About the Calendar

How to Use the Calendar

In This Section:

- Terminology
- About Courses
- About Programs of Study

The Academic Calendar is a Faculty of Arts & Science document that houses the most current information on the degrees, programs, and courses offered, as well as rules and regulations. The Academic Calendar is published once a year in early to mid-May, with updates from then on only for urgent unexpected changes or corrections.

Much of the information in the Calendar will be reflected elsewhere: for example, course descriptions can also be found on the Faculty Timetable, and a breakdown of completion of programs of study – and the degree – can be found on Degree Explorer.

The information in the Academic Calendar is broken up into sections, and programs and courses are organized in pages dedicated to the various programs of study or by the academic units that offer programs and courses. The Academic Calendar can be browsed using the Course Search and Program Search pages, or read as a kind of “book” by using the Adobe PDF version.

Terminology

Throughout the sections of the Calendar that deal with rules and concepts, definitions will be offered to clarify what specific terms mean in the context of study here at the Faculty of Arts & Science.

Conventions

Certain conventions are useful in reading parts of the Calendar that deal with requirements, whether for courses (prerequisites, corequisites, recommended preparation) or programs.

- Commas (,) and semi-colons (;) indicate items in a list. Context indicates whether the list is of options a student can pick from, or whether it is a list of courses where a student is expected to take all of them. If not stated specifically, assume the list indicates that a student must take all options.
- The plus sign (+) means “and” but may be used as a strong “and” to indicate courses that are paired to be a single option or requirement.
- A forward slash (/) means “or” and distinguishes multiple options to fulfil a specific requirement.
- Parentheses ( ) or brackets [ ] identify courses that are grouped together to form a specific option or requirement.
- “Credit” or “Credits” = Full Course Equivalents/FCE

Example 1: Cell and Molecular Biology Specialist – First Year Requirements

- First Year: BIO120H1, BIO130H1; (CHM135H1, CHM136H1)/(CHM138H1, CHM139H1)/ CHM151Y1; JMB170Y1/(MAT135H1, MAT136H1)/ MAT137Y1/ MAT157Y1/(PHY131H1, PHY132H1)/(PHY151H1, PHY152H1)

This text explains that there is a series of course requirements needed for first year, but within these there are options. Going from the beginning, this means:

- BIO120H1 and BIO130H1 are both required.
- There is a Chemistry (CHM) requirement, which is filled either by:
  - CHM135H1 and CHM136H1; or
  - CHM138H1 and CHM139H1; or
  - CHM151Y1.
- There is also a Math or Physics requirement, filled either by:
  - JMB170Y1; or
  - MAT135H1 and MAT136H1; or
  - MAT137Y1; or
When Questions Arise

These style conventions help the academic units offering programs try to list the options in a concise way. For any clarification, reach out to the Department or academic unit directly, a College Registrar’s Office, or the Faculty directly at ask.artsci@utoronto.ca.

About Courses

While it is almost self-explanatory, a course is an academic activity that lets a student obtain a result which is recorded on the academic history – and if passed, normally gives academic credit towards completing a degree and may help complete a program of study. There are “full” (Y) and “half” (H) courses each with a different credit weight.

Elements of a Course Description

Below are the fields in the course description template. Links to existing courses as examples are included to help show how the template works.

Course Code

This is the unique identifier of every course, used not only here in the Academic Calendar but used by the information systems like ACORN and Degree Explorer, ensuring that any action taken involving a course – from a student enrolling in it to an instructor submitting final marks – is done correctly.

The course code breaks down further into these sections:

<table>
<thead>
<tr>
<th>Element</th>
<th>Examples</th>
<th>Explanation</th>
</tr>
</thead>
<tbody>
<tr>
<td>Course Code</td>
<td>CIN105Y1, PPG301H1</td>
<td>This three-letter designator identifies the program offering the course. In these examples, CIN and PPG refer to these two programs: Cinema Studies; and Public Policy &amp; Governance.</td>
</tr>
<tr>
<td>Course Designator</td>
<td>CIN, PPG</td>
<td></td>
</tr>
<tr>
<td>Course Number</td>
<td>105, 301</td>
<td>Every course in a program has its own identifying digits. For-credit courses run from “100-level” (starting with a 1) all the way to “400-level” (starting with a 4), and as they go up, broadly they indicate more advanced or more focused study. The “level” does not restrict student access. For example, a third-year student could take 100- to 400-level courses, but a first-year student should be careful taking 200- or high-level courses.</td>
</tr>
<tr>
<td>Course Weight</td>
<td>Y (1.0), H (0.5)</td>
<td>This is only one of two letters, either a “Y” or an “H”: a “Y” indicates the course is a “full course” and is worth 1.0 credit; an “H” indicates a “half course” and is worth 0.5 credit.</td>
</tr>
<tr>
<td>Campus Indicator</td>
<td>1</td>
<td>This digit indicates the campus where the course is offered. In the Arts &amp; Science Academic Calendar, normally a course has a “1” (one), indicating the downtown St. George Campus. Other indicators include a “0” (zero) meaning it is taught off-campus, a “3” (three) meaning it is taught at U of T Scarborough, or “5” (five) meaning it is taught at U of T Mississauga.</td>
</tr>
</tbody>
</table>

Course Title

Indicates the topic and theme of the course. Some courses may have a general title of a “topics course” in the Academic Calendar but the actual course content varies year by year; in such a case, seek out the department or program’s website, or the Timetable offerings, to learn more about what will be offered. Course titles, when they appear on the transcript, are abbreviated.

Types of Instruction (Lecture/Tutorial/Practical/Seminar Hours (L/T/P/S))

All courses comprise a certain number of hours dedicated to instruction, and there are four types. Often courses may have more than one.

- **Lectures** are standard in almost every course as the fundamental type of instruction, where the instructor will present course content to students. All instructors have individual styles and approaches to lectures. For example, some instructors may take questions differently or present slides/visual aids differently.
- **Tutorials** are smaller group meetings where students can discuss and ask questions about lecture material with either the instructor or (more often) a TA (tutorial assistant). Tutorials may also be used for some kinds of evaluation, like small quizzes or to be assessed
on a student's participation in the course. Like practicals, tutorials always are part of a course that has either lectures or seminars (see below).

- **Practicals** involve students being able to learn and apply their learning hands-on, for example, laboratories ("labs") for science courses. If a course has practicals, then it always has either lectures or seminars (see below).
- **Seminars** are a small-class experience, common for very advanced courses, where the in-class process is a combination of some lecturing mixed with structured class discussion and often student presentations.

In brackets after the title, the number of hours that students will spend in lecture (L), in tutorial (T), in practical sessions (P), or seminar (S) for the course are listed. These are most often a multiple of 12, as the term is 12 weeks in length.

### Calendar Description

This paragraph highlights the course content and themes to be delivered in the course. Anything special about the course, from special aspects of the class experience (for example, language of study or field work), to the intended audience of the course (for example, a science course intended for non-science students as an elective), to any special ancillary fees (for example, lab material) are also listed here.

### Prerequisites, Co-requisites, Recommended Preparation

These fields indicate other courses which a student either has to have completed before taking the course in question (prerequisites), sometimes with a minimum grade; courses a student should be taking at the same time as this course (co-requisites), though they can also have completed it before; or courses they are advised to take (recommended preparation). The academic units that offer a course can remove students who do not have needed prerequisites or corequisites at any time, though they usually try to do so near the beginning of the course to allow students to try and quickly add something else. Still, students are responsible for reviewing this information for their course planning.

### Exclusions

Some courses overlap in content. This can be because the same kind of material may be offered in the context of different areas of study (like introductory statistics), or because there may be certain similar course material that is offered at different levels of difficulty, or because some courses have content that used to be offered in an older and now "retired" course. When reading a course description, if a student sees a course listed under "exclusions" that includes a course they already have credit for, they should not normally take this course. Departments or program offices can remove students who have course exclusions, and even if they choose not to, the new course will not count for degree credit and will be marked "Extra".

### Breadth Requirement

Almost all courses are categorized in terms of one of the five breadth requirement categories:

- 1 (Creative and Cultural Representations)
- 2 (Thought, Belief, Behaviour)
- 3 (Society and Its Institutions)
- 4 (Living Things and Their Environment)
- 5 (Physical and Mathematical Universes)

Half-courses offer 0.5 credits towards only one of the categories; full-courses offer either 0.5 credits in two different categories, or 1.0 credit in one.

### Distribution Requirements (old)

Courses still list what is called the “distribution requirement” which normally categorizes a course as either Science, Social Science, Humanities, or a combination thereof. (In rare cases, there may be no category assigned.) This is only of interest to students who started their degree before September 2010.

### About Programs of Study

All degrees awarded by the Faculty of Arts & Science require and are defined by the program(s) of study a student completes as a degree requirement. These programs identify the subject area(s) the student has pursued and completed. A program of study is a sequence of courses in certain areas, normally with some choice of options within the sequence.

### Elements of a Program Description

Programs of study can be searched directly using the Program Search. Programs of study usually fall under a page dedicated to the department or academic unit that sponsors the program, but sometimes on their own page if they are very distinct from the usual programs that unit offers. Usually the program information is divided up this way:
• **Description** (optional) – A small bit of text to indicate what is notable about this program and why a student might select it as part of their academic or professional plans.

• **Enrolment requirements** – This describes what requirements, if any, a student must meet to enter the program. A program can be entered only if a student has obtained 4.0 credits or is on track to doing so before the start of the next September.

• **Completion requirements** – This lays out – often year by year – the courses a student must complete to complete the program itself. This information is translated for use in [Degree Explorer](#) tool to help a student track their progress and plan future courses.

• **Notes** (optional) – If either the enrolment requirements or the completion requirements need some clarification, there may be special notes inserted in either area.

• **Course Groups** (program dependent) – Many programs, especially programs that can recognize a selection from a number of courses from many other departments to fulfil program requirements, will list courses grouped by category.

### Specialist, Major, and Minor Programs of Study

Programs offered by the Faculty that may be used to complete a degree can have the status of a Specialist, Major, or Minor.

- **Specialist** programs (from 10.0 to 14.0 credits to complete) offer the deepest and most extensive study of the subject matter in question, and almost always represents the key area of degree studies.

- **Major** programs (from 6.0 to 8.0 credits to complete) offer a comprehensive study of the subject matter, and may be the primary area of degree studies, complemented with another Major or some Minor programs.

- **Minor** programs (4.0 credits to complete) offer a fundamental study of the subject matter and complement degree studies where a Major or a Specialist is also being pursued.

For more information on what combination of programs of study ensure completion of a degree, and the allowable combinations of programs of study, refer to the [HBA/HBSc](#) or [BCom](#) Degree Requirements.

### Open and Limited Programs

Programs in the Faculty of Arts & Science are either open or limited; in the Academic Calendar, the enrolment requirements section of each program will specify the program type.

*Open* programs have no enrolment requirements except the completion of 4.0 credits. The enrolment requirements section for an open program may contain additional information that is useful for a student to know prior to enrolling the program.

*Limited* programs have enrolment requirements in addition to the completion of 4.0 credits. These enrolment requirements are broken down in the following ways:

- **Completed courses (with minimum grades)**
  - For reasons of academic success, entry into the program relies on students having completed one or more specific courses, normally with a specific grade beyond a pass (50%).

- **Variable Minimum Grade or Variable Minimum Grade Average**
  - Limited programs with this requirement are in very high demand, and every year the program must establish a specific minimum grade (or a minimum average grade across multiple courses) based on how many students have applied and how many of the limited spaces are available. As such, this minimum changes each year and it is not possible to publish a guaranteed minimum.
  - Some programs may identify a minimum grade or minimum grade average that is required in order to ensure students’ success in the program, however obtaining this minimum final grade or minimum grade average does not guarantee admission to the program.

- **Special**
  - Any requirement listed as “special” is a requirement that is beyond courses completed and grades achieved; for example, a supplementary application, or audition.

### Streams

Both Specialist and Major programs of study may be categorized by different streams, and each stream represents a way to complete a specialist or major with a special emphasis within the area of study. Often the difference between a stream and other streams in the same area of study, or between a stream and the general Specialist or Major, shows itself in upper-year courses, while the courses usually taken in first or second year are similar across all the streams. Streams are presented in the Academic Calendar like a distinct program of study.

### Focuses

When focuses exist in an area of study, they are normally taken in conjunction with a Specialist or Major, and they allow a student to select, among the course choices they have, a special cluster of course options that all contribute to deeper study of a particular theme, topic, or sub-discipline within the area of study. Focuses are normally not mandatory and are there to enhance how a student plans the completion of their programs, but if completed, a focus will show on a student’s transcript.
Certificates

The University has three categories of “certificates”, but the Arts & Science Academic Calendar only includes those that may be applied for and completed using undergraduate courses while pursuing a degree. The intent of certificates is to allow students to study a cluster of courses related in topic or which otherwise connect with one another in a way that normally uses both courses within their programs and outside their programs. It is important to note that while the word “certificate” is used, in this context it refers to a very small sequence of courses (fewer courses than a Minor) with an area of study; these certificates do not offer any kind of professional certification.

Language Citation

This is a special recognition available at the Faculty of Arts & Science that shows advanced study of a language. The Language Citation will consist of a notation on the transcript that reads: “Completed Requirements of Language Citation in [name of language].” This notation will appear in the Faculty of Arts & Science sessional segment of the student’s academic record on the transcript listing the courses and marks for the session in which the Citation is assessed as complete. Note that Language Citation is not a program, and will not contribute toward the program(s) required to complete the degree.

The list below identifies the academic units that offer a Language Citation. For details, including the languages in which students may achieve a Citation, see the relevant entries in this Calendar.

- Classics
- East Asian Studies
- French
- Germanic Languages & Literatures
- Indigenous Studies
- Italian Studies
- Near & Middle Eastern Civilizations
- Portuguese
- Slavic Languages & Literatures
- Spanish

How the Calendar Changes

The Academic Calendar, at its core, is the official record of the curriculum of the Faculty as approved by the Faculty: all the courses, programs, and degrees offered, and policies and rules around academic life. This information serves other student websites and resources, including the Timetable and Degree Explorer.

The Academic Calendar is published every twelve months, and includes any changes that were approved in the previous twelve months. Changes can be small, like a change to a course title or description, but can also include new courses, changes to program requirements, and even new programs or retired programs. All approved changes will have gone through planning, consultation, and official approval before being published.

When does the information in the Academic Calendar come into effect?

As of April 2019, when a new Academic Calendar is published in May, all the information normally comes into effect in the September after publication. This means students can rely on any Academic Calendar’s information lasting from September through to the end of the following August.

For example: the information in 2020–2021 Academic Calendar comes into effect September 2020. Students already following the 2019–2020 Academic Calendar continue to do so through the Summer of 2020 but can use the new Calendar to begin planning their courses for Fall/Winter (2020-21) course enrolment and for program enrolment in the Spring of 2021.

Specifically, when it comes to any new information regarding courses, programs of study, or degrees offered, this means:

- Any new courses or changes to courses in a new Calendar do not take effect until September, so courses in the Summer are from the previous Calendar and follow those rules. As an example: the changes to courses or new courses in the 2020–2021 Academic Calendar do not start until September 2020, in the 2020–2021 Fall/Winter session.
• Changes to programs of study – either to rules on how to enrol in the program or to complete the program – take effect the following Summer. So any changes in the 2020–2021 Academic Calendar apply to students who enroll in the Spring/Summer of 2021 (allowing the 2020–2021 Fall/Winter session to prepare and plan).

• Changes to degree requirements take effect for students entering the Faculty in September. So students who start their studies in September 2020 follow the rules for their degree requirements in the 2020–2021 Academic Calendar.

This applies not only to changes to the curriculum – to degrees, programs of study, and courses – but also to rules and policies.

Exceptions

There are three different situations where new information in a new Calendar may come into effect right away or as of the start of the Summer academic session (i.e., starting May).

• Changes to Ancillary Fees – Some courses may charge a special fee to students in the course to offset the cost of specific course materials (for example, lab coats for certain science courses with laboratory work). Fees operate on a different cycle and, if they are changed, this takes effect starting in summer courses. So be sure to note, when using any Academic Calendar, that ancillary fees listed can change in the Summer at the end of that Calendar’s cycle.

• Special or urgent changes to courses/programs/degrees – If for any reason there is a change to course/programs that are urgently needed, or which are shown to only benefit students if they come into effect right away, these can take effect as of the Summer Session when the new Calendar is published. If this is true, the Academic Calendar will be annotated to make special note.

• Changes that affect prospective students in high school – Students planning to attend the University of Toronto and the Faculty of Arts & Science are expected to follow the Academic Calendar published ahead of their first classes in September. But if any change in the Academic Calendar could significantly impact the planning for students in their last year of high school/secondary school, such changes may be published but be delayed by a year (or more) in taking effect, to allow time for students to adjust their studies before coming to the University of Toronto and the Faculty of Arts & Science.

Governing Structure of the Faculty of Arts & Science

The Arts & Science Council

The Arts & Science Council is the governing body in the Faculty of Arts & Science. The Council is composed of elected members from the Faculty’s undergraduate and graduate students, teaching staff, administrative and technical staff, and normally meets six times per year. It approves policy for the Faculty in the areas of admissions, curriculum development, evaluation and academic standing, and determines the Faculty’s academic rules and regulations. Budgetary and administrative matters are not within the purview of Council; those responsibilities lie with the Dean of the Faculty.

The Council has several Standing Committees charged with specific responsibilities to formulate policy and to apply it in specific cases. Those committees are: Undergraduate Curriculum Committees, Graduate Curriculum Committee, Committee on Standing (petitions), Academic Appeals Board, and the Committee on Admissions. There is also an Agenda Committee which oversees the business conducted at each meeting of Council, and which can, in extreme cases, approve items when Council is unavailable and when urgency demands it.

Details on the Council and its sub-committees, along with the Constitution and By-Laws, rules for elections, meeting dates and agendas can be found on the Faculty's Governance website.

Elections to Council and its Committees

Elections to fill the positions on the Arts & Science Council and its committees are held in the Spring for the following year’s Council and committees. The exception is the election of First-Year representatives, held early in the Fall Term; this time may also be used to fill any seats still empty after the previous Spring.

Notification of the nomination and election dates, as well as nomination forms, will be available on the Faculty's Governance website.

University and Faculty Leadership

Governing Council & the University of Toronto Senior Leadership

Governing Council of the University of Toronto, established in 1971, oversees the business of the University – its academic programs and planning, its business and finances, and the support for student community.

Governing Council, with this mandate, works closely with senior administrative leadership, including the University’s Chancellor, the President, Vice-Presidents, the Provost and Vice-Provosts.
More about this leadership is available at the following web pages:

- governingcouncil.utoronto.ca – For information not only on Governing Council, but the various boards and committees that report to it. There is also a link to the University’s policies.
- president.utoronto.ca – For more information about the current President, Meric Gertler, and his priorities in leading the University.
- utoronto.ca/about-u-of-t – This page introduces you to the senior leadership of the University, with links to small bios to learn about each member.
- provost.utoronto.ca – This page introduces the Vice-President and Provost and lists the many Vice-Provosts and their areas of work to support University life.

Arts & Science Council & Officers of the Faculty of Arts & Science

Faculty of Arts & Science Council, unlike Governing Council for the University, only oversees academic policy and curriculum in the Faculty of Arts & Science. The Dean of Arts & Science manages the business and financial side of Arts & Science, supported by Vice-Deans, Associate Deans and senior administration. The Dean’s Office, along with the Office of the Faculty Registrar, and the senior administration of the seven Colleges work closely with student groups and individual students to support communities of learning and engagement.

More information is available at the following websites:

- artsci.utoronto.ca/about/governance – These pages tell you more about Arts & Science Council, its Standing Committees, and its past and current business.
- artsci.utoronto.ca/about/glance/leadership-team/dean-faculty-arts-science – This page tells you more about the current Dean of Arts & Science.

Faculty Officers for July 1, 2020 - June 30, 2021. (Academic appointment terms begin July 1 of a given year.)

<table>

The Learning Experience

Language of Instruction

The default language of instruction in any course is English. If any course is taught in another language – for example, courses studying another language – then that is clearly stated either in the notes for that department/program, or in the course description.

Academic Sessions and Terms

There are two Academic Sessions at the Faculty of Arts & Science.

- The Fall/Winter Session runs from September to April and is divided into two terms: First (September to December) and Second (January to April).
Each term of the Fall/Winter is comprised of 12 weeks for classes/lectures (thus, 24 weeks in total for the Session) and includes days for study break and for Faculty final exams (also called the Exam Period). Some courses, normally full (1.0 credit) courses, run the full 24 weeks from September to April; normally half-courses (0.5 credit) run in the Fall or Winter term. In some cases, courses may repeat and be offered in the Fall and the Winter.

- Enrolment for an upcoming Fall/Winter normally begins in early July.

- **The Summer Session** runs from May to August (with a total of 12 weeks possible for course content) and has two short terms, a “First” and “Second”.
  - The first term runs from early May to mid-June, the other from early July to mid-August. Days are also allotted for exam preparation and for writing exams. Because of this compressed time period, many courses have double the normal lectures/tutorials in any week, and so the limit on the number of classes a student can take in the Summer is lower.
  - Enrolment for an upcoming Summer session normally begins in early March.

When a student enrolls in a course in any session, they are normally expected to be available from the start of classes all the way through to the end of the Session, which is the last day of the final exam period.

**Course Offerings**

The Academic Calendar is the complete document of all the degrees, programs of study, and courses offered by the Faculty of Arts & Science. But note that each academic unit reserves the right not to offer every course every academic year. Every effort, however, is made to ensure that core mandatory courses are offered reliably every year, and in many cases, more than once through an academic year. See [How to Use the Calendar](#) to learn more about what the Academic Calendar can tell you about the experience and expectations in any course offering.
Degree Requirements (H.B.A., H.B.Sc., BCom)

In this section:

- Honours Bachelor of Arts (HBA)/Honours Bachelor of Science (HBSc) Requirements
- Bachelor of Commerce (BCom) Requirements

HBA/HBSc Requirements

Degree Requirements:
Honours Bachelor of Arts (HBA)/Honours Bachelor of Science (HBSc)

Thought, Belief, and Behaviour 3. Society and Its Institutions 4. Living Things and Their Environment 5. The Physical and Mathematical Universes</td>
</tr>
</tbody>
</table>

To qualify for an Honours Bachelor of Arts (HBA) or Honours Bachelor of Science (HBSc), a student must:

a) Obtain standing (i.e., complete with a mark of 50% or higher/P/CR) in at least 20.0 credits that meet the following criteria:

- At least 13.0 credits at the 200+ level, including a minimum of 6.0 credits at the 300+ level. No more than 1.0 credit at the 300+ level in transfer credit may be counted towards the minimum number of 300- and 400-level credits, except transfer credits attained through a University of Toronto exchange program.
- At least 10.0 credits from Faculty of Arts & Science courses. Note that transfer credits attained through a University of Toronto exchange program contribute to this 10.0 credits minimum.
- No more than 15.0 credits may have the same three-letter designator (“AST”, “ENG”, etc.). Courses beyond this limit will not be included in the 20.0 credits required for the degree, but will be counted in all other respects.

b) Complete one of the following:

- One Specialist program (which includes at least 1.0 credit at the 400-level), or
- Two Major programs, which must include at least 12.0 different credits, or
- One Major and two Minor programs, which must include at least 12.0 different credits

Whether a student receives an HBA or HBSc depends on the programs that are completed; see Program Requirements.

c) Complete the Arts & Science Breadth Requirement.

d) Obtain a Cumulative GPA of 1.85 or more by the time of graduation. Students who meet all the requirements for the HBA/HBSc except for the GPA requirement may elect to graduate with a Bachelor of Arts/Bachelor of Science degree provided that their final Cumulative GPA is between 1.5 and 1.84.
Program Requirements

Completion of one or more programs is only one part of the general degree requirements. Variations made in program details for individual students do not in any way affect degree requirements. Programs are groupings of courses in one or more disciplines.

Programs of Study are one of:

- **Specialist** Program: a sequence of between 10.0 and 14.0 credits in one or more disciplines (note that some interdisciplinary Specialist programs may require up to 16.0 credits). Specialist programs must include at least 4.0 credits from 300+ series courses, of which 1.0 credit must be at the 400-level.
- **Major** Program: a sequence of between 6.0 and 8.0 credits in one or more disciplines. Major programs must include at least 2.0 credits from 300+ series courses, of which one 0.5 credit must be at the 400-level.
- **Minor** Program: a sequence of 4.0 credits in one or more disciplines. Minor programs must include at least 1.0 credit at the 300+ level.

Please note:

Some courses included as program options may have prerequisites as requirements not listed in the program but which must be taken. Programs which list optional courses do not necessarily list their prerequisites. Students are responsible for fulfilling prerequisites; students enrolled in courses for which they do not have the published prerequisites may have their registration in those courses cancelled at any time without warning.

Students are required to:

- Enrol in at least one and no more than three programs (of which only two can be Majors or Specialists), in the session in which they pass the course that brings them to a total of 4.0 credits. See the Arts & Science Program Toolkit for details. Students admitted with transfer credit for 4.0 credits or more must enrol in programs immediately upon admission.
- Meet any enrolment requirements for a program as stated in the Calendar.
- The programs(s) completed determine whether a student receives the Honours Bachelor of Science (HBSc) or the Honours Bachelor of Arts (HBA) degree upon graduation. Each program entry lists the type of degree it leads to. For example, in the English section, the English Specialist listing is followed by “Arts program”; in the Mathematics section, the Math Major is followed by “Science program”, etc. A student completing one Specialist in an Arts area would receive the HBA; a student completing one Specialist in a Science area would receive the HBSc.

For program combinations that include more than one area (Arts and Science), the following applies:

- A student completing one Major in a Science area and one Major in an Arts area has a choice of either the HBSc or the HBA.
- In combinations of one Major and two Minors, the type of degree depends on the areas of the three programs. For example, if the Major is in a Science area and the two Minors are in Arts areas (or vice versa), the student has a choice of either the HBSc or the HBA. If the Major and one Minor are in Science areas and the other Minor is in an Arts area, the student would receive the HBSc. Similarly, if the Major and one Minor are in Arts areas and the other Minor is in a Science area, the student would receive the HBA.
- A student completing one Specialist in a Science area and an additional Major in an Arts area (or vice versa) has a choice of either the HBSc or the HBA.
- Students enrolled in either two Majors or one Major and two Minors must ensure they have a minimum of 12.0 different credits between the programs.

For example:

- For a student enrolled in the Physiology Major (8.0 credits) and the Biology Major (8.0 credits):
  - In order to meet the 12.0 different credit requirement, they may have up to 4.0 overlapping credits between their Majors (8.0 + 8.0 = 16.0; 16.0 – 12.0 = 4.0).
  - These two programs contain 3.0 core credits in common: (BIO120H1 and BIO130H1), (CHM135H1 and CHM136H1), and (BIO220H1 and BIO230H1). Therefore, they may take up to 1.0 more overlapping credit between the majors. In short, 8.0 for PSL + 8.0 for BIO = 16.0 credits; 16.0 credits - 12.0 different credits = 4.0 credits overlapping allowed.

- For a student enrolled in the Economics Major (7.0 credits) and the Statistics Major (6.5 credits):
  - In order to meet the 12.0 different credits requirement, they may have up to 1.5 overlapping credits between their Majors (7.0 + 6.5 = 13.5; 13.5 – 12.0 = 1.5).
  - They take (MAT135H1 and MAT136H1) and (STA257H1 and STA261H1) (2.0 credits total) towards both programs. Since they have exceeded the 1.5 credits overlap limit by 0.5, they must take an additional 0.5 credit towards one of the Majors so that they will have 12.0 different credits between them.
Self-Designed Programs

In rare circumstances, a student may propose to design their own program, which must be substantially different from any program in this Calendar. Such cases are exceptional. Such a program, if formally adopted by the student’s College on the basis of its academic rigour and coherence, and if approved by the Office of the Dean, will be accepted as fulfilling the degree requirement for certification in a program (transcripts indicate only “Completed Self-designed Program approved by ‘X’ College”). Since the approval process is necessarily a long one, students following this alternative must discuss this process with their College Registrar immediately after completion of 4.0 credits in the Faculty.

Breadth Requirement

The purpose of the Breadth Requirement is to ensure all students graduating with a degree from the Faculty of Arts & Science have chosen courses across a broad range of subject areas in the Faculty as part of their undergraduate education.

The five Breadth Requirement Categories are:

1. **Creative and Cultural Representations**
   An appreciation for the diversity of cultural products, their meanings, and their socio-historical contexts through exposure to works in a variety of media and forms. Courses in this category focus on creative products and cultural expression, engaging students in activities such as the reading of texts, the learning of languages, and the study of art, film or oral traditions. These courses would normally focus on the conditions through which such works are produced, on their various interpretations in societal context, and on the ways in which those interpretations may have changed over time.

2. **Thought, Belief, and Behaviour**
   Familiarity with investigations of the mind and individual behaviour, and the formation and function of systems of meaning, belief, and communication. These courses explore the ways in which the mind perceives reality and makes sense of both the human and natural world. Their content may focus on the creation of meaning and the ways in which belief systems are sustained and reproduced, as well as on the communication of meaning through language and other symbolic systems. Many courses falling into this category centre upon understanding collective belief and the nature of human thought, and the ways in which these shape societal behavior and norms.

3. **Society and Its Institutions**
   Knowledge of societal organization, institutions, and systems, the ways they change over time, and the theories and models used to understand them. These courses include not only the study of social, economic and political systems, but also the ways in which humans arrange their built environments and manage environmental systems to meet their own needs. They will typically explore the social networks and systems that organize human lives and modify their environments. Courses in this category will generally approach these issues using social science methodologies and/or historical and critical analyses. Courses may also situate the issues explored in relation to relevant social theory (or theorists), models, or approaches to understanding societal problems.

4. **Living Things and Their Environment**
   A grasp of the principles and concepts of life and the relation between organisms and their natural surroundings, and the ability to make and evaluate observations about living things. This category includes courses broadly from the biological and environmental sciences, which develop an understanding of the study of life and its contexts; levels of organization range from molecules to the biosphere. Courses will cultivate an understanding of scientific methodology (the formulation of hypotheses, experimental design, and quantitative analysis methods), its application in the life sciences, and its limits in providing answers concerning biological and environmental questions.

5. **The Physical and Mathematical Universes**
   An understanding of theories of the physical world and mathematical models, and the ability to apply them and to make and evaluate observations relating to them. Courses in the physical sciences study the constituents and mechanisms that govern the natural world, with an emphasis on non-living systems. Such courses develop an understanding of scientific methodology (the formulation of hypotheses, experimental design, and quantitative analysis methods), its application and its limits.

The Breadth Requirement can be completed in one of two ways:

- at least 1.0 credit in each of 4 of the 5 categories, or
- at least 1.0 credit in each of any 3 of the 5 categories, and at least one 0.5 credit in each of the other 2 categories.

Most courses in the Faculty of Arts & Science are classified into five Breadth categories by subject content. A few courses do not have a Breadth Requirement assigned and therefore do not count toward this degree requirement. Students may count towards the Breadth Requirement any course which has a Breadth designation, and in which they have achieved standing (a grade of 50% or higher/P/CR), including courses completed toward program (Specialist, Major, Minor) requirements. Courses that have been designated Extra can contribute toward the Breadth Requirement.

A course’s Breadth designation can be found following the course description in the Calendar for the year in which the course is taken; in the instance where a course does not have a Breadth category, the Breadth Requirement will not appear in the course description.
For example:

**HIS103Y1 Statecraft and Strategy: An Introduction to the History of International Relations [48L/20T]**
An analysis of the development of the international system, from 1648 to 1945, which highlights the role of war as an instrument of national policy, as a determinant of the system of states and as a threat to international society.
Exclusion: any 100-level HIS course, with the exception of AP, IB, CAPE, or GCE transfer credits.
Breadth Requirement: Society and its Institutions (3)

HIS103Y1 counts as 1.0 credit in Category 3 (Society and Its Institutions).

**ENG215H1 The Canadian Short Story [36L]**
An introduction to the Canadian short story, this course emphasizes its rich variety of settings, subjects, and styles.
Prerequisite: 1.0 ENG credit or any 4.0 credits
Breadth Requirements: Creative and Cultural Representations (1)

ENG215H1 counts as one 0.5 credit in Category 1 (Creative and Cultural Representations).

**ANT100Y1 Introduction to Anthropology [48L/12T]**
Society and culture from various anthropological perspectives: socio-cultural, biological, archaeological, and linguistic.
Breadth Requirements: Living Things and Their Environment (4)
Society and Its Institutions (3)

ANT100Y1 counts as one 0.5 credit in Category 3 (Society and Its Institutions) and one 0.5 credit in Category 4 (Living Things and Their Environment).

### BCom Requirements

To qualify for a Bachelor of Commerce (BCom) degree, a student must:

a) Obtain standing (i.e., complete with a mark of 50% or higher/P/CR) in at least 20.0 credits that meet the following criteria:

- At least 13.0 credits at the 200+ level, including a minimum of 6.0 credits at the 300+ level. No more than 1.0 credit at the 300+ level in transfer credit may be counted towards the minimum number of 300- and 400-level credits, except transfer credits attained through a University of Toronto exchange program.
- At least 10.0 credits in Faculty of Arts & Science courses. Note that transfer credits attained through a University of Toronto exchange program contribute to this 10.0 credits minimum.
- No more than 15.0 credits may have the same three-letter designator (“AST”, “ENG”, etc.). Courses beyond this limit will not be included in the 20.0 credits required for the degree, but will be counted in all other respects.
b) Complete one of the following program requirements: Specialist in Accounting, Specialist in Finance and Economics, or Specialist in Management

c) Complete the Arts & Science Breadth Requirement;

d) Achieve a cumulative GPA of 1.85 or more by the time of graduation.

Program Requirements

Completion of one or more programs is only one part of the general degree requirements. Variations made in program details for individual students do not in any way affect degree requirements. Programs are groupings of courses in one or more disciplines.

Programs of Study are one of:

- **Specialist** Program: a sequence of between 10.0 and 14.0 credits in one or more disciplines (note that some interdisciplinary Specialist programs may require up to 16.0 credits). Specialist programs must include at least 4.0 credits from 300+series courses, of which 1.0 credit must be at the 400-level.

- **Major** Program: a sequence of between 6.0 and 8.0 credits in one or more disciplines. Major programs must include at least 2.0 credits from 300+series courses, of which one 0.5 credit must be at the 400-level.

- **Minor** Program: a sequence of 4.0 credits in one or more disciplines. Minor programs must include at least 1.0 credit at the 300+level.

Please note: Some courses included as program options may have prerequisites as requirements not listed in the program but which must be taken. Programs which list optional courses do not necessarily list their prerequisites. Students are responsible for fulfilling prerequisites; students enrolled in courses for which they do not have the published prerequisites may have their registration in those courses cancelled at any time without warning.

Students are required to:

- Enrol in at least one and no more than three programs (of which only two can be Majors or Specialists), in the session in which they pass the course that brings them to a total of 4.0 credits. Bachelor of Commerce students complete either the Specialist in Accounting, Specialist in Finance and Economics, or Specialist in Management and can enrol in Major or Minor programs in other disciplines as well.

- Meet any enrolment requirements for a program as stated in the Calendar.

Self-Designed Programs

In rare circumstances, a student may propose to design their own program, which must be substantially different from any program in this Calendar. Such cases are exceptional. Such a program, if formally adopted by the student’s College on the basis of its academic rigour and coherence, and if approved by the Office of the Dean, will be accepted as fulfilling the degree requirement for certification in a program (transcripts indicate only “Completed Self-designed Program approved by ‘X’ College”). Since the approval process is necessarily a long one, students following this alternative must discuss this process with their College Registrar immediately after completion of 4.0 credits in the Faculty.

Breadth Requirement

The purpose of the Breadth Requirement is to ensure all students graduating with a degree from the Faculty of Arts & Science have chosen courses across a broad range of subject areas in the Faculty as part of their undergraduate education.

The five Breadth Requirement Categories are:

1. **Creative and Cultural Representations**
   An appreciation for the diversity of cultural products, their meanings, and their socio-historical contexts through exposure to works in a variety of media and forms. Courses in this category focus on creative products and cultural expression, engaging students in activities such as the reading of texts, the learning of languages, and the study of art, film or oral traditions. These courses would normally focus on the conditions through which such works are produced, on their various interpretations in societal context, and on the ways in which those interpretations may have changed over time.

2. **Thought, Belief, and Behaviour**
   Familiarity with investigations of the mind and individual behaviour, and the formation and function of systems of meaning, belief, and communication. These courses explore the ways in which the mind perceives reality and makes sense of both the human and natural world. Their content may focus on the creation of meaning and the ways in which belief systems are sustained and reproduced, as
well as on the communication of meaning through language and other symbolic systems. Many courses falling into this category centre upon understanding collective belief and the nature of human thought, and the ways in which these shape societal behavior and norms.

3. **Society and Its Institutions**
Knowledge of societal organization, institutions, and systems, the ways they change over time, and the theories and models used to understand them. These courses include not only the study of social, economic and political systems, but also the ways in which humans arrange their built environments and manage environmental systems to meet their own needs. They will typically explore the social networks and systems that organize human lives and modify their environments. Courses in this category will generally approach these issues using social science methodologies and/or historical and critical analyses. Courses may also situate the issues explored in relation to relevant social theory (or theorists), models, or approaches to understanding societal problems.

4. **Living Things and Their Environment**
A grasp of the principles and concepts of life and the relation between organisms and their natural surroundings, and the ability to make and evaluate observations about living things. This category includes courses broadly from the biological and environmental sciences, which develop an understanding of the study of life and its contexts; levels of organization range from molecules to the biosphere. Courses will cultivate an understanding of scientific methodology (the formulation of hypotheses, experimental design, and quantitative analysis methods), its application in the life sciences, and its limits in providing answers concerning biological and environmental questions.

5. **The Physical and Mathematical Universes**
An understanding of theories of the physical world and mathematical models, and the ability to apply them and to make and evaluate observations relating to them. Courses in the physical sciences study the constituents and mechanisms that govern the natural world, with an emphasis on non-living systems. Such courses develop an understanding of scientific methodology (the formulation of hypotheses, experimental design, and quantitative analysis methods), its application and its limits.

The Breadth Requirement can be completed in one of two ways:

- at least 1.0 credit in each of 4 of the 5 categories, or
- at least credit in each of any 3 of the 5 categories, and at least one 0.5 credit in each of the other 2 categories.

Most courses in the Faculty of Arts & Science are classified into five Breadth categories by subject content. A few courses do not have a Breadth Requirement assigned and therefore do not count toward this degree requirement. Students may count towards the Breadth Requirement any course which has a Breadth designation, and in which they have achieved standing (a grade of 50% or higher/P/CR), including courses completed toward program (Specialist, Major, Minor) requirements. Courses that have been designated Extra can contribute toward the Breadth Requirement.

A course’s Breadth designation can be found following the course description in the Calendar for the year in which the course is taken; in the instance where a course does not have a Breadth category, the Breadth Requirement will not appear in the course description.

Society and culture from various anthropological perspectives: socio-cultural, biological, archaeological, and linguistic.
**Breadth Requirements:** Living Things and Their Environment (4)
Society and its Institutions (3)

ANT100Y1 counts as one 0.5 credit in Category 3 (Society and its Institutions) and one 0.5 credit in Category 4 (Living Things and Their Environment).
Rules and Regulations

Academic Record

In This Section

- Grading and Course Marks
- Grade Point Average
- Assessment of Academic Standing
- Recognition of Academic Achievement (Including Dean’s List Scholar, Distinction and High Distinction, and Faculty of Arts & Science Scholarships)

Grading and Course Marks

Marks Review Procedure

The Faculty of Arts & Science implements the Grading Regulations, reviews course marks submitted by academic units, and posts the official marks. Official marks are communicated to students via ACORN.

Each academic unit has an appointed faculty member (e.g. a Chair, Program Director, Vice Principal) who is responsible for reviewing marks submitted by instructors. This appointed faculty member may ask for clarification of any anomalous results or distributions, or disparity between sections of the same courses. Both the appointed faculty member and the Dean have the right, in consultation with the instructor of the course, to adjust marks where there is an obvious and unexplained discrepancy between the marks submitted and the perceived standards of the Faculty. Final marks are official, and may be communicated to the students only after the review procedure has taken place. Marks, as an expression of the instructor’s best judgment of each student’s overall performance, will not be determined by any system of quotas.

* The grade point values above apply to marks earned in individual courses; grade point averages are weighted sums of the grade points earned, and thus do not necessarily correspond exactly to the scale above.

In order to obtain final standing in a course, a student must receive at least a passing grade (50%)/P/CR in that course. A Grade of “F” is a failure. There are no supplemental examination privileges in the Faculty.

Transcript notations that may appear in lieu of a final mark and have no grade point value are:
AEG | Aegrotat Standing on the basis of term work and medical evidence
CR/NCR | Credit/No Credit
EXT or XTR or X | Extra
GWR | Grade Withheld pending Review
IPR | (Course) In Progress
LWD | Late Withdrawal After the Drop Date
NGA | No grade available
P/FL | Pass/Failure. In cases where the FL grade is used in calculating grade point averages, the symbol “FL %” is used and a grade point value of 0.0 is assigned
SDF | Standing Deferred; granted only by petition
WDR | Late Withdrawal without academic penalty after the relevant deadline; granted only by petition

Grade Point Average

The Grade Point Average (GPA) is the weighted sum (a full course is weighted as 1.0, a half-course as 0.5) of the grade points earned, divided by the number of courses in which grade points were earned. GPAs are calculated for degree students, non-degree students, and visiting students. For non-degree students who have completed a degree in the Faculty, the cumulative GPA includes all courses taken both as a degree student and as a non-degree student.

Four types of grade point averages are calculated:

- **Sessional GPA (SGPA)**: The SGPA is calculated up to three times per year, based on marks obtained during each of the Fall term (September-December), the Winter term (January-April), and the Summer Session (May-August).
- **Annual GPA (AGPA)**: The AGPA is calculated once, based on courses completed during the Fall/Winter Session as a whole.
- **Cumulative GPA (CGPA)**: The CGPA is calculated on the same schedule as the SGPA and takes into consideration all the marks for all individual courses completed by the student to that point.
- **The Concurrent Teacher Education Program (CTEP) GPA**: takes into account all Bachelor of Education courses and is only calculated for CTEP students.

Courses that are not included in the GPA calculation are:

- courses noted with **AEG standing**
- transfer credits
- courses designated **Extra**
- courses taken as **CR/NCR**
- courses evaluated on a Pass/Fail basis in which a grade of Pass (P) is achieved

If a grade of Fail (FL) is achieved in a course evaluated on a Pass/Fail basis, a grade point value of 0.0 may be assigned in which case the course is included in the GPA.

Assessment of Academic Standing

There are four kinds of academic standing:

- In Good Standing
- On Probation
- On Suspension
- Refused Further Registration

Academic standing is assessed for the first time at the end of the Session in which a student achieves final standing in at least one 0.5 credit in the Faculty of Arts & Science, excluding:

- courses noted with **AEG standing**
- transfer credits
- courses designated **Extra**
- courses taken as **CR/NCR**
- courses evaluated on a Pass/Fail basis in which a grade of Pass (P) is achieved
If a grade of Fail (FL) is achieved in a course evaluated on a Pass/Fail basis, a grade point value of 0.0 may be assigned in which case the course is included in the GPA and therefore contributes to the assessment of academic standing.

Academic standing is assessed twice a year:

- At the end of the Fall/Winter Session; the GPAs used for this assessment are the annual and the cumulative GPAs.
- At the end of the Summer Session; the GPAs used for this assessment are the sessional and the cumulative GPAs.

**In Good Standing**

Students are described as In Good Standing if their cumulative GPA is 1.50 or higher, that is, they have not been assessed as On Probation, Suspended, or Refused Further Registration.

**Probation, Suspension, and Refused Further Registration**

Students are on academic probation if they

a) have a cumulative GPA of less than 1.50 or
b) return from suspension

Students On Academic Probation may take no more than 2.5 credits in each of the Fall and Winter terms, and no more than 1.0 credit in each of the Summer terms (see Number of Courses Taken).

Students who are on probation and, depending on individual enrolment, at the end of the next Fall/Winter Session or Summer Session when academic standing is assessed:

- have a cumulative GPA of 1.50 or more: will be in good standing
- have a cumulative GPA of less than 1.50 but an annual GPA of 1.70 or more (Fall/Winter Session) or a sessional GPA of 1.70 or more (Summer Session): will continue on probation
- have a cumulative GPA of less than 1.50 and an annual GPA of less than 1.70 (Fall/Winter Session) or a sessional GPA of less than 1.70 (Summer Session): will be suspended for one calendar year unless they have already been suspended for one year, in which case they will be suspended for three years.

Students who, having been suspended for three years, when next assessed have a cumulative GPA of less than 1.50 and an annual GPA of less than 1.70 (Fall/Winter Session) or a sessional GPA of less than 1.70 (Summer Session): will be refused further registration in the Faculty.

**Recognition of Academic Achievement**

**Dean’s List Scholar**

This designation is given at the end of the Fall/Winter Session and/or Summer Session to Faculty of Arts & Science degree students who complete their fifth, tenth, fifteenth, or twentieth degree credits in the Faculty and obtain a Cumulative Grade Point Average of 3.50 or higher.

The following courses are included in the credit count for the Dean’s List, as long as the student receives a final mark of 50% or higher or a status of CR or P:

- Faculty of Arts & Science courses (H1/Y1/H0/Y0) completed for degree credit
- Courses in other divisions (for example the University of Toronto Mississauga (UTM), University of Toronto Scarborough (UTSC), or the John H. Daniels Faculty of Architecture, Landscape, and Design (Daniels)) completed by a degree student registered in the Faculty of Arts & Science
- Faculty of Arts & Science courses (H1/Y1/H0/Y0) completed while a student was registered in another division (for example, UTM/UTSC/Daniels) and the student subsequently transferred to the Faculty of Arts & Science

The following courses are not included in the credit count for the Dean’s List:

- Transfer credits from secondary school (e.g. AP, IB, GCE, etc.) and/or post-secondary institutions
- Courses in other divisions completed while a student was registered in the other division
- Courses designated Extra
- Courses with a final mark of 49% or lower, or with a status of NCR or F
- EDU courses taken as part of the Concurrent Teacher Education Program (CTEP)
A “Dean’s List Scholar” notation is added to each qualifying student’s transcript in late June (for students who satisfy the criteria at the end of the Fall/Winter Session) and in late October (for students who satisfy the criteria at the end of the Summer Session). Dean’s List Scholar notations are not applied at the end of the Fall term. There is no monetary value.

Students who satisfy the criteria but do not receive a transcript notation by the dates above for the appropriate session can contact the Office of the Faculty Registrar, Faculty of Arts & Science, at ask.artsci@utoronto.ca.

Distinction and High Distinction

Students who graduate with a Cumulative Grade Point Average (GPA)* of 3.50 or above are described as graduates “With High Distinction”. This achievement is noted on the diploma and transcript.

Students who graduate with a Cumulative GPA* of 3.20 to 3.49 are described as graduates “With Distinction”. This achievement is noted on the diploma and transcript.

*Note: The Cumulative GPA must be based on at least 5.0 credits taken for Faculty of Arts & Science degree credit.

Faculty of Arts & Science Scholarships

The Faculty offers many academically-based scholarships and other awards to exceptional degree students. Full details of these scholarships are available on the Faculty website.

Course Enrolment

In This Section:

- Year of Study
- Number of Courses Taken (“Course Load”)
- Full-time and Part-time Status
- Extra Courses
- Credit/No Credit (CR/NCR)
- Cancelling Courses
- Late Withdrawal (LWD)
- Prerequisites, Co-requisites, and Exclusions
- Taking Courses Outside the Faculty

Year of Study

A Faculty of Arts & Science student who has:

- Completed fewer than 4.0 credits is in Year 1
- Completed 4.0 to 8.5 credits is in Year 2
- Completed 9.0 to 13.5 credits is in Year 3
- Completed 14.0 or more credits is in Year 4

Number of Courses Taken (“Course Load”)

Students may proceed towards the degree at a rate of their own choosing, within the following parameters:

1. The recommended course load for full-time students who are in good standing in each of the Fall and Winter terms is no more than 2.5 credits; the maximum course load in each term is 3.0 credits. During the priority period of enrolment students’ maximum course load, included waitlisted courses, is 2.5 credits; once the priority period has ended, students may enrol in/waitlist for an additional 0.5 credit to the maximum of 3.0 credits. Special consideration will not be granted on the basis of enrolment in more than the recommended maximum.
2. The maximum course load for students who are in good standing during the Summer Session is 1.0 credit per term.
3. Students on Academic Probation may take no more than 2.5 credits in each of the Fall and Winter terms and no more than 1.0 credit in each of the Summer terms.

4. Once students have completed 4.0 credits in the Faculty of Arts & Science, their College Registrar may consider a request for an exception to the above limits; the Rotman Commerce Program Office considers requests for an exception for Bachelor of Commerce students. The College Registrar or Rotman Commerce Program Office, following Faculty guidelines, has the discretion to approve or deny such requests. Special consideration will not be granted on the basis of, and final examination schedules may be affected by, a course overload.

5. Students restricted to a reduced course load on admission may take no more than 1.5 credits in a Fall or Winter term unless approved by their College Registrar, and no more than 2.5 credits overall during the Fall/Winter Session. They may take a maximum of 1.0 credit in the Summer Session. Students restricted to part-time studies who wish to transfer to full-time studies should consult with their College Registrar.

6. To calculate course loads, students should consult this Calendar together with the Timetable. The codes “Y1” or “H1” in a course code in the Calendar indicate the credit value:

- Y1 = a full course (1.0 credit), for which one credit is given (e.g. ANT100Y1)
- H1 = a half-course (0.5 credit), for which one half credit is given (e.g. HIS332H1)

7. In the Timetable a section code is associated with a course code to indicate when the course is offered:

- F = “First Term”; the first term of the Fall/Winter Session (September – December) or the first term of the Summer Session (May – June)
- S = “Second Term”; the second term of the Fall/Winter Session (January – April) or the second term of the Summer Session (July – August)
- Y = full session; the entire Fall/Winter Session (September – April) or the entire Summer Session (May – August)

8. Students should note that courses designated as "...Y1F" or "...Y1S" in the Timetable are particularly demanding.

**Full-Time and Part-Time Status**

**Full-time status**

- A student enrolled in 3.0 credits or more in the Fall/Winter Session is full-time.
- A student enrolled in 1.5 credits or more in the Summer Session is full-time.

**Part-time status**

- A student enrolled in 2.5 credits or fewer in the Fall/Winter Session is part-time.
- A student enrolled in 1.0 credit or fewer in the Summer Session is part-time.

**Extra Courses**

Extra courses appear on a student's academic record with a final course mark and are noted as "EXT". Extra courses do not count for degree credit and are not included in calculating a student's Grade Point Average. However, Extra courses may count in other respects, such as to satisfy program requirements or Breadth Requirements.

Each course with a mark of 50% or higher/P/CR counts for credit towards a degree unless:

- the course has already been passed and is being repeated (see 1. below), or
- the course lists as an exclusion another course that has already been completed (see 2. below)

1. Repeating Passed Courses

Students (both degree and non-degree) may not repeat any course in which they have already obtained credit (a mark of 50% or higher/P/CR) with two exceptions:

- i) When students need to achieve a minimum mark in a course for entry to a limited enrolment program or for meeting a prerequisite to take another course in their program, they may repeat such a course once. The repeated course will be designated Extra.
ii) Students may repeat up to 1.0 credit in courses which they have already obtained credit, for reasons other than to meet a minimum mark for entry to a limited enrollment program or for course prerequisite purposes. The repeated course will be designated Extra. Students may not use this one-time-only allowance to subsequently repeat a passed course again after having repeated the same course for reasons noted in i) above, i.e., they may repeat a specific passed course only once.

Students requesting to repeat a course must do so at their College Registrar's Office, where they will receive appropriate advising and will be enrolled in the course, provided there is space available, only after other degree students have had an opportunity to enrol.

2. Exclusions

Students may not receive degree credit for a course that lists as an exclusion a course they are currently taking or a course they have already passed. If they enrol in such a course, they may be removed at any time during the enrolment period at the discretion of the department. If allowed to remain enrolled in an excluded course, the second course taken will be designated Extra.

Credit/No Credit (CR/NCR)

Degree students in the Faculty of Arts & Science may select up to 2.0 credits to be assessed on a Credit/ No Credit (CR/NCR) basis. This option is available for Arts & Science degree students taking courses offered by the Faculty of Arts & Science, the John H. Daniels Faculty of Architecture, Landscape and Design (Daniels), the University of Toronto Mississauga (UTM), or the University of Toronto Scarborough (UTSC). Some courses may not be eligible for CR/NCR -- refer to the Academic Calendar of the relevant division. This option is not available to Arts & Science non-degree students.

Students taking a course on a CR/NCR basis will not be identified individually to the instructor teaching that course; they will be assessed in the same way as all other students in the course (will have the same assignments and tests and will be evaluated with the same expectations).

Deadline

Students can choose or remove this mode of assessment on ACORN; the deadline to do so is the last date to cancel the relevant course without academic penalty. Once the deadline has passed, students may not reverse this decision.

Eligibility for CR or NCR

To achieve a status of CR (Credit) in a course, a student must achieve a final mark of at least 50%. Courses with a final status of CR will count as degree credits but will have no effect on the student’s Grade Point Average (GPA) calculation. They will also count toward the Breadth Requirements, but cannot normally be used to satisfy program requirements or the 12.0 distinct credits between programs required for the degree. See the Calendar sections on Degree Requirements for details.

A course with a final mark below 50% will be assessed as NCR (No Credit). Courses with a final status of NCR will not count as degree credits, and will also not be included in the GPA calculation.

Important Notes and Limitations of CR/NCR

The underlying mark of a course completed on a CR/NCR basis will not be released or reported in any way. However, the Faculty cannot determine how an external body may read or interpret the CR/NCR on a transcript. If a specific mark may be required in a course for professional or graduate school applications or for other reasons in the future, students should not choose the CR/NCR option. Students may wish to seek academic advising at their College Registrar's Office when considering the use of CR/NCR.

Students who transfer to the Faculty of Arts & Science from Daniels, UTM or UTSC will have all Daniels, UTM, and UTSC CR/NCR options (if any) included in their Arts & Science academic record. These CR/NCR options are counted towards the 2.0 credits maximum.

If a student has specified the CR/NCR option for a course in which an academic offence has been committed, the CR/NCR option will be revoked and the percentage mark will stand as the course mark.

Note to graduating students: The CR/NCR option is only open to degree students. Once students have graduated, they become non-degree students and they may not complete courses on a CR/NCR basis, even if they enrolled in the course before their graduation. For example, if a student is graduating in June and they select the CR/NCR option for a Summer course, or if a student is graduating in November and they select the CR/NCR option for a Fall or Winter course, the CR/NCR option will be removed upon graduation and a percentage mark will appear on the student’s record.

The following courses are not eligible to be taken as CR/NCR: courses where an individual student works on independent study or individual research supervised by a professor; Research Opportunity Program (299s/399s)/Research Excursions (398s); First-Year Foundations Seminars; First-Year Foundations Ones Program courses; Rotman Commerce (RSM) courses; field courses; courses evaluated on a Pass/Fail basis. Other approved exceptions will be noted in the course description.
Cancelling Courses or Registration

Cancelling Courses

Students who do not intend to complete a course or courses must cancel the course on ACORN before the final date to cancel courses without academic penalty (see Sessional Dates). Students still enrolled in a course after the final date to cancel the course will receive a mark for that course (unless Late Withdrawal is requested). Not attending classes, ceasing to complete further course work, and/or not writing the examination do not constitute grounds for cancellation without academic penalty from a course after the cancellation deadline; the course remains on the record with the mark earned, including a zero for incomplete work.

Students are not permitted to cancel or withdraw from a course in which an allegation of academic misconduct is pending from the time of the alleged offence until the final resolution of the allegation.

Late Withdrawal After the Drop Date (LWD)

The Faculty of Arts & Science has a mechanism to assist students, in conjunction with their College Registrars, to remedy situations, particularly in their early years at university, where personal or other circumstances mean they are irretrievably behind in a course. Students who have fallen behind with assignments or are not at all prepared to write exams in one or more of courses can contact their College Registrar’s Office to discuss a Late Withdrawal After the Drop Date (LWD) from the course.

Degree students in the Faculty of Arts & Science may request Late Withdrawal After the Drop Date (LWD) – to withdraw from a course without petition – from a total of 3.0 credits, provided such a request is made by the last day of classes in the relevant term. Non-degree students may also request LWD, provided they do not exceed the 3.0 credits maximum throughout their combined degree and non-degree studies.

Withdrawals approved under this procedure will be noted on the academic record by the course status LWD. This course status will have no effect on the Grade Point Average (GPA) or other elements of the academic record.

Students seeking to avail themselves of this remedy will be expected to work with their College registrarial advisor to analyze what led to their situation, to discuss what steps they can take to prevent it from happening again, and to learn from their experiences.

Students who transfer to the Faculty of Arts & Science from the University of Toronto Mississauga (UTM), or the University of Toronto Scarborough (UTSC), or the John H. Daniels Faculty of Architecture, Landscape and Design (Daniels) will have all UTM/UTSC/Daniels LWD requests (if any) included in their Arts & Science academic record. These LWD requests are counted towards the 3.0 credits maximum.

Note that the option for Late Withdrawal is not available if an allegation of academic misconduct is under investigation. If LWD was previously granted in the course, it will be revoked and the percentage grade will stand as the course grade.

Please note: Students who have not achieved final standing (a final passing mark/P/CR) in at least one course in the Faculty of Arts & Science who cancel their registration must re-apply for admission through the Ontario Universities Application Centre if they wish to return in the future. Late Withdrawal (LWD) does not constitute final standing in a course.

Prerequisites, Co-requisites, and Exclusions

Prerequisites and co-requisites are established by academic units to ensure that students enrolling a course have the necessary academic preparation to be successful. Students are responsible for fulfilling prerequisites and co-requisites, and if they enroll in a course for which they do not have the published prerequisites or co-requisite, it is at the discretion of the academic unit to cancel their enrolment in the course at any time during the enrolment period. If students withdraw from a course, they must also withdraw from any course for which it is a co-requisite unless the academic unit offering the latter course agrees to waive the co-requisite.

An exclusion is a course that is deemed to have content that significantly overlaps with another course. Prerequisites, co-requisites, and exclusions will be listed below the course description.

Prerequisite: A course (or other qualification) required as preparation for enrolment in another course. Prerequisites must be completed in advance of enrolment in a course. If students consider that they have equivalent preparation, they may ask the academic unit to waive the stated prerequisite.

Co-requisite: A course to be undertaken concurrently with another course. If a student has previously passed the co-requisite course, the academic unit will waive the co-requisite.

Recommended Preparation: Background material or courses that may enhance a student’s understanding of a course, but that are not required for enrolment in the course.
Exclusions: Students may not receive degree credit for a course that lists as an exclusion a course they are currently taking or a course they have already passed. If they enrol in such a course, they may be removed at any time during the enrolment period at the discretion of the department. If allowed to remain enrolled in an excluded course, the second course taken will be designated Extra.

Taking Courses Outside the Faculty

Courses at the University of Toronto Mississauga (UTM), the University of Toronto Scarborough (UTSC), and the John H. Daniels Faculty of Architecture, Landscape, and Design (Daniels)

Students registered in the Faculty of Arts & Science may enrol in most courses offered by UTM, UTSC, and Daniels, provided that they meet the enrolment controls and prerequisites established by those divisions. While still considered an earned credit, any course from UTM/UTSC/Daniels taken in excess of 10.0 credits will not count toward the 20.0 credits required for a Faculty of Arts & Science degree; the course will be included in the Cumulative Grade Point Average (CGPA) calculation. These courses may also count towards Faculty of Arts & Science program requirements; students should check with the relevant academic unit before enrolling. Faculty of Arts & Science students enrolling in UTM, UTSC, and Daniels courses should also note that, although academic and course refund deadlines may be different for UTM/UTSC/Daniels students, as a Faculty of Arts & Science student they must adhere to all Faculty of Arts & Science deadlines (e.g. enrolment, cancellation, CR/NCR, refund, etc.), with the exception of the start and end of classes.

Non-degree students in the Faculty of Arts & Science may enrol in Arts & Science, UTM, UTSC, and Daniels courses, provided that they meet the enrolment controls and prerequisites established by those divisions.

Graduate Courses Sponsored by a Faculty of Arts & Science Academic Unit

In exceptional circumstances, undergraduate degree students in the Faculty of Arts & Science may be granted permission to count a graduate course sponsored by a Faculty of Arts & Science academic unit toward their undergraduate degree. Students are expected to have already exhausted all undergraduate courses available in the Faculty in the relevant subject area before requesting to enrol in a graduate course sponsored by a Faculty of Arts & Science academic unit. Note that not all Faculty of Arts & Science academic units will allow undergraduate enrolment in a graduate course, even in exceptional circumstances; others may require a minimum GPA and/or the instructor’s permission. Please contact the relevant Graduate Unit for details.

For degree requirement purposes, a graduate course will count as a 400-level course. Permission to count a graduate course toward a student’s program requirements is a separate matter and at the discretion of the relevant academic unit.

Courses of Other Divisions at the St. George Campus

Students should select their courses from those offered in the Faculty of Arts & Science. If, however, they identify a course(s) offered in a division, faculty or school of the University (other than the Faculty of Arts & Science, the University of Toronto Mississauga, the University of Toronto Scarborough, or the John H. Daniels Faculty of Architecture, Landscape, and Design, see above), including a graduate course sponsored by an academic unit outside of the Faculty of Arts & Science, that may be appropriate for inclusion in their program(s), they may request permission to enrol or remain enrolled in the course for degree credit. A student will obtain permission from the division, faculty, or school offering the course, and obtain confirmation from the relevant undergraduate academic unit that the course may be used to fulfil the requirements of one of their programs.

Students should initiate the procedure well in advance of the beginning of classes, so that they may choose alternate courses if permission is not granted. If permission is granted, the academic unit that will count the course towards a program will arrange to enrol the student in the course (unless enrolment has already taken place.)

Non-degree students in the Faculty of Arts & Science may enrol only in Arts & Science, UTM, UTSC, and Daniels courses. They may not request permission from the Faculty to enrol in courses from other divisions.

Courses of Other Universities (Letters of Permission and Transfer Credit)

Degree students with a Cumulative Grade Point Average (CGPA) of at least 1.50 may take a maximum of 5.0 credits elsewhere for transfer credit. Transfer credits received as a result of studies completed on an exchange program are not included in this maximum. Students admitted with transfer credit may be limited in the number of courses that they may transfer after admission, including transfer credits as a result of studies completed on an exchange program, and should consult the Faculty of Arts & Science website.

Prior to taking courses at a Canadian or U.S. university, students are advised to request a Letter of Permission to confirm acceptability of those courses for transfer credit. For other universities, students may submit a request for transfer credit after completing courses elsewhere; note that there is no guarantee that transfer credit will be awarded. Permission obtained from an instructor or from an academic unit for program purposes does not obligate the Faculty to grant transfer credit. Assessments of transfer credit may take several weeks to process depending on the time of year and the nature of the request. Applicants are responsible for submitting requests well in advance of any deadlines they must meet and for obtaining advising as necessary concerning the Letter of Permission and Transfer Credit processes.

Note: Only 1.0 credit in transfer credit at the 300+ level may be used to satisfy the degree requirement of a minimum of 6.0 credits at the 300+ level, with the exception of 300+ level transfer credits received as a result an exchange program. All 300+ level transfer credits received as a
result of studies completed on an exchange program can contribute toward the 300+ level degree requirement. Please refer to the Letters of Permission and Transfer Credit (Post-Admission) Guidelines on the Faculty of Arts & Science website.

**Fees**

Tuition fees normally consist of academic fees and compulsory non-academic incidental fees (which provide access to student services including Hart House, Health Services, Athletics and student organizations). Additional ancillary fees (such as lab fees) may also be billed for enrolment in some specific courses.

More information, as well as the University’s policy on ancillary and incidental fees can be found in the Office of the Vice-Provost, Students website.

Any changes to fees (tuition, incidental, or ancillary) are subject to approval by the Governing Council, and come into effect in the Summer session.

More information can be found in the Office of Student Accounts website.

**Financial Assistance**

A limited number of in-course bursaries, scholarships and awards are available to students who need financial assistance or who qualify for them on the basis of academic merit. Information on these, and the Ontario Student Assistance Program, is available on the following websites:

- Faculty of Arts & Science
- Enrolment Services
- College Registrars’ Offices

**Graduation**

There are two graduation periods for Faculty of Arts & Science students: June and November. Students can request graduation on ACORN during the relevant timeframe.

For students graduating in June, only courses completed by the end of the preceding Winter term (ending in April) will be included in the assessment of the student’s eligibility to graduate. For students graduating in November, only courses completed by the end of the preceding Summer Session (ending in August) will be included in the assessment of the student’s eligibility to graduate.

Prospective graduands receive an email from the Office of Convocation in March (for June graduation) or in October (for November graduation) providing details of the convocation ceremony. The Office of the Faculty Registrar will contact students at least two weeks in advance of the relevant convocation ceremony to confirm their eligibility to graduate.

**Recognition of Exceptional Academic Achievement: “High Distinction” and “Distinction”**

Students who graduate with a Cumulative Grade Point Average (GPA) * of 3.50 or above are described as graduates “With High Distinction”. This achievement is noted on the diploma and transcript.

Students who graduate with a Cumulative GPA* of 3.20 to 3.49 are described as graduates “With Distinction”. This achievement is noted on the diploma and transcript.

*Note: The Cumulative GPA must be based on at least 5.0 credits taken for Faculty of Arts & Science degree credit.
Off-Campus Opportunities

Field Courses

Field courses take place away from the university campus and are sometimes an international opportunity. Most field courses have a very small class size which provides an opportunity for students to interact closely with the course instructor(s), and to collaborate with other students who share the same interests. Field courses are normally held during the Summer session for usually two to three weeks.

A small number of academic units in the Faculty of Arts & Science offer field courses. Please refer to the following websites for information about eligibility, cost and application process:

- Department of Anthropology
- Department of Ecology & Evolutionary Biology
- Department of Earth Sciences
- Forestry Program (John H. Daniels Faculty of Architecture, Landscape, and Design)
- Department of Physiology (Faculty of Medicine)

International/Indigenous Course Module

The Faculty of Arts & Science’s International or Indigenous Course Module Program (ICMs) provides an opportunity for faculty members to incorporate an intensive international or Indigenous experiential module into the framework of existing undergraduate courses. ICMs are a great way to combine academic study with a short-term international experience. Professors lead ICM trips over the Fall or Winter Reading Week in conjunction with specific courses. International opportunities may include partnerships developed with Indigenous nations both within Canadian borders and beyond.

For more details, including current opportunities, please refer to the information on the Faculty of Arts & Science website.

Learning Abroad Experiences

There are different types of Learning Abroad Experiences, for Study, Research and Professional experience, in Short-term, Summer, Fall/Winter, or year-long opportunities. For more information, visit the Learning Abroad website.

Professional Experience Year Co-op (PEY Co-op)

The Professional Experience Year Co-op (PEY Co-op) Internship Program provides students with an opportunity to gain industry experience in a field related to their academic program. The PEY Co-op program consists of a 12 – 16 month, full-time paid internship, beginning between May and September and ending the following year. The length of the internship allows sufficient time for students to undertake substantive projects and to be involved in challenging and productive work. As a result of the experience, students return to their studies with a greater understanding of their discipline from a practical, hands-on perspective. Students registered in the PEY Co-op program also participate in an intensive student development program, consisting of a variety of small and large group workshops, as well as individual career counselling appointments tailored to each student’s needs and goals. The objective is for students to acquire knowledge and gain insight that will remain invaluable to their ongoing career development, beyond the academic years.

Students who join PEY Co-op are required to pay a fee upon registration, and those who secure an internship also must pay a placement fee, which is applied to the student’s ROSI account in July/August. Students will then be registered in the PEY200Y1 course. Neither the application fee, nor the placement fee is refundable. Part-time incidental fees will also apply to maintain student status and the accompanying benefits. Students who secure a PEY internship must return to full-time studies following the completion of their 12 – 16 month internship. Fourth Year students are not eligible to graduate while their PEY Co-op placement is in progress.

Registration in the PEY Co-op program is open to eligible, full-time Arts & Science and Engineering students, in their Second or Third year of studies. For detailed PEY eligibility requirements and program timelines, please visit the Engineering Career Centre/PEY Co-op Office website. Students must be in good academic standing and must have any outstanding balances paid in full. Due to the time commitment of the PEY Co-op program, the CGPA should be above 2.0. If you do not meet this 2.0 CGPA recommended minimum, we suggest focusing first on your studies, and registering for PEY in the following year.

Research Excursions Program

The 398 Research Excursions Program (REP) provides an opportunity for Arts & Science (St. George) degree students in their third year (i.e. after completing at least 9 but not more than 16 credits) to participate in a practical or experiential research activity under the supervision of a faculty member. The practical, experiential component can take the form of research/learning in archives, laboratories, libraries, or in a field
camp, etc.—but not in a classroom at another university (that is covered by the Faculty's summer abroad and exchange programs). The projects run within the May-August period, when both Faculty and students can make the time commitments necessary. Summer tuition fees apply. The Faculty of Arts & Science will cover travel and living expenses.

For more information, refer to the Faculty of Arts & Science website.

Summer Abroad

The Summer Abroad programs are designed to enrich students’ academic lives by providing an exciting and educational international experience. Students complete full-year University of Toronto undergraduate degree credit courses from the Faculty of Arts & Science that are relevant to each location. Relatively small classes (about 25 students on average) are taught by University of Toronto professors or faculty from the host university, for a period of 3 to 6 weeks. All classes, except for language courses, are taught in English. All Summer Abroad courses and grades show on students’ transcripts as regular U of T credits and are calculated into their CGPA.

For more information about a list of courses, locations, eligibility, cost and other information, please refer to the Summer Abroad website.

Petitions and Appeals

In This Section:

- Petitions to the Faculty
- Types of Petitions
- Appeals

Students are responsible for observing sessional dates, course prerequisites, exclusions, satisfying the degree requirements, and following the rules and regulations in the Calendar and the Registration Instructions. Failure to follow regulations, requirements and deadlines may result in academic and/or financial consequences or penalties, and failure to inform oneself about these will not be accepted as sufficient excuse to avoid these consequences. Students should always consult their College Registrar immediately for guidance if anything happens that interferes with continuing or completing their courses, or that appears to be contrary to rules, regulations and deadlines.

Special Consideration Requests to Academic Department(s)

Special consideration requests to academic department(s)/unit(s) (sometimes called Academic Appeals) concern issues arising within a course that relate to the pedagogical relationship of the instructor and the student, such as the organization of a course, grading practices, or conduct of instructors. These fall within the authority of the academic unit sponsoring the course and are not the subject of Faculty petitions. Students are encouraged to discuss any issues regarding the academic aspects of a course first with the instructor. It is recommended that such discussions should be documented in writing where appropriate. The successive stages of special consideration request after the course instructor must be documented in writing. These successive stages are: the Undergraduate Coordinator or Associate Chair; the Chair or Program Director of the Academic Unit; then the Office of the Dean, Faculty of Arts & Science. A special consideration request must have been reviewed at the academic unit level before being referred to the Dean’s Office; requests to the Dean’s Office must be in writing.

Petitions to the Faculty

Petitions to the Faculty concern issues relating to degree requirements, academic regulations, deadlines, examinations, and administrative rules. These may be petitioned to the Faculty, provided the petition is submitted prior to the specified deadlines. The Faculty recognizes that an exception may be required in the face of unpredictable, exceptional circumstances. In submitting a petition to have regulations waived or varied, students must present compelling reasons and relevant documentation, and must demonstrate that they have acted responsibly and with good judgment in attempting to observe Faculty regulations. Students are requested to present their entire case from the outset so their circumstances may be reviewed adequately for an equitable decision. There is no guarantee that a petition will see a successful outcome. If they are considering submitting a petition to the Faculty, students are encouraged to seek academic advising from their College Registrar’s Office.

Petitions must 1) state the student’s request; 2) provide the reasons why an exception should be made in a clear and concise manner; and 3) be accompanied by relevant supporting documentation. A petition is considered in confidence by the Faculty petitions office on behalf of the Committee on Standing, which is charged with interpreting and administering the regulations of the Faculty.

It is the responsibility of the student to provide a valid UofT email address to which a petition decision may be sent. Only UofT email will be used to reply to petitions. Non-receipt of a decision due to incorrect email address is not grounds for reconsideration.
Deadlines to Submit Petitions

The deadlines for petitions are strictly enforced. If there are compelling reasons why a petition is being submitted after the deadline, the student should explain the reasons for the lateness in their personal statement. The issue of lateness must be satisfactorily resolved before the substance of the petition may be considered. Late petitions without sufficient reason for lateness will not be considered, no matter how compelling.

Petitions for Term Work Extension(s)

The deadline to submit a petition for a term work extension is five working days after the last day of the examination period for the term in question (for term work during the Fall term, the deadline is five working days after the University reopens in January).

Petitions for Deferred Examinations

The deadline to submit a deferred exam petition is five working days after the last day of the examination period for the term in question (for December examinations, the deadline is five working days after the University reopens in January). The deadline to submit a deferred exam petition for a UTM/UTSC course is within 72 hours of a missed examination. Students must submit a petition with their Faculty of Arts & Science College Registrar’s Office, with the required supporting documentation.

Petitions/Requests for Outside Centre Examinations

Students must make such requests/petitions at least three weeks prior to the start of the final examination period (see Petitions/Requests for Outside Centre Examinations below).

Petitions for Late Withdrawal Without Academic Penalty

Fall-Winter Session courses: The deadline is the following 15 November

Summer Session courses: The deadline is the following 28/29 February

All documentation supporting petitions must be submitted as soon as possible, and no later than three weeks after the date the student initiates the petition. Students should be aware of the expectations around submission of late petitions or documentation (see Deadlines to Submit Petitions above), and that there is no guarantee of a successful outcome.

Supporting Documentation for Petitions

The Faculty seeks documentation that provides pertinent evidence for decisions determining whether or not an exception should be made to regulations that are designed to ensure equitable treatment for all students. If the reasons cited in a petition are of a medical nature, the preferred medical documentation at the University of Toronto is the University’s Verification of Student Illness or Injury Form. Students must submit the original Verification of Student Illness or Injury form when submitting a petition to their College Registrar’s office; no faxed or scanned copies will be accepted. This form may only be completed by Dentists, Nurse/Nurse Practitioners, Physicians/Surgeons, Psychologists, Psychotherapists or Social Workers registered and licensed in Ontario and can be found at www.illnessverification.utoronto.ca.

If illness is being presented as the reason for the petition request, the claim of illness itself may not necessarily be sufficient grounds to guarantee approval of the request. All cases are examined in their entirety before a decision is made: an illness or injury’s duration and resulting incapacitation are taken into account along with other relevant factors in the context of the course at issue. Note that the physician’s report must establish that the patient was examined and diagnosed at the time of illness, not after the fact. If the physician’s report does not explicitly establish this, then the Faculty reserves the right to use its discretion in accepting the report as supporting documentation for a petition.

If the reasons cited for a petition request are of a non-medical nature, then the supporting documentation may come in various forms. Consult with your College Registrar’s office and/or the online Petitions Guide for more information on possible types of documentation in other circumstances.

Types of Petitions

Petitions for Term Work Extension(s) (see also Term Work, Tests and Final Exams)

Matters concerning term work normally fall within the authority of the instructor. Students unable to comply with given deadlines must contact their instructor prior to the deadline if an extension to the deadline is being requested. Students should expect no consideration if an issue is raised after the assignment deadline.
Petitions and Appeals

Normally, all term work must be submitted by the last day of classes, unless an earlier date has been specified by the instructor. Instructors may grant extensions beyond their own deadlines or beyond the last day of classes up until five working days after the end of the examination period, provided that a student presents legitimate reasons with appropriate documentation as determined by the instructor.

Extensions beyond five business days after the end of the examination period can be approved only through a petition. Such petitions for an extension of time for term work must also be initiated within five business days after the end of the relevant examination period. Late requests will not be considered. Students must file the petition after consultation with the instructor regarding a suitable extension date. The Faculty petitions unit under the authority of the Committee on Standing consults the academic unit concerned for information about the status of the course work, and the steps, if any, that must be taken to complete the course. Students seeking an extension of time for term work are expected to have been in contact with their instructor before the initial deadline and must continue working on the outstanding assignments while they await a decision.

Note that when a term work extension petition has been granted in a course, a notation of “SDF” (standing deferred) will be indicated in place of a course grade. Students who have the notation of SDF on a course and who have earned a Cumulative Grade Point Average (CGPA) of less than 1.50 are strongly encouraged by the Faculty to come up with an academic plan for the term/session in which they will be completing the outstanding work. The Faculty reserves the right to limit registration or course load in a subsequent session for students who have outstanding academic obligations from a previous term/session. Students who find themselves in this situation are strongly encouraged to seek academic advising from their College Registrar’s office.

Petitions for Deferred Examinations

Students are expected to write their examinations as scheduled. Only in cases of documented debilitating illness or legitimate conflict should a student request a deferral of a final examination. Students who are too ill and/or incapacitated at the time of the examinations should petition to defer the examination they are unable to attend due to their medical condition. Petitions based on travel, employment, or personal plans will not be considered as students are expected to make themselves available during the published Examination Period to write final examinations.

In response to a petition for a deferred examination, a student may be granted the opportunity to write a special examination at a subsequent examination period or the regular examination in the next offering of the course. Satisfactory documentation must be provided to corroborate illness (see above) to show that the student was examined at the time of the illness.

There is a fee of $70.00 per deferred examination (maximum $140.00 for multiple deferral requests in the same petition).

In the petition decision students are notified of the examination period in which the deferred examination will take place, and if the examination will be a regular or special examination. They must pay the fee by the deadline given, so that the deferred examination can be scheduled appropriately.

Students who have paid the deferred examination fee(s) will receive their personal deferred examination schedule.

Students who must write a deferred examination in a course that serves as a prerequisite for subsequent courses may enrol in those courses provided they obtain the approval of the academic unit concerned and provided the term mark in the prerequisite (deferred) course is at least 60%. If approval from the academic unit is not obtained, there is a risk that students may be removed from the subsequent course during a prerequisite check and reinstatement may not be possible if the course is full.

If a student becomes ill at an examination, they must notify the Chief Presiding Officer (CPO) immediately, sign the appropriate form and promptly leave the examination to seek medical attention. This request cannot be made at the end of the examination or just before the examination ends. The CPO will ask the student to sign a form and submit all examination materials. After having sought medical attention, the student may petition for another opportunity to write the examination along with submitting relevant supporting documentation. Having once abandoned an examination, a student should be aware that consideration may not be given again for the same circumstances.

Please note that a granted WDR does not have any impact on fees. Because a WDR is likely granted beyond any fee refund deadlines, students are still responsible for any tuition or other fees incurred.

Petitions for Late Withdrawal Without Academic Penalty (WDR)

A student may petition the Faculty for a late withdrawal without academic penalty when they feel that they were unable to complete a course due to circumstances outside their control. Typically a late withdrawal petition is pursed when no other kind of petition request or special option (like term work extension, or a deferred final exam) will remedy the situation.

It is important to note that students who intend to finish a course, and who therefore do not drop the course themselves (whether by the last day to cancel on ACORN, or perhaps through their College Registrar’s office for an “LWD”), do take on a risk. The Faculty assumes that students who persist in a course right to the end have assessed their progress and marks and decided to take the course to completion, regardless of any circumstances. Therefore, a late withdrawal without academic penalty petition has a much lower chance of success when a student has taken the course to completion – which means they have written the final exam or final piece of term work (in courses without a final exam).

If a late withdrawal without academic penalty petition is granted, the course is not removed from the transcript, but the notation “WDR” is placed on the transcript in the place of a final mark. Once WDR has been placed on the student’s academic record, no credit is received for the course and there is no impact on any GPA.

Please note that a granted WDR does not have any impact on fees. Because a WDR is likely granted beyond any fee refund deadlines, students are still responsible for any tuition or other fees incurred.

Petitions for Deferred Examinations

Students are expected to write their examinations as scheduled. Only in cases of documented debilitating illness or legitimate conflict should a student request a deferral of a final examination. Students who are too ill and/or incapacitated at the time of the examinations should petition to defer the examination they are unable to attend due to their medical condition. Petitions based on travel, employment, or personal plans will not be considered as students are expected to make themselves available during the published Examination Period to write final examinations.

In response to a petition for a deferred examination, a student may be granted the opportunity to write a special examination at a subsequent examination period or the regular examination in the next offering of the course. Satisfactory documentation must be provided to corroborate illness (see above) to show that the student was examined at the time of the illness.

There is a fee of $70.00 per deferred examination (maximum $140.00 for multiple deferral requests in the same petition).

In the petition decision students are notified of the examination period in which the deferred examination will take place, and if the examination will be a regular or special examination. They must pay the fee by the deadline given, so that the deferred examination can be scheduled appropriately.

Students who have paid the deferred examination fee(s) will receive their personal deferred examination schedule.

Students who must write a deferred examination in a course that serves as a prerequisite for subsequent courses may enrol in those courses provided they obtain the approval of the academic unit concerned and provided the term mark in the prerequisite (deferred) course is at least 60%. If approval from the academic unit is not obtained, there is a risk that students may be removed from the subsequent course during a prerequisite check and reinstatement may not be possible if the course is full.

If a student becomes ill at an examination, they must notify the Chief Presiding Officer (CPO) immediately, sign the appropriate form and promptly leave the examination to seek medical attention. This request cannot be made at the end of the examination or just before the examination ends. The CPO will ask the student to sign a form and submit all examination materials. After having sought medical attention, the student may petition for another opportunity to write the examination along with submitting relevant supporting documentation. Having once abandoned an examination, a student should be aware that consideration may not be given again for the same circumstances.

Please note that a granted WDR does not have any impact on fees. Because a WDR is likely granted beyond any fee refund deadlines, students are still responsible for any tuition or other fees incurred.

Petitions for Deferred Examinations

Students are expected to write their examinations as scheduled. Only in cases of documented debilitating illness or legitimate conflict should a student request a deferral of a final examination. Students who are too ill and/or incapacitated at the time of the examinations should petition to defer the examination they are unable to attend due to their medical condition. Petitions based on travel, employment, or personal plans will not be considered as students are expected to make themselves available during the published Examination Period to write final examinations.

In response to a petition for a deferred examination, a student may be granted the opportunity to write a special examination at a subsequent examination period or the regular examination in the next offering of the course. Satisfactory documentation must be provided to corroborate illness (see above) to show that the student was examined at the time of the illness.

There is a fee of $70.00 per deferred examination (maximum $140.00 for multiple deferral requests in the same petition).

In the petition decision students are notified of the examination period in which the deferred examination will take place, and if the examination will be a regular or special examination. They must pay the fee by the deadline given, so that the deferred examination can be scheduled appropriately.

Students who have paid the deferred examination fee(s) will receive their personal deferred examination schedule.

Students who must write a deferred examination in a course that serves as a prerequisite for subsequent courses may enrol in those courses provided they obtain the approval of the academic unit concerned and provided the term mark in the prerequisite (deferred) course is at least 60%. If approval from the academic unit is not obtained, there is a risk that students may be removed from the subsequent course during a prerequisite check and reinstatement may not be possible if the course is full.

If a student becomes ill at an examination, they must notify the Chief Presiding Officer (CPO) immediately, sign the appropriate form and promptly leave the examination to seek medical attention. This request cannot be made at the end of the examination or just before the examination ends. The CPO will ask the student to sign a form and submit all examination materials. After having sought medical attention, the student may petition for another opportunity to write the examination along with submitting relevant supporting documentation. Having once abandoned an examination, a student should be aware that consideration may not be given again for the same circumstances.

Please note that a granted WDR does not have any impact on fees. Because a WDR is likely granted beyond any fee refund deadlines, students are still responsible for any tuition or other fees incurred.
Note that when a deferred examination has been granted in a course, a notation of "SDF" (standing deferred) will be indicated in place of a course grade. A further deferral of an examination is only granted in very exceptional circumstances. Students are charged a further fee of $70 for each subsequent deferred examination. If the student does not write the deferred examination, the "SDF" notation will be replaced by the original grade with a grade of "0" for the final examination in the calculation of the final grade.

In the event that a further deferral is granted and will be written in a subsequent term/session, the student is strongly encouraged to reduce their course load in that term or session to allow room for preparation of that deferred examination.

Students who have the notation of SDF on a course and who have earned a Cumulative Grade Point Average (CGPA) of less than 1.50 are strongly encouraged by the Faculty to come up with an academic plan for the term/session in which they will be completing the outstanding exam. The Faculty reserves the right to limit registration or course load in a subsequent session for students who have outstanding academic obligations from a previous term/session. Students who find themselves in this situation are strongly encouraged to seek academic advising from their College Registrar’s office.

Petitions/Requests for Outside Centre Examinations

If students have legitimate reasons to be away from campus during a regularly scheduled final exam, they may seek permission to write an examination at an Outside Centre (i.e. an institution or facility other than U of T St. George). If the request is for an online section of a course, then they must work with their College Registrar’s office to make the Outside Centre Exam request directly to the Faculty Exams office. If the Outside Centre Exam request is for any other type of course/section (i.e. typical ‘in person’ section), the student must submit a petition at least three weeks prior to the beginning of the examination period. Late requests cannot be accommodated. Please note that if a student requests/petitions for both an Outside Centre Exam and a deferred exam, they will be charged the deferred examination fee of $70.00 per examination up to a maximum of $140.00 for multiple deferral requests in the same petition.

If permission has been granted for the examination to be written at an Outside Centre, students are also responsible for all costs for invigilation, postage/courier, etc. charged by the Outside Centre involved. Students are advised to determine the total cost before petitioning. Such permission is granted only in the most extreme circumstances.

Appeals

Any student looking to appeal a denied request is encouraged to seek academic advising from their College Registrar’s office. If a student’s initial petition is denied, they may appeal (through the following stepwise processes).

1. Committee on Standing (COS): The Committee on Standing will review an appeal with new information not presented in the original petition request within 90 days of the original petition decision date. Appeals must be submitted to the student’s College Registrar’s office.
2. Faculty Academic Appeals Board (AAB): In order to appeal a denied COS appeal, students must submit their request in writing to their College Registrar’s office within ninety days of the COS decision.
3. Academic Appeals Committee of the Governing Council: In order to appeal a denied AAB appeal, students must submit a Notice of Appeal and other related documents to the Academic Appeals Committee of the Office of Appeals, Discipline and Faculty Grievances (ADFG) of Governing Council in Simcoe Hall within ninety days of the AAB decision. Students considering submitting an appeal to Governing Council should carefully review the instructions outlined here: governingcouncil.utoronto.ca/processes/academic-appeals.

Term Work, Tests, and Final Exams

In This Section:

- Term Work and Tests
- Final Exams
- Reassessment of Term Work, Final Exam or Course Marks

Term Work and Tests

Term Work

Instructors shall return by the deadline one or more marked assignments worth a combined total of at least 10% of the total course mark for H courses and 20% for Y courses. The deadline for returning such marked work is the last regularly-scheduled class meeting prior to the deadline.
Term Work, Tests, and Final Exams

to cancel without academic penalty, with one exception: for courses that run the entire Fall/Winter Session (Y1Y or H1Y courses), the deadline is the last regularly-scheduled class meeting of the first week of classes in January.

Students must submit all term work on or before the last day of classes in the course concerned, unless an earlier date is specified by the instructor. Students who for reasons beyond their control are unable to submit an assignment by its deadline must obtain approval from their instructor for an extension of the deadline. This extension may be for no longer than five business days after the end of the final examination period. If additional time beyond this period is required, students must petition through their College Registrar on or before five business days after the end of the examination period for a further extension of the deadline. (See Petitions and Appeals)

Students are strongly advised to keep rough and draft work and copies of their essays and assignments, as these may be required by the instructor.

All written work that has been evaluated should be returned to the student with such detailed comment as the instructor deems appropriate, and time made available for discussion of it. Any enquiries or appeals about a graded piece of work must be made to the instructor as soon as possible and no later than two weeks after the work was returned. Instructors must keep unclaimed term work for at least six months beyond the end of the course.

Term Work and Term Test Regulations

The following regulations summarize the Faculty’s implementation of the University Assessment and Grading Practices Policy, Parts A and B, available on the Governing Council website.

Marking Schemes

As early as possible in each course, and no later than the last date to enrol in the course, the instructor shall make available to the class, and shall file with the division/faculty or academic unit, the course marking scheme, i.e., methods by which student performance shall be evaluated. This should include whether the methods of evaluation will be essays, tests, class participation, seminar presentations, examinations, or other requirements; the relative weight of these methods in relation to the overall mark; and the timing of each major evaluation.

No essay, test, examination etc. in the marking scheme may be assigned a weight of more than 80% of the course mark. This limit does not apply when an instructor makes an accommodation at a student's request to take into account assessments missed for legitimate, documented reasons.

After the marking scheme has been made known by the last date to enrol in the course, the instructor may not change it or the relative weight of assessments without the consent of a simple majority of students attending the class, provided the vote is announced no later than in the previous class. Any changes must be reported to the division or the academic unit. The only exception to this is in the case of the declaration of a disruption. Please see the University's Policy on Academic Continuity.

In the event that this policy has not been followed, a student should contact their College Registrar's office or the relevant academic unit.

Term Tests

No term test or combination of term tests held in the last two weeks of classes at the end of any term may have a total weight greater than 25% of the final mark. This includes term tests in Y courses held in December, and also includes “take-home tests” and assignments where the topics or questions are both assigned and due within the last two weeks of classes.

All term tests must be held on or before the last day of classes. No term test may be held during Reading Week in November and in February, during the Study Break in April, or during Faculty Examination Periods, except for those in F courses scheduled by the Faculty in the December Examination Period.

Missed Term Tests

Students who miss a term test for reasons beyond their control may, no later than one week after the missed test, submit to the instructor or academic unit a request for special consideration. Such request should explain the reason for missing the test, and should include appropriate documentation, such as the Verification of Illness or Injury form (www.illnessverification.utoronto.ca).

A student whose special consideration request is granted by the academic unit will be entitled to a) a make-up test, or b) a re-weighting of the missed test to remaining term work and/or final exam in the course. If the student misses the remaining term work and provides legitimate grounds, the full percentage weight of the missed work may be allocated to the final exam.

Note that the weight of a final exam in a 100-level course may not be increased beyond 80% as an initial accommodation for a legitimate absence. However, if the student misses the make-up opportunity or subsequent test that was to be re-weighted, then the weight of the final exam may be increased beyond 80%.
In courses where the mid-term test is the only marked term work in the course other than the final examination, an initial make-up test opportunity normally must be given. Instructors may use their discretion, but typically students are not automatically entitled to a second make-up test opportunity. The academic unit will determine what consideration is appropriate for a student who misses a make-up test for legitimate reasons. Furthermore, it is important to note that a student who misses a term test cannot claim that as grounds (i.e., no term work was returned before the drop date) for a successful late withdrawal petition.

**Final Exams**

**Faculty Final Examinations**

A Faculty final examination counting for between one-third and two-thirds of the final mark must be held in each 100-series course, unless exemption has been granted by the Faculty of Arts & Science. In 200-, 300- and 400-series courses, the Departments will decide whether or not an examination is appropriate. Courses in the 200-series will normally have a final examination. The ratio of term work to examination will be the same for all sections of multi-section courses that have final examinations. The relative value of each part of a written examination must be indicated on the question paper.

Final examinations are held at the end of each term. Students taking courses during the day may be required to write evening examinations, and students taking evening courses may be required to write examinations during the day. Examinations may be held on Saturdays. Students who make personal commitments during the examination period do so at their own risk. No special consideration is given and no special arrangements are made in the event of conflicts resulting from personal commitments.

Students who are unable to write their examinations due to illness, etc., should contact their College Registrar (see "Petitions for Deferred Examinations").

Students who have two Faculty final examinations in the same time slot, or three consecutive Faculty final examinations (e.g., morning, afternoon, evening; or afternoon, evening, next morning), should submit a Final Examinations Conflict form using their University of Toronto email account to exams.artsci@utoronto.ca.

Students who cannot write a final examination at the scheduled time due to a religious obligation should submit a Final Examinations Conflict form using their University of Toronto email account to exams.artsci@utoronto.ca as soon as the conflict is known, and no later than the deadline shown on the examination schedule.

Information regarding dates, times and locations of examinations will not be given by telephone or email; for the most up to date examination timetable consult the Faculty's current students website.

**Rules of Conduct for Examinations**

1. No person will be allowed in an examination room during an examination except the candidates concerned and those supervising the examination.
2. Students are expected at the examination room at least twenty minutes before the commencement of the examination.
3. Students shall bring their photo identification (signed Photo ID - the picture must be clearly visible for identification purposes) and place it out in the open on their desks. Photo identification may include any one of the following, as long as it contains a current photo and a signature:
   A) current University of Toronto Photo ID (TCard); or
   B) up-to-date Passport (any country); or
   C) current Driver's License (any country); or
   D) government issued photo ID (any province or territory).
4. Students shall place their non-smartwatch or timepiece on their desks – if the CPO cannot tell if it is wireless or Bluetooth capable, they will ask for it to be placed under the desk.
5. All coats and jackets should be placed on the back of each Student’s chair. All notes and books, pencil cases, cell phones (turned off), laptops, any other electronic devices or unauthorized aids, and smaller bags like purses should be stored inside the student’s knapsack or large bag, which should then be closed securely and placed under the candidate’s chair. Students may not have a pencil case on their desk and any pencil cases found on desks will be searched and placed under the chair. All watches and timepieces on desks will be checked. Students are not allowed to touch their knapsack or bag or the contents until the exam is over. Students are not allowed to reach into the pockets or any part of their coat or jacket until the exam is over.
6. The Chief Presiding Officer has authority to assign seats to students.
7. Students shall not communicate with one another in any manner whatsoever during the examination. Students may not leave the examination room unescorted for any reason, and this includes using the washroom.
8. No materials or electronic devices shall be used or viewed during an examination, except those authorized by the Chief Presiding Officer or Examiner. Unauthorized materials include, but are not limited to: books, class notes, or aid sheets. Unauthorized electronic devices include any device that has internet/wireless/Bluetooth connectivity or otherwise may communicate with another person or device outside the exam hall. The most obvious examples include cell phones, tablets/laptops, smart technology including smart watches or fitness devices with connectivity, and so forth.
9. Students who use or view any unauthorized materials or electronic devices while their examination is in progress - or who assist or obtain assistance from other candidates or from any unauthorized source - are liable to academic penalties under the Code of Behaviour on Academic Matters which can be severe.
10. In general, students will not be permitted to enter an examination room later than thirty minutes after the commencement of the examination, nor leave until at least half an hour after the examination has commenced. Any exception to this rule is made by the Chief Presiding Officer, and the Chief Presiding Officer will set the conditions for such an exception.

11. Students shall remain seated at their desks during the final ten minutes of each examination.

12. At the conclusion of an examination, all writing shall cease. The Chief Presiding Officer may seize the papers of students who fail to observe this requirement, and a penalty may be imposed.

13. Examination papers, books and other material issued for the examination, shall not be removed from the examination room except by authority of the Chief Presiding Officer.

14. The University is not responsible for personal property left in examination rooms.

**Reassessment of Term Work, Final Exam or Course Marks**

**Requests for Re-marking of Term Work**

A student who believes an individual item of work has been incorrectly or unfairly marked may request that it be re-marked. Such requests should be made initially to the instructor in the course as soon as possible after the work was returned, and no later than two weeks after it was returned.

If an instructor refuses the request to re-mark a piece of work, or if the student believes the re-marking was incorrect or unfair, the student may appeal to the Undergraduate Coordinator (e.g. Associate Chair who is acting on behalf of the Chair) of the academic unit sponsoring the course.

Requests for re-marking beyond the academic unit should be made to the Office of the Dean. Such requests about the marking of term work must be made in writing. They will be reviewed to ensure that appropriate procedures have been followed in earlier requests, that the student has been treated fairly, and that the standards applied have been consistent with those applied to other students doing the assignment. The Office of the Dean is the final level of requests for re-marking in the Faculty of Arts & Science; no further level of request is possible.

A request for re-grading of a mark beyond the instructor for term work may only be made for an item worth at least 20% of the course mark.

All requests beyond the instructor must be made in writing in a timely manner, and no later than two weeks after the work was returned, explaining why the student believes the mark was inappropriate and summarizing all previous communications in the matter.

Students making a request for remarking must accept that the resulting mark will become the new mark, whether it goes up or down or remains the same.

**Requesting a Recheck of Calculation of a Course Mark**

If a student believes that there has been an arithmetical error in calculating the course mark, a recheck can be requested. A recheck can be requested with or without requesting a photocopy or viewing of the final examination. The student must fill out a "Request for Recheck of Course Mark" form and submit it to the Office of the Faculty Registrar within six months of the final examination (see list of deadlines below). Whenever possible, the student should indicate precisely the location of the possible error. The academic unit concerned will check that the examination marks have been added correctly; the examination will not be reread. The academic unit will also check that all term work marks have been correctly calculated. There is no fee for the recheck of a course mark. If the mark is changed as a result of this review, any fees paid for an exam photocopy will be refunded.

**Requesting a Reread of Faculty Final Examination**

If a student believes that a final examination has been incorrectly marked in its substance, or that a portion of an examination has not been marked, a reread of the final examination may be requested. The student must first purchase a photocopy or request a supervised viewing of the exam. Once the exam has been reviewed by the student, a "Request for Reread of Final Examination" form must be submitted to the Office of the Faculty Registrar within six months of the final examination (see list of deadlines below). The student must demonstrate that that examination answers are substantially correct by citing specific instances of disagreement, supported by such documentary evidence as course handouts, textbooks, lecture notes, etc. The student must do more than simply assert that “I disagree with the marking,” or that “I believe I deserve more marks.” The academic unit concerned will reread the examination in light of the arguments presented. There is a $36.00 fee for this procedure, which is in addition to the fee of $15.00 charged for a photocopy of the final examination. If the mark is changed as a result of this review, both the photocopy fee (if paid) and the reread fee will be refunded. It should be noted that when a course is failed, the examination must be reread before the mark is reported.

NOTE: A recheck or reread may result in a raised mark, a lowered mark, or no change. By requesting a reread or recheck a student agrees to abide by the outcome.

For some examinations, particularly those with multiple-choice questions and/or those designed to be read mechanically, there may be an answer key that is essential to the understanding of the marking of the examination. In such cases, an answer key should be included with the photocopy of the exam. If it is not, the student may contact the relevant department to see if one is available.

Forms are available at the Office of the Faculty Registrar, or [online](#).

### Withdrawal and Return from Absence

#### Cancelling Registration

Students who wish to cancel all their current courses in the Fall/Winter Session or in the Summer Session, and who do not intend to enrol in any other courses for the rest of the Session, can cancel their registration on ACORN. If a student is unable to cancel their registration on ACORN, the student can contact their College Registrar’s Office.

Cancellation of registration only occurs when all courses are cancelled by the deadline to cancel courses without academic penalty. If any courses remain on a student’s record for the academic session – a final mark, CR/NCR, P/FL, LWD or WDR – the registration for that Session cannot be cancelled. If a student has a question about a possible refund of their tuition, the student can contact their College Registrar's Office.

When cancelling their registration, students must:

1. Pay any outstanding fees;
2. Return any books to the Library and pay any outstanding fines;
3. Vacate any laboratory or athletic lockers and return any equipment in their possession.

Please note: Students who have not achieved final standing (a final passing mark/P/CR) in at least one course in the Faculty of Arts & Science who cancel their registration must re-apply for admission through the Ontario Universities Application Centre if they wish to return in the future.

#### Undergraduate Leave of Absence Policy for International Students

An approved leave of absence will be permitted for international undergraduate Faculty of Arts & Science students who have completed at least one academic term (e.g. Fall 2020 or Winter 2021), whose current academic standing is in good standing or on academic probation, and who have no outstanding financial obligations to the University. Students may request a leave at their College Registrar’s Office, for the Fall term, the Winter term, or the complete Fall/Winter session, for up to a maximum of two consecutive Fall/Winter sessions.

Newly admitted students are not eligible for a leave of absence and should instead, if relevant, request a deferral of admission.

Students may request a leave for the following reasons:

- Serious health, personal or family issues
- Issues related to child birth or child care
- Military service
- Financial issues

Students may extend an approved leave of absence for up to a maximum of two consecutive Fall/Winter sessions. An extension beyond two consecutive Fall/Winter sessions will not be approved; students may choose to continue a leave but it will not be considered an approved leave of absence.

While on approved leave, students do not pay any tuition, incidental, or ancillary fees; are not permitted to enrol in courses or register in the Faculty; are not considered for scholarships or awards; and cannot access University services (with the exception of their College Registrar’s Office), participate in student internships, or undertake undergraduate research. A student who has been granted an approved leave of absence under this policy is not exempt from academic deadlines, financial responsibilities, current or future policies, and fees schedules.

To initiate a return to studies, students should contact their College Registrar’s Office at least one month in advance of the term or session in which they plan to resume their studies.
Return from Absence

Students who were previously registered as degree or non-degree students in the Faculty of Arts & Science, who have completed at least one course in the Faculty, and who have not been registered in the Faculty for at least 12 months must submit an application for re-registration through their College Registrar’s Office. Students who previously studied as non-degree visiting students do not request re-registration. They must submit a new visiting student application and valid letter of permission through Woodsworth College.

Students who were previously registered in the Faculty but who did not achieve final standing (e.g. a final grade or CR/NCR) in at least one course must re-apply for admission through the Ontario Universities Application Centre.

Students with outstanding accounts may not re-register at the University until these accounts are paid.

The recommended timeframe to submit an application for re-registration is a minimum of two weeks prior to course enrolment for the relevant session. Course enrolment for the Fall/Winter session begins in July; course enrolment for the Summer session begins in March. Although applications for re-registration will continue to be accepted after these dates, please note that if enrolment has already started some courses may no longer have space.

It is recommended that students planning to re-register make an appointment with an advisor in their College Registrar’s Office to discuss their academic plans, their degree and program requirements, and any changes in Faculty policies or procedures since their last registration.

Rights & Responsibilities

Student Rights and Responsibilities

As members of the University of Toronto community, students assume certain responsibilities and are guaranteed certain rights and freedoms.

The University has several policies that are approved by the Governing Council and which apply to all students. The University will assume that each student has become familiar with the policies. The rules and regulations of the Faculty of Arts & Science are listed in this calendar. In applying to the Faculty, the student assumes certain responsibilities to the University and the Faculty and, if admitted and registered, will be subject to all rules, regulations and policies cited in the calendar, as amended from time to time.

A directory of the policies, guidelines and resources that relate to your conduct as a student at the University of Toronto can be found on the Office of the Vice-Provost, Students website.

All University policies can be found in the Governing Council Policies website.

E-Mail Address

Students of the University of Toronto have access to the Information Commons, which is their passport to their University of Toronto affiliated e-mail, libraries and Internet access while on campus. Once a student has their TCard, they must activate their University of Toronto e-mail account. Setting up a UTmail+ account is mandatory; see "University Policy on Official Correspondence with Students".

Mailing Address

Address information (mailing and permanent) must be viewed and updated on ACORN. It is the student’s responsibility to ensure that the mailing address is kept up-to-date on ACORN.

Sanctions on Account of Outstanding Obligations

As per the Governing Council’s policy on Academic Sanctions for Students who have Outstanding University Obligations, the following are recognized University obligations:

- tuition fees
- academic and other incidental fees
- residence fees and other residence charges
- library fines
- Bookstore accounts
- loans made by colleges, faculties or the University
- Health Service accounts
- unreturned or damaged instruments, materials and equipment
- orders for the restitution, rectification or the payment of damages, fines, bonds for good behaviour, and requirement of public service work imposed under the authority of the Code of Student Conduct.

The following academic sanctions are imposed on Arts & Science students who have outstanding recognized University obligations:

- Official transcripts of record will not be issued.
- The University will not release the diploma nor provide confirmation of degree status to external enquirers.
- Graduands who have an outstanding balance will be allowed to walk on stage and have their names appear on the convocation program but will not receive their diploma until their account is paid.
- Registration will be refused to a continuing or returning student.
- Official letters (e.g., confirmation of graduation, QECO) will not be issued.
- Education verifications may not be issued.

Payments made by continuing or returning students will first be applied to outstanding University debts and then to current fees.

Scientific Observations

In biological and science programs, there may be occasions when scientific observations are made by students on themselves or on fellow students. These include common diagnostic or immunization procedures. Unless a valid reason exists, students are expected to participate in such exercises. If any investigative work involving student participation does not form part of the program, participation is voluntary.
Academic Record

Students are able to check their course results, grade point averages, and academic standing by accessing their academic record online through ACORN. Final course results will be available for viewing on ACORN as soon as possible after they are received and posted by the Office of the Faculty Registrar. Note that academic status is only assessed at the end of the Fall/Winter session and the end of the Summer session.

Students not in good standing (i.e. on probation, or suspended, or refused further registration) will receive notification by email to their UTMail+ account.

The University’s Policy on Access to Student Academic Records can be found on the Governing Council website.

TCard

The TCard is the official University of Toronto student ID card, bearing student information including name, student number, and image. It serves various functions, including library card, meal plan card & access card (if applicable). It is used for identification purposes within the University, such as Faculty examinations, student activities, and Athletic Association privileges.

Detailed Information about the TCard, such as applying for a new card, reporting a loss card, and usage can be found in the TCard Office website.

Transcripts and Course Descriptions

The transcript of a student’s record reports their complete registration history at the university including courses in progress and the standing in all courses attempted along with course average, information about the student’s academic standing including records of suspension and refusal of further registration, any current academic sanctions if relevant, completion of program(s) at the time of graduation, and conferral of the degree.

The University of Toronto issues consolidated transcripts, including a student’s total academic record at the University. However, graduate students who were previously enrolled at the University of Toronto as an undergraduate student may request that only the graduate portion of their record be issued. Students may request their transcript online on ACORN. Further information can be obtained on the Transcript Centre Office’s website. Copies of course descriptions are issued at the student’s request.

University Rights and Responsibilities

Changes in Programs of Study and/or Courses

The programs of study and courses that are listed in our Calendar are available for the year(s) to which the Calendar applies. They may not necessarily be available in later years or offered in all years. If the University or the Faculty must change the content of programs of study or courses or withdraw them, all reasonable possible advance notice will be given. The University will not, however, be liable for any loss, damages, or other expenses that such changes might cause.

For each program of study offered by the University through the Faculty, the courses necessary to complete the minimum requirements of the program will be made available annually. The Faculty reserves the right otherwise to change the content of courses, instructors and instructional assignments, enrolment limitations, prerequisites and co-requisites, grading policies, requirements for promotion and timetables without prior notice.

Copyright in Instructional Settings

If a student wishes to tape-record, photograph, video-record or otherwise reproduce lecture presentations, course notes or other similar materials provided by instructors, they must obtain the instructor’s written consent beforehand. Otherwise all such reproduction is an infringement of copyright and is absolutely prohibited.

Note that where such permission is granted by the instructor, materials reproduced are for the student’s individual private use only, not for further reproduction or publication.

In the case of private use by students with disabilities, the instructor’s consent will not be unreasonably withheld.

Enrolment Limitations

The University makes every reasonable effort to plan and control enrolment to ensure that all of our students are qualified to complete the programs to which they are admitted, and to strike a practicable balance between enrolment and available instructional resources. Sometimes such a balance cannot be struck and the number of qualified students exceeds the instructional resources that we can reasonably make available while at the same time maintaining the quality of instruction. In such cases, we must reserve the right to limit enrolment in the
programs, courses, or sections listed in the Calendar, and to withdraw courses for which enrolment or resources are insufficient. The University will not be liable for any loss, damages, or other expenses that such limitations or withdrawals might cause.

Fees and Other Charges

The University reserves the right to alter the fees and other charges described in the Calendar by approval of the Governing Council.

Notice of Collection of Personal Information: Freedom of Information and Privacy Act

The University of Toronto respects your privacy.

Personal information that you provide to the University is collected pursuant to section 2(14) of the University of Toronto Act, 1971.

It is collected for the purpose of administering admissions, registration, academic programs, university-related student activities, activities of student societies, safety, financial assistance and awards, graduation and university advancement, and reporting to government.

The University is also required to report student-level enrolment-related data to the Ministry of Training, Colleges and Universities as a condition of its receipt of operating grant funding. The Ministry collects this enrolment data, which includes limited personal information such as Ontario Education Numbers, student characteristics and educational outcomes, in order to administer government postsecondary funding, policies and programs, including planning, evaluation and monitoring activities.

At all times it will be protected in accordance with the Freedom of Information and Protection of Privacy Act. If you have questions, please refer to www.utoronto.ca/privacy or contact the University Freedom of Information and Protection of Privacy Coordinator at McMurrich Building, room 104, 12 Queen's Park Crescent West, Toronto, ON, M5S 1A8.

Person I.D. (Student Number)

Each student at the University is assigned a unique identification number. The number is confidential. The University strictly controls access to Person I.D. numbers. The University assumes and expects that students will protect the confidentiality of their Person I.D.’s.
Research Opportunities Program: 299Y1/399Y1 Courses

Director: Randy Boyagoda, Vice-Dean, Undergraduate
Contact: Christine Ovcaric, Experiential Learning Officer (experiential.artsci@utoronto.ca)

The Research Opportunities Program (ROP) provides an opportunity for Arts & Science (St. George) degree students in their second and third year (i.e. after completing at least 4 but not more than 16 credits) to earn one course credit by participating in a faculty member’s research project. Each 299Y1/399Y1 course has a program-specific designator, such as ANT, CLA, CSB, VIC, etc. Not all departments or programs will necessarily participate in the ROP each year.

Students can participate in only one 299Y1 project and/or one 399Y1 project, and students may not participate in a 299Y1 and a 399Y1 in the same Academic year or with the same Faculty supervisor. Students apply to ROP projects and are informed in mid-April whether they have been accepted. Successful applicants are registered by the Office of Experiential Learning & Outreach Support. Regular tuition fees apply for ROP enrollment.

Assessment and grading methods are determined by individual faculty members and may differ between projects. Students are typically expected to present a poster of their work at the Annual Arts & Science Research Forum.

Exact details about ROP projects, application deadlines, eligibility, and how to apply are posted on the Faculty’s website.

Research Excursions Program: 398H0/398Y0 Courses

Director: Randy Boyagoda, Vice-Dean, Undergraduate
Contact: Christine Ovcaric, Experiential Learning Officer (experiential.artsci@utoronto.ca)

The 398 Research Excursions Program (REP) provides an opportunity for Arts & Science (St. George) degree students in their third year (i.e. after completing at least 9 but not more than 16 credits) to participate in a practical or experiential research activity under the supervision of a faculty member. The practical, experiential component can take the form of research/learning in archives, laboratories, libraries, or in a field camp, etc.—but not in a classroom at another university (that is covered by the Faculty’s summer abroad and exchange programs). The projects run within the May-August period, when both Faculty and students can make the time commitments necessary. Regular tuition fees apply.

Each 398H0/398Y0 has a program-specific designator, such as ANT, CLA, CSB, VIC, etc., and would be eligible to count towards program completion if the program sponsor (Chair or Director) so chooses. A limited number of 398H0/398Y0 courses are available each year. Faculty supervisors propose the projects and choose students from those who apply.

Applications for summer 2021 REPs will open in February 2021 and close in March 2021. Exact details about REP application deadlines, eligibility, course offerings and how to apply are posted on the Faculty’s website.

Faculty of Arts & Science-Funded International Programs

Director: Randy Boyagoda, Vice-Dean, Undergraduate
Contact: Christine Ovcaric, Experiential Learning Officer (experiential.artsci@utoronto.ca)

In an effort to provide opportunities to as many students as possible, for Faculty of Arts & Science-funded programs priority will be given to those students who have not previously received funding for these programs. All participants must be current Arts & Science (St. George) degree students in good standing, and their eligibility must be confirmed by the Experiential Learning & Outreach Support Office prior to acceptance to the program. Participation in a Faculty-funded program does not affect participation in Summer Abroad or student exchange opportunities.

International/Indigenous Course Module (ICM)

The Faculty of Arts & Science’s International/Indigenous Course Module (ICM) provides an opportunity for faculty members to incorporate an intensive international or Indigenous experiential module into the framework of existing undergraduate courses. The ICM is designed to enhance students’ classroom learning in a wide range of areas through the application of course content to relevant settings and communities around the globe. ICMs are selected in late May and take place over Reading Week the following November or February. Students’ participation in the ICM may be incorporated into the final course grade. In many cases, ICM participants share their experiences with the wider Arts & Science community through publications, presentations or web-based resources.
Locations: Courses and locations for Reading Week in the upcoming November or February will be posted in June on the Faculty of Arts & Science Current Students page. Interested students can view stories and highlights of previous ICMs on the Learning Abroad website.

Courses: Past ICMs have examined the role of political changes in the Republic of Georgia, geologic evolution and mining in Spain, historical biography in Uganda and urbanization in China.

Cost: Faculty of Arts & Science provides funding for students’ and faculty airfare, accommodation and local transportation. Students may be asked to contribute a deposit towards the ICM, but amounts are capped at $200.00.

Eligibility: A limited number of ICMs are offered each year and the program is only available to undergraduate Arts & Science (St. George) degree students enrolled in the course(s) in which the module is proposed.

Application: Upcoming ICMs and their corresponding courses will be listed on the Arts & Science website. Students express interest to participate in the ICM through the course professor. Once they are enrolled and faculty members will be responsible for selecting student participants.

If you are interested in working with a faculty member to create an ICM for a course, and for all questions related to the ROP, REP, and ICM programs, please contact: experiential.artsci@utoronto.ca

Undergraduate Research Fund

The Undergraduate Research Fund (URF) is funded jointly by the Arts & Science Students’ Union (ASSU) and the Faculty of Arts & Science. It provides funding for students to develop a research project of their own, for which there is no other available funding. The fund is open to all Arts & Science undergraduate students in good academic standing and no minimum GPA is required. Research projects must be initiated by students, related to their degree, and supervised by a faculty member with a continuing appointment in the Faculty of Arts and Science either through a regular course, an independent study, a research essay, or other academic project. For application forms and further information, please see the URF website.

For further information please contact: undergrad.awards@artsci.utoronto.ca
Academic Bridging Program

Faculty List

Director
T. Socknat, MA, Ph D

Associate Professors, Teaching Stream
W. B. MacDonald, BA, MA
T. Mortitz, MA, Ph D
J. B. Rose BA, MA

Introduction

The Academic Bridging Program allows individuals, who have been away from formal education for some time and are at least 19 years of age, to pursue degree studies at the University of Toronto. The courses in the program are designed to help ease the transition into first-year university courses in the Faculty of Arts and Science after time away from prior education.

Courses feature study skills, essay writing skills, library research skills and the methodology of the specific academic discipline involved. Students are admitted by Woodsworth College to non-degree studies in the Academic Bridging Program and are enrolled in Woodsworth College courses. Both part-time and full-time options are available to students.

Students who successfully complete the Academic Bridging Program, earning a grade of 63% or above, are admitted to the Faculty of Arts and Science, at the University of Toronto, with at least one full credit towards their degree for those who complete the part-time Academic Bridging Program. Students who complete the full-time program may transfer up to two full credits towards their degree.

Program Learning Objectives

Develop Academic Skills:
• students learn clear, mature and reflective spoken and written communication
• students learn critical analytical reading, thinking and writing
• students learn basic information literacy and good academic work habits and study skills

Understand University Culture:
• students learn appropriate classroom protocol
• students learn to use classroom technology
• students learn to access university resources

Enhance Life Skills:
• students learn to assess their personal and academic strengths and weaknesses, and readiness for university
• students learn to develop an appreciation of lifelong learning in and out of the classroom
• students learn to think and act independently and responsibly

The program is offered in the Fall, Winter and Summer sessions. To find out more about the program please contact the Academic Bridging Program office.

Academic Bridging Program Courses

ABP100Y1 - Introduction to Academic Studies

Hours: 72S

This interdisciplinary, skills-focused course parallels the other component courses of the full-time Academic Bridging Program, supplementing those courses and helping students integrate their entire Academic Bridging experience, while providing intensive, workshop-style training in the fundamental skills needed for success in further university studies in the Humanities and Social Sciences. The course will also provide academic advising and planning, to help students understand and navigate university culture. Open only to Academic Bridging Program students. Not eligible for CR/NCR option.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1); Society and its Institutions (3)

ABP101Y1 - Introduction to Academic Studies in the Sciences

Hours: 72S

This interdisciplinary, skills-focused course parallels the other component courses of the full-time ABP Science Option, supplementing those courses and helping students integrate their entire Academic Bridging experience, while providing intensive, workshop-style training in the fundamental skills needed for success in further university studies in Mathematics and the Sciences. The course will also provide academic advising and planning, to help students understand and navigate university culture. Open only to Academic Bridging Program students. Not eligible for CR/NCR option.

Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)
WDW101Y1 - Decentring "Canada"

Previous Course Number:  
Hours: 72L

This course centres diverse, under-acknowledged narratives of people, such as Indigenous and racialized peoples, within the territories of "Canada" to challenge monolithic, linear, and uncritical representations of this country's history and future. Archival materials, maps, place names, art, literature, film, and other texts will be approached from interdisciplinary perspectives to reveal different orientations to historical events, social injustices, and futures of this territory. Open only to Academic Bridging Program students. Not eligible for CR/NCR option.

Distribution Requirements: Humanities  
Breadth Requirements: Society and its Institutions (3)

WDW102Y1 - Contemporary Canada

Previous Course Number: JWU100Y1  
Hours: 72L

This interdisciplinary, foundational course provides an introduction to contemporary Canadian society. The course includes the study of geography, politics, literature and culture through a historical framework of the twentieth century. It also emphasizes particular themes including indigenous issues, Quebec nationalism, gender/women’s issues and immigration/multiculturalism. Open only to Academic Bridging Program students. Not eligible for CR/NCR option.

Exclusion: JWU100Y1  
Distribution Requirements: Humanities; Social Science  
Breadth Requirements: Creative and Cultural Representations (1); Society and its Institutions (3)

WDW103Y1 - Introduction to the Study of Literature

Previous Course Number: ENG185Y1  
Hours: 72L

This discipline based, writing intensive course introduces essential rhetorical and critical skills, focusing on how to recognize major literary forms and how to read and analyze outstanding classic and contemporary literary works of drama, poetry and fiction. Open only to Academic Bridging Program students. Not eligible for CR/NCR option.

Exclusion: ENG185Y1  
Distribution Requirements: Humanities  
Breadth Requirements: Creative and Cultural Representations (1)

WDW104Y1 - Introduction to Environmental Studies

Hours: 72L

This interdisciplinary course introduces the major issues regarding the sustainability of the global environment in the face of human development by integrating humanities and social science with the fundamental concept of environmental science. It examines major environmental problems, such as rapid climate change and land degradation as well as the role and impact of government, economics, and ethics on environmental issues. Open only to Academic Bridging Program students. Not eligible for CR/NCR option.

Distribution Requirements: Social Science  
Breadth Requirements: Society and its Institutions (3)

WDW105Y1 - Indigenous Cultures and Societies

Hours: 72L

This course provides an interdisciplinary focus on key topics relevant to Indigenous communities, historically and in the present. Students will be introduced to diverse cultures, communities, and worldviews of Indigenous peoples of Turtle Island (particularly Canada) and how they have been affected by colonialism. Emphasis will be placed on the ways Indigenous peoples are resisting social, economic, political, and environmental injustices, while revitalizing their identities, knowledges, and communities and creating space for the expression of Indigenous voices.

Storytelling that prioritizes the perspectives and worldviews of Indigenous peoples will guide students' learning about course topics, issues, and concepts. Students will be encouraged to connect their own storied identities and perspectives to course themes and issues. Classes will involve a mix of interactive lectures, class discussion, student-led learning opportunities, and field trips. Class time and assignments will also be devoted to helping students build their critical thinking, reading, and writing skills towards the completion of a research-based essay due at the end of the year. Open only to Academic Bridging Program students. Not eligible for CR/NCR option.

Distribution Requirements: Humanities  
Breadth Requirements: Society and its Institutions (3)
WDW106Y1 - Media, Culture, and Society

Hours: 72L

This interdisciplinary course provides an introduction to the cultural and social impacts of present-day popular mass media. Themes explored include the economic and political forces that shape the media world, the role of technology, and issues of representation, gender, and social justice. The course examines a wide range of texts, emphasizing popular culture produced in Canada, and students will have the opportunity to draw extensively on their own interactions with popular media. Open only to Academic Bridging Program students. Not eligible for CR/NCR option.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

WDW107Y1 - Introduction to University Studies in Mathematics

Hours: 72L

This course focuses on mathematical concepts and skills needed for success in First Year university Math and Science courses. Students will develop quantitative reasoning abilities required to critique arguments and make decisions, and will gain a deep understanding of functions modeling relationships. The course highlights multiple representations of each topic, emphasizing connections, and workshop-style sessions enable students to strengthen the skills they learn. Open only to Academic Bridging Program students. Not eligible for CR/NCR option.

Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

WDW108Y1 - Introduction to University Studies in Chemistry

Hours: 72L

This course covers the fundamental knowledge and skills needed for success in First Year university Chemistry and other Sciences such as Biology. Topics include atoms, elements, and compounds; the chemical and physical properties of gases, liquids, and solids; chemical reactions; and the importance of chemistry in understanding the world around us, with attention to how it can address issues in medicine, the environment, and sustainability. Open only to Academic Bridging Program students. Not eligible for CR/NCR option.

Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

**Introduction**

Actuarial Science is based upon the application of mathematical techniques to reduce the impact of such hazards as loss of income through death, disability, or retirement, or loss of property through fire, accident, or theft. Actuaries are the chief architects of life, health, and property insurance plans, and pension plans, and bear the major responsibility for their financial soundness. By using concepts from the areas of probability and finance, actuaries model, forecast and value the costs of benefits that will be provided to the participants in such plans. Methods developed for modeling insurance risk can also be applied to modeling investment risk, and actuaries apply their expertise to the valuation of sophisticated investment vehicles such as options on equities, bonds and other investment derivatives. ACT230H1 and ACT240H1, though somewhat technical, are courses of interest to a wide audience, since almost every student will from time to time be either a saver or a borrower, and will be covered by insurance and pension plans. Other actuarial courses deal with more specialized topics, and are generally taken by students with a more serious interest in the field or who want to pursue a career as an actuary. Professional accreditation as an actuary is obtained via the Canadian Institute of Actuaries by passing a series of examinations set by the Society of Actuaries or the Casualty Actuarial Society. University of Toronto’s Actuarial Science program is accredited by the Canadian Institute of Actuaries and some professional requirements can be satisfied through courses in the actuarial program.

Actuarial Science Programs

Actuarial Science Specialist (Science Program) - ASSPE0608

Description:

This program is designed to prepare a student for professional work as an actuary, and more generally in the financial risk management industry.

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

Completed courses (with minimum grades)
The following courses with the stated minimum grades are required:

• MAT137Y1 (63%)/ MAT157Y1 (60%)
• ACT240H1 (70%), ACT245H1 (70%) and ACT247H1 (70%)

Completion Requirements:

The following requirements are effective as of March 1, 2020.

(13.0 credits)

First Year:

1. MAT137Y1 (63%)/ MAT157Y1 (60%)
2. MAT223H1/ MAT240H1 (should be taken in first year, enforced as a prerequisite for MAT237Y1)
3. ECO101H1, ECO102H1

To be completed before the end of Second Year:

1. STA130H1 (strongly recommended to be taken in the first year, due to priority enrollment given to first-year students)
2. CSC108H1/ CSC120H1/ CSC148H1. A student who has completed CSC110Y1 also fulfills this program requirement.

Second Year:

1. ACT240H1 (70%), ACT245H1 (70%), ACT247H1 (70%)
2. MAT237Y1/MAT257Y1
3. STA257H1, STA261H1
4. MGT201H1

Higher Years:

1. A set of mandatory courses (3.5 credits): ACT348H1, ACT370H1, ACT451H1, ACT452H1, STA302H1, STA314H1, ACT350H1
2. 2.0 credits to be selected from lists 1 and 2 (students can only use at a maximum 1.0 credit from list 2, the practice oriented courses, to fulfill program requirements):
   (1) ACT349H1, ACT371H1, ACT455H1, ACT460H1, ACT466H1, STA457H1, STA414H1, and
   (2) ACT372H1, ACT470H1, ACT471H1, ACT473H1, ACT479H1.

3. Professional Experience Course ACT390H1: students are strongly recommended to complete this course in the Fall semester of the third year.

NOTES:

• In order to enroll in ANY 300- or 400-level ACT course, the minimum grade of C must be obtained in each of ACT240H1, ACT245H1 and ACT247H1. The enrolment requirements and the prerequisites for all ACT courses will be strictly enforced.
• Students who have an interest in pursuing studies in mathematical finance should consider taking MAT244H1, MAT336H1/ MAT337H1 and APM346H1. Students in the Actuarial Science Specialist Program who have successfully completed ACT348H1 and ACT349H1 may request to enroll in the following RSM courses (provided the appropriate prerequisites and corequisites are met): RSM430H1, RSM433H1, RSM437H1, MAT246H1 is recommended (not required) for students in the Actuarial Science Specialist Program.
• Wherever possible, the expectation is that the student will be paid based on industry standards for the duration of the work term.

Actuarial Science Major (Science Program) - ASMAJ0608

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

Completed courses (with minimum grades)
The following courses with the stated minimum grades are required:

• MAT137Y1 (63%)/ MAT157Y1 (60%)

Completion Requirements:

(8.5 credits)

First Year:

1. MAT137Y1 (63%)/ MAT157Y1 (60%)
2. MAT223H1/ MAT240H1 (should be taken in first year, enforced as a prerequisite for MAT237Y1)

To be completed before the end of Second Year:

3. STA130H1 (strongly recommended to be taken in the first year, due to priority enrollment given to first-year students)
4. CSC108H1/ CSC120H1/ CSC148H1. A student who has completed CSC110Y1 also fulfills this program requirement.

Higher Years:

5. ACT240H1, ACT245H1, ACT247H1, ACT348H1, ACT370H1
6. MAT237Y1/MAT257Y1
7. STA257H1, STA261H1
8. ACT451H1, ACT452H1, STA302H1

STA314H1 is strongly recommended.
NOTES:

- In order to enroll in ANY 300- or 400-level ACT course, the minimum grade of C must be obtained in each of ACT240H1, ACT245H1, and ACT247H1. The enrolment requirements and the prerequisites for all ACT courses will be strictly enforced.
- Students who have an interest in pursuing studies in mathematical finance should consider taking MAT244H1, MAT337H1, MAT336H1, and APM346H1.
- Students interested in actuarial practices should consider taking ACT371H1, ACT372H1, ACT470H1, ACT471H1, ACT473H1, and ACT475H1.

Actuarial Science Courses

ACT199H1 - Decipher Financial Puzzles in the Media and Pop Culture

Hours: 24L

Have you ever watched a pundit’s passionate rant over financial crisis on TV and wondered whether he was right or wrong? Did you get the full story after watching movies like Margin Call or The Big Short? What was the efficiency market versus behavioral finance debate all about? Did you wonder why everyone in the financial press seem to be calling for a lower debt/equity ratio on banks in the post-crisis era? If you find yourself think about those questions, this is the course for you. We will start from some basic building blocks of finance, such as time value of money and discounting, and proceed to look at some of the important financial controversies you have read or heard in the pop culture or media. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: The Physical and Mathematical Universes (5)

ACT230H1 - Mathematics of Finance for Non-Actuaries

Hours: 24L/12T

Introduction to financial mathematics, interest measurement, present value calculation, annuity valuation, loan amortization, consumer financing arrangements, bond valuation. The course is aimed at a general audience who will not be continuing in the actuarial science program. Course manuals fee: $30.

Prerequisite: First-year Calculus
Exclusion: ACT240H1
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

ACT240H1 - Mathematics of Investment & Credit

Hours: 24L/12T

Interest, discount and present values, as applied to determine prices and values of annuities, mortgages, bonds, equities; loan repayment schedules and consumer finance payments in general; yield rates on investments given the costs on investments. Course manuals fee: $45.

Prerequisite: MAT137Y1 (minimum grade 63%)/MAT157Y1 (minimum grade 60%)
Exclusion: ACT230H1
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

ACT245H1 - Financial Principles for Actuarial Science I

Hours: 24L/12T

Term structure of interest rates, cashflow duration, convexity and immunization, forward and futures contracts, interest rate swaps, introduction to investment derivatives and hedging strategies.

Prerequisite: ACT240H1, MAT137Y1 (minimum grade 63%)/MAT157Y1 (minimum grade 60%)
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

ACT247H1 - Introductory Life Contingencies

Hours: 36L

Probability theory applied to survival and to costs and risks of life assurances, life annuities, and pensions; analysis of survival distributions; international actuarial notation. Course manuals fee: $35.

Prerequisite: ACT240H1: MAT137Y1 (minimum grade 63%)/MAT157Y1 (minimum grade 60%); STA257H1
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)
ACT348H1 - Advanced Life Contingencies

Hours: 36L

Determination of benefit premium and benefit reserves for life insurance and annuities; analysis of insurance loss random variables; theory of life contingencies for multiple lives. Course manuals fee: $40.

Prerequisite: ACT240H1 (minimum grade C); ACT245H1 (minimum grade C); ACT247H1 (minimum grade C); (STA257H1,STA261H1); MAT237Y1/MAT257Y1

Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

ACT349H1 - Corporate Finance for Actuarial Science

Hours: 24L/12T

Actuarial applications of financial mathematics and economics.

Prerequisite: ACT240H1 (minimum grade C); ACT245H1 (minimum grade C); ACT247H1 (minimum grade C); (STA257H1, STA261H1); MAT237Y1/MAT257Y1

Exclusion: ECO358H1, ECO359H1 , RSM332H1 , RSM333H1

Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

ACT350H1 - Applied Probability for Actuarial Science

The course offers an introduction to elementary probability theory and stochastic processes. The main goal of the course is to help actuarial students understand the concept of stochastic processes with particular emphasis on Markov chains that are of great importance in Life Contingencies and Property and Casualty insurance.

The course will cover the following topics: a basic review of probabilities with emphasis on conditional probabilities and expectations, discrete time Markov chains, Poisson processes, continuous time Markov chains, renewal theory and some applications, queueing theory.

Prerequisite: ACT240H1 (minimum grade 63%); ACT245H1 (minimum grade 63%); ACT247H1 (minimum grade 63%); STA257H1; MAT237H1/MAT240H1, MAT237Y1/MAT257Y1

Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

ACT370H1 - Financial Principles for Actuarial Science II

Hours: 36L

Mathematical theory of financial derivatives, discrete and continuous option pricing models, hedging strategies and exotic option valuation.

Prerequisite: ACT240H1 (minimum grade C); ACT245H1 (minimum grade C); ACT247H1 (minimum grade C); (STA257H1,STA261H1); MAT237Y1/MAT257Y1

Exclusion: RSM435H1

Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

ACT371H1 - Basic Reserving Methods For P&C Insurance

Hours: 24L/12T

Topics covered include reserving data and triangles, diagnoses methods that range from triangle of ratios of paid claims to reported claims to triangle of reported claim ratios. The syllabus also includes projection techniques. Not eligible for CR/NCR option.

Prerequisite: ACT240H1, STA257H1

Recommended Preparation: None

Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

ACT372H1 - Basic Ratemaking Methods For P&C Insurance

Hours: 24L/12T

This course covers the basic ratemaking methods for P&C insurance. It assumes that students are familiar with traditional reserving diagnoses and projection methods. The syllabus would introduce concepts related to earning of exposures, on-level factors, catastrophe loading, large loss loading and credibility. Not eligible for CR/NCR option.

Prerequisite: ACT371H1

Recommended Preparation: None

Distribution Requirements: Science
**ACT390H1 - Professional Experience in Actuarial Science**

**Hours:** 24S

The professional experience is a mandatory course in the actuarial science Specialist program, in preparation for an internship work term after the PE course is completed. It includes various professional skill workshops, networking activities and an invited industry speaker series. (No tuition fee associated, however an ancillary fee of $550 will be assessed towards Professional Experience preparatory program costs.)

**Prerequisite:** Enrolment in the Actuarial Science Specialist.

**Distribution Requirements:** Science

**Breadth Requirements:** The Physical and Mathematical Universes (5)

**ACT398H0 - Research Excursions**

An instructor-supervised group project in an off-campus setting.

Details at [https://www.artsci.utoronto.ca/current/academics/research-opportunities/research-excursions-program](https://www.artsci.utoronto.ca/current/academics/research-opportunities/research-excursions-program). Not eligible for CR/NCR option.

**Distribution Requirements:** Science

**Breadth Requirements:** The Physical and Mathematical Universes (5)

**ACT398Y0 - Research Excursions**

An instructor-supervised group project in an off-campus setting.

Details at [https://www.artsci.utoronto.ca/current/academics/research-opportunities/research-excursions-program](https://www.artsci.utoronto.ca/current/academics/research-opportunities/research-excursions-program). Not eligible for CR/NCR option.

**Distribution Requirements:** Science

**Breadth Requirements:** The Physical and Mathematical Universes (5)

**ACT451H1 - Loss Models**

**Hours:** 36L

Loss models policy adjustments, frequency and severity models, compound distributions.

**Prerequisite:** STA257H1

**Distribution Requirements:** Science

**Breadth Requirements:** The Physical and Mathematical Universes (5)

**ACT452H1 - Loss Models II**

**Hours:** 36L

**Prerequisite:** STA261H1, ACT451H1

**Distribution Requirements:** Science

**Breadth Requirements:** The Physical and Mathematical Universes (5)

**ACT455H1 - Advanced Topics in Actuarial Science**

**Hours:** 36L

Advanced life contingencies, multiple decrement theory, insurance policy expenses, multi-state transition models, Poisson processes.

**Prerequisite:** ACT348H1; ACT350H1/STA347H1

**Distribution Requirements:** Science

**Breadth Requirements:** The Physical and Mathematical Universes (5)

**ACT460H1 - Stochastic Methods for Actuarial Science**

**Hours:** 36L

Applications of the lognormal distribution, Brownian motion, geometric Brownian motion, martingales, Ito's lemma, stochastic differential equations, interest rate models, the Black-Scholes model, volatility, value at risk, conditional tail expectation.

**Prerequisite:** ACT350H1/STA347H1. (ACT370H1 strongly recommended)

**Distribution Requirements:** Science

**Breadth Requirements:** The Physical and Mathematical Universes (5)
ACT466H1 - Credibility and Simulation

Hours: 36L

Limited fluctuation credibility, Bayesian estimation, Buhlmann credibility, non-parametric credibility methods, inverse transformation simulation method, specialized simulation methods for the normal and lognormal distributions, Monte Carlo methods, the bootstrap method.

Prerequisite: ACT451H1, STA261H1, ACT350H1/STA347H1
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

ACT470H1 - Advanced Pension Mathematics

Hours: 36L

Topics in pension mathematics; funding methods for pension plans. (Offered in alternate years)

Prerequisite: ACT348H1 or permission of instructor
Corequisite: ACT455H1
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

ACT471H1 - Topics in Casualty Actuarial Science

Hours: 36L

This course will cover advanced ratemaking methods for P&C insurance. It includes topics such as commercial insurance pricing, catastrophic pricing, reinsurance pricing and GLM applications to P&C insurance.

(Offered in alternate years)

Not eligible for CR/NCR option.

Prerequisite: permission of instructor
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

ACT473H1 - Issues In Actuarial Practice

Hours: 24L/24T

Case study approach to current issues in life insurance, pension consulting and casualty actuarial practice. The focus of the course will be on communication and presentation. This course is Pass/Fail. Not eligible for Credit/No Credit. The course is open to students in the specialist program in actuarial science. Students in the major program in actuarial science can enrol into the course with permission of the department.

Prerequisite: ACT348H1, ACT349H1
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

ACT475H1 - Insurance Products and Regulation with AXIS

Hours: 36L

Case studies using leading actuarial application AXIS. Examine key types of insurance products and their pricing and valuation. Review representative developments in insurance regulations in US, Europe and Canada. Other topics include a brief introduction of the use of AI in life insurance.

Prerequisite: ACT240H1, ACT245H1, ACT247H1
Corequisite: ACT348H1
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

ACT496H1 - Readings in Actuarial Science

Independent study under the direction of a faculty member. Persons wishing to take this course must have the permission of the Undergraduate Secretary and of the prospective supervisor. Not eligible for CR/NCR option.

Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

ACT497H1 - Readings in Actuarial Science

Independent study under the direction of a faculty member. Persons wishing to take this course must have the permission of the Undergraduate Secretary and of the prospective supervisor. Not eligible for CR/NCR option.

Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)
**ACT498Y1 - Readings in Actuarial Science**

Independent study under the direction of a faculty member. Persons wishing to take this course must have the permission of the Undergraduate Secretary and of the prospective supervisor. Not eligible for CR/NCR option.

**Distribution Requirements:** Science  
**Breadth Requirements:** The Physical and Mathematical Universes (5)

**ACT499Y1 - Readings in Actuarial Science**

Independent study under the direction of a faculty member. Persons wishing to take this course must have the permission of the Undergraduate Secretary and of the prospective supervisor. Not eligible for CR/NCR option.

**Distribution Requirements:** Science  
**Breadth Requirements:** The Physical and Mathematical Universes (5)
American Studies

Faculty List

Associate Professor and Director
Nic Sammond

Lecturer
Alexandra Rahr, Ph.D.

Introduction

The American Studies Program is designed to provide students with a broad, yet deep, education about the United States. To ensure breadth, students are required to take two interdisciplinary core courses that range widely both with respect to the themes covered and disciplinary perspectives applied. As well, the Program offers a wide selection of courses from participating departments and programs in the Faculty of Arts and Science, giving students broad exposure to fundamental themes of American life. To ensure depth, the American Studies Program relies heavily on upper level courses, including its own capstone seminars at the 400-level.

American Studies Programs

American Studies Major (Arts Program) - ASMAJ0135

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

7.0 full courses or equivalent (FCEs), specified as follows:

1. 1.0 FCE from the gateway courses in English (ENG250H1 and either ENG270H1 or ENG235H1), History (HIS271Y1), Geography (GGR240H1 and GGR254H1), or Political Science (POL386Y1), or Cinema Studies (CIN270Y1).

2. USA200H1 and USA300H1 (total of 1.0 FCE).

3. 1.0 FCE from at least three disciplinary/thematic clusters, categorized as follows (3.0 FCEs): a) Politics and Economics b) Society (Indigenous Studies, Anthropology, East Asian Studies, Geography) c) Culture (Cinema Studies, English, Music, Religion) d) History

4. 0.5 FCE in Breadth Requirement Category 5: The Physical or Mathematical Universe, or another half course approved by the CSUS Program Director, to fulfill the Quantitative Reasoning competency requirement of the program.

5. Additional eligible courses from the Recommended Courses listed on the Centre for the Study of the United States website (http://munkschool.utoronto.ca/csus/undergraduate-program) to a total of 7.0 FCEs, including requirement #4 above.

6. At least 2.0 FCEs of the student’s 7.0 FCEs must be at the 300-level or above.

7. At least 1.5 FCEs of the student’s program must be in American Studies (USA prefix courses), at the 300- or 400-level.

Recommended Sequence of Courses:

First Year:

Students are encouraged to take any pre-requisites for the gateway course required, and/or enroll directly in USA200H1 as a first year student. Of the required second-year disciplinary survey courses, only one– POL386Y1– has a pre-requisite of a course that deals substantially with politics; students interested in this course, therefore, should confer with the instructor as to whether their course work includes a pre-requisite for POL386Y1. Other recommended courses at the first year level include: HIS106Y1.

Second Year:

- USA200H1
- HIS271Y1 (or) ENG250H1 AND either ENG270H1 or ENG235H1 (or) GGR240H1 AND GGR254H1 (or) POL386Y1

Second, Third, and Fourth Years:

- USA300H1, plus other eligible courses, to a total of 7.0 FCEs.
- At least 2.0 of these courses must be at the 300-level or above.
- At least 1.5 of these courses must be in American Studies (USA prefix courses) at the 300- or 400-level. Courses must be chosen in a way that satisfies the disciplinary/thematic variety described above, plus 0.5 FCE in Breadth Requirement Category 5, or another half course approved by the CSUS Program Director, to fulfill the Quantitative Reasoning competency requirement of the program.

American Studies Minor (Arts Program) - ASMIN0135

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

(4 full courses or their equivalent, including at least one 300+ series course in at least two disciplines)

Second year:

1. 1.0 FCE from the gateway courses in English (ENG250H1 and either ENG270H1 or ENG235H1), History (HIS271Y1), Geography (GGR240H1 and GGR254H1), or Political Science (POL386Y1), or Cinema Studies (CIN270Y1).
American Studies

Third year:
2. Students must take USA200H1 (0.5 FCE).

Second, third, and fourth years:
3. 2.5 courses from the eligible courses listed below to total 4.0 FCEs.

NOTE: Other 300+ series courses with American content may be allowed; students should seek early approval of program credit for such courses.

To see our full list of American Studies courses offered in 2020-2021, please go to our website at the Centre for the Study of the United States, at the Munk School of Global Affairs & Public Policy here: https://munkschool.utoronto.ca/csus/undergraduate-program/

Courses eligible for program credit include those appearing below. Please note that some of these courses have pre-requisites; in all cases, and for updates on courses being offered, check individual department/program websites. Other 300+ series courses with American content may be allowed; students should seek early approval of program credit for such courses from the Director.

Course Groups

American Studies

- USA200H1 Introduction to American Studies
- USA300H1 Theories and Methods in American Studies
- USA310H1 Approaches to American Studies
- USA311H1 Approaches to American Studies
- USA312H1 Approaches to American Studies
- USA313H1 Approaches to American Studies
- USA400H1 Topics in American Studies
- USA401H1 Topics in American Studies
- USA402H1 Topics in American Studies
- USA403H1 Topics in American Studies
- USA494H1 Independent Studies
- USA495Y1 Independent Studies

Cinema Studies

- CIN211H1 Science Fiction Film
- CIN230H1 The Business of Film
- CIN270Y1 American Popular Film since 1970
- CIN310Y1 Avant-Garde and Experimental Film
- CIN334H1 The Origins of the Animation Industry, 1900-1950: A Technosocial History
- CIN335H1 American Animation after 1950
- CIN374Y1 American Filmmaking in the Studio Era
- CIN431H1 Advanced Study in Cinema as Social and Cultural Practice
- CIN490Y1 Independent Studies in Cinema
- CIN491H1 Independent Studies in Cinema
- CIN492H1 Independent Studies in Cinema

Economics

- ECO306H1 American Economic History

English

- ENG250H1 Introduction to American Literature
- ENG235H1 The Graphic Novel
- ENG270H1 Introduction to Colonial and Postcolonial Writing
- ENG355Y1 Transnational Indigenous Literatures
- ENG360H1 Early American Literature
- ENG363Y1 American Literature to 1900
- ENG364Y1 American Literature 1900 to the present
- ENG365H1 Contemporary American Fiction
- ENG368H1 Asian North American Literature

Geography

- GGR240H1 Geographies of Colonialism in North America
- GGR254H1 Geography USA
- GGR336H1 Urban Historical Geography of North America
- GGR339H1 Urban Geography, Planning and Political Processes
- GGR359H1 Comparative Urban Policy
- GGR458H1 Selected Topics in Urban Geography

History

- HIS106Y1 The African Diaspora in the Americas, 1492-1804
- HIS202H1 Gender, Race and Science
- HIS221H1 African American History to 1865
- HIS222H1 African American History from 1865 to the Present
- HIS271Y1 American History Since 1607
- HIS300H1 Energy and Environment in North American History
- HIS310H1 Histories of North American Consumer Culture
- HIS343H1 History of Modern Intelligence
- HIS345H1 History and Film
- HIS366H1 Aboriginal Peoples of the Great Lakes from 1815 to the Present
- HIS369H1 Aboriginal Peoples of the Great Lakes from 1500 to 1830
- HIS374H1 American Consumerism - The Beginnings
- HIS376H1 The United States: Now and Then
- HIS377H1 20th-Century American Foreign Relations
- HIS378H1 America in the 1960s
- HIS379H1 Vietnam at War
- HIS389H1 Topics in History
- HIS389Y1 Topics in History
- HIS396H1 The Progressive Era and Rise of Big Business in America
- HIS400H1 The American War in Vietnam
- HIS401H1 History of the Cold War
- HIS404H1 Topics in U.S. History
- HIS411H1 Great Trials in History
- HIS463H1 Cloth in American History to 1865
- HIS464H1 Religion and Violence in Comparative Perspective
- HIS465Y1 Gender and International Relations
- HIS473H1 The United States and Asia since 1945
- HIS479H1 US Foreign Policy Since World War II
American Studies Courses

USA200H1 - Introduction to American Studies

Hours: 24L

An interdisciplinary introduction to the study of the United States and to the field of American Studies. Drawing from a variety of source materials ranging from political and literary to visual culture and material artifacts, this course examines the politics, history and culture of the U.S. A major emphasis will be learning to analyze primary sources.

Distribution Requirements: Humanities; Social Science
Breadth Requirements: Society and its Institutions (3)

USA300H1 - Theories and Methods in American Studies

Previous Course Number: USA300Y1
Hours: 24L

This course, required for majors and minors but open to all who have met the pre-requisites, explores a range of approaches to the field of American Studies. Students will be introduced to some of the many ‘theories and methods’ that have animated the field of American Studies, including historical methods; formal analysis of visual and literary texts; and key concepts, such as commodity chain analysis; ‘race,’’ ‘commodity,’’ ‘gender,’’ ‘diaspora,’’ and ‘affect.’

Prerequisite: HIS271Y1/ENG250Y1/POL203Y1/GGR240H1/GGR254H1
Exclusion: USA300Y1
Distribution Requirements: Humanities; Social Science
Breadth Requirements: Creative and Cultural Representations (1)

USA310H1 - Approaches to American Studies

Hours: 24L

An in-depth, interdisciplinary examination of a specific question concerning U.S. history, politics, and/or culture. Focus varies depending on instructor. Major emphases include reading critically and the initial steps of conducting original research.

Prerequisite: At least two half courses (1.0 FCE) from the American Studies list or USA300H1
Distribution Requirements: Humanities; Social Science
Breadth Requirements: Creative and Cultural Representations (1)
USA311H1 - Approaches to American Studies

Hours: 24L

An in-depth, interdisciplinary examination of a specific question concerning U.S. history, politics, and/or culture. Focus varies depending on instructor. Major emphases include reading critically and the initial steps of conducting original research.

Prerequisite: At least two half courses (1.0 FCE) from the American Studies list of eligible courses or USA300H1.
Distribution Requirements: Humanities; Social Science
Breadth Requirements: Creative and Cultural Representations (1)

USA312H1 - Approaches to American Studies

Hours: 24L

An in-depth, interdisciplinary examination of a specific question concerning U.S. history, politics, and/or culture. Focus varies depending on instructor. Major emphases include reading critically and the initial steps of conducting original research.

Prerequisite: At least two half courses (1.0 FCE) from the American Studies list of eligible courses or USA300H1.
Distribution Requirements: Humanities; Social Science
Breadth Requirements: Creative and Cultural Representations (1)

USA313H1 - Approaches to American Studies

Hours: 24L

An in-depth, interdisciplinary examination of a specific question concerning U.S. history, politics, and/or culture. Focus varies depending on instructor. Major emphases include reading critically and the initial steps of conducting original research.

Prerequisite: At least two half courses (1.0 FCE) from the American Studies list of eligible courses or USA300H1.
Distribution Requirements: Humanities; Social Science
Breadth Requirements: Creative and Cultural Representations (1)

USA400H1 - Topics in American Studies

Hours: 24S

In-depth examination of specific themes relating to American Studies.

Prerequisite: At least two courses (2.0 FCE) from the American Studies list
Distribution Requirements: Humanities; Social Science
Breadth Requirements: Creative and Cultural Representations (1)

USA401H1 - Topics in American Studies

Hours: 24S

In-depth examination of specific themes relating to American Studies.

Prerequisite: At least two courses (2.0 FCE) from the American Studies list
Distribution Requirements: Humanities; Social Science
Breadth Requirements: Creative and Cultural Representations (1)

USA402H1 - Topics in American Studies

Hours: 24S

In-depth examination of specific themes relating to American Studies.

Prerequisite: At least two courses (2.0 FCE) from the American Studies list
Distribution Requirements: Humanities; Social Science
Breadth Requirements: Society and its Institutions (3)

USA403H1 - Topics in American Studies

Hours: 24S

In-depth examination of specific themes relating to American Studies.

Prerequisite: At least two courses (2.0 FCE) from the American Studies list
Distribution Requirements: Humanities; Social Science
Breadth Requirements: Society and its Institutions (3)
**USA494H1 - Independent Studies**

**Distribution Requirements**: Humanities; Social Science

---

**USA495Y1 - Independent Studies**

**Distribution Requirements**: Humanities; Social Science
Anatomy Courses

ANA300Y1 - Human Anatomy and Histology

Hours: 86L/18P

Structure of the human body and its relationship to function. Basic Human Histology, Gross Anatomy, and Neuroanatomy. Some content is delivered using online modules.

Prerequisite: BIO130H1
Exclusion: BIO33H3, BIO210Y5
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

ANA301H1 - Human Embryology

Hours: 48L

Human embryology from fertilization to the end of the fetal period. Current concepts in mammalian morphogenesis applied to the development of the various organ systems; etiologies and pathogenesis of some of the more common human congenital abnormalities.

Prerequisite: BIO130H1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

ANA400H1 - Anatomy Dissection

Hours: 24P/24S

A focussed series of Anatomical dissections will be made and the surgical implications of the findings will be the subject of seminars. Attitudes to dissection of the human body, complications of surgery and other relevant issues will be discussed.

Prerequisite: ANA300Y1 and permission of department. Normally a "B+" standing will be required
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

ANA411H1 - Anatomy in Application: Exercise & Biomechanics

Hours: 24P/36S

This course will cover musculoskeletal anatomy (both upper and lower limb) topics with an emphasis on applying detailed anatomical review, biomechanical principles and research evidence to explain or clarify exercise principles and myths.

Prerequisite: ANA126Y1 or ANA300Y1 (78%) or equivalent
Exclusion: none
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)
ANA496H1 - Independent Research Project

Hours: TBA

This course provides an opportunity for students to participate in an individual research project in a particular topic of study including, but not limited to histology, cellular and molecular biology, developmental biology, neuroscience and gross anatomy. Students are mentored and supervised by research scientists and faculty associated with the University of Toronto. These research projects may include areas such as Histology, Cellular or Molecular Biology, Developmental Biology, Neuroanatomy or Gross Anatomy. Not eligible for CR/NCR option.

Prerequisite: Permission from proposed supervisor and approval from the course coordinator.

Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

ANA497H1 - Independent Research Project

Hours: TBA

This course provides an opportunity for students to participate in an individual research project in a particular topic of study including, but not limited to histology, cellular and molecular biology, developmental biology, neuroscience and gross anatomy. Students are mentored and supervised by research scientists and faculty associated with the University of Toronto. These research projects may include areas such as Histology, Cellular or Molecular Biology, Developmental Biology, Neuroanatomy or Gross Anatomy. Not eligible for CR/NCR option.

Prerequisite: Permission from proposed supervisor and approval from the course coordinator.

Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

ANA498Y1 - Project in Anatomy

A research project in Histology, Cellular or Molecular Biology, Developmental Biology, Neuroanatomy or Gross Anatomy. Not eligible for CR/NCR option.

Prerequisite: Permission of a professor to supervise the project

Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)
Anthropology

Faculty List

University Professor Emeritus
R.B. Lee, MA, Ph D, FRSC

Professors Emeriti
F.D. Burton, MA, Ph D (UTSC)
J.J. Chew, MA, Ph D
R.B. Drewitt, Ph D
M.R. Kleindienst, MA, Ph D (UTM)
J. Mavalwala, M Sc, Ph D
S.K. Pfeiffer, MA, Ph D
S.B. Philpott, MA, Ph D
A.K. Ray, M Sc, Ph D
B.A. Sigmon, MS, Ph D (UTM)
G.A. Smith, MA, Ph D (U)
D.H. Turner, BA, Ph D (T)
F.D. Burton, MA, Ph D (UTSC)
J.J. Chew, MA, Ph D
R.B. Drewitt, Ph D
M.R. Kleindienst, MA, Ph D (UTM)
J. Mavalwala, M Sc, Ph D
S.K. Pfeiffer, MA, Ph D
S.B. Philpott, MA, Ph D
A.K. Ray, M Sc, Ph D
B.A. Sigmon, MS, Ph D (UTM)
G.A. Smith, MA, Ph D (U)
D.H. Turner, BA, Ph D (T)

Associate Professors Emeriti
M.A. Latta, MA, Ph D (UTSC)
M.D. Levin, MA, Ph D (N)

Professor and Chair of the Department
J.P. Boddy, MA, Ph D, FRSC

University Professor
T. Li, MA, Ph D (U)

Professors
E.B. Banning, MA, Ph D (U)
D.R. Begun, MA, Ph D
M. Chazan, M Phil, Ph D (V)
G.G. Coupland, MA, Ph D
G.W. Crawford, MA, Ph D, FRSC (UTM)
M. Danesi, MA, Ph D, FRSC (V)
T.M. Friesen, MA, Ph D
I. Kalmar, MA, Ph D (W, V)
M.J. Lambek, MA, Ph D, FRSC (UTSC)
H.V. Luong, MA, Ph D
V. Napoli, MA, Ph D
E. Parra, BS, Ph D (UTM)
L.A. Sawchuk, MA, Ph D (UTSC)
D. Sellen, MA, Ph D
J. Sidnell, MA, Ph D (UTM)
M. Silcox, Ph D (UTSC)
J. Song, Ph D
J. S. Taylor, MA, PhD
H. Wardlow, MA, Ph D, MPH

Associate Professors
S. Bamford, MA, Ph D (UTSC)
J. Barker, MA, Ph D
F. Cody, MA, Ph D (UTM, AI)
H. Cunningham, MA, Ph D (U)
G. Daswani, M Sc, Ph D (UTSC)
N. Dave, MA, Ph D
G. Dewar, MA, Ph D (UTSC)
G.S. Gillison, BA, Ph D (T)
S. M. Hillewaert, MA, Ph D (UTM)
K. Kiroy-Marac, Ph D (UTSC)
C. Krupa, MA, Ph D (UTSC)
S. Lehman, MA, Ph D
B. McElhinny, MA, Ph D
H. Miller, MA, PhD (UTM)
A. Mittermaier, MA, Ph D
A. Muehlebach, MA, Ph D (UTM)

Assistant Professors
A. Allen, MTS, PhD (DTS)
F. V. Bozcali, Ph D (UTM)
W. Butt, Ph D (UTSC)
M. Cameron, M Sc, Ph D
B. Dahlin, MA, Ph D (UTSC)
T. Galloway, MA, Ph D (UTM)
C. Hartblay, MA, Ph D (UTSC)
K. Maxwell, MA, Ph D
L. Mortensen, MA, Ph D (UTSC)
N. Novroski, M Sc, Ph D (UTM)
D. Samson, MA, Ph D (UTM)
P. Sapirstein, Ph D
L. Schroeder, Ph D (UTM)
J. Teichroeb, MA, Ph D (UTSC)
B. Viola, Ms, Ph D
L. Xie, MA, Ph D (UTM)
D. Young, MA, Ph D (UTSC)

Lecturers
M. Cummings, MA, Ph D (UTSC)
H. Moore, M Sc, Ph D
A. K. Patton, MA, Ph D

Introduction

Anthropology examines the complexity and diversity of human experience, past and present, through evolutionary, archaeological, social, cultural, and linguistic perspectives. As such, Anthropology is a truly interdisciplinary venture that spans the natural sciences, social sciences, and humanities. This broad mandate has led to the division of the discipline into three broad areas of research: Archaeology; Evolutionary Anthropology; and the study of Society, Culture and Language.

Archaeologists study the material remains of the human past. Archaeological methods range widely, from the study of artifacts to the analysis of plant and animal remains, and Archaeological research covers a vast expanse of time from the earliest stone tools to the complex record left by modern industrial society. Archaeologists also grapple with a range of theoretical issues including material culture, culture change, identity, and ritual. Many archaeologists today also work in collaboration with local communities and engage with the questions of archaeological ethics.

Evolutionary Anthropology is the study of the biological diversity of humans, the history of this diversity, and the biological relationships between humans and non-human primates. Major foci in Evolutionary Anthropology include Human Biology, the study of modern humans; Osteology, the study of the human skeleton; Paleoanthropology, the study of human evolution; and Primatology, the study of non-human primates. Evolutionary anthropologists integrate biological and social variables in their explanations of the effects of evolution on humans and other primates.

At the core of the study of Society, Culture and Language is the question of how we humans organize our lives together, and why we do so in such vastly different ways. The orientation is global and contemporary. We explore social relations: relations between kin and neighbours, between genders and generations, between ethnic
Anthropology Programs

Anthropology Specialist (Society, Culture, and Language) (Arts Program) - ASSPE2112

Enrolment Requirements:
This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

Completed courses (with minimum grades)
The following course with the stated minimum grade is required:
- ANT207H1 (70%)

Completion Requirements:
(10 credits, including at least 2 credits at the 400 level)
First and/or Second Year
1. ANT204H1 and ANT207H1

Upper years
2. ANT370H1 and ANT380H1
3. 6 credits from Group C including at least 0.5 credits course from Subgroup C(i)
4. ANT475H1 and an additional 1.5 credits at the 400-level

Focus in Medical Anthropology (Specialist: Society, Culture and Language) - ASFOC2112B

Description:
This focus enables students in the Anthropology Specialist (Society, Culture, and Language) ASSPE2112, to identify courses pertaining to Medical Anthropology (Health) and receive formal acknowledgement for completing a suite of health-related anthropology courses.

Enrolment Requirements:
Enrolment in the Anthropology Specialist (Society, Culture, and Language) is required.

Completion Requirements:
3.5 credits (total)
1. ANT205H1
2. 3.0 credits from: ANT208H1, ANT345H1, ANT348H1, ANT358H1, ANT371H1, ANT435H1, ANT458H1, ANT460H1, ANT474H1, ANT476H1

Health related Special Topics courses may be chosen when offered at the third or fourth year levels.

Anthropology Major (Society, Culture, and Language) (Arts Program) - ASMAJ2112

Enrolment Requirements:
This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

Completed courses (with minimum grades)
The following courses with the stated minimum grades are required:
- ANT100Y1 (65%) or ANT207H1 (65%)

Completion Requirements:
(6.5 credits including at least 2.0 credits at the 300+ level and at least 1 credit at the 400 level)
First and/or Second Year
1. ANT207H1
2. ANT204H1 or ANT253H1

Upper years
3. ANT370H1 or ANT425H1
4. Five additional credits from Group C including at least 1 credit at the 400 level. Students who want to focus more specifically on the role of language in culture and society should take ANT253H1, ANT425H1, and courses in the C (ii) Subgroup
Focus in Medical Anthropology (Major: Society, Culture and Language) - ASFOC2112A

**Description:**

This focus enables students in the Anthropology Major (Society, Culture and Language) ASMAJ2112 to identify courses pertaining to Medical Anthropology from a sociocultural perspective and receive formal acknowledgement for completing a suite of health-related anthropology courses.

**Enrolment Requirements:**

Enrolment in the Anthropology Major (Society, Culture, and Language) is required.

**Completion Requirements:**

- 2.5 credits (total)
  1. ANT205H1
  2. 2.0 credits from: ANT208H1, ANT345H1, ANT348H1, ANT358H1, ANT371H1, ANT435H1, ANT458H1, ANT460H1, ANT474H1, ANT476H1

Health related Special Topics courses may be chosen when offered at the third or fourth year levels.

Focus in Medical Anthropology (Major: General) - ASFOC1775A

**Description:**

This focus enables students in the Anthropology Major (General) ASMAJ1775 to identify courses pertaining to Medical Anthropology across the discipline's social science and science fields and receive formal acknowledgement for completing a suite of health-related anthropology courses.

**Enrolment Requirements:**

Enrolment in the Anthropology Major (General) is required.

**Completion Requirements:**

- 2.5 credits (total)
  1. 0.5 credit from ANT205H1 or ANT208H1
  2. 2.0 credit from: ANT345H1, ANT348H1, ANT358H1, ANT371H1, ANT435H1, ANT458H1, ANT460H1, ANT474H1, ANT476H1

Health related Special Topics courses may be chosen when offered at the third or fourth year levels.

Anthropology Major (General) (Arts Program) - ASMAJ1775

**Enrolment Requirements:**

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

**Completed courses (with minimum grades)**
The following courses with the stated minimum grades are required:

- ANT100Y1 (65%) or ANT200Y1 (65%) or ANT203Y1 (65%) or ANT204H1 (65%) or ANT207H1 (65%)

**Completion Requirements:**

- (6.5 credits)
  1. ANT100Y1
  2. ANT207H1
  3. 1.0 credit from ANT200Y1, ANT203Y1
  4. 0.5 credit from ANT204H1, ANT208H1, ANT253H1

Upper years

5. 2.5 credits at the 300+ level from either Group A or Group B or Group C, including at least 0.5 credit at the 400-level.

Environmental Anthropology Minor (Arts Program) - ASMIN1291

**Admission Requirements:**

A program focused on understanding the diverse nature of interactions between humans and their environments, both in the past and in modern global society. Consult the Undergraduate Office, Department of Anthropology (416-978-6414).

**Enrolment Requirements:**

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

**Completion Requirements:**

- (4.0 credits, including 1.0 credit at the 300+ level)
  1. ANT100Y1/ ENV221H1 and ENV222H1/ GGR223H1/ ENV222Y1
  2. ANT200Y1/ (ANT204H1 and ANT207H1)/ (0.5 credit 300-level Social Anthropology course)
  3. 2.0 credits from: ANT315H1, ANT336H1, ANT346H1, ANT348H1, ANT358H1, ANT366H1, ANT368H1, ANT371H1, ANT374H1, ANT376H1, ANT409H1, ANT410H1, ANT415Y1, ANT420H1, ANT430H1, ANT450H1, INS250H1, INS402H1
Anthropology Minor (General) (Arts Program) - ASMIN1775

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

Completed courses (with minimum grades)
The following courses with the stated minimum grades are required:

- ANT100Y1 (65%) or ANT200Y1 (65%) or ANT203Y1 (65%) or ANT204H1 (65%) or ANT207H1 (65%)

Completion Requirements:

(4 credits including at least one 300-level course; excluding ANT497Y/ANT498H/ANT499H)

First and/or Second Year
1. ANT100Y1
2. 2 credits from ANT200Y1, ANT203Y1, ANT204H1, ANT207H1, ANT208H1, ANT253H1

Upper years
3. 1.0 credit at the 300+ level from either Group A or Group B or Group C

Anthropology Major (Evolutionary) (Science Program) - ASMAJ1510

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

Completed courses (with minimum grades)
The following courses with the stated minimum grades are required:

- ANT100Y1 (65%) or ANT203Y1 (65%)

Completion Requirements:

(6.5 credits, including at least 2 credits at the 300+ level, 0.5 credits of which must be at the 400-level)

First Year and/or Second Year:
1. BIO120H1
2. ANT100Y1 or BIO220H1. If BIO220H1 is taken, students must take an additional 0.5 credit in ANT
3. ANT203Y1

Upper Years:
4. 2.0 credits from ANT208H1, ANT333Y1, ANT334H1, ANT335Y1, ANT336H1
5. 1.5 additional credit from: Group B and/or ANT406H1, ANT415Y1, ARH312Y1
6. 0.5 credit at the 400-level from Group B

Course Groups

A: Archaeology

- ANT200Y1 Introduction to Archaeology
- ANT299Y1 Research Opportunity Program
- ANT311Y1 Archaeological Fieldwork
- ANT314H1 Archaeology of the Pacific Northwest
- ANT315H1 Arctic Archaeology
- ANT317H1 Archaeology of Eastern North America
- ANT318H1 The Preindustrial City and Urban Social Theory
- ANT319Y1 Archaeology of North America
- ANT320H1 Ancient Cultures of the Andes
- ANT321H1 Cultural Property
- ANT388H1 Anthropologists and Indigenous Peoples in North America
- ANT390H1 Special Topics in Anthropology
  Note: ANT390H1 may be placed in either Group A or B or C depending on the topic which will vary from year to year
- ANT406H1 Lithic Analysis
- ANT407H1 Inka and Aztec States
- ANT409H1 Landscape Archaeology
- ANT410H1 Hunter-Gatherers Past & Present
- ANT411H1 Advanced Archaeological Theory
- ANT412H1 Historical Archaeology
- ANT415Y1 Laboratory in Faunal Archaeology-Osteology
- ANT416H1 Archaeology of Ritual and Identity
- ANT419H1 Current Debates in Palaeolithic Archaeology
- ANT420H1 Archaeology of Inequality
- ANT437H1 Introduction to Virtual Anthropology
- ANT491Y1 Internship in Anthropology
- ANT491H1 Internship in Anthropology
- ANT497Y1 Independent Research
- ANT498H1 Independent Research
- ANT499H1 Independent Research
- ARH305H1 Archaeological Interpretation
- ARH306Y1 Archaeological Field Methods
- ARH309H1 Archaeology, Ethics, and the Public
- ARH312Y1 Archaeological Laboratory
- ARH360H1 Prehistory of the Near East (formerly ANT360Y1)
- ARH361H1 Field Archaeology
- ARH361Y1 Field Archaeology
- ARH482H1 Special Topics in Archaeology
- ARH494H1 Topics in Emerging Scholarship (Archaeology)
- ARH495H1 Archaeology Research Practicum
- VIC225Y1 A History of the World in Objects

B: Evolutionary

- ANT203Y1 The Nature of Humans
- ANT208H1 Medical Anthropology: an Evolutionary Perspective on Human Health
- ANT299Y1 Research Opportunity Program
- ANT330Y1 Paleanthropology Field School
- ANT333Y1 Living Primate Adaptations
- ANT334H1 Human Skeletal Biology
- ANT335Y1 Human Evolution
- ANT336H1 Evolutionary Anthropology Theory
C: Society, Culture, and Language

- ANT337H1 Human Movement
- ANT338H1 Molecular Anthropology and Human Evolution
- ANT371H1 Human Nutritional Ecology
- ANT388H1 Anthropologists and Indigenous Peoples in North America
- ANT390H1 Special Topics in Anthropology
- Note: ANT390H1 may be placed in either Group A or B or C depending on the topic which will vary from year to year.
- ANT419H1 Current Debates in Palaeoanthropological Research
- ANT430H1 Primate Conservation Biology
- ANT431H1 The Real Planet of the Apes
- ANT434H1 Health, Diet & Disease in the Past
- ANT435H1 Anthropology of Childhood and Childcare
- ANT436H1 Primate Ecology & Social Behavior
- ANT437H1 Introduction to Virtual Anthropology
- ANT438H1 Topics in Emerging Scholarship (Evolutionary Anthropology)
- ANT481H1 Special Topics in Evolutionary Anthropology
- ANT491Y1 Internship in Anthropology
- ANT491H1 Internship in Anthropology
- ANT497Y1 Independent Research
- ANT498H1 Independent Research

Anthropology Courses

ANT100Y1 - Introduction to Anthropology

Hours: 48L/12T

Society and culture from various anthropological perspectives: socio-cultural, evolutionary, archaeological, and linguistic.

Distribution Requirements: Social Science
Breadth Requirements: Living Things and Their Environment (4); Society and its Institutions (3)

ANT193H1 - Making, Using, and Interpreting Stone Tools

Hours: 6L/8P/10S

Stone tools are the earliest and longest-lasting record of human technology. This course explores interpreting stone tools from a multidisciplinary perspective. In making, using, and studying stone tools, students will learn how archaeologists form hypotheses and design experiments to understand humans and their technologies in the past. This course presents research that investigate changes in human ancestors’ cognition and livelihoods through the contributions of other disciplines in life and social sciences to the study of stone tools. The course introduces major stone tool discoveries and critically engages with current research through the development of new ideas for research projects. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Social Science
Breadth Requirements: Thought, Belief and Behaviour (2)

ANT194H1 - Tragically Unhip: Great Thinkers of the Late 19th and Early 20th Centuries

Hours: 24S

Inspired by Darwin’s Origin of Species (1859), the first anthropologists tried to extend his theory of evolution into culture by searching for the origins and essence of human existence. The course focuses on English and French thinkers who defined minimal sets of beliefs and practices that all cultures shared. It also takes account of the motivations and social milieu of early theorists who rarely, if ever, came in contact with the exotic “other” they studied; and it touches on the radical critique of their theories including Lévi-Strauss’s structuralism and influential “afterologies” like deconstruction, post-structuralism, Lacanian psychoanalysis and Foucauldian philosophy. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Social Science
Breadth Requirements: Thought, Belief and Behaviour (2)

ANT195H1 - Speculative Fiction and Social Reality

Hours: 24S

How do the imagined worlds of speculative fiction reflect, and reflect upon, the real worlds of their authors and audiences? And on the other hand, how can works of speculative fiction have real-world impacts? Is speculative fiction different, in either of these respects, than other genres of narrative? This course explores a variety of works of speculative fiction from the perspective of an anthropological interest in ideas, imaginations, and narratives in relation to social life. Restricted to first-year students. Not available for CR/NCR option.

Distribution Requirements: Social Science
Breadth Requirements: Thought, Belief and Behaviour (2)

ANT196H1 - Observing Everyday Life

Hours: 24S

This course is a First-Year Foundation Seminar and provides an opportunity for exploration of different topics and themes. Informal introduction to the notion of “everyday life” in anthropology and related humanities and social science disciplines. How seemingly insignificant, ordinary events and behaviors shape and are shaped by large societal patterns. Students will learn to interpret their own observational experiences with reference to relevant anthropological and other analytical frameworks. First-Year Foundation Seminars are restricted to first-year students and do not normally contribute towards program completion. Not available for CR/NCR option.

Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)
### ANT197H1 - Representations of Intellectuals

**Hours:** 24S

This course is a First-Year Foundation Seminar and provides an opportunity for exploration of different topics and themes. The course explores ideas of intellectuals who carved transformative theories during war times or under repressive regimes in the twentieth century. Intellectuals featured in the course include Rosa Luxemburg, Frantz Fanon, Walter Benjamin, Lu Xin, Audre Lorde. Further, it would examine cultural representations of them, such as, graphic novels, fictions, essays, films and videos on them or relatable to their ideas. For example, it would assign reading of Red Rosa, a graphic novel of Luxemburg together with her own work, Theory of Imperialism. Or it would juxtapose Lorde's classic, Sister Outsider, with Octavia Butler's science fiction, Parable of the Sower. First-Year Foundation Seminars are restricted to first-year students and do not normally contribute towards program completion. Not available for CR/NCR option.

**Distribution Requirements:** Social Science  
**Breadth Requirements:** Society and its Institutions (3)

### ANT198H1 - Nature: A Cultural Introduction

**Hours:** 24S

This course is a First-Year Foundation Seminar and provides an opportunity for exploration of different topics and themes. The distinction (or dualism) between nature and culture is often described as a central feature of the western cultural imagination and of "modernity." The nature/culture dualism is also relevant to many current debates about ecology and environment. This course explores various approaches to "nature" through a variety of written and visual texts, and focuses on representations of the nature/culture dualism. First-Year Foundation Seminars are restricted to first-year students and do not normally contribute towards program completion. Not available for CR/NCR option.

**Distribution Requirements:** Social Science  
**Breadth Requirements:** Creative and Cultural Representations (1)

### ANT199H1 - Living on the Water in Toronto

**Hours:** 24S

**Distribution Requirements:** Social Science  
**Breadth Requirements:** Society and its Institutions (3)

### ANT200Y1 - Introduction to Archaeology

**Hours:** 48L/24T

How did art and technology develop in the course of human evolution? What led to the development of agriculture and settled village life? How did social inequality and urbanism emerge? This course takes a global perspective to explore the archaeological evidence that sheds light on these questions and other aspects of prehistory and early history. Students will engage with the challenges posed by new discoveries and also with recent developments in archaeological method and theory. The goal of the course is to involve students with the current state of archaeological research and some of the major issues archaeologists work to address.

**Recommended Preparation:** ANT100Y1  
**Distribution Requirements:** Social Science  
**Breadth Requirements:** Society and its Institutions (3)

### ANT203Y1 - The Nature of Humans

**Hours:** 48L/24P

This course examines where humans fit in the fabric of the natural world. It explores the history of ideas about humans in nature, humans as primates, the story of human evolution and modern human physical and genetic diversity.

**Recommended Preparation:** ANT100Y1/BIO120H1, BIO220H1  
**Distribution Requirements:** Science  
**Breadth Requirements:** Living Things and Their Environment (4)

### ANT204H1 - Social Cultural Anthropology and Global Issues

**Previous Course Number:** ANT204Y1  
**Hours:** 24L/12T

A course focused on recent anthropological scholarship that seeks to understand and explain the transformation of contemporary societies and cultures. Topics may include some of the following: new patterns of global inequality, war and neo-colonialism, health and globalization, social justice and indigeneity, religious fundamentalism, gender inequalities, biotechnologies and society etc.

**Exclusion:** ANT204Y1  
**Recommended Preparation:** ANT100Y1  
**Distribution Requirements:** Social Science  
**Breadth Requirements:** Society and its Institutions (3)
ANT205H1 - Medical Anthropology: Sociocultural Perspectives on Illness, Medicine and Care

**Hours:** 24L/11T

Introduction to medical anthropology with a focus on questions, methods, and insights from sociocultural anthropology. Explores the relationships among culture, society, and medicine with special attention to power, inequality, and globalization. Examples from many parts of the world, addressing biomedicine as well as other healing systems.

**Recommended Preparation:** ANT100Y1, ANT207H1  
**Distribution Requirements:** Social Science  
**Breadth Requirements:** Society and its Institutions (3)

ANT207H1 - Core Concepts in Social and Cultural Anthropology

**Hours:** 24L/12T

Society, culture, kinship, exchange, community, identity, politics, belief: these and other core concepts are explored in this course, which lays the foundation for advanced courses in social and cultural anthropology.

**Distribution Requirements:** Social Science  
**Breadth Requirements:** Society and its Institutions (3)

ANT208H1 - Medical Anthropology: an Evolutionary Perspective on Human Health

**Hours:** 24L/10T

Introduction to applied evolutionary medical anthropology. It explores evidence for the evolution of human vulnerability to disease across the life cycle (conception to death) and implications for health of contemporary populations in behavioral ecological, cross-cultural, health and healing systems, historical trauma, inter-sectionality, and climate change, lenses.

**Recommended Preparation:** ANT100Y1/BIO120H1  
**Distribution Requirements:** Science; Social Science  
**Breadth Requirements:** Living Things and Their Environment (4)

ANT253H1 - Language & Society

**Hours:** 24L

This course introduces linguistic analysis with a view towards its application to the study of the relation between culture and social structure. The interplay of pronunciation, grammar, semantics, and discourse with rituals, ideologies, and constructions of social meaning and worldview are discussed in tandem with the traditional branches of linguistic analysis, phonology, morphology, grammar, syntax, and semantics. The objective of the course is to provide a broad framework for understanding the role of language in society.

**Exclusion:** JAL253H1  
**Recommended Preparation:** ANT100Y1  
**Distribution Requirements:** Social Science  
**Breadth Requirements:** Thought, Belief and Behaviour (2)

ANT299Y1 - Research Opportunity Program

Credit course for supervised participation in faculty research project. Details at https://www.artsci.utoronto.ca/current/academics/research-opportunities/research-opportunities-program. Not eligible for CR/NCR option.

**Distribution Requirements:** Social Science

JAR301H1 - Plagues and Peoples: From Divine Intervention to Public Health

**Hours:** 24L/12T

Infectious diseases have afflicted human societies throughout the history of our species. How are diseases shaped by the societies in which they spread, and how do they change culture and politics in turn? This course introduces perspectives from medical anthropology and religious studies to analyze the intersection of cultural, religious and scientific narratives when people confront plagues. We focus on historical and contemporary examples, such as the Spanish flu and COVID-19, giving students the tools to understand how cultural institutions, religious worldvews, and public health epidemiology shape living and dying during a pandemic.

**Prerequisite:** At least 4.0 credits  
**Distribution Requirements:** Social Science  
**Breadth Requirements:** Thought, Belief and Behaviour (2)
ARH305H1 - Archaeological Interpretation

Hours: 24L

Transforming archaeological results into statements about people and their life ways. Covers basic archaeological theory, including research design, sampling, stratigraphy, seriation, formation and testing or evaluation of hypotheses, regional analyses. Introduces some of the major schools of archaeological theory, including New Archaeology and Post-Processual Archaeology.

Prerequisite: ANT200Y1
Distribution Requirements: Social Science
Breadth Requirements: Thought, Belief and Behaviour (2)

ARH306Y1 - Archaeological Field Methods

Hours: 12L/61P

Intensive instruction in archaeological field methods and acquisition of field skills, including archaeological search and survey, site mapping, laying out excavation grids, use of theodolites, total station, and GPS, stratigraphic excavation, stratigraphy, field recording, screening sediment, Ontario license and reporting requirements. Normally this course would take place on campus in the summer. This course has a mandatory Lab Materials Fee of $25 to cover non-reusable materials. The fee will be included on the student's ACORN invoice.

Prerequisite: ANT200Y1 or (NMC260H1 and NMC262H1) or NMC261Y0
Distribution Requirements: Social Science

ARH309H1 - Archaeology, Ethics, and the Public

Hours: 24L

An analysis of ethics in contemporary archaeology that covers reburial and repatriation, interpretation of the archaeological record in the context of historically oppressed groups, ethnic minorities, and non-western societies, the ethics of collecting and managing cultural property, relationships with the media, the debates surrounding looting, and other issues.

Prerequisite: ANT200Y1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

ANT311Y1 - Archaeological Fieldwork

Practical field training through six weeks of excavation on an archaeological site. Basic principles of artifact handling and classification. (Offered only in Summer Session) Not eligible for CR/NCR option.

Prerequisite: ANT200Y1
Distribution Requirements: Social Science

ARH312Y1 - Archaeological Laboratory

Hours: 28L/44P

Techniques for making archaeological data meaningful after excavation or survey. Archaeological measurements, compilation of data, database design, archaeological systematics, and sampling theory in the context of lithics, pottery, floral, faunal and other archaeological remains.

Prerequisite: ANT200Y1 and a half statistics course (e.g. GGR270H1*, STA220H1, STA221H1, STA257H1, STA261H1, ANTC35H3**. Note: *Geography Pre- or co-requisites waived for Anthropology and Archaeology students; ** to be taken at the Scarborough Campus
Distribution Requirements: Social Science
Breadth Requirements: The Physical and Mathematical Universes (5)

ANT314H1 - Archaeology of the Pacific Northwest

Hours: 24L

An archaeological survey of the human prehistory of northwestern North America from the late Pleistocene to the time of early European contact. Geographical coverage will include the Northwest Coast, California, and the Intermontane Plateau.

Prerequisite: ANT200Y1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

ANT315H1 - Arctic Archaeology

Hours: 24L

Archaeology and ethnohistory of Arctic cultures. Emphasis is on variation in social organization, settlement pattern, economy, ideology, and interaction with the expanding European world-system.

Prerequisite: ANT200Y1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)
ANT317H1 - Archaeology of Eastern North America

Hours: 24L

This course examines the precontact and early contact period culture history of eastern North America, including Ontario, through archaeological evidence. Topics covered include the earliest peopling of the region at the end of the Ice Age, diversity of hunter-gatherer societies, introduction of agriculture, and the development of the dynamic First Nations societies who eventually met and interacted with Europeans.

Prerequisite: ANT200Y1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

ANT318H1 - The Preindustrial City and Urban Social Theory

Hours: 24L

This course offers a comparative examination of the rise and organization of ancient cities through a detailed investigation of urban social theory. We will explore competing anthropological interpretations of urban process while probing the political, ideological, and economic structures of the worlds earliest cities. Students will have the opportunity to consider a broad range of subjects, including mechanisms of city genesis; urban-rural relations; the intersections of city and state; and historical variation in urban landscapes, ideologies, and political economies.

Prerequisite: ANT200Y1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

ANT319Y1 - Archaeology of North America

Previous Course Number: ANT310Y1
Hours: 48L

This course examines human prehistory in North America, North of Mexico, from the time of earliest occupation to European contact. Special topics include Paleoindian and Archaic adaptations, the rise of complex hunter-gatherers, origins of farming and the evolution of complex chiefdoms.

Prerequisite: ANT200Y1
Exclusion: ANT309H1, ANT310Y1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

ANT320H1 - Ancient Cultures of the Andes

Hours: 24L

This class offers intensive study of the archaeology and culture history of the Andean region prior to the Spanish conquest. The complexity and distinctiveness of Andean social organization, political institutions, religious ideologies, and economic practices have long fascinated anthropologists. Ultimately, the course will explore Andean cultures over a 10,000 year period, highlighting key debates, current research projects, and innovative theoretical approaches shaping contemporary archeological scholarship in South America and beyond.

Prerequisite: ANT100Y1 or ANT200Y1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

ANT322H1 - Anthropology of Youth Culture

Hours: 24L

This course will present various perspectives on the nature and dynamics of youth culture. It will discuss the research accumulated over the past quarter century on youth lifestyles, from fashion and music to the formation and spread of slang. It will also look at the various critical and controversial aspects of adolescence in contemporary culture.

Prerequisite: ANT204H1 or ANT207H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

ANT324H1 - Tourism & Globalization

Previous Course Number: ANT443H1
Hours: 24L

The course uses tourism as a lens to examine global connections. Particular focus will be on the politics of cultural encounters. Drawing examples from diverse ethnographic materials, the course explores how different visions of the world come into contact, negotiated and transformed, and how tourist encounters shape peoples everyday lives.

Prerequisite: ANT204H1 or ANT207H1
Exclusion: ANT443H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)
ANT327H1 - "Diversity": Critical/Comparative Studies of Indigeneity, Multiculturalism and (Settler) Colonialism

Hours: 24L

How do societies understand and manage their own diversity? This course unites critical studies of multiculturalism and settler colonialism to study Canada, Australia, New Zealand, and the U.S., also examining strategies in other sites for managing diversity which are framed differently (e.g. superdiversity (Europe), co-existence (Japan), multiracialism (Hawai'i), mestizoness (Mexico)).

Prerequisite: ANT204H1 or ANT253H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

JAL328H1 - Writing Systems

Hours: 36L

Introduction to writing systems; their historical development, their relationship to language, and their role in culture and society. (Given by the Departments of Anthropology and Linguistics) (Not offered every year)

Prerequisite: ANT100Y1/LIN101H1/LIN200H1
Distribution Requirements: Social Science
Breadth Requirements: Thought, Belief and Behaviour (2)

ANT329H1 - Language & Power Structure

Previous Course Number: ANT329Y1
Hours: 24L/4T

The role of language and symbolism in the representation and manipulation of ideology and power structure. Case materials drawn from the study of verbal arts, gender, law, advertising, and politics with a focus on North America.

Prerequisite: ANT204H1 or ANT207H1 or ANT253H1 or VIC223Y1 or one of 200+ series H1 course in SOC or POL or LIN or Women's Studies
Exclusion: ANT329Y1
Distribution Requirements: Social Science
Breadth Requirements: Thought, Belief and Behaviour (2)

ANT330Y1 - Paleoanthropology Field School

Hours: 24L/78P

This course provides background in the practical and theoretical aspects of fieldwork in Paleoanthropology. Students are trained in the treatment and analysis of fossil vertebrates, plant macro- and micro-fossils and sediments. Excursions to paleoanthropological localities of Homo erectus and Homo sapiens, and excavation at a hominoid site. (Joint undergraduate-graduate) Not eligible for CR/NCR option. Additional fees of up to $2500 for field trip costs will apply.

Prerequisite: ANT203Y1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

ANT333Y1 - Living Primate Adaptations

Hours: 48L/24P

A survey of living primates, this lab-oriented course describes and compares the diverse behavioural and anatomical adaptations that are characteristic to this order of mammals. The understanding of the biological diversity and evolutionary history of primates is important for further understanding of human adaptation and evolution.

Prerequisite: ANT203Y1
Exclusion: ANT333H1
Recommended Preparation: ANT334H1; BIO120H1, BIO220H1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

ANT334H1 - Human Skeletal Biology

Previous Course Number: ANT334Y1
Hours: 24L/24P

Exploration of the development and maintenance of the human skeleton and dentition, with emphasis on application to archaeological, forensic and biomedical sciences.

Prerequisite: ANT203Y1
Exclusion: ANT334Y1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)
ANT335Y1 - Human Evolution

Hours: 24L/36P

This course takes the student on a survey of human evolution from our ape ancestors to modern humans. Students will learn to identify skulls, teeth and limb bones, explore hundreds of casts, and learn how researchers understand human origins and trends in the development of human anatomy and behavior.

Prerequisite: ANT203Y1
Exclusion: ANT429H1, ANT332H5, ANT333H5, ANT434H5, ANTC17H3
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

ANT336H1 - Evolutionary Anthropology Theory

Hours: 24L

This course will explore the foundational and leading concepts in evolutionary anthropology. Historically important readings and current concepts will be presented and discussed in the context of research, especially in areas of human population biology, ecology and the evolution of Homo sapiens. Topics will include behavioral ecology and life history theory, as well as a critique of the adaptationist program.

Prerequisite: ANT203Y1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

ANT337H1 - Human Movement

Hours: 24L/24P

This course will investigate human movement and physical activity patterns through the lens of evolutionary anthropology. The evolution of hominin physical behaviours, such as bipedalism and tool use, will be explored alongside the morphological traits associated with these behaviours. We will also examine social and cultural factors that may moderate physical activities among diverse human groups, including subsistence strategy variation and contemporary views on activity and exercise.

Prerequisite: ANT203Y1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

ANT338H1 - Molecular Anthropology and Human Evolution

Hours: 24L/12P

Molecular anthropology is an interdisciplinary field combining biology, genetics, evolution and anthropology. In this class, we will explore the use of DNA for the study of past migrations and admixture patterns, the evolution of pathogens, plant and animal domestication and especially the relationships between recent and archaic humans.

Prerequisite: ANT203Y1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

ANT340H1 - Anthropology of Latin America

Hours: 24L

Provides a framework for understanding current anthropological issues in the different geo-political regions of Latin America. Special attention will be paid to historical/conceptual development of the discipline in the region, and the course will introduce a debate about the death and resurgence of area studies.

Prerequisite: ANT207H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

ANT341H1 - China in Transition

Previous Course Number: ANT341Y1
Hours: 24L

This course offers a general introduction to transformations in modern and contemporary China from an anthropological perspective. This course covers major aspects of Chinese culture, history, and society in a global context.

Prerequisite: ANT207H1
Exclusion: ANT341Y1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)
ANT343H1 - Social Anthropology of Gender

Previous Course Number: ANT343Y1
Hours: 24L

Social anthropological perspectives on variations in gender roles and systems. Examines, through comparison of ethnography, the relationship of gender to social organization, economic and political processes, belief systems and social change.

Prerequisite: ANT207H1
Exclusion: ANT343Y1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

ANT345H1 - Global Health: Anthropological Perspectives

Hours: 24L

This course examines medical anthropologies contributions to, and critiques of, global health policies and programs. Topics covered include: colonialism and health, the political ecology of disease, indigenous constructions of illness and healing, medical pluralism, the politics of primary health care, population policies, reproductive health, and AIDS.

Prerequisite: ANT207H1 or permission of the instructor
Recommended Preparation: ANT348H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

ANT346H1 - Anthropology of Food

Hours: 24L

Social anthropological perspective on the nature and meaning of food production, culinary cultures, industrial food, food as metaphor, and famine and hunger.

Prerequisite: ANT204H1 or ANT207H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

ANT347H1 - Metropolis: Global Cities

Hours: 24L

The role of culture, cultural diversity, space and performance in urban institutions and settings. The cultural context and consequence of urbanization.

Prerequisite: ANT207H1
Exclusion: ANT347Y1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

ANT348H1 - Medical Anthropology: Health, Power and Politics

Previous Course Number: ANT348Y1
Hours: 24L/5T

This course deepens students’ understandings of health and illness as social, cultural, political and historical phenomena. Drawing on theories and approaches from social-cultural anthropology, students will develop skills in critical analysis of experiences and meanings of healing and illness in particular contexts, with a focus on anthropological critique of dominant health policies, discourses, technologies and practices.

Prerequisite: ANT204H1 or ANT207H1 or permission of the instructor. (Note: ANT208H1 is not accepted preparation for this course.)
Exclusion: ANT348Y1
Recommended Preparation: ANT205H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

ANT349H1 - Anthropology and New Technologies

Previous Course Number: ANT442H1
Hours: 24L

This course explores the relationship between technology and culture through a focus on new media and technological infrastructures. Anticipating a future of driverless cars and big data, we examine how social theorists, cultural critics and ethnographers have sought to understand the socio-cultural dimensions of earlier waves of rapid technological change.

Prerequisite: ANT207H1
Exclusion: ANT442H1
Distribution Requirements: Social Science
Breadth Requirements: Creative and Cultural Representations (1)
JAL353H1 - Conversational Structures

**Hours:** 36L

Conversational Structures in an introduction to the detailed observation of ordinary conversational interaction, and to some of the main ways in which such interaction is organized. The focus is on developing the capacity to discern orderliness in the details of everyday interaction, and beginning independent research in this area. (Given by the Departments of Anthropology and Linguistics). Not offered every year.

**Prerequisite:** (LIN101H1, LIN102H1)/LIN200H1/ANT253H1  
**Distribution Requirements:** Social Science  
**Breadth Requirements:** Thought, Belief and Behaviour (2)

JAL355H1 - Language and Gender

**Hours:** 24L

An introduction to some of the principal questions of feminist theory, as viewed from sociolinguistics. Topics include: socialization into gendered discourse patterns, cultural and ethnic differences in gendered interactions; the role of language and gender in legal, medical and labour settings; multilingualism, migration, imperialism and nationalism; sexuality, desire and queer linguistics, language, gender and globalization.

**Prerequisite:** One FCE at the 200-level in LIN/ANT/JAL/SOC/WGS  
**Recommended Preparation:** ANT204H1/ANT253H1/SOC200H1/SOC214H1  
**Distribution Requirements:** Social Science  
**Breadth Requirements:** Society and its Institutions (3)

ANT356H1 - Anthropology of Religion

**Hours:** 24L

This course introduces anthropological definitions of religion; debates on rituals and rites of passage; rationality, religion and modernity; belief and body; religion and the media. It also engages with studies in the anthropology of popular and transnational religion, and the politics of religious movements.

**Prerequisite:** ANT207H1  
**Distribution Requirements:** Social Science  
**Breadth Requirements:** Thought, Belief and Behaviour (2)

ANT358H1 - Medical Anthropology and Social Justice

**Hours:** 24L

It is widely acknowledged that sharp disparities in disease burden and access to medical care characterize global patterns in health. These disparities affect the life chances of much of the world's population, based on class position, gender, and geographical region.

**Prerequisite:** ANT204H1 or ANT207H1  
**Distribution Requirements:** Social Science  
**Breadth Requirements:** Society and its Institutions (3)

ARH360H1 - Prehistory of the Near East  
(formerly ANT360Y1)

**Hours:** 24L

From earliest times through the rise of complex hunter-gatherers, and the food producing revolution to politically complex societies in Southwest Asia.

**Prerequisite:** ANT200Y1 or NMC260H1 and NMC262H1  
**Exclusion:** ARH360Y1  
**Distribution Requirements:** Social Science  
**Breadth Requirements:** Society and its Institutions (3)

ARH361H1 - Field Archaeology

Opportunity for students participating in non-degree credit archaeological digs to submit reports, field notes and term papers for degree credit. Not eligible for CR/NCR option.

**Prerequisite:** Permission of Undergraduate Coordinator and Supervisor  
**Distribution Requirements:** Social Science

ANT362H1 - Sports and Play

**Hours:** 24L

We tend to think of sports as unserious. This course shows that much serious cultural work is conducted through sports, but also that sports are indeed not always serious. This anthropology of sports engages with sports as both work and play, considering issues like gender, bodies, competition, and pleasure.

**Prerequisite:** ANT204H1 or ANT207H1  
**Distribution Requirements:** Social Science  
**Breadth Requirements:** Creative and Cultural Representations (1)
ANT364H1 - Environment & Globalization

Previous Course Number: ANT364Y1
Hours: 24L

This course will examine the relationships between humans and the environment in the context of contemporary efforts to develop within or in opposition to the political economy of neoliberal globalization. We will critically examine the discourses of progress and environment within a broader theoretical inquiry of structure/agency and power.

Prerequisite: ANT204H1 or ANT207H1
Exclusion: ANT364Y1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

ANT366H1 - Anthropology of Activism and Social Justice

Previous Course Number: ANT366Y1
Hours: 24L

Explores how anthropologists have traditionally studied social movements and how new social movements have challenged anthropologists to rethink some of their ethnographic methods and approaches. Some specific movements covered include those related to indigenous rights, environmentalism, refugees, gay and lesbian issues, biotechnology, new religions, and globalization.

Prerequisite: ANT207H1
Exclusion: ANT366Y1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

ANT368H1 - Nature Culture Human

Hours: 24L

What is “nature” and how does it relate to the way in which “culture” is conceptualized? How do race, class, gender, sexuality and ability structure our experiences of both nature and ourselves as human beings? This course explores these questions through engagements with a variety of texts.

Prerequisite: ANT204H1
Exclusion: ANT110H1
Distribution Requirements: Social Science
Breadth Requirements: Thought, Belief and Behaviour (2)

ANT370H1 - Introduction to Social Anthropological Theory

Hours: 24P

An in-depth critical review of foundational ideas in the development of the practice of Anthropology. Topics may include questioning fieldwork, origins and legacies of functionalism, cultural materialism, politics of culture, power and political economy, globalization and post modernism, gender and post-structuralism.

Prerequisite: ANT207H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

ANT371H1 - Human Nutritional Ecology

Previous Course Number: ANT471H1
Hours: 24L

A detailed review of human dietary adaptations, subsistence strategies and the suite of cognitive, cultural and life history traits that make humans so adaptable. Focus is on the relevance of the past to understanding the modern world food system and finding solutions to contemporary problems in population, food, and health.

Prerequisite: ANT203Y1 or ANT207H1 or ANT208H1
Exclusion: ANT471H1
Distribution Requirements: Science; Social Science
Breadth Requirements: Society and its Institutions (3)

ANT372H1 - Cultural Property

Hours: 24L

This course explores the relationship between cultural property and everyday life through the themes of movement, ownership and value. Case studies, current events and debates help students understand how heritage is informed by the multiple values of cultural property. This course addresses issues of cultural property and heritage in the contemporary world that are relevant to all subfields of anthropology.

Prerequisite: ANT100Y1 or ANT200Y1 or ANT204H1 or ANT207H1 or ANT253H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)
ANT374H1 - Rethinking Development, or the Improvement of the World

**Hours:** 36L

Development, or deliberate intervention to improve the lives of people deemed to be lacking, or left behind, has shaped the modern world for at least a century. Drawing on historical and ethnographic studies, this course examines the trajectory of development as a concept and practice, and traces its effects.

**Prerequisite:** ANT207H1 or permission of the instructor

**Distribution Requirements:** Social Science

**Breadth Requirements:** Society and its Institutions (3)

ANT376H1 - Anthropology of Animals

**Hours:** 24L

The relationship between humans and other animals is one of the most hotly debated topics of our times. Through key classic and contemporary writings, this course introduces students to the interdisciplinary field of animal studies, and explores how anthropologists and other theorists have critically engaged in debates about animal and human distinctions.

**Prerequisite:** ANT204H1 or ANT207H1

**Distribution Requirements:** Social Science

**Breadth Requirements:** Society and its Institutions (3)

ANT378H1 - Gift, Money, and Finance

**Hours:** 24L

This course introduces dialogue between anthropological literature and other disciplinary studies in regards to the economy and culture of gift and money transaction as a key aspect of human society. Studying the history of gift and money economy from agricultural societies and diverse developments of finance market culture in recent era through various perspectives (e.g., ethnographic, sociological, politico-economic, and historical views), this course aims to train students developing a critical understanding of capitalism.

**Prerequisite:** ANT204H1 or ANT207H1

**Distribution Requirements:** Social Science

**Breadth Requirements:** Society and its Institutions (3)

ANT380H1 - Craft of Social/Cultural Anthropology

**Previous Course Number:** ANT210H1

**Hours:** 36S

This course introduces students to the skills they need to conduct ethnographic research, in particular, participant observation, in-depth interview, as well as writing fieldnotes and research proposals. The emphasis is on interactive, workshop-style small group learning.

**Prerequisite:** ANT207H1

**Exclusion:** ANT210H1

**Distribution Requirements:** Social Science

**Breadth Requirements:** Society and its Institutions (3)

ANT384H1 - Special Topics in Society, Culture and Language

**Hours:** 24L

This lecture-format course focuses on a relatively broad topic in socio-cultural and/or linguistic anthropology. Topics change from year to year. For the 2015-16 academic year, the title of this course is "Nature, Culture, Human".

**Prerequisite:** ANT207H1

**Distribution Requirements:** Social Science

**Breadth Requirements:** Society and its Institutions (3)

ANT386H1 - Global Catholicism: Anthropological Approaches

**Hours:** 24L

This is a course on material religion and mediation, kingdom and kinship, gender symbolisms and devotions, ecologies of selves and the histories of senses that infuse Catholicism. It challenges us to think about the importance of Catholicism as a global phenomenon expressed through socio-political and cultural practices of the everyday life.

**Prerequisite:** ANT204H1 or ANT207H1 or SMC103Y1 or RLG212H1 or RLG203H1

**Distribution Requirements:** Social Science

**Breadth Requirements:** Thought, Belief and Behaviour (2)
ANT388H1 - Anthropologists and Indigenous Peoples in North America

Hours: 24L

Indigenous scholars (including anthropologists), intellectuals and activists have publicly challenged the ethical and political implications of anthropological research in, on and with Indigenous nations and communities. This course takes such critiques as jumping-off points from which to explore historical and contemporary relations between anthropologists and Indigenous peoples in North America.

Prerequisite: ANT200Y1 or ANT203Y1 or ANT204H1 or ANT207H1 or ANT208H1 or ANT253H1
Recommended Preparation: ABS201Y1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

JAH391Y0 - Topics in Anthropology and History

Hours: 48S

Anthropological and Historical perspectives on topics that vary from year to year.

Recommended Preparation: ANT207H1 or a course in European History
Distribution Requirements: Humanities; Social Science
Breadth Requirements: Creative and Cultural Representations (1); Society and its Institutions (3)

ANT395Y0 - Special Topics in Anthropology

Hours: 48S

Studies in anthropology taken abroad. Areas of concentration vary depending on the instructor and year offered.

Recommended Preparation: ANT100Y1 or ANT200Y1 or ANT203Y1 or ANT204H1 or ANT207H1
Distribution Requirements: Social Science

ANT396Y0 - Special Topics in Anthropology

Hours: 48S

Studies in anthropology taken abroad. Areas of concentration vary depending on the instructor and year offered.

Recommended Preparation: ANT100Y1 or ANT200Y1 or ANT203Y1 or ANT204H1 or ANT207H1
Distribution Requirements: Social Science

JAH391H1 - Topics in Anthropology and History

Hours: 24S

Anthropological and Historical perspectives on topics that vary from year to year.

Recommended Preparation: ANT204H1 or a course in European History
Distribution Requirements: Humanities; Social Science
Breadth Requirements: Society and its Institutions (3)

ANT388H0 - Research Excursions

Distribution Requirements: Social Science
ANT398Y0 - Research Excursions

Distribution Requirements: Social Science

ANT399Y1 - Research Opportunity Program

Hours: TBA

Credit course for supervised participation in faculty research project. Details at https://www.artsci.utoronto.ca/current/academics/research-opportunities/research-opportunities-program. Not eligible for CR/NCR option.

JAL401H1 - Field Linguistics

Hours: 48P

Field Linguistics provides practice in language analysis based on elicited data from a native speaker of an indigenous or foreign language, emphasizing procedures and techniques. (Given by the Departments of Anthropology and Linguistics)

Prerequisite: Completion of LIN322H1 and LIN331H1 or permission of the instructor
Exclusion: LIND46H3
Distribution Requirements: Social Science
Breadth Requirements: Thought, Belief and Behaviour (2)

ANT406H1 - Lithic Analysis

Hours: 24L/12P

Core reduction strategies, replication, experimental archaeology, use-wear, design approaches, ground stone, inferring behaviour from lithic artifacts.

Prerequisite: ANT200Y1 and ARH312Y1 and ARH305H1
Distribution Requirements: Social Science
Breadth Requirements: The Physical and Mathematical Universes (5)

ANT407H1 - Inka and Aztec States

Hours: 24L

This course provides a comparative study of the emergence, organization, and transformation of the two historically-documented states of the native Americas: the Inka and the Aztec. Students will have the opportunity to analyze ethnohistorical and archaeological data in order to critically evaluate models of the pre-industrial state while gauging the anthropological significance of either convergence or particularity in the historical development of centralized political formations.

Prerequisite: ANT200Y1 and ARH305H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

ANT409H1 - Landscape Archaeology

Hours: 24L/12P

Archaeological survey, spatial analysis of archaeological evidence over landscapes and territories, and ways archaeologists attempt to interpret landscapes, regional settlement systems, agricultural land use, regional exchange and communication, and past people's perceptions of or ideas about landscape.

Prerequisite: ARH305H1
Recommended Preparation: GGR270H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

ANT410H1 - Hunter-Gatherers Past & Present

Hours: 24S

Examines the diversity of recent hunter-gatherer societies, as a source of analogues for understanding the archaeological record of past foraging peoples.

Prerequisite: ARH305H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

ANT411H1 - Advanced Archaeological Theory

Hours: 24S

Seminar in the critical examination of major schools of archaeological thought.

Prerequisite: ARH305H1
Distribution Requirements: Social Science
Breadth Requirements: Thought, Belief and Behaviour (2)
ANT412H1 - Historical Archaeology

Hours: 16L/8P

Introduces the problems, methods and some of the material culture of colonial and industrial archaeology with emphasis on Canada and colonial America. Covers the use of documentary evidence, maps, architecture, and a variety of artifact classes.

Prerequisite: ANT200Y1 or HIS374H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

ANT415Y1 - Laboratory in Faunal Archaeo-Osteology

Hours: 48P/48S

Examination and interpretation of faunal material from archaeological sites as evidence for culture.

Prerequisite: ARH312Y1
Distribution Requirements: Science; Social Science
Breadth Requirements: Living Things and Their Environment (4); The Physical and Mathematical Universes (5)

ANT416H1 - Archaeology of Ritual and Identity

Hours: 24L

This course offers a comparative survey of archaeological approaches to ritual practice as it relates to identity politics, personhood, and the negotiation of power relations in past societies. An important goal of the seminar is to introduce students to social theories on the inherent materiality of ritual performance, whether orchestrated in everyday practice or in elaborate religious and political spectacles.

Prerequisite: ARH305H1 and one of ANT100Y1/ANT200Y1/ANT356H1
Distribution Requirements: Social Science
Breadth Requirements: Thought, Belief and Behaviour (2)

ANT419H1 - Current Debates in Palaeolithic Archaeology

Hours: 24S

Current research in Palaeolithic Archaeology reflecting emerging issues.

Prerequisite: ANT200Y1 or ANT203Y1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

ANT420H1 - Archaeology of Inequality

Hours: 24L

How social complexity is manifested in the archaeological record. Origins and evolution of prehistoric complex societies, from small-scale chiefdoms to large-scale states.

Prerequisite: ANT200Y1 and ARH305H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

ANT425H1 - Language in Anthropological Thought

Previous Course Number: ANT325H1
Hours: 24L

How ideas about language fit into the overall views of humankind as expressed by selected anthropologists, linguists, sociologists, and philosophers.

Prerequisite: ANT204H1 or ANT207H1 or ANT253H1 and 0.5 300+ level course from Group C
Exclusion: ANT425Y1; ANT325H1
Distribution Requirements: Social Science
Breadth Requirements: Thought, Belief and Behaviour (2)

ANT426H1 - Western Views of the Non-West

Hours: 24S

The history and present of western concepts and images about the 'Other', in anthropological and other scholarship and in popular culture.

Prerequisite: 0.5 300 level FCE from Anthropology Group C (Society, Culture, Language), or NMC or Jewish Studies or Diaspora and Transnational Studies or History
Distribution Requirements: Social Science
Breadth Requirements: Creative and Cultural Representations (1)
ANT430H1 - Primate Conservation Biology

Hours: 24L

The focus of this course is on the science of primate conservation biology in an anthropological context. Topics will include primate biodiversity and biogeography, human impacts, and conservation strategies/policies. The effects of cultural and political considerations on primate conservation will also be discussed.

Prerequisite: ANT203Y1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

ANT431H1 - The Real Planet of the Apes

Hours: 12L/12P

Through fossil labs and lectures, we look back over 30 to 5 million years ago when apes roamed from Spain to China and Germany to Southern Africa. The fossil record of these apes, our ancestors, reveals how we evolved our large brains, dexterous hands, extended growth period and incredible intelligence. We encounter many surprises along the way, such as apes living with pandas in Hungary, animals with a mix of monkey, ape and pig traits and apes the size of polar bears. Of the more than 100 species of fossil apes known, only one gave rise to us.

Prerequisite: ANT203Y1
Recommended Preparation: ANT335Y1 or ANT330Y1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

ANT434H1 - Health, Diet & Disease in the Past

Hours: 24L/12P

Advanced exploration of the life histories of past populations, through the application of palaeodietary analyses, palaeopathology and other appropriate research methods.

Prerequisite: ANT334H1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

ANT435H1 - Anthropology of Childhood and Childcare

Hours: 24L

A detailed review of the classic and recently emerging literature on the anthropology of children, childhood, and childcare. Focus is on theories for evolution of human parenting adaptations, challenges in research methodology and implications for contemporary research, practice and policy in the area of care and nutrition of infants and children.

Prerequisite: ANT203Y1
Distribution Requirements: Social Science; Science
Breadth Requirements: Living Things and Their Environment (4)

ANT436H1 - Primate Ecology & Social Behavior

Hours: 24L

This course will provide an overview of the ecology and social behavior of extant nonhuman primates. Topics will include socioecology, conservation biology, biogeography, aggression and affiliation, community ecology, communication, and socio-sexual behavior. There will also be extensive discussions of methods used in collecting data on primates in the field.

Prerequisite: ANT203Y1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

ANT437H1 - Introduction to Virtual Anthropology

Hours: 18L/24P

Virtual anthropology is a set of new methods that allow us to digitize objects, analyze, reconstruct and share them digitally, and bring them back into the real world. After a theoretical introduction, students will use surface scanners, photogrammetric software and 3D printers to digitize and study archaeological and anthropological specimens.

Prerequisite: ANT334H1 or ARH312Y1
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)
ANT438H1 - Topics in Emerging Scholarship (Evolutionary Anthropology)

Hours: 24S

Taught by an advanced PhD student or postdoctoral fellow, and based on his or her doctoral research and area of expertise, this course presents a unique opportunity to explore intensively a particular Evolutionary Anthropology topic in-depth. Topics vary from year to year.

Prerequisite: ANT203Y1 and 0.5 FCE 300+ Group B (Evolutionary) course
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

ANT440H1 - Society in Transition

Hours: 36S

Modernity, globalization, and neoliberalism have emerged as three distinct, yet connected, concepts in anthropological studies of social, cultural, political and economic changes around the world. This course critically examines the various meanings of these three concepts, and tests their usefulness as analytical tools to think productively about societies in transition in specific historical and ethnographic contexts. Topical focus varies by year, and may include the changing character of work and welfare, property and markets, country and city, media and mobilization, and others. Check the course outline for details.

Prerequisite: ANT207H1 and ANT370H1 or permission of the instructor
Exclusion: ANT440Y1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

ANT441H1 - Love, Sex, and Marriage

Hours: 24S

Beginning with anthropology's early work on kinship, and ending with recent analyses of sex work and the globalization of ideologies of romantic love and companionate marriage, this course will investigate how emotional and sexual relationships are produced, used, conceptualized, and experienced both within particular societies and transnationally.

Prerequisite: ANT207H1 and ANT343H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

ANT450H1 - Multispecies Cities

Hours: 24S

As of 2007, for the first time in human history, more than half the world’s peoples lived in cities. It is estimated that by 2030 over 60% will be urban-dwellers. This demographic shift suggests that for many (if not most) people, their primary encounter with “nature” will be urban based. This course explores the idea of “urban-nature” by 1) focusing on the ways in which various theorists have challenged traditional ways of viewing both “the city” and “nature” and 2) encouraging students to develop their own critical perspectives through ethnographic engagements with the city of Toronto.

Prerequisite: ANT204H1 or ANT207H1 and a 300-level course or above in Society, Culture and Language
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

HAJ453H1 - AIDS: A Global Perspective

Hours: 6L/18S

Seminars explore the global AIDS crisis, adopting the medical-anthropological perspective of Paul Farmer’s Infections and Inequalities. Varying epidemiological profiles of AIDS are placed in broader social, cultural, and political-economic frameworks. The impact of globalization and structural inequality on local cultures and lifestyles provides an essential backdrop to the discussions.

Prerequisite: 14 FCE complete, ANT208H1/BIO220H1/PHS300H1/JNH350H1
Distribution Requirements: Science; Social Science
Breadth Requirements: Society and its Institutions (3)
ANT455H1 - Ethnographic Approaches to the Middle East and North Africa

Hours: 36L

This course explores the literature and concerns of anthropologists conducting ethnographic research in the greater Middle East and North Africa (MENA). It is designed for students with a background in social and cultural anthropology who wish to become familiar with the social and religious complexity of the MENA region, and the anthropological questions it has compelled. Islam has long been the area’s principal social and historical force and thus provides the backdrop for much, but not all, of the ethnography considered in the course. Moreover, Muslim majority MENA countries exhibit considerable social and sectarian diversity. Readings and lectures attend to differences as well as resemblances, while considering issues such as gender roles, kinship, marriage, local level practices, medicine, secularism, ‘public Islam,’ nationalism, and the persistent problem of orientalism.

Prerequisite: ANT207H1
Recommended Preparation: NMC241H1, RLG204H1, NMC283Y1
Distribution Requirements: Social Science
Breadth Requirements: Thought, Belief and Behaviour (2)

ANT456H1 - Queer Ethnography

Hours: 24L

This course explores, first, how and where forms of desire and sexual practice have become sites of anthropological inquiry and exemplars of particular cultural logics. Tracing, then, the transnational turn in the anthropology of sexuality, the course engages important debates about culture, locality, and globalization. By focusing on the transnational movement of desires, practices, and pleasures through activistism, mass media, and tourism, the course asks how sex is global and how globalization is thoroughly sexed. Course material will stress, but not be limited to, forms of same-sex or otherwise queer sexualities.

Prerequisite: ANT207H1 and any 300-level course in Society, Culture and Language
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

ANT457H1 - Anthropology of Material Culture

Hours: 24L

The course addresses the cultural and social significance of material culture in specific cultural settings, and the role that artifacts have played in the history of anthropological thought from early typological displays to the most recent developments of material culture studies.

Prerequisite: ANT200Y1 or ANT207H1
Distribution Requirements: Social Science
Breadth Requirements: Creative and Cultural Representations (1)

ANT458H1 - Settler-Colonialism and Indigenous Health in Canada

Hours: 24S

This course draws on anthropological and historical literatures to explore the relationship between the health of Indigenous people and Canadian settler-colonialism. In conceptualising this relationship, we focus on critical analysis of the role of biomedical health-care systems in settler-colonial governmentality, and how history is understood in discourses on Indigenous health.

Prerequisite: Any 300-level course in Society, Culture and Language or INS350H1 or INS355H1 or JFP450H1 or permission of the instructor
Recommended Preparation: ANT345H1 or ANT348H1 or ANT358H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

ANT459H1 - Multispecies Ethnography

Hours: 24S

This course introduces perspectives which extend anthropological inquiry beyond the solely human realm. Building on an acknowledgement of the fundamental interconnectedness of humans and other life forms, it explores the agencies of other-than-humans, including nonhuman animals, land and seascape, plants, bacteria, “contaminants,” and others. The course involves field-site visits and fieldwork projects in Toronto (GTA region) and engages with ethnographic methodologies best suited to investigations of inter-species, inter-life form relationships.

Prerequisite: ANT376H1 or three 300-level anthropology courses in any subfield or permission of instructor
Distribution Requirements: Social Science
Breadth Requirements: Thought, Belief and Behaviour (2)
ANT460H1 - Global Perspectives on Womens Health

Hours: 24S

This fourth-year seminar examines how female gender shapes health and illness. Using case studies of sexual health, fertility and its management, substance use/abuse, mental health, and occupational/labor health risks, the course investigates the material, political, and socio-cultural factors that can put women at risk for a range of illness conditions.

Prerequisite: ANT343H1 or ANT348H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

ANT462H1 - Anthropology of Affect

Hours: 24S

This course examines how anthropologists have studied the way that people hope, imagine, love, and despise. Ethnography of the intimate realms of affect raises important questions about knowledge production and methodology as well as offering insight into how people come to act upon the world and what the human consequences of such action are. The course will also examine how the intimate is socially produced and harnessed in the service of politics and culture. Topics will include grief and its lack; dreams and activism; love and social change; memory and imperialism; sexuality and care; and violence and hope.

Prerequisite: ANT207H1 and any 300-level course in Society, Culture and Language
Distribution Requirements: Social Science
Breadth Requirements: Thought, Belief and Behaviour (2)

ANT472H1 - Japan in Global Context: Anthropological Perspectives (formerly ANT354Y1 and ANT354H1)

Hours: 24L

This course examines how what we know as Japan and its culture has been constructed through global interactions. Topics include gender and sexuality, race and ethnicity, social and family life, work and leisure, and Japanese identity amid changing global power relations.

Prerequisite: ANT204H1 or ANT207H1
Exclusion: ANT354Y1; ANT354H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

ANT473H1 - Ethnographic Practicum: The University

Hours: 36S

Students carry out original ethnographic research projects on some aspect of life in the University of Toronto: its students, staff and faculty; its hierarchies and habits; and the everyday practices in classrooms, labs, dining halls, offices, clubs, and residence corridors. Class time is used for collective brainstorming, feedback and analysis.

Prerequisite: ANT380H1 or permission of the instructor
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

ANT474H1 - Ethnographies of HIV/AIDS: Risk, Vulnerability, and Care

Hours: 24S

This course examines HIV/AIDS globally and ethnographically focusing on how gendered political economies create HIV vulnerability; the experiences of sexual minorities; how religious institutions shape practices of social care and exclusion; and anthropological critiques of HIV awareness campaigns and counseling as sites of govern mentality.

Prerequisite: ANT207H1 and ANT348H1 or ANT345H1 or ANT358H1 or ANT343H1
Recommended Preparation: ANT343H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

ANT475H1 - Reading Ethnography

Hours: 24P

Students read several full-length ethnographies, both classical and contemporary, and debate what makes for sound ethnographic research and writing, as well as what ethnography is and "should" be as a genre of writing and representation.

Prerequisite: ANT207H1 and ANT370H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)
ANT476H1 - Body, Self and Sociality

Hours: 36S

This seminar class examines 'the body' as a historically and culturally contingent category, the material site and means of practice, and a foundation point for identity and self-fashioning. We consider the relevance of cultural meanings to biomedical practices, the centrality of the body to consumer techno-society, and the body’s role as a locus of experience, political inscription, and struggle.

Prerequisite: ANT370H1
Distribution Requirements: Social Science
Breadth Requirements: Thought, Belief and Behaviour (2)

ANT477H1 - Transnational Korea in and outside the Peninsula

Previous Course Number: ANT377H1
Hours: 24S

This course addresses reading ethnography as a tool to understand compressed and complex modernity such as Korean societies, both in and outside of the Korean peninsula. In particular, this course aims to develop students’ critical thinking on class, ethnicity, gender, family, and migration in Korea and diasporic societies of Koreans in Canada, China, Japan, and US.

Prerequisite: ANT207H1 and at least one 300+ course in social sciences and humanities
Exclusion: ANT377H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

ANT478H1 - Special Topics in Anthropological Research

Hours: 24S

Unique opportunity to explore a particular anthropological topic in-depth. Topics vary from year to year.

Prerequisite: Any 200 level Anthropology course and 1.0 FCE at the 300+ level
Distribution Requirements: Social Science

ANT481H1 - Special Topics in Evolutionary Anthropology

Hours: 24S

Unique opportunity to explore in-depth a particular topic in Evolutionary Anthropology. Topics vary from year to year.

Prerequisite: ANT203Y1 and 0.5 FCE 300+ Group B (Evolutionary) course
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

ARH482H1 - Special Topics in Archaeology

Hours: 24S

Unique opportunity to explore a particular archaeological topic in-depth. Topics vary from year to year.

Prerequisite: ARH305H1
Distribution Requirements: Social Science

ANT483H1 - Special Topics in Linguistic Anthropology

Hours: 24S

This course will focus on an advanced topic in Linguistic Anthropology. Topic will vary from year to year.

Prerequisite: ANT253H1 and 1.0 FCE 300 level Group C (Society, Culture and Language) course
Distribution Requirements: Social Science
Breadth Requirements: Thought, Belief and Behaviour (2)

ANT484H1 - Special Topics in Social Cultural Anthropology

Hours: 24S

Unique opportunity to explore a particular Social Cultural Anthropology topic in-depth. Topics vary from year to year.

Prerequisite: ANT207H1 and 1 FCE 300 level Group C (Society, Culture and Language) course
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)
ANT485H1 - Topics in Emerging Scholarship (Society, Culture and Language)

Hours: 24S

Taught by an advanced PhD student or postdoctoral fellow, and based on his or her doctoral research and area of expertise, this course presents a unique opportunity to explore intensively a particular Socio-cultural or Linguistic Anthropology topic in-depth. Topics vary from year to year.

Prerequisite: ANT207H1 and 1 FCE 300+ Group C (Society, Culture and Language) course
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

ANT486H1 - Special Topics: Socio-Cultural Research Seminar

Hours: 24S

Unique opportunity to explore a particular Social Cultural Anthropology topic in-depth. Topics vary from year to year.

Prerequisite: ANT207H1 and 1 FCE 300+ Group C (Society, Culture and Language) course
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

ANT490Y1 - Field Course in Social and Cultural Anthropology

Hours: 24L/52P

An instructor-supervised experiential study project in social and cultural anthropology. Course takes place in an off-campus setting. Not eligible for CR/NCR option.

Prerequisite: ANT204H1 or ANT207H1, and 1.0 additional FCE from the Society, Culture, and Language course group
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

ANT491H1 - Internship in Anthropology

Hours: 24P

This course is an opportunity to apply acquired knowledge in anthropology or archeology in a work placement environment. Opportunities may include local community organizations, international development organizations, museum or heritage projects, or media production projects. Only internships that require knowledge and skills in anthropology and/or archeology will be considered. Student must fulfill responsibilities of the internship as well as complete a final research paper. If qualified, the student’s internship supervisor will mark the final paper for the course; if not, an appropriate academic supervisor will be assigned from within the Dept. of Anthropology. Not eligible for CR/NCR option.

Prerequisite: Fourth year; major or specialist in a program in Anthropology; 3.0 FCEs in Anthropology
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

ANT491Y1 - Internship in Anthropology

Hours: 48P

This course is an opportunity to apply acquired knowledge in anthropology or archeology in a work placement environment. Opportunities may include local community organizations, international development organizations, museum or heritage projects, or media production projects. Only internships that require knowledge and skills in anthropology and/or archeology will be considered. Student must fulfill responsibilities of the internship as well as complete a final research paper. If qualified, the student’s internship supervisor will mark the final paper for the course; if not, an appropriate academic supervisor will be assigned from within the Dept. of Anthropology. Not eligible for CR/NCR option.

Prerequisite: Fourth year; major or specialist in a program in Anthropology; 3.0 FCEs in Anthropology
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

ARH494H1 - Topics in Emerging Scholarship (Archaeology)

Hours: 24S

Taught by an advanced PhD student or postdoctoral fellow, and based on his or her doctoral research and area of expertise, this course presents a unique opportunity to explore intensively a particular Archaeology topic in-depth. Topics vary from year to year.

Prerequisite: ARH305H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)
ARH495H1 - Archaeology Research Practicum

Laboratory or practical research on an archaeological project that emphasizes methods and research design in archaeology. Students must obtain the consent of a Supervisor before enrolling. Students are required to give an oral presentation of research results to an open meeting of the Archaeology Centre at the conclusion of the course. Application must be made to the Anthropology Department. Not eligible for CR/NCR option.

**Prerequisite:** A minimum of 14 credits, permission of Supervisor and Undergraduate Coordinator.

**Exclusion:** AN497Y1

**Recommended Preparation:** ARH305H1, ARH312Y1

**Distribution Requirements:** Social Science

ANT497Y1 - Independent Research

Supervised independent research on a topic agreed on by the student and supervisor before enrolment in the course. Open in exceptional circumstances to advanced students with a strong background in Anthropology. Course Supervisor must be a member of the Anthropology faculty. Application for enrolment should be made to the Department in the preceding term. A maximum of one year of Independent Research courses is allowed per program. Not eligible for CR/NCR option.

**Prerequisite:** A minimum of 10 credits, permission of Supervisor and Undergraduate Coordinator.

**Distribution Requirements:** Social Science

ANT499H1 - Independent Research

Supervised independent research on a topic agreed on by the student and supervisor before enrolment in the course. Open in exceptional circumstances to advanced students with a strong background in Anthropology. Course Supervisor must be a member of the Anthropology faculty. Application for enrolment should be made to the Department in the preceding term. A maximum of one year of Independent Research courses is allowed per program. Not eligible for CR/NCR option.

**Prerequisite:** A minimum of 10 credits, permission of Supervisor and Undergraduate Coordinator.

**Distribution Requirements:** Social Science
Archaeology

The Archaeology Program focuses on the study of past human societies primarily through their material remains, or "material culture." Archaeologists explore the nature of and changes in past cultures around the world through survey, excavation and analyses of stone tools, pottery, bones, plant remains, architecture and other cultural residues. Some of the major research foci of archaeologists are the behaviour and adaptations of early hominins, diversity of hunter-gatherer societies, origins of agriculture, pastoralism, urbanism and politically complex states, the workings of ancient exchange systems, and the development of class-based and gender-based political and economic inequalities in complex societies. Working archaeologists often specialize geographically, chronologically or thematically. Classical archaeologists, for example, specialize in the cultures of the ancient Greco-Roman world, while palaeoethnobotanists explore ways that botanical residues of ancient and prehistoric cultures can inform us about their economies and social systems. The specialist, major and minor programs allow students to explore archaeology in an interdisciplinary setting.

Students in the specialist or major program should consult the program coordinator or faculty members in their intended areas of specialization for advice on the selection of courses. Those intending to go on to graduate studies in departments such as Classics, East Asian Studies, Fine Art History or Near and Middle Eastern Civilizations should pay particular attention to language requirements at the graduate level.

The Archaeology Specialist (Arts program) is designed for students who would like to concentrate in archaeology while drawing on the teaching resources of diverse departments. See details below. Students interested in pursuing graduate studies should combine it with study of the ancient and modern languages relevant to their primary area of interest.

The Archaeology Major (Arts program) is designed for students who would like to pursue their interests in archaeology in conjunction with a Major in another field, such as Art, Classics, Earth Science, History, or Near and Middle Eastern Civilizations. See details below.

The Archaeology Minor (Arts program) allows students to sample archaeology while pursuing their main interest in another discipline. See details below.

For all these programs, students are encouraged to seek counselling and information from the Anthropology Undergraduate Administrator/Student Counsellor, Anthropology (416-978-6414).

Careers in archaeology usually require graduate training, although some aspects of archaeology in the public sector can be pursued with an undergraduate degree. Students completing our program have also successfully pursued careers in teaching, tourism, and cultural resource management.

Archaeology Programs

Archaeology Specialist (Arts Program) - ASSPE0155

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

Completed courses (with minimum grades)
The following course with the stated minimum grade is required:

- ANT200Y1 (70%)

Completion Requirements:

(11 credits, including at least 4 credits at the 300+ level and 1 credit at the 400 level)

First Year:
1. ANT200Y1
2. Statistical Requirement: GGR270H1 (Geography pre- or co-requisites waived for Archaeology and Anthropology students); or 0.5 credit from STA220H1, STA221H1, STA247H1, STA248H1, STA255H1, STA257H1, STA261H1, or ANT353H3 (at UTSC)
3. ANT100Y1 or CLA160Y1. If CLA160Y1 is taken, students must take an additional 0.5 credit from the following: CLA210H1, CLA230H1, CLA231H1, FAH206H1, FAH207H1; GGR100H1, GGR101H1; NMC262H1

Upper Years:
4. ARH305H1, ARH309H1, ARH312Y1, ANT411H1
5. Field Requirement: ANT311Y1 or ARH306Y1 or NMC261Y0 or ARH361Y1 or ARH361H1 or ANT418H5 (at UTM). If ARH361H1 or ANT418H5 is taken, students must take an additional 0.5 credit from ANT.
6. 5.0 credits from Groups A and B, of which 2.0 credits must be from Group A and 2.0 credits must be from Group B and 1.0 credits from either group

Note that students may substitute ARH495H1 (Research Practicum) for 0.5 credit of this requirement (assignment to Group A or B to be determined by Undergraduate Coordinator).

Archaeology Major (Arts Program) - ASMAJ0155

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

Completed courses (with minimum grades)
The following courses with the stated minimum grades are required:

- ANT100Y1 (65%) or ANT200Y1 (65%)
Completion Requirements:

(7 credits, including at least 2 credits at the 300+ level and 0.5 credits at the 400-level)

First Year:

1. ANT200Y1
2. ANT100Y1 or CLA160H1. If CLA160H1 is taken, students must take an additional 0.5 credits from the following: CLA210H1, CLA230H1, CLA231H1, FAH206H1, FAH207H1, GGR100H1, GGR101H1, NMC262H1

Upper Years:
3. ARH305H1 and ARH309H1
4. 1 credit from: ARH306Y1, ARH312Y1, ARH361Y1, ARH361H1, ANT311Y1, NMC261Y0, NMC465H1, NMC466H1
5. 2.5 credits from: Group A
6. 0.5 credit from: Group B

Archaeology Minor (Arts Program) - ASMIN0155

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

Completed courses (with minimum grades)
The following course with the stated minimum grades are required:

- ANT200Y1 (65%)

Completion Requirements:

(4 full course equivalents, including at least 1 FCE at the 300- or 400-levels)

1. ANT200Y1
2. ARH305H1 and ARH309H1
3. 1.5 credits from Group A
4. 0.5 credits from Group B

If ARH312Y is completed, it will be considered a Group A course.

Course Groups

Group A Theoretical and Methods 1: Theoretical

- ANT370H1 Introduction to Social Anthropological Theory
- ANT372H1 Cultural Property
- ANT388H1 Anthropologists and Indigenous Peoples in North America
- ANT409H1 Landscape Archaeology
- ANT410H1 Hunter-Gatherers Past & Present
- ANT411H1 Advanced Archaeological Theory
- ANT416H1 Archaeology of Ritual and Identity
- ANT420H1 Archaeology of Inequality
- NMC266H1 Archaeologies of Power
- NMC474H1 The Archaeology of Death
- VIC225Y1 A History of the World in Objects

Group A Theoretical and Methods 2: Archaeometry

- CHM317H1 Introduction to Instrumental Methods of Analysis
- CHM414H1 Biosensors and Chemical Sensors
- CHM416H1 Separation Science
- GGR337H1 Environmental Remote Sensing
- JGA305H1 Environmental and Archaeological Geophysics
- NMC470H1 Polarized-light Microscopy in Archaeology II: Applications

Group A Theoretical and Methods 3: Ceramic and Lithic Analysis

- ANT406H1 Lithic Analysis
- NMC462H1 Polarized-light Microscopy in Archaeology I: Foundations
- NMC465H1 Ceramic Analysis
- NMC466H1 Near Eastern Ceramics
- NMC469Y1 Mediaeval Middle Eastern Ceramics

Group A Theoretical and Methods 4: Geoarchaeology

- ANT409H1 Landscape Archaeology
- GGR272H1 Geographic Information and Mapping I
- GGR273H1 Geographic Information and Mapping II
- GGR301H1 Fluvial Geomorphology
- GGR337H1 Environmental Remote Sensing
- GGR373H1 Advanced Geographic Information Systems
- GGR390H1 Field Methods
- GGR413H1 Watershed Hydroecology
- ESS234H1 Introduction to Geological Field Methods
- ESS331H1 Sedimentation and Stratigraphy
- JGA305H1 Environmental and Archaeological Geophysics

Group A Theoretical and Methods 5: Osteoarchaeology and Zooarchaeology

- ANT334H1 Human Skeletal Biology
- ANT335Y1 Human Evolution
- ANT338H1 Molecular Anthropology and Human Evolution
- ANT415Y1 Laboratory in Faunal Archaeo-Osteology
- ANT434H1 Health, Diet & Disease in the Past
- EEB318H1 Principles of Evolution
- EEB323H1 Evolutionary Genetics
- EEB324H1 Evolutionary Ecology
- EEB390H1 Vertebrate Paleontology: Major Transitions in Vertebrate History
Group A: Theoretical and Methods 6: Paleoethnobotany
- EEB340H1 Comparative Plant Morphology
- GGR305H1 Biogeography
- GGR390H1 Field Methods
- JGE331H1 Resource and Environmental Theory

Group A: Theoretical and Methods 7: Urbanism and Settlement
- ANT318H1 The Preindustrial City and Urban Social Theory

Group B: Area Courses and Cultural History 1: Classical and Aegean Archaeology
- CLA210H1 Greek and Roman Archaeology
- CLA215H1 Classical Warfare
- CLA230H1 Introduction to Greek History
- CLA231H1 Introduction to Roman History
- CLA362H1 Early Greece
- CLA363H1 Archaic and Classical Greece
- CLA364H1 The Hellenistic World
- CLA366H1 Topics in the Study of Greek History
- CLA367H1 The Roman Republic
- CLA368H1 Augustus and the Julio-Claudians
- CLA369H1 The Roman Empire
- CLA371H1 Topics in the Study of Roman History
- CLA389H1 Early Greece
- CLA403H1 Advanced Seminar in Roman Civilization
- FAH206H1 Prehistoric Aegean and East Mediterranean Art and Archaeology
- FAH207H1 Greek and Roman Art and Archaeology
- FAH303H1 Emergence of Greek Civilisation
- FAH309H1 City of Rome
- FAH318H1 Monastic Art and Architecture
- FAH327H1 Secular Art and Architecture of the Middle Ages
- FAH328H1 Gothic Cathedral
- FAH420H1 Studies in Western Medieval Art and Architecture
- FAH421H1 Studies in Medieval Cities
- HIS321H1 Dark Age Europe, 7th to 10th Centuries
- HIS323H1 Rites of Passage and Daily Life in the Middle Ages
- HIS361H1 Medieval Spain
- HIS367Y1 A Social History of Renaissance Europe
- HIS403H1 Jews and Christians in Medieval and Renaissance Europe
- HIS424H1 Violence in Medieval Society
- SMC337H1 Early Celtic History 450-1000
- SMC338H1 The Celtic Nations in the Later Middle Ages 1000-1550

Group B: Area Courses and Cultural History 2: Egyptian Archaeology
- JAL328H1 Writing Systems
- NMC343H1 Farmers to Pyramid Builders: Cultural and Political History of Ancient Egypt I
- NMC344H1 Hyksos Subjects to Empire Builders: Cultural and Political History of Ancient Egypt II
- NMC346Y1 Why the Ancient Near East? Investigating the Great Transformations in Pre- and Proto- History
- NMC362Y1 Ancient Egyptian Sites
- NMC367H1 Archaeology & Architecture of Egyptian Monasticism
- NMC368H1 Coptic Art & Archaeology
- NMC461H1 The History and Archaeology of the Horn of Africa and South Arabia
- NMC467H1 Seminar in Egyptian Archaeology I
- NMC468H1 Seminar in Egyptian Archaeology II

Group B: Area Courses and Cultural History 3: European and Celtic Archaeology
- FAH318H1 Monastic Art and Architecture
- FAH327H1 Secular Art and Architecture of the Middle Ages
- FAH328H1 Gothic Cathedral
- FAH420H1 Studies in Western Medieval Art and Architecture
- FAH421H1 Studies in Medieval Cities
- HIS321H1 Dark Age Europe, 7th to 10th Centuries
- HIS323H1 Rites of Passage and Daily Life in the Middle Ages
- HIS361H1 Medieval Spain
- HIS367Y1 A Social History of Renaissance Europe
- HIS403H1 Jews and Christians in Medieval and Renaissance Europe
- HIS424H1 Violence in Medieval Society
- SMC337H1 Early Celtic History 450-1000
- SMC338H1 The Celtic Nations in the Later Middle Ages 1000-1550

Group B: Area Courses and Cultural History 4: Historical Archaeology
- ANT412H1 Historical Archaeology
- FAH376H1 Canadian Architecture: A Survey
- GGR240H1 Geographies of Colonialism in North America
- GGR241H1 Geographies of Urban Social Exclusion
- GGR336H1 Urban Historical Geography of North America
- GGR421H1 Histories of Geographical Thought
- HIS369H1 Aboriginal Peoples of the Great Lakes from 1500 to 1830

Group B: Area Courses and Cultural History 5: Islamic Archaeology
- HIS303H1 The Mediterranean, 600-1300: Crusade, Colonialism, Diaspora
- NMC348Y1 History of Iran: From the Sasanians to the Safavids
- NMC374H1 The Mamluks: from Slaves to Sultans
- NMC376H1 History of Islamic Spain and North Africa (640-1492)
- NMC394H1 Persianate Art & Architecture

Group B: Area Courses and Cultural History 6: Near Eastern Archaeology
- JAL328H1 Writing Systems
- NMC360H1 Why the Ancient Near East? Investigating the Great Transformations in Pre- and Proto- History
- NMC364H1 The Archaeology of Stuff
- NMC367H1 Ancient Mesopotamia I: Sumerians and Akkadians
- NMC367H1 Ancient Mesopotamia II: Assyrians and Babylonians
Archaeology Courses

ARH305H1 - Archaeological Interpretation

Hours: 24L

Transforming archaeological results into statements about people and their life ways. Covers basic archaeological theory, including research design, sampling, stratigraphy, seriation, formation and testing or evaluation of hypotheses, regional analyses. Introduces some of the major schools of archaeological theory, including New Archaeology and Post-Processual Archaeology.

Prerequisite: ANT200Y1
Distribution Requirements: Social Science
Breadth Requirements: Thought, Belief and Behaviour (2)

JGA305H1 - Environmental and Archaeological Geophysics

Hours: 24L/12P

Application of near-surface geophysical methods to investigate environmental and archaeological sites; in particular magnetometry, resistivity, ground-probing radar, and seismic surveys. Course will cover background on the various methods, and allow students to run field surveys and present on case studies.

Prerequisite: ESS241H1 or ANT200Y1 or GGR201H1
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

ARH306Y1 - Archaeological Field Methods

Hours: 12L/61P

Intensive instruction in archaeological field methods and acquisition of field skills, including archaeological search and survey, site mapping, laying out excavation grids, use of theodolites, total station, and GPS, stratigraphic excavation, stratigraphy, field recording, screening sediment, Ontario license and reporting requirements. Normally this course would take place on campus in the summer. This course has a mandatory Lab Materials Fee of $25 to cover non-reusable materials. The fee will be included on the student’s ACORN invoice.

Prerequisite: ANT200Y1 or (NMC260H1 and NMC262H1) or NMC261Y0
Distribution Requirements: Social Science
ARH309H1 - Archaeology, Ethics, and the Public

Hours: 24L

An analysis of ethics in contemporary archaeology that covers reburial and repatriation, interpretation of the archaeological record in the context of historically oppressed groups, ethnic minorities, and non-western societies, the ethics of collecting and managing cultural property, relationships with the media, the debates surrounding looting, and other issues.

Prerequisite: ANT200Y1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

ARH312Y1 - Archaeological Laboratory

Hours: 28L/44P

Techniques for making archaeological data meaningful after excavation or survey. Archaeological measurements, compilation of data, database design, archaeological systematics, and sampling theory in the context of lithics, pottery, floral, faunal and other archaeological remains.

Prerequisite: ANT200Y1 and a half statistics course (e.g. GGR270H1*, STA220H1, STA221H1, STA257H1, STA261H1, ANTC35H3**. Note: *Geography Pre- or co-requisites waived for Anthropology and Archaeology students; ** to be taken at the Scarborough Campus
Distribution Requirements: Social Science
Breadth Requirements: The Physical and Mathematical Universes (5)

ARH360H1 - Prehistory of the Near East (formerly ANT360Y1)

Hours: 24L

From earliest times through the rise of complex hunter-gatherers, and the food producing revolution to politically complex societies in Southwest Asia.

Prerequisite: ANT200Y1 or NMC260H1 and NMC262H1
Exclusion: ARH360Y1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

ARH361H0 - Field Archaeology

Opportunity for students participating in non-degree credit archaeological digs to submit reports, field notes and term papers for degree credit. Not eligible for CR/NCR option.

Prerequisite: Permission of Undergraduate Co-ordinator and Supervisor
Distribution Requirements: Social Science

ARH361Y0 - Field Archaeology

ARH361Y1 - Field Archaeology

Opportunity for students participating in non-degree credit archaeological digs to submit reports, field notes and term papers for degree credit. Not eligible for CR/NCR option.

Prerequisite: Permission of Undergraduate Co-ordinator and Supervisor
Distribution Requirements: Social Science

ARH398H0 - Research Excursions

Distribution Requirements: Social Science

ARH398Y0 - Research Excursions

Distribution Requirements: Social Science
**ARH482H1 - Special Topics in Archaeology**

**Hours:** 24S

Unique opportunity to explore a particular archaeological topic in-depth. Topics vary from year to year.

**Prerequisite:** ARH305H1  
**Distribution Requirements:** Social Science

---

**ARH494H1 - Topics in Emerging Scholarship (Archaeology)**

**Hours:** 24S

Taught by an advanced PhD student or postdoctoral fellow, and based on his or her doctoral research and area of expertise, this course presents a unique opportunity to explore intensively a particular Archaeology topic in-depth. Topics vary from year to year.

**Prerequisite:** ARH305H1  
**Distribution Requirements:** Social Science  
**Breadth Requirements:** Society and its Institutions (3)

---

**ARH495H1 - Archaeology Research Practicum**

Laboratory or practical research on an archaeological project that emphasizes methods and research design in archaeology. Students must obtain the consent of a Supervisor before enrolling. Students are required to give an oral presentation of research results to an open meeting of the Archaeology Centre at the conclusion of the course. Application must be made to the Anthropology Department. Not eligible for CR/NCR option.

**Prerequisite:** A minimum of 14 credits, permission of Supervisor and Undergraduate Coordinator.  
**Exclusion:** ANT497Y1  
**Recommended Preparation:** ARH305H1, ARH312Y1  
**Distribution Requirements:** Social Science
Architecture and Visual Studies

A Program of the Faculty of Arts & Science and the John H. Daniels Faculty of Architecture, Landscape, and Design

The Architectural Studies Major programs were transferred from the Faculty of Arts & Science to the John H. Daniels Faculty of Architecture, Landscape, and Design effective September 1, 2012. Students interested in pursuing the Major programs may apply for admission to the Daniels Faculty. For information regarding the Architectural Studies programs and courses, please visit the Daniels website: www.daniels.utoronto.ca.

The Visual Studies Specialist and Major programs were transferred from the Faculty of Arts & Science to the John H. Daniels Faculty of Architecture, Landscape, and Design effective September 1, 2014. Students interested in pursuing the Visual Studies Specialist or Major program may apply for admission to the Daniels Faculty (www.daniels.utoronto.ca).

If you have any questions about the Architectural Studies or Visual Studies programs, please contact the Daniels Faculty Registrar’s Office at registrar@daniels.utoronto.ca.

The Visual Studies Minor is a Faculty of Arts & Science program. Requirements are listed below.

Architecture and Visual Studies Programs

Visual Studies Minor (Arts Program) - A3MIN0660

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

Variable Minimum Grade

A minimum grade is needed for entry, and this minimum changes each year depending on available spaces and the number of applicants. The following courses must be completed:

- VIS120H1/ JAV120H1 and VIS130H1/ JAV130H1.

To ensure that students admitted to the program will be successful, applicants with a final grade or grade average lower than a B in these required courses will not be considered for admission. Please note that obtaining this minimum final grade or grade average does not guarantee admission to the program.

Completion Requirements:

(4.0 credits in Visual Studies, including at least 1.0 credit at the 300-level.)

2. JAV200H1 and 2.5 credits in VIS courses

Note: VIS minors are not permitted to take VIS300H0, VIS403H1, VIS404H1, VIS405H1, VIS430Y1, and VIS431Y1.

Visual Studies Programs

The Visual Studies Specialist and Major programs were transferred from the Faculty of Arts & Science to the John H. Daniels Faculty of Architecture, Landscape, and Design effective September 1, 2014. Students interested in pursuing the Visual Studies Specialist or Major program may apply for admission to the Daniels Faculty (www.daniels.utoronto.ca).

For Arts & Science students enrolled in the program before September 2014, please refer to the relevant archived Calendar for program information.

Architecture Programs

The Architectural Studies Major programs were transferred from the Faculty of Arts & Science to the John H. Daniels Faculty of Architecture, Landscape, and Design effective September 1, 2012. Students interested in pursuing the Major programs may apply for admission to the Daniels Faculty.

For information regarding the Architectural Studies programs and courses, please visit the Daniels website: www.daniels.utoronto.ca.

For Arts & Science students enrolled in the program before September 2012, please refer to the relevant archived Calendar for program information.

Architecture and Visual Studies Courses

Architecture and Visual Studies course descriptions can be found on the Daniels website at www.daniels.utoronto.ca. Elective courses are available for Arts & Science students.

If you have any questions about the Architecture or Visual Studies courses, please contact the Daniels Faculty Registrar’s Office at registrar@daniels.utoronto.ca.

Faculty List

Professors Emeriti
K. Andrews, MFA
L.E. Eleen, MA, PhD
D.S. Richardson, MA, PhD (U)
D. Rifat, DA
J.W. Shaw, MAT, PhD, D Hum Lett, FSA, FRSC (T)
M.C. Shaw, MA, PhD (S)
B. Welsh-Orchakov, MA, PhD

Professor and Chair
C. Knappett, PhD, FSA (Homer Thompson/Walter Graham Chair in Aegean Prehistory)

Associate Chair, Undergraduate Studies
C. Anderson, MA, PhD

University Professor
P.L. Sohm, MA, PhD (U)

Professors
C. Anderson, MA, PhD
M.A. Cheetham, MA, PhD, FRSC (U)
L. Kaplan, MA, PhD (University of Toronto Mississauga)
E.M. Kavaler, MA, PhD
C. Knappett, PhD, FSA (Homer Thompson/Walter Graham Chair in Aegean Prehistory)
E. Levy, MFA, PhD (University of Toronto Mississauga)
J. Ricco, MA, PhD (University of Toronto Mississauga)

Associate Professors
J. Bear, MA, PhD
J. Caskey, MA, PhD (University of Toronto Mississauga)
A. S. Cohen MA, PhD
B. C. Ewald, MA, PhD
E. Harney, MA, PhD (University of Toronto Scarborough)
K. Jain, MA, PhD (University of Toronto Mississauga)
E.M.M. Legge, MA, PhD (U)
G. Periti, MA, PhD
J. Purtle, MA, MPhil, PhD (U)
A. Syme, MA, PhD (University of Toronto Mississauga)

Assistant Professors
J. Clarke, M. Arch, M Phil, PhD
Y. Gu, MA, PhD (University of Toronto Scarborough)
S.J. Kim, MA, MPhil, PhD
H. Mostafa, MA, PhD
P. Sapirstein, PhD (Limited Term Appointment)

Adjunct Professor
Y. Hendelvies, C.M., O.Ont, PhD Amsterdam, LL.D University of Toronto, Nova Scotia College of Art and Design, Ontario College of Art and Design (Hons)

Royal Ontario Museum
H. Coxon, Associate Professor, Status Only
D. Dewan, MA, PhD, Associate Professor, Status Only
R. Fox, MA, PhD, Assistant Professor, Status Only
A. Gehmacher, MA, PhD, Associate Professor, Status Only
A. Palmer, MA, PhD, Associate Professor, Status Only

Introduction

The Department of Art History offers Minor, Major, and Specialist programs in Art History (FAH).

The FAH curriculum covers the Bronze Age to the present in several global regions: the Mediterranean area, Europe and North America, and Asia. FAH102H1 offers an overview of the discipline of art history through a thematic survey of major monuments and skills. FAH102H1 is a mandatory component of the curriculum, and students are encouraged to take this class early in their progress toward an FAH program. Half courses at the 200 level are more comprehensive surveys that thematically introduce the material from specific chronological periods, regional areas, or the history of architecture. Many of these courses, which are offered on a regular basis, serve as “gateway” prerequisites for courses at the 300 and 400 level; students are advised to check the prerequisites for each upper-level course carefully.

Courses in art history (FAH) are useful to students in other departments or faculties; history, literature, music, and philosophy are likewise concerned with systems of thought and imagery. Fundamental concepts in such disciplines are embodied or reflected in related works of art of the same general period and area. Students in architecture, geography, or city planning will find courses in the history of architecture of benefit.

At the same time, the Department directs the attention of its students to the wide range of offerings in other departments and urges them to acquire the broad cultural background essential to an understanding of the arts. Of special importance are familiarity with history, a knowledge of the various traditions of literature and mythology, and an acquaintance with philosophy. Courses in cultural, historical or urban geography may also be relevant in programs that include the history of architecture. It is imperative that students interested in pursuing an advanced degree in art history acquire the foreign languages necessary for such work. Although the choice of languages will be dependent on an individual’s program of study, it is generally recommended that students learn German and at least one other European language. The Department website provides a list of courses in other departments that can be counted toward an art history degree, or consult the Director of Undergraduate Studies to confirm the eligibility of any course.

In conjunction with Woodsworth College, the Department offers courses during the summer term at the University of Siena, Italy, and at other locations abroad. For information about these degree-credit courses, please consult the Department of Art History website or contact the Summer Abroad Program at Woodsworth College, 119 St. George Street (416-978-8713), summer.abroad@utoronto.ca.

The History of Art Students’ Association sponsors a variety of lectures and other activities for members of the departmental community.

Many courses in the Department are offered in alternate years only, or on a three-year cycle. For more detailed information on courses and degree programs, consult the Department of Art History website and Undergraduate Handbook at www.arthistory.utoronto.ca. Counselling is available, by appointment, from the Undergraduate Coordinators.

Enquiries:

Undergraduate Secretary, Sidney Smith Hall, Room 6036 (416-978-7892), undergrad.arthistory@utoronto.ca
Art History Programs

Art History Specialist (Arts Program) - ASSPE0908

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

Completed courses (with minimum grades)
The following courses with the stated minimum grades are required:

- 2.0 credits from FAH courses with a grade of 70% in each course

Completion Requirements:

(6.0 credits)

At least 6.0 FAH credits fulfilling the following distribution requirements:

First Year:

FAH102H1

Higher Years:

1. At least one 0.5 credit in three of the four FAH Groups (see below for definitions).
2. 3.0 credits at the 300+ level, including at least one 0.5 credit at the 400-level.
3. No more than 1.0 credit at the 400-level will be counted toward fulfilling program requirements.
4. Approved courses in other programs may be substituted for up to 1.0 FAH credit. See Department web site for details.

In addition, the Faculty of Arts and Science requires History of Art Majors who do not complete FAH338H1 to complete at least 0.5 FCE in Arts and Science courses in Breadth Category 5: The Physical and Mathematical Universes.

Art History Minor (Arts Program) - ASMIN0908

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

(4.0 credits)

At least 4.0 FAH credits fulfilling the following distribution requirements:

1. FAH102H1
2. At least one 0.5 credit in two of the four FAH Groups (see below for definitions)
3. At least one 0.5 credit at the 300-level.

FAH Course Groups

Note:
1. Certain courses, including FAH101H1, do not satisfy the requirement for any group, but do count toward any FAH degree program.
2. Students who have already taken FAH100Y1 are encouraged, but not required, to take FAH102H1 for the fulfillment of degree requirements.
3. Courses used to satisfy one group requirement cannot be counted toward another group requirement.
Course Groups

**Group A: Ancient, Medieval**
- FAH206H1 Prehistoric Aegean and East Mediterranean Art and Archaeology
- FAH207H1 Greek and Roman Art and Archaeology
- FAH215H1 Early Medieval Art and Architecture
- FAH216H1 Later Medieval Art and Architecture
- FAH303H1 Emergence of Greek Civilisation
- FAH308H1 City of Athens: Art, Politics and Society
- FAH309H1 City of Rome
- FAH310H1 Greek Vase Painting
- FAH311H1 Greek Sculpture
- FAH312H1 Art of the Hellenistic Age
- FAH313H1 Greek Myth in Ancient Art
- FAH318H1 Monastic Art and Architecture
- FAH319H1 Illuminated Manuscripts
- FAH326H1 Cultural History of Islamic Spain
- FAH327H1 Secular Art and Architecture of the Middle Ages
- FAH328H1 Gothic Cathedral
- FAH401H1 Aegean Wall Paintings
- FAH405H1 Understanding Dionysos: The God of Wine, Theatre and the Afterlife
- FAH406H1 Cross-Cultural Issues in Ancient Art Beyond Greece and Rome
- FAH407H1 Studies in Roman Painting and Sculpture
- FAH420H1 Studies in Western Medieval Art and Architecture
- FAH421H1 Studies in Medieval Cities
- FAH423H1 The Palaces of Minoan Crete
- FAH424H1 Studies in Medieval Book Illumination

**Group B: Renaissance-Baroque, Modern-Contemporary-Canadian**
- FAH230H1 Renaissance Art and Architecture
- FAH231H1 Baroque Art and Architecture
- FAH245H1 Modernism and anti-Modernism, c. 1750-1900
- FAH246H1 Art Since 1900
- FAH248H1 Canadian Painting 1665-1960
- FAH252H1 Introduction to the History of Photography
- FAH330H1 German Art and Architecture in the Age of Dürer
- FAH331H1 Netherlandish Renaissance Art and Culture
- FAH335H1 The Art of Love in the Renaissance
- FAH337H1 Rivalry, Imitation and Envy in Italian Renaissance Art
- FAH338H1 Art and Consumers in the Renaissance (1400-1700)
- FAH340H1 17th-Century Art of the Netherlands
- FAH341H1 Venetian Renaissance Art and Architecture
- FAH344H1 Rembrandt, Rubens and their Age
- FAH345H1 The Romantic Movement in French Art
- FAH346H1 Impressionism
- FAH347H1 Cubism and Related Movements
- FAH348H1 The Dada and Surrealist Tradition
- FAH349H1 Abstraction in Twentieth-Century Art
- FAH350H1 Minimalism
- FAH352H1 19th Century Photography
- FAH353H1 On Display: Cultures of Exhibition, 1789-1900
- FAH354H1 Art in Canada Since the 1960s
- FAH355H1 Landscape to EcoArt
- FAH430H1 Pieter Bruegel
- FAH433H1 Leonardo and His Legacy in Renaissance Italy
- FAH434H1 The First Art Historians
- FAH436H1 Italian Renaissance Art, Fashion, and Material Culture
- FAH440H1 Dutch Genre Painting of the 17th Century
- FAH445H1 The Paris Salon and French Art of the Nineteenth Century
- FAH447H1 19th-Century Landscape Painting
- FAH448H1 International Art Since 1940
- FAH449H1 Contemporary Art Movements
- FAH457H1 Issues in Canadian Art, ca. 1900-1940
- FAH458H1 Issues in Recent Canadian Art

**Group C: Asian**
- FAH260H1 The Artistic Landscape of East Asia
- FAH262H1 Art and Visual Experience in Modern and Contemporary East Asia
- FAH265H1 Monuments of the Islamic World
- FAH360H1 World of the Senses: Chinese Decorative Arts
- FAH363H1 The Mechanics of the Image in China
- FAH364H1 Visual South Asia
- FAH461H1 East Asian Art as a Cultural System
- FAH462H1 Outside East Asian Art
- FAH463H1 Materiality, Objecthood, Connoisseurship and Collecting in the Arts of East Asia
- FAH464H1 Transregional East Asian Art
- FAH465H1 Exhibiting China

**Group D: History of Architecture**
- FAH270H1 Architecture: Rituals and Monuments
- FAH272H1 Modern Architecture from 1750 to the Present
- FAH370H1 European Renaissance Architecture
- FAH371H1 Architecture and Urbanism in Baroque Europe
- FAH372H1 Architecture in the Age of Historicism ca. 1750-1900
- FAH373H1 Modern Architecture Since 1890
- FAH374H1 Consequences of Modernism: Architecture after 1945
- FAH376H1 Canadian Architecture: A Survey
- FAH470H1 Studies in Renaissance and Baroque Architecture
- FAH472H1 Studies in Modern Architecture
- FAH309H1 City of Rome
- FAH328H1 Gothic Cathedral
- FAH364H1 Visual South Asia
- FAH421H1 Studies in Medieval Cities
Art History Courses

FAH101H1 - Monuments of Art History

Hours: 24L

Consideration of the stylistic and contextual significance of representative monuments in the history of art.

Exclusion: FAH100Y/FAH105H5
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

FAH102H1 - Art and Ideas

Hours: 24L/6T

A survey of the history of art, architecture and allied arts. This introduction to the history of art will examine a wide range of objects, selected and discussed in connection with a special theme to be selected by the instructor. Students will be expected to study the history and significance of art through the close reading of selected texts that relate to both art and theory. Special attention will be given to developing essential art historical skills necessary for upper level courses. The topic for each semester will vary based on the instructor. No previous knowledge of history of art or architecture is required. Frequent writing assignments and exercises will be based on readings, lectures, and museum or gallery visits to collections in Toronto.

Exclusion: FAH105H5/FAH202H5/VPHB39H3
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

FAH194H1 - Public Art: Local and Global

Hours: 24S

We are surrounded by public art, whether in the form of official commemorative monuments or ephemeral (some say illegal) street art. We will examine the history and current practice of this important art form in Toronto and by comparison, globally. The focus will be on discussing the nature, roles, and issues pertaining to contemporary public art that we can see in situ in downtown Toronto. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

FAH195H1 - On Foot: From Pilgrimage to the Mobile City

Hours: 24S

Walking is a basic human activity, yet it also defines and shapes us. In order to understand the permutations of this seemingly simple activity we will look at walking in a variety of contexts through the study of texts, art, movies and the built environment. Restricted to first-year students. Not available for CR/NCR option.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

FAH196H1 - Marco Polo's World

Hours: 24S

This course explores the visual and material worlds of the Italian traveller Marco Polo, which are described in his Travels. Together we will read sections of this text and explore their meaning with respect to the objects and monuments of Marco Polo's time from the regions to which he travelled. By studying cartography, art, architecture, and urban form in the expansive medieval world of Marco Polo, the course will introduce us to the global world of the Middle Ages. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

FAH197H1 - Classical Art from Greek Gods to Roman Gladiators

Hours: 24S

The ancient Greeks and Romans lived in a world full of images. Ancient visual culture comprises not only the high arts but also the everyday. This course is meant to introduce students to key ideas about how art and images in general impacted the life of ancient Greeks and Romans. Students will learn to examine various categories of visual material ranging from the pictorial and applied arts (painting, sculpture, architecture) to everyday artifacts (for example, domestic wares, jewelry or weapons). Through a series of discussion-centred seminar sessions students will explore the interconnections between art and ideology, art and identity as well as visuality and viewing. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)
FAH198H1 - Shocking Artists, Shocking Art

Hours: 24S

Art causes scandals for many reasons, provoking a range of consequences, including censorship, cuts to government funding of the arts or even destruction of the work in question. In this course we will consider a number of kinds of art scandal arising from exhibition in public galleries and urban spaces, including those that have to do with legal issues such as plagiarism and vandalism; aesthetic objections on the part of the public, ranging from perceived obscenity to simple resentment of abstract art; racism; sacrilege; and political subversion, amongst others. We will consider the work of artists including Chris Ofili, Joep van Lieshout, Paul McCarthy, Damien Hirst, Michael Snow, Sally Mann, Banksy, Rachel Whiteread, Richard Prince, Andres Serrano, Robert Mapplethorpe, Carl Andre, Maya Lin, and Jeff Koons, amongst others. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

FAH199H1 - Curiosity: Art and Science

Hours: 24S

“Curiosity” can refer to the desire to know or learn something, but the word has also been used to define objects of singular interest: “curiosities.” Drawing from the University of Toronto’s rich museum and library collections, this course will present an overview of the diverse and shifting European cultural attitudes toward curiosity—from the early modern period to the present. We will examine themes such as: museum history, rarity and monstrosity, natural history illustration, exploration and travel art, the construction of racial and cultural difference, and visual entertainment. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

FAH205H1 - Clay: A Material and Visual History

Hours: 24L

This course will reveal the deep history of clay, stretching back to the Palaeolithic period with the first clay figurines; through the Neolithic period with its extensive use of clay for the earliest permanent houses, the first inorganic containers, and many votive offerings in clay; all the way to the present day with the ceramic art of Pablo Picasso, Grayson Perry, and Ai Weiwei. Our approach will also be thoroughly global, ranging from the Maya of Mesoamerica to the Mingei of Japan. The course will involve hands-on elements too, particularly with the nearby Gardiner Museum of Ceramic Art.

Recommended Preparation: FAH101H1/FAH102H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

FAH206H1 - Prehistoric Aegean and East Mediterranean Art and Archaeology

Hours: 24L

An overview of the major monuments, artifacts, themes and problems in the study of the archaeology, art and architecture of the Aegean region and the east Mediterranean to 1000BC.

Exclusion: FAH101Y5/FAH203H5/FAH204H5/FAH205H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

FAH207H1 - Greek and Roman Art and Archaeology

Hours: 24L

An overview of the major monuments, artifacts, themes and problems in the study of the archaeology, art and architecture of the civilizations of Greece and Rome.

Exclusion: FAH101Y5/FAH203H5/FAH204H5/XBC199Y1 L0211
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

FAH215H1 - Early Medieval Art and Architecture

Hours: 24L

An overview of major monuments and themes in the art and architecture of Western Europe and the Byzantine East from the third until the eleventh century.

Exclusion: FAH102Y5/FAH261H1/FAH267H5/FAH271H5
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

FAH216H1 - Later Medieval Art and Architecture

Hours: 24L

An overview of major monuments and themes in the art and architecture of Western Europe and the Byzantine East from the eleventh until the fifteenth century.

Exclusion: FAH102Y5/FAH267H5/FAH271H5
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)
FAH230H1 - Renaissance Art and Architecture

Hours: 24L

A selective survey of the major art centres and types of artistic and architectural production in Italy and northern Europe, from the early fifteenth century to the mid-sixteenth. Themes include the relations—artistic, economic and ideological—between northern and southern Europe during this period, the changing role of art in religious life, the emergence of secular themes, and the legacies left by Renaissance art to modern life and culture.

Exclusion: FAH200Y5/FAH274H5
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

FAH231H1 - Baroque Art and Architecture

Hours: 24L

Major forms of expression in the visual arts ca. 1600 - ca. 1750 with particular attention to forms, techniques, theories, and patronage of the arts as well as biographies of artists in Italy, France, the Netherlands, Flanders, Germany and England.

Exclusion: FAH200Y5/FAH279H5
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

FAH245H1 - Modernism and anti-Modernism, c. 1750-1900

Hours: 24L

An introduction to the advent and development of art movements including Rococo and Neoclassicism; Romanticism and Revolution, Realism and the advent of Photography, Impressionism; Academic art; Post-Impressionism.

Exclusion: FAH287H5
Recommended Preparation: FAH102H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

FAH246H1 - Art Since 1900

Hours: 24L

An introduction to the consolidation of Modernist tendencies in Europe to the mid 20th century and to the many contemporary responses to these achievements. Individual artists, including Picasso, Matisse, Duchamp, and Matthew Barney are considered in their relationship to various art movements and the theories that supported them, including Expressionism; Abstraction and Constructivism; Dada and Surrealism; Neue Sachlichkeit; Abstract Expressionism; Pop, Conceptual Art; Earth Art; Feminist Art; Postmodernism; New Media Art.

Exclusion: FAH288H5/FAH289H5
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

FAH248H1 - Canadian Painting 1665-1960

Hours: 24L

An introductory survey of the history of painting in Canada from the 17th to the 20th century.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

FAH252H1 - Introduction to the History of Photography

Hours: 24L

This course surveys the history of photography in Europe and North America, from its origins to recent innovations in digital imaging. Emphasis is placed on the various aesthetic, scientific, and political discourses in which photography has been located, and the assumptions and premises associated with the medium’s relationship to reality.

Exclusion: FAH352H1
Recommended Preparation: FAH101H1/FAH102H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)
FAH255H1 - Art of Indigenous North America

Hours: 24L

A broad survey of Indigenous arts in North America from Mexico to the Arctic, and from ancient to modern. Students will gain a basic literacy in key artforms including painting, architecture, basketry and more, grounded in an awareness of Indigenous realities and historical currents.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

FAH260H1 - The Artistic Landscape of East Asia

Hours: 24L

An overview of major monuments and themes in the art and architecture of East Asia (China, Japan, Korea, Vietnam, Mongolia and Tibet), from the neolithic to the present.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

FAH262H1 - Art and Visual Experience in Modern and Contemporary East Asia

Hours: 24L

An overview of major monuments and themes in the art and architecture of East Asia (China, Japan, Korea, Vietnam, Mongolia and Tibet) and its diaspora in the nineteenth and twentieth centuries.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

FAH265H1 - Monuments of the Islamic World

Hours: 24L

This course explores the architecture of the Islamic world from the 7th - 12th centuries through the lens of its major monuments throughout the central Islamic lands, North Africa and Spain. Through an emphasis upon the Umayyad, Abbasid, Fatimid and Seljuk periods, the course explores the range of cultural, political, social and religious aspects related to the development of the built environment. It also considers the impact of Islam's encounter with late antiquity and aims to position the rise of Islamic architecture within the context of this encounter. Additionally, the architecture is contextualized through a study of the urban history of select early and medieval Islamic cities.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

FAH270H1 - Architecture: Rituals and Monuments

Hours: 24L

A survey of architecture from pre-history to the start of modernism, with attention given to the ways in which architecture shapes human experience.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

FAH272H1 - Modern Architecture from 1750 to the Present

Hours: 24L

An introduction to the buildings, issues and ideas from Neoclassicism to the present.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)
FAH273H1 - Canada Buildings and Landscapes

Hours: 24L

An introduction to the traditions and patterns of building in Canada taking into account the unique landscapes, resources and history that comprise what is now a unified political entity. Lectures will pay special attention to the complexity of architecture throughout Canada including issues of land rights, natural resources, immigration, settlements and urban design, transportation, and heritage issues. A special feature of this class will be the opportunity to study Toronto first-hand through class projects. No previous architectural history study is required.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

FAH299Y1 - Research Opportunity Program

Credit course for supervised participation in faculty research project. Details at https://www.artsci.utoronto.ca/current/academics/research-opportunities/... Not eligible for CR/NCR option.

Distribution Requirements: Humanities

FAH303H1 - Emergence of Greek Civilisation

Hours: 24L

This course investigates the material culture, art and architecture of the Aegean civilizations from the Neolithic through to the building of the palaces of Crete around 2000BC.

Prerequisite: FAH207H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

FAH307H1 - Ancient Art, Migration, and the Barbarian ‘Other’

Hours: 24L

This course surveys the cultural, artistic and social interactions between the Graeco-Roman world and the so-called ‘Barbarians’ beyond its eastern and northern confines. Chronologically, it spans from the Greek Geometric and Archaic periods (9th - 6th c. BCE) to the disintegration of the Western Roman Empire and the emergence of Early Medieval Europe (6th-7th c. CE). The course will address issues of artistic production, material culture, ritual and cult in relation to the mobility of peoples and groups, objects and individuals.

Prerequisite: FAH102H1; FAH207H1
Exclusion: HIS320H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

FAH308H1 - City of Athens: Art, Politics and Society

Hours: 24L

This course provides a detailed investigation of the city of Athens, focusing on the art, architecture and archaeology in the later Archaic and Classical Period. A combination of topographical and chronological approach is taken to familiarize the students with both the physical cityscape as well as its development in the context of major areas of interest, such as politics, religion and social customs. Some broad themes explored include: art, democracy and propaganda (Agora), the impact of the Persian wars, ritual and religious festivals (Acropolis), the symposium, Athenian women, funerary art (Kerameikos), cult, sanctuaries and votives, art and Athenian drama. The course will also feature digital humanities components in the assignments, which may involve spatial mapping, 3D tools/VR and/or databases, as well as a trip to the Royal Ontario Museum.

Prerequisite: FAH207H1 or permission of instructor
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

FAH309H1 - City of Rome

Hours: 24L

The art, architecture and archaeology of the city of Rome to AD476.

Prerequisite: FAH207H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)
FAH310H1 - Greek Vase Painting

**Hours:** 24L

This course is a comprehensive exploration of the art of Greek vase painting, covering material from the late Geometric period (8th C. BCE) to the late Classical Period (4th C. BCE). While iconography and narrative will form a major portion of the content, the class will also explore issues surrounding material and technique, the prevalent sympotic (drinking) culture and Greek rituals that provides the cultural framework, dynamics of trade, theories of viewership and semiotics, status of the artist, and other historiographical concerns, including problematic issues surrounding the modern practice of collecting.

**Prerequisite:** FAH207H1  
**Distribution Requirements:** Humanities  
**Breadth Requirements:** Creative and Cultural Representations (1)

FAH311H1 - Greek Sculpture

**Hours:** 24L

The course provides a thorough examination of ancient Greek sculpture from 7th - 1st century BCE, which in many ways defined the canon of western art that was to follow. Classic issues of style, dating, and technique are complemented by putting them into the contexts of cultural history, religion and socio-politics. While the course is a traditional monument-based survey of major sculptural works from the ancient Greek world, several important issues are also addressed, pertaining both to contemporary society and the study of other areas of art history. These include but are not limited to: gender, social class, colonialism, notion of the artist, originality, and aesthetic theory.

**Prerequisite:** FAH207H1  
**Distribution Requirements:** Humanities  
**Breadth Requirements:** Creative and Cultural Representations (1)

FAH312H1 - Art of the Hellenistic Age

**Hours:** 24L

Transformation in the visual arts, paintings, sculpture, and mosaics of the expanding Greek world c. 400BC to c. 100BC; the response to Hellenization from the new artistic centres of Asia Minor and Italy.

**Prerequisite:** FAH207H1  
**Distribution Requirements:** Humanities  
**Breadth Requirements:** Creative and Cultural Representations (1)

FAH313H1 - Greek Myth in Ancient Art

**Hours:** 24L

A general introduction to Greek mythology and its uses (and abuses) by the Greeks and Romans through the art of antiquity. Students will learn about gods and goddesses, heroes and heroines, their attributes and stories which constituted the subjects of (not only) ancient art.

**Exclusion:** CLA204H1  
**Distribution Requirements:** Humanities  
**Breadth Requirements:** Creative and Cultural Representations (1)

FAH314H1 - Eroticism in Ancient Art

**Hours:** 24L

Erotic ‘imagery’ – sculptures, reliefs, paintings – is ubiquitous in ancient art, to a degree that modern viewers have often found disturbing. This course faces the challenge posed by the ancient predilection for such imagery and explores it from a critical and scholarly perspective. At its most basic level, it reassigns a seemingly universal segment of human ‘nature’ and experience to the realm of culture, by examining the imagery against the background of ancient constructions of sexuality, gender and the body. But it also explores the libidinal and hedonic structure of the works of art themselves and asks for the functions of erotic imagery in its respective contexts. The course will avail itself of the excellent research on gender, sexuality and eroticism in antiquity that has been produced over the past few decades, and it will also explore the topic’s lateral connections with the thematic fields of ancient humour, the ‘grotesque’, apotropaism, myth and magic.

**Prerequisite:** FAH207H1  
**Distribution Requirements:** Humanities  
**Breadth Requirements:** Creative and Cultural Representations (1)

FAH318H1 - Monastic Art and Architecture

**Hours:** 24L

An examination of the role played by monks and nuns in the creation and use of art and architecture in the Middle Ages.

**Prerequisite:** FAH215H1/FAH216H1/FAH454H5  
**Distribution Requirements:** Humanities  
**Breadth Requirements:** Creative and Cultural Representations (1)
**FAH319H1 - Illuminated Manuscripts**

**Hours:** 24L

A focused survey of different types of manuscripts and their images from the origins of the book in Late Antiquity to the invention of printing.

**Prerequisite:** FAH215H1/FAH216H1  
**Recommended Preparation:** SMC358H1  
**Distribution Requirements:** Humanities  
**Breadth Requirements:** Creative and Cultural Representations (1)

**FAH327H1 - Secular Art and Architecture of the Middle Ages**

**Hours:** 24L

A consideration of art and architecture made for the court, the aristocracy, and other patrons outside the realm of the Christian church.

**Prerequisite:** FAH215H1/FAH216H1/FAH337H5  
**Distribution Requirements:** Humanities  
**Breadth Requirements:** Creative and Cultural Representations (1)

**FAH325H1 - Urban Islam**

**Hours:** 24L

By challenging essentialist questioning of Islamic urbanism, this course considers the inter-animated and complex web of forces that drive cities forward by identifying repertoires of underlying logic. Through a deep and historically situated reading of Medieval Mecca, Medina, Damascus, Jerusalem, Baghdad, Cairo, and Cordoba, we will map and encode history on the urban scale to reveal what makes a city "Islamic." Visual mapping skill cultivation for communication purposes (both digital and analogue) will be taught throughout to enhance understandings of urban complexity in rich historical contexts.

**Prerequisite:** FAH215H1/FAH216H1/FAH318H1/FAH319H1/FAH327H1/FAH328H1  
**Recommended Preparation:** FAH265H1/FAH326H1  
**Distribution Requirements:** Humanities  
**Breadth Requirements:** Creative and Cultural Representations (1)

**FAH328H1 - Gothic Cathedral**

**Hours:** 24L

An examination of the Gothic cathedral from its origins in Paris in the 1130’s through its development and elaboration in France, England and Italy. This course also considers monumental decorations in painted glass, wall painting, tapestry and portal sculpture.

**Prerequisite:** FAH215H1/FAH216H1/FAH351H5  
**Distribution Requirements:** Humanities  
**Breadth Requirements:** Creative and Cultural Representations (1)

**FAH330H1 - German Art and Architecture in the Age of Dürer**

**Hours:** 24L

Albrecht Dürer and the painting and printmaking of his contemporaries. Consideration of the great Hall churches of Saxony and the altarpieces of Tilman Riemenschneider and his contemporaries; the status of the arts and attitudes towards Italian art, and the consequences of the Reformation for religious imagery.

**Prerequisite:** FAH230H1/FAH231H1  
**Distribution Requirements:** Humanities  
**Breadth Requirements:** Creative and Cultural Representations (1)

**FAH326H1 - Cultural History of Islamic Spain**

**Hours:** 24L

From its earliest beginnings as an Umayyad province and up until the 16th century, al-Andalus acted as a lynch pin within the Mediterranean world. Connecting the Islamic empire in the East and forging links of trade and cultural exchange with Europe to the West, cities such as Cordoba and Granada captured the imagination of contemporary chroniclers, earning descriptions in the sources as truly "first-rate places". Through an exploration of the historical, artistic, architectural, urban, social and economic contexts, this course will engage with and expand upon current understandings of this seminal period in Islamic history to examine Islam’s encounters and modes of cultural exchange with Europe and the Mediterranean world.

**Prerequisite:** Any Medieval 200 or 300 level half-course (any one of FAH215H1, FAH216H1, FAH318H1, FAH319H1, FAH327H1, or FAH328H1).  
**Distribution Requirements:** Humanities  
**Breadth Requirements:** Creative and Cultural Representations (1)
FAH331H1 - Netherlandish Renaissance Art and Culture

Hours: 24L

Painting, sculpture and architecture of the Netherlands in the sixteenth century with reference to the arts in Italy, France, Germany and Spain. Consideration of Netherlandish art in the context of literature, religion, urban expansion, political and economic developments; and as a system of communication. Particular attention devoted to Hieronymus Bosch, Pieter Bruegel, the rise of secular art.

Prerequisite: FAH230H1/FAH231H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

FAH335H1 - The Art of Love in the Renaissance

Hours: 24L

Love is studied not only as a favorite theme of Renaissance art, but as the basis of some of its fundamental aesthetic claims. The question of love connects Renaissance art to important strains of philosophical thought and religious spirituality, as well as to some urgent realities of social life.

Prerequisite: FAH230H1/FAH231H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

FAH337H1 - Rivalry, Imitation and Envy in Italian Renaissance Art

Hours: 24L

This course examines works in different art media, including painting, sculpture and prints, produced from 1400 to 1600, discussing how artistic practice of imitation and emulation stimulated the development of individual styles. In addition, this course addresses notions of disruptive rivalry, and the representation of slander and envy.

Prerequisite: FAH230H1/FAH231H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

FAH338H1 - Art and Consumers in the Renaissance (1400-1700)

Hours: 24L

It has long been said that the material culture of the Renaissance generated the first stir of consumerism with a variety of artifacts produced from 1400 to 1700 in Italy. This course explores the material culture of Renaissance consumerism and discusses the production and function of works in different art media.

Prerequisite: FAH230H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

FAH340H1 - 17th-Century Art of the Netherlands

Hours: 24L

Concentration on the major painters of Holland’s Golden Age, ca. 1580-ca. 1700. Particular attention is paid to genre painting and the notion of “Dutch realism.” Consideration of art within its social and political contexts. Notions of gender, of the historical past, of embodiment, and of contact with the non-western world will be discussed.

Prerequisite: FAH230H1/FAH231H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

FAH341H1 - Venetian Renaissance Art and Architecture

Hours: 24L

Form and meaning, theory and practice of painting and architecture in Venice, ca. 1450-ca. 1600. Social, political and cultural contexts of making and viewing art, including works by Giorgione, Titian, Veronese, Tintoretto and Palladio.

Prerequisite: FAH230H1/FAH231H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)
FAH345H1 - The Romantic Movement in French Art

Hours: 24L

This course explores the painting, sculpture, and graphic arts of the Romantic era in France, from about 1820 to 1850. Major emphasis on Gericault, Delacroix, and Ingres in their artistic, cultural, and political context. Key topics in Romanticism, including Orientalism and gender, are also explored.

Prerequisite: FAH245H1/FAH246H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

FAH346H1 - Impressionism

Hours: 24L

The origin and development of Impressionism in France and Europe, 1860-1886, in its social, political and intellectual context. Painting, graphics and sculpture by Monet, Renoir, Degas, Pissarro, Sisley, Cassatt and Morisot.

Prerequisite: FAH245H1/FAH246H1
Exclusion: FAH378H5
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

FAH347H1 - Cubism and Related Movements

Hours: 24L

An investigation of the birth and development of Cubism, Futurism and Orphism in Europe and North America.

Prerequisite: FAH245H1/FAH246H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

FAH348H1 - The Dada and Surrealist Tradition

Hours: 24L

The origins and development of the Dada and Surrealist movements in early 20th-century Western art, and their lasting impact on art after World War II. Painting, sculpture, graphic arts, and the theoretical preoccupation which accompanied artistic production.

Prerequisite: FAH245H1/FAH246H1
Exclusion: FAH447H5
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

FAH349H1 - Abstraction in Twentieth-Century Art

Hours: 24L

The origins, development, and critical issues pertaining to abstract or non-figurative modes of art as manifested in painting, sculpture and other selected media up to the present time. Movements include European abstract art before World War II as well as post-war developments.

Prerequisite: FAH102H1/FAH245H1/FAH246H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

FAH350H1 - Minimalism

Hours: 24L

An investigation of the different definitions and issues of minimal art including seriality, materials, process, objecthood, chance, installation, reception, relations to music and film, and the influence of structuralism.

Prerequisite: FAH102H1/FAH245H1/FAH246H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

FAH352H1 - 19th Century Photography

Hours: 24L

An introduction to the major artists, movements, and debates in photography in Europe and North America, from its prehistory to the turn of the century. Issues considered include the relationship of social class to aesthetics, the role of illusion, the rise of mass reproduction.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)
FAH353H1 - On Display: Cultures of Exhibition, 1789-1900

Hours: 24L

Examination of the historical development of the cultures of exhibition in Nineteenth-Century Europe, and the diversity of venues displaying works of art and nature. Historical and theoretical overview is complemented by case studies which include investigations of private cabinets of curiosity, encyclopedic museums, commercial galleries, side-shows, and world's fairs.

Prerequisite: Any FAH 200-level course
Recommended Preparation: some introduction to art and/or cultural history
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

FAH360H1 - World of the Senses: Chinese Decorative Arts

Hours: 24L

This course surveys late imperial Chinese decorative arts from the Song (960-1127) through Qing (1644-1911) dynasties. It focuses on ceramics/porcelain, textiles, and furniture, attending especially to works in Toronto collections. Students will read primary and secondary sources to learn how decorative arts shaped daily life in imperial China.

Prerequisite: Any 200-level FAH half course/any 100- or 200-level EAS Society-Culture course.
Recommended Preparation: FAH260H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

FAH354H1 - Art in Canada Since the 1960s

Hours: 24L

An examination of the visual arts in Canada from the 1960's to the present. A large and diverse range of media, practices, artists, and theoretical contexts will be examined. Emphasis is placed on work that can be seen in the original.

Prerequisite: FAH101H1/FAH102H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

FAH363H1 - The Mechanics of the Image in China

Hours: 24L

East Asian images differ from Western ones in material support, format, and technologies of image-making. This course probes how East Asian images -- painting on objects, handscrolls, prints, optical media, film, and new media -- work.

Prerequisite: Any 200 level FAH half course/ANY 100 or 200 level EAS Society-Culture course
Recommended Preparation: FAH260H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

FAH355H1 - Landscape to EcoArt

Hours: 24L

Ecological art is a focus in contemporary global art. We examine ecoart’s antecedents in the landscape genre and Earth Art and the diverse theoretical and disciplinary perspectives that inform our understanding of these movements. Artists include Burtnynsky, Eliasson, Long, Mendieta, Netco, Smithson, Turrell. Readings include Deleuze, Heidegger, Latour.

Prerequisite: FAH246H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

FAH364H1 - Visual South Asia

Hours: 24L

An overview of the visual culture (monuments to films) of South Asia from the Indus Valley Civilization (3500 BCE) to the contemporary. Focus on visual literacy, stylistic evolution, major concepts and the first-hand study of objects.

Prerequisite: any 200-level FAH half course / any course in Asian history, culture, or religion
Recommended Preparation: FAH260H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)
FAH370H1 - European Renaissance Architecture

Hours: 24L

Architecture and architectural theory ca. 1400 – ca. 1600.

Prerequisite: FAH270H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

FAH371H1 - Architecture and Urbanism in Baroque Europe

Hours: 24L

Architecture studied through its various building types and in its urban context. Themes include architecture and power under Absolutism, and the rise of the modern city.

Prerequisite: FAH270H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

FAH376H1 - Canadian Architecture: A Survey

Hours: 24L

Vernacular traditions in building, patterns of settlement and urbanization, and development of high styles in architecture in New France, British North America, and what is now Canada, from ca. 1650 to ca. 1925. Material economy, cultural identity, local character, regional expression, national symbolism and international influences.

Prerequisite: FAH270H1/FAH272H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

FAH380H1 - Special Topics in Art History

Hours: 24L

The study of various aesthetic, cultural, social, political, and theoretical aspects of Western art and photography across the centuries.

Prerequisite: Two FAH half courses or permission of instructor
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

FAH381H1 - Problems in Jewish Art

Hours: 24L

This course investigates the changing definition of Jewish art and the status of Jewish artists. Other issues explored include Jewish-Christian visual polemics, the construction of individual and communal Jewish identity through art, architecture, and texts, and the conceptual transformation of Jewish craft and ritual objects into art.

Recommended Preparation: FAH102H1, a 200 level FAH half course
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

FAH382H1 - Art Writing

Hours: 12L/12P

Study and practice in the variety of writing genres and styles associated with art history and contemporary criticism. Students will develop skills in writing for museum exhibitions and publications, reviews and criticism, academic analysis, and writing for popular print and media. Regular and frequent writing assignments. Recommended for FAH majors and specialists.

Prerequisite: Any 200-level FAH course
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

FAH388H1 - Art History Theories and Practices

Hours: 24L

Investigates the development of art and architectural history as an academic discipline and method of analysis including discussion of varied approaches such as formalism, connoisseurship, post-colonialism, feminism, queer studies, psychoanalysis, and material studies. The course explores the relationship of art history to other disciplines including archaeology, literary criticism, film studies, and anthropology. Suggested for all Specialists and students considering graduate study in art history.

Prerequisite: any 300-level FAH course
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)
FAH390Y0 - Studies Abroad in Spanish Art and Architecture

Hours: 24L

Through site visits and local resources, this course looks at the history of Spanish art and architecture, including the various work created by the diverse religious and political groups of the Iberian peninsula. The specific focus of the course may vary from year to year.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

FAH391Y0 - Studies Abroad in Ancient Art and Architecture

Prerequisite: one FAH half course in ancient art, architecture, and archaeology/permission of instructor
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

FAH392Y0 - Studies Abroad in Medieval Art and Architecture

Prerequisite: one FAH half course in medieval art and architecture/permission of instructor
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

FAH393Y0 - Studies Abroad in Renaissance and Baroque Art and Architecture

Studies Abroad in Renaissance and Baroque Art and Architecture. Not eligible for CR/NCR option.

Prerequisite: one FAH half course in Renaissance or Baroque art and architecture/permission of instructor
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

FAH394Y0 - Studies Abroad in Modern and Contemporary Art and Architecture

Studies Abroad in Modern and Contemporary Art and Architecture.

Prerequisite: one FAH half course in Modern or Contemporary art and architecture/permission of instructor
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

FAH395Y0 - Studies Abroad in Canadian Art and Architecture

Studies Abroad in Canadian Art and Architecture. Not eligible for CR/NCR option.

Prerequisite: one FAH half course in Canadian art and architecture/permission of instructor
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

FAH396Y0 - Studies Abroad in Asian Art and Architecture

Prerequisite: one FAH half course in Asian art and architecture/permission of instructor
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

FAH397Y0 - Studies Abroad in Architectural History

Studies Abroad in Architectural History. Not eligible for CR/NCR option.

Prerequisite: one FAH half course in architectural history/permission of instructor
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

FAH398H0 - Research Excursions

Distribution Requirements: Humanities
FAH398Y0 - Research Excursions

An instructor-supervised group project in an off-campus setting. Details at https://www.artsci.utoronto.ca/current/academics/research-opportunities/... Not eligible for CR/NCR option.

Distribution Requirements: Humanities

FAH399Y1 - Research Opportunity Program

An instructor-supervised group project in an off-campus setting. Details at https://www.artsci.utoronto.ca/current/academics/research-opportunities/... Not eligible for CR/NCR option.

FAH401H1 - Aegean Wall Paintings

Hours: 24S

Investigation of the wall-paintings of the Minoan, Cycladic and Mycenaean worlds in the second millennium BC: context, associations, viewing and historical interpretations.

Prerequisite: FAH205H1/FAH206H1
Recommended Preparation: FAH300H1/FAH303H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

FAH405H1 - Understanding Dionysos: The God of Wine, Theatre and the Afterlife

Hours: 24S

The Greek god Dionysos presents a multifaceted entry point into exploring Ancient Greek art, culture, religion and history. This course is a comprehensive exploration of the figure of Dionysos, from his obscure pre-historic beginnings of foreign origin, to his transformation into other post-classical entities, spanning Christianity to Buddhism. A substantial part of the course deals with his representations in Greek art, and the god's relationship to the Greeks as the governing figure of many important facets of their lives: drinking practices, sexuality, the performative arts, and the transition into the afterlife through the notion of eternal bliss. The course reading draws on art historical literature, as well as primary sources, and theoretical texts regarding religion and cultural practices.

Prerequisite: FAH207H1 / FAH310H1 / FAH311H1 / FAH312H1 / FAH313H1 / CLA204H1 / CLA232H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

FAH406H1 - Cross-Cultural Issues in Ancient Art Beyond Greece and Rome

Hours: 24S

When cultures collide, they assimilate, they exchange, they transform, and they develop, and there seems to be a pattern of recognizable centres of power around which artistic tradition often revolves. This has caused the conventional understanding of certain flowering of artistic heritage as a product of cross-cultural influences. This course is a seminar style survey that explores these fascinating amalgams of artistic traditions that lie at the Eastern outskirts of the Hellenistic world throughout the roman Period, from Bactria to India, and with a heavy focus on the Buddhist art of Gandhara, reaching out along the Silk Road. As the title suggests, the class aims at a renewed framework that re-evaluates the role of the Ancient West, which has been absent since the heavily Eurocentric scholarship from the early 20th century. It also aims to familiarize students with current theoretical issues surrounding cross-cultural studies as it pertains to the visual arts, touching upon modern postcolonial theories of space.

Prerequisite: FAH207H1; three additional FAH courses
Recommended Preparation: FAH311H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

FAH407H1 - Studies in Roman Painting and Sculpture

Hours: 24S

Issues explored might cover Republican and Imperial painting; its Hellenistic sources and parallel media (mosaic, relief). The four distinctive genres of Roman sculptural production: the portrait, the historical relief, sarcophagi, and replicas of famous Greek sculptures. Styles, themes and modes of display in cultural context.

Prerequisite: FAH206H1
Recommended Preparation: FAH305H1/FAH309H1/FAH312H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)
FAH415H1 - History of Islamic Cairo

Hours: 24S

This seminar explores the architectural and urban development of Islamic Cairo (al-Qahira) between the 7th and 16th centuries. As a nexus of both the Islamic empire and the Mediterranean world, Cairo provides an opportunity to explore a major Islamic Medieval city. Modern day Cairo emerged first as a provincial capital (al-Fustat and later al-Qata’a) in the 7th and 8th century and later morphed into a capital under successive dynasties from the 9th to the 16th century. Exploring Cairo throughout this critical historical period, one of both relative stability and upheaval during the post-conquest period to the Crusades, allows for a better understanding of the reciprocity between architecture and urbanism on the one hand and broader political shifts on the other. A central organizing theme of this course is Cairo’s position as a place of multiplicity and confessional diversity, embedded within networks of cultural and economic exchange. Other themes explored include the role played by ceremonies and processions on urban form and the development of public space as well as the development of various religious, charitable, military and educational institutions and their impact upon shaping the city.

Prerequisite: 8 half FAH courses; permission of instructor
Recommended Preparation: FAH265H1/FAH326H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

FAH415H1 - The Palaces of Minoan Crete

Hours: 24L

Around 2000 BC, the island of Crete sees the emergence of what are arguably the earliest towns and states in European prehistory. At the heart of this new social order are the so-called ‘palaces’, massive architectural complexes usually interpreted as seats of administrative and political authority. However, fresh discoveries over the past two decades, coupled recently with radical new interpretations, require a fundamental rethinking of the nature of the palaces and their role in Minoan society. This course will provide students with an active opportunity to learn about the latest developments in Minoan art, architecture, and archaeology.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

FAH420H1 - Studies in Western Medieval Art and Architecture

Hours: 24S

In-depth examination of monuments and issues in the art and architecture of Western Europe from the sixth to the fifteenth century.

Prerequisite: FAH215H1/FAH216H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

FAH420H1 - Studies in Medieval Cities

Hours: 24S

A focused examination of urbanism, art and architecture of a specific medieval city, such as Jerusalem, Rome, Constantinople, or Paris.

Prerequisite: FAH215H1/FAH216H1
Recommended Preparation: FAH327H1/FAH328H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

FAH420H1 - The Palaces of Minoan Crete

Hours: 24L

A consideration of individual types of books, their decoration, function, and cultural context. Topics might include, for example, Gospels, Psalters, or Books of Hours.

Prerequisite: FAH215H1/FAH216H1
Recommended Preparation: FAH319H1/SMC358H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

FAH430H1 - Pieter Bruegel

Hours: 24S

The study of Pieter Bruegel’s works in the context of Netherlandish culture. Emphasis on secular works.

Prerequisite: FAH331H1; permission of instructor
Recommended Preparation: Reading knowledge of French or German
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)
FAH433H1 - Leonardo and His Legacy in Renaissance Italy

Hours: 24S

This seminar examines major critical developments in the interpretation of High Renaissance art in Italy by looking at key works produced by Leonardo, his contemporaries, and followers (1470-1530).

Prerequisite: FAH230H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

FAH434H1 - The First Art Historians

Hours: 24S

In Vasari’s Lives of the Artists and their “after-lives,” painters and humanists explored questions of word and image, art and life, biography and history, the psychology of style, the economics and politics of art and the languages of art. How and why did art history originate?

Prerequisite: FAH230H1/FAH231H1 and permission of instructor
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

FAH436H1 - Italian Renaissance Art, Fashion, and Material Culture

Hours: 24S

This seminar explores fashion in the visual and material culture of Renaissance Italy. It focuses on the discourse of fashion as represented by Renaissance artists in their works and as treated in contemporary texts. It further examines the multiple meanings of dress in the courts of Renaissance Italy.

Prerequisite: FAH230H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

FAH438H1 - History of Bad Art from Gothic to Kitsch

Hours: 24S

"Bad" art is a critical category that shadows and defines "good" art. How has the art of invective shaped the histories of art by applying ethical, psychological and anthropological values to the world of art? Topics include blasphemy, decadence, senility, the "other" and anti-social behaviors. Special attention will be given to such prejudicial period styles as Gothic, Mannerism, Baroque and Rococo, and to such artistic movements as the Macchiaioli, neo-Kitsch, Dada, Automatism and Degenerate Art. Readings range from Seneca and Vitruvius to Walter Benjamin and Clement Greenberg. Case studies of artists range from Caravaggio to Odd Nerdrum.

Prerequisite: 1.5 FAH courses; permission of instructor
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

FAH440H1 - Dutch Genre Painting of the 17th Century

Hours: 24S

Study of so-called “scenes of everyday life.” Special attention given to cultural context and problems of constructions of gender and gendered relationships, of social and economic interests, of class conflict, of the relationship with broader European culture. Considerable attention will be paid to the work of Jan Vermeer.

Prerequisite: FAH331H1/FAH340H1; permission of instructor
Recommended Preparation: Reading knowledge of French or German
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

FAH446H1 - Arctic Anthropocene? Image Cultures of Arctic Voyaging

Hours: 24S

‘Arctic Anthropocene’ examines the extensive visual culture of voyages in the Arctic in the long 19th century. We will probe both Western and Inuit perspectives on the search for the Northwest Passage, whaling, and scientific understandings of the exotic meteorological, human, and animal phenomena of this region through its complex image culture. To underscore ecological understandings of the Arctic in the 19th century and today, we will frame our investigation of the visual culture of this place and time with an interrogation of the notion of the ‘Anthropocene.’

Prerequisite: FAH102H1, FAH245H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)
FAH447H1 - 19th-Century Landscape Painting

Hours: 24S

Investigation of English, French, German and Swiss landscape painting from the birth of the Romantic movement to Post-Impressionism.

Prerequisite: FAH245H1
Recommended Preparation: Reading knowledge of French or German
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

FAH448H1 - International Art Since 1940

Hours: 24S

Developments in the mainstream of Western painting and sculpture since World War II with special emphasis upon interrelations between Europe and North America.

Prerequisite: FAH246H1/FAH348H1/FAH350H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

FAH449H1 - Contemporary Art Movements

Hours: 24S

Selected aspects of the complex array of international contemporary art movements, their artists, objects, and critical discourses. Potential issues include the theoretical, philosophical, and political concerns addressed by given artworks and artists; the role of art journals, the private patron, and museum display.

Prerequisite: FAH246H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

FAH452H1 - Contemporary Indigenous Art in Canada and the United States

Hours: 24S

This course focuses on Indigenous artists working both within and outside of contemporary art spaces in Canada and the United States, through a study of key exhibitions and movements in the Indigenous arts community from 1984 to the present. From the Columbus Quincentennial in 1992 and its echoes in the "Canada 150" celebrations, to artists working from the front lines of land protection movements, we will explore ideas of nationalism, inclusion, intervention, and 'decolonization' of the gallery.

Prerequisite: 3.0 credits at the 300-level
Recommended Preparation: course work focusing on contemporary art and/or Indigenous topics
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

FAH457H1 - Issues in Canadian Art, ca. 1900-1940

Hours: 24S

Focused, thematic examinations of the visual arts in Canada in the first half of the twentieth century.

Prerequisite: FAH248H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

FAH458H1 - Issues in Recent Canadian Art

Hours: 24S

Focused, thematic examinations of the visual arts in Canada from c. 1960 to the present.

Prerequisite: FAH354H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)
FAH461H1 - East Asian Art as a Cultural System

Hours: 24S

Methodologically-focused seminar engaged with recovering and articulating in Western terms indigenous ways of seeing and thinking about East Asian art.

Prerequisite: FAH260H1/FAH262H1/FAH290H1/FAH361H1/FAH362H1/FAH363H1/FAH364H1/FAH365H1/FAH368H1/EAS211Y0/EAS227Y/EAS233H1/EAS237Y1/EAS305Y1/EAS331Y1/EAS418H1

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

FAH463H1 - Materiality, Objecthood, Connoisseurship and Collecting in the Arts of East Asia

Hours: 24S

Seminar based on firsthand examination of East Asian objects in Toronto collections that attends to the historical processes by which such objects were valued and collected.

Prerequisite: FAH260H1/FAH262H1/FAH360H1/FAH363H1/FAH364H1/FAH368H1/EAS211Y0/EAS227Y/EAS233H1/EAS237Y1/EAS305Y1/EAS331Y1; permission of instructor

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

FAH464H1 - Transregional East Asian Art

Hours: 24S

In-depth examination of the play of East Asian Art within and beyond East Asia.

Prerequisite: FAH260H1/FAH262H1/FAH360H1/FAH363H1/FAH364H1/FAH368H1/EAS211Y0/EAS227Y/EAS233H1/EAS237Y1/EAS305Y1/EAS331Y1; permission of instructor

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

FAH465H1 - Exhibiting China

Hours: 24S

This seminar teaches students the skills required to curate an exhibition of Chinese materials. Working firsthand with objects of Chinese art and visual culture in local Toronto collections, students learn to document the object, assess authenticity, write object labels, panel texts, and catalogue essays. Students will thus prepare an exhibition, actual or virtual, of Chinese objects in local collections.

Prerequisite: FAH260H1/FAH262H1/FAH360H1/FAH363H1/FAH364H1/FAH368H1/EAS211Y0/EAS227Y/EAS233H1/EAS237Y1/EAS305Y1/EAS331Y1; permission of instructor

Recommended Preparation: Two additional courses in Chinese/East Asian art

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

FAH470H1 - Studies in Renaissance and Baroque Architecture

Hours: 24S

An in-depth study of themes and problems in architecture in Renaissance and Baroque Europe.

Prerequisite: FAH370H1

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

FAH472H1 - Studies in Modern Architecture

Hours: 24S

Focused examination of themes and methods in the history of architecture since 1750.

Prerequisite: FAH272H1 or Permission of Instructor

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

FAH473H1 - Studies in Canadian Architecture and Landscapes

Hours: 24S

An in-depth study of themes in the history of architecture and landscape in Canada.

Prerequisite: FAH270H1/FAH272H1; permission of instructor

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)
FAH481H1 - Internship

Hours: 24S

The internship is designed to offer hands-on experience pertaining to the study, exhibition, and care of works of art, focused on the collections and activities of the University Art Centre, an auction house, a public museum, or a private gallery. Students must provide proof of their acceptance as an intern by the Art Centre/auction house/museum/gallery in order to be enrolled in the course. This course is Pass/Fail. Not eligible for CR/NCR option.

Prerequisite: 8 FAH half courses; permission of instructor
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

FAH481Y1 - Internship

Hours: 48S

The internship is designed to offer hands-on experience pertaining to the study, exhibition, and care of works of art, focused on the collections and activities of the University Art Centre, an auction house, a public museum, or a private gallery. Students must provide proof of their acceptance as an intern by the Art Centre/auction house/museum/gallery in order to be enrolled in the course. This course is Pass/Fail. Not eligible for CR/NCR option.

Prerequisite: 8 FAH half courses; permission of instructor (application in department)
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

FAH483H1 - Introduction to Conservation: Materials, Deterioration, and Preservation in Art and Material Culture

Hours: 24S

An introduction to conservation, designed to give students a basic understanding of the field, its techniques, and its purposes. Sessions conducted by specialists in the Royal Ontario Museum conservation department.

Prerequisite: 8 FAH half courses; permission of instructor.
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

FAH484H1 - Fashion & Textiles: Culture & Consumption

Hours: 24S

This course examines the history, meaning and consumption of Western European fashion (18th - 21st centuries). Analysis and research will combine student seminars with the study of actual artefacts in the Textile & Costume Collection of the Royal Ontario Museum.

Prerequisite: 8 half FAH courses
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

FAH485H1 - Collecting Canada: Canadian Pictorial Arts Collection at the Royal Ontario Museum

Hours: 24S

Theoretical and practical engagement with the ROM's Canadian paintings, prints and drawing collections (18th-20th C). Through lectures, workshops, and seminars, we consider the collecting, interpretation, and display of images within the framework of "documentary art" and its various connotations.

Prerequisite: FAH248H1, 2.0 300-level FAH courses
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

FAH486H1 - Case Studies at the Royal Ontario Museum

Hours: 24S

In-depth investigation of objects at the Royal Ontario Museum. Content will vary according to the museum department offering the course in any given semester.

Prerequisite: 8 FAH half courses
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)
FAH487H1 - Introduction to Asian Textiles

**Hours:** 24S

Introduction to the diverse textile traditions of Asia and the diverse means for interpreting them, with a concentration on core production areas, select regional traditions and connecting forces. Includes first-hand study of objects in ROM collections and galleries and possible guest lectures.

**Prerequisite:** 8 half FAH courses (4.0 FCE)

**Distribution Requirements:** Humanities

**Breadth Requirements:** Creative and Cultural Representations (1)

FAH489H1 - Topics in the History of Art and Architecture

**Hours:** 24S

Focused examination of special topics in any period of Mediterranean, European, North American, or Asian art and architecture.

**Prerequisite:** 8 FAH half courses; permission of instructor

**Distribution Requirements:** Humanities

**Breadth Requirements:** Creative and Cultural Representations (1)

FAH490H1 - Introduction to the Textile Arts of the Indian Ocean World

**Hours:** 24S

The Indian Ocean has been called the Cradle of Globalization. For thousands of years monsoon winds linked the people and arts of this vast Ocean that stretches from East Africa in the West to Indonesia (and beyond) in the East. Throughout its long history, handwoven textiles have been amongst the area’s greatest art forms, trade goods, religious objects and markers of identity. This course will survey the wide variety of these forms, from c. 1100 to 1950. Special attention is placed on India, which lies at the center of the region, and originated many of the fibres, techniques, design and iconography of the wider area. Select regional manifestations are then examined in depth, using the ROM’s extensive collections. These range from the silks of Madagascar, to embroidered men’s wear of Oman, to the cosmopolitan batiks of northern coastal Java. It is seen that all these traditions can best be understood within the framework of the wider Indian Ocean region.

**Prerequisite:** Permission of the instructor

**Recommended Preparation:** Asian art, Islamic art, or anthropology

**Distribution Requirements:** Humanities

**Breadth Requirements:** Creative and Cultural Representations (1)

FAH494H1 - Independent Studies

Eligible students may undertake an independent study course under the supervision of Department of Art History (St. George campus) faculty member. Refer to the Art History website for further information and application instructions. Not eligible for CR/NCR option.

**Distribution Requirements:** Humanities

**Breadth Requirements:** Creative and Cultural Representations (1)

FAH494Y1 - Independent Studies

Eligible students may undertake an independent study course under the supervision of a Department of Art History (St. George campus) faculty member. Refer to the Art History website for detailed information and application instructions. Not eligible for CR/NCR option.

**Distribution Requirements:** Humanities

**Breadth Requirements:** Creative and Cultural Representations (1)

Introduction

Astronomy explores the universe beyond the earth and attempts to understand the physical processes that describe its contents. Essentially all civilizations have developed astronomy to some degree, with records extending back to the Babylonians. The modern development of astronomy began with Galileo turning a telescope to the sky and the heliocentric model of the solar system. Astronomy and astrophysics have undergone a revolution in the past fifty years as telescopes ranging from the radio to the gamma ray have discovered the relict radiation from the Big Bang, stars and galaxies that were forming not long after, ultradense neutron stars and black holes, as well as planets around other stars. Astronomy as a discipline is a distinctive integration of many of the sciences. At the introductory level it is used to provide a non-technical overview of the scientific approach to questions and our current understanding. At the more advanced level a quantitative physical understanding of astrophysical systems is developed. A graduate in astronomy has a wide grounding in modern physical science which is important for a wide range of roles in society.

Several courses are offered to suit persons of diverse backgrounds and depths of interest. Two beginning courses (AST101H1, AST201H1) require no special knowledge of mathematics or other sciences and are best suited to students taking non-science programs. These courses develop an understanding of the universe in a qualitative way and in terms of natural laws familiar to us on Earth. AST121H1 is an introductory astronomy course for all science students, while AST210H1 is intended for science students who do not intend to pursue an astronomy program. AST251H1 is best suited to life science students.

The remaining courses are designed for physical sciences and astronomy program students. For all Astronomy & Astrophysics programs, the first astronomy courses normally start in the second year, as they require the mathematical and physical grounding provided in the first year. In third year, after further physics and mathematics, follow more advanced theoretical study as well as a lab course that includes the use of the campus telescopes. For the major program, this is complemented by electives in more advanced mathematics, physics or numerical methods, as well as an introduction to astrophysical research. For the Astronomy & Physics specialist program, intensive training in all aspects of physics is added, allowing supervised, forefront research in fourth year, and preparing for a career in (astro)physical research via graduate studies or otherwise.

The Department works closely with two related academic units, the Canadian Institute for Theoretical Astrophysics (CITA) and the Dunlap Institute for Astronomy and Astrophysics (DI). With a national mandate, CITA fosters research in theoretical aspects of the discipline, including the exploitation of high-performance computers in house and in SciNet. Complementary to this, a focus of DI is on the design and development of astronomical instrumentation. Undergraduate students will find diverse research opportunities through the Department and these two cognate units.

Astronomy and Astrophysics Programs

Astronomy & Physics Specialist (Science Program) - ASSPE0271

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

The Astronomy & Physics Specialist program combines rigorous training in the full spectrum of core physics subfields with their application in astronomy. Lecture courses are complemented by practical courses, and the program culminates in a supervised research project, where all the skills learned are used, and which is intended to be published.

(14 full courses or their equivalent, including at least 4 at the 300+ level, and at least 1 at the 400 level)

First Year:
MAT137Y1/ MAT157Y1, MAT223H1/ MAT240H1, PHY151H1, PHY152H1

Second Year:
AST221H1, AST222H1, MAT237Y1/MAT235Y1, MAT235Y1/MAT244H1, MAT267H1, PHY250H1, PHY252H1, PHY256H1 (MAT237Y1, MAT244H recommended)

Third Year:
1. APM346H1; AST320H1, AST325H1/AST326Y1, PHY224H1, PHY254H1, PHY354H1, PHY356H1
2. One of MAT224H1, MAT327H1, MAT334H1, MAT363H1, STA257H1

Fourth Year:
1. AST425Y1; PHY350H1, PHY450H1
2. One half course from PHY324H1, PHY357H1, PHY358H1, PHY450H1, PHY454H1, PHY483H1, PHY484H1, PHY495H1
3. Any other APM/AST/CTA/CSC/MAT/PHY/STA at the 300+ level to make up the total of 8 full-course equivalents.

Fourth Year:
AST424H1

Notes:
1. The Astronomy & Astrophysics Major program is not designed primarily for students intending to pursue graduate studies in Astronomy & Astrophysics. Such students should consider the Astronomy & Physics Specialist program, or consult the Undergraduate Chair about their course selections.
2. Students interested in pursuing a research project in fourth year (AST425Y1) should consult the undergraduate chair.
3. Third-year students are invited and fourth-year students are expected to attend the weekly departmental colloquia.

Astronomy & Astrophysics Minor (Science Program) - ASMIN1423

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

1. The Astronomy & Astrophysics Minor program is not designed for students interested in a more flexible and diverse undergraduate program. It may be tailored to be a natural counterpart to a second major in Mathematics, Physics or Computer Science; students should consult the undergraduate chairs of Astronomy & Astrophysics and the respective departments for advice on course selection.

(8 full courses or their equivalent, including at least 2 at the 300+ level, and at least 0.5 at the 400 level)

First Year:
(MAT135H1, MAT136H1)/MAT137Y1/MAT157Y1; (PHY131H1, PHY132H1)/PHY151H1, PHY152H1)

Second Year:
1. AST221H1, AST222H1, MAT235Y1/MAT237Y1; PHY252H1
2. One of PHY224H1, PHY250H1, PHY254H1, PHY256H1

Third Year:
AST320H1, AST325H1/AST326Y1

Notes:
1. Second-year students who wish to keep open the option of pursuing a physics specialist degree should consider taking PHY254H1 in 2nd year.
2. Third-year students are invited and fourth-year students are expected to attend the weekly departmental colloquia.

Astronomy & Astrophysics Major (Science Program) - ASMAJ1423

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

A program designed for students looking to add breadth to a program in another, perhaps unrelated discipline.

(4 full courses or their equivalent)

1. AST221H1, AST222H1, AST320H1, AST325H1/AST326Y1
2. (PHY131H1, PHY132H1)/(PHY151H1, PHY152H1)
3. PHY252H1 and one of PHY224H1, PHY250H1, PHY254H1, PHY256H1

Notes:
1. PHY131H1, PHY132H1 and PHY151H1, PHY152H1 require (MAT135H1, MAT136H1)/MAT137Y1/MAT157Y1 and PHY252H1 requires MAT235Y1/MAT237Y1/MAT257Y1.
2. Faculty of Applied Science & Engineering equivalents to the physics courses can be substituted. Please consult the Undergraduate Chair.

Astronomy and Astrophysics Courses

AST101H1 - The Sun and Its Neighbours

Hours: 24L/12T

Our place in the Universe. Phenomena we see in the sky. What we know about the Sun, the planets and comets, and the formation of the solar system – and how we know it. What makes planets suitable for life. Finding out about the nearest stars and their planets. This course is intended for students with no science or engineering background.

Exclusion: AST121H1, AST221H1. Also excluded are CIV100H1, CIV101H1, CIV102H1, any 100- or higher-series CHM/PHY courses taken previously or concurrently (with the exception of PHY100H1, PHY101H1, PHY201H1, PHY202H1, PHY205H1, PHY207H1, CHM101H1; and AP, IB, CAPE, and GCE Transfer Credits)

Distribution Requirements: Science

Breadth Requirements: The Physical and Mathematical Universes (5)

AST121H1 - Origin and Evolution of the Universe

Hours: 24L

The origin of the Universe and all that it contains, from the chemical elements, stars and galaxies, and life. The course is intended for students who are enrolling in science and engineering courses.

Prerequisite: SPH4U Physics; MCB4U Calculus

Exclusion: AST101H1, AST201H1, AST210H1. Also excluded are AST221H1, AST222H1 if taken previously or concurrently

Distribution Requirements: Science

Breadth Requirements: The Physical and Mathematical Universes (5)

AST198H1 - Great Astronomical Issues

Hours: 24S

There are some fundamental questions which humankind has asked itself over the centuries. Many of these involve astronomical origins, events, and objects. Astronomers now have the tools with which to attempt to answer some of the most fundamental questions, such as "Where did it all begin, where are we in space and time, are we alone, and who and what are we?" This seminar will explore some of these great issues. The selection of topics will be made initially by the instructor, but will be modified by the seminar participants at the first class meeting. Topics could include: stellar evolution and the future of the Sun, origin of the elements, origin and future of the Universe, origin of the Earth, origin of life, and extinction of the dinosaurs, global warming, the scientific method, astronomy and the public. Participants will be expected to join actively in lively discussions and to prepare and lead some of the seminars. Restricted to first-year students. Not eligible for CR/NCR option.

Exclusion: AST199H1

Distribution Requirements: Science

Breadth Requirements: The Physical and Mathematical Universes (5)

AST199H1 - Astronomy at the Frontier

Hours: 24S

This seminar series aims at building up general scientific literacy, by discussing selected topics in current astronomy, cosmology, and space science. We will delve into the physical foundation behind the questions being asked and how the answers are being sought. Students will have an opportunity early in the course to select topics of particular interest to them and this will govern the choice of readings as well. Topics could include: formation of stars; lives and deaths of stars; stellar corpses: white dwarfs, neutron stars, and black holes; planets around other stars; recent results from Hubble and other telescopes; architecture of the solar system; exploration in the solar system; the invisible universe: dark energy and dark matter; first light; formation of galaxies; the age and future of the universe. Participants should be comfortable with basic mathematics and quantitative reasoning. Students will be expected to do independent research for essays, presentations, etc. Restricted to first-year students. Not eligible for CR/NCR option.

Exclusion: AST198H1

Distribution Requirements: Science

Breadth Requirements: The Physical and Mathematical Universes (5)
AST201H1 - Stars and Galaxies

Hours: 24L/12T

What we know about the properties and life cycles of stars, of galaxies, and of the Universe itself – and how we know it. How astronomers develop methods for understanding phenomena that span such vast ranges in distance and time. This course is intended for students with no science or engineering background.

Exclusion: AST121H1, AST210H1, AST221H1, AST222H1. Also excluded are CIV100H1, CIV101H1, CIV102H1 and any 100- or higher-series CHM or PHY courses taken previously or concurrently (with the exception of PHY100H1, PHY101H1, PHY201H1, PHY202H1, PHY205H1, PHY207H1, CHM101H1; and AP, IB, CAPE, and GCE Transfer Credits)

Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

AST210H1 - Great Moments in Astronomy

Hours: 24L

From the Copernican Revolution to twentieth century astrophysics. Emphasis is placed on the process of discovery which has led to major advances in knowledge about the Universe. The course includes an outline of some of the most significant puzzles of our day and an examination of the potential for new revolutions in our knowledge. This course is best suited to science students.

Exclusion: AST101H1, AST121H1, AST201H1

Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

AST221H1 - Stars and Planets

Hours: 36L

The (astro)physics of stars and planets, their observed variety, their structure, formation and evolution. Introduction to telescopes and instrumentation.

Prerequisite: PHY132H1/PHY152H1; MAT136H1/MAT137Y1/MAT157Y1

Exclusion: AST101H1/AST201H1

Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

AST222H1 - Galaxies and Cosmology

Hours: 36L

The (astro)physics of stellar systems, galaxies, and the Universe, their structure, formation, and evolution.

Prerequisite: AST221H1

Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

AST251H1 - Life on Other Worlds

Hours: 24L/12T

Scholarly discussion of the probability that there are planets with life elsewhere in the universe, from the perspective of current ideas concerning the origin and evolution of the universe, the solar system and life. Search techniques and possibilities for interstellar travel and space colonies are discussed.

Exclusion: AST221H1/AST222H1

Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

AST299Y1 - Research Opportunity Program

Credit course for supervised participation in faculty research project. Details at https://www.artsci.utoronto.ca/current/academics/research-opportunities/research-opportunities-program . Not eligible for CR/NCR option.

Distribution Requirements: Science
AST301H1 - Observational Astronomy

Hours: 36P

A hands-on introduction to telescopes and observational astronomy for students with little experience in the physical sciences. Through laboratory exercises and observations of the sky, students will learn the techniques that have enabled the major discoveries of modern astronomy, from the expansion of the universe to the existence of Earth-like planets orbiting other stars. Hands-on activities will teach how telescopes work and how we can measure the distances, motion, and chemical composition of celestial objects. Basic arithmetic is used, but no advanced mathematics. This course is intended for students without a formal science background to gain experience with hands-on observational astronomy.

Prerequisite: AST101H1/AST201H1/AST251H1
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

AST320H1 - Introduction to Astrophysics

Hours: 24L

The formation, equilibrium and evolution of structure on all astronomical scales from the largest to the smallest: universe, clusters of galaxies, galaxies, clusters of stars, gas clouds and stars.

Prerequisite: PHY252H1/PHY294H1; AST221H1,AST222H1 (or equivalent AST readings; consult the instructor)
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

AST325H1 - Introduction to Practical Astronomy

Hours: 39P

Through experiment and observation, develop the core skills to collect, reduce, and interpret astronomical data. Develop understanding and usage of telescopes, instruments, and detectors; reduction and analysis methods; simulations and model fitting; data and error analysis.

Prerequisite: AST221H1,AST222H1 (or equivalent readings, consult the instructor)
Exclusion: AST326Y1
Recommended Preparation: basic programming/scripting, numerical techniques (e.g., through CSC108H1/CSC148H1, CSC260H1)
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

AST326Y1 - Practical Astronomy

Hours: 78P

Through experiment and observation, develop the core skills to collect, reduce, and interpret astronomical data. Develop understanding and usage of telescopes, instruments, and detectors; reduction and analysis methods; simulations and model fitting; data and error analysis. This course is an expanded version of AST325H1 that gives a wider exposure to practical astronomy.

Prerequisite: AST221H1,AST222H1 (or equivalent readings; consult the instructor)
Exclusion: AST325H1
Recommended Preparation: basic programming/scripting, numerical techniques (e.g., through CSC108H1/CSC148H1, CSC260H1)
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

AST398H0 - Research Excursions

Distribution Requirements: Science

AST398Y0 - Research Excursions

Distribution Requirements: Science

AST399Y1 - Research Opportunity Program

Credit course for supervised participation in faculty research project. Details at https://www.artsci.utoronto.ca/current/academics/research-opportunities/research-opportunities-program. Not eligible for CR/NCR option.
### AST424H1 - Introduction to Astrophysical Research

**Hours:** 24L

A literature study that develops methods and skills applicable to research in the physical sciences, with an emphasis on communication, including writing proposals and reports, and delivering presentations. This course is intended for students in the final year of the Astronomy & Astrophysics Major. Students are required to attend the weekly departmental colloquia and G2000 talks. Not eligible for CR/NCR option.

**Prerequisite:** AST320H1  
**Exclusion:** AST425Y1  
**Recommended Preparation:** AST325H1/AST326Y1  
**Distribution Requirements:** Science

### AST425Y1 - Research Topic in Astronomy

A research project done in consultation with an individual staff member in the Department leading to a detailed written report and oral presentation. This course is intended for students in the final year of the Astronomy and Physics specialist program. Students must enrol with the Undergraduate Secretary of the Department. Not eligible for CR/NCR option.

**Prerequisite:** AST320H1 and two of AST325H1/AST326Y1, PHY324H1, PHY350H1, PHY354H1, PHY356H1, PHY357H1, PHY358H1, PHY407H1/PHY408H1, PHY450H1, JPE395H1  
**Distribution Requirements:** Science  
**Breadth Requirements:** The Physical and Mathematical Universes (5)

### AST430H1 - Supervised Study in Astronomy & Astrophysics

An individual study program chosen by the student with the advice of, and under the direction of, a staff member. Not eligible for CR/NCR option.

**Prerequisite:** Minimum GPA of 3.5 in Astronomy program courses  
**Permission of the Undergraduate Chair and the prospective adviser**  
**Distribution Requirements:** Science  
**Breadth Requirements:** The Physical and Mathematical Universes (5)

### AST431H1 - Supervised Study in Astronomy & Astrophysics

An individual study program chosen by the student with the advice of, and under the direction of, a staff member. Not eligible for CR/NCR option.

**Prerequisite:** Minimum GPA of 3.5 in Astronomy program courses  
**Permission of the Undergraduate Chair and the prospective adviser**  
**Distribution Requirements:** Science  
**Breadth Requirements:** The Physical and Mathematical Universes (5)

### AST431Y1 - Supervised Study in Astronomy & Astrophysics

An individual study program chosen by the student with the advice of, and under the direction of, a staff member. Not eligible for CR/NCR option.

**Prerequisite:** Minimum GPA of 3.5 in Astronomy program courses  
**Permission of the Undergraduate Chair and the prospective adviser**  
**Distribution Requirements:** Science  
**Breadth Requirements:** The Physical and Mathematical Universes (5)

Introduction

Biochemistry is the study of the chemistry of living organisms. Biochemists seek a molecular explanation of life by attempting to understand its underlying principles. Biochemistry is concerned with the relevance of a molecule to an organism and the correlations between its structure and its function. Modern biochemistry grew out
of the application of chemical techniques to biological problems and is the foundation of biological science and medicine. In many ways it combines biology and chemistry but the subject now covers such a broad range of activity that it is difficult to draw a neat border around biochemistry. Some of the most exciting areas of current biochemistry research include:

- structural biology
- enzyme mechanisms
- signal transduction and regulation
- biotechnology
- molecular cell biology
- gene expression and development
- metabolic diseases
- proteomics and bioinformatics
- molecular evolution
- protein folding
- membranes and transport

The Biochemistry Specialist Program is academically oriented and designed to provide students with a fundamental understanding of the theoretical and practical aspects of the discipline. The program offers broad training in problem solving specifically using a molecular approach. Biochemistry specialists gain experience in critical thinking and the skills required to evaluate scientific rationale. The Biochemistry Major Program offers students fundamental training in the science and gives each student in the program the chance to combine Biochemistry with another relevant Major Program. This may be within the Life Sciences or Basic Sciences, or may be within the arts. For example, the combination of Biochemistry with Economics or with English could provide students with training relevant to the fields of investment within biotechnology or scientific journalism. Students who excel within the Biochemistry Major Program may be offered the chance to enter the Specialist Program at the third year. Students who complete a B.Sc. in the Specialist Program are well prepared to continue their studies in graduate programs in Biochemistry and other Life Sciences. Graduates from either the Specialist or Major Programs may find employment in research and teaching. Employers include universities and colleges, government laboratories, clinical biochemistry laboratories, forensic laboratories, pharmaceutical companies, biotechnology companies, and many other industries.

Skills learned in the Biochemistry Specialist and Major Programs are also helpful in other areas such as marketing, finance, and law. Some biochemistry graduates continue their studies in medicine, dentistry or other health related programs. Regardless of where life takes them, our students benefit from a broad knowledge-based and logical framework that will help them navigate the waters ahead.

Students considering choosing either the BCH Specialist or BCH Major program are encouraged to attend program information sessions held throughout the academic year. Please note that the Specialist program is the clearest path to graduate studies in Biochemistry and to careers in research.

Associate Chair of Undergraduate Education, Dr. A. Ensminger, biochemistry.undergrad@utoronto.ca

Undergraduate Administrator, Jennifer Haughton, jennifer.haughton@utoronto.ca

Biochemistry Programs

Biochemistry Specialist (Science Program) - ASSPE1762

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

Variable Minimum Grade Average

A minimum grade average is needed for entry, and this minimum changes each year depending on available spaces and the number of applicants. The following courses or their equivalents must be completed:

- BIO120H1 and BIO130H1
- (CHM135H1 and CHM136H1)/CHM151Y1
- (MAT136H1 and MAT136H1)/MAT137Y1/MAT157Y1

To ensure that students admitted to the program will be successful, applicants with a final grade lower than 60%, or a grade average lower than 70% in these required courses will not be considered for admission. Please note that obtaining this minimum final grade or minimum grade average does not guarantee admission to the program. While it is difficult to predict what will constitute "competitive" course marks in a given year, based on previous years the estimate is: course marks = mid 80s; average = mid 80s.

Please consult the Arts & Science Program Toolkit or the departmental web site at www.biochemistry.utoronto.ca for more information.

Completion Requirements:

(14 credits, including at least five 400-series courses)

First Year: (BIO120H1, BIO130H1); (CHM135H1, CHM136H1)/(CHM138H1, CHM139H1)/CHM151Y1; and (MAT136H1, MAT136H1)/MAT137Y1/MAT157Y1

First or Second Year: (PHY131H1, PHY132H1)/(PHY151H1, PHY152H1)
[PHY131H1, PHY132H1 recommended]

Second Year:

BCH242Y1; MGY280H1; BIO230H1; BIO255H1; STA220H1; CHM247H1/CHM249H1; BIO260H1/HMB265H1*

*Alternatively BIO260H1 may be taken in third year (due to timetable conflicts BIO260H1 may not be taken in 2nd year)

Third Year: BCH340H1; BCH377H1; MGY311Y1

Fourth Year:

1. BCH478H1
2. 2.0 credits from the following list, including at least 1.0 credit in BCH: BCH422H1, BCH425H1, BCH426H1, BCH428H1, BCH440H1, BCH441H1, BCH444H1, BCH445H1, BCH446H1, BCH448H1, BCH449H1, BCH450H1, BCH478H1, BGB420H1, CHM447H1,
Third Year:

1. BCH311H1
2. BCH307H1
3. CHM217H1/CHM220H1/BCH340H1
4. 1.0 credit from CHM217H1*/CHM220H1*/BCH340H1* (*if not taken for the requirement immediately above) /BIO220H1/ BIC260H1/ HMB265H1*/ JPM300H1. The department is open to the use of 300-level non-field course(s) in CHM/CSB/EEB/HMB/IMM/LMP/MGY/PCL/PSL to fulfill this requirement, but students must seek approval from the department prior to course enrolment.

Fourth Year: 1.0 credit from: BCH422H1, BCH425H1, BCH426H1, BCH428H1, BCH440H1, BCH441H1, BCH444H1, BCH445H1, BCH446H1, BCH449H1, CHM447H1

---

Biochemistry Courses

BCH210H1 - Biochemistry I: Proteins, Lipids and Metabolism

Hours: 36L/24T

Proteins, enzymes, membranes and the metabolism of carbohydrates and lipids. This course is intended for students who are NOT taking BCH242Y1 as part of their program.

Prerequisite: Successful completion of (CHM135H1, CHM136H1)/(CHM151Y1) NOTE: CHM1** with COURSE EXCLUSION TO CHM135H1 AND CHM136H1 meet the Prerequisite requirement for BCH210H1. CHM110H5 & CHM120H5 (UTM) are equivalent to CHM135H1 ONLY. CHMA10H3 & CHMA11H3 (UTSC) are equivalent to CHM135H1 ONLY. CHM241H3/CHM242H3 (UTSC) are equivalent to CHM136H1 ONLY. CHM242H5 (UTM) is equivalent to CHM136H1 ONLY. Students with a SDF in CHM135H1/CHM136H1 are not permitted to enrol in BCH210H1 until a final passing grade (50%) appears on the transcript.

Exclusion: BCH242Y1, [CHM361H5(UTM) and CHM362H5(UTM)], [BIOC12H3(UTSC) and BIOC13H3(UTSC)], CHM262H3(UTSC)

Distribution Requirements: Science Breadth Requirements: The Physical and Mathematical Universes (5)

---

Biochemistry Major (Science Program) - ASMAJ1762

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

Variable Minimum Grade Average

A minimum grade average is needed for entry, and this minimum changes each year depending on available spaces and the number of applicants. The following courses or their equivalents must be completed:

- BIO120H1 and BIO130H1
- (CHM135H1 and CHM136H1) / CHM151Y1
- (MAT135H1 and MAT136H1) / MAT137Y1 / MAT157Y1

To ensure that students admitted to the program will be successful, applicants with a final grade lower than 60%, or a grade average lower than 70% in these required courses will not be considered for admission. Please note that obtaining this minimum final grade or minimum grade average does not guarantee admission to the program. While it is difficult to predict what will be competitive course marks and average in a given year, based on previous years, the estimate is: course marks = mid 70s; average = mid 70s.

Please consult the Arts & Science Program Toolkit or the departmental web site at www.biochemistry.utoronto.ca for more information.

Completion Requirements:

8 credits, including two 400-series half-year courses as noted below.

First Year: (BIO120H1, BIO130H1); (CHM135H1, CHM136H1);(CHM138H1, CHM139H1); CHM151Y1; (MAT135H1, MAT136H1) / MAT137Y1 / MAT157Y1

Second Year: BCH210H1; BIO230H1; BIO255H1; CHM247H1/CHM249H1

---

---
**BCH242Y1 - Introduction to Biochemistry**

Hours: 64L/12T/18P

An introductory course that will serve as the foundation for BCH courses taken in Third and Fourth years by students specializing in biochemistry and related specialist programs. The major topics include protein structure, enzyme mechanisms, cellular and molecular biology, lipid and membrane structure and function, and carbohydrate, lipid, and amino acid metabolism and bioenergetics. Please note that there are five laboratories accompanying this course. *(Lab fees: $10)*

**Prerequisite:** (CHM135H1, CHM136H1)/CHM151Y1  
**Exclusion:** BCH210H1 and BCH311H1, [CHM361H5 (UTM) and CHM362H5 (UTM)], [BIOC12H3 (UTSC) and BIOC13H3 (UTSC)], CHMB62H3 (UTSC)  
**Distribution Requirements:** Science  
**Breadth Requirements:** Living Things and Their Environment (4); The Physical and Mathematical Universes (5)

---

**BCH311H1 - Biochemistry II: Nucleic Acids and Biological Information Flow**

Hours: 24L/12T

Nucleic acids and flow of information in biological systems. Information storage and transmission by nucleic acids, as well as new molecular technologies will be discussed. Registration in one of the tutorial sessions is mandatory. Note: Students that have a SDF in BCH210H1 are not permitted to enrol in BCH311H1 until a final passing grade (50%) appears on the transcript. BCH2** WITH COURSE EXCLUSION TO BCH210H1 meets the prerequisite requirement for BCH311H1.

**Prerequisite:** BCH210H1/[BIOC12H3 and BIOC13H3 (UTSC)]  
**Exclusion:** MGY311Y1, PSL350H1  
**Distribution Requirements:** Science  
**Breadth Requirements:** Living Things and Their Environment (4)

---

**BCH299Y1 - Research Opportunity Program**

Credit course for supervised participation in faculty research project. Details at [https://www.artsci.utoronto.ca/current/academics/research-opportunities/research-opportunities-program](https://www.artsci.utoronto.ca/current/academics/research-opportunities/research-opportunities-program). Not eligible for CR/NCR option.

**Distribution Requirements:** Science

---

**JPM300H1 - Research Readiness and Advancing Biomedical Discoveries**

Hours: 12L/24T

Explore how scientists leverage their knowledge and skills to advance academic biomedical discoveries from the laboratory to improve patient health through either commercialization or not-for-profit approaches. Students will learn about innovation and develop key research and industry skills including intellectual property, ethics, budget and project management; learn how to critically evaluate scientific evidence and effectively communicate to a wide audience. This hybrid student-centered course will include interactive online modules and in-class group work. Course work will focus on developing skills and knowledge to help you be successful in diverse research courses and future careers. Not eligible for CR/NCR.

**Prerequisite:** 10.0 FCE completed; BCH210H1/BCH242Y1  
**Recommended Preparation:** PSL300H1, PSL301H1  
**Distribution Requirements:** Science  
**Breadth Requirements:** Living Things and Their Environment (4)

---

**BCH340H1 - Proteins: from Structure to Proteomics**

Hours: 24L/6T

Proteins are the main functional units in the cell and are part of almost every biochemical process. They catalyze many metabolic reactions and also play central roles in signaling pathways. Some proteins have crucial structural and mechanical functions. In this course, a detailed overview of protein structure, stability, folding, and protein-ligand interactions will be given with strong emphasis on discussing the basic principles in the field. Biophysical, theoretical, and proteomic methods used to study protein stability and folding and protein-ligand interactions will be presented. Protein misfolding diseases will also be discussed. The course will offer a solid basis in protein biochemistry. It is recommended for those interested in pursuing graduate studies or professional degrees in health or medicine.

**Prerequisite:** BCH210H1/BCH242Y1  
**Distribution Requirements:** Science  
**Breadth Requirements:** Living Things and Their Environment (4)
BCH370H1 - Laboratory Course in Biochemical Techniques

Hours: 48P

This course is designed to provide hands-on experience at an introductory level, employing a variety of biochemical techniques commonly used in research and clinical diagnostic laboratories. This course is intended for students who are not proceeding further in biochemistry. It is highly recommended that students take this course in their third year as space is limited and priority will go to third-year students. This course will be offered in the FALL & WINTER terms. Attendance in the first week of class is mandatory in order to receive safety information and laboratory protocols. (Enrolment limited.) (Lab fees: $50)

Prerequisite: BCH210H1.
Exclusion: BCH377H1, CHM379H1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

BCH374Y1 - Research Project in Biochemistry

Hours: 12T/144P

This course provides an opportunity to perform specialized research in biochemistry under the direct supervision of Biochemistry Department Faculty. Not eligible for CR/NCR option.

Prerequisite: For Specialist: BCH242Y1 (75% or higher); BIO230H1; CHM247H1/CHM249H1, and approval of the course coordinator. For Major: BCH210H1 (80% or higher); BIO230H1; CHM247H1/CHM249H1, and approval of the course coordinator.
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

BCH375H1 - Independent Research Project

Hours: 144P

This course provides an opportunity for individual research with a specific topic of study. Students are mentored and supervised by research scientists and faculty associated with the University of Toronto. It provides students an opportunity to enhance and apply their knowledge and understanding learned in other courses. Direct supervision must be provided by a faculty member within the Department of Biochemistry. Not eligible for the CR/NCR option.

Prerequisite: (75% or higher in BCH242Y1)/(80% or higher in BCH210H1); BIO230H1; CHM247H1/CHM249H1; and approval of the course coordinator.
Corequisite: BCH375H1 can be combined with BCH373H1.
Exclusion: BCH473Y1, BCH374Y1
Breadth Requirements: Living Things and Their Environment (4)

BCH377H1 - Biochemistry Laboratory I

Hours: 12L/48P

An introduction to fundamental laboratory techniques in modern biochemistry. Experiments illustrate and develop the concepts described in lecture courses and serve as a foundation for more advanced training in biochemistry laboratory courses. Enrollment in this course is generally restricted to students enrolled in the Biochemistry, Immunology, and Molecular Genetics & Microbiology (Genetics Stream) Specialist programs. (Lab fees: $25)

Prerequisite: BCH242Y1
Exclusion: BCH370H1, CHM379H1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)
BCH378H1 - Biochemistry Laboratory II

**Hours:** 12L/48P

This course builds upon the fundamental laboratory techniques acquired in BCH377H1. Students gain hands-on experience in experimental design and data analysis, exploring numerous modern and classic biochemistry and molecular biology experimental techniques used in research laboratories. Enrollment in this course is generally restricted to students enrolled in the Biochemistry Specialist program.

**Prerequisite:** BCH377H1

**Distribution Requirements:** Science

**Breadth Requirements:** Living Things and Their Environment (4)

BCH399Y1 - Research Opportunity Program

Credit course for supervised participation in faculty research project. Details at https://www.artsci.utoronto.ca/current/academics/research-opportunities/research-opportunities-program. Not eligible for CR/NCR option.

JPM400Y1 - Biomedical Incubator Capstone Project

**Hours:** 240P/16S

Discover what it is like to be part of a biomedical innovation team. Develop and engage in biomedical research in a simulated small business/incubator setting under the guidance of a faculty mentor. Bring your proposed JPM300H1 project to life, while acquiring budget management, research, business and communication workplace skills for future careers. Enrolment is application-based. Proposals will be reviewed by committee and successful proposals will be matched to a mentor. Not eligible for CR/NCR option.

**Students will form teams and develop a research proposal based on either:**

1. Faculty led concept requiring further development and testing, which would not normally be funded grants and would be tangential to ongoing research in the lab.

2. Student developed innovative idea that requires further development and testing. This should be a project that is not being investigated in a UofT research lab.

**Prerequisite:** A minimum of 75% in JPM300H1; completion of any of PCL367H1/PCL368H1/PSL372H1/BCH370H1/BCH377H1.

**Application required; see department for more information.**

**Distribution Requirements:** Science

**Breadth Requirements:** Living Things and Their Environment (4)

BCH422H1 - Membrane Proteins: Structure, and Function

**Hours:** 24L

**Prerequisite:** BCH210H1/BCH242Y1; BCH311H1/ MGY311Y1/ PSL350H1

**Distribution Requirements:** Science

**Breadth Requirements:** Living Things and Their Environment (4)

BCH425H1 - Structural Biology: Principles and Practice

**Hours:** 24L

Theory of modern biophysical techniques as applied to the study of the structure and function of macromolecules; emphasis on X-ray crystallography, electron cryomicroscopy, NMR spectroscopy, and other spectroscopic methods.

**Prerequisite:** BCH210H1/BCH242Y1. This is a problem-solving course and will require use of skills from introductory physics, math, and/or chemistry courses.

**Distribution Requirements:** Science

**Breadth Requirements:** Living Things and Their Environment (4)

BCH426H1 - Regulation of Signalling Pathways

**Hours:** 24L

This course is focussed on the molecular aspects of signal transduction, covering how cells receive and then transmit signals via intracellular proteins such as kinases and phosphatases and how this ultimately regulates cell function. Specific topics covered may include calcium regulation and signalling by extracellular ligands including morphogens, growth factors and/or insulin.

**Prerequisite:** BCH210H1/BCH242Y1; BCH311H1/MGY311Y1/ PSL350H1

**Distribution Requirements:** Science

**Breadth Requirements:** Living Things and Their Environment (4)
BCH428H1 - Genomics of Microbial Communities in Human Health and Beyond

Hours: 24L/12P

There is a growing appreciation that microbes do not operate in isolation but form parts of larger populations and communities (microbiomes) with unique considerations for human health. Combining lectures, small group discussions, and a computer lab component, this course will cover how genomics can be applied to analyze microbial communities and the transformative discoveries that continue to result.

Prerequisite: BCH210H1/BCH242Y1; BCH311H1/MGY311Y1/CSB349H1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

BCH440H1 - Protein Homeostasis

Hours: 24L

Protein homeostasis is dependent on the coordinated synthesis, folding, localization and degradation of the thousands of proteins in a living cell. This course deals with selected aspects of the process including: 1) mRNA synthesis, 2) ribosome structure and function, 3) translation initiation, elongation and termination, 4) protein folding and the role of chaperones, 5) protein degradation via the ubiquitin proteasome system and 6) protein aging and disease. The course will serve as a foundation for those with an interest in how cellular protein levels and conformations are maintained.

Prerequisite: BCH210H1/BCH242Y1; BCH311H1/MGY311Y1/PSL350H1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

BCH444H1 - Bioinformatics

Hours: 24L/12T

This course is an introduction to computational methods and internet resources in modern biochemistry and molecular biology. The main topics include: sequence and genome databases, sequence alignment and homology search, use and interpretation of molecular structure, and phylogenetic analysis. Assignments focus on hands-on competence building with web-based bioinformatics tools and databases, downloadable software including a molecular viewer and a multiple sequence alignment editor, and the statistics workbench and programming language "R". For syllabus details see: www.biochemistry.utoronto.ca/undergraduates/courses/BCH441H/

Note BCH420H1 extends this syllabus to computational topics of systems biology.

Prerequisite: BCH210H1/BCH242Y1; BCH311H1/MGY311Y1/PSL350H1 or special permission of the course coordinator
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

BCH444H1 - Protein Trafficking in the Secretory & Endocytic Pathways

Hours: 24L

This course examines the molecular details of the secretory and endocytic pathways in the cell. Some of the specific topics covered will include protein translocation into the ER, chaperones and protein folding in the ER, retrotranslocation and protein degradation, the Unfolded Protein Response (UPR), vesicle biogenesis and ER-Golgi transport, regulated secretion, basic concepts in endocytosis and protein sorting in polarized cells. Emphasis is placed on current experimental approaches. A good understanding of basic biochemical methods is an asset.

Prerequisite: BCH210H1/BCH242Y1; BCH311H1 (75% or higher)/MGY311Y1 (75% or higher)/PSL350H1 (75% or higher).
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)
BCH445H1 - Organelles in Cell Function and Death

Hours: 24L

Advanced principles and concepts of cell biology are covered including the structure, biogenesis, and dynamic behavior of cell organelles. The specific contributions to the life and death of the cell are highlighted. Signaling events that integrate cellular communication are discussed. Specifically, the interplay between the Endoplasmic Reticulum, Peroxisomes and Mitochondria is highlighted. Mitochondrial biogenesis and membrane dynamics as they relate to apoptosis and cellular signaling/integration are presented as they relate to human disease. State-of-the-art imaging techniques and the contributions of cell biology to modern day advances in medicine are also presented.

Prerequisite: BCH210H1/BCH242Y1; BIO230H1/BIO255H1;
BCH311H1/MGY311Y1/PSL350H1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

BCH446H1 - Membrane Dynamics of the Cell Surface

Hours: 24L

This course covers the principles and concepts related to molecular cell biology of the cell surface in multicellular organisms. Topics include: biophysical properties of cells, membranes, and extracellular matrix, dynamic remodelling of the cytoskeleton; cell-cell and cell-matrix interactions; maintenance of planar and apical-basal cell polarity; cytokinesis, viral uptake by macropinocytosis and engulfment by phagocytosis. In addition to lectures, groups of students will interpret a recent scientific paper related to the course material to be formally presented during regular class hours.

Prerequisite: BCH210H1/BCH242Y1; BCH311H1/MGY311Y1/PSL350H1.
Exclusion: CSB331H1, CSB428H1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

BCH448H1 - Structure and Function of the Nucleus

Hours: 24L

This course examines the structure and function of the cell nucleus and the genome through the lens of biochemistry, molecular biology, cell biology and evolution. A focus is placed on the major scientific developments that shaped our current understanding. Topics that will be covered are eukaryogenesis, junk DNA, the structure of DNA and chromatin, the transfer of information between genotype and phenotype, the filtering of information found in the genome into biologically relevant molecules such as mRNA, the processing and export of these products from the nucleus into the cytoplasm, and the translation of mRNA into protein. We will also investigate how various organelles, such as the endoplasmic reticulum and mitochondria, played a role in the evolution of the nucleus. Finally we will investigate how biological information is partitioned during mitosis.

Prerequisite: BCH210H1/BCH242Y1; BCH311H1/MGY311Y1/PSL350H1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

BCH449H1 - Medical Biochemistry

Hours: 24L/12T

This course will apply core biochemical principles to explain the pathogenesis of emerging diseases at the molecular level and describe advanced biochemical technologies used to understand and treat these illnesses. Students will be exposed to how biochemical principles influence medical diagnoses, therapy and the development of new drugs.

Prerequisite: BCH242Y1/(BCH210H1, BCH311H1), BIO230H1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

BCH450H1 - Antibiotics and Antibiotic Targets

Previous Course Number: BCH350H1
Hours: 24L/12T

This course will cover the action of the biochemical targets of the existing antibiotics (nucleotide-, RNA-, DNA-, protein- and cell wall synthesis, the manner in which these pathways are inhibited in antimicrobial therapy and the biochemical basis of antibiotic resistance. The biochemistry and origin of naturally occurring and synthetic antibiotics will be introduced. (Enrolment limited.)

Prerequisite: BCH242Y1/(BCH210H1, BCH311H1)
Exclusion: BCH350H1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)
**BCH470H1 - Independent Research Project**

*Hours: 144P*

This course provides an opportunity for individual research with a specific topic of study. Students are mentored and supervised by research scientists and faculty associated with the University of Toronto. It provides students an opportunity to enhance and apply their knowledge and understanding learned in other courses. Direct supervision must be provided by a faculty member within the Department of Biochemistry. Not eligible for the CR/NCR option.

**Prerequisite:** (BCH340H1; BCH377H1; BCH378H1; 75% or higher in MGY311Y1)/(BCH370H1; 80% or higher in BCH311H1); and approval of the course coordinator.

**Corequisite:** BCH478H1

**Exclusion:** BCH473Y1

**Distribution Requirements:** Science

**Breadth Requirements:** Living Things and Their Environment (4)

**BCH471H1 - Independent Research Project**

*Hours: 144P*

This course provides an opportunity for individual research with a specific topic of study. Students are mentored and supervised by research scientists and faculty associated with the University of Toronto. It provides students an opportunity to enhance and apply their knowledge and understanding learned in other courses. Direct supervision must be provided by a faculty member within the Department of Biochemistry. Not eligible for the CR/NCR option.

**Prerequisite:** (BCH340H1; BCH377H1; BCH378H1; 75% or higher in MGY311Y1)/(BCH370H1; 80% or higher in BCH311H1); and approval of the course coordinator.

**Corequisite:** BCH478H1

**Exclusion:** BCH473Y1

**Distribution Requirements:** Science

**Breadth Requirements:** Living Things and Their Environment (4)

**BCH472Y1 - Advanced Summer Research Project in Biochemistry**

*Hours: 144P*

Real-world opportunity to apply theoretical knowledge and hone technical skills through full-time research in an active research laboratory for students who have completed third year. Students are responsible for arranging for supervision by a Department of Biochemistry faculty member in advance of the academic year-end. Not eligible for CR/NCR option.

**Prerequisite:** A final grade of 75% or higher in each of BCH340H1; BCH377H1; BCH378H1; and approval of the course coordinator.

**Distribution Requirements:** Science

**Breadth Requirements:** Living Things and Their Environment (4)

**BCH473Y1 - Advanced Research Project in Biochemistry**

*Hours: 144P*

This course provides opportunities to pursue an original individual research project in a particular area of biochemistry, under the direct supervision of a Biochemistry Department faculty member. Not eligible for the CR/NCR option.

**Prerequisite:** For Specialist: BCH340H1; BCH377H1; BCH378H1; 75% or higher in MGY311Y1; and approval of the course coordinator. For Major: BCH370H1; 80% or higher in BCH311H1; and approval of the course coordinator.

**Corequisite:** BCH478H1

**Distribution Requirements:** Science

**Breadth Requirements:** Living Things and Their Environment (4)

**BCH478H1 - Advanced Biochemistry Laboratory**

*Hours: 24L/84P*

Experiments extend students' technical abilities as well as their knowledge and application of practical theory. This course is designed as an advanced successor in a progression of biochemistry laboratory experiences in BCH242Y1, BCH377H1 and BCH378H1 that will equip students with a spectrum of practical abilities that are of vital importance in scientific research. (Lab fees: $25)

**Prerequisite:** BCH340H1; BCH377H1; BCH378H1/(CHM361H5 [UTM] + CHM362H5 [UTM]) + CHM371H5 [UTM]); MGY311Y1

**Distribution Requirements:** Science

**Breadth Requirements:** Living Things and Their Environment (4)
BCH479H1 - Advanced Seminar in Biochemistry

Hours: 24S

This seminar course will foster close interactions between students and Faculty and encourage in depth discussion not only of results but the ways the results were presented and the rationales for experimental design. Critical thinking skills will be developed, as will presentation skills, as students become presenters of results and take on the role of scientist presenting and analyzing new findings. Writing skills will be developed through an essay assignment. Students within the audience will also have access to the experimental papers and be encouraged to pose thoughtful questions about research and the ways that research can be communicated within the scientific community. Thus the new seminar course will foster an appreciation of scientific writing and give students a venue to develop their communication skills. The goal of the seminar course is to improve both the written and oral scientific communication skills of our Specialist students, as well as to increase their knowledge of key papers in Biochemistry.

Prerequisite: BCH340H1; BCH377H1; BCH378H1; and permission of Department

Distribution Requirements: Science

Breadth Requirements: Living Things and Their Environment (4)
Biology

Introduction

Biology is the scientific study of life. At no time in history has biology been more visible and important to human life and the future of our planet. The study of biology has vast applications: in understanding one’s own body, in improving human health and natural resources, in grappling with the ethical questions that face humanity and in understanding the interdependent web of living organisms on the planet. Important discoveries and advances in the biological sciences occur weekly as scientists and their students around the world develop and use new techniques, theories, and approaches.

The University of Toronto has an enormous depth of faculty members on the St. George campus who conduct leading-edge research and teach courses in the biological sciences. Within the Faculty of Arts and Science, St. George campus, there is no single biology department; members of the Departments of Cell & Systems Biology (CSB) and Ecology & Evolutionary Biology (EEB) teach biology courses across the broad spectrum of introductory to advanced topics. Each of these departments offers its own programs and courses, and jointly offer the Biology programs. These co-sponsored Programs of Study include: Biology (Specialist, Major, Minor), Bioinformatics & Computational Biology (Specialist), and Genome Biology (Major). The Biology Minor includes the option of joint sponsorship with the National University of Singapore that incorporates an international study-abroad semester. The program in Genome Biology also includes the Department of Molecular Genetics & Microbiology as a co-sponsor, and the program in Bioinformatics & Computational Biology additionally includes the Departments of Biochemistry and Computer Science as co-sponsors.

Students should consult the Cell & Systems Biology and Ecology & Evolutionary Biology entries in this Calendar about additional courses available in the broad subject areas of bioinformatics, cell and molecular biology, conservation and environmental biology, developmental biology, ecology, evolutionary biology, genetics, physiology, and genome biology. The diverse course offerings in the Biology programs allow students to customize their educational experience to match their personal interests and career aspirations.

High school pre-requisites and First-year requirements

Because many areas of biology draw on mathematics and the physical sciences, background preparation in calculus and chemistry from high school is required for students pursuing some programs in biology and recommended for others.

Students entering their first year in the life sciences take BIO120H1 and BIO130H1. These courses are taken by students who have successfully completed Grade 12 Biology (or an equivalent course); BIO130H1 also requires students to have successfully completed Grade 12 Chemistry (or an equivalent course). These single-semester courses are a prerequisite for almost all further courses in the life sciences. It is possible for students to enrol in BIO220H1 concurrently with BIO130H1.

All co-sponsored Biology programs have unlimited enrolment and no specific admission requirements. All students who have completed at least 4.0 FCE of courses are eligible to enrol (FCE=full-course equivalents, most single-semester courses are 0.5 FCE). Program completion requires 12.0-12.5 FCE of courses for a Specialist, 8.0 FCE for a Major, or 4.0 FCE for a Minor. To fulfill graduation requirements, students must complete either one Specialist, two Majors, or one Major with two Minors. Students may choose a Specialist to focus in-depth on a single subject area or may pair complementing Majors (or Minors) to customize their education and training to encompass the breadth of their interests.

General Biology Programs

Students in the Biology Specialist and Biology Major programs obtain a foundation in the core areas of cell and molecular biology, ecology and biodiversity, evolutionary biology, physiology and genetics; as well as in calculus, chemistry and statistics (Specialist), or chemistry (Major). These programs are flexible in allowing students many possible course pathways that are compatible with completing program requirements, encouraging students to explore the diversity of their biological interests and to obtain broad training in life sciences. In the upper years, students take advanced courses in specific biological topics, and can also include courses in the biological sciences offered by other units. In their final year, students take at least one full-year or two half-year (Specialist) or one half-year (Major) advanced integrative, inquiry-based course in the biological sciences offered by the departments of Cell & Systems Biology and Ecology & Evolutionary Biology, including seminar, independent research project, and field courses. Students who wish to focus either on plant and microbial biology or on animal biology can take courses within these programs that concentrate in these subject areas. Students in these Biology Programs of Study prepare themselves for diverse life sciences career trajectories that depend on critical thinking and practical hands-on skills, including postgraduate study in biological sciences and medicine.

The Biology Minor program offers students an introduction to cell and molecular biology, ecology, evolutionary biology, and physiology. The Biology Minor (joint with NUS) program is offered jointly with the National University of Singapore: students complete 2.0 FCEs at the University of Toronto and 2.0 FCEs on exchange in Singapore.

The Biology Specialist, Major and Minor programs are administered by the Department of Ecology & Evolutionary Biology, and co-sponsored by the Department of Cell & Systems Biology. Students requiring more information or advising about these programs are encouraged to visit the departmental website http://www.eeb.utoronto.ca/undergrad.htm or to contact the EEB Undergraduate Office, Earth Sciences Centre (25 Willcocks St.), Room 3055B, undergrad.eeb@utoronto.ca, 416-978-2084.

Biology Specialist (Science Program) - ASSPE2364

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

The Biology Specialist, Major, and Minor programs are administered through the Department of Ecology & Evolutionary Biology. Contact: undergrad.eeb@utoronto.ca

(12 FCEs including at least 1.0 FCE at the 400 series)
Biology

First Year (3.0 FCEs): BIO120H1; BIO130H1; (CHM135H1, CHM136H1)/CHM151Y1; (MAT135H1, MAT136H1)/MAT137Y1

Higher Years:

1. 2.5 FCEs: BIO220H1; BIO230H1/ BIO255H1; BIO251H1; BIO270H1/ PSL300H1; BIO260H1/ HMB265H1

2. 0.5 FCE statistics from: EEB225H1, PSY201H1, STA220H1, STA257H1, GGR270H1, STA288H1

3. 0.5 FCE from chemistry, physics or statistics: CHM220H1, CHM249H1, PHY131H1, PHY151H1; PSY202H1; STA215H1, STA255H1, STA261H1

4. 1.5 FCE at the 200+ series from: BCH; BIO; CJH332H1; CSB (excluding CSB201H1, CSB202H1); EEB (excluding EEB202H1, EEB208H1, EEB214H1, EEB219H1); EEB266H1; ENV334H1; ENV432H1; IMM250H1; JHE353H1; JHE355H1; MGY200H1; MGY277H1; NFS284H1; PSY397H1; PSY497H1

5. 0.5 FCE at 300+ series in plant or microbial biology from: CSB340H1, CSB350H1, CSB351Y1, CSB353H1, CSB450H1, CSB452H1, CSB454H1, CSB459H1, CSB460H1, CSB475H1, EEB328H1, EEB331H1, EEB340H1, EEB403H1, EEB403H1, EEB405H1, EEB405H1, EEB428H1, EEB440H1

6. 0.5 FCE at 300+ series in animal biology from: CJH332H1, CSB329H1, CSB327H1, CSB328H1, CSB329H1, CSB330H1, CSB331H1, CSB332H1, CSB343H1, CSB346H1, CSB348H1, CSB426H1, CSB427H1, CSB428H1, CSB429H1, CSB430H1, CSB431H1, CSB432H1, CSB435H1, CSB445H1, CSB447H1, CSB483H1, EEB322H1, EEB380H1, EEB382H1, EEB384H1, EEB386H1, EEB388H1, EEB390H1, EEB440H1, EEB440H1

7. 2.0 FCEs at 300+ series (at least 1.0 FCE must be from Group 1) from:
Group 1: CJH332H1; CSB; EEB; EHB328H1/ ENV334H1, ENV432H1; JHE353H1, JHE355H1; NUS; PSY397H1; PSY497H1
Group 2: ANA/ ANT333Y1, ANT338H1, ANT430H1, ANT436H1; BCH; CJH332H1; CSB; EEB; EHB328H1/ ENV334H1, ENV432H1/ HMB; IMM; IMM; JHE353H1, JHE355H1; MGY; NUS; PCL; PSL; PSY397H1; PSY497H1

8. 1.0 FCE at 400-series from: CSB; EEB

NOTE: Students who wish to focus on either plant or microbial biology, or animal biology should take courses in 7. and 8. that concentrate in these subject areas as listed in 5. and 6., respectively. BIO271H1/ PSL301H1 is highly recommended for students concentrating in animal biology and is a prerequisite for 300+ series CSB courses in physiology.

Biology Major (Science Program) - ASMAJ2364

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

The Biology Specialist, Major, and Minor programs are administered through the Department of Ecology & Evolutionary Biology. Contact: undergrad.eeb@utoronto.ca

(8 FCEs including at least 1.5 FCEs at the 300+ series and 0.5 FCE at the 400 series)

First Year (2.0 FCEs): BIO120H1; BIO130H1; (CHM135H1, CHM136H1)/CHM151Y1

Higher Years:

1. 2.5 FCEs: BIO220H1; BIO230H1/ BIO255H1; BIO251H1; BIO270H1/ PSL300H1; BIO260H1/ HMB265H1

2. 1.5 FCE from: BCH; BIO; CJH332H1; CSB (excluding CSB196H1, CSB197H1, CSB198H1, CSB199H1, CSB201H1, CSB202H1); EEB (excluding EEB197H1, EEB198H1, EEB199H1, EEB202H1, EEB208H1, EEB214H1, EEB215H1); EHB328H1, ENV334H1, ENV432H1/ IMM250H1, JHE353H1, JHE355H1, MGY200H1, MGY277H1, NFS284H1, PSY397H1, PSY497H1

3. 1.5 FCEs at 300+ series from: ANA/ ANT333Y1, ANT338H1, ANT430H1, ANT436H1; BCH; CJH332H1; CSB; EEB; EHB328H1/ ENV334H1, ENV432H1/ HMB; IMM; IMM JHE353H1, JHE355H1; MGY; NUS; PCL; PSL; PSY397H1, PSY497H1

4. 0.5 FCE at 400-series from: CSB; EEB; ENV432H1

NOTE: Students who wish to focus on either plant or microbial biology, or animal biology should take courses in 2., 3., and 4. that concentrate in these subject areas (as listed below).

CSB and EEB courses in plant or microbial biology: CSB340H1, CSB350H1, CSB351Y1, CSB353H1, CSB450H1, CSB452H1, CSB454H1, CSB459H1, CSB460H1, CSB475H1, EEB328H1, EEB331H1, EEB340H1, EEB405H1, EEB405H1, EEB428H1, EEB440H1

CSB and EEB courses in animal biology: BIO271H1/ PSL301H1; CJH332H1; CSB328H1, CSB327H1, CSB328H1, CSB329H1, CSB330H1, CSB331H1, CSB343H1, CSB346H1, CSB348H1, CSB426H1, CSB427H1, CSB428H1, CSB429H1, CSB430H1, CSB431H1, CSB432H1, CSB435H1, CSB445H1, CSB447H1, CSB483H1, EEB263H1, EEB266H1, EEB267H1, EEB322H1, EEB308H1, EEB382H1, EEB384H1, EEB386H1, EEB388H1, EEB390H1, EEB440H1, EEB352H1, (BIO271H1/ PSL301H1 is highly recommended for students concentrating in animal biology and is a prerequisite for 300+ series CSB courses in physiology.)

Biology Minor (Jointly Offered With National University Of Singapore) (Science Program) - ASMAJ2730

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.
The following courses are required:

- BIO120H1, BIO130H1
- 1.0 credit from: BIO220H1, BIO230H1, BIO255H1, BIO251H1, BIO270H1, PSL300H1, BIO271H1, PSL301H1, BIO260H1, HMB265H1, ENV234H1

Completion Requirements:

(4.0 full courses or their equivalent)

First Year (1.0 FCE): BIO120H1, BIO130H1

Higher Years:

1. 1.0 FCE from: BIO220H1, BIO230H1, BIO255H1, BIO251H1, BIO270H1, PSL300H1, BIO271H1, PSL301H1, BIO260H1, HMB265H1, ENV234H1

2. 2.0 FCEs: any available 2000+ LSM courses at the National University of Singapore for which you have the appropriate equivalent U of T course prerequisite and for which space is available (note: 1.0 FCE at NUS must be at the 3000 or 4000 level). You enrol through the NU$ generic courses at U of T; NUS201H0, NUS302H0, etc. For a list of LSM courses see: http://www.lifesciences.nus.edu.sg/lsm.html. To discuss exclusions and prerequisites contact the EEB Undergraduate Office.

Biology Minor (Science Program) - ASMIN2364

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

The Biology Specialist, Major, and Minor programs are administered through the Department of Ecology & Evolutionary Biology. Contact: undergrad. eeb@utoronto.ca

4 FCEs

First Year (1.0 FCE): BIO120H1, BIO130H1

Higher Years:

1. 1.0 FCE from: BIO220H1, BIO230H1, BIO255H1, BIO251H1, BIO270H1, PSL300H1, BIO271H1, PSL301H1, BIO260H1, HMB265H1

2. 2.0 FCEs: any available 2000+ LSM courses at the National University of Singapore for which you have the appropriate equivalent U of T course prerequisite and for which space is available (note: 1.0 FCE at NUS must be at the 3000 or 4000 level). You enrol through the NU$ generic courses at U of T; NUS201H0, NUS302H0, etc. For a list of LSM courses see: http://www.lifesciences.nus.edu.sg/lsm.html. To discuss exclusions and prerequisites contact the EEB Undergraduate Office.

Biology Programs in Genomics and Informatics

Genomics, the study of the structure, function and evolution of the genome, is among the newest and most rapidly growing fields of both basic and applied science, and nearly all of the more traditional disciplines in biology and medicine are being revolutionized by genomic tools. The growing flood of data on the DNA, RNA, and protein sequences of organisms provides unprecedented opportunities to address fundamental biological questions such as the causes of disease, the genetic basis of development, the nature of gene regulation, the extent and causes of adaptive evolution, and the history of species on planet earth, including humans. Genome biology and bioinformatics are highly interdisciplinary fields, encompassing concepts and practices from such diverse fields as cell and molecular biology, evolutionary genetics, and computer science. The Bioinformatics & Computational Biology Specialist program is an interdepartmental, interdisciplinary Program of Study that balances computer-science and life-science courses. Students in the Genome Biology Major program will receive a uniquely broad training in these concepts and practices, with a key focus on conceptual training in molecular biology, bioinformatics and evolutionary genetics, and practical training in both computational and wet-lab genomics research.

Note: The Bioinformatics & Computational Biology Specialist program has deregulated fees, which are incurred after enrolment in program. Please refer to the Arts & Science Program Toolkit for more information.

The Bioinformatics & Computational Biology Specialist and Genome Biology Major programs are administered by the Department of Cell & Systems Biology, and are co-sponsored by the Departments of Ecology & Evolutionary Biology and Molecular Genetics & Microbiology. The Bioinformatics & Computational Biology Specialist additionally includes the Departments of Biochemistry and Computer Science as program co-sponsors. Students requiring more information or advising about these programs are encouraged to visit the departmental website, https://csb.utoronto.ca/, or contact the CSB Undergraduate Office, Ramsay Wright Building (25 Harbord St.), Room 424, 416-978-3477.

Bioinformatics and Computational Biology Specialist (Science Program) - ASSPE1868

Description:

The genomic and post-genomic era brings opportunities for new insight into all aspects of biology and medicine, based on the computational analysis of very large datasets in a biological context. The Bioinformatics and Computational Biology Program is an interdepartmental, interdisciplinary Program of Study that balances computer-science and life-science courses towards that goal. As a Specialist Program it is designed to prepare students for graduate studies in the field.

The Program is formally administered by the Department of Cell and Systems Biology and co-sponsored by the Departments of Biochemistry, Computer Science, Ecology and Evolutionary Biology, and Molecular Genetics; all sponsoring Departments have clear trajectories to extend the Program into graduate studies in the respective Department.
Biology

requirement. BCH441H1

Former BCB students benefitted from taking instructions in this Calendar.

replaced. For details, (1) The "missing" half part of this Specialist Program's requirements.

Department's major can normally be fulfilled with 0.5 to 3.5

Program Director. Note that the requirements for a co

Course substitutions are possible with written permission of the Program Director. Note that the requirements for a co-sponsoring Department’s major can normally be fulfilled with 0.5 to 3.5 additional credits. All Major programs in the co-sponsoring life science departments require BIO120H1, however, it is not formally a part of this Specialist Program's requirements.

(1) The "missing" half-credit of the substitution does not have to be replaced. For details, please refer to the Computer Science Program instructions in this Calendar.

Former BCB students benefitted from taking CSB352H1, Bioinformatic Methods. They also found it to be helpful to take BCH441H1 prior to BCB410H1 due to BCB410H1's R programming requirement.

Genome Biology Major (Science Program) - ASMAJ2655

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

This program is a joint program of the departments of Cell & Systems Biology, Ecology & Evolutionary Biology, and Molecular Genetics. It is administered through the Department of Cell & Systems Biology.

(8 full courses or their equivalent)

First year: BIO120H1, BIO130H1; ( CHM135H1, CHM136H1)( CHM138H1, CHM139H1)( CHM151Y1; ( MAT135H1, MAT136H1/ MAT137Y1/ MAT157Y1

Higher years:

1. BIO220H1, BIO230H1/ BIO255H1; BIO260H1/ HMB265H1; EEB225H1/ STA220H1

2. Genomics fundamentals: BCH311H1/ CSB349H1/ MGY311Y1, CSB352H1, EEB323H1

3. 0.5 FCE laboratory course from: CSB472H1, CSB474H1; EEB460H1

4. 1.0 FCE genomics elective from: CSB330H1, CSB350H1, CSB397Y0, CSB427H1, CSB435H1, CSB450H1, CSB457H1, CSB458H1, CSB471H1, CSB473H1, CSB490H1, CSB491H1, CSB497H1/ CSB498Y1/ CSB499Y1; EEB362H1, EEB455H1, EEB459H1, EEB462H1, EEB397Y1/ EEB497H1/ EEB498Y1/ EEB499Y1; EJB352H1, MGY350H1, MGY360H1, MGY428H1, MGY470H1, MGY480Y1

NOTE: Students taking CSB397Y0, CSB490H1, CSB491H1, CSB497H1/ CSB498Y1/ CSB499Y1, EEB397Y1/ EEB497H1/ EEB498Y1/ EEB499Y1 or MGY480Y1 are encouraged to conduct a genomics-related research project.

Discipline-Specific Biology Programs within CSB and EEB:

In addition to the co-sponsored Biology programs, the Departments of Cell & Systems Biology and Ecology & Evolutionary Biology each administer Specialist, Major and Minor programs with particular disciplinary emphases within the biological sciences of the Faculty of Arts and Science, St. George campus. Discipline-specific Major or Minor programs may be paired with each other, with the general Biology Major or Minor programs, or with programs from other departments in accord with the University's degree requirements. Students may seek more information about programs and courses offered by CSB and EEB from their respective Calendar entries:

- **Cell & Systems Biology** offers the Animal Physiology Major and Cell & Molecular Biology Major and Specialist programs
- **Ecology & Evolutionary Biology** offers the Biodiversity & Conservation Biology Major, Ecology & Evolutionary Biology Major and Specialist, and Environmental Biology Major and Minor programs
Other Discipline-Specific Programs in the Life Sciences:

Inside and outside the Faculty of Arts and Science on the St. George campus, several departments administer Specialist, Major and Minor programs with particular disciplinary emphases within life sciences. Many of the Life Science programs are collaborative programs given by the Faculty of Arts and Science and departments in the Faculty of Medicine. Students requiring more information and course details are encouraged to visit the corresponding departmental websites and departmental Calendar entries. These additional Life Science departments and programs are listed in this Calendar:

- Biochemistry
- Human Biology
- Immunology
- Laboratory Medicine & Pathobiology
- Molecular Genetics & Microbiology
- Nutritional Sciences
- Pharmaceutical Chemistry
- Pharmacology & Toxicology
- Physiology
- Psychology

Core Biology Courses

Courses with a BIO designation form core components of the biology curriculum and are taught by instructors from the Departments of Cell & Systems Biology and Ecology & Evolutionary Biology. These core courses include BIO120H1 and BIO130H1 as well as BIO220H1 and BIO230H1 that are required for most life sciences programs at the University of Toronto.

BIO120H1 - Adaptation and Biodiversity

**Hours:** 24L/15P

Principles and concepts of evolution and ecology related to origins of adaptation and biodiversity. Mechanisms and processes driving biological diversification illustrated from various perspectives using empirical and theoretical approaches. Topics include: genetic diversity, natural selection, speciation, physiological, population, and community ecology, maintenance of species diversity, conservation, species extinction, global environmental change, and invasion biology. A lab coat is required and the cost is approximately $16 if students wish to purchase it through the Department. (Lab Materials Fee: $25)

**Prerequisite:** Grade 12 Biology or equivalent. Students without high school Biology must consult the BIO120 Office (bio120@utoronto.ca)

**Distribution Requirements:** Science

**Breadth Requirements:** Living Things and Their Environment (4)

BIO130H1 - Molecular and Cell Biology

**Hours:** 36L/15P

One of the goals of modern biology is to understand how the basic building blocks of life give rise to biological form and function. This course provides students with a common lexicon to understand the key principles and concepts in molecular and cell biology, with a focus on how the basic building blocks of life lead to functioning cells. (Lab Materials Fee: $10). Lab coat and safety glasses are required for use in laboratories; students are responsible for purchasing these items (approximate cost is $25).

**Prerequisite:** SB14U and SCH4U (Grade 12 University Preparation Biology and Chemistry) or permission of department. Please contact bio130@utoronto.ca for more information.

**Distribution Requirements:** Science

**Breadth Requirements:** Living Things and Their Environment (4)

BIO220H1 - From Genomes to Ecosystems in a Changing World

**Hours:** 24L/15P

Dynamics of genetic and ecological change in biological systems, from genomes to ecosystems. Evolutionary genetic and ecological perspectives on wide-ranging topics including disease, aging, sexual conflict, genetics of human differences, conservation, and global climate change. Applications of evolutionary, ecological, and molecular-genetic principles and processes. Responsibilities of human societies in a changing world. (Lab Materials Fee: $25).

**Prerequisite:** BIO120H1

**Recommended Preparation:** BIO130H1, BIO230H1

**Distribution Requirements:** Science

**Breadth Requirements:** Living Things and Their Environment (4)

BIO230H1 - From Genes to Organisms

**Hours:** 36L/15P

The genome is the "book of life," providing instructions to construct an organism. This course introduces genome biology and explores how the building blocks of life are networked into functioning organisms. We will investigate how cells perceive internal and external cues, how gene expression is shaped by this perception, and how these events give rise to tissues, organs, and whole organisms. (Lab Materials Fee: $15). Lab coat and safety glasses are required for use in laboratories; students are responsible for purchasing these items (approximate cost is $25).

**Prerequisite:** BIO130H1

**Recommended Preparation:** BIO130H1, (CHM135H1, CHM136H1)/(CHM138H1, CHM139H1)/CHM151Y1

**Exclusion:** BIO255H1

**Distribution Requirements:** Science

**Breadth Requirements:** Living Things and Their Environment (4)
BIO251H1 - Form, Function and Development in Plants

**Previous Course Number:** BIO251Y1  
**Hours:** 24L/18P

Introduction to structure, function, and ecology of vegetative and reproductive processes in plants with a focus on flowering plants and gymnosperms. Lectures and labs emphasize photosynthesis, respiration, mineral nutrition, transport processes, patterns of plant growth and development, the role of hormones in development, photomorphogenesis, and plant reproduction. (Lab Materials Fee: $25).

**Prerequisite:** BIO120H1  
**Distribution Requirements:** Science  
**Breadth Requirements:** Living Things and Their Environment (4)

BIO255H1 - From Genes to Organisms with Advanced Laboratory

**Hours:** 36L/33P

The genome is the "book of life," providing instructions to construct an organism. This course introduces genome biology and explores how the building blocks of life are networked into functioning organisms. We will investigate how cells perceive internal and external cues, how gene expression is shaped by this perception, and how these events give rise to tissues, organs, and whole organisms. The Enhanced Laboratory provides the opportunity for greater laboratory skill development in modern investigative techniques and is intended for students interested in conducting their own laboratory research. (Lab Materials Fee: $50). Lab coat and safety glasses are required for use in laboratories; students are responsible for purchasing these items (approximate cost is $25).

**Prerequisite:** BIO130H1, (CHM135H1, CHM136H1)/(CHM138H1, CHM139H1)/CHM151Y1, cGPA 3.0  
**Exclusion:** BIO230H1  
**Recommended Preparation:** BCH210H1 (taken concurrently or previously)  
**Distribution Requirements:** Science  
**Breadth Requirements:** Living Things and Their Environment (4)

BIO260H1 - Concepts in Genetics

**Hours:** 48L/12T

This is a problem based course which discusses classical, molecular, developmental, and population genetics and genomics with emphasis on model organisms for genetic analysis.

**Prerequisite:** BIO230H1/BIO255H1  
**Exclusion:** HMB265H1  
**Distribution Requirements:** Science  
**Breadth Requirements:** Living Things and Their Environment (4)

BIO270H1 - Animal Physiology I

**Hours:** 24L/9P

Animal physiology is a biological sub-discipline that aims to understand, in physical and chemical terms, how animals work. This course uses examples from throughout the animal kingdom, in a comparative approach, to introduce and study homeostasis and the endocrine system. Accompanying laboratories reinforce concepts introduced in lectures and provide opportunities for students to experience firsthand the role that experimentation, data collection, interpretation of data, and communication of data plays in the nature of the scientific process. (Lab Materials Fee: $10). Lab coat and safety glasses are required for use in laboratories; students are responsible for purchasing these items (approximate cost is $25).

**Prerequisite:** BIO130H1  
**Distribution Requirements:** Science  
**Breadth Requirements:** Living Things and Their Environment (4)

BIO271H1 - Animal Physiology II

**Hours:** 24L/9P

Animal physiology is a biological sub-discipline that aims to understand, in physical and chemical terms, how animals work. This course uses examples from throughout the animal kingdom, in a comparative approach, to introduce and study homeostasis and the endocrine system. Accompanying laboratories reinforce concepts introduced in lectures and provide opportunities for students to experience firsthand the role that experimentation, data collection, interpretation of data, and communication of data plays in the nature of the scientific process. (Lab Materials Fee: $10). Lab coat and safety glasses are required for use in laboratories; students are responsible for purchasing these items (approximate cost is $25).

**Prerequisite:** BIO270H1  
**Distribution Requirements:** Science  
**Breadth Requirements:** Living Things and Their Environment (4)

The Departments of Cell & Systems Biology and Ecology & Evolutionary Biology together also offer over 100 courses in biology from the 200-level to the 400-level, which contribute to the course requirements and electives for the co-sponsored Biology programs. Topics range from animal behaviour, biodiversity, bioinformatics, cell and molecular biology, conservation and environmental biology, developmental biology, ecology, evolutionary biology, genetics, genome biology, neurobiology, plant biology, and physiology. They include course formats as small-class seminars, bench lab practicals, field excursions, computer labs, and individualized research experiences with research professors. These courses use designations CSB or EEB, as well as some collaborative course codes administered by these departments. Students are encouraged to view the full list of courses from these departments on their respective Calendar entries:

1. **Cell & Systems Biology**
2. **Ecology & Evolutionary Biology**
Biology Exchange Courses with NUS

Courses with a NUS designation correspond to the direct credit exchange codes for courses taken at the National University of Singapore as part of the Biology Minor (joint with NUS).

NUS201H0 - Life Science Course A

A 2000-level Life Sciences (LSM) course offered at the National University of Singapore. For course offerings see: www.lifesciences.nus.edu.sg/lsm.html Prerequisites and Exclusions: see the EEB website (http://www.eeb.utoronto.ca/undergrad/programs.htm)

Prerequisite: BIO120H1, BIO130H1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

NUS301H0 - Life Science Course B

A 3000-level Life Sciences (LSM) course offered at the National University of Singapore. For course offerings see: www.lifesciences.nus.edu.sg/lsm.html Prerequisites and Exclusions: see the EEB website (http://www.eeb.utoronto.ca/undergrad/programs.htm)

Prerequisite: BIO120H1, BIO130H1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

NUS302H0 - Life Science Course C

A 3000-level Life Sciences (LSM) course offered at the National University of Singapore. For course offerings see: www.lifesciences.nus.edu.sg/lsm.html Prerequisites and Exclusions: see the EEB website (http://www.eeb.utoronto.ca/undergrad/programs.htm)

Prerequisite: BIO120H1,BIO130H1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

NUS303H0 - Life Science Course D

A 3000-level Life Sciences (LSM) course offered at the National University of Singapore. For course offerings see: www.lifesciences.nus.edu.sg/lsm.html Prerequisites and Exclusions: see the EEB website (http://www.eeb.utoronto.ca/undergrad/programs.htm)

Prerequisite: BIO120H1,BIO130H1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

NUS304H0 - Life Science Course E

A 3000-level Life Sciences (LSM) course offered at the National University of Singapore. For course offerings see: www.lifesciences.nus.edu.sg/lsm.html Prerequisites and Exclusions: see the EEB website (http://www.eeb.utoronto.ca/undergrad/programs.htm)

Prerequisite: BIO120H1,BIO130H1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

NUS401H0 - Life Science Course F

A 4000-level Life Sciences (LSM) course offered at the National University of Singapore. For course offerings see: www.lifesciences.nus.edu.sg/lsm.html Prerequisites and Exclusions: see the EEB website (http://www.eeb.utoronto.ca/undergrad/programs.htm)

Prerequisite: BIO120H1,BIO130H1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

NUS402H0 - Life Science Course G

A 4000-level Life Sciences (LSM) course offered at the National University of Singapore. For course offerings see: www.lifesciences.nus.edu.sg/lsm.html Prerequisites and Exclusions: see the EEB website (http://www.eeb.utoronto.ca/undergrad/programs.htm)

Prerequisite: BIO120H1,BIO130H1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)
Introduction

The Canadian Institute for Theoretical Astrophysics (CITA) is an incorporated national institute hosted by the University of Toronto, conducting research covering all of modern astrophysical theory and analysis during this remarkable age of cosmic discovery. CITA has firmly established itself as one of the top five places in the world for such research; despite its small size CITA has had a large impact on the world-wide astrophysics community. Research at CITA is carried out by about 20 research fellows, 30 graduate students, and a limited number of undergraduate students, all supervised by full-time faculty members.

Where do elements, planets, solar systems, stars, galaxies, the Universe, and life, come from? Questions like these fascinate everyone. Theorists at CITA analyze, interpret, and explain the astronomical observations that illuminate such questions, using laboratory-tested physical laws, or as recently seen, new physical laws that the observations require but which laboratory experiments have not been able, so far, to detect. The observational data are supplied by the recent and ongoing explosion in astronomical hardware, including current observatories like the 10-meter class Keck telescope, ALMA, the Hubble space telescope, x-ray, infrared, and ultra-violet space telescopes, and a host of others.

CITA courses are designed for students interested in doing undergraduate research in theoretical astrophysics, and are appropriate for computer science, engineering science, physical sciences and astronomy program students.

CITA works closely with two related academic units, the Department of Astronomy and Astrophysics (DAA) and the Dunlap Institute for Astronomy and Astrophysics (Dunlap). The DAA is engaged in a broad range of research, with an emphasis on observational astronomy. A main focus of Dunlap is on the design and development of astronomical instrumentation. Undergraduate students will find diverse research opportunities through CITA and these two cognate units.

Undergraduate Enquiries: pen@cita.utoronto.ca (416-978-6477)

Canadian Institute for Theoretical Astrophysics Courses

CTA200H1 - Computational Astrophysics

Hours: 24L/12T

Research in theoretical astrophysics encompasses cosmology, galaxy formation and black holes. This course introduces students to modern computational techniques using large scale parallel numerical simulations, carried out at CITA and SciNet. This is an intensive two-week course taught in May.

Prerequisite: MAT135Y1/MAT137Y1/MAT157Y1; (PHY131H1, PHY132H1)/(PHY151H1, PHY152H1) or their equivalent.

Recommended Preparation: Physical science, mathematics and computation, or engineering

Distribution Requirements: Science

Breadth Requirements: The Physical and Mathematical Universes (5)

CTA299Y1 - Research Opportunity Program

Credit course for supervised participation in faculty research project. Details at https://www.artsci.utoronto.ca/current/academics/research-opportunities/research-opportunities-program. Not eligible for CR/NCR option.

Prerequisite: MAT135Y1/MAT137Y1/MAT157Y1; (PHY131H1, PHY132H1)/(PHY151H1, PHY152H1) or their equivalent

Recommended Preparation: Physical science, mathematics and computation, or engineering

Distribution Requirements: Science

Breadth Requirements: The Physical and Mathematical Universes (5)

CTA395Y1 - Research Topic

Course credit for research under the supervision of a faculty member. Not eligible for CR/NCR option.

Prerequisite: Completed at least 8.5 FCEs and no more than 14.0 FCEs including courses in AST, CTA200H1, or permission

Distribution Requirements: Science
CTA396Y0 - Research Topic Abroad

Course credit for research or field studies abroad under the supervision of a faculty member. Not eligible for CR/NCR option.

Prerequisite: At least 8.5 FCEs and no more than 14.0 FCEs including courses in AST, CTA200H1, or permission of the instructor

Recommended Preparation: Physical science, mathematics and computation, or engineering

Distribution Requirements: Science

Breadth Requirements: The Physical and Mathematical Universes (5)

CTA398Y0 - Research Excursions

Hours: TBA

An instructor-supervised group project in an off-campus setting.

Details at https://www.artsci.utoronto.ca/current/academics/research-opportunities/research-excursions-program. Not eligible for CR/NCR option.

CTA399Y1 - Research Opportunity Program

Credit course for supervised participation in faculty research project.

Details at https://www.artsci.utoronto.ca/current/academics/research-opportunities/research-opportunities-program. Not eligible for CR/NCR option.

CTA495Y1 - Independent Topics in Astrophysics

A research project done in consultation with an individual staff member in the Institute leading to a detailed written report and oral presentation. This course is intended primarily for students in the final year of the Astronomy and Physics specialist program, although it is available to students in Engineering Science, Computer Science, or Mathematics. Students must enroll with the Undergraduate Secretary, Prof. Pen. Not eligible for CR/NCR option.

Prerequisite: 1 FCE from PHY324H1, PHY350H1, PHY354H1, PHY356H1, PHY357H1, PHY358H1, PHY395H1, PHY404H1, PHY408H1, AST325H1/AST326Y1, or similar courses in Engineering Science or Mathematics.

Recommended Preparation: Physical science, mathematics and computation, or engineering

Distribution Requirements: Science

Breadth Requirements: The Physical and Mathematical Universes (5)
Introduction

The study of life, biology, has been transformed in recent decades by powerful new ways of asking fundamental questions about how living organisms work. In particular, molecular and microscopy approaches are revealing the incredible complexity of cells. With additional principles drawn from chemistry, physics and information science, we are beginning to understand this complexity and how it transcends multiple scales to organize molecular networks and cellular systems into fully functional organisms.

The Department of Cell and Systems Biology brings together biologists who study life at the level of molecules to functioning individual organisms. Our research laboratories conduct cutting edge research of fundamental processes using a diverse range of model systems (yeast, plants, nematodes, insects, fish, frogs, mice, mammalian cell culture and others). Our undergraduate programs reflect this diversity and research strength. Since cells are the basic units of life, it is important to understand how molecular mechanisms control cells and how cells organize the development and physiology of whole organisms. These relationships encompass molecular biology, cell biology, developmental biology, genetics and physiology. These relationships are also complex, requiring studies of dynamic molecular and cellular networks: systems biology. One core component of systems biology is the integration of large datasets arising from the genomics revolution. In addition, computer modeling and bioinformatics are integrated with biochemical, molecular and microscopy studies to understand genomes, transcriptomes, proteomes and metabolomes of the cell and organism.

The Department of Cell and Systems Biology offers two core programs: Animal Physiology (Major) and Cell & Molecular Biology (Major and Specialist). Cell & Molecular Biology Major and Specialist students also have the option of pursuing one Disciplinary Focus in either Molecular Networks of the Cell, Plant Genomics and Biotechnology, or Stem Cells and Developmental Biology.

We also contribute to multi-department programs (Bioinformatics & Computational Biology, Biology, and Genome Biology). We administer Bioinformatics & Computational Biology (Specialist) and Genome Biology (Major).

Student Counseling and Enquiries:

Associate Chair (Undergraduate): Professor T. Harris (416-946-0873).

Contact the Undergraduate Office, Room 424 in the Ramsay Wright Laboratories (416-978-3477; undergrad.csb@utoronto.ca) and consult the departmental website, www.csb.utoronto.ca.
Cell and Systems Biology Programs

Bioinformatics and Computational Biology Specialist (Science Program) - ASSPE1868

Description:

The genomic and post-genomic era brings opportunities for new insight into all aspects of biology and medicine, based on the computational analysis of very large datasets in a biological context. The Bioinformatics and Computational Biology Program is an interdepartmental, interdisciplinary Program of Study that balances computer-science and life-science courses towards that goal. As a Specialist Program it is designed to prepare students for graduate studies in the field.

The Program is formally administered by the Department of Cell and Systems Biology and co-sponsored by the Departments of Biochemistry, Computer Science, Ecology and Evolutionary Biology, and Molecular Genetics; all sponsoring Departments have clear trajectories to extend the Program into graduate studies in the respective Department.

Note: this program has deregulated fees, which are incurred after enrolment in the program. Please refer to Arts & Science Registration Instructions for more information.

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

Variable Minimum Grade or Variable Minimum Grade Average
A minimum grade average is needed for entry, and this minimum changes each year depending on available spaces and the number of applicants. The following courses must be completed:

- BIO130H1 and (CSC108H1 or CSC148H1 or CSC110Y1) or
- BIO230H1 and CSC236H1

Completion Requirements:

Specialist program:
(12.5 full courses or their equivalent)

First or second year:
Foundational courses (5 Credits total)
- (MAT135H1, MAT136H1)/MAT137Y1/MAT157Y1
- (CSC108H1, CSC148H1)/CSC110Y1
- (CSC111H1/CSC165H1, CSC236H1/CSC240H1 (1))
- CSC263H1/CSC265H1
- (CHM135H1, CHM136H1)/CHM151Y1
- BIO130H1

Upper years:
Program requirements (7.5 Credits total)
- STA237H1/STA247H1/STA255H1/STA257H1
- CSC207H1
- CSC209H1
- CSC373H1
- BIO230H1/ BIO255H1
- BIO260H1/HMB265H1
- (BCH210H1, BCH311H1/CSB349H1/MGY311Y1)/BCH242Y1
- BCH441H1/CSB472H1
- BCB330Y1
- BCB410H1
- BCB420H1
- BCB430Y1

Course substitutions are possible with written permission of the Program Director. Note that the requirements for a co-sponsoring Department’s major can normally be fulfilled with 0.5 to 3.5 additional credits. All Major programs in the co-sponsoring life science departments require BIO120H1, however, it is not formally a part of this Specialist Program’s requirements.

(1) The “missing” half-credit of the substitution does not have to be replaced. For details, please refer to the Computer Science Program instructions in this Calendar.

Former BCB students benefitted from taking CSB352H1, Bioinformatic Methods. They also found it to be helpful to take BCH441H1 prior to BCB410H1 due to BCB410H1’s R programming requirement.

Cell & Molecular Biology Specialist (Science Program) - ASSPE1003

Description:

Students learn how genes and proteins organize cells for cellular activities, multicellular development, and cellular interactions with the environment. Students also learn how cell and molecular biology research is conducted, and receive training in advanced techniques of the field. Cell and molecular biology research is one of the most demanding fields in science. Students gain an understanding of the field, and leave the program equipped to tackle fundamental scientific questions.

After foundational courses in first and second year, students participate in advanced lecture, seminar and laboratory courses, and are encouraged to apply for research project courses in the laboratories of the Department. Course offerings include gene expression, cell biology, developmental biology, plant development, plant-microbe interactions, plant signaling, neurogenesis, tissue morphogenesis, stem cell biology, genomics and proteomics.

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

Completed courses
The following courses are required:

- BIO120H1
- (CHM135H1 and CHM136H1)/CHM151Y1
- JMB170Y1/(MAT135H1 and MAT136H1)/MAT137Y1/MAT157Y1

Variable Minimum Grade
A minimum grade in some courses is needed for entry, and this minimum changes each year depending on available spaces and the number of applicants. The following courses must be completed:
• BIO130H1 or BIO230H1/ BIO255H1

To ensure that students admitted to the program will be prepared, applicants with a final grade lower than 70% in BIO130H1 or BIO230H1/ BIO255H1 will not be considered for admission. Please note that obtaining this minimum final grade or minimum grade average does not guarantee admission to the program.

Completion Requirements:

(12.5 full courses or their equivalent, including at least one 400-series course)

First Year:
BI020H1, BI0130H1; (CHM135H1, CHM136H1)( CHM138H1, CHM139H1)/(CHM151Y1; JMB170Y1)/(MAT135H1, MAT136H1)/(MAT137Y1)/(MAT138Y1).

Higher Years:
1. (PHY131H1, PHY132H1)/(PHY151H1, PHY152H1)
2. BIO220H1, BIO230H1/ BIO255H1, BIO270H1, BIO271H1, BIO260H1, HMB265H1, BCH210H1
3. CSB330H1, CSB350H1, CSB352H1, CSB349H1
4. 1.0 FCE from: CHJ322H1, CHJ327H1, CSB328H1, CSB329H1, CSB331H1, CSB340H1, CSB353H1
5. 1.0 FCE from: BCH422H1, BCH426H1, BCH444H1, BCH445H1, CSB427H1, CSB428H1, CSB429H1, CSB430H1, CSB431H1, CSB435H1, CSB450H1, CSB452H1, CSB454H1, CSB457H1, CSB459H1, CSB460H1, CSB472H1, CSB473H1, CSB474H1, CSB475H1, CSB483H1
6. 2.5 FCEs from: BCH422H1, BCH426H1, BCH444H1, BCH445H1, CHJ322H1, CHJ327H1, CSB299Y1, CSB327H1, CSB328H1, CSB330H1, CSB331H1, CSB340H1, CSB350H1, CSB351Y1, CSB352H1, CSB353H1, CSB397Y1, CSB399Y1, CSB427H1, CSB428H1, CSB429H1, CSB430H1, CSB431H1, CSB435H1, CSB447H1, CSB450H1, CSB452H1, CSB454H1, CSB455H1, CSB457H1, CSB458H1, CSB459H1, CSB460H1, CSB471H1, CSB472H1, CSB473H1, CSB474H1, CSB475H1, CSB483H1, CSB490H1, CSB491H1, CSB492H1, CSB497H1, CSB498Y1, CSB499Y1, HMB496Y1/HMB499Y1, MGY480Y1

NOTE: No more than 0.5 FCE in BCH can be used towards requirements 5. and 6.

The Cell & Molecular Biology Specialist Program has the additional option of a Disciplinary Focus.

Cell & Molecular Biology Specialist: Focus in Molecular Networks of the Cell - ASSPE1003A

Description:

Starting in 2nd year, this focus organizes a restricted number of highly motivated Cell and Molecular Biology Specialist students with an interest in Molecular Networks of the Cell. Focus students are required to complete a subset of related program courses and to participate in a learning community for the focus.

Enrolment Requirements:

Once you have been approved for and have enrolled in the Cell and Molecular Biology Specialist program, you have the option to apply for entry into a focus. The focuses have a limited enrolment and can only accommodate a restricted number of students with a particular interest in the topic of the focus. Students can only apply for one focus. Admission will be determined with a minimum grade of 80% in BIO130H1. If the student does not achieve 80% in BIO130H1, admission can be determined with a minimum grade of 80% in BIO230H1, BIO255H1 or CSB349H1. On the application form, students must include a 300-word statement of interest regarding the topic of the focus. Statement submission instructions are in the Undergraduate program section of the CSB website, http://csb.utoronto.ca. Achieving these requirements does not necessarily guarantee admission to the focus in any given year.

Students in a focus complete the requirements of First Year, the requirements 1.-3. of Higher Years, as well as requirements 4.-7. specific to each focus.

Each year students are enrolled in a focus, they must also be an active participant in the faculty-led learning community for their focus (requirement 7.). The learning community appears as a non-credit course recognized on the co-curricular record. Students who fail to contribute to the faculty-led learning community will be removed from the focus.

Completion Requirements:

This Focus is part of the Cell and Molecular Biology Specialist and begins with the requirements of First Year and of lines 1-3 of Higher Years of the Cell and Molecular Biology Specialist Program.

1. 1.0 FCE from: CHJ322H1, CSB327H1, CSB331H1, CSB353H1
2. 1.0 FCE from: CHJ322H1, CSB327H1, CSB328H1, CSB329H1, CSB331H1, CSB340H1, CSB350H1, CSB351Y1, CSB352H1, CSB353H1, CSB397Y1, CSB399Y1, CSB427H1, CSB428H1, CSB429H1, CSB430H1, CSB431H1, CSB435H1, CSB447H1, CSB450H1, CSB452H1, CSB454H1, CSB455H1, CSB457H1, CSB458H1, CSB459H1, CSB460H1, CSB471H1, CSB472H1, CSB473H1, CSB474H1, CSB475H1, CSB483H1
3. of Higher Years, as well as requirements 4.

Cell & Molecular Biology Specialist: Focus in Plant Genomics and Biotechnology - ASSPE1003B

Description:

Starting in 2nd year, this focus organizes a restricted number of highly motivated Cell and Molecular Biology Specialist students with an interest in Plant Genomics and Biotechnology. Focus students are required to complete a subset of related program courses and to participate in a learning community for the focus.

Enrolment Requirements:

Once you have been approved for and have enrolled in the Cell and Molecular Biology Specialist program, you have the option to apply
for entry into a focus. The focus has a limited enrollment and can only accommodate a restricted number of students with a particular interest in the topic of the focus. **Students can only apply for one focus.** Admission will be determined with a minimum grade of 80% in BIO130H1. If the student does not achieve 80% in BIO130H1, admission can be determined with a minimum grade of 80% in BIO230H1, BIO255H1 or CSB349H1. On the application form, students must include a 300-word statement of interest regarding the topic of the focus. Statement submission instructions are in the Undergraduate program section of the CSB website, http://csb.utoronto.ca. A 300-word statement of interest regarding the topic of the focus. Statement submission instructions are in the Undergraduate program section of the CSB website, http://csb.utoronto.ca. Achieving these requirements does not necessarily guarantee admission to the focus in any given year.

Students in a focus complete the requirements of First Year, the requirements 1.-3 of Higher Years, as well as requirements 4.-7 specific to each focus.

The learning community appears as a non-credit course recognized on the co-curricular record. Students who fail to contribute to the faculty-led learning community will be removed from the focus.

**Completion Requirements:**

This Focus is part of the Cell and Molecular Biology Specialist and begins with the requirements of First Year and of lines 1-3 of Higher Years of the Cell and Molecular Biology Specialist Program.

4. 1.0 FCE from: CSB340H1, CSB350H1, CSB352H1, CSB353H1
5. 1.0 FCE from: CSB435H1, CSB450H1, CSB452H1, CSB453H1, CSB458H1
6. 2.5 FCEs from: BCH422H1, BCH426H1, BCH440H1, BCH441H1, BCH444H1, BCH445H1, CSB299Y1, CSB320H1, CSB329H1, CSB330H1, CSB331H1, CSB340H1, CSB350H1, CSB351Y1, CSB352H1, CSB353H1, CSB397H1, CSB399Y1, CSB428H1, CSB431H1, CSB435H1, CSB445H1, CSB450H1, CSB459H1, CSB472H1, CSB475H1, CSB475H1, CSB476H1, CSB478H1, CSB483H1, CSB491H1, CSB492H1, CSB497H1, CSB498H1, CSB499Y1, CSB499Y1, No more than 0.5 FCE in BCH can be used towards this requirement. 7. Plant Biotech Learning Community (each year of focus enrolment)

**Animal Physiology Major (Science Program) - ASMAJ1538**

**Description:**

Students learn to compare and contrast the physiological systems of different animal species, or of a single species under different environmental conditions. This experimental science strives to understand how physiological systems allow animals to adapt to their individual and ever-changing environments. Through a systems-level approach, from molecules to organisms, students gain an understanding of how emergent properties arise when physiological components operate as a whole.

After foundational courses in first and second year, students participate in advanced lecture, seminar and laboratory courses, and are encouraged to apply for research project courses in the laboratories of the Department. Course offerings include neuropsychology, respiratory physiology, endocrinology, sleep physiology and comparative cellular physiology.

**Enrolment Requirements:**

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.
Completion Requirements:

(8 full courses or their equivalent)

First Year:
1. BIO120H1, BIO130H1: (CHM135H1, CHM136H1)/(CHM138H1, CHM139H1)/CHM151Y1
2. 1.0 credit from JMB170Y1/MAT135H1/MAT136H1/MAT137Y1/MAT157Y1/PHY131H1/PHY132H1/PHY151H1/PHY152H1

Higher Years:
1. BIO220H1, BIO230H1/BIO255H1
2. BIO270H1, BIO271H1
3. CSB325H1
4. 0.5 FCE from: CJH332H1, CSB343H1, CSB346H1
5. 1.5 FCEs (at least 0.5 FCE must be at the 300+level) from: BCH210H1, BIO260H1/HMB265H1; CJH332H1; CSB299Y1, CSB327H1, CSB328H1, CSB329H1, CSB330H1, CSB331H1, CSB343H1, CSB346H1, CSB348H1, CSB352H1, CSB397Y0; CSB399Y1; EEB263H1; PSY397H1; STA320H1
6. 0.5 FCE at the 400-level from: CSB426H1, CSB427H1, CSB430H1, CSB431H1, CSB432H1, CSB445H1, CSB447H1, CSB483H1, CSB492H1, CSB497H1, CSB499Y1, CSB499Y1; HMB430H1, HMB472H1, HMB496Y1, HMB499Y1; PSL432H1, PSL452H1

Cell & Molecular Biology Major (Science Program) - ASMAJ1003

Description:

Students learn how genes and proteins organize cells for cellular activities, multicellular development, and cellular interactions with the environment. Students also learn how cell and molecular biology research is conducted, and receive training in advanced techniques of the field. Cell and molecular biology research is one of the most demanding fields in science. Students gain an understanding of the field, and leave the program equipped to tackle fundamental scientific questions.

After foundational courses in first and second year, students participate in advanced lecture, seminar and laboratory courses, and are encouraged to apply for research project courses in the laboratories of the Department. Course offerings include gene expression, cell biology, developmental biology, plant development, plant-microbe interactions, plant signaling, neurogenesis, tissue morphogenesis, stem cell biology, genomics and proteomics.

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in program.

Completion Requirements:

(8 full courses or their equivalent)

First Year:
1. BIO120H1, BIO130H1: (CHM135H1, CHM136H1)/(CHM138H1, CHM139H1)/CHM151Y1;
2. 1.0 credit from JMB170Y1/MAT135H1/MAT136H1/MAT137Y1/MAT157Y1/PHY131H1/PHY132H1/PHY151H1/PHY152H1

Higher Years:
1. BIO220H1, BIO230H1/BIO255H1
2. BIO270H1, BIO271H1
3. CSB325H1
4. 0.5 FCE from: CSB327H1, CSB328H1, CSB329H1, CSB330H1, CSB331H1, CSB343H1, CSB346H1, CSB348H1, CSB352H1, CSB397Y0; CSB399Y1; EEB263H1; PSY397H1; STA320H1
5. 1.5 FCEs (at least 0.5 FCE at the 400-level) from: BCH422H1, BCH426H1, BCH440H1, BCH441H1, BCH444H1, BCH445H1, CJH332H1; CSB299Y1, CSB327H1, CSB328H1, CSB329H1, CSB330H1, CSB331H1, CSB343H1, CSB346H1, CSB348H1, CSB349H1, CSB352H1, CSB353H1, CSB354H1, CSB356H1, CSB357H1, CSB358H1; CSB397Y0; CSB399Y1, CSB427H1, CSB428H1, CSB429H1, CSB430H1, CSB431H1, CSB432H1, CSB445H1, CSB447H1, CSB450H1, CSB452H1, CSB454H1, CSB457H1, CSB458H1, CSB459H1, CSB460H1, CSB471H1, CSB472H1, CSB473H1, CSB474H1, CSB475H1, CSB483H1, CSB490H1, CSB491H1, CSB492H1, CSB497H1, CSB498Y1, CSB499Y1, HMB496Y1, HMB499Y1, MGY480Y1. No more than 0.5 FCE in BCH can be used towards this requirement.

The Cell & Molecular Biology Major Program has the additional option of a Disciplinary Focus.

Cell & Molecular Biology Major: Focus in Molecular Networks of the Cell - ASMAJ1003A

Description:

Starting in 2nd year, this focus organizes a restricted number of highly motivated Cell and Molecular Biology Major students with an interest in Molecular Networks of the Cell. Focus students are required to complete a subset of related program courses and to participate in a learning community for the focus.

Enrolment Requirements:

Once you have enrolled in the Cell and Molecular Biology Major program, you have the option to apply for entry into a focus. The focuses have a limited enrolment and can only accommodate a restricted number of students with a particular interest in the topic of the focus. **Students can only apply for one focus.** Admission will be determined with a minimum grade of 80% in BIO130H1. If the student does not achieve 80% in BIO130H1, admission can be determined with a minimum grade of 80% in BIO230H1, BIO255H1 or CSB349H1. On the application form, students must include a 300-word statement of interest regarding the topic of the focus. Statement submission instructions are in the Undergraduate program section of the CSB website, http://csb.utoronto.ca. Achieving these requirements does not necessarily guarantee admission to the focus in any given year.

Students in a focus complete the requirements of First Year, the requirements 1.-3. of Higher Years, as well as requirements 4.-7. specific to each focus.

Each year students are enrolled in a focus, they must also be an active participant in the faculty-led learning community for their focus (requirement 7.). The learning community appears as a non-credit
Students in a focus complete the requirements of First Year, the requirements 1-3 of Higher Years, as well as requirements 4-7 specific to each focus.

Each year students are enrolled in a focus, they must also be an active participant in the faculty-led learning community for their focus (requirement 7). The learning community appears as a non-credit course recognized on the co-curricular record. Students who fail to contribute to the faculty-led learning community will be removed from the focus.

Completion Requirements:

This Focus is part of the Cell and Molecular Biology Major and begins with the requirements of First Year and of lines 1-3 of Higher Years of the Cell and Molecular Biology Major Program.

4. 1.0 FCE from: CSB340H1, CSB350H1, CSB352H1, CSB353H1
5. 0.5 FCE from: CSB435H1, CSB450H1, CSB452H1, CSB454H1, CSB459H1, CSB460H1, CSB471H1, CSB472H1, CSB473H1, CSB474H1, CSB475H1
6. 1.0 FCE from: CSB299Y1, CSB300H1, CSB301H1, CSB305H1, CSB351Y1, CSB352H1, CSB353H1, CSB357Y0, CSB399Y1, CSB427H1, CSB428H1, CSB429H1, CSB435H1, CSB450H1, CSB452H1, CSB454H1, CSB458H1, CSB459H1, CSB460H1, CSB471H1, CSB472H1, CSB473H1, CSB474H1, CSB475H1, CSB490H1, CSB491H1, CSB497H1, CSB498Y1, CSB499Y1.
7. Plant Biotech Learning Community (each year of focus enrolment)

Cell & Molecular Biology Major: Focus in Plant Genomics and Biotechnology - ASMAJ1003B

Description:

Starting in 2nd year, this focus organizes a restricted number of highly motivated Cell and Molecular Biology Major students with an interest in Plant Genomics and Biotechnology. Focus students are required to complete a subset of related program courses and to participate in a learning community for the focus.

Enrolment Requirements:

Once you have enrolled in the Cell and Molecular Biology Major program, you have the option to apply for entry into a focus. The focuses have a limited enrolment and can only accommodate a restricted number of students with a particular interest in the topic of the focus. Students can only apply for one focus. Admission will be determined with a minimum grade of 80% in BIO130H1. If the student does not achieve 80% in BIO130H1, admission can be determined with a minimum grade of 80% in BIO230H1, BIO255H1 or CSB349H1. On the application form, students must include a 300-word statement of interest regarding the topic of the focus. Statement submission instructions are in the Undergraduate program section of the CSB website, http://csb.utoronto.ca. Achieving these requirements does not necessarily guarantee admission to the focus in any given year.

Students in a focus complete the requirements of First Year, the requirements 1-3 of Higher Years, as well as requirements 4-7 specific to each focus.

Each year students are enrolled in a focus, they must also be an active participant in the faculty-led learning community for their focus (requirement 7). The learning community appears as a non-credit course recognized on the co-curricular record. Students who fail to contribute to the faculty-led learning community will be removed from the focus.

Completion Requirements:

This Focus is part of the Cell and Molecular Biology Major and begins with the requirements of First Year and of lines 1-3 of Higher Years of the Cell and Molecular Biology Major Program.

4. 1.0 FCE from: CSB340H1, CSB350H1, CSB352H1, CSB353H1
5. 0.5 FCE from: CSB435H1, CSB450H1, CSB452H1, CSB454H1, CSB459H1, CSB460H1, CSB471H1, CSB472H1, CSB473H1, CSB474H1, CSB475H1
6. 1.0 FCE from: CSB299Y1, CSB300H1, CSB301H1, CSB305H1, CSB351Y1, CSB352H1, CSB353H1, CSB357Y0, CSB399Y1, CSB427H1, CSB428H1, CSB429H1, CSB435H1, CSB450H1, CSB452H1, CSB454H1, CSB458H1, CSB459H1, CSB460H1, CSB471H1, CSB472H1, CSB473H1, CSB474H1, CSB475H1, CSB490H1, CSB491H1, CSB497H1, CSB498Y1, CSB499Y1.
7. Plant Biotech Learning Community (each year of focus enrolment)
4. 1.0 FCE from: CSB328H1, CSB329H1, CSB340H1
5. 0.5 FCE from: CSB427H1, CSB429H1, CSB430H1, CSB431H1, CSB483H1
6. 1.0 FCE from: CSB299Y1, CSB328H1, CSB329H1, CSB340H1, CSB397Y0, CSB399Y1, CSB427H1, CSB429H1, CSB430H1, CSB431H1, CSB483H1, CSB497H1, CSB498Y1, CSB499Y1.
7. Multicellularity Learning Community (each year of focus enrolment)

Genome Biology Major (Science Program) - ASMAJ2655

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

This program is a joint program of the departments of Cell & Systems Biology, Ecology & Evolutionary Biology, and Molecular Genetics. It is administered through the Department of Cell & Systems Biology.

(8 full courses or their equivalent)

First year: BIO120H1, BIO130H1; (CHM135H1, CHM136H1)/CHM138H1, CHM139H1/CHM151Y1; (MAT135H1, MAT136H1)/MAT137Y1/ MAT157Y1

Higher years:
1. BIO220H1, BIO230H1/ BIO255H1; BIO260H1/ HMB265H1; EEB225H1/ STA220H1
2. Genomics fundamentals: BCH311H1/ CSB340H1/ MGY311Y1, CSB352H1; EEB332H1
3. 0.5 FCE laboratory course from: CSB472H1, CSB474H1; EEB460H1
4. 1.0 FCE genomics elective from: CSB330H1, CSB350H1, CSB397Y0, CSB427H1, CSB430H1, CSB450H1, CSB457H1, CSB458H1, CSB471H1, CSB473H1, CSB490H1, CSB491H1, CSB497H1/ CSB498Y1/ CSB499Y1; EEB362H1, EEB553H1, EEB459H1, EEB462H1, EEB367Y1/ EEB497H1/ EEB498Y1/ EEB499Y1/ EEB499Y1 or MGY480Y1

NOTE: Students taking CSB397Y0, CSB490H1, CSB491H1, CSB497H1/ CSB498Y1/ CSB499Y1, EEB397Y1/ EEB497H1/ EEB498Y1/ EEB499Y1 or MGY480Y1 are encouraged to conduct a genomics-related research project.

Biology: see Biology
Genome Biology: see Biology

Lab Materials Fee

Some courses in this department have a mandatory Lab Materials Fee to cover non-reusable materials. The fee for each such course is given below in the course description, and will be included on the student's invoice on ACORN.

Cell and Systems Biology Courses

**BIO130H1 - Molecular and Cell Biology**

*Hours: 36L/15P*

One of the goals of modern biology is to understand how the basic building blocks of life give rise to biological form and function. This course provides students with a common lexicon to understand the key principles and concepts in molecular and cell biology, with a focus on how the building blocks of life lead to functioning cells. (Lab Materials Fee: $10). Lab coat and safety glasses are required for use in laboratories; students are responsible for purchasing these items (approximate cost is $25).

*Prerequisite: SBI4U and SCH4U (Grade 12 University Preparation Biology and Chemistry) or permission of department. Please contact bio130@utoronto.ca for more information.*

*Distribution Requirements: Science*

*Breadth Requirements: Living Things and Their Environment (4)*

**CSB196H1 - Genes, Genomes and Us**

*Hours: 24L*

With the completion of the human genome sequence, we now have access to more information than ever before about our genetic make-up. This course addresses topics such as what are genes, how are they identified and how does knowledge about genes impact society. Students will learn basic concepts in genetics. Using this conceptual foundation, the significance of genomic research for understanding human biology, and the social consequences that may result from it, will be discussed. Evaluation is based on class discussions, homework, oral presentation and written assignments. Restricted to first-year students. Not eligible for CR/NCR option.

*Distribution Requirements: Science*

*Breadth Requirements: Living Things and Their Environment (4)*
CSB197H1 - Human Viruses

Hours: 24L

This course allows students to broaden their knowledge about the most important human viruses and prions. In essence, what viruses are, what they do, what are the diseases caused by viruses and how they are transmitted, etc., and what can be done about them (vaccines, antiviral treatments, etc.). Viruses cause many diseases ranging from a benign rash to severe hemorrhages and death. Each student will select a specific topic in Virology and write an essay and present a seminar for the rest of the class. Major "hot" problems in Virology from pandemics to controversial vaccines will also be discussed. Two tests covering all materials presented by all the students' seminars will be conducted. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

CSB198H1 - Cell and Molecular Biology in the News

Hours: 24L

The pace of knowledge creation in the fields of cell and molecular biology has greatly increased in the 21st century and with it, the need for greater scientific literacy. In this course, we will teach students to find reliable sources of information in order to understand the basic concepts underlying the research reported in these media releases, with the ultimate aim of critically evaluating these reports. Through exploration of various media articles in cell and molecular biology (with an emphasis on humans), students will be able to apply what they have learned to current events, as well as relevant issues in their lives and society as a whole. Students will be assessed through short-written assignments, class discussions, an oral presentation, and a final project where they will get the opportunity to explore the research behind a media article of their choice. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

CSB199H1 - Biotechnology and Society

Hours: 24L

From the manipulation of genes of plants for improved food production through to human tissue engineering and stem cell research, biotechnology is increasingly playing a major role in our world. Society, however, is often challenged by the rapid advances in our knowledge in these areas, and how to best apply these technologies in a manner that is socially responsible and economically viable. In this seminar course, students will research and describe various applications of biotechnology using information obtained from reputable sources, and lead discussions on the benefits and concerns that arise from this research. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

CSB201H1 - Molecular Biology, Biotechnology and You

Hours: 24L/12T

An online course intended to provide non-science students with an understanding of basic concepts in molecular biology and genetics, with particular emphasis on humans. Students will work online in groups on problem sets. The course will end with an introduction to biotechnology, including an opportunity for students to use their new knowledge to explore a real, multi-dimensional problem (e.g., cancer). Lectures will be delivered via the web and mandatory tutorials will require live webinar participation. The final exam will require attendance on the St. George campus. This course does not count towards CSB programs.

Exclusion: BIO130H1, BIO230H1, BIO255H1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

CSB202H1 - Further Exploration in Biotechnology

Hours: 24L/12T

Provides non-science students with an additional opportunity to explore biotechnology and its applications in agriculture, the environment, and human health including: genetically modified organisms, drug discovery and aging. Most lectures are viewed online before class and students work in groups during class on problem sets and case studies designed to stimulate further learning, enhance evidence-based reasoning, and promote reflection on the role of biotechnology in society. This course does not count towards CSB programs. CSB201H1 is not a prerequisite for this course.

Exclusion: BIO230H1, BIO255H1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)
**BIO230H1 - From Genes to Organisms**

*Hours: 36L/15P*

The genome is the "book of life," providing instructions to construct an organism. This course introduces genome biology and explores how the building blocks of life are networked into functioning organisms. We will investigate how cells perceive internal and external cues, how gene expression is shaped by this perception, and how these events give rise to tissues, organs, and whole organisms. (Lab Materials Fee: $15). Lab coat and safety glasses are required for use in laboratories; students are responsible for purchasing these items (approximate cost is $25).

**Prerequisite:** BIO130H1, (CHM135H1, CHM136H1)(CHM138H1, CHM139H1)/CHM151Y1

**Exclusion:** BIO255H1

**Distribution Requirements:** Science

**Breadth Requirements:** Living Things and Their Environment (4)

---

**BIO270H1 - Animal Physiology I**

*Hours: 24L/9P*

Animal physiology is a biological sub-discipline that aims to understand, in physical and chemical terms, how animals work. This course uses examples from throughout the animal kingdom, in a comparative approach, to introduce and study homeostasis and the endocrine system. Accompanying laboratories reinforce concepts introduced in lectures and provide opportunities for students to experience firsthand the role that experimentation, data collection, interpretation of data, and communication of data plays in the nature of the scientific process. (Lab Materials Fee: $10). Lab coat and safety glasses are required for use in laboratories; students are responsible for purchasing these items (approximate cost is $25).

**Prerequisite:** BIO230H1/BIO255H1

**Distribution Requirements:** Science

**Breadth Requirements:** Living Things and Their Environment (4)

---

**BIO255H1 - From Genes to Organisms with Advanced Laboratory**

*Hours: 36L/33P*

The genome is the "book of life," providing instructions to construct an organism. This course introduces genome biology and explores how the building blocks of life are networked into functioning organisms. We will investigate how cells perceive internal and external cues, how gene expression is shaped by this perception, and how these events give rise to tissues, organs, and whole organisms. The Enhanced Laboratory provides the opportunity for greater laboratory skill development in modern investigative techniques and is intended for students interested in conducting their own laboratory research. (Lab Materials Fee: $50). Lab coat and safety glasses are required for use in laboratories; students are responsible for purchasing these items (approximate cost is $25).

**Prerequisite:** BIO130H1, (CHM135H1, CHM136H1)(CHM138H1, CHM139H1)/CHM151Y1, cGPA 3.0

**Exclusion:** BIO230H1

**Recommended Preparation:** BCH210H1 (taken concurrently or previously)

**Distribution Requirements:** Science

**Breadth Requirements:** Living Things and Their Environment (4)

---

**BIO271H1 - Animal Physiology II**

*Hours: 24L/9P*

Animal physiology is a biological sub-discipline that aims to understand, in physical and chemical terms, how animals work. This course uses examples from throughout the animal kingdom in a comparative approach to introduce and study the nervous and cardiorespiratory systems. Accompanying laboratories reinforce concepts introduced in lectures and provide opportunities for students to experience firsthand the role that experimentation, data collection, interpretation of data, and communication of data plays in the nature of the scientific process. (Lab Materials Fee: $10). Lab coat and safety glasses are required for use in laboratories; students are responsible for purchasing these items (approximate cost is $25).

**Prerequisite:** BIO270H1

**Distribution Requirements:** Science

**Breadth Requirements:** Living Things and Their Environment (4)

---

**CSB299Y1 - Research Opportunity Program**

Credit course for supervised participation in faculty research project. Details at https://www.artsci.utoronto.ca/current/academics/research-opportunities/research-opportunities-program. Not eligible for CR/NCR option.

**Distribution Requirements:** Science
CSB325H1 - Endocrine Physiology

Hours: 24L/9T

The regulation of physiological processes by hormones and other signalling molecules in non-human chordates. An integrated genes-to-environment approach is used to examine aspects of hormonal evolution, physiological information flow, behaviour and neuroendocrinology, and xenobiotic endocrine disruptors. Students will have the opportunity to research areas of their own interest via group interaction in a series of tutorial sessions.

Prerequisite: BIO270H1, BIO271H1
Recommended Preparation: EEB266H1, EEB267H1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

CSB327H1 - Extracellular Matrix Dynamics and Associated Pathologies

Hours: 36L

Examines the expression, structure and function of the four major classes of ECM macromolecules: collagen, proteoglycans, non-collagenous structural proteins and glycoproteins. In addition to forming elaborate networks that give tissues and organs their unique architectural design and biomechanical properties, ECM molecules act as potent regulators of all cellular activities. Emphasis is placed on the morphoregulatory contribution(s) of ECM molecules to normal and pathological development.

Prerequisite: BIO230H1/BIO255H1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

CSB328H1 - Developmental Biology

Hours: 24L/24P

Basic concepts in developmental biology. Early development of invertebrates and vertebrates will be discussed with emphasis on experimental and molecular analysis of developmental mechanisms. Tutorials focus on the experimental analysis of embryonic development and regeneration, and discuss primary literature of selected topics in developmental biology. (Lab Materials Fee: $25).

Prerequisite: BIO230H1/BIO255H1, BIO260H1/HMB265H1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

CSB329H1 - Stem Cell Biology: Developmental Models and Cell-based Therapeutics

Hours: 24L/12T

Stem cells provide the basis for cellular diversity in multicellular organisms and have enormous therapeutic potential in regenerative medicine. The course will introduce students to the differences and similarities between stem cells from different organisms, their roles throughout development and therapeutic potential.

Prerequisite: BIO230H1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

BCB330Y1 - Special Project in Bioinformatics and Computational Biology

An opportunity for specialized individual research in bioinformatics and computational biology by arrangement with the course coordinator and a supervisor. Significant background in both life science and computer science courses is required. Not eligible for CR/NCR option.

Prerequisite: Permission of the course coordinator.
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

CSB330H1 - Techniques in Molecular and Cell Biology

Hours: 8L/52P

Laboratory course on molecular and cell biology research techniques used to study genes and proteins. Topics include plasmid cloning, PCR, bioinformatics, gene expression analyses, protein-protein interactions, and protein subcellular localization. (Lab Materials Fee: $50).

Prerequisite: BIO230H1/BIO255H1, BIO260H1/HMB265H1
Recommended Preparation: BCH311H1/CSB349H1/MGY311Y1 taken concurrently
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)
CSB331H1 - Advanced Cell Biology

Hours: 36L

The development of multicellular organisms is dependent on complex cell-cell and cell-matrix dynamics. The course examines the molecules and mechanisms involved and how they act in concert to regulate distinct developmental and physiological events. Emphasis is placed on the experimental approaches and technology used to study the molecular interactions and dynamics that alter structure-function relationships in cells and organisms.

Prerequisite: BIO230H1/BIO255H1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

CSB343H1 - Animal Energetics

Hours: 24L

Animal structure and function, at all levels from molecule to whole animal, are dependent on energy. This course describes how the supply, consumption, transformation, exchange and storage of energy can facilitate, constrain and limit animal function. Emphasis is placed on systems level physiological function and whole animal performance.

Prerequisite: (BIO270H1, BIO271H1)/(PSL300H1, PSL301H1)
Recommended Preparation: BCH210H1/BCH242Y1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

CJH332H1 - Cellular and Molecular Neurobiology of the Synapse

Previous Course Number: CSB332H1
Hours: 36L

Examination of all aspects of the synapse in both the peripheral and central nervous systems of invertebrates and vertebrates. Topics include: neuroplasticity, synapse formation, synaptic transmission, synaptic modulation, and the molecular biological basis of neurodegenerative disorders.

Prerequisite: BIO271H1/PSL300H1
Exclusion: CSB332H1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

CSB346H1 - Neurobiology of Respiration

Hours: 24L/12T

This course examines how the central and peripheral nervous system controls breathing in mammals. Topics include how the brain generates rhythmic breathing movements, how sleep impacts breathing control and how abnormal breathing contributes to disorders such as sleep apnea.

Prerequisite: (BIO270H1, BIO271H1)/(PSL300H1, PSL301H1)
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

CSB348H1 - Laboratory in Comparative Animal Physiology

Hours: 48P

Laboratory exercises will include traditional and guided inquiry approaches to investigate and gain an understanding of the regulation of physiological systems in vertebrates and invertebrates. Students will experience the nature of physiological investigation while being exposed to a range of the current experimental approaches animal physiologists use to design, test and evaluate hypotheses, and communicate their findings. This course will emphasize the fundamental characteristics humans share with all animal life and the physiological adaptations that have permitted species to exploit alternative environmental niches. This course requires participation and includes group work, written assignments, and oral presentations. (Lab Materials Fee: $50). Lab coat and safety glasses are required for use in laboratories; students are responsible for purchasing these items (approximate cost is $25).

Prerequisite: BIO230H1
Exclusion: PSL372H1
Recommended Preparation: BIO270H1, BIO271H1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)
CSB349H1 - Eukaryotic Gene Expression

Hours: 30L/18T

Genome structure and the regulation of gene expression in eukaryotic cells. Topics include gene duplication, repetitive DNA, transcription, gene silencing and regulation, expression profiling, and nuclear reprogramming. Tutorials emphasize problem based learning exercises that relate to recent advances in the broad field of eukaryotic gene expression.

Prerequisite: BIO230H1/BIO255H1, BIO260H1/HMB265H1
Exclusion: MGY311Y1, MGY420H1
Recommended Preparation: BCH210H1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

CSB350H1 - Laboratory in Molecular Plant Biology

Hours: 24L/36P

Laboratory methods used in plant molecular biology research. Topics include vector construction, plant transformations, PCR, DNA blots, high-throughput screens, genetic mapping, and bioinformatic analyses. (Lab Materials Fee: $50). Lab coat and safety glasses are required for use in laboratories; students are responsible for purchasing these items (approximate cost is $25).

Prerequisite: BIO230H1/BIO255H1
Recommended Preparation: BIO251H1 or higher level plant biology course; BCH311H1/CSB349H1/MGY311Y1 concurrently
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

CSB351Y1 - Introductory Virology

Hours: 48L/48T

An introduction to basic and medical virology. What you should know about viruses and the diseases they cause. Tutorials are optional.

Prerequisite: BIO230H1/BIO255H1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

CSB352H1 - Bioinformatic Methods

Hours: 6L/18P

Use of available programs for analyzing biological data. This is an introductory course with a strong emphasis on hands-on methods. Some theory is introduced, but the main focus is on using extant bioinformatics tools to analyze data and generate biological hypotheses.

Prerequisite: BIO230H1/BIO255H1, BIO260H1/HMB265H1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

CSB353H1 - Plant-Microorganism Interactions and Plant Immunity

Hours: 24L

Plants have co-evolved with microbes ever since their first appearance on land, resulting in sophisticated strategies of pathogenicity, symbiosis, commensalisms and mutualism. This course presents an overview of these strategies with examples of bacteria, fungi, oomycetes and viruses that have evolved intimate associations with plants, and discusses plant immune systems.

Prerequisite: BIO230H1/BIO255H1
Recommended Preparation: BIO251H1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

CSB397Y0 - Research Abroad in Cell & Systems Biology

An independent research project conducted in molecular biology, cell biology, developmental biology, neurobiology, physiology or systems biology. Whole organism, cell culture, in vitro or in silico studies are acceptable. The laboratory research is conducted by the student and supervised by a faculty member at an approved partner university. An information session is held each fall, and an application and interview process is required. The research is typically conducted from May to August. Not eligible for CR/NCR option.

Prerequisite: Minimum grade of 73% in BIO230H1/BIO255H1/ BIO271H1 and permission of the CSB397Y0 coordinator
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)
CSB398Y0 - Research Excursions

Distribution Requirements: Science

CSB399Y1 - Research Opportunity Program
Credit course for supervised participation in faculty research project. Details at https://www.artsci.utoronto.ca/current/academics/research-opportunities/research-opportunities-program. Not eligible for CR/NCR option.

CSB410H1 - Applied Bioinformatics
Hours: 24L
Practical introduction to concepts, standards and tools for the implementation of strategies in bioinformatics and computational biology. Student led discussions plus a strong component of hands-on exercises.

Prerequisite: BCH311H1/MGY311Y1; (CSC324H1/CSC373H1/CSC375H1) or permission of the course coordinator
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

CSB420H1 - Computational Systems Biology
Hours: 24L
Current approaches to using the computer for analyzing and modeling biology as integrated molecular systems. Lectures plus hands-on practical exercises. The course extends and complements an introductory Bioinformatics course, such as BCH441H1.

Prerequisite: BCH441H1/CSB472H1 or permission of the course coordinator
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

CSB426H1 - Physiology of Stress and Reproduction
Hours: 12L/24S
Students will gain an integrated understanding of how organismal and cellular stress affects the process of reproduction. The focus will be primarily on chordates and will examine genetic, cellular, organismal, behavioural, and social levels of interaction.

Prerequisite: Minimum grade of 73% in CSB325H1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

CSB427H1 - Drosophila as a Model in Cancer Research
Hours: 12L/12T/12S
Use of the genetic model organism Drosophila in biomedical research with specific emphasis on cancer research. Students will read, discuss and present classical papers and current literature in the field to enhance their ability to critically evaluate the primary scientific literature.

Prerequisite: BIO260H1/HMB265H1, two of CSB328H1/CSB331H1/CSB349H1/MGY350H1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

CSB428H1 - Cytoskeletal Networks of the Cell
Hours: 12L/12T/12S
The cytoskeleton is a highly dynamic protein network that links all regions and components of the cell to provide a structural framework for organizing numerous cellular activities. This course will explore the molecular regulation of the actin and microtubule cytoskeletons during cell migration and other cellular processes. Topics will include (1) an overview of key regulators of the cytoskeleton, (2) how they organize specific cellular structures, and (3) how the coordinated activities of cytoskeletal networks govern complex cellular behaviours. The format of this course is mainly journal club style presentations and student-led discussions of research papers, together with supporting background lectures. Experience with critical evaluation of research papers is emphasized.

Prerequisite: Minimum grade of 73% in BCH311H1/CSB349H1/MGY311Y1, minimum grade of 73% in BCH340H1/CJH332H1/CSB328H1/CSB329H1/CSB331H1/CSB340H1/CSB353H1/CSB397Y0
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)
CSB429H1 - Germ Cell Biology

Hours: 12L/12T/12S

This course will discuss the genetic and cell biological aspects of the development of gametes, gonads, and sex related traits in animals, including invertebrates and vertebrates. The course consists of lectures and student seminars, and is based on the discussion of primary scientific literature. Not recommended for students with fewer than 14 FCE’s.

Prerequisite: Minimum grade of 77% in CSB328H1/CSB340H1/CSB349H1/MGY311Y1/MGY312H1

Distribution Requirements: Science

Breadth Requirements: Living Things and Their Environment (4)

BCB430Y1 - Advanced Special Project in Bioinformatics and Computational Biology

An opportunity for advanced specialized individual research in bioinformatics and computational biology by arrangement with the course coordinator and a supervisor. Significant background in both life science and computer science courses is required. BCB330Y1 is a recommended preparation for this course however students should not normally conduct their project in the same laboratory or continue their previous project. Not eligible for CR/NCR option.

Prerequisite: Permission of the course coordinator

Recommended Preparation: BCB330Y1

Distribution Requirements: Science

Breadth Requirements: The Physical and Mathematical Universes (5)

CSB431H1 - Evolution and Development: Gastrulation

Hours: 12L/12T/12S

Gastrulation is used to examine the molecular and cellular mechanisms of a major morphogenetic process and its evolutionary modifications. This course includes small group discussions and presentations. Controversial issues presented in the lectures are debated.

Prerequisite: CSB328H1

Distribution Requirements: Science

Breadth Requirements: Living Things and Their Environment (4)

CSB432H1 - Advanced Topics in Cellular Neurophysiology

Hours: 12L/24S

This course examines cellular neurophysiological processes in the developing and mature nervous systems with a focus on: (1) understanding modern techniques used in neurophysiological research; and (2) interpreting the results from neurophysiological peer-reviewed manuscripts. This course is interactive and requires students to contribute actively during lectures and seminars, including conducting a group presentation.

Prerequisite: CJH332H1

Distribution Requirements: Science

Breadth Requirements: Living Things and Their Environment (4)

CSB435H1 - Regulatory Networks and Systems in Molecular Biology

Hours: 24L

This course will expose students to several of the best-understood regulatory networks in molecular biology, as well as recent technological and methodological developments. Emphasis is on the mechanistic basis for these systems, methods and models for quantitative analysis of regulatory networks and the biological logic they encode.

Prerequisite: BCH311H1/CSB349H1/MGY311Y1

Distribution Requirements: Science

Breadth Requirements: Living Things and Their Environment (4)
CSB445H1 - Topics in Sleep Research

Hours: 3L/33S

This course covers theories in why and how we sleep. It will focus on the biological functions of sleep, how the brain generates different sleep states and how breakdowns in sleep mechanisms contribute to sleep disorders like insomnia, sleep walking and narcolepsy. This course emphasizes student participation in seminar discussion and debates.

Prerequisite: (BIO270H1, BIO271H1)/(PSL300H1, PSL301H1)
Recommended Preparation: CJH332H1/CSB345H1/PSY397H1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

CSB447H1 - Living Without Oxygen: Microbes to Mammals

Hours: 18L/18S

In-depth examination of the unique cellular adaptations of different organisms and tissues to survival in low oxygen environments. Cellular, physiological and biochemical strategies, and systemic and whole organism responses will be investigated to uncover broad-ranging common strategies employed by diverse organisms to live without oxygen and in other stressful environments.

Prerequisite: (BIO270H1, BIO271H1)/(PSL300H1, PSL301H1)
Exclusion: CSB347H1, NUS348H0
Recommended Preparation: BCH210H1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

CSB450H1 - Proteomics in Systems Biology

Hours: 24L

A discussion on current proteomic approaches to understand biological processes. The role of mass spectrometry, gel electrophoresis, protein-protein interaction and structural biology in understanding how proteins function in pathways and interaction networks will be discussed.

Prerequisite: BIO230H1/BIO255H1, BCH210H1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

CSB452H1 - Molecular Interactions Between Plants, Microorganisms and Parasitic Plants

Hours: 24L

This course explores the strategies that plants have evolved to defend themselves against microbes and parasitic plants. The course consists of two sections: 1. Plant - pathogenic microbe interactions and 2. Plant - plant parasite interactions. The first section focuses on an in-depth discussion about on-going research of plant immunity against pathogenic microbes. The second section introduces plant - parasitic plant relationships with an emphasis on signalling pathways that underlie these interactions and discusses how basic knowledge of the lifestyle of parasitic plants could contribute to agricultural solutions in the developing world.

Prerequisite: BCH311H1/CSB349H1/MGY311Y1
Recommended Preparation: CSB353H1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

CSB454H1 - Pathogenic Effector Biology

Hours: 12L/12S

Microbial pathogens inject effector proteins into host cells in order to sabotage cellular systems and favor the infection process. This course explores the molecular details of how cellular systems (e.g., secretion, cytoskeleton and signaling) are manipulated by pathogenic effectors to promote the infection process, while emphasizing interesting structural and biochemical features of effector biology along the way. The course will also compare and contrast the strategies employed by plant versus animal pathogens, and how immune systems have evolved to cope with cellular hijacking by pathogenic effector molecules. The course will be based on the primary research literature and involve a combination of lectures and critical discussions of research papers.

Prerequisite: BCH311H1/CSB349H1/MGY311Y1
Recommended Preparation: MGY377H1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

CSB457H1 - Post-transcriptional Gene Regulation

Hours: 12L/24S

This course focuses on advances in post-transcriptional gene regulation. Topics include regulatory RNAs, RNA processing, localization, translation, and degradation. In addition to lectures covering background material, emphasis is placed on current research and involves discussion of primary literature in a round-table format.

Prerequisite: Minimum grade of 70% in BCH311H1/CSB349H1/ MGY311Y1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)
CSB458H1 - Epigenetics

Hours: 36S

A seminar course exploring non-Mendelian phenomena in plants, fungi and animals that reveal aspects of genome organization and regulation that may provide insight into genome function and evolution.

Prerequisite: BIO260H1/HMB265H1, BCH311H1/CSB349H1/MGY311Y1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

CSB459H1 - Plant Molecular Biology and Biotechnology

Hours: 24L

This course introduces students to major features of gene expression and signal transduction in plants. Topics include strategies for generating transgenic plants and regulating gene expression, as well as the importance of signal transduction in plant growth and survival. How plants sense and respond at the molecular level to environmental stresses such as drought, salinity, cold and disease will be discussed. The application of this basic scientific information in biotechnological strategies for improving agronomic traits will also be addressed.

Prerequisite: BCH311H1/CSB349H1/MGY311Y1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

CSB460H1 - Plant Signal Transduction

Hours: 24L

Plant development, ecological adaptation and crop plant productivity depend on the sophisticated potential of plants to sense and compute signals to regulate their responses. An arsenal of genetic and genomic tools is employed to elucidate these plant signal transduction pathways. Examples from the original literature will be used to introduce general concepts of plant signal transduction, molecular biology and genomics and their application in understanding and influencing plant growth and development.

Prerequisite: BCH311H1/CSB349H1/MGY311Y1 or permission of instructor
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

CSB471H1 - Foundational Discoveries in Genome Biology and Bioinformatics

Hours: 24S

This course is based on the critical analysis of key research articles in genome biology and bioinformatics. The format is interactive and requires students to contribute actively during class meetings. Small student groups will be assigned to present context, figures, data, methods and impact from a number of research articles during the semester. Based on the readings, small student groups will propose new genome technologies or datasets and new bioinformatics software or databases.

Prerequisite: BCB330Y1/BCH441H1/CSB352H1/CSB472H1/EHJ352H1/MGY428H1, or permission of instructor
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

CSB472H1 - Computational Genomics and Bioinformatics

Hours: 24L/12T

Computational analyses of DNA and RNA expression data. Understanding biological databases, sequence alignment, sequence annotation, gene prediction, computational analysis of function, motif analysis, phylogenetic analysis, and gene expression profiling analysis. Applied, theoretical and statistical issues will be addressed.

Prerequisite: BIO230H1/BIO255H1
Recommended Preparation: BIO260H1/HMB265H1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

CSB473H1 - Chemical Genomics

Hours: 24L

This course surveys the field of Chemical Genomics, focusing on the analysis of biological problems using chemical approaches. Topics covered include chemical genetics, combinatorial chemistry and combinatorial strategies in molecular biology. Examines both the underlying biological and chemical concepts; however, the focus is primarily biological.

Prerequisite: BIO230H1/BIO255H1, BIO260H1/HMB265H1, CHM247H1/CHM249H1/any 300+ CHM course
Recommended Preparation: BCH210H1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)
CSB474H1 - Methods in Genomics and Proteomics

Hours: 48P

This is a hands-on, laboratory based course offered through the Centre for the Analysis of Genome Evolution and Function (CAGEF). It will teach students how to produce and analyze data that are central to the fields of genomics and proteomics. Techniques taught include DNA and RNA extraction, PCR, DNA sequencing, quantitative PCR, transcript profiling using microarrays, 2D-gel proteome analysis, and associated bioinformatics analyses. (Lab Materials Fee: $50). A lab coat is required for use in laboratories; students are responsible for purchasing this (approximate cost is $16).

Prerequisite: BIO260H1/HMB265H1, BIO255H1/CSB330H1/CSB350H1 or by permission of the instructor
Recommended Preparation: BCH311H1/CSB349H1/MGY311Y1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

CSB475H1 - Plant Metabolomics

Hours: 24L

This course introduces students to major features of plant metabolism. The content covers plant physiology, natural product chemistry, genetics, molecular biology, and genomics. Topics also include strategies for designing how we modulate metabolic pathways and how we utilize plants for biotechnology through metabolic engineering.

Prerequisite: BCH311H1/CSB349H1/MGY311Y1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

CSB483H1 - Seminar in Development

Hours: 24S

Seminars analyzing major concepts in developmental biology from quantitative, physics-based and molecular perspectives.

Prerequisite: CSB328H1/CSB340H1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

CSB490H1 - Team-Based Learning: Current Topics in Cell and Molecular Biology

Hours: 8L/16S

A team-based learning course with emphasis on questions in the fields of protein biochemistry, synthetic biology, and the evolution of proteins and networks of protein-protein interactions. Lectures and seminars will focus on current research topics within these fields and will provide the background knowledge for students to work in teams to explore the primary research literature, and for each team to develop a formal research proposal. For details on this year’s content, please go to the Undergraduate course section of the CSB website, http://csb.utoronto.ca.

Prerequisite: BIO260H1/HMB265H1, CSB330H1/CSB349H1/CSB352H1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

CSB491H1 - Team-Based Research: Research in Cell and Molecular Biology

Hours: 60P

CSB491H1 is a plant molecular biology lab that builds on molecular biology and biochemistry skills acquired in CSB350H1 or CSB330H1. After an initial training lab section, students will work in teams to develop a research project which they will conduct in the second half of the course. They will develop laboratory and teamwork skills that are desirable for them to function in a research laboratory and in the workplace. The course will integrate current molecular biology techniques, including designing and characterizing mutants made with CRISPR/Cas9. (Lab Materials Fee: $50). Lab coat and safety glasses are required for use in laboratories; students are responsible for purchasing these items (approximate cost is $25).

Prerequisite: CSB330H1/CSB350H1 with a minimum grade of 77% and approval of the instructor
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

CSB492H1 - Advanced Topics in Cell and Systems Biology

Hours: 24L

This advanced course covers topics in cell and systems biology at all levels of biological organization. Students learn about the wide array of state-of-the-art molecular, genomic, proteomic, cell biological, imaging, physiological and computational tools and methods that researchers use to study the behaviour of cells.

Prerequisite: CSB325H1/CSB349H1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)
**CSB497H1 - Independent Research in Cell and Systems Biology I**

An original research project (a literature review alone is not sufficient) requiring the prior consent of a member of the Department to supervise the project. The topic is to be mutually agreed upon by the student and supervisor. They must arrange the time, place, and provision of any materials and submit to the Undergraduate Office a signed form of agreement outlining details prior to being enrolled. In the Fall or Winter sessions, a commitment of 8–10 hours per week is expected for research and related course activities. If spread over both the Fall and Winter sessions, a commitment of 4–5 hours per week is expected. In the Summer Session, the number of hours doubles per week (e.g., 16–20 for F or S, or 8–10 for Y) as the length of the term is halved compared to the Fall or Winter term. Many students spend more than this amount of time as they become immersed in their project. This course is normally open only to fourth year students with adequate background in Cell and Systems Biology. Course requirements include a final report, and either an oral presentation (Summer and Fall sessions) or a poster presentation (Winter session). Two workshops on scientific research are scheduled and highly recommended. Details for enrollment are available at the Undergraduate course section of the CSB website, http://csb.utoronto.ca. Maximum of 2.0 FCEs allowed among CSB497H1, CSB498Y1 and CSB499Y1. (Lab Materials Fee: $25). Not eligible for CR/NCR option.

**Distribution Requirements:** Science  
**Breadth Requirements:** Living Things and Their Environment (4)  

**CSB499Y1 - Independent Research in Cell and Systems Biology II**

Allows students to do a second independent project. Operates in the same manner as CSB497H1/CSB498Y1. Maximum of 2.0 FCEs allowed among CSB497H1, CSB498Y1 and CSB499Y1. Students who have completed both CSB497H1 and CSB498Y1 are excluded from taking CSB499Y1. (Lab Materials Fee: $50). Not eligible for CR/NCR option.

**Prerequisite:** CSB497H1/CSB498Y1  
**Distribution Requirements:** Science  
**Breadth Requirements:** Living Things and Their Environment (4)  

**CSB498Y1 - Independent Research in Cell and Systems Biology I**

An original research project (a literature review alone is not sufficient) requiring the prior consent of a member of the Department to supervise the project. The topic is to be mutually agreed upon by the student and supervisor. They must arrange the time, place, and provision of any materials and submit to the Undergraduate Office a signed form of agreement outlining details prior to being enrolled. In the Fall/Winter session, a commitment of 8–10 hours per week is expected for research and related course activities. In the Summer session, the number of hours doubles (16–20 per week) as the length of the term is halved. Centre for Medieval Studies

Faculty List

Professor and Director
Isabelle Cochelin, PhD (interim to June 30, 2020)
John Magee, BA, PhD (as of July 1, 2020)

Assistant Professors
Alexandra Bolintineanu, B.Sc, MA, PhD
Cillian O'Hogan, BA, PhD

Introduction

The Centre for Medieval Studies provides a course in the thousand-year period from the Fall of Rome to the Fall of Constantinople, and beyond. Students can expect to cross the disciplinary boundaries of history, art, literature, philosophy, religion, and history of science, focusing not only on Europe but on the broader Mediterranean and North Sea regions. These courses open up the Centre for the first time to undergraduate students and provide a valuable humanities breadth experience for students who want to experience the culture, poetry, and art of the Middle Ages, as well as medieval music, drama performance and manuscript studies.

Centre for Medieval Studies Courses

MST201H1 - Getting Medieval: Myths and Monsters

Hours: 24L/12T

Introduction to the sound, sight, and touch of the distant past, telling the story of the Middle Ages through objects from animal skin parchment to enameled icon. Lectures are complemented by hands-on learning in weekly tutorials featuring text- and narrative-oriented digital methods, along with medieval drama and music performance.

Prerequisite: None
Exclusion: MST200Y1
Recommended Preparation: N/A
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

MST202H1 - Getting Medieval: Place and Space

Hours: 24L/12T

From world maps to tales of pilgrimage, trade, and exploration, from imagined other worlds to historical cityscapes, this course tells the story of the Middle Ages through the places and spaces that defined medieval culture. Lectures are complemented by hands-on learning in weekly tutorials featuring network visualization and digital mapping.

Prerequisite: None
Exclusion: MST200Y1
Recommended Preparation: N/A
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

MST300H1 - Alexander the Great in the Middle Ages

Hours: 24L/12T

Alexander the Great (356-323 BCE), king of Macedon, was one of the most successful military campaigners the world has ever seen. By the time he was thirty, he had established a vast empire stretching from Greece in the west to India in the east. Fantastic stories and legends about Alexander the Great circulated throughout the medieval world, from Iceland to Iran and from Ethiopia to England. In this course, we explore what different representations of the same figure can tell us about the range of medieval cultures. Through the use of digital tools, students and the instructor work together to explore this rich material. We trace the transmission of Alexander’s legend using digital maps. We compare different versions of the same story using text analysis tools. And we curate a small selection of the lavishly-illustrated manuscripts of the Alexander Romance in a digital exhibition.

Prerequisite: MST201H1, or MST202H1, or Permission of Instructor
Exclusion: None
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

MST399Y1 - Research Opportunity Program

Credit course for supervised participation in faculty research project. Details at https://www.artsci.utoronto.ca/current/academics/research-opportunities/. Not eligible for CR/NCR option.
MST400Y1 - Languages and Methods for Medieval Studies

Undergraduate students may enrol in MST400Y1 with permission of the instructor.

Prerequisite: Prior training in Latin is required.

MST404H1 - Languages in Medieval Studies: Palaeography I

Hours: 24L/12T

The course is designed as a practicum in the transcription of scripts from the late Roman Empire to the twelfth century. The goal is to offer students the opportunity to participate in a graduate course in manuscript studies where comparable offerings at the undergraduate level are unavailable.

Prerequisite: Level One Latin pass; permission of the instructor; at least 8 FCEs
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

MST405H1 - Languages in Medieval Studies: Palaeography II

Hours: 24L/12T

Study of Latin Scripts from 1200 to 1600, with attention to background of Gothic writing, physical characteristics of manuscripts, library practices and bibliographical resources. The goal is to offer students the opportunity to participate in a graduate course in manuscript studies where comparable offerings at the undergraduate level are unavailable.

Prerequisite: Level One Latin pass; permission of the instructor; at least 8 FCEs
Exclusion: None
Recommended Preparation: Previous language study
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

MST410H1 - Languages for Medieval Studies: Old Norse

Hours: 24L

Introduction to Old Norse language and literature, focusing on basic instruction in Old Norse grammar and short readings from poetic and prose texts. The goal is to offer students the opportunity to participate in a graduate course in medieval languages where comparable offerings at the undergraduate level are unavailable.

Prerequisite: Permission of the instructor; at least 8 FCEs
Exclusion: None
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

Introduction

Chemistry is a challenging intellectual pursuit and a dominant force in shaping our civilization. Chemistry places strong emphasis on an understanding of the structures and properties of individual atoms and molecules, and on using this understanding to interpret and predict the behaviour of matter. Many of the concepts of physics, and the methods of mathematics, are basic to chemistry. Chemistry is of fundamental importance to many other subjects including astrophysics, biological sciences, environmental science, geology, materials science, and medical sciences. These and other aspects
of the subject are reflected in the courses offered, and the programs recommended by the Department.

The Department has made extensive changes to its course and program offerings in the last few years. These changes included a revision of first year courses, substantial modifications to later-year courses, and the introduction of updated specialist programs in Biological Chemistry, Materials Chemistry, Environmental Chemistry, Pharmaceutical Chemistry, and Synthetic & Catalytic Chemistry. Opportunity also exists to undertake a Nanoscience minor in collaboration with the National University of Singapore.

Students can choose between two first-year options according to their intended area of specialization.

CHM151Y1 is the course that is strongly recommended for students who will be following one of the specialist programs involving chemistry, including Biological Chemistry and Environmental Chemistry or who will be including a substantial amount of chemistry in their degree (such as those following a chemistry major program). CHM151Y1 features a unique Course Community which significantly supports and enhances the student learning experience.

The combination of CHM135H1 and CHM136H1 is recommended for students who intend to take programs in the Life or Health Sciences that do not require a large amount of chemistry.

The outlines of these first-year courses, together with those for later-year offerings, are shown in this Calendar. More detailed information is available from the Department and is posted at www.chem.utoronto.ca/undergrad/courseinfo.php.

Incoming first-year students may find more information about the first year chemistry courses at http://www.chem.utoronto.ca/undergrad/incoming_students.php. The self-assessment test can be a useful tool to measure their understanding of fundamental chemistry concepts from high school.

Students who are following programs that contain a substantial number of chemistry courses are strongly advised to take courses in the proper year (i.e. 200-series in the second year, etc.). Following the correct sequence will enhance the level and balance of preparation for all later year courses, and timetable conflicts will be avoided.

Students whose current programs may be affected by the introduction of new or revised chemistry courses are advised to consult the Department at the earliest possible opportunity.

Students requiring more information about Chemistry programs and courses are invited to visit or phone the Undergraduate Office, Lash Miller Chemical Laboratories, Room 151 (chem.undergrad@utoronto.ca).

Lab Materials Fee

Some courses in this department have a mandatory Lab Materials Fee to cover non-reusable materials. The fee for each such course is given below in the course description and will be included on the student’s invoice on ACORN.

Chemistry Programs

Biological Chemistry Specialist (Science Program) - ASSPE1995

Description:

Consult Professor G. A. Woolley, Department of Chemistry.

Biological Chemistry examines Nature at the molecular level by using a combination of synthetic, inorganic, analytical and physical chemistry as well as the tools of molecular biology and biochemistry. This program provides the setting to understand the chemical reactions and interactions that occur in biological processes, as well as how chemical strategies can be used to control these systems. This program includes sufficient flexibility to allow focus in areas such as bioinorganic, bioorganic, biophysical or medicinal chemistry. Students graduating from this program will be prepared for career paths in the biotechnology, biomedical and pharmaceutical sectors, as well as for research and teaching in related areas of chemistry and biology. This program is accredited by the Canadian Society for Chemistry.

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

Completed courses (with minimum grades)
The following courses with the stated minimum grades are required:

- (CHM135H1 and CHM136H1) (63% in each) CHM151Y1 (63%)

Completion Requirements:

(14.0 credits, including 3.0 credits from 400-series courses)

First Year: BIO120H1, BIO130H1; CHM151Y1 (strongly recommended)/ (CHM135H1/CHM139H and CHM136H1/CHM138H); ( MAT135H1 and MAT136H1)/ MAT137Y1/ MAT157Y1

First or Second Year: (PHY131H1 and PHY132H1)/ (PHY151H1 and PHY152H1)

Second and Higher Years:

1. BCH210H1; BIO230H1/ BIO255H1; CHM217H1/ (CHM220H1/ CHM222H1 and CHM233H1); CHM238Y1/ (CHM249H1 strongly recommended)/ CHM247H1
2. CHM347H1, CHM348H1, CHM379H1
3. At least 1.0 credit from the following: CHM317H1, CHM327H1, CHM338H1, CHM343H1, CHM410H1, CHM499Y1/ PHC489Y1
4. Additional 300/400-series BCH or CHM courses, including CHM437H1, CHM447H1, and CHM499H1 to a total of 14.0 credits. CSB450H1 is also acceptable.
Chemical Physics Specialist
(Science Program) - ASSPE0600

Description:

Consult Professor J. Schofield, Department of Chemistry.

Chemical Physics aims to explain structure and dynamics of molecular and bulk systems in terms of atomic and molecular interactions. Sub-disciplines and specialized topics include reaction dynamics, spectroscopy, optical control of molecular processes, nanoscale science, surface chemistry, theoretical and experimental studies of soft systems (polymers, liquids, biological systems), quantum control and quantum information sciences. The Chemical Physics program will provide students with a solid grounding in physical chemistry, and will prepare students for careers in experimental and theoretical physical sciences, in academia or in research development for companies.

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

Completed courses (with minimum grades)
The following courses with the stated minimum grades are required:

- (CHM135H1 and CHM136H1) (63% in each)/ CHM151Y1 (63%)

Completion Requirements:

(14.0 credits, including at least 3.0 credits from 400-series courses)

First Year: (CHM151Y1 strongly recommended)/(CHM135H1/CHM139H and CHM136H1/CHM138H1), (MAT135H1 and MAT136H1)/MAT137Y1/MAT152Y1; (PHY131H1 and PHY132H1)/(PHY151H1 and PHY152H1)

Higher Years:

1. APM346H1; (CHM220H1 and CHM223H1), CHM326H1/PHY356H1, CHM327H1, CHM328H1/MAT232H1/MAT240H1/MAT235Y1/MAT237Y1/MAT244H1/MAT334H1/PHY250H1/PHY254H1, PHY354H1, PHY350H1/CHM423H1/PHY456H1
2. 2.0 credits from CHM210H1, CHM217H1, CHM238Y1, (CHM249H1 strongly recommended)/CHM247H1, CHM310H1, CHM317H1, CHM338H1, CHM348H1, CHM415H1
3. Additional 400-series CHM/PHY 0.5 credit courses to a total of 14.0 credits

Environmental Chemistry Specialist (Science Program) - ASSPE2543

Description:

Consult Professor J. Murphy, Department of Chemistry (416-946-0260 or jmurphy@chem.utoronto.ca)

Jointly sponsored by the School of the Environment and the Department of Chemistry, this program focuses on analytical theory, instrumentation and methodological aspects of organic and inorganic contaminants in soil, water, air and biological tissues.

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

Completed courses (with minimum grades)
The following courses with the stated minimum grades are required:

- (CHM135H1 and CHM136H1) (63% in each)/ CHM151Y1 (63%)

Chemistry Specialist (Science Program) - ASSPE1376

Description:

Consult Associate Chair, Undergraduate Studies, Department of Chemistry.

The Chemistry Specialist Program provides a broad coverage of the core areas of chemistry together with appropriate courses in mathematics and physics during the first three years, and allows students to follow a particular area of interest or a more general program in fourth year. The program is suitable for professional work in any area of chemistry and for entry into graduate school to continue work in any of the sub-fields of chemistry, provided that appropriate options are chosen in fourth year. This program is accredited by the Canadian Society for Chemistry.

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

Completed courses (with minimum grades)
The following courses with the stated minimum grades are required:

- (CHM135H1 and CHM136H1) (63% in each)/ CHM151Y1 (63%)

Completion Requirements:

(14.0 credits, including at least 3.0 credits from 400-series courses)

First Year: (CHM151Y1 strongly recommended)/(CHM135H1/CHM139H and CHM136H1/CHM138H1), (MAT135H1 and MAT136H1)/MAT137Y1/MAT152Y1; (PHY131H1 and PHY132H1)/(PHY151H1 and PHY152H1)

Second Year: CHM217H1, (CHM220H1 and CHM223H1), CHM238Y1, CHM249H1, MAT235Y1/MAT237Y1

Third and Fourth Years:

1. BCH210H1, CHM326H1, CHM328H1, CHM327H1
2. Additional credits from 300/400-level CHM/MAT/another science, including at least three of CHM317H1, CHM338H1, CHM343H1, CHM379H1, CHM410H1, CHM499Y1/PHC489Y1. Minimum 3.0 CHM credits at the 400-level to a total of 14.0 credits.
Completion Requirements:

(14.0 credits, including 1.0 credit from 400-series courses)

First Year: (BIO120H1 and BIO130H1/ BIO220H1; CHM151Y1 (strongly recommended)/ CHM135H1/CHM139H and CHM136H1/ CHM138H); (MAT135H1 and MAT136H1)/ MAT137Y1/ MAT157Y1

First or Second Year: (PHY131H1 and PHY132H1)/ (PHY151H1 and PHY152H1)

Second and Higher Years:

1. CHM217H1, (CHM220H1 and CHM222H1 and CHM223H1), CHM238Y1, CHM247H1/ CHM249H1; (CHM210H1 and GGR203H1/ GGR314H1); STA220H1/ GGR270H1
2. CHM310H1, CHM410H1, CHM415H1; ENV234H1, (ENV221H1 and ENV222H1); ENV334H1/ ENV341H1/ ENV346H1
3. 1.0 credit from 300/400-series CHM courses
4. ENV421H1/ CHM499Y1/ PHC489Y1/ CHM398H0 (in areas relevant to the program with prior approval by the Department)
5. Additional credits from any 300/400-series courses with DR=SCI, BR=4 or BR=5 to a total of 14.0 credits.

Materials Science Specialist (Science Program) - ASSPE2424

Description:

Consult Professor Andrew Dicks, Department of Chemistry.

This program draws both on the basic sciences of chemistry and physics, and on the more applied areas such as metallurgy or ceramics. Courses dealing with these latter fields are offered through the Department of Materials Science in the Faculty of Applied Science and Engineering. This would be an appropriate program for students with career interests in solid-state, polymer or composite materials industries, or for graduate work in either chemistry or materials science, with an appropriate choice of options. Students may follow the Materials Science Chemistry path by taking the research course CHM499Y1 or the Materials Science and Engineering path by taking the research course MSE498Y1.

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

Completed courses (with minimum grades)
The following courses with the stated minimum grades are required:

• (CHM135H1 and CHM136H1) (63% in each)/ CHM151Y1 (63%)

Completion Requirements:

(14.0 credits, including 1.0 credit from 400-series courses)

First Year: BIO120H1, CHM151Y1 (strongly recommended)/ CHM135H1/CHM139H and CHM136H1/ CHM138H); (MAT135H1 and MAT136H1)/ MAT137Y1/ MAT157Y1; MSE120H1

First or Second Year: BIO130H1/ BIO220H1; (PHY131H1 and PHY132H1)/ (PHY151H1 and PHY152H1)

Second Year and Higher Years

1. (CHM220H1/ CHM222H1 and CHM223H1/ MSE202H1), CHM238Y1, CHM247H1/ CHM249H1
2. MSE210H1, MSE318H1, MSE359H1
3. CHM325H1, CHM327H1, CHM336H1, CHM343H1/ CHM348H1, CHM426H1, CHM434H1
4. At least three of the following one of which must be a 400-series: MSE302H1, MSE316H1, MSE343H1, CHM434H1, CHM446H1, MSE415H1, MSE430H1, MSE432H1, MSE440H1, MSE442H1, MSE451H1, MSE458H1, MSE459H1, MSE461H1
5. CHM499Y1/ MSE498Y1

Pharmaceutical Chemistry Specialist (Science Program) - ASSPE1211

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

Variable Minimum Grade Average
A minimum grade average is needed for entry, and this minimum changes each year depending on available spaces and the number of applicants. The following courses must be completed:

• BIO120H1 and BIO130H1
• (CHM135H1 and CHM136H1)/ CHM151Y1
• (PHY131H1 and PHY132H1)/ (PHY151H1 and PHY152H1)

To ensure that students admitted to the program will be successful, applicants with a final grade lower than 60%, or a grade average lower than 70% will not be considered for admission. Please note that obtaining this minimum final grade or minimum grade average does not guarantee admission to the program.

Completion Requirements:

(13.0 credits, including 1.0 credit from 400-series courses)

NOTE: Some of the courses listed below may have prerequisites.

First Year:
BIO120H1, BIO130H1; (CHM135H1 and CHM136H1)/ (CHM138H1 and CHM139H)Y CHM151Y1; (PHY131H1 and PHY132H1)/ (PHY151H1 and PHY152H1)

Second Year:
BCH220H1; BIO230H1; CHM220H1/ CHM222H1, CHM223H1, CHM247H1/ CHM249H1; PCL201H1; PHC230H1

Third Year:
CHM217H1; PHC300H1; PHC301H1; PHC320H1; PHC330H1; PHC340Y1

Fourth Year:
1. PHC489Y1 or CHM499Y1
2. 2.0 credits from: CHM317H1; CHM342H1; CHM347H1; CHM379H1; CHM410H1; CHM414H1; CHM417H1; CHM427H1;
Chemistry
165

Second and Higher Years:

1. BCH210H1, CHM217H1, (CHM220H1/CHM222H1 and CHM223H1), CHM238Y1, (CHM249H1 strongly recommended)/CHM247H1/MAT235Y1/MAT237Y1.
2. CHM317H1, CHM338H1, CHM342H1, CHM243H1, CHM347H1, CHM348H1.
3. CHM432H1, CHM440H1, CHM441H1, CHM443H1.

Note that not all of the 400-series PHC courses are offered every academic year.

We also offer an optional 12- or 16-month internship program to qualified students. This is a project-based, paid employment placement that takes place between the third and fourth years of undergraduate study. It provides the student with an opportunity to apply the knowledge acquired in the first three years of university to private- or public-sector settings. Placements are available in pharmaceutical and biotechnology companies, university research labs, university-affiliated organizations, or government research agencies.

Synthetic & Catalytic Chemistry Specialist (Science Program) - ASSPE1377

Description:

Consult Professor R. Batey, Department of Chemistry.

This program focuses on the fundamentals and practical aspects of modern synthetic organic and inorganic chemistry, and the understanding and applications of catalytic reactions. Students will become exposed to extensive green chemistry approaches from both experimental and theoretical perspectives. The program provides preparation for career paths as synthetic/discovery chemists, in the pharmaceutical, biotechnology, biomedical, crop protection, materials and related sectors, or for academic research and teaching positions. This program is accredited by the Canadian Society for Chemistry.

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 14.0 credits and meet the requirements listed below to enrol.

Completed courses (with minimum grades)

The following courses with the stated minimum grades are required:

• (CHM135H1 and CHM136H1) (63% in each)/CHM151Y1 (63%)

Completion Requirements:

(14.0 credits)

First Year: (CHM151Y1 strongly recommended)/(CHM135H1/CHM139H and CHM136H1/CHM138H); (MAT135H1 and MAT136H1)/MAT137Y1/MAT157Y1.

Second Year: At least two of CHM217H1, CHM220H1/CHM222H1, CHM238Y1, (CHM249H1 strongly recommended)/CHM247H1.

Third Year: At least two of CHM317H1, CHM327H1, CHM338H1, CHM343H1, CHM348H1, CHM379H1.

Fourth Year: Additional 200/300/400-level CHM courses to total of 7.0 credits (CHM299Y1, CHM395Y1, CHM396Y0, CHM397H0, CHM398H0, CHM398Y0, CHM399Y1 excluded).

Chemistry Major (Science Program) - ASMAJ1376

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

Completed courses (with minimum grades)

The following courses with the stated minimum grades are required:

• (CHM135H1 and CHM136H1) (63% in each)/CHM151Y1 (63%)

Completion Requirements:

(8.0 credits, including at least one 0.5 CHM credit at the 400-level)

First Year: (CHM151Y1 strongly recommended)/(CHM135H1/CHM139H and CHM136H1/CHM138H); (MAT135H1 and MAT136H1)/MAT137Y1/MAT157Y1.

Second Year: At least two of CHM217H1, CHM220H1/CHM222H1, CHM238Y1, (CHM249H1 strongly recommended)/CHM247H1.

Third Year: At least two of CHM317H1, CHM327H1, CHM338H1, CHM343H1, CHM348H1, CHM379H1.

Fourth Year: Additional 200/300/400-level CHM courses to total of 7.0 credits (CHM299Y1, CHM395Y1, CHM396Y0, CHM397H0, CHM398H0, CHM398Y0, CHM399Y1 excluded).

Chemistry Minor (Science Program) - ASMIN1376

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

Consult Associate Chair, Undergraduate Studies, Department of Chemistry.

(4.0 credits, including 1.0 credit CHM course at the 300+ level)

First Year: CHM151Y1/(CHM135H1/CHM139H1 and CHM136H1/CHM138H1).

Second Year: At least one of CHM217H1, CHM220H1/CHM222H1, CHM238Y1, (CHM249H1 strongly recommended)/CHM247H1.
Environmental Chemistry Minor
(Science Program) - ASMIN2543

**Description:**
Consult Professor J. Murphy, Department of Chemistry

Environmental chemistry is the study of the chemical impacts of humankind’s activities on the soil, air, and water. This minor provides a balanced fundamental background in chemistry as well as an introduction to the major issues associated with environmental chemistry.

**Enrolment Requirements:**
This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

**Completion Requirements:**
(4.0 credits, including 1.0 credit at the 300+ level)

1. CHM135H1/CHM139H1 and CHM136H1/CHM138H1/CHM151Y1
2. 1.0 credit from: CHM217H1, CHM220H1/CHM222H1/CHM225Y1, CHM238Y1, CHM247H1/CHM249H1
3. CHM210H1
4. CHM310H1, and any two of CHM317H1, CHM410H1, CHM415H1

Nanoscience Minor (offered jointly with the National University of Singapore) (Science Program) - ASMIN2723

**Enrolment Requirements:**
This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

**Special Requirement**
* A supplementary application is required. For more information, contact the Undergraduate Office (LM 151, 416-978-6033, undergrad@chem.utoronto.ca), and the Centre for International Experience (CIE, www.cie.utoronto.ca).

**Completion Requirements:**
This Minor program represents a unique opportunity to study chemistry and physics in a different cultural environment.

(4.0 credits, including 1.0 CHM credit at the 300+ level)

1. CHM151Y1/CHM135H1/CHM139H1, (PHY151H1 and PHY152H1)/(PHY131H1 and PHY132H1)
2. NUS227H0, NUS228H0, NUS328H0, NUS398H0
3. Additional CHM courses to a total of 4.0 credits

*NUS courses must be taken at the National University of Singapore during either the Winter session of second year studies or the Winter session of third year studies.

Chemistry Courses

**CHM101H1 - The Chemistry and Biology of Organic Molecules: Sex, Drugs and Rock and Roll!**

**Hours:** 30L/6T

An introduction to chemistry and chemical principles for non-scientists, with a focus on the chemistry and biology of organic molecules. The myriad roles these compounds play in our lives are discussed, including their use of pheromones, medicines and weapons, and their effect on colour, taste and smell.

**Distribution Requirements:** Science
**Breadth Requirements:** The Physical and Mathematical Universes (5)

**CHM135H1 - Chemistry: Physical Principles**

**Previous Course Number:** CHM139H1

**Hours:** 36L/12T/18P

Structure of matter, gases, liquids and solids; phase equilibria and phase diagrams; colligative properties; chemical equilibria; electrolyte solutions and electrochemistry; reaction kinetics; introduction to thermodynamics. Recommended for students in life and health science programs that involve a small amount of chemistry. (Lab Materials Fee: $25).

**Prerequisite:** Chemistry SCH4U, Mathematics MHF4U + MCV4U
**Corequisite:** (MAT135H1, MAT136H1)/MAT137Y1/MAT157Y1 recommended, but may be required prerequisite in 2nd year Chemistry courses; PHY131H1, PHY132H1/(PHY151H1, PHY152H1) recommended

**Exclusion:** CHM139H1, CHM151Y1, CHMA11H3, CHM140Y5, CHM110H5

**Distribution Requirements:** Science
**Breadth Requirements:** The Physical and Mathematical Universes (5)
CHM136H1 - Introductory Organic Chemistry I

Previous Course Number: CHM138H1
Hours: 36L/12T/18P

An introduction to principles of structure and their relation to reactivity of organic molecules: molecular structure, stereochemistry, functional groups, and reactions. Recommended for students in life and health science programs that involve a small amount of chemistry. (Lab Materials Fee: $25).

Prerequisite: Chemistry SCH4U, Mathematics MHF4U + MCV4U, CHM135H1
Corequisite: MAT135H1/MAT137Y1/MAT157Y1 recommended, but may be required prerequisite in 2nd year Chemistry courses; (PHY131H1, PHY132H1)/(PHY151H1, PHY152H1) recommended
Exclusion: CHM138H1, CHM151Y1, CHM242H5, CHM244H3
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

CHM151Y1 - Chemistry: The Molecular Science

Hours: 72L/24T/35P

An introduction to the major areas of modern chemistry, including organic and biological chemistry; physical chemistry and chemical physics; and inorganic/materials chemistry. The course is intended for students who will be following one of the chemistry specialist programs (including Biological Chemistry and Environmental Chemistry) or who will be including a substantial amount of chemistry in their degree (such as those following a chemistry major program). The combination of CHM151Y1 and CHM249H1 serves as a full year introductory course in organic chemistry with laboratory. (Lab Materials Fee: $50).

Note: CHM151Y1 has a unique Course Community where the undergraduate experience in chemistry is greatly enhanced through a series of workshops, research seminars, tours, outreach opportunities and social activities. Two hour biweekly Course Community meetings, during laboratory class hours will alternate weeks with the CHM151Y1 lab classes. The lab time is reserved for CHM151Y1 activities every other week of each semester.

Prerequisite: Chemistry SCH4U, Mathematics MHF4U + MCV4U; Physics SPH4U recommended
Corequisite: PHY131H1, PHY132H1/(PHY151H1, PHY152H1) recommended, but may be required prerequisites in 2nd year chemistry courses; (MAT135H1, MAT136H1)/MAT137Y1/ MAT157Y1
Exclusion: CHM135H1, CHM136H1, CHM138H1, CHM139H1, CHMA10H3, CHMA11H3, CHM41H3, CHM110H5, CHM120H5
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

CHM194H1 - Science and Human Values

Hours: 24S

There is a tension between creativity and the search for truth, which in science can be looking for patterns in nature. With examples drawn particularly from reports of scientific discoveries that have generated controversy, this seminar course will introduce the underlying principles and history of science, as well as how science and its boundaries are evolving, and how these influence human values. Restricted to first-year students. Not available for CR/NCR option.

Prerequisite: None
Corequisite: None
Exclusion: Other First-year Seminars
Recommended Preparation: Minimum level of high school science and mathematics
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

CHM195H1 - Innovative Teaching Methods in Chemistry

Hours: 24S

Good teaching is effective communication that engages the audience. In this breadth course, we'll explore innovative teaching in science, through an examination of the nature of science, how scientific knowledge is built, and what makes certain concepts in science problematic to the learner. Students will read and discuss relevant articles in newsmagazines, popular science sources, and educational literature. They will design and deliver mini-lessons to communicate specified scientific concepts. As a major course project, students will develop a communication tool that integrates pedagogical know-how with leading-edge chemical discoveries to produce a teaching unit for use by Ontario teachers. Restricted to first-year students. Not available for CR/NCR option.

Prerequisite: None
Corequisite: None
Exclusion: Other First-year Seminars
Recommended Preparation: Minimum level of high school science and mathematics
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)
CHM196H1 - The Quantum World and Its Classical Limit

Hours: 24S

This course seeks to demystify quantum mechanics and equip students to critically analyze popular depictions of quantum phenomena. While quantum mechanics provides a reliable description of the behavior of atoms, molecules and photons, most people are uncomfortable with some of its predictions, such as "quantum entanglement" between distant particles. In this course we will delve into key aspects of quantum mechanics and its more comfortable classical limit, focusing first on its manifestations in nature and then on fundamental issues such as uncertainty, interference, entanglement, and decoherence. This course will appeal to students with enthusiasm for physics. Restricted to first-year students. Not eligible for CR/NCR option.

Recommended Preparation: High school physics and mathematics
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

CHM197H1 - Environmental Chemistry in a Sustainable World

Hours: 24S

Rapid and widespread industrialization is changing the chemical nature of the planet. In order to have a sustainable future, we need to manage chemicals released by humankind, and to understand their effects on the environment and on us. Each year, this seminar course will address the fundamental science behind a specific topic in this field, such as the interactions of our energy choices and the environment, changes in water and air quality, or exposure to biologically-active synthetic chemicals such as pharmaceuticals or personal care products. Restricted to first-year students. Not eligible for CR/NCR option.

Recommended Preparation: Minimum level of high school science and mathematics
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

CHM198H1 - Biosensor Technology and Applications for the Non-Scientist

Hours: 24S

This breadth course introduces uses of and key ideas behind biosensor technology. Sensors will be familiar to all, playing key roles in our everyday lives, for example in touch screens or in automotive technology. Biosensor devices are fabricated from an electrical transducer which is intimately connected to a biochemical probe such as an enzyme or antibody. The idea is that a detectable electrical signal can be obtained when a target molecule or ion binds to the probe. Such a device offers many applications. These range from the detection of biological markers in blood and serum to test for genetic and infectious disease, to the selective monitoring of biomolecules for public safety, or in biotechnology or other industrial processes. Restricted to first-year students. Not eligible for CR/NCR option.

Recommended Preparation: Reading of book chapter on biosensor technology
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

Hours: 24S

Chemistry is a practical as well as a conceptual science that serves as the basis for applications in many other fields. The ideas and methods have evolved from diverse inputs leading to widely accepted sets of standard of facts. This collective knowledge has led to progress in the quality and understanding of life at a molecular level. While the facts of chemistry are taught in established courses, the context of what we know, the limitations and challenges of what chemistry can do and how we got to this point will be the targets for discovery by students in this course. The course will operate in a seminar model, combining presentations, readings, reports and discussions of current and historical issues. Restricted to first-year students. Not eligible for CR/NCR option.

Recommended Preparation: Grade 12 level chemistry
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)
CHM209H1 - Science of the Modern Kitchen

Hours: 24L

The properties of different food types will be discussed, as well as how they can be manipulated in the kitchen to transform taste and texture. Concepts will be considered through the lens of the scientific method, and many of the ingredients and practices of modernist cuisine will be examined. This course is intended for students with no science background.

Prerequisite: None
Corequisite: None
Exclusion: CHM135H1/CHM136H1/CHM138H1/CHM139H1/CHM151Y1
Recommended Preparation: SCH4U
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

CHM210H1 - Chemistry of Environmental Change

Hours: 24L/12T

Examines the fundamental chemical processes of the Earth's natural environment, and changes induced by human activity. Topics relate to the atmosphere: urban air pollution, stratospheric ozone depletion, acid rain; the hydrosphere: water resources and pollution, wastewater analysis; biogeochemistry and inorganic metals in the environment.

Prerequisite: (CHM135H1/CHM139H1/CHM151Y1), (MAT135H1/MAT137Y1/MAT157Y1)
Exclusion: ENV235Y1
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

CHM211H1 - Chemicals in the Environment: The Good, the Bad, and the Ugly

Hours: 24L/12T

The world is made up of chemicals, some are natural and some are unnatural. This course will explore sources and fate of chemicals in the environment and how humans interact with them. From this perspective, we will examine how to assess exposure and risk in our everyday lives.

Exclusion: CHM135H1/CHM136H1/CHM151Y1
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

CHM217H1 - Introduction to Analytical Chemistry

Hours: 30L/6T/52P

Introduction to the science of chemical measurement, from sampling through analysis to the interpretation of results, including how water, food products, pharmaceuticals, and dietary supplements are analysed for content, quality, and potential contaminants. Also how to interpret experimental measurements, compare results and procedures, and calibrate analytical instrumentation. Through closely integrated lectures, laboratories, and tutorials, this highly practical course introduces a variety of analytical techniques including volumetric methods, potentiometry, uv/visible and infrared spectrophotometry, flame atomic absorption spectrometry, and chromatography. Additional information can be found at http://www.chem.utoronto.ca/coursenotes/CHM217/. (Lab Materials Fee: $25).

Prerequisite: (CHM135H1/CHM139H1, CHM136H1/CHM138H1/CHM151Y1 with a minimum grade of 63%; (MAT135H1, MAT136H1)/MAT137Y1/MAT157Y1
Exclusion: CHM211H5, CHMB16H3
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

CHM220H1 - Physical Chemistry for Life Sciences

Hours: 36L/12T

Introduction to thermodynamics; kinetics; phase equilibrium, properties of mixtures, chemical equilibrium, electrochemistry; introduction to quantum mechanics and spectroscopy. This course is recommended for students in life and health science programs that involve a small amount of chemistry. Students enrolled in any chemistry specialist program (including Biological Chemistry and Environmental Chemistry) or who will be including a substantial amount of chemistry in their degree (such as those following a chemistry major program), are strongly encouraged to take CHM222H1 and CHM223H1.

Prerequisite: (CHM135H1/CHM139H1, CHM136H1/CHM138H1/CHM151Y1; (MAT135H1, MAT136H1)/MAT137Y1/MAT157Y1
Corequisite: Recommended co-requisite: MAT235Y1/MAT237Y1
Exclusion: CHM225Y1/CHM222H1, CHMB20H3, JCP221H5/CHM221H5
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)
CHM222H1 - Introduction to Physical Chemistry

Previous Course Number: CHM225Y1
Hours: 24L/12T

Topics: introductory thermodynamics, first and second law and applications; chemical equilibrium. The course is intended for students who will be following one of the chemistry specialist programs (including Biological Chemistry and Environmental Chemistry) or who will be including a substantial amount of chemistry in their degree (such as those following a chemistry major program).

Prerequisite: [(CHM135H1/CHM139H1, CHM136H1/CHM138H1)/CHM151Y1 with a minimum grade of 63%], (MAT135H1, MAT136H1)/MAT137Y1/MAT157Y1,(PHY131H1, PHY132H1)/(PHY151H1, PHY152H1)
Corequisite: MAT235Y1/MAT237Y1
Exclusion: CHM220H1/CHM225Y1, CHM221H5, JCP221H5
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes

CHM223H1 - Physical Chemistry: The Molecular Viewpoint

Previous Course Number: CHM221H1
Hours: 24L/12T

A continuation of CHM220H1 or CHM222H1 for students wishing to take some additional material in Physical Chemistry. The course covers topics in quantum mechanics and spectroscopy.

Prerequisite: CHM220H1 with a minimum grade of B, or CHM222H1
Corequisite: MAT235Y1/MAT237Y1 recommended, but may be required pre-requisite in 3rd year Chemistry courses
Exclusion: CHM225Y1/CHM222H1, CHM222H1
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes

NUS228H0 - Principles of Spectroscopy

Hours: 36L/12T/39P

Topics discussed include microwave spectroscopy, infrared spectroscopy, Raman spectroscopy, electronic spectroscopy, electron and nuclear spin resonance spectroscopy. The fundamental principles such as energy quantization, rigid rotors and harmonic oscillators are discussed, the techniques and instrumentation are studied, and the practical applications are emphasized.

Prerequisite: CHM135H1/CHM139H1/CHM151Y1; (PHY131H1, PHY132H1)/(PHY151H1, PHY152H1)
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes

CHM238Y1 - Introduction to Inorganic Chemistry

Hours: 48L/10T/52P

The first part (with CHM338H1) of a two-year sequence in Inorganic Chemistry, designed to illustrate and systematize the rich variety of structures, physical properties and reactions of compounds of the elements across and down the Periodic Table. Introduction to structure, symmetry and bonding of molecules and lattices; acid-base and redox reactions; d-metal complexes; chemistry of elements of the s and p blocks; inorganic materials and solid state chemistry with applications in advanced technologies. (Lab Materials Fee: $50).

Prerequisite: CHM151Y1/(CHM135H1/CHM139H1, CHM136H1/CHM138H1) with a minimum grade of 63%
Exclusion: CHM231H5
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes

NUS227H0 - Science at the Nanoscale

Hours: 48L/12T

Students are introduced to fundamental principles of physics and chemistry important to the nanoscale. Some basic physical tools that can be used to explore structures at this length scale are discussed. Linkages between the fundamental sciences and practical applications in nanotechnology are also made.

Prerequisite: CHM135H1/CHM139H1/CHM151Y1; (PHY131H1, PHY132H1)/(PHY151H1, PHY152H1)
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes

170
CHM247H1 - Introductory Organic Chemistry II

Hours: 36L/12T/22P

Reactions of organic compounds. Principles of mechanism, synthesis, and spectroscopy, continuing from CHM138H1. This course is recommended for students in life and health science programs that involve a small amount of chemistry. Students enrolled in any chemistry specialist program (including Biological Chemistry and Environmental Chemistry) or who will be including a substantial amount of chemistry in their degree (such as those following a chemistry major program) are strongly encouraged to take CHM249H1. (Lab Materials Fee: $25).

Prerequisite: (CHM135H1/CHM139H1, CHM136H1/CHM138H1)/CHM151Y1
Exclusion: CHM249H1, CHM243H5, CHMB42H3
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

CHM249H1 - Organic Chemistry

Hours: 36L/52P

An introductory course in organic chemistry, based around the themes of structure, bonding, reaction mechanism and synthesis. Reactions are discussed with a view to understanding mechanism and how they are useful in the multi-step synthesis of medicinally and industrially important compounds. An introduction to the spectroscopy of organic molecules is also given, as well as discussion of topics relating to the biological behaviour of organic molecules and medicinal chemistry. Students are also introduced to green chemistry approaches from an experimental perspective. This course continues from CHM151Y1 or CHM138H1 and is designed for students enrolled in any chemistry specialist or major program. This course is highly recommended for students in the Biological Chemistry Specialist program. (Lab Materials Fee: $25).

Prerequisite: CHM151Y1/(CHM135H1/CHM139H1, CHM136H1/CHM138H1) with a minimum grade of 63%
Exclusion: CHM247H1, CHM243H5, CHMB42H3
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

JCC250H1 - Computing for Science

Previous Course Number: CSC198H1
Hours: 24L/24T

Computational skills for the modern practice of basic and applied science. Applied computer programming with an emphasis on practical examples related to the simulation of matter, drawing from scientific disciplines including chemistry, biology, materials science, and physics. Studio format with a mixture of lecture, guided programming, and open scientific problem solving. Students will be exposed to Python numerical and data analysis libraries. No prior programming experience is required.

Prerequisite: CHM135H1/CHM136H1/CHM151Y1, 0.5 FCE in MAT (excluding FYF courses)
Corequisite: None
Exclusion: Any CSC course except CSC104H1, CSC196H1, CSC197H1
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

CHM299Y1 - Research Opportunity Program

Credit course for supervised participation in faculty research project. Details at https://www.artsci.utoronto.ca/current/academics/research-opportunities/research-opportunities-program. Not eligible for CR/NCR option.

Distribution Requirements: Science

JSC301H1 - Principles and Practices in Science Education

Hours: 24L

Fundamental principles and practices in education and public outreach in the sciences, mathematics, and engineering, including education research, curriculum, teaching, and assessment. Students will learn and apply effective strategies which engage and educate learners at the K-16 and public level. The course assignments include a project and/or placement experience.

Prerequisite: At least 8.0 credits, and enrolment in a science, mathematics, or engineering program
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)
CHM310H1 - Environmental Chemistry

Hours: 24L/12T

This course considers carbon-containing molecules in the environment from a variety of perspectives: the carbon cycle, climate change and ocean acidification; fossil fuels and alternative energy sources; and the partitioning and degradation pathways of organic chemicals.

Prerequisite: (CHM135H1/CHM139H1, CHM136H1/CHM138H1)/CHM151Y1, (MAT135H1, MAT136H1)/MAT137Y1/MAT157Y1

Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

CHM317H1 - Introduction to Instrumental Methods of Analysis

Hours: 24L/52P

Scope of instrumental analytical chemistry; Fourier transform IR absorption spectroscopy; molecular luminescence; emission spectroscopy; mass spectrometry; sensors; gas and high performance liquid chromatography; instrument design principles and applications in industry and the environment. (Lab Materials Fee: $25).

Prerequisite: CHM217H1 with a minimum grade of 63%; (MAT135H1, MAT136H1)/MAT137Y1/MAT157Y1
Exclusion: CHM391H5, CHMC11H3, CHMC16H3
Recommended Preparation: CHM220H1/CHM222H1, CHM221H1/CHM223H1/CHM225Y1

Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

CHM325H1 - Introduction to Inorganic and Polymer Materials Chemistry

Hours: 24L

Fashioned to illustrate how inorganic and polymer materials chemistry can be rationally used to synthesize superconductors, metals, semiconductors, ceramics, elastomers, thermoplastics, thermosets and polymer liquid crystals, with properties that can be tailored for applications in a range of advanced technologies. Coverage is fairly broad and is organized to crosscut many aspects of the field.

Prerequisite: CHM220H1/CHM222H1/CHM225Y, CHM238Y1, CHM247H1/CHM249H1
Exclusion: CHM426H1

Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

CHM326H1 - Introductory Quantum Mechanics and Spectroscopy

Hours: 24L/12T

This course introduces the postulates of quantum mechanics to develop the fundamental framework of quantum theory. A number of exactly soluble problems are treated in detail as examples. Perturbation theory is introduced in the context of understanding many body problems. Various applications to chemical bonding and molecular spectroscopy are covered in detail.

Prerequisite: (CHM220H1/CHM222H1/CHM225H1/CHM223H1)/CHM225Y1, MAT235Y1/MAT237Y1
Exclusion: JCP321H5

Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

CHM327H1 - Experimental Physical Chemistry

Hours: 12L/52P

Students are exposed to experiments to help them experience modern physical chemistry. Labs designed to illustrate physical chemistry principles and practical techniques as well as their real world state of the art applications. The course also involves some lecture material to broaden the laboratory experience. (Lab Materials Fee: $25).

Prerequisite: (CHM220H1/CHM222H1/CHM225H1/CHM223H1)/CHM225Y1 with a minimum grade of 63%
Corequisite: Recommended: CHM326H1 or CHM328H1

Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

CHM328H1 - Modern Physical Chemistry

Hours: 24L/12T

This course explores the microscopic description of macroscopic phenomena in chemistry. Statistical mechanics is introduced as the bridge between the microscopic and macroscopic views, and applied to a variety of chemical problems including reaction dynamics. More advanced topics in thermodynamics are introduced and discussed as required.

Prerequisite: (CHM220H1/CHM222H1/CHM225H1/CHM223H1/CHM225Y1, MAT235Y1/MAT237Y1
Exclusion: JCP322H5, CHMC20H3

Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)
NUS328H0 - Nanochemistry

Hours: 48L/12T

The synthesis, characterisation and application of nanostructures using chemical routes, incorporating various concepts from colloidal chemistry, supramolecular chemistry, polymer chemistry and electrochemistry. Applications of nanostructures such as quantum dots, nanoparticles, nanorods and nanowires in the areas of biosensors, bioimaging, LEDs and photonic crystals are highlighted.

Corequisite: NUS227H0
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes
(5)

CHM338H1 - Intermediate Inorganic Chemistry

Hours: 24L/52P

Further study of the structures, physical properties and reactions of compounds and transition metals. Introductions to spectroscopy and structural analysis, reaction mechanisms, d-block organometallic compounds, catalysis, and bioinorganic chemistry. The weekly laboratory demonstrates aspects of transition metal chemistry. (Lab Materials Fee: $25).

Prerequisite: CHM238Y1 with a minimum grade of 63%
Exclusion: CHM331H5
Recommended Preparation: CHM217H1, CHM247H1/CHM249H1
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes
(5)

CHM342H1 - Modern Organic Synthesis

Hours: 24L/12T

An overview of the preparation of various classes of organic compounds. Strategies and tactics of synthetic organic chemistry using examples from natural products and pharmaceuticals. C-C bond formation, functional group reactivity, structure, stereochemistry and selectivity.

Prerequisite: CHM247H1/CHM249H1
Exclusion: CHM345H5
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes
(5)

CHM343H1 - Organic Synthesis Techniques

Hours: 24L/52P

This laboratory course showcases modern organic synthesis techniques and introduces chemical research principles. It provides excellent preparation for a CHM499Y1 project in organic chemistry. Associated lectures teach theory and problem-solving approaches from a practical perspective and through industrial case studies. Green chemistry decision-making is a central theme of both the lecture and laboratory components. (Lab Materials Fee: $25).

Prerequisite: CHM247H1/CHM249H1 with a minimum grade of 63%
Exclusion: CHM393H5
Recommended Preparation: CHM342H1
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes
(5)

CHM347H1 - Organic Chemistry of Biological Compounds

Hours: 24L/12T

An organic chemical approach to the structure and reactions of major classes of biological molecules: carbohydrates, amino acids, peptides and proteins, phosphates, lipids, heterocycles, vitamins, nucleotides and polynucleotides. This is achieved through studies of advanced stereochemistry, chemical modification, reactions and synthesis. In addition to lectures and reading from texts, there will be opportunities for independent written assignments on several of the topics.

Prerequisite: CHM247H1/CHM249H1
Exclusion: CHM393H5, CHMC47H3
Recommended Preparation: CHM217H1
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes
(5)
CHM348H1 - Organic Reaction Mechanisms

Hours: 24L/26P

Principles and methods of analyzing and predicting organic chemical reactivity: advanced stereochemistry, conformational analysis, molecular orbitals, reaction kinetics, isotope effects, linear free energy relationships, orbital transformations, systematization of mechanisms. The laboratory section is used to illustrate the operation of the principles, including examples of data acquisition for mechanistic analysis and theoretical computations. Regular original reports on methods and outcomes are an important part of the laboratory. (Lab Materials Fee: $25).

Prerequisite: CHM247H1/CHM249H1 with a minimum grade of 63%
Exclusion: CHM341H5, CHM241H3
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

CHM379H1 - Biomolecular Chemistry

Hours: 24L/52P

This course provides an opportunity to learn core techniques in biological chemistry in a small group laboratory setting. It provides excellent preparation for a CHM499Y1 project in biological chemistry or related areas. Lectures will discuss the theory behind the techniques and highlight how they are used in modern biological chemistry research and practice. Note: CHM379H1 can be used as the biochemistry lab requirement for students completing double majors in chemistry and biochemistry. (Lab Materials Fee: $25).

Prerequisite: (CHM247H1/CHM249H1 with a minimum grade of 63%), CHM347H1, BCH210H1
Exclusion: BCH370H1, CHM371H5
Recommended Preparation: CHM217H1
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

CHM395Y1 - Research Project in Chemistry

Hours: 180P

An independent research project conducted under the direction of a teaching faculty or research faculty member in the Department of Chemistry. Applications for enrolment should be made to the Department before the end of the preceding Summer session. Not eligible for CR/NCR option.

Prerequisite: Completion of at least 2.0 FCEs of CHM courses with a minimum cGPA of 3.0 in all CHM courses. Students are required to identify a potential faculty supervisor before contacting the Associate Chair, Undergraduate Studies for enrolment permission. Written confirmation is needed from both the Associate Chair, Undergraduate Studies and the prospective supervisor. Attendance at a mandatory safety orientation training session held during the first week of September.

Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

CHM396Y0 - Research Topic Abroad

Course credit for research or field studies abroad under the supervision of a faculty member. Not eligible for CR/NCR option.

Prerequisite: At least 8.5 FCEs and no more than 14.0 FCEs including at least 1.5 FCEs in 2nd Year chemistry courses, or permission of the instructor.
Recommended Preparation: CHM299Y1
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

CHM397H0 - Research Abroad in Chemistry

Independent research project in Chemistry under the supervision by a faculty member in an approved partner institution. This unique opportunity to conduct a lab-based research project is open to students in any Chemistry programs. Not eligible for CR/NCR option.

Prerequisite: Any CHM 300-level courses with lab; permission of the Department
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

CHM398H0 - Research Excursions

Distribution Requirements: Science
CHM398Y0 - Research Excursions

Distribution Requirements: Science

NUS398H0 - Nanoscience Research

Hours: 130P

An experimental or theoretical research problem in nanoscience under the supervision of a faculty member. Not eligible for CR/NCR option.

Distribution Requirements: Science

CHM410H1 - Analytical Environmental Chemistry

Hours: 24L/44P

An analytical theory, instrumental, and methodology course focused on the measurement of pollutants in soil, water, air, and biological tissues and the determination of physical/chemical properties including vapour pressure, degradation rates, partitioning. Lab experiments involve application of theory. (Lab Materials Fee: $25).

Prerequisite: CHM217H1, CHM210H1/CHM310H1
Recommended Preparation: CHM317H1
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

CHM414H1 - Biosensors and Chemical Sensors

Hours: 24L

The development, design, and operation of biosensors and chemical sensors, including: biosensor technology, transducer theory and operation, device design and fabrication, surface modification and methods of surface analysis, flow injection analysis and chemometrics.

Prerequisite: CHM217H1/CHM220H1/CHM222H1/CHM225Y1
Recommended Preparation: CHM317H1
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

CHM415H1 - Topics in Atmospheric Chemistry

Hours: 24L

This course builds upon the introductory understanding of atmospheric chemistry provided in CHM210H. In particular, modern research topics in the field are discussed, such as aerosol chemistry and formation mechanisms, tropospheric organic chemistry, the chemistry of climate including cloud formation and geoengineering, biosphere-atmosphere interactions, the chemistry of remote environments. Reading is from the scientific literature; class discussion is emphasized.

Prerequisite: (CHM220H1/CHM222H1/CHM225Y1),CHM210H1
Recommended Preparation: (PHY131H1, PHY132H1)/(PHY151H1, PHY152H1)
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

CHM416H1 - Separation Science

Hours: 24L

This course provides theoretical and practical background useful for engaging in cutting-edge chemical separations in chemistry, biology, medicine, engineering, research, and industry. The course covers general separations concepts and principles, with an emphasis on liquid chromatography and its various modes, including partition chromatography, ion chromatography, enantiomer chromatography, size exclusion chromatography, and affinity chromatography. Other topics include materials and instrumentation, gas chromatography, supercritical fluid chromatography, electrophoresis and related techniques, and a host of miscellaneous separation (e.g., TLC, FFF, CF) and extraction (e.g., LLE, SPE, SPME) modalities. Classes are supplemented with online/virtual laboratory exercises.

Prerequisite: CHM317H1
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)
CHM417H1 - Laboratory Instrumentation

Hours: 24L/10P

This course provides an introduction to building and using optics- and electronics-based instrumentation for laboratory research, as well as for implementing custom software control. Lecture topics include passive electronic components, diodes and transistors, operational amplifiers, analogue-to-digital conversion, light sources and detectors, reflectors, refractors, polarizers, diffractors, and many others. Lectures are supplemented by laboratories in which students work in teams to build fluorescent detection systems for chromatography over the course of several weeks. (Lab Materials Fee: $25).

Recommended Preparation: CHM317H1
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes

CHM427H1 - Statistical Mechanics

Hours: 24L

Ensemble theory in statistical mechanics. Applications, including imperfect gases and liquid theories. Introduction to non-equilibrium problems.

Prerequisite: CHM326H1, CHM328H1
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes

CHM432H1 - Organometallic Chemistry and Catalysis

Hours: 24L

Structure, bonding, and reactions of organometallic compounds, with emphasis on basic mechanisms, and industrial processes. Addition, metatation, elimination, important catalytic cycles, electrophilic, and nucleophilic reactions are considered on a mechanistic basis. Topics on modern organometallic chemistry and catalysis are covered.

Prerequisite: CHM336H1
Recommended Preparation: CHM348H1
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes

CHM423H1 - Applications of Quantum Mechanics

Hours: 24L

Applications of time independent and time dependent perturbation theory to atomic and molecular problems, selection of topics from WKB approximation and the classical limit; the interaction of light with matter; elementary atomic scattering theory; molecular bonding.

Prerequisite: CHM326H1
Recommended Preparation: MAT223H1
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes

CHM426H1 - Polymer Chemistry

Hours: 24L/12T

Prerequisite: CHM220H1/CHM222H1/CHM225Y1, CHM247H1/CHM249H1
Recommended Preparation: CHM325H1
Breadth Requirements: The Physical and Mathematical Universes

CHM434H1 - Advanced Materials Chemistry

Hours: 24L

A comprehensive investigation of synthetic methods for preparing diverse classes of inorganic materials with properties intentionally tailored for a particular use. Begins with a primer on solid-state materials and electronic band description of solids followed by a survey of archetypical solids that have had a dramatic influence on the materials world, some new developments in materials chemistry and a look at perceived future developments in materials research and technology. Strategies for synthesizing many different classes of materials with intentionally designed structures and compositions, textures and morphologies are then explored in detail emphasizing how to control the relations between structure and property of materials and ultimately function and utility. A number of contemporary issues in materials research are critically evaluated to appreciate recent highlights in the field of materials chemistry - an emerging sub-discipline of chemistry.

Prerequisite: CHM325H1, CHM338H1
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes
CHM437H1 - Bioinorganic Chemistry

Hours: 24L

This course examines the use of metals in biology. Topics include naturally occurring and medicinal ligands; transport, uptake and control of concentration of metal ions; and physical methods of characterization of metal binding sites. The roles of metal ions in nature are discussed, including as structural and signaling elements in proteins, nucleic acids and DNA-binding complexes and proteins; as Lewis-acid centres in enzymes; as carriers of electrons, atoms and groups in redox proteins and enzymes; and as sources of biominerals; as radiopharmaceuticals.

Prerequisite: CHM238Y1
Exclusion: CHM333H5, CHMD69H3
Recommended Preparation: CHM338H1 (strongly recommended), CHM347H1/CHM379H1
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

CHM440H1 - The Synthesis of Modern Pharmaceutical Agents

Hours: 24L

This course provides an overview of reactions and synthetic strategies that are being used at different stages of the drug development process. Using representative examples from the literature, we will concentrate on synthesis of complex heterocyclic compounds.

Prerequisite: CHM342H1
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

CHM441H1 - Spectroscopic Analysis in Organic Chemistry

Hours: 24L/20P

Structure and stereochemistry determination using modern spectroscopic techniques. Several techniques are discussed but particular emphasis is given to NMR (1H and 13C NMR) and mass spectrometry. The approach taken emphasizes applications of these spectroscopic methods to organic problems. Students are trained to run their own spectra (IR, UV, NMR, GC-MS). (Lab Materials Fee: $25).

Prerequisite: CHM249H1, CHM343H1
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

CHM443H1 - Physical Organic Chemistry

Hours: 24L

Noncovalent binding forces, solutions, and molecular recognition. Electronic structure theory and computational techniques. Reaction mechanisms: experimental probes and reactive intermediates, including carbenes and radicals. Photophysics and photochemistry of organic compounds.

Prerequisite: CHM220H1/CHM222H1/CHM225Y1, CHM348H1
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

CHM446H1 - Organic Materials Chemistry

Hours: 24L

This course covers design, synthesis, characterization and application of organic materials. Emphasis is placed on classic examples of organic materials including semiconducting polymers, molecular devices, self-assembled systems, and bioconjugates, as well as recent advances from the literature.

Prerequisite: CHM247H1/CHM249H1, CHM220H1/CHM222H1/CHM225Y1
Recommended Preparation: CHM325H1, CHM342H1/CHM343H1
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

CHM447H1 - Bio-organic Chemistry

Hours: 24L

Mechanisms in biochemical systems: Examples of biological catalysis are considered in terms of chemical mechanisms and their extensions, overcoming barriers catalytic groups in active sites, stereocchemical applications, energy transfer, kinetic patterns, inhibitors, drug design, cofactors, ribozymes, proteosomes. Related current issues are noted and discussed. The format includes lectures integrated with in-class discussions.

Prerequisite: CHM347H1, CHM348H1
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)
CHM479H1 - Biological Chemistry

Hours: 24L

An in depth examination of biological systems at the molecular level. Several complex, multi-component molecular machines with a central role in life will be examined. For each system studied, the focus will be on understanding the chemical mechanisms that underlie the biological activities, and how these processes fit into a cellular context.

**Prerequisite:** BCH210H1/BCH242Y1, CHM347H1

**Distribution Requirements:** Science

**Breadth Requirements:** The Physical and Mathematical Universes (5)

CHM499Y1 - Introduction to Chemistry Research

Hours: 240P/16S

An experimental or theoretical research problem under the supervision of a teaching faculty or research faculty member in the Department of Chemistry. Five mandatory 90-minute professional development workshops cover aspects of academic writing, poster presentations, reading scientific literature, and job applications/interviews. Each student is required to attend a total of six one-hour research colloquia during the Fall and Winter Sessions. Applications for enrolment should be made to the Department in the preceding Winter Session with the deadline being the Friday before Reading Week: the application form is available at the Department of Chemistry website. Students are notified with the results of their application by the last week of March. Only students being admitted are required to contact chemistry faculty to discuss available research projects. Projects are in the areas of environmental, analytical, physical, inorganic, materials, polymer, organic and biological chemistry. Not eligible for CR/NCR option.

**Prerequisite:** Permission of the department. Minimum cGPA of 3.0 in CHM program courses. Research positions are limited. Students with strong background on courses in the sub-discipline of research interest will be given preference. Attendance at a mandatory safety orientation training session held during the first week of September.

**Exclusion:** CHM489Y5, CHMD90Y3, MSE498Y1, PHC489Y1

**Distribution Requirements:** Science

**Breadth Requirements:** The Physical and Mathematical Universes (5)
Introduction

At the dawn of the twentieth century cinema emerged as a new mass entertainment, a source of information, and a product of economic and social power. Cinema adapted to and absorbed novel technologies, such as sound, color, 3-D, and, later, digital techniques at a rapid pace. As shifting political and economic forces came into play, cinema continued to assume a key role in moving-image culture. During its history, cinema has absorbed seismic shocks in ideas and ideologies, and responded to the shifting politics of race, gender, class, and sexuality that have defined modern society. Now, in the early years of the twenty-first century, an evolving mediascape driven by digital technologies offers exciting opportunities to assess the ever-changing role of cinema across global cultures.

Because of its status as a major art form and a vital social practice, cinema has assumed a crucial place within the university. The Cinema Studies Institute has, over four decades, developed into a center of the discipline both in Canada and internationally.

Cinema Studies offers courses that reflect the diversity of cinematic experience: film analysis, history, social practice, and theory are at the core of the program. Other topics also receive emphasis, including distinct types of film (such as documentary, animation, and the avant-garde), film genres, media cultures, and new media forms. Our courses explore the global dimension of cinema, investigating national and transnational cinema. They raise issues of how race, class, and gender operate in moving image culture. Cinema Studies offers a range of research methods, scholarly frameworks, and learning opportunities; all are designed to develop students’ abilities to understand cinema within a wide range of contexts — critical, economic, cultural, technological, and aesthetic. Graduates of the Cinema Studies Institute achieve learning outcomes that include a strong historical and theoretical foundation coupled with advanced analytical and critical skills. Our graduates are well-equipped to apply their knowledge to a variety of media-related careers and avocations. They have become arts and entertainment journalists, film programmers, and image archivists, and have found a diversity of positions within the film, television, and new media sectors.

Cinema Studies does not offer courses in filmmaking, but numerous graduates have successfully pursued professional work in different facets of film and media production.

Since its inception, Cinema Studies has had its administration, teaching, and research home at Innis College, which also houses its faculty. Innis offers specially-equipped facilities and a cordial and intimate setting for cinema students. For more information about Innis College, go to innis.utoronto.ca.

Enquiries: Undergraduate Program Assistant, Room 232AE, Innis College (416-978-8571), cinema.studies@utoronto.ca, or the Cinema Studies website, cinema.utoronto.ca.

Cinema Studies Institute

Programs

Cinema Studies Specialist (Arts Program) - ASSPE0797

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

Variable Minimum Grade
A minimum grade is needed for entry, and this minimum changes each year depending on available spaces and the number of applicants. The following courses must be completed:

- CIN105Y1 or CIN201Y1

To ensure that students admitted to the program will be successful, applicants with a final grade lower than 70% will not be considered for admission. Please note that obtaining this minimum final grade does not guarantee admission to the program.

Completion Requirements:

(10.0 credits)

First Year:
- CIN105Y1

Second Year:
- CIN201Y1

Third Year:
- CIN301Y1

Fourth Year:

1.0 credit from the following: CIN410H1, CIN411H1, CIN412H1, CIN420H1, CIN430H1, CIN431H1, CIN432H1, CIN440H1, CIN450H1, CIN451H1, CIN452H1, CIN460H1, CIN470H1, CIN471H1, CIN472H1, CIN480H1

Second, Third and Fourth Year:
In addition, CIN230H1 or a 0.5 credit from Breadth Category 5; and at least 5.5 credits from Groups B through G, of which 3.0 credits must be at the 300/400-level, and a maximum of 2.0 credits can be from Group G: Cross-Listed

Students must complete CIN105Y1, CIN201Y1 and CIN301Y1 before taking any fourth-year courses.
Cinema Studies Major (Arts Program) - ASMAJ0797

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

Variable Minimum Grade
A minimum grade is needed for entry, and this minimum changes each year depending on available spaces and the number of applicants. The following courses must be completed:

- CIN105Y1 or CIN201Y1

To ensure that students admitted to the program will be successful, applicants with a final grade lower than 70% will not be considered for admission. Please note that obtaining this minimum final grade does not guarantee admission to the program.

Completion Requirements:

(7.0 credits)

First Year:
CIN105Y1
Second Year:
CIN201Y1
Third Year:
CIN301Y1
Fourth Year:
0.5 credit from the following: CIN410H1, CIN411H1, CIN412H1, CIN420H1, CIN430H1, CIN431H1, CIN432H1, CIN440H1, CIN450H1, CIN451H1, CIN452H1, CIN460H1, CIN470H1, CIN471H1, CIN472H1, CIN480H1

Second, Third and Fourth Year:
In addition, CIN230H1 or 0.5 credit from Breadth Category 5; and at least 3.0 credits from Groups A through G, of which 2.0 credits must be at the 300/400-level, and only a maximum of 1.5 credits can be from Group G: Cross-Listed

Students must complete CIN105Y1, CIN201Y1 and CIN301Y1 before taking any fourth-year courses.

Course Groups

Group A: Foundations

- CIN105Y1 Introduction to Film Study
- CIN201Y1 Film Cultures I: Art and Industry
- CIN301Y1 Film Cultures II: Politics and Global Media

Group B: Genre and Modes

- CIN210H1 Horror Film
- CIN211H1 Science Fiction Film
- CIN212H1 Cinema and Sensation I: Action/Spectacle
- CIN213H1 Cinema and Sensation II: Sex
- CIN215H1 Fantasy Film
- CIN216H1 Crime Film Traditions
- CIN310Y1 Avant-Garde and Experimental Film
- CIN312Y1 Documentary Film
- CIN314Y1 Genre, Narrative and Narration in Film
- CIN320H1 Special Topics in Genre and Modes
- CIN322H1 Cult Cinema
- CIN410H1 Advanced Study in Genre and Modes
- CIN411H1 Advanced Study in Genre and Modes
- CIN412H1 Advanced Study in Genre and Modes
- CIN420H1 Advanced Studies in Cinema

Group C: Social and Cultural Practices

- CIN230H1 The Business of Film
- CIN240H1 Special Topics in Cinema Studies
- CIN330Y1 Feminist Approaches to Cinema
- CIN332Y1 Screening Race
- CIN334H1 The Origins of the Animation Industry, 1900-1950: A Technosocial History
- CIN335H1 American Animation after 1950
- CIN336H1 Queer Film and Media
- CIN340H1 Special Topics in Cinema as Social and Cultural Practice
- CIN349H1 Screenwriting
- CIN430H1 Advanced Study in Cinema as Social and Cultural Practice
- CIN431H1 Advanced Study in Cinema as Social and Cultural Practice

• HIS460H1 Soviet History and Film, 1941-1991
• HIS467H1 French Colonial Indochina: History, Cultures, Texts, Film
• SLA226H1 Film and Ethics: Polish Cinema
• SLA234H1 Russian and Soviet Cinema
• SLA333H1 Animated Film in Europe
• SLA355H1 Contemporary Celtic Cinema
• JSU325H1 Queerly Canadian

Cinema Studies Institute Courses

CIN105Y1 - Introduction to Film Study

Hours: 24L/24T/72P

Introduction to film form (including style and narration), different types of films, and popular approaches to the study of cinema. Topics include: narrative cinema, documentary, avant-garde, genre, authorship, ideology, and representation.

Exclusion: INI115Y1

Distribution Requirements: Humanities

Breadth Requirements: Creative and Cultural Representations (1)

CIN196H1 - Story Worlds and the Cinema

Hours: 24S

Films create story worlds, imaginary environments in which characters live and act, and where events, large and small, transpire. Some story worlds are elaborate, fanciful constructs (think of Disney’s animated films). Others stay close to reality (think of “docudramas”). But across the spectrum, all of them are framed by and provided with rules of time and space, of believable or impossible. This course offers an examination of selected story worlds from several periods of film history. Emphasis falls on the expansive story worlds of contemporary corporately-run media-franchise “universes,” like the cross-media “DC Universe.” Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Humanities

Breadth Requirements: Creative and Cultural Representations (1)
### CIN197H1 - School Daze

**Hours:** 24P/24S

This first-year foundation course is a survey of sound film (with a brief selection of silent shorts) on the topic of how popular cinemas have represented going to school. Looking at one film and one scholarly text a week, the course will offer an introduction to the close reading of film texts, reading and writing film criticism, and the fundamentals of film history. By engaging with only one film/reading per week, the course emphasizes depth over breadth. Texts for the course may include excerpts from Corrigan's *A Short Guide to Writing About Film*, Sturken and Cartwright's *Practices of Looking*, Staiger's *Interpreting Films*, and Prince's *Movies and Meaning*, along with selected criticism on the movies screened. Those films may include *Zero for Conduct, Aparajito, Tom Brown's School Days, Tea and Sympathy, If, Rock and Roll High School, Mean Girls, School Daze, Blackboard Jungle*, or *Lady Bird*. Restricted to first-year students. Not eligible for CR/NCR option.

**Distribution Requirements:** Humanities  
**Breadth Requirements:** Creative and Cultural Representations (1)

### CIN201Y1 - Film Cultures I: Art and Industry

**Hours:** 24L/24T/72P

Examines the practices, theories, and debates surrounding the emergence of cinema through to the development of studio system filmmaking in the first half of the 20th Century. Topics include: film's relation to the other arts, formalist and realist traditions, technological innovations, audiences and reception, and cultural industries.

**Prerequisite:** CIN105Y1  
**Exclusion:** INI212Y1, INI215Y1  
**Distribution Requirements:** Humanities  
**Breadth Requirements:** Creative and Cultural Representations (1); Thought, Belief and Behaviour (2)

### CIN210H1 - Horror Film

**Hours:** 12L/12T/36P

Horror film as a genre, focusing on three types of international horror: the un-dead, body horror, and the supernatural. The genre's popular appeal, affective power, unique means of producing pleasure, and current global resurgence will be emphasized. Topics include: the aesthetics of gore and violence, technologies of fear, J-Horror, new French extremity, cult fandom and paracinema, and media convergence.

**Exclusion:** INI226H1  
**Distribution Requirements:** Humanities  
**Breadth Requirements:** Creative and Cultural Representations (1)

### CIN211H1 - Science Fiction Film

**Hours:** 12T/36P

This course is the study of science fiction films in their cultural and political contexts and the genre's narrative and conceptual components. The goal of the course is to familiarize students with science fiction films as popular genre texts, emphasizing the period between 1950 and the present.

**Exclusion:** INI227H1  
**Distribution Requirements:** Humanities  
**Breadth Requirements:** Creative and Cultural Representations (1)

### CIN212H1 - Cinema and Sensation I: Action/Spectacle

**Hours:** 12L/12T/36P

Action movies cement the dominance of commercial cinema, and they largely define the contemporary era of the blockbuster and CGI effects. This course examines the narrative modes and the extremes that action scenes reach, and it explores the commercial and social function of the genre. The course also traces Action's historic reach and global diversity to include its significant precursors and transnational forms that Action cinema takes on.

**Exclusion:** INI222H1  
**Distribution Requirements:** Humanities  
**Breadth Requirements:** Creative and Cultural Representations (1)

### CIN213H1 - Cinema and Sensation II: Sex

**Hours:** 12L/12T/36P

Erotic images and sounds have long featured in filmic pleasure and, for just as long, excited controversy. This course examines how sex is articulated on screen and how its regulation suggests broader themes and ideas. Topics include: obscenity laws and the history of film censorship, the eroticized aspects of conventional movies, art cinema, and "adult" erotic films.

**Exclusion:** INI223H1  
**Distribution Requirements:** Humanities  
**Breadth Requirements:** Creative and Cultural Representations (1)
CIN214H1 - New Media Forms

**Previous Course Number:** CIN260H1  
**Hours:** 36L/12T

Introduction to the study of new and contemporary media forms, with a focus on aesthetic and moving-image media. Students will learn key concepts in digital media studies through close examination of historical and contemporary examples from art, cinema, video, and games. Course readings draw on interdisciplinary critical models from cinema studies, cultural studies, art history, and digital media studies.

**Exclusion:** CIN260H1 (Topics: New Media), offered in Winter 2014, Fall 2014, and Fall 2016  
**Distribution Requirements:** Humanities  
**Breadth Requirements:** Creative and Cultural Representations (1)

CIN215H1 - Fantasy Film

**Hours:** 12L/12T/36P

This course examines the development of the Fantasy imagination in cinema from the start of film production (i.e., George Melies) through the classical era (i.e., Wizard of Oz) to the contemporary proliferation of Fantasy cinema (i.e., Lord of the Rings, Snow White and the Huntsman). Course includes study of Asian, European, and South American Fantasy films.

**Distribution Requirements:** Humanities  
**Breadth Requirements:** Creative and Cultural Representations (1)

CIN216H1 - Crime Film Traditions

**Hours:** 12L/12T/36P

Originating in the mid-19th century from journalistic accounts and detective stories, crime fiction has emerged as one of the dominant popular genres in the 20th century across a variety of media and platforms, from true crime dime novels to radio dramas, from hard-boiled literature to prestige television series. Rejuvenated in the 21st century by the consolidation of gaming culture and the rise of podcasting, crime narratives have expanded to transmediality, stretching the boundaries between fiction and documentary practices. In this context, the culturally porous and generically elastic crime film had remained one of the most enduring cinematic expressions of sociopolitical anxieties related to class, gender, race, and ethnicity. This course examines a selection of crime film traditions across various geographical areas and historical periods, investigating the resilience of this form from the silent period to the present day.

**Distribution Requirements:** Humanities  
**Breadth Requirements:** Creative and Cultural Representations (1)

CIN230H1 - The Business of Film

**Hours:** 36L/12T

Examines cinema as a commercial enterprise, emphasizing production, distribution, and exhibition and the political economy of North American film culture.

This is a Breadth Category 3 course but has been specially-designed to fulfill the Quantitative Reasoning requirement for Cinema Studies Specialists and Majors.

**Exclusion:** INI228H1  
**Distribution Requirements:** Humanities; Social Science  
**Breadth Requirements:** Society and its Institutions (3)

CIN240H1 - Special Topics in Cinema Studies

**Hours:** 12L/12T/36P

Course on special topics in Cinema Studies. Topics vary each year.

**Distribution Requirements:** Humanities  
**Breadth Requirements:** Society and its Institutions (3)

CIN250Y1 - Directors: Four Studies in Film Authorship

**Hours:** 48L/48P

This course takes four selected directors' films and examines them analytically and interpretively. The purpose of the course is to apply and test the *auteur* theory in the context of concepts of film style and film conventions.

**Prerequisite:** CIN105Y1  
**Exclusion:** INI224Y1  
**Distribution Requirements:** Humanities  
**Breadth Requirements:** Creative and Cultural Representations (1)

CIN260H1 - Selected Topics in Cinema Studies

**Hours:** 12L/12T/36P

Course on selected topics in Cinema Studies. Past topics include: "New Media."

**Distribution Requirements:** Humanities  
**Breadth Requirements:** Creative and Cultural Representations (1)
CIN270Y1 - American Popular Film Since 1970

Hours: 48L/24T/48P

The examination of popular American cinema through its social, political, and commercial practices, and through the study of selected popular films from the 1970s to the present.

Exclusion: INI225Y1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1); Society and its Institutions (3)

CIN301Y1 - Film Cultures II: Politics and Global Media

Hours: 24L/24T/72S

Examines film theory and practice from the 1950s onward, and the impact of media change on earlier film cultures and aesthetics. Topics include: New Wave cinemas, the politicization of theory, spectatorship, counter-cinemas, transnational film and "Global Hollywood", and media theory from the analog to the digital.

Prerequisite: CIN105Y1, CIN201Y1
Exclusion: INI214Y1, INI314Y1, INI315Y1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1); Thought, Belief and Behaviour (2)

CIN310Y1 - Avant-Garde and Experimental Film

Hours: 48L/72P

Avant-garde films, both canonical and marginal, are examined mainly in the context of modern art and poetry from the 1920s through the 1990s. Films include works from Europe, North America, and Japan. Art contexts range from Cubism, Dada, and Surrealism in the 1920s to Neo-Dada, Abstract Expressionism, Pop, and Postmodernism.

Prerequisite: CIN105Y1
Exclusion: INI322Y1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

CIN312Y1 - Documentary Film

Hours: 48L/48P

Critical and historical survey of documentary practice, including cinema verité, ethnographic experiments, and various hybrid forms, with emphasis on the rhetorical, aesthetic, and political dimensions of the "art of record." Topics include: the filmmaker/subject/audience nexus; historiography, hagiography, and performance; and how emerging technology and new media platforms, evinced in the rise of documentary-based webdocs, i-docs, and webgames, affect the actual production and style of linear documentary, as well as impact earlier models of documentary exhibition, distribution, and viewer engagement alike.

Prerequisite: CIN105Y1
Exclusion: INI325Y1
Recommended Preparation: CIN201Y1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1); Society and its Institutions (3)

CIN314Y1 - Genre, Narrative and Narration in Film

Hours: 48L/72P

Study of theoretical-analytical models of film genres, narrative form, and narration. Structuralist, cognitive-neoformalist, and historiographical approaches will be developed. Genres to be studied include: Westerns, musicals, crime films, biography films, gothic and fantastic films, and art cinema.

Prerequisite: CIN105Y1
Exclusion: INI329Y1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1); Thought, Belief and Behaviour (2)

CIN320H1 - Special Topics in Genre and Modes

Hours: 24L/24P

Courses in special topics designed for Specialists and Majors in Cinema Studies. Past topics include: “Contemporary Screen Comedy,” and "Eco-cinema: The Nature of Film.”

Prerequisite: CIN105Y1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)
CIN322H1 - Cult Cinema

Hours: 24L/24P

This course examines "cult" and "exploitation" cinema. It examines the growing popularity of cult/exploitation films as an emerging cinematic subculture that valorizes disreputable or "trash" cinema. A number of sub-genres within exploitation film, including teen films, educational/instructional films, sexploitation, and Blaxploitation, will be explored. The social politics of appropriating texts through ironic reading strategies will also be considered.

Prerequisite: CIN105Y1
Exclusion: INI396H1F (2011), CIN320H1F (20145), CIN320H1S (2016)
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

CIN330Y1 - Feminist Approaches to Cinema

Hours: 48L/48P

Gender politics of feminist film culture since the 1970s. Topics include: apparatus theory and its legacy, models of spectatorship, feminist historiography, the cinematic (re)production of identity, the relationship between social movements and cinema, "postfeminism."

Prerequisite: CIN105Y1/ permission of instructor
Exclusion: INI323Y1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1); Thought, Belief and Behaviour (2)

CIN332Y1 - Screening Race

Hours: 48L/48P

How race functions in cinema. Topics include: the foundational role of racial inscription and its expansion beyond the black/white paradigm, visual ethnography, 'the primitive,' and Orientalism, indigenous media, the "Black Atlantic" and Diaspora, Banlieu and exilic film practice and theory, border aesthetics, race and urban space, "post-race", and the evolving racial imaginary.

Prerequisite: CIN105Y1, CIN201Y1
Exclusion: INI327Y1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1); Thought, Belief and Behaviour (2)

CIN334H1 - The Origins of the Animation Industry, 1900-1950: A Technosocial History

Previous Course Number: INI383H1
Hours: 24L/36P

An introduction to early animation, considering its vaudeville roots, industrialization, emerging aesthetics, and representational tropes. Examination of the early corpus of animation from 1900-1950, and in-depth study of the artistic, social, and cultural milieux from which animation derived.

Prerequisite: CIN105Y1, CIN201Y1
Exclusion: INI383H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

CIN335H1 - American Animation after 1950

Hours: 24L/36P

This course examines the second fifty years of animation, first by marking Disney's shifting fortunes, then broadening the scope to take in its competitors here and abroad. The global nature of postwar animation has been an odd amalgam of competition and cooperation, of private and public funding, and of film, television, and eventually webcasting, and we will explore some of the changes the form has gone through in the past fifty years or so. Since this is a study of art and of commerce, and of high and low culture, we will view our limited history through the lenses of aesthetics, cultural practices, business decisions, and sometimes political struggle.

Prerequisite: CIN105Y1, CIN201Y1
Exclusion: INI396H1S (2013), CIN320H1S (2014)
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

CIN336H1 - Queer Film and Media

Hours: 48L

This course focuses on queer film, television, and/or digital media. Approaches may include cultural, historical, analytical, critical, and theoretical methods. This course may focus on the representation of queer people in film in media, or film and/or media made by queer people, or both.

Prerequisite: CIN105Y1, or 1.0 FCE from SDS255H1, SDS256H1, SDS279H1, SDS355H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)
CIN340H1 - Special Topics in Cinema as Social and Cultural Practice

Hours: 24L/24P

Courses in special topics designed for Specialists and Majors in Cinema Studies. Past topics include: "History of Cinematography," and "Everyday Life in the Digital Age."

Prerequisite: CIN105Y1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

CIN349H1 - Screenwriting

Hours: 24S

Students will develop screenwriting skills under the guidance of a renowned screenwriter-in-residence through a combination of writing workshops and individual consultations. Like the course, the appointment of the Universal Screenwriter-in-Residence occurs biannually.

Prerequisite: CIN105Y1, CIN201Y1, and two additional Cinema Studies full-course equivalents
Exclusion: INI388H1, VIC276H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

CIN352H1 - Issues in Film Authorship I

Hours: 24L/24P

Advanced study of issues in film authorship through intensive examination of one or more major filmmakers.

Prerequisite: CIN105Y1
Exclusion: INI374H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

CIN353H1 - Issues in Film Authorship II

Hours: 24L/24P

Advanced study of issues in film authorship through intensive examination of one or more major filmmakers.

Prerequisite: CIN105Y1
Exclusion: INI375H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

CIN360H1 - Special Topics in Theory and Criticism

Hours: 24L/24P

Courses in special topics designed for Specialists and Majors in Cinema Studies. Past topics include: "Cinema and Intermediality."

Prerequisite: CIN105Y1, CIN201Y1
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

CIN362H1 - Animals and Cinema

Hours: 24L/24P

This course explores cinema's century-long fascination with animals. Its investigations are organized around three central questions. First, what does cinema teach us about animals (why and how we look at animals on film, how we represent and understand animals through film, and what lessons we hope to gain from animals on film)? Second, what do animal films reveal or teach us about the cinema? Third, what are the aesthetic, theoretical, and ethical stakes of such encounters between animals and cinema?

Prerequisite: CIN105Y1, CIN201Y1
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

CIN363H1 - Ecocinema: The Nature of Film

Hours: 2L/2P

This course takes a broad approach to the growing field – sometimes termed “ecocinema” or “film ecology” – devoted to cinema’s relationship to the natural environment. We will consider that relationship through a combination of historical, textual, and theoretical analysis.

Prerequisite: CIN105Y1, CIN201Y1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)
CIN364H1 - Theories of Media

Hours: 48L

In-depth history of humanistic theories of media and mediation, with a focus on aesthetics. Authors discussed may include Karl Marx, Walter Benjamin, Sigmund Freud, Marshall McLuhan, Friedrich Kittler, Donna Haraway, Bernard Stiegler, Katherine Hayles, and others. Includes substantial discussion of contemporary problems and authors in digital media studies and media theory. Includes extensive consideration of aesthetic forms, including animation, cinema, television, installation art, video games, net.art, and others.

Prerequisite: CIN105Y1
Recommended Preparation: CIN214H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

CIN369H1 - Critical Writing on Film

Hours: 48L

The practice of film criticism: studies of examples of journalistic and scholarly critical writing, practical sessions of process writing, and collaborative editing. Course includes regular film screenings.

Prerequisite: CIN105Y1 and one additional Cinema Studies full-course equivalent/ permission of the instructor
Exclusion: INI384H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

CIN370H1 - Canadian Cinemas

Hours: 24L/24P

History and diversity of Canadian and Québécois cinemas. Analyses of film and critical frameworks examine how co-productions, multiculturalism, and post-national arguments are re-shaping the production and reception contexts of national cinema. Annual emphasis will be placed on one of the following topics: the emergence of the feature film, Québécois cinema, documentary, or experimental cinema.

Prerequisite: CIN105Y1
Exclusion: FCS391H1, INI385Y1, INI385H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

CIN371H1 - (New) Media Aesthetics

Previous Course Number: CIN340H1

Hours: 48L

Investigates the theory and history of media technologies as sites of aesthetic investment in a wide variety of artistic practices, focusing on contemporary digital media work, including experimental cinema, gallery installation, net.art, and avant-garde videogames. One important emphasis lies in the aesthetic possibilities new (and newly inexpensive) media technologies have made available to marginalized artists, including especially women and queer artists. We will study the work of Maya Deren, John Cage, Tony Conrad, Yoko Ono, Jack Smith, Andy Warhol, Michael Snow, Marina Abramovic, Marlon Riggs, Felix Gonzales-Torres, Anna Anthropy, and others.

Prerequisite: CIN105Y1
Exclusion: CIN340H1 (Topics: (New) Media Aesthetics), offered in Winter 2017
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

CIN372Y1 - Contemporary World Cinema

Hours: 48L/72P

Major contemporary developments beyond Hollywood and European filmmaking, examining a select number of national/regional cinemas: Africa, Korea, Iran, India (Hindi cinema), and Latin America. Topics include: transnationalism, indigenization of generic and stylistic conventions, cultural contexts, distribution networks, film festivals, and reception within a global economy.

Prerequisite: CIN105Y1
Exclusion: INI380Y1
Recommended Preparation: CIN201Y1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1); Society and its Institutions (3)

CIN374Y1 - American Filmmaking in the Studio Era

Hours: 24L/24T/72P

Industrial, economic, ideological, and aesthetic dimensions of the American studio era.

Prerequisite: CIN105Y1
Exclusion: INI324Y1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1); Society and its Institutions (3)
CIN376Y1 - Chinese Cinemas
Hours: 48L/72P

Examination of Chinese films in their three post-World War II production centres: The People's Republic of China, Taiwan, and Hong Kong. Commercial, political, and aesthetic trends; international reception; major auteurs and genres. Directors include Tsui Hark, Chen Kaige, Zang Yimou, Edward Yang, John Woo, and Wong Kar-Wai.

Prerequisite: CIN105Y1
Exclusion: INI390Y1
Recommended Preparation: CIN201Y1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1); Society and its Institutions (3)

CIN378H1 - Aspects of a National Cinema
Hours: 24L/24P

In-depth treatment of a national cinema. Past courses include: "British Cinema," "Australian and New Zealand Cinema," and "The Other Europe."

Prerequisite: CIN105Y1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

CIN378Y0 - Aspects of a National Cinema

This course offers a critical study of British film cultures, with an emphasis on British film genres, movements and cycles from the 1960s to the present day. Earlier representative works, to include the British documentary movement, will provide a foundation for a comparative study of contemporary British cinema. Major and minor film cultures will be studied in their institutional, social, and cultural contexts to include: the long standing tradition of British realism; the Free Cinema Movement; the "New Wave;" "Swinging London;" "Thatcherite" cinema, including its heritage, art cinema, Brit-grit and Black British iterations; in addition to the recent "lad boy" underclass cycle that reconfigures the traditional conceptualization of British cinema as strictly oppositional "realism or tinsel." Debates pertinent to the way in which British films and relate to a shifting sense of national identity, towards examining the "Englishness" of British national cinema, will be highlighted.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

CIN379H1 - Hungarian Cinema
Hours: 24L/24P

Examines historical trends, influential filmmakers, and social and cultural factors influencing the development of Hungarian cinema, assessing its impact within the context of Eastern Europe and internationally.

Prerequisite: CIN105Y1/ permission of instructor
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

CIN380H1 - Special Topics in History and Nation
Hours: 24P/24S

Courses in special topics designed for Specialists and Majors in Cinema Studies.

Prerequisite: CIN105Y1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

CIN381Y1 - Special Topics in History and Nation
Hours: 48P/48S

Courses in special topics designed for Specialists and Majors in Cinema Studies.

Prerequisite: CIN105Y1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

CIN410H1 - Advanced Study in Genre and Modes
Hours: 24P/24S

See course description for CIN412H1 listed below.

Prerequisite: At least ten full-course equivalents, including CIN105Y1, CIN201Y1, CIN301Y1/ permission of instructor
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)
### CIN411H1 - Advanced Study in Genre and Modes

**Hours:** 24P/24S

See course description for CIN412H1 listed below.

**Prerequisite:** At least ten full-course equivalents, including CIN105Y1, CIN201Y1, CIN301Y1/ permission of instructor

**Distribution Requirements:** Humanities

**Breadth Requirements:** Creative and Cultural Representations (1)

### CIN412H1 - Advanced Study in Genre and Modes

**Hours:** 24P/24S

Consideration of the status of a selected film genre or mode from historical and theoretical perspectives. Past seminars include: "Film Comedy," "Melodrama," "Film Noir," "The End in Cinema," and "The Musical."

**Prerequisite:** At least ten full-course equivalents, including CIN105Y1, CIN201Y1, CIN301Y1/ permission of instructor

**Distribution Requirements:** Humanities

**Breadth Requirements:** Creative and Cultural Representations (1)

### CIN420H1 - Advanced Studies in Cinema

**Hours:** 24P/24S

Seminars in special topics designed for advanced Specialist and Major students in Cinema Studies.

**Prerequisite:** At least ten full-course equivalents, including CIN105Y1, CIN201Y1, CIN301Y1/ permission of instructor

**Distribution Requirements:** Humanities

**Breadth Requirements:** Creative and Cultural Representations (1)

### CIN430H1 - Advanced Study in Cinema as Social and Cultural Practice

**Hours:** 24P/24S

See course description for CIN432H1 listed below.

**Prerequisite:** At least ten full-course equivalents, including CIN105Y1, CIN201Y1, CIN301Y1/ permission of instructor

**Distribution Requirements:** Humanities

**Breadth Requirements:** Creative and Cultural Representations (1)

### CIN431H1 - Advanced Study in Cinema as Social and Cultural Practice

**Hours:** 24P/24S

**Prerequisite:** At least ten full-course equivalents, including CIN105Y1, CIN201Y1, CIN301Y1/ permission of instructor

**Distribution Requirements:** Humanities

**Breadth Requirements:** Creative and Cultural Representations (1)

### CIN432H1 - Advanced Study in Cinema as Social and Cultural Practice

**Hours:** 24P/24S

See course description for CIN432H1 listed below.

**Prerequisite:** At least ten full-course equivalents, including CIN105Y1, CIN201Y1, CIN301Y1/ permission of instructor

**Distribution Requirements:** Humanities

**Breadth Requirements:** Creative and Cultural Representations (1)

### CIN440H1 - Advanced Studies in Cinema

**Hours:** 24P/24S

Seminars in special topics designed for advanced Specialist and Major students in Cinema Studies. Past seminars include: "Experiential Learning."

**Prerequisite:** At least ten full-course equivalents, including CIN105Y1, CIN201Y1, CIN301Y1/ permission of instructor

**Distribution Requirements:** Humanities

**Breadth Requirements:** Creative and Cultural Representations (1)

### CIN450H1 - Advanced Study in Theory and Criticism

**Hours:** 24P/24S

See course description for CIN452H1 listed below.

**Prerequisite:** At least ten full-course equivalents, including CIN105Y1, CIN201Y1, CIN301Y1/ permission of instructor

**Distribution Requirements:** Humanities

**Breadth Requirements:** Creative and Cultural Representations (1)

CIN491H1 - Independent Studies in Cinema

See course description for CIN492H1 listed below. Not eligible for CR/NCR option.

Prerequisite: At least ten full-course equivalents, including CIN105Y1, CIN201Y1, CIN301Y1/ permission of instructor

Distribution Requirements: Humanities

Breadth Requirements: Creative and Cultural Representations (1)

CIN492H1 - Independent Studies in Cinema

Independent research projects devised by students and supervised by Cinema Studies faculty. Open to advanced Specialist and Major students in the Program. Submit applications to the Undergraduate Program Office: Fall 2016 courses, June 1/ Winter 2017 courses, November 1/ Summer 2017 courses, April 1. Not eligible for CR/NCR option.

Prerequisite: At least ten full-course equivalents, including CIN105Y1, CIN201Y1, CIN301Y1/ permission of instructor

Distribution Requirements: Humanities

Breadth Requirements: Creative and Cultural Representations (1)
Introduction

Classics is the study of the civilizations of ancient Greece and Rome. This includes their literature, religion, mythology, history, philosophy and art, and also their physical settings, their interactions with surrounding societies, and their influence on later cultures to the present day. The scope of the discipline is vast both in space (not just the territories of the modern states of Greece and Italy but most of western Europe, the Middle East and North Africa) and time (a period of at least two thousand years, from the start of the Bronze Age in Europe in the second millennium B.C. to the dawn of the Middle Ages). Classics at the University of Toronto is not just looking at the past but engaging with issues of compelling and enduring relevance, including; gender and sexuality; the nature of freedom and the basis of political power and legitimacy; how relationships should and do work between parents and children; whether democracy is compatible with imperialism; what it means to be in love; how people cope with the fear of death; and when, if ever, it is right to go to war.

The Department of Classics welcomes students of all academic backgrounds who wish to take courses in the field but do not wish to specialize in Classical Studies. Even without knowing Greek or Latin, students can profitably study Greek and Roman history or Greek and Latin literature in translation - two areas combined under the designation CLA (for Classical Civilization courses) below. Similarly, the Major and Minor Programs in Classical Civilization presuppose no knowledge of the classical languages.

Advanced work in Greek and Latin does require study of the basic language courses in sequence. These are listed below under the designations GRK (for Greek courses) and LAT (for Latin courses). The Department of Classics publishes an undergraduate handbook which may be obtained from the departmental office and is published on the internet; this and other information about the Department is available at:

https://classics.utoronto.ca/.

Undergraduate Coordinator: George Boys-Stones

125 Queens Park, room 110 (undergrad.classics@utoronto.ca; 416-978-4848)

Classics Programs

Classical Civilization Major (Arts Program) - ASMAJ0382

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

Completed courses (with minimum grades)

The following courses with the stated minimum grades are required:

- 1.0 credit in CLA courses with a final grade 65%. (CLA160H1 is recommended, but not required.)
Completion Requirements:

There are no specific requirements for first year. Students are recommended to take CLA160H1 and at least one other CLA course at the 200-level.

(7.0 credits)

1. CLA160H1
2. CLA260H1
3. CLA402H1/CLA403H1
4. Additional 5.5 credits in CLA, including 2.0 credits at the 300+ level

Substitutions:
1. Up to 3.0 credits from approved courses involving the ancient Greek and Roman civilizations taught by other departments, notably Art History (e.g., FAH206H1, FAH207H1, FAH300H1-FAH313H1) and Philosophy (e.g., PHL200Y1, PHL301H1-PHL304H1), may be substituted for the 5.5 credits in CLA courses from Requirement 4.
2. Up to 2.0 credits in GRK or LAT may be substituted for the 5.5 credits in CLA courses from Requirement 4.

Classics (Greek and Latin) Major (Arts Program) - ASMAJ0962

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

There are no specific requirements for first year. Students are recommended to take CLA160H1, and in addition GRK101H1 and GRK102H1.

(6.0 credits)

1. CLA160H1, CLA260H1
2. 4.0 credits from GRK courses, of which 1.0 credit must be at the 300+ level, 1.0 credit at the 400-level, including GRK430H1
3. Additional 1.0 FCE from CLA/GRK/LAT

Latin Major (Arts Program) - ASMAJ1451

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

There are no specific requirements for first year. Students are recommended to take CLA160H1, LAT101H1 and LAT102H1.

(6.0 credits)

1. CLA160H1, CLA260H1
2. 4.0 credits from LAT courses, of which 1.0 credit must be at the 300+ level, 1.0 credit at the 400-level, including LAT430H1
3. Additional 1.0 credit from CLA/GRK/LAT

Classical Civilization Minor (Arts Program) - ASMIN0382

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

Completed courses (with minimum grades)
The following courses with the stated minimum grades are required:

• 1.0 credit in CLA courses with a final grade 65%. (CLA160H1 is recommended, but not required.)

Completion Requirements:

There are no specific requirements for first year. Students are recommended to take CLA160H1 and one other CLA course at the 200 level.

(4.0 credits)

1. CLA160H1
2. 3.5 credits in CLA courses at the 200+ level, including 1.0 credit at the 300+ level

Substitutions:
1. Up to 2.0 credits from approved courses involving the ancient Greek and Roman civilizations taught by other departments, notably Art History (e.g., FAH206H1, FAH207H1, FAH300H1-FAH313H1) and Philosophy (e.g., PHL200Y1, PHL301H1-PHL304H1), may be substituted for the 3.5 credits in CLA courses from Requirement 2.
2. Up to 1.0 credit in GRK or LAT may be substituted for the 3.5 credits in CLA courses from Requirement 2.

Greek Major (Arts Program) - ASMAJ2123

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

There are no specific requirements for first year. Students are recommended to take CLA160H1, GRK101H1 and GRK102H1.

(6.0 credits)
Greek Minor (Arts Program) - ASMIN2123

Enrolment Requirements:
This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:
There are no specific requirements for first year. Students are recommended to take CLA160H1, GRK101H1 and GRK102H1.

(4.0 credits)
1. 1.0 credit from CLA courses, including CLA160H1
2. 3.0 credits from GRK courses, of which 1.0 credit must be at the 300+ level

Latin Minor (Arts Program) - ASMIN1451

Enrolment Requirements:
This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:
There are no specific requirements for first year. Students are recommended to take CLA160H1, LAT101H1 and LAT102H1.

(4.0 credits)
1. 1.0 credit from CLA courses, including CLA160H1
2. 3.0 credits from LAT courses, of which 1.0 credit must be at the 300+ level

Faculty of Arts & Science Language Citation

The Department of Classics participates in the Faculty of Arts and Science’s Language Citation initiative for Ancient Greek and Latin. The study of Ancient Greek and Latin is a demanding and intellectually rewarding educational experience which makes available to the modern student the rich resources of classical texts in the original languages. Successful study of these languages demonstrates intelligence, discipline, analytical sophistication, and an excellent memory. The study of any foreign language provides invaluable insights into the varieties of human culture and expression.

In each language the Language Citation recognizes a significant level of achievement in language study with a high level of academic success.

The Citation in Latin is available to students who complete LAT101H1 and LAT102H1 (or the equivalent prerequisite training) and earn a grade of at least B-

in LAT201H1, LAT202H1 and any two LAT half-courses at the 300 level.

The Citation in Ancient Greek is available to students who complete GRK101H1 and GRK102H1 (or the equivalent prerequisite training) and earn a grade of at least B-

in GRK201H1, GRK202H1 and any two GRK half-courses at the 300 level.

Students should note that, as explained on page 20 of this Calendar, the Language Citation is not equivalent to an academic program and that enrolment in a program is not necessary in order to earn the recognition bestowed by the Citation.

Regarding Classics Courses

Note: CLA courses are taught in English; all readings are in English. CLA courses do not require knowledge of Greek or Latin.

300-Series Courses

Most 300-series courses have specific prerequisites, which are enforced. Students seeking exemption from these prerequisites should contact the undergraduate coordinator before attempting to enroll in them on ACORN.

Students enrolled in the Major and Minor Programs in Classical Civilization have priority access to these courses.

Only 8 to 10 half-courses at the 300-level are offered in a typical Fall-Winter Session.

Greek Courses

These courses teach reading in ancient Greek. Prerequisites will be enforced. GRK101H1 requires no prior knowledge in ancient Greek. Courses in Greek taught by the Department of Classics involve the study of the form of the language employed in antiquity from about 800 B.C.E. to 400 C.E. The Department of Classics does not offer instruction in Medieval or Modern Greek.

Frequency of Offering: In each fall-winter session, GRK430H1 will be offered and a minimum of 3 half-courses in each of the GRK 300 and 400-series. In odd-numbered years the courses offered in the 300 and 400-series will normally be drawn from those with odd numbers, and in even-numbered years from those with even numbers.

Courses numbered GRK440H1 to GRK453H1 are advanced versions of the courses with the same titles at the 300-level (GRK340H1 - GRK353H1). They differ from the 300-level versions in meeting for an extra hour, studying more texts, and including a component of integrative, inquiry-based research.

Latin Courses

These courses teach reading in Latin. Prerequisites will be enforced. LAT101H1 requires no prior knowledge of Latin.

Frequency of Offering: In each fall-winter session, LAT430H1 will be offered and a minimum of 3 half-courses in each of the LAT 300 and 400-series. In odd-numbered years the courses offered in the 300 and 400-series will normally be drawn from those with odd numbers, and in even-numbered years from those with even numbers.
Courses numbered LAT440H1 to LAT453H1 are advanced versions of the courses with the same titles at the 300-level (LAT340H1 - LAT353H1). They differ from the 300-level versions in meeting for an extra hour, studying more texts, and including a component of integrative, inquiry-based research.

**Classics Courses**

**CLA160H1 - Introduction to Classical Studies**

**Hours:** 36L/10T

An introduction to major themes in the development of Greek and Roman civilization, literature and culture.

**Distribution Requirements:** Humanities  
**Breadth Requirements:** Creative and Cultural Representations (1)

**CLA195H1 - Socrates and his Legacy**

**Hours:** 24S

Socrates was a well-known figure in Athens during his lifetime: charismatic and inspirational to some, but a figure of fear and derision to others, who saw in him a challenge to political and religious norms. This course will look at the debates, ancient and modern, provoked by the unconventional life and controversial death of Socrates, and the influence he had over the public image, style, and content of subsequent philosophy. Plato is an important source for our view of Socrates, but we will make a point of exploring wider perspectives too: from the work of others in his circle, through literary representations, to his later reception in antiquity and beyond. Restricted to first-year students. Not eligible for CR/NCR option.

**Distribution Requirements:** Humanities  
**Breadth Requirements:** Creative and Cultural Representations (1)

**CLA196H1 - Homer’s Odyssey down through Time**

**Hours:** 24S

This course will survey creative works inspired by Homer’s Odyssey. First we will read through the Odyssey, contextualizing the Homeric epic within the larger story of the Trojan War and the subsequent heroic return in the “Epic Cycle.” Then we will study various ”receptions” of the Odyssey, ancient and modern. Ancient works will include the satyr play *Cyclops* by Euripides and portrayals of a love-sick Cyclops in Theocritus and Ovid. In *True Story* Lucian calls Odysseus a liar but rivals his travel tale with episodes placed on the moon and inside a whale. Modern works include Atwood’s *Penelopiad*, Walcott’s stage version of the *Odyssey*, and the film “O Brother, Where Art Thou?” Themes will include travel literature, truth and lying, localization of the wanderings of Odysseus, culture clash, and the definition of home. All this material, various in date, media, and fidelity to their Homeric source, will provide us with a well-rounded sense of how the Odyssey has been re-imagined over the ages. Restricted to first-year students. Not eligible for CR/NCR option.

**Distribution Requirements:** Humanities  
**Breadth Requirements:** Creative and Cultural Representations (1)

**CLA197H1 - Death and Immortality in Ancient Thought**

**Hours:** 24S

It seems natural for us to love life and hate death -- to long, therefore, for immortality. But are human beings in any way immortal? If so, where do we go — is there an ‘afterlife’? Are our souls reincarnated? And are we really right to fear death, or is this somehow childish? What is death, and what exactly is it that we are so afraid of: the pain of dying, loss of the pleasures of life, non-existence? We will read a series of ancient texts which engage with these questions: the Mesopotamian epic *Gilgamesh*, Homer’s *Odyssey*, Euripides’ play *Alcestis*, Plato’s *Phaedo*, and *De Rerum Natura* by the Roman poet Lucretius. All are great works with many dimensions; while focusing on our themes we will try to make the most of what they have to offer. The course is designed for students to get practice at several important skills: close reading of complex texts, analysis of philosophical arguments, oral discussion, and essay-writing. Restricted to first-year students. Not eligible for CR/NCR option.

**Distribution Requirements:** Humanities  
**Breadth Requirements:** Creative and Cultural Representations (1)
CLA198H1 - Julius Caesar

Hours: 24S

Gaius Julius Caesar (100 – 44 BC) was a writer, an orator, a reformer, and a builder, as well as a general, a conqueror, an explorer, and a dictator. After his death, he was even worshipped as a god with a temple in the very heart of Rome. According to his critics, both ancient and modern, he was also a megalomaniac, an enemy of the state, a war criminal, and a tyrant. Only a very few individuals have left such an extensive and controversial mark on the history of the ancient world. We shall consider as many aspects of his life and his legacy as we can, from his conquest of Gaul to his decision to plunge Rome into a horrific civil war, from his love-affair with Queen Cleopatra of Egypt to his brutal assassination on the Ides of March. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

CLA199H1 - Monsters

Hours: 24S

We will be examining the monsters of classical antiquity. How do we think of monstrosity today? What is the shape of this category in the Greco-Roman world? Why are our monsters not the same as theirs? What occasions the peculiar horror that one labels “monstrosity”?

We will look at the exotic, inhuman creatures of mythology. But we will also explore other genres like ethnographic writing and natural history where one entertains the idea that there are real monsters “out there” at the edge of the world. Similarly we will consider tragedy and its “human monsters”, people guilty of crimes such as incest and cannibalism. And lastly we will ponder the “monsters of history”, that is, the concrete historical individuals whose acts were so shocking that they could be described in the register reserved for the outlandishly inhuman. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

CLA203H1 - Science in Antiquity

Hours: 36L

The first scientific traditions in the classical Mediterranean and the Near East, with emphasis on Greek science. Discussions of early physical science, biology, mathematics, and astronomy, and their place in ancient life and thought, based on primary sources in translation. Designed for students in both the sciences and humanities.

Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

CLA204H1 - Introduction to Classical Mythology

Hours: 36L

A survey of the myths and legends of ancient Greece (and their extension to Rome) with some consideration of their role in ancient and modern literature and art.

Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

CLA210H1 - Greek and Roman Archaeology

Hours: 36L

A survey of the practices and theory of archaeology in the Classical Mediterranean, from the Greek Bronze Age through the Roman Empire. This course introduces students to the archaeological record of the Greco-Roman past, as well as the means by which we access it. Students will develop essential skills to recognize and analyze ancient material culture in preparation for upper level classes, or for fieldwork. No previous knowledge of the discipline is required.

Distribution Requirements: Humanities
Breadth Requirements: Living Things and Their Environment (4)

CLA215H1 - Classical Warfare

Hours: 36L

An introduction to the military history of ancient Greece and Rome from the 8th century BCE to the 7th century CE, with an emphasis on the political, social and economic implications of warfare and military institutions.

Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)
CLA219H1 - Women in Antiquity
Hours: 36L
A survey of the position of women in ancient Greece and Rome, with focus on women's sexuality and socialization; their economic, religious, and political roles; and their creative production in the arts.
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

CLA220H1 - Introduction to Greek History
Hours: 36L
A historical survey of the most significant features in the development of the civilization and states of ancient Greece from the Bronze Age to the second century B.C.E.
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

CLA221H1 - Introduction to Roman History
Hours: 36L
A historical survey of the most significant features in the development of the civilization and state of ancient Rome from the mythical beginnings to the fourth century C.E.
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

CLA222H1 - Greek Literature and Society
Hours: 36L
An introduction to ancient Greek literature. Students will explore a range of genres, authors and texts as well as ways of interpreting them.
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

CLA223H1 - Roman Literature and Society
Hours: 36L
An introduction to ancient Roman literature. Students will explore a range of genres, authors and texts as well as ways of interpreting them.
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

CLA224H1 - Greek and Roman Epic
Hours: 36L
A study of one or more of the epic poems of Greek and Roman antiquity (e.g. The Iliad and Odyssey of Homer and the Aeneid of Virgil).
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

CLA225H1 - Method and Theory in Classics
Hours: 36L
An introduction to key issues in methodology and theory in the study of the classical world.
Distribution Requirements: Humanities

CLA229Y1 - Research Opportunity Program
Credit course for supervised participation in faculty research project. Details at https://www.artsci.utoronto.ca/current/academics/research-opportunities/research-opportunities-program. Not eligible for CR/NCR option.
Distribution Requirements: Humanities
**CLA303H1 - The Ancient Novel**

**Hours:** 36S

An introduction to the Greek romances of love and adventure (Chariton, Longus, Heliodorus), and the more ironical and socially conscious works of the Roman writers Petronius and Apuleius.

**Prerequisite:** CLA160H1 + 1 of CLA204H1/CLA219H1/CLA232H1/CLA233H1/CLA236H1/CLA260H1

**Distribution Requirements:** Humanities

**Breadth Requirements:** Creative and Cultural Representations (1)

**CLA319H1 - Sexuality and Gender in Classical Literature**

**Hours:** 36S

Detailed study of the representation of sexuality and gender in Greek and/or Roman literary texts from one or more genres.

**Prerequisite:** CLA160H1 + 1 of CLA219H1/CLA232H1/CLA233H1/CLA260H1

**Distribution Requirements:** Humanities

**Breadth Requirements:** Creative and Cultural Representations (1)

**CLA305H1 - Theories of Myth**

**Hours:** 36S

A detailed study of the major modern approaches to the analysis and interpretation of myth with specific reference to their applications to ancient Graeco-Roman myth.

**Prerequisite:** CLA204H1 + 1 OF CLA160H1/CLA260H1

**Distribution Requirements:** Humanities

**Breadth Requirements:** Thought, Belief and Behaviour (2)

**CLA321H1 - Sport and Festival**

**Hours:** 36S

An examination of various aspects of athletic competition in the ancient Greco-Roman world, employing literary and archaeological evidence.

**Prerequisite:** CLA160H1 + 1 of CLA230H1/CLA231H1/CLA232H1/CLA233H1/CLA236H1/CLA260H1

**Distribution Requirements:** Humanities

**Breadth Requirements:** Society and its Institutions (3)

**CLA308H1 - Religion in the Greek World**

**Hours:** 36S

A study of the religious cults and forms of worship in the ancient Greek world.

**Prerequisite:** CLA160H1 + 1 of CLA204H1/CLA230H1/CLA232H1/CLA236H1/CLA260H1

**Distribution Requirements:** Humanities

**Breadth Requirements:** Thought, Belief and Behaviour (2)

**CLA310H1 - Religion in the Roman World**

**Hours:** 36S

A study of the religious cults and forms of worship in the Roman world, including the pagan cults, Judaism, and early Christianity.

**Prerequisite:** CLA160H1 + 1 of CLA204H1/CLA231H1/CLA233H1/CLA236H1/CLA260H1

**Distribution Requirements:** Humanities

**Breadth Requirements:** Thought, Belief and Behaviour (2)

**CLA322H1 - Classical Reception**

**Hours:** 36S

Modern reception of the classical world in a variety of media, such as art, literature, music, popular culture, etc.

**Prerequisite:** CLA160H1 + 1 of CLA204H1/CLA219H1/CLA233H1/CLA236H1/CLA260H1

**Distribution Requirements:** Humanities

**Breadth Requirements:** Creative and Cultural Representations (1)

**CLA336H1 - Roman Law**

**Hours:** 36S

Roman law with emphasis on how it reflected community values. The nature of Roman legal reasoning. The historical development of Roman law against the background of the evolution of Roman society and Roman power.

**Distribution Requirements:** Humanities

**Breadth Requirements:** Society and its Institutions (3)
CLA362H1 - Early Greece

Hours: 36S

The Greek world from the second millennium B.C.E. to the emergence of the polis

Prerequisite: CLA160H1 + 1 of CLA230H1/CLA260H1/CLA210H1
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

CLA363H1 - Archaic and Classical Greece

Hours: 36S

The Greek world from the eighth to the fourth centuries B.C.E., with an emphasis on political events and development.

Prerequisite: CLA160H1 + 1 of CLA230H1/CLA260H1/CLA210H1
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

CLA364H1 - The Hellenistic World

Hours: 36S

The Greek world in the age of Alexander the Great and his successors (336 B.C.E. to 31 B.C.E.)

Prerequisite: CLA160H1 + 1 of CLA230H1/CLA260H1/CLA210H1
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

CLA366H1 - Topics in the Study of Greek History

Hours: 36S

Topics vary from year to year.

Prerequisite: CLA160H1 + 1 of CLA230H1/CLA260H1/CLA210H1
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

CLA367H1 - The Roman Republic

Hours: 36S

The Roman world from 510 B.C.E. to 44 B.C.E.

Prerequisite: CLA160H1 + 1 of CLA231H1/CLA260H1/CLA210H1
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

CLA368H1 - Augustus and the Julio-Claudians

Hours: 36S

The Roman world in the age of Augustus and his dynasty (44 B.C.E. to 68 C.E.)

Prerequisite: CLA160H1 + 1 of CLA231H1/CLA260H1/CLA210H1
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

CLA369H1 - The Roman Empire

Hours: 36S

The Roman world from 68 C.E. to 378 C.E.

Prerequisite: CLA160H1 + 1 of CLA231H1/CLA260H1/CLA210H1
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

CLA371H1 - Topics in the Study of Roman History

Hours: 36S

Topics vary from year to year.

Prerequisite: CLA160H1 + 1 of CLA231H1/CLA260H1/CLA210H1
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)
CLA372H1 - The Economic History of the Classical World

**Hours**: 36S

The structure and performance of economies in the Greek and/or Roman worlds, and their modern interpretation.

**Prerequisite**: CLA160H1 + 1 of CLA230H1/CLA231H1/CLA260H1/CLA210H1  
**Distribution Requirements**: Humanities  
**Breadth Requirements**: Society and its Institutions (3)

CLA383H1 - Comedy

**Hours**: 36S

The origin and development of Greek and Roman comedy, based on a study of representative plays.

**Prerequisite**: CLA160H1 + 1 of CLA219H1/CLA230H1/CLA231H1/CLA232H1/CLA233H1/CLA236H1/CLA260H1  
**Distribution Requirements**: Humanities  
**Breadth Requirements**: Creative and Cultural Representations (1)

CLA373H1 - The Environment in the Greco-Roman World

**Hours**: 36S

An exploration of the ecology and environment of the ancient Mediterranean basin in classical antiquity.

**Prerequisite**: CLA160H1 + 1 of CLA230H1/CLA231H1/CLA260H1/CLA210H1  
**Distribution Requirements**: Humanities  
**Breadth Requirements**: Living Things and Their Environment (4)

CLA386H1 - Classical Literature in Translation

**Hours**: 36S

Study of a selection of Greek and Roman literary texts from one or more genres.

**Prerequisite**: CLA160H1 + 1 of CLA204H1/CLA219H1/CLA230H1/CLA233H1/CLA260H1  
**Distribution Requirements**: Humanities  
**Breadth Requirements**: Creative and Cultural Representations (1)

CLA378H1 - Late Antiquity

**Hours**: 36S

The history and culture of the Greco-Roman world during the fourth through seventh centuries C.E., with particular emphasis on the decline of the Roman state and emergence of Christianity.

**Prerequisite**: CLA160H1 + 1 of CLA231H1/CLA233H1/CLA260H1/CLA210H1  
**Distribution Requirements**: Humanities  
**Breadth Requirements**: Society and its Institutions (3)

CLA387H1 - Spectacle in the Roman World

**Hours**: 36S

The role in Roman society and culture of public spectacles, including the chariot-races, the gladiatorial games, executions, and triumphal processions.

**Prerequisite**: CLA160H1 + 1 of CLA231H1/CLA233H1/CLA260H1  
**Distribution Requirements**: Humanities  
**Breadth Requirements**: Creative and Cultural Representations (1)

CLA382H1 - Tragedy

**Hours**: 36S

The study of classical tragedy as a literary genre, dramatic production, and social institution, with analysis of representative plays.

**Prerequisite**: CLA160H1 + 1 of CLA204H1/CLA219H1/CLA230H1/CLA232H1/CLA236H1/CLA260H1  
**Distribution Requirements**: Humanities  
**Breadth Requirements**: Creative and Cultural Representations (1)

CLA388H1 - Classical Antiquity and the Cinema

**Hours**: 36S

A study of the representation of ancient Greece and/or Rome in cinema.

**Prerequisite**: CLA160H1 + 1 of CLA219H1/CLA232H1/CLA233H1/CLA260H1; or INI115Y1  
**Distribution Requirements**: Humanities  
**Breadth Requirements**: Creative and Cultural Representations (1)
CLA389H1 - Classical Spaces: Sites and Monuments

Hours: 36S

A close study of one or more sites in the ancient world and the cultural significance of the site(s) in question.

Prerequisite: CLA160H1 + 1 of CLA230H1/CLA231H1/CLA232H1/CLA233H1/CLA260H1

Distribution Requirements: Humanities

Breadth Requirements: Creative and Cultural Representations (1)

CLA392H1 - Topics in the study of Classical Culture and Society

Hours: 36S

Topics vary from year to year.

Prerequisite: CLA160H1 + 1 of CLA219H1/CLA232H1/CLA233H1/CLA260H1

Distribution Requirements: Humanities

Breadth Requirements: Creative and Cultural Representations (1)

CLA398H0 - Research Excursions

Distribution Requirements: Humanities

CLA398Y0 - Research Excursions

Distribution Requirements: Humanities

CLA399Y1 - Research Opportunity Program

Credit course for supervised participation in faculty research project. Details at https://www.artsci.utoronto.ca/current/academics/research-opportunities/research-opportunities-program. Not eligible for CR/NCR option.

CLA400H1 - Independent Studies

Previous Course Number: CLA400Y1

Prerequisite: Permission of Department

Exclusion: CLA400Y1

Recommended Preparation: Preferably 1 FCE in the CLA 300-series

Distribution Requirements: Humanities

CLA401H1 - Independent Studies

Prerequisite: Permission of Department

Recommended Preparation: Preferably 1 FCE in the CLA 300 series

Distribution Requirements: Humanities

CLA402H1 - Advanced Seminar in Greek Civilization

Hours: 36S

An advanced research seminar devoted to critical issues relating to Greek civilization. Course requirements include a research essay. Topics vary from year to year.

Prerequisite: Enrolment in Major Program in Classical Civilization; 14.0 FCEs completed including 1.0 in CLA 300-series

Exclusion: CLA403H1

Distribution Requirements: Humanities

CLA403H1 - Advanced Seminar in Roman Civilization

Hours: 36S

An advanced research seminar devoted to critical issues relating to Roman civilization. Course requirements include a research essay. Topics vary from year to year.

Prerequisite: Enrolment in Major Program in Classical Civilization; 14.0 FCEs completed including 1.0 in CLA 300-series

Exclusion: CLA402H1

Distribution Requirements: Humanities
Greek Courses

GRK101H1 - Introductory Ancient Greek I

Previous Course Number: GRK100Y1
Hours: 48S

An intensive introduction to Ancient Greek for students who have no
knowledge of the language; preparation for the reading of Ancient
Greek literature.

Exclusion: GRK100Y1 Students who have studied Ancient Greek
previously must obtain permission from the Undergraduate
Coordinator before enrolling.
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

GRK102H1 - Introductory Ancient Greek II

Hours: 48S

A continuation of the intensive introduction to Ancient Greek in GRK
101H1. Also appropriate for students who have some training in
Ancient Greek, but have not completed a whole credit course at
University or a final-year (Grade 12) course in secondary school.

Prerequisite: GRK101H1/some background in Ancient Greek
Exclusion: GRK100Y1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

GRK201H1 - Intermediate Ancient Greek I

Hours: 48S

Reading of selections of Ancient Greek prose works with systematic
language study.

Prerequisite: GRK100Y1/GRK102H1. Grade 12 in Ancient Greek
may be accepted, but students should consult the Undergraduate
Coordinator before enrolling.
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

GRK202H1 - Intermediate Ancient Greek II

Hours: 48S

Continued language training with readings in Ancient Greek prose
and verse.

Prerequisite: GRK201H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

GRK340H1 - Greek Philosophy I

Hours: 36S

Readings from one or more philosophical texts.

Prerequisite: GRK202H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

GRK341H1 - Greek Historians I

Hours: 36S

Readings from one or more Greek Historians.

Prerequisite: GRK202H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

GRK342H1 - Greek Orators I

Hours: 36S

Readings from from one or more oratorical texts.

Prerequisite: GRK202H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

GRK343H1 - Greek Prose Authors I

Hours: 36S

Readings from Greek prose authors (e.g., biography, novels,
theses, texts in koine).

Prerequisite: GRK202H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)
GRK350H1 - Greek Epic I

Hours: 36S
Readings from Greek epics, including Homer.

Prerequisite: GRK202H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

GRK351H1 - Greek Comedy I

Hours: 36S
Readings from Aristophanes and Menander.

Prerequisite: GRK202H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

GRK352H1 - Greek Tragedy I

Hours: 36S
Readings from Aeschylus, Sophocles and Euripides.

Prerequisite: GRK202H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

GRK353H1 - Greek Verse Authors I

Hours: 36S
Readings from Greek verse (e.g., elegy, iambics, lyric).

Prerequisite: GRK202H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

GRK428H1 - Independent Studies

Previous Course Number: GRK428Y1

Prerequisite: Permission of Department
Exclusion: GRK428Y1
Recommended Preparation: Usually 1 FCE from GRK 300-series courses
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

GRK429H1 - Independent Studies

Prerequisite: Permission of Department
Exclusion: GRK428Y1
Recommended Preparation: Usually 1 FCE from GRK 300-series courses
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

GRK430H1 - Advanced Greek Language Study

Hours: 36S
A course designed to enhance language skills. Prose composition, sight translation, stylistic analysis of classical Greek prose.

Prerequisite: GRK340H1/GRK341H1/GRK342H1/GRK343H1
Exclusion: GRK330H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

GRK440H1 - Greek Philosophy II

Hours: 48S
Advanced readings from one or more philosophical texts.

Prerequisite: One FCE in the GRK 300-series
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)
GRK441H1 - Greek Historians II

Hours: 48S

Advanced readings from one or more Greek historians.

**Prerequisite:** One FCE in the GRK 300-series
**Distribution Requirements:** Humanities
**Breadth Requirements:** Creative and Cultural Representations (1)

GRK442H1 - Greek Orators II

Hours: 48S

Advanced readings from one or more oratorical texts.

**Prerequisite:** One FCE in the GRK 300-series
**Distribution Requirements:** Humanities
**Breadth Requirements:** Creative and Cultural Representations (1)

GRK443H1 - Greek Prose Authors II

Hours: 48S

Advanced readings from Greek prose authors (e.g., biography, novels, essays, texts in koine).

**Prerequisite:** One FCE in the GRK 300-series
**Distribution Requirements:** Humanities
**Breadth Requirements:** Creative and Cultural Representations (1)

GRK450H1 - Greek Epic II

Hours: 48S

Advanced readings from Greek epics, including Homer.

**Prerequisite:** One FCE in the GRK 300-series
**Distribution Requirements:** Humanities
**Breadth Requirements:** Creative and Cultural Representations (1)

GRK451H1 - Greek Comedy II

Hours: 48S

Advanced readings from Aristophanes and Menander.

**Prerequisite:** One FCE in the GRK 300-series
**Distribution Requirements:** Humanities
**Breadth Requirements:** Creative and Cultural Representations (1)

GRK452H1 - Greek Tragedy II

Hours: 48S

Advanced readings from Aeschylus, Sophocles and Euripides.

**Prerequisite:** One FCE in the GRK 300-series
**Distribution Requirements:** Humanities
**Breadth Requirements:** Creative and Cultural Representations (1)

GRK453H1 - Greek Verse Authors II

Hours: 48S

Advanced readings from Greek verse (e.g., elegy, iambic, lyric).

**Prerequisite:** One FCE in the GRK 300-series
**Distribution Requirements:** Humanities
**Breadth Requirements:** Creative and Cultural Representations (1)

**Latin Courses**

LAT101H1 - Introductory Latin I

**Previous Course Number:** LAT100Y1
**Hours:** 48S

An intensive introduction to Latin for students who have no knowledge of the language; preparation for the reading of Latin literature.

**Exclusion:** LAT100Y1. Students who have studied Latin previously must obtain permission from the Undergraduate Coordinator before enrolling.
**Distribution Requirements:** Humanities
**Breadth Requirements:** Creative and Cultural Representations (1)

LAT102H1 - Introductory Latin II

**Hours:** 48S

A continuation of the intensive introduction to Latin in LAT 101H1. Also appropriate for students who have some training in Latin, but have not completed a whole credit course at University or a final-year (Grade 12) course in secondary school.

**Prerequisite:** LAT101H1/some background in Latin
**Exclusion:** LAT100Y1
**Distribution Requirements:** Humanities
**Breadth Requirements:** Creative and Cultural Representations (1)
LAT201H1 - Intermediate Latin I

Hours: 48S

Reading of selections of Latin prose works with systematic language study.

Prerequisite: LAT100Y1/LAT102H1. Grade 12 in Latin may be accepted, but students should consult the Undergraduate Coordinator before enrolling.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

LAT202H1 - Intermediate Latin II

Hours: 48S

Continued language training with readings in Latin prose and verse.

Prerequisite: LAT201H1

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

LAT340H1 - Latin Novelists I

Hours: 36S

Readings from one or more Latin novelists.

Prerequisite: LAT202H1

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

LAT341H1 - Latin Historians I

Hours: 36S

Readings from one or more Latin historians.

Prerequisite: LAT202H1

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

LAT342H1 - Latin Orators I

Hours: 36S

Readings from Latin orators, including Cicero.

Introduction

What is Computer Science?

Despite the name, Computer Science is not really a science of computers at all. Computers are quite remarkable electronic devices, but even more remarkable is what they can be made to do: simulate the flow of air over a wing, manage communication over the Internet, control the actions of a robot, synthesize realistic images, play grandmaster-level chess, and on and on. Indeed the application of computers in activities like these has affected most areas of modern life. What these tasks have in common is that they can be formulated as some sort of computation. This is the real subject matter of Computer Science: computation, and what can or cannot be done computationally.

In trying to make sense of what we can get a computer to do, a wide variety of topics come up. There are, however, two recurring themes. The first is the issue of scale: how big a system can we specify without getting lost in the design, or how big a task can a computer handle within reasonable bounds of time, memory, and accuracy. A large part of Computer Science deals with these questions in one form or another. In the area of programming languages and methodology, for example, we look for notations for describing computations, and programming methodologies that facilitate the production of manageable and efficient software. In the theory of computation area, we study resource requirements in time and memory of many basic computational tasks.

The second theme concerns the scope of computation. Computers were originally conceived as purely numerical calculators, but today, we tend to view them much more broadly. Part of Computer Science is concerned with understanding just how far computational ideas can be applied. In the area of artificial intelligence, for example, we ask how much of the intelligent behaviour of people can be expressed in computational terms. In the area of human-computer interaction, we ask what sorts of normal day-to-day activities of people might be supported and augmented using computers.

Some Computer Science courses are offered in the evening, to allow part-time students to pursue our programs. Introductory courses and some higher-level courses are offered in the summer.

The Professional Experience Year Co-op Program (PEY Co-op) offers students the opportunity to gain valuable work experience in industry, over a twelve to sixteen-month period. It is available to eligible, full-time students. Students may also take advantage of the International Exchange Program offered by CIE.

Academic Advisors, Undergraduate Office: Bahen Building, 40 St. George Street, Rooms 4290, MSS 2E4 (416-978-6360 or 416-946-8870), email: ug@cs.toronto.edu

Computer Science Programs

Data Science Specialist (Science Program) - ASSPE1687

Description:

The field of Data Science is a combination of statistics and computer science methodologies that enable ‘learning from data’. A data scientist extracts information from data, and is involved with every step that must be taken to achieve this goal, from getting acquainted with the data to communicating the results in non-technical language. The Data Science Specialist program prepares students for work in the Data Science industry or government and for graduate studies in Data Science, Computer Science, or Statistics. Students in the program will benefit from a range of advanced courses in Computer Science and Statistics offered by the University of Toronto, as well as from a sequence of three integrative courses designed especially for the program.

The Data Science Specialist program comprises three fundamental and highly-integrated aspects. First, students will acquire expertise in statistical reasoning, methods, and inference essential for any data analyst. Second, students will receive in-depth training in computer science: the design and analysis of algorithms and data structures for handling large amounts of data, and best practices in software design. Students will receive training in machine learning, which lies at the intersection of computer and statistical sciences. The third aspect is the application of computer science and statistics to produce analyses of complex, large-scale datasets, and the communication of the results of these analyses; students will receive training in these areas by taking integrative courses that are designed specifically for the Data Science Specialist program. The courses involve experiential learning: students will be working with real large-scale datasets from the domain of business, government, and/or science. The successful student will combine their expertise in computer and statistical science to produce and communicate analyses of complex large-scale datasets.

Skills that graduates of the program will acquire include proficiency in statistical reasoning and computational thinking; data manipulation and exploration, visualization, and communication that are required for work as a data scientist; the ability to apply statistical methods to solve problems in the context of scientific research, business, and government; familiarity and experience with best practices in software development; and knowledge of current software infrastructure for handling large data sets. Graduates of the program will be able to demonstrate the ability to apply machine learning algorithms to large-scale datasets that arise in scientific research, government, and business; create appropriate data visualizations for complex datasets; identify and answer questions that involve applying statistical methods or machine learning algorithms to complex data, and communicating the results; present the results and limitations of a data analysis at an appropriate technical level for the intended audience.

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

For students admitted to Arts & Science in the Year 1 Computer Science (CMP1) admission category:

Variable Minimum Grade
A minimum grade is needed for entry, and this minimum changes each year depending on the number of applicants. At least 20 spaces will be available each year for students applying from Year 1 Computer Science (CMP1). The following courses must be completed:

- CSC110Y1
- CSC111H1
- MAT137Y1/ MAT157Y1
- STA130H1

To ensure that students admitted to the program will be successful, applicants will not be considered for admission with a grade lower than 70% in CSC110Y1, MAT137Y1, and STA130H1, or lower than 77% in CSC111H1. (MAT157Y1 grades will be adjusted to account for the course’s greater difficulty.) Obtaining these minimum grades does not guarantee admission to the program.

For students admitted to other Arts & Science Year 1 admission categories:

Special Requirement

- Students who do not have the Computer Science Admission Guarantee must complete a supplementary application to be considered for the program.

Variable Minimum Grade
A minimum grade is needed for entry, and this minimum changes each year depending on available spaces and the number of applicants. The following courses must be completed:

- CSC148H1
- MAT137Y1/ MAT157Y1
- STA130H1

To ensure that students admitted to the program will be successful, applicants with a grade lower than 70% will not be considered for admission. (MAT157Y1 grades will be adjusted to account for the course's greater difficulty.) Obtaining these minimum grades does not guarantee admission to the program.

Notes:

1. Requests for admission will be considered in the first program request period only.
2. Due to the limited enrolment nature of this program, students are strongly advised to plan to enroll in backup programs.
3. Students admitted to the program after second or third year will be required to pay retroactive deregulated program fees.

Completion Requirements:

(13.0-13.5 credits, including at least 1.5 credits at the 400-level)

First year (3.0-3.5 credits)
MAT137Y1/ MAT157Y1; MAT223H1/ MAT240H1 (MAT240H1 is recommended); STA130H1; (CSC108H1, CSC148H1Y) (CSC110Y1, CSC111H1)

Note: Students with a strong background in an object-oriented language such as Python, Java or C++ may omit CSC108H1 and proceed directly with CSC148H1. There is no need to replace the missing half-credit for program completion; however, please base your course choice on what you are ready to take, not on "saving" a half-credit. Consult with the Computer Science Undergraduate Office for advice on choosing between CSC108H1 and CSC148H1.
Second year (3.5-4.0 credits)
MAT237Y1/ MAT257Y1; STA257H1; STA261H1; CSC207H1; (CSC165H1, CSC236H1)/CSC236H1/CSC240H1 (CSC240H1 is recommended); JSC270H1 (Data Science I)
Note: CSC240H1 is an accelerated and enriched version of CSC165H1 plus CSC236H1, intended for students with a strong mathematical background, or who develop an interest after taking CSC165H1. If you take CSC240H1 without CSC165H1, there is no need to replace the missing half-credit for program completion; however, please base your course choice on what you are ready to take, not on “saving” a half-credit. Consult the Computer Science Undergraduate Office for advice on choosing between CSC165H1 and CSC240H1. CSC236H1 may be taken without CSC165H1 for students who completed CSC111H1.

Later years (6.5 credits)

1. STA302H1: one of STA303H1 or STA305H1; STA355H1; CSC209H1; CSC263H1; CSC265H1 (CSC265H1 is recommended); CSC343H1; CSC373H1; JSC370H1 (Data Science II)
2. STA314H1/ CSC311H1/ CSC411H1
3. 2.0 credits from the following list, including at least 1.0 credit at the 400 level (see below for additional conditions): STA303H1/ STA305H1 (whichever one was not taken previously), STA347H1, CSC401H1, STA414H1/ CSC412H1, CSC413H1/CSC421H1, any 400-level STA course; JSC470H1 (Data Science III); CSC454H1, CSC490H1, CSC491H1, CSC494H1, CSC495H1

The choices from 3 must satisfy the requirement for an integrative, inquiry-based activity by including at least 0.5 credit from the following: JSC470H1 (Data Science III); CSC454H1, CSC490H1, CSC494H1, CSC495H1, CSC499H1, CSC499H1, CSC499H1, STA490Y1, STA496H1, STA497H1, STA498Y1, STA499Y1. This requirement may also be met by participating in the PEY Co-op (Professional Experience Year Co-op) program.

For students admitted to other Arts & Science Year 1 admission categories:

Special Requirement

- Students who do not have the Computer Science Admission Guarantee must complete a supplementary application to be considered for the program.

Variable Minimum Grade

A minimum grade is needed for entry, and this minimum changes each year depending on available spaces and the number of applicants. The following courses must be completed:

- CSC148H1
- CSC165H1/ CSC240H1

To ensure that students admitted to the program will be successful, applicants with a grade below 70% will not be considered for admission. Obtaining this minimum grade does not guarantee admission to the program.

Notes:

1. Requests for admission will be considered in the first program request period only.
2. Due to the limited enrolment nature of this program, students are strongly advised to plan to enroll in backup programs.
3. Students admitted to the program after second or third year will be required to pay retroactive deregulated program fees.

Completion Requirements:

(12.0 credits, including at least 1.5 credits at the 400-level)

First year (2.5 credits):

1. (CSC108H1, CSC148H1, CSC165H1/ CSC240H1)/(CSC110Y1, CSC111H1); MAT137Y1/ MAT157Y1/ (MAT135H1, MAT136H1)

Notes:

a. Students with a strong background in an object-oriented language such as Python, Java or C++ may omit CSC108H1 and proceed directly with CSC148H1. There is no need to replace the missing half-credit for program completion; however, please base your course choice on what you are ready to take, not on “saving” a half-credit.

b. CSC240H1 is an accelerated and enriched version of CSC165H1 plus CSC236H1, intended for students with a strong mathematical background, or who develop an interest after taking CSC165H1. If you take CSC240H1 without CSC165H1, there is no need to replace the missing half-credit for program completion; but please see Note (a).

c. Consult the department's Undergraduate Office for advice about choosing among CSC108H1 and CSC148H1, and between CSC165H1 and CSC240H1.

d. We recommend that students take MAT137Y1 or MAT157Y1, as they have been determined to provide the best preparation for upper-year courses in computer science and benefit students in CSC165H1/ CSC240H1. Similarly, we recommend MAT223H1 or MAT240H1 from the options in second year.

Computer Science Specialist (Science Program) - ASSPE1689

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

For students admitted to Arts & Science in the Year 1 Computer Science (CMP) admission category:

Completed courses (with minimum grades)
The following courses with the stated minimum grades are required:

- CSC110Y1 (70%)
- CSC111H1 (77%)
- MAT137Y1/MAT157Y1
Focus in Artificial Intelligence - ASFOC1689B

Description:

(3.5 FCEs)

Artificial Intelligence (AI) is aimed at understanding and replicating the computational processes underlying intelligent behavior. These behaviors include the perception of one’s environment, learning how that environment is structured, communicating with other agents, and reasoning to guide one’s actions. This focus is designed to provide students with an introduction to some of the key scientific and technical ideas that have been developed in AI. There are four different sub-areas of AI represented in our department: Computer Vision, Computational Linguistics, Machine Learning, and Knowledge Representation and Reasoning. These areas cover a wide variety of ideas and techniques. Students wanting to achieve this focus are required to take courses from at least two of these sub-areas (as in point 2, below).

Enrolment Requirements:

Enrolment in the Computer Science Specialist Program (ASSPE1689).

Completion Requirements:

Required Courses:

1. 1.0 FCE from the following: CSC336H1, MAT235Y1, MAT237Y1, MAT247H1, STA248H1, STA261H1, STA302H1, STA347H1
2. 2.5 FCEs from the following, so that courses are from at least two of the four areas:
   a. CSC401H1, CSC485H1
   b. CSC321H1, CSC420H1
   c. CSC413H1, CSC421H1, CSC321H1, CSC311H1, CSC411H1, CSC412H1, STA414H1
   d. CSC304H1, CSC384H1, CSC486H1

Suggested Related Courses:

CSC324H1, COG250Y1, PSY270H1, PHL232H1, PHL342H1

Focus in Computational Linguistics and Natural Language Processing - ASFOC1689C

Description:

(4.0 FCEs)

How can we build and analyze systems that enable users to communicate with computers using human language (also called natural language) and automatically process the vast amounts of data on the web available in the form of text? The focus covers appropriate material on natural language interfaces, as well as tools such as document summarization, intelligent search over the web, and so on. Students considering this focus are encouraged to consider a Major in Linguistics. [Note 0.5 FCE in LIN is in addition to the 12.0 FCEs required to complete the Specialist program]

Enrolment Requirements:

Enrolment in the Computer Science Specialist Program (ASSPE1689).

Completion Requirements:

Required Courses:

1. CSC318H1
2. CSC401H1, CSC485H1
3. LIN101H1, LIN200H1
4. 1.5 FCEs from the following: CSC309H1, CSC413H1, CSC421H1, CSC311H1, CSC411H1, CSC428H1, CSC486H1
5. 0.5 FCE from the following: PSY100H1, COG250Y1
Focus in Computer Vision - ASFOC1689D

Description:

(3.5 FCEs)

Computer vision is the science and technology of machines that can see. As a science, the goal of computer vision is to understand the computational processes required for a machine to come to an understanding of the content of a set of images. The data here may be a single snapshot, a video sequence, or a set of images from different viewpoints or provided by medical scanners.

The computer vision focus introduces students to the study of vision from a computational point of view. That is, we attempt to clearly define computational problems for various steps of the overall process, and then show how these problems can be tackled with appropriate algorithms.

Students who wish to pursue computer vision should have an understanding of linear algebra and calculus of several variables. Moreover, they should be solid programmers and have a good understanding of data structures and algorithm design. These basic tools are required in order to first pose computational vision problems, and then develop and test algorithms for the solution to those problems.

Enrolment Requirements:

Enrolment in the Computer Science Specialist Program (ASSPE1689).

Completion Requirements:

Required Courses:

1. MAT235Y1/ MAT237Y1/ MAT257Y1, CSC320H1, CSC336H1, CSC411H1, CSC418H1
2. 0.5 FCE from the following: CSC412H1, CSC417H1, CSC419H1, CSC419H1, CSC450H1 (Note: students must petition to take a graduate course.)

Suggested Related Courses:

1. CSC301H1, CSC309H1, CSC410H1
2. Relevant courses offered at UTM: CSC347H5, CSC423H5, CSC427H5
3. Relevant courses offered by Engineering: ECE454H1, ECE458H1

Focus in Game Design - ASFOC1689G

Description:

(3.0 FCEs)

Video game design combines several disciplines within computer science, including software engineering, graphics, artificial intelligence, and human-computer interaction. It also incorporates elements of economics, psychology, music, and creative writing, requiring video game researchers to have a diverse, multidisciplinary set of skills.

Students who wish to pursue video game design should have an understanding of linear algebra (for computer graphics modelling), computer hardware and operating systems (for console architecture), data structures, and algorithm design. Students will gain a general knowledge of the more advanced topics listed in the courses below.
Focus in Human-Computer Interaction - ASFOC1689H

**Description:**

(6.5 FCEs)

Human-Computer Interaction (HCI) is the scientific study of the use of computers by people and the design discipline that informs the creation of systems and software that are useful, usable, and enjoyable for the people who use them. HCI students have exciting opportunities for research and graduate school; HCI professionals often have jobs with titles such as user interface architect, user interface specialist, interaction designer, or usability engineer. [Note that 3.5 FCEs in SOC & PSY are in addition to the 12.0 FCEs required to complete the Specialist program]

**Enrolment Requirements:**

Enrolment in the Computer Science Specialist Program (ASSPE1689).

**Completion Requirements:**

**Required Courses:**

1. CSC300H1, CSC301H1, CSC318H1, CSC384H1, CSC317H1/ CSC417H1/ CSC418H1/ CSC419H1, CSC404H1

1. CSC303H1, CSC304H1, CSC358H1, CSC458H1, CSC428H1

2. MUS300H1, CIN212H1/ INI222H1, CIN432H1/ INI465H1, ENG235H1

3. ECO326H1, RSM482H1/MGT2056H

**Focus in Scientific Computing - ASFOC1689A**

**Description:**

(3.5 FCEs)

Scientific computing studies the world around us. Known and unknown quantities are related through certain rules, e.g. physical laws, formulating mathematical problems. These problems are solved by numerical methods implemented as algorithms and run on computers. The numerical methods are analyzed and their performance (e.g. accuracy, efficiency) studied. Problems, such as choosing the optimal shape for an airplane (to achieve, for example, minimal fuel consumption), finding the fair price for derivative products of the market, or regulating the amount of radiation in medical scans, can be modelled by mathematical expressions and solved by numerical techniques.

Students wishing to study scientific computing should have a strong background in mathematics—in particular calculus of several variables, linear algebra, and statistics—be fluent in programming, and have a good understanding of data structures and algorithm design.

**Enrolment Requirements:**

Enrolment in the Computer Science Specialist Program (ASSPE1689).

**Completion Requirements:**

**Required Courses:**

1. MAT235Y1/ MAT237Y1/ MAT257Y1

2. 1.5 FCEs from the following: CSC336H1, CSC436H1, CSC446H1, CSC456H1, CSC466H1

3. 1.0 FCE from the following: CSC317H1/ CSC320H1/ CSC417H1/ CSC418H1/ CSC419H1, CSC311H1/ CSC411H1, CSC343H1, CSC384H1, CSC358H1/ CSC458H1

**Suggested Related Courses:**

- CSC367H1

- MAT224H1/ MAT240H1/ MAT247H1, MAT334H1/ MAT354H1, MAT337H1/ MAT357H1

It is also recommended that students in this focus consider taking a half-course or two from the basic sciences (such as physics, chemistry, biology), as these sciences are the source of many problems solved by numerical techniques.
**Focus in Theory of Computation - ASFOC1689I**

**Description:**

(5.5 FCEs)

Why is it easy to sort a list of numbers, but hard to break Internet encryption schemes? Is finding a solution to a problem harder than checking that a solution is correct? Can we find good approximate solutions, even when the exact solutions seem out of reach? Theory of Computation studies the inherent complexity of fundamental algorithmic problems. On one hand, we develop ground-breaking efficient data structures and algorithms. On the other, we have yet to develop good algorithms for many problems despite decades of effort, and for these problems we strive to prove no time- or space-efficient algorithms will ever solve them. While the field has seen some successful impossibility results, there are still many problems (such as those underlying modern cryptography and security) for which we do not know either efficient algorithms or strong lower bounds.

This focus takes a rigorous, mathematical approach to computational problem-solving: students will gain a deep understanding of algorithm paradigms and measures of problem complexity, and develop the skills necessary to convey abstract ideas with precision and clarity. Many of our students go on to graduate studies and sophisticated algorithmic work in industry. This focus has natural ties with many branches of mathematics and is the foundation of many computer science fields. Consequently, our students often apply their theoretical knowledge to other fields of interest.

We strongly encourage taking the enriched theory courses (CSC240H1, CSC265H1) as well as specialist/major versions of the MAT requirements for our focus. (Depending on courses selected for points 3 & 4, students may need to complete 0.5–1.0 FCE in addition to the 12.0 FCEs required to complete the Specialist program.)

**Enrolment Requirements:**

Enrolment in the Computer Science Specialist Program (ASSPE1689).

**Completion Requirements:**

Required courses:

1. MAT137Y1/ MAT157Y1/ MAT237Y1 (Note: If MAT237Y1 is used here, it cannot be counted as part of the 2.0 FCEs for point 4, below.)
2. CSC463H1
3. 2.0 FCEs from the following: CSC304H1, CSC336H1, CSC438H1, CSC448H1, CSC473H1, MAT309H1, MAT332H1, MAT344H1; at UTM: MAT302H5, graduate courses: CSC222H1, CSC240H1, CSC241H1, CSC242H1, CSC244H1, CSC256H1 (note that students must petition to take a graduate course)
4. 2.0 FCEs from the following: APMB236H1/ MIE262H1, MIE263H1, APMB241H1, APMB461H1, MAT224H1, MAT227H1, MAT237Y1, MAT257Y1, MAT244H1, MAT267H1, MAT301H1, MAT347Y1, MAT315H1, MAT327H1, MAT334H1, MAT354H1, MAT335H1, MAT337H1/ MAT357H1, any 400-level MAT course, STA248H1/ STA261H1, STA347H1

**Notes:**

1. Students who complete an independent study project (CSC494H1/ CSC495H1) under the supervision of a faculty member from the Theory group may request to substitute one of CSC494H1/ CSC495H1 for one of the courses in list 3 above. This request must be made directly to the department's Undergraduate Office.
2. Students who complete a graduate Topics course in Theory may request to count it towards the completion of list 3 above. This request must be made directly to the department's Undergraduate Office.

**Recommended Courses:**

1. Students are strongly encouraged to take the enriched theory courses: CSC240H1 and CSC265H1, rather than their regular counterparts: CSC165H1/ CSC236H1 and CSC263H1, respectively.

---

**Focus in Web and Internet Technologies - ASFOC1689J**

**Description:**

(3.5 FCEs)

The Web and Internet Technologies focus introduces students to the systems and algorithms that power today's large-scale web and Internet applications such as search engines, social networking applications, web data mining applications, and content distribution networks. The focus covers the algorithm foundations of web and Internet technologies, as well as implementation and system architecture.

Students who wish to pursue the Focus in Web and Internet Technologies should have a solid understanding of statistics, be good programmers, and have a good understanding of data structures and algorithm design.

To get practical experience, students pursuing the web and Internet technologies focus are encouraged to do either a term project or a summer USRA project in web and internet technologies.

**Enrolment Requirements:**

Enrolment in the Computer Science Specialist Program (ASSPE1689).

**Completion Requirements:**

Required courses:

1. STA248H1/ STA261H1, CSC309H1, CSC343H1, CSC358H1, CSC458H1, CSC411H1, CSC411H1
2. 0.5 FCE from the following: CSC367H1, CSC443H1, CSC469H1

**Suggested Related Courses:**

1. Courses offered at UTM: CSC347H5, CSC423H5, CSC427H5
2. ECE568H1
3. ENV281H1, ENV381H1
Computer Science Major (Science Program) - ASMAJ1689

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

For students admitted to Arts & Science in the Year 1 Computer Science (CMP1) admission category:

Completed courses (with minimum grades)
The following courses with the stated minimum grades are required:

- CSC110Y1 (70%)
- CSC111H1 (77%)
- MAT137Y1/ MAT157Y1

For students admitted to other Arts & Science Year 1 admission categories:

Special Requirement

- Students who do not have the Computer Science Admission Guarantee must complete a supplementary application to be considered for the program.

Variable Minimum Grade

A minimum grade is needed for entry, and this minimum changes each year depending on available spaces and the number of applicants. The following courses must be completed:

- CSC148H1
- CSC165H1/ CSC240H1

To ensure that students admitted to the program will be successful, applicants with a grade below 70% will not be considered for admission. Obtaining this minimum grade does not guarantee admission to the program.

Notes:

1. Requests for admission will be considered in the first program request period only.
2. Due to the limited enrolment nature of this program, students are strongly advised to plan to enroll in backup programs.
3. Students admitted to the program after second or third year will be required to pay retroactive deregulated program fees.

Completion Requirements:

(8.0 credits, including at least 0.5 credit at the 400-level)

First year (2.5 credits):

1. (CSC108H1, CSC148H1, CSC165H1/ CSC240H1)/(CSC110Y1, CSC111H1); MAT137Y1/ MAT157Y1/(MAT135H1, MAT136H1)

Notes:

a. Students with a strong background in an object-oriented language such as Python, Java or C++ may omit CSC108H1 and proceed directly with CSC148H1. There is no need to replace the missing half-credit for program completion; however, please base your course choice on what you are ready to take, not on "saving" a half-credit.

b. CSC240H1 is an accelerated and enriched version of CSC165H1 plus CSC236H1, intended for students with a strong mathematical background, or who develop an interest after taking CSC165H1. If you take CSC240H without CSC165H1, there is no need to replace the missing half-credit for program completion; but please see Note (a).

c. We recommend that students take MAT137Y1 or MAT157Y1, as they have been determined to provide the best preparation for upper-year courses in computer science and benefit students in CSC165H1/CSC240H1. Similarly, we recommend MAT223H1 or MAT240H1, if students choose one of these options in their later years.

Second year (2.5 credits):

2. CSC207H1, CSC236H1/ CSC240H1, CSC258H1, CSC263H1/ CSC265H1; STA247H1/ STA255H1/ STA257H1

Later years (3.0 credits):

3. 3.0 credits from the following:

- Any 200-/300-/400-level CSC course
- BCB410H1, BCB420H1, BCB330Y1/ BCB430Y1
- MAT223H1/ MAT240H1/ MAT221H1, MAT235Y1/ MAT237Y1/ MAT257Y1, any 300-/400-level MAT course except MAT329Y1, MAT390H1, MAT391H1
- STA414H1

with at least 0.5 credit from a 400-level CSC/BCB course, at least 1.0 additional credit from 300-/400-level CSC/BCB courses, and at least 0.5 additional credit from a 300-/400-level course.

No more than 1.0 credit from CSC490H1, CSC491H1, CSC494H1, CSC495H1, BCB330Y1/ BCB430Y1 may be used to fulfill program requirements.

The choices in 3 must satisfy the requirement for an integrative, inquiry-based activity by including one of the following courses: CSC301H1, CSC318H1, CSC404H1, CSC417H1, CSC418H1, CSC419H1, CSC420H1, CSC428H1, CSC454H1, CSC485H1, CSC490H1, CSC491H1, CSC494H1, CSC495H1. This requirement may also be met by participating in the PEY Co-op (Professional Experience Year Co-op) program. Transfer credits cannot comprise more than 1.0 credit at the 300-/400-level, and cannot be used to satisfy the requirement for an integrative, inquiry-based activity. In addition, transfer credits cannot be used to satisfy the requirement for 0.5 credit at the 400-level in CSC/BCB.
Computer Science Minor (Science Program) - ASMIN1689

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

For students admitted to Arts & Science in the Year 1 Computer Science (CMP1) admission category:

Completed courses (with minimum grades)
The following courses with the stated minimum grades are required:

- CSC110Y1 (70%)
- CSC111H1 (70%)

For students admitted to other Arts & Science Year 1 admission categories:

Special Requirement

- Students who do not have the Computer Science Admission Guarantee must complete a supplementary application to be considered for the program.

Variable Minimum Grade

A minimum grade is needed for entry, and this minimum changes each year depending on available spaces and the number of applicants. The following courses must be completed:

- CSC148H1
- CSC165H1/ CSC240H1

To ensure that students admitted to the program will be successful, applicants with a grade below 70% will not be considered for admission. Obtaining this minimum grade does not guarantee admission to the program.

Notes:

1. Requests for admission will be considered in the first program request period only.
2. Due to the limited enrolment nature of this program, students are strongly advised to plan to enroll in backup programs.

Completion Requirements:

(4.0 credits)

1. (CSC108H1/ CSC120H1, CSC148H1, CSC165H1/ CSC240H1)/(CSC110Y1, CSC111H1)

Notes:

a. Students with a strong background in Java or C++ may omit CSC108H1 and proceed directly with CSC148H1.
 b. CSC240H1 is an accelerated and enriched version of CSC165H1 plus CSC236H1, intended for students with a strong mathematical background, or who develop an interest after taking CSC165H1.

c. Consult the Undergraduate Office for advice about choosing among CSC108H1 and CSC148H1, and between CSC165H1 and CSC240H1.

2. CSC207H1, CSC236H1/ CSC240H1

(Total of above requirements: 2.5 credits. If you take fewer than 2.5 credits, you must take more than 1.5 credits from the next list, so that the total is 4.0 credits.)

3. 1.5 credits from the following list, of which at least 1.0 credit must be at the 300-/400-level:

- CSC: any 200-/300-/400-level

Note:

- Computer Science Minors are limited to 1.5 credits from 300-/400-level CSC/ECE courses.
- Transfer credits cannot comprise more than 0.5 credit at the 300-/400-level.

Courses equivalent to CSC148H1 and CSC165H1/CSC240H1:

In the past, Computer Science has accepted courses equivalent to CSC148H1 and CSC165H1/CSC240H1 when considering applications to Computer Science programs. Beginning in 2020, only grades from CSC148H1 and CSC165H1/CSC240H1 will be accepted for purposes of application to the Computer Science Specialist, Major and Minor and the Data Science Specialist. However, equivalent courses will be accepted for purposes of prerequisites for course enrolment.

Advice on choosing courses towards a Major in Computer Science

A Major program in any discipline may form part (but not the whole) of your degree requirements. The Major program in Computer Science is designed to include a solid grounding in the essentials of Computer Science, followed by options that let you explore one or a few topics more deeply. You will also realize what areas you have not studied, and be ready to explore them if your interests change after completing the Major.

To give you freedom to choose your path through Computer Science, we have designed the Major to include a minimal set of required courses. There are some courses that we think you ought to consider carefully as you make those choices. CSC373H1 is fundamental to many more advanced Computer Science topics, where designing appropriate algorithms is central. CSC209H1 is a prerequisite to effective work in many application areas.

We have designed “packages” of related courses that are intended to accompany the Specialist program in Computer Science, and you may find them helpful in completing your Major too. More information can be found on the Computer Science website.

A significant role of the Major is to allow you to integrate your studies in Computer Science and another discipline. For example, many Computer Science students are also interested in statistics, economics, physics or mathematics. In those cases, it makes sense to enrol in a Major in one discipline and either a Major or a Specialist in the other. If your interests are evenly balanced, the obvious choice is to do two Majors, and that is what we assume here.
If you are doing a double Major (two Majors in related disciplines), you might want to consult your college registrar’s office for advice on satisfying the degree requirements with overlapping Majors. A number of sample combinations are listed below for your reference. This is not a complete list; many other combinations are possible.

A Major program is generally not enough to prepare you for graduate study in Computer Science, though a complete Specialist is not required. Please consult the advice about graduate study included with the description of the Specialist program in Computer Science.

Applying to Computer Science Programs

For enrolment requirements please refer to the individual program requirements below. More information is available on the Department of Computer Science website at: https://web.cs.toronto.edu/how-to-apply-to-the-CS-program

Regarding Computer Science Courses

Enrolment notes

1. The University of Toronto Mississauga and University of Toronto Scarborough Computer Science Minor subject POSTs are not recognized as restricted Computer Science programs for St. George course enrolments.

2. No late registration is permitted in any Computer Science course after the first two weeks of classes. Enrolment in most Computer Science courses above 100-level MAY be restricted. Consult the Calendar or the Arts & Science Registration Instructions and Timetable for details.

3. Students not enrolled in the Computer Science Major or Specialist programs are limited to a maximum of three 300-/400-level CSC/ECE half-courses.

Prerequisites and exclusions

Prerequisites and exclusions for all courses are strictly enforced. Prerequisite waivers can be granted by instructors if the student demonstrates that s/he has background covering the material of the prerequisite course(s).

Please refer to the Arts & Science Registration Instructions and Timetable for prerequisite waiver deadlines.

Dropping down from enriched to regular courses

Students may go to their college to drop down from enriched courses to regular courses. The courses are as follows: from CSC148H1 to CSC108H1, from CSC240H1 to CSC165H1 (or to CSC265H1 if you have already passed CSC165H1 with at least 60%), and from CSC263H1 to CSC263H1. Students may only drop down if there is space in the course into which they are moving.

Drop down deadlines

2020, Fall session: Friday, October 9, 2020
2021, Winter session: Friday, January 29, 2021

Students with transfer credits

If you have transfer credits in Computer Science, or a similar subject, for courses done at another university or college, contact our Undergraduate Office (BA4290) for advice on choosing courses. Also ask for advice even if you don’t have transfer credits yet but are considering degree study at the University of Toronto. Without advice, you risk poor course choice or other adverse consequences.

First-Year Foundation Seminars

First-Year Foundation Seminars are open only to newly-admitted, Faculty of Arts & Science students (3.5 credits or less). They are full-credit or half-credit courses that focus on discussion of issues, questions and controversies surrounding a particular discipline (or several disciplines) in a small-group setting that encourages the development of critical thinking, writing skills, oral presentation and research methods. FYF seminars are as rigorous and demanding as any other first-year course and require in addition the acquisition of those skills expected of successful undergraduate students. With a maximum enrolment of 30 students each, they are an ideal way to have an enjoyable and challenging small-class experience in your first year.

First-Year Foundation Seminars:

- Count as 1.0 or 0.5 of the 20 credits required for an Hon. B.A., Hon B.Sc. or B. Com.
- Can be counted towards the breadth requirement.

Computer Science Courses

CSC104H1 - Computational Thinking

Hours: 24L/12T

Humans have solved problems for millennia on computing devices by representing data as diverse numbers, text, images, sound and genomes, and then transforming the data. A gentle introduction to designing programs (recipes) for systematically solving problems that crop up in diverse domains such as science, literature, and graphics. Social and intellectual issues raised by computing. Algorithms, hardware, software, operating systems, the limits of computation.

Note: you may not take this course concurrently with any Computer Science course, but you may take CSC108H1/CSC148H1 after CSC104H1.

Exclusion: JCC250H1; Any CSC course except CSC196H1, CSC197H1, CSC199H1

Distribution Requirements: Science

Breadth Requirements: The Physical and Mathematical Universes (5)
CSC108H1 - Introduction to Computer Programming

Hours: 36L

NOTE: You may not take this course concurrently with CSC120H1/CSC148H1, but you may take CSC148H1 after CSC108H1.

Exclusion: CSC110Y1, CSC120H1, CSC121H1, CSC148H1
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

CSC110Y1 - Foundations of Computer Science I

Hours: 72L/24P

An introduction to the field of computer science combining the tools and techniques of programming (using the Python programming language) with rigorous mathematical analysis and reasoning. Topics include: data representations; program control flow (conditionals, loops, exceptions, functions); mathematical logic and formal proof; algorithms and running time analysis; software engineering principles (formal specification and design, testing and verification). Prior programming experience is not required to succeed in this course.

This course is restricted to students in the first year Computer Science admission stream, and is only offered in the Fall term. Other students planning to pursue studies in computer science should enrol in CSC108H1, CSC148H1, and CSC165H1/CSC240H1.

Exclusion: CSC108H1, CSC148H1, CSC165H1
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

CSC111H1 - Foundations of Computer Science II

Hours: 36L/24P

A continuation of CSC110Y1 to extend principles of programming and mathematical analysis to further topics in computer science.

Topics include: object-oriented programming (design principles, encapsulation, composition and inheritance); binary representation of numbers; recursion and mathematical induction; abstract data types and data structures (stacks, queues, linked lists, trees, graphs); the limitations of computation.

This course is restricted to students in the first year Computer Science admission stream, and is only offered in the Winter term. Other students planning to pursue studies in computer science should enrol in CSC108H1, CSC148H1, and CSC165H1/CSC240H1.

Prerequisite: CSC110Y1 (70% or higher)
Exclusion: CSC108H1, CSC148H1, CSC165H1
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

CSC120H1 - Computer Science for the Sciences

Hours: 36L/12P

An introduction to computer science for students in other sciences, with an emphasis on gaining practical skills. Introduction to programming with examples and exercises appropriate to the sciences; web programming; software tools. Topics from: database design, considerations in numerical calculation, using UNIX/LINUX systems. At the end of this course you will be able to develop computer tools for scientific applications, such as the structuring and analysis of experimental data. With some additional preparation, you will also be ready to go on to CSC148H1. Practical (P) sections consist of supervised work in the computer laboratory. No programming experience is necessary.

Exclusion: Any CSC course, with the exception of CSC104H1
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)
CSC148H1 - Introduction to Computer Science

Hours: 36L/24P

Abstract data types and data structures for implementing them. Linked data structures. Encapsulation and information-hiding. Object-oriented programming. Specifications. Analyzing the efficiency of programs. Recursion. This course assumes programming experience as provided by CSC108H1. Students who already have this background may consult the Computer Science Undergraduate Office for advice about skipping CSC108H1. Practical (P) sections consist of supervised work in the computing laboratory. These sections are offered when facilities are available, and attendance is required. NOTE: Students may go to their college to drop down from CSC148H1 to CSC108H1. See above for the drop down deadline.

Prerequisite: CSC108H1/(equivalent programming experience)
Exclusion: CSC111H1, CSC207H1, CSC148H5, CSCA48H3
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes

CSC165H1 - Mathematical Expression and Reasoning for Computer Science

Hours: 36L/12T

Introduction to abstraction and rigour. Informal introduction to logical notation and reasoning. Understanding, using and developing precise expressions of mathematical ideas, including definitions and theorems. Structuring proofs to improve presentation and comprehension. General problem-solving techniques. Running time analysis of iterative programs. Formal definition of Big-Oh. Diagonalization, the Halting Problem, and some reductions. Unified approaches to programming and theoretical problems.

Corequisite: CSC108H1/CSC120H1/(equivalent programming experience)
Exclusion: CSC111H1, CSC236H1, CSC240H1, MAT102H5, CSCA65H3
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes

CSC196H1 - Great Ideas in Computing

Hours: 36L

We will pursue the general (and very debatable) theme of GREAT IDEAS in COMPUTING (including some surprising algorithms). The ambitious goal is to try to identify some of the great ideas that have significantly influenced the field and have helped to make computing so pervasive. We will concentrate on mathematical, algorithmic and software ideas with the understanding that the importance and usefulness of these ideas depends upon (and often parallels) the remarkable ideas and progress in computing and communications hardware. As we will see, many of the great ideas were against the “prevailing opinion”. The list of topics we shall discuss will depend to some degree on the background and interests of the class. Restricted to first-year students. Not eligible for CR/NCR option.

Recommended Preparation: Some knowledge of probability theory
Distribution Requirements: Science
Breadth Requirements: Society and its Institutions (3)

CSC197H1 - What, Who, How: Privacy in the Age of Big Data Collection

Hours: 24S

The rapid advance of technology has brought remarkable changes to how we conduct our daily lives, from how we communicate, consume news and data, and purchase goods. As we increase our online activity, so too do we increase the amount of personal data that we’re sharing, often without realizing it. The questions of exactly what data is being collected, who is collecting and accessing this data, and how this data is being used, have significant implications for both individuals and our larger social and political institutions. Organized by a wide variety of case studies drawn from current events, we’ll study how personal data can be collected and tracked, how personal and social factors may influence our own decisions about whether and how much to share our data, and what broader political and legal tools are used to either protect or subvert individual privacy. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)
CSC198H1 - Computing for Science

Hours: 48L

Computational skills for the modern practice of basic and applied science. Applied computer programming with an emphasis on practical examples related to the simulation of matter, drawing from scientific disciplines including chemistry, biology, materials science, and physics. Studio format with a mixture of lecture, guided programming, and open scientific problem solving. Students will be exposed to Python numerical and data analysis libraries. Restricted to first-year students. Not eligible for CR/NCR option.

Exclusion: Any CSC course, except CSC104H1
Recommended Preparation: We recommend students also be enrolled in CHM151H1, PHY151H1, or another science course
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

CSC199H1 - Intelligence, Artificial and Human

Hours: 24S

What is human intelligence? How close are we to replicating it? How productive/reductive is the brain-computer analogy? What ethical challenges are posed by AI on workers, society, and the environment? Can we put a hold on “progress”? Is Silicon Valley the seat of a new techno-religion? What can we learn from works of science fiction about the future of human-AI interaction? Through reading discussion, written assignment, and workshops, this seminar will present students with the opportunity to integrate their computer science interests with philosophy, history, and literature. There is an equivalent course offered by St. Michael’s College. Students may take one or the other but not both. Restricted to first-year students. Not eligible for CR/NCR option.

Exclusion: SMC199H1 (Intelligence, Artificial and Human)
Distribution Requirements: Science
Breadth Requirements: Society and its Institutions (3)

CSC207H1 - Software Design

Hours: 24L/12T

An introduction to software design and development concepts, methods, and tools using a statically-typed object-oriented programming language such as Java. Topics from: version control, unit testing, refactoring, object-oriented design and development, design patterns, advanced IDE usage, regular expressions, and reflection. Representation of floating-point numbers and introduction to numerical computation.

Prerequisite: 60% or higher in CSC148H1/60% or higher in CSC111H1 (Please note: The minimum prerequisite grade in CSC148H1 is lower than the minimum grade for program admission in Computer Science. If you take this course when your grade in CSC148H1 is lower than the requirement for program admission, you will be unable to enrol in a Computer Science program. If you hope to enrol in a Computer Science program in future, please ensure that you satisfy the program admission grade requirements in CSC148H1 before completing CSC207H1.)
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

CSC209H1 - Software Tools and Systems Programming

Hours: 24L/12T

Software techniques in a Unix-style environment, using scripting languages and a machine-oriented programming language (typically C). What goes on in the operating system when programs are executed. Core topics: creating and using software tools, pipes and filters, file processing, shell programming, processes, system calls, signals, basic network programming.

Prerequisite: CSC207H1
Exclusion: CSC372H1, CSC369H1, CSC469H1
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)
CSC236H1 - Introduction to the Theory of Computation

**Hours:** 24L/12T

The application of logic and proof techniques to Computer Science. Mathematical induction; correctness proofs for iterative and recursive algorithms; recurrence equations and their solutions; introduction to automata and formal languages. This course assumes university-level experience with proof techniques and algorithmic complexity as provided by CSC165H1. Very strong students who already have this experience (e.g. successful completion of MAT157Y1) may consult the undergraduate office about proceeding directly into CSC236H1 or CSC240H1.

**Prerequisite:** 60% or higher in CSC148H1/ 60% or higher in CSC111H1, 60% or higher in CSC165H1/ 60% or higher in CSC111H1 (Please note: The minimum prerequisite grade in CSC148H1 and CSC165H1/CSC240H1 is lower than the minimum grade for program admission in Computer Science. If you take this course when your grade in CSC165H1/CSC240H1 is lower than the requirement for program admission, you will be unable to enrol in a Computer Science program. If you hope to enrol in a Computer Science program in future, please ensure that you satisfy the program admission grade requirements in CSC165H1/CSC240H1 before completing CSC236H1. Students will not be permitted to retake CSC165H1 after completing CSC236H1.)

**Exclusion:** CSC240H1

**Distribution Requirements:** Science

**Breadth Requirements:** The Physical and Mathematical Universes (5)

CSC240H1 - Enriched Introduction to the Theory of Computation

**Hours:** 24L/12T

The rigorous application of logic and proof techniques to Computer Science. Propositional and predicate logic; mathematical induction and other basic proof techniques; correctness proofs for iterative and recursive algorithms; recurrence equations and their solutions (including the Master Theorem); introduction to automata and formal languages. This course covers the same topics as CSC236H1, together with selected material from CSC165H1, but at a faster pace, in greater depth and with more rigour, and with more challenging assignments. Greater emphasis will be placed on proofs and theoretical analysis. Certain topics briefly mentioned in CSC165H1 or CSC236H1 may be covered in more detail in this course, and some additional topics may also be covered.

**NOTES:**

1. If you completed CSC165H1 with a course grade less than 85, you should take CSC236H1 instead of CSC240H1.
2. Students may go to their college to drop down from CSC240H1 to CSC165H1 (or to CSC236H1 if they have already passed CSC165H1). See note in Calendar Section for the drop down deadlines.

**Corequisite:** CSC111H1/CSC148H1; MAT137Y1/MAT157Y1

**Exclusion:** CSC236H1, CSC263H1/CSC265H1

**Distribution Requirements:** Science

**Breadth Requirements:** The Physical and Mathematical Universes (5)

JCC250H1 - Computing for Science

**Previous Course Number:** CSC198H1

**Hours:** 24L/24T

Computational skills for the modern practice of basic and applied science. Applied computer programming with an emphasis on practical examples related to the simulation of matter, drawing from scientific disciplines including chemistry, biology, materials science, and physics. Studio format with a mixture of lecture, guided programming, and open scientific problem solving. Students will be exposed to Python numerical and data analysis libraries. No prior programming experience is required.

**Prerequisite:** CHM135H1/CHM136H1/CHM151Y1, 0.5 FCE in MAT (excluding FYF courses)

**Corequisite:** None

**Exclusion:** Any CSC course except CSC104H1, CSC196H1, CSC197H1

**Distribution Requirements:** Science

**Breadth Requirements:** The Physical and Mathematical Universes (5)
CSC258H1 - Computer Organization

**Hours:** 24L/12T/36P

Computer structures, machine languages, instruction execution, addressing techniques, and digital representation of data. Computer system organization, memory storage devices, and microprogramming. Block diagram circuit realizations of memory, control and arithmetic functions. There are a number of laboratory periods in which students conduct experiments with digital logic circuits.

**Prerequisite:** 60% or higher in CSC111H1/CSC148H1, 60% or higher in CSC111H1/CSC165H1/CSC240H1 (Please note: The minimum prerequisite grades in CSC148H1 and CSC165H1/ CSC240H1 are lower than the minimum grades for program admission in Computer Science. If you take this course when your grade in CSC148H1 or CSC165H1/CSC240H1 is lower than the requirement for program admission, you will be unable to enrol in a Computer Science program. If you hope to enrol in a Computer Science program in future, please ensure that you satisfy the program admission grade requirements in CSC148H1 and CSC165H1/CSC240H1 before completing CSC258H1.)

**Distribution Requirements:** Science

**Breadth Requirements:** The Physical and Mathematical Universes (5)

CSC265H1 - Enriched Data Structures and Analysis

**Hours:** 24L/12T

This course covers the same topics as CSC263H1, but at a faster pace, in greater depth and with more rigour, and with more challenging assignments. Greater emphasis will be placed on proofs, theoretical analysis, and creative problem-solving. Certain topics briefly mentioned in CSC263H1 may be covered in more detail in this course, and some additional topics may also be covered. Students without the exact course prerequisites but with a strong mathematical background are encouraged to consult the Department about the possibility of taking this course.

**Prerequisite:** CSC240H1 or an A- in CSC236H1

**Corequisite:** STA247H1/STA255H1/STA257H1

**Exclusion:** CSC263H1

**Distribution Requirements:** Science

**Breadth Requirements:** The Physical and Mathematical Universes (5)

CSC263H1 - Data Structures and Analysis

**Hours:** 24L/12T

Algorithm analysis: worst-case, average-case, and amortized complexity. Expected worst-case complexity, randomized quicksort and selection. Standard abstract data types, such as graphs, dictionaries, priority queues, and disjoint sets. A variety of data structures for implementing these abstract data types, such as balanced search trees, hashing, heaps, and disjoint forests. Design and comparison of data structures. Introduction to lower bounds.

**Prerequisite:** CSC236H1/ CSC240H1/ APS105H1/ APS106H1/ ESC180H1; STA237H1/ STA247H1/ STA255H1/ STA257H1/ ECE302H1/ STA237H1/ CHE223H1/ CME263H1/ MIE231H1/ MIE236H1/MSE238H1/ ECE286H1

**Exclusion:** CSC265H1

**Distribution Requirements:** Science

**Breadth Requirements:** The Physical and Mathematical Universes (5)

JSC270H1 - Data Science I

**Hours:** 24L/24P

This course is restricted to students in the Data Science Specialist program. Data exploration and preparation; data visualization and presentation; and computing with data will be introduced. Professional skills, such as oral and written communication, and ethical skills for data science will be introduced. Data science workflows will be integrated throughout the course. These topics will be explored through case studies and collaboration with researchers in other fields.

**Prerequisite:** STA257H1, CSC207H1

**Corequisite:** STA261H1, MAT237Y1/MAT257Y1, CSC236H1/ CSC240H1

**Exclusion:** CSC263H1

**Distribution Requirements:** Science

**Breadth Requirements:** The Physical and Mathematical Universes (5)

CSC299Y1 - Research Opportunity Program

**Hours:** TBA

Credit course for supervised participation in faculty research project. Details at https://www.artsci.utoronto.ca/current/academics/research-opportunities/... Not eligible for CR/NCR option.
CSC300H1 - Computers and Society

Hours: 24L/12T

This course offers a concise introduction to ethics in computing, distilled from the ethical and social discussions carried on by today’s academic and popular commentators. This course covers a wide range of topics within this area including the philosophical framework for analyzing computer ethics; the impact of computer technology on security, privacy and intellectual property, digital divide, and gender and racial discrimination; the ethical tensions with Artificial Intelligence around future of work and humanity, the emerging role of online social media over voice, inclusion, and democracy; and the environmental consequences of computing.

Prerequisite: Any CSC half course.
Exclusion: NOTE: Students not enrolled in the Computer Science Major or Specialist program at FAS, UTM, or UTSC, or the Data Science Specialist at FAS, are limited to a maximum of three 300-400-level CSC/ECE half-courses.
Distribution Requirements: Science
Breadth Requirements: Society and its Institutions (3)

CSC301H1 - Introduction to Software Engineering

Hours: 24L/12T

An introduction to agile development methods appropriate for medium-sized teams and rapidly-moving projects. Basic software development infrastructure; requirements elicitation and tracking; estimation and prioritization; teamwork skills; basic UML; design patterns and refactoring; security, discussion of ethical issues, and professional responsibility.

Prerequisite: CSC209H1, CSC263H1/CSC265H1
Exclusion: NOTE: Students not enrolled in the Computer Science Major or Specialist program at FAS, UTM, or UTSC, or the Data Science Specialist at FAS, are limited to a maximum of three 300-400-level CSC/ECE half-courses.
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

CSC302H1 - Engineering Large Software Systems

Hours: 24L/12T

An introduction to the theory and practice of large-scale software system design, development, and deployment. Project management; advanced UML; reverse engineering; requirements inspection; verification and validation; software architecture; performance modelling and analysis.

Prerequisite: CSC301H1
Exclusion: NOTE: Students not enrolled in the Computer Science Major or Specialist program at FAS, UTM, or UTSC, or the Data Science Specialist at FAS, are limited to a maximum of three 300-400-level CSC/ECE half-courses.
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

CSC303H1 - Social and Information Networks

Hours: 24L/12T

A course on how networks underlie the social, technological, and natural worlds, with an emphasis on developing intuitions for broadly applicable concepts in network analysis. Topics include: introductions to graph theory, network concepts, and game theory; social networks; information networks; the aggregate behaviour of markets and crowds; network dynamics; information diffusion; popular concepts such as "six degrees of separation," the "friendship paradox," and the "wisdom of crowds."

Prerequisite: CSC263H1/CSC265H1, STA247H1/STA255H1/STA257H1/ECO227Y1/STA237H1, MAT221H1/MAT223H1/MAT240H1
Exclusion: CSCC46H3. NOTE: Students not enrolled in the Computer Science Major or Specialist program at FAS, UTM, or UTSC, or the Data Science Specialist at FAS, are limited to a maximum of three 300-400-level CSC/ECE half-courses.
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)
CSC304H1 - Algorithmic Game Theory and Mechanism Design

Hours: 24L/12P

A mathematical and computational introduction to game theory and mechanism design. Analysis of equilibria in games and computation of price of anarchy. Design and analysis mechanisms with monetary transfers (such as auctions). Design and analysis of mechanisms without monetary transfers (such as voting and matching). This course is intended for economics, mathematics, and computer science students.

Prerequisite: STA247H1/STA255H1/STA257H1/STA237H1/PSY201H1/ECO227Y1, (MAT135H1, MAT136H1)/MAT137Y1/ MAT157Y1
Exclusion: NOTE: Students not enrolled in the Computer Science Major or Specialist program at FAS, UTM, or UTSC, or the Data Science Specialist at FAS, are limited to a maximum of three 300-400-level CSC/ECE half-courses.
Recommended Preparation: MAT223H1, CSC373H1
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

CSC309H1 - Programming on the Web

Hours: 24L/12T

An introduction to software development on the web. Concepts underlying the development of programs that operate on the web; survey of technological alternatives; greater depth on some technologies. Operational concepts of the internet and the web, static client content, dynamic client content, dynamically served content, n-tiered architectures, web development processes, and security on the web. Assignments involve increasingly more complex web-based programs. Guest lecturers from leading e-commerce firms will describe the architecture and operation of their web sites.

Prerequisite: CSC209H1/ESC180H1/ESC190H1/CSC190H1/(APS105H1, ECE244H1)
Exclusion: NOTE: Students not enrolled in the Computer Science Major or Specialist program at FAS, UTM, or UTSC, or the Data Science Specialist at FAS, are limited to a maximum of three 300-400-level CSC/ECE half-courses.
Recommended Preparation: CSC343H1
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

CSC311H1 - Introduction to Machine Learning

Previous Course Number: CSC411H1
Hours: 24L/12T

Prerequisite: CSC207H1/APS105H1/APS106H1/ESC180H1/CSC180H1; MAT235Y1/MAT237Y1/MAT257Y1/(minimum of 77% in MAT135H1 and MAT136H1)/(minimum of 73% in MAT137Y1)/(minimum of 67% in MAT157Y1)/MAT291H1/MAT294H1/(minimum of 77% in MAT186H1, MAT187H1)/(minimum of 73% in MAT194H1, MAT195H1)/(minimum of 73% in ESC194H1, ESC195H1); MAT221H1/MAT223H1/MAT240H1/MAT185H1/MAT188H1; STA237H1/STA247H1/STA255H1/STA257H1/STA286H1/CHE223H1/CME263H1/MIE231H1/MIE236H1/MSE239H1/ECE286H1
Exclusion: CSC411H1, STA314H1, ECE421H1. NOTE: Students not enrolled in the Computer Science Major or Specialist program at FAS, UTM, or UTSC, or the Data Science Specialist at FAS, are limited to a maximum of three 300-400-level CSC/ECE half-courses.
Recommended Preparation: MAT235Y1/MAT237Y1/MAT257Y1
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

CSC317H1 - Computer Graphics

Previous Course Number: CSC418H1
Hours: 24L/12T

Identification and characterization of the objects manipulated in computer graphics, the operations possible on these objects, efficient algorithms to perform these operations, and interfaces to transform one type of object to another. Display devices, display data structures and procedures, graphical input, object modelling, transformations, illumination models, primary and secondary light effects; graphics packages and systems. Students, individually or in teams, implement graphical algorithms or entire graphics systems.

Prerequisite: MAT235Y1/MAT237Y1/MAT257Y1/MAT291H1/MAT294H1/MAT221H1/MAT223H1/MAT240H1/MAT185H1/MAT188H1; CSC209H1/proficiency in C or C++/APS105H1/ESC180H1/CSC180H1
Exclusion: CSC418H1. NOTE: Students not enrolled in the Computer Science Major or Specialist program at FAS, UTM, or UTSC, or the Data Science Specialist at FAS, are limited to a maximum of three 300-400-level CSC/ECE half-courses.
Recommended Preparation: MAT244H1
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)
CSC318H1 - The Design of Interactive Computational Media

Hours: 24L/12T

User-centred design of interactive systems; methodologies, principles, and metaphors; task analysis. Interdisciplinary design; the role of graphic design, industrial design, and the behavioural sciences. Interactive hardware and software; concepts from computer graphics. Typography, layout, colour, sound, video, gesture, and usability enhancements. Classes of interactive graphical media; direct manipulation systems, extensible systems, rapid prototyping tools. Students work on projects in interdisciplinary teams.

Prerequisite: Any CSC half-course/ ESC180H1/ ESC190H1/ APS105H1/ APS106H1

Exclusion: NOTE: Students not enrolled in the Computer Science Major or Specialist program at FAS, UT, or UTSC, or the Data Science Specialist at FAS, are limited to a maximum of three 300-/400-level CSC/ECE half-courses.

Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

CSC320H1 - Introduction to Visual Computing

Hours: 24L/12P

Image synthesis and image analysis aimed at students with an interest in computer graphics, computer vision, or the visual arts. Focus on three major topics: (1) visual computing principles—computational and mathematical methods for creating, capturing, analyzing, and manipulating digital photographs (image acquisition, basic image processing, image warping, anti-aliasing); (2) digital special effects—applying these principles to create special effects found in movies and commercials; (3) visual programming—using C/C++ and OpenGL to create graphical user interfaces for synthesizing and manipulating photographs. The course requires the ability to use differential calculus in several variables and linear algebra.

Prerequisite: CSC209H1/(CSC207H1, proficiency in C or C++); MAT219H1/MAT223H1/MAT240H1, (MAT136H1 with a minimum mark of 77)/(MAT137Y1 with a minimum mark of 73)/(MAT157Y1 with a minimum mark of 67)/MAT235Y1/MAT237Y1/MAT257Y1

Exclusion: NOTE: Students not enrolled in the Computer Science Major or Specialist program at FAS, UT, or UTSC, or the Data Science Specialist at FAS, are limited to a maximum of three 300-/400-level CSC/ECE half-courses.

Recommended Preparation: MAT235Y1/MAT237Y1/MAT257Y1

Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

CSC324H1 - Principles of Programming Languages

Hours: 24L/12T

Programming principles common in modern languages; details of commonly used paradigms. The structure and meaning of code. Scope, control flow, datatypes, and parameter passing. Two non-procedural, non-object-oriented programming paradigms: functional programming (illustrated by languages such as Lisp/Scheme, ML or Haskell) and logic programming (typically illustrated in Prolog).

Prerequisite: CSC263H1/CSC265H1

Exclusion: CSC263H1/CSC265H1

Recommended Preparation: CSC300H1 provides useful background for work in CSC318H1, so if you plan to take CSC300H1 then you should do it before CSC318H1

Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

CSC336H1 - Numerical Methods

Hours: 24L/12T

The study of computational methods for solving problems in linear algebra, non-linear equations, and approximation. The aim is to give students a basic understanding of both floating-point arithmetic and the implementation of algorithms used to solve numerical problems, as well as a familiarity with current numerical computing environments.

Prerequisite: CSC148H1/CSC111H1; MAT133Y1(70%)/(MAT135H1, MAT136H1)/MAT137Y1/MAT137Y1/MAT157Y1, MAT221H1/MAT223H1/MAT240H1

Exclusion: CSC350H1, CSC351H1. NOTE: Students not enrolled in the Computer Science Major or Specialist program at FAS, UT, or UTSC, or the Data Science Specialist at FAS, are limited to a maximum of three 300-/400-level CSC/ECE half-courses.

Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)
CSC343H1 - Introduction to Databases

**Hours:** 36L

Introduction to database management systems. The relational data model. Relational algebra. Querying and updating databases: the query language SQL. Application programming with SQL. Integrity constraints, normal forms, and database design. Elements of database system technology: query processing, transaction management.

**Prerequisite:** CSC111H1/ CSC165H1/ CSC240H1/ (MAT135H1, MAT136H1)/ MAT135Y1/ MAT137Y1/ (MAT186H1, MAT187H1)/ (MAT194H1, MAT195H1)/ (ESC194H1, ESC195H1); CSC207H1/ ECE345H1/ ESC190H1

**Exclusion:** CSC443H1. NOTE: Students not enrolled in the Computer Science Major or Specialist program at FAS, UTM, or UTSC, or the Data Science Specialist at FAS, are limited to a maximum of three 300-/400-level CSC/ECE half-courses.

**Distribution Requirements:** Science
**Breadth Requirements:** The Physical and Mathematical Universes (5)

CSC369H1 - Operating Systems

**Hours:** 24L/12T

Principles of operating systems. The operating system as a control program and as a resource allocator. The concept of a process and concurrency problems: synchronization, mutual exclusion, deadlock. Additional topics include memory management, file systems, process scheduling, threads, and protection.

**Prerequisite:** CSC209H1, CSC258H1

**Exclusion:** NOTE: Students not enrolled in the Computer Science Major or Specialist program at FAS, UTM, or UTSC, or the Data Science Specialist at FAS, are limited to a maximum of three 300-/400-level CSC/ECE half-courses.

**Distribution Requirements:** Science
**Breadth Requirements:** The Physical and Mathematical Universes (5)

CSC367H1 - Parallel Programming

**Hours:** 24L/12T

Introduction to aspects of parallel programming. Topics include computer instruction execution, instruction-level parallelism, memory system performance, task and data parallelism, parallel models (shared memory, message passing), synchronization, scalability and Amdahl's law, Flynn taxonomy, vector processing and parallel computing architectures.

**Prerequisite:** CSC258H1, CSC209H1

**Exclusion:** NOTE: Students not enrolled in the Computer Science Major or Specialist program at FAS, UTM, or UTSC, or the Data Science Specialist at FAS, are limited to a maximum of three 300-/400-level CSC/ECE half-courses.

**Distribution Requirements:** Science
**Breadth Requirements:** The Physical and Mathematical Universes (5)

JSC370H1 - Data Science II

**Hours:** 24L/24P

This course is restricted to students in the Data Science Specialist program. Students will learn to identify and answer questions through the application of exploratory data analysis, data visualization, statistical methods or machine learning algorithms to complex data. Software development for data science and reproducible workflows. Communication of statistical information at various technical levels, ethical practice of data analysis and software development, and teamwork skills. Topics will be explored through case studies and collaboration with researchers in other fields.

**Prerequisite:** JSC270H1, STA261H1, MAT237Y1/MAT257Y1, CSC263H1, STA302H1, CSC343H1

**Corequisite:** STA303H1/STA305H1

**Distribution Requirements:** Science
**Breadth Requirements:** The Physical and Mathematical Universes (5)
CSC373H1 - Algorithm Design, Analysis & Complexity

Hours: 36L/12T

Standard algorithm design techniques: divide-and-conquer, greedy strategies, dynamic programming, linear programming, randomization, network flows, approximation algorithms. Brief introduction to NP-completeness: polynomial time reductions, examples of various NP-complete problems, self-reducibility. Additional topics may include approximation and randomized algorithms. Students will be expected to show good design principles and adequate skills at reasoning about the correctness and complexity of algorithms.

Prerequisite: CSC263H1/CSC265H1
Exclusion: CSC375H1. NOTE: Students not enrolled in the Computer Science Major or Specialist program at FAS, UTM, or UTSC, or the Data Science Specialist at FAS, are limited to a maximum of three 300-/400-level CSC/ECE half-courses.
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

CSC384H1 - Introduction to Artificial Intelligence

Hours: 24L/12T

Theories and algorithms that capture (or approximate) some of the core elements of computational intelligence. Topics include: search; logical representations and reasoning, classical automated planning, representing and reasoning with uncertainty, learning, decision making (planning) under uncertainty. Assignments provide practical experience, in both theory and programming, of the core topics.

Prerequisite: (CSC263H1/ CSC265H1/ ECE345H1/ ECE358H1/ MIE335H1, STA237H1/ STA247H1/ STA255H1/ STA257H1/ STA237H1/ ECE302H1/ STA266H1/ CHE223H1/ CME263H1/ MIE231H1/ MIE236H1/ MSE238H1/ ECE286H1)/ Permission of the Cognitive Science Director
Exclusion: NOTE: Students not enrolled in the Computer Science Major or Specialist program at FAS, UTM, or UTSC, or the Data Science Specialist at FAS, are limited to a maximum of three 300-/400-level CSC/ECE half-courses.
Recommended Preparation: CSC324H1
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

CSC385H1 - Microprocessor Systems

Hours: 24L/12T/36P

Microprocessor and embedded systems: Software techniques for real-time task creation and management. Connected device characteristics and the hardware and software ramifications. System construction and management. An examination of the issues unique to or particularly important to embedded computing. Laboratory experiments provide "hands on" experience. An open team project is done in the last few laboratory sessions.

Prerequisite: CSC258H1; CSC209H1/proficiency in C
Exclusion: CSC372H1, ECE385H1. NOTE: Students not enrolled in the Computer Science Major or Specialist program at FAS, UTM, or UTSC, or the Data Science Specialist at FAS, are limited to a maximum of three 300-/400-level CSC/ECE half-courses.
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

CSC396Y0 - Designing Systems for Real World Problems

This Summer Abroad special offering provides students with an opportunity to explore new environments, which improves their ability to see their own world with increased sensitivity and germinates new design ideas. In this course, students will identify a real problem in the world and work in groups on projects addressing this problem. Students will explore their problem space and the people within that space, identify needs, constraints, and requirements, and ultimately design solutions. Their designs will be iterated by gathering feedback and conducting usability testing on the early prototypes. The course projects will culminate with development of a technological solution that addresses the identified problem. Final project presentations will take place at the end of the course. This course can be counted as 0.5 FCE at the 300-level for Computer Science program completion.

Prerequisite: Any CSC half course, and balloting
Exclusion: NOTE: Students not enrolled in the Computer Science Major or Specialist program at FAS, UTM, or UTSC, or the Data Science Specialist at FAS, are limited to a maximum of three 300-/400-level CSC/ECE half-courses.
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

CSC398H0 - Research Excursions

Hours: TBA

An instructor-supervised group project in an off-campus setting. Details at https://www.artsci.utoronto.ca/current/academics/research-opportunities/... Not eligible for CR/NCR option.
CSC398Y0 - Research Excursions

Hours: TBA

CSC399Y1 - Research Opportunity Program

Credit course for supervised participation in faculty research project. Details at https://www.artsci.utoronto.ca/current/academics/research-opportunities/research-opportunities-program. Not eligible for CR/NCR option.

Exclusion: NOTE: Students not enrolled in the Computer Science Major or Specialist program at FAS, UTM, or UTSC, or the Data Science Specialist at FAS, are limited to a maximum of three 300-/400-level CSC/ECE half-courses.

CSC401H1 - Natural Language Computing

Hours: 24L/12T

Introduction to techniques involving natural language processing and speech in applications such as information retrieval, speech recognition and synthesis, machine translation, summarization, and dialogue. N-grams, corpus analysis, neural methods, and information theory. Python and other software.

Prerequisite: CSC207H1/ CSC209H1/ APS105H1/ APS106H1/ ESC180H1/ CSC180H1; STA237H1/ STA247H1/ STA255H1/ STA257H1/ ECE302H1/ STA286H1/ CME263H1/ MIE223H1/ MIE226H1/ MIE236H1/ MSE238H1/ ECE286H1
Exclusion: NOTE: Students not enrolled in the Computer Science Major or Specialist program at the FAS, UTM, or UTSC, or the Data Science Specialist at FAS, are limited to a maximum of three 300-/400-level CSC/ECE half-courses.
Recommended Preparation: MAT221H1/MAT223H1/MAT240H1 is strongly recommended
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

CSC404H1 - Introduction to Video Game Design

Hours: 24L/12T

Concepts and techniques for the design and development of electronic games. History, social issues, and story elements. The business of game development and game promotion. Software engineering, artificial intelligence, and graphics elements. Level and model design. Audio elements. Practical assignments leading to team implementation of a complete game.

Prerequisite: CSC301H1/CSC317H1/CSC318H1/CSC384H1/ CSC417H1/CSC418H1/CSC419H1
Exclusion: NOTE: Students not enrolled in the Computer Science Major or Specialist program at the FAS, UTM, or UTSC, or the Data Science Specialist at FAS, are limited to a maximum of three 300-/400-level CSC/ECE half-courses.
Distribution Requirements: Science
Breadth Requirements: Creative and Cultural Representations (1)

CSC410H1 - Software Testing and Verification

Hours: 24L/12T

Concepts and state-of-the-art techniques in quality assessment for software engineering; quality attributes; formal specifications and their analysis; testing, verification, and validation.

Prerequisite: CSC207H1, CSC236H1/CSC240H1
Exclusion: NOTE: Students not enrolled in the Computer Science Major or Specialist program at the FAS, UTM, or UTSC, or the Data Science Specialist at FAS, are limited to a maximum of three 300-/400-level CSC/ECE half-courses.
Recommended Preparation: CSC330H1
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)
CSC412H1 - Probabilistic Learning and Reasoning

**Hours:** 24L/12T

An introduction to probability as a means of representing and reasoning with uncertain knowledge. Qualitative and quantitative specification of probability distributions using probabilistic graphical models. Algorithms for inference and probabilistic reasoning with graphical models. Statistical approaches and algorithms for learning probability models from empirical data. Applications of these models in artificial intelligence and machine learning.

**Prerequisite:** CSC311H1/ CSC411H1/ STA314H1/ ECE421H1/ ROB313H1/ CSCC11H3

**Exclusion:** STA414H1. NOTE: Students not enrolled in the Computer Science Major or Specialist program at the FAS, UTM, or UTSC, or the Data Science Specialist at FAS, are limited to a maximum of three 300-/400-level CSC/ECE half-courses.

**Distribution Requirements:** Science

**Breadth Requirements:** The Physical and Mathematical Universes (5)

---

CSC413H1 - Neural Networks and Deep Learning

**Previous Course Number:** CSC321H1/CSC421H1

**Hours:** 24L/12T

**Prerequisite:** CSC311H1/ CSC411H1/ STA314H1/ ECE421H1/ ROB313H1/ CSCC11H3; MAT235Y1/ MAT237Y1/ MAT257Y1/ MAT291H1/ MAT294H1; MAT221H1/ MAT223H1/ MAT240H1/ MAT185H1/ MAT188H1; CSC209H1/ proficiency in C or C++/ APS105H1/ ESC180H1/ CSC180H1

**Exclusion:** CSC321H1/CSC421H1. NOTE: Students not enrolled in the Computer Science Major or Specialist program at the FAS, UTM, or UTSC, or the Data Science Specialist at FAS, are limited to a maximum of three 300-/400-level CSC/ECE half-courses.

**Distribution Requirements:** Science

**Breadth Requirements:** The Physical and Mathematical Universes (5)

---

CSC417H1 - Physics-Based Animation

**Hours:** 24L/12T

This course is designed to introduce students to the field of physics-based animation by exposing them to the underlying mathematical and algorithmic techniques required to understand and develop efficient numerical simulations of physical phenomena such as rigid bodies, deformable bodies and fluids. Topics covered include rigid body simulation, elasticity simulation, cloth simulation, collision detection and resolution and fluid simulation. Along the way, we will explore the underlying mathematics of ordinary differential equations, discrete time integration, finite element methods and more.

Students should have a strong background in Linear Algebra and Multivariate Calculus.

**Prerequisite:** MAT235Y1/ MAT237Y1/ MAT257Y1/ MAT291H1/ MAT294H1; MAT221H1/ MAT223H1/ MAT240H1/ MAT185H1/ MAT188H1; CSC209H1/ proficiency in C or C++/ APS105H1/ ESC180H1/ CSC180H1

**Exclusion:** NOTE: Students not enrolled in the Computer Science Major or Specialist program at FAS, UTM, or UTSC, or the Data Science Specialist at FAS, are limited to a maximum of three 300-/400-level CSC/ECE half-courses.

**Distribution Requirements:** Science

**Breadth Requirements:** The Physical and Mathematical Universes (5)

---

CSC419H1 - Geometry Processing

**Hours:** 24L/12T

Extending traditional signal processing, geometry processing interprets three-dimensional curves and surfaces as signals. Just as audio and image signal data can be filtered, denoised and decomposed spectrally, so can the geometry of a three-dimensional curve or surface. The course covers algorithms and mathematics behind fundamental operations for interpreting and manipulating geometric data. These essential tools enable: geometric modeling for computer aided design, life-like animations for computer graphics, reliable physical simulations, and robust scene representations for computer vision. Topics include: discrete curves and surfaces, curvature computation, surface reconstruction from point clouds, surface smoothing and denoising, parameterization, symmetry detection, and animation.

**Prerequisite:** MAT235Y1/ MAT237Y1/ MAT257Y1/ MAT291H1/ MAT294H1; MAT221H1/ MAT223H1/ MAT240H1/ MAT185H1/ MAT188H1; CSC209H1/ proficiency in C or C++/ APS105H1/ ESC180H1/ CSC180H1

**Exclusion:** NOTE: Students not enrolled in the Computer Science Major or Specialist program at the FAS, UTM, or UTSC, or the Data Science Specialist at FAS, are limited to a maximum of three 300-/400-level CSC/ECE half-courses.

**Recommended Preparation:** CSC317H1/ CSC418H1

**Distribution Requirements:** Science

**Breadth Requirements:** The Physical and Mathematical Universes (5)
CSC420H1 - Introduction to Image Understanding

Hours: 24L/12P

Prerequisite: CSC263H1/ CSC265H1/ ECE345H1/ ECE358H1/ MIE335H1; (MAT135H1, MAT136H1)/ MAT137Y1/ MAT157Y1/ (MAT186H1, MAT187H1)/ (MAT194H1, MAT195H1)/ (ESC194H1, ESC195H1); MAT221H1/ MAT223H1/ MAT240H1/ MAT185H1/ MAT188H1

Exclusion: NOTE: Students not enrolled in the Computer Science Major or Specialist program at the FAS, UTM, or UTSC, or the Data Science Specialist at FAS, are limited to a maximum of three 300-/400-level CSC/ECE half-courses.

Recommended Preparation: CSC320H1

Distribution Requirements: Science

Breadth Requirements: The Physical and Mathematical Universes
(5)

CSC428H1 - Human-Computer Interaction

Hours: 24L/12T

Understanding human behaviour as it applies to user interfaces: work activity analysis, observational techniques, questionnaire administration, and unobtrusive measures. Operating parameters of the human cognitive system, task analysis and cognitive modelling techniques and their application to designing interfaces. Interface representations and prototyping tools. Cognitive walkthroughs, usability studies and verbal protocol analysis. Case studies of specific user interfaces.

Prerequisite: CSC318H1; STA237H1/ STA247H1/ STA255H1/ STA257H1/ ECE302H1/ STA286H1/ CHE223H1/ CME263H1/ MIE231H1/ MIE236H1/ MIE238H1/ ECE286H1; CSC209H1/ proficiency in C or C++ or Java/ APS105H1/ ESC180H1/ CSC180H1

Exclusion: NOTE: Students not enrolled in the Computer Science Major or Specialist program at the FAS, UTM, or UTSC, or the Data Science Specialist at FAS, are limited to a maximum of three 300-/400-level CSC/ECE half-courses.

Recommended Preparation: A course in PSY; CSC209H1; (STA248H1/STA250H1/STA261H1)/(PSY201H1, PSY202H1)/(SOC202H1, SOC300H1)

Distribution Requirements: Science

Breadth Requirements: The Physical and Mathematical Universes
(5)

CSC436H1 - Numerical Algorithms

Hours: 24L/12T

Prerequisite: CSC336H1/CSC350H1

Exclusion: CSC351H1. NOTE: Students not enrolled in the Computer Science Major or Specialist program at the FAS, UTM, or UTSC, or the Data Science Specialist at FAS, are limited to a maximum of three 300-/400-level CSC/ECE half-courses.

Recommended Preparation: MAT235Y1/MAT237Y1/MAT257Y1

Distribution Requirements: Science

Breadth Requirements: The Physical and Mathematical Universes
(5)

CSC438H1 - Computability and Logic

Hours: 24L/12T

Prerequisite: (CSC363H1/CSC463H1)/CSC365H1/CSC373H1/ CSC375H1/MAT247H1

Exclusion: MAT309H1; PHL348H1. NOTE: Students not enrolled in the Computer Science Major or Specialist program at the FAS, UTM, or UTSC, or the Data Science Specialist at FAS, are limited to a maximum of three 300-/400-level CSC/ECE half-courses.

Distribution Requirements: Science

Breadth Requirements: The Physical and Mathematical Universes
(5)

CSC443H1 - Database System Technology

Hours: 24L/12T

Prerequisite: CSC343H1, CSC369H1, CSC373H1/CSC375H1

Exclusion: NOTE: Students not enrolled in the Computer Science Major or Specialist program at the FAS, UTM, or UTSC, or the Data Science Specialist at FAS, are limited to a maximum of three 300-/400-level CSC/ECE half-courses.

Distribution Requirements: Science

Breadth Requirements: The Physical and Mathematical Universes
(5)
CSC446H1 - Computational Methods for Partial Differential Equations

Hours: 24L/12T

Prerequisite: CSC351H1/(CSC336H1 (75%))/equivalent mathematical background; MAT237Y1/MAT257Y1; APM346H1/MAT351Y1/(MAT244H1/MAT267H1 and exposure to PDEs)

Exclusion: NOTE: Students not enrolled in the Computer Science Major or Specialist program at the FAS, UTM, or UTSC, or the Data Science Specialist at FAS, are limited to a maximum of three 300-/400-level CSC/ECE half-courses.

Distribution Requirements: Science

Breadth Requirements: The Physical and Mathematical Universes (5)

CSC448H1 - Formal Languages and Automata

Hours: 24L/12T

Regular, deterministic, context free, context sensitive, and recursively enumerable languages via generative grammars and corresponding automata (finite state machines, push down machines, and Turing machines). Topics include complexity bounds for recognition, language decision problems and operations on languages. Ordinarily offered in years alternating with CSC438H1.

Prerequisite: CSC236H1/CSC263H1/CSC240H1, CSC265H1

Exclusion: NOTE: Students not enrolled in the Computer Science Major or Specialist program at the FAS, UTM, or UTSC, or the Data Science Specialist at FAS, are limited to a maximum of three 300-/400-level CSC/ECE half-courses.

Recommended Preparation: CSC373H1

Distribution Requirements: Science

Breadth Requirements: The Physical and Mathematical Universes (5)

CSC454H1 - The Business of Software

Hours: 24L/12T

The software and internet industries; principles of operation for successful software enterprises; innovation and entrepreneurship; software business definition and planning; business models, market and product planning; product development, marketing, sales, and support; financial management and financing of high-technology ventures; management, leadership, and partnerships. Students will all write business plans in teams.

Prerequisite: Five CSC half-courses at the 200-level or higher

Exclusion: NOTE: Students not enrolled in the Computer Science Major or Specialist program at the FAS, UTM, or UTSC, or the Data Science Specialist at FAS, are limited to a maximum of three 300-/400-level CSC/ECE half-courses.

Distribution Requirements: Science

Breadth Requirements: The Physical and Mathematical Universes (5)

CSC456H1 - High-Performance Scientific Computing

Hours: 24L/12T

Computationally-intensive applications in science and engineering are implemented on the fastest computers available, today composed of many processors operating in parallel. Parallel computer architectures; implementation of numerical algorithms on parallel architectures; performance evaluation. Topics from: matrix-vector product, solution of linear systems, sparse matrices, iterative methods, domain decomposition, Fourier solvers. For students in computer science, applied mathematics, science, engineering. Ordinarily offered in years alternating with CSC446H1.

Prerequisite: CSC436H1/(CSC336H1 (75%))/equivalent mathematical background; CSC209H1/proficiency in C, C++, or Fortran

Exclusion: NOTE: Students not enrolled in the Computer Science Major or Specialist program at the FAS, UTM, or UTSC, or the Data Science Specialist at FAS, are limited to a maximum of three 300-/400-level CSC/ECE half-courses.

Distribution Requirements: Science

Breadth Requirements: The Physical and Mathematical Universes (5)
CSC457H1 - Principles of Computer Networks

Previous Course Number: CSC358H1
Hours: 24L/12T

The course covers fundamental principles of computer networks, as well as currently used network architectures and protocols. Its emphasis is 1) to explain why reliable data transfer, addressing, routing and congestion control are the fundamental concepts, 2) to explore the design principles behind algorithms/protocols for reliable data transfer, addressing, routing and congestion control and 3) to use current protocols such as TCP/IP, ARQ, Ethernet, CSMA/CD, DNS and Internet routing protocols as examples of concrete implementations/designs of these protocols. It will highlight the trade-offs (and approaches to navigate these trade-offs) in the design of computer network protocols.

Prerequisite: CSC373H1/CSC373H5/CSCC73H3, STA247H1/STA255H1/STA257H1/STA237H1
Exclusion: CSC358H1; NOTE: Students not enrolled in the Computer Science Major or Specialist program at FAS, UTM, or UTSC, or the Data Science Specialist at FAS, are limited to a maximum of three 300-/400-level CSC/ECE half-courses.
Recommended Preparation: CSC309H1, CSC369H1
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

CSC458H1 - Computer Networking Systems

Hours: 24L/12T

Computer networks with an emphasis on network systems, network programming, and applications. Networking basics: layering, routing, congestion control, and the global Internet. Network systems design and programming: Internet design, socket programming, and packet switching system fundamentals. Additional topics include network security, multimedia, software-defined networking, peer-to-peer networking, and online social networks.

Prerequisite: CSC209H1, CSC258H1, CSC263H1/CSC265H1, STA247H1/STA255H1/STA257H1/STA237H1/ECO227Y1
Exclusion: NOTE: Students not enrolled in the Computer Science Major or Specialist program at the FAS, UTM, or UTSC, or the Data Science Specialist at FAS, are limited to a maximum of three 300-/400-level CSC/ECE half-courses.
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

CSC463H1 - Computational Complexity and Computability

Hours: 24L/12P

Introduction to the theory of computability: Turing machines and other models of computation, Church’s thesis, computable and noncomputable functions, recursive and recursively enumerable sets, many-one reductions. Introduction to complexity theory: P, NP, polynomial time reducibility, NP-completeness, self-reducibility, space complexity (L, NL, PSPACE and completeness for those classes), hierarchy theorems, and provably intractable problems.

Prerequisite: CSC236H1/CSC240H1
Exclusion: CSC363H1/CSCC63H3, CSC365H1. NOTE: Students not enrolled in the Computer Science Major or Specialist program at the FAS, UTM, or UTSC, or the Data Science Specialist at FAS, are limited to a maximum of three 300-/400-level CSC/ECE half-courses.
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

CSC465H1 - Formal Methods in Software Design

Hours: 24L/12T

Using mathematics to write error-free programs. Proving each refinement; identifying errors as they are made. Program development to meet specifications; modifications that preserve correctness. Useful for all programming; essential for programs that lives depend on. Basic logic, formal specifications, refinement. Conditional, sequential, parallel, interaction, probabilistic programming, and functional programming.

Prerequisite: CSC236H1/CSC240H1/MAT309H1
Exclusion: NOTE: Students not enrolled in the Computer Science Major or Specialist program at the FAS, UTM, or UTSC, or the Data Science Specialist at FAS, are limited to a maximum of three 300-/400-level CSC/ECE half-courses.
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)
**CSC466H1 - Numerical Methods for Optimization Problems**

**Hours:** 36L

Numerical methods for unconstrained optimization problems, in particular line search methods and trust region methods. Topics include steepest descent, Newton's method, quasi-Newton methods, conjugate gradient methods and techniques for large problems. This course will normally be offered every other year.

**Prerequisite:** CSC336H1, MAT221H1/MAT223H1/MAT240H1, MAT235Y1/MAT237Y1/MAT257Y1

**Exclusion:** NOTE: Students not enrolled in the Computer Science Major or Specialist program at the FAS, UTM, or UTSC, or the Data Science Specialist at FAS, are limited to a maximum of three 300-/400-level CSC/ECE half-courses.

**Distribution Requirements:** Science

**Breadth Requirements:** The Physical and Mathematical Universes (5)

---

**CSC469H1 - Operating Systems Design and Implementation**

**Hours:** 24L/12T

An in-depth exploration of the major components of operating systems with an emphasis on the techniques, algorithms, and structures used to implement these components in modern systems. Project-based study of process management, scheduling, memory management, file systems, and networking is used to build insight into the intricacies of a large concurrent system.

**Prerequisite:** CSC369H1

**Exclusion:** NOTE: Students not enrolled in the Computer Science Major or Specialist program at the FAS, UTM, or UTSC, or the Data Science Specialist at FAS, are limited to a maximum of three 300-/400-level CSC/ECE half-courses.

**Distribution Requirements:** Science

**Breadth Requirements:** The Physical and Mathematical Universes (5)

---

**JSC470H1 - Data Science III**

**Hours:** 24L/24P

This course is restricted to students in the Data Science Specialist program. Research topics and applications of data science methods will be explored through case studies and collaboration with researchers in other fields. Data analysis, visualization, and communication of statistical information at various technical levels, ethical practice of data analysis and software development, and teamwork skills.

**Prerequisite:** JSC370H1, STA314H1/CSC411H1/CSC311H1, STA303H1/STA305H1

**Exclusion:** STA490Y1

**Distribution Requirements:** Science

**Breadth Requirements:** The Physical and Mathematical Universes (5)

---

**CSC473H1 - Advanced Algorithm Design**

**Hours:** 24L/12P

Advanced algorithm design techniques, with emphasis on the role that geometry, approximation, randomization, and parallelism play in modern algorithms. Examples will be drawn from linear programing and basics of continuous optimization; randomized algorithms for string matching, graph problems, and number theory problems; streaming algorithms and parallel algorithms in the Map Reduce model.

**Prerequisite:** CSC373H1, MAT221H1/MAT223H1/MAT240H1

**Exclusion:** NOTE: Students not enrolled in the Computer Science Major or Specialist program at the FAS, UTM, or UTSC, or the Data Science Specialist at FAS, are limited to a maximum of three 300-/400-level CSC/ECE half-courses.

**Distribution Requirements:** Science

**Breadth Requirements:** The Physical and Mathematical Universes (5)
CSC485H1 - Computational Linguistics

Hours: 36L

Computational linguistics and the processing of language by computer. Topics include: context-free grammars; chart parsing, statistical parsing; semantics and semantic interpretation; ambiguity resolution techniques; reference resolution. Emphasis on statistical learning methods for lexical, syntactic, and semantic knowledge.

Prerequisite: CSC209H1/APS105H1/APS106H1/ESC180H1/CSC180H1/STA237H1/STA247H1/STA255H1/STA257H1/ECE302H1/STA286H1/CHE223H1/CME263H1/MIE231H1/MIE236H1/MSE238H1/ECE286H1

Exclusion: NOTE: Students not enrolled in the Computer Science Major or Specialist program at the FAS, UTM, or UTSC, or the Data Science Specialist at FAS, are limited to a maximum of three 300-400-level CSC/ECE half-courses.

Recommended Preparation: CSC324H1/CSC384H1

Distribution Requirements: Science

Breadth Requirements: The Physical and Mathematical Universes (5)

CSC488H1 - Compilers and Interpreters

Hours: 24L/12T

The structure of compilers, Programming language processing. Scanning based on regular expressions, Parsing using context free grammars, Semantic analysis (type and usage checking), Compiler dictionaries and tables. Runtime organization and storage allocation, code generation, optimization. Use of modern compiler building tools. Course project involves building a complete compiler.

Prerequisite: CSC258H1, CSC324H1, CSC263H1/CSC265H1

Exclusion: NOTE: Students not enrolled in the Computer Science Major or Specialist program at the FAS, UTM, or UTSC, or the Data Science Specialist at FAS, are limited to a maximum of three 300-400-level CSC/ECE half-courses.

Distribution Requirements: Science

Breadth Requirements: The Physical and Mathematical Universes (5)

CSC488H1 - Knowledge Representation and Reasoning

Hours: 24L/12T

Representing knowledge symbolically in a form suitable for automated reasoning, and associated reasoning methods. Topics from: first-order logic, entailment, the resolution method, Horn clauses, procedural representations, production systems, description logics, inheritance networks, defaults and probabilities, tractable reasoning, abductive explanation, the representation of action, planning.

Prerequisite: CSC384H1, CSC363H1/CSC365H1/CSC373H1/CSC375H1/CSC463H1

Exclusion: NOTE: Students not enrolled in the Computer Science Major or Specialist program at the FAS, UTM, or UTSC, or the Data Science Specialist at FAS, are limited to a maximum of three 300-400-level CSC/ECE half-courses.

Distribution Requirements: Science

Breadth Requirements: The Physical and Mathematical Universes (5)

CSC490H1 - Capstone Design Project

Hours: 48L

This half-course gives students experience solving a substantial problem that may span several areas of Computer Science. Students will define the scope of the problem, develop a solution plan, produce a working implementation, and present their work using written, oral, and (if suitable) video reports. Class time will focus on the project, but may include some lectures. The class will be small and highly interactive. Project themes change each year. Contact the Computer Science Undergraduate Office for information about this year’s topic themes, required preparation, and course enrolment procedures. Not eligible for CR/NCR option.

Prerequisite: Permission of the instructor

Exclusion: NOTE: Students not enrolled in the Computer Science Major or Specialist program at the FAS, UTM, or UTSC, or the Data Science Specialist at FAS, are limited to a maximum of three 300-400-level CSC/ECE half-courses.

Distribution Requirements: Science

Breadth Requirements: The Physical and Mathematical Universes (5)
CSC491H1 - Capstone Design Project

Hours: 48L

This half-course gives students experience solving a substantial problem that may span several areas of Computer Science. Students will define the scope of the problem, develop a solution plan, produce a working implementation, and present their work using written, oral, and (if suitable) video reports. Class time will focus on the project, but may include some lectures. The class will be small and highly interactive. Project themes change each year. Contact the Computer Science Undergraduate Office for information about this year’s topic themes, required preparation, and course enrolment procedures. Not eligible for CR/NCR option.

Prerequisite: Permission of the instructor
Exclusion: NOTE: Students not enrolled in the Computer Science Major or Specialist program at the FAS, UTM, or UTSC, or the Data Science Specialist at FAS, are limited to a maximum of three 300-/400-level CSC/ECE half-courses.
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

CSC494H1 - Computer Science Project

This half-course involves a significant project in any area of Computer Science. The project may be undertaken individually or in small groups. The course is offered by arrangement with a Computer Science faculty member. Not eligible for CR/NCR option.

Prerequisite: Three 300-/400-level CSC half-courses, and permission of the Associate Chair, Undergraduate Studies. Contact the Computer Science Undergraduate Office for information about course enrolment procedures.
Exclusion: NOTE: Students not enrolled in the Computer Science Major or Specialist program at FAS, UTM, or UTSC, or the Data Science Specialist at FAS, are limited to a maximum of three 300-/400-level CSC/ECE half-courses.
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

CSC495H1 - Computer Science Project

This half-course involves a significant project in any area of Computer Science. The project may be undertaken individually or in small groups. The course is offered by arrangement with a Computer Science faculty member. Not eligible for CR/NCR option.

Prerequisite: Three 300-/400-level CSC half-courses, and permission of the Associate Chair, Undergraduate Studies. Contact the Computer Science Undergraduate Office for information about course enrolment procedures.
Exclusion: NOTE: Students not enrolled in the Computer Science Major or Specialist program at FAS, UTM, or UTSC, or the Data Science Specialist at FAS, are limited to a maximum of three 300-/400-level CSC/ECE half-courses.
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)
Dr. David Chu Program In Contemporary Asian Studies

Faculty List

Professor Emeritus
Victor Falkenheim (East Asian Studies/Political Science)

University Professor
Tania Li (Anthropology)

Professors
Zaheer Baber (Sociology, University of Toronto Scarborough)
Jacques Bertrand (Political Science)
Loren Brandt (Economics)
Eric Cazdyn (East Asian Studies)
Amrita Daniere (Geography/Planning)
Takashi Fujitani (History)
Ping-Chun Hsiung (Social Sciences, University of Toronto Scarborough)
Hy Van Luong (Anthropology)
Ito Peng (Sociology)
Katharine Rankin (Geography)
Atsuko Sakaki (East Asian Studies)
Rachel Silvey (Geography)
Jesook Song (Anthropology)
Ka Tat Tsang (Social Work)
Joseph Wong (Political Science)
Jia-Lin Xie (Rotman)
Lisa Yoneyama (East Asian Studies)

Associate Professors
Aisha Ahmad (Political Science)
Ruoyun Bai (Global Asia Studies, University of Toronto Scarborough)
Joshua Barker (Anthropology)
Ritu Birla (History)
Anita Boland (Geography)
Li Chen (Global Asia Studies, University of Toronto Mississauga)
Caroll Clark (History)
Hae Yeon Choo (Sociology)
Francis Cody (Anthropology/Asian Institute)
Naisargi Dave (Anthropology)
Arti Dhand (Religion)
Christoph Emmrich (Religion)
Frances Garrett (Religion)
Kanishka Goonewardena (Geography)
Ji Gu (Art History, University of Toronto Scarborough)
Kajri Jain (Visual Studies, University of Toronto Mississauga)
Yoonjung Kang (French and Linguistics)
Malavika Kasturi (Historical Studies, University of Toronto Mississauga)
Ken Kawashima (East Asian Studies)
Hui Kian Kwee (Historical Studies, University of Toronto Mississauga)
Tong Lam (Historical Studies, University of Toronto Mississauga)
Yoonkyung Lee (Sociology)
Ken MacDonald (Social Sciences, University of Toronto Scarborough)
Virginia MacLaren (Geography)
Mark Manger (Munk School of Global Affairs & Public Policy)
Lisa Mar (History, University College)
Bonnie McElhinny (Anthropology)
Heather Miller (Anthropology)
Lynette Ong (Political Science/Asian Institute)

Assistant Professors
Michelle Cho (East Asian Studies)
Hae Yeon Choo (Sociology)
Cindy Ewing (History)
Xing Fan (Centre for Drama, Theatre and Performance Studies)
Diana Fu (Political Science, University of Toronto Scarborough)
Anup Grewal (Cultural and Historical Studies, University of Toronto Scarborough)
Ju Hui Judy Han (Human Geography, University of Toronto Scarborough)
Beatrice Jauregui (Criminology and Sociolegal Studies)
Sida Liu (Sociology)
Libby Mills (Religion)
Shivaji Mukherjee (Political Science, University of Toronto Mississauga)
Kanta Murali (Political Science)
Rajeshree Narayanareddy (Geography)
J. Barton Scott (Religion)
Wen-Ching Sung (Anthropology)
Matthew Walton (Political Science)
Yvon Wang (History)
Shana Ye (Women and Gender Studies, University of Toronto Scarborough)
Jun Zhang (Geography)

Adjunct Professors
Deepali Dewan (ROM)
Wendy Dobson (Rotman)

Introduction

Asia is home to more than half the world’s population. Its cultural and historical complexity is endless, its economic growth unprecedented, and its global influence unmatched.

The Contemporary Asian Studies program (CAS) offers a thematically driven approach to understanding the complexity of issues facing today’s Asia. It examines the linkages between Asia’s history and culture, its emergence on the global stage, and its future in the global arena. CAS courses are distinctly pan-Asian in geographic scope, providing empirical and critical coverage of South, Southeast, and East Asia through multiple disciplinary approaches, including anthropology, economics, geography, history, political science, religion, and sociology.

By exposing students to current issues and debates in Asia, the CAS program is designed to prepare students for careers in or about...
Asia. In addition, the Asian Institute is committed to facilitating overseas experiential learning opportunities, including field schools, international course modules, professional internships, and study abroad opportunities. Upper-level CAS courses are designed to be research-intensive. There is no language requirement for the CAS major or minor. However, students are strongly encouraged to study an Asian language. One FCE in an approved Asian language can be credited towards the major or minor degree.

Students may also be interested in the South Asian Studies minor, which is closely connected with the Contemporary Asian Studies program.

NOTE: Students who wish to count courses towards the CAS major or minor that are not listed as CAS courses or in Group A, B, or C below (including U of T courses and transfer credits) must seek pre-approval from the program director prior to taking the course. Asian content does not guarantee that the course will be approved for CAS program credit.

Contemporary Asian Studies Programs

Contemporary Asian Studies Major (Arts Program) - ASMAJ0235

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

(7.0 full courses or their equivalent)

1. 1.0 FCE in 200 level CAS courses (CAS200H1, CAS201H1, CAS202H1)
2. 1.0 FCE in 300 level CAS courses
3. 0.5 FCEs from each of Groups A and B (excluding 100-level courses)
4. 1.0 FCE from Group A or B (excluding 100-level courses), or at any level in an Asian language.

7. Either CAS450H1 OR 0.5 FCE in a quantitative or qualitative methods course from Group C to fulfill the Research Competency required in the program.

Contemporary Asian Studies Minor (Arts Program) - ASMIN0235

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

(4 full courses or their equivalent)

1. 1.0 FCE from 200 level CAS courses (CAS200H1, CAS201H1, CAS202H1)
2. 1.0 FCE from 300 level CAS courses
3. 0.5 FCEs from each of Groups A and B (excluding 100-level courses)
4. 1.0 FCE from Group A or B (excluding 100-level courses), or at any level in an Asian language.

Groups of Elective Courses

These are courses pre-approved to count towards the CAS program. Note that not all electives are offered every year. Some may not be offered on a regular basis and/or may only be offered to students enrolled in a POG sponsored by the department or unit offering the courses. Students are responsible for checking co- and prerequisites for all courses listed below.

Course Groups

Group A: Social, Political, and Economic Topics (Social Science)

- CAS200H1 Introduction to Contemporary Asian Studies
- CAS201H1 Global Asian Studies: Insights and Concepts
- CAS202H1 Global Asian Studies: Sites and Practices
- CAS310H1 Comparative Colonialisms in Asia
- CAS320H1 Comparative Modernities in Asia
- CAS370H1 Asian Cities
- CAS390H1 Special Topics
- CAS420H1 Asia and the New Global Economy
- CAS430H1 Nationalism and Revolution in Asia
- CAS490H1 Special Topics in Contemporary Asian Studies
- ANT341H1 China in Transition
- ANT472H1 Japan in Global Context: Anthropological Perspectives (formerly ANT354Y1 and ANT354H1)
- ANT477H1 Transnational Korea in and outside the Peninsula
- CDN230H1 Asian Canadian History
- CDN390H1 Chinese Canadian Studies
- EAS105H1 Modern East Asia
• EAS246H1 Early Modern Japanese History
• EAS247H1 History of Capitalism in Modern Japan
• EAS273H1 Modern Chinese Cities
• EAS285H1 Revolutions in Modern China
• EAS289Y1 Environment and East Asia
• EAS315H1 The "Yellow Peril": Past & Present
• EAS328H1 Science, Technology and Society in Modern China
• EAS333H1 Modernism and Colonial Korea
• EAS345Y1 The Rise of Greater China: Issues & Topics
• EAS347H1 Everyday Life in Modern Japan
• EAS357H1 Mao’s China and Beyond
• EAS364H1 China’s Cultural Revolution: History and Memory
• EAS372H1 The Postwar, Cold War and Divided Koreas
• EAS373H1 Revolutionaries, Rebels, and Dissent in Korea’s Long 20th Century
• EAS374H1 Modern Japan and Colonialism
• EAS375H1 Postwar Japan: Crisis, Apocalypse
• EAS378H1 Urban Life in Early Modern Japan
• EAS457H1 Modern Japanese Historiography
• EAS459Y1 Rethinking the Cold War in East Asia
• EAS466H1 History, Everyday Life, and North Korea
• EAS468H1 Democratic Struggles in Korea
• EAS473H1 Modern Korean Historiography
• EAS474H1 U.S. and Canada’s Wars in Asia
• ECO435H1 The Economics of Modern China
• GGR342H1 The Changing Geography of Southeast Asia
• GGR343H1 Buddhist Ritual
• HAF490H1 Introduction to the Textile Arts of the Indian Subcontinent
• HIS260H1 The Artistic Landscape of East Asia
• HIS262H1 Art and Visual Experience in Modern and Contemporary East Asia
• HIS280Y1 History of China
• HIS282Y1 History of South Asia
• HIS283Y1 History of Southeast Asia: How the Lands Below the Winds Reshaped the World
• HIS326H1 Topics in Chinese History
• HIS328H1 Modern China
• HIS333H1 Catholic Asia in the Early Modern Era, 1500-1800
• HIS348H1 Rice and Spice in Southeast Asia: a Regional Food History
• HIS379H1 Vietnam at War
• HIS385Y0 The History of Hong Kong
• HIS470H1 History, Rights, and Difference in South Asia
• HIS480H1 Modernity and its Others: History and Postcolonial Critique
• HIS494H1 Gandhi’s Global Conversations
• JHA384H1 Japan in the World, Mid-16th to Mid-20th century
• JHA394H1 The Asia Pacific War
• JPA331Y1 Issues in Contemporary Chinese Politics
• JPA376Y0 Transforming Global Politics: Comparative and Chinese Perspectives
• POL302Y1 State & Society in 20th Century China
• POL328Y1 Politics and Government in South Asia
• POL388H1 Politics and Government of Southeast Asia
• POL357Y1 Topics in South Asian Politics
• POL431Y1 Politics and Society in Contemporary China
• POL441H1 Topics in Asian Politics
• SAS114H1 Introduction to South Asian Studies
• SAS318H1 Colonialism and Tradition
• SOC218H1 Asian Communities in Canada
• SOC372H1 Transnational Asia
• WGS420H1 Asian/North American Feminist Issues

Group B: Cultural Topics (Humanities)

• CAS310H1 Comparative Colonialisms in Asia
• CAS320H1 Comparative Modernities in Asia
• CAS350H1 Asian Youth Cultures
• CAS360H1 Asian Genders
• CAS414H1 Public Culture and Media in Asia
• CDN225H1 Asian Canadian Space & Place
• CDN307H1 Asian Cultures in Canada
• CIN376Y1 Chinese Cinemas
• EAS251H1 Aesthetics and Politics in 20th Century Korea
• EAS278H1 Approaches to Korean Cinema
• EAS279H1 East Asian Ecocinema
• EAS307H1 Chinese Political Philosophy
• EAS314H1 Culture & World After Hiroshima & Nagasaki
• EAS333H1 Modernism and Colonial Korea
• EAS355H1 The Art and Politics of Video in Japan
• EAS387H1 Images and Ideas in Chinese Art
• EAS391H1 Transnational East Asian Cinema
• EAS392H1 East Asian Television
• EAS394H1 Film Culture in Contemporary China
• EAS419H1 Chinese Cultural Studies Seminar: May Fourth
• EAS421H1 History of the Chinese Book
• EAS431H1 Advanced Seminar in Japanese Cinema
• EAS489H1 Advanced Topics in Asian Media Studies
• FAH260H1 The Artistic Landscape of East Asia
• FAH262H1 Art and Visual Experience in Modern and Contemporary East Asia
• FAH363H1 The Mechanics of the Image in China
• FAH364H1 Visual South Asia
• FAH462H1 Outside East Asian Art
• FAH463H1 Materiality, Objecthood, Connoisseurship and Collecting in the Arts of East Asia
• FAH464H1 Transregional East Asian Art
• FAH465H1 Exhibiting China
• FAH487H1 Introduction to Asian Textiles
• FAH490H1 Introduction to the Textile Arts of the Indian Ocean World
• HIS467H1 French Colonial Indochina: History, Cultures, Texts, Film
• MUS209H1 Performing Arts of South Asia
• MUS215H1 Performing Arts of East Asia
• NEW214H1 Socially Engaged Buddhism
• PHL237H1 History of Chinese Philosophy
• PHL239H1 Introduction to South Asian Philosophy
• PHL339H1 Topics in South Asian Philosophy
• RLG205H1 Hinduism
• RLG206H1 Buddhism
• RLG208H1 Sikhism
• RLG311H1 Gender, Body and Sexuality in Asian Traditions
• RLG312H1 Gender, Body and Sexuality in Islam
• RLG352H1 Post-Colonial Islam
• RLG355H1 Living Islam
• RLG356H1 Islam in China
• RLG358H1 Special Topics in Hinduism
• RLG361H1 Literatures of Hinduism
• RLG365H1 Modern Hinduism
• RLG366H1 Hindu Philosophy
• RLG372H1 Engaging Tibet
• RLG373H1 Buddhist Ritual
Courses with Priority Enrolment

In addition to the CAS and joint courses listed below, the following courses offer priority enrolment for CAS students:

JPA331Y1 - Issues in Contemporary Chinese Politics
JPA376Y0 - Transforming Global Politics: Comparative and Chinese Perspectives
POL328Y1 - Politics and Government in South Asia
SAS114HT - Introduction to South Asian Studies
SAS318H1 - Colonialism and Tradition

Contemporary Asian Studies Courses

CAS200H1 - Introduction to Contemporary Asian Studies

Hours: 24L

This course is an introduction to Contemporary Asian Studies. It covers detailed case study material from South Asia, Southeast Asia, and East Asia. It introduces students to the interdisciplinary study of political, sociocultural and economic interactions among these regions, as well as the transnational forces shaping internal dynamics throughout Asia. In addition, it examines the ways that forces stemming from Asia are affecting global processes, pushing scholarship to engage questions about colonialism, nationalism, “race,” religion, markets, urbanization, migration, and mass mediated culture. This course provides preparation for more advanced courses on Asia and globalization and provides an introductory gateway for the Contemporary Asian Studies major and minor. May be taken in the first year of studies.

Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

CAS201H1 - Global Asian Studies: Insights and Concepts

Previous Course Number: CAS200Y1
Hours: 24L

This course addresses Asia empirically in contemporary global formations and as an idea in the global imagination. It introduces students to concepts and theories central to scholarship on Asia and its transnational formations. It provides foundational theoretical and conceptual material to understand global issues as they play out in the politics, economies, cultures and contemporary social worlds of contemporary Asian sites. Interdisciplinary analytical and research concepts are introduced to provide area studies grounding. This course provides preparation to delve into deeper research on Asia connected to broad questions about the natures of democracy, authoritarianism, market formation, social justice, and the media of cultural expression. It informs students aiming to take more advanced courses on Asia and globalization and provides one part of the foundation for the Contemporary Asian Studies major and minor. CAS201H1 introduces the theoretical and conceptual frameworks that are explored through further grounded empirical case studies in upper year CAS courses.

Exclusion: CAS200Y1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)
CAS202H1 - Global Asian Studies: Sites and Practices

Previous Course Number: CAS200Y1
Hours: 24L

This interdisciplinary course explores a variety of sites and topics in South, Southeast, and East Asia. It explores themes including contemporary and historical articulations of socio-economic development, (post)colonial political formations, urbanization processes, climate change, labour struggles, gender studies, migration, citizenship, and social justice. The course examines the diversity of Asian modernities, cross-regional linkages, and changing approaches to area studies over time. It provides a foundation for the Contemporary Asian Studies major and minor, preparing students for taking more advanced courses on Asia in the global context.

Exclusion: CAS200Y1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

CAS301H1 - Comparative Colonialisms in Asia

Hours: 24L

This course analyzes the impact of colonialism in South, East, and Southeast Asia and the various ways in which pre-colonial traditions intersect with and reshape colonial and postcolonial process across the various regions of Asia. The course will examine the conjunctures of economy, politics, religion, education, ethnicity, gender, and caste, as these have played out over time in the making and re-making of Asia as both idea and place. Attention will be paid to postcolonial and indigenous theories, questions of 'the colonial' from the perspective of Asian Studies, and debates about the meaning of postcolonialism for the study of Asia now and in the future.

Prerequisite: 0.5 FCE in 200 level CAS courses
Distribution Requirements: Humanities; Social Science
Breadth Requirements: Society and its Institutions (3)

CAS320H1 - Comparative Modernities in Asia

Hours: 24L

Since at least the late 1700s, the effects of capitalism across the globe have profoundly transformed the landscapes of human livelihood, consumption, production and governance in Asia. While colonial empires have declined, new empires have emerged, and a growing number of countries have witnessed the rise of nationalism and independent states, social, political and technological revolutions, and most recently neoliberal globalization. This course theorizes and explores these dramatic changes in a comparative framework. It is aimed at students wishing to better understand the great transformations of modern Asia in a global context.

Prerequisite: 0.5 FCE in 200 level CAS courses
Recommended Preparation: CAS202H1
Distribution Requirements: Humanities; Social Science
Breadth Requirements: Society and its Institutions (3)

JPA331Y1 - Issues in Contemporary Chinese Politics

Hours: 48L

The course covers topics of interest in China from the Communist takeover in 1949 through to the reform period of the 1980s, 1990s and 2000s. It will also address aspects of China’s diplomacy related to its growing economic power. (Given by the Department of Political Science and the Contemporary Asian Studies Program)

Prerequisite: 2.0 POL FCEs or 1.0 CAS FCEs
Exclusion: POLC16H3
Distribution Requirements: Humanities; Social Science
Breadth Requirements: Society and its Institutions (3)

CAS350H1 - Asian Youth Cultures

Hours: 24L

In focusing on youth in Asia, this course brings together two disputed cultural formations of substantial contemporary importance. Both youth and Asia are increasingly invoked on the global stage in support of a wide range of interests. Examining practices of young people and the idea of youth in the context of Asia requires critical attention to the promises and fears that attach to the rise of Asian economies, international demographic transitions, the growth of a global middle-class, increasing consumption disparities, changing immigration patterns, expanding technological skills, global/local environmental concerns, and young people’s shifting political priorities and loyalties. The course may feature a significant amount of social theory, with authors such as Michel Foucault, Roland Barthes, Louis Althusser, and Stuart Hall.

Prerequisite: Minimum of 6 FCEs
Recommended Preparation: 0.5 FCE in 200 level CAS courses
Distribution Requirements: Humanities; Social Science
Breadth Requirements: Creative and Cultural Representations (1)
CAS360H1 - Asian Genders

Hours: 24L

This course will explore ways that gender is mobilized and produced in parts of Asia. It seeks to understand gender and sexuality in their diversity and in attempts to “fix” or locate it in various bodies and places. Attempts will be made to see how gender is made knowable in terms of sexuality, medicine, nation, class, ethnicity, religion, and other discourses. The course assumes a willingness to read challenging theory – such as the writings of Judith Butler, Michel Foucault, and Eve Sedgwick – and asks that students commit to regular attendance.

Prerequisite: Minimum of 6 FCEs
Recommended Preparation: 0.5 FCE in 200 level CAS courses
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

CAS370H1 - Asian Cities

Hours: 24L

This course offers a multidisciplinary perspective of urban life in Asia. The thematic focus will be on how the urban intersects with modernities and postcolonial formations. Drawing on recent scholarship in the social sciences and the humanities, we will examine the realignment of cultural, political, and economic forces associated with Asia’s diverse processes of urbanization.

Prerequisite: Minimum of 6 FCEs
Recommended Preparation: 0.5 FCE in 200 level CAS courses
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

JHA384H1 - Japan in the World, Mid-16th to Mid-20th century

Hours: 24L

This course examines Japan within the context of world history from the mid-16th to the mid-20th century. Rather than seek comprehensive coverage of Japan's national history along a linear timeline, we will use Japan as a lens through which to consider key moments in the history of the modern world.

Prerequisite: One course from: HIS102Y1, HIS103Y1, HIS107Y1, HIS241H1, HIS242H1, HIS244H1, HIS250H1, HIS250Y1, HIS271Y1, HIS280Y1, HIS281Y1, HIS282Y1, HIS283Y1, HIS291H1, HIS291Y1, HIS292H1, HIS292Y1, HIS297Y1, or 1.0 credit from CAS200H1, CAS201H1, CAS202H1, CAS310H1, CAS320H1.
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)
JHA394H1 - The Asia Pacific War

Hours: 24L

This course examines the Second World War in the Asia Pacific region and highlights: (1) how imperialism and colonialism of both the Euro-American and Japanese varieties were central to the War's outbreak, conduct, and "resolution"; (2) various "local" rather than simply national experiences and memories of the War, including those of marginalized groups in Japan and its colonies, "comfort women," victims of war atrocities, Asian North Americans, African Americans, and Pacific Islanders.

Prerequisite: One course from: HIS107Y1, HIS242H1, HIS250H1, HIS251H1, HIS263Y1, HIS271Y1, HIS280Y1, HIS281Y1, HIS282Y1, HIS283Y1, HIS284Y1, HIS292Y1, HIS311Y1, HIS317H1, HIS328H1, HIS338H1, HIS343H1, HIS343Y1, HIS344H1, HIS344Y1, HIS351H1, HIS361Y1, HIS377H1, HIS385H1, HIS385Y1, or 1.0 credit from CAS200H1, CAS201H1, CAS202H1, CAS310H1, CAS320H1.

Recommended Preparation: One or more courses on Japan, China, Korea, or Southeast Asia in any department.

Distribution Requirements: Humanities

Breadth Requirements: Society and its Institutions (3)

CAS400H1 - Interdisciplinary Research in Methods in Contemporary Asian Studies

Hours: 24S

This seminar addresses Asian worlds – in Asia, transnationally, and locally – to cultivate new approaches to global processes and problems. The course explores key Asian sites that open new configurations for studying interactions between economic/environmental development, political change, and migration and cultural politics. It provides an advanced and systematic overview of the research methodologies that students have been exposed to throughout the CAS program. These include historical/archival, ethnographic, visual/media, and statistical/quantitative methods that allow us to map Asian political, economic, and cultural formations, and through them, global challenges. The seminar builds interdisciplinary conversations attentive to both critical problematizing and problem-solving, to qualitative and applied projects. It is the required capstone to the Contemporary Asian Studies major.

Prerequisite: 1.0 FCE in 200 level CAS courses; 1.0 FCE in 300 level CAS courses

Exclusion: CAS400Y1

Distribution Requirements: Social Science

Breadth Requirements: Society and its Institutions (3)

CAS413H1 - Asia and Canada

Hours: 24S

This course is an interactive, participatory seminar. It will provide an opportunity to complement theoretical understanding about Asia acquired in other courses through hands-on research and experiential learning. The course will enable students to link studying Asia and Canada to career trajectories in the field of development and research.

Prerequisite: At least 14 FCEs

Exclusion: NEW413H1, SAS413H1

Distribution Requirements: Social Science

Breadth Requirements: Society and its Institutions (3)

CAS414H1 - Public Culture and Media in Asia

Hours: 24S

This upper-level seminar will introduce students to the interdisciplinary study of popular culture and mass-mediated cultural forms in Asia. Through readings about popular protest, festivals, cinema, print, television, and music this course provides methodological tools to interpret the politics of representation and the formation of alternative modernities in the Asian continent and among the diaspora. The course will furthermore familiarize students with a range of theoretical lenses for conceptualizing the different meanings of the public from a modern Asian perspective.

Prerequisite: At least 14 FCEs

Exclusion: NEW414H1, SAS414H1

Recommended Preparation: 1.0 FCE in 200 level CAS courses; 1.0 FCE in 300 level CAS courses

Distribution Requirements: Social Science

Breadth Requirements: Creative and Cultural Representations (1)

CAS420H1 - Asia and the New Global Economy

Previous Course Number: JPA420H1

Hours: 24S

This course explores the rise of Asia and its integration into the new global economy (labour, capitalism, knowledge economy, economic nationalism, inequality, gender, the meaning of capitalism, democracy, among others), exposing students to diverse disciplinary perspectives. Geographical coverage is pan-Asian, including East, Southeast and South Asia.

Prerequisite: At least 14 FCEs

Exclusion: JPA420H1

Recommended Preparation: 1.0 FCE in 200 level CAS courses; 1.0 FCE in 300 level CAS courses

Distribution Requirements: Humanities; Social Science

Breadth Requirements: Society and its Institutions (3)
CAS430H1 - Nationalism and Revolution in Asia

Hours: 24L

This course explores the far-reaching social, political, and cultural transformations in modern East, Southeast, and South Asia, focusing on the twentieth-century revolutionary histories and struggles to establish modern nation-states. The course adopts a topical approach within a chronological and comparative framework to highlight major historical movements and theoretical issues significant to the Asian experience.

Prerequisite: At least 14 FCEs
Exclusion: HIS382H1, ASI430H1
Recommended Preparation: 1.0 FCE in 200 level CAS courses; 1.0 FCE in 300 level CAS courses
Distribution Requirements: Humanities; Social Science
Breadth Requirements: Society and its Institutions (3)

CAS450H1 - Asian Pathways Research Practice

Hours: 24S

This seminar builds on the systematic overview of research methodologies of the Contemporary Asian Studies major and its capstone course, CAS400H1. CAS450H1 provides students with the opportunity to research questions of contemporary relevance stemming from Asia and its transnational networks and communities. Addressing a range of methodologies, including historical-archival, ethnographic, visual/media, and statistical/quantitative, the course emphasizes research experience outside the classroom, in Asia as well as locally with communities in Toronto. Students will develop their own research contributions while working collaboratively.

Prerequisite: At least 14 FCEs, including 1.0 FCE in 200 level CAS courses and 1.0 FCE in 300 level CAS courses
Exclusion: CAS400Y1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

CAS490H1 - Special Topics in Contemporary Asian Studies

Hours: 24S

Course content varies in accordance with the interest of the instructor. Check http://munkschool.utoronto.ca/al/cas for an updated description.

Prerequisite: At least 14 FCEs including 1.0 FCE in 200 level CAS courses, 1.0 FCE in 300 level CAS courses, and enrolment in the Contemporary Asian Studies major or minor or permission from the Program Director.
Distribution Requirements: Humanities; Social Science

CAS498H1 - Independent Research

Supervised independent research on a topic agreed on by the student and supervisor before enrolment in the course. Open to advanced students with a strong background in contemporary Asian studies. A maximum of one year of Independent Research courses is allowed per program. Contact hours with the supervisor may vary, but typically comprise of one hour per week. Not eligible for CR/NCR option.

Prerequisite: At least 14 FCEs including CAS200Y1/(CAS201H1 and CAS202H1), CAS310H1; enrolment in the Contemporary Asian Studies major or minor, and permission from the Program Director
Distribution Requirements: Social Science

CAS498Y1 - Independent Research

Supervised independent research on a topic agreed on by the student and supervisor before enrolment in the course. Open to advanced students with a strong background in contemporary Asian studies. A maximum of one year of Independent Research courses is allowed per program. Contact hours with the supervisor may vary, but typically comprise of one hour per week. Not eligible for CR/NCR option.

Prerequisite: At least 14 FCEs including 1.0 FCE in 200 level CAS courses, 1.0 FCE in 300 level CAS courses, enrolment in the Contemporary Asian Studies major or minor, and permission from the Program Director
Distribution Requirements: Social Science

Introduction

The Centre for Criminology and Sociolegal Studies (CrimSL) is a research and teaching unit at the University of Toronto. Founded in 1963 by Prof. John Edwards, CrimSL faculty and students study crime, justice, and governance through law from a variety of disciplinary perspectives and theoretical approaches. With backgrounds in sociology, anthropology, history, law, psychology, philosophy and political science, the faculty are actively engaged in Canadian and international criminological and sociolegal research. The CrimSL library (the Criminology Information Service) houses the leading Canadian research collection of criminological material, consisting of more than 25,000 books, journals, government reports, statistical sources and other documents.

The Criminology and Sociolegal Studies program incorporates theory, research methods, and knowledge from a wide range of disciplines. The program provides students with a sound foundation for the understanding of crime and the administration of justice in Canada and abroad, and, more generally, the processes of social order and disorder. The curriculum also responds to the Truth and Reconciliation Commission’s calls to action by offering courses in Indigenous peoples and criminal justice and Indigenous law, as well as incorporating attention to Indigeneity in other courses. Most students combine their studies in Criminology and Sociolegal Studies with programs in Political Science, Psychology or Sociology.

People with backgrounds in Criminology and Sociolegal Studies are found working in Correctional Services, Law Enforcement, Courts, Government departments, NGOs and other settings. Some careers in Criminology and Sociolegal Studies require additional education and experience beyond the undergraduate level. Please visit our website for a comprehensive career information page, course forms and other program resources. The Program Office is located in Woodsworth College and students in the program continue to benefit from the rich academic support services and facilities available at the College.

Regarding Program Enrolment

Admission to major and specialist programs will be determined by a student’s mark in specific courses taken in the Fall and Winter terms immediately preceding the Spring program admission cycle. Details on the entry requirements are listed below. These are limited enrolment programs that can only accommodate a limited number of students. Achieving the minimum required marks does not necessarily guarantee admission to the program in any given year. Requests for admission will be considered in the first program request period only. For detailed program application instructions, please consult the Arts & Science Program Toolkit. Do not change your program after year 3 if you are required to complete your degree in four years as prerequisites and program requirements will not be waived. Due to the limited enrolment nature of this program students are strongly advised to enroll in backup programs.

Criminology and Sociolegal Studies Programs

Criminology and Sociolegal Studies - Specialist (Arts Program) - ASSPE0826

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 9.0 credits and meet the requirements listed below to enrol. Note there are different options depending on whether a student has completed between 9.0 and 13.5 credits, or 14.0 or more credits.

For students applying after second year:

Variable Minimum Grade Average
A minimum grade average in required courses is needed for entry, and this minimum changes each year depending on available spaces and the number of applicants. The following courses must be completed:

- CRI205H1, CRI210H1 and CRI225H1

For reasons of limited capacity, applicants with a final grade average lower than 80% in these required courses will not be considered for
admission. Please note that obtaining this minimum final grade average does not guarantee admission to the program.

Special Requirement

- Student must be enrolled in the Criminology and Sociolegal Studies Major (ASMAJ0826)

For students applying after third year:

Variable Minimum Grade Average
A minimum grade average in required courses is needed for entry, and this minimum changes each year depending on available spaces and the number of applicants. The following courses must be completed:

- 2.0 credits in CRI courses at the 300+ level
- 1.0 credit from: CRI205H1, CRI210H1 and CRI225H1

To ensure that students admitted to the program will be successful, applicants with a final grade average lower than 80% in these required courses will not be considered for admission. Please note that obtaining this minimum final grade average does not guarantee admission to the program.

Special Requirement

- Student must be enrolled in the Criminology and Sociolegal Studies Major (ASMAJ0826)

Notes:

- Requests for admission will be considered in the first program request period only.
- Due to the limited enrolment nature of this program students are strongly advised to plan to enroll in backup programs.

Completion Requirements:

Each course requirement is individual and cannot be used more than once.

Total credits: 11.0 of which 7.0 credits must be CRI courses (including 3.0 credits at the 300+ level from Group A and 1.0 credit at the 400-level from Group B).

1. 2.0 credits from ECO/HIS/PHL/POL/PSY/SOC
2. All of CRI205H1, CRI210H1, CRI215H1, CRI225H1, CRI335H1, CRI340H1, CRI343H1, CRI350H1
3. At least 2.5 credits from Group A
4. At least 1.0 credit from Group B
5. Additional credits (excluding those already counted) from Groups A, B or C for a total of 11.0 credits

Note: Students may use a maximum of 1.0 credit from Independent Study courses and 1.0 credit from Research Participation courses towards the Criminology & Sociolegal Studies program.

Group A: CRI300H1/ CRI364H1/ CRI365H1/ CRI370H1/ CRI380H1/ CRI383H1/ CRI385H1/ CRI390H1/ CRI391H1/ CRI392H1/ CRI393H1/ CRI394H1/ CRI395H1/ CRI396H1/ CRI450H1

Group B: CRI415H1/ CRI420H1/ CRI422H1/ CRI425H1/ CRI427H1/ CRI428H1/ CRI429H1/ CRI431H1/ CRI435H1/ CRI445H1/ CRI480H1/ CRI487H1/ CRI490H1/ CRI491H1/ CRI498H1

Group C: ANT444Y/ HIS411H1/ PHL271H1/ PHL370H1/ POL242Y/ PSY201H1/ PSY202H1/ PSY220H1/ PSY240H1/ PSY328H1/ SOC205H1/ SOC212H1/ SOC306Y/ SOC313H1/ SOC315H1/ SOC413H1/ TRN412H1/ CRI389Y0

Note about non CRI courses:

1. Group C courses are offered by other departments. Registration in these courses may be available only to students who have completed specified prerequisites and/or are enrolled in a program sponsored by the department offering the course. Course enrolment conditions are listed in the Arts and Science timetable. Course descriptions, prerequisites, corequisites and exclusions are listed in the Calendar.
2. Students who have completed criminology/sociolegal type courses in the Faculty of Arts and Science that are not included in Group C may email the Program Coordinator to find out if the courses can be used towards the Group C program requirements.

Criminology and Sociolegal Studies - Major (Arts Program) - ASMAJ0826

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

Variable Minimum Grade Average
A minimum grade average in required courses is needed for entry, and this minimum changes each year depending on available spaces and the number of applicants. The following courses must be completed:

- 2.0 credits from ECO, HIS, PHL, POL, PSY, or SOC courses (any course level and combination)

For reasons of limited capacity, applicants with a final grade average lower than 70% in these required courses will not be considered for admission. Please note that obtaining this minimum final grade average does not guarantee admission to the program.

Notes:

- Requests for admission will be considered in the first program request period only.
- Due to the limited enrolment nature of this program students are strongly advised to plan to enroll in backup programs.
- Courses for enrolment must be taken in the Fall/Winter preceding the program request period.

Completion Requirements:

Students must complete a total of 8.0 credits including a minimum of 2.0 credits from 300+level CRI courses, of these 0.5 CRI credit must be at the 400-level.
1. 2.0 credits from ECO/HIS/PHL/POL/PSY/SOC
2. All of CRI205H1, CRI210H1, CRI215H1, CRI225H1
3. At least 2.0 credits at the 300+ level from Group A, at least 0.5 credit must be at the 400-level
4. At least 0.5 credit from Group B
5. Additional courses (excluding those already counted) from Groups A and C for a total of 8.0 credits

Note: Students may use a maximum of 1.0 credit from Independent Study courses and 1.0 credit from Research Participation courses towards the Criminology & Sociolegal Studies program.

**Group A: CRI300H1/ CRI335H1/ CRI340H1/ CRI343H1/ CRI364H1/ CRI365H1/ CRI370H1/ CRI380H1/ CRI383H1/ CRI385H1/ CRI386H1/ CRI390H1/ CRI391H1/ CRI392H1/ CRI393H1/ CRI394H1/ CRI395H1/ CRI396H1/ CRI415H1/ CRI420H1/ CRI422H1/ CRI425H1/ CRI427H1/ CRI428H1/ CRI429H1/ CRI431H1/ CRI435H1/ CRI445H1/ CRI480H1/ CRI487H1/ CRI490H1/ CRI491H1/ CRI498H1**

**Group B: PSY201H1/ PSY202H1/ SOC200H1/ SOC202H1/ CRI350H1**

**Group C: ANT444Y/ HIS411H1/ PHL271H1/ PHL370H1/ PSY220H1/ PSY240H1/ PSY328H1/ SOC205H1/ SOC212H1/ SOC306Y/ SOC313H1/ SOC315H1/ SOC413H1/ TRN412H1/ CRI389Y0**

**Important Notes:**

1. Group C Courses: These courses are offered by other academic units. Registration in these courses may be available only to students who have completed specified prerequisites and/or are enrolled in a program sponsored by the academic unit offering the course. Check the Faculty of Arts and Science’s timetable for details.
2. Students who have completed criminology/sociolegal type courses in the Faculty of Arts and Science (not included in Group C) may email the Program Coordinator to find out if these courses can be used towards the Group C requirements.

Not all courses are offered every year. Please check the timetable for current course offerings and enrolment restrictions/conditions. Students without course prerequisites may be removed at any time they are discovered. Course descriptions, prerequisites, corequisites and exclusions are listed below.

---

**Criminology and Sociolegal Studies Courses**

**CRI205H1 - Introduction to Criminology**

**Hours:** 24L/12T

An introduction to the study of crime and criminal behaviour. The concept of crime, the process of law formation, and the academic domain of criminology. Theories of crime causation, methodologies used by criminologists, and the complex relationship between crime, the media and modern politics.

**Prerequisite:** Min. 4.0 FCEs
**Corequisite:** CRI225H1
**Exclusion:** WDW205H1, WDW200Y1
**Recommended Preparation:** 2 FCEs from ECO/HIS/PHL/POL/PSY/SOC with a combined average of at least 70%
**Distribution Requirements:** Social Science
**Breadth Requirements:** Society and Its Institutions (3)

**CRI210H1 - Criminal Justice**

**Hours:** 24L/12T

An introduction to the Canadian criminal justice system. The institutions established by government to respond to crime and control it; how they operate, and the larger function they serve; including the role of the police, the trial process, courts and juries, sentencing, imprisonment and community corrections.

**Prerequisite:** CRI205H1, CRI225H1
**Exclusion:** WDW210H1, WDW200Y1
**Distribution Requirements:** Social Science
**Breadth Requirements:** Society and Its Institutions (3)

**CRI215H1 - Introduction to Sociolegal Studies**

**Hours:** 24L/12T

The course covers several major issues that will help prepare students for advanced courses in the criminology major: the meaning of law, the production of laws and legal institutions, law in action, comparative legal traditions, and the methodology of sociolegal studies.

**Prerequisite:** Min. 4.0 FCEs
**Exclusion:** WDW215H1
**Recommended Preparation:** 2 FCEs from ECO/HIS/PHL/POL/PSY/SOC with a combined average of at least 70%
**Distribution Requirements:** Social Science
**Breadth Requirements:** Society and Its Institutions (3)
CRI225H1 - Criminal Law

Hours: 24L/12T

The main principles and themes of Canadian criminal law; legal definitions of crime, requirements of a criminal act (actus reus), criminal intention (mens rea), causation and defences. The origins, goals and functioning of criminal law, and limits on the power of the state to criminalize behaviour.

Prerequisite: Min. 4.0 FCEs
Corequisite: CRI205H1
Exclusion: WDW225H1, WDW220Y1
Recommended Preparation: 2 FCEs from ECO/HIS/PHL/POL/PSY/SOC with a combined average of at least 70%
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

CRI299Y1 - Research Opportunity Program

Hours: TBA

Credit course for supervised participation in faculty research project. Details at https://www.artsci.utoronto.ca/current/academics/research-opportunities/... Not eligible for CR/NCR option.

CRI300H1 - Theories of Criminal Justice

Hours: 36L

A survey of the evolution of normative theories of criminal justice, which examines how major theorists from the Enlightenment to the contemporary period have understood the normative justification for criminal prohibition and punishment. Although the course focuses on western political philosophy and social science, there will also be some attention to theories of criminal justice in selected non-western traditions.

Prerequisite: (CRI205H1 and CRI225H1) or (1.0 FCE 300+ level from HIS/PHL/POL/SOC and a min cgpa of 2.5)
Exclusion: WDW300H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

CRI322H1 - Inequality and Criminal Justice

Hours: 36L

This course examines the intersections between social inequality and the criminal justice system in Canada and internationally. The course explores how factors such as race, ethnicity, gender, sexual orientation and religion influence perceptions of and experiences with crime and criminal justice.

Prerequisite: 1 FCE from: CRI205H1, CRI210H1, SOC212H1.
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

CRI335H1 - Policing

Hours: 36L

A theoretical framework is developed to examine the nature of policing, its structure and function. Attention is given to the history of policing as a global form of social practice. We examine the perspectives of both “the police” and “the policed”, as well as the objectives, domains, strategies, and authority of contemporary policing, including decision-making, organizational culture, and accountability.

Prerequisite: CRI210H1/CRI215H1
Exclusion: WDW335H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

CRI340H1 - Punishment: Theory and Practice

Hours: 36L

The study of punishment from historical and philosophical perspectives, with a focus on contemporary Canadian policy issues. Topics covered include penal theory, prisons and non-carceral forms of punishment, and the goals of penal reform.

Prerequisite: CRI205H1, CRI210H1, CRI225H1
Exclusion: WDW340H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)
CRI343H1 - Comparative Criminal Justice

Hours: 36L

Criminal justice issues outside Canada, based on a variety of international and historical studies. The evolution of criminal justice systems in Western Europe, including the English adversarial and continental European inquisitorial approaches. A comparison of policing, criminal procedure, forms of punishment, and crime rates in the contemporary world.

Prerequisite: CRI205H1, CRI210H1, CRI225H1
Exclusion: WDW393H1 taken in 2008-09, WDW343H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

CRI345H1 - History of Criminal Justice

Hours: 36L

The course offers a historical perspective on the development of the legal doctrines, professions and institutions that define criminal justice in Canada and the broader common law world today. Topics include the shift from medieval trial by ordeal and torture to the modern reliance on expert witnesses and forensic science; the emergence of the adversarial trial; the growth of the legal profession; the birth of policing; the rise of the penitentiary; and the changing fortunes of the death penalty. The course focuses primarily on the period from the eighteenth century to the present. Students will be introduced to historical debates and ways of thinking and writing about law and crime. We will explore how culture, politics, economics and social life are essential to how we understand the foundational elements of criminal justice, including concepts of truth, guilt, legitimacy, fairness and violence.

Prerequisite: 1 FCE from: CRI215H1, CRI210H1, SOC212H1, SOC313H1, HIS268H1, any HIS 300+ level course. Any course combination from this list is acceptable.
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

CRI350H1 - Understanding Criminological Research

Hours: 36L

An introduction to social science research methods used by criminologists and to the statistical analysis of criminological data. An understanding of the strengths and weaknesses of published criminological research is developed. Specific technical issues related to sampling, measurement, and data analysis are taught in the context of examining ways of answering research questions.

Prerequisite: CRI205H1, CRI210H1, CRI225H1
Exclusion: SOC200H1, SOC200Y1, WDW350H1, WDW350Y1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

CRI364H1 - Indigenous Peoples & Criminal Justice

Hours: 36L

An introduction to issues affecting Indigenous peoples in the Canadian criminal justice system identified by Indigenous scholars, activists and allies. Topics include: effects of colonization, legal discrimination and disenfranchisement, Treaties and land claims, criminalization, Indigenous activism, and the Truth and Reconciliation Commission.

Prerequisite: 1 FCE from CRI205H1, CRI210H1, CRI215H1, CRI225H1
Exclusion: CRI394H1 Topics: Indigenous Peoples & Criminal Justice taken in 20171
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

CRI365H1 - Crime and Mind

Hours: 36L

Legal, psychological and sociological understandings of issues in the criminal justice system, through a consideration of topics including: criminal intent, the Not Criminally Responsible on Account of Mental Disorder defence, the use of battered woman syndrome as part of a self-defence, infanticide, issues of transcultural psychiatry, and jury screening for bias.

Prerequisite: 1.0 FCE from CRI205H1, CRI210H1, CRI225H1
Exclusion: WDW365H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)
CRI370H1 - Youth Justice

Hours: 36L

The course will examine what is known about offending by youths and the various purposes that have been attributed to youth justice systems. The course will focus, in large part, however, on the nature of the laws and youth justice systems that have been designed in Canada and elsewhere to respond to offending by youths.

Prerequisite: CRI205H1, CRI210H1, CRI225H1
Exclusion: WDW370H1, WDW375H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

CRI380H1 - Crime, Gender and Sex

Hours: 36L

Theory, research and policy related to the ways in which gender shapes criminal behaviour, the administration of criminal justice, and the criminal law. How notions of different types of masculinity and femininity are embedded in and influence both the operation of the criminal justice system as well as criminal behaviours. The regulation of gender and sexuality through the criminal law and through crime.

Prerequisite: (CRI205H1 and CRI210H1) or (70% in SOC212H1 and enrolment in Sociology program)
Exclusion: WDW380H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

CRI383H1 - Immigration, Ethnicity and Crime

Hours: 36L

The connection between immigration and crime, the effect of immigration on crime rates, discrimination against immigrants, the representation of immigrants in crime statistics, public perception of risk and security, and criminal justice policy changes which affect immigration. We consider research conducted in North America and Europe.

Prerequisite: CRI205H1 or SOC212H1
Exclusion: WDW383H1, WDW390H1 in 2008
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

CRI385H1 - Representing Crime and Authority

Hours: 36L

Cultural constructions of crime, disorder, dangerousness and risk are integral parts of the criminal justice system. A critical analysis of how criminal justice personnel, the media, and academic criminologists construct their authority through symbols and images, in order to “explain” and manage crime, and how these representations are regarded in public discourse.

Prerequisite: 1.0 FCE from CRI205H1, CRI210H1, CRI225H1
Exclusion: WDW385H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

CRI386H1 - Origins of Criminal Justice

Hours: 36L

Criminal justice practice, as well as political debate concerning crime and criminal justice, are often influenced by ideas that are initially developed outside the criminal justice arena. This course examines the history, current influence and efficacy of a range of such ideas, such as: the role of religious practice in rehabilitating offenders; military service and participation in sports as preventive of delinquency; the influence of environmental pollution on crime rates; the concept of the ‘problem family’; intelligence based policing and the use of management theories in criminal justice organizations.

Note: The course may include an optional Service Learning component. If offered, additional information will be provided in the Faculty of Arts and Science's timetable.

Prerequisite: CRI205H1, CRI210H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

CRI389Y0 - Topics in Criminology and Sociolegal Studies Abroad

Topics in Criminology and Sociolegal Studies offered in an international setting. The content may vary from year to year. Details are posted on the Summer Abroad website.

Prerequisite: Consult the Summer Abroad Program Office.
Exclusion: WDW389Y0
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)
CRI390H1 - Topics in Criminology and Sociolegal Studies

Hours: 36L

The objective of the course is to explore emerging issues in Criminology, and their social, legal, ethical and political implications. Topics vary from year to year.

Prerequisite: 1 FCE from CRI205H1, CRI210H1, CRI225H1
Exclusion: WDW390H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

CRI391H1 - Topics in Criminology and Sociolegal Studies

Hours: 36L

The objective of the course is to explore emerging issues in Criminology, and their social, legal, ethical and political implications. Topics vary from year to year.

Prerequisite: 1 FCE from CRI205H1, CRI210H1, CRI225H1
Exclusion: WDW391H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

CRI392H1 - Topics in Criminology and Sociolegal Studies

Hours: 36L

The objective of the course is to explore emerging issues in Criminology, and their social, legal, ethical and political implications. Topics vary from year to year.

Prerequisite: 1 FCE from CRI205H1, CRI210H1, CRI225H1
Exclusion: WDW392H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

CRI393H1 - Topics in Criminology and Sociolegal Studies

Hours: 36L

The objective of the course is to explore emerging issues in Criminology, and their social, legal, ethical and political implications. Topics vary from year to year.

Prerequisite: 1 FCE from CRI205H1, CRI210H1, CRI225H1
Exclusion: WDW393H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

CRI394H1 - Topics in Criminology and Sociolegal Studies

Hours: 36L

The objective of the course is to explore emerging issues in Criminology, and their social, legal, ethical and political implications. Topics vary from year to year.

Prerequisite: 1 FCE from CRI205H1, CRI210H1, CRI225H1
Exclusion: WDW394H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

CRI395H1 - Independent Study

Independent study under the direction of a faculty member. Open only when a faculty member is willing and available to supervise. Consult the program website for additional information. Not eligible for CR/NCR option.

Prerequisite: CRI205H1, CRI210H1, CRI225H1 and 2 CRI 300 half-credit lecture/seminar courses, approval of the Program Coordinator
Exclusion: CRI395Y1, WDW395H1 Criminology
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

CRI396H1 - Research Participation

Credit course for supervised participation in a faculty research project. Offered only when a full-time faculty member from the Centre for Criminology & Sociolegal Studies is willing and available to supervise. Consult the program website for additional information. Not eligible for CR/NCR option.

Prerequisite: 9 FCEs. A CGPA of at least 3.0 is recommended. Approval of the Program Coordinator.
Exclusion: CRI397Y1, WDW396H1 Criminology
Breadth Requirements: Society and its Institutions (3)
CRI399Y1 - Research Opportunity Program
Credit course for supervised participation in faculty research project. Details at https://www.artsci.utoronto.ca/current/academics/research-opportunities/research-opportunities-program. Not eligible for CR/NCR option.

CRI415H1 - Politics and Crime
Hours: 24S
An advanced seminar examining the development of criminal justice and penal policies in Canada, the United States, Western Europe and Russia; the way authorities in those countries define and manage political deviance and the intrusion of politics into the administration of justice, especially in non-democratic settings.

Prerequisite: A minimum average of 77% in 4 CRI 300 half-credit lecture/seminar courses
Exclusion: CRI3120H1, WDW415H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

CRI420H1 - Current Issues in Criminal Law
Hours: 24S
An advanced seminar exploring in detail current issues in criminal law. The objective of the course is to discuss current policy and case law developments in the criminal law, and their social, political and ethical implications. The role of Parliament and the judiciary in the development of the criminal law is considered. Topics vary from year to year.

Prerequisite: 2 CRI 300 half-credit lecture/seminar courses
Exclusion: WDW420H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

CRI422H1 - Indigenous Law
Hours: 24S
Seminar course exploring Indigenous law, settler state law, and the complex interrelationship between the two in Canada. Topics include: legal sources, forms and processes; sovereignty, territory and jurisdiction; treaty relationships; Indigenous peoples in international law; Indigenous rights and the constitution; environmental use, relations and protection; and Indigenous self-determination and governance.

Prerequisite: 1 FCE from CRI205H1, CRI210H1, CRI215H1, CRI225H1. 0.5 FCE from CRI 300-level
Exclusion: CRI490H1 Advanced Topics in Criminology: Indigenous Law taken in 2016
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

CRI425H1 - The Prosecution Process
Hours: 24L
A critical examination of the process by which certain conduct is identified, prosecuted and punished as “crime”, and the process by which individuals become “criminals”. The evolution of the modern prosecution system, including the exercise of prosecutorial discretion, rules of evidence, socially constructed defences, disparity in sentencing, and wrongful convictions.

Prerequisite: CRI205H1, CRI210H1, CRI225H1, 0.5 CRI 300 level course
Exclusion: WDW320H1, WDW425H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

CRI427H1 - Organized Crime and Corruption
Hours: 24S
An advanced seminar exploring the history and characteristics of organized crime and corruption.

Prerequisite: 2 CRI 300 half-credit lecture/seminar courses
Exclusion: WDW427H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)
CRI428H1 - Neighbourhoods and Crime

Hours: 24S

An advanced seminar exploring the connection between neighbourhoods and the perpetuation of poverty, social marginalization, segregation and crime. The course may include an optional Service Learning component. Check the timetable for details.

Prerequisite: 2 CRI 300 half-credit lecture/seminar courses
Exclusion: WDW428H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

CRI429H1 - Youth Culture, Racialization and Crime in the Global Context

Hours: 24S

An advanced seminar exploring youth culture and its possible connection to criminality from an international perspective.

Prerequisite: 2 CRI 300 half-credit lecture/seminar courses (0.5 may be substituted by a 300+ level HIS/PHL/PSY/SOC course)
Exclusion: WDW429H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

CRI431H1 - Mental Health, Morality & Legal Controls

Hours: 24S

A critical exploration of contemporary debates in criminology, and legal and moral philosophy concerning the diagnostic and criminal justice labeling of mental disorders such as psychopathy and paedophilia, and their representation in popular culture.

Prerequisite: 2 CRI 300 half-credit lecture/seminar courses
Exclusion: WDW431H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

CRI435H1 - Advanced Seminar in Policing

Hours: 24S

This course will explore policing in a comparative and historical context. Issues to be covered include the following: the maintenance of law and order before police forces; development of police forces in continental Europe and the English-speaking world; structure and function of national police forces around the world today; the role of political and secret police forces; and contemporary debates on the mission and regulation of the police in contemporary North America including issues such as police-community relations, private policing, and counter-terrorism.

Prerequisite: 2 CRI 300 half-credit lecture/seminar courses.
Exclusion: CRI3130H1, WDW435H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

CRI445H1 - International Criminal Law

Hours: 24S

An advanced seminar focusing on the legal and conceptual framework for responding to state violence and war crimes, and the challenges faced by various international legal institutions. Legal doctrines of sovereign immunity and universal jurisdiction, the history of international criminal prosecutions, and substantive international criminal law are examined.

Prerequisite: 2 CRI 300 half-credit lecture/seminar courses
Exclusion: CRI3340H1, WDW445H1 taken in 2008-2009; WDW445H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

CRI450H1 - Advanced Research/Reading

Hours: 24S

A supervised individual or group project under the direction of a faculty member from the Centre for Criminology & Sociolegal Studies. Approval of the Undergraduate Coordinator is required. Form is available on the Program Office website. Not eligible for CR/NCR option.

Prerequisite: 3 CRI 300 half-credit lecture/seminar courses and minimum 3.0 CGPA.
Exclusion: WDW450H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)
CRI480H1 - Interpersonal Violence

Hours: 24S

The meaning, purposes and sources of interpersonal violence, including an examination of debates over defining and documenting violence, and a review of the research on the relationships between illegitimate, interpersonal violence and state-approved or state-initiated violence. Cultural, social and individual correlates of interpersonal violence; the violence of the law; and how violence is justified and denied.

Prerequisite: 2 CRI 300 half-credit lecture/seminar courses
Exclusion: WDW400H1 in 2004-2006, WDW480H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

CRI487H1 - Law, Space, and the City

Hours: 24S

An introduction to interdisciplinary studies of law and space, this course covers a broad range of topics, from work on empire and colonialism by legal historians and indigenous scholars to studies of national spaces, urban spaces, and bodily spaces. Some background in either legal studies or cultural geography is desirable. Open to students in law, geography, anthropology, women/gender studies, and sociology, though permission of the instructor is required.

Prerequisite: 2 CRI 300 half-credit lecture/seminar courses
Exclusion: CRI3256H1 (when offered as a joint course), WDW487H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

CRI490H1 - Advanced Topics in Criminology and Sociolegal Studies

Hours: 24S

The objective of the course is to explore emerging issues in Criminology, and their social, legal, ethical and political implications. Topics vary from year to year.

Prerequisite: 2 CRI 300 half-credit lecture/seminar courses
Exclusion: WDW490H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

CRI491H1 - Advanced Topics in Criminology and Sociolegal Studies

Hours: 24S

Topics vary from year to year. The objective of the course is to explore emerging issues in Criminology, and their social, legal, ethical and political implications.

Prerequisite: 2 CRI 300 half-credit lecture/seminar courses
Exclusion: WDW491H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

CRI498H1 - Intensive Course

Content in any given year depends on instructor. Intensive courses are offered by distinguished visitors from around the world. Students in their 4th year are strongly encouraged to take advantage of this unique opportunity to study with one or more outstanding visiting international scholars that the Centre for Criminology & Sociolegal Studies brings from time to time. The intensive course usually runs for approximately 3-4 weeks.

Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

P.X. Scanlan, MA, Ph D

Introduction

Interdisciplinary program

Where is home? Need it be in one place? Is it always attached to territory? Diaspora and transnational studies examines the historical and contemporary movements of peoples and the complex problems of identity and experience to which these movements give rise as well as the creative possibilities that flow from movement. The program is comparative and interdisciplinary, drawing from the social sciences, history and the arts. Students are required to take a year long course that offers an introduction to a broad array of themes and disciplinary methodologies. The program offers a wide selection of additional courses, giving students the opportunity to learn about a range of diasporic communities as well as key debates in the field.

Diaspora and Transnational Studies Programs

Diaspora & Transnational Studies Major (Arts Program) - ASMAJ1407

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

(7 full courses or their equivalent, including at least two 300+ series courses)

1. DTS200Y1
2. DTS300H1
3. 4.5 full-course equivalents (FCEs) from Group A and B courses, with at least two FCEs from each group.

Diaspora & Transnational Studies Minor (Arts Program) - ASMIN1407

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

(4 full courses or their equivalent, including at least one 300+ series course)

1. DTS200Y1
2. DTS300H1
3. 2 full-course equivalents (FCEs) from Group A and B courses, with at least one FCE from each group.
4. One DTS 400-level course

Notes Regarding Course Groups

Students are responsible for checking the co- and prerequisites for all courses in Groups A and B.

Note: course = one full course or the equivalent in half courses.

Course Groups

Group A: Humanities Courses

- CJS200H1 Introduction to Jewish Thought
- CJS201H1 Introduction to Jewish Culture

Diaspora and Transnational Studies Courses

DTS199H1 - The Bible and Migration

Hours: 24S

From the expulsion of Adam and Eve from Eden to the border-crossings in the book of Ruth and the journey of Joseph and Mary to Bethlehem, the Bible speaks powerfully and in many voices about the experience of displacement and migration. These stories continue to play a complex and important role in modern literature and contemporary debates about migration and migrants. Our course will explore biblical narratives and laws about sojourners, strangers, foreigners, refugees and migrants, follow the paths of these travelers into later religious and political discourse, and attend to the reverberations of these journeys in contemporary art, literature and political discourse. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Humanities; Social Science
Breadth Requirements: Thought, Belief and Behaviour (2)

DTS200Y1 - Introduction to Diaspora and Transnational Studies I

Hours: 48L

What is the relationship between place and belonging, between territory and memory? How have the experiences of migration and dislocation challenged the modern assumption that the nation-state should be the limit of identification? What effect has the emergence of new media of communication had upon the coherence of cultural and political boundaries? All of these questions and many more form part of the subject matter of Diaspora and Transnational Studies. This introductory course examines the historical and contemporary movements of peoples and the complex issues of identity and experience to which these processes give rise as well as the creative possibilities that flow from movement and being moved. The area of study is comparative and interdisciplinary, drawing from the social sciences, history, the arts and humanities. Accordingly, this course provides the background to the subject area from diverse perspectives and introduces students to a range of key debates in the field, with particular attention to questions of history, globalization, cultural production and the creative imagination.

Exclusion: DTS201H1, DTS202H1
Distribution Requirements: Humanities; Social Science
Breadth Requirements: Creative and Cultural Representations (1); Society and its Institutions (3)

DTS300H1 - Qualitative and Quantitative Reasoning

Hours: 24L

Focuses on research design and training in methods from history, geography, anthropology, literary and cultural studies, and other disciplines appropriate to Diaspora and Transnational Studies. Prepares students to undertake primary research required in senior seminars.

Prerequisite: DTS200Y1 or CJS200H1 or CJS201H1 or permission of course instructor
Distribution Requirements: Humanities; Social Science
Breadth Requirements: The Physical and Mathematical Universes (5)

DTS305H1 - Special Topics in Diaspora and Transnational Studies

Hours: 24L

An upper level course. Topics of study vary from year to year.

Prerequisite: DTS200Y1 or permission of course instructor
Distribution Requirements: Humanities; Social Science
Breadth Requirements: Society and its Institutions (3)
DTS310H1 - Transnational Toronto

Hours: 24L

Toronto is a city increasingly configured through transnational connections and practices. It is a city defined by the scale at which its residents live their lives; a scale that is no longer (if it ever was) parochial, but extends across time and space to connect people and practice across a multitude of locales. Contemporary understandings of Toronto can only be reached through adopting a transnational lens. This course will examine the processes that have produced Toronto as a transnational city over time, including the dynamics of immigration and mobility, experiences of alienation, the global extension of capitalism, and the (re)formation of communities grounded in the complex dynamics of identities produced in a space that is both 'home' and away. We will also explore the specific practices, and connections that produce "Toronto" as a space that transcends its physical geographic boundaries and is continually reproduced in and through the flows of people, capital, objects, ideas, and the many forces that reproduce and reconfigure these flows.

Prerequisite: DTS200Y1 or permission of course instructor
Distribution Requirements: Humanities; Social Science
Breadth Requirements: Society and its Institutions (3)

DTS311H1 - Fun in Diaspora

Hours: 24L

From parkour to "Baby Shark" remixes, concepts and practices surrounding fun, entertainment, and pleasure transcend cultural boundaries, reveal the reach of globalization, and help facilitate the maintenance of transnational communities through shared activities. This course will examine these relationships with fun, and we will also assess cases where concepts of fun diverge and clash in intercultural contexts. Additionally, the class will consider the relationship between entertainment practices and politics, marketing, and social movements. Cases examined will include K-pop fandom, bucket challenges, social media memes, and global YouTube phenomena.

Prerequisite: DTS200Y1 or permission of course instructor
Distribution Requirements: Humanities; Social Science
Breadth Requirements: Creative and Cultural Representations (1)

DTS312H1 - Exile

Hours: 24S

Historically used to describe both voluntary departure and enforced banishment from a city, today, "Exile" is perhaps most famously associated with both the Jewish and the Palestinian condition. But exile is also a state of being, one that is creative, critical, and full of meaning-making. This class posits "Exile" as a conceptual framework through which to think through the 21st-century condition of migration and diaspora. Through foundational texts and historic case studies, particularly drawn from East Africa, South Asia, and the Middle East, we will consider how exile has been deployed in order to bring together diverse situations under a unifying theory of both individual and collective experience.

Prerequisite: DTS200Y1 or permission of course instructor
Distribution Requirements: Humanities; Social Science
Breadth Requirements: Society and its Institutions (3)

DTS314H1 - Citizenship and Multiculturalism

Hours: 24S

This course examines approaches to belonging and distinction that accompany different models of citizenship. What are some historical and recent trends in the intersections of place, custom, and rights? How have governments related social diversity to social justice in theory and in practice? Areas of emphasis will vary, but may include topics such as authenticity and assimilation; ethno-nationalism; immigration and naturalization policy; indigeneity; insurgency; colonialism; mass media and popular culture; policing and surveillance; racial stratification; transnational markets; and xenophobia.

Prerequisite: DTS200Y1 or permission of course instructor
Distribution Requirements: Humanities; Social Science
Breadth Requirements: Society and its Institutions (3)

JQR360H1 - The Canadian Census: Populations, Migrations and Demographics

Hours: 24L/12T

Examines the Canadian population census through the experience of diasporic groups in Canada. Approaches the census as a statistical tool, an historical source and an ideological project of citizenship and nationalism. Uses census data to explore mathematical and statistical concepts and to integrate numerical ways of thinking with qualitative analysis. (Jointly sponsored by African Studies, Diaspora and Transnational Studies, Caribbean Studies, Equity Studies and Latin American Studies).

Prerequisite: DTS200Y1/HIS230H1/HIS231H1/LAS200H1/LAS201H1/NEW120Y1/NEW150Y1/NEW200H1/NEW211H1/NEW224Y1/NEW225H1/NEW226H1/NEW240Y1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)
DTS390H1 - Independent Study

A scholarly project chosen by the student, approved by the Department, and supervised by one of its instructors. Consult with the Diaspora and Transnational Studies Program Office for more information. Not eligible for CR/NCR option.

Prerequisite: DTS200Y1
Distribution Requirements: Humanities; Social Science

DTS390Y1 - Independent Study

A scholarly project chosen by the student, approved by the Department, and supervised by one of its instructors. Consult with the Diaspora and Transnational Studies Program Office for more information. Not eligible for CR/NCR option.

Prerequisite: DTS200Y1
Distribution Requirements: Humanities; Social Science

DTS401H1 - Advanced Topics in Diaspora and Transnationalism

Hours: 24S

An in-depth investigation of topics in Diaspora and Transnationalism. Content in any given year depends on instructor. Refer to the Centre for Diaspora and Transnational Studies website (http://cdts.utoronto.ca/index.php/undergraduate/courses/) for more information.

Prerequisite: DTS200Y1 or equivalent and a minimum of 15 FCEs
Distribution Requirements: Humanities; Social Science
Breadth Requirements: Society and its Institutions (3)

DTS402H1 - Advanced Topics in Diaspora and Transnationalism

Hours: 24S

An in-depth investigation of topics in Diaspora and Transnationalism. Content in any given year depends on instructor. Refer to the Centre for Diaspora and Transnational Studies website (http://cdts.utoronto.ca/index.php/undergraduate/courses/) for more information.

Prerequisite: DTS200Y1 or equivalent and a minimum of 15 FCEs
Distribution Requirements: Humanities; Social Science
Breadth Requirements: Society and its Institutions (3)

DTS403H1 - Advanced Topics in Diaspora and Transnationalism

Hours: 24S

An in-depth investigation of topics in Diaspora and Transnationalism. Content in any given year depends on instructor. Refer to the Centre for Diaspora and Transnational Studies website (http://cdts.utoronto.ca/index.php/undergraduate/courses/) for more information.

Prerequisite: DTS200Y1 or equivalent and a minimum of 15 FCEs
Distribution Requirements: Humanities; Social Science
Breadth Requirements: Society and its Institutions (3)

DTS404H1 - Advanced Topics in Diaspora and Transnationalism

Hours: 24S

An in-depth investigation of topics in Diaspora and Transnationalism. Content in any given year depends on instructor. Refer to the Centre for Diaspora and Transnational Studies website (http://cdts.utoronto.ca/index.php/undergraduate/courses/) for more information.

Prerequisite: DTS200Y1 or equivalent, or CJS200H1 or CJS201H1 and a minimum of 15 FCEs
Distribution Requirements: Humanities; Social Science
Breadth Requirements: Society and its Institutions (3)

DTS405H1 - Advanced Topics in Diaspora and Transnationalism

Hours: 24S

An in-depth investigation of topics in Diaspora and Transnationalism. Content in any given year depends on instructor. Refer to the Centre for Diaspora and Transnational Studies website (http://cdts.utoronto.ca/index.php/undergraduate/courses/) for more information.

Prerequisite: DTS200Y1 or equivalent and a minimum of 15 FCEs
Distribution Requirements: Humanities; Social Science
Breadth Requirements: Society and its Institutions (3)
DTS406H1 - Advanced Topics in Diaspora and Transnationalism

Hours: 24S

An in-depth investigation of topics in Diaspora and Transnationalism. Content in any given year depends on instructor. Refer to the Centre for Diaspora and Transnational Studies website (http://cdts.utoronto.ca/index.php/undergraduate/courses/) for more information.

Prerequisite: DTS200Y1 or equivalent and a minimum of 15 FCEs
Distribution Requirements: Humanities; Social Science
Breadth Requirements: Society and its Institutions (3)

DTS410H1 - Diasporic Foodways

Hours: 24S

Food links people across space and time. As it spirals outward from parochial sites of origin to articulate with new sites, actors and scales, it assumes new substance and meaning in new locales. This movement of food gives rise to new 'foodways' that help us to understand the past in terms of temporally connected sites of intense interaction. Food also plays a strong role in shaping translocal identities. As peoples have moved in the world, food has played a central role in (re)defining who they are, reproducing myth and ritual, and bounding diasporic communities. This course seeks to address questions surrounding the dynamics of the food 'we' eat, the ways in which 'we' eat, the meaning 'we' give to eating, and the effect of eating in a transnational world. Recognizing that culinary culture is central to diasporic identifications, the focus is on the place of food in the enduring habits, rituals, and everyday practices that are collectively used to produce and sustain a shared sense of diasporic cultural identity.

Prerequisite: 14 FCE, including DTS200Y1
Distribution Requirements: Humanities; Social Science
Breadth Requirements: Society and its Institutions (3)

DTS411H1 - Transnational Justice

Hours: 24S

This course explores the intersection between local conceptions of justice and their transnational and institutional circulations. It interrogates competing meanings of justice and examines the varied practices of actors engaged in justice making domains. From international human rights, to transitional justice and truth and reconciliation, to international legal and traditional justice formulations, the course offers students an opportunity to learn about and critically reflect on the processes and purposes through which justice conceptions are structured, implemented and being contested in the contemporary period. Topics include: theories of transnationalism, transnational justice, social injustice, law and culture, universalism, racism and social inequality.

Prerequisite: 14 FCE, including DTS200Y1
Distribution Requirements: Humanities; Social Science
Breadth Requirements: Society and its Institutions (3)

DTS412H1 - The Diasporic Imagination

Hours: 24S

This course focuses on echoes of diasporic and transnational life in artistic work, and on the significance of aesthetic production to the formation of diasporic and transnational worlds. How have practices, producers, and works of art illuminated the particularities of diasporic life? How do conventions of genre, performance, and tradition shape experiences of borders and crossings? Areas of emphasis will vary but may spotlight particular historical and geographic contexts, and may foreground one or more form, including film, poetry, fiction, music, and dance.

Prerequisite: 14 FCE, including DTS200Y1
Distribution Requirements: Humanities; Social Science
Breadth Requirements: Creative and Cultural Representations (1)

DTS413H1 - Global Sexualities

Hours: 24S

Sexuality is a complex interplay of desires, attractions, interests, and modes of behavior and has diverse meanings in different societies and cultures. In this course, we will examine the notion of sexuality as well as gender identity and expression from an interdisciplinary perspective that is rooted in ethnography. A cross-cultural study of sexuality and gender identity within global and transnational contexts will provide students with an understanding of how the intersections of culture, community, as well as social and political factors affect individuals' sexual choices and understandings of gender. A particular focus in this course will be experiences of sexuality and gender within diasporic communities.

Prerequisite: 14 FCE, including DTS200Y1 or SDS380H1
Distribution Requirements: Humanities; Social Science
Breadth Requirements: Society and its Institutions (3)
DTS414H1 - Money on the Move

Hours: 24S

In the eighteenth and nineteenth centuries, industry and finance matured together, pushing people into motion around the world. The instruments of long-distance trade, like insurance, credit and debt, connected cities and continents in new and sometimes unsettling ways. The free movement of goods and cash was mirrored by restrictions on migration to some parts of the world and by forced or coerced migration to others. This course explores the history of the rise of global capitalism at a human scale, exploring how financialization, industrialization and imperialism overlapped and intertwined, and how the remaking of the world in the image of capital weighed on human lives.

Prerequisite: 14 FCE, including DTS200Y1
Distribution Requirements: Humanities; Social Science
Breadth Requirements: Society and its Institutions (3)

DTS415H1 - Diaspora at Home

Hours: 24S

What is the relationship between diaspora and domesticity? What does it mean to inhabit the position of the stranger not in the public life of the city, but in the private sphere of the household? This course approaches questions of migration, labour, and foreignness through the prism of the home. We consider the international phenomenon of migrant domestic labour and how it shapes social and family relations, both in countries of origin such as the Philippines and Ethiopia, as well as in countries of employment such as Canada and Lebanon. But we also reflect on how migration radically transforms life inside the home, affecting what it means to be a parent, a child, or a partner. In doing so we draw upon diverse representations of “the family”, kinship, and intimacy across both the humanities and the social sciences.

Prerequisite: 14 FCE, including DTS200Y1
Distribution Requirements: Humanities; Social Science
Breadth Requirements: Society and its Institutions (3)

DTS416H1 - Wars, Diaspora and Music

Hours: 24S

The course explores how composers, performers, songwriters and audiences made sense of traumatic and violent events that they experienced, such as ethnic conflicts, wars, exile and displacement, through music. We will also look at how government ideologies employ music during wars. The case studies will include stories of Jewish, Palestinian, Afghan, Romani, Korean, Rwandan and other diasporas severely affected by wars and violence.

Prerequisite: 14 FCE, including DTS200Y1
Distribution Requirements: Humanities; Social Science
Breadth Requirements: Society and its Institutions (3)

Introduction

The undergraduate program at the Centre for Drama, Theatre, and Performance Studies offers a unique combination of rich and rigorous scholarship with high standards of practical training. The program provides students with an integrated set of critical and artistic skills through which to engage with broader intellectual, social, and political issues in the Humanities and beyond. Along with courses in theatre and performance theory and history, dramatic literature, dramaturgy, technology, and practice-based lab courses, the Centre offers introductory and advanced studio courses in acting, production, design, directing, and playwriting. The Digital Dramaturgy Lab (squared) (DDL) and the newly founded BMO Lab in Creative Research in the Arts, Performance, Emerging Technologies and AI, with their international scope and interdisciplinary approach, present the students with a unique opportunity to develop projects exploring the use of new technologies in the context of the performing arts.

Students graduating from our program have combined majors in the Humanities, Social Sciences, and Sciences, including English, Women and Gender Studies, Cinema Studies, Sexual Diversity Studies, Art History, Classics, Religion, Anthropology, Canadian Studies, Political Science, Psychology, Sociology, Human Biology, Computer Science, and Cognitive Science.

The Centre’s undergraduate program has access to two theatres (the Helen Gardiner Phelan Playhouse and the Robert Gill Theatre) and a number of performance and rehearsal spaces available to students and faculty.

Please note. While some of our courses are open to all students of the University, others are restricted to students in a Drama Specialist, Major or Minor program. Some studio courses (Group B) require an audition, interview, or the submission of a portfolio. While entry into and progress through most of these studio courses require certain prerequisites, the Centre can grant exceptions on a case-by-case basis.

More details, including application guidelines and deadlines, can be found on our website at: https://www.cdtps.utoronto.ca.

The Centre’s Undergraduate Administrative Coordinator, Colleen Osborn, is also available for consultation. For general enquiries or to schedule an appointment call 416-978-8099 or send an e-mail to c.osborn@utoronto.ca.

Drama, Theatre and Performance Studies Programs

Drama Specialist (Arts Program) - ASSPE2148

Admission Requirements:
Enrolment Requirements:

In effect for March 1, 2020:

This is an open enrolment program. A student who has completed 4.0 credits may join the program.

Please note (below) that while there are no specific course requirements to join the program, completion of the Studio (Group B) requirement will normally require either an audition, a personal interview, or the submission of a portfolio to match students with courses as required. The Centre will, however, work with any student who enrolls in the program to determine the best options for proceeding through and completing the program.

Completion Requirements:

12 credits, including at least 4.0 300+ series with at least 1.0 FCE at the 400 level.

1. DRM101Y1
2. DRM220Y1
3. 3.0 credits from Drama, Theatre, and Performance Studies courses (Group A)
4. 2.0 credits from Studio courses (Group B)
5. From Group A, B, C or other DRM: 5.0 credits to make up the total of 12 credits

Notes on Group A and B requirements:
Following completion of DRM220Y1, students are advised to complete at least 0.5 FCE from Group A per academic year until they have completed the required total of 3.0 FCE from Group A.

Students can take a maximum of 3.0 FCE from Group B per year.

Minimum grade requirements apply to some pre-requisite courses (DRM101Y1, DRM220Y1 and second-year foundation courses) to advance through some Studio (Group B) courses.

Some Studio (Group B) courses will require a separate assessment either through an audition (performance), submission of a portfolio (playwriting), or a personal interview (directing, design and production). For information on the deadlines for these assessments and the process for applying, please consult the Centre website.

The Centre is committed to working with any student to consider best options for not only progressing but completing the program. Students are strongly encouraged to reach out to Centre staff for advising on planning their program.

Drama Minor (Arts Program) - ASMIN2148

Enrolment Requirements:

In effect for March 1, 2020:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Please note (below) that while there are no specific course requirements to join the program, completion of the Studio (Group B) requirement may require an audition, a personal interview, or the submission of a portfolio to match students with courses as required. The Centre will, however, work with any student who enrolls in the program to determine the best options for proceeding through and completing the program.

Completion Requirements:

4.0 credits including at least 1.0 credit at the 300+ level.

1. DRM101Y1
2. From Group A: 1.0 credit or DRM220Y1
3. From Group A: 1.0 credit
4. From Groups A, B, C or other DRM (when eligible): 1.0 credit to make up the total of 4.0 credits

Note: Priority is reserved for Drama Majors and Specialists for Group B Studio courses.

Notes Regarding Course Groups

Studio Courses (Group B): Students taking a studio course (Group B) are required to take an academic co-requisite from Foundations or any course from Group A.

Group C: Many Group C courses have pre-requisites. Check with the designated department prior to enrollment.

Course Groups

Drama, Theatre and Performance Studies Courses

DRM101Y1 - Introduction to Drama, Theatre and Performance Studies

Hours: 48L/24T

The course introduces students to key concepts and issues in the three related disciplines at the core of our program: drama, theatre, and performance studies. We consider broader questions of performance and performativity in daily life alongside the questions of what goes into the making of a stage-based performance and the responsibilities of artists, presenters, and witnesses in this endeavour. Engaging critically with theoretical and dramatic texts and live performances, students learn how to think about performance in its cultural, social, aesthetic and political dimensions, and how to acknowledge and navigate their own responsibilities as culture workers situated in specific historical and contemporary contexts. This course combines weekly two-hour lectures with one-hour tutorials.

Exclusion: DRM100Y1, DRE121H5, DRE122H5, VPDA10H3, VPDA11H3, VPDA10H3, VPDA15H3, VPDB10H3, VPDB11H3

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1); Society and its Institutions (3)

DRM200Y1 - Performance I

Hours: 168P

Emphasis is initially placed on ensemble, non-verbal, and improvisational work. Students proceed to the application of their acquired skills to scripted material. Students may apply in their first or second year of University. The Application Deadline is March 10th for the first round of auditions; August 10th for the second round. Please consult the CDTPS undergraduate web page for information on how to apply.

Prerequisite: An audition and interview in April or in August. Newly admitted students can apply for an audition before beginning their first year of studies.
Corequisite: DRM101Y1 or DRM220Y1
Exclusion: DRS221H5 AND DRS222H5; VPDB01H3 AND VPDB02H3
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

DRM202H1 - Directing I

Hours: 36P

A practical introduction to directing theatre and to the different styles, concerns, and goals that can guide directors in their relations to actors, audiences, and politics. Through lectures, discussions, and practical exercises, students learn how directors prepare for their work in terms of generating ideas, breaking down a text, animating space, and communicating with actors and audiences.

Prerequisite: Specialist or Major in Drama; DRM101Y1
Corequisite: DRM220Y1
Exclusion: VPDC02H3
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

DRM220Y1 - Comparative Theatre Histories

Hours: 48L/24T

This course will introduce students to major developments in world theatre history through the exploration of a wide range of plays, performances, and practices. In the Fall term our trajectory will go roughly from antiquity to the 16th Century; in the Winter term, from the 16th Century to the present. We will examine material from Africa, America, Asia, Europe, and Oceania, with close attention to the social, religious, historical, aesthetic, and political parameters in which theatre and performance take place. Nurturing ethnically sensitive approaches to world theatre history, this course considers the many ways theatre and performance interact with the globalized world. Students will have an opportunity to participate in collaborative projects and focus on writing for research in the performing arts.

Prerequisite: DRM101Y1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1); Thought, Belief and Behaviour (2)
DRM228H1 - Playwriting I

Hours: 36L

A hands-on study of the craft of dramatic writing. The class examines the basic elements of playwriting such as plot, structure, theme, character, dialogue, setting, with an emphasis on story-making. Attention is given to the development of students own work through written assignments and in-class exercises.

Prerequisite: Specialist or Major in Drama; DRM101Y1
Corequisite: DRM220Y1
Exclusion: DRE362H5
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

DRM2288H1 - Introduction to Communication

Previous Course Number: DRM286H1
Hours: 48P

Effective communication is a pivotal skill when public speaking, persuasive discourse, and personal presence are key to success. In this introductory course, students will strengthen and develop confidence in a supportive, playful, highly participatory and collaborative environment. This course is suited to students in professional programs or for those who would like to learn a full range of communication skills. Exploration of language structure, argumentation, grounding, alignment, vocal resonance, clarity and effective listening will be part of each class with an emphasis on enhancing individual potential.

Prerequisite: 4 FCE
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

DRM254H1 - Design and Production I

Hours: 36L/12T

A practical and theoretical introduction to the fundamentals of theatrical performance design. This course touches on theatre architecture, conceptual approaches to theatrical design and spatial considerations of live performance. Students will work on case studies and practical projects geared toward understanding theatre terminology, design, and production processes. Students will also explore concrete aspects of technical theatre production, particularly as they pertain to theatrical design elements.

Prerequisite: Specialist or Major in Drama
Corequisite: DRM101Y1 or DRM220Y1
Exclusion: DRM254Y1, VPDB03H3/VPDC03H3
Recommended Preparation: DRM101Y1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

DRM254H1 - Design and Production I

Hours: 36L/12T

A practical and theoretical introduction to the fundamentals of theatrical performance design. This course touches on theatre architecture, conceptual approaches to theatrical design and spatial considerations of live performance. Students will work on case studies and practical projects geared toward understanding theatre terminology, design, and production processes. Students will also explore concrete aspects of technical theatre production, particularly as they pertain to theatrical design elements.

Prerequisite: Specialist or Major in Drama
Corequisite: DRM101Y1 or DRM220Y1
Exclusion: DRM254Y1, VPDB03H3/VPDC03H3
Recommended Preparation: DRM101Y1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

DRM254H1 - Design and Production I

Hours: 36L/12T

A practical and theoretical introduction to the fundamentals of theatrical performance design. This course touches on theatre architecture, conceptual approaches to theatrical design and spatial considerations of live performance. Students will work on case studies and practical projects geared toward understanding theatre terminology, design, and production processes. Students will also explore concrete aspects of technical theatre production, particularly as they pertain to theatrical design elements.

Prerequisite: Specialist or Major in Drama
Corequisite: DRM101Y1 or DRM220Y1
Exclusion: DRM254Y1, VPDB03H3/VPDC03H3
Recommended Preparation: DRM101Y1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

DRM254H1 - Design and Production I

Hours: 36L/12T

A practical and theoretical introduction to the fundamentals of theatrical performance design. This course touches on theatre architecture, conceptual approaches to theatrical design and spatial considerations of live performance. Students will work on case studies and practical projects geared toward understanding theatre terminology, design, and production processes. Students will also explore concrete aspects of technical theatre production, particularly as they pertain to theatrical design elements.

Prerequisite: Specialist or Major in Drama
Corequisite: DRM101Y1 or DRM220Y1
Exclusion: DRM254Y1, VPDB03H3/VPDC03H3
Recommended Preparation: DRM101Y1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

DRM266H1 - Special Topics in Drama, Theatre and Performance Studies

Hours: 36P

An introduction to selected issues in drama, theatre and performance studies. Special Topics vary for Breadth distribution and Group assignment depending on the course content. Please consult the Undergraduate Drama office and check Special Topics on the website for more details.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

DRM299Y1 - Research Opportunity Program

Credit course for supervised participation in faculty research project. Details at https://www.artsci.utoronto.ca/current/academics/research-opportunities/research-opportunities-program. Not eligible for CR/NCR option.

Prerequisite: Permission from the instructor.
Distribution Requirements: Humanities

DRM300Y1 - Performance II

Hours: 192P

Building upon the work of DRM200Y1, students concentrate on scene study, styles of acting, and the development of ensemble work with an intensive focus on voice and movement practices. The Application Deadline is March 10th.

Prerequisite: Minimum 70% in required courses: DRM101Y1 and DRM200Y1
Corequisite: DRM220Y1 or any course from Group A if DRM220Y1/DRM230Y1 is complete
Exclusion: DRS321H5 and DRS322H5
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)
DRM301H1 - Voice and Movement I

Hours: 3T/36P

A practice-based exploration of voice and movement in relation to performance. Through an exploration of the connections between breath, movement, voice, impulse, emotion, space, character and text, students learn to use their voice and body in informed and efficient ways in practice and performance and to develop a wide expressive range. Emphasis is placed on both personal awareness and ensemble work. Taken in conjunction with DRM300Y1: Performance II.

Prerequisite: DRM101Y1 and DRM200Y1
Corequisite: DRM300Y1
Recommended Preparation: DRM220Y1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

DRM302H1 - Directing II

Hours: 12T/36P

A continuation of DRM202H1, concentrating on deepening the exploration of what it means to think and work like a director. Through practical exercises and scene study, students learn how to conceptualize a production and how to communicate their vision, as well as deepen their understanding of what is involved in directing actors and collaborating with a production team. Please consult the CDTPS undergraduate web page for information on how to apply and the deadline to apply.

Prerequisite: Minimum 70% in required courses: DRM101Y1; DRM202H1; and an interview in November.
Corequisite: DRM220Y1 or any course from Group A.
Recommended Preparation: DRM220Y1 and DRM331H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

DRM303H1 - Theories of Acting

Hours: 36L

An examination of the major writers who have influenced the art of the actor in the twentieth century, with a focus on theories of actor training and the preparation for performance, the ways in which audiences assess acting as an art form, and the rise of the actor as an artist of equal status in North American and European theatre. Writers include Konstantin Stanislavsky, his followers and interpreters in America (including the Actors Studio and Lee Strasberg), along with alternatives to his 'System,' including Expressionism, Epic Theatre and the teachings of Michael Chekhov.

Prerequisite: DRM101Y1 or any 4.0 FCE
Exclusion: DRM388H1; VPDB15H3
Recommended Preparation: DRM220Y1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

DRM311H1 - Voice and Movement II

Hours: 3T/36P

Building on DRM301H1, students deepen their exploration of vocal and physical practices and techniques. Taken in conjunction with DRM300Y1: Performance II.

Prerequisite: DRM101Y1 and DRM200Y1
Corequisite: DRM300Y1
Recommended Preparation: DRM220Y1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

DRM320H1 - Concepts of Theatre in the Twentieth and Twenty-first Centuries

Hours: 36L

An exploration of the shifting landscapes of European theatre theory, history and practice in the late 19th century and their repercussions throughout the 20th and 21st centuries. The course focuses on the developments of modern and post-dramatic theatre. It also includes critical analysis of the annual Drama Mainstage production and current Canadian theatre.

Prerequisite: DRM101Y1
Exclusion: DRM230Y1
Recommended Preparation: DRM220Y1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

DRM328H1 - Playwriting II

Hours: 36L

A continuation of DRM228H1, concentrating on the in-depth knowledge and practice of playwriting with an emphasis on style and technique of writing for the stage. Students develop their own work through written assignments, in-class exercises, and the final public presentation. Please consult the CDTPS undergraduate web page for information on how to apply and the deadline to apply.

Prerequisite: Minimum 70% in required courses: DRM101Y1; DRM228H1; and a portfolio of writing samples due in April.
Corequisite: DRM220Y1 or any course from Group A
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)
DRM331H1 - Dramaturgy

Hours: 36L

Study of dramaturgical theory and of interpretations of the dramaturge's function in the theatre. Using examples from Canada and beyond, students apply this knowledge to theatre practice.

Prerequisite: DRM101Y1
Exclusion: DRE348H5; DRE360H5; VPDD01H3
Recommended Preparation: DRM220Y1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

DRM342H1 - The Contemporary Avant-Garde

Hours: 36L

The turn of the 21st century advanced a social, political, and aesthetic shift reminiscent of that during the post-Industrial Revolution/pre-WWII epoch that launched the historical avant-garde. This class, while exploring significant artistic and sociopolitical developments of the historical avant-garde, will primarily concentrate on the experimental theatre and performance of the past 15 years—a contemporary avant-garde that "hinge[s] on a networked spatiality, rather than on linear teleology" and reflects a growing collective investment on part of audiences and artists alike in the work of a work of art.

Prerequisite: DRM101Y1 or any 4.0 FCE
Recommended Preparation: DRM220Y1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

DRM354H1 - Design II

Hours: 72P

An intermediate-level investigation of various aspects of theatrical performance design, with a focus on scenic and costume design, though also considering the impact of projections and lighting. Using skills developed through practical study in the Design Studio, the students form the core of the design team for Drama productions. Applications are required in order to enroll in this course. Please consult the CDTPS Application Guidelines for specific procedures and deadlines.

Prerequisite: Minimum 70% in required courses: DRM101Y1; DRM254H1; and an interview.
Corequisite: DRM220Y1 or any course from Group A
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

DRM355H1 - Production II

Hours: 36L/36P

An intermediate-level investigation of various aspects of theatrical production, including stage management, lighting, sound and video, with some exploration of how these elements relate to theatrical design concepts. Using skills developed through practical study in the Helen Gardiner Phelan Playhouse, the students form the core of the production team for Drama productions. Applications are required in order to enroll in this course. Please consult the CDTPS Guidelines for specific procedures and deadlines.

Prerequisite: Minimum 70% in required courses: DRM101Y1; DRM254H1; and an interview.
Corequisite: DRM220Y1 or any course from Group A
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

DRM355Y1 - Production II

Hours: 72L/72P

An intermediate-level investigation of various aspects of theatrical production, including stage management, lighting, sound and video, with some exploration of how these elements relate to theatrical design concepts. Using skills developed through practical study in the Helen Gardiner Phelan Playhouse, the students form the core of the production team for Drama productions. Applications are required in order to enroll in this course. Please consult the CDTPS Guidelines for specific procedures and deadlines.

Prerequisite: Minimum 70% in required courses: DRM101Y1; DRM254H1; and an interview.
Corequisite: DRM220Y1 or any course from Group A
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

DRM362H1 - Theatre and the World

Hours: 36L

An intercultural, post-colonial and comparative analysis of innovative processes in the national and cross-cultural theatre around the world. Focusing on selected periods and cultures, the course explores the cultural backgrounds of key turning points in pre-modern and modern theatre and their impact on the developments of the post-modern theatre in a globalizing world.

Prerequisite: DRM101Y1 or any 4.0 FCE
Recommended Preparation: DRM220Y1/DRM230Y1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)
DRM363H1 - Story-ing the Possible: Talking Treaties, Rehearsing (Re)conciliation

Hours: 24L/12T

This half course offers a comprehensive examination of Indigenous history in the territories (now called Canada), Treaty Relationships, and Indigenous-Settler Relationships, as they have shifted and evolved since first contact. Students will enter into conversation with this history and the contemporary issues confronting all Canadians today through the writings of Indigenous playwrights, oral history keepers, academic historians, and Indigenous theorists.

Prerequisite: DRM101Y1 or any 4.0 FCE
Exclusion: INS201Y1
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

DRM366H1 - Canadian Theatre

Hours: 36L

Since the 1960s, actors, directors, and writers have been architects of Canadian identity. This course will study the history of Canadian theatre, with an emphasis on how Canadian playwrights and creators have been engaged with social and political issues. A survey of post-colonial theatre, cultural diversity, and gender politics on the Canadian stage.

Prerequisite: DRM101Y1 or any 4.0 FCE
Exclusion: DRM268H1; DRE200H5; DRE364H5; VPDB13H3
Recommended Preparation: For Drama Majors and Specialists: DRM220Y1
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

DRM368H1 - Devised Theatre

Hours: 36P

An in-depth study of devising theatre in a group context. This course offers an intensive exploration of the history and practice of devised theatre within the late 20th and early 21st centuries that will culminate in a number of in-class and public performances.

Prerequisite: Minimum 70% in required courses: DRM101Y1 and DRM200Y1/DRM202H1/DRM228H1/DRM254H1
Recommended Preparation: DRM220Y1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

DRM375H1 - Special Topics in Studio Practice

Hours: 36P

An in-depth examination of selected performance disciplines, styles, and genres within their historical and critical context. Content may vary depending on instructor. Please check Studio Topics on the CDTPS undergraduate web page for more details.

Prerequisite: Minimum 70% in required courses: DRM101Y1; DRM200Y1/DRM202H1/DRM228H1/DRM254H1
Recommended Preparation: DRM220Y1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

DRM375Y1 - Special Topics in Studio Practice

Hours: 72P

An in-depth examination of selected performance disciplines, styles, and genres within their historical and critical context. Content may vary depending on instructor. Please check Studio Topics on the CDTPS undergraduate web page for more details.

Prerequisite: Minimum 70% in required courses: DRM101Y1; DRM200Y1/DRM202H1/DRM228H1/DRM254H1
Recommended Preparation: DRM220Y1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

DRM376H1 - Special Topics in Studio Practice

Hours: 36P

An in-depth examination of selected performance disciplines, styles, and genres within their historical and critical context. Content may vary depending on instructor. Please check Studio Topics on the CDTPS undergraduate web page for more details.

Prerequisite: Minimum 70% in required courses: DRM101Y1; DRM200Y1/DRM202H1/DRM228H1/DRM254H1
Recommended Preparation: DRM220Y1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)
DRM377H1 - Special Topics in Studio Practice

Hours: 36P

An in-depth examination of selected performance disciplines, styles, and genres within their historical and critical context. Content may vary depending on instructor. Please check Studio Topics on the CDTPS undergraduate web page for more details.

Prerequisite: DRM101Y1; DRM200Y1/DRM202H1/DRM228H1/DRM254H1
Corequisite: .
Recommended Preparation: DRM220Y1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

DRM378H1 - Special Topics in Studio Practice

Hours: 36P

An in-depth examination of selected performance disciplines, styles, and genres within their historical and critical context. Content may vary depending on instructor. Please check Studio Topics on the CDTPS undergraduate web page for more details.

Prerequisite: Minimum 70% in required courses: DRM101Y1; DRM200Y1/DRM202H1/DRM228H1/DRM254H1
Recommended Preparation: DRM220Y1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

DRM385Y1 - Special Topics in Drama, Theatre and Performance Studies

Hours: 36L

An in-depth examination of selected issues in drama, theatre and performance studies. Content may vary depending on instructor and is counted towards Group A. Please check the Undergraduate Drama office and check Special Topics on the website for more details.

Prerequisite: DRM101Y1 or any 4.0 FCE
Recommended Preparation: DRM220Y1
Distribution Requirements: Humanities

DRM386H1 - Special Topics in Drama, Theatre and Performance Studies

Hours: 36L

An in-depth examination of selected issues in drama, theatre and performance studies. Special Topics vary for Breadth distribution depending on the course content. Please consult the Undergraduate Drama office and check Special Topics on the website for more details.

Prerequisite: DRM101Y1 or any 4.0 FCE
Recommended Preparation: DRM220Y1
Distribution Requirements: Humanities

DRM387H1 - Special Topics in Drama, Theatre and Performance Studies

Hours: 36L

An in-depth examination of selected issues in drama, theatre and performance studies. Special Topics vary for Breadth distribution depending on the course content. Please consult the Undergraduate Drama office and check Special Topics on the website for more details.

Prerequisite: DRM101Y1 or any 4.0 FCE
Recommended Preparation: DRM220Y1
Distribution Requirements: Humanities
DRM388H1 - Special Topics in Drama, Theatre and Performance Studies

Hours: 36L

An in-depth examination of selected issues in drama, theatre and performance studies. Special Topics vary for Breadth distribution depending on the course content. Please consult the Undergraduate Drama office and check Special Topics on the website for more details.

Prerequisite: DRM101Y1 or any 4.0 FCE
Recommended Preparation: DRM220Y1
Distribution Requirements: Humanities

DRM390Y1 - Independent Studies in Drama, Theatre and Performance Studies

A scholarly project at the 300 level proposed by the individual student in conversation with a faculty member who is willing to act as supervisor. Not eligible for CR/NCR option.

Prerequisite: Minimum 70% in DRM220Y1/DRM230Y1; 10 FCE; Specialist or Major in Drama. A written proposal; Independent study form signed by both student and faculty instructor to be submitted for approval to the Associate Director (undergraduate) before registration: August 1st for September start date; November 1st for January start date.
Distribution Requirements: Humanities

DRM391H1 - Independent Studies in Drama, Theatre and Performance Studies

A scholarly project at the 300 level proposed by the individual student in conversation with a faculty member who is willing to act as supervisor. Not eligible for CR/NCR option.

Prerequisite: Minimum 70% in DRM220Y1/DRM230Y1; 10 FCE; Specialist or Major in Drama. A written proposal; Independent study form signed by both student and faculty instructor to be submitted for approval to the Associate Director (undergraduate) before registration: August 1st for September start date; November 1st for January start date.
Distribution Requirements: Humanities

DRM398H0 - Research Excursions

Hours: TBA

DRM398Y0 - Research Excursions

Hours: TBA

DRM399Y1 - Research Opportunity Program

Credit course for supervised participation in faculty research project. Details at https://www.artsci.utoronto.ca/current/academics/research-opportunities/research-opportunities-program. Not eligible for CR/NCR option.

DRM400H1 - Advanced Performance

Hours: 12T/48P

Advanced Performance builds on the training sequence of DRM200Y1 and DRM300Y1 by developing students’ acting and performance skills in monologues, extensive collaborative scene work, and preparations for auditions. The work focuses on the particulars of character development and the emotional and technical aspects of the actor’s craft. Applications are required in order to enroll in this course. Please consult the CDTPS Application Guidelines for specific procedures and deadlines.

Prerequisite: Specialist or Major in Drama; Minimum 70% in required courses: DRM220Y1/DRM230Y1; DRM300Y1
Corequisite: DRM403Y1 or permission of the Centre
Exclusion: DRM400Y1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

JIA400H1 - Interdisciplinary Practice for the Arts

Hours: 72P

While examining the interconnectedness of the arts, students are required to meet between sessions and develop projects connected to their study. These projects involve a range of media, including theatre, film, music and visual art (installation).

Prerequisite: 14 FCE and an interview/proposal.
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)
DRM402H1 - Advanced Directing

Hours: 36T/36P

An exploration of advanced directing for the theatre. The class is centered on student directed productions, which are publicly presented at the end of term. Emphasis is placed on the development of strong central concepts and realizing the production with imagination, collaboration and creativity. Please consult the CDTPS Application Guidelines for specific procedures and deadlines.

Prerequisite: Specialist or Major in Drama; Minimum 70% in required courses: DRM220Y1/DRM230Y1; DRM302H1; DRM331H1; a written proposal and an interview in April.

Recommended Preparation: DRM300Y1/DRM328H1/DRM354H1/DRM355Y1

Distribution Requirements: Humanities

Breadth Requirements: Creative and Cultural Representations (1)

DRM403Y1 - Mainstage Performance

Hours: 72T/144P

This course, taught each year by a different visiting professional theatre director, offers upper-level theatre and performance studies students the opportunity to explore acting in a full-length production. Plays are selected to challenge students in a variety of diverse ways, exposing them to a full spectrum of theatre and performance genres and possibilities. Applications are required in order to enroll in this course. Please consult the CDTPS Application Guidelines for specific procedures and deadlines.

Prerequisite: Specialist or Major in Drama; Minimum 70% in required courses: DRM220Y1/DRM230Y1; DRM300Y1; 0.5 FCE from DRM368H1/DRM375H1/DRM376H1/DRM377H1/DRM378H1.

Corequisite: DRM400H1 and DRM413H1

Exclusion: DRS425H5 AND DRS426H5

Distribution Requirements: Humanities

Breadth Requirements: Creative and Cultural Representations (1)

DRM413H1 - Advanced Voice and Movement

Hours: 12T/48P

Voice and Movement is a skill-developing companion to the DRM400H1 training for performers. It exposes students to a wide range of voice and movement techniques and explores a heightened use of physicality, voice and speech.

Prerequisite: Minimum 70% in required courses: DRM220Y1/DRM230Y1; DRM300Y1

Corequisite: DRM403Y1 or permission of the Centre

Distribution Requirements: Humanities

Breadth Requirements: Creative and Cultural Representations (1)

DRM420H1 - Arts and Politics: Bertolt Brecht, Giorgio Strehler, Robert Wilson and Robert Lepage

Previous Course Number: JDC410H1

Hours: 36L

Bertolt Brecht played a specific role in the paradigm shift of the art which began at the end of the 19th century. He advanced this change by trying to connect art to its social and political functions and structure with the positive acceptance of the industrial revolution and by trying to transform it with the help of the new technological media.

Prerequisite: 9 FCE; DRM220Y1/DRM230Y1 or DRM320H1; Specialist or Major in Drama

Exclusion: JDC410H1

Distribution Requirements: Humanities

Breadth Requirements: Creative and Cultural Representations (1)

DRM428H1 - Advanced Playwriting

Hours: 12T/36P

A continuation of DRM328H1, concentrating upon the in-depth knowledge and practice of playwriting with an emphasis on advanced style and technique of writing for the stage. Students develop their own longer work through in-class exercises, one major written assignment, and the final public presentation. Please consult the CDTPS undergraduate web page for information on how to apply.

Prerequisite: Minimum 70% in required courses: DRM220Y1/DRM230Y1, DRM328H1 and a portfolio of writing samples due in November.

Distribution Requirements: Humanities

Breadth Requirements: Creative and Cultural Representations (1)

DRM431H1 - Advanced Dramaturgy

Hours: 36L

A continuation of DRM331H1 Dramaturgy. Students will be provided with finer conceptual tools with which to approach DRM402H1 Advanced Directing and DRM403Y1 Mainstage Performance.

Prerequisite: DRM220Y1/DRM230Y1; DRM331H1

Distribution Requirements: Humanities

Breadth Requirements: Creative and Cultural Representations (1)
DRM454H1 - Advanced Design

Hours: 36L/36P

An advanced-level exploration of theatrical design skills and techniques, delving deeper into specific areas of specialization and with more opportunity for independent work. Students are expected to participate in Drama Centre productions in senior creative and leadership roles. Applications are required in order to enroll in this course. Please consult the CDTPS Application Guidelines for specific procedures and deadlines.

Prerequisite: Minimum 70% in required courses: DRM220Y1/DRM230Y1; DRM354H1/DRM354Y1; and an interview.

Distribution Requirements: Humanities

Breadth Requirements: Creative and Cultural Representations (1)

DRM455H1 - Advanced Production

Hours: 36L/36P

An advanced-level exploration of production skills and techniques, delving deeper into specific areas of specialization and with more opportunity for independent work. Students are expected to participate in Drama Centre productions in senior creative and leadership roles. Applications are required in order to enroll in this course. Please consult the CDTPS Application Guidelines for specific procedures and deadlines.

Prerequisite: Minimum 70% in required courses: DRM220Y1/DRM230Y1; DRM355Y1; and an interview.

Distribution Requirements: Humanities

Breadth Requirements: Creative and Cultural Representations (1)

DRM458H1 - Senior Seminar in Drama, Theatre and Performance Studies

Hours: 36L

An in-depth examination of selected issues in the theatre at the 400 level. Special Topics vary for Breadth distribution depending on the course content and therefore may be counted towards Groups A or B. Please consult the Undergraduate Drama office or check the program’s website for more details.

Prerequisite: Specialist or Major in Drama; 14 FCE; DRM220Y1/DRM230Y1.

Distribution Requirements: Humanities

DRM485Y1 - Senior Seminar: Drama, Theatre and Performance Studies Thesis

Hours: 72L

Research thesis, emphasizing topics and methods used in drama, theatre and performance studies. Students must obtain permission from the instructor by submitting a research project proposal. The project may engage creative practice, but the thesis itself will be a critical, written work engaging the research and dramaturgy involved in the performance or artwork. Not eligible for CR/NCR option. Deadline is March 10th to apply. See online application for details.

Prerequisite: Specialist or Major in Drama; 14 FCE; Minimum 70% in required courses: DRM220Y1/DRM230Y1; and an interview.

Distribution Requirements: Humanities

Breadth Requirements: Creative and Cultural Representations (1); Society and its Institutions (3)

DRM486H1 - Senior Seminar in Drama, Theatre and Performance Studies

Hours: 36P

An in-depth examination of selected issues in the theatre at the 400 level. Special Topics vary for Breadth distribution depending on the course content and therefore may be counted towards Groups A or B. Please consult the Undergraduate Drama office or check the program’s website for more details.

Prerequisite: Specialist or Major in Drama; 14 FCE; DRM220Y1/DRM230Y1.

Distribution Requirements: Humanities

DRM487H1 - Senior Seminar in Drama, Theatre and Performance Studies

Hours: 36L

An in-depth examination of selected issues in the theatre at the 400 level. Special Topics vary for Breadth distribution depending on the course content and therefore may be counted towards Groups A or B. Please consult the Undergraduate Drama office or check the program’s website for more details.

Prerequisite: Specialist or Major in Drama; 14 FCE; DRM220Y1/DRM230Y1.

Distribution Requirements: Humanities
DRM488H1 - Senior Seminar in Drama, Theatre and Performance Studies

Hours: 36L

An in-depth examination of selected issues in the theatre at the 400 level. Special Topics vary for Breadth distribution depending on the course content and therefore may be counted towards Groups A or B. Please consult the Undergraduate Drama office or check the program’s website for more details.

Prerequisite: Specialist or Major in Drama; 14 FCE; DRM220Y1/DRM230Y1.
Distribution Requirements: Humanities

DRM490Y1 - Independent Studies in Drama, Theatre and Performance Studies

A scholarly project at the 400 level proposed by the individual student in conversation with a member of faculty who is willing to act as supervisor. Not eligible for CR/NCR option.

Prerequisite: 14 FCE; Specialist or Major in Drama; Minimum 70% in DRM220Y1/DRM230Y1; A written proposal; Independent study form signed by both student and faculty instructor to be submitted for approval to the Associate Director (undergraduate) before registration: August 1st for September start date; November 1st for January start date.
Distribution Requirements: Humanities

DRM491H1 - Independent Studies in Drama, Theatre and Performance Studies

A scholarly project at the 400 level proposed by the individual student in conversation with a member of faculty who is willing to act as supervisor. Not eligible for CR/NCR option.

Prerequisite: 14 FCE; Specialist or Major in Drama; Minimum 70% in DRM220Y1/DRM230Y1; A written proposal; Independent study form signed by both student and faculty instructor to be submitted for approval to the Associate Director (undergraduate) before registration: August 1st for September start date; November 1st for January start date.
Distribution Requirements: Humanities
Introduction

Do you like sciences but have a hard time choosing which one to pursue? Can you picture yourself performing experiments in the lab, or collecting data in the field, or developing and testing models on a computer? Then Earth Sciences is the discipline for you. It is the study of physical, chemical, and biological processes over a wide range of temporal and spatial scales in earth and planetary systems.

Our department offers various programs:

The three specialist programs – Geology, Environmental Geoscience, and Geophysics (offered in collaboration with the Department of Physics) – give students the skills to enter graduate studies and also allow them to become professional “geoscientists in training” after graduation. The Geology specialist program focuses on processes of the solid planetary bodies, including volcanoes, sedimentary environments, mountain building, the formation of minerals or ores, and Earth through time. The Environmental Geosciences specialist program in addition addresses processes related to groundwater and biochemical activities. The Geophysics specialist program allows students to model physical processes in and on Earth and other planets and to apply non-invasive methods of imaging the subsurface, often in 4D (i.e., space and time); targets may range from archaeological investigations to groundwater imaging and mineral exploration, but also include modeling of mountain-building processes and planetary magnetic fields.

The Geoscience Major program builds on a set of core courses and allows students to select elective courses that match their particular interests. Students have paired this program not just with other science programs but such diverse fields as geography, archaeology, economics, history, political science, or peace and conflict studies.

The Geoscience Minor program provides an introduction to Earth science topics and thinking.

The new major called “Earth and Environmental Systems” takes a holistic approach to understanding how the Earth system works and how it has evolved over tens to millions and billions of years. This requires understanding the dynamics and interactions of all aspects of the system (solid Earth, ocean, atmosphere, and biosphere) and provides the larger context at a time when climate change, resource consumption and global pollution weigh heavily on people and societies.

Our programs emphasise hands-on lab and field work. At least one field course is required in each program, and several courses have offered optional one-day to two-week long trips. In recent years courses have travelled to Newfoundland, Texas, Arizona, Hawaii, Chile, and New Zealand, and small groups of undergraduates have been involved with field research in Turkey, Peru, Greece and South Africa. These field training opportunities foster the establishment of
Earth Sciences Programs

Environmental Geosciences Specialist (Science Program) (Science Program) - ASSPE1253

Description:

The Environmental Geosciences specialist program explains the interconnectedness within the Earth system (biosphere, hydrosphere, atmosphere, and geosphere), measures and models processes related to groundwater and biochemical activities, and assesses the effects of human activities on our geological surroundings.

Jointly sponsored by the School of the Environment and the Department of Earth Sciences. Topics include earth materials, sedimentary geology, aqueous geochemistry, hydrogeology and biogeochemistry. For more information, please contact the Department of Earth Sciences, undergradchair@es.utoronto.ca. Students should note that under the Professional Geoscientists Act of 2000, individuals practicing Environmental Geoscience in Ontario require education that fulfills APGO knowledge requirements (see note below) or a P.Eng.

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

(12 full courses or their equivalent which includes fulfillment of the Faculty’s Distribution requirement, including at least one FCE from 400-series courses)

1st year required courses (2 FCE): CHM151Y1/(CHM135H1, CHM136H1), MAT135H1, PHY131H1/PHY151H1

1st year elective courses: 1 FCE from MAT136H1, PHY132H1, PHY152H1, ENV237H1/ENV238H1, BIO120H1, CSC108H1/CHM135H1, JEG100H1

2nd year required courses (2 FCE): ESS241H1, ESS223H1, ENV233H, ESS262H1, GGR201H1

2nd year elective courses: 1 FCE from ESS224H1, ESS262H1, ESS261H1, STA220H1/GGR270H1, CHM210H1, MAT221H1/MAT223H1: up to 0.5 FCE of this requirement can be satisfied by taking one of the following ethics courses: IMC200H1/PHL273H1/PHL275H1/ABS201Y1

3rd and 4th year required courses (2 FCE): ESS311H1, ESS312H1, ESS410H1, ESS461H1

3rd and 4th year elective courses: 4 FCE from JGA305H1, ESS234H1, ESS330H1, ESS331H1, ESS361H1, ESS362H1, GGR337H1, GGR390H1, ENV333H1, ESS431H1, ESS441H1, ESS445H1, ESS450H1, ESS462H1, ESS463H1, ESS464H1, ESS490H1, ESS491H1/ESS492Y1

Other courses which might of interest: ESS391H1, ESS392Y1, ESS381H1, ESS481H1

If you plan to become APGO certified, we suggest you consider the following courses to fulfill minimum qualifications. This list comprises courses which are required for the specialist as well as suggested courses; together they fulfill groups 1A, 1B, 2A and 2B of the APGO requirements and add up to 13.5 FCE:

Group 1A: CHM135H1, MAT135H1, PHY131H1

Group 1B: BIO120H1, MAT136H1, CHM136H1, PHY132H1, STA220H1, CSC108H1/ESS345H1

Group 2A: ESS224H1, ESS241H1, ESS234H1/ESS330H1, ESS331H1

Group 2B: ESS223H1/ENV233H, ESS312H1, GGR201H1, GGR337H1, JGA305H1

Group 2C: 4.5 FCE of 200/300/400 level ESS or other allowable courses

All students, regardless of their career aspirations, are encouraged to talk to the undergraduate chair about their selection of electives.

Geology Specialist (Science Program) - ASSPE0509

Description:

This program gives the deepest level of education within the field of geology, preparing students for a career in the energy and mineral resources sector or as a government-employed geologist. The program meets the requirements for gaining membership in the Association of Professional Geoscientist of Ontario (APGO) and similar organizations in other Canadian provinces and territories. The Geology Specialist Program focuses on core geology subjects, such as mineralogy and petrology, sedimentology, structural geology, mineral resources and geologic field mapping. Students are advised to be aware of course prerequisites, check clusters of courses listed for the Geology Specialist program, and consult the Earth Sciences Undergraduate Handbook for logical course progressions. For further questions, please consult with the Student Affairs Coordinator (Scott Moore, Department of Earth Sciences, 22 Russell St. Earth Sciences Center, Room 1062 email: ugrad@es.utoronto.ca)

Keywords: Geology, Petrology, Energy and Mineral Resources
Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

14 full courses or their equivalent to be chosen according to this list:

**Compulsory Foundation Sciences (1.5 FCE):**

CHM135H1, MAT135H1, PHY131H1

**Additional Foundation Sciences (3 FCE):**

Any six half-courses from the following, with no more than two half courses from the same category:

- Biology: BIO120H1, BIO130H1
- Computer Science: CSC108H1, CSC148H1, ESS345H1
- Chemistry: CHM136H1, CHM220H1, CHM222H1
- Math: MAT136H1, MAT221H1
- Physics: PHY132H1, PHY152H1
- Statistics: STA220H1/GGR270H1/STA247H1/STA257H1/STA248H1/STA261H1

**Compulsory Foundation Geosciences (3.5 FCE):**

- Field techniques: ESS234H1
- Mineralogy and Petrology: ESS222H1/ESS224H1
- Sedimentation and Stratigraphy: ESS331H1
- Structural Geology: ESS241H1
- Additionally: ESS262H1, ESS221H1/ESS321H1, ESS324H1

**Additional Foundation Geosciences (2.5 FCE):**

At least one, but no more than two courses from each subgroup:

- Geochemistry and Geophysics: ESS223H1, JGA305H1
- Mineralogy and Petrology: ESS322H1, ESS323H1
- Sedimentology, Glacial Geology, Geomorphology, Remote Sensing: ESS431H1, GGR201H1, GGR301H1, GGR337H1

**Other Geosciences (3.5 FCE):**

A minimum of 7 courses from the following list that have not been used to fulfill the above requirements. At least two need to be at the 400 level, and no more than 3 from the 200 level.

- Second-year courses: ENV234H1, ESS223H1, ESS261H1, GGR201H1, GGR205H1, GGR206H1, GGR272H1, GGR273H1
- Third-year courses: ESS311H1, ESS312H1, ESS323H1, ESS324H1, ESS345H1, ESS362H1, ESS381H1, ESS391H1, ESS392Y1, GGR301H1, GGR337H1, JGA305H1, JPE395H1
- Fourth-year Courses: ESS410H1, ESS423H1, ESS425H1, ESS431H1, ESS441H1, ESS445H1, ESS450H1, ESS461H1, ESS481H1, ESS490H1, ESS491H1/ESS492Y1

Notes:

1. Advanced courses, like CHM151Y1, PHY151H1, MAT137Y1 or MAT157Y1, can be used as credits for both foundation sciences sections, meaning half of the credit will count for Compulsory Foundation Sciences, and the other half will count for Additional Foundation Sciences.
2. You may choose more than 2.5 FCE from the Additional Foundation Geosciences list. In that case, the additional courses will count towards the Other Geosciences.
3. You need a minimum of 4.0 FCE of 300/400-level courses.
4. Students are advised to check the prerequisites of the upper-year courses when deciding on their 2nd and 3rd-year-course selection.
5. Students who do not wish to attain APGO certification are advised to speak to the Associate Chair Undergraduate Affairs concerning their course selection.

Recommended Course Combinations:

Students interested in Mineral Exploration:

First Year: BIO120H1, CHM135H1, CHM136H1, MAT135H1, MAT136H1, PHY131H1, PHY132H1

Second year: ESS223H1, ESS224H1 or ESS221H1 and ESS222H1, ESS234H1, ESS241H1, ESS262H1, STA220H1

Third Year: ESS331H1, ESS321H1, ESS322H1, ESS323H1, ESS345H1, JGA305H1, ESS311H1, ESS324H1

Fourth Year: ESS423H1, ESS431H1, ESS441H1, ESS461H1, ESS490H1, ESS491H1, ESS492Y1

Students with an interest in GIS:

First Year: CHM135H1, CHM136H1, MAT135H1, PHY131H1, PHY132H1, CSC108H1

Second year: STA220H1, ESS223H1, ESS224H1, ESS234H1, ESS241H1, ESS262H1, GGR272H1, GGR273H1, MAT221H1

Third Year: ESS311H1, ESS312H1, ESS321H1, ESS322H1, ESS331H1, JGA305H1, GGR337H1, ESS323H1, ESS324H1

Fourth Year: ESS431H1, ESS490H1, ESS491H1, ESS492Y1

Geophysics Specialist (Science Program) - ASSPE1650

Description:

The Geophysics specialist program allows students to model physical processes in and on Earth and other planets and to apply noninvasive methods of imaging the subsurface, often in 4D (i.e., space and time); targets may range from archaeological investigations to groundwater imaging and mineral exploration, but also include modeling of mountain-building processes and the exploration of planetary surfaces instead. Students are advised to be aware of course prerequisites, and consult the Earth Sciences Undergraduate Handbook. For further questions, please consult with the Student Affairs Coordinator (Scott Moore, Department of Earth Sciences, 22 Russell St. Earth Sciences Center, Room 1062 email: ugrad@es.utoronto.ca).
Earth Sciences

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

Consult Departments of Earth Sciences and Physics

(13.5 to 14 full courses or their equivalent with at least one course at the 400-level)

9.0 FCEs core courses:

100-level: PHY131H1/PHY151H1, PHY132H1/PHY152H1; (MAT135H1, MAT136H1)/MAT137Y1

200-level: PHY250H1, PHY254H1; MAT235Y1/MAT237Y1; ESS224H1, ESS241H1

300-level: JPE395H1; JGA305H1

400-level: PHY408H1, JPE493H1, ESS452H1; ESS441H1, ESS445H1, ESS450H1

0.5 to 1.0 FCEs ethics course chosen from the following list:

JPH441H1, ENV333H1, IMC200H1, PHL273H1, PHL275H1, INS201Y1

4.0 to 4.5 additional FCEs chosen from Groups A, B, and/or C:

Group A -- courses required and relevant for professional registration (APGO):

CHM135H1; ESS345H1/CSC108H1; STA220H1/GGR270H1; MAT223H1, MAT244H1/APM346H1; ESS331H1

Group B -- emphasis on physics (suitable for graduate school preparation in a physics program):

PHY252H1, PHY350H1, PHY354H1, PHY392H1, PHY454H1, PHY495H1

Group C -- other relevant courses:

PHY224H1, MAT224H1, MAT335H1, APM346H1, ESS211H1, ESS311H1, ESS312H1, ESS321H1, ESS322H1, ESS323H1, ESS324H1, ESS343H1, ESS344H1, ESS330H1, ESS410H1, ESS490H1, ESS491H1, ESS492Y1, ESS381H1, ESS391H1, ESS392Y1, ESS481H1

Earth Systems and Environmental

Description:

In the Earth and Environmental Systems Major, students use multidisciplinary approaches to studying the large-scale interactions between the Earth and planetary systems over a broad spectrum of time-scales, addressing deep timescales of millions to billions of years as well as processes taking place in today’s and in future worlds. Courses take an integrative approach to understanding interactions between the solid Earth, the biosphere, the atmosphere and the hydrosphere, addressing how these interactions have developed over geological, historical, and recent time periods.

Themes of the program include Earth surface processes (e.g., evolution of landforms and sedimentary basins), paleoclimatology (e.g., drivers of Earth’s natural climate variability), biogeochemistry, Quaternary science (understanding the ice ages) and global environmental change. This program provides broad context over time and space to better understand and provide solutions for the current issues of climate change, resource consumption and global pollution weighing heavily on people and societies. Students are advised to check course prerequisites, to review the clusters of courses listed for the geoscience major program, and to consult the Earth Sciences Undergraduate Handbook for logical course progressions. For further questions, please contact the Student Affairs Coordinator (Scott Moore, Department of Earth Sciences, 22 Russell St. Earth Sciences Center, Room 1062 email: ugrad@es.utoronto.ca).

Keywords: Geoscience, Geology, Earth Sciences, Earth History, Evolution, Chemistry, Physics, Biology

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

(8 full courses or their equivalent including at least 2.0 FCE at 300+ series with at least 0.5 FCE at 400 level series.)

1. 2.0 FCE foundation science courses: 2.0 FCE selected from JEG100H1/ESS102H, BIO120H1/BIO130H1, CHM135H1/CHM139H, CHM136H1/CHM138H, PHY131H1, PHY132H1, MAT135H1, ENV237H1/ENV238H1

2. 3.0 FCE ESS core courses:

- 1.0 FCE at 200 level chosen from the following courses: ESS224H1, ESS241H1, ESS262H1
- 1.0 FCE at 300 level: ESS345H1, ESS361H1/ESS362H1/GGR305H1
- 0.5 FCE field course: ESS410H1/ESS450H1/GGR390H1
- 0.5 FCE capstone course: ESS461H1/ESS462H1/ESS463H1/ESS464H1

3. 3.0 FCE elective courses:

In addition to the above core courses, you need to take 3 FCE electives. This requirement can be satisfied by any of the Earth Sciences Courses listed in categories A to F below. The following clusters of courses are neither mutually exclusive nor meant to limit choice but intended to show logical course complements. These are not POSt requirements; rather the clusters are presented to aid students in course selection according to their interests.

Strongly recommended: ESS224H1

a) Earth Surface Processes

ESS224H1, ESS241H1, ESS311H1, ESS331H1, ESS445H1, GGR201H1, GGR205H1, GGR272H1

b) Paleoclimate

ESS261H1, ESS331H1, ESS361H1, ESS362H1, ESS461H1, ESS464H1, ENV234H1, GGR305H1
c) Biogeochemistry

ESS233H1/ENV233H, ESS311H1, ESS312H1, ESS362H1, ESS410H1, ESS462H1

d) Global Environmental Change

ESS362H1, ESS462H1, ESS463H1, GGR203H1, GGR314H1, PHY392H1

e) Quaternary Science

ESS224H1, ANT314H1, ANT315H1, ANT409H1, ANT419H1, ESS461H1

f) Other Relevant Courses

ESS261H1, JGA305H1, ESS321H1, ESS322H1, ESS323H1, ESS450H1, GGR337H1, ENV337H1, JSC301H1, ESS381H1, ESS389Y0, ESS418H1, ESS490H1, ESS491H1/ESS492Y1

Geoscience Major (Science Program) - ASMAJ0509

Description:

The study of Earth Sciences integrates many of the classical sciences like chemistry and physics and applies their principles to a diverse range of processes. The major program aims to give students exposure to the traditional geoscience curriculum (Mineralogy, Petrology, Geological structures and Maps, Field Techniques etc.). Students wishing for a more customized degree, should explore the Earth and Environmental Systems Major. Students are advised to be aware of course prerequisites, check clusters of courses listed for the geoscience major program, and consult the Earth Sciences Undergraduate Handbook for logical course progressions. For further questions, please consult with the Student Affairs Coordinator (Scott Moore, Department of Earth Sciences, 22 Russell St. Earth Sciences Center, Room 1062 email: ugrad@es.utoronto.ca).

Keywords: Geology, Paleontology, Earth History, Evolution

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

(4 full courses or their equivalent including at least one full course equivalent at the 300+ level)

1. CHM136H1 (CHM138H1)
2. ENV233H1, ESS221H1, ESS222H1, ESS311H1, ESS312H1, ESS410H1

Environmental Geosciences Minor (Science Program) - ASMIN1253

Enrolment Requirements:

Admission to the Environmental Geosciences Minor has been administratively suspended as of 1 April 2015 and is no longer admitting students. Students presently enrolled in the minor will be able to complete the program requirements as described below.

Completion Requirements:

(4 full courses or their equivalent; must include at least one full course equivalent at the 300+ level)

1. CHM136H1 (CHM138H1)
2. ENV233H1, ESS221H1, ESS222H1, ESS311H1, ESS312H1, ESS410H1

Geoscience Minor (Science Program) - ASMIN0509

Description:

The study of Earth Sciences (or "Geology" to use the Greek term) integrates the classical sciences of chemistry, physics and biology, and applies their principles to a diverse range of processes on Earth and other planets, from landform evolution to plate tectonics all the way to the origin and evolution of life and geomicrobiology. The Geoscience Minor program aims to give students as much leeway as possible to choose particular interests within the diverse and dynamic field of Earth Sciences. Students are advised to check course prerequisites, to review the clusters of courses listed for the geoscience major program, and to consult the Earth Sciences Undergraduate Handbook for logical course progressions. For further questions, please contact the Student Affairs Coordinator (Scott Moore, Department of Earth Sciences, 22 Russell St. Earth Sciences Center, Room 1062 email: ugrad@es.utoronto.ca).

Keywords: Geology

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.
Completion Requirements:

(4 full courses or their equivalent, with at least 1.0 FCE at 300+ series.)

1. 1.0 FCE of 100-series CHM, BIO, MAT or PHY courses.

2. 2.0 FCE of 100- or 200-level ESS courses (excluding ESS103H1, ESS104H1, ESS105H1, and ESS205H1). It is however recommended to include at least ESS262H1/ENV234H1/ JEG100H1 and ESS224H1.

3. 1.0 FCE of 300/400 level ESS/JGA courses.

Be aware of course prerequisites, check clusters of courses listed for the geoscience major program, and consult the geology undergraduate handbook for logical course progressions.

Earth Sciences Courses

ESS103H1 - Geology in Public Issues

Hours: 24L

Geologic hazards: earthquakes, volcanoes, landslides, tsunamis. The distribution and politics of natural resources, including petroleum and ore deposits. Nuclear power and nuclear waste disposal. Global change: the geologic record of hot and cold climates, and how the earth survives. ESS103H1 is primarily intended as a science Distribution Requirement course for Humanities and Social Science, it will be taught in odd years.

Exclusion: GLG103H1, ERS103H5
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes
(5)

ESS104H1 - Controversies in Earth Science

Hours: 24L

The evolution of ideas about the origin and development of the earth from the Athenians to the 20th Century, with attention on the age of earth; on the evolution and disappearance of species; on the origin of oceans, continents and mountains; on climate change; and on the courage of scientists in confronting the religious and political views of their time. ESS104H1 is primarily intended as a science Distribution Requirement course for Humanities and Social Science students. Taught in even years.

Exclusion: GLG105H1
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes
(5)

ESS105H1 - Our home planet

Hours: 24L

The nature and evolution of the Earth; plate tectonics; rocks and minerals; volcanism; geological time; fossils; geology of Ontario; environmental issues; and human interactions with the planet. ESS105H1 is primarily intended as a science Distribution Requirement course for Humanities and Social Science students.

Exclusion: GLG110H1, EESA06H3
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes
(5)
ESS196H1 - Life and Death in the Solar System

Previous Course Number: PMU199H1
Hours: 24L

Earth is the only planet in the solar system known to support life. Through directed readings, seminars, videos and lab visits, participants in this course will work with instructors whose own research tackles important questions concerning the origin of life on earth; the limits to life on this planet; implications for life under extreme conditions elsewhere in the solar system; and the life cycles of the planets themselves. The course will involve reading of scientific literature, student-led discussions, oral presentations and research projects, as well as potential field trips to sites in Southern Ontario. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

ESS197H1 - Earth and Life through Time

Previous Course Number: PMU199H1
Hours: 24L

This seminar will look through the lens of earth history to explore drivers of change in the biosphere and the impacts of these changes. We will focus on episodes of mass extinction, and the spectacular landscape changes and speciation events which often followed. Abrupt or gradual climatic changes, massive volcanism, asteroid impacts, catastrophic carbon releases, and human activity will be evaluated as the causes of major extinction events in Earth history. The course will involve reading of scientific literature, student-led discussions, oral presentations and research projects, as well as potential field trips to sites in Southern Ontario. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

ESS198H1 - Resources and Sustainability

Previous Course Number: PMU199H1
Hours: 24L

The rise of humanity is intricately linked to the exploitation of natural resources. From its earliest attempts to use fire and extract metals from rocks, to coal-fired steam that brought the industrial revolution, hydrocarbons that fuel international travel and trade, nuclear energy to produce electricity, and the reliance on smartphones in our daily lives, the planet’s resources have brought innovation and problems and require us to ask questions regarding sustainability. This course will explore the gamut from resource extraction and trading, to its societal consequences including global politics, environmental pollution, and remediation. The course will involve reading of scientific literature, student-led discussions, oral presentations and research projects, and potentially field trips to sites in Southern Ontario. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

ESS199H1 - Earth, Portrait of a Planet

Hours: 24L

Modern Earth Sciences touches on virtually all aspects of modern life, from the atmosphere to large scale natural disasters. This course will explore how earth sciences has shaped our society and our understanding of the earth as a system. Potential course topics include (but are not limited to) the great climate change crisis and what we know about climate change in the past to the literally earth moving ideas of plate tectonics (and the associated natural disasters). The course will involve reading of scientific literature, student-led discussions, oral presentations and research projects. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

ESS205H1 - Confronting Global Change

Hours: 24L/8T

The emergence of society as a major geological force is considered in terms of the evolving debate about the consequences of human activity for the habitability of our planet. Major issues such as climate change, environmental pollution, and depletion of natural resources are examined.

Prerequisite: Completion of at least 4.0 credits
Exclusion: GLG205H1, ERS321H5, ENV200H1, EEB208H1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)
ESS223H1 - Earth System Chemistry 1: Earth Materials

Previous Course Number: ENV233H1
Hours: 24L/24T

This course introduces students to the basic principles of geochemistry beginning with some fundamental chemical concepts concerning atoms, bonding and the periodic table. It continues with an overview of the wide ranging geochemical fields and concepts such as elemental distributions, fractionation and differentiation, and trace element cycling. The latter half of the courses leads into an introduction to basic thermodynamics as it applies to more advanced geochemical concepts found in aqueous geochemistry, mineralogy and petrology.

Prerequisite: MAT135H1, MAT136H1, CHM135H1
Exclusion: ENV233H1
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

ESS224H1 - Introduction to Mineralogy and Petrology

Hours: 24L/48P

An introduction to atomic structure, chemistry, physical properties, and geological significance of rock-forming minerals and rocks. Field techniques and core concepts to identify important minerals and rocks in hand specimens and place them into their geological context. The development of practical skills is emphasized.

Recommended Preparation: CHM135H1, PHY131H1, MAT135H1.
For Mineral Engineering students, recommended preparation is MAT186H1 and CHE112H1.
Exclusion: ESS222H1, JEG100H1
Recommended Preparation: JEG100H1/ESS262H1
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

ESS234H1 - Introduction to Geological Field Methods

Previous Course Number: ESS330H1

A two-week field course in early May or late August. Students are introduced to field geology and to basic field measurement, mapping and documentation techniques (for example in the Espanola - Manitoulin Island area, west of Sudbury). Students are responsible for the cost of board and lodging and transport to and from the field area. Not eligible for CR/NCR option. Note: Enrollment is handled by the department. For registration deadlines, additional fees associated with the field course, course dates, and special registration requirements, please consult the departmental announcements or inquire with ugrad@es.utoronto.ca.

Prerequisite: ESS224H1/ESS222H1, ESS241H1, ESS262H1/JEG100H1
Exclusion: ESS330H1, GLG340H1
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

ESS241H1 - Geologic Structures and Maps

Hours: 24L/36P

Field observations, description and classification of geological structures: stratigraphic and intrusive contacts, unconformities; relative age determination; folds and fold systems; faults and fault systems; boudinage, foliations and lineations; spherical projections and mechanical principles (stress, strain, rheology). Practical work focuses on reading geological maps, constructing cross-sections, and interpreting both in terms of geological processes and histories.

Exclusion: GLG345H1, EESC37H3
Recommended Preparation: JEG100H1/ESS262H1
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

ESS261H1 - Earth System Evolution

Hours: 24L/36P

Interrelationships between Earths atmosphere, hydrosphere, geosphere and biosphere through time; including patterns of evolution and extinction as they are related to changes at the earth's surface and recorded in the rock record. Laboratories cover major groups of fossils, their classification, use in biostratigraphy, and living analogues. NOTE: ESS261H1 and ESS262H1 may be taken in either order; and both are required for advanced courses.

Exclusion: GLG217H1
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)
ESS262H1 - Earth System Processes

Hours: 24L/24P

An introduction to how our planet works, focusing on physical processes that govern the nature and composition of Earth with an emphasis on the dynamic nature of the planet. Topics include surface processes (e.g., weathering and erosion, ocean and atmospheric circulation, weather and climate), crustal processes (e.g., plate tectonics, earthquakes, volcanoes, biogeochemical cycles), and earth-environment interactions (e.g., natural hazards, resource development, and sustainability).

Recommended Preparation: PHY131H1/CHM138H1/BIO120H1. For Mineral Engineering students, recommended preparation is MAT186H1 and CHE112H1.

Distribution Requirements: Science

Breadth Requirements: The Physical and Mathematical Universes (5)

ESS99Y1 - Research Opportunity Program

Credit course for supervised participation in faculty research project. Details at https://www.artsci.utoronto.ca/current/academics/research-opportunities/research-opportunities-program. Not eligible for CR/NCR option.

Distribution Requirements: Science

JGA305H1 - Environmental and Archaeological Geophysics

Hours: 24L/12P

Application of near-surface geophysical methods to investigate environmental and archaeological sites; in particular magnetometry, resistivity, ground-probing radar, and seismic surveys. Course will cover background on the various methods, and allow students to run field surveys and present on case studies.

Prerequisite: ESS241H1 or ANT200Y1 or GGR201H1

Distribution Requirements: Science

Breadth Requirements: The Physical and Mathematical Universes (5)

ESS311H1 - Earth System Chemistry 2: Aqueous Geochemistry

Hours: 24L/24P

An introduction to aqueous environmental geochemistry emphasising the importance of chemical equilibria, mass transport, and microbiological activity in regulating the chemical composition of natural and contaminated systems.

Prerequisite: ESS23H1/ENV233H1

Exclusion: GLG351H1

Distribution Requirements: Science

Breadth Requirements: The Physical and Mathematical Universes (5)

ESS312H1 - Hydrogeology

Hours: 24L/24P

Groundwater flow, the role of groundwater in geologic processes, and physical, chemical and biological constraints on contaminant source transport and attenuation.

Prerequisite: ESS311H1

Exclusion: GLG450H1

Distribution Requirements: Science

Breadth Requirements: The Physical and Mathematical Universes (5)

ESS321H1 - Mineralogy

Previous Course Number: ESS221H1

Hours: 24L/36P

Systematic mineralogy (including identification, classification, and description); physical and chemical properties of minerals; crystallography and crystal systems (symmetry, crystal structure, crystal systems); optical techniques in mineral identification.

Prerequisite: ESS224H1, ESS234H1

Distribution Requirements: Science

Breadth Requirements: The Physical and Mathematical Universes (5)
ESS322H1 - Igneous Petrology

Hours: 24L/36P

An overview of the nature and origin of igneous rocks, with particular emphasis on the interpretation of textures and mineral assemblages as they reflect rock-forming processes. Topics include the physical and chemical properties of magma, origin, and evolution of different magmatic series in specific igneous/tectonic environments, geochemical and isotopic characteristics of igneous rocks, and the assimilation, fractionation & crystallization processes.

Prerequisite: ESS224H1, ESS234H1, ESS321H1/ESS221H1
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

ESS331H1 - Sedimentation and Stratigraphy

Hours: 24L/36P

Formal principles of stratigraphy, types of stratigraphic unit, methods of dating and correlation (biostratigraphic methods, magnetostratigraphy, radiometric dating). Methods of study in surface and subsurface (outcrop measurement, elemental introduction to wireline logs, seismic methods). The principles of facies analysis; sediment transport - sedimentary structures, the flow regime, and sediment gravity flows. The carbonate factory and carbonate rock classification. Trace fossils. Laboratory exercises in understanding facies mapping, isopachs and isolith maps.

Prerequisite: ESS224H1
Exclusion: GLG360H1, ERS313H5
Recommended Preparation: ESS222H1, ESS234H1/ESS330H1
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

ESS323H1 - Metamorphic Petrology

Hours: 24L/36P

This course provides a basic understanding of the formative processes of metamorphic rocks through quantitative applications of simple thermodynamic and kinetic principles. Topics include processes of heat and mass transport in orogenic belts, fluid-rock interaction in metasomatic systems, pressure-temperature-time paths of metamorphic rocks, temporospatial patterns of metamorphism through geologic time, and metamorphism in extreme conditions.

Prerequisite: (ESS224H1, ESS234H1, ESS321H1, ESS322H1) or (ESS221H1, ESS222H1, ESS234H1)
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

ESS345H1 - Computational Geology

Hours: 24L/1T/24P

A practical introduction to programming. This course will teach an operational knowledge on how to write and execute self written computer programs. Course topics touch upon using a computer without a graphical interface, using an integrated development environment, programming, documenting, debugging, reading and writing data, graphical output, how to navigate existing documentation and internet resources, and last but not least how to effectively ask for help. Students will work individually and in small groups in an inverted classroom setting on earth science related problem sets. Previous programming experience is not required, however curiosity, independence and perseverance are mandatory.

Prerequisite: 2 FCEs from first-year math, chemistry or physics courses; 2 FCEs of earth sciences courses
Exclusion: GLG204H1
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

ESS324H1 - Advanced Geological Field Methods

Previous Course Number: ESS420H1

A two-week advanced geological mapping project in a challenging field environment. Students learn to compile existing geoscience data, create a geological map and prepare a professional final report on their activities and findings. Not eligible for CR/NCR option. For registration deadlines, additional fees associated with the field course, course dates, and special registration requirements, please consult the departmental announcements or inquire with ugrad@es.utoronto.ca.

Prerequisite: ESS322H1, ESS234H1/ESS330H1
Exclusion: ESS420H1, GLG445H1
Recommended Preparation: ESS323H1
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)
ESS361H1 - Atmosphere-Biosphere Interact

Hours: 24L

Theory on the exchange of energy and matter (carbon, water) between the land surface and atmosphere, with a focus on the implications of ecosystem-level processes for regional micrometeorology. Examples will be taken from research on contemporary as well as palaeoclimate systems. Case studies to include how changes in vegetation type alter surface radiation balance, hydrological cycling and heat transfer in soils. There is no formal textbook for this course. Lecture material will be augmented with assigned readings from the scientific literature.

Prerequisite: 8.0 FCE`s, including 1 FCE from PHY131H1/PHY132H1/CHM135H1/CHM136H1/CHM138H1/CHM139H1/MAT135H1/MAT136H1
Exclusion: GGR303H1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

ESS362H1 - Oceanography

Hours: 24L/24P

An introduction to the physical, geological, chemical, and biological processes governing the world's oceans. The course emphasizes critical thinking, environmental issues, and interrelationships among scientific disciplines.

Prerequisite: 8.0 FCE
Recommended Preparation: 1.0 FCE from ESS102H1/PHY131H1/PHY132H1/CHM135H1/CHM136H1/CHM138H1/CHM139H1/BIO120H1/MAT135H1/MAT136H1
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

ESS381H1 - Special Topics in Earth Science

Hours: 24L/24P

A survey of current thinking in Earth science. Topics may include isotope geochemistry, ore genesis, or planetary remote sensing.

Prerequisite: minimum of 1.0 credits in ESS at the 200+level
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

ESS391H1 - Directed Studies

An individual study program chosen by the student with the advice, and under the supervision, of a faculty member. Such work may involve obtaining data in the field or lab and analysing it, an interdisciplinary research project, and supervised readings. Not eligible for CR/NCR option.

Prerequisite: enrollment in an Earth Science program of study, completion of at least one full-course equivalent of 200-series ESS courses.
Exclusion: GLG371H1
Distribution Requirements: Science

ESS392Y1 - Directed Studies

An individual study program chosen by the student with the advice, and under the supervision, of a faculty member. Such work may involve obtaining data in the field or lab and analysing it, an interdisciplinary research project, and supervised readings. Not eligible for CR/NCR option.

Prerequisite: enrollment in an Earth Sciences Program of Study; completion of at least one full-course equivalent of 200-series ESS courses.
Exclusion: GLG372Y1
Distribution Requirements: Science

JPE395H1 - Physics of the Earth

Hours: 24L

Designed for students interested in the physics of the Earth and the planets. Study of the Earth as a unified dynamic system; determination of major internal divisions in the planet; development and evolution of the Earth's large scale surface features through plate tectonics; the age and thermal history of the planet; Earth's gravitational field and the concept of isostasy; mantle rheology and convection; Earth tides; geodetic measurement techniques, in particular modern space-based techniques.

Prerequisite: PHY132H1/PHY152H1/PHY180H1/MIE100H1/MAT235Y1/MAT237Y1/MAT291H1/AER210H1, PHY254H1/PHY293H1/MAT244H1/MAT267H1/MAT290H1/MAT292H1
Exclusion: PHY359H1, PHY395H1
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)
ESS398H0 - Research Excursions

Distribution Requirements: Science

ESS398Y0 - Research Excursions

Exclusion: GLG399Y0

Distribution Requirements: Science

ESS410H1 - Field Techniques in Hydrogeochemistry
A ten-day field course in late summer at the Deep River field site designed to familiarize students in a variety of hydrogeological and biogeochemical field techniques; includes a mixture of lecture, laboratory and field exercises. Not eligible for CR/NCR option. Note: Enrollment is handled by the department. For registration deadlines, additional fees associated with the field course, course dates, and special registration requirements, please consult the departmental announcements or inquire with ugrad@es.utoronto.ca.

Prerequisite: ESS311H1, ESS312H1
Exclusion: GLG448H1
Distribution Requirements: Science

Breadth Requirements: The Physical and Mathematical Universes (5)

ESS423H1 - Mineral Deposits
Hours: 24L/36P

Geology and geochemistry of ore deposits. Origin and interpretation; systematic ore mineralogy, in hand specimen and reflected light microscopy.

Prerequisite: ESS322H1, ESS323H1
Exclusion: GLG442H1
Distribution Requirements: Science

Breadth Requirements: The Physical and Mathematical Universes (5)

ESS425H1 - Advanced Methods in the Geosciences
Hours: 24L/36P

This course provides an in-depth exploration of methods which are commonly used in the Geosciences. The course content will vary from year to year; students should inquire with the Department about course topics and pre-requisites before the beginning of the Fall term. Topics taught in this course include, but are not limited to, laboratory analytical techniques (such as X-ray diffraction, X-ray fluorescence, stable isotopes, light and scanning electron microscopy and Inductively Coupled Plasma Mass Spectrometry), core logging, computational techniques including modeling, statistical methods, or spatial analysis tools for geological mapping applications such as plotting cross sections or correlating biostratigraphies.

Prerequisite: 8 FCEs of Earth Sciences courses

Distribution Requirements: Science

Breadth Requirements: The Physical and Mathematical Universes (5)

ESS431H1 - Basin Analysis

Previous Course Number: ESS332H1

Hours: 24L/36P

Prerequisite: ESS331H1
Exclusion: GLG430H1, ESS332H1
Distribution Requirements: Science

Breadth Requirements: The Physical and Mathematical Universes (5)

ESS441H1 - Advanced Structural Geology

Hours: 24L/24P

Prerequisite: 8.0 FCE of ESS courses including ESS322H1, ESS234H1, ESS241H1, ESS331H1

Recommended Preparation: ESS345H1, ESS323H1

Distribution Requirements: Science

Breadth Requirements: The Physical and Mathematical Universes (5)
ESS445H1 - Global Tectonics

Hours: 24L/24P

Exploration of physical Earth processes and their relationship to large-scale geological phenomena. Mantle convection as plate tectonic engine; intraplate/plate boundary lithospheric deformation including orogenesis and crustal subsidence. Focus on reconciling geodynamic theory/modelling with geological/geophysical observations.

Exclusion: GLG465H1
Recommended Preparation: ESS322H1, ESS332H1 & ESS441H1
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

ESS450H1 - Geophysical Field Techniques

A ten-day field course in late August at the Deep River field site. Students get hands-on experience using geophysical instrumentation, applying various data collection techniques, and performing data analysis in gravity, magnetic, seismic, electrical, electromagnetic, and radar surveys. Not eligible for CR/NCR option. Note: Enrollment is handled by the department. For registration deadlines, additional fees associated with the field course, course dates, and special registration requirements, please consult the departmental announcements or inquire with ugrad@es.utoronto.ca. Additional fee of up to $500 will apply.

Recommended Preparation: JGA305H1
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

ESS452H1 - Geophysical Imaging with Non-seismic Methods

Hours: 24L

Current geophysical surface and borehole methodologies (gravity, magnetics, electrical, electromagnetic, nuclear) and their theoretical basis for investigating Earth’s interior to depths ranging from several metres to tens of kilometers.

Exclusion: PHY494H1
Recommended Preparation: ESS345H1
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

ESS461H1 - Palaeoenvironmental Studies

Hours: 24L/24P

The use of proxy data (terrestrial and aquatic microfossils) to infer past environmental conditions. The nature and extent of Quaternary environmental change is considered in the context of assessing current issues such as acidification, metal pollution, eutrophication and global climate change. Paleoenvironmental techniques are applied in the laboratory.

Prerequisite: ESS261H1
Exclusion: GLG436H1
Recommended Preparation: ESS362H1, ENV233H1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

ESS462H1 - Global Biogeochemical Cycles

Hours: 24L

A seminar course focusing on the exchange of matter (i.e. elements, minerals) between the Earth’s atmosphere, ocean, and biosphere. Course-related topics include global biogeochemical cycling of carbon, nitrogen, phosphorous, silicon, iron, and zinc (amongst other elements) and will include both terrestrial and marine ecosystems. Examples and case studies will be viewed from the paleo-, contemporary and potential future global change perspectives. The overall content of course readings will be determined by student interest, as students have the freedom to choose topics (readings) of personal interest. Offered in alternate years.

Prerequisite: 10 FCEs from any of ESS/MAT/PHY/CHM/EEB/GGR, including ESS361H1/ESS362H1/GGR305H1
Exclusion: GGR403H1
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)
ESS464H1 - Biological Perspectives on Earth System Evolution

Hours: 24L

A seminar course focussing on ways that the Earth’s biosphere (terrestrial and marine) has altered the overall functioning of the Earth System over geological time, including (1) influence of terrestrial vegetation on surface processes such as palaeosol development, river geomorphology, erosion, and cycling of major biogeochemical nutrients on land, (2) influence of the marine biosphere on the concentration of O2 and CO2 in the atmosphere, including the origin of the stratospheric ozone layer, and (3) the interactive influence of the terrestrial and marine biosphere on atmospheric moisture transport, production of latent relative to sensible heat fluxes, and the development of the planetary boundary layer. Offered in alternate years.

Prerequisite: ESS261H1/ESS262H1, ESS361H1/ESS362H1/ GGR305H1 or permission of the instructor
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

ESS481H1 - Advanced Topics in Earth Sciences

Hours: 24L/24P

This course is offered on an irregular basis, typically in the winter term. Students are advised to consult the departmental notices with respect to course times and content, but should expect an in-depth study of modern earth science questions, for example mineralogy and material science, advanced petrology, or exploration geochemistry. Course instructors will often, but not always, be recruited from Industry.

Prerequisite: appropriate 300-level ESS credits. Prerequisites change from year to year; consult Department for details.
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

ESS490H1 - Geological Capstone Fieldtrip

A two-week excursion to a challenging field setting. Students will integrate field observations with their accumulated knowledge of geodynamics, structural geology, and landscape evolution to understand large-scale geological events. Not eligible for CR/NCR option. This course can be offered in any given term. Note: Enrollment is handled by the department. For registration deadlines, additional fees associated with the field course, course dates, and special registration requirements, please consult the departmental announcements or inquire with ugrad@es.utoronto.ca.

Prerequisite: At least 12 FCE of any Earth Science program of study requirements, or permission of the instructor
Exclusion: GLG420H1
Recommended Preparation: ESS221H1/ESS224H1, ESS262H1, ESS222H1, ESS234H1, ESS331H1, ESS423H1
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

ESS491H1 - Undergraduate Thesis Project

Research emphasising methods used in field and experimental work. Students must obtain the consent of an instructor and register with the undergraduate coordinator and are urged to do so toward the end of their third year. In addition to submitting a thesis, students are required to give an oral presentation of their research results to an open meeting of the department. Not eligible for CR/NCR option.

Prerequisite: Completion of the required 300-level courses, and enrollment in a relevant program and permission of the department.
Exclusion: GLG471H1
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

ESS492Y1 - Undergraduate Thesis Project

Research emphasising methods used in field and experimental work. Students must obtain the consent of an instructor and register with the undergraduate coordinator and are urged to do so toward the end of their third year. In addition to submitting a thesis, students are required to give an oral presentation of their research results to an open meeting of the department. Not eligible for CR/NCR option.

Prerequisite: Completion of the required 300-level courses in an appropriate program and permission of the department.
Exclusion: GLG470Y1
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)
JPE493H1 - Seismology

Hours: 24L

Why do earthquakes occur and how are they related to tectonic motion of the Earth's surface? What is the physics behind the propagation of seismic waves through the Earth, and how can it be used to determine the internal structures of the Earth? This introductory course is aimed at understanding the physics behind seismic wave propagation, as well as asymptotic and numerical solutions to the elastodynamic equation. Travel time and amplitude of seismic waves are discussed based on seismic ray theory, while numerical methods are introduced to obtain accurate solutions to more complex velocity structures. Seismic tomographic methods, including their applications to hydrocarbon reservoir imaging, are also covered.

Prerequisite: JPE395H1, APM346H1/APM351Y1/MAT351Y1
Exclusion: PHY493H1
Recommended Preparation: ESS345H1
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

Introduction

The Department of East Asian Studies offers students the opportunity to develop a deeper understanding of the history, cultures, and languages of premodern, modern, and contemporary East Asia. The department's course offerings engage the diversity of East Asian cultures, from contemporary film and politics to ancient philosophy, and they critically examine the structures that define the area and render it an object of study. We offer a full range of courses on East Asian literature, history, thought, religion, and society, as well as Chinese, Japanese, and Korean language courses from beginning to advanced levels. In a time of globalization, a degree in East Asian Studies can be an excellent springboard from which to launch a career in fields where bilingualism, critical analytical skills, and in-depth knowledge of the socio-historical and cultural contexts of East Asian texts and ideas are essential. Our Major and Specialist programs build the foundation for careers in teaching and research, international business and law, foreign service, and cultural institutions.

Students seeking advice on course selection or academic progress should contact the Undergraduate Coordinator, but all members of the Department will be happy to provide advice and information about their course offerings. In conjunction with Woodsworth College, the Department offers courses during June and July at the University of Hong Kong, and through the Centre for International Experience, participates in exchange programs with universities in China, Korea, Japan, Taiwan, and Singapore.

East Asian Studies Programs

East Asian Studies Specialist (Arts Program) - ASSPE1058

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

Completion of the program requires 10.0 FCEs, meeting the following requirements:

1. EAS103H1 and EAS105H1, normally taken in the first year;
2. EAS200H1, highly recommended to be taken in the second year;
3. At least third-year proficiency in Chinese, Korean or Japanese, either by completing an appropriate language course (e.g., EAS300Y1/ EAS310Y1/ EAS320Y1 or a 400-level language course) or by demonstrating the required proficiency in the initial placement. Students whose placement assessment exempts them from the requirement must substitute Society-Culture courses or courses in one of the other languages offered;
4. A minimum of 5.0 Society-Culture FCEs, with at least 4.0 FCEs at the 300-level or above, of which at least 1.0 FCE must be at the 400 level;
5. Additional EAS courses to a total of 10.0 FCEs; and
6. 2.5 FCEs may be courses on East Asia offered by other departments.

Note: First-year students should take EAS103H1 and EAS105H1, a first-year language course (unless placed in an upper-year language course by the department), and may take up to 1.0 Society-Culture FCE at the 200-level.
East Asian Studies Major (Arts Program) - ASMAJ1058

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

Completion of the program requires 7.0 FCEs, meeting the following requirements:

1. EAS103H1 and EAS105H1, normally taken in the first year;
2. EAS209H1, highly recommended to be taken in the second year;
3. At least second-year proficiency in Chinese, Korean or Japanese, either by completing an appropriate language course (e.g., EAS201H1/ EAS200Y1/ EAS210Y1/ EAS211Y1/ EAS212H1/ EAS220Y1/ EAS221H1 or a higher level language course) or by demonstrating the required proficiency in the initial placement.
Students whose placement assessment exempts them from the requirement must substitute Society-Culture courses or courses in one of the other languages offered;
4. A minimum of 3.0 Society-Culture FCEs, with at least 2.0 FCEs at the 300-level or above, of which at least 0.5 FCE must be at the 400-level;
5. Additional EAS courses to a total of 7.0 FCEs; and
6. 1.5 FCE may be courses on East Asia offered by other departments.

Note: First-year students should take EAS103H1 and EAS105H1, a first-year language course (unless placed in an upper-year language course by the department), and may take up to 1.0 Society-Culture FCE at the 200-level.

East Asian Studies Minor (Arts Program) - ASMIN1058

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

Completion of the program requires 4.0 FCEs, meeting the following requirements:

1. EAS103H1 and EAS105H1;
2. 3.0 Society-Culture FCEs, one of which must be 300/400-level; and
3. 1.0 FCE may be courses on East Asia offered by other departments.

Language courses cannot be used to fulfil the requirements of the Minor program.

Course Groups

Core Courses

- EAS103H1 Premodern East Asia
- EAS105H1 Modern East Asia
- EAS209H1 Approaches to East Asia

Society-Culture Courses

- EAS194H1 East Asia through Music
- EAS195H1 Shan Shui Landscape: A Cultural Historical Study
- EAS196H1 Consumption, Taste and Culture in East Asia
- EAS197H1 Media Worlds and East Asia
- EAS198H1 Martial Arts in East Asian Narratives
- EAS199H1 Thinking through Art in Chinese Culture
- EAS218H1 Classical Chinese Prose
- EAS219H1 Cultural History of Food in East Asia
- EAS235H1 Perceptions of China in Japanese Literature
- EAS241H1 History of Chinese Philosophy
- EAS242H1 Japanese Cinemas I: Film Form and the Problems of Modernity
- EAS243H1 Japanese Cinemas II: Film Form and the Problems of Modernity
- EAS245H1 Premodern Japanese History
- EAS246H1 Early Modern Japanese History
- EAS247H1 History of Capitalism in Modern Japan
- EAS248H1 Marxism and East Asia
- EAS251H1 Aesthetics and Politics in 20th Century Korea
- EAS256H1 Chinese Literature (Pre-Qin to Tang)
- EAS257H1 Chinese Literature (Song to Qing)
- EAS263H1 Classical Japanese Literature
- EAS271H1 20th Century Korean History
- EAS273H1 Modern Chinese Cities
- EAS274H1 Popular Culture in East Asia
- EAS278H1 Approaches to Korean Cinema
- EAS279H1 East Asian Ecocinema
- EAS284H1 Modern Chinese Literature
- EAS284Y1 Modern Chinese Literature
- EAS285H1 Revolutions in Modern China
- EAS289Y1 Environment and East Asia
- EAS295Y0 Selected Topics in East Asian Studies, 200-level
- EAS296H1 Topics in East Asian Studies
- EAS297H1 Texts, Images and Objects in East Asia
- EAS299Y1 Research Opportunity Program
- EAS307H1 Chinese Political Philosophy
- EAS308H1 East Asia Seen in Maps, Ancient and Modern
- EAS309H1 Modern Chinese Prose
- EAS311H1 A History of Japanese Monsters
- EAS312H1 Art and Archaeology of Early China
- EAS314H1 Culture & World After Hiroshima & Nagasaki
- EAS315H1 The "Yellow Peril": Past & Present
- EAS324H1 The Asia-Pacific in the Nuclear Age
- EAS327H1 Japanese Fiction and the Nation
- EAS328H1 Science, Technology and Society in Modern China
- EAS330H1 Narrative Strategies in Modern Japanese Fiction

Faculty of Arts & Science Language Citation

The Department of East Asian Studies participates in the Faculty of Arts and Science’s Language Citation initiative for Chinese, Japanese, and Korean. The study of any of these languages is challenging and time-consuming, which offers rich rewards for students interested in the cultures, societies, and economies of East Asia.

The Language Citation recognizes a significant level of achievement in language study with a high level of academic success. The Language Citation is available to students who achieve a B- or above in 2.0 FCEs beyond the first-year course in a language. The following courses count towards a Language Citation:

**Chinese**
- EAS200Y1
- EAS201H1
- EAS300Y1
- EAS401H1
- EAS402H1

**Japanese**
- EAS220Y1
- EAS221H1
- EAS320Y1
- EAS460H1
- EAS461H1

**Korean**
- EAS210Y1, half a credit of EAS211Y1
- EAS212H1
- EAS310Y1
- EAS410Y1
- EAS416Y1

Students should note that the Language Citation is not equivalent to an academic program and that enrolment in a program is not necessary in order to earn the recognition bestowed by the Citation. Students interested in the Citation should email eas.undergrad@utoronto.ca.
**East Asian Studies Courses**

**EAS194H1 - East Asia through Music**

**Hours:** 24L

This course will discuss ‘East Asia’ through music as composed, performed, recorded, processed, remembered, imagined, and represented. Questions to be asked include: what kinds of sound are recognized as music in East Asia? What are the goals and effects of music? When, where, and how is music performed in East Asia? How is music described in East Asian literature and visual art? How does music translate East Asian literature and visual art? How are certain musical elements—tonality, rhythm, genre, instruments—recognized as ‘East Asian’? How is East Asia imagined musically? How are East Asian composers and performers received globally? Restricted to first-year students. Not eligible for CR/NCR option.

**Distribution Requirements:** Humanities
**Breadth Requirements:** Creative and Cultural Representations (1)

**EAS195H1 - Shan Shui Landscape: A Cultural Historical Study**

**Hours:** 24L

This course looks into the history of cultural production of Chinese Shan Shui (lit., mountain and water) landscape representations from an environmental humanities perspective. As an artistic motif, Shan Shui travels between past and present and across various mediums as well as literary and artistic genres. What exactly are we invited to see and contemplate on in the Shan Shui? Are Shan Shui works about “nature,” spirit, Qi, or the human world? The course seeks to inquire into these and other questions through examining the concepts, arts, and transformations of selected Shan Shui works in imperial and contemporary China. Restricted to first-year students. Not eligible for CR/NCR option.

**Distribution Requirements:** Humanities
**Breadth Requirements:** Creative and Cultural Representations (1)

**EAS196H1 - Consumption, Taste and Culture in East Asia**

**Hours:** 24S

This course explores the roles that consumption and taste play in personal and public lives in East Asia. Course focus may include the cultural histories of food, fashion, tourism, sports, or forms of audio and visual media. (No prior knowledge of East Asian languages or cultures is necessary.) Restricted to first-year students. Not eligible for CR/NCR option.

**Distribution Requirements:** Humanities
**Breadth Requirements:** Creative and Cultural Representations (1)

**EAS197H1 - Media Worlds and East Asia**

**Hours:** 24S

The term “world-making” is often used nowadays to refer to transmedia storytelling, or the creation of story-worlds across serial narratives in a range of entertainment media, such as novels, games, film series/franchises, television shows, comics, and webtoons. This course looks at the ways that media producers and fans, alike, engage with media worlds. More importantly, the course situates these media worlds within a broader conception of “world-making,” namely, the geopolitical and economic configuration of modern East Asia. (No prior knowledge of East Asian languages or cultures is necessary.) Restricted to first-year students. Not eligible for CR/NCR option.

**Distribution Requirements:** Humanities
**Breadth Requirements:** Creative and Cultural Representations (1)

**EAS198H1 - Martial Arts in East Asian Narratives**

**Hours:** 24S

What can we learn about East Asian history and culture through its rich tradition of narratives featuring the martial arts? This course introduces short stories and novels dealing with combat and warfare from nearly two thousand years of East Asian literature, exploring issues such as self and society, gender, power, the body, and identity. All texts will be provided in translation, and no prior knowledge of any East Asian language or culture is necessary. Restricted to first-year students. Not eligible for CR/NCR option.

**Distribution Requirements:** Humanities
**Breadth Requirements:** Creative and Cultural Representations (1)
EAS199H1 - Thinking through Art in Chinese Culture

Hours: 24S

This seminar explores different visions and methods of art (textual and visual) as a way of thinking about living, knowing, and willing in Chinese culture. Examination of various theoretical texts on arts and literature, as well as works of art themselves, will provide students with knowledge and research skills on arts in Chinese culture, and an expanded sense of Chinese intellectual history. Questions explored in the course will include: How should we understand the concept of Chinese art beyond representation? How did Chinese literati pursue a sense of beauty through their poetry and painting? How is beauty apprehended in natural and constructed landscapes? What are the political and social functions of art education in Chinese culture? How do Chinese artists fit into a global cultural context? (No prior knowledge of East Asian languages or cultures is necessary.) Restrict ed to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

Core Courses

EAS103H1 - Premodern East Asia

Hours: 24L/12T

Examines how various histories of East Asia can be written by focusing on specific themes in the histories of China, Japan, and Korea to roughly 1600. Required of EAS specialists, majors, and minors.

Exclusion: EAS102Y1
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

EAS105H1 - Modern East Asia

Hours: 24L/12T

Examines how various histories of East Asia can be written by focusing on specific themes in the histories of China, Japan, and Korea from roughly 1600 to the Cold War. Required of EAS specialists, majors, and minors.

Prerequisite: EAS103H1
Exclusion: EAS102Y1
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

EAS209H1 - Approaches to East Asia

Previous Course Number: EAS209Y1
Hours: 24L/12T

Required of EAS specialists and majors, this course introduces various approaches, theories, and methodologies for the study of East Asian societies and cultures. As the course serves as a foundation for upper-level EAS courses, it should be taken as early as possible, preferably in the second year.

Prerequisite: EAS103H1, EAS105H1
Exclusion: EAS209Y1
Distribution Requirements: Humanities

Society-Culture Courses

EAS218H1 - Classical Chinese Prose

Hours: 24L

This course introduces the form and types of prose in classical Chinese literature by critical reading of some basic Chinese texts and their English translations on various themes, such as history, philosophy, religion and art.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

EAS219H1 - Cultural History of Food in East Asia

Hours: 24L

This course introduces historical, literary, and anthropological issues related to the consumption of food in East Asia. Through a wide variety of reading materials, it focuses on the relationship between various foodways and trade, ritual, religion, medicine, and cultural identity.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)
EAS235H1 - Perceptions of China in Japanese Literature

Hours: 24L

Lectures on Japanese literary negotiations with China, the Chinese and Chineseness, ranging from celebration of shared cultural practices and aestheticization of China to nativist resistance to Chinese cultural hegemony. Required readings are available in English translation, including Tale of Genji, Tale of Middle-Councillor Hamamatsu (medieval romance), Haku Rakuten (No Play), Battles of Coxinga (Kabuki play), Three-Cornered World (by Soseki), and Wild Goose (by Ogai).

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

EAS241H1 - History of Chinese Philosophy

Hours: 36L

The course introduces the major philosophical traditions in China, such as Confucianism, Daoism, and Buddhism, and their historical development from ancient to modern times in four periods: the emergence of Confucianism, Daoism, and other minor schools; the introduction of Buddhism and the development of various sects of Chinese Mahayana Buddhism; the unfolding of neo-Confucianism; and the development of modern Chinese philosophy.

Exclusion: PHL237H1
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

EAS242H1 - Japanese Cinemas I: Film Form and the Problems of Modernity

Hours: 36L/12T

This course investigates how film aesthetics relate to the most profound socio-historical problems of Japanese modernity. It also considers how various filmmakers employ cinematic form to engage the social problems of their moment. Part I focuses on the 1890s - present.

Exclusion: EAS237Y1
Recommended Preparation: EAS242H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

EAS243H1 - Japanese Cinemas II: Film Form and the Problems of Modernity

Hours: 36L/12T

This course investigates how film aesthetics relate to the most profound socio-historical problems of Japanese modernity. It also considers how various film makers employ cinematic form to engage the social problems of their moment. Part II focuses on the 1960s - present.

Exclusion: EAS237Y1
Recommended Preparation: EAS242H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

EAS245H1 - Premodern Japanese History

Hours: 24L

A survey of the history of premodern Japan from earliest recorded histories to the establishment of the Tokugawa regime in the seventeenth century. Uses a wide range of translated primary Japanese texts to illuminate the emergence of cultural forms and their conjunction with social, economic, religious, and political trends.

Recommended Preparation: EAS103H1
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

EAS246H1 - Early Modern Japanese History

Hours: 24L

A survey of the history of Japan from about 1600 until the disintegration of the Tokugawa regime in the mid-19th century. Uses a wide range of translated primary Japanese texts to illuminate the emergence of cultural forms and their conjunction with social, economic, religious, and political trends.

Recommended Preparation: EAS103H1/EAS105H1
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)
EAS247H1 - History of Capitalism in Modern Japan  
Hours: 24L  
This course provides a historical narrative of the development of the capitalist mode of production in Japan, from the mid-19th century to the present day. Readings include texts from various disciplines: economics, philosophy, social and labour history, and literature.  
Distribution Requirements: Humanities  
Breadth Requirements: Society and its Institutions (3)  

EAS248H1 - Marxism and East Asia  
Hours: 24L  
This course focuses on how Marxism became one of the most important and influential systems of revolutionary thought in East Asian countries such as Japan, Korea, and China in the twentieth century, with enormous repercussions for our present historical conjuncture. The course particularly focuses on the theoretical creativity and impasses that went into translating the basic tenets of Marxism to address particular, national questions in East Asia.  
Distribution Requirements: Humanities  
Breadth Requirements: Society and its Institutions (3)  

EAS251H1 - Aesthetics and Politics in 20th Century Korea  
Hours: 24L  
This lecture course examines key questions and texts in the history of literature from the Korean peninsula during the twentieth century, exploring how aesthetic form refracted the experiences of colonialism, division, and the formation of opposing nation-states.  
Distribution Requirements: Humanities  
Breadth Requirements: Creative and Cultural Representations (1)  

EAS256H1 - Chinese Literature (Pre-Qin to Tang)  
Hours: 24L  
A survey of major works in premodern Chinese literature, including poetry, essays, short narratives and drama from the pre-Qin through Tang eras (11th century BCE - 10th century CE).  
Exclusion: EAS336Y1,EAS336H1  
Distribution Requirements: Humanities  
Breadth Requirements: Creative and Cultural Representations (1)  

EAS257H1 - Chinese Literature (Song to Qing)  
Hours: 24L  
A survey of major works in premodern Chinese literature, including poetry, essays, short narratives and drama from the Song through Qing dynasties (10th - 19th centuries CE).  
Exclusion: EAS337Y1,EAS337H1  
Distribution Requirements: Humanities  
Breadth Requirements: Creative and Cultural Representations (1)  

EAS263H1 - Classical Japanese Literature  
Hours: 24L  
This course examines canonical literary works written in classical and sinic Japanese (bungo and kanbun), including poetry, narrative, and theatre, produced from the Nara Period to the Edo Period (roughly 8th to 19th Centuries), with an emphasis on rhetoric, media, performance, reception history, canon formation and gender relations. Themes include: orality and literacy; masculine and feminine discourses; image and text; poetry and narrative; (auto)biography and fiction; intertextuality and authorship; the supernatural and realistic; establishment and resistance; and the centre and periphery. All readings will be in English.  
Recommended Preparation: EAS103H1, EAS245H1, EAS246H1  
Distribution Requirements: Humanities  
Breadth Requirements: Creative and Cultural Representations (1)  

EAS271H1 - 20th Century Korean History  
Hours: 24L  
A survey of the history of Korea from the Tonghak uprising and Sino-Japanese war of 1894-1895, through the colonial period, division, and to the civil war.  
Exclusion: EAS271Y1  
Distribution Requirements: Humanities  
Breadth Requirements: Society and its Institutions (3)
EAS273H1 - Modern Chinese Cities

Hours: 24L
This course offers a critical review of the history and historiography of modern Chinese cities. Focusing on the development of specific Chinese cities, the course emphasizes understanding the socio-cultural production of space as well as analytical reading of landscape, urban imagery, and urban writings.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

EAS274H1 - Popular Culture in East Asia

Hours: 24L
Through various forms of popular culture in the 20th century, this course explores the cultural contexts and social trajectories of China, Japan and Korea. Forms of popular culture studied include art, visual culture, consumer habits, foodways, advertising, music, and fashion.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

EAS278H1 - Approaches to Korean Cinema

Hours: 48L
This course explores the postwar development of film in Korea with a focus on the analysis of film form, genre and historical context.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

EAS279H1 - East Asian Ecocinema

Hours: 36L
The course examines the ethical, political, historic and aesthetic dimensions of Asian Ecocinema (environmental films that engage with the Asia-based global environmental crisis) and discusses the films’ ways of connecting place and planet.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

EAS284H1 - Modern Chinese Literature

Hours: 24L
This course offers a critical examination of 20th-century Chinese literature, with a focus on the important developments of literary writing over time, from the inception of New Literature in the 1910s, the development of realism and modernism in the 1930s, to the emergency of post-revolution and postmodernist writings in the 1990s. Emphasis is placed on generating a dialogue on interpretations of key works.

Exclusion: EAS284Y1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

EAS285H1 - Revolutions in Modern China

Hours: 24L
This course offers an interdisciplinary treatment of the Chinese people’s protracted struggle to transform the world’s oldest empire and to create a revolutionary society, with a special focus on the myriad revolutions, uprisings, and protests that had radically remade the country’s social fabric in the tumultuous twentieth century. First-person accounts, classic and revisionist scholarly works, and literary and visual materials will be used to examine China’s multifaceted transformations both chronologically and thematically, in their socioeconomic, cultural, political, and global contexts.

Recommended Preparation: EAS105H1, HIS280Y1
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

EAS289Y1 - Environment and East Asia

Hours: 48L
This course explores the environmental crisis in East Asia, with a special focus on its representations in the media, film, and literary writings.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1); Society and its Institutions (3)
EAS295Y0 - Selected Topics in East Asian Studies, 200-level

This course allows students to pursue the specialized study of specific topics tailored to the research and study opportunities available in Hong Kong and the expertise and interests of the instructor. Available only in the Woodsworth College Hong Kong Summer Program.

Distribution Requirements: Humanities

EAS296H1 - Topics in East Asian Studies

Hours: 24L

An in-depth study of Chinese, Japanese or Korean culture, history and/or literature. Content depends on the instructor. When offered, the course will have a subtitle that describes its content.

Distribution Requirements: Humanities

EAS297H1 - Texts, Images and Objects in East Asia

Hours: 24P

This course seeks to understand East Asian civilizations through texts, images, and objects exhibited at the Royal Ontario Museum (ROM). Students study various texts, paintings, bronzes, architecture, sculptures, porcelains, and other objects, and explore their historical, aesthetic, and critical meanings.

Distribution Requirements: Humanities

Breadth Requirements: Creative and Cultural Representations (1)

EAS299Y1 - Research Opportunity Program

Credit course for supervised participation in faculty research project. Details at https://www.artsci.utoronto.ca/current/academics/research-opportunities/research-opportunities-program. Not eligible for CR/NCR option.

Distribution Requirements: Humanities

EAS307H1 - Chinese Political Philosophy

Hours: 24S

The course analyses the development of Chinese political philosophy from ancient times to the present day, focusing on Confucianism, Daoism, and Legalism and their relation to issues in political philosophy today.

Prerequisite: EAS105H1 and EAS241H1/PHL237H1

Distribution Requirements: Humanities

Breadth Requirements: Thought, Belief and Behaviour (2)

EAS308H1 - East Asia Seen in Maps, Ancient and Modern

Hours: 24L

Through the lens of important maps ancient and new, this course looks at the histories, cultural logic, and methods of visual representation in societies of East Asia. The maps include archaeological artifacts, ancient manuscripts, and printed renditions, spanning from early history to the nineteenth century.

Prerequisite: EAS105H1

Distribution Requirements: Humanities

Breadth Requirements: Thought, Belief and Behaviour (2)

EAS309H1 - Modern Chinese Prose

Hours: 24S

A survey of representative works of prose written by 20th-century Chinese writers. This course focuses on reading texts, as well as analyzing their textual structures, aesthetic values, and historical contexts.

Prerequisite: EAS105H1

Distribution Requirements: Humanities

Breadth Requirements: Creative and Cultural Representations (1)

EAS311H1 - A History of Japanese Monsters

Hours: 24L

This course examines the historical development of Japanese monsters, from roughly the 7th - 8th centuries to modern times. We focus on how the changing understanding of monsters in society has embodied certain fissures in Japanese culture, especially with regard to gender and class.

Prerequisite: EAS105H1

Recommended Preparation: EAS209H1

Distribution Requirements: Humanities

Breadth Requirements: Creative and Cultural Representations (1)
EAS312H1 - Art and Archaeology of Early China

Hours: 36L

This course explores ancient societies from prehistory to the Bronze Age of China from archaeological perspectives with a focus on Chinese collections at the ROM. The course offers students an understanding of the origins and formation of Chinese civilizations.

Prerequisite: EAS105H1 and EAS209H1/ANT100Y1/ANT200Y1
Exclusion: EAS411H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

EAS314H1 - Culture & World After Hiroshima & Nagasaki

Hours: 24L

Exploration of literature, film, and other cultural production related to the atomic bombing and other nuclear catastrophes from transnational, inter-Asia, and transpacific perspectives. Primarily focuses on, but not necessarily limited to, the cultural texts, intellectual concepts, and social thoughts generated out of the history of Hiroshima and Nagasaki atomic destruction.

Prerequisite: EAS105H1
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

EAS315H1 - The "Yellow Peril": Past & Present

Hours: 24L

Beginning with the Chinese Exclusion Acts, the Asian presence in North America has often been considered a serious social menace. This course explores the Asian/North American response to the past and present "Yellow Peril" constituted as a gendered, sexualized, classed, and racialized epistemological and affective structure of knowledge.

Prerequisite: EAS105H1
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

EAS324H1 - The Asia-Pacific in the Nuclear Age

Hours: 24L

From the events such as the world’s first use of the atoms for war, the Cold War nuclear arms race, the "Atoms for Peace" campaign, the worst nuclear accident in history, to the unfolding threat of nuclear proliferation, the twentieth century Asia-Pacific region has been profoundly shaped by the nuclear age. The course introduces the diverse cultural knowledge and social thoughts that have developed distinctly in the Asia-Pacific in response to the nuclear-related affairs. They include, for instance, the ideas and practices concerning the environment, the human, peace, visibility, security, coloniality, sustainability, etc.

Prerequisite: EAS105H1
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

EAS327H1 - Japanese Fiction and the Nation

Hours: 24L/4T

Explores modern Japanese literature, with special attention given to literature's relation to the nation. Students explore how literature transforms throughout Japanese modernity and how its meaning and effects function to simultaneously solidify and fracture national identity.

Prerequisite: EAS105H1 and at least one (0.5 credit) course in literature
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

EAS328H1 - Science, Technology and Society in Modern China

Hours: 24L

Learn to understand modern China from an understudied yet important perspective: the development of science and technology since the establishment of People’s Republic in 1949. Science and technology have played crucial parts in China’s political, economical, social, and cultural transformations. Drawing from anthropological, social, and historical studies of science, we examine, among other topics, science and nation-building, biopolitics, technocracy, and scientists’ self-fashioning at the juncture of Communist reign and global capitalism. Students also learn key concepts of science studies.

Prerequisite: EAS105H1/CAS201H1
Distribution Requirements: Humanities; Science
Breadth Requirements: Society and its Institutions (3)
EAS330H1 - Narrative Strategies in Modern Japanese Fiction

Hours: 24L

Discussion of narratives by modern Japanese authors with attention to issues in narratology and contemporary narrative studies such as: voice and perspective; gender and power relationships of the narrator-narratee-narrated; the act of narrating, writing, listening and reading; and metafictional paradox.

Prerequisite: EAS105H1 and EAS263H1/EAS230H1/EAS235H1/EAS256H1/EAS257H1/EAS284H1/EAS284Y1, or permission of the instructor.

Distribution Requirements: Humanities

Breadth Requirements: Creative and Cultural Representations (1)

EAS333H1 - Modernism and Colonial Korea

Hours: 24L

This course considers the problem of colonial modernism through a close reading of literary and cultural texts from early 20th-century Korea. It asks what it means to enter modernity under colonial rule, and questions the relationship between imperialism, writing, and subjectivity. Topics include the role of literature in elaborating new concepts of subjectivity, literature and the fine arts as assimilatory practices, the emergence of urban space and reconfiguration of notions of the rural, and changing notions of time and space in the cultural products of nativism. Readings of literary works will be accompanied by showings of paintings and photographs from the period, as well as discussions of theoretical essays on modernism.

Prerequisite: EAS105H1

Distribution Requirements: Humanities

Breadth Requirements: Creative and Cultural Representations (1)

EAS334H1 - Chinese Novels

Hours: 24L

This course explores the development of Chinese fiction from earliest times with emphasis on the twentieth century.

Prerequisite: EAS105H1

Exclusion: EAS334Y1

Distribution Requirements: Humanities

Breadth Requirements: Creative and Cultural Representations (1)

EAS338H1 - Classical Daoism

Hours: 48L/24P

This course examines major issues of classical Daoist thought, such as Dao and cosmos, body and self, human nature, language and knowledge, and political visions. Based on both textual and ideological analysis of Daoist works such as the Laozi, the Zhuangzi, and Huanglao Daoist texts, to be updated with recently unearthed texts in silk and bamboo slips.

Prerequisite: EAS105H1 and PHL237H1/EAS241H1

Distribution Requirements: Humanities

Breadth Requirements: Thought, Belief and Behaviour (2)

EAS340H1 - Chinese Society and Culture

Hours: 24L

This course explores issues of identity, self, and community in a broad exploration of cultural transformation in China.

Prerequisite: EAS105H1

Exclusion: EAS340Y1

Recommended Preparation: EAS103H1

Distribution Requirements: Humanities

Breadth Requirements: Society and its Institutions (3)

EAS345Y1 - The Rise of Greater China: Issues & Topics

Previous Course Number: EAS345H1

Hours: 48L

This course looks at China from a regional perspective, with a focus on Taiwan, Hong Kong, and the Peoples Republic of China's economic integration. The role of Chinese communities globally and in Southeast Asia also receives attention.

Prerequisite: EAS105H1

Exclusion: EAS345H1

Recommended Preparation: One course on modern China or East Asia or equivalent

Distribution Requirements: Humanities

Breadth Requirements: Society and its Institutions (3)
EAS347H1 - Everyday Life in Modern Japan

Hours: 24L

This course analyzes the history of modern Japan from the perspective of a “critique everyday life” (la vie quotidienne; nichijō seikatsu). Analyzing the uneven transformation of Japan’s feudal society into a capitalist commodity economy, the course discusses how everyday life in Japan was produced and reproduced in ways that are specific to capitalist society, but that also open onto questions of a revolution of everyday life, an everyday life after capitalism. Focusing on different moments in Japan’s modern history (including its past colonial empire), the course looks at, reads, and listens to diverse representations of everyday life in Japan, especially in the worlds of work and labour, consumption and social reproduction. How are these worlds represented politically, as well as aesthetically? Specific topics include: literature and music, architecture and housing, war and forced labour, population control and sexual reproduction, and radio, leisure-time, and state propaganda.

Prerequisite: EAS105H1
Recommended Preparation: EAS247H1
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

EAS348H1 - Gift, Plunder, and Exchange: Japan and World History

Hours: 24L

This course critically re-evaluates the history and historiography of Japanese capitalism, imperialism/colonialism, and world-empire through the lens of three, distinct “modes of exchange”: gift, plunder, and commodity exchange. Inspired by Kojin Karatani’s The Structure of World History: From Modes of Production to Modes of Exchange (2014), this course explores the emancipatory politics inherent in the critical analysis of modes of exchange, and takes up historical cases from Japan, Hokkaido, Okinawa, Taiwan, Korea, China, and the “Greater East Asian Co-Prosperity Sphere.”

Prerequisite: EAS105H1/EAS247H1
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

EAS349H1 - Soundscapes and Modern China

Hours: 24L

An introduction to sound studies through the case of modern China. The class surveys basic theories of sound studies. It investigates the technological, cultural, and social production of soundscapes in modern China. Topics include the invention of national language(s), the introduction of gramophone, radio, and sound cinema, and the relationship between sound, aesthetics, and power.

Prerequisite: EAS105H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

EAS350H1 - Ideology and Japan

Hours: 24L

This course analyzes the problem of ideology in relation to the development of capitalism and imperialism in modern Japan. Among the topics analyzed in the course will be: the development of a national ideology in the transition to capitalism, the rise of “ultranationalism,” the ideological battles between Communism and fascism, the ideological struggles surrounding the U.S. military occupation of Japan, and the question of national ideology in the postwar period.

Prerequisite: EAS105H1/EAS247H1
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

EAS354H1 - Body, Movement, Japan

Hours: 24L

This course will explore theories and practices of the body and movement in Japan by way of a series of associated territories: From the 17th century walking poetry of Basho to various political resistance movements of the 1960s, from the revolutionary dance experiments of Min Tanaka to Buddhist inspired philosophies of Body-Mind and physics inspired theories of movement by Japanese scientists to the movement of information, people, and capital at the contemporary moment.

Prerequisite: EAS105H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

EAS355H1 - The Art and Politics of Video in Japan

Hours: 24L

This course will study the history of Japanese video art, beginning in the 1960s (when the Sony Corporation released the first portable video cameras) leading to the contemporary moment in which recording devices (phones, surveillance cameras, computers) and new distribution models (the Internet, public projections) abound. Video art is neither cinema nor television, and its early history is marked by some of the most radical artistic and political experiments in the history of modern Japan. This course will focus on the aesthetics and politics of experimental video with an eye on its global flows and Japan’s central role in its development.

Prerequisite: EAS105H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)
EAS357H1 - Mao's China and Beyond

Hours: 24L

This course introduces major issues and events in contemporary Chinese history from the success of the Communist revolution in 1949 to China's postsocialist transitions in the 1980s and early 1990s. Topics include the development and victory of the Chinese Communist revolution, the rule and legacy of Mao Zedong (particularly the Hundred Flowers movement, the Great Leap Forward, and the Cultural Revolution), and economic reform and political repression in the era of Deng Xiaoping.

Prerequisite: EAS105H1
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

EAS358Y1 - Classical Chinese I

Hours: 48S

An introduction to the Classical Chinese language with emphasis on grammatical analysis and translation into English. Open only to EAS majors and specialists.

Prerequisite: EAS103H1, EAS100Y1/EAS101Y1/EAS200Y1
Recommended Preparation: Two or more years of Modern Standard Chinese
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

EAS361H1 - Zen Buddhism

Hours: 24L

This course introduces the Zen Buddhist traditions of China, Korea, and Japan. Emphasis is placed on the radical views of history, language, ritual, self, and enlightenment espoused by these traditions. The course also examines issues related to Zen monasticism, the development of koans, and the definition of orthodoxy in both premodern and modern Zen. Students will be asked to explore these and other topics by paying close attention to the historical, doctrinal, and institutional contexts from which they arose.

Prerequisite: EAS105H1
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

EAS362Y1 - Classical Japanese

Hours: 48S

Introduction to classical Japanese, followed by readings of various short works by classical authors.

Prerequisite: EAS220Y1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

EAS363H1 - Classical Japanese Part I

Hours: 24S

Introduction to classical Japanese, followed by readings of various short works by classical authors. Covers first half of EAS362Y1.

Prerequisite: EAS220Y1
Exclusion: EAS362Y1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

EAS364H1 - China's Cultural Revolution: History and Memory

Hours: 24L

No understanding of contemporary China is possible without understanding the ramifications of the Great Proletarian Cultural Revolution (1966-1976). This course considers this tumultuous episode as a field of historical research and conceptual inquiry. This course critically examines a wide variety of sources, including scholarly accounts, official documents, personal memoirs, oral histories, and literary works.

Prerequisite: EAS105H1
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

EAS365H1 - Classical Japanese Part II

Hours: 24S

Introduction to classical Japanese, followed by readings of various short works by classical authors. Covers the second half of EAS362Y1. Students must seek permission of the instructor to be placed in the course.

Prerequisite: EAS363H1,EAS220Y1
Exclusion: EAS362Y1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)
EAS370H1 - Media, Cultural Citizenship, and the Korean Diaspora

Hours: 24L

This course explores how cultural and ethnic identity in diaspora is constructed in media texts, and how the politics of national identity target various publics. We will examine the work of particular filmmakers, diasporic Korean celebrities in Korea, and digital platforms for producing public visibility, such as YouTube.

Prerequisite: EAS105H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

EAS372H1 - The Postwar, Cold War and Divided Korea

Hours: 24L

This research-oriented course examines the divided history of the Korean peninsula since 1945 in the context of the global war. Examines key debates in the history of contemporary Korea, beginning with the Korean war and ending with the contemporary culture of division.

Prerequisite: EAS105H1
Exclusion: EAS372Y1
Recommended Preparation: EAS271H1
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

EAS373H1 - Revolutionaries, Rebels, and Dissent in Korea’s Long 20th Century

Hours: 24L

Korea’s long 20th century experienced many tumultuous moments of dissent, rebellion, and revolution. When, why, and how do specific people dissent? This course devotes each weekly meeting to the study of a single moment of dissent, ranging from the peasant uprisings of the 1890s to labor activities in the colonial period and from anti-regime student movements in the 1970s to recent social movements and candlelight demonstrations.

Prerequisite: EAS105H1
Recommended Preparation: EAS271H1
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

EAS374H1 - Modern Japan and Colonialism

Hours: 24L

This course interrogates the history of modern Japan from the perspective of Japan’s colonial exploits in East Asia. The course also addresses the political economy and culture of the military occupation of Japan by the Supreme Command of the Allied Powers. Texts from economics, philosophy, and literature will be used.

Prerequisite: EAS105H1
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

EAS375H1 - Postwar Japan: Crisis, Apocalypse

Hours: 24L

This course explores the history of the postwar period in Japan and its former colonies in order to delineate a way to think of the idea of apocalypse in relation to crisis in advanced capitalism. Through an examination of the history of capitalist crisis in postwar Japan, the course investigates themes of apocalypse in atomic-bomb literature, television, Godzilla, radical students movements, ecological-industrial disasters, worker art movements, debates on modernity and fascism, avant-garde theatre, popular music, religious movements, nationalism, populism, and the so-called “ageing population” problem. The course revolves around texts by philosophers, economists, novelists, essayists, artists, and critics, as well as film and audio recordings.

Prerequisite: EAS105H1
Exclusion: EAS347H1,EAS374H1
Recommended Preparation: EAS247H1
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

EAS378H1 - Urban Life in Early Modern Japan

Hours: 24L

An exploration of most important cities of Tokugawa Japan, which were among the largest of the early modern world, and home to vibrant urban culture and economic activity. The texts include buildings, maps, paintings, prints, film and novels.

Prerequisite: EAS105H1
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)
EAS380H1 - Writing Women in Premodern China

Hours: 24L

A survey of premodern Chinese texts (before 1700) in translation, written by women, about women, and in the voices of women, across a variety of genres drawn from literature, history, philosophy, and religion. The texts provide opportunities to explore how gender was constructed in Chinese societies, how women were defined and constrained by texts, and how women used writing to express themselves, often in resistance to dominant modes of representation.

Prerequisite: EAS105H1
Recommended Preparation: EAS209H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

EAS384H1 - Medieval Japan

Hours: 24L

In popular culture medieval Japan often figures as an era of unremitting warfare, in which only samurai mattered. This course offers more balanced and interconnected view of what many historians regard as the most volatile, yet also most creative, era in Japanese history. The course examines the era from 1100-1500 with an eye to understanding the place of warriors, but also to explaining the incredible cultural advances of the period, which gave rise to many of the arts for which Japanese culture is renowned.

Prerequisite: EAS103H1/EAS105H1
Recommended Preparation: EAS245H1
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

EAS386H1 - Culture of Nature in China

Hours: 24L

The course examines the cultural practice of nature in China’s past and present, focusing on literary, artistic, spiritual, ethical, political, and scientific aspects of human-nature relation. Through scholarly works and primary sources, the course inquires into the cultural politics of human-nature entanglements.

Prerequisite: EAS105H1
Exclusion: EAS388Y1
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

EAS387H1 - Images and Ideas in Chinese Art

Hours: 24L

Making use of the Royal Ontario Museum’s excellent Chinese art collection, this object-based and oriented seminar encourages exploration of the ideas and practices behind works of Chinese art. We examine art and artifacts in relation to their social environment and historical contexts, paying close attention to such issues as political practices, power and authority, identity, gender, and materiality. Other relevant topics include patronage, audience, religious quests, and literati culture. Depending on special Chinese exhibitions of the year at the ROM, the course may incorporate case-studies of relevant exhibition content.

Prerequisite: EAS105H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

EAS388H1 - Asian/North American Feminist Issues

Hours: 24L

A transpacific examination of gender and sexuality issues that have directly and indirectly affected Asians and Asian North Americans. Considers, for example, the gender and sexual representations of Asia in North America, the psycho-history of the “Yellow Peril” and its ramifications beyond Asian North Americans, and the history of immigration, nationalism, colonialism, war, and the militarized empire.

Prerequisite: EAS105H1
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

EAS391H1 - Transnational East Asian Cinema

Hours: 48L

This course investigates cinema’s border-crossing modes of production, reception, and circulation, to uncover the ways in which the study of cinema enriches current theories and approaches to the transnational. Films and sites to be explored may include Asian co-productions (documentaries, feature films, shorts), transnational genre adaptations (e.g, The Ring/Ringu), and film festivals.

Prerequisite: EAS105H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)
EAS392H1 - East Asian Television

Hours: 24L

This course approaches television and televisuality in regional, transnational, and global perspectives. Beginning with the cold war histories of transmission infrastructures in the Asia Pacific, continuing with an exploration of key television shows and genres that support and resist the nation-building ethos of the medium, the course will introduce students to the history and ideology of televisuality in East Asia.

Prerequisite: EAS105H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

EAS393H1 - Chinese Buddhism

Hours: 24L

Topics vary according to the instructor's interests.

Prerequisite: EAS105H1
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

EAS394H1 - Film Culture in Contemporary China

Hours: 36L

This course discusses documentary film and DV culture in contemporary China as forms of cultural, communal, and political practices. We focus on films and videos that seek to address important global issues such as peace, environment, and climate change in cross-media approach and in personal tone. We ask: What new tendencies are there in the films and videos? Where can we trace them back to? What fresh possibilities do they bring forth to our aesthetic and public life?

Prerequisite: EAS105H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

EAS395Y0 - Topics in East Asian Studies (Summer Abroad)

This course allows students to pursue the specialized study of topics tailored to the research and study opportunities available in Hong Kong and the expertise and interests of the instructor. Available only in the Woodsworth College Hong Kong Summer Program.

Prerequisite: EAS105H1
Distribution Requirements: Humanities

EAS396H1 - Special Topics in East Asian Studies

Hours: 24L

A study of Chinese, Japanese or Korean culture, history and/or literature. Content depends on the instructor. When offered, the course will have a subtitle that describes its content.

Prerequisite: EAS105H1
Distribution Requirements: Humanities

EAS398H0 - Research Excursions

Prerequisite: EAS105H1
Distribution Requirements: Humanities

EAS398Y0 - Research Excursions

Prerequisite: EAS105H1
Distribution Requirements: Humanities

EAS406Y1 - Thinking about Things: Material Culture in East Asia

Hours: 48S

This seminar explores theories of the object, the histories of objects in East Asia, and critical thinking about the process of research. Through theoretical readings, class, and individual research projects, the seminar asks how to formulate research questions, use the internet and other resources, and present discoveries in a class conference.

Prerequisite: EAS209H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)
EAS407H1 - Textual Analysis of Classical Chinese Philosophy

Hours: 24S

Readings from ancient and medieval Chinese philosophy. Beginning with linguistic (especially semantic) analysis of key words, structure and meaning of sentences, paragraphs, and texts as a whole, which forms the basis for philosophical examination.

Prerequisite: EAS209H1 and PHL237H1/EAS241H1
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

EAS412H1 - Technology and Material Cultures of Ancient China

Hours: 24P

This course introduces the technology and material culture of prehistoric and Bronze-Age China. Offers students an understanding of the development of ancient technologies (e.g. bronze, jade, and lacquer) and associated ways of life from archaeological perspectives.

Prerequisite: EAS209H1 and EAS312H1/EAS411H1
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

EAS408H1 - Modern Taiwanese Literature

Hours: 24S

A general survey of modern Taiwanese literature from 1949 to the present. It examines issues central to understanding the Taiwanese literary culture, such as historical/cultural context, oral/written language, self-identification, gender, and human rights.

Prerequisite: EAS209H1 and 2.0 FCEs in literature
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

EAS409H1 - Cities in Premodern China

Hours: 24S

Focusing on selected Chinese cities from the earliest history to 1800 CE, this course introduces students to different aspects of urban life and its representations in literature and history.

Prerequisite: EAS209H1
Exclusion: EAS367H1
Recommended Preparation: Some familiarity with Chinese history in the middle period
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

EAS417H1 - Korean Literary Translation Workshop

Hours: 24L

A workshop format is used to explore problems encountered when translating Korean literary texts (fiction and poetry) into English. Practice with a variety of texts is accompanied by readings in translation theory to refine our understanding of translation and enrich our experience working with historical forms of Korean and English.

Prerequisite: EAS209H1 and EAS310Y1 or its equivalent
Recommended Preparation: EAS410Y1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

EAS418H1 - Chinese Art Theories

Hours: 24S

This course focuses on theories of Chinese arts by critically analyzing various theoretical texts and treatises on music, painting, calligraphy, and literature as recorded in the Classics.

Prerequisite: EAS209H1
Recommended Preparation: Knowledge of Chinese language
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)
EAS419H1 - Chinese Cultural Studies
Seminar: May Fourth

Hours: 24L

This seminar focuses on the May Fourth Movement in early twentieth century China. Taking May Fourth as a case study and a vantage point, this class enables a critical understanding of various aspects of the cultural and intellectual life in the early Republican period.

Prerequisite: EAS209H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

EAS420H1 - Travels, Travelers, and Travel Accounts in Asia

Hours: 24S

This seminar focuses on the circulation of people, words, and ideas throughout Asia before 1900, as we try to understand the worlds travelers both sought and encountered. Texts include travel diaries and geographical narratives.

Prerequisite: EAS209H1
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

EAS421H1 - History of the Chinese Book

Hours: 24L

This seminar traces the changing forms of the Chinese book from the early ‘page’ to modern print editions. We begin by considering the Chinese writing system and the bones, shells, bamboo and silk on which it was first inscribed. Next, we examine the specific technologies associated with medieval manuscript and early print cultures, many of which were associated with Buddhist textual production. Along the way we consider the social dimensions of Chinese book culture by considering the scribes, binders, engravers, printers, publishers, distributors and readers who produced, circulated and consumed Chinese books. The course draws on the methods and theories developed in diverse fields of study, including book history, philology, literacy studies and archive studies, to examine different chapters in the history of the Chinese book.

Prerequisite: EAS209H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

EAS431H1 - Advanced Seminar in Japanese Cinema

Hours: 24S

The focus ranges from the examination of cross-cultural theoretical problems (such as Orientalism) to a director-based focus, from the examination of genre (such as documentary or the category of genre itself) to the way film intersects with other cultural forms and technologies (such as video and new media).

Prerequisite: EAS209H1 and EAS242H1/EAS243H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

EAS432H1 - Korean Cultural Studies Seminar

Hours: 24S

This seminar provides an opportunity for in-depth reading and research into a specific topic in the cultural and intellectual history of Korea. Topics will vary each semester but may include colonial period print culture, the New Woman, the history of photography, and modernism.

Prerequisite: EAS209H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

Hours: 24S

This course studies Bildungsroman, the story of an individual’s coming of age, in the context of twentieth-century political, cultural, and social developments of imperialism, anti-colonialism, human rights discourse, and globalization. Our focus will be novels from the (post)colonial world and theoretical essays on the Bildungsroman form. The course aims to provide a model for rethinking literary history and genres within a global context. Authors may include Yi Kwangsui, Wu Zhouliu, Pramoedya Ananta Toer, Kang Younghill, Tsitsi Dangarembga, Camara Laye, amongst others.

Prerequisite: EAS209H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)
EAS444H1 - The City, Body and Text in Modern Japanese Literature

Hours: 24S

This course examines how the city and body exert formative forces on the text, and how the practice of writing and reading texts informs the ways we, as corporeal beings, experience the city as manifested in the 20th-century Japanese literature.

Prerequisite: EAS105H1 and EAS263H1/ EAS230H1/ EAS235H1/ EAS256H1/ EAS257H1/ EAS284H1/ EAS309H1/ EAS327H1/ EAS334H1/ EAS34Y1/ EAS366H1/ EAS380H1/ EAS397H1, or permission of the instructor.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

EAS446H1 - The Communist Hypothesis and Asia

Hours: 24L

In recent years, the basic hypotheses of Communism have begun to be thought anew, precisely because of the demise of the Soviet Union and the rise of capitalism in communist regimes (i.e., China). Taking up recent writings by Alain Badiou, Jodi Dean, Gavin Walker, Fred Jameson and a host of other contemporary thinkers, this course asks again: what is the communist hypothesis in today’s Asia and how can it help us to imagine a different Asia?

Prerequisite: EAS209H1, EAS247H1/EAS248H1
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

EAS447H1 - Sound Studies and Modern Japan

Hours: 24S

This seminar explores the growing field of sound studies with particular attention given to auditory histories and cultures in modern Japan and the prewar Japanese empire in East Asia. We study the interrelationships between industrialization, mass culture, colonialism, and techniques and processes of reproducing sound in order to specify the status of acoustic and sonic mediation in everyday life in a capitalist commodity economy.

Prerequisite: EAS209H1 and EAS247H1/EAS347H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

EAS448H1 - East Asian Studies Archive: Language, Number, Money

Hours: 24S

This course investigates salient problems of the historical archive in relation to the experience of modernity in East Asian societies. What is the meaning of the modern archive in East Asia? How is the knowledge of the modern archive produced in relation to the production of quantitative knowledge (e.g., in demographic or economic statistics)? How should we approach the relationship between number and language? How is this knowledge transformed into state knowledge as well as into what we call common sense?

Prerequisite: EAS209H1
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

EAS449H1 - Future, Architecture, Japan

Hours: 24L

Examination of how the future is imagined and materialized in architectural theory and practice throughout Japanese history. From classical temples to modernist experiments of the Metabolist movement to contemporary works by Isozaki Arata and Atelier Bow Wow, we study built and unbuilt structures as theories of the future.

Prerequisite: EAS209H1/ARC221H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

EAS454H1 - Modern Chinese Historiography

Hours: 24S

A selective survey of major historiographical problems and debates in the fields of late 19th and 20th century Chinese history. Course readings will include both theoretical and historical materials.

Prerequisite: EAS209H1
Recommended Preparation: EAS209H1,HIS280Y1
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)
EAS455H1 - Classical Confucianism

Hours: 24S

This course explores the historical and systematic aspects of classical Confucianism, which is fundamental for understanding Chinese philosophy and culture. The historical part discusses the development of the Confucian doctrine from Confucius to his generations of disciples. The systematic part engages issues such as emotion, art, poetry, morality and virtues, political philosophy, and knowledge and reality.

Prerequisite: EAS209H1 and EAS241H1/PHL237H1
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

EAS456H1 - Japan as seen by ?: Reference, Apparatus, Operation

Hours: 24S

The course discusses how images of Japan, charged with varied degrees of desire for empirical knowledge, have contributed to contemporary novels and plays by David Mitchell, Ruth L. Ozeki, David Mamet, Joy Kogawa, Kazuo Ishiguro, Marguerite Duras, and David Hwang.

Prerequisite: EAS209H1, or permission of the instructor.
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

EAS457H1 - Modern Japanese Historiography

Hours: 24S

An analysis of contemporary monographs on modern Japanese history. This course offers a critical survey of existing methodologies and approaches to writing about modern Japan.

Prerequisite: EAS209H1 and EAS247H1
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

EAS458H1 - Classical Chinese II

Previous Course Number: EAS306Y1
Hours: 24S

As a continuation of EAS358Y1 (formerly EAS206Y1), this course helps students to gain in-depth control of grammatical structures of classical Chinese and to read texts with greater ease. Requirements include a major research/translation project. Open only to EAS majors and specialists.

Prerequisite: EAS358Y1 (minimum 79%)
Exclusion: EAS306Y1, EAS335Y1
Recommended Preparation: Three or more years of Modern Standard Chinese
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

EAS459Y1 - Rethinking the Cold War in East Asia

Hours: 48S

This research course examines the ways our historical understanding of the Cold War in East Asia has shifted over the last twenty years. Focusing primarily on the divided Korean peninsula where it can be said the Cold War still rages, the course examines the mutual constitution of two competing regional political economies rooted in a shared commitment to developmentalism.

Prerequisite: EAS209H1 and EAS271H1
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

EAS466H1 - History, Everyday Life, and North Korea

Hours: 36S

This essay-driven course explores the complexity of examining North Korean history by using comparative methods developed through the study of other socialist societies and theories of everyday life.

Prerequisite: EAS209H1,EAS271H1
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)
EAS467H1 - Photographic Narratives of Japan

Hours: 24S

Uses seminal theoretical literature, photo roman (by, e.g., Abe, Nakagami) and narratives about photography (by, e.g., Tanizaki, Mishima, Kanai) to examine the rhetorical complicity and coercion of the two modes of representation which emerged in the modern and nationalistic age, and persist, in the wake of the newer media, as dominant registers of everyday life and departures from there.

Prerequisite: EAS209H1 & at least one course in humanities (literature, art history, philosophy) or reading proficiency in Japanese
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

EAS468H1 - Democratic Struggles in Korea

Hours: 24S

This seminar examines resistance, struggles, strikes and movements seen as constituting a troubled history of democracy across Korea's long 20th century.

Prerequisite: EAS209H1, EAS271H1
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

EAS471H1 - Issues in the Political Economy of South Korea

Hours: 24S

A course designed to guide students toward a research paper on a selected topic of interest on the postwar political economy of South Korea.

Prerequisite: EAS209H1 and EAS271H1
Exclusion: EAS471Y1
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

EAS473H1 - Modern Korean Historiography

Hours: 24S

An examination of recent literature in the modern Korean history field, focusing especially on the late 19th and 20th centuries.

Prerequisite: EAS209H1 and EAS271H1
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

EAS474H1 - U.S. and Canada's Wars in Asia

Hours: 24S

This course examines the cultural and social legacies of the 19th- and 20th-century hot and cold wars fought by the U.S. and Canada in different parts of Asia. It explores film, literature, and other cultural products that came out of the transpacific violence and its aftermath.

Prerequisite: EAS209H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

EAS475Y1 - Issues in East Asian Historiography

Hours: 48L

This course analyses select topics in the historiography of East Asian. Students are expected to write a major research paper.

Prerequisite: EAS209H1
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

EAS477H1 - Samurai Culture

Hours: 24S

An intensive seminar exploring one of Japan's most recognizable figures, the samurai. This course investigates the historical reality of warrior life along with the legends, with focus on the ways in the warrior's world found expression in religion, art, and literature.

Prerequisite: EAS209H1, EAS245H1/EAS246H1/EAS247H1
Exclusion: EAS478Y1
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

EAS479H1 - Ecocriticism

Hours: 24L

The course aims to establish students' ability to engage with core ecological agendas with methodology of cultural history and literary and visual analysis.

Prerequisite: EAS209H1
Recommended Preparation: At least one 300-level EAS course
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)
EAS486H1 - Readings in Mahāyāna Sūtra Literature

Hours: 24S

This seminar explores the key literary, doctrinal and ritual innovations of the Mahāyāna Buddhist tradition as it unfolded in the first few centuries of the Common Era. The semester will begin with a consideration of the origins of the Mahāyāna in early India, and end in medieval Mahāyāna communities of East Asia and Tibet. Along the way we will conduct close readings of several important Mahāyāna works (sūtras, commentaries, ritual manuals) in order to explore key elements in the development of the Great Vehicle as it was transmitted and transformed across Buddhist Asia.

Prerequisite: EAS209H1
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

EAS488H1 - Fandom, Transmedia, and the Korean Wave

Hours: 24S

This course investigates the transmedia forms and reception contexts of what is now known as hallyu or "the Korean wave." Topics include fan subjectivity and the "global popular," across a broad array of texts, including music, feature films, television dramas, fan blogs, and internet video. This seminar considers how popular media shape collective identity, and explores the connections between activism, mass media, commodity culture, and their corresponding affective registers, bridging fan studies, media studies, and contemporary Korean cultural studies.

Prerequisite: EAS209H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

EAS489H1 - Advanced Seminar in Asian Media Studies

Hours: 24S

Topics include: histories of media infrastructures, material culture, geopolitics of colonialism, imperialism, and regionalism, institutional histories of media production, analyses of popular and industrial media practices, questions of interface, platforms, circulation, and reception, and the constitutive role of media in shaping notions of modernity, publicity, and politics.

Prerequisite: EAS209H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

EAS496H1 - Advanced Topics in East Asian Studies

Hours: 24S

An in-depth study of Chinese, Japanese or Korean culture, history and/or literature. Content depends on the instructor. When offered, the course will have a subtitle that describes its content.

Prerequisite: EAS209H1
Distribution Requirements: Humanities

Independent Studies

EAS399Y1 - Research Opportunity Program

Credit course for supervised participation in faculty research project. Details at https://www.arts.utoronto.ca/current/academics/research-opportunities/research-opportunities-program. Not eligible for CR/NCR option.

EAS434H1 - Independent Studies

A scholarly project chosen by the student, approved by the Department, and supervised by one of its instructors. Consult the website (eas.utoronto.ca) for more information. Not eligible for CR/NCR option.

Prerequisite: 5.0 EAS credits, including EAS209H1
Distribution Requirements: Humanities

EAS435H1 - Independent Studies

A scholarly project chosen by the student, approved by the Department, and supervised by one of its instructors. Consult the website (eas.utoronto.ca) for more information. Not eligible for CR/NCR option.

Prerequisite: 5.0 EAS credits, including EAS209H1
Distribution Requirements: Humanities
EAS436Y1 - Independent Studies

A scholarly project chosen by the student, approved by the Department, and supervised by one of its instructors. Consult the website (eas.utoronto.ca) for more information. Not eligible for CR/NCR option.

Prerequisite: 5.0 EAS credits, including EAS209H1
Distribution Requirements: Humanities

Chinese

EAS100Y1 - Modern Standard Chinese I

Hours: 52T/52S

Intended for students with no background in Mandarin or any Chinese dialect, this course provides an introduction to modern standard Chinese as a foreign/second language. The course consists of mandatory lectures and tutorials. Students study a minimum of 550 Chinese characters. Students must go through screening process conducted by the Department. See www.eas.utoronto.ca/languages/chinese for details.

Exclusion: EAS101Y1, LGGA60H3, LGGA61H3, LGGB60H3, LGGB61H3, CHI100Y5, CHI101H5
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

EAS101Y1 - Modern Chinese I for Students with Prior Background

Hours: 26T/52S

This course is designed for students who understand elementary Mandarin or any Chinese dialect because of their cultural or family backgrounds. The course consists of mandatory lectures and tutorials. Students will learn a minimum of 650 characters. Students must go through placement process conducted by the Department. See www.eas.utoronto.ca/languages/chinese for details.

Exclusion: EAS100Y1, EAS200Y1, LGGA60H3, LGGA61H3, LGGB60H3, LGGB61H3, CHI100Y5, CHI101H5, CHI200Y5, CHI201Y5
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

EAS200Y1 - Modern Standard Chinese II

Hours: 52T/52S

This course is a continuation of EAS100Y1. Students learn major grammatical structures which are not introduced in the first year and expand their vocabulary. Students who do not meet the prerequisite must go through a placement process conducted by the Department. See www.eas.utoronto.ca/languages/chinese for details.

Prerequisite: EAS100Y1 (minimum grade 67%)/equivalent as determined by placement process.
Exclusion: EAS101Y1, EAS201H1, LGGB60H3, LGGB61H3, CHI200Y5, CHI201Y5
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

EAS201H1 - Modern Chinese II for Students with Prior Background

Previous Course Number: EAS201Y1
Hours: 26T/52S

This course is a continuation of EAS101Y1. It focuses on development of students’ listening, speaking, reading, and writing skills at a low intermediate level. Students who do not meet the prerequisite must go through placement process conducted by the Department. See www.eas.utoronto.ca/languages/chinese for details.

Prerequisite: EAS101Y1 (minimum 67%)/equivalent as determined by placement process.
Exclusion: EAS200Y1, EAS201Y1, EAS290Y1, LGGB60H3, LGGB61H3, CHI200Y5, CHI201Y5
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

EAS300Y1 - Modern Standard Chinese III

Hours: 104S

This high intermediate-level course is a continuation of EAS200Y. Students learn to read short texts which deal with personal or social topics, compose paragraph-length essays, and converse in social situations which require exchanges of basic information. Students who do not meet the prerequisite must go through placement process conducted by the Department. See www.eas.utoronto.ca/languages/chinese for details.

Prerequisite: EAS200Y1 (EAS200Y1 (minimum 70%)/EAS201Y1 or EAS201H1 (minimum 70%)/equivalent as determined by placement process.
Exclusion: EAS290Y1, LGGC60H3, LGGC61H3, LGGC62H3, LGGC63H3, CHI301Y5, CHI310Y5, CHI311Y5
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)
EAS401H1 - Modern Standard Chinese IVa

Hours: 52S

This course aims to develop students' abilities at an advanced level, with a focus on reading of fictional and/or journalistic writings. Students will improve their reading comprehension, strengthen writing skills, and advance speaking and listening skills through class discussions and oral presentations. Students who do not meet the prerequisite must go through placement process conducted by the Department. See www.eas.utoronto.ca/languages/chinese for details.

Prerequisite: EAS300Y1 (minimum 73%)/EAS402H1 (minimum 73%)/equivalent as determined by placement process
Exclusion: EAS290Y1,EAS400Y1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

EAS402H1 - Modern Standard Chinese IVb

Hours: 52S

This course aims to develop students' language abilities at an advanced level, with a focus on reading argumentative-style essays and news. Students will improve their reading comprehension, strengthen writing skills, and advance speaking and listening skills through class discussions and oral presentations. Students who do not meet the prerequisite must go through placement process conducted by the Department. See www.eas.utoronto.ca/languages/chinese for details.

Prerequisite: EAS300Y1 (minimum 73%)/EAS401H1 (minimum 73%)/equivalent as determined by placement process
Exclusion: EAS290Y1,EAS400Y1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

EAS121H1 - Japanese I for Students with Prior Background

Hours: 24L/24T

This course is equivalent to the second half of EAS120Y1 for students with some background in the Japanese language. Students must go through placement process conducted by the Department. See www.eas.utoronto.ca/languages/japanese/ for details. Not eligible for CR/NCR option.

Exclusion: EAS120Y1, EAS222Y0, LGGA81H3
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

EAS122Y0 - Summer Japanese in Japan I

This course is available in the Summer Abroad Program for students with no or a very limited background in Japanese. Those who successfully complete this course may be able to take EAS220Y1 based on the result of the East Asian Studies Department's placement test. See https://summerabroad.utoronto.ca/ for details.

Exclusion: EAS120Y1, EAS121H1
Recommended Preparation: Learning the Japanese alphabets (hiragana & katakana)
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

EAS220Y1 - Modern Standard Japanese II

Hours: 48L/48T

This is an advanced beginner level language course for those who completed EAS120Y1 or EAS121H1 with a minimum grade of 67%. Students who do not meet the prerequisite must go through placement process conducted by the Department. See www.eas.utoronto.ca/languages/japanese/ for details.

Prerequisite: EAS120Y1/EAS121H1 (minimum 67%)/equivalent as determined by placement process
Exclusion: EAS223Y0
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)
EAS221H1 - Modern Standard Japanese II for Students with Prior Background

Hours: 24L/24T

This course is equivalent to the second half of EAS220Y1. Designed for those who have a good foundation of lower beginners' grammar, vocabulary, and kanji knowledge and have not yet acquired the proficiency required to take EAS320Y1. Students must go through placement process conducted by the Department. See www.eas.utoronto.ca/languages/japanese for details.

Prerequisite: Placement process
Exclusion: EAS220Y1/EAS223Y0
Recommended Preparation: The first half of the content covered in EAS220Y1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

EAS222Y0 - Summer Japanese in Japan IIa

This course is available in the Summer Abroad Program for students who have some prior background in the language. Students should already be familiar with hiragana, katakana and some kanji as well as basic sentence patterns. Those who have successfully completed this course may be able to take EAS220Y1 or EAS320Y1 based on the result of a placement test. See http://summerabroad.utoronto.ca/programs/japan/ for details.

Prerequisite: Passing the placement test at ICU
Exclusion: EAS120Y1,EAS121H1
Recommended Preparation: Two-thirds of the content covered in EAS120Y1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

EAS223Y0 - Summer Japanese in Japan IIb

This course is available in the Summer Abroad Program for students who have completed EAS120Y1 or EAS121H1 or equivalent. Those who have successfully completed this course may be able to take EAS460H1 or EAS461H1 based on the result of the placement test and/or interview. See http://summerabroad.utoronto.ca/programs/japan/ for details.

Prerequisite: Passing the placement test at ICU
Exclusion: EAS220Y1
Recommended Preparation: One-third of the content covered in EAS220Y1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

EAS320Y1 - Modern Standard Japanese III

Hours: 96S

This is a lower intermediate level course for those who have completed EAS220Y1 with a minimum grade of 70%. Students who do not meet the prerequisite must go through placement process conducted by the Department. See www.eas.utoronto.ca/languages/japanese/ for details.

Prerequisite: EAS220Y1 (70% minimum)/equivalent as determined by placement process
Exclusion: EAS348H1,EAS349H1,EAS322Y0
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

EAS321Y0 - Summer Japanese in Japan IIla

This is a lower intermediate Japanese course available in the Summer Abroad for students who have completed EAS220Y1 or equivalent. Those who have successfully completed this course may be able to take EAS320Y1, EAS460H1, or EAS461H1 based on the result of a placement test; for EAS460H1 an interview will also be required. See http://summerabroad.utoronto.ca/programs/japan/ for details.

Prerequisite: Passing the placement test at ICU
Recommended Preparation: Material covered in EAS220Y1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

EAS322Y0 - Summer Japanese in Japan IIlb

This is a lower intermediate Japanese course available in the Summer Abroad program. Those who successfully complete this course may be able to take EAS460H1 or EAS461H1 based on the result of the placement test and/or interview. See http://summerabroad.utoronto.ca/programs/japan/ for details.

Prerequisite: Passing the placement test at ICU
Exclusion: EAS320Y1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)
### EAS460H1 - Modern Standard Japanese IVa

**Hours:** 48S

This is a high intermediate level Japanese course that focuses on oral/aural communication. Native or near-native speakers are not permitted to take this course. Students who do not meet the prerequisite must go through placement process conducted by the Department. See [www.eas.utoronto.ca/languages/japanese](http://www.eas.utoronto.ca/languages/japanese) for details.

**Prerequisite:** EAS320Y1 (70% minimum)/equivalent as determined by placement process  
**Exclusion:** EAS460Y1, EAS463Y0  
**Distribution Requirements:** Humanities  
**Breadth Requirements:** Creative and Cultural Representations (1)

### EAS461H1 - Modern Standard Japanese IVb

**Hours:** 48S

This is a high intermediate level Japanese course that focuses on reading and writing skills. Native or near-native speakers are not permitted to take this course. Students who do not meet the prerequisite must go through placement process conducted by the Department. See [www.eas.utoronto.ca/languages/japanese](http://www.eas.utoronto.ca/languages/japanese) for details.

**Prerequisite:** EAS320Y1 (70% minimum)/equivalent as determined by placement process  
**Exclusion:** EAS460Y1, EAS463Y0  
**Distribution Requirements:** Humanities  
**Breadth Requirements:** Creative and Cultural Representations (1)

### EAS463Y0 - Summer Japanese in Japan IVa

This is an upper intermediate level Japanese course available only in the Summer Abroad Program. Those who have successfully completed this course may be eligible to take EAS460H1 and/or EAS461H1 depending on the result of a placement test; for EAS460H1 an interview will also be required. See [http://summerabroad.utoronto.ca/programs/japan/](http://summerabroad.utoronto.ca/programs/japan/) for details.

**Prerequisite:** Passing the placement test at ICU  
**Distribution Requirements:** Humanities  
**Breadth Requirements:** Creative and Cultural Representations (1)

### EAS463Y0 - Summer Japanese in Japan IVb

This is a high intermediate level Japanese course available only in the Summer Abroad Program for those who have completed a course equivalent to EAS460H1 or EAS461H1. See [http://summerabroad.utoronto.ca/programs/japan/](http://summerabroad.utoronto.ca/programs/japan/) for details.

**Prerequisite:** Passing the placement test at ICU  
**Distribution Requirements:** Humanities  
**Breadth Requirements:** Creative and Cultural Representations (1)

### Korean

### EAS110Y1 - Modern Standard Korean I

**Hours:** 48T/48S

This course is designed to help students build communication skills in the Korean language. Through an integration of listening, speaking, reading and writing, it aims to provide a solid foundation in beginning-level Korean. This course assumes that students do not have any prior knowledge of Korean. Students must go through screening process conducted by the Department. See [www.eas.utoronto.ca/languages/korean](http://www.eas.utoronto.ca/languages/korean) for details. Not eligible for CR/NCR option.

**Exclusion:** EAS211Y1  
**Distribution Requirements:** Humanities  
**Breadth Requirements:** Creative and Cultural Representations (1)
EAS210Y1 - Modern Standard Korean II

Hours: 48T/48S

As a continuation of EAS110Y1, this course is designed to help students improve their skills in the Korean language. Students in this course are expected to perform basic communicative functions, read and write paragraph-level texts, and conjugate verbs/adjectives accurately. Students who do not meet the prerequisite must go through placement process conducted by the Department. See www.eas.utoronto.ca/languages/korean for details.

Prerequisite: EAS110Y1 (63% minimum)/equivalent as determined by the Korean placement interview
Exclusion: EAS211Y1,EAS212H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

EAS211Y1 - Accelerated Modern Standard Korean I & II

Hours: 96L

Covering both EAS110Y1 and EAS210Y1, the course is ideal for self-motivated students who enjoy fast-paced language learning, students with a passion for Korean films and television, students with some listening and speaking skills from prior study or family background, and students taking the full four-year course series. Successful completion of the course fulfills the prerequisite for EAS310Y1. Students must go through screening process conducted by the Department. See www.eas.utoronto.ca/languages/korean for details.

Exclusion: EAS110Y1,EAS210Y1,EAS212H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

EAS212H1 - Accelerated Modern Standard Korean II

Hours: 48L

As a continuation of EAS110Y1, this course is designed to help students increase their Korean communication skills at beginner high to intermediate low levels. It is ideal for self-motivated students who enjoy fast-paced language learning, and students who have built basic language skills from prior study. Successful completion of the course fulfills the prerequisite for EAS310Y1. Students must go through screening process conducted by the Department. See www.eas.utoronto.ca/languages/korean for details.

Prerequisite: EAS110Y1 (70% minimum)/equivalent as determined by the Korean placement process.
Exclusion: EAS210Y1,EAS211Y1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

EAS310Y1 - Modern Standard Korean III

Hours: 96S

As a continuation of EAS210Y1 and EAS211Y1, this course is designed to help students improve their Korean proficiency at the intermediate level. The class focuses not only on oral fluency and grammar but also on reading comprehension. Students who do not meet the prerequisite must go through placement process conducted by Department. See www.eas.utoronto.ca/languages/korean for details.

Prerequisite: EAS210Y1 (67%)/EAS211Y1 (67%)/EAS212H1 (67%)/equivalent as determined by placement process
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

EAS410Y1 - Modern Standard Korean IV

Hours: 96S

As a continuation of EAS310Y1, this course is designed for advanced-level learners of Korean. Through reading short essays/articles and watching films, this course aims to improve students’ proficiency in speaking, writing, listening, and reading. Classroom and online discussions are conducted entirely in Korean. Students who do not meet the prerequisite must go through placement process conducted by the Department. See www.eas.utoronto.ca/languages/korean for details.

Prerequisite: EAS310Y1 (70% minimum)/equivalent as determined by placement process
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

EAS416Y1 - Academic and Professional Korean

Hours: 96S

This course aims to assist students to upgrade their language proficiency for academic and professional purposes. It is ideal for students who seek career opportunities in Korea-related business or in higher education in Korean studies. Emphasis is on comprehension and composition of academic and business texts and preparation for Korean proficiency tests. Students who do not meet the prerequisite must go through placement process conducted by the Department. See www.utoronto.ca/languages/korean for details.

Prerequisite: EAS310Y1 (70% minimum)/equivalent as determined by placement process.
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)
Ecology and Evolutionary Biology

Faculty List

Professors Emeriti
P.A. Abrams, B Sc, Ph D, FRSC
S.C.H. Barrett, B Sc, Ph D, FRSC, FRS
D.R. Brooks, MS, Ph D, FRSC
D.G. Butler, M Sc, Ph D, D Sc, FRSA
T.J. Carleton, B Sc, Ph D
C.S. Churcher, M Sc, Ph D
N.G. Dengler, MS, Ph D
S.S. Desser, M Sc, Ph D
T.A. Dickinson, B Sc, Ph D
D.W. Dunham, BS, Ph D
J.E. Eckenwalder, M Sc, Ph D
J.B. Falls, BA, Ph D CM
C.A. Goldman, M Sc
R.I.C. Hansell, B Sc, Ph D
H.H. Harvey, M Sc, Ph D
D.A. McLennan, M Sc, Ph D
R.C. Plowright, MA, Ph D
H.A. Regier, MS, Ph D CM
G.M. Telford, B Sc, Ph D
J.D. Thomson, MS, Ph D, FRSC
A. P. Zimmerman, BA, Ph D

University Professors
M.B. Sokolowski, B Sc, Ph D, FRSC

Distinguished Professor and Associate Chair, Graduate Studies
A. Agrawal, B Sc, Ph D

Distinguished Professors
L. Rowe, B Sc, Ph D, FRSC
J.R. Stinchcombe, BA, Ph D

Professor and Chair of the Department
S.I. Wright, M Sc, Ph D

Professors
B. Chang, AB, Ph D
A.D. Cutter, B Sc, Ph D
M.-J. Fortin, M Sc, Ph D, FRSC
M.R. Gross, B Sc, Ph D
D.A. Jackson, M Sc, Ph D
R. Murphy, MA, Ph D
F.H. Rodd, M Sc, Ph D
R.F. Sage, MS, Ph D
A.E. Weis, BA, Ph D

Associate Professor and Associate Chair, Undergraduate Studies
B. Gilbert, M Sc, Ph D

Associate Professors
J-B. Caron, M Sc, PhD
D.C. Currie, B Sc, Ph D
H. Cyr, M Sc, Ph D
C. Darling, M Sc, Ph D
M.E. Engstrom, M Sc, Ph D
D. Evans, B Sc, Ph D
M.E. Frederickson, AB, Ph D
M. Krkosek, B Sc, Ph D
N. Mideo, B Sc, Ph D
J.M. Moncalvo, M Sc, Ph D
T.L. Sage, MS, Ph D

Assistant Professors
S. Claramunt, B Sc, Ph D
S.B. Kvist, MS, Ph D
D.L. Mahler, BA, Ph D
M.M. Osmond, B Sc, M Sc, Ph D
C.M. Rochman, B Sc, Ph D
N. Rollinson, M Sc, Ph D
J. Sztepanacz, M Sc, Ph D

Introduction

Ecology and evolutionary biology (EEB) seeks to understand the origins, diversity, and distribution of organisms. All life evolves. All life sciences, along with evidence-based stewardship of life on planet Earth, depend on understanding the factors that influence the origin and maintenance of biological diversity – from genomes to ecosystems. Understanding EEB helps society to make informed decisions about sustainable development, global climate change, invasive species, harvested natural resources, preservation of biodiversity, genetic diversity and ecosystem integrity, control of herbicide and pesticide resistance, antibiotic and drug resistance, and emerging infectious diseases.

Students exposed to these subjects come to realize that the ecological and evolutionary underpinnings of life pose a constellation of engaging scientific problems that are both intellectually challenging and critical to humanity’s future. EEB graduates go on to successful careers in data science, research, medicine and healthcare, government ministries like MNR and DFO, environmental and conservation NGO’s and consulting firms, and many other industries. As members of one of the highest ranked EEB departments in the world and the largest EEB department in Canada, EEB students are uniquely positioned to enhance their scientific literacy as the future decision-makers and knowledge-creators in society.

The EEB Department offers a diverse collection of over 50 courses that explore biological diversity, conservation biology, molecular evolution, population and quantitative genetics, computational and statistical data analysis, genomics, animal behaviour, the ecology of populations, communities, and ecosystems, mathematical theory in biology, environmental biology, and systematics. EEB faculty include Curators from the Royal Ontario Museum. Students participate in diverse learning environments within EEB courses: hands-on bench and computer lab practicals, field trips, off-campus field courses in Ontario and internationally, small-class discussion seminars, and independent research projects with world-leading faculty researchers. Students enrolled in EEB courses and programs become part of a welcoming and supportive community of scholars.

The EEB Department offers five core Programs of Study (POST): Ecology & Evolutionary Biology (Specialist and Major); Biodiversity & Conservation Biology (Major). Environmental Biology (Major and Minor). Students enrolled in EEB programs are invited to participate in the EEB PMP peer-mentoring program for Co-Curricular Record credit as a mentee in 2nd year or as a mentor in upper years, and to attend the EEB Info Session Series for advising about career options, applying for scholarships and grad school, and seeking out research opportunities.

Students with questions and advising needs about EEB-sponsored programs are encouraged to visit the departmental website.
Ecology and Evolutionary Biology Program Goals

Ecologists and evolutionary biologists recognize that all life has evolved and that an understanding of the factors influencing the origin and maintenance of biological diversity – from genomes to ecosystems – underlies all life sciences and is critical to our stewardship of life on this planet. EEB aims to produce citizens who are literate in the ecological and evolutionary principles that form the foundation for understanding life on Earth, how human and natural factors influence nature, and how changes to nature influence public health, the economy, and other societal priorities. The EEB-sponsored programs of study prepare students in these foundations of life science for future careers in data science, research, medicine and healthcare, government agencies like MNR and DFO, environmental and conservation NGO's, and many other industries.

Ecology and Evolutionary Biology Programs

Ecology and Evolutionary Biology Specialist (Science Program) - ASSPE1006

Description:

The Ecology & Evolutionary Biology Specialist program (12 FCEs) provides an in-depth understanding of ecological and evolutionary patterns and processes, as well as the diversity of life forms (microbes, fungi, plants, animals). Concepts are taught using a broad array of approaches, including molecular studies, laboratory experiments, computer and mathematical modeling, and field studies. An integral part of the experience is to conduct independent research projects in the laboratory and/or field. There is a strong emphasis within the program on hands-on laboratory and fieldwork that complement the conceptual framework developed in lectures. Students in this program have the opportunity to concentrate in ecology, evolutionary biology, or behaviour.

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

(12 FCEs including at least 4.0 FCEs at the 300+ series level, 1.0 of which must be at the 400 series level)

First Year (3.0 FCEs): BIO120H1; BIO130H1; (CHM135H1, CHM136H1)/CHM151Y1; (MAT135H1, MAT136H1)/MAT137Y1/MAT157Y1

1. 2.0 FCEs: BIO220H1 (ecology and evolutionary biology); BIO230H1/BIO255H1 (molecular and cell biology); BIO260H1/HMB265H1 (genetics); BIO251H1/BIO270H1/PSL300H1/ENV234H1 (plant or animal form and function/environmental biology); Please note: ENV234H1 environmental biology cannot be substituted with EEB375H1.

2. 0.5 FCE in statistics from: EEB225H1 (recommended)/STA220H1/STA237H1/STA288H1/GGR270H1/PSY201H1

3. 0.5 FCE in core evolution from: EEB318H1; EEB323H1; EEB362H1

4. 0.5 FCE in core ecology from: EEB319H1; EEB320H1; EEB321H1; EEB322H1

5. 0.5 FCE in organismal biology from: EEB263H1; EEB266H1; EEB267H1; EEB268H1; EEB331H1; EEB340H1; EEB380H1; EEB382H1; EEB384H1; EEB386H1; EEB388H1

6. 1.0 FCE at 300+ series, from: EEB313H1; EEB318H1; EEB319H1; EEB320H1; EEB321H1; EEB322H1; EEB323H1; EEB324H1; EEB325H1; EEB326H1; EEB328H1; EEB331H1; EEB340H1; EEB341H1; EEB342H1; EEB345H1; EEB346H1; EEB348H1; EEB356H1; EEB362H1; EEB365H1; EEB368H1; EEB380H1; EEB382H1; EEB384H1; EEB386H1; EEB388H1; EEB390H1; EEB398H1; EEB399Y1; EEB428H1; EEB430H1; EEB433H1; EEB440H1; EEB441H1; EEB455H1; EEB466H1; EEB469H1; EEB491H1; EEB495H1; EEB499H1; EEB521H1; ENV234H1; ENV343H1; ENV432H1; ENV539Y1; NUS301H0; NUS302H0; NUS303H0; NUS304H0; NUS401H0

*More information about NUS courses and programs can be found on the Biology Calendar section

Sub-total = 8.0 FCEs

7. 1.0 to 1.5 FCEs in at least two of the three following categories: (1) one field course (0.5 FCE) from EEB403H0; EEB403H1; EEB405H0; EEB405H1; EEB406H0; EEB406H1; EEB440H1; EEB440H2; EEB441H1; EEB445H1; EEB449H1; EEB455H1; and/or (2) one seminar (0.5 FCE) from EEB491H1; EEB495H1; and/or (3) one independent research course (0.5 FCE) from EEB497H1 (1.0 FCE) from EEB498Y1

Sub-total = 9.0 or 9.5 FCEs (depending on options chosen in #7)

8. Select the remaining FCEs for a total of 12.0 FCEs (at least 1.0 must be 300+ series if 1.0 FCE is completed in #7 above) from: BIO251H1; BIO270H1/PSL300H1; BIO271H1/PSL301H1; all EEB courses (excluding EEB197H1; EEB198H1; EEB199H1; EEB202H1; EEB208H1; EEB214H1; EEB215H1; EEB224H1; EEB263H1; EEB266H1; EEB267H1; EEB268H1; EEB331H1; EEB340H1; EEB380H1; EEB382H1; EEB384H1; EEB386H1; EEB388H1; EEB390H1; EEB398H1; EEB399Y1; EEB428H1; EEB430H1; EEB433H1; EEB440H1; EEB441H1; EEB455H1; EEB466H1; EEB469H1; EEB491H1; EEB495H1; EEB499H1; EEB499Y1; EEB521H1; ENV234H1; ENV343H1; ENV349H1; ENV432H1; EHN352H1; ENV334H1; ENV335H1; ENV432H1; ENV343H1; ENV349H1; ENV432H1; EHN352H1; ENV334H1; ENV335H1; and no more than 1.0 FCE from the following (note that some courses may require prerequisites that are not listed within this program): ANT336H1; ANT333Y1; ANT335Y1; ANT338H1; ANT430H1; ANT436H1; CSB328H1; CSB340H1; CSB349H1; CSB350H1; CSB352H1; CSB353H1; CSB340H1; CSB431H1; CSB452H1; CSB458H1; CSB472H1; CSB474H1; ENV334H1; ENV343H1; ENV349H1; ENV335H1; ENV334H1; and no more than 1.0 FCE from the following (note that some courses may require prerequisites that are not listed within this program): ANT336H1; ANT333Y1; ANT335Y1; ANT338H1; ANT430H1; ANT436H1; CSB328H1; CSB340H1; CSB349H1; CSB350H1; CSB352H1; CSB353H1; CSB340H1; CSB431H1; CSB452H1; CSB458H1; CSB472H1; CSB474H1; ENV334H1; ENV343H1; ENV349H1; ENV335H1; ENV334H1; and no more than 1.0 FCE from the following (note that some courses may require prerequisites that are not listed within this program): ANT336H1; ANT333Y1; ANT335Y1; ANT338H1; ANT430H1; ANT436H1; CSB328H1; CSB340H1; CSB349H1; CSB350H1; CSB352H1; CSB353H1; CSB340H1; CSB431H1; CSB452H1; CSB458H1; CSB472H1; CSB474H1; ENV334H1; ENV343H1; ENV349H1; ENV335H1; ENV334H1;
Biodiversity and Conservation Biology Major (Science Program) - ASMAJ0110

Description:

In today's era of unprecedented global change, natural ecosystems are under attack and thousands of species are threatened with extinction and many more have experienced unprecedented declines. Students in the Biodiversity & Conservation Biology Major program (8 FCEs) will be equipped to aid in the response to what is perhaps humanity's most pressing challenge, the conservation of biological diversity. Students in this program take courses in their first and second years that provide foundations in ecology, evolutionary biology, biodiversity and conservation biology, environmental biology, mathematics, and statistics. In their upper years students will obtain in-depth knowledge about the diversity of living organisms and take advanced courses in ecology, evolution, and biodiversity and conservation biology, including a capstone course at the 400-level.

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

(8 FCEs including at least 2.0 FCEs at 300+ series with at least 0.5 FCE at the 400 level series)

First Year (1.0 FCE): BIO120H1; MAT135H1/ MAT137Y1/ MAT221H1/ MAT223H1

Higher Years:

1. 2.0 FCEs: BIO220H1 (ecology and evolutionary biology); EEB225H1 (recommended)/ STA220H1/ STA257H1/ STA288H1/ GGR270H1/ PSY201H1 (statistics); EEB255H1 (conservation biology); ENV234H1 (environmental biology; cannot be substituted with EEB375H1)

2. 1.5 FCEs in organismal biology (with at least 0.5 FCE from Group 1 and 0.5 FCE from Group 2) from:
   Group 1 (plant or microbial): BIO251H1; EEB268H1; EEB331H1; EEB340H1; FOR305H1
   Group 2 (animal): EEB263H1; EEB266H1; EEB267H1; EEB380H1; EEB382H1; EEB384H1; EEB386H1; EEB388H1

3. 0.5 FCE in core evolution: EEB318H1, EEB323H1, EEB362H1

4. 0.5 FCE in core ecology from: EEB319H1, EEB320H1, EEB321H1, EEB328H1

5. 0.5 FCE: EEB365H1 (applied conservation biology)

6. 1.5 FCEs from: BIO130H1; BIO251H1; EEB263H1; EEB266H1; EEB267H1; EEB268H1; EEB313H1; EEB318H1; EEB319H1; EEB320H1; EEB321H1; EEB322H1; EEB323H1; EEB324H1; EEB325H1; EEB326H1; EEB328H1; EEB329H1; EEB331H1; EEB333H1; EEB337H1; EEB340H1; EEB362H1; EEB365H1; EEB380H1; EEB382H1; EEB384H1; EEB386H1; EEB388H1; EEB390H1; EEB397Y1; EEB398H1; EEB399Y0; EEB428H1; EEB430H1; EEB433H1; EEB440H1; EEB444H1; EEB445H1; EEB449H1; EEB450H1; EEB459H1; EEB469H1; EEB470H1; EEB471H1; EEB472H1; EEB475H1; EEB478H1; EEB499Y1; EEB552H1; ENV334H1; ENV432H1/ FOR200H1; FOR201H1; FOR307H1; FOR413H1; GGR272H1; JHE353H1; JHE355H1/ NUS

7. 0.5 FCE at 400 series from: EEB465H1; EEB466H1; field course: EEB403H0, EEB403H1, EEB405H0, EEB406H0, EEB406H1, EEB407H0, EEB407H1, EEB410H0, EEB410H1; seminar: EEB491H1, EEB495H1, EEB497H1; research project: EEB498Y1 (recommended research subject in biodiversity and/or conservation biology) and concurrent research issues course EEB488H1 (0.5 FCE)

NOTE: BIO260H1/HMB265H1 (genetics) is recommended. Note that both BIO260H1 and HMB265H1 require BIO130H1 and BIO230H1/ BIO255H1/ BIO230H1/ BIO255H1 require both CHM135H1 and CHM136H1

Students interested in law, economics, policy, or environmental studies may choose to pair their Biodiversity and Conservation Biology Major with another Major such as Economics, Environmental Ethics, or Environmental Studies (all three are Arts programs), or Science programs (e.g., School of the Environment programs).

Ecology & Evolutionary Biology Major (Science Program) - ASMAJ1006

Description:

The Ecology & Evolutionary Biology Major program (8 FCEs) provides a comprehensive understanding of ecological and evolutionary patterns and processes, as well as the diversity of life forms (microbes, fungi, plants, animals). Concepts are taught using a broad array of approaches, including molecular studies, laboratory experiments, computer and mathematical modeling, and field studies. An integral part of the experience is to conduct independent research projects in the laboratory and/or field. There is a strong emphasis within the program on hands-on laboratory and fieldwork that complement the conceptual framework developed in lectures.
Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

(8 FCEs including at least 2.0 FCEs at 300+ series with at least 0.5 FCE at the 400 series level)

First Year (2.0 FCEs): BIO120H1; BIO130H1; (CHM135H1, CHM136H1)/CHM151Y1

Higher Years:

1. 2.0 FCEs: BIO220H1; BIO230H1; BIO255H1; BIO260H1/ HMB265H1; EEB225H1/ STA220H1/ STA257H1/ STA288H1/ GGR270H1/ PSY201H1
2. 1.0 FCE from: BIO251H1, BIO270H1/ PSL300H1, BIO271H1/ PSL301H1, EEB263H1, EEB266H1, EEB267H1, EEB268H1, ENV234H1
3. 0.5 FCE in core ecology and evolution from: EEB318H1, EEB319H1, EEB320H1, EEB321H1, EEB322H1, EEB328H1, EEB362H1

4. 1.5 FCEs from: EEB313H1, EEB318H1, EEB319H1, EEB320H1, EEB321H1, EEB322H1, EEB323H1, EEB324H1, EEB325H1, EEB328H1, EEB331H1, EEB332H1, EEB336H1, EEB375H1, EEB380H1, EEB382H1, EEB384H1, EEB386H1, EEB388H1, EEB390H1, EEB397Y1, EEB398H0, EEB399Y1, EEB428H1, EEB430H1, EEB433H1, EEB440H1, EEB441H1, EEB455H1, EEB459H1, EEB460H1, EEB464H1, EEB465H1, EEB466H1, EHB352H1, ENV432H1, NUS201H0, NUS301H0, NUS302H0, NUS303H0, NUS304H0, NUS401H0; PSY305H1

*More information about NUS courses and programs can be found on the Biology Calendar section

5. 0.5 FCE from: BIO251H1; BIO270H1/ PSL300H1, BIO271H1/ PSL301H1, EEB (excluding EEB197H1, EEB198H1, EEB199H1, EEB202H1, EEB206H1, EEB214H1, EEB215H1), ENV234H1, ENV334H1, ENV432H1, EHB352H1, JHE353H1, MAT135H1, MAT136H1, MAT137Y1, MAT221H1/ MAT223H1; or PHY131H1/ PHY151H1/ PHY152H1

*More information about NUS courses and programs can be found on the Biology Calendar section

6. 0.5 FCE at the 400-series from: field course, EEB403H0, EEB405H0, EEB406H0, EEB406H1, EEB407H0, EEB407H1, EEB410H0, EEB410H1; seminar, EEB419H1, EEB495H1; independent research project course, EEB497H1, EEB498Y1 (concurrent with research issues course EEB488H1); advanced lecture/discussion course, EEB428H1, EEB430H1, EEB433H1, EEB440H1, EEB455H1, EEB459H1, EEB460H1, EEB465H1, EEB466H1, ENV432H1

Environmental Biology Major (Science Program) - ASMAJ1390

Description:

Environmental science is an interdisciplinary field that integrates biological, chemical, and physical sciences to study human interactions with their environment. The Environmental Biology Major program (8 FCEs) provides a broad background in biology that is essential to understand the impact of humans on other organisms and their environments. It provides students with an understanding of ecology, the diversity and function of living organisms, the physical and chemical environment, and the ways organisms interact with, and affect, ecosystem processes. Students are exposed to ecosystem management, issues related to environmental change, and the consequences of interactions between humans and the environment.

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

(8 FCEs including at least 2.0 FCEs at 300+ series with at least 0.5 FCE at the 400 level series)

First Year (2.0 FCEs): BIO120H1; (CHM135H1, CHM136H1)/ CHM151Y1, MAT135H1, MAT136H1, MAT137Y1/ MAT221H1/ MAT223H1 or PHY131H1/ PHY151H1, or BIO130H1

1. 2.0 FCEs: BIO220H1 (ecology and evolutionary biology); ENV234H1 (cannot be substituted with EEB375H1 for this requirement), ENV334H1 (environmental biology)/ EEB225H1 (recommended)/ STA220H1/ STA257H1/ STA288H1/ GGR270H1/ PSY201H1 (statistics)

2. 0.5 FCE in biological diversity and function from: BIO251H1, BIO270H1, EEB266H1, EEB267H1, EEB340H1, BIO260H1/ HMB265H1 (note that both require BIO130H1 and BIO230H1/ BIO255H1)

3. 0.5 FCE in physical environment from: CHM210H1, ENV238H1, ENV239H1, ENV240H1, ESS223H1, ESS267H1, ESS326H1, GGR201H1, GGR203H1, GGR205H1, GGR206H1, PHY131H1, PHY132H1, PHY151H1, PHY152H1

4. 1.0 FCE in core ecology from: EEB319H1, EEB320H1, EEB321H1, EEB322H1, EEB324H1, EEB328H1

5. 1.5 FCEs from: EEB313H1, EEB319H1, EEB320H1, EEB321H1, EEB322H1, EEB324H1, EEB325H1, EEB328H1, EEB335H1, EEB336H1, EEB386H1, EEB403H0, EEB405H0, EEB406H0, EEB406H1, EEB407H0, EEB407H1, EEB410H0, EEB410H1, EEB428H1, EEB430H1, EEB433H1, EEB441H1, EEB449H1, EEB497H1, EEB498Y1, EEB499Y1, ENV316H1, ENV337H1, ENV432H1, ENV452H1, ESS311H1, ESS361H1, ESS362H1, ESS462H1, ESS463H1, ESS464H1, FOR305H1, FOR407H1, FOR418H1, GGR305H1, GGR307H1, GGR308H1, JFG470H1

6. 0.5 FCE at the 400-series from: field course EEB403H0, EEB405H0, EEB406H0, EEB406H1, EEB407H0, EEB407H1, EEB410H0, EEB410H1, EEB428H1, EEB430H1, EEB433H1, EEB495H1, EEB499H1, EEB499Y1, (concurrent with research issues course EEB488H1), EEB499Y1

This program can be combined with other Environmental programs (see School of the Environment), as well as Science (e.g., Chemistry, Earth Sciences) and Social Science (e.g., Economics) programs.
Environmental Biology Minor (Science Program) - ASMIN1390

Description:

Environmental science is an interdisciplinary field that integrates biological, chemical, and physical sciences to study human interactions with their environment. The Environmental Biology Minor program (4 FCEs) provides students an introduction to biology that is essential to understand the impact of humans on other organisms and their environments. It provides students with an understanding of ecology, the diversity and function of living organisms, the physical and chemical environment, and the ways organisms interact with, and affect, ecosystem processes. Students are exposed to ecosystem management, issues related to environmental change, and the consequences of interactions between humans and the environment.

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

(4 FCEs; must include at least one full-course equivalent at the 300+ series)

1. 1.5 FCEs: BIO120H1; BIO220H1; ENV234H1 (cannot be substituted with EEB375H1)

2. 0.5 FCE in organismal biology: EEB266H1, EEB267H1, EEB268H1

3. 2.0 FCEs (at least 1.0 FCEs at 300+ series)

A. core ecology and evolution (no more than 1.0 FCEs): EEB318H1, EEB319H1, EEB320H1, EEB321H1, EEB322H1, EEB324H1, EEB328H1

B. biological diversity (no more than 0.5 FCE): EEB263H1, EEB266H1, EEB267H1, EEB268H1, EEB331H1, EEB340H1, EEB380H1, EEB382H1, EEB384H1, EEB386H1, EEB388H1

C. field courses (no more than 0.5 FCE): EEB403H0, EEB403H1, EEB405H0, EEB406H0, EEB407H0, EEB407H1, EEB410H0, EEB410H1

D. no more than 1.0 FCEs from: BIO251H1, EEB255H1, EEB362H1, EEB365H1, EEB428H1, EEB433H1, ENV334H1 (recommended), ENV432H1; NUS201H0, NUS301H0, NUS302H0, NUS303H0, NUS304H0, NUS401H0*

*More information about NUS courses and programs can be found on the Biology Calendar section

General Biology Programs: see Biology

The University of Toronto has an enormous depth of faculty members on the St. George campus who conduct leading-edge research and teach courses in the biological sciences. Within the Faculty of Arts and Science, St. George campus, there is no single biology department; members of the Departments of Ecology & Evolutionary Biology (EEB) and Cell & Systems Biology (CSB) teach biology courses across the broad spectrum of introductory to advanced topics. These departments jointly offer the Biology Programs of Study to provide broad-based training in biological sciences. Students requiring more information about these programs and their course requirements should consult the Biology Calendar page.

The Biology Specialist, Major and Minor programs are administered by the Department of Ecology & Evolutionary Biology. Students with questions and advising needs about these programs are encouraged to visit the departmental website http://www.eeb.utoronto.ca/undergrad.htm or to contact the EEB Undergraduate Office, Earth Sciences Centre (25 Willcocks St.), Room 3055B, undergrad.eeb@utoronto.ca, 416-978-2084.

Co-sponsored Programs in Genomics and Informatics: see Biology

The Department of Ecology & Evolutionary Biology also co-sponsors the Bioinformatics & Computational Biology (Specialist) and Genome Biology (Major) programs. These programs are administered by the Department of Cell & Systems Biology. Students requiring more information about these programs and their course requirements should consult the Biology Calendar page.

Enrolment requirements, 1st year courses, advising and mentorship

All EEB programs have unlimited enrolment and no specific admission requirements. All students who have completed at least 4.0 FCE of courses are eligible to enroll in a Program of Study (FCE=full-course equivalents, most single-semester courses are 0.5 FCE). Program completion requires 12.0-12.5 FCE of courses for a Specialist, 8.0 FCE for a Major, or 4.0 FCE for a Minor. To fulfill graduation degree requirements, students must complete either one Specialist, two Majors, or one Major with two Minors. Students may choose a Specialist to focus in-depth on a single subject area or may pair complementing Majors (or Minors) to customize their education and training to encompass the breadth of their interests.

Students entering their first year in the life sciences take BIO120H1 (“Adaptation and Biodiversity” offered by EEB) and BIO130H1 (“Molecular and Cell Biology” offered by CSB). These courses are taken by students who have successfully completed Grade 12 Biology (SB4U or an equivalent course). BIO130H1 also requires Grade 12 Chemistry (SCH4U or an equivalent course). One or both of these courses are a prerequisite for almost all further courses in the life sciences. Students requiring more information about BIO120H1 please contact the BIO120 Office, Ramsay Wright Zoological Laboratories (25 Harbord St.), Room 105E, bio120@utoronto.ca

Students requiring more information about EEB programs and courses please visit the departmental website or contact the Undergraduate Office, Earth Sciences Centre (25 Willcocks St.), Room 3055B, undergrad.eeb@utoronto.ca, 416-978-2084.

EEB website: http://www.eeb.utoronto.ca/undergrad.htm

Students enrolled in EEB programs are encouraged to participate in the EEB-PMP peer-mentorship program for Co-Curricular Record credit as a mentee in 2nd year or as a mentor in upper years, and to

324
Ecology and Evolutionary Biology

Breadth courses for students in programs outside of the life sciences:

- EEB197H1 - Biodiversity and the City
- EEB198H1 - Genes and Behaviour
- EEB199H1 - Humans, Evolution and Ecology
- EEB202H1 - Plants and Society
- EEB208H1 - Ecosystems and the Human Footprint
- EEB214H1 - Evolution and Adaptation
- EEB215H1 - Conservation Biology

BIO120H1 - Adaptation and Biodiversity

Hours: 24L/15P

Prerequisite: Grade 12 Biology or equivalent. Students without high school Biology must consult the BIO120 Office (bio120@utoronto.ca)

Distribution Requirements: Science

Breadth Requirements: Living Things and Their Environment (4)

EEB197H1 - Biodiversity and the City

Hours: 24L

Most of us are urban creatures, but we as people are not the only urban creatures. In this seminar we will explore the diversity of animal and plant species comprising the ecological community that we call “Toronto”. We will learn their names, whether they are endemic (from here originally) or newcomers, general aspects of their biology that suit them to living in an urban environment, how natural selection shapes the traits similarly and differently for species in urban versus wilderness settings, and what happens when the wild and the domesticated members of the community meet one another. For non-science students in all years and disciplines. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Science

Breadth Requirements: Living Things and Their Environment (4)
In this course you will experience the new paradigm in behaviour genetic research. You will learn why the concept of a nature-nurture dichotomy is passé and that it has been replaced by a new understanding gained from animal and human research in the areas of gene by environment interaction and epigenetics. We will discuss how our genome listens to our environment and the effect this has on our health and behaviour. We will learn why our early experiences are critical for the development of our brains and our bodies. Together this new body of knowledge will help us understand how individual differences in behaviour and health arise. For non-science students in all years and disciplines. Restricted to first-year students. Not eligible for CR/NCR option.

**Distribution Requirements:** Science
**Breadth Requirements:** Living Things and Their Environment (4)
BIO220H1 - From Genomes to Ecosystems in a Changing World

Hours: 24L/15P

Dynamics of genetic and ecological change in biological systems, from genomes to ecosystems. Evolutionary genetic and ecological perspectives on wide-ranging topics including disease, aging, sexual conflict, genetics of human differences, conservation, and global climate change. Applications of evolutionary, ecological, and molecular-genetic principles and processes. Responsibilities of human societies in a changing world. (Lab Materials Fee: $25).

Prerequisite: BIO120H1
Recommended Preparation: BIO130H1, BIO230H1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

EEB225H1 - Biostatistics for Biological Sciences

Hours: 36L/12P

A statistics course designed especially for life science students, using examples from ecology and evolution where appropriate. Students learn to choose and use statistics that are appropriate to address relevant biological questions and hypotheses. Lectures and computer labs will be used to cover the following methods: sampling and experimental design, data exploration, correlation, regression, ANOVA, Chi-square, and non-parametric tests.

Prerequisite: BIO120H1
Exclusion: BIO225H1/ ECO220Y1/ ECO227Y1/ GGR270H1/ HMB325H1/ PCL376H1/ PSY201H1/ SOC300Y1/ STA220H1/ STA250H1/ STA288H1
Distribution Requirements: Science

ENV234H1 - Environmental Biology: Structure and Function of Ecosystems

Hours: 24L/18P

This multidisciplinary course draws on elements from geology, soil science, and ecology to understand past and present environments and human impacts on landscapes and ecosystems. Emphasis on the structure, functioning and connectivity of aquatic and terrestrial ecosystems. Field trips and labs. Mandatory day-long field trip on a Friday or Saturday in late September or early October (students choose which day; a small fee may be charged for transportation.) (Lab Materials Fee: $25)

Prerequisite: BIO120H1/JEG100H1 (recommended)/FOR200H1/ FOR201H1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

BIO251H1 - Form, Function and Development in Plants

Previous Course Number: BIO251Y1
Hours: 24L/18P

Introduction to structure, function, and ecology of vegetative and reproductive processes in plants with a focus on flowering plants and gymnosperms. Lectures and labs emphasize photosynthesis, respiration, mineral nutrition, transport processes, patterns of plant growth and development, the role of hormones in development, phomorphogenesis, and plant reproduction. (Lab Materials Fee: $25).

Prerequisite: BIO120H1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

EEB255H1 - Essentials of Biodiversity Science and Conservation Biology

Hours: 24L/24T

"Classical” and “new” concepts in biodiversity and conservation. Topics may include: evolution and ecology in the past (Holocene) and future (Anthropocene); levels and kinds of biodiversity; valuing biodiversity through ecological economics; causes of endangerment; predicting extinction; genetic and demographic theory; habitat protection and captive breeding; conservation policies and endangered species acts; designing future biodiversity.

Prerequisite: BIO120H1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

EEB263H1 - Comparative Vertebrate Anatomy

Hours: 24L/36P

The ontogeny and phylogeny of vertebrate structure are considered within the context of evolutionary theory. Functional aspects of the various organ systems are examined. Representative vertebrates are analyzed (with brief dissection of some forms) in laboratory to illustrate selected anatomical features and to provide practical exposure to vertebrate construction. (Lab Materials Fee: $25)

Prerequisite: BIO120H1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)
EEB266H1 - Animal Diversity: Invertebrates

Hours: 24L/18P

The diversity of invertebrates (e.g. sponges, jellyfish, flatworms, molluscs, segmented worms, round worms, arthropods, echinoderms and several smaller phyla) is explored, focusing on taxonomic characters that define each group and their placement in the evolutionary tree of life, ecological function, biological requirements, and geographical distribution. Labs emphasize identification and recognition of major groups, including dissection when appropriate. (Lab Materials Fee: $25)

Prerequisite: BIO120H1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

EEB267H1 - Animal Diversity: Vertebrates

Hours: 24L/18P

Introduction to the diversity of chordate animals (vertebrates, tunicates, and lancelets), focusing on morphological, physiological, ecological and behavioural traits that make each group special and how those traits increase vulnerability to human-based exploitation. Labs involve living organisms whenever possible, but only for display purposes.

Prerequisite: BIO120H1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

EEB268H1 - Plant and Microbial Diversity

Hours: 24L/36P

Introduction to the biology of algae, fungi, and land plants. Lectures and labs emphasize the diversity of organisms with a focus on life cycles, ecology, and evolution. (Lab Materials Fee: $25)

Prerequisite: BIO120H1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

EEB299Y1 - Research Opportunity Program

Credit course for supervised participation in faculty research project. Details at https://www.artsci.utoronto.ca/current/academics/research-opportunities/research-opportunities-program. Not eligible for CR/NCR option.

Distribution Requirements: Science

EEB313H1 - Quantitative Methods in R for Biology

Hours: 24L/24P

The quantitative analysis and management of biological data is crucial in modern life sciences disciplines. Students will develop skills with R as applied to problems in ecology and evolutionary biology to learn reproducible approaches for data management, data manipulation, visualization, modelling, statistical analysis, and simulation for solving biological problems.

Prerequisite: BIO220H1, EEB225H1/STA288H1/STA220H1
Exclusion: STA130H1, PSY305H1
Recommended Preparation: CSC108H1/CSC120H1/CSC121H1
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

EEB318H1 - Principles of Evolution

Hours: 24L/12T

Principles and practice of evolutionary biology since Darwin. Topics may include: phylogeny, speciation, mutation and neutral evolution, population genetic variation, quantitative genetics, molecular evolution, natural selection and adaptation, evolutionary conflict and cooperation, and levels of selection.

Prerequisite: BIO220H1
Exclusion: Students who have taken EEB323H1/EEB324H1 cannot take (or concurrently take) EEB318H1. Students who have completed EEB318H1 may take EEB323H1/EEB324H1/EEB362H1.
Recommended Preparation: BIO260H1/HMB265H1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

EEB319H1 - Population Ecology

Hours: 24L/36P

Abundance and distribution of populations; population growth and regulation; fluctuations, stochasticity and chaos; meta-population persistence and extinction; age and stage-structured populations; interactions within and between species; optimal harvesting; spread of infectious diseases. Labs include experiments and computer simulations. (Lab materials fee: $25)

Prerequisite: BIO220H1; (MAT135H1,MAT136H1)/MAT137Y1/MAT157Y1; and a course in statistics from EEB225H1 (recommended), PSY201H1, STA220H1/STA250H1/STA257H1, STA288H1/GGR270H1, HMB325H1
Recommended Preparation: ENV234H1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)
EEB320H1 - Dynamics of Ecosystem Processes

Hours: 24L/24P

This course explores the relationships and feedback between biological communities and the abiotic factors of ecosystems. The course will cover the biogeochemical dynamics of energy and nutrients through ecosystem development and the effects of global change on these processes. The lab component of the course will apply lecture concepts and tools to specific case studies.

Prerequisite: BIO220H1
Recommended Preparation: ENV234H1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

EEB321H1 - Community Ecology

Hours: 24L/36P

Nature and analysis of community structure; disturbance and community development; species interactions; community assembly processes. Computer exercises in weekly labs provide training in sampling, simulation, and data analysis.

Prerequisite: BIO220H1 and a course in statistics from EEB225H1 (recommended), PSY201H1, STA220H1/STA250H1/STA257H1/STA288H1, GGR270H1, HMB325H1
Recommended Preparation: EEB319H1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

EEB322H1 - Behaviour and Behavioural Ecology

Hours: 24L/36P

A broad introduction to animal behaviour emphasizing concepts from ethology and behavioural ecology, including foraging, predation, mating systems, parental care and behaviour genetics. Field and laboratory studies are undertaken. (Lab Materials Fee: $25; Lab Manual Fee: $10)

Prerequisite: BIO220H1 and a course in statistics from EEB225H1 (recommended), PSY201H1, STA220H1/STA250H1/STA257H1/STA288H1, GGR270H1, HMB325H1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

EEB323H1 - Evolutionary Genetics

Hours: 36L/12T

Evolutionary biology rests on a foundation of evolutionary genetics. This course focuses on the core ideas in population genetics and extends to evolutionary genomics. Students are exposed to the mathematical theory underlying evolutionary genetics and will learn the mathematical foundations underlying these ideas. Topics include the population genetics of mutation, migration, drift, and selection, analysis of sequence variation, and the evolution of sexual reproduction.

Prerequisite: BIO220H1, BIO260H1/HMB265H1
Recommended Preparation: (MAT135H1, MAT136H1)/MAT137Y1/MAT157Y1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

EEB324H1 - Evolutionary Ecology

Hours: 36L/12T

Empirical and theoretical approaches to key areas of research including natural selection, sexual selection, and life histories. Other topics may include phenotypic plasticity, speciation, co-evolution, and quantitative genetics.

Prerequisite: EEB318H1/EEB323H1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

EEB325H1 - Evolutionary Medicine

Hours: 36L/12T

How evolutionary principles can help us better understand health and disease. Concepts from evolutionary biology (e.g., life history theory, coevolution, genomic conflict, constraints and trade-offs) will be applied to key problems in medicine and public health, including antibiotic resistance, aging, cancer, autoimmune disease, and pathogen virulence.

Prerequisite: BIO130H1, BIO220H1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)
**EEB328H1 - Physiological Ecology**

**Hours:** 24L/24T

An advanced treatment of the physiological mechanisms controlling plant and animal distribution and ecological success. Topics of focus include photosynthesis and resource balance, water and nutrient relations, temperature effects, and adaptations to abiotic stress. A fee of approximately $15 may be charged for field trip transportation.

**Prerequisite:** BIO220H1  
**Recommended Preparation:** BIO251H1/BIO270H1  
**Distribution Requirements:** Science  
**Breadth Requirements:** Living Things and Their Environment (4)

---

**EEB331H1 - Introduction to the Fungi**

**Hours:** 24L/36P

Topics include fungal systematics, morphology, physiology, and ecology. The roles of fungi in the environment and their importance to man. A weekend field trip explores the natural occurrence of fungi. Labs introduce the techniques used for morphological and molecular identification, and for isolation in pure culture. Students use fungal cultures to conduct an independent experimental research project. (Lab Materials Fee: $25).

**Prerequisite:** BIO220H1  
**Recommended Preparation:** EEB268H1  
**Distribution Requirements:** Science  
**Breadth Requirements:** Living Things and Their Environment (4)

---

**ENV334H1 - Environmental Biology: Applied Ecology**

**Hours:** 36L/12T

Applied issues in aquatic and terrestrial ecosystems, with an emphasis on land-use change and its impacts on watersheds. Topics include: ecology of agro-ecosystems and other human-managed ecosystems, bio-indicators of anthropogenic impacts, ecosystem restoration, and adaptive management. Group projects address local management/restoration issues.

**Prerequisite:** ENV234H1 and completion of 9 FCEs  
**Recommended Preparation:** a course in statistics (EEB225H1 recommended)  
**Distribution Requirements:** Science  
**Breadth Requirements:** Living Things and Their Environment (4)

---

**EEB340H1 - Comparative Plant Morphology**

**Hours:** 24L/36P

The origin of land plants and the subsequent diversification of land plant vegetative and reproductive form and function. Discussions synthesize morphological and anatomical knowledge from living organisms and fossil records with cellular, physiological, and molecular information on the developmental “tool kit” of land plants and their ancestors throughout geological time. Topics address the evolution of vegetative and reproductive meristems; stem, leaf, and root architecture; vascular tissue; the ovule habit; fertilization processes; and pollination biology. (Lab Materials Fee: $25; Lab Manual Fee: $25)

**Prerequisite:** BIO220H1  
**Distribution Requirements:** Science  
**Breadth Requirements:** Living Things and Their Environment (4)

---

**EHJ352H1 - Evolution of the Human Genome**

**Hours:** 24L/12T

Human genome diversity and evolution with a focus on current research. The course integrates applications of human evolutionary genomics to the understanding of human history and adaptation, the causes of disease, and genome structure and function. Topics include: comparative genomics, population genomics of adaptation, association mapping, repetitive/selfish DNA, and gene duplication.

**Prerequisite:** BIO220H1, BIO260H1/HMB265H1  
**Distribution Requirements:** Science  
**Breadth Requirements:** Living Things and Their Environment (4)

---

**JHE353H1 - History of Evolutionary Biology**

**Hours:** 24L/10T

An examination of major ideas about biological evolution from the 18th century to the 1930s and of their impact on scientific and social thought. Topics include the diversity of life and its classification, the adaptation of organisms to their environment, Wallace’s and Darwin’s views on evolution by natural selection, sexual selection, inheritance from Mendel to T.H. Morgan, eugenics, and the implications of evolution for religion, gender roles, and the organization of society. Offered by the Institute for the History and Philosophy of Science and Technology.

**Prerequisite:** 6 full courses or equivalent  
**Exclusion:** EEB353H1/HPS323H1/HPS353H1  
**Distribution Requirements:** Humanities; Science  
**Breadth Requirements:** Society and its Institutions (3)
JHE355H1 - History and Philosophy of Evolutionary Biology

Hours: 24L/10T

An examination of the place of the organism in evolutionary theory from the early 1900s to the present. Biology is the science of living things, and yet, paradoxically, living things—organisms—have been comprehensively left out of the Modern Synthesis theory of evolution that developed in the twentieth century. This course surveys the reasons—historical, philosophical and empirical—for the marginalisation of organisms from evolutionary theory. It examines the ways in which evolutionary developmental biology attempts to restore the organisms to a central place in evolutionary biology. Offered by faculty in the Institute for the History and Philosophy of Science and Technology.

Prerequisite: 6 full courses, including two half-courses or one full-year course in any one or more of EEB, BIO or HPS
Exclusion: EEB355H1/HPS333H1/HPS355H1
Recommended Preparation: JHE353H1
Distribution Requirements: Humanities; Science
Breadth Requirements: Society and its Institutions (3)

EEB362H1 - Macroevolution

Hours: 24L/12T

Explores patterns and processes of large-scale evolutionary change, played out over large geographic expanses and extended periods of time. Integrates information from paleontology, phylogenetics, field studies, functional biology, and experiments to link emergent evolutionary patterns to underlying evolutionary processes. Topics include: speciation, phylogenetic inference, adaptive vs. non-adaptive evolution, evolutionary constraints, diversification and extinction, evolutionary innovations, historical biogeography, and the relationship between evolutionary history and ecology. Tutorials will illustrate common analytical approaches to macroevolutionary investigation and provide in-depth exploration of landmark studies in macroevolution.

Prerequisite: BIO220H1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

EEB365H1 - Topics in Applied Conservation Biology

Hours: 24L/24P

Applied conservation biology including management (at the level of species/populations, environments/landscapes, and ecosystems) and how to conserve and maintain biodiversity and ecosystem function (including species and ecosystem distribution modelling).

Prerequisite: BIO220H1
Recommended Preparation: EEB255H1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

EEB375H1 - Organisms and Their Environment

Hours: 24L

Ecological interactions between organisms and their environment. Past and present changes in Earth's environment and the human responses to those changes. Topics may include: Pleistocene glaciations, origins of agriculture, species extinctions, disease ecology, deforestation, water pollution, pesticides, and estrogenic compounds. (Note: EEB375H1 cannot substitute ENV234H1 to satisfy a program requirement.)

Prerequisite: BIO220H1
Exclusion: ENV234H1/ENV334H1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

EEB380H1 - Diversity of Insects

Previous Course Number: EEB356H1
Hours: 24L/36P

Evolutionary history, morphology, physiology, development, behaviour, and ecological significance of insects. Labs focus on identification of major groups of insects found in Ontario and each student makes an insect collection. Insects are collected during field trips during class time and also on Saturday field trips early in the term. A fee of approximately $25 may be charged for field trip transportation.

Prerequisite: BIO220H1
Exclusion: EEB356H1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

EEB382H1 - Diversity of Fishes

Hours: 24L/18P

Systematics, morphology, ecology, behaviour, biogeography, and conservation of fishes. Identification of major groups of fish; what makes each group biologically special and how those unique traits might contribute to conservation concerns. Labs focus on exercises designed to highlight how ichthyologists actually do research. (Lab materials fee: $25)

Prerequisite: BIO220H1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)
EEB384H1 - Diversity of Amphibians and Reptiles

Hours: 24L/36P

Lectures and laboratories examine the natural history, morphology, behaviour, ecology, evolutionary relationships, and biogeography of amphibians (frogs and toads, salamanders, caecilians) and non-avian reptiles (turtles, the tuatara, lizards, snakes, and crocodilians). Ancillary fee of $25 to cover cost of arranging a live animal lab featuring living Ontario reptiles and amphibians. Students are also required to purchase a $25 lab manual.

Prerequisite: BIO220H1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

EEB386H1 - Diversity of Birds

Hours: 24L/24P

Avian ecology, behaviour, conservation, and functional morphology and evolution of avian flight. Labs focus on avian anatomy and song analysis, and an outdoor activity introduces students to basic avian identification and compiling a field journal.

Prerequisite: BIO220H1
Exclusion: BIOD48H3/BIO326H5
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

EEB388H1 - Diversity of Mammals

Hours: 24L/36P

Lectures and laboratories examine the natural history, morphology, classification, evolutionary relationships, reproduction, biogeography, and conservation of mammals. Labs focus on the identification of mammals and their diverse morphological adaptations including mammals of Ontario. Lab manual fee: $25.

Prerequisite: BIO220H1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

EEB390H1 - Vertebrate Paleontology: Major Transitions in Vertebrate History

Hours: 24L/18P

The evolutionary history of vertebrates is recorded in their fossil record. Lectures highlight the origin and radiation of major vertebrate clades, and emphasize key events in vertebrate history, notably major ecological and evolutionary transitions, and mass extinctions. Practicals (at the Royal Ontario Museum) explore fossils that exemplify these themes.

Prerequisite: BIO220H1; at least one of EEB263H1, EEB267H1, EEB362H1, EEB382H1, EEB384H1, EEB386H1, EEB388H1
Recommended Preparation: EEB263H1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

EEB397Y1 - Research Project in Ecology and Evolutionary Biology

An intermediate research project requiring the prior consent of a member of the Department to supervise the project. The topic is to be one mutually agreed on by the student and supervisor. They must arrange the time, place, and provision of any materials and submit to the Undergraduate Office a signed form of agreement outlining details prior to being enrolled. This course is open to highly self-motivated students who are in their Third Year and have a strong interest in ecology and/or evolutionary biology. Students are required to write up the results of their research in a formal paper, often in the format of a research article, and may be required to present the results at a poster session and/or participate in an oral presentation. Students should contact their potential supervisors over the summer before classes begin in September. Information regarding how to register for the course is available on the EEB website. Not eligible for CR/NCR option. Note: cannot enrol if already taken the fourth year research project course EEB498Y1/EEB499Y1.

Prerequisite: Permission of department
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

EEB398H0 - Research Excursions

Distribution Requirements: Science
EEB398Y0 - Research Excursion

An instructor-supervised group project in an off-campus setting. Details at: https://www.artsci.utoronto.ca/current/academics/research-opportunities/research-excursions-program. Not eligible for CR/NCR option.

Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

EEB399Y1 - Research Opportunity Program

Credit course for supervised participation in faculty research project. Details at https://www.artsci.utoronto.ca/current/academics/research-opportunities/research-opportunities-program. Not eligible for CR/NCR option.

EEB403H0 - Tropical Field Biology

A two-week field course introducing students to the diversity of biological communities in the tropics focusing on ecological and evolutionary interactions. Plant and animal communities of the New World tropics are compared and contrasted with temperate communities. Student research projects included. Fee for accommodations, food, within course travel, station fee, etc. will apply. See Departmental website for details. Not eligible for CR/NCR option.

Prerequisite: BIO220H1 and permission of department
Recommended Preparation: A second or third year ecology, evolution or environmental biology course
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

EEB405H0 - Temperate Field Biology

A two-week field course offered (in May or August) at U of T’s Koffler Scientific Reserve, King City, Ontario. Students learn the natural history of the region and conduct a field-based research project in ecology or evolutionary biology. A fee of $720 for accommodations, food, within course travel, station fee, etc. will apply. See Departmental website for details. Not eligible for CR/NCR option.

Prerequisite: BIO220H1 and a course in statistics and permission of department
Recommended Preparation: A second or third year ecology, evolution or environmental biology course
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

EEB405H1 - Temperate Field Biology

A two-week field course offered (in May or August) at U of T’s Koffler Scientific Reserve, King City, Ontario. Students learn the natural history of the region and conduct a field-based research project in ecology or evolutionary biology. A fee of $720 for accommodations, food, within course travel, station fee, etc. will apply. See Departmental website for details. Not eligible for CR/NCR option.

Prerequisite: BIO220H1 and a course in statistics and permission of department
Recommended Preparation: A second or third year ecology, evolution or environmental biology course
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

EEB406H0 - Inter-University Field Course

A two-week field course offered between May and August by another Ontario university (to various locations) as part of the Ontario Universities Program in Field Biology (OUPFB). The selection of field course modules are announced in January. For registration information and additional fees information consult the EEB website; fees from $350-5000 will be applied for field trip costs. Not eligible for CR/NCR option.

Prerequisite: Varies on module selected
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)
EEB406H1 - Inter-University Field Course

A two-week field course offered between May and August by another Ontario university (to various locations) as part of the Ontario Universities Program in Field Biology (OUPFB). The selection of field course modules are announced in January. For registration information and additional fees information consult the EEB website; fees from $350-5000 will be applied for field trip costs. Not eligible for CR/NCR option.

**Prerequisite:** Varies on module selected  
**Distribution Requirements:** Science  
**Breadth Requirements:** Living Things and Their Environment (4)

EEB407H0 - Alpine Ecosystems

A two-week field course at a high mountain field station in the summer. Students learn the natural history of alpine and subalpine biomes and investigate major abiotic and biotic interactions. Required projects catalogue natural diversity, examine species interactions, or assess abiotic influences and stresses on high-altitude organisms and their environment. (Offered occasionally.) Not eligible for CR/NCR option.

**Prerequisite:** BIO120H1, (BIO251H1 or BIO270H1) and permission of department  
**Distribution Requirements:** Science  
**Breadth Requirements:** Living Things and Their Environment (4)

EEB407H1 - Alpine Ecosystems

A two-week field course at a high mountain field station in the summer. Students learn the natural history of alpine and subalpine biomes and investigate major abiotic and biotic interactions. Required projects catalogue natural diversity, examine species interactions, or assess abiotic influences and stresses on high-altitude organisms and their environment. (Offered occasionally.) Not eligible for CR/NCR option.

**Prerequisite:** BIO220H1, (BIO251H1 or BIO270H1) and permission of department  
**Distribution Requirements:** Science  
**Breadth Requirements:** Living Things and Their Environment (4)

EEB410H0 - Lake Ecosystem Dynamics

A two-week field course in August (offered in alternate years) at the Harkness Fisheries Research Laboratory in Algonquin Park, Ontario. Field and laboratory exercises demonstrate how interactions between physical, chemical, and biological parameters are crucial in understanding lake ecosystems. Fundamental and applied issues are discussed. Students collect, analyse, and interpret data, and complete a class project and an individual project. A fee of $900 for accommodations, food, within course travel, station fee, etc. will apply. See Departmental website for details. Not eligible for CR/NCR option.

**Prerequisite:** BIO220H1 and permission of department  
**Recommended Preparation:** At least one 200+ series course in ecology, environmental biology, or physical geography; and a course in statistics  
**Distribution Requirements:** Science  
**Breadth Requirements:** Living Things and Their Environment (4)

EEB410H1 - Lake Ecosystem Dynamics

A two-week field course in August (offered in alternate years) at the Harkness Fisheries Research Laboratory in Algonquin Park, Ontario. Field and laboratory exercises demonstrate how interactions between physical, chemical, and biological parameters are crucial in understanding lake ecosystems. Fundamental and applied issues are discussed. Students collect, analyse, and interpret data, and complete a class project and an individual project. A fee of $900 for accommodations, food, within course travel, station fee, etc. will apply. See Departmental website for details. Not eligible for CR/NCR option.

**Prerequisite:** BIO220H1 and permission of department  
**Recommended Preparation:** At least one 200+ series course in ecology, environmental biology, or physical geography; and a course in statistics  
**Distribution Requirements:** Science  
**Breadth Requirements:** Living Things and Their Environment (4)

EEB428H1 - Global Change Ecology

**Hours:** 24L/24T

An examination of organism, population, and ecosystem responses to long-term environmental change occurring at the global scale, with emphasis on human caused perturbation to climate and the carbon, nitrogen, and hydrolic cycles and their ecological effects.

**Prerequisite:** BIO220H1 and at least 1.0 FCE from EEB at 300+ series  
**Recommended Preparation:** ENV234H1  
**Distribution Requirements:** Science  
**Breadth Requirements:** Living Things and Their Environment (4)
EEB430H1 - Modeling in Ecology and Evolution

Hours: 24L/12P

Study of ecology and evolution uses models to explain biological phenomena including the maintenance of biodiversity, population growth, competition, eco-evolutionary dynamics, trait and molecular evolution, epidemiology, spatial ecology, phylogeny and extinction. Students will learn to develop, assess and apply analytical, simulation and statistical models for analysis and data interpretation.

Prerequisite: BIO220H1, EEB225H1, MAT136H1/MAT137Y1/ MAT223H1, and at least one of EEB319H1/EEB321H1/EEB322H1/ EEB323H1

Distribution Requirements: Science

Breadth Requirements: Living Things and Their Environment (4)

ENV432H1 - Urban Ecology

Hours: 24L/12S

The ecology of urban areas through consideration of the biological and physical environments, in particular how the human-constructed environment alters pre-existing biophysical conditions and interactions. Encompasses a comparative perspective to study the development of these emerging ecosystems of increasing importance given global urbanization. One or two Saturday field trips (a fee of approximately $15 may be charged for field trip transportation.)

Prerequisite: BIO220H1 and at least one of EEB319H1/EEB321H1/ EEB365H1/ENV334H1

Distribution Requirements: Science

Breadth Requirements: Living Things and Their Environment (4)

EEB440H1 - Ecology and Evolution of Plant-Animal Interactions

Hours: 24L/12T

Major concepts in ecology and evolution from the perspective of plant-animal interactions. The richness of interactions between plants and animals is explored including antagonistic interactions (e.g., herbivory, carnivorous plants), mutualistic interactions (e.g., pollination, seed dispersal, ant-plant associations), and interactions involving multiple species across trophic levels.

Prerequisite: BIO220H1, a course in statistics (from EEB225H1 (recommended)/PSY201H1 / STA220H1/ STA257H1/ STA288H1/ GGR270H1/ HMB325H1) and at least one of EEB318H1 /EEB319H1/ EEB321H1/ EEB323H1/ EEB324H1/ EEB328H1/ EEB403H1/ EEB403H0/ EEB405H1/ EEB405H0/ EEB406H1/ EEB406H0/ EEB407H1/ EEB407H0/ EEB410H1/ EEB410H0

Distribution Requirements: Science

Breadth Requirements: Living Things and Their Environment (4)

EEB441H1 - Reproductive Strategies

Hours: 24L/24T

Behaviour, ecology, genetics and life history theory in the study of the evolution of sex, mate choice, sexual competition, sex ratio, hermaphroditism, age at maturity, fecundity, parental care and alternative strategies. Examples may be drawn from nonhuman animals, plants or fungi and highlight the research focus of the instructor.

Prerequisite: BIO220H1

Distribution Requirements: Science

Breadth Requirements: Living Things and Their Environment (4)

EEB433H1 - Global Issues in Aquatic Ecosystems

Hours: 36L

Advanced study of ecological principles and applied issues in freshwater and marine systems. Lectures and student-led discussions will cover physical, chemical, and biological interactions, from microbes to marine mammals. Topics may include carbon and nutrient cycling, food webs & trophic downgrading, ocean acidification, hydrothermal vents & connectivity in the oceans, lake management.

Prerequisite: BIO220H1, ENB234H1 and one of EEB319H1/ EEB321H1/EEB328H1/ENV334H1

Distribution Requirements: Science

Breadth Requirements: Living Things and Their Environment (4)

EEB455H1 - Genes, Environment and Behaviour

Hours: 18L/18S

An examination of the Gene-Environment Interplay perspective as sources of individual differences in behaviour, from both mechanistic and evolutionary viewpoints. Both historical and recent studies are used to illustrate important concepts in the field. Student-led discussions address the evidence base for these concepts.

Prerequisite: BIO220H1, HMB265H1/BIO260H1, and at least 12.0 FCEs (including 1.0 FCE 300+ level series EEB course)

Recommended Preparation: EEB322H1

Distribution Requirements: Science

Breadth Requirements: Living Things and Their Environment (4)
EEB459H1 - Population Genetics

Hours: 24L/12T

A focus on theoretical population genetics, using mathematical models to understand how different evolutionary forces drive allele frequency change. Students learn how to mathematically derive classic results in population genetics. Topics include drift, coalescence, the relationship between population and quantitative genetics, selection in finite populations, and mutation load. Offered in alternate years; next offered in 2018-19.

Prerequisite: BIO260H1/HMB265H1, EEB323H1
Recommended Preparation: A solid understanding of basic algebra and calculus.
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

EEB460H1 - Molecular Evolution and Genomics

Hours: 36L

Processes of evolution at the molecular level, and the analysis of molecular data. Gene structure, neutrality, nucleotide sequence evolution, sequence evolution, sequence alignment, phylogeny construction, gene families, transposition.

Prerequisite: BIO220H1, BIO230H1/BIO255H1, BIO260H1/HMB265H1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

EEB462H1 - Phylogenetic Systematics

Hours: 24L/36P

The Tree of Life metaphor for evolutionary relationships among species, phylogenies, is now fundamental in biology. Phylogenetic trees are now used both in species classification and to investigate myriad biological hypotheses about the evolutionary process and applied problems like virus and cancer epidemiology. This course will train students in the concepts and core methods of phylogenetic tree inference, including parsimony, likelihood, and Bayesian techniques. Students will gain bioinformatics skills with application to DNA sequence analysis and phylogenetic tree inference. Through a combination of lectures, discussion, and computer labs, students will master theory and practice of phylogenetic tree construction and inference.

Prerequisite: BIO220H1, EEB225H1/STA220H1/STA247H1/STA248H1/STA261H1/STA288H1/GGR270H1/PSY201H1
Exclusion: BIO443H5
Recommended Preparation: CSC108H1, EEB323H1, EEB362H1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

EEB465H1 - Advanced Topics in Biodiversity Science and Conservation Biology

Hours: 36L

Biodiversity in the Anthropocene. This course links the biological and social sciences to identify human goals for future biodiversity, methods to achieve this biodiversity, and to understand key issues such as the end of the wild, ecosystem services as a unit of conservation, animal welfare as a moral responsibility, and GMOs as biodiversity. Practical training may be provided in identifying species at risk, and in applying ecological-economics to trade-off decisions.

Prerequisite: BIO220H1, EEB255H1 and at least 1.0 FCE from EEB at 300+ series
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

EEB466H1 - Approaches to the Study of Biodiversity

Hours: 24L/24P

This course uses the collections, research, and public gallery areas of the Royal Ontario Museum to expose students to the ways in which biodiversity is discovered, analyzed, and interpreted in a museum setting. Topics include: morphological and molecular approaches, taxonomy, classification, bioinformatics and e-taxonomy, and the interpretation of biodiversity for the public. Labs include student projects and a one-day field trip on a weekend (cost about $15).

Prerequisite: BIO220H1; EEB266H1/EEB267H1/EEB268H1/EEB330H1/EEB331H1/EEB365H1/EEB380H1/EEB382H1/EEB384H1/EEB386H1/EEB388H1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)
EEB488H1 - Research Issues in Ecology and Evolutionary Biology

**Hours:** 42S

This course is taken concurrently by students who are enrolled in EEB498Y1 Advanced Research Project in Ecology and Evolutionary Biology, and uses a combination of seminars, discussions, and presentations (including presentations by students) designed to cover issues commonly encountered when conducting research in ecology and evolutionary biology. Topics may include experimental design, effective use of statistics, scientific writing and publishing, public communication, ethics, and career development. Students will be required to attend weekly departmental seminars. This half-course runs from September to April and lectures meet in alternate weeks.

**Prerequisite:** Permission of the department
**Corequisite:** EEB498Y1
**Exclusion:** EEB499Y1
**Distribution Requirements:** Science
**Breadth Requirements:** Living Things and Their Environment (4)

EEB495H1 - Seminar in Ecology and Evolutionary Biology

**Hours:** 24S

Seminar course in ecology and evolutionary biology, emphasizing critical thinking and the synthesis of ideas crossing disciplinary boundaries. Group discussions among peers, facilitated by faculty, and student presentations. Discussions include critical analysis of research and review articles in the primary literature. Evaluation based on presentations, participation in class discussions, and written assignments. (Note students may take this course only once.)

**Prerequisite:** A minimum of 1.0 FCE in EEB courses at the 300+ level (at least 0.5 FCE in ecology and 0.5 FCE in evolutionary biology is highly recommended)
**Exclusion:** EEB491H1
**Distribution Requirements:** Science
**Breadth Requirements:** Living Things and Their Environment (4)

EEB497H1 - Research Studies in Ecology & Evolutionary Biology

An independent studies half-course allowing students to produce a literature review, which is supervised by a faculty member in the Department of Ecology and Evolutionary Biology. Highly motivated fourth-year students will work closely with a supervisor and be required to write up the results of their research in a final research paper. Students should contact a potential supervisor well before classes begin in the fall, winter, or summer session. Information on how to apply for the course is available on the EEB website. Students cannot take more than two independent research courses of EEB 497H1, 498Y1, and 499Y1, and the second project must be with a different supervisor. Students who apply to EEB497H1 in the fall session can also apply to enrol concurrently in EEB488H1Y. Not eligible for CR/NCR option.

**Prerequisite:** Permission of department
**Distribution Requirements:** Science
**Breadth Requirements:** Living Things and Their Environment (4)

EEB491H1 - Seminar in Biodiversity and Conservation Biology

**Hours:** 24L

Seminar course in biodiversity and conservation biology, emphasizing critical thinking and the synthesis of ideas crossing disciplinary boundaries. Group discussions among peers, facilitated by faculty, and student presentations. Discussions include critical analysis of research and review articles in the primary literature, with a focus on recent developments in biodiversity science and conservation biology. Evaluation based on presentations, participation in class discussions, and written assignments. (Note students may take this course only once.)

**Prerequisite:** A minimum of 1.0 FCE in EEB courses at the 300+ level (EEB365H1 highly recommended)
**Exclusion:** EEB495H1
**Distribution Requirements:** Science
**Breadth Requirements:** Living Things and Their Environment (4)
EEB498Y1 - Advanced Research Project in Ecology and Evolutionary Biology

An advanced research project (a literature review alone is not sufficient) requiring the prior consent of a member of the Department to supervise the project. The topic is to be one mutually agreed on by the student and supervisor. They must arrange the time, place, and provision of any materials and submit to the Undergraduate Office a signed form of agreement outlining details prior to being enrolled. This course is normally open only to highly self-motivated students who are in their Fourth-Year and have adequate background in ecology and/or evolutionary biology. Students are required to write up the results of their research in a formal paper, often in the format of a research article, and are also required to present the results at a poster session and/or oral presentation. The time commitment is approximately 8 hours per week. Students should contact their potential supervisors over the summer before classes begin in September. Information regarding how to register for the course is available on the EEB website. Students in this course are also concurrently enrolled in EEB488H1Y Research Issues in Ecology and Evolutionary Biology. Not eligible for CR/NCR option.

Prerequisite: Permission of department
Corequisite: EEB488H1Y
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

EEB499Y1 - Advanced Research Project in Ecology and Evolutionary Biology II

Allows students to do another independent project, supervision of which must be different from EEB497H1/EEB498Y1. Operates in the same manner as EEB498Y1. Not eligible for CR/NCR option.

Prerequisite: EEB497H1/EEB498Y1 and permission of department
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)
# Faculty List

## University Professor Emeritus
- S. Hollander, OC, BScEcon, PhD, LLD, FRSC

## Professors Emeriti
- G. Anderson, MSc, PhD (University of Toronto Mississauga)
- R.A. Berry, BA, PhD
- R.M. Bird, MA, PhD, FRSC
- J.D. Bossons, AM, PhD
- J.L. Carr, MA, PhD
- F.R. Casas, MSc, PhD
- J.S. Cohen, MA, PhD
- M. Dewees, BSc, LLB, PhD
- J.E. Floyd, MA, PhD
- D.K. Foot, AM, PhD
- M.A. Fuss, MA, PhD
- M. Gunderson, MA, PhD, FRSC
- W. Haque, MA, MSc, PhD
- M.J. Hare, BCom
- G.K. Helleiner, OC, MA, PhD, FRSC
- S. Howson, MA, PhD
- J.A. Hynes, ABD
- Y. Kotowitz, BA, PhD
- A.M. Kruger, BA, PhD
- G.F. Mathewson, BCom, PhD
- D.E. Moggridge, MA, PhD
- J.E. Pesando, MA, PhD
- K.J. Rea, MA, PhD
- F.J. Reid, MSc, PhD
- L.B. Smith, AM, PhD
- M.H. Watkins, BCom
- A.M. Watson, BCom, MA
- L. Waverman, MA, PhD
- T.A. Wilson, AM, PhD, FRSC
- J.W.L. Winder, MA, PhD

## Professor and Chair of the Department
- E. Damiano, MA, PhD

## Professor and Associate Chair, Graduate Studies
- C. Stewart, MA, MPhil, MSc, PhD

## Associate Professor and Associate Chair, Undergraduate Studies
- G. Hamilton, MA, PhD

## University Professor
- M. Trebilcock, FRSC, LLM

## Professors
- V. Aguirregabiria, MSc, PhD
- V.A. Aivazian, BS, PhD (University of Toronto Mississauga)
- M. Alexopoulos, MA, PhD
- M. Baker, MA, PhD
- H.D. Benjamin, MA, PhD
- G. Bobonis, BA, PhD
- L. Brandt, BS, PhD
- M. Faig, MA, PhD (University of Toronto Mississauga)
- C. Gourieroux, PhD
- Y. Halevy, MA, PhD
- G. Kambourov, MA, PhD (University of Toronto Mississauga)
- A. Melino, BA, PhD (University of Toronto Mississauga)
- P. Oreopoulos, MA, PhD (University of Toronto Mississauga)
- M.J. Osborne, BA, PhD
- C. Pitchik, MSc, PhD (University of Toronto Mississauga)
- D. Restuccia, MA, PhD
- X. Shi, MA, PhD (University of Toronto Mississauga)
- A. Siow, BA, PhD
- M. Smart, MA, PhD
- D. Trefler, MA, PhD
- A.J. Yatchew, MA, PhD
- X. Zhu, MS, PhD (University of Toronto Mississauga)

## Professor, Teaching Stream
- J. Murdock, MPhil, PhD

## Associate Professors
- M. Burda, MA, PhD
- R. Deb, MA, MPhil, PhD (University of Toronto Mississauga)
- M. Duarte, MA, PhD (University of Toronto Mississauga)
- K. Kroft, MA, PhD
- B. Kuruscu, MA, PhD
- R. McMillan, BA, PhD (University of Toronto Mississauga)
- J. Mondria, MA, PhD
- P. Morrow, MA, PhD
- S. Ozkan, MA, MSc, PhD
- M. Peski, MA, PhD
- Y. Wan, MA, PhD
- R. Wolloff, MSc, PhD (University of Toronto Mississauga)

## Associate Professors, Teaching Stream
- L. Bailey, BA, MA (University of Toronto Mississauga)
- K. Freitas, BSc, PhD
- R. Gazzale, MA, PhD
- S.A. Hussain, MA, PhD
- G. Indart, MA, PhD
- K. Yu, MA, PhD (University of Toronto Mississauga)

## Assistant Professors
- C. Arteaga, MA, PhD (University of Toronto Mississauga)
- J. Beauchamp, MA, PhD
- A. Blouin, MA, PhD
- M. Celik, BA, PhD
- M. Chan, MA, PhD (University of Toronto Mississauga)
- P. Cziraki, MSc, MPhil, PhD
- S. Dyrdra, MA, PhD (University of Toronto Mississauga)
- S. Ely, BA, PhD
- J. Goldman, MSc, PhD (University of Toronto Mississauga)
- J. Gu, BS, MA, PhD (University of Toronto Mississauga)
- Y. Halberstam, MA, PhD
- J. Hall, BA, PhD
- N. Li, MA, PhD (University of Toronto Mississauga)
- K. Lim, MA, PhD
- Y. Luo, MA, PhD
- I. Mourifié, MSc, PhD
- D. Price, BS, MA, PhD (University of Toronto Mississauga)
- A. Roesler, MSc, PhD
- E. Souza Rodrigues, MA, MSc, MPhil, PhD (University of Toronto Mississauga)
- J. Steinberg, BA, PhD
- X. Tian, MA, PhD (University of Toronto Mississauga)
- A. Tsuyoi, MA, PhD
- C. Van Effenterre, MA, PhD
- N. Vellekoop, LL.M, MSc, PhD
- Y. Zhao, BSc, MSc, PhD (University of Toronto Mississauga)

## Assistant Professors, Teaching Stream
- P. Blanchenay, MSc, PhD
- J. McNeill, MA, PhD
- T. Yindok, BA, MA, PhD (University of Toronto Mississauga)
- N. Zammit, MA, PhD (University of Toronto Mississauga)

## Status Only Faculty
- A.J. Cohen, PhD
- G. Georgopoulos, MA, PhD
Introduction

Economics is a social science that encompasses a broad range of human behaviour and has a strong influence on the structure, well-being and development of a society.

Much of human activity is directed towards the satisfaction of material wants. In many areas of the world, the greater part of human effort must be directed towards meeting the most elemental demands for food, clothing, and shelter. Even in technologically advanced societies, where these basic requirements can be met with comparative ease, the desire for more goods and services never appears to be fully satisfied. In consequence, every society - whatever its political orientation - is both competitive and cooperative. It is competitive because its members contend with one another to satisfy their individual wants from a limited supply of productive resources. It is cooperative because the greatest supply of goods is available when the activity of producing them is coordinated and organized. Economics deals with any issue arising out of the conflict between the demand for goods and services, and a limited supply of resources to satisfy those demands.

Undergraduate training in economics is intended to familiarize students with the discipline of economic thinking, to equip them to better understand human behaviour, and for the intelligent appraisal of contemporary economic problems.

Economics makes considerable use of mathematics in its enquiries. All economics programs require at least one course in mathematics.

An undergraduate degree is generally not sufficient to become a professional economist. For this or other reasons, graduate work may be necessary. Students who wish to do graduate work should seek advice from the Department concerning their choice of courses. The Economics Specialist program and the Economics and Mathematics program, with their greater emphasis on mathematics, are designed to prepare students for graduate study, and are an excellent starting place.

Economics Programs

Financial Economics Specialist (Science Program) - ASSPE2722

Enrolment Requirements:

This is a limited enrolment program. Students must meet the requirements listed below to enrol.

A minimum grade is needed for entry, and this minimum changes each year depending on available spaces and the number of applicants. The following courses must be completed:

Completed courses (with minimum grades)
The following courses with the stated minimum grades are required:

- ECO206Y1 (80%)
- ECO208Y1 (80%)
- ECO227Y1 (80%)/(STA257H1 (80%) and STA261H1 (80%))

To ensure that students admitted to the program will be successful, applicants with a final grade lower than 80% will not be considered for admission. Please note that obtaining this minimum final grade does not guarantee admission to the program.

Special Requirement

- Students must be enrolled in the Economics Major (ASMAJ1478)
- Students enrolled in this program cannot simultaneously be enrolled in any other Economics specialist, joint specialist, major or minor program in Economics, or in Economic History or in the B.Com program.

Completion Requirements:

Program Course Requirements: 13.0 credits

First Year (2.0 credits):

1. (ECO101H1 and ECO102H1)/ECO100Y1
2. (MAT135H1 and MAT136H1)/MAT137Y1/MAT157Y1
Economics Specialist (Science Program) - ASSPE2599

Enrolment Requirements:

This is a limited enrolment program. Students must meet the requirements listed below to enrol.

Completed courses (with minimum grades)
The following courses with the stated minimum grades are required:

- ECO206Y1 (70%)
- ECO208Y1 (70%)
- MAT137Y1 (60%)/ MAT157Y1 (60%).

Economics Specialist (Arts Program) - ASSPE1478

Enrolment Requirements:

This is a limited enrolment program. Students must meet the requirements listed below to enrol.

Completed courses (with minimum grades)
The following courses with the stated minimum grades are required:

- ECO206Y1 (70%)
- ECO208Y1 (70%)
Focus in Data Analytics (Specialist) - ASFOC1478A

Description:

Students in the Economics Specialist program who undertake a Focus in Data Analytics will gain advanced ability in applied empirical economics. The Focus (for specialists) provides students with hands-on exposure to the tools empirical economists use to build and analyze datasets - programming languages such as Python, and software programs to manage, statistically analyze, and visualize data such as Excel, GIS, Stata and R. The Specialist Focus will also direct students to required and elective empirical economics courses that apply these tools in a wide variety of contexts.

Enrolment Requirements:

Enrolment in the Economics Specialist program (ASPE1478) is required.

Completion Requirements:

(5.0 credits)

1. CSC108H1/ CSC148H1
2. ECO225H1/ GGR272H1
3. ECO372H1
4. ECO374H1
5. ECO475H1
6. 2.0 credits 300+ ECO elective courses from: ECO310H1, ECO324H1, ECO334H1, ECO336H1, ECO337H1, ECO339H1, ECO340H1 (or the 400-level courses listed below (#7)
7. 0.5 credit 400-level ECO course from: ECO401H1, ECO403H1, ECO404H1, ECO418H1, ECO439H1, ECO446H1, ECO464H1, ECO466H1, ECO499H1

Students may request that other courses not listed (such as temporary special topics courses) count towards the focus.

Economics Major (Arts Program) - ASMAJ1478

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

Completed courses (with minimum grades)

The following courses with the stated minimum grades are required:

- ECO101H1 (63%) and ECO102H1 (63%) and ECO105Y1 (80%)
- MAT133Y1 (63%) and MAT135H1 (60%) and MAT136H1 (60%)
- MAT137Y1 (55%) and MAT157Y1 (55%)

Completion Requirements:

Program Course Requirements: 7.0 credits

First Year (2.0 credits):

- MAT135H1
- STA255H1
- STA261H1
- CSC108H1/CSC148H1 (introductory programming) is strongly recommended for students interested in graduate studies.

Notes:

1. A minimum of 70% is required in ECO101H1 and ECO102H1 to meet prerequisites for specialist-level intermediate ECO courses (ECO206Y1, ECO208Y1, ECO22Y1).
2. ECO210H1 is highly recommended, especially for students interested in graduate studies. Students may count ECO210H1 towards the Specialist program in lieu of a 0.5 credit 300-level ECO elective.
3. While 200-level or higher math or statistics courses may complement the Economics Specialist courses, they cannot be used as substitutes for economics courses in this program.
4. Students are nevertheless encouraged to take more math if they plan on pursuing graduate studies. Students should especially consider MAT221H1/ MAT223H1/ MAT240H1 (Linear Algebra), MAT235Y1/ MAT237Y1 (Multivariate Calculus), MAT246H1 (Abstract Mathematics), or even consider doing a Minor program in Mathematics.
5. ECO475H1 is strongly recommended.
6. STA302H1/ STA303H1 are not accepted in lieu of ECO372H1.
7. STA220H1/ STA255H1 are not accepted in lieu of ECO220Y1/ ECO22Y1/ STA257H1/ STA261H1.
8. CSC108H1/CSC148H1 (introductory programming) is strongly recommended for students interested in graduate studies.
Focus on Data Analytics (Major) - ASFOC1478B

Description:

The Focus on Data Analytics (major) ensures that students gain proficiency in applied empirical economics. It provides students with hands-on exposure to the tools empirical economists use to build and analyze datasets - programming languages such as Python, and software programs to manage, statistically analyze, and visualize data such as Excel, GIS, Stata and R. The focus will also direct students to empirical economics courses that apply these tools in a wide variety of contexts.

Enrolment Requirements:

Enrolment in the Economics Major program (ASMAJ1478) is required.
mentioned courses, they may repeat a specific passed course only once as per Faculty regulations.

3. Many 300-level and higher courses in economics require ECO220Y1. While not a formal part of the Economics Minor program, students MUST meet the specified prerequisites for 300+ economics courses, and should seriously consider taking ECO220Y1.

Other Programs

- Finance & Economics (BCom) - See Rotman Commerce
- Environmental Economics - See School of the Environment

Economics Courses

ECO101H1 - Principles of Microeconomics

Hours: 24L/12T

An introduction to economic analysis and its applications: price determination, market structure, decision making by individuals and firms, public policy. NOTE: extensive use of graphical and quantitative analysis.

Exclusion: ECO100Y1, ECO105Y1, ECO100Y5, MGEA01H3, MGEA02H3
Recommended Preparation: MCV4U (Calculus & Vectors) and MHF4U (Advanced Functions), or equivalent secondary school mathematics credits
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

ECO102H1 - Principles of Macroeconomics

Hours: 24L/12T

An introduction to economic analysis and its applications from a macroeconomic (economy-wide) perspective. Topics covered include international trade and finance, role of money and the banking system, monetary and fiscal policy. Note: graphical and quantitative analysis are used extensively.

Prerequisite: ECO101H1
Exclusion: ECO100Y1, ECO105Y1, ECO100Y5, MGEA05H3, MGEA06H3
Recommended Preparation: MCV4U (Calculus & Vectors) and MHF4U (Advanced Functions), or equivalent secondary school mathematics credits
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

ECO105Y1 - Principles of Economics for Non-Specialists

Hours: 48L/24T

Exclusion: ECO100Y1, ECO101H1, ECO102H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

ECO196H1 - An Economist's Guide to the Galaxy

Hours: 24S

Climb aboard as we seek answers to the "Ultimate Question of Life, the Universe, and Everything" (Douglas Adams). Unlike the Hitchhiker's Guide to the Galaxy, the answer will not be 42. Prepare for a wide-ranging journey into the questions economists seek to answer and the evidence they muster to examine these questions. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

ECO197H1 - Seminar on Classical Economic Thought

Hours: 24L/12T

This seminar examines the basic ideas of the five most notable economic thinkers before 1870: Aristotle, Adam Smith, Thomas Malthus, David Ricardo, and Karl Marx. We focus on demand as the basis of price in Aristotle; the ambiguity in Smith between a labour theory of value and a demand/supply theory of value; the principle of population in Malthus; Ricardo's labour theory of value and his theory of rent and economic growth; and Marx's labour theory of value as the explanation for the development of capital. The understanding in these authors of economics as an historical process of production gives fascinating insights into modern economic development that contrast with the modern economic concentration on the distribution of resources in a world of scarcity. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)
ECO198H1 - Seminar on Modern Economic Thought

Hours: 24L/12T

This seminar examines the development of modern economic thought from the marginal revolutionaries (Jevons and Menger) who proclaimed that demand in the form of utility was the basis of price to the supply/demand analysis of Alfred Marshall that established modern microeconomics by 1890. We then look at Irving Fisher’s 1907 foundation of the modern concept of the interest rate and the present value of capital before reviewing J.M. Keynes’ 1936 criticism of neo-classical positions on full employment and interest rates in arguing for government manipulation of interest rates to ensure full employment. We finish with Milton Friedman’s championing of the unregulated market economy through his quantity theory of money critique of Keynes. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

ECO199H1 - Economics and Sustainable, Green Development

Hours: 24L/12T

Economic growth has been a powerful force through history in improving living standards throughout the world. At the same time, there is a growing recognition that environmental damages frequently accompany this growth, whether it be at the local level (soil degradation and deforestation), or the global level (climate change). Economics studies the allocation of scarce resources, but how can it incorporate "the environment" in a meaningful way that can help guide policy-makers in the 21st century? This course is a fast review of economic approaches and tools, and a review of a wide range of environmental policies, designed to manage the possible adverse impacts of economic expansions. The major emphasis in this course is on the market-based policies that guarantee incentive compatibility of these policies, thus, a higher chance of success. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

ECO200Y1 - Microeconomic Theory

Hours: 48L/24T

Theory of markets and prices. Determination of prices through the interaction of the basic economic units, the household as consumer and as supplier of inputs and the business firm as producer and as employer of inputs. The pricing system as the mechanism by which social decisions and allocation of goods are made in a market economy.

Prerequisite: ECO100Y1(67%)/(ECO101H1(63%), ECO102H1(63%))/ECO105Y1(60%); MAT133Y1/(MAT135H1, MAT136H1)/MAT137Y1/MAT157Y1
Exclusion: ECO204Y1, ECO206Y1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

ECO202Y1 - Macroeconomic Theory and Policy

Hours: 48L/24T

Theory of output, employment and the price level; techniques for achieving economic stability; central banking and Canadian financial institutions and markets; foreign exchange markets and the exchange rate. This course is not intended for students enrolled in the BCom program; please see ECO209Y1.

Prerequisite: ECO100Y1(67%)/(ECO101H1(63%), ECO102H1(63%))/ECO105Y1(60%); MAT133Y1/(MAT135H1, MAT136H1)/MAT137Y1/MAT157Y1
Exclusion: ECO208Y1, ECO209Y1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

ECO204Y1 - Microeconomic Theory and Applications (for Commerce)

Hours: 48L/24T

The use of microeconomics to analyze a variety of issues from marketing and finance to organizational structure. Consumer preferences and behaviour; demand, cost analysis and estimation; allocation of inputs, pricing and firm behaviour under perfect and imperfect competition; game theory and public policy, including competition policy. Business cases are used to connect theory and practice and to highlight differences and similarities between economics and accounting, marketing and finance. This course is restricted to students in the Commerce programs.

Prerequisite: ECO100Y1(67%)/(ECO101H1(63%), ECO102H1(63%))/ECO105Y1(60%); MAT133Y1/(MAT135H1, MAT136H1)/MAT137Y1/MAT157Y1
Exclusion: ECO200Y1, ECO206Y1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)
ECO206Y1 - Microeconomic Theory

Hours: 48L/24T

This course deals more rigorously and more mathematically with the topics included in ECO200Y1 and is intended primarily for students in certain Economics Specialist programs.

Prerequisite: ECO100Y1(70%)/(ECO101H1(70%), ECO102H1(70%)); MAT133Y1(63%)/(MAT135H1(60%), MAT136H1(60%))/MAT137Y1(55%)/MAT157Y1(55%)

Exclusion: ECO200Y1, ECO204Y1

Distribution Requirements: Social Science

Breadth Requirements: Society and its Institutions (3)

ECO208Y1 - Macroeconomic Theory

Hours: 48L/24T

This course deals more rigorously and more mathematically with the topics included in ECO202Y1 and is intended primarily for students in certain Economics Specialist programs.

Prerequisite: ECO100Y1(70%)/(ECO101H1(70%), ECO102H1(70%)); MAT133Y1(63%)/(MAT135H1(60%), MAT136H1(60%))/MAT137Y1(55%)/MAT157Y1(55%)

Exclusion: ECO202Y1, ECO209Y1

Distribution Requirements: Social Science

Breadth Requirements: Society and its Institutions (3)

ECO209Y1 - Macroeconomic Theory and Policy (for Commerce)

Hours: 48L/24T

Macroeconomic issues relevant for commerce students. Analytical tools are used to examine policy issues: Canadian government budgets, Bank of Canada monetary policy, exchange rate policy, foreign trade policy and government regulation of financial intermediaries. This course is restricted to students in the Commerce programs.

Prerequisite: ECO100Y1(67%)/(ECO101H1(63%), ECO102H1(63%))/ECO105Y1(80%); MAT133Y1/(MAT135H1, MAT136H1)/MAT137Y1/MAT157Y1

Exclusion: ECO202Y1, ECO208Y1

Distribution Requirements: Social Science

Breadth Requirements: Society and its Institutions (3)

ECO210H1 - Mathematical Methods for Economic Theory

Hours: 24L/12T

An introduction to mathematical methods commonly used in economic theory. Topics include: multivariate calculus, concavity and convexity, unconstrained multivariate optimization, multivariate optimization subject to equality or inequality constraints and differential equations.

Prerequisite: ECO100Y1(67%)/(ECO101H1(63%), ECO102H1(63%))/ECO105Y1(80%); MAT133Y1/(MAT135H1, MAT136H1)/MAT137Y1/MAT157Y1

Exclusion: MAT235Y1, MAT237Y1

Distribution Requirements: Social Science

ECO220Y1 - Introduction to Data Analysis and Applied Econometrics

Hours: 48L/48T

Numerical and graphical data description; data collection and sampling; probability; sampling distributions; statistical inference; hypothesis testing and estimation; simple and multiple regression analysis (extensive coverage). Learn how to analyze data and how to correctly interpret and explain results. Use Excel to analyze a wide variety of data and replicate tables and figures in economics research papers.

Prerequisite: ECO100Y1(67%)/(ECO101H1(63%), ECO102H1(63%))/ECO105Y1(80%); MAT133Y1/(MAT135H1, MAT136H1)/MAT137Y1/MAT157Y1

Exclusion: GGR270H1, PSY201H1, PSY202H1, SOC202H1, SOC252H1, STA220H1, STA221H1, STA248H1

Distribution Requirements: Social Science

Breadth Requirements: Society and its Institutions (3); The Physical and Mathematical Universes (5)
ECO225H1 - Data Tools for Economists

Hours: 24L/12T

This course explores unstructured data sources such as text files, webpages, weather data, social media posts, satellite imagery, and traffic data and how economists harness these types of data. It offers a practical introduction to: creating datasets from these types of sources (for example, via web scrapping and machine learning), linking data sources, and managing and visualizing these data (for example, via geospatial visualization).

Prerequisite: ECO100Y1(67%)/(ECO101H1(63%), ECO102H1(63%))/ECO105Y1(80%); MAT133Y1(63%)/(MAT135H1(60%), MAT136H1(60%))/MAT137Y1(55%)/MAT157Y1(55%); CSC108H1/CSC148H1

Distribution Requirements: Social Science

Breadth Requirements: The Physical and Mathematical Universes (5)

ECO227Y1 - Foundations of Econometrics

Hours: 48L/24T

A rigorous introduction to probability and mathematical statistics intended for students in Economics Specialist programs. Probability and estimation theory, sampling distributions, hypotheses testing, multiple regression analysis. Students will learn the tools used in economics and finance to model and address randomness and uncertainty.

Prerequisite: ECO100Y1(70%)/(ECO101H1(70%), ECO102H1(70%))/MAT133Y1(65%)/(MAT135H1(60%), MAT136H1(60%))/MAT137Y1(55%)/MAT157Y1(55%)

Corequisite: Recommended: MAT223H1/MAT240H1, MAT235Y1/MAT237Y1/ECO210H1

Exclusion: STA237H1, STA238H1, STA247H1, STA248H1, STA255H1, STA257H1, STA261H1

Distribution Requirements: Social Science

Breadth Requirements: The Physical and Mathematical Universes (5)

ECO231H1 - Economics of Global Trade

Previous Course Number: ECO230Y1

Hours: 24L/12T

This course is intended primarily for students in the International Relations program. This course offers an introduction to the economic causes and consequences of international trade in goods, services, labour, innovation and capital. Attention will be devoted to the economic impact of policies that affect these flows, such as protectionism and outsourcing.

Prerequisite: (ECO101H1, ECO102H1)/ECO100Y1/ECO105Y1

Exclusion: ECO230Y1, ECO364H1, ECO364H5

Distribution Requirements: Social Science

Breadth Requirements: Society and its Institutions (3)

ECO232H1 - Global Macroeconomics and Policies

Previous Course Number: ECO230Y1

Hours: 24L/12T

This course is intended primarily for students in the International Relations program. The course serves as an introduction to some of the causes of differences in economic performance across countries and the impact of a variety of government policies, such as monetary and fiscal policy as well as exchange rate regimes, and how each of the three interact in response to changes in development, sovereign debt, monetary unions and financial crises.

Prerequisite: (ECO101H1, ECO102H1)/ECO100Y1/ECO105Y1

Exclusion: ECO230Y1, ECO365H1, ECO365H5

Distribution Requirements: Social Science

Breadth Requirements: Society and its Institutions (3)

ECO232H1 - Global Macroeconomics and Policies (continued)

Distribution Requirements: Society and its Institutions (3)

ECO232Y1 - Special Topics in Economics

Hours: 24L/12T

Courses may be offered in one or more subjects each year. Students must meet the prerequisites announced by the Department.

Prerequisite: See the Department of Economics website for details.

Distribution Requirements: Social Science

ECO250Y1 - Special Topics in Economics

Hours: 48L/24T

Courses may be offered in one or more subjects each year. Students must meet the prerequisites announced by the Department.

Prerequisite: See the Department of Economics website for details.

Distribution Requirements: Social Science

ECO251H1 - Special Topics in Economics

Hours: 24L/12T

Courses may be offered in one or more subjects each year. Students must meet the prerequisites announced by the Department.

Prerequisite: See the Department of Economics website for details.

Distribution Requirements: Social Science

ECO252H1 - Special Topics in Economics

Hours: 24L/12T

Courses may be offered in one or more subjects each year. Students must meet the prerequisites announced by the Department.

Prerequisite: See the Department of Economics website for details.

Distribution Requirements: Social Science
ECO299Y1 - Research Opportunity Program
Credit course for supervised participation in faculty research project. Details at https://www.artsci.utoronto.ca/current/academics/research-opportunities/research-opportunities-program. Not eligible for CR/NCR option.

Distribution Requirements: Social Science

ECO305H1 - Economics of Accounting
Hours: 24L/12T
The economic impact of accounting rules and practices for firms and financial contracts. Topics include: economic models of agency, economics of optimal accounting rules such as government regulation of corporate disclosure and the economic returns to financial reporting. No previous knowledge of accounting is required; the basic language of financial accounting will be covered.

Prerequisite: ECO200Y1/ECO204Y1/ECO206Y1; ECO220Y1/ECO227Y1/ (STA237H1, STA238H1)/ (STA247H1, STA248H1)/ (STA257H1, STA261H1)
Exclusion: Not open to students enrolled in Rotman Commerce programs.
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

ECO306H1 - American Economic History
Hours: 24L/12T
A survey of American economic history from the ante-bellum period to the present. Potential topics include: the rapid growth of the American economy in the late 19th and early 20th century; causes of the onset of the Great Depression; the economic impact of slavery and its aftermath; health and demographic trends; and 20th century trends in inequality.

Prerequisite: ECO200Y1/ECO204Y1/ECO206Y1; ECO202Y1/ECO208Y1/ECO209Y1; ECO220Y1/ECO227Y1/ (STA237H1, STA238H1)/ (STA247H1, STA248H1)/ (STA257H1, STA261H1)
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

ECO310H1 - Empirical Industrial Organization
Hours: 24L/12T
The quantitative analysis of firms' strategies in real-world industries, using tools from applied microeconomics and statistics. Topics include: studies of monopoly, oligopoly, imperfect competition, and the estimation of demand and cost functions that underpin these markets.

Prerequisite: ECO200Y1/ECO204Y1/ECO206Y1; ECO220Y1/ECO227Y1/ (STA237H1, STA238H1)/ (STA247H1, STA248H1)/ (STA257H1, STA261H1)
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

ECO313H1 - Environmental Economics and Policies
Hours: 24L/12T
This course demonstrates how a rigorous application of microeconomic techniques can inform our responses to various environmental problems. Topics may include: air and water pollution and renewable resource management.

Prerequisite: ECO200Y1/ECO204Y1/ECO206Y1; ECO220Y1/ECO227Y1/ (STA237H1, STA238H1)/ (STA247H1, STA248H1)/ (STA257H1, STA261H1)
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

ECO314H1 - Energy and the Environment
Hours: 24L/12T
This course surveys important features of energy markets and related environmental challenges. One of the central objectives is to provide an understanding of the key economic tools needed to analyse these markets. A related objective is the development of a framework for understanding the public discourse on energy and the environment. Topics include: the hydrocarbon economy (oil, natural gas and coal), electricity markets, global warming and other externalities, renewable energy, conservation, carbon taxes and 'cap-and-trade'.

Prerequisite: ECO200Y1/ECO204Y1/ECO206Y1; ECO220Y1/ECO227Y1/ (STA237H1, STA238H1)/ (STA247H1, STA248H1)/ (STA257H1, STA261H1)
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)
ECO316H1 - Applied Game Theory

Hours: 24L/12T

Focuses on the core ideas and concepts of game theory and on applications of them in economics and other social sciences. Topics may include: oligopoly, electoral competition, the theory of public goods, voting theory, the free rider problem, repeated interaction, bargaining, evolutionary equilibrium, matching and auctions.

Note: This course cannot be taken as a substitute in programs that require ECO326H1.

Prerequisite: ECO200Y1/ECO204Y1/ECO206Y1
Exclusion: ECO326H1, ECO326H5
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

ECO320H1 - Economic Analysis of Law

Hours: 24L/12T

The practical application of microeconomic theory to common legal problems: torts, contracts, property and crime, and the limitations of economic analysis. No previous familiarity with the law is assumed. (This is an economic analysis of legal issues, not a course in law).

Prerequisite: ECO200Y1/ECO204Y1/ECO206Y1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

ECO321H1 - Canadian Economic History prior to 1850

Hours: 24L/12T

This course applies the tools of economics - theoretical and empirical - to study Canada’s historical growth experiences. Topics include: the variation in well-being among Indigenous peoples (both pre and post contact), migration and indentured servitude, colonial money, child labour and education, and the rise of factories. The impact of colonial institutions on Canada’s economic success is studied in a comparative context.

Prerequisite: ECO200Y1/ECO204Y1/ECO206Y1
Exclusion: ECO322Y5, ECO323Y5
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

ECO322H1 - Canadian Economic History, 1850-1960

Hours: 24L/12T

Canadian economic history between 1850 and 1960, with a focus on the debate over the ability of the market mechanism to optimize economic development. Topics covered include: tariff policies, Confederation, the transcontinental railroad, opening the West, the Great Depression, monetary policy and the Bank of Canada, regional growth and dominion-provincial relations.

Prerequisite: ECO200Y1/ECO204Y1/ECO206Y1
Exclusion: ECO322Y5, ECO323Y5
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

ECO324H1 - Economic Development

Hours: 24L/12T

This course critically analyzes issues related to economic development and the associated policy responses. Tools from micro and macroeconomic theory are employed, as well as the critical assessment of empirical evidence. Topics may include: education, health, credit markets, inequality, and the role of foreign aid.

Prerequisite: ECO200Y1/ECO204Y1/ECO206Y1; ECO220Y1/ECO227Y1/(STA237H1, STA238H1)/(STA247H1, STA248H1)/(STA257H1, STA261H1)
Exclusion: ECO324Y1, ECO324Y5
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

ECO325H1 - Advanced Economic Theory - Macro

Hours: 24L/12T

A development of the microeconomic foundations of macroeconomic theory to expand students’ analytic skills by constructing and solving macroeconomic models. Topics may include: dynamic choice, neoclassical growth theory, uncertainty and rational expectations, business cycles, as well as fiscal and monetary policy.

Prerequisite: ECO208Y1/ECO202Y1(70%)/ECO209Y1; ECO220Y1/(STA237H1(70%), STA238H1(70%), STA247H1(70%), STA248H1(70%))/ (STA257H1, STA261H1)
Recommended Preparation: MAT235Y1/MAT237Y1/ECO210H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)
ECO326H1 - Advanced Microeconomics - Game Theory

Hours: 24L/12T

Game theory and applications. Topics include: strategic and extensive games, with applications to economics.

Prerequisite: ECO200Y1/ECO204Y1/ECO206Y1; ECO220Y1/ECO227Y1/STA237H1/STA238H1/STA247H1/STA248H1/STA257H1/STA261H1
Exclusion: ECO316H1, ECO326H5
Recommended Preparation: MAT235Y1/MAT237Y1/ECO210H1

Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

ECO331H1 - Behavioural and Experimental Economics

Hours: 24L/12T

Ample empirical and experimental evidence suggests significant departures from classical assumptions of economic behaviour. For example, humans are neither always perfectly rational nor always self interested. This course describes systematic ways in which behaviour deviates from neoclassical assumptions, generating new, and hopefully more realistic behavioural assumptions that have broad empirical, theoretical and policy implications.

Prerequisite: ECO200Y1/ECO204Y1/ECO206Y1; ECO220Y1/ECO227Y1/STA237H1/STA238H1/STA247H1/STA248H1/STA257H1/STA261H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

ECO332H1 - Economics of the Family

Hours: 24L/24T

A use of microeconomics to study the behaviour of the family, including marriage, divorce, intra-family allocations, investment in children and gender roles.

Prerequisite: ECO200Y1/ECO204Y1/ECO206Y1; ECO220Y1/ECO227Y1/STA237H1/STA238H1/STA247H1/STA248H1/STA257H1/STA261H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

ECO333H1 - Urban Economics

Hours: 24L/12T

Spatial economic theory and urban public policy: firms and individuals in partial and general equilibrium, land development and land-use controls, urban transportation, efficiency and equity in spending and taxing.

Prerequisite: ECO200Y1/ECO204Y1/ECO206Y1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

ECO334H1 - The Political Economy of Media

Hours: 24L/12T

Tools are developed to analyze voters and the role of information in democracies. Theories of voter information are evaluated using empirical literature on media and the political economy of media. The effects of innovations in information technology are explored and we will evaluate how the empirical results square with the theory. A study of newspapers, radio, television, cable, the Internet and social media, with a focus on empirical methods used to identify effects of media on voters.

Prerequisite: ECO200Y1/ECO204Y1/ECO206Y1; ECO220Y1/ECO227Y1/STA237H1/STA238H1/STA247H1/STA248H1/STA257H1/STA261H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

ECO336H1 - Public Economics

Hours: 24L/12T

Theory of taxation and public goods, and quantitative methods for program evaluation. Additional topics include: taxation and income distribution; environmental policy; and the political economy of government policy.

Prerequisite: ECO200Y1/ECO204Y1/ECO206Y1; ECO220Y1/ECO227Y1/STA237H1/STA238H1/STA247H1/STA248H1/STA257H1/STA261H1
Exclusion: ECO336Y1, ECO337H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)
ECO337H1 - Public Economics (for Commerce)

Hours: 24L/12T

An introduction to the economics of government similar to ECO336H1, but with greater focus on issues in business and financial economics. Additional topics include: business tax planning and corporate financial policy; taxation of saving and risk-taking; and government business enterprises.

Prerequisite: ECO200Y1/ECO204Y1/ECO206Y1; ECO220Y1/ECO227Y1/ (STA237H1, STA238H1)/ (STA247H1, STA248H1)/ (STA257H1, STA261H1)
Exclusion: ECO336Y1, ECO336H1

Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

ECO338H1 - Economics of Careers

Hours: 24L/12T

The economic analysis of careers from the perspectives of both workers and employers. How do people decide what to study, what careers to pursue, and when to change jobs? How do these decisions interact with the structure of firms? The impact of specialization and the division of labour on the evolution of careers is considered, as are the role of cognitive and communication skills in the labour market.

Prerequisite: ECO200Y1/ECO204Y1/ECO206Y1; ECO220Y1/ECO227Y1/ (STA237H1, STA238H1)/ (STA247H1, STA248H1)/ (STA257H1, STA261H1)

Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

ECO339H1 - Labour Economics: Employment, Wages and Public Policy

Hours: 24L/12T

Using tools from microeconomic theory and statistics, this course introduces students to the study of labour markets, focusing on employment and wage determination, and the application of labour economics to public policy. Topics may include: labour supply, labour demand, estimating the impact of welfare programs, minimum wages, and other labour market interventions.

Prerequisite: ECO200Y1/ECO204Y1/ECO206Y1; ECO220Y1/ECO227Y1/ (STA237H1, STA238H1)/ (STA247H1, STA248H1)/ (STA257H1, STA261H1)

Exclusion: ECO339Y1, ECO343H5, ECO344H5

Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

ECO340H1 - Labour Economics: The Distribution of Earnings

Hours: 24L/12T

Using tools from microeconomic theory and statistics, this course studies the determinants of wages across labour markets. Topics include: the theory of compensating differentials, human capital, discrimination, immigration, unions, and alternative models of compensation. In addition, students are introduced to microeconomic models of unemployment. Throughout the course, there is an emphasis on the evaluation of empirical evidence.

Prerequisite: ECO200Y1/ECO204Y1/ECO206Y1; ECO220Y1/ECO227Y1/ (STA237H1, STA238H1)/ (STA247H1, STA248H1)/ (STA257H1, STA261H1)

Exclusion: ECO339Y1, ECO343H5, ECO344H5

Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

ECO341H1 - The Economic History of the 20th Century: Trade, Migration, Money and Finance before 1945

Hours: 24L/12T

Tailored to advanced students in Economics, Commerce, International Relations and History. The focus is on growth and fluctuations in Europe and North America between roughly 1870 and 1939, with a particular emphasis on international trade and payments, migration, investment, and monetary arrangements.

Prerequisite: ECO200Y1/ECO204Y1/ECO206Y1/ (ECO230Y1, POL208Y1)

Exclusion: ECO342Y1/ECO303H5

Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

ECO342H1 - Twentieth Century Economic History: Institutions, Growth and Inequality

Hours: 24L/12T

Tailored to advanced students in Economics, Commerce, International Relations and History. The focus is on institutions, growth and inequality in countries across the world.

Prerequisite: ECO200Y1/ECO204Y1/ECO206Y1/ (ECO230Y1, POL208Y1)

Exclusion: ECO342Y1

Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)
ECO349H1 - Money, Banking and Financial Markets

Hours: 24L/12T

This course studies the interaction of the monetary and banking sectors with financial markets and the broader economy. It builds especially on tools developed in intermediate macroeconomics, but also focuses on the institutional structure of the Canadian monetary sector, including the role and operation of the Bank of Canada.

Prerequisite: ECO200Y1/ECO204Y1/ECO206Y1; ECO202Y1/ECO208Y1/ECO209Y1; ECO220Y1/ECO227Y1/(STA237H1, STA238H1)/(STA247H1, STA248H1)/(STA257H1, STA261H1)
Exclusion: ECO348H5/ECO349H5
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

ECO356H1 - Special Topics in Financial Economics

Hours: 24L/12T

Courses may be offered in one or more subjects each year. Students must meet the prerequisites announced by the Department.

Prerequisite: See the Department of Economics website for details.
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

ECO350Y1 - Special Topics in Economics

Hours: 48L/24T

Courses may be offered in one or more subjects each year. Students must meet the prerequisites announced by the Department.

Prerequisite: See the Department of Economics website for details.
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

ECO351H1 - Special Topics in Economics

Hours: 24L/12T

Courses may be offered in one or more subjects each year. Students must meet the prerequisites announced by the Department.

Prerequisite: See the Department of Economics website for details.
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

ECO352H1 - Special Topics in Economics

Hours: 24L/12T

Courses may be offered in one or more subjects each year. Students must meet the prerequisites announced by the Department.

Prerequisite: See the Department of Economics website for details.
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

ECO359H1 - Financial Economics II: Corporate Finance

Hours: 24L/12T

Agency and incomplete information problems inherent in financial transactions; the role of contractual arrangements in overcoming them. Financial constraints on investment decisions of firms; the financial system in economic growth; the legal system in the functioning of financial markets. A look at theoretical and empirical literature covering these issues.

Prerequisite: ECO358H1
Exclusion: ACT349H1, RSM333H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)
ECO362H1 - Economic Growth

Hours: 24L/12T

The course considers a broad range of issues that underlie economic growth, including technical progress and the accumulation of human and physical capital. Beyond these factors, the course also investigates the efficiency with which capital is used, the role of foreign trade, and the possible roles of institutions and geography.

Prerequisite: ECO200Y1/ECO204Y1/ECO206Y1; ECO202Y1/ECO208Y1/ECO209Y1; ECO220Y1/ECO227Y1; (STA237H1, STA238H1); (STA247H1, STA248H1); (STA257H1, STA261H1)

Exclusion: ECO362H5

Distribution Requirements: Social Science

Breadth Requirements: Society and its Institutions (3)

ECO364H1 - International Trade Theory

Hours: 24L/12T

An examination of the causes and consequences of international trade. The first half develops traditional models of comparative advantage. The second half examines more recent theoretical and empirical work on trade & wages, the political economy of trade, outsourcing, and firm heterogeneity.

Prerequisite: ECO200Y1/ECO204Y1/ECO206Y1; ECO220Y1/ECO227Y1; (STA237H1, STA238H1); (STA247H1, STA248H1); (STA257H1, STA261H1)

Exclusion: ECO230Y1, ECO231H1, ECO232H1

Distribution Requirements: Social Science

Breadth Requirements: Society and its Institutions (3)

ECO365H1 - International Monetary Economics

Hours: 24L/12T

Introduction to open economy macroeconomics and international finance. The core objective of the course is to develop macroeconomic models of open economies that can be applied towards gaining an understanding of recent events such as US deficits, financial crises, China's exchange rate policy and the Euro.

Prerequisite: ECO202Y1/ECO208Y1/ECO209Y1

Exclusion: ECO230Y1, ECO231H1, ECO232H1

Distribution Requirements: Social Science

Breadth Requirements: Society and its Institutions (3)

ECO368H1 - Economics of Conflict

Hours: 24L/12T

This course explores the links between violent conflict and socioeconomic development. It focuses on micro-level processes leading to conflict, and how conflict and political violence affect people's lives at the household and community levels. It also examines how these processes are linked to wider political and economic issues including governance and the role of institutions. Tools from economic theory are applied alongside country-specific and cross-country empirical evidence.

Prerequisite: ECO200Y1/ECO204Y1/ECO206Y1; ECO220Y1/ECO227Y1; (STA237H1, STA238H1); (STA247H1, STA248H1); (STA257H1, STA261H1). Note: Students with ECO100Y1(67%)/ECO101H1(63%)/ECO102H1(63%); STA237H1, STA238H1(80%), plus a full-year of quantitative methods/statistics (e.g. POL222H1, POL232H1), and who are enrolled in the International Relations or Peace, Conflict and Justice Major or Specialist programs may take this course with Permission of the Instructor.

Exclusion: ECO230Y1, ECO231H1, ECO232H1

Distribution Requirements: Social Science

Breadth Requirements: Society and its Institutions (3)

ECO369H1 - Health Economics

Hours: 24L/12T

The provision of health care provides many special problems of informational asymmetry, regulation, insurance and redistribution. A consideration of the demand and supply side problems. Alternative reform proposals for health care are explored.

Prerequisite: ECO200Y1/ECO204Y1/ECO206Y1; ECO220Y1/ECO227Y1; (STA237H1, STA238H1); (STA247H1, STA248H1); (STA257H1, STA261H1)

Distribution Requirements: Social Science

Breadth Requirements: Society and its Institutions (3)

ECO372H1 - Data Analysis and Applied Econometrics in Practice

Hours: 24L/12T

How multiple regression can be used to answer causal questions. Implications of, and how to interpret different model specifications and identification strategies. Students will read, critically evaluate and replicate existing research, and conduct their own original analyses. Statistical software STATA or R will be used.

Prerequisite: ECO200Y1/ECO204Y1/ECO206Y1; ECO220Y1/ECO227Y1; (STA237H1, STA238H1); (STA247H1, STA248H1); (STA257H1, STA261H1)

Distribution Requirements: Social Science

Breadth Requirements: Society and its Institutions (3)
**ECO374H1 - Forecasting and Time Series Econometrics**

**Hours:** 24L/12T

An introduction to econometrics similar to ECO375H1, with greater focus on applications drawn from business and financial economics. The course is built around the statistical foundations and economic applications of the multiple regression model. Using statistical software, students will also learn how to conduct, present, and critique empirical research.

**Prerequisite:** ECO200Y1/ECO204Y1/ECO206Y1; ECO220Y1 (STA237H1(70%), STA238H1(70%), STA247H1(70%), STA248H1(70%))/ (STA257H1, STA261H1)

**Recommended Preparation:** MAT221H1/MAT223H1/MAT240H1

**Distribution Requirements:** Social Science

**Breadth Requirements:** Society and its Institutions (3)

**ECO381H1 - Personnel Economics**

**Hours:** 24L/12T

An examination of selected material on compensation and incentives in organizations. Topics include: recruitment and hiring, training, turnover, downsizing, motivating workers, teams, allocating authority and task assignment.

**Prerequisite:** ECO200Y1/ECO204Y1/ECO206Y1; ECO220Y1/ECO227Y1/ STA237H1, STA238H1/ (STA247H1, STA248H1)/ (STA257H1, STA261H1)

**Exclusion:** ECO370Y1

**Distribution Requirements:** Social Science

**Breadth Requirements:** Society and its Institutions (3)

**ECO375H1 - Applied Econometrics I**

**Hours:** 24L/12T

Introduction to econometrics. Statistical foundations and the interpretation of multiple regression models, with an emphasis on cross-sectional data. Application of regressions to a wide variety of economic questions and data sources, including the use of statistical software. Problems in the identification of causality, and an introduction to methods of addressing common statistical issues.

**Prerequisite:** ECO200Y1/ECO204Y1/ECO206Y1; ECO220Y1 (STA237H1(70%), STA238H1(70%), STA247H1(70%), STA248H1(70%))/ (STA257H1, STA261H1)

**Exclusion:** ECO327Y5, ECO375H5

**Recommended Preparation:** MAT221H1/MAT223H1/MAT240H1

**Distribution Requirements:** Social Science

**Breadth Requirements:** Society and its Institutions (3)

**ECO380H1 - Markets, Competition, and Strategy**

**Hours:** 24L/12T

This course in applied microeconomics is concerned with the functioning of markets and the behaviour of firms within these markets. The focus is on strategic relationships between organizations, including competitive relationships among firms in the same market and cooperative relationships between a firm and its suppliers and distributors.

**Prerequisite:** ECO200Y1/ECO204Y1/ECO206Y1; ECO220Y1/ECO227Y1/ STA237H1, STA238H1/ (STA247H1, STA248H1)/ (STA257H1, STA261H1)

**Distribution Requirements:** Social Science

**Breadth Requirements:** Society and its Institutions (3)

**ECO398H0 - Research Excursions**

**Distribution Requirements:** Social Science

**ECO398Y0 - Research Excursions**

**Distribution Requirements:** Social Science

**ECO399Y1 - Research Opportunity Program**

Credit course for supervised participation in faculty research project. Details at https://www.artsci.utoronto.ca/current/academics/research-opportunities/research-opportunities-program. Not eligible for CR/NCR option.
ECO401H1 - Topics in Economic Policy

Hours: 24L/12T

This course covers basic issues in the theoretical and empirical evaluation of public policy. Sample topics include: income redistribution through taxation and the provision of social insurance and public goods, the mitigation of externalities, and welfare analysis in behavioural models.

Prerequisite: ECO200Y1/ECO204Y1/ECO206Y1; ECO202Y1/ECO208Y1/ECO227Y1; (STA237H1, STA238H1)/(STA247H1, STA248H1)/(STA257H1, STA261H1); at least 1.0 FCE in ECO at the 300+ level.

Distribution Requirements: Social Science

Breadth Requirements: Society and its Institutions (3)

ECO402H1 - Topics in Health Economics

Hours: 24L/12T

This course explores a variety of topics in health economics, providing students with an overview of current and historical institutional characteristics of the market for, and public policy towards, health care. Students will apply theoretical and empirical tools to current domestic and international issues in health policy. No previous background in health economics is required.

Prerequisite: ECO200Y1/ECO204Y1/ECO206Y1; ECO202Y1/ECO208Y1/ECO209Y1; ECO220Y1/(STA237H1, STA238H1)/(STA247H1, STA248H1)/(STA257H1, STA261H1); at least 1.0 FCE in ECO at the 300+ level.

Distribution Requirements: Social Science

Breadth Requirements: Society and its Institutions (3)

ECO403H1 - Topics in Development Economics and Policy

Hours: 24L/12T

This course covers a variety of topics pertaining to economic development and associated policies. Depending on the course instructor, the focus may be on theories and policies related to poverty alleviation, human capital formation, financial markets, international trade, governance or economic growth.

Prerequisite: ECO200Y1/ECO204Y1/ECO206Y1; ECO202Y1/ECO208Y1/ECO227Y1; (STA237H1, STA238H1)/(STA247H1, STA248H1)/(STA257H1, STA261H1); at least 1.0 FCE in ECO at the 300+ level.

Distribution Requirements: Social Science

Breadth Requirements: Society and its Institutions (3)

ECO404H1 - Topics in Managerial Economics

Hours: 24L/12T

 Applies quantitative economic methods to real world business-oriented cases. Sample topics include: new product design, decision making under uncertainty, market segmentation and price discrimination, inventory analysis, game theoretic analysis of price wars, financial portfolio design, and optimal pricing. Involves substantial modeling in Excel, regression analysis, optimization methods, and financial reports.

Prerequisite: ECO200Y1(75%)/ECO204Y1/ECO206Y1; ECO372H1/ECO374H1/ECO375H1; at least 1.0 FCE in ECO at the 300+ level.

Distribution Requirements: Social Science

Breadth Requirements: Society and its Institutions (3)

ECO406H1 - Developmental Macroeconomics

Hours: 24L/12T

This course studies a growth model applicable to both middle-income developing countries and resource-rich developed countries. Special attention is paid to causes of cyclical currency overvaluation, particularly Dutch disease and excessive capital inflows.

Prerequisite: ECO200Y1/ECO204Y1/ECO206Y1; ECO202Y1/ECO208Y1/ECO209Y1; ECO220Y1/(STA237H1, STA238H1)/(STA247H1, STA248H1)/(STA257H1, STA261H1); at least 1.0 FCE in ECO at the 300+ level.

Distribution Requirements: Social Science

Breadth Requirements: Society and its Institutions (3)

ECO407H1 - Competing Views in Macroeconomic Theory and Policy

Hours: 24L/24T

Provides students with a systematic analysis of competing perspectives on key areas of macroeconomic theory and policy. Special attention paid to competing views regarding key fiscal, monetary, and trade policy issues as applied to Canada.

Prerequisite: ECO200Y1/ECO204Y1/ECO206Y1; ECO202Y1/ECO208Y1/ECO209Y1; ECO220Y1/(STA237H1, STA238H1)/(STA247H1, STA248H1)/(STA257H1, STA261H1); at least 1.0 FCE in ECO at the 300+ level.

Distribution Requirements: Social Science

Breadth Requirements: Society and its Institutions (3)
ECO409H1 - Topics in Money, Banking, and Finance

Hours: 24L/12T

This course examines the foundations of money and financial institutions using tools mastered in micro and macroeconomics. The goal is a set of principles valid for the analysis of monetary policy and institutional regulation in a variety of real world settings.

Prerequisite: ECO202Y1/ECO204Y1/ECO206Y1; ECO202Y1/ECO204Y1/ECO209Y1; ECO220Y1/ECO227Y1/(STA237H1, STA238H1)/(STA247H1, STA248H1)/(STA257H1, STA261H1); at least 1.0 FCE in ECO at the 300+ level.

Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

ECO410H1 - Mergers and Competition Policy

Hours: 24L/24T

A combined theoretical, empirical and policy approach to mergers amongst competitors (horizontal mergers). Uses microeconomic models including game theory and econometrics. Delves into recent/current matters assessed by antitrust authorities domestically and/or internationally with applications to specific industries.

Prerequisite: ECO372H1/ECO374H1/ECO375H1; at least 1.0 FCE in ECO at the 300+ level.

Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

ECO414H1 - Energy and Regulation

Hours: 24L/12T

This course provides a general treatment of the economics of energy markets and the use of regulation in addressing environmental and other issues arising in these markets. A central theme is the search for an appropriate balance between market forces and regulatory/government intervention. Familiarity with tools of microeconomics and statistics/econometrics is essential. Topics include: oil, natural gas, coal and electricity markets, global warming and other externalities, networks, feed-in-tariffs, carbon taxes, 'cap-and-trade' and incentive regulation.

Prerequisite: ECO200Y1/ECO204Y1/ECO206Y1; ECO220Y1/ECO227Y1/(STA237H1, STA238H1)/(STA247H1, STA248H1)/(STA257H1, STA261H1)

Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

ECO416H1 - Macroeconometric Models for Policy Analysis and Forecasting

Hours: 24L/12T

The construction and operation of macroeconomic models. The use of models for conducting policy simulations and for generating quantitative forecasts of economic activity.

Prerequisite: ECO325H1, ECO374H1/ECO375H1

Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

ECO417H1 - Economic Development Policy: Community Engaged Learning

Hours: 12L/12T/12P

An examination of the causes and consequence of poverty in developing countries with a microeconomic focus, and how it relates it to poverty in the developed world, using a 30-hour service placement at a community organization. Importance of community and context specific factors in policy implementation; learn how local organizations have responded. Use of reflection assignments, papers, group work and class discussions to relate to course concepts. Topics include: poverty traps, health, education, and credit. An application to the instructor is necessary. Not eligible for CR/NCR option.

Prerequisite: ECO200Y1/ECO204Y1/ECO206Y1; ECO202Y1/ECO208Y1/ECO209Y1; ECO220Y1/ECO227Y1/(STA237H1, STA238H1)/(STA247H1, STA248H1)/(STA257H1, STA261H1)

Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

ECO418H1 - Empirical Applications of Economic Theory

Hours: 24L/12T

Topics class in applied econometrics, emphasizing empirical industrial organization. Emphasis on a balanced treatment of theory and econometric techniques used in empirical research in industrial organization (the study of firms and markets). How firms behave, how market equilibriums arise and how economic policies are used to affect market equilibriums.

Prerequisite: ECO374H1/ECO375H1

Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)
ECO419H1 - International Macroeconomics

Hours: 24L/12T

This course studies the causes and consequences of international borrowing and lending and exchange rate fluctuations. We will discuss key empirical facts about these phenomena, develop economic models to understand the forces that drive them, and apply the models to gain insights about a variety of historical contexts like China’s rapid economic development and the recent sovereign debt crises in the Eurozone periphery.

Prerequisite: ECO200Y1/ECO204Y1/ECO206Y1; ECO202Y1/ECO208Y1/ECO209Y1; ECO220Y1/ECO227Y1/ (STA237H1, STA238H1)/ (STA247H1, STA248H1)/ (STA257H1, STA261H1)

Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

ECO420Y1 - Special Topics in Economics

Hours: 48S

Seminars or workshops may be offered in one or more subjects each year. Students must meet the prerequisites announced by the Department.

Prerequisite: See the Department of Economics website for details.
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

ECO421H1 - Special Topics in Economics

Hours: 24S

Seminars or workshops may be offered in one or more subjects each year. Students must meet the prerequisites announced by the Department.

Prerequisite: See the Department of Economics website for details.
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

ECO422H1 - Special Topics in Economics

Hours: 24S

Seminars or workshops may be offered in one or more subjects each year. Students must meet the prerequisites announced by the Department.

Prerequisite: See the Department of Economics website for details.
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

ECO423H1 - Economics and Biosocial Data

Hours: 24L/12T

This course introduces and critically assesses economic research that uses genetic, neuroscientific, and other biosocial data. We will address questions such as: what are the effects of brain neurochemistry on economic decision-making? What role do nature and nurture play in economic behaviour and outcomes? What can we learn from genoeconomics? What are the policy implications (or lack thereof) of related findings? No previous background in biology or genetics is required.

Prerequisite: ECO200Y1/ECO204Y1/ECO206Y1; ECO220Y1/ECO227Y1/ (STA237H1, STA238H1)/ (STA247H1, STA248H1)/ (STA257H1, STA261H1); at least 1.0 FCE in ECO at the 300+ level.
Exclusion: ECO422H1 (Special Topics in Economics: Biology, Genetics and Economics), offered in Winter 2017.
Recommended Preparation: ECO372H1/ECO374H1/ECO375H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

ECO425H1 - Business Cycles

Hours: 24L/12T

This course builds on material covered in ECO208Y1. Students will learn how to use business cycle models to better understand key empirical features of the macroeconomy. Topics covered include: the financial crisis, monetary policy, fiscal policy, theories of unemployment, and the effects of innovation on economic fluctuations, the Great Depression and the Financial Crisis.

Prerequisite: ECO200Y1/ECO204Y1/ECO206Y1; ECO202Y1/ECO208Y1/ECO209Y1; ECO220Y1/ECO227Y1/ (STA237H1, STA238H1)/ (STA247H1, STA248H1)/ (STA257H1, STA261H1); at least 1.0 FCE in ECO at the 300+ level.
Corequisite: ECO374H1/ECO375H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

ECO426H1 - Market Design

Hours: 24L/12T

This course presents the theory and practice of market design, including matching markets and auctions. Sample topics include: school choice, kidney exchange, spectrum auctions, and keyword auctions.

Prerequisite: ECO316H1(70%)/ECO326H1(60%)
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)
ECO427H1 - Economics of Information

Previous Course Number: ECO421H1
Hours: 24L/12T

This course examines the role and the use of information in strategic situations. The class will expand on the material covered in game theory classes and illustrate it with applications. Topics include: communication, signalling, building reputations, adverse selection, etc.

Prerequisite: ECO316H1(60%)/ECO326H1
Exclusion: ECO421H1 (Special Topics in Economics: Economics of Information), offered in Winter 2018 and Winter 2020.
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

ECO428H1 - Classical Economic Thought

Hours: 24L/12T

An examination of the price, distribution, and growth theories of major economic thinkers before 1870, from pre-classical contributions by Aristotle, Mercantilists, and Physiocrats to the classical authors Adam Smith, David Ricardo, T.R. Malthus, and Karl Marx.

Prerequisite: ECO200Y1/ECO204Y1/ECO206Y1; ECO202Y1/ECO208Y1/ECO209Y1
Exclusion: ECO322Y5, ECO429Y1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

ECO429H1 - Economic Thought after 1870

Hours: 24L/12T

Economic analysis between 1870 and 1960, from the foundations of microeconomics by the Marginal Utility theorists of the 1870s (Jevons, Menger, and Walras), Alfred Marshall in the 1890s, and the capital theorists Bohm-Bawerk and Fisher in the early 1900s, to the Keynesian revolution in macroeconomics in the 1930s and Friedman’s counter-revolution in the 1950s.

Prerequisite: ECO200Y1/ECO204Y1/ECO206Y1; ECO202Y1/ECO208Y1/ECO209Y1
Exclusion: ECO322Y5, ECO429Y1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

ECO430Y1 - Reading Course or Thesis

Intended for advanced Specialist students who have exhausted course offerings in a particular area. Open only when a faculty member is available and willing to supervise. Students must obtain the approval of the Associate Chair for Undergraduate Studies before enrolling. Not eligible for CR/NCR option.

Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

ECO431H1 - Reading Course or Thesis

Intended for advanced Specialist students who have exhausted course offerings in a particular area. Open only when a faculty member is available and willing to supervise. Students must obtain the approval of the Associate Chair for Undergraduate Studies before enrolling. Not eligible for CR/NCR option.

Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

ECO434H1 - Topics in Political Economy

Hours: 24L/12T

This course surveys recent advances in political economy, emphasizing the critical evaluation of empirical evidence pertaining to political economic theories. Topics vary by year, but may include: voters and electoral competition, and the political economy of media and political agency.

Prerequisite: ECO316H1/ECO326H1; ECO374H1/ECO375H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

ECO435H1 - The Economics of Modern China

Hours: 24L/12T

A focus on post-1949 Chinese economy, and the PRCs economic legacy. Economic development during the Maoist period, particularly post-1979 reforms. China’s experience is compared to Eastern Europe’s and the role of China in the rapidly growing East Asian economy. This is a limited enrolment seminar requiring extensive reading.

Prerequisite: ECO200Y1(70%)/ECO204Y1(70%)/ECO206Y1(70%); ECO220Y1/ECO227Y1/(STA237H1, STA238H1)/(STA247H1, STA248H1)/(STA257H1, STA261H1)
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)
ECO437H1 - Quantitative Macroeconomics

Hours: 24L/12T

In order to capture the complexity of economic behaviour and interactions, especially with a significant time dimension, modern models of the macroeconomy make considerable use of computer simulation. This course teaches students both how to develop the economic models, and how to solve and work with them computationally.

Prerequisite: ECO325H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

ECO438H1 - Topics in Behavioural Economics

Previous Course Number: ECO422H1
Hours: 24L/12T

Behavioural Economics is a relatively new field that incorporates insights gained from psychological, experimental and neuroscientific studies. Research methods adapted from behavioural economics are now being employed in virtually every field in economics. The course will cover the main themes in behavioural economics: individual choices under risk and uncertainty, reference-dependent choices, intertemporal preferences, other-regarding preferences, bounded rationality in individual and interactive decision-making, and the measurement of rationality and recovery of preferences.

Prerequisite: ECO200Y1/ECO204Y1/ECO206Y1; ECO220Y1/ECO227Y1/STA237H1, STA238H1)/STA247H1, STA248H1)/STA257H1, STA261H1); at least 1.0 FCE in ECO at the 300+ level.
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

ECO439H1 - Empirical Methods in Microeconomics

Hours: 24L/12T

This course studies the methods used in modern program evaluation and micro-econometrics to identify causal effects in the presence of potentially unobserved confounding factors. Covers a range of methods and designs, both experimental and quasi-experimental. There is a heavy emphasis on the application of these methods to a broad range of economic questions.

Prerequisite: (ECO375H1(60%)/ECO374H1(70%)) OR (ECO200Y1(80%)/ECO204Y1(80%)/ECO206Y1(80%)/ECO220Y1(80%)/ECO227Y1(80%))
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

ECO446H1 - Advanced Public Economics

Hours: 24L/12T

Advanced topics in public economics and economic analysis of Canadian public policy. Through a mix of lectures and independent research, students will acquire theoretical and empirical tools for public policy analysis. Topics may include: income inequality and redistribution; fiscal federalism; taxation of corporate profits; and policies to deal with public goods and externalities.

Prerequisite: ECO200Y1/ECO204Y1/ECO206Y1; ECO220Y1/ECO227Y1/STA237H1, STA238H1)/STA247H1, STA248H1)/STA257H1, STA261H1); at least 1.0 FCE in ECO at the 300+ level.
Exclusion: ECO336Y1
Recommended Preparation: ECO372H1/ECO374H1/ECO375H1 (familiarity with STATA)
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

ECO451H1 - Macroeconomic Growth

Hours: 24L/12T

Studies current empirical evidence, and corresponding theoretical models to explain and understand macroeconomic growth, and its varied experience across countries. Coverage and depth of treatment go beyond ECO362H1. Students may benefit from, but need not have taken ECO362H1.

Prerequisite: ECO325H1(60%); ECO374H1(60%)/ECO375H1(60%)
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

ECO456H1 - Special Topics in Financial Economics

Hours: 24L/12T

Courses may be offered in one or more subjects each year. Students must meet the prerequisites announced by the Department.

Prerequisite: See the Department of Economics website for details.
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)
ECO459H1 - International Trade Regulation

Hours: 24L

The theory and political economy of international trade, with examination of specific trade institutions: Bretton Woods, WTO, NAFTA, tariff administration, most-favoured nation treatment, antidumping regulation, subsidies and countervailing duties, agriculture, trade in services, trade-related intellectual property, trade and environment, trade and developing countries.

Prerequisite: ECO364H1, ECO365H1, permission of the instructor
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

ECO461H1 - The Economics of Financial Risk Management

Hours: 24L/12T

This course is intended primarily for students in the Financial Economics specialist program and is not open to students in the BCom program. The role of risk management in both private and public sectors, a discussion of why firms and government should hedge financial risks; individual and social gains of financial risk management; identification and quantification of financial risks (including Value-at-Risk measures); how derivative securities can be used for financial risk management.

Prerequisite: ECO358H1(70%)
Exclusion: ACT349H1, RSM332H1, RSM333H1, RSM435H1, ECO460H5, ECO461H5
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

ECO463H1 - Financial Market Innovation

Hours: 24L/12T

A research-oriented course that explores the impact of technological developments on the industrial organization of financial markets. Topics include: the impact of the automated financial products and procedures (e.g., algorithmic trading and robo-advising) on the price formation process, the economic impact of new tools and technologies (e.g., blockchain, digital currencies, and predictive analytics such as machine learning), the emergence of alternative financing methods such as crowdfunding and peer-to-peer lending.

Prerequisite: ECO200Y1(70%)/ECO204Y1(60%)/ECO206Y1(60%); ECO374H1(70%)/ECO375H1(70%)/CSC321H1/CSC411H1
Exclusion: ECO463H5
Recommended Preparation: ECO358H1/RSM330H1/RSM332H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

ECO464H1 - Empirical Financial Economics

Hours: 24L/12T

The course develops the tools used in empirical research in financial economics. Coverage may include: discrete choice models, duration models, instrumental variables, differences-in-differences, regression discontinuity, propensity score estimators, sample selection models and cumulative abnormal return calculation. Topics are drawn from: ownership structure, mergers and acquisitions, capital structure, payout policy, CEOs' effect on the firm, executive compensation, insider trading, shareholder activism, and bank financing.

Prerequisite: ECO358H1(70%)/ RSM332H1(70%); ECO374H1(70%)/ ECO375H1(70%)/ ECO375H5(70%)/ ECO327Y5(70%)
Recommended Preparation: ECO359H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

ECO465H1 - International Finance

Hours: 24L/12T

An advanced course that addresses topics in international finance and macroeconomics. Potential topics include: foreign exchange market; exchange rate determination; empirical models of exchange rates; international financial markets and uncertainty; international CAPM and home bias; sovereign debt; optimal capital controls.

Prerequisite: One of the following:
ECO365H1(80%)/(ECO325H1(60%), ECO374H1(60%)); (ECO325H1(60%), ECO375H1(60%))
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)
ECO466H1 - Empirical Macroeconomics and Policy

Hours: 24L/12T

This course builds on material covered in ECO208Y1, ECO325H1, and ECO374H1/ECO375H1. Students will increase their data literacy and learn to apply techniques to address policy issues. Topics covered: how monetary policy is conducted, ways in which central banks use general equilibrium models and basic techniques for predicting key macroeconomic variables. Students will follow current global issues and forecast how domestic and international events may alter the Bank of Canada's monetary policy in the short run.

Prerequisite: ECO208Y1(70%)/ ECO209Y1(70%)/ ECO202Y1(75%)/ ECO325H1(70%); ECO374H1(70%)/ ECO375H1(70%)
Recommended Preparation: ECO325H1, ECO425H1, ECO475H1
Breadth Requirements: Society and its Institutions (3)

ECO475H1 - Applied Econometrics II

Previous Course Number: ECO376H1
Hours: 24L/12T

A research-oriented course continuing from ECO375H. The regression model is extended in several possible directions: time series analysis; panel data techniques; instrumental variables; simultaneous equations; limited dependent variables. Students will complete a major empirical term paper, applying the tools of econometrics to a topic chosen by the student.

Prerequisite: ECO375H1(70%)/ECO374H1(80%); NOTE: STA302H1 is not accepted preparation.
Exclusion: ECO376H1, ECO377Y5
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

ECO499H1 - Honours Essay in Applied Microeconomics

Hours: 24L/12T

Students will complete an original research paper on a topic of their choosing. Topic must be microeconomic and applied, meaning all papers will involve data and quantitative (regression) analysis.

Prerequisite: ECO200Y1/ECO204Y1/ECO206Y1; ECO202Y1/ ECO208Y1/ECO209Y1; ECO220Y1/ECO227Y1/ (STA237H1, STA238H1)/(STA247H1, STA248H1)/(STA257H1, STA261H1); ECO372H1/ECO374H1/ECO375H1; 3.0 GPA in economics courses; approval of the Associate Chair, Undergraduate.
Recommended Preparation: ECO374H1/ECO375H1 and ECO372H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

Introduction

Literary study engages with some of history’s most creative and articulate thinkers as they contemplate fundamental and persistent questions: How do individuals form and sustain meaningful relationships with one another? What is the purpose of art? How does language record and shape human experience? As a student in the English program, you will be introduced to the literary tradition in English, a fascinating conversation spanning over a thousand years and connecting nations and peoples all across the globe. In addition, you will be trained in methods of critical reading and writing which will help you to comprehend complex texts and the authors and societies that produced them. The skills acquired by students of English are directly applicable to any career that requires critical thinking and effective communication—from education to government, law to engineering, business to medicine, and beyond. Just as valuably, the study of English will provide you with models and tools for discovering and articulating your own perspective on the many different kinds of written texts that make up our world.

The Department of English offers courses in British, Canadian, and American literature; Indigenous literatures of North America; postcolonial, transnational, and diasporic English literatures of Africa, the Caribbean, and South Asia; and in the critical and theoretical literature through which literary critics and philosophers have developed vocabulary and methods for describing the forms, histories, and ideologies of literary art.

English courses are arranged in four series. Courses in our 100 series introduce students, in large lectures, to the study of English literature through sweeping surveys: of the literary tradition from Homer through the 19th century; of literature written in direct response to the events of recent decades; or of narrative forms in many genres and historical periods. Most 100-series courses include small-group tutorials, where students are introduced to critical reading and writing skills; essays at the 100 level typically do not require research or secondary sources. Courses in the 200 series provide historically, geographically, generically, or theoretically grounded introductions to the study of English literature. These include the four “gateway” courses required of all Specialists and Majors—introductions to the major national-historical fields (British, Canadian, and American) that comprise literatures in English—as well as a wide range of courses that will prepare students for further study. 300-series courses focus on particular literary periods, on diasporic literatures, and on special topics within a literature or literary genre. Courses at this level introduce students to research skills and typically require essays that incorporate secondary sources. Courses in the 400 series are both advanced and focused—unique courses created by Department faculty which often relate to their own research. Active student participation, including oral presentations, is an important part of these courses. These courses require a substantial research essay. English 400-series courses are open to students who have obtained standing in at least 9.0 FCE, including 4.0 ENG FCE, and who have completed ENG202H1, ENG203H1, ENG250H1, and ENG252H1 (though exemptions may be made for students registered in our pre-2018 programs).

The Department of English offers several Programs of Study. The Specialist is the most intensive and comprehensive, requiring a minimum of ten full-course equivalents (FCE) in a 20-FCE degree. The Major is the Department’s most popular program. It provides both depth and breadth to students who wish to focus on English studies but also wish to leave room in their degrees to pursue other interests. The Minor is the Department’s second-most popular program, and can be combined with Majors or Minors in a wide variety of other fields. On the presumption that the Minor is a curiosity-driven program, Minors are exempt from the required courses and distribution requirements of the Specialist and Major.

Students with questions about English Programs should consult the Office of the Associate Chair or the Undergraduate Counsellor. Students interested in graduate school in English should seek advice on course selection from their professors, academic counsellors, and the Office of the Director of Graduate Studies. Students considering a teaching career in Ontario should consult the admission counsellors at the Ontario Institute for Studies in Education/UT.

The Department of English publishes detailed course descriptions and reading lists online, usually at the beginning of May. Students are urged to consult these course descriptions at www.english.utoronto.ca before enrolment begins.

Associate Chair: Professor N. Morgenstern, Room 608, 170 St. George Street
Undergraduate Counsellor: Ms. V. Holmes, Room 609, 170 St. George Street (416-978-5026)
General Enquiries: Room 610, 170 St. George Street (416-978-3190)

Regarding English Programs

Students are responsible for completing all the requirements of an English program from the Calendar of the year in which they enrolled in the program. Completion of a first-year ENG course is not a requirement for any of our programs. Please note that we do not accept ENG100H1, ENG102H1, or any CR/NCR courses toward any of our programs. Enrolment in the English Specialist program requires a final grade of at least 73% in ENG110Y1, ENG140Y1, or ENG150Y1; or a final grade of at least 73% in 2.0 ENG 200-series FCE.
English Programs

English Specialist (Arts Program) - ASSPE1645

Enrolment Requirements:
This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

Completed courses (with minimum grades)
The following courses with the stated minimum grades are required:

- 73% in ENG110Y1, ENG140Y1, or ENG150Y1, or
- 2.0 credits from 200-series ENG courses, with a final grade of 73% in each.

Completion Requirements:
10.0 ENG credits, including 3.0 credits from 300+series ENG courses and 1.0 credit from 400-series ENG courses. Only 1.0 credit from 100-series ENG courses may be counted. We do not accept ENG100H1, ENG102H1, or any CR/NCR courses toward our programs.

Courses must fulfill the following requirements:

1. ENG202H1, ENG203H1, ENG250H1, ENG252H1
2. 0.5 ENG credit from Indigenous, Postcolonial, Transnational Literatures
3. 2.0 ENG credits from Pre-1800 British Literature
4. 0.5 ENG credit from Theory, Language, Critical Methods
5. ENG287H1; if not, 0.5 credit in any BR=5 course

English Major (Arts Program) - ASMAJ1645

Enrolment Requirements:
This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:
7.0 ENG credits, including 1.5 credits from 300+series ENG courses and a 0.5 credit 400-series ENG course. Only 1.0 credit from 100-series ENG courses may be counted. We do not accept ENG100H1, ENG102H1, or any CR/NCR courses toward our programs.

Courses must fulfill the following requirements:

1. ENG202H1, ENG203H1, ENG250H1, ENG252H1
2. 0.5 ENG credit from Indigenous, Postcolonial, Transnational Literatures
3. 1.0 ENG credit from Pre-1800 British Literature
4. 0.5 ENG credit from Theory, Language, Critical Methods
5. ENG287H1; if not, 0.5 credit in any BR=5 course

English Minor (Arts Program) - ASMIN1645

Enrolment Requirements:
This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:
4.0 ENG credits, including 1.0 credit from 300+series ENG courses.

Only 1.0 credit from 100-series ENG courses may be counted. We do not accept ENG100H1, ENG102H1, or any CR/NCR courses toward our programs.

Asian Literatures and Cultures Minor (Arts Program) - ASMIN2726

Description:
This humanities-based Minor program represents a unique opportunity to study Asian Literatures and Cultures within a Southasian location. Students take core subjects at the first-year or second-year level in Toronto and then spend one semester of their second, third or fourth year at the National University of Singapore (NUS) where they are enrolled in lecture courses. For more information, contact the English Undergraduate Office and the Centre for International Experience at studentlife.utoronto.ca/cie.

Enrolment Requirements:
This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

Special Requirement
- A supplementary application is required. For more information, contact the Centre for International Experience (CIE, studentlife.utoronto.ca/cie).

Completion Requirements:
Four credits, including 1.0 credit from ENG270H1, ENG369H1, or ENG370Y1, and one additional ENG credit, and two appropriate NUS credits, including at least one 300-series ENG or NUS credit. Please note that we do not accept ENG100H1, ENG102H1, or any CR/NCR courses toward any of our programs. Students are advised to contact the Undergraduate Counsellor in advance of going abroad to discuss course selection at NUS.

Course Groups

Courses that may be counted toward English programs but that are not grouped:

- ENG110Y1 Narrative
- or
• ENG140Y1 Literature for our Time
• or
• ENG150Y1 Literary Traditions
• ENG202H1 Introduction to British Literature I
• ENG203H1 Introduction to British Literature II
• ENG210H1 Introduction to the Novel
• ENG213H1 The Short Story
• ENG215H1 The Canadian Short Story
• ENG234H1 Children’s Literature
• ENG235H1 The Graphic Novel
• ENG237H1 Science Fiction
• ENG239H1 Fantasy and Horror
• ENG250H1 Introduction to American Literature
• ENG252H1 Introduction to Canadian Literature
• ENG254H1 Introduction to Indigenous Literatures
• ENG269H1 English Literature and Chinese Translation
• ENG270H1 Introduction to Colonial and Postcolonial Writing
• ENG300Y1 Old English Language and Literature
• ENG301Y1 Reading Poetry
• ENG302Y1 English Renaissance Literature
• ENG305H1 Swift, Pope, and Their Contemporaries
• ENG306Y1 Restoration and Eighteenth-Century Literature
• ENG308Y1 Romantic Literature
• ENG320H1 Shakespeare
• ENG322Y1 The Rise of the Novel
• ENG323H1 Austen and Her Contemporaries
• ENG324Y1 The Victorian Novel
• ENG325H1 Children’s Literature
• ENG326H1 The Graphic Novel
• ENG327H1 Science Fiction
• ENG328Y1 Modern Fiction
• ENG329H1 Contemporary British Fiction
• ENG330Y1 Chaucer
• ENG331H1 Drama 1485–1603
• ENG332H1 Drama 1660–1800
• ENG335H1 Drama 1603–1642
• ENG337H1 Topics in Pre-1800 British Literature
• ENG338Y1 Contemporary American Fiction
• ENG339H1 Contemporary Poetry
• ENG340H1 Modern Drama
• ENG341H1 Post-Modern Drama
• ENG342Y1 Modern Poetry to 1960
• ENG344H1 Contemporary American Fiction
• ENG345H1 Contemporary Poetry
• ENG346H1 Modern Poetry to 1960
• ENG347Y1 Victorian Literature
• ENG348Y1 Modern Poetry to 1960
• ENG349H1 Early Canadian Literature
• ENG350H1 Early Canadian Literature
• ENG351H1 Canadian Drama
• ENG352H1 Canadian Drama
• ENG353Y1 Canadian Fiction
• ENG354Y1 Canadian Poetry
• ENG355Y1 Transnational Indigenous Literatures
• ENG356Y1 African Canadian Literature
• ENG358Y1 African Literatures in English
• ENG359H1 Asian North American Literature
• ENG360H1 Early American Literature
• ENG361H1 American Literature to 1900
• ENG362Y1 American Literature 1900 to the present
• ENG363Y1 American Literature to 1900
• ENG364Y1 American Literature 1900 to the present
• ENG365Y1 Pre-1800 British Literature
• ENG366H1 Topics in Pre-1800 British Literature
• ENG367H1 African Literatures in English
• ENG368H1 Asian North American Literature

• ENG384Y1 Literature and Psychoanalysis
• ENG385H1 History of the English Language

Regarding English Courses

Please note: Not all courses are offered every year.
Only ONE of ENG110Y1, ENG140Y1, or ENG150Y1 may be counted toward English program requirements. ENG100H1 and ENG102H1 may not be used to meet the requirements of any English program. First-year students may enrol in a 200-series ENG course if they are concurrently enrolled in ENG110Y1, ENG140Y1, or ENG150Y1. English 200-series courses are open to students who have obtained standing in 1.0 ENG FCE or in any 4.0 FCE. Students without these prerequisites may enrol in a 200-series course if they are concurrently enrolled in ENG110Y1, ENG140Y1, or ENG150Y1. English 300-series courses are open to students who have obtained standing in 4.0 FCE, including 2.0 ENG FCE. Students should note the special prerequisites for ENG388H1, ENG389H1, ENG390Y1, ENG391Y1, ENG392H1, and ENG393H1: consult the descriptions online before the May 15 deadline for instructions on applying for these courses. English 400-series courses are open to students who have obtained 4.0 ENG FCE (including ENG202H1, ENG203H1, ENG250H1, ENG252H1); and any 9.0 FCE (though exemptions may be made for students registered in our pre-2018 programs). Students who require a 400-series course to satisfy their program requirements have enrolment priority in the first round of course enrolment. Individual topics to be specified by instructors. Seminars are designed to provide students with the opportunity to practice their skills of research and interpretation at a particularly advanced level. These courses are not eligible for the CR/NCR option. Please note that prerequisites and exclusions will be strictly enforced.

**English Courses**

**ENG100H1 - Effective Writing**

*Hours: 36L*

Practical tools for writing in university and beyond. Students will gain experience in generating ideas, clarifying insights, structuring arguments, composing paragraphs and sentences, critiquing and revising their writing, and communicating effectively to diverse audiences. This course may not be counted toward any English program.

**Distribution Requirements:** Humanities  
**Breadth Requirements:** Creative and Cultural Representations (1)

**ENG102H1 - Literature and the Sciences**

*Hours: 36L*

Literature has always provided a place for the imaginative exploration of science, technology, and the physical universe. For students interested in literary treatments of science and scientific problems, concerns, and methods. Assumes no background in the methods and techniques of literary scholarship. This course may not be counted toward any English program.

**Distribution Requirements:** Humanities  
**Breadth Requirements:** Creative and Cultural Representations (1)

**ENG110Y1 - Narrative**

*Hours: 48L/24T*

This course explores the stories that are all around us and that shape our world: traditional literary narratives such as ballads, romances, and novels, and also non-literary forms of narrative, such as journalism, movies, myths, jokes, legal judgments, travel writing, histories, songs, diaries, biographies.

**Distribution Requirements:** Humanities  
**Breadth Requirements:** Creative and Cultural Representations (1)

**ENG140Y1 - Literature for our Time**

*Hours: 48L/24T*

An exploration of how recent literature in English responds to our world. Includes poetry, prose, and drama by major writers of the twentieth century and emerging writers of the current century.

**Distribution Requirements:** Humanities  
**Breadth Requirements:** Creative and Cultural Representations (1)

**ENG150Y1 - Literary Traditions**

*Hours: 48L/24T*

An introduction to major authors, ideas, and texts that shaped and continue to inform the ever-evolving traditions of literature in English. Includes works and authors from antiquity to the nineteenth century such as the Bible, the Qur'an, Plato, Homer, Sappho, Virgil, Dante, Christine de Pizan, Shakespeare, Cervantes, Montaigne, Austen, Dostoevski.

**Distribution Requirements:** Humanities  
**Breadth Requirements:** Creative and Cultural Representations (1)

**ENG196H1 - Time Travel and Narrative**

*Hours: 24S*

From H.G. Wells to Star Trek to Bill and Ted's Excellent Adventure, tales of time travelers remain captivating. What does our fascination with time travel tell us about storytelling and narrative? This course will explore the questions that time travel raises about narrative as well as history, temporality, subjectivity, and agency. We will look at examples of time travel in film, television, and books as well as philosophical and scientific writing about it. Restricted to first-year students. Not eligible for CR/NCR option.

**Exclusion:** ENG197H1, ENG198H1, ENG199H1  
**Distribution Requirements:** Humanities  
**Breadth Requirements:** Creative and Cultural Representations (1)
ENG197H1 - Representing Disability

Hours: 24S

Understanding disability as a cultural concept—not a medical condition or personal misfortune—that describes how human variation matters in the world, this course asks: how do literary texts represent physical and intellectual disability? Reading drama, fiction, and poetry, we will consider how disability prompts new strategies of writing and thinking. Restricted to first-year students. Not eligible for CR/NCR option.

Exclusion: ENG196H1, ENG198H1, ENG199H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

ENG198H1 - Monster Encounters: Monsters and the Monstrous in Literature

Hours: 24S

Monsters and the monstrous have been among the most compelling and frequently recurring elements in literature, from ancient times to the present day. From Homer's Cyclops to Ridley Scott's alien, monstrous figures have terrified and transfixed all those who come upon them. In this course, we will examine the figure of the monster to see what we might gain from our own encounter with the monstrous. Readings will include epic poems, novels, and critical selections from the burgeoning field of inquiry known as "monster studies." Restricted to first-year students. Not eligible for CR/NCR option.

Exclusion: ENG196H1, ENG197H1, ENG199H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

ENG199H1 - "Tell It Slant": Mental Illness and Literature

Hours: 24S

This course will explore representations of mental illness in poetry, short fiction and essays from the nineteenth, twentieth and twenty-first centuries. We will consider the relationship of literature to "madness," "hysteria" and "melancholia" and work to historically and politically contextualize some of our contemporary dilemmas regarding psychic distress. Restricted to first-year students. Not eligible for CR/NCR option.

Exclusion: ENG196H1, ENG197H1, ENG198H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

ENG201Y1 - Reading Poetry

Hours: 72L

An introduction to poetry through a close reading of texts, focusing on its traditional forms, themes, techniques, and uses of language; its historical and geographical range; and its twentieth-century diversity.

Prerequisite: 1.0 ENG FCE or any 4.0 FCE
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

ENG202H1 - Introduction to British Literature I

Previous Course Number: ENG202Y1
Hours: 36L

An introduction to British literature, exploring works in poetry, prose, and drama from the medieval period to the end of the seventeenth century.

Prerequisite: 1.0 ENG FCE or any 4.0 FCE
Exclusion: ENG202Y1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

ENG203H1 - Introduction to British Literature II

Previous Course Number: ENG202Y1
Hours: 36L

An introduction to British literature, exploring works in poetry, prose, and drama from the end of the seventeenth century into the twentieth century.

Prerequisite: 1.0 ENG FCE or any 4.0 FCE
Exclusion: ENG202Y1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)
ENG205H1 - Rhetoric

Hours: 36L

An introduction to the rhetorical tradition from classical times to the present with a focus on prose as strategic persuasion. Besides rhetorical terminology, topics may include the discovery and arrangement of arguments, validity in argumentation, elements of style, and rhetorical criticism and theory.

Prerequisite: 1.0 ENG FCE or any 4.0 FCE
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

JEI206H1 - Writing English Essays

Hours: 24L/12T

This course teaches students who already write effectively how to write clear, compelling, research-informed English essays. The course aims to help students recognize the function of grammar and rhetoric, the importance of audience, and the persuasive role of style.

Prerequisite: 1.0 ENG FCE or any 4.0 FCE. English students have priority.
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

ENG210H1 - Introduction to the Novel

Previous Course Number: ENG210Y1
Hours: 36L

An introduction to the novel as literary genre through a reading of five or six key novels from a range of periods and regions.

Prerequisite: 1.0 ENG FCE or any 4.0 FCE
Exclusion: ENG210Y1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

ENG213H1 - The Short Story

Hours: 36L

This course explores shorter works of nineteenth- and twentieth-century writers. Special attention is paid to formal and rhetorical concepts for the study of fiction as well as to issues such as narrative voice, allegory, irony, and the representation of temporality.

Prerequisite: 1.0 ENG FCE or any 4.0 FCE
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

ENG215H1 - The Canadian Short Story

Hours: 36L

An introduction to the Canadian short story, this course emphasizes its rich variety of settings, subjects, and styles.

Prerequisite: 1.0 ENG FCE or any 4.0 FCE
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

ENG220H1 - Introduction to Shakespeare

Previous Course Number: ENG220Y1
Hours: 36L

An introduction to Shakespeare’s work through five or six representative plays. Readings may include non-dramatic poetry as well as plays.

Prerequisite: 1.0 ENG FCE or any 4.0 FCE
Exclusion: ENG220Y1, ENG320Y1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

ENG234H1 - Children's Literature

Hours: 36L

A critical and historical study of poetry and fiction written for or appropriated by children, this course may also include drama or non-fiction and will cover works by at least twelve authors such as Bunyan, Stevenson, Carroll, Twain, Alcott, Nesbit, Montgomery, Milne, Norton, Fitzhugh.

Prerequisite: 1.0 ENG FCE or any 4.0 FCE
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

ENG235H1 - The Graphic Novel

Hours: 36L

An introduction to book-length sequential art, this course includes fictional and nonfictional comics, with a focus on formal properties such as narrative layout and text/art hybridity. Themes vary but may include superheroes; auto/biography; the figure of the outsider; women in comics; alienation and youth; and war reporting.

Prerequisite: 1.0 ENG FCE or any 4.0 FCE
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)
ENG237H1 - Science Fiction

Hours: 36L

This course explores speculative fiction that invents or extrapolates an inner or outer cosmology from the physical, life, social, and human sciences. Typical subjects include AI, alternative histories, cyberpunk, evolution, future and dying worlds, genetics, space/time travel, strange species, theories of everything, utopias, and dystopias.

Prerequisite: 1.0 ENG FCE or any 4.0 FCE

Distribution Requirements: Humanities

Breadth Requirements: Creative and Cultural Representations (1)

ENG239H1 - Fantasy and Horror

Hours: 36L

This course explores speculative fiction of the fantastic, the magical, the supernatural, and the horrific. Subgenres may include alternative histories, animal fantasy, epic fantasy, the Gothic, fairy tales, magic realism, sword and sorcery, and vampire fiction.

Prerequisite: 1.0 ENG FCE or any 4.0 FCE

Distribution Requirements: Humanities

Breadth Requirements: Creative and Cultural Representations (1)

ENG240Y1 - Old English Language and Literature

Hours: 72L

Prepares students to read the oldest English literary forms in the original language. Introduces the earliest English poetry in a woman’s voice, expressions of desire, religious fervour, and the agonies of war. Texts, written 680 - 1100, range from the epic of Beowulf the dragon-slayer to ribald riddles.

Prerequisite: 1.0 ENG FCE or any 4.0 FCE

Distribution Requirements: Humanities

Breadth Requirements: Creative and Cultural Representations (1)

ENG250H1 - Introduction to American Literature

Previous Course Number: ENG250Y1

Hours: 36L

An introduction to American literature, exploring works in a variety of genres, including poetry, fiction, essays, and slave narratives.

Prerequisite: 1.0 ENG FCE or any 4.0 FCE

Exclusion: ENG250Y1

Distribution Requirements: Humanities

Breadth Requirements: Creative and Cultural Representations (1)

ENG252H1 - Introduction to Canadian Literature

Previous Course Number: ENG252Y1

Hours: 36L

An introduction to Canadian literature, exploring works in poetry, prose, and drama from early to recent times.

Prerequisite: 1.0 ENG FCE or any 4.0 FCE

Exclusion: ENG252Y1

Distribution Requirements: Humanities

Breadth Requirements: Creative and Cultural Representations (1)

ENG254H1 - Introduction to Indigenous Literatures

Previous Course Number: ENG254Y1

Hours: 36L

An introduction to Indigenous writings in English, with significant attention to Indigenous literatures in Canada. The writings are placed within the context of Indigenous cultural and political continuity, linguistic and territorial diversity, and living oral traditions. The primary focus may be on contemporary Indigenous writing.

Prerequisite: 1.0 ENG FCE or any 4.0 FCE

Exclusion: ENG254Y1

Distribution Requirements: Humanities

Breadth Requirements: Creative and Cultural Representations (1)
ENG269H1 - English Literature and Chinese Translation

Hours: 36L

This course studies how works of English literature have been translated and presented in modern Chinese culture. It requires no background in translation or literary studies. Through exercises and workshops, students will be exposed to works by British, American, and Canadian authors. Students will engage with issues in translation studies and learn practical skills of translation from English to Chinese. Class will be taught primarily in English, supplemented by Mandarin. Assignments to be completed in English. Reading knowledge of Mandarin is required.

Prerequisite: 1.0 ENG FCE or any 4.0 FCE; reading knowledge of Mandarin
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

ENG270H1 - Introduction to Colonial and Postcolonial Writing

Previous Course Number: ENG270Y1
Hours: 36L

In this course, we examine the colonial archive for its representations of race, indigeneity, sexuality, and capital accumulation. We familiarize ourselves with the aesthetic and political modes of resisting colonial power around the world. Besides literary texts, our objects of study may include photographs, film, and digital media.

Prerequisite: 1.0 ENG FCE or any 4.0 FCE
Exclusion: ENG270Y1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

ENG273Y1 - Queer Writing

Hours: 72L

Introducing a lesbian, gay, bisexual, trans, and queer tradition in literature and theory, this course explores classical, modern, postmodern, and contemporary literature, criticism, art, film, music, and popular culture.

Prerequisite: 1.0 ENG FCE or any 4.0 FCE
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

ENG280H1 - Critical Approaches to Literature

Hours: 36L

An introduction to the theory and practice of literary criticism. Focusing on a single text or small group of texts, students will gain experience with close reading and analysis, critical theory, research methods, and the conventions and skills particular to literary-critical writing.

Prerequisite: 1.0 ENG FCE or any 4.0 FCE
Distribution Requirements: Creative and Cultural Representations (1)

ENG281H1 - Writing About Literature

Hours: 24L/12T

An introduction to the skills and contexts that underlie university-level writing about literature. Students will analyze the style and mechanics of literary criticism in a variety of fields, including published essays by Department faculty. Guest speakers and writing-intensive tutorials will help students begin to join the critical conversation.

Prerequisite: 1.0 ENG FCE or any 4.0 FCE
Distribution Requirements: Creative and Cultural Representations (1)

ENG285H1 - The English Language in the World

Hours: 36L

This introductory course surveys transnational, regional, and social varieties of Later Modern English; the linguistic and social factors that have shaped them; their characteristic structures; and their uses in speech and in writing, both literary and non-literary.

Prerequisite: 1.0 ENG FCE or any 4.0 FCE
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)
ENG287H1 - The Digital Text

Hours: 24L/12T

Explores the relations between digital technology and literary studies. Students will use such tools as computer-assisted analysis, digital editions, and visualization to ask new questions about literature. Readings may include born-digital fiction. Students will gain hands-on experience with digital technology, but no programming experience is required.

Prerequisite: 1.0 ENG FCE or any 4.0 FCE
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

ENG289H1 - Introduction to Creative Writing

Hours: 36L

An introduction to creative writing, especially poetry and short fiction, attending to conventions of literary forms and genres, as well as to writing strategies, techniques, and terminology.

Prerequisite: 1.0 ENG FCE or any 4.0 FCE
Exclusion: ENG389Y1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

ENG296Y0 - Topics in English Literature

Content varies with Instructor. Offered by the Summer Abroad program, usually in Oxford, England.

Prerequisite: 1.0 ENG FCE or any 4.0 FCE

ENG297Y0 - Topics in English Literature

Content varies with Instructor. Offered by the Summer Abroad program, usually in Siena, Italy.

Prerequisite: 1.0 ENG FCE or any 4.0 FCE

ENG299Y1 - Research Opportunity Program

Credit course for supervised participation in faculty research project. Details at https://www.artsci.utoronto.ca/current/academics/research-opportunities/research-opportunities-program. Not eligible for CR/NCR option.

Distribution Requirements: Humanities

ENG300Y1 - Chaucer

Hours: 72L

An in-depth study of Chaucer's major works, including The Canterbury Tales and Troilus and Criseyde.

Prerequisite: 2.0 ENG FCE and any 4.0 FCE
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

ENG302Y1 - English Renaissance Literature

Hours: 72L

A survey of some of the major works in English poetry and prose written between 1500 and 1660. Some dramatic literature may be considered as well.

Prerequisite: 2.0 ENG FCE and any 4.0 FCE
Exclusion: ENG304Y1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

ENG303H1 - Milton

Hours: 36L

Selections from Paradise Lost and other works.

Prerequisite: 2.0 ENG FCE and any 4.0 FCE
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

ENG305H1 - Swift, Pope, and Their Contemporaries

Hours: 36L

Selected works in prose and verse by Swift and Pope studied alongside works by their contemporaries. Topics may include the legitimacy of satire, the role of criticism, and the growing importance of writing by women.

Prerequisite: 2.0 ENG FCE and any 4.0 FCE
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)
ENG306Y1 - Restoration and Eighteenth-Century Literature

Hours: 72L

A study of selected works by Dryden, Pope, Swift, Johnson, and at least six other authors.

Prerequisite: 2.0 ENG FCE and any 4.0 FCE
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

ENG308Y1 - Romantic Literature

Hours: 72L

Poetry and critical prose of Blake, W. Wordsworth, Coleridge, Byron, P.B. Shelley, and Keats; may include selections from other writers such as Crabbe, Scott, Landor, Clare, D. Wordsworth, M. Shelley, De Quincey.

Prerequisite: 2.0 ENG FCE and any 4.0 FCE
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

ENG311H1 - Medieval Literature

Hours: 36L

This course explores a selection of writings in early English, excluding those by Chaucer.

Prerequisite: 2.0 ENG FCE and any 4.0 FCE
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

ENG320Y1 - Shakespeare

Hours: 72L

An in-depth study of Shakespeare's work, covering the different periods of his career and the different genres in which he worked. Readings may include non-dramatic poetry as well as plays.

Prerequisite: 2.0 ENG FCE and any 4.0 FCE
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

ENG322Y1 - The Rise of the Novel

Hours: 72L

This course, spanning from 1660 to the 1830s, studies the emergence of prose fiction as a genre recognized in both a literary and a commercial sense. Authors may include Behn, Defoe, Richardson, Fielding, Sterne, Scott, Austen.

Prerequisite: 2.0 ENG FCE and any 4.0 FCE
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

ENG323H1 - Austen and Her Contemporaries

Hours: 36L

A study of selected novels of Jane Austen and of works by such contemporaries as Radcliffe, Godwin, Wollstonecraft, Wordsworth, Edgeworth, Scott, and Shelley, in the context of the complex literary, social, and political relationships of that time.

Prerequisite: 2.0 ENG FCE and any 4.0 FCE
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

ENG324Y1 - The Victorian Novel

Hours: 72L

A study of such topics as the comic art of Dickens, Trollope, and Thackeray; the Gothicism of the Brontës; the crisis of religious faith in George Eliot; and the powerful moral fables of Hardy. Students will read 10-12 novels.

Prerequisite: 2.0 ENG FCE and any 4.0 FCE
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

ENG328Y1 - Modern Fiction

Hours: 72L

This course explores ten to twelve works by such writers as James, Conrad, Cather, Forster, Joyce, Woolf, Lawrence, Faulkner, Rhys, Hemingway, Achebe, Ellison, Spark, Lessing.

Prerequisite: 2.0 ENG FCE and any 4.0 FCE
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)
ENG329H1 - Contemporary British Fiction

Hours: 36L

This course explores six or more works by at least four British contemporary writers of fiction.

Prerequisite: 2.0 ENG FCE and any 4.0 FCE
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

ENG330H1 - Medieval Drama

Hours: 36L

Plays and other texts composed for live performance across the first millennium of English history, primarily 1300-1485; morality plays, biblical pageants, solo performances, large-scale spectacles, mummmings, religious rituals, rude songs, recovered fragments. Basic training in reading/translating medieval English sources and in decoding early cues for staging.

Prerequisite: 2.0 ENG FCE and any 4.0 FCE
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

ENG331H1 - Drama 1485-1603

Hours: 36L

Plays and performance history across Britain, 1485 to 1603; the rise of London theatres and of named English and Scottish playwrights (Medwall, Redford, Marlowe, Shakespeare, etc.); anonymous sixteenth-century plays from Cheshire, Yorkshire, East Anglia, and Cambridgeshires; traces of lost performances in the archives.

Prerequisite: 2.0 ENG FCE and any 4.0 FCE
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

ENG335H1 - Drama 1603-1800

Hours: 36L

At least twelve plays, including works by Dryden, Wycherley, Congreve, and their successors, chosen to demonstrate the modes of drama practised during the period, the relationship between these modes and that between the plays and the theatres for which they were designed.

Prerequisite: 2.0 ENG FCE and any 4.0 FCE
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

ENG337H1 - Drama 1660-1800

Hours: 36L

A survey of major texts in a variety of genres by authors such as Darwin, Tennyson, Browning, Wilde, Nightingale, Christina Rossetti, Kipling.

Prerequisite: 2.0 ENG FCE and any 4.0 FCE
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

ENG340H1 - Modern Drama

Hours: 36L

A study of plays by such dramatists as Wilde, Yeats, Shaw, Synge, Glaspell, Hughes, O'Neill, as well as plays in translation by such dramatists as Ibsen, Chekhov, Strindberg, Pirandello.

Prerequisite: 2.0 ENG FCE and any 4.0 FCE
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

ENG341H1 - Post-Modern Drama

Hours: 36L

A study of plays by such dramatists as Beckett, Miller, Williams, Pinter, Soyinka, Churchill, with background readings from other dramatic literatures.

Prerequisite: 2.0 ENG FCE and any 4.0 FCE
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

ENG347Y1 - Victorian Literature

Hours: 72L

A survey of major texts in a variety of genres by authors such as Darwin, Tennyson, Browning, Wilde, Nightingale, Christina Rossetti, Kipling.

Prerequisite: 2.0 ENG FCE and any 4.0 FCE
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)
ENG348Y1 - Modern Poetry to 1960

Hours: 72L

Special study of Yeats, Pound, Eliot, Auden, Stevens; selections from other poets.

Prerequisite: 2.0 ENG FCE and any 4.0 FCE
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

ENG349H1 - Contemporary Poetry

Hours: 36L

Works by at least six contemporary poets, such as Ammons, Ashbery, Heaney, Hughes, Lowell, Muldoon, Plath.

Prerequisite: 2.0 ENG FCE and any 4.0 FCE
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

ENG350H1 - Early Canadian Literature

Hours: 36L

Writing in English Canada before 1914, from a variety of genres such as the novel, poetry, short stories, exploration and settler accounts, nature writing, criticism, First Nations cultural production.

Prerequisite: 2.0 ENG FCE and any 4.0 FCE
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

ENG352H1 - Canadian Drama

Hours: 36L

A study of major Canadian playwrights and developments since 1940, with some attention to the history of the theatre in Canada.

Prerequisite: 2.0 ENG FCE and any 4.0 FCE
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

ENG353Y1 - Canadian Fiction

Hours: 72L

A study of ten to twelve Canadian works of fiction, primarily novels.

Prerequisite: 2.0 ENG FCE and any 4.0 FCE
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

ENG354Y1 - Canadian Poetry

Hours: 72L

A study of major Canadian poets, modern and contemporary.

Prerequisite: 2.0 ENG FCE and any 4.0 FCE
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

ENG355Y1 - Transnational Indigenous Literatures

Previous Course Number: ENG355H1

Hours: 72L

A study of works by Indigenous writers from North America and beyond, with significant attention to Indigenous writers in Canada. Texts engage with issues of de/colonization, representation, gender, and sexuality, and span multiple genres, including fiction, life writing, poetry, drama, film, music, and creative non-fiction.

Prerequisite: 2.0 ENG FCE and any 4.0 FCE
Exclusion: ENG355H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

ENG356Y1 - African Canadian Literature

Previous Course Number: ENG359H1

Hours: 72L

Black Canadian Literature (poetry, drama, fiction, non-fiction) from its origin in the African Slave Trade in the eighteenth century to its current flowering as the expression of immigrants, exiles, refugees, ex-slave-descended, and colonial-settler-established communities. Pertinent theoretical works, films, and recorded music are also considered.

Prerequisite: 2.0 ENG FCE and any 4.0 FCE
Exclusion: ENG359H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)
ENG357H1 - New Writing in Canada

Hours: 36L

Close encounters with recent writing in Canada: new voices, new forms, and new responses to old forms. Texts may include or focus on poetry, fiction, drama, non-fiction, or new media.

Prerequisite: 2.0 ENG FCE and any 4.0 FCE
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

ENG360H1 - Early American Literature

Hours: 36L

This course explores writing in a variety of genres produced in the American colonies in the seventeenth and eighteenth centuries, such as narratives, poetry, autobiography, journals, essays, sermons, court transcripts.

Prerequisite: 2.0 ENG FCE and any 4.0 FCE
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

ENG363Y1 - American Literature to 1900

Hours: 72L

This course explores American writing in a variety of genres from the end of the Revolution to the beginning of the twentieth century.

Prerequisite: 2.0 ENG FCE and any 4.0 FCE
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

ENG364Y1 - American Literature 1900 to the present

Hours: 72L

This course explores twentieth-century American writing in a variety of genres.

Prerequisite: 2.0 ENG FCE and any 4.0 FCE
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

ENG365H1 - Contemporary American Fiction

Hours: 36L

This course explores six or more works by at least four contemporary American writers of fiction.

Prerequisite: 2.0 ENG FCE and any 4.0 FCE
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

ENG367H1 - African Literatures in English

Hours: 36L

What, if anything, is distinctively "African" in African texts; what might it mean to produce "African" readings of African literature? We address these, as well as other questions, through close readings of oral performances and literary and other cultural texts.

Prerequisite: 2.0 ENG FCE and any 4.0 FCE
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

ENG368H1 - Asian North American Literature

Hours: 36L

Literature and cultures of Asian Canadians and Asian Americans, including fiction, poetry, theory, drama, film, and other media.

Prerequisite: 2.0 ENG FCE and any 4.0 FCE
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

ENG369H1 - South Asian Literatures in English

Hours: 36L

Major authors and literary traditions of South Asia, with specific attention to literatures in English from India, Sri Lanka, Pakistan, Bangladesh, and the diaspora. The focus will be on fiction and poetry with some reference to drama.

Prerequisite: 2.0 ENG FCE and any 4.0 FCE
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)
ENG370Y1 - Postcolonial and Transnational Discourses

Previous Course Number: ENG370H1
Hours: 72L

This course focuses on recent theorizations of postcoloniality and transnationality through readings of fictional and non-fictional texts, along with analyses of contemporary films and media representations.

Prerequisite: 2.0 ENG FCE and any 4.0 FCE
Exclusion: ENG370H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

ENG371H1 - Topics in Indigenous, Postcolonial, Transnational Literatures

Hours: 36L

Sustained study in a topic pertaining to Indigenous, postcolonial, or transnational literatures. Content varies with instructors. See Department website for current offerings. Course may not be repeated under the same subtitle.

Prerequisite: 2.0 ENG FCE and any 4.0 FCE
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

ENG372H1 - Topics in Indigenous, Postcolonial, Transnational Literatures

Hours: 36L

Sustained study in a topic pertaining to Indigenous, postcolonial, or transnational literatures. Content varies with instructors. See Department website for current offerings. Course may not be repeated under the same subtitle.

Prerequisite: 2.0 ENG FCE and any 4.0 FCE
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

ENG373H1 - Topics in Pre-1800 British Literature

Hours: 36L

Sustained study in a topic pertaining to British literature before 1800. Content varies with instructors. See Department website for current offerings. Course may not be repeated under the same subtitle.

Prerequisite: 2.0 ENG FCE and any 4.0 FCE
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

ENG374H1 - Topics in Pre-1800 British Literature

Hours: 36L

Sustained study in a topic pertaining to British literature before 1800. Content varies with instructors. See Department website for current offerings. Course may not be repeated under the same subtitle.

Prerequisite: 2.0 ENG FCE and any 4.0 FCE
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

ENG376H1 - Topics in Theory, Language, Critical Methods

Hours: 36L

Sustained study in a topic pertaining to literary theory, critical methods, or linguistics. Content varies with instructors. See Department website for current offerings. Course may not be repeated under the same subtitle.

Prerequisite: 2.0 ENG FCE and any 4.0 FCE
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

ENG377H1 - Topics in Theory, Language, Critical Methods

Hours: 36L

Sustained study in a topic pertaining to literary theory, critical methods, or linguistics. Content varies with instructors. See Department website for current offerings. Course may not be repeated under the same subtitle.

Prerequisite: 2.0 ENG FCE and any 4.0 FCE
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)
ENG378H1 - Special Topics

Hours: 36L

Sustained study in a variety of topics, including: Canadian literature, American literature, Post-1800 British literature, and genres or themes that span across nations and periods. Content varies with instructors. See Department website for current offerings. Course may not be repeated under the same subtitle.

Note: An additional fee of $123 will apply to the "Cook the Books" subtitle offering.

Prerequisite: 2.0 ENG FCE and any 4.0 FCE
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

ENG379H1 - Special Topics

Hours: 36L

Sustained study in a variety of topics, including: Canadian literature, American literature, Post-1800 British literature, and genres or themes that span across nations and periods. Content varies with instructors. See Department website for current offerings. Course may not be repeated under the same subtitle.

Prerequisite: 2.0 ENG FCE and any 4.0 FCE
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

ENG382Y1 - Literary Theory

Hours: 72L

This course explores contemporary literary theory, but may include related readings from earlier periods. Schools or movements studied may include structuralism, formalism, phenomenology, Marxism, post-structuralism, reader-response theory, feminism, queer theory, new historicism, psychoanalysis, postcolonial theory, critical race studies, and ecocriticism.

Prerequisite: 2.0 ENG FCE and any 4.0 FCE
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1); Thought, Belief and Behaviour (2)

ENG384Y1 - Literature and Psychoanalysis

Hours: 72L

An introduction to psychoanalysis for students of literature, this course considers major psychoanalytic ideas through close readings of selected texts by Freud. The course also explores critiques and applications of Freud's work and examines a selection of literary texts that engage psychoanalytic theory.

Prerequisite: 2.0 ENG FCE and any 4.0 FCE
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1); Thought, Belief and Behaviour (2)

ENG385H1 - History of the English Language

Hours: 36L

This course explores English from its prehistory to the present day, emphasizing Old, Middle, and Early Modern English and the theory and terminology needed to understand their lexical, grammatical, and phonological structure; language variation and change; codification and standardization; literary and non-literary usage.

Prerequisite: 2.0 ENG FCE and any 4.0 FCE
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

ENG388H1 - Creative Writing

Previous Course Number: ENG389Y1
Hours: 36S

This is a seminar course restricted to students who in the opinion of the Department show special aptitude for writing poetry, fiction, or drama. For application procedure, see the descriptions online and submit an application by May 15. Not eligible for CR/NCR option.

Prerequisite: 2.0 ENG FCE, any 4.0 FCE, and permission of the instructor and the Associate Chair
Exclusion: ENG389Y1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)
ENG389H1 - Creative Writing

Previous Course Number: ENG389Y1
Hours: 36S

This is a seminar course restricted to students who in the opinion of the Department show special aptitude for writing poetry, fiction, or drama. For application procedure, see the descriptions online and submit an application by May 15. Not eligible for CR/NCR option.

Prerequisite: 2.0 ENG FCE, any 4.0 FCE, and permission of the instructor and the Associate Chair
Exclusion: ENG389Y1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

ENG390Y1 - Individual Studies

A scholarly project chosen by the student and supervised by a member of the staff. The form of the project and the manner of its execution are determined in consultation with the supervisor. All project proposals should be submitted by May 15. Proposal forms are available online and from the Department. Not eligible for CR/NCR option.

Prerequisite: 3.0 ENG FCE, any 4.0 FCE, and permission of the instructor and the Associate Chair
Exclusion: ENG390Y1
Distribution Requirements: Humanities

ENG391Y1 - Individual Studies (Creative)

A project in creative writing chosen by the student and supervised by a member of the staff. The form of the project and the manner of its execution are determined in consultation with the supervisor. All project proposals should be submitted by May 15. Proposal forms are available online and from the Department. Not eligible for CR/NCR option.

Prerequisite: 3.0 ENG FCE including ENG388H1 or ENG389H1, any 4.0 FCE, and permission of the instructor and the Associate Chair
Exclusion: ENG393H1
Distribution Requirements: Humanities

ENG392H1 - Individual Studies

A scholarly project chosen by the student and supervised by a member of the staff. The form of the project and the manner of its execution are determined in consultation with the supervisor. All project proposals should be submitted by May 15. Proposal forms are available online and from the Department. Not eligible for CR/NCR option.

Prerequisite: 3.0 ENG FCE, any 4.0 FCE, and permission of the instructor and the Associate Chair
Exclusion: ENG391Y1
Distribution Requirements: Humanities

ENG393H1 - Individual Studies (Creative)

A project in creative writing chosen by the student and supervised by a member of the staff. The form of the project and the manner of its execution are determined in consultation with the supervisor. All project proposals should be submitted by May 15. Proposal forms are available online and from the Department. Not eligible for CR/NCR option.

Prerequisite: 3.0 ENG FCE including ENG388H1 or ENG389H1, any 4.0 FCE, and permission of the instructor and the Associate Chair
Exclusion: ENG393H1
Distribution Requirements: Humanities

ENG398H0 - Research Excursions

Distribution Requirements: Humanities

ENG398Y0 - Research Excursions

Distribution Requirements: Humanities
ENG399Y1 - Research Opportunity Program

Credit course for supervised participation in faculty research project. Details at https://www.artsci.utoronto.ca/current/academics/research-opportunities/research-opportunities-program. Not eligible for CR/NCR option.

ENG480H1 - Advanced Studies Seminar

Hours: 24S

Seminars are designed to provide students with the opportunity to practice their skills of research and interpretation, and to participate in critical discussion, at a particularly advanced level. All seminars demand substantial class participation and most require an oral presentation. Not eligible for CR/NCR option.

Prerequisite: 4.0 ENG FCE (including ENG202H1, ENG203H1, ENG250H1, ENG252H1); and any 9.0 FCE

Distribution Requirements: Humanities

Breadth Requirements: Creative and Cultural Representations (1)

ENG480H1 - Advanced Studies Seminar

Hours: 24S

Seminars are designed to provide students with the opportunity to practice their skills of research and interpretation, and to participate in critical discussion, at a particularly advanced level. All seminars demand substantial class participation and most require an oral presentation. Not eligible for CR/NCR option.

Prerequisite: 4.0 ENG FCE (including ENG202H1, ENG203H1, ENG250H1, ENG252H1); and any 9.0 FCE

Distribution Requirements: Humanities

Breadth Requirements: Creative and Cultural Representations (1)

ENG481H1 - Advanced Studies Seminar

Hours: 24S

Seminars are designed to provide students with the opportunity to practice their skills of research and interpretation, and to participate in critical discussion, at a particularly advanced level. All seminars demand substantial class participation and most require an oral presentation. Not eligible for CR/NCR option.

Prerequisite: 4.0 ENG FCE (including ENG202H1, ENG203H1, ENG250H1, ENG252H1); and any 9.0 FCE

Distribution Requirements: Humanities

Breadth Requirements: Creative and Cultural Representations (1)

ENG481H1 - Advanced Studies Seminar

Hours: 24S

Seminars are designed to provide students with the opportunity to practice their skills of research and interpretation, and to participate in critical discussion, at a particularly advanced level. All seminars demand substantial class participation and most require an oral presentation. Not eligible for CR/NCR option.

Prerequisite: 4.0 ENG FCE (including ENG202H1, ENG203H1, ENG250H1, ENG252H1); and any 9.0 FCE

Distribution Requirements: Humanities

Breadth Requirements: Creative and Cultural Representations (1)

ENG482H1 - Advanced Studies Seminar

Hours: 24S

Seminars are designed to provide students with the opportunity to practice their skills of research and interpretation, and to participate in critical discussion, at a particularly advanced level. All seminars demand substantial class participation and most require an oral presentation. Not eligible for CR/NCR option.

Prerequisite: 4.0 ENG FCE (including ENG202H1, ENG203H1, ENG250H1, ENG252H1); and any 9.0 FCE

Distribution Requirements: Humanities

Breadth Requirements: Creative and Cultural Representations (1)

ENG482H1 - Advanced Studies Seminar

Hours: 24S

Seminars are designed to provide students with the opportunity to practice their skills of research and interpretation, and to participate in critical discussion, at a particularly advanced level. All seminars demand substantial class participation and most require an oral presentation. Not eligible for CR/NCR option.

Prerequisite: 4.0 ENG FCE (including ENG202H1, ENG203H1, ENG250H1, ENG252H1); and any 9.0 FCE

Distribution Requirements: Humanities

Breadth Requirements: Creative and Cultural Representations (1)

ENG483H1 - Advanced Studies Seminar

Hours: 24S

Seminars are designed to provide students with the opportunity to practice their skills of research and interpretation, and to participate in critical discussion, at a particularly advanced level. All seminars demand substantial class participation and most require an oral presentation. Not eligible for CR/NCR option.

Prerequisite: 4.0 ENG FCE (including ENG202H1, ENG203H1, ENG250H1, ENG252H1); and any 9.0 FCE

Distribution Requirements: Humanities

Breadth Requirements: Creative and Cultural Representations (1)
ENG486H1 - Advanced Studies Seminar

Hours: 24S

Seminars are designed to provide students with the opportunity to practice their skills of research and interpretation, and to participate in critical discussion, at a particularly advanced level. All seminars demand substantial class participation and most require an oral presentation. Not eligible for CR/NCR option.

Prerequisite: 4.0 ENG FCE (including ENG202H1, ENG203H1, ENG250H1, ENG252H1); and any 9.0 FCE
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

ENG487H1 - Advanced Studies Seminar

Hours: 24S

Seminars are designed to provide students with the opportunity to practice their skills of research and interpretation, and to participate in critical discussion, at a particularly advanced level. All seminars demand substantial class participation and most require an oral presentation. Not eligible for CR/NCR option.

Prerequisite: 4.0 ENG FCE (including ENG202H1, ENG203H1, ENG250H1, ENG252H1); and any 9.0 FCE
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

ENG488H1 - Advanced Studies Seminar

Hours: 24S

Seminars are designed to provide students with the opportunity to practice their skills of research and interpretation, and to participate in critical discussion, at a particularly advanced level. All seminars demand substantial class participation and most require an oral presentation. Not eligible for CR/NCR option.

Prerequisite: 4.0 ENG FCE (including ENG202H1, ENG203H1, ENG250H1, ENG252H1); and any 9.0 FCE
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

ENG489H1 - Advanced Studies Seminar

Hours: 24S

Seminars are designed to provide students with the opportunity to practice their skills of research and interpretation, and to participate in critical discussion, at a particularly advanced level. All seminars demand substantial class participation and most require an oral presentation. Not eligible for CR/NCR option.

Prerequisite: 4.0 ENG FCE (including ENG202H1, ENG203H1, ENG250H1, ENG252H1); and any 9.0 FCE
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

ENG499Y1 - Advanced Research Seminar

Hours: 48S

A seminar designed to provide students with the opportunity to practice their skills of research and interpretation at a particularly advanced level. Admission by invitation and permission of the instructor and the Associate Chair. Not eligible for CR/NCR option.

Prerequisite: 4.0 ENG FCE, any 9.0 FCE, and permission of the Department.
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

K. Ing, BSc, MSc

Senior Lecturers Emeriti
D. Macdonald, BA, MA, PhD
B. Savan, BSc, PhD

† Cross-appointed faculty

Introduction

The School of the Environment is an innovative interdisciplinary unit within the Faculty of Arts and Science; it brings together and leverages the enormous breadth of environmental teaching and research expertise throughout the Faculty. The School fosters opportunities for interdisciplinary research and scholarship in environment, spanning the sciences, social sciences and humanities. Students who enrolled in programs in the former Centre for Environment will be able to complete them.

Core Programs:

The School offers core programs in two areas: Environmental Science BSc Major and Minor, and Environment Studies BA Major and Minor. These programs are ideally suited to be taken in conjunction with another program(s) in a related academic field. For example, the Environmental Science Major could be combined with a Major in Environment & Health, Environmental Ethics, Earth and Environmental Systems, Environmental Geography, Forest Conservation Science, Physical & Environmental Geography, Biomedical Toxicology, Chemistry, Physics, Biodiversity and Conservation Biology, or Environmental Biology, while the Environmental Studies Major could be combined with a complementary BA Major such as Political Science, Economics, Women and Gender Studies, Human Geography, Forest Conservation, Architecture, or BSc Major, such as Environmental Biology, Physics, or Forest Conservation Science. These programs of study provide students with a powerful combination of disciplinary depth and interdisciplinary breadth.

The School’s Environmental Science B.Sc. Major and Minor programs reflect the fact that most environmental issues are complex and involve aspects drawing from many different areas of science. These programs provide students with a breadth of knowledge spanning scientific disciplines, and the tools to understand and integrate scientific principles from across the physical and biological sciences, and across multiple spatial and temporal scales. At its core, environmental science is concerned with the scientific analysis and development of creative solutions to environmental problems. Students are exposed to disciplinary and interdisciplinary knowledge and research skills necessary to function as an environmental scientist.

The School’s Environmental Studies B.A. Major and Minor are interdisciplinary programs intended for students interested in studying and working in an environmental area, primarily within the social sciences or humanities. These programs offer rigorous academic study of the economic, social, cultural and political forces that drive issues such as species extinction, loss of biodiversity, air and water pollution, and climate change. The interdisciplinary structure of the programs provides grounding in scientific literacy while advancing critical thinking skills that will help students to evaluate complex environmental problems and sustainable solutions for improved environmental health and well-being.

Environmental Science students who wish to have a foundation in Environmental Studies beyond the ENV221H1 and ENV222H1 core courses, are encouraged to consider adding the Minor in Environmental Studies to their Environmental Science Major. It is possible to double count a number of courses between the two programs.

Collaborative Specialist, Major and Minor Programs:

The School collaborates with other disciplines to offer four collaborative Science Specialist programs: Environment & Health; Environmental Chemistry; Environmental Geosciences; and Environment & Toxicology. Other collaborative offerings include Major programs in Environment & Health, and Environmental Ethics, as well as collaborative Minor programs in Environmental Ethics, Energy & Environment, and Environment & Behaviour. These programs combine the School’s interdisciplinary core with a deliberately focused set of discipline-specific courses.

Directed Environmental Minor Programs:

Environmental Minor programs are offered by a number of departments. Five of these Minors are in the sciences, and four are arts Minors. These programs are intended for students interested in acquiring a hierarchical body of environmental knowledge in a specific discipline.

These Minors are open to any student irrespective of program. As with any Minor, these programs can be combined with other programs of study (i.e., Minors and Majors) to meet the requirements for a degree. (See the Degree Requirements section of the Calendar for program requirement details).
General Program Information:

All Science programs in the School include a strong First Year science component with core interdisciplinary science courses in subsequent years. Students intending to pursue Environmental Science or any of the Science Specialist programs are advised to choose First Year courses from among (BIO120H1, BIO130H1; CHM136H1/CHM138H1, CHM135H1/CHM139H1/CHM151Y1; MAT136H1/MAT138H1/MAT137Y1/MAT157Y1/JMB170Y1; PHY131H1, PHY132H1; PHY151H1, PHY152H1), and (GGR100H1/JEG100H1, GGR101H1). Students should identify specific program requirements as well as the prerequisites for ENV234H1, ENV237H1, ENV238H1, ENV316H1, ENV334H1; ENV337H1, CHM210H1 when selecting specific First Year science courses.

Arts programs in the School build on a base of social science and humanities courses. Environmental Studies, as well as Environmental Ethics, do not require specific First Year courses. Students intending to follow arts programs in the area of environment are recommended to take ENV100H1, and might find it helpful to take ENV200H1 in first year, as well as to include some First Year course choices from the 100-level offerings in Anthropology, Biology, Economics, Geography, History, Philosophy, Political Science or Sociology.

Note: Majors and Specialists in School of the Environment programs are eligible for a number of School-based scholarships (see https://environment.utoronto.ca/undergraduate/scholarships/)

Students interested in School of the Environment programs should refer to the Calendar program listings below and are encouraged to consult the School’s website at https://www.environment.utoronto.ca. For further information about the School’s programs and courses, please contact:

School of the Environment Undergraduate Associate Director, Prof J. D’eon (ug.director.env@utoronto.ca).

School of the Environment Undergraduate Student Advisor and Placement Coordinator, David Powell, Room ES 1022, 33 Willcocks Street Wing, Earth Sciences Centre, 416-946-8100 or ug.office.env@utoronto.ca

Environmental Programs in Other Academic Units:

Students should also be aware that numerous programs offered by other academic units have relevance to the study of the environment, and most are highly suitable for double majors with the School of the Environment programs. Students interested in environment-related courses of study should also review the following programs:

Biodiversity & Conservation Biology (Science program offered by the Department of Ecology & Evolutionary Biology):

Details available at: http://www.eeb.utoronto.ca/undergrad/programs.htm

Students in the Biodiversity and Conservation Biology Major receive training in the relatively young, but already firmly established, synthetic fields of biodiversity and conservation biology. They will be equipped to aid in the response to what is perhaps humanity’s most pressing challenge, the conservation of biological diversity. As ecologically responsible and informed citizens, they will appreciate the increasing complexity and uncertainty of the world in which we all live, and be in a position to make informed policy and decisions about sustainable development, global environmental change, control of invasive species, and the conservation of genetic diversity and ecosystem integrity.

Earth and Environmental Systems (Science program offered by the Department of Earth Sciences):

(Details available at: https://www.es.utoronto.ca/programs/undergraduate/)

The Major, Earth and Environmental Systems, takes a holistic approach to understanding how the Earth system works and how it has evolved over tens of millions to billions of years. This requires understanding the dynamics and interactions of all aspects of the system (solid Earth, ocean, atmosphere, and biosphere) and provides the larger context at a time when climate change, resource consumption and global pollution weigh heavily on people and societies.

Environmental Biology (Science program offered by the Department of Ecology & Evolutionary Biology):

Details available at: http://www.eeb.utoronto.ca/undergrad/programs.htm

The Environmental Biology Major provides a broad background in biology that is essential to understand the impact of humans on other organisms and their environments. It provides students with an understanding of ecology, the diversity and function of living organisms, the physical and chemical environment, and the ways organisms interact with, and affect, ecosystem processes. Students are exposed to ecosystem management, issues related to environmental change, and the consequences of interactions between humans and the environment.

Environmental Geography (Arts program offered by the Department of Geography and Planning):

(See program details under Geography and Planning or at www.geography.utoronto.ca)

These Specialist, Major and Minor programs can be taken in conjunction with either the School’s Arts or Science programs for an Honours Degree. They focus on resource and environmental planning, environmental assessment, water resources, waste management and Canada’s forests from the perspective of Geography.

Forestry (Arts or Science programs offered by Daniels Forestry in the Daniels Faculty of Architecture, Landscape & Design):

(See program details under Forestry/Forest Conservation and Forest Biomaterials Science or at www.forestry.utoronto.ca)

These Specialist, Major and Minor programs can be taken in conjunction with the School’s science or arts programs for an Honours degree. Core subjects include world forests, forest products in sustainable forestry, forest conservation practices, forest management and resource allocation, and forests and society. Other topics include biodiversity maintenance, ecological sustainability, protection of wildlife and their habitats, international policy, certification, intensive forest management, community management, forest health and forest fragmentation.

Physical & Environmental Geography (Science program offered by the Department of Geography and Planning):
School of Environment Programs

Core Programs

Environmental Science Major (Science Program) - ASMAJ1076

Enrolment Requirements:
This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

Variable Minimum Grade/Grade Average
A minimum grade average in required courses is needed for entry, and this minimum changes each year depending on available spaces and the number of applicants. The following courses must be completed:

- BIO120H1
- One of: CHM135H1, CHM136H1, CHM151Y1

To ensure that students admitted to the program will be successful, applicants with a final grade lower than 60% in each course, or a grade average lower than 65% in these required courses will not be considered for admission. Please note that obtaining this minimum grade average does not guarantee admission to the program.

Completion Requirements:

(8.0 credits)

First Year (1.5 credits): BIO120H1; 0.5 credit from CHM136H1/CHM138H1/CHM135H1 (recommended)/CHM139H1/CHM151Y1; 0.5 credit from MAT135H1/MAT137Y1/MAT157Y1/JMB170Y1

Second Year (2.5 credits):
1. ENV221H1
2. ENV234H1
3. One of CHM210H1 (recommended) or ESS262H1
4. ENV237H1/ENV238H1
   * ENV238H1 is for students who have previously taken PHY131H1/PHY132H1/PHY151H1/PHY152H1
5. STA220H1/STA288H1/EEB225H1/GGR270H1 or other science courses providing training in statistics as approved by the Academic Associate Director.

NOTE: students interested in taking EEB Field Courses (Group B) in third/fourth year are encouraged to take BIO220H1 in second/third year.

Third Year (1.5 credits):
1. The other of CHM210H1 or ESS262H1 not taken in second year
2. ENV337H1/JEE337H1
3. ENV316H1

Third/Fourth Year (2.0 credits):
1. 2.0 credits from among the courses in Group A, B, and C, with no more than 0.5 credit from Group C. At least 0.5 credit must be at the 300+ level

Group A: Environmental Science
BIO220H1*/CHM310H1/CHM410H1/CHM415H1/EEB319H1/EEB320H1/EEB321H1/EEB365H1/EEB428H1/EEB430H1/EEB433H1/EEB440H1/EEB446H1/ENV334H1/ENV341H1/ENV346H1/ENV430H1/ENV432H1/ESS261H1/ESS311H1/ESS312H1/ESS461H1/ESS463H1/GGR203H1/GGR301H1/GGR305H1/GGR308H1/GGR314H1/GGR347H1/GGR348H1/GGR406H1/GGR413H1/JGA305H1/PCL362H1/PHY392H1**/PHY492H1**

Notes: * BIO220H1 is required for all upper-year 300+ EEB series courses, with no exceptions. ** PHY392H1 and PHY492H1 include relevant environmental content, but prerequisites for these courses cannot be used towards Group A requirements.

Group B: Environmental Science-related Field Courses

ANT330Y1/ARH306Y1/EEB403H1/EEB405H1/EEB406H1/EEB407H1/EEB410H1/ENV336H1/ENV395Y0/ENV396H0/ENV396Y0/ESS234H1/ESS410H1/ESS450H1/GGR390H1

Note: * BIO220H1 is required for all upper-year 300+ EEB series courses, with no exceptions.

Group C: Environmental Policy & Society (no more than 0.5 credit from Group C)

Fourth Year (0.5 credit):
1. 0.5 credit from the following: ENV432H1*/ENV440H1/ENV452H1*
   *Note that ENV432H1 requires one of EEB319H1/EEB321H1/EEB365H1/ENV334H1 as a prerequisite, and ENV452H1 requires one of ENV316H1/ENV334H1/ENV337H1 as a prerequisite.

Notes:

- Students combining the Environmental Science Major with a second BSc or BA Major, and who are also interested in obtaining a basic understanding of the social/political/policy aspects of environment, can add the Environmental Studies Minor. Some of the courses taken for the Environmental Science Major may be double counted for this Minor. Please contact the Undergraduate Student Advisor (see above) to learn more about this option.
- Daniels Students enrolled in this program may be able to fulfill up to 1.5 credits in requirement 3 from ARC courses. Consult the School of the Environment for more information.

Third Year (1.5 credits):
School of the Environment

Environmental Science Minor
(Science Program) - ASMIN1555
Enrolment Requirements:
This is a limited enrolment program. Students must have completed
4.0 credits and meet the requirements listed below to enrol.
Variable Minimum Grade/Grade Average
A minimum grade average in required courses is needed for entry,
and this minimum changes each year depending on available
spaces and the number of applicants. The following courses must be
completed:

•
•

BIO120H1
One of: CHM135H1, CHM136H1, CHM151Y1

To ensure that students admitted to the program will be successful,
applicants with a final grade lower than 60% in each course, or a
grade average lower than 65% in these required courses will not be
considered for admission. Please note that obtaining this minimum
grade average does not guarantee admission to the program.
Completion Requirements:
(4.0 credits)
First Year (1.5 credits):
1. BIO120H1; 0.5 credit from CHM136H1/CHM138H/
CHM135H1(recommended)/CHM139H/ CHM151Y1; 0.5 credit from
MAT135H1/ MAT137Y1/ MAT157Y1/ JMB170Y1
Higher Years (2.5 credits):
2. ENV221H1
3. 1.0 credit from CHM210H1, ENV234H1, ENV237H1/ ENV238H1*,
ESS262H1
4. ENV337H1/ JEE337H1
5. 0.5 credit from courses in Group A or B**
Notes

•
•
•
•

* ENV238H1 is for students who have previously taken
PHY131H1/ PHY132H1/ PHY151H1/ PHY152H1
** Students should verify the prerequisites for the courses
listed under the groups below in advance of their course
selection.
BIO220H1 is required for all upper-year EEB 300+-series
courses (Group A and B) and there are no exceptions.
Daniels Students enrolled in this program may be able to
fulfil up to 1.0 credit of elective courses from ARC courses.
Consult the School of the Environment for more
information

Group A: Environmental Science
CHM310H1/ CHM410H1/ CHM415H1/ EEB319H1/ EEB320H1/
EEB321H1/ EEB328H1/ EEB365H1/ EEB428H1/ EEB430H1/
EEB433H1/ EEB440H1/ EEB465H1/ ENV334H1/ ENV341H1/
ENV346H1/ ENV430H1/ ENV432H1/ ESS261H1/ ESS311H1/
ESS312H1/ ESS461H1/ ESS463H1/ GGR301H1/ GGR305H1/
GGR308H1/ GGR314H1/ GGR347H1/ GGR348H1/ GGR406H1/
GGR413H1/ JGA305H1/ PCL362H1/ PHY392H1*/ PHY492H1*

Notes: * PHY392H1 and PHY492H1 include relevant environmental
content, but prerequisites for these courses cannot be used towards
Group A requirements.
Group B: Environmental Science-related Field Courses
ANT330Y1/ ARH306Y1/ EEB403H1/ EEB405H1/ EEB406H1/
EEB407H1/ EEB410H1/ ENV316H1/ ENV336H1/ ENV395Y0/
ENV396H0/ ENV396Y0/ ESS234H1/ ESS410H1/ ESS450H1/
GGR390H1

Environmental Studies Major
(Arts Program) - ASMAJ1254
Description:
Enrolment Requirements:
This is an open enrolment program. A student who has completed
4.0 credits may enrol in the program.
Completion Requirements:
For more information, please email the School of the Environment’s
Undergraduate Student Advisor, David Powell, at
ug.office.env@utoronto.ca.
(7.0 credits, including 2.5 credits at the 300+ level and a 0.5 credit at
the 400-level)
First Year
ENV100H1 is recommended but not required.
Higher Years:
1. ENV221H1; ENV222H1; ENV223H1.
2. ENV200H1
3. 0.5 credit from the following Environmental Policy, Law & Society
courses: ENV320H1; ENV322H1; ENV323H1; ENV347H1;
ENV350H1; ENV422H1; JGE331H1
4. 0.5 credit from among the following Environmental Thought &
Ethics courses: ENV333H1; JGE321H1; CLA373H1; PHL273H1;
WGS273H1
5. One of ENV421H1/ ENV440H1/ ENV451H1/ ENV461H1.
6. An additional 3.5 credits from any combination of courses listed in
the three groups below*, with no more than 1.0 credit from the
Science group.
*Students may choose to take courses across the three groups or
within a particular group, depending on their interest.
Note: Daniels Students enrolled in this program may be able to fulfill
up to 1.5 credits in requirement 6 from ARC courses.For more
information, please email the School of the Environment’s
Undergraduate Student Advisor, David Powell, at
ug.office.env@utoronto.ca.

Environmental Studies Minor (Arts Program) - ASMIN1254

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

For more information, please email the School of the Environment’s Undergraduate Student Advisor, David Powell, at ug.office.env@utoronto.ca.

(4.0 credits, including 1.5 credits at the 300+ level)

First Year:
EN100H1 is recommended but not required.

Higher Years:
1. ENV221H1, ENV222H1
2. ENV200H1
3. Additional 2.5 credits, of which a maximum 1.0 credit may be environmental courses offered by academic units other than the School of the Environment (from Group A below). The remainder must be selected from the following: ENV261H1, ENV281H1, ENV282H1, ENV307H1, ENV320H1, ENV322H1, ENV330H1, JGE321H1, JGE331H1, ENV333H1, ENV335H1, ENV337H1, ENV341H1, ENV343H1, ENV347H1, ENV361H1, ENV381H1, ENV382H1, ENV395Y0.

*Note: with permission of Undergraduate Associate Director

Note: Daniels Students enrolled in this program may be able to fulfill up to 1.0 credit in requirement 3, Group A, from ARC courses. Consult the School of the Environment for more information.

Collaborative Programs

Environment & Behaviour Minor (Science Program) - ASMIN1551

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

Special Requirement

- Students must be enrolled in the Psychology Minor, Major or Specialist, to be considered for enrolment.

Completion Requirements:

(4.0 credits; must include at least 1.0 credit at the 300+ level.)

For more information, please email the School of the Environment's Undergraduate Student Advisor, David Powell, at ug.office.env@utoronto.ca.

Environment & Health Major (Science Program) - ASMAJ0365

Description:

From air pollution and water contamination to climate change, the anthropogenic impact on our environment has significant repercussions on human health. A collaboration between the School of the Environment and Human Biology, the objective of the Environment and Health program is to provide students with instruction in fundamental biological sciences and to integrate a broad understanding of the environmental determinants of health.

For more information, please email the School of the Environment’s Undergraduate Student Advisor, David Powell, at ug.office.env@utoronto.ca.

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

Required Courses (8.0 credits)

To help students proceed through the program, it is recommended that the first year BIO and CHM requirements are completed before entering the program.

Year 1:

1. BIO120H1, BIO130H1
2. (CHM136H1/ CHM138H1 and CHM135H1/ CHM139H1/ CHM151Y1). (Only transfer credits that carry exclusions to CHM136H1/ CHM138H1 and/or CHM135H1/ CHM139H1 will be accepted)
3. GGR100H1, JEG100H1, GGR101H1, GLG102H1, GGR102H1, GLG102H1, MAT135H1, PHY131H1, PSY100H1, GLG102H1, GLG102H1, GLG102H1

Year 2: Foundations in environment and health

4. BCH210H1, CHM247H1
5. BIO220H1, BIO230H1, BIO255H1
6. HMB265H1, BIO260H1
7. 1.0 credit from environmental core courses: ENV221H1, ENV222H1, ENV234H1, ENV337H1, JEE337H1

Year 3: Third year core courses

8. ENV341H1

Higher Years:
1. ENV221H1, ENV222H1, PSY220H1, PSY335H1/ PSY435H1
2. 1.0 credit from ENV333H1, ENV335H1, ENV361H1/ ENV381H1 (if ENV381H1 taken in 2015-16 or 2016-17); JGE321H1, JGE331H1
3. 1.0 credit from PSY320H1, PSY321H1, PSY327H1, PSY427H1, PSY336H1
9. PSL300H1; PSL301H1

Years 3 or 4:

10. 0.5 credit from environment and health relevant courses:

Year 4: Environment & Health Capstone Course

11. JEH455H1

E&H Major Program Note:

- Not all non-ENV courses listed in requirement 10 above have priority enrolment for the Environment & Health Major. Students are responsible for checking the priority of courses, as well as meeting course prerequisites for courses they wish to take.

Environment & Health Specialist (Science Program) - ASSPE0365

Description:

From air pollution and water contamination to climate change, the anthropogenic impact on our environment has significant repercussions on human health. A collaboration between the School of the Environment and Human Biology, the objective of the Environment and Health Specialist program is to provide students with instruction in fundamental biological sciences and to integrate a broad understanding of the environmental determinants of health.

For more information, please email the School of the Environment’s Undergraduate Student Advisor, David Powell, at ug.office.env@utoronto.ca.

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

(14.0 credits, including 4.0 credits from 300+ series courses, of which 1.0 credit must be at the 400-level)

To help students proceed through the program, it is recommended that the first year BIO and CHM requirements are completed before entering the program.

Year 1:

1. BIO120H1; BIO130H1

2. (CHM136H1/ CHM138H1 and CHM135H1/ CHM139H1/ CHM151Y1 (Only transfer credits that carry exclusions to CHM136H1/ CHM138H1 and/or CHM135H1/ CHM139H1 will be accepted)

3. 1.0 credit from: GGR100H1/ JEG100H1/ GGR101H1/ MAT135H1/ MAT136H1/ JMB170Y1/ PHY131H1/ PHY132H1/ PHY151H1/ PHY152H1/ PSY100H1

Year 2: Foundations of environment and health

4. BCH210H1/ CHM247H1

5. BIO220H1; BIO230H1; BIO255H1

6. HMB265H1/ BIO260H1

7. ENV221H1; ENV222H1

8. ENV234H1; ENV337H1/ JEE337H1

9. PHL273H1

Year 3: Selected topics in environment and health with greater depth.

10. STA220H1/ STA288H1/ STA221H1

11. BCH311H1/ CSB349H1/ LMP363H1/ NFS284H1/ (PSL300H1 and PSL301H1)/ PSL350H1

12. JGE321H1; ENV341H1

13. 1.0 credit from: CHM210H1/ ENV334H1/(only one from ENV233H1; ESS261H1/ GGR203H1/ GGR303H1/ GGR314H1/ PHY231H1)

Years 3 & 4:

14. 1.5 credits from environment and health relevant courses:

HMB302H1/ HMB303H1/ HMB312H1/ HMB314H1/ HMB322H1/ HMB390H1/ HMB430Y1/ HMB499Y1/ ANA300Y1/ ANA301H1/ BCH311H1/ CSB349H1/ PSL350H1/ BCH370H1/ CHM310H1/ CSB329H1/ CSB327H1/ CSB328H1/ CSB331H1/ CSB346H1/ CSB347H1/ CSB350H1/ CSB351Y1/ EEB318H1/ EEB319H1/ EEB321H1/ EEB328H1/ EEB362H1/ EEB375H1/ EEB428H1/ ENV315H1/ ESS425H1/ ENV316H1/ ENV336H1/ GGR305H1/ GGR306H1/ GGR347H1/ GGR372H1/ GGR433H1/ HIS423H1/ HST405H1/ ESS311H1/ ESS312H1/ IMMS341Y1/ LMP301H1/ LMP363H1/ MGY377H1/ NFS382H1/ NFS386H1/ PSL372H1/ PSL420H1/ PSY435H1 or any other approved course for which the student has appropriate prerequisites. The 1.5 credits can be chosen to reflect the particular academic interests of each student.

Year 4: Advanced topics in environment and health with emphasis on primary research and critical analysis

15. ENV421H1/ ENV491Y1*/ ENV492H1*/ ENV493H1* or a minimum of 0.5 credit from any approved departmental or college independent research project (*the research topic for these courses must be related to environment and health)

16. JEH455H1
Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

Variable Minimum Grade Average
A minimum grade average in required courses is needed for entry, and this minimum changes each year depending on available spaces and the number of applicants. The following courses or their equivalents must be completed:

- BIO120H1 and BIO130H1
- CHM135H1 and CHM136H1
- 1.0 credit from PHY131H1, PHY132H1, MAT135H1, MAT136H1

To ensure that students admitted to the program will be successful, applicants with a final combined grade average lower than 70% in these required courses will not be considered for admission. Please note that obtaining this minimum grade average does not guarantee admission to the program. Please consult the Arts & Science Program Toolkit for more information on program enrolment.

Notes:

- Students cannot combine a Biomedical Toxicology Major program with an Environment and Toxicology Specialist program for their degree.
- Students who wish to enroll in the program after their second year will be considered on a case-by-case basis. Successful completion of required prerequisite courses is required to enroll in further upper-level program courses.

Completion Requirements:

(14 credits, including 4.0 credits at the 300+ level or higher, 1.0 credit of which must be at the 400-level).

First Year: BIO120H1, BIO130H1, CHM135H1, CHM136H1, and at least 1.0 credit from PHY131H1, PHY132H1, MAT135H1, MAT136H1

Second Year: BCH210H1, BIO230H1, BIO255H1, ENV221H1, ENV222H1, PCL201H1 and CHM247H1. 1.0 credit from (BIO270H1, BIO271H1, (PSL300H1, PSL301H1) (see NOTE 1)

Third and Fourth Years:

BIO220H1, ENV234H1, JGE321H1, ENV334H1, CHM210H1, PCL302H1, PCL362H1, (PCL428H1, PCL429H1)/PCL473Y1
One of: STA220H1, STA221H1, STA288H1, EEB225H1 (see NOTE 2)
One of: ENV421H1/PCL367H1/PCL474Y1 (see NOTE 2)
At least 1.0 credit from: ENV341H1, PHY231H1, ENV337H1, JEE337H1, CHM310H1, EES463H1, JPM300H1, PCL477H1, PCL481H1, PCL484H1, PCL486H1, PCL490H1, LMP301H1, LMP363H1 (see NOTE 3)

An Integrative, Inquiry-Based Activity Requirement must be satisfied.

The requirement for an integrative, inquiry-based and/or experiential activity must be met by completing at least one of the following:
PCL297H1, PCL367H1, PCL397Y0, ENV421H1, PCL474Y1
Professional Experience Year Co-op Program

Notes:

1. PSL300H1 and PSL301H1 require MAT100/ PHY100 courses series.
2. PCL201H1, and PCL302H1 are pre-requisites for students intending to take PCL474Y1. Students intending to take PCL474Y1 must obtain permission from the Undergraduate Student Advisor of the School of the Environment 3 months prior to the intended date of enrolment. Students must also consult with the Department of Pharmacology and Toxicology at least 3 months prior to the intended date of enrolment.
Environmental and Energy Minor (Science Program) - ASMIN1552

Description:

Environment and Energy (Science Program) Joint Program with the School of the Environment

Jointly sponsored by the School of the Environment and the Department of Geography, this interdisciplinary program addresses the scientific, technological, environmental and policy aspects of energy use and supply, with a focus on the reduction of environmental impacts.

Note that the four full course equivalents that constitute the Minor Program are those listed below under Higher Years. For more information, please email the School of the Environment’s Undergraduate Student Advisor, David Powell, at ug.office.env@utoronto.ca.

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

(4.0 credits)

First Year Courses: 1.0 credit from (MAT135H1 and MAT136H1)/MAT137Y1, and 1.0 credit from CHM138H1/CHM136H1, CHM139H1/CHM139H, CHM151Y1, PHY131H1, PHY132H1, PHY151H1, PHY152H1

All of: ENV221H1, ENV222H1/GGR223H1 (1.0 credit)

All of: ENV346H1, ENV350H1, ENV450H1 (1.5 credits)

Any two of: GGR332H1/ENV462H1, GGR310H1/FOR310H1, GGR314H1, GGR347H1, GGR348H1 (1.0 credit)

Any one of: CHM210H1, CHM310H1, CHM415H1, ENV237H1, ENV238H1, FOR310H1/GGR310H1, FOR410H1, GGR203H1, GGR314H1, GGR347H1, GGR348H1, HPS313H1, PHY231H1, PHY250H1 (* if not taken for the requirement immediately above) (0.5 credit)

Environmental Chemistry Specialist (Science Program) - ASSPE2543

Description:

Consult Professor J. Murphy, Department of Chemistry (416-946-0260 or jmurphy@chem.utoronto.ca)

Jointly sponsored by the School of the Environment and the Department of Chemistry, this program focuses on analytical theory, instrumentation and methodological aspects of organic and inorganic contaminants in soil, water, air and biological tissues.

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

Completed courses (with minimum grades)

The following courses with the stated minimum grades are required:

• (CHM135H1 and CHM136H1) (63% in each)/CHM151Y1 (63%)

Completion Requirements:

(14.0 credits, including 1.0 credit from 400-series courses)

First Year: (BIO120H1 and BIO130H1/BIO220H1); CHM151Y1 (strongly recommended) [CHM135H1/CHM139H and CHM136H1/CHM138H]; (MAT135H1 and MAT136H1)/MAT137Y1/MAT157Y1

First or Second Year: (PHY131H1 and PHY132H1)/PHY151H1 and PHY152H1

Second and Higher Years:

1. CHM217H1, (CHM220H1/CHM222H1 and CHM223H1), CHM238Y1, CHM247H1/CHM249H1; (CHM210H1 and GGR203H1/GGR314H1); STA220H1/GGR270H1
2. CHM310H1, CHM410H1, CHM415H1, ENV234H1, (ENV221H1 and ENV222H1), ENV341H1/ENV344H1/ENV346H1
3. 1.0 credit from 300/400-series CHM courses
4. ENV421H1/CHM499Y1/PHC489Y1/CHM398H0 (in areas relevant to the program with prior approval by the Department)
5. Additional credits from any 300/400-series courses with DR=SCI, BR=4 or BR=5 to a total of 14.0 credits.

Environmental Ethics Major (Arts Program) - ASMAJ1107

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:
Jointly sponsored by the School of the Environment and the Department of Philosophy, this program explores how value judgments and worldviews affect environmental decision making. For more information, please email the School of the Environment’s Undergraduate Student Advisor, David Powell, at ug.office.env@utoronto.ca.

(6.0 credits)

1. ENV221H1, ENV222H1; PHL273H1; JGE321H1
2. 1.0 credit from PHL373H1; ENV333H1; JGE331H1
3. 0.5 credit from ENV421H1/ ENV491Y1/ ENV492H1/ ENV493H1, ENV440H1, ENV451H1
4. 2.5 credits from Group A below.

**Group A:**

ANT450H1; EAS479H1; ECO105Y1; ENV330H1; ENV333H1; ENV335H1; ENV347H1; RLG108H1; JGE321H1/ JIG322H1; HIS318Y1; PHL302H1; PHL325H1; INS402H1; JGE331H1; PHL373H1 PHL275H1; PHL295H1; PHL375H1; PHL394H1; PHL395H1; PHL413H1; PSY335H1/ PSY439H1; RLG318H1; RLG228H1; RLG345H1; RLG484H1; VIC271H1; WGS273H1; WGS442H1

**Environmental Ethics Minor (Arts Program) - ASMIN1107**

**Description:**

Jointly sponsored by the School of the Environment and the Department of Philosophy, this program explores how value judgments and worldviews affect environmental decision making. For more information, please email the School of the Environment’s Undergraduate Student Advisor, David Powell, at ug.office.env@utoronto.ca.

**Enrolment Requirements:**

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

**Completion Requirements:**

(4.0 credits, including include 1.0 credit at the 300+ level)

1. PHL273H1
2. One of PHL373H1, ENV333H1; JGE321H1, JGE331H1
3. ENV221H1, ENV222H1
4. Additional 2.0 PHL credits, with at least a 0.5 credit at the 300+ level. It is recommended that one course be in the History of Philosophy and the other in the Problems of Philosophy, including a 0.5 credit in ethics.

**Environmental Geosciences Specialist (Science Program) (Science Program) - ASSPE1253**

**Description:**

The Environmental Geosciences specialist program explains the interconnectedness within the Earth system (biosphere, hydrosphere, atmosphere, and geosphere), measures and models processes related to groundwater and biochemical activities, and assesses the effects of human activities on our geological surroundings.

Jointly sponsored by the School of the Environment and the Department of Earth Sciences. Topics include earth materials, sedimentary geology, aqueous geochemistry, hydrogeology and biogeochemistry. For more information, please contact the Department of Earth Sciences, undergradchair@es.utoronto.ca.

Students should note that under the Professional Geoscientists Act of 2000, individuals practicing Environmental Geoscience in Ontario require education that fulfills APGO knowledge requirements (see note below) or a P.Eng.

**Enrolment Requirements:**

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

**Completion Requirements:**

(12 full courses or their equivalent which includes fulfillment of the Faculty’s Distribution requirement, including at least one FCE from 400-series courses)

1. First year required courses (2 FCE): CHM151Y1/ (CHM135H1, CHM136H1), MAT135H1, PHY131H1/ PHY151H1
2. First year elective courses: 1 FCE from MAT136H1, PHY132H1/ PHY152H1, ENV237H1/ ENV238H1, BIO120H1, CSC108H1/ ESS345H1, JEG100H1
3. Second year required courses (2 FCE): ESS241H1, ESS223H1/ ENV233H, ESS262H1, GGR201H1
4. Second year elective courses: 1 FCE from ESS224H1, ESS262H1, ESS261H1, STA220H1/ GGR270H1, CHM210H1, MAT221H1/ MAT223H1; up to 0.5 FCE of this requirement can be satisfied by taking one of the following ethics courses: IMC200H1/ PHL273H1/ PHL275H1/ ABS201Y1
5. Third and fourth year required courses (2 FCE): ESS311H1, ESS312H1, ESS410H1, ESS461H1
6. Third and fourth year elective courses: 4 FCE from JGA305H1, ESS234H1/ ESS330H1, ESS331H1, ESS361H1, ESS362H1, GGR337H1, GGR390H1, ENV333H1, ESS341H1, ESS445H1, ESS450H1, ESS462H1, ESS463H1, ESS464H1, ESS490H1, ESS491H1, ESS492Y1
7. Other courses which might of interest: ESS391H1, ESS392Y1, ESS381H1, ESS481H1

If you plan to become APGO certified, we suggest you consider the following courses to fulfill minimum qualifications. This list comprises courses which are required for the specialist as well as suggested courses; together they fulfill groups 1A, 1B, 2A and 2B of the APGO requirements and add up to 13.5 FCE:

**Group 1A:** CHM135H1, MAT135H1, PHY131H1

**Group 1B:** BIO120H1, MAT136H1, CHM136H1, PHY132H1, STA220H1, CSC108H1/ ESS345H1
School of the Environment

Directed Minors

Environmental Anthropology Minor (Arts Program) - ASMIN1291

Admission Requirements:
A program focused on understanding the diverse nature of interactions between humans and their environments, both in the past and in modern global society. Consult the Undergraduate Office, Department of Anthropology (416-978-6414).

Enrolment Requirements:
This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:
(4.0 credits, including 1.0 credit at the 300+ level)

1. ANT100Y1 (ENV221H1 and ENV222H1/ GGR223H1)/ ENV222Y1
2. ANT200Y1 (ANT204H1 and ANT207H1/0.5 credit 300-level Social Anthropology course)
3. 2.0 credits from: ANT315H1, ANT336H1, ANT346H1, ANT364H1, ANT366H1, ANT368H1, ANT371H1, ANT374H1, ANT376H1, ANT409H1, ANT410H1, ANT415Y1, ANT420H1, ANT430H1, ANT450H1, INS250H1, INS402H1

Environmental Biology Minor (Science Program) - ASMIN1390

Description:
Environmental science is an interdisciplinary field that integrates biological, chemical, and physical sciences to study human interactions with their environment. The Environmental Biology Minor program (4 FCEs) provides students an introduction to biology that is essential to understand the impact of humans on other organisms and their environments. It provides students with an understanding of ecology, the diversity and function of living organisms, the physical and chemical environment, and the ways organisms interact with, and affect, ecosystem processes. Students are exposed to ecosystem management, issues related to environmental change, and the consequences of interactions between humans and the environment.

Enrolment Requirements:
This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:
(4.0 credits, including 1.0 credit at the 300+ level)

1. (CHM135H1/ CHM139H1 and CHM136H1/ CHM138H1)/ CHM151Y1
2. 1.0 credit from: CHM217H1, CHM220H1/ CHM222H1/ CHM225Y1, CHM238Y1, CHM247H1/ CHM249H1

Environmental Chemistry Minor (Science Program) - ASMIN2543

Description:
Consult Professor J. Murphy, Department of Chemistry

Environmental chemistry is the study of the chemical impacts of humankind’s activities on the soil, air, and water. This minor provides a balanced fundamental background in chemistry as well as an introduction to the major issues associated with environmental chemistry.

Enrolment Requirements:
This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:
(4 FCEs; must include at least one full-course equivalent at the 300+ series)

1. 1.5 FCEs: BIO120H1, BIO220H1, ENV234H1 (cannot be substituted with EEB375H1)
2. 0.5 FCE in organismal biology: EEB266H1, EEB267H1, EEB268H1
3. 2.0 FCEs (at least 1.0 FCEs at 300+ series)

A. core ecology and evolution (no more than 1.0 FCEs): EEB318H1, EEB319H1, EEB320H1, EEB321H1, EEB322H1, EEB324H1, EEB328H1

B. biological diversity (no more than 0.5 FCE): EEB263H1, EEB266H1, EEB267H1, EEB268H1, EEB331H1, EEB340H1, EEB380H1, EEB382H1, EEB384H1, EEB386H1, EEB388H1

C. field courses (no more than 0.5 FCE): EEB403H1, EEB405H0, EEB405H1, EEB406H1, EEB406H0, EEB407H1, EEB410H0, EEB410H1

D. no more than 1.0 FCEs from: BIO251H1, EEB255H1, EEB362H1, EEB365H1, EEB428H1, EEB433H1, ENV334H1 (recommended), ENV432H1, NUS201H0, NUS301H0, NUS302H0, NUS303H0, NUS304H0, NUS401H0

*More information about NUS courses and programs can be found on the Biology Calendar section
Environmental Economics Minor (Arts Program) - ASMIN1438

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

Completed courses (with minimum grades)
The following courses with the stated minimum grades are required:

- ECO101H1 (63%) and ECO102H1 (63%)/ECO105Y1 (80%)
- MAT133Y1 (63%)/MAT135H1 (60%)/MAT136H1 (60%)/MAT137Y1 (55%)/MAT157Y1 (55%)

Completion Requirements:

(4.0 credits)

1. (ECO101H1 and ECO102H1)/ECO105Y1/ECO100Y1
2. MAT133Y1/MAT135Y1/MAT137Y1
3. ECO200Y1/ECO204Y1/ECO206Y1
4. 1.0 credit 300+ level ECO courses, including at least one of ECO313H1 and/or ECO314H1

Note: Students enrolled in this Minor program cannot be enrolled in any other program in Economics.

Environmental Geosciences Minor (Science Program) - ASMIN1253

Enrolment Requirements:

Admission to the Environmental Geosciences Minor has been administratively suspended as of 1 April 2015 and is no longer admitting students. Students presently enrolled in the minor will be able to complete the program requirements as described below.

Completion Requirements:

(4 full courses or their equivalent; must include at least one full-course equivalent at the 300+ level)

1. CHM136H1 (CHM138H1)
2. ENV233H1; ESS221H1, ESS222H1, ESS311H1, ESS312H1, ESS410H1

Geographic Information Systems Minor (Arts Program) - ASMIN0305

Description:

The GIS program covers the theoretical, technical and applied foundations for geographic information systems. Students learn methods for spatial data production, analysis and presentation using computer cartography, spatial analysis, remote sensing, and geovisualization. Problem solving and project design are emphasized in upper level courses, as students apply techniques to answer specific geographic questions. The GIS program is structured to provide a stand-alone minor for students in Geography and other disciplines seeking complementary skills in spatial analysis (e.g., field biology, archaeology).

Note: Students combining this program with a Specialist/Major sponsored by the Department of Geography will normally be allowed to count only 1.5 (of the 4.0) credits towards both programs.
Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

(4.0 credits)

First Year Geography Courses: Any 2 courses (1.0 credit) from JEG100H1, GGR101H1, GGR107H1, GGR112H1, GGR124H1, GGR196H1, GGR197H1, GGR198H1, GGR199H1. 200/300-level GGR courses may also be used to meet this requirement. Contact the Undergraduate Administrator to update your program.

Methods & Core Courses: All (2.0 credits) of GGR270H1, GGR272H1, GGR273H1, GGR373H1

Applications: Any 2 courses (1.0 credit) from GGR225H1, GGR337H1, GGR372H1, GGR386H1, GGR414H1, GGR462H1, GGR472H1, GGR491Y1, GGR492H1, GGR493Y1 (0.5 credit can be used based on internship), GGR497H1, GGR498H1, GGR499H1

Note: At least 1.0 credit must be 300/400 series courses

Physical and Environmental Geography Minor (Science Program) - ASMIN2030

Description:

Physical and Environmental Geography offers science-based programs for students interested in an integrative approach to understanding the earth’s biotic and abiotic systems, including their spatial dynamics and the ways they are altered by human action. The programs provide a foundation in the subfields of climatology, biogeography, hydrology, and geomorphology. Students gain practical experience in lab and field settings. Technical skills taught also include data analysis, geospatial analytical tools, including GIS and Remote Sensing.

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

(4.0 credits)

First Year Geography Courses: Any 2 courses (1.0 credit) from JEG100H1 (recommended), GGR101H1, GGR107H1, GGR112H1, GGR124H1, GGR196H1, GGR197H1, GGR198H1, GGR199H1

Core Courses: Any 2 courses (1.0 credit) from GGR201H1, GGR203H1, GGR205H1, GGR206H1

Methods Courses: One (0.5 credit) of GGR301H1, GGR305H1, GGR307H1, GGR310H1, GGR308H1, GGR314H1, GGR347H1, GGR348H1, GGR390H1, GGR401H1, GGR405H1, GGR406H1, GGR413H1, GGR414H1. Up to a 0.5 credit can be used from GGR493Y1, based on suitability of placement for this program, and approved by department.

Course Groups

Environmental Studies Major Group A: Environmental Policy, Law & Society Courses

- ANT346H1 Anthropology of Food
- ANT351H1
- ANT364H1 Environment & Globalization
- ANT371H1 Human Nutritional Ecology
- ANT374H1 Rethinking Development, or the Improvement of the World
- ECO313H1 Environmental Economics and Policies
- ECO314H1 Energy and the Environment
- ECO414H1 Energy and Regulation
- ENV261H1 Is the Internet Green?
- ENV281H1 Special Topics in Environment
- ENV282H1 Special Topics in the Environment
- ENV307H1 Urban Sustainability
- ENV320H1 National Environmental Policy
- ENV322H1 International Environmental Policy
- ENV323H1 Ontario Environmental Policy
- ENV335H1 Environmental Design
- ENV347H1 The Power of Economic Ideas
- ENV350H1 Energy Policy and Environment
- ENV361H1 Social Media and Environmentalism
- ENV362H1 Energy & Environment: Transitions in History
- ENV381H1 Special Topics in Environment
- ENV382H1 Special Topics in Environment
- ENV422H1 Environmental Law
- ENV462H1 Energy and Environment: Economics, Politics, and Sustainability
- FOR302H1 Societal Values and Forest Management
- FOR303H1 Human Dimensions of Global Forests
- FOR310H1 Bioenergy from Sustainable Forest Management
- GGR223H1 Environment, Society and Resources
- GGR310H1 Bioenergy from Sustainable Forest Management
- GGR314H1
- GGR321H1
- GGR329H1 The Global Food System
- GGR332H1 Social Geographies of Climate Change
- GGR334H1 Water Resource Management
- GGR338H1 Environmental Issues in the Global South
- GGR341H1 Changing Geography of Latin America
- GGR349H1 Managing Urban Natures
- GGR416H1 Environmental Impact Assessment
- GGR418H1 Political Economy of Natural Resources
- GGR434H1 Building Community Resilience
- GGR433H1 Built Environment and Health
- GGR438H1 Environment and Development
- HIS218H1 Environmental History
- HIS300H1 Energy and Environment in North America
### Environmental Studies Major Group B: Environmental Thought & Ethics Courses

- HIS408H1 Topics in Environmental History
- HPS307H1 History of Energy
- HPS313H1 Two Hundred Years of Electricity
- HPS316H1 Environment, Technology, and Nature
- HPS324H1 Natural Science and Social Issues
- JGE321H1 Multicultural Perspectives on Environmental Management
- JGE331H1 Resource and Environmental Theory
- JIG322H1 Indigenous Worlds, Worldviews and the Environment
- JIG440H1 Indigenous Geographies
- POL205H1 International Relations in the Anthropocene
- POL384H1 Global Environmental Governance from the Ground Up
- POL413H1 Global Environmental Politics
- RSM466H1 Environmental and Social Responsibility
- TRN312H1 Sustainability Issues in Ethics, Society, and Law

Note: GGR223H1 is NOT a substitute for ENV222H1.

### Environmental Studies Minor Group A

- ANT364H1 Environment & Globalization
- ANT368H1 Nature Culture Human
- ANT450H1 Multispecies Cities
- CHM210H1 Chemistry of Environmental Change
- CLA373H1 The Environment in the Greco-Roman World
- EAS479H1 Ecocriticism
- ECO313H1 Environmental Economics and Policies
- ECO314H1 Energy and the Environment
- ECO414H1 Energy and Regulation
- ENV234H1 The Science of Energy in the Environment
- ENV330H1 Waste Not: Faith-Based Environmentalism
- ENV333H1 Ecological Worldviews
- FAH446H1 Arctic Anthropocene? Image Cultures of Arctic Voyaging
- FOR302H1 Societal Values and Forest Management
- FOR303H1 Human Dimensions of Global Forests
- GGR314H1 Global Warming
- GGR321H1 Environment, Society and Resources
- GGR418H1 Political Economy of Natural Resources
- GGR419H1 Environmental Justice
- HPS316H1 Environment, Technology, and Nature
- JGE321H1 Multicultural Perspectives on Environmental Management
- JIG322H1 Indigenous Worlds, Worldviews and the Environment
- JUG320H1 The Canadian Wilderness
- PHL273H1 Environmental Ethics
- PHL373H1 Issues in Environmental Ethics
- PSY435H1 Environmental Psychology
- RLG318H1 Religion and Nature
- RLG345H1 Social Ecology and Judaism
- RLG484H1
- VIC271H1 Reading the Wild
- WGS273H1 Gender & Environmental (In)Justice
- WGS442H1 Toxic Worlds, Decolonial Futures

### Environmental Studies Major Group C: Environmental Science Courses

- ENV234H1 Environmental Biology: Structure and Function of Ecosystems
- ENV262H1 The Science of Energy in the Environment
- ENV337H1 Human Interactions with the Environment
- ENV341H1 Environment and Human Health
- ENV395Y0 Special Topics Field Course
- ENV396H0 Special Topics Field Course
- ENV396Y0 Special Topics Field Course
- ENV430H1 Environment and Health in Vulnerable Populations
- ENV431H1 Urban Sustainability & Environmental Technology
- FOR200H1 Conservation of Canada’s Forests
- FOR201H1 Conservation of Tropical and Subtropical Forests
- FOR401H1 Research Paper/Thesis in Forest Conservation
- GGR272H1 Geographic Information and Mapping I
- GGR273H1 Geographic Information and Mapping II
- GGR314H1 Global Warming
- GGR337H1 Environmental Remote Sensing
- ESS205H1 Confronting Global Change
- JEH455H1 Current Issues in Environment and Health

- ECO414H1 Energy and the Environment
- ECO417H1 Energy and Regulation
- ENV234H1 The Science of Energy in the Environment
- ENV330H1 Waste Not: Faith-Based Environmentalism
- ENV333H1 Ecological Worldviews
- ENV337H1 Human Interactions with the Environment
- ENV430H1 Environment and Health in Vulnerable Populations
- ENV431H1 Urban Sustainability & Environmental Technology
- FOR200H1 Conservation of Canada’s Forests
- FOR201H1 Conservation of Tropical and Subtropical Forests
- FOR401H1 Research Paper/Thesis in Forest Conservation
- GGR272H1 Geographic Information and Mapping I
- GGR273H1 Geographic Information and Mapping II
- GGR314H1 Global Warming
- GGR337H1 Environmental Remote Sensing
- JEH455H1 Current Issues in Environment and Health
Environmental Science Minor Group A: Environmental Science

- CHM310H1 Environmental Chemistry
- CHM410H1 Analytical Environmental Chemistry
- CHM415H1 Topics in Atmospheric Chemistry
- EEB319H1 Population Ecology
- EEB320H1 Dynamics of Ecosystem Processes
- EEB321H1 Community Ecology
- EEB328H1 Physiological Ecology
- EEB365H1 Topics in Applied Conservation Biology
- EEB428H1 Global Change Ecology
- EEB430H1 Modeling in Ecology and Evolution
- EEB433H1 Global Issues in Aquatic Ecosystems
- EEB440H1 Ecology and Evolution of Plant-Animal Interactions
- EEB465H1 Advanced Topics in Biodiversity Science and Conservation Biology
- ENV334H1 Environmental Biology: Applied Ecology
- ENV341H1 Environment and Human Health
- ENV346H1 Terrestrial Energy Systems
- ENV430H1 Environment and Health in Vulnerable Populations
- ENV432H1 Urban Ecology
- ESS261H1 Earth System Evolution

Environmental Science Minor Group B: Environmental Science-related Field Courses

- AN330Y1 Paleoenvironmental Field School
- ARH306Y1 Archaeological Field Methods
- EEB403H1 Tropical Field Biology
- EEB405H1 Temperate Field Biology
- EEB406H1 Inter-University Field Course
- EEB407H1 Alpine Ecosystems
- EEB410H1 Lake Ecosystem Dynamics
- ENV316H1 Laboratory and Field Methods in Environmental Science
- ENV336H1 Ecology in Human-Dominated Environments
- ENV395Y0 Special Topics Field Course
- ENV396H0 Special Topics Field Course
- ENV396Y0 Special Topics Field Course
- ESS234H1 Introduction to Geological Field Methods
- ESS410H1 Field Techniques in Hydrogeochemistry
- ESS450H1 Geophysical Field Techniques
- GGR390H1 Field Methods

Environmental Science Major Group A: Environmental Science

- BIO220H1 From Genomes to Ecosystems in a Changing World
- CHM310H1 Environmental Chemistry
- CHM410H1 Analytical Environmental Chemistry
- CHM415H1 Topics in Atmospheric Chemistry
- EEB319H1 Population Ecology
- EEB320H1 Dynamics of Ecosystem Processes
- EEB428H1 Global Change Ecology
- EEB430H1 Modeling in Ecology and Evolution
- EEB433H1 Global Issues in Aquatic Ecosystems
- EEB440H1 Ecology and Evolution of Plant-Animal Interactions
- EEB465H1 Advanced Topics in Biodiversity Science and Conservation Biology
- ENV334H1 Environmental Biology: Applied Ecology
School of the Environment Courses

Lab Materials Fee

Some courses in this department have a mandatory Lab Materials Fee to cover non-reusable materials. The fee for each such course is given below in the course description, and will be included on the student's invoice on ACORN.

NOTE: Many ENV courses are limited in enrolment and require specific prerequisites (check the online Arts&Science Calendar or Timetable for course prerequisites). Preference is given to students meeting the ACORN deadlines.

ENV100H1 - Introduction to Environmental Studies

Hours: 24L

An investigation of the relationship between human beings and their natural and built environments. This interdisciplinary course will draw from the sciences, social sciences and the humanities to explore major social, cultural, economic, regulatory, ethical, ecological and technological aspects of environmental issues.

Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)
ENV198H1 - Idleness and the Environment: What Does Sustainable Work Mean?

Hours: 24S

In a fast-paced, high-tech world—and one that must rapidly decarbonize to address the climate crisis—the relationship between labour and environment is rapidly changing. This course explores the intersection of work and the environment, considering how ideas about leisure and idleness might offer new pathways for a more sustainable future. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

ENV199H1 - Debating & Understanding Current Environmental Issues

Previous Course Number: SII199H1 LEC0201
Hours: 2L

The course examines current environmental issues for which there is no easy answer or consensus position. For instance, to help solve climate change should we generate more electricity from nuclear power-plants, which have no greenhouse gas emissions? Or instead, should we phase out nuclear plants because of possible accidents, costs and radioactive wastes? The seminar examines the scientific and political aspects of such issues and debates the pros and cons of each. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

ENV200H1 - Assessing Global Change: Science and the Environment

Hours: 24L/4T

The perspective which scientists bring to the understanding and resolution of environmental concerns having global implications: atmospheric systems and climate change, the biosphere and conservation of biodiversity.

This living things and their environment breadth course is intended to fulfill the environmental literacy requirement for students in the BA programs of the School of the Environment or the living things and their environment breadth course requirement for Commerce, Humanities and Social Science students

Exclusion: BIO120H1, EEB208H1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

ENV211H1 - Multidisciplinary Perspectives on Environment

Hours: 24L/4T

One of two foundation courses for the School’s undergraduate program. Introduces students to ways in which different disciplines contribute to our understanding of environment. Instructors and guest lecturers are drawn from the sciences, social sciences and the humanities and will present subject matter, assumptions, conceptualizations and methodologies of their disciplines.

Distribution Requirements: Social Science

ENV222H1 - Interdisciplinary Environmental Studies

Hours: 24L/4T

Building upon ENV221H1, shows how environmental studies is working to knit different disciplinary perspectives into one interdisciplinary body of knowledge; interplay of science and values in definition and framing of issues; roles of markets, politics and ethics in developing solutions; local to global scale; historical and current timeframes.

Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

ENV223H1 - Fundamental Environmental Skills

Hours: 24L

The practical, interdisciplinary and controversial nature of environmental issues, as well as the uncertainty that surrounds measures to address them demand mastery of a particular range of skills by environmental students. This course teaches the fundamental research, analysis and presentation skills required for effective environmental work. This course is for students enrolled in the Environmental Studies Major program, or permission of the Undergraduate Associate Director.

Prerequisite: 4 FCE of courses completed.
Exclusion: GGR271H1
Distribution Requirements: Social Science
ENV234H1 - Environmental Biology: Structure and Function of Ecosystems

Hours: 24L/18P

This multidisciplinary course draws on elements from geology, soil science, and ecology to understand past and present environments and human impacts on landscapes and ecosystems. Emphasis on the structure, functioning and connectivity of aquatic and terrestrial ecosystems. Field trips and labs. Mandatory day-long field trip on a Friday or Saturday in late September or early October (students choose which day; a small fee may be charged for transportation.) (Lab Materials Fee: $25)

Prerequisite: BIO120H1/JEG100H1 (recommended)/FOR200H1/ FOR201H1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

ENV237H1 - Physics of the Changing Environment A

Hours: 24L/24P

The course will cover basic physics of environmental processes and of measurement techniques in the atmosphere, the ocean, lake-land-forest systems, and other biological systems. It will place its work in the context of climate change and other aspects of environmental change. This course is solely intended for students who have completed a previous first year physics core course, who are in one of the following programs: Environmental Science Major or Minor, Environmental Geosciences Specialist or Earth and Environmental Systems Major.

Prerequisite: MAT135H1/MAT136H1/MAT137Y1/MAT157Y1/ JMB170Y1, CHM136H1/CHM138H1/CHM135H1/CHM139H1/ CHM151Y1, PHY131H1/PHY132H1/PHY151H1/PHY152H1
Exclusion: ENV237H1
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

ENV238H1 - Physics of the Changing Environment B

Hours: 24L/24P

The course will cover basic physics of environmental processes and of measurement techniques in the atmosphere, the ocean, lake-land-forest systems, and other biological systems. It will place its work in the context of climate change and other aspects of environmental change. This course is solely intended for students who have completed a previous first year physics core course, who are in one of the following programs: Environmental Science Major or Minor, Environmental Geosciences Specialist or Earth and Environmental Systems Major.

Prerequisite: MAT135H1/MAT136H1/MAT137Y1/MAT157Y1/ JMB170Y1, CHM136H1/CHM138H1/CHM135H1/CHM139H1/ CHM151Y1, PHY131H1/PHY132H1/PHY151H1/PHY152H1
Exclusion: ENV237H1
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

ENV261H1 - Is the Internet Green?

Previous Course Number: ENV281H1
Hours: 24L/12T

The Internet has deeply penetrated most aspects of society and yet we are remarkably unreflective about its impacts and sustainability. This course challenges students to critically evaluate evidence regarding the environmental and social impacts of the Internet and how the Internet contributes (or not) to goals of environmental sustainability. (ENV261H1 is intended as a Breadth Requirement course in the Social Sciences.)

Prerequisite: Students must have completed a minimum of 4.0 FCEs to enrol in the course.
Exclusion: BIG102Y1; ENV281H1 if taken in 2015-16 or 2016-17
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)
ENV262H1 - The Science of Energy in the Environment

Hours: 24L/12T

Energy is a fundamental organizing principle of Nature. It has a central role in the origin and evolution of the universe, and is the basis of the ecosystem of the Earth and of technology and the world economy. This course will explore the science of energy in all its forms. (ENV262H1 is primarily intended as a Breadth Requirement course for students in the Humanities and Social Sciences.)

Prerequisite: None
Exclusion: ENV346H1, (PHY131H1, PHY132H1, PHY151H1, PHY152H1 or equivalent, taken previously or concurrently)
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

ENV281H1 - Special Topics in Environment

Hours: 24L

Special topics course designed for students in School of the Environment programs. Content in any given year depends on instructor. See School of the Environment website for more details.

Prerequisite: Students must have completed a minimum of 4.0 FCEs to register for the course.
Exclusion: BIG102Y1 if ENV281H1 taken in 2015-16 or 2016-17
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

ENV282H1 - Special Topics in the Environment

Hours: 24L

Special topics course designed for students in School of the Environment programs. Content in any given year depends on instructor. See School of the Environment website for more details.

Prerequisite: Students must have completed a minimum of 4.0 FCEs to register for the course.
Exclusion: BIG101Y1 if ENV282H1 taken in 2015-16 or 2016-17
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

ENV299Y1 - Research Opportunity Program

Credit course for supervised participation in faculty research project. Details at https://www.artsci.utoronto.ca/current/academics/research-opportunities/research-opportunities-program. Not eligible for CR/NCR option.

Distribution Requirements: Science; Social Science

ENV307H1 - Urban Sustainability

Hours: 18L/18P

This course critically examines the concept of urban sustainability in theory and application. Case studies of ongoing urban sustainability programs in the developed and developing world help students assess the successes and failures of these programs. The course also examines the current state of research and implementation efforts toward urban sustainability. Toronto’s urban sustainability and sustainable needs will be investigated through the use of Geographic Information Systems (GIS) during the course (previous experience with GIS is not required).

Prerequisite: Completion of 8.0 FCE including ENV221H1/ENV222H1, or permission of the Undergraduate Associate Director
Recommended Preparation: An environmental studies half course.
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

ENV316H1 - Laboratory and Field Methods in Environmental Science

Hours: 12T/36P

This course focuses on methods of sampling and analyzing natural air, water and solid Earth materials for physical, chemical and biological properties that are relevant to current environmental issues. It will integrate approaches from chemistry, physics, geology and biology, and cover techniques in field sampling, laboratory analyses and analyses of large environmental data sets. Basic concepts related to quality control will be emphasized throughout the course: sample collection and storage methods, calibration of field and lab instruments, analyses in complex matrices, errors (accuracy, precision), and detection limits. This course is for students enrolled in the Environmental Science Major program, or permission of the Undergraduate Associate Director. A fee of $25 will be charged for lab supplies, lab instrument charges and technical services.

Prerequisite: ENV234H1, ENV237H1/ENV238H1, one of CHM210H1/ESS262H1, one of STA220H1/STA288H1/EEB225H1/GGR270H1
Exclusion: ESS425H1/ENV315H1 (Chemical Analysis of Environmental Samples)
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)
ENV320H1 - National Environmental Policy

Hours: 24L/12T

Examines ways in which governments develop and implement policy to protect the environment within their borders. Primarily Canada, plus comparisons with other countries. The focus is upon the politics of environmental policy making, which is understood by examining the interests and powers of the relevant state and non-state actors.

Prerequisite: Completion of 8.0 FCE including ENV221H1/ENV222H1; or permission of the Undergraduate Associate Director

Distribution Requirements: Social Science

Breadth Requirements: Society and its Institutions (3)

ENV322H1 - International Environmental Policy

Hours: 24L/12T

Examines the ways in which states negotiate and implement international agreements addressing global environmental issues, such as the United Nations Framework Convention on Climate Change. Focus is upon factors which determine the efficacy of multilateral environmental agreements and the prospects for stronger global environmental governance.

Prerequisite: Completion of 8.0 FCE including ENV221H1/ENV222H1; or permission of the Undergraduate Associate Director

Distribution Requirements: Social Science

Breadth Requirements: Society and its Institutions (3)

ENV323H1 - Ontario Environmental Policy

Hours: 24S

Introduces students to public policy and institutional foundations of public policy in Canada, with an emphasis on environmental policy in Ontario. Provides an insiders perspective on how environmental policy has been developed in Ontario.

Prerequisite: Completion of 8.0 FCE including ENV221H1/ENV222H1; or permission of the Undergraduate Associate Director

Distribution Requirements: Social Science

Breadth Requirements: Society and its Institutions (3)

ENV330H1 - Waste Not: Faith-Based Environmentalism

Hours: 24L

This course explores religious environmentalism, its proponents and opponents, and its core values within the Abrahamic faiths of Judaism, Christianity and Islam. Religious environmentalists have used teachings from sacred texts as exemplars of sustainability. Some, however, claim that these texts teach domination, anthropocentrism and hierarchical values. Looking at a range of worldviews, we focus on the topics of wastefulness, consumption, and simplicity. Readings about barriers, motivations, and values that inform environmental behaviour are complemented with field trips to places of worship where we will hear religious leaders speak about the environmental initiatives undertaken in their communities and see sacred spaces.

Prerequisite: Completion of 8.0 FCE including ENV221H1/ENV222H1; or permission of the Undergraduate Associate Director

Distribution Requirements: Humanities

Breadth Requirements: Thought, Belief and Behaviour (2)

ENV333H1 - Ecological Worldviews

Hours: 24L

Approaches to environmental concerns are often marked by assumptions that reflect distinct worldviews positing particular understandings of the role of the human with respect to nature. This course explores sundry economic, political, scientific, religious, and moral worldviews pertaining to the environment, including environmental ethics, Gaia, ecofeminism, scientific cosmology, and indigenous perspectives.

Prerequisite: Completion of 8.0 FCE including ENV221H1/ENV222H1; or permission of the Undergraduate Associate Director

Distribution Requirements: Humanities; Social Science

Breadth Requirements: Thought, Belief and Behaviour (2)
**ENV334H1 - Environmental Biology: Applied Ecology**

**Hours:** 36L/12T

Applied issues in aquatic and terrestrial ecosystems, with an emphasis on land-use change and its impacts on watersheds. Topics include: ecology of agro-ecosystems and other human-managed ecosystems, bio-indicators of anthropogenic impacts, ecosystem restoration, and adaptive management. Group projects address local management/restoration issues.

**Prerequisite:** ENV234H1 and completion of 9 FCEs

**Recommended Preparation:** a course in statistics (EEB225H1 recommended)

**Distribution Requirements:** Science

**Breadth Requirements:** Living Things and Their Environment (4)

**ENV337H1 - Human Interactions with the Environment**

**Hours:** 24L/12P

The impact of 7 billion people on the planet is enormous and challenges future generations. What are these impacts today and in future? What solutions and tools can avert societal collapse? Using an integrated and interdisciplinary systems approach, we explore problems and solutions to the earth’s limits to growth.

**Prerequisite:** (two of ENV233H1, ENV234H1, ENV237H1/ENV238H1) or (two of CHM210H1, ENV234H1, ENV237H1/ENV238H1, ESS262H1) or (GGR201H1 + GGR203H1) or (ENV233H1 + ESS261H1) or (ESS261H1 + ESS262H1) or (CHM210H1 + CHM217H1) or (ENV221H1/ENV222H1/ENV234H1 + BIO220H1 + BIO230H1/BIO255H1) or permission of Undergraduate Associate Director

**Exclusion:** JGE236H1/JEE337H1

**Recommended Preparation:** Related high school science

**Distribution Requirements:** Science

**ENV335H1 - Environmental Design**

**Hours:** 18L/18P

Environmental design, in the context of this course, refers to design strategies that account for the ability of supporting ecosystems to continue to meet human needs and those of other lifeforms without diminishing biological diversity or environmental quality. This course takes a hands-on approach to investigating several environmental design issues: climate-responsive design, energy consumption, health and comfort, natural lighting and ventilation, and water management. Students will build up a design of a net-zero carbon residential building through several instructive design exercises during the semester, including hands-on measurement and calculation activities.

**Prerequisite:** Completion of 8.0 FCE including ENV221H1/ENV222H1; or permission of the Undergraduate Associate Director

**Distribution Requirements:** Social Science

**Breadth Requirements:** Society and its Institutions (3)

**ENV341H1 - Environment and Human Health**

**Hours:** 24L

Examination of the linkages between human health and environment. Addresses basic principles and scientific knowledge relating to health and the environment and uses case studies to examine current environmental health issues from a health sciences perspective.

**Prerequisite:** ENV221H1/ENV222H1 or (BIO230H1/BIO255H1, and enrolment in the HMB Specialist in Health and Disease/HMB Specialist in Global Health), and completion of at least 8 FCE of courses; or permission of the Undergraduate Associate Director.

**Distribution Requirements:** Science; Social Science

**Breadth Requirements:** Living Things and Their Environment (4)

**ENV336H1 - Ecology in Human-Dominated Environments**

A two week course offered at a Southern Ontario field station during late summer. Introduction to impacts of humans on semi-natural and human-dominated environments of southern Ontario and overview of the most commonly used assessment tools for states of ecosystems. These environments play important roles in terms of ecosystem services.

**Prerequisite:** first year biology and permission of the instructor

**Distribution Requirements:** Science

**Breadth Requirements:** Living Things and Their Environment (4)
ENV346H1 - Terrestrial Energy Systems

Hours: 36L/24T

Various earth systems for energy transformation, storage and transport are explored. Geological, hydrological, biological, cosmological and oceanographic energy systems are considered in the context of the Earth as a dynamic system, including the variation of solar energy received by the planet and the redistribution of this energy through various radiative, latent and sensible heat transfer mechanisms. It considers the energy redistribution role of large-scale atmospheric systems, of warm and cold ocean currents, the role of the polar regions, and the functioning of various hydrological systems. The contribution and influence of tectonic systems on the surface systems is briefly introduced, as well the important role of energy storage processes in physical and biological systems, including the accumulation of fossil fuel reserves.

Prerequisite: (MAT135H1, MAT136H1)/ MAT137Y1/ JMB170Y1; BIO120H1/ CHM136H1/ CHM138H1/ CHM135H1/ CHM139H1/ CHM151Y1/ PHY131H1/ PHY132H1/ PHY151H1/ PHY152H1

Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

ENV347H1 - The Power of Economic Ideas

Hours: 24L

This course examines the power of economic ideas in effecting environmental change. Topics include the relation of ecological economics to mainstream economics, as well as the role of financial incentives to move the environmental agenda forward.

Prerequisite: Completion of 8.0 FCE including ENV221H1/ ENV222H1; or permission of the Undergraduate Associate Director

Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

ENV350H1 - Energy Policy and Environment

Hours: 24L

The course addresses: (1) physical, technological and economic aspects of energy and electricity systems and their associated environmental impacts; (2) current international, Canadian and Ontario energy policy; (3) technological, economic and political factors influencing policy which could significantly reduce environmental impacts of energy use.

Prerequisite: Completion of 8.0 FCE including ENV221H1/ ENV222H1; or permission of the Undergraduate Associate Director

Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

ENV361H1 - Social Media and Environmentalism

Previous Course Number: ENV381H1

Hours: 24L/12T

This course examines the impacts of the internet on environmental thinking and policy-making. Topics include the use of social media as a tool for community-building and collaborative design, the sharing economy, online protest movements, mass surveillance and its implications, and the impact of misinformation on climate denialism.

Prerequisite: Students must have completed a minimum of 6.0 FCEs to register for the course.

Exclusion: BIG102Y1; ENV381H1 if taken in 2015-16 or 2016-17
Recommended Preparation: ENV221H1, ENV222H1, and/or ENV261H1

Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

ENV362H1 - Energy & Environment: Transitions in History

Previous Course Number: ENV282H1

Hours: 36L

An exploration of the interactions between humans and their environments in the Holocene, focussing on the contexts and consequences of changes in energy technologies. Includes consideration of changes in food production and processing, transport and power generation technologies from the adoption of agriculture to the twentieth century.

Prerequisite: Students must have completed a minimum of 6.0 FCEs to register for the course.

Exclusion: BIG101Y1; ENV282H1 if taken in 2015-16 or 2016-17; HPS307H1; HIS300H1;
Recommended Preparation: ENV221H1, ENV222H1, and/or ENV262H1

Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

ENV381H1 - Special Topics in Environment

Hours: 24L

Special topics course designed for students in School of the Environment programs. Topics vary based on the year offered. See the School of the Environment website for more details.

Prerequisite: Students must have completed a minimum of 9.0 FCEs to register for the course.

Exclusion: BIG102Y1 if ENV381H1 taken in 2015-16 or 2016-17
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)
ENV382H1 - Special Topics in Environment

**Hours:** 24L

Special topics course designed for students in School of the Environment programs. Content in any given year depends on instructor. See [School of the Environment website](https://www.artsci.utoronto.ca/current/academics/ admissions/) for more details.

**Prerequisite:** Students must have completed a minimum of 9.0 FCEs to register for the course.

**Exclusion:** BIG101Y1 if ENV382H1 taken in 2015-16 or 2016-17

**Distribution Requirements:** Humanities

**Breadth Requirements:** Thought, Belief and Behaviour (2)

ENV395Y0 - Special Topics Field Course

**Hours:** 48S

This course examines fundamental concepts in ecology, evolution, biodiversity, geology and conservation biology through lectures and fieldwork in highland, tropical and island ecosystems in Ecuador. The complex relations between these environments and the people who depend on them will also be examined through analysis of the social, cultural, and economic transformations that have taken place in recent years. Suitable for all School of the Environment programs.

**Recommended Preparation:** ENV200H1 or equivalent; OR BIO120H1 or equivalent

**Distribution Requirements:** Social Science

**Breadth Requirements:** Living Things and Their Environment (4); Society and its Institutions (3)

ENV395Y1 - Special Topics Field Course

**Hours:** 48S

This course examines fundamental concepts in ecology, evolution, biodiversity, geology and conservation biology through lectures and fieldwork in highland, tropical and island ecosystems in Ecuador. The complex relations between these environments and the people who depend on them will also be examined through analysis of the social, cultural, and economic transformations that have taken place in recent years. Suitable for all School of the Environment programs.

**Recommended Preparation:** ENV200H1 or equivalent; OR BIO120H1 or equivalent

**Distribution Requirements:** Social Science

**Breadth Requirements:** Living Things and Their Environment (4); Society and its Institutions (3)

ENV396H0 - Special Topics Field Course

This course examines Australia’s environmental, wildlife and conservation issues from an interdisciplinary perspective. In consideration of these issues, Australia’s unique flora and fauna are examined through lectures and fieldwork in the various climatically varied regions of Australia that are visited throughout the course.

**Recommended Preparation:** ENV200H1 or equivalent; or BIO120H1 or equivalent

ENV396Y0 - Special Topics Field Course

This course examines Australia’s environmental, wildlife and conservation issues from an interdisciplinary perspective. In consideration of these issues, Australia’s unique flora and fauna are examined through lectures and fieldwork in the various climatically varied regions of Australia that are visited throughout the course.

**Recommended Preparation:** ENV200H1 or equivalent; or BIO120H1 or equivalent

**Distribution Requirements:** Social Science; Science

**Breadth Requirements:** Society and its Institutions (3); Living Things and Their Environment (4)

ENV398H0 - Research Excursions

**Hours:** TBA

An instructor-supervised group project in an off-campus setting. Details at [https://www.artsci.utoronto.ca/current/academics/research-opportunities/](https://www.artsci.utoronto.ca/current/academics/research-opportunities/). Not eligible for CR/NCR option.

ENV398Y0 - Research Excursions

**Hours:** TBA

An instructor-supervised group project in an off-campus setting. Details at [https://www.artsci.utoronto.ca/current/academics/research-opportunities/research-excursions-program](https://www.artsci.utoronto.ca/current/academics/research-opportunities/research-excursions-program). Not eligible for CR/NCR option.

ENV399Y1 - Research Opportunity Program

Credit course for supervised participation in faculty research project. Details at [https://www.artsci.utoronto.ca/current/academics/research-opportunities/research-opportunities-program](https://www.artsci.utoronto.ca/current/academics/research-opportunities/research-opportunities-program). Not eligible for CR/NCR option.
**ENV421H1 - Environmental Research**

**Hours:** 24S

A research course for all students in the School combining report writing, independent and group-based research on an interdisciplinary topic. This course is restricted to students enrolled in one of the Environmental Studies Major, Environmental Ethics Major, Environment & Health Specialist, Environmental Chemistry Specialist or Environment & Toxicology Specialist programs, or permission of the Undergraduate Associate Director. Not eligible for CR/NCR option.

**Prerequisite:** Completion of 10.0 FCE including ENV221H1/ENV222H1
**Distribution Requirements:** Humanities; Social Science
**Breadth Requirements:** Society and its Institutions (3)

**ENV422H1 - Environmental Law**

**Hours:** 24S

An introduction to environmental law for students in Environmental Studies; legal methods available to resolve environmental problems and the scope and limits of those methods; common law and statutory tools as well as environmental assessment legislation; the problem of standing to sue and the limits of litigation.

**Prerequisite:** Completion of 12.0 FCE including ENV221H1/ENV222H1; or permission of the Undergraduate Associate Director
**Distribution Requirements:** Social Science
**Breadth Requirements:** Society and its Institutions (3)

**ENV430H1 - Environment and Health in Vulnerable Populations**

**Hours:** 24S

The seminar introduces students to a wide range of topics and issues as they relate to the environment and health of vulnerable populations. Through readings and discussion, students will explore the potential health effects of exposures in children and other vulnerable populations to a variety of chemical and physical agents in both the indoor and outdoor environments. A number of case studies or topics will be examined to exemplify why certain populations may be especially vulnerable to various environmental hazards. Issues related to equity and justice will also be examined.

**Prerequisite:** ENV341H1, or permission of the instructor.
**Distribution Requirements:** Science; Social Science
**Breadth Requirements:** Living Things and Their Environment (4)

**ENV421H1 - Environmental Research**

**Hours:** 24S

A research course for all students in the School combining report writing, independent and group-based research on an interdisciplinary topic. This course is restricted to students enrolled in one of the Environmental Studies Major, Environmental Ethics Major, Environment & Health Specialist, Environmental Chemistry Specialist or Environment & Toxicology Specialist programs, or permission of the Undergraduate Associate Director. Not eligible for CR/NCR option.

**Prerequisite:** Completion of 10.0 FCE including ENV221H1/ENV222H1
**Distribution Requirements:** Humanities; Social Science
**Breadth Requirements:** Society and its Institutions (3)

**ENV431H1 - Urban Sustainability & Ecological Technology**

**Hours:** 24L

Ecological technology or green infrastructure encompasses those technologies that incorporate ecosystems to replace mechanical or non-living components in a machine or a piece of infrastructure. Complex systems theory and second-law thermodynamics are used as a template to explore concepts of urban sustainability, and the role of ecological technology in this context.

**Prerequisite:** ENV221H1/ENV222H1, or permission of the Undergraduate Associate Director
**Distribution Requirements:** Science
**Breadth Requirements:** Living Things and Their Environment (4)

**ENV432H1 - Urban Ecology**

**Hours:** 24L/12S

The ecology of urban areas through consideration of the biological and physical environments, in particular how the human-constructed environment alters pre-existing biophysical conditions and interactions. Encompasses a comparative perspective to study the development of these emerging ecosystems of increasing importance given global urbanization. One or two Saturday field trips (a fee of approximately $15 may be charged for field trip transportation.)

**Prerequisite:** BIO220H1 and at least one of EEB319H1/EEB321H1/EEB365H1/ENV334H1
**Distribution Requirements:** Science
**Breadth Requirements:** Living Things and Their Environment (4)

**ENV440H1 - Professional Experience Course**

**Hours:** 10S

Regular academic seminars complement off-campus work on an environmental project. The course enables students to gain practical experience of the needs and demands of professional environmental agencies. Students are given a choice of placements in a variety of sectors (such as government, NGOs, industry).

Eligible students who wish to do a work placement in the upcoming summer or fall session are must submit an application form to the Placement Coordinator by mid-January of each year. Please contact the School of the Environment’s Placement Coordinator, David Powell, at ug.office.env@utoronto.ca, or consult the School’s undergraduate courses webpage for access to the application form, instructions and application deadline.

**Prerequisite:** 10 full courses or their equivalent, including three FCE of environmental courses in the student's environmental program completed before ENV440H1 taken; or permission of Undergraduate Associate Director
**Distribution Requirements:** Social Science
**Breadth Requirements:** Society and its Institutions (3)
ENV450H1 - Energy and Environment Solutions

Hours: 12T/24S

This is an interdisciplinary course in which students address current energy problems while incorporating technical, environmental, economic, social, and political concerns.

Prerequisite: ENV346H1, ENV350H1 and any two of FOR310H1/GGR310H1/GGR314H1/GGR347H1/GGR348H1

Distribution Requirements: Science

Breadth Requirements: Society and its Institutions (3)

ENV451H1 - Current Environmental Topics

Hours: 24S

This capstone course for the School’s core programs will explore current environmental topics, with the goal of integrating the multi- and interdisciplinary strands of each student's learning to date. This course is for students enrolled in one of the School's BA programs, or permission of the Undergraduate Associate Director.

Prerequisite: Completion of 12.0 FCE including ENV221H1/ENV222H1

Distribution Requirements: Social Science

Breadth Requirements: Society and its Institutions (3)

ENV452H1 - Environmental Science Seminar

Hours: 36S

Scientists from within and external to the university share and discuss challenges, findings and opportunities. Specific topics (and speakers) vary from year to year but may draw from rehabilitation techniques, contaminants in our environment, environmental health, impacts on landscapes and communities, biodiversity, water, and modelling of environmental processes. This course is for students enrolled in the School of the Environment, Environmental Science Major BSc program, or permission of the Undergraduate Associate Director.

Prerequisite: Completion of 12 FCE of courses, including ENV316H1/ENV334H1/ENV337H1

Distribution Requirements: Science

Breadth Requirements: Living Things and Their Environment (4)

ENV461H1 - The U of T Campus as a Living Lab of Sustainability

Hours: 24L

Sustainability is a growing priority for universities all over the world. Many are developing strong operational sustainability goals and targets, and are giving increasing emphasis to teaching and research on sustainability issues. Yet few have committed at the executive level to integrating academic and operational sustainability in the context of treating their campus as a living laboratory of sustainable practice, research and teaching. Arguably, it is such living lab approaches that offer the largest potential for universities to play a significant role in the sustainability transition. This course will explore and apply the living lab concept, in the context of operational sustainability at the University of Toronto. We will begin by looking at the literature on university sustainability and the living lab concept. The bulk of the course will involve undertaking an applied research project on some aspect of campus sustainability, working in close partnership with operational staff at the University of Toronto. Students will develop the skills needed to work across disciplines and fields of study, and with non-academic partners. This course will put students to work on operational sustainability projects identified by the staff working in or with the Sustainability Office at the University of Toronto. Students will be organized into groups, each of which will be assigned one project, to be overseen by one or more U of T staff members. The bulk of the course will consist of regular meetings with the staff "clients", with instructors, and in small groups to undertake a group project. Each group will produce a mid-term and final report, and give a mid-term and final presentation. Each student will also submit two 360 reviews of the group process. A crucial aspect of this course is the ability of students to work collaboratively together in a group environment, and to work effectively with a university staff person acting as a "client" for their work. Students will be provided with a Handbook outlining information on working in groups and the focus of the class in the second week will be on this issue. The first 360 peer review will serve to provide information on how well each group is working. Students are encouraged to discuss and resolve group process issues in the weekly group meetings, and in their regular meetings with the instructor and TA. The second 360 review will occur at the end of the term. The results of the two 360 reviews will be used, where appropriate, to adjust individual marks from the group averages.

Prerequisite: Completion of 10.0 FCE including ENV221H1; or permission of the Undergraduate Associate Director

Exclusion: ENV481H1 if taken in 2016-17

Recommended Preparation: 1.0 FCE of environment-related coursework

Distribution Requirements: Social Science; Science; Humanities

Breadth Requirements: Society and its Institutions (3)
ENV462H1 - Energy and Environment: Economics, Politics, and Sustainability

Previous Course Number: ENV382H1
Hours: 24L/12T

This is an interdisciplinary course that examines key ideas in economics, politics and security that are essential to understanding energy and environmental issues. The course will cover energy markets, energy security, and the increasing role that sustainability plays in setting policies.

Prerequisite: Students must have completed a minimum of 10.0 FCE's to register for the course.
Exclusion: BIG101Y1; ENV382H1 if taken in 2015-16 or 2016-17
Recommended Preparation: ENV221H1/ENV222H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

ENV481H1 - Special Topics in the Environment

Hours: 24S

Special topics course designed for advanced Specialist and Major students in School of the Environment programs. This course is for students enrolled in a School Environmental program, or permission of the Undergraduate Associate Director.

Prerequisite: Completion of at least 10 FCE, including (ENV221H1,ENV222H1)
Distribution Requirements: Social Science

ENV482H1 - Special Topics in the Environment

Hours: 24S

Special topics course designed for advanced Specialist and Major students in School of the Environment programs. This course is restricted to students enrolled in a School Environmental program.

Prerequisite: (ENV221H1,ENV222H1) and completion of at least 10 FCE; or permission of Undergraduate Associate Director.
Distribution Requirements: Social Science

ENV491Y1 - Independent Studies Project

A research project or selected topic in an area of environment not otherwise available in the Faculty, meant to develop skills in independent study of interdisciplinary topics. This course is restricted to students enrolled in a School of the Environment program. A written proposal co-signed by the student and supervisor must be submitted for approval by the Academic Associate Director of the School normally one month prior to commencing the course. Not eligible for CR/NCR option.

Prerequisite: Completion of 14.0 FCE including ENV221H1/ENV222H1

ENV492H1 - Independent Studies Project

A research project or selected topic in an area of environment not otherwise available in the Faculty, meant to develop skills in independent study of interdisciplinary topics. This course is restricted to students enrolled in a School of the Environment program. A written proposal co-signed by the student and supervisor must be submitted for approval by the Academic Associate Director of the School normally one month prior to commencing the course. Not eligible for CR/NCR option.

Prerequisite: Completion of 14.0 FCE including ENV221H1/ENV222H1

Distribution Requirements: Social Science

ENV493H1 - Independent Studies Project

A research project or selected topic in an area of environment not otherwise available in the Faculty, meant to develop skills in independent study of interdisciplinary topics. This course is restricted to students enrolled in a School of the Environment program. A written proposal co-signed by the student and supervisor must be submitted for approval by the Academic Associate Director of the School normally one month prior to commencing the course. Not eligible for CR/NCR option.

Prerequisite: Completion of 14.0 FCE including ENV221H1/ENV222H1

Distribution Requirements: Social Science
JEH455H1 - Current Issues in Environment and Health

Hours: 16L/8S

This course introduces students to complex issues at the interface between environment and health where health is broadly defined. Each year a current and controversial case study is explored from scientific, medical, political and policy perspectives. The course takes students from the molecular to individual to population and societal levels.

Prerequisite: 14 FCE complete, ENV341H1/ HMB302H1/ HMB312H1/ HMB314H1/ HMB322H1

Distribution Requirements: Science

Breadth Requirements: Living Things and Their Environment (4)

JGE321H1 - Multicultural Perspectives on Environmental Management

Hours: 24L

Diverse approaches to environmental issues in a variety of multicultural settings are introduced, compared and analyzed, using case studies. Perspectives on environmental management will be discussed as they emerge from contexts such as Latin America, Asia, or Africa.

Prerequisite: ENV221H1/ENV222H1/GGR222H1/GGR223H1

Exclusion: ENV321Y1

Recommended Preparation: 8.0 FCE's

Distribution Requirements: Social Science

Breadth Requirements: Society and its Institutions (3)

JGE331H1 - Resource and Environmental Theory

Hours: 24L

Introduction to and critical evaluation of major ideas and conceptual traditions underpinning environmental and natural resource politics and regulation. Topics include: parks and protected areas, market-based environmental regulation, property rights and conservation, Malthusianism, and biodiversity conservation. Emphasis is placed on critical reading of primary texts.

Prerequisite: GGR100H1/JEG100H1/GGR107H1/ENV221H1/ ENV222H1/GGR222H1/GGR223H1

Recommended Preparation: 8.0 FCE's

Distribution Requirements: Social Science

Breadth Requirements: Society and its Institutions (3)
Estonian

Given by the Department of Slavic Languages and Literatures

Estonian is spoken by approximately one million people in present-day Estonia and some 72,000 in other parts of the world, including 18,000 in Canada. Closely related to Finnish and more distantly to Hungarian, Estonian is one of the few Finno-Ugric languages to exist surrounded by speakers of Indo-European languages.

An ancient people, the Estonians have preserved their language and culture despite centuries of domination by other nations. Not only is their heritage enormously rich in folk epics and songs, but Estonians enjoy a vigorous and diversified literary tradition which continues in Estonia proper and in their adoptive countries.

Estonian studies at the University of Toronto are concerned with the language, literature, and culture of Estonia. The language courses will be of interest to those wishing to improve their language skills, as well as to students of general linguistics who desire to acquire a knowledge of a non-Indo-European language.

Estonian Programs

Estonian Studies Minor (Arts Program) - ASMIN1756

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

(4 FCEs or equivalent, including at least one at the 300+ level)

Four FCEs from: EST100H1, EST101H1, EST200H1, EST201H1, EST300Y1, EST400Y1, EST420Y1, FIN220H1

Regarding Estonian Courses

Note: The Department reserves the right to assign students to courses appropriate to their level of competence in Estonian.

Estonian Courses

EST100H1 - Elementary Estonian Language and Culture I

Previous Course Number: EST100Y1

Hours: 48P

Learn essential Estonian vocabulary, basic grammar and develop elementary conversational competence. Popular songs, poetry, and structured dialogue are among the various tools for achieving these objectives. Students will learn commonly used phrases and expressions used in everyday situations, from greeting people to making purchases in stores, and ordering meals in cafes. The course is designed for students with either no fluency or minimum fluency in Estonian.

Exclusion: EST100Y1

Distribution Requirements: Humanities

Breadth Requirements: Creative and Cultural Representations (1)

EST101H1 - Elementary Estonian Language and Culture II

Previous Course Number: EST100Y1

Hours: 48L

This course expands the student’s command of Estonian from the introductory level. The course will consist of themed sessions using language for travel in Estonia, savouring the language of Estonian cuisine, and the lyrics of popular, folk and classical Estonian music. These themed sessions will also enable students to better understand the proper inflections of nouns and tenses of verbs in both dialogue and written exercises. This course is open to students with minimum fluency in Estonian.

Prerequisite: EST100H1 / Permission of instructor

Exclusion: EST100Y1

Distribution Requirements: Humanities

Breadth Requirements: Creative and Cultural Representations (1)
EST200H1 - Intermediate Estonian Language and Culture I

Previous Course Number: EST200Y1
Hours: 48P

This course develops the student's language skills via an exploration of Estonian culture - including its music, literature, film and media. Each of these areas will be examined through readings, writing about one’s impressions, and speaking about them to others in the class. The course consists of a combination of both classroom and web-based learning. The course is open to students with some fluency in Estonian.

Prerequisite: (EST100H1, EST101H1) / Permission of instructor
Exclusion: EST200Y1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

EST201H1 - Intermediate Estonian Language and Culture II

Previous Course Number: EST200Y1
Hours: 48P

Through an exploration of Estonian culture both in Estonia and the diaspora, students will further develop their skills in speaking, reading and writing in Estonian. Students will learn about the main characteristics of Estonian society – its history, way of life, the Estonian economy and business environment, and Estonian current affairs. Students will discuss recent trends and challenges in the development of Estonian society. The course will combine both classroom and web-based learning. It is open to students with elementary fluency in Estonian, both spoken and written.

Prerequisite: (EST100H1, EST101H1) / Permission of instructor
Exclusion: EST200Y1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

EST300Y1 - Advanced Estonian

Hours: 72P

Advanced grammar and stylistics through study of a variety of texts; problems of composition; translation; oral and written practice. (Offered in alternate years)

Prerequisite: EST200Y1 or permission of instructor
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

EST400Y1 - Estonian Literature from 1700

Hours: 24L/24S

A survey of the major writers and literary periods in Estonian literature. From Ksu Hans, Lament of Tartu to the National Awakening. Republican, Soviet, expatriate literature, and the New Awakening. Readings in Estonian or English. (Offered in alternate years)

Prerequisite: Permission of instructor
Recommended Preparation: EST300Y1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

EST420Y1 - Independent Study

A year-long reading and research project of significant depth in a major topic in Estonian language, literature or culture approved and supervised by an instructor. Not eligible for CR/NCR option.

Prerequisite: EST300Y1/EST400Y1; permission of instructor
Distribution Requirements: Humanities

EST421H1 - Independent Study

A semester-long reading and research project of significant depth in a major topic in Estonian language, literature or culture approved and supervised by an instructor. Not eligible for CR/NCR option.

Prerequisite: Permission of instructor
Distribution Requirements: Humanities
Centre for Ethics

The Centre for Ethics at the University of Toronto fosters research, teaching and public discussion of the moral dimensions of contemporary individual, social and political life. We are committed to the proposition that universities have a distinctive capacity and responsibility to shed light on questions of the moral life, as well as to educate students for reflective citizenship. Fulfilling this responsibility requires that we promote and engage in dialogue about the theory and practice of ethics across disciplinary, cultural, religious and social divides. For information or to make an appointment for consultation contact the Assistant to the Director, 416-978-6288 or e-mail: ethics@utoronto.ca.

Centre for Ethics Courses

ETH201H1 - Contemporary Moral Problems

Hours: 24L

ETH201 is an introductory course in ethics. How should we live? Which course of action is the right one? When and why should we blame ourselves and/or others? We all have and exercise moral opinions; this course is about justifying them. The course begins with some critical reasoning skills, and then explores philosophical strategies for justifying moral beliefs. We will then examine some specific issues of moral and political significance before concluding with psychological mechanisms behind moral attitudes and behaviour.

Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

ETH210H1 - Rationality and Action

Hours: 36L

An introductory survey of attempts that have been made to develop a formal model of practical rationality, with particular emphasis on the way moral considerations enter into those deliberations. Topics may include: utility-maximization theory, introductory game theory, consequentialism, and deontic reasoning, as well as the limitations of rationality.

Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

ETH220H1 - Moral Psychology

Hours: 36L

A study of issues that arise at the intersection of psychology and moral philosophy. Why do people act morally? What role do reason and emotion play? Can we know what is right, yet not be motivated to do it? What role can science play in advancing our understanding of morality?

Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

ETH230H1 - Morality in Cross-Cultural Perspective

Hours: 24L

Is morality universal, or does it vary by time and place? This course will examine cultural differences in moral codes from both empirical and philosophical perspectives.

Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

ETH350H1 - Topics in Value Theory

Hours: 24L

Selected topics in value theory, broadly construed (ethics, political theory, law). Consult the Centre for Ethics website for offering information.

Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)
ETH401H1 - Seminar in Ethics

Hours: 16L/16S

The seminar will expose advanced undergraduates to cutting edge research in ethics. It meets bi-weekly over the entire academic year. Participants will attend research presentations at the Centre for Ethics (topics have included bioethics, indigenous rights, equality and education, free speech, and workplace democracy). They will also meet individually with the instructor (the Centre’s Director) to plan an independent research project related to the theme of the course. In the winter term, students will present their research and discuss it with the other students in the seminar. (Note that this is an "H1Y" course -- a half-credit course taught throughout both Fall and Winter terms.)

Prerequisite: One of PHL365H1, PHL375H1, PHL271H1, POL200Y1 or an equivalent, POL330Y1 or an equivalent. Preference for enrolment will be given to students of the Department of Philosophy, the Department of Political Science, and Trinity College's program in Ethics, Society, and Law.

Distribution Requirements: Humanities; Social Science

Breadth Requirements: Thought, Belief and Behaviour (2)
European Studies

The European Studies Program is designed to develop an interdisciplinary expertise on modern Europe, combining rigorous language training with in-depth knowledge of Europe’s history, politics, and culture. For students who desire the linguistic competence, the cultural comprehension, and the specialized knowledge necessary to operate effectively in the “new” Europe, the major program provides undergraduate students with the opportunity to focus on Europe through a wide variety of courses and disciplines with a focus on economics, history, language and politics. A major in European Studies offers preparation either for further specialized or professional study at the graduate level or for work either in Europe itself or within a Canadian-based organization/business dealing with Europe.

Language competence is at the centre of the European Studies Program. Students majoring in European Studies are expected to acquire, in the course of their Program, a working fluency in one or more of the following designated languages: Croatian, Czech, Estonian, Finnish, French, German, Hungarian, Italian, Macedonian, Modern Greek, Polish, Portuguese, Russian, Serbian, Slovak, Spanish, or Ukrainian. European Studies majors may want to consider working toward language citation. To ensure that graduates in European Studies have the historical understanding and specialized knowledge, as well as linguistic competence, necessary to comprehend contemporary Europe, a balanced syllabus is presented: core courses on the political evolution of Europe and on the economics and politics of European integration are complemented by choices from courses offered by the twelve academic departments participating in the Program. Students who choose to minor in European Studies will acquire in-depth knowledge of modern Europe.

European Studies Programs

European Studies Major (Arts Program) - ASMAJ1625

Description:

Visit the European Studies Program web site for updated information about requirements, course offerings, and events: https://munkschool.utoronto.ca/ceser/study-at-ceser/ or consult Prof. Robert Austin, Undergraduate Coordinator, Room 126N, Munk School of Global Affairs (416-946-8942) for general program requirements.

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

Completed courses (with minimum grades)

The following courses with the stated minimum grades are required:

For students with no prior language experience:

- One of the following (1.0 credit) with a final grade of 65%:
  EST100Y1, (EST100H1 and EST101H1), FIN100Y1, (FSL100H1 and FSL102H1), FSL121Y1, GER100Y1, HUN100Y1, ITA100Y1, (MGR100H1 and MGR101H1).

For students who are exempted from a first-year language course (i.e. those with some prior language skills):

- One of the following (1.0 credit) with a final grade of 65%:
  EST200Y1, FIN200Y1, FSL221Y1, GER200Y, GER300Y1, (GER370H1 + GER372H1), HUN200Y1, ITA250Y1, ITA251Y1, ITA252Y1, MGR245Y1, PRT220Y1, SLA204Y1, SLA206Y1, SLA207Y1, SLA208Y1, SLA209Y1, SLA220Y1, SLA237Y1, SPA220Y1

Completion Requirements:

European Studies Majors must complete 7.0 credits, including at least two 300+–level credits, 0.5 of which must be at the 400–level. The mandatory EUR498H1 – Special Topics in European Studies fulfills the 400-level requirement. The distribution of the 7.0 credits is as follows:

- Three credits in language (a three-year progressive sequence of courses in a single language). Variations on this can be discussed with the Program Coordinator.
- Two credits in the required core courses offered by the Departments of History (EUR200Y1) and Political Science (the combination of POL219H1 and POL387H1, or the full-credit POL395Y1).
- The .5 credit EUR498H1 - Special Topics in European Studies.
- The remaining 1.5 credit in elective courses chosen from the list of eligible electives below.

Notes:

- Students are expected to consult with the Program Coordinator for assistance with and advice on course selection.
- Some of the courses listed below may have prerequisites; some may be offered in alternate years. The list reflects information available at the time of publication. Consult the Program Advisor for up-to-date information.

First Year:

One of the following: EST100Y1, (EST100H1 and EST101H1), FIN100Y1, (FSL100H1 and FSL102H1), FSL121Y1, GER100Y1, HUN100Y1, ITA100Y1, (MGR100H1 and MGR101H1), PRT100Y1, SLA100Y1, (SLA100H1 and SLA101H1), SLA105Y1, SLA106Y1, SLA107Y1, SLA108Y1, SLA109Y1, SPA100Y1 or an equivalent combination of half credits.

Second Year:

1. EUR200Y1
2. One full course equivalent from: EST200Y1, FIN200Y1, FSL221Y1, GER200Y, GER300Y1, (GER370H1 + GER372H1), HUN200Y1, ITA250Y1, ITA251Y1, ITA252Y1, MGR245Y1, PRT220Y1, SLA204Y1, SLA206Y1, SLA207Y1, SLA208Y1, SLA209Y1, SLA220Y1, SLA237Y1, SPA220Y1 or an equivalent combination of half credits.

Third Year:

1. (POL219H1, POL387H1) or POL359Y1
2. One credit from: EST300Y1, FIN300H1 plus 0.5 credit in literature: FSL321Y1, FSL421Y1, FSL442H1 and FSL443H1; GER300Y1, GER370H1, GER372H1, GER400H1, HUN310Y1, ITA343H1 and ITA344H1, ITA354H1 and ITA355H1, ITA364H1 and
European Union Studies Minor (Arts Program) - ASMIN1011

Description:
Visit the European Studies Program web site for more information about requirements, course offerings, and events: https://munkschool.utoronto.ca/ceres/study-at-ceres/.

Enrolment Requirements:
This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

Completed courses (with minimum grades)
The following courses with the stated minimum grades are required:

- 1.0 credit in HIS or POL courses at the 100-level with a final grade of 70%

Completion Requirements:
(4 credits, including at least 1 credit at the 300 or 400 level)

1. EUR200Y1
2. (POL219H1, POL387H1) or POL359Y1
3. Two credits or their equivalent in eligible elective courses (see European Studies Major)

European Studies Courses

MGR100H1 - Introductory Modern Greek

Hours: 24L
This course is designed for absolute beginners in the Modern Greek language. The overall goal is to facilitate understanding and use of familiar everyday expressions and phrases aimed at the satisfaction of basic communicative needs. Students will familiarize themselves with the Modern Greek alphabet, pronunciation and grammatical rules. No previous knowledge of Modern Greek required.

Exclusion: Students who have completed High School in Greece or a Grade 12 Modern Greek language credit.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)
MGR101H1 - Elementary Modern Greek

Hours: 24L

This course builds on MGR100H1 and aims to develop competence in the Modern Greek language at the basic level. Students will attain elementary proficiency in the spoken and written language by familiarizing themselves with a variety of grammatical and syntax structures while continuing to enrich their vocabulary. Emphasis will be placed on reading and conversational skills while students are expected to write short descriptive paragraphs.

Prerequisite: MGR100H1
Exclusion: Students who have completed High School in Greece or a Grade 12 Modern Greek language credit.
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

EUR200Y1 - Europe: Nation-State to Supranational Union

Hours: 48L/24T

An analysis of the development of European political regimes from 1789 until the 2004 and 2007 enlargements of the European Union to include the countries of the former Soviet bloc. This course identifies the decisive forces and factors affecting the operation of constitutions and institutions within the countries which came to form the European Union: nationalism, multi-nationalism, internationalism and supranationalism.

Exclusion: HIS241H1/HIS242H1
Recommended Preparation: HIS103Y1/HIS109Y1
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

MGR245Y1 - Intermediate Modern Greek

Hours: 78S

A course designed for students with some command of the language: vocabulary building; study of grammar and syntax; compositional skills leading to the study of a prose literary work.

Prerequisite: First year Greek or equivalent; permission of instructor that includes language placement test evaluation
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

EUR299Y1 - Research Opportunity Program

Hours: TBA

Credit course for supervised participation in faculty research project. Details at https://www.artsci.utoronto.ca/current/academics/research-opportunities/... Not eligible for CR/NCR option.

MGR300H1 - Advanced Modern Greek I

Hours: 24L

This course builds on the Intermediate level background knowledge to prepare students as independent users of the Modern Greek language. In order to attain conversational fluency and communicate effectively and accurately with native Greek language speakers, students will practice on reading and interpreting magazine and newspaper articles on various topics as well as applying more complex grammatical and syntax rules to write essays on assigned subjects.

Prerequisite: Completion of MGR245Y1 or permission of instructor
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

MGR301H1 - Advanced Modern Greek II

Hours: 24L

The aim of this course is to facilitate fluency both in spoken and written Modern Greek. Proficiency at this level will be attained through familiarization with various texts and genres including a Modern Greek literature anthology and selected academic articles. Emphasis will be placed on writing which will lead to the production of a short research paper in Modern Greek.

Prerequisite: Completion of MGR300H1 or permission of instructor
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

EUR398H0 - Research Excursions

Hours: TBA

An instructor-supervised group project in an off-campus setting. Details at https://www.artsci.utoronto.ca/current/academics/research-opportunities/... Not eligible for CR/NCR option.
EUR398Y0 - Research Excursions

Hours: TBA

EUR399Y1 - Research Opportunity Program

Credit course for supervised participation in faculty research project. Details at https://www.artsci.utoronto.ca/current/academics/research-opportunities/... - Not eligible for CR/NCR option.

JRA401H1 - Topics in Comparative Politics V

Hours: 24S

Selected issues in comparative politics. Content and instructor varies from year to year. (Given by the Department of Political Science and the Centre for European, Russian and Eurasian Studies)

Prerequisite: 2.0 POL credits in comparative politics. See the Department's website http://politics.utoronto.ca/undergraduate/courses/fallwinter-timetable/ for POL courses by area group.
Exclusion: POL 410H (taken in 2013-14 and 2014-15)
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

JRA401Y1 - Topics in Comparative Politics V

Hours: 48S

Selected issues in comparative politics. Content and instructor varies from year to year. (Given by the Department of Political Science and the Centre for European, Russian and Eurasian Studies)

Prerequisite: 2.0 POL credits in comparative politics. See the Department's website http://politics.utoronto.ca/undergraduate/courses/fallwinter-timetable/ for POL courses by area group.
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

JRA402H1 - Topics in Comparative Politics VI

Hours: 24S

Selected issues in comparative politics. Content and instructor varies from year to year. (Given by the Department of Political Science and the Centre for European, Russian and Eurasian Studies)

Prerequisite: 2.0 POL credits in comparative politics. See the Department's website http://politics.utoronto.ca/undergraduate/courses/fallwinter-timetable/ for POL courses by area group.
Exclusion: POL 410H (taken in 2013-14 and 2014-15)
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

JRA437H1 - Government, Law and Politics in Russia

Previous Course Number: POL437H1
Hours: 24S

Law in the governance of Russia, in the Soviet and post Soviet periods, including constitutional development, courts, business disputes, crime and criminal justice, corruption, cultural obstacles to legal order, and legal transition in comparative perspective. (Given by the Department of Political Science and the Centre for European, Russian, and Eurasian Studies)

Prerequisite: HIS351Y1/POL354H1/a course in Russia or Soviet politics
Exclusion: POL437H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

EUR495H1 - Independent Studies

Hours: 2P

An in-depth of an issue of relevance to the European Union. Content depends on the instructor. Not eligible for CR/NCR option.

Prerequisite: Open only to students enrolled in the European Studies Major Program. Third and Fourth year students only.
Recommended Preparation: Varies year to year.
EUR498H1 - Special Topics in European Studies: European Union

Hours: 24L

What is the European Union? Which are its core institutions and how do they work? What is the scope of its directives and programs, and how do they fit in with the member-states’ policies? What is the role of the EU as an international actor? This course on Special Topics in European Studies aims at answering all these questions. The course will start with an introduction to integration in Europe, the development of the EU, and some theories and approaches to its study. It will then review the main political, economic, and judiciary institutions in the EU. Last, it will examine some important policy areas and challenges at the European level, including migration and asylum, social cohesion, counterterrorist initiatives, scenarios after Brexit, relations between the EU and its neighbours, and foreign policy. Special care will be given to explaining the political interaction between the EU institutions and the member-states, on the one hand, and the EU’s Directives and policy frameworks and the members’ policies, on the other hand.

Prerequisite: Completion of 12.0 FCEs including EUR200Y1 and one of POL207Y1/POL359Y1

Distribution Requirements: Social Science

Breadth Requirements: Society and its Institutions (3)
Finnish

Faculty List

Professor Emeritus
B. Vahamaki, MA, Ph Lic, Ph D

Assistant Professor
A. Muhonen, MA, Ph D

Introduction

A nation of five million people, Finland is situated between West and East, between Sweden and Russia, sharing for thousands of years religious, historical, political, social, and cultural influences and experiences with its neighbours and the different worlds they represent.

Finnish, a Finno-Ugric language related to Estonian and Hungarian, is spoken by 94% of Finland’s population, by 300,000 in Sweden, and by large numbers in Canada, the United States, and other countries. The other constitutionally recognized group, the Finland-Swedes, comprises over six percent of the population. The Finns have a strong commitment to their languages and to their culture. Their national epic, the Kalevala, compiled in the 19th century from old Finnish epic narrative poems and incantations, soon became a national symbol and continues to this day to inspire the growth and development of the country’s creative force. Today the entire world responds to Finnish achievements in music, literature, the arts and architecture, and celebrates the work of such outstanding figures as Jean Sibelius, Aki Kaurismäki, Alvar Aalto, and Eliel and Eero Saarinen.

Finnish studies at the University of Toronto are presently engaged in teaching the Finnish language - a three-year sequence - and in offering other courses on the literature and culture of Finland.

Finnish Programs

Finnish Studies Major (Arts Program) - ASMAJ1089

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

(6 FCEs or their equivalent, with at least 2 FCEs at the 300+ level, including 0.5 FCE at the 400-level)

1. FIN100H1, FIN110H1
2. FIN200H1, FIN210H1
3. FIN300H1
4. 3 FCEs from the following: FIN225H1, FIN230H1, FIN235H1, FIN236H1, FIN238H1, FIN240H1, FIN250H1, FIN260H1, FIN270H1, FIN280H1, FIN305H1, FIN310H1, FIN320H1, FIN330H1, FIN340H1, FIN350H1, FIN360H1, FIN400H1, FIN410H1, FIN415H1, FIN420Y1, FIN430H1

5. 0.5 FCE in Breadth Requirement Category 5: The Physical and Mathematical Universes, or another half course approved by the program director, to fulfill the Quantitative Reasoning competency required in the program.

Finnish Courses

FIN100H1 - Elementary Finnish I

Hours: 48P

The Department reserves the right to assign students to courses appropriate to their level of competence in Finnish. An introductory language course for students with no knowledge of Finnish. The acquisition of a basic vocabulary and of an understanding of elementary structural features through practice in comprehension, speaking, reading and writing.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

SWE100H1 - Elementary Swedish I

Hours: 24L/24P

Elementary Swedish I gives students a basic knowledge of Swedish. Students learn to understand and use Swedish in everyday situations, and to read and write short texts on familiar themes, and speak about their immediate social environment and learn something about everyday life in both Finland and Sweden.

Prerequisite: None
Corequisite: None
Exclusion: SWE 101H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)
SWE101H1 - Elementary Swedish II

Hours: 24L/24P

Elementary Swedish II, a continuation of SWE100H1 gives students a basic knowledge of Swedish. Students learn to understand and use Swedish in everyday situations, and to read and write short texts on familiar themes, and speak about their immediate social environment and learn something about everyday life in both Finland and Sweden.

Prerequisite: SWE100H1 or instructor permission
Corequisite: None
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

FIN110H1 - Elementary Finnish II

Hours: 48P

An introductory language course for students with no knowledge of Finnish. The acquisition of a basic vocabulary and of an understanding of elementary structural features through practice in comprehension, speaking, reading and writing.

Prerequisite: FIN100H1 or permission of instructor
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

FIN200H1 - Intermediate Finnish I

Hours: 48P

The four language skills (speaking, listening, reading and writing) honed by discussion of Finnish literary texts as well as by compositions in Finnish about these texts, by a series of conversation exercises, and by analysis of morphology, syntax and word formation. Translation is used to aid in language learning.

Prerequisite: FIN110H1 or permission of instructor
Exclusion: FIN200Y1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

FIN210H1 - Intermediate Finnish II

Hours: 48P

The four language skills (speaking, listening, reading and writing) honed by discussion of Finnish literary texts as well as by compositions in Finnish about these texts, by a series of conversation exercises, and by analysis of morphology, syntax and word formation. Translation is used to aid in language learning.

Prerequisite: FIN200H1 or permission of instructor
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

FIN225H1 - Culture, Society and Politics of the Nordic Region

Hours: 24L

An introduction to the culture, society and politics of the Nordic region with a focus on Finland, Sweden and Estonia, and including other countries of the Baltic sea region. An overview of the evolution of culture and society, as well as historical and political developments, demonstrating how interactions between these two spheres have shaped life in the region today.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

FIN230H1 - Finnish Culture 1800 to Present

Hours: 12L/12P

FIN230H1 offers an introduction to Finnish society, history and culture from 1800 to present. The course examines the rise of Finnish nationalism in the 1800s, its main manifestations, and concentrates on the developments of its cultural, educational and social institutions, its economic structures, demographics, cultural traditions as well as the nation’s bilingual status. The focus is on contemporary themes placed in a wider societal context.

Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)
FIN235H1 - Finnish Literature 1800 to Present  
**Hours:** 12L/12P  
FIN235H1 surveys the major works in Finnish literature 1800 to present by examining its role in the implementation of the agenda of Finnish nationalism in the 19th and the 20th century. The major genres and periods in Finnish literature are studied. 

**Recommended Preparation:** FIN230H1  
**Distribution Requirements:** Humanities  
**Breadth Requirements:** Creative and Cultural Representations (1)

FIN236H1 - Hot Reads from a Cool Country: Contemporary Finnish Literature  
**Hours:** 24S  
An introduction to contemporary Finnish literature which leads students through major developments in Finnish literature over the last 30 years with a focus on the major themes and trends of Finnish literature through selected representative works. Finnish texts will be read in translation, analyzed and discussed.  

**Distribution Requirements:** Humanities  
**Breadth Requirements:** Creative and Cultural Representations (1)

FIN238H1 - The Vikings  
**Hours:** 48L  
This course examines the influence and reception of the Vikings on the Nordic countries and Europe up to the modern day, focusing on their legacy in the contemporary Nordic world in literature, film and other cultural fields.  

**Prerequisite:** None  
**Corequisite:** None  
**Exclusion:** None  
**Recommended Preparation:** None  
**Distribution Requirements:** Humanities  
**Breadth Requirements:** Creative and Cultural Representations (1)

FIN240H1 - Masterpieces of Scandinavian Literature  
**Hours:** 12L/12S  
Introduction to the greatest authors of Scandinavian literature and their greatest works, particularly August Strinberg, Henrik Ibsen, H.C. Andersen, Knut Hamsun, Selma Lagerlof, Pr Lagerkvist, Aleksis Kivi, Sigrid Undset and Halldor Laxness, etc. These are situated in their Scandinavian context and in world literature. (Offered every two or three years)  

**Recommended Preparation:** Some background in literature  
**Distribution Requirements:** Humanities  
**Breadth Requirements:** Creative and Cultural Representations (1)

FIN250H1 - Finnish Cinema  
**Hours:** 12P/24S  
The course offers a survey of development of Finnish cinema from its parochial beginnings to its international recognition with a focus on contemporary themes. Selected films with different themes and topics will be screened and analysed. Readings and subtitles in English. (Offered in alternate years)  

**Distribution Requirements:** Humanities  
**Breadth Requirements:** Creative and Cultural Representations (1)

FIN260H1 - Scandinavian Cinema  
**Hours:** 12P/24S  
Major developments of cinema in Scandinavia in the 20th and 21st centuries focusing on Denmark, Sweden, and Finland. In addition to "old classics," most important recent films are screened and discussed. Film directors include Ingmar Bergman, Carl Th. Dreyer, Aki and Mika Kaurismaki, and many others. (Offered in alternate years)  

**Distribution Requirements:** Humanities  
**Breadth Requirements:** Creative and Cultural Representations (1)
FIN270H1 - Modern and Contemporary Finnish Architecture and Design

Hours: 24P

Finnish architecture and design from the 19th century to the present. Explores the technical and stylistic development of modern architecture and design in relation to the cultural and socioeconomic progress of the young nation. The focus is on the work of modern architects and designers. The course also examines the history of Scandinavian design more broadly.

Prerequisite: None
Exclusion: None
Recommended Preparation: None
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

FIN280H1 - Finnish Musical Culture from Sibelius to Heavy Metal

Hours: 24S

Analyzing the role of music in Finnish cultural identity, history, and society, this course explores both traditional and contemporary Finnish music, concentrating on what makes Finnish musical culture unique: Sibelius, kantele, folk music, heavy metal, rock and pop music. We will explore the themes of national and international music, the music industry, and the globalization of Finland’s music.

Prerequisite: None
Exclusion: None
Recommended Preparation: None
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

FIN300H1 - Advanced Finnish I

Hours: 12P/24S

Advanced Finnish provides a continuation of FIN210H1 Intermediate Finnish.

Prerequisite: FIN210H1 or permission of instructor
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

FIN310H1 - Finnish Folktale: The Kalevala

Hours: 12L/12S

An examination of the Finnish national epic, the Kalevala: its relationship to the tradition of folk poetry; its quality as an epic poem; the mythological, religious, and cultural dimensions of its world view; its role in Finlands nation building in the 19th and 20th centuries. Readings in English. (Offered at least every alternate year)

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

FIN320H1 - The Finnish Canadian Immigrant Experience

Hours: 12L/12S

Major issues and dimensions of the culture and experience of the Finnish immigrants to Canada, including Finnish Canadian literature, theatre, and press. Conceptual and ideological contributions to working class culture, womens lives, religious and social attitudes and values. Readings in English. (Offered every three or four years)

Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

FIN340H1 - Advanced Finnish II

Hours: 12P/24S

Advanced Finnish II provides a continuation of FIN300H1 Advanced Finnish I.

Prerequisite: FIN300H1 or permission of instructor
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

FIN350H1 - The Finnish Short Story

Hours: 24S

Historical, structural, and thematic study of the short fiction of Finland from the Romanticism of the 19th century to contemporary post-structuralism and post-modernism. Works of Runeberg, Topelius, Kivi, Canth, Aho, Jotuni, Lehtonen, Schildt, Sillanpaa, Haanpaa, Meri, Hyry, Salama, Mukka, Liksom, and others. Readings in English. (Offered in alternate years)

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)
FIN360H1 - Bilingualism in Finland

Hours: 12L/12S

Bilingualism in Finland as a case study in the sociology of language. A critical survey of the historical development of language politics in Finland as a bilingual society from 1800 until present.

Exclusion: FIN340H1
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

FIN400H1 - Translation: Finnish-English

Hours: 24S

Written translation from Finnish to English. Students will apply their textual analysis skills in translating texts drawn from diverse sources and genres, while exploring the general theory of translation. Translation exercises will serve as the basis for training in comparative Finnish-English stylistics.

Prerequisite: FIN300H1 or permission of instructor
Recommended Preparation: FIN305H1
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

FIN415H1 - Finnish Literature in the 20th Century

Hours: 24S

This course examines the main literary works and genres of 20th Century Finland, especially Jotuni, Sillanpaa, Haanpaa, Meri, Manner, Linna, Tuuri and a sample of contemporary writers. All readings in Finnish.

Prerequisite: Permission of instructor
Recommended Preparation: FIN410H1
Breadth Requirements: Creative and Cultural Representations (1)

FIN420Y1 - Independent Study

A year-long reading and research project of significant depth in a major area in Finnish language, literature or culture approved and supervised by an instructor. Not eligible for CR/NCR option.

Distribution Requirements: Humanities
First-Year Foundations

First-year students in the Faculty of Arts & Science have access to many kinds of foundational opportunities. Large-scale lectures offer a dynamic experience and can be supported with tutorials or labs. Smaller, more intimate courses can help you build relationships with professors and peers early on in your academic career.

If you are considering a small-class experience, read below to learn more about First-Year Foundation Seminars and First-Year Foundation Ones Programs. Victoria College also has seminar courses called the Vic One Hundred series that are open to all Arts & Science first-year students. (Please note: Some Ones Programs require applications—see below for details.)

First-Year Foundation Seminars

First-Year Foundation Seminars enable new students to engage in academically rigorous discussions and develop strong written, oral, and teamwork skills in the process. These small classes are capped at 25 students, which helps ensure that all students are active participants in discussions and have the opportunity to build relationships with professors early on in their academic career.

These courses focus on issues, questions and controversies surrounding a particular topic or theme. Taught by some of the Faculty's leading scholars, the best researchers and teachers at U of T, they are restricted to newly admitted first-year students. Enrol during summer course selection.

First-Year Foundation One Programs

First-Year Foundation Ones Programs are interactive, small-group courses allow you to network with peers and professors explore a range of compelling issues. All seven colleges in the Faculty of Arts & Science and the Munk School of Global Affairs offer First Year Foundation Ones Programs, which typically combine one or more theme-based courses with co-curricular events and experiential learning. These distinctive first-year programs build community, foster critical thinking and writing skills and develop intellectual independence.

All newly admitted first-year students in the Faculty of Arts & Science can register for First-Year Foundation Ones Programs, regardless of college affiliation.

Note: Some First Year Foundation Ones Programs require an application, while you enrol in others during course selection. See details below.

First-Year Foundation Courses

ACT199H1 - Decipher Financial Puzzles in the Media and Pop Culture

Hours: 24L

Have you ever watched a pundit’s passionate rant over financial crisis on TV and wondered whether he was right or wrong? Did you get the full story after watching movies like Margin Call or The Big Short? What was the efficiency market versus behavioral finance debate all about? Did you wonder why everyone in the financial press seem to be calling for a lower debt/equity ratio on banks in the post-crisis era? If you find yourself think about those questions, this is the course for you. We will start from some basic building blocks of finance, such as time value of money and discounting, and proceed to look at some of the important financial controversies you have read or heard in the pop culture or media. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: The Physical and Mathematical Universes (5)

ANT193H1 - Making, Using, and Interpreting Stone Tools

Hours: 6L/8P/10S

Stone tools are the earliest and longest-lasting record of human technology. This course explores interpreting stone tools from a multidisciplinary perspective. In making, using, and studying stone tools, students will learn how archaeologists form hypotheses and design experiments to understand humans and their technologies in the past. This course presents research that investigate changes in human ancestors’ cognition and livelihoods through the contributions of other disciplines in life and social sciences to the study of stone tools. The course introduces major stone tool discoveries and critically engages with current research through the development of new ideas for research projects. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Social Science
Breadth Requirements: Thought, Belief and Behaviour (2)
ANT194H1 - Tragically Unhip: Great Thinkers of the Late 19th and Early 20th Centuries

Hours: 24S

Inspired by Darwin’s Origin of Species (1859), the first anthropologists tried to extend his theory of evolution into culture by searching for the origins and essence of human existence. The course focuses on English and French thinkers who defined minimal sets of beliefs and practices that all cultures shared. It also takes account of the motivations and social milieu of early theorists who rarely, if ever, came in contact with the exotic “other” they studied; and it touches on the radical critique of their theories including Lévi-Strauss’ structuralism and influential “afterologies” like deconstruction, post-structuralism, Lacanian psychoanalysis and Foucauldian philosophy. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Social Science
Breadth Requirements: Thought, Belief and Behaviour (2)

ANT195H1 - Speculative Fiction and Social Reality

Hours: 24S

How do the imagined worlds of speculative fiction reflect, and reflect upon, the real worlds of their authors and audiences? And on the other hand, how can works of speculative fiction have real-world impacts? Is speculative fiction different, in either of these respects, than other genres of narrative? This course explores a variety of works of speculative fiction from the perspective of an anthropological interest in ideas, imaginations, and narratives in relation to social life. Restricted to first-year students. Not available for CR/NCR option.

Distribution Requirements: Social Science
Breadth Requirements: Thought, Belief and Behaviour (2)

ANT196H1 - Observing Everyday Life

Hours: 24S

This course is a First-Year Foundation Seminar and provides an opportunity for exploration of different topics and themes. Not available for CR/NCR option.

Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

ANT197H1 - Representations of Intellectuals

Hours: 24S

This course is a First-Year Foundation Seminar and provides an opportunity for exploration of different topics and themes. The course explores ideas of intellectuals who carved transformative theories during war times or under repressive regimes in the twentieth century. Intellectuals featured in the course include Rosa Luxemburg, Frantz Fanon, Walter Benjamin, Lu Xin, Audre Lorde. Further, it would examine cultural representations of them, such as, graphic novels, fictions, essays, films and videos on them or relatable to their ideas. For example, it would assign reading of Red Rosa, a graphic novel of Luxemburg together with her own work Theory of Imperialism. Or it would juxtapose Lorde’s classic, Sister Outsider, with Octavia Butler’s science fiction, Parable of the Sower. First-Year Foundation Seminars are restricted to first-year students and do not normally contribute towards program completion. Not available for CR/NCR option.

Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

ANT198H1 - Nature: A Cultural Introduction

Hours: 24S

This course is a First-Year Foundation Seminar and provides an opportunity for exploration of different topics and themes. The distinction (or dualism) between nature and culture is often described as a central feature of the western cultural imagination and of “modernity.” The nature/culture dualism is also relevant to many current debates about ecology and environment. This course explores various approaches to “nature” through a variety of written and visual texts, and focuses on representations of the nature/culture dualism. First-Year Foundation Seminars are restricted to first-year students and do not normally contribute towards program completion. Not available for CR/NCR option.

Distribution Requirements: Social Science
Breadth Requirements: Creative and Cultural Representations (1)

ANT199H1 - Living on the Water in Toronto

Hours: 24S

Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)
AST198H1 - Great Astronomical Issues

Hours: 24S

There are some fundamental questions which humankind has asked itself over the centuries. Many of these involve astronomical origins, events, and objects. Astronomers now have the tools with which to attempt to answer some of the most fundamental questions, such as "Where did it all begin, where are we in space and time, are we alone, and who and what are we?" This seminar will explore some of these great issues. The selection of topics will be made initially by the instructor, but will be modified by the seminar participants at the first class meeting. Topics could include: stellar evolution and the future of the Sun, origin of the elements, origin and future of the Universe, origin of the Earth, origin of life, and extinction of the dinosaurs, global warming, the scientific method, astronomy and the public. Participants will be expected to join actively in lively discussions and to prepare and lead some of the seminars. Restricted to first-year students. Not eligible for CR/NCR option.

Exclusion: AST199H1
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

AST199H1 - Astronomy at the Frontier

Hours: 24S

This seminar series aims at building up general scientific literacy, by discussing selected topics in current astronomy, cosmology, and space science. We will delve into the physical foundation behind the questions being asked and how the answers are being sought. Students will have an opportunity early in the course to select topics of particular interest to them and this will govern the choice of readings as well. Topics could include: formation of stars; lives and deaths of stars; stellar corpses: white dwarfs, neutron stars, and black holes; planets around other stars; recent results from Hubble and other telescopes; architecture of the solar system; exploration in the solar system; the invisible universe: dark energy and dark matter; first light; formation of galaxies; the age and future of the universe. Participants should be comfortable with basic mathematics and quantitative reasoning. Students will be expected to do independent research for essays, presentations, etc. Restricted to first-year students. Not eligible for CR/NCR option.

Exclusion: AST198H1
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

CDN197H1 - Inventing Canada

Hours: 24S

This course explores the ways that Canadian history and identity have been commemorated, interpreted and experienced, now and in the past. The course focuses in particular on who has been included or excluded in commemorative efforts over time. Key topics include representations of women, Indigenous peoples, and political figures on screen and through public installations like museum exhibits, plaques and statues. Case studies highlighting a range of interpretive media will encourage students to work with and discuss a range of primary and secondary sources, build critical thinking and academic writing skills. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

CDN198H1 - Canada, Colonialism and Settler Relations

Hours: 24S

A First Year Foundations seminar focused on exploring Canada's colonial history and recent efforts to enact appropriate settler relations through an interdisciplinary lens. Topics will include contemporary land claims and treaty-making processes, the Royal Commission on Aboriginal Peoples, governmental apologies for the mistreatment of Indigenous peoples, the Truth and Reconciliation Commission, land acknowledgements, practices of allyship through social movement such as Idle No More, and efforts to influence Canada's overseas mining practices. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Society and its Institutions (3)

CDN199H1 - Canada- Hong Kong Migration

Hours: 24S

This course surveys the effects of migrations and cultural connections between Hong Kong and Canada from the 1960s. Students will discuss and analyze the impact of migrations, and study the connection between the two locations from the perspectives of history, culture and literature, politics and democracy, economic and financial development and the network of people and community. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Society and its Institutions (3)
CHM194H1 - Science and Human Values

Hours: 24S

There is a tension between creativity and the search for truth, which in science can be looking for patterns in nature. With examples drawn particularly from reports of scientific discoveries that have generated controversy, this seminar course will introduce the underlying principles and history of science, as well as how science and its boundaries are evolving, and how these influence human values. Restricted to first-year students. Not available for CR/NCR option.

Prerequisite: None
Corequisite: None
Exclusion: Other First-year Seminars
Recommended Preparation: Minimum level of high school science and mathematics
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

CHM195H1 - Innovative Teaching Methods in Chemistry

Hours: 24S

Good teaching is effective communication that engages the audience. In this breadth course, we’ll explore innovative teaching in science, through an examination of the nature of science, how scientific knowledge is built, and what makes certain concepts in science problematic to the learner. Students will read and discuss relevant articles in newsmagazines, popular science sources, and educational literature. They will design and deliver mini-lessons to communicate specified scientific concepts. As a major course project, students will develop a communication tool that integrates pedagogical know-how with leading-edge chemical discoveries to produce a teaching unit for use by Ontario teachers. Restricted to first-year students. Not available for CR/NCR option.

Prerequisite: None
Corequisite: None
Exclusion: Other First-year Seminars
Recommended Preparation: Minimum level of high school science and mathematics
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

CHM196H1 - The Quantum World and Its Classical Limit

Hours: 24S

This course seeks to demystify quantum mechanics and equip students to critically analyze popular depictions of quantum phenomena. While quantum mechanics provides a reliable description of the behavior of atoms, molecules and photons, most people are uncomfortable with some of its predictions, such as "quantum entanglement" between distant particles. In this course we will delve into key aspects of quantum mechanics and its more comfortable classical limit, focusing first on its manifestations in nature and then on fundamental issues such as uncertainty, interference, entanglement, and decoherence. This course will appeal to students with enthusiasm for physics. Restricted to first-year students. Not eligible for CR/NCR option.

Recommended Preparation: High school physics and mathematics
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

CHM197H1 - Environmental Chemistry in a Sustainable World

Hours: 24S

Rapid and widespread industrialization is changing the chemical nature of the planet. In order to have a sustainable future, we need to manage chemicals released by humankind, and to understand their effects on the environment and on us. Each year, this seminar course will address the fundamental science behind a specific topic in this field, such as the interactions of our energy choices and the environment, changes in water and air quality, or exposure to biologically-active synthetic chemicals such as pharmaceuticals or personal care products. Restricted to first-year students. Not eligible for CR/NCR option.

Recommended Preparation: Minimum level of high school science and mathematics
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)
CHM198H1 - Biosensor Technology and Applications for the Non-Scientist

Hours: 24S

This breadth course introduces uses of and key ideas behind biosensor technology. Sensors will be familiar to all, playing key roles in our everyday lives, for example in touch screens or in automotive technology. Biosensor devices are fabricated from an electrical transducer which is intimately connected to a biochemical probe such as an enzyme or antibody. The idea is that a detectable electrical signal can be obtained when a target molecule or ion binds to the probe. Such a device offers many applications. These range from the detection of biological markers in blood and serum to test for genetic and infectious disease, to the selective monitoring of biomolecules for public safety, or in biotechnology or other industrial processes. Restricted to first-year students. Not eligible for CR/NCR option.

Recommended Preparation: Reading of book chapter on biosensor technology
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

Hours: 24S

Chemistry is a practical as well as a conceptual science that serves as the basis for applications in many other fields. The ideas and methods have evolved from diverse inputs leading to widely accepted sets of standard of facts. This collective knowledge has led to progress in the quality and understanding of life at a molecular level. While the facts of chemistry are taught in established courses, the context of what we know, the limitations and challenges of what chemistry can do and how we got to this point will be the targets for discovery by students in this course. The course will operate in a seminar model, combining presentations, readings, reports and discussions of current and historical issues. Restricted to first-year students. Not eligible for CR/NCR option.

Recommended Preparation: Grade 12 level chemistry
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

CIN196H1 - Story Worlds and the Cinema

Hours: 24S

Films create story worlds, imaginary environments in which characters live and act, and where events, large and small, transpire. Some story worlds are elaborate, fanciful constructs (think of Disney’s animated films). Others stay close to reality (think of “docudramas”). But across the spectrum, all of them are framed by and provided with rules of time and space, of believable or impossible. This course offers an examination of selected story worlds from several periods of film history. Emphasis falls on the expansive story worlds of contemporary corporately-run media-franchise “universes,” like the cross-media “DC Universe.” Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

CIN197H1 - School Daze

Hours: 24P/24S

This first-year foundation course is a survey of sound film (with a brief selection of silent shorts) on the topic of how popular cinemas have represented going to school. Looking at one film and one scholarly text a week, the course will offer an introduction to the close reading of film texts, reading and writing film criticism, and the fundamentals of film history. By engaging with only one film/reading per week, the course emphasizes depth over breadth. Texts for the course may include excerpts from Corrigan’s A Short Guide to Writing About Film, Sturken and Cartwright’s Practices of Looking, Staiger’s Interpreting Films, and Prince’s Movies and Meaning, along with selected criticism on the movies screened. Those films may include Zero for Conduct, Aparajito, Tom Brown’s School Days, Tea and Sympathy, If, Rock and Roll High School, Mean Girls, School Daze, Blackboard Jungle, or Lady Bird. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)
CLA195H1 - Socrates and his Legacy

Hours: 24S

Socrates was a well-known figure in Athens during his lifetime: charismatic and inspirational to some, but a figure of fear and derision to others, who saw in him a challenge to political and religious norms. This course will look at the debates, ancient and modern, provoked by the unconventional life and controversial death of Socrates, and the influence he had over the public image, style, and content of subsequent philosophy. Plato is an important source for our view of Socrates, but we will make a point of exploring wider perspectives too: from the work of others in his circle, through literary representations, to his later reception in antiquity and beyond. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

CLA196H1 - Homer's Odyssey down through Time

Hours: 24S

This course will survey creative works inspired by Homer’s Odyssey. First we will read through the Odyssey, contextualizing the Homeric epic within the larger story of the Trojan War and the subsequent heroic return in the “Epic Cycle.” Then we will study various "receptions" of the Odyssey, ancient and modern. Ancient works will include the satyr play Cyclops by Euripides and portrayals of a love-sick Cyclops in Theocritus and Ovid. In True Story Lucian calls Odysseus a liar but rivals his travel tale with episodes placed on the moon and inside a whale. Modern works include Atwood’s Penelopiad, Walcott’s stage version of the Odyssey, and the film "O Brother, Where Art Thou?" Themes will include travel literature, truth and lying, localization of the wanderings of Odysseus, culture clash, and the definition of home. All this material, various in date, media, and fidelity to their Homeric source, will provide us with a well-rounded sense of how the Odyssey has been re-imagined over the ages. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

CLA197H1 - Death and Immortality in Ancient Thought

Hours: 24S

It seems natural for us to love life and hate death -- to long, therefore, for immortality. But are human beings in any way immortal? If so, where do we go -- is there an 'afterlife'? Are our souls reincarnated? And are we really right to fear death, or is this somehow childish? What is death, and what exactly is it that we are so afraid of: the pain of dying, loss of the pleasures of life, non-existence? We will read a series of ancient texts which engage with these questions: the Mesopotamian epic Gilgamesh, Homer’s Odyssey, Euripides’ play Alcestis, Plato’s Phaedo, and De Rerum Natura by the Roman poet Lucretius. All are great works with many dimensions; while focusing on our themes we will try to make the most of what they have to offer. The course is designed for students to get practice at several important skills: close reading of complex texts, analysis of philosophical arguments, oral discussion, and essay-writing. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

CLA198H1 - Julius Caesar

Hours: 24S

Gaius Julius Caesar (100 – 44 BC) was a writer, an orator, a reformer, and a builder, as well as a general, a conqueror, an explorer, and a dictator. After his death, he was even worshipped as a god with a temple in the very heart of Rome. According to his critics, both ancient and modern, he was also a megalomaniac, an enemy of the state, a war criminal, and a tyrant. Only a very few individuals have left such an extensive and controversial mark on the history of the ancient world. We shall consider as many aspects of his life and his legacy as we can, from his conquest of Gaul to his decision to plunge Rome into a horrific civil war, from his love-affair with Queen Cleopatra of Egypt to his brutal assassination on the Ides of March. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)
CLA199H1 - Monsters

Hours: 24S

We will be examining the monsters of classical antiquity. How do we think of monstrosity today? What is the shape of this category in the Greco-Roman world? Why are our monsters not the same as theirs? What occasions the peculiar horror that one labels “monstrosity”?

We will look at the exotic, inhuman creatures of mythology. But we will also explore other genres like ethnographic writing and natural history where one entertains the idea that there are real monsters “out there” at the edge of the world. Similarly we will consider tragedy and its “human monsters”, people guilty of crimes such as incest and cannibalism. And lastly we will ponder the “monsters of history”, that is, the concrete historical individuals whose acts were so shocking that they could be described in the register reserved for the outlandishly inhuman. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

CSB197H1 - Human Viruses

Hours: 24L

This course allows students to broaden their knowledge about the most important human viruses and prions. In essence, what viruses are, what they do, what are the diseases caused by viruses and how they are transmitted, etc., and what can be done about them (vaccines, antiviral treatments, etc.). Viruses cause many diseases ranging from a benign rash to severe hemorrhages and death. Each student will select a specific topic in Virology and write an essay and present a seminar for the rest of the class. Major “hot” problems in Virology from pandemics to controversial vaccines will also be discussed. Two tests covering all materials presented by all the students’ seminars will be conducted. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

CSB196H1 - Genes, Genomes and Us

Hours: 24L

With the completion of the human genome sequence, we now have access to more information than ever before about our genetic make-up. This course addresses topics such as what are genes, how are they identified and how does knowledge about genes impact society. Students will learn basic concepts in genetics. Using this conceptual foundation, the significance of genomic research for understanding human biology, and the social consequences that may result from it, will be discussed. Evaluation is based on class discussions, homework, oral presentation and written assignments. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

CSB198H1 - Cell and Molecular Biology in the News

Hours: 24L

The pace of knowledge creation in the fields of cell and molecular biology has greatly increased in the 21st century and with it, the need for greater scientific literacy. In this course, we will teach students to find reliable sources of information in order to understand the basic concepts underlying the research reported in these media releases, with the ultimate aim of critically evaluating these reports. Through exploration of various media articles in cell and molecular biology (with an emphasis on humans), students will be able to apply what they have learned to current events, as well as relevant issues in their lives and society as a whole. Students will be assessed through short-written assignments, class discussions, an oral presentation, and a final project where they will get the opportunity to explore the research behind a media article of their choice. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)
CSB199H1 - Biotechnology and Society

Hours: 24L

From the manipulation of genes of plants for improved food production through to human tissue engineering and stem cell research, biotechnology is increasingly playing a major role in our world. Society, however, is often challenged by the rapid advances in our knowledge in these areas, and how to best apply these technologies in a manner that is socially responsible and economically viable. In this seminar course, students will research and describe various applications of biotechnology using information obtained from reputable sources, and lead discussions on the benefits and concerns that arise from this research. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

CSC196H1 - Great Ideas in Computing

Hours: 36L

We will pursue the general (and very debatable) theme of GREAT IDEAS in COMPUTING (including some surprising algorithms). The ambitious goal is to try to identify some of the great ideas that have significantly influenced the field and have helped to make computing so pervasive. We will concentrate on mathematical, algorithmic and software ideas with the understanding that the importance and usefulness of these ideas depends upon (and often parallels) the remarkable ideas and progress in computing and communications hardware. As we will see, many of the great ideas were against the "prevailing opinion". The list of topics we shall discuss will depend to some degree on the background and interests of the class. Restricted to first-year students. Not eligible for CR/NCR option.

Recommended Preparation: Some knowledge of probability theory
Distribution Requirements: Science
Breadth Requirements: Society and its Institutions (3)

CSC197H1 - What, Who, How: Privacy in the Age of Big Data Collection

Hours: 24S

The rapid advance of technology has brought remarkable changes to how we conduct our daily lives, from how we communicate, consume news and data, and purchase goods. As we increase our online activity, so too do we increase the amount of personal data that we're sharing, often without realizing it. The questions of exactly what data is being collected, who is collecting and accessing this data, and how this data is being used, have significant implications for both individuals and our larger social and political institutions. Organized by a wide variety of case studies drawn from current events, we'll study how personal data can be collected and tracked, how personal and social factors may influence our own decisions about whether and how much to share our data, and what broader political and legal tools are used to either protect or subvert individual privacy. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

CSC198H1 - Computing for Science

Hours: 48L

Computational skills for the modern practice of basic and applied science. Applied computer programming with an emphasis on practical examples related to the simulation of matter, drawing from scientific disciplines including chemistry, biology, materials science, and physics. Studio format with a mixture of lecture, guided programming, and open scientific problem solving. Students will be exposed to Python numerical and data analysis libraries. Restricted to first-year students. Not eligible for CR/NCR option.

Exclusion: Any CSC course, except CSC104H1
Recommended Preparation: We recommend students also be enrolled in CHM151H1, PHY151H1, or another science course
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)
CSC199H1 - Intelligence, Artificial and Human

Hours: 24S

What is human intelligence? How close are we to replicating it? How productive/reductive is the brain-computer analogy? What ethical challenges are posed by AI on workers, society, and the environment? Can we put a hold on “progress”? Is Silicon Valley the seat of a new techno-religion? What can they teach us about today’s research priorities? What insight (or inspiration) can we get from works of science fiction about the future of human-AI interaction? Through reading discussion, written assignment, and workshops, this seminar will present students with the opportunity to integrate their computer science interests with philosophy, history, and literature. There is an equivalent course offered by St. Michael’s College. Students may take one or the other but not both. Restricted to first-year students. Not eligible for CR/NCR option.

Exclusion: SMC199H1 (Intelligence, Artificial and Human)
Distribution Requirements: Science
Breadth Requirements: Society and its Institutions (3)

DTS199H1 - The Bible and Migration

Hours: 24S

From the expulsion of Adam and Eve from Eden to the border-crossings in the book of Ruth and the journey of Joseph and Mary to Bethlehem, the Bible speaks powerfully and in many voices about the experience of displacement and migration. These stories continue to play a complex and important role in modern literature and contemporary debates about migration and migrants. Our course will explore biblical narratives and laws about sojourners, strangers, foreigners, refugees and migrants, follow the paths of these travelers into later religious and political discourse, and attend to the reverberations of these journeys in contemporary art, literature and political discourse. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Humanities; Social Science
Breadth Requirements: Thought, Belief and Behaviour (2)

EAS194H1 - East Asia through Music

Hours: 24L

This course will discuss ‘East Asia’ through music as composed, performed, recorded, processed, remembered, imagined, and represented. Questions to be asked include: what kinds of sound are recognized as music in East Asia? What are the goals and effects of music? When, where, and how is music performed in East Asia? How is music described in East Asian literature and visual art? How does music translate East Asian literature and visual art? How are certain musical elements—tonality, rhythm, genre, instruments—recognized as “East Asian”? How is East Asia imagined musically? How are East Asian composers and performers received globally? Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

EAS195H1 - Shan Shui Landscape: A Cultural Historical Study

Hours: 24L

This course looks into the history of cultural production of Chinese Shan Shui (lit., mountain and water) landscape representations from an environmental humanities perspective. As an artistic motif, Shan Shui travels between past and present and across various mediums as well as literary and artistic genres. What exactly are we invited to see and contemplate on in the Shan Shui? Are Shan Shui works about “nature,” spirit, Qi, or the human world? The course seeks to inquire into these and other questions through examining the concepts, arts, and transformations of selected Shan Shui works in imperial and contemporary China. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

EAS196H1 - Consumption, Taste and Culture in East Asia

Hours: 24S

This course explores the roles that consumption and taste play in personal and public lives in East Asia. Course focus may include the cultural histories of food, fashion, tourism, sports, or forms of audio and visual media. (No prior knowledge of East Asian languages or cultures is necessary.) Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)
EAS197H1 - Media Worlds and East Asia

Hours: 24S

The term "world-making" is often used nowadays to refer to transmedia storytelling, or the creation of story-worlds across serial narratives in a range of entertainment media, such as novels, games, film series/franchises, television shows, comics, and webtoons. This course looks at the ways that media producers and fans, alike, engage with media worlds. More importantly, the course situates these media worlds within a broader conception of "world-making," namely, the geopolitical and economic configuration of modern East Asia. (No prior knowledge of East Asian languages or cultures is necessary.) Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

EAS198H1 - Martial Arts in East Asian Narratives

Hours: 24S

What can we learn about East Asian history and culture through its rich tradition of narratives featuring the martial arts? This course introduces short stories and novels dealing with combat and warfare from nearly two thousand years of East Asian literature, exploring issues such as self and society, gender, power, the body, and identity. All texts will be provided in translation, and no prior knowledge of any East Asian language or culture is necessary. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

EAS199H1 - Thinking through Art in Chinese Culture

Hours: 24S

This seminar explores different visions and methods of art (textual and visual) as a way of thinking about living, knowing, and willing in Chinese culture. Examination of various theoretical texts on arts and literature, as well as works of art themselves, will provide students with knowledge and research skills on arts in Chinese culture, and an expanded sense of Chinese intellectual history. Questions explored in the course will include: How should we understand the concept of Chinese art beyond representation? How did Chinese literati pursue a sense of beauty through their poetry and painting? How is beauty apprehended in natural and constructed landscapes? What are the political and social functions of art education in Chinese culture? How do Chinese artists fit into a global cultural context? (No prior knowledge of East Asian languages or cultures is necessary.) Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

ECO196H1 - An Economist's Guide to the Galaxy

Hours: 24S

Climb aboard as we seek answers to the "Ultimate Question of Life, the Universe, and Everything" (Douglas Adams). Unlike the Hitchhiker's Guide to the Galaxy, the answer will not be 42. Prepare for a wide-ranging journey into the questions economists' seek to answer and the evidence they muster to examine these questions. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)
ECO197H1 - Seminar on Classical Economic Thought

Hours: 24L/12T

This seminar examines the basic ideas of the five most notable economic thinkers before 1870: Aristotle, Adam Smith, Thomas Malthus, David Ricardo, and Karl Marx. We focus on demand as the basis of price in Aristotle; the ambiguity in Smith between a labour theory of value and a demand/supply theory of value; the principle of population in Malthus; Ricardo’s labour theory of value and his theory of rent and economic growth; and Marx’s labour theory of value as the explanation for the development of capital. The understanding in these authors of economics as an historical process of production gives fascinating insights into modern economic development that contrast with the modern economic concentration on the distribution of resources in a world of scarcity. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Social Science
Breadth Requirements: Society and Its Institutions (3)

ECO198H1 - Seminar on Modern Economic Thought

Hours: 24L/12T

This seminar examines the development of modern economic thought from the marginal revolutionaries (Jevons and Menger) who proclaimed that demand in the form of utility was the basis of price to the supply/demand analysis of Alfred Marshall that established modern microeconomics by 1890. We then look at Irving Fisher’s 1907 foundation of the modern concept of the interest rate and the present value of capital before reviewing J.M. Keynes’ 1936 criticism of neo-classical positions on full employment and interest rates in arguing for government manipulation of interest rates to ensure full employment. We finish with Milton Friedman’s championing of the unregulated market economy through his quantity theory of money critique of Keynes. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Social Science
Breadth Requirements: Society and Its Institutions (3)

ECO199H1 - Economics and Sustainable, Green Development

Hours: 24L/12T

Economic growth has been a powerful force through history in improving living standards throughout the world. At the same time, there is a growing recognition that environmental damages frequently accompany this growth, whether it be at the local level (soil degradation and deforestation), or the global level (climate change). Economics studies the allocation of scarce resources, but how can it incorporate "the environment" in a meaningful way that can help guide policy-makers in the 21st century? This course is a fast review of economic approaches and tools, and a review of a wide range of environmental policies, designed to manage the possible adverse impacts of economic expansions. The major emphasis in this course is on the market-based policies that guarantee incentive compatibility of these policies, thus, a higher chance of success. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Social Science
Breadth Requirements: Society and Its Institutions (3)

EEB197H1 - Biodiversity and the City

Hours: 24L

Most of us are urban creatures, but we as people are not the only urban creatures. In this seminar we will explore the diversity of animal and plant species comprising the ecological community that we call “Toronto”. We will learn their names, whether they are endemic (from here originally) or newcomers, general aspects of their biology that suit them to living in an urban environment, how natural selection shapes the traits similarly and differently for species in urban versus wilderness settings, and what happens when the wild and the domesticated members of the community meet one another. For non-science students in all years and disciplines. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)
**EEB198H1 - Genes and Behaviour**

**Hours:** 24L

In this course you will experience the new paradigm in behaviour genetic research. You will learn why the concept of a nature-nurture dichotomy is passé and that it has been replaced by a new understanding gained from animal and human research in the areas of gene by environment interaction and epigenetics. We will discuss how our genome listens to our environment and the effect this has on our health and behaviour. We will learn why our early experiences are critical for the development of our brains and our bodies. Together this new body of knowledge will help us understand how individual differences in behaviour and health arise. For non-science students in all years and disciplines. Restricted to first-year students. Not eligible for CR/NCR option.

**Distribution Requirements:** Science
**Breadth Requirements:** Living Things and Their Environment (4)

---

**EEB199H1 - Humans, Evolution and Ecology**

**Hours:** 24L

Learn about the evolution and ecology of humans and other species. Through discussion, scientific literature research, seminal readings, written reports and presentations you will discover scientific answers to questions such as (topics vary among years): How did life originate? Why are there so many species? Where did humans come from? Will humans become extinct? How can we explain human DNA and human brain size? Need we worry about climate change? What is causing the sixth extinction crisis? Are there ecological limits to human population size? What will life be like in the Anthropocene? Are humans still evolving? For non-science students in all years and disciplines. Restricted to first-year students. Not eligible for CR/NCR option.

**Distribution Requirements:** Science
**Breadth Requirements:** Living Things and Their Environment (4)

---

**ENG197H1 - Representing Disability**

**Hours:** 24S

Understanding disability as a cultural concept—not a medical condition or personal misfortune—that describes how human variation matters in the world, this course asks: how do literary texts represent physical and intellectual disability? Reading drama, fiction, and poetry, we will consider how disability prompts new strategies of writing and thinking. Restricted to first-year students. Not eligible for CR/NCR option.

**Exclusion:** ENG196H1, ENG198H1, ENG199H1
**Distribution Requirements:** Humanities
**Breadth Requirements:** Creative and Cultural Representations (1)

---

**ENG199H1 - Monster Encounters: Monsters and the Monstrous in Literature**

**Hours:** 24S

Monsters and the monstrous have been among the most compelling and frequently recurring elements in literature, from ancient times to the present day. From Homer's Cyclops to Ridley Scott's alien, monstrous figures have terrified and transfixed all those who come upon them. In this course, we will examine the figure of the monster to see what we might gain from our own encounter with the monstrous. Readings will include epic poems, novels, and critical selections from the burgeoning field of inquiry known as "monster studies." Restricted to first-year students. Not eligible for CR/NCR option.

**Exclusion:** ENG196H1, ENG197H1, ENG199H1
**Distribution Requirements:** Humanities
**Breadth Requirements:** Creative and Cultural Representations (1)

---

**ENG199H1 - "Tell It Slant": Mental Illness and Literature**

**Hours:** 24S

This course will explore representations of mental illness in poetry, short fiction and essays from the nineteenth, twentieth and twenty-first centuries. We will consider the relationship of literature to "madness," "hysteria" and "melancholia" and work to historically and politically contextualize some of our contemporary dilemmas regarding psychic distress. Restricted to first-year students. Not eligible for CR/NCR option.

**Exclusion:** ENG196H1, ENG197H1, ENG198H1
**Distribution Requirements:** Humanities
**Breadth Requirements:** Creative and Cultural Representations (1)
ENV198H1 - Idleness and the Environment: What Does Sustainable Work Mean?

**Hours:** 24S

In a fast-paced, high-tech world—and one that must rapidly decarbonize to address the climate crisis—the relationship between labour and environment is rapidly changing. This course explores the intersection of work and the environment, considering how ideas about leisure and idleness might offer new pathways for a more sustainable future. Restricted to first-year students. Not eligible for CR/NCR option.

**Distribution Requirements:** Social Science

**Breadth Requirements:** Society and its Institutions (3)

ENV199H1 - Debating & Understanding Current Environmental Issues

**Previous Course Number:** SII199H1 LEC0201

**Hours:** 2L

The course examines current environmental issues for which there is no easy answer or consensus position. For instance, to help solve climate change should we generate more electricity from nuclear power-plants, which have no greenhouse gas emissions? Or instead, should we phase out nuclear plants because of possible accidents, costs and radioactive wastes? The seminar examines the scientific and political aspects of such issues and debates the pros and cons of each. Restricted to first-year students. Not eligible for CR/NCR option.

**Distribution Requirements:** Social Science

**Breadth Requirements:** Society and its Institutions (3)

ESS196H1 - Life and Death in the Solar System

**Previous Course Number:** PMU199H1

**Hours:** 24L

Earth is the only planet in the solar system known to support life. Through directed readings, seminars, videos and lab visits, participants in this course will work with instructors whose own research tackles important questions concerning the origin of life on earth; the limits to life on this planet; implications for life under extreme conditions elsewhere in the solar system; and the life cycles of the planets themselves. The course will involve reading of scientific literature, student-led discussions, oral presentations and research projects, as well as potential field trips to sites in Southern Ontario. Restricted to first-year students. Not eligible for CR/NCR option.

**Distribution Requirements:** Science

**Breadth Requirements:** The Physical and Mathematical Universes (5)

ESS197H1 - Earth and Life through Time

**Previous Course Number:** PMU199H1

**Hours:** 24L

This seminar will look through the lens of earth history to explore drivers of change in the biosphere and the impacts of these changes. We will focus on episodes of mass extinction, and the spectacular landscape changes and speciation events which often followed. Abrupt or gradual climatic changes, massive volcanism, asteroid impacts, catastrophic carbon releases, and human activity will be evaluated as the causes of major extinction events in Earth history. The course will involve reading of scientific literature, student-led discussions, oral presentations and research projects, as well as potential field trips to sites in Southern Ontario. Restricted to first-year students. Not eligible for CR/NCR option.

**Distribution Requirements:** Science

**Breadth Requirements:** The Physical and Mathematical Universes (5)

ESS198H1 - Resources and Sustainability

**Previous Course Number:** PMU199H1

**Hours:** 24L

The rise of humanity is intricately linked to the exploitation of natural resources. From its earliest attempts to use fire and extract metals from rocks, to coal-fired steam that brought the industrial revolution, hydrocarbons that fuel international travel and trade, nuclear energy to produce electricity, and the reliance on smartphones in our daily lives, the planet’s resources have brought innovation and problems and require us to ask questions regarding sustainability. This course will explore the gamut from resource extraction and trading, to its societal consequences including global politics, environmental pollution, and remediation. The course will involve reading of scientific literature, student-led discussions, oral presentations and research projects, and potentially field trips to sites in Southern Ontario. Restricted to first-year students. Not eligible for CR/NCR option.

**Distribution Requirements:** Science

**Breadth Requirements:** The Physical and Mathematical Universes (5)
ESS199H1 - Earth, Portrait of a Planet

Hours: 24L

Modern Earth Sciences touches on virtually all aspects of modern life, from the atmosphere to large scale natural disasters. This course will explore how earth sciences has shaped our society and our understanding of the earth as a system. Potential course topics include (but are not limited to) the great climate change crisis and what we know about climate change in the past to the literally earth moving ideas of plate tectonics (and the associated natural disasters). The course will involve reading of scientific literature, student-led discussions, oral presentations and research projects. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

FAH194H1 - Public Art: Local and Global

Hours: 24S

We are surrounded by public art, whether in the form of official commemorative monuments or ephemeral (some say illegal) street art. We will examine the history and current practice of this important art form in Toronto and by comparison, globally. The focus will be on discussing the nature, roles, and issues pertaining to contemporary public art that we can see in situ in downtown Toronto. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

FAH195H1 - On Foot: From Pilgrimage to the Mobile City

Hours: 24S

Walking is a basic human activity, yet it also defines and shapes us. In order to understand the permutations of this seemingly simple activity we will look at walking in a variety of contexts through the study of texts, art, movies and the built environment. Restricted to first-year students. Not available for CR/NCR option.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

FAH196H1 - Marco Polo's World

Hours: 24S

This course explores the visual and material worlds of the Italian traveller Marco Polo, which are described in his Travels. Together we will read sections of this text and explore their meaning with respect to the objects and monuments of Marco Polo’s time from the regions to which he travelled. By studying cartography, art, architecture, and urban form in the expansive medieval world of Marco Polo, the course will introduce us to the global world of the Middle Ages. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

FAH197H1 - Classical Art from Greek Gods to Roman Gladiators

Hours: 24S

The ancient Greeks and Romans lived in a world full of images. Ancient visual culture comprises not only the high arts but also the everyday. This course is meant to introduce students to key ideas about how art and images in general impacted the life of ancient Greeks and Romans. Students will learn to examine various categories of visual material ranging from the pictorial and applied arts (painting, sculpture, architecture) to everyday artifacts (for example, domestic wares, jewelry or weapons). Through a series of discussion-centred seminar sessions students will explore the interconnections between art and ideology, art and identity as well as visuality and viewing. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

FAH198H1 - Shocking Artists, Shocking Art

Hours: 24S

Art causes scandals for many reasons, provoking a range of consequences, including censorship, cuts to government funding of the arts or even destruction of the work in question. In this course we will consider a number of kinds of art scandal arising from exhibition in public galleries and urban spaces, including those that have to do with legal issues such as plagiarism and vandalism; aesthetic objections on the part of the public, ranging from perceived obscenity to simple resentment of abstract art; racism; sacrilege; and political subversion, amongst others. We will consider the work of artists including Chris Ofili, Joep van Lieshout, Paul McCarthy, Damien Hirst, Michael Snow, Sally Mann, Banksy, Rachel Whiteread, Richard Prince, Andres Serrano, Robert Mapplethorpe, Carl Andre, Maya Lin, and Jeff Koons, amongst others. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)
FAH199H1 - Curiosity: Art and Science

Hours: 24S

“Curiosity” can refer to the desire to know or learn something, but the word has also been used to define objects of singular interest: “curiosities.” Drawing from the University of Toronto’s rich museum and library collections, this course will present an overview of the diverse and shifting European cultural attitudes toward curiosity—from the early modern period to the present. We will examine themes such as: museum history, rarity and monstrosity, natural history illustration, exploration and travel art, the construction of racial and cultural difference, and visual entertainment. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

FCS197H1 - Pleasure, Pain and Nostalgia in Belle Époque

Hours: 24L

This course will explore ideas and cultural representations of 19th century France through examples from art, philosophy, and literature with an emphasis on the critical discussion of two literary narratives that challenged tradition and authority: Flaubert’s “Madame Bovary” and Maupassant’s “Bel-ami”. The course will be held in English. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

FCS194H1 - Urban Youth Languages of the World

Hours: 24S

Are there such phenomena as urban youth “languages”? How do they evolve and what commonalities or divergences are there? In this course, we will survey a range of urban youth languages that have emerged in African, North American and European contexts—with specific focus on their structural (linguistic) and social typicalities. Discussions and presentations will focus on the sociolinguistic concepts of language contact, bi/multilingualism, lexical innovation/renovation, language mixing, etc. in relation to youth language practices. We will be comparing major varieties of these language practices within and between the continents, and also be assessing their prospects and implications for language change. This course is taught in English. Restricted to first-year students. Not eligible for CR/NCR option.

Prerequisite: None
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

FCS198H1 - Dreaming of Future Worlds: The Making of Modernity in 19th-Century France

Hours: 24L

This interdisciplinary course will analyze the different forms of the imagination of future and the debates between different conceptions of modernity in 19th-century France. From different perspectives, the students will be invited to reflect on the role of utopian imagination, on the emergence of social sciences, and on the force of the philosophies of progress. The course will be held in English. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

FCS199H1 - Marketing in the French Speaking World

Hours: 24S

This course investigates sociocultural and linguistic issues surrounding market expansion and marketing of products and services to French-speaking audiences in Canada and elsewhere. Students consider challenges posed by increased globalization through comparisons of English- and French-speaking communities, while exploring basic marketing theory. Through case studies of successes and failures, students examine how companies develop and adapt branding and messaging for Francophone audiences by integrating differences in humour, values, politics, and financial considerations. Students thus develop an understanding of the Francophone consumer and gain skills for advertising and branding in a Francophone or bilingual environment. This course is taught in English. Restricted to first-year students. Not eligible for CR/NCR option.

Prerequisite: None
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

FCS196H1 - Exploring Linguistic Variation in Spoken French

Hours: 24S

“R texting n tweeting like” ruining the language? Do young people speak differently than older people? Are teenagers causing language change? How do we adapt the way we speak in certain situations? Are some varieties of French better than others? In this practical introduction to variationist sociolinguistics, we will investigate these and similar questions through the analysis of linguistic variation and change in multiple varieties of French. No knowledge of French is necessary. The course will be held in English. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)
GER194H1 - The Age of Reason and the New World (E)

Hours: 24S

In this course we will examine the growing awareness of the strange new world beyond Europe in the so-called Age of Reason. How did writers respond to the challenges of radically different cultures? What did their way of life and their world view mean for a Europe that placed reason above all other human qualities? How did the fact of slavery and exploitation change the way they viewed the "New World"? What did this encounter mean for growing preoccupations with common humanity? We will read a number of classic texts from the European Enlightenment with an eye to these and other questions. All readings and class discussions will be in English. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

GER195H1 - Cities, Real and Imagined (E)

Hours: 24S

Cities have been described as places of desire and places of fear. They pulse with life, bringing together people from different class, gender, and ethnic backgrounds, simultaneously giving rise to a sense of freedom and oppression, a sense of belonging and alienation. This course will explore the city as a physical reality that shapes our lives, but is also a projection of our deepest imaginings. Through readings of philosophical and sociological texts by influential theorists of the city, we will consider various ancient and modern conceptions of urban space and subjectivity. Alongside these theoretical readings, we will also examine literary and filmic representations of the city as a space of desire, memory and power. All readings and class discussions are in English. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

GER196H1 - "Es war einmal auf Deutsch" - Learning German with Fairy Tales

Hours: 24S

Grimms Fairy Tales – we all know and love them. But what do we really know? Which versions are we familiar with? Most likely not the ones by the Brothers Grimm. And certainly not in German! This course is a journey into the mythical German Schwarzwald, a place of wolves and witches, the realm of the fantastic. It is not a traditional language course, as we won’t be cramming grammar and vocabulary, at least not excessively. Rather, we will learn German playfully by reading, analyzing and acting out original folk tales, their Romantic adaptations and modern retellings. In the process we will enrich our understanding of German language and culture. Please note that basic knowledge of German is required to participate in this course (i.e. at least one year of solid high school instruction). Restricted to first-year students. Not eligible for CR/NCR option.

Prerequisite: One year of German instruction, or equivalent
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

GER197H1 - Automaton, Puppet, Thing in German Literature (E)

Hours: 24S

This course will introduce students to the various attempts in German literature over the course of the past 200 years to define the boundary between human and non-human agents. It will examine the idea of a mechanical being, of prostheses (both physical and emotional), of self-motivated matter, of narrating agency in non-human beings, and of imagining the limits of human action. In reading select texts on this topic, we will explore the physical, mental and moral qualities that purportedly separate human from non-human agents. Students will gain insight into the problem of defining human beings in the context industrialization, mechanization, automation and artificial intelligence. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)
GER198H1 - Technology and the Human in German Literature and Thought (E)

Hours: 24S

Technology has changed our lives, and scientific knowledge has enhanced human capacities. At the same time, though, this development is also experienced as a threat. Killing missiles, controlling 'Big Brothers,' and monstrous creatures are often considered the flip-side of technological advancement. This course asks: What is the relationship between technology and the "human"? Can there be progress of technology without a regress of humanity? Or is technology liberating us from the bonds of nature? We will discuss possible answers to these questions by looking at key texts in German literature, philosophy, and cultural history from the eighteenth century to Post-Modernity. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

GER199H1 - The Pleasure of Reading: Reading as Self-Emancipation in the German Literary Tradition (E)

Hours: 24S

In this course we read some of the most enjoyable plots and stories in German Literature and examine how the pleasure of reading sets readers free to re-imagine themselves and the world released from everyday pressures and the repressive weight of the status quo. Readings are all in English translation and include texts by Lessing, Goethe, Schiller, Kleist, Keller, Heine and Kafka. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

GGR196H1 - Tracking Insect Life: The Political Ecology of “Bugs”

Hours: 24S

Have you wondered why we find a ladybug ‘picturesque’ but a cockroach ‘disgusting’? Have you thought of butterflies as feminine and sublime, and bees as an army? Have you ever received advice in your workplace or school to avoid behaving like a ‘mosquito,’ meaning to resist engaging in micro-aggressive conducts? Have you been curious about why the film industry created an enlarged half human/half ant ‘alien’ creature to feed our worst fears? This course engages with these and other contradictory and complex renderings of insects in Western culture and around the world to investigate how we define the limits of social belonging in relation to space and place. The course explores how the anxieties and wonders around insects’ behaviour are related to aspects of the human/nature relationship. By tracking the political ecology of insects, the course provides a first approximation to arguments about the connection between nature and culture and “lived-in” environments; also exploring themes of class, gender, race and settler colonialism. Because this is a first-year seminar, reading and engaging actively with the course material is important for this course.

The course also serves as an introduction to other subjects that are relevant to navigating post-secondary life, such as: critical reading; conducting university-level research; presenting and communicating ideas in the classroom; teamwork; and how to benefit from it; and developing social networks.

Restricted to newly admitted first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)
GGR197H1 - Nature, Conservation and Justice

Hours: 24S

Every day we read about climate change, species extinction, environmental degradation and the need for nature conservation. It is increasingly becoming apparent that the environmental problems that we face today arise from a deeper crisis relating to human ways of viewing and connecting to nature. This course asks how we can rework human ways of relating to nature, while querying the idea of “nature” and questioning the dominant approaches to nature conservation. It asks how can concerns for nature and for other species be balanced with that for human livelihoods and well-being? How can inequalities with regards to the distribution of environmental goods and bads be reduced? How are citizens and communities in the different parts of the world struggling against environmental injustice and to protect their local environments? How do these place-based movement demand justice and what visions do they articulate for a more just and sustainable world? How do indigenous worldview offer conceptual resources for rethinking nature and our ways of relating to nature? The course will explore these questions using lectures, class discussion, videos and student presentations. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

GGR198H1 - Political Spaces

Hours: 24S

Is space political? In what ways? What are the implications of thinking about politics geographically? How do political conflicts both invoke and transform space and place? What kinds of alternative political relationships to space and alternative mappings can we imagine? This course will attempt to answer those questions while exploring a wide range of possible contexts in which political spaces are evident. These may include: conflicts over the intimate spaces of the body, identity, and the home; the racialization and gendering of space; the politics of cities and urbanization; the boundaries of public and private space; struggles over land, property, resources and ‘nature’; the political geographies of labour, citizenship and migration; globalization of economic markets and alternative economic political and social cartographies; borders, geopolitics, and the territorial politics of empire; and the geographic projects of colonialism, post-coloniality, modernity, and modernization. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

GGR199H1 - Race, Conflict, and the Urban Landscape

Hours: 24S

This course will focus on how racial conflict affects the size, shape, composition, and landscape of cities. It will emphasize Canadian and American cities, but other international examples will be discussed for comparison. Ethno-racial conflict has been, and continues to be, an important force on cities throughout the world. Course topics will include housing and employment discrimination, ethno-racial uprisings, and inequality. The course will be a discussion-oriented blend of academic readings, popular journalism, and film. It will serve as an introduction to concepts that are dealt with in greater depth in second, third, and fourth year geography courses. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

HIS192H1 - A History of Queer Asia

Hours: 24L

A first-year seminar on the history of queerness, in all its complexity and diversity, in the no less complex and diverse settings of East, South, and Southeast Asia. Our journey will encompass empires and Indigenous peoples, rulers and rebels, and range from early recorded history down to the twentieth century. Focus will be placed on primary sources and introducing students to the evolving definitions of “queerness” itself. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

HIS194H1 - Power, Resistance, and the Graphic Novel

Hours: 24S

This course will look broadly at the question of power and resistance in the Americas (Canada, the United States, and Latin America) through the prism of graphic novels. Each week we will read a graphic novel related to important historical moments or events, drawing on scholarly articles to help us contextualize the novel. We will discuss the medium of graphic novels, their history and place in the broader culture, as well as how they might help or hinder our ability to study and disseminate information about the past. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)
HIS195H1 - Drunk History

Hours: 24S

Histories of wine or beer or vodka often focus either on the production of these alcoholic beverages and their role in national economies, or the ways that drinking is part of celebrations. But drunkenness enters the historical record in other ways, too—not just as a social lubricant but as a social ill, one associated with intimate violence or violence to the self and with mass protest. From worries about the Gin Craze to the rise of temperance movements and eventually the passing of Prohibition, from tax policies to policing, this class will consider the many ways that drunkenness has been accepted, denounced, and legislated about in societies around the world. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

HIS196H1 - Religion and Violence

Hours: 24S

In this seminar we will explore the complex roles of religion in cases of extreme violence. Working chronologically backward from the 1990s (Rwanda, former Yugoslavia), we will consider cases from a number of locations and decades in the 20th Century (Cambodia in the 1970s, the Holocaust in the 1940s, Armenians in the 1910s, Southwest Africa in the 1900s). Rather than limiting ourselves to the recent past, we will also explore cases from the 19th century (imperialism) and earlier as well as ongoing situations that connect past and present (aboriginal people in the Americas). Students will be expected to do the assigned reading (from personal accounts, primary sources, and scholarly articles), participate actively in discussions, prepare a series of short responses, make and oral presentation individually or with a group, and produce a final paper based on original research. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

HIS197H1 - Microhistory, Global History, and Historical Narrative

Hours: 24S

How do historians make arguments and tell stories? How does the scale of their gaze affect their narrative strategies? In this course, we will consider a number of topics and themes related to these questions: the difference between microhistory and biography (or microhistory and regional history); the relationship of microhistory to global history; the role of the historian in these kinds of history; and the ways that microhistory and global history both pose particular problems of narrative. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

HIS198H1 - Decolonizing Women's History

Hours: 24S

This course introduces students to the historiographical and theoretical debates in women’s and gender history from a global perspective, with emphasis on the local histories of women in the non-western world. Students will study the themes in women’s history as articulated by first and second wave feminists. The second part of the class deconstructs the basic assumptions of Western feminism through the perspective of post-colonial feminist writings and empirical studies. The readings are structured so that you consider how examples from Asia disrupt narratives of universality in Western feminist epistemologies. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

HIS199H1 - Soccer: The History of the World’s Game

Hours: 24S

This seminar proposes to consider the history of the world’s most popular sport, soccer, in broader political, social, economic, and cultural context. We will consider the emergence of the modern game in industrializing Britain in the 19th century; its globalization; its mobilization as a vehicle for political expression, as well as social cultural, and gendered identities; supporter culture; and soccer as an industry. Students will read scholarly works from a range of disciplinary perspectives, including history, cultural anthropology, sociology, literature, and economics. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)
IMM199H1 - Immunology in the News Today

Hours: 24S

Why do we get sick? How do vaccines work? Does our diet influence our immunity? This course is intended to inspire curiosity about questions generated by immunology concepts that are prevalent in the news today. Different topics will be explored each week including immunity worldwide, human vaccinations and the mucosal immune system. Topics will be placed in context through real-life case studies, immunology virtual laboratory simulation, interactions with faculty members and extensive coverage of the basic science underlying each topic. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

INI102H1 - Telling the Stories of the City: Writing Creative Non-Fiction

Hours: 36S

An introduction to creative writing techniques and the personal essay form through which students will explore and develop their conscious connection to the natural-urban landscape. The course will include activities such as field trips, readings, interviews, and journaling to generate the material for personal essays on engagement with nature in the city. Restricted to first-year students. Not eligible for CR/NCR option.

Exclusion: Munk One, New One, St. Mike's One, Trinity One, Vic One, UC One, Woodsworth One
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

INI100H1 - The City Where Movies Are Made

Hours: 36S

In this course, first-year students will be introduced to film culture in Toronto from a variety of angles, including: a history of the city onscreen (both as itself and as a popular shooting location for American productions); an account of major Toronto filmmaking sites and institutions; introductions to local directors and producers; and overviews of contemporary local film festival culture (TIFF and beyond) as well as the city’s film-critical community. Through a combination of lectures, screenings, field trips and special guest speakers, the students will be moved to consider both the vitality of Toronto’s film scene as well as its connections to other aspects of the city. Restricted to first-year students. Not eligible for CR/NCR option.

Exclusion: Munk One, New One, St. Mike's One, Trinity One, Vic One, UC One, Woodsworth One
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

INI106H1 - Writing Literary Journalism: Telling the Stories of the City

Hours: 36S

An introduction to literary journalism, in which students study the craft of storytelling along with interviewing, reporting, and the journalist's ethical stance. Guest speakers, field trips, writing activities and course readings will help students engage deeply with their environment and develop the skills and sensitivity required for literary reporting. Restricted to first-year students. Not eligible for CR/NCR option.

Exclusion: Munk One, New One, St. Mike's One, Trinity One, Vic One, UC One, Woodsworth One
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

INI196H1 - Hoboes, Geniuses and Immigrants: Otherness in Contemporary Culture

Hours: 24L

Hoboes, geniuses, and immigrants all share a sense of Otherness in terms of their identity because they are different from the norm. This course analyzes the factors that create the sense of Otherness in an individual. Can Otherness be chosen as an identity or is it imposed by society? What conditions make Otherness a positive or negative experience? What is the distinction between difference and Otherness? Instances of Otherness both negative and positive are analyzed in contemporary novels and films. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)
IRE199H1 - Why We Work: Understanding Work Through the Prism of Art & Culture

Hours: 24S

Why do we work? What does work mean to the average person? These questions are not as straightforward as they appear. We work for the bulk of our lives and most of our days are spent with coworkers who are neither family nor our closest friends, but we often fail to realize how self-defining work really is. This speaks to work’s centrality but also to its invisibility in reflective discourse. However, through “popular” representations of work (e.g., such as in story-telling, cave drawings, hieroglyphs, music, writing, painting, television, film, video games, etc.,) we can begin to better understand the meaning of work and how this has changed over time. Readings in anthropology, history, economics, sociology and employment relations plus film and art criticism will help us explore these questions from an interdisciplinary perspective; assignments will encourage students to reflect on their own experience of work. Developing strong analytical and communication skills is an important goal of the course. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

ITA196H1 - Image and Text in Medieval and Renaissance Italian Culture

Hours: 24L

The course will explore various aspect of the interaction between literature and the visual arts in Italy from the Middle Ages to the end of the Renaissance. The focus will be on the intersection between the literary and visual modes of perception in the works of representative Italian authors from the Fourteenth to the Sixteenth Centuries. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

ITA197H1 - The Fine Art of Murder: Reading Detective Fiction

Hours: 24L

Since its inception in the Nineteenth century, detective fiction has been one of the most popular literary genres, proving adept at both entertaining and shining a critical light on social and political problems. This course will explore the many faces of detective fiction addressing questions such as: Why does crime hold such a fascination for modern audiences? What kind of pleasure do we derive from reading stories that often follow established conventions and rules? What do these novels about crime and punishment tell us about broader social and political issues? Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

ITA198H1 - Machiavelli and Machiavellianism

Hours: 24L

An examination of Machiavelli’s political doctrine in The Prince and the development of his ideas in politics, ethics and the arts. Special attention will be paid to the enduring relevance of his legacy in the modern world. Restricted to first-year students. Not eligible for CR/NCR option.

Exclusion: Vincotte 142H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

ITA199H1 - Italian Fascism and Global Responses: The Dark Side of Italianità

Hours: 24L

After WWI, Italian society faced a political, economic, and moral crisis that resulted in the rise of fascism. Using diverse sources (media, literary texts, movies, architecture and design), this course explores various reactions in Italy and abroad to the rise of Mussolini and the totalitarian State. Why did common people, intellectuals, politicians, and business and community leaders around the globe succumb to the seduction of fascism? How did other people denounce fascist violence? After an introduction to Italian fascism, the course will consider global reactions to Italian fascism and diverse responses in Italian communities abroad (e.g. Canada, USA, Argentina). Restricted to first-year students. Not eligible for CR/NCR option.

Prerequisite: None
Corequisite: None
Exclusion: None
Recommended Preparation: None
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)
When we speak, the sound is transmitted through the air as a complex sound wave. How are various speech sounds – vowels and consonants – manifested acoustically? What does it mean, in physical terms, to have an accent? These and other related questions will be explored through computer-based acoustic analysis and perceptual experimentation. Upon completion of this course, students will (i) have overview knowledge of basic acoustic properties characterizing phonetic variation pertaining to speech, and accents in particular, (ii) be able to conduct simple speech production and perception experiments, and write up results in the form of scientific research reports, (iii) begin to read and understand scientific literature pertaining to acoustic phonetic variation and its relevance for communication. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

What is the relation between language and thought? In this course we examine how language is represented in our minds, and how language and cognitive processes interact. While the link between words and meanings is arbitrary and reflects culture, language is considered to be a universal property of our species. We will examine the place of language in the architecture of the mind; the debates about the universality of language structure vs. linguistic relativism; and how language and thought interact in children’s development. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Social Science
Breadth Requirements: Thought, Belief and Behaviour (2)

This course explores how language is used to construct and reinforce unjust social structures. Topics may include: the underlying sexism, classism, racism, and ableism of prestige dialects and prescriptive language education; the history and consequences of national language movements; language endangerment, documentation, and revival; sign languages and language rights for the deaf and hard-of-hearing; popular media representations of linguistic variation, especially vocal fry, uptalk, and regional accents; and the relationships between language and sex, gender identity, and sexuality.

Students will develop research, analytic, and writing skills through critique and discussion of assigned texts, independent research projects, and regular written and oral presentation of their work. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Social Science
Breadth Requirements: Thought, Belief and Behaviour (2)
LIN198H1 - Language Diversity

Hours: 24L

There are estimated to be about 7000 languages currently spoken in the world. What do they have in common? In what ways are they different? This course will explore these questions, covering such topics as meaning, sound systems, the structure of words, the order of words in sentences, question formation, concepts such as subject and object, tense systems, pronoun systems. We will also discuss language loss and revival. Students will develop analytic skills as they consult published grammars and other resources to address these issues. Students will share their findings through oral and written presentation. Examples will be drawn from a wide range of languages. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Social Science
Breadth Requirements: Thought, Belief and Behaviour (2)

LIN199H1 - Exploring Heritage Languages

Hours: 24L

We will explore how speakers use Heritage Languages in Toronto, using data recently collected in the GTA, so students should be familiar with one of these languages. We will collect, organize and interpret information about heritage languages in Toronto. We will look for speech patterns that differentiate first, second and third generation speakers in Toronto from corresponding speakers in their countries of origin, and look at the effects of cultural and language attitudes and usage.

Students will develop analytic skills as they explore a range of research methods and resources to address these issues. Students will share their findings through oral and written presentation, including online formats. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Social Science
Breadth Requirements: Thought, Belief and Behaviour (2)

MAT193H1 - Mathematics through Literature & Poetry

Hours: 36S

Mathematics intersects with literature and poetry in a multitude of ways. In this seminar, students will study literary works that include mathematicians, are about mathematicians, and contain mathematical forms. These works will be a springboard for mathematical investigations that build a deeper understanding of and appreciation for mathematics. This course is appropriate for students with all mathematical backgrounds who are not taking another math course. Restricted to first-year students. Not eligible for CR/NCR option.

Prerequisite: High school level algebra.
Exclusion: Not intended for students in a Mathematics Specialist or Major program.
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

MAT198H1 - Cryptology: The Mathematics of Secrecy and Security

Hours: 24S

How do we send our own confidential information through secure channels, and how can we break codes to uncover the secret information of our adversaries? The mathematical field of cryptology is dedicated to answering such questions. In this course we will study breakthroughs in cryptology, from secret messages in the ancient world and the Enigma cipher in World War II, to modern cryptosystems that facilitate online commerce. Along the way, you will develop a sophisticated understanding of how numbers interact and develop the ability to communicate messages secretly and mathematics clearly. Restricted to first-year students. Not eligible for CR/NCR option.

Prerequisite: High school level algebra.
Exclusion: Not intended for students in a Mathematics Specialist or Major program.
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)
MAT199H1 - Women's Mathematics

Hours: 36S

Mathematics has been shaped in significant ways by the work of outstanding female mathematicians such as Hypatia, Emmy Noether, Sofia Kovalevskaya, and Maryam Mirzakhani. Despite these successes, women still experience barriers to entering the field and participating at the highest levels. This course will blend an exploration of mathematics created by women with a study of the issue of women in mathematics. Students will have the opportunity to examine the complex factors that impact women’s participation in STEM, learn about the lives of female mathematicians, create their own mathematics, and sharpen their spatial cognition and logical thinking skills. Restricted to first-year students. Not eligible for CR/NCR option.

Prerequisite: High school level algebra
Exclusion: Not intended for students in a Mathematical Specialist or Major program.
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

MUN102H1 - Global Innovation II: Challenges and Solutions

Hours: 24L

Governing public goods has been an age-old concern for social scientists and policymakers alike. This is not surprising since the provision of global public goods is riddled with problems of collective action. In this course, we focus on how to implement solutions through states, markets and communities.

The first objective is to familiarize students with the concept of global public goods, the different mechanisms that can provide these goods and the challenges that emerge from lacking incentives to secure their provision. To this end, the course will introduce theories from sociology, political science, philosophy, and history to help us understand different types of governance mechanisms and how they may be used to scale global solutions. Theories can help us explain the tensions between cooperating for the public good at the expense of sacrificing individual goals, or why certain areas of our lives, like the Internet, seem to produce public goods without any formal mechanism of cooperation.

The second objective is to use the class and subject of study as an arena to model and practice the kind of learning that is expected of university students. The main skills that the course will help students target and develop are: research (finding, evaluating and assimilating reliable information); writing (developing ideas into logically written arguments); and critical analysis of arguments presented in the readings and debated in class (this includes identifying the key assumptions that are implicit in different theories as well as inherent in our own positions on various questions related to governance). Restricted to first-year students. Not eligible for CR/NCR option.

Prerequisite: Admission to Munk One
Exclusion: Innis One, New One, St. Mike’s One, Trinity One, UC One, Vic One, Woodsworth One
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

MUN101H1 - Global Innovation I: Issues and Perspectives

Hours: 24L

Innovation has always been a key driver of economic growth, population health, and societal success. Transformative change has historically been linked to major innovations such as urban sanitation, pasteurization, the printing press and the industrial revolution. Currently, the opportunity to enhance life chances worldwide relies on innovating for the poor, social innovation, and the ability to harness scientific and technological knowledge. What precisely is innovation? When does innovation happen? Who benefits from innovation? How can innovation be fostered, and how do innovations spread? Relying on major global transformations and country-specific case studies (for example, South Korea, Taiwan, Israel and India), this course examines the drivers of innovation, the political, social, economic, and scientific and technological factors that are critical to promoting innovation and addressing current global challenges, and the consequences of innovation. Restricted to first-year students. Not eligible for CR/NCR option.

Prerequisite: Admission to Munk One
Exclusion: Innis One, New One, St. Mike’s One, Trinity One, UC One, Vic One, Woodsworth One
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)
MUN105Y1 - Global Problem-Solving: Laboratory Opportunities

Hours: 48L

This course teaches students how to conduct analytically rigorous social science research to improve their insights into complex global problems and devise innovative solutions to address them. A unique feature of this class is that students have the opportunity to learn by doing. Students work hands-on in one of several labs dealing with some of the most intractable global problems of our time in the areas of the environment, health, digital governance, security and the gap between rich and poor. By the end of this course students will be able to:

1. Experience and practice the process of social science research
2. Narrow the scope of a complex global challenge into a manageable research problem that can be tackled over the course of the semester
3. Improve their knowledge and insights on a particular global problem
4. Develop a viable, compelling and implementable solution that can help address an aspect of a global problem
5. Pitch a solution in a compelling way to a jury of experts in global affairs

Students will work with their peers in small seminar classes and lab group settings, mentored by graduate teaching assistants specializing in global affairs, expert faculty and senior policy advisors dedicated to addressing global issues in the fields of the environment, health, security, digital governance and political economy. Restricted to first-year students. Not eligible for CR/NCR option.

Prerequisite: Admission to Munk One
Exclusion: Admission to Innis One, New One, St. Mike’s One, Trinity One, UC One, Vic One, Woodsworth One
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

NEW101H1 - Exploring Multilingual Toronto

Hours: 12L/24S

How does language connect and divide people, places and communities? This course considers how interactions between people in Toronto are shaped by language as well as history, economy, architecture and urban landscapes. Students engage with the city both in and out of class to think about a range of questions linked to gender and sexuality, indigeneity, migration, race, ethnicity, and public/private space. Restricted to first-year students. Not eligible for CR/NCR option.

Exclusion: Innis One, Munk One, SM One, TRN One, Uni One, Vic One, WDW One; NEW101H1/NEW103H1/NEW104H1/NEW105H1/NEW106H1
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

NEW103H1 - Digital Technology and Society

Hours: 12L/24S

While the internet and other forms of digital technology have created new forms of social relationships and widened access to information, they have also raised concerns. This course explores issues such as surveillance, addiction and bullying as well as the potential of digital technologies (e.g. smart cities, Big Data, and the internet of things). The course engages students’ own experience of digital technology. Restricted to first-year students. Not eligible for CR/NCR option.

Exclusion: Innis One, Munk One, SM One, TRN One, Uni One, Vic One, WDW One; NEW101H1/NEW102H1/NEW104H1/NEW105H1/NEW106H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

NEW104H1 - Creating Community: Art, Identity and Belonging

Hours: 12L/24S

How is art implicated in the process of community building? How does art foster a sense of community identity and belonging? This course explores how communities, in Toronto and beyond, engage a variety of art forms including graffiti, spoken-word, hip-hop, digital art, traditional dance and music to connect people and express community identity. Students will have the opportunity to visit community arts projects. Restricted to first-year students. Not eligible for CR/NCR option.

Exclusion: Innis One, Munk One, SM One, TRN One, Uni One, Vic One, WDW One; NEW101H1/NEW102H1/NEW103H1/NEW105H1/NEW106H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)
NEW105H1 - Current Issues Without Borders

**Hours:** 12L/24S

This interdisciplinary course addresses a current issue that exemplifies the themes of "Learning Without Borders" in New One. It investigates how this issue is implicated in connecting us with others around the globe; it engages different kinds of knowledge and community perspectives; and integrates students' own experience as related to the issue. Restricted to first-year students. Not eligible for CR/NCR option.

**Exclusion:** INI/Munk/SMC/TRN/UNI/VIC/WDW One; NEW101H1/NEW102H1/NEW103H1/NEW104H1/NEW106H1

**Distribution Requirements:** Social Science

**Breadth Requirements:** Society and its Institutions (3)

NEW106H1 - Science, Health and Social Justice

**Hours:** 12L/24S

How can scientific knowledge and research be mobilized to impact individual and global health? How is health impacted by social, racial and economic inequalities? This course explores scientific research and practice with special attention to the translation of scientific knowledge in the public sphere, and its ability to inform policies, practices and laws. Students have the opportunity to meet with clinician-scientists, policy-makers, and other professionals connected to the health care system. Restricted to first-year students. Not eligible for CR/NCR option.

**Exclusion:** INI, SMC, TRI, UC, VIC, WDW One; Munk One; NEW101H1/NEW102H1/NEW103H1/NEW104H1/NEW105H1

**Recommended Preparation:** None

**Distribution Requirements:** Social Science

**Breadth Requirements:** Society and its Institutions (3)

NEW111H1 - Food, Ethics and Sustainability

**Hours:** 12L/24S

How do we produce and ensure access to nutritious and environmentally sustainable food for all? This course explores what is involved in achieving ethical food production and food security, examining topics such as: the paradox of food waste amidst scarcity, the relationship between food production and climate change, community-led alternatives to dominant food systems, and the role of biotechnology. Research projects allow students to focus on an issue of particular interest. Restricted to first-year students. Not eligible for CR/NCR option.

**Prerequisite:** NEW101H1/NEW102H1/NEW103H1/NEW104H1/NEW105H1/NEW106H1/Permission of the New One Coordinator

**Exclusion:** INI/Munk/SMC/TRN/UNI/VIC/WDW One; NEW112H1/NEW113H1/NEW114H1/NEW115H1/NEW116H1

**Distribution Requirements:** Social Science

**Breadth Requirements:** Society and its Institutions (3)

NEW112H1 - Language Freedom and Power

**Hours:** 12L/24S

How do we imagine a balance between the need for communication, freedom of expression, and protection for marginalized groups? This course considers how language shapes and is shaped by the relations of power not only in such sites as colonies, nations and institutions, but also in popular culture and how we communicate online. It explores the key role of language in activism and youth cultures and allows students to focus on an issue of particular interest. Restricted to first-year students. Not eligible for CR/NCR option.

**Prerequisite:** NEW101H1/NEW102H1/NEW103H1/NEW104H1/NEW105H1/NEW106H1/Permission of the New One Coordinator

**Exclusion:** INI/Munk/SMC/TRN/UNI/VIC/WDW One; NEW111H1/NEW113H1/NEW114H1/NEW115H1/NEW116H1

**Distribution Requirements:** Humanities

**Breadth Requirements:** Society and its Institutions (3)

NEW113H1 - Unpacking Digital Technology

**Hours:** 12L/24S

What are the social and material implications of the digital technologies we use every day - for the present and for the future? This course explores how digital technologies have been remaking the world and affecting our lives by tracing their historical development, their social effects, and the impact of their physical presence. It also peers into scenarios of the future in this digital world. Students engage in research on a topic of their own interest. Restricted to first-year students. Not eligible for CR/NCR option.

**Prerequisite:** NEW101H1/NEW102H1/NEW103H1/NEW104H1/NEW105H1/NEW106H1/Permission of the New One Coordinator

**Exclusion:** INI/Munk/SMC/TRN/UNI/VIC/WDW One; NEW111H1/NEW112H1/NEW114H1/NEW115H1/NEW116H1

**Distribution Requirements:** Social Science

**Breadth Requirements:** Society and its Institutions (3)
NEW114H1 - Art for Social Change

Hours: 12L/24S

How does art contribute to social change? Artistic productions can draw attention to social problems, mobilize support for and symbolize social movements, and inspire new visions for imagined futures. This course will explore case studies of the role of various art forms in relation to past and current social change initiatives. Students will have the opportunity to engage in research on an art project of their choice. Restricted to first-year students. Not eligible for CR/NCR option.

Prerequisite: NEW101H1/NEW102H1/NEW103H1/NEW104H1/NEW105H1/NEW106H1/Permission of the New One Coordinator
Exclusion: INI/Munk/SMC/TRN/UNI/VIC/WDW One; NEW111H1/NEW112H1/NEW113H1/NEW115H1/NEW116H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

NEW116H1 - Science and Global Threats

Hours: 12L/24S

What is the role of science in addressing current global threats? What are the possibilities and the limitations of scientific research and knowledge in tackling complex problems such as climate change, pandemics and pollution? In this course, students explore these questions by examining case studies, meeting with specialists in various scientific fields, and engaging in research on a topic of their own choice. Restricted to first-year students. Not eligible for CR/NCR option.

Prerequisite: NEW101H1/NEW102H1/NEW103H1/NEW104H1/NEW105H1/NEW106H1, or permission of the New One Coordinator
Exclusion: INI, SMC, TRI, UC, VIC, WDW One, Munk One; NEW111H1/NEW112H1/NEW113H1/NEW114H1/NEW115H1
Recommended Preparation: None
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

NEW115H1 - Current Issues Without Borders II

Hours: 12L/24S

Building on the integrated learning from any New One course, this course explores, in more depth, the social and ethical implications of a current issue exemplifying the themes of "Learning without Borders." Normally, this course would address the same current issues as offered in NEW105H1 in the preceding term. The course also considers examples of policy and community organizing responses. Restricted to first-year students. Not eligible for CR/NCR option.

Prerequisite: NEW101H1/NEW102H1/NEW103H1/NEW104H1/NEW105H1/NEW106H1/Permission of the New One Coordinator
Exclusion: INI/Munk/SMC/TRN/UNI/VIC/WDW One; NEW111H1/NEW112H1/NEW113H1/NEW114H1/NEW116H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

NEW119H1 - We Are What We Eat: The Example of French Cuisine

Hours: 24S

The historical study of French cuisine reveals a culture rich in controversy and conflicting narratives. These include contested origins, court intrigues, sensual delight, revolutions, colonialism and slavery, controversial farm practices, haute cuisine, cuisine bourgeoise, regionalism, European regulation. Through various research, writing and presentation techniques, including mini-essays, wikis and pecha kucha, students will explore what is left of this reputation in an era of globalization. No knowledge of French is necessary. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)
NMC195H1 - Rebels, Misfits, and Outcasts in Modern Arabic Literature

**Previous Course Number:** NMC242H1  
**Hours:** 36S

Examines modern Arabic literary works that portray marginalized social figures and groups, including the criminal, the urban poor, the peasantry, the delinquent, the prostitute, and the political outcast. Explores issues such as political violence, marginality, precarity, social reform and social exclusion. Restricted to first-year students. Not eligible for CR/NCR option.

**Exclusion:** NMC242H1  
**Distribution Requirements:** Humanities  
**Breadth Requirements:** Creative and Cultural Representations (1)

NMC196H1 - Law and Order in the Ancient Near East

**Hours:** 24S

Are human beings basically evil or good? What creates order in society? Coercion? Religion? Can societies operate without law? This course explores different systems of authority and control through ancient texts, focusing on the very first ideas of law in human history. We examine actual law codes, court cases on real estate disputes and conspiracy to commit murder and rape, as well as alternative means of regulating communities such as ideology, ritual and magic. While most courses on ancient law approach the topic from the perspective of modern concerns, this course situates the first law in its own historical, social and political context. Restricted to first-year students. Not eligible for CR/NCR option.

**Distribution Requirements:** Humanities  
**Breadth Requirements:** Creative and Cultural Representations (1)

NMC197H1 - Myth and History in the Bible

**Hours:** 24S

Reading the Bible is easy, but reading it well isn’t. Should we read its stories as history? All of it? Or perhaps only part of it? If so, which parts? And if some parts aren’t meant to be read as history, then what are they? Was Jonah really swallowed by a large fish? Did the sun and moon stand still for Joshua? Did Moses really part the Red Sea? Did Jesus really raise Lazarus from the dead? Are miracles necessarily fiction? In this seminar, we will read together many of the most colourful stories of the Bible, sometimes alongside similar stories from the cultural context of ancient Israel, and discuss what genre (history, myth, legend, folktale) they belong to and how this affects our reading of these texts. Restricted to first-year students. Not eligible for CR/NCR option.

**Distribution Requirements:** Humanities  
**Breadth Requirements:** Creative and Cultural Representations (1)

NMC198H1 - Iranian Women Reveal their Lives: the First Generation

**Hours:** 24S

The narrative of women speaking out begins in Iran in the first decades of the 20th century. In this course, we will look at an early generation of educated Iranian females who although from varied backgrounds have a common desire to make their lives public. We will refer to a mix of sources including memoirs, interviews and poems to explore how feminist aspirations are repressed or expressed in a society dominated by patriarchal values. We will analyse how a woman’s childhood experience affects her personal expectations for the future and whether the cultural environment restricted this generation or encouraged women to make a social contribution. Restricted to first-year students. Not eligible for CR/NCR option.

**Distribution Requirements:** Humanities  
**Breadth Requirements:** Creative and Cultural Representations (1)

NMC199H1 - Babylon: Fact vs. Fiction

**Hours:** 24S

The ancient city of Babylon, now a vast archaeological site in Iraq about 100km south of Baghdad, has captured people’s imagination up to this day. Who has not heard of the Hanging Gardens of Babylon, the Biblical Tower of Babel, or the sci-fi TV series Babylon 5? Yet, how much of that reflects the reality of ancient Babylon? This course will explore the city of Babylon through its texts and archaeology and contrast this data with the way the city has been remembered over the past two thousand years. However, the goal of the course is not only to investigate how myths about Babylon have been constructed throughout the centuries. It will also look at the shortcomings of contemporary academic research on Babylon, and how difficult it is to reconstruct humankind’s distant past. Restricted to first-year students. Not eligible for CR/NCR option.

**Distribution Requirements:** Humanities  
**Breadth Requirements:** Creative and Cultural Representations (1)
PHL196H1 - Multiculturalism, Philosophy and Film

Hours: 48S

This course will critically examine the role of cinema in the construction and exploration of the figure of the racial, ethnic, cultural and social "other". Our topics will include (1) racial, ethnic and cultural identity and its reciprocal relationship with cinema, (2) the notion of realism in relation to the representation of race and ethnicity in film, (3) the cinematic representation of inter-ethnic and intra-ethnic conflict, (4) the position of cinema in the debate between assimilation and multiculturalism, and (5) the ways in which cinema can help illuminate a cluster of relevant notions in political philosophy including citizenship, communitarianism, cosmopolitanism, and the relation between individual rights and group rights. Films will be screened in class and discussed against the background of focused critical readings. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

PHL197H1 - Introduction to Philosophical Anthropology

Hours: 24S

Philosophical anthropology is the subject that poses the most fundamental questions about human nature and the human condition. Taking as its point of departure the most up-to-date scientific understanding of human nature, from anthropology broadly conceived, it goes on to inquire, in a disciplined fashion, about the implications of these views for perennial philosophical questions about human rationality, morality, the possibility of progress, the existence of god and the meaning of life. This course will examine one or more topics in this domain, as a more general introduction to the discipline. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

PHL198H1 - Philosophy of Time

Hours: 24S

The passage of time is a fundamental aspect of human experience: we are born, we grow older, and eventually we pass away. During our lives our experience of the past, present, and future are distinct. We can influence the world in the present and the future, but it does not seem that we can influence the past. We have hopes about the future, memories of the past, and experiences of the present. In this seminar we will explore insights from contemporary philosophy and physics concerning the nature of the passage of time. Questions to be considered may include the following: What does it mean to say that time passes? Does time really pass at all? How do we experience time? Why can we influence the future but not the past? Is it possible to travel backward in time? Is time even real? What is time? Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

PHL199H1 - Ethics and Fiction

Hours: 24S

The goal of this seminar is to investigate ethical questions via works of fiction, primarily novels. The idea is not to see fiction as a pedantic vehicle for ethical argument, but rather to consider how, and with what effect, fiction functions as an ethical medium. We will not judge characters as ‘likeable’ or ‘relatable’; rather, we will reflect on what fiction can teach us about the pressing challenges of choice and responsibility, and how it can (perhaps) enhance empathy.

The focus is on issues of individual identity and integrity: creating and maintaining oneself as a moral whole within environments hostile or indifferent to that end. All the works considered are novels or plays from the period between about 1900 and 2020—for convenience, the ‘modern’ and ‘postmodern’ ages, though we will query those notions. A running theme in the chosen readings is what is usually called ‘existential’ philosophy, but we will query the validity of that label as well. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)
PHY196H1 - Emergence in Nature

Hours: 24S

The universe is not a rigid clockwork, but neither is it formless and random. Instead, it is filled with highly organized, evolved structures that have somehow emerged from simple rules of physics. Examples range from the structure of galaxies to the pattern of ripples on windblown sand, to biological and even social processes. These phenomena exist in spite of the universal tendency towards disorder. How is this possible? Self-organization challenges the usual reductionistic scientific method, and begs the question of whether we can ever really understand or predict truly complex systems. Restricted to first-year students. Not eligible for CR/NCR.

Breadth Requirements: The Physical and Mathematical Universes (5)

PHY197H1 - Modern Physics for the Curious

Hours: 24S

Have you wondered about the origin and workings of the natural world around us? Have you found physical science interesting but inaccessible because it was too full of math and jargon? Have you felt a pull to become more science-literate? If so, this seminar course is for you -- or for anyone interested in understanding more about the universe, including our planet, seen through the lens of modern physics. Ideas on the menu will include: particle physics, space and time, relativity, black holes, quantum physics, unification forces, string theory, and big bang cosmology. The intriguing story of these integrated phenomena unfolds over a wide distance and a long time. Students from diverse academic backgrounds are warmly welcome. Restricted to first-year students. Not eligible for CR/NCR option.

Prerequisite: No prior experience with physical science will be required, but familiarity with Grade 10 mathematics will be assumed.

Distribution Requirements: Science

Breadth Requirements: The Physical and Mathematical Universes (5)

PHY198H1 - Physics at the Cutting Edge

Previous Course Number: PHY289H1

Hours: 24L/12S

A limited enrollment seminar course for First Year Science students interested in current research in Physics. Students will meet active researchers studying the universe from the centre of the earth to the edge of the cosmos. Topics may range from string theory to experimental biological physics, from climate change to quantum computing, from superconductivity to earthquakes. The course may involve both individual and group work, essays and oral presentations. Restricted to first-year students. Not eligible for CR/NCR option.

Prerequisite: PHY151H1

Corequisite: PHY152H1, MAT137Y1/MAT157Y1

Distribution Requirements: Science

Breadth Requirements: The Physical and Mathematical Universes (5)

PHY199H1 - Dark Matter and Dark Energy are the New Black

Hours: 24S

It is now 90 years since astronomers found the first evidence for a form of matter that wasn't part of the stars in our galaxies, but rather is "dark" and has a gravitational attraction to ordinary matter. Other lines of evidence lead us to believe that there is six times more dark matter than the ordinary matter we are familiar with. Despite this, we have no credible, direct evidence for what this dark matter might be. It is one of the biggest puzzles in particle physics and cosmology. In the last decade, we have also discovered that something else is going on – the universe appears to be filled with "dark energy" that causes the expansion of our universe to speed up instead of slowdown. We will discuss what we know about the hypotheses of dark matter and dark energy, and the debates about what might really be going on. Are we seeing science in crisis, with a revolution just around the corner, or is this just the "normal science" talked about by Kuhn and other philosophers of science? Participants will be expected to participate in seminar-style discussions, as well as take the lead on at least one topic of discussion. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Science

Breadth Requirements: The Physical and Mathematical Universes (5)
POL193H1 - The Politics of Representation

Hours: 24S

This course examines the politics of representation in Canada from a political science perspective. What is representation? Why are some groups under-represented? How can we increase the representation of marginalized groups? Students will learn to evaluate qualitative, quantitative and normative scholarship; develop their own arguments; and communicate their arguments effectively. Restricted to first-year students. Not available for CR/NCR option.

Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

POL194H1 - Race

Hours: 24S

This course is an introduction to the history, politics, economics, and psychology of race and racism, as well as intersections between race and class, gender, and indigeneity. The course focuses attention on the ways that states structure race, and the ways race is differently conceptualized around the world. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Social Science
Breadth Requirements: Thought, Belief and Behaviour (2)

POL195H1 - Settler Colonialism and Enduring Indigeneity

Hours: 24S

What is settler colonialism and how does Indigeneity endure it? This course explores the many, diverse ways that Indigenous peoples resist settler colonization and persist beyond it. We will examine Indigenous activisms, legal orders, political philosophies, and cultural productions that demonstrate settler colonialism is indeed a failing project. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Social Science
Breadth Requirements: Thought, Belief and Behaviour (2)

POL196H1 - The China Challenge

Hours: 24S

China’s meteoric rise to great power status has triggered an intense international debate over its global implications. While many analysts see Beijing’s rise as posing a threat to global political and economic stability, Chinese leaders have argued forcefully that China’s efforts to regain its historic preeminence will result in a “win-win” outcome for all states. This course will assess the merits of these contending positions through an historical examination of China’s 20th century renaissance. The course will begin by tracing the long period of imperial decline in the 19th century, culminating in China’s revolutionary rebirth as a Marxist state in 1949. A major focus will be on the Mao-era legacy of revolutionary diplomacy and the foreign policy consequences of its later transformation into a market-authoritarian powerhouse. Restricted to first-year students. Not available for CR/NCR option.

Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

POL197H1 - Solidarity in Diverse Societies

Hours: 24S

Liberal democracies in the “populist” age are increasingly defined by polarization, and many observers fear that liberal democracies are having trouble accommodating diversity and protecting the rule of law and the integrity of their elections. This course will explore how these societies can better accommodate diversity and preserve liberal democracy. It will consider patriotism and nationalism, as well as arguments that seek to empower citizens with the techniques of “political friendship” required to manage difference and disagreement. The course will also consider critical arguments, that solidarity can only be attained by juxtaposing the political community against an “enemy.” Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Social Science
Breadth Requirements: Thought, Belief and Behaviour (2)

POL198Y1 - Social Justice and the City

Hours: 48S

Who benefits and who loses from urban transformation? This course is an introduction to the concept of social justice from an urban perspective. It will highlight how unequal relations of race, class, gender, sexuality, and ability operate through the urban environment, and how these conditions can be contested through political mobilization. A variety of cases from cities around the world are used to explore issues related to segregation, gentrification, policing, migration, and access to public spaces and services. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)
POL199H1 - Utopias and Dystopias

Previous Course Number: POL199Y1
Hours: 12T/24S

This course explores alternative visions of good and bad social, economic and political orders. Students are expected to think about how work, income, and power should be allocated, what social norms regarding gender and sexuality should prevail, how children should be raised and educated, and so on. Restricted to first-year students. Not eligible for CR/NCR option.

Exclusion: POL199Y1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

PSL190H1 - Biomedical Research at the Cutting Edge

Hours: 24L/6S

Explore the thought processes, logic, motivation, techniques, analysis and impact of recent high-profile publications to gain insight into the enterprise of science. Outstanding scientists present recent high-impact papers, and students will examine the research in depth, focusing on the underlying questions, experimental approach, results and significance. Restricted to first-year students. Not available for CR/NCR option.

Prerequisite: SB4U and SCH4U (Grade 12 University Preparation Biology and Chemistry); permission of Department
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

PSY195H1 - The Science of Babies

Hours: 24S

Up until roughly four decades ago, infants were seen as cute, clueless creatures. Yet, research from a range of fields has led to a radical consideration of this claim; infants may be cute but they are not clueless! In this class, we will consider and discuss the science of babies. In particular, we will take a second look at long-held beliefs about the nature of infants and their knowledge. We will learn that studying infants' perception, cognition and behaviour can offer us critical insights into long-standing philosophical questions. This course provides an interdisciplinary introduction to infancy, that includes content from psychology, philosophy, neuroscience, as well as biology and anthropology. Upon completion of this class, students will (1) have overview knowledge of aspects of infancy as it relates to perception, cognition and behavior; (2) be able to use exploratory writing to develop arguments and develop their understanding of subject matter; and (3) begin to be able to read and summarize a scientific research paper in Developmental Psychology. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Science
Breadth Requirements: Thought, Belief and Behaviour (2)

PSY196H1 - Critical Periods, Brain Plasticity and Development

Hours: 24S

This course will ask how changes in the developing brain can influence our understanding of how humans learn. To answer this question, we will learn about how the brain changes and about how learning changes. We will dig into brain plasticity and ask how this influences “critical” or “sensitive” periods for learning: a phenomenon whereby learning can only take place during a particular time in an organism’s life. We will explore learning in a number of different ways including learning in sensory and motor systems and the development of multiple aspects of learning and memory. In all cases, we will ask how changes in the developing brain impact learning outcomes. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

PSY197H1 - The Individual and Society

Hours: 24S

How does one develop a sense of individuality? Can individual will and freedom be reconciled with the interests of society? Are we determined by society or culture or do we, in some important sense, determine our own behaviour and futures? In this course, we will use classic and contemporary readings from psychology, sociology, anthropology, philosophy, and law to explore general characterizations of the individual and society. Basic questions will be examined in light of these characterizations such as: Is there a universal human nature? Who is a “person”? and What is the ideal society? We will examine these questions in light of various social issues, such as debates about multiculturalism and democracy, whether children have rights to freedom of speech, and women’s equality in society. Throughout the course, the emphasis will be on the different views of the person underlying and informing contrasting perspectives on important social questions. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Science
Breadth Requirements: Thought, Belief and Behaviour (2)
PSY198H1 - The Psychology of Magic

Hours: 24S

Magicians entertain us with their tricks. What appears as "Magic" is based on fundamental aspects of human psychology: visual and auditory perception, decision making, logic, memory, and verbal abilities. In this class, we will consider and discuss the psychological basis of magic tricks and use magic to explore aspects of psychology. The class will require reading of scientific articles and book chapters as well as watching and analyzing magical tricks. The only prerequisite is a curious and critical mind. The course puts great emphasis on writing and on starting to read primary scientific literature. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Science
Breadth Requirements: Thought, Belief and Behaviour (2)

PSY199H1 - Psychology and History of Drug Use

Hours: 24S

This seminar will examine the historical and contemporary use of drugs. Students will be introduced to the general psychological and neuroscientific mechanisms by which drugs affect human behavior, and explore highlights of current research on drug effects in animals and humans. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Science
Breadth Requirements: Thought, Belief and Behaviour (2)

RLG196H1 - Innocence and Ecstasy

Hours: 24S

Religion can be understood as a set of aspirations that manages and moralizes the most intimate matters of social life, including sexual intercourse, bodily fluids, and mind-altering substances. This course engages fundamental theories of religion to consider an eclectic set of case studies that troubles a clean divide between purity and danger. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

RLG197H1 - Enchantment, Disenchantment, Re-Enchantment

Hours: 24L

Modernity is associated with disenchantment, secularisation and progress, and has traditionally been understood as the successor to the enchanted, spiritual, and transcendent worldviews of antiquity and the middle ages. Re-enchantment, a term increasingly encountered in popular and academic contexts alike, demonstrates nostalgia for an enchanted past, a discomfort with the modern narrative, and a desire to recover wonder. This course will examine the history of enchantment through a series of readings taken from literature, philosophy, theology, ranging from Plato to contemporary magical realism. Restricted to first-year students. Not available for CR/NCR option.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

RLG198H1 - Dystopia: Religion & Gender in Science Fiction

Hours: 24L

This course will examine the "what ifs" and imagined worlds of ideal utopias and oppressive dystopias through the lens of religion and gender in Margaret Atwood’s The Handmaid’s Tale and Charlotte Perkins Gilman’s Herland. Because science fiction and utopian/dystopian literature expresses what an author sees as possible or hopes is possible, but also fears is possible, we will consider science fiction as a political and social critique. Themes to be covered include fundamentalism, totalitarianism, the relationship between technology and religion, religion and reproductive rights, and the potential relationship between religion, gender and oppression. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

RLG199H1 - Religion for Grown-Ups?

Hours: 24L

Kant, the great modern philosopher, famously describes enlightenment as our release from self-incurred immaturity or minority. That is, according to Kant, we don’t want to grow up. Our immaturity is facilitated especially by religion, whose demands for deference to the authority of texts, traditions, and gods often prevent us from taking full responsibility for our thoughts and actions. But need religion play this role? Is there a religion for grown-ups? This course explores those questions by reading autobiographical accounts of philosophers who describe how their study of philosophy either strengthened or strangled their youthful religious convictions. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)
**SDS199H1 - Sexuality at the Intersections**

**Hours:** 24L

This First-Year Foundations seminar will explore sexuality at the intersections of race, gender, class, disability, citizenship status, and geography, among other social relations and processes as a foundational practice in Sexual Diversity Studies. In an intimate seminar setting, students will develop reading, writing, and presentation skills necessary for engaging in Sexual Diversity Studies across a wide array of disciplinary traditions. Restricted to first-year students. Not eligible for CR/NCR option.

**Distribution Requirements:** Humanities; Social Science

**Breadth Requirements:** Society and its Institutions (3)

---

**SLA193H1 - Objects of War**

**Hours:** 24L

An object or a thing always has a collective history. It speaks of the political and the social conditions under which it was made. In this course, objects of war – the material culture of conflict – from the 20th and 21st centuries will be critically and historically examined. How do these objects speak of violence, politics, and culture, but also rewrite and influence the arenas within which they circulate? Some objects include: canned food, drones, the journalists' hotel, helmets, tents. Restricted to first-year students. Not eligible for CR/NCR option.

**Distribution Requirements:** Humanities

**Breadth Requirements:** Creative and Cultural Representations (1)

---

**SLA194H1 - Utopia Interrupted: Late and Post-Soviet Russian Literature**

**Hours:** 24S

Almost 30 years after the collapse of the Soviet Union, what can we understand about its culture and people, and its impact on the popular imagination in the West? To answer these questions, the course introduces students to canonical literary and cinematic works from the post-Stalin era to the present, with particular attention to the literary and cultural peripheries. Some of the topics will include: Gulag, or Return of the Repressed, Counter-Culture, Space Race, Immigration, Gender, Perestroika, and Putin's Russia. All readings in English. Restricted to first-year students. Not eligible for CR/NCR option.

**Distribution Requirements:** Humanities

**Breadth Requirements:** Creative and Cultural Representations (1)

---

**SLA195H1 - Literature and Painting in Russia and the West**

**Hours:** 24S

What makes literature 'visible'? How do the verbal and the visual coexist? This seminar explores the relationship between words and images, texts and pictures through history, in Russia and the West. Special attention will be paid to the figure of the artist. Is it a writer's alter ego, the incarnation of creativity, or just a character among others? Literary texts (mainly short stories) from Balzac and Gogol to Chekhov and O. Henry, Maugham and Bunin, Nabokov and Camus will be studied along with the paintings of some major 19th-20th century artists. The comparative dimension of the course will help students contextualize Russian literature and think about its relationship with the Western canon. We will also watch some 21st century films about artists (such as Julie Taymor's Frida [2002], Milos Forman Goya's Ghosts [2006], and Mike Leigh Mr. Turner [2014]), All texts will be in English. Restricted to first-year students. Not eligible for CR/NCR option.

**Distribution Requirements:** Humanities

**Breadth Requirements:** Creative and Cultural Representations (1)

---

**SLA196H1 - Russia at War**

**Hours:** 24S

In its long history Russia has fought numerous wars, both defensive and offensive, and these wars have inspired a rich, complex, contradictory poetic response. We examine Russian war narratives starting with the medieval period and ending with the Second World War and including epic poetry, songs, stories, novels, paintings, and films. We will study the depiction of war and the image of the soldier (or warrior) in different genres and time periods, as well as the historical circumstances in which the different works were produced and the respective audiences for which they were intended. All texts will be in English. Restricted to first-year students. Not eligible for CR/NCR option.

**Distribution Requirements:** Humanities

**Breadth Requirements:** Creative and Cultural Representations (1)

---

**SLA197H1 - The Imaginary Jew**

**Hours:** 24S

The course examines the genesis and evolution of the image of the Jew, central to all European cultures, from the theology and psychology of Christian anti-Judaism to their reflection in folklore, visual, plastic, and verbal arts, and to the survival of the imaginary Jew in secular forms. Special attention is given to the Jews of Slavic and East European imagination. All readings are in English. Restricted to first-year students. Not eligible for CR/NCR option.

**Distribution Requirements:** Humanities

**Breadth Requirements:** Creative and Cultural Representations (1)
SLA198H1 - The Slavic Grecian Formula: From Ancient Rhapsode to Modern Slav Song

Hours: 24S

Slav singers of heroic tales about war, lust, honour and revenge have made a special contribution to our appreciation of classical literature and mythology. We will compare Slavic epics and African-American rap songs to reveal the connection between Homer's Iliad and Nas's iconic Illmatic, between the mythical image of the pagan goddess Aphrodite and the mystique of Nicki Minaj, Lauryn Hill, and other iconic singers today. As we read The Iliad closely, we will study songs from the Russian, Bosnian Muslim, Croatian and Serbian traditions. Employing new performance formulaic theory, we will learn that they share much, in melody and message, with the work of today's hip-hop artists, whose roots of rap "flowing" reach back to the beginnings of Western literature and the epic singers of ancient Greece. Students will have the opportunity to interact with a unique online multimedia edition of an epic song by a traditional Slavic singer.

No knowledge of languages other than English is required. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

SLA199H1 - Invisible Kingdom, Imaginary Space

Hours: 24S

The Central European Region of Galicia gave rise to a remarkable array of literary representations -- Austrian, Jewish, Polish, and Ukrainian -- animating fantastic creatures, powerful myths, deviant pleasures, and sublime stories. Bruno Schulz created shimmering peacocks, Leopold von Sacher-Masoch seized ecstasy through pain, and Ivan Franko investigated the effects of avarice and social decay.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

SMC155H1 - SMC One: The McLuhan Seminar in Creativity and Technology

Hours: 12L/12S

This seminar is an interdisciplinary exploration of the relationship between creativity and technology. Inspired by the innovative thinking of Marshall McLuhan, it explores how the humanities relate to other fields of thought and research in addressing the individual, social and cultural experiences and effects of technological innovation. This course includes a mandatory travel component opportunity to Silicon Valley, California. Restricted to first-year students. Not eligible for CR/NCR option. (An ancillary fee of $1,000 is required to help cover some of the travel costs.)

Prerequisite: Admission to SMC One
Exclusion: Innis One, Munk One, New One, Trinity One, Vic One, UC One, Woodsworth One, SMC155H1, SMC188H1, SMC189H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

SMC165H1 - SMC One: The Boyle Seminar in Scripts and Stories

Hours: 24L/12S

This seminar introduces students to university-level studies through an interdisciplinary exploration of Celtic influences in the mediaeval world, with a particular focus on early books and historical artifacts as physical objects and bearers of meaning. Students will learn how to read and analyse these books and artifacts to decode their meanings, and, in support of that, take introductory language instruction in Latin or Irish. Subjects discussed will include intercultural encounter and dialogue, research methods with historical sources, and the relationship between the written word and lived experience, then and now. There is a co-curricular travel opportunity to Dublin, Ireland associated with this course which takes place following the Winter term exam period. Restricted to first-year students. Not eligible for CR/NCR option. (If you choose to go on the trip to Ireland, an ancillary fee of $1,000 is required to help cover some of the travel costs.)

Prerequisite: Admission to SMC One
Exclusion: Innis One, Munk One, New One, Trinity One, Vic One, UC One, Woodsworth One, SMC155H1, SMC188H1, SMC189H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)
SMC185H1 - SMC One: Seminar in Christianity, Truth and Reconciliation

Hours: 24L/12T

This seminar critically explores the complex relations of Christianity and Indigenous peoples of Turtle Island, with a special focus on education. Sample topics include: settler colonialism and treaty relationships; prominent Indigenous Christians, critics and reformers; the residential school system; the Truth and Reconciliation Commission of Canada; recent initiatives in ecclesial repentance, dialogue and enculturation. The course includes guest speakers and mandatory co-curricular activities, including travel to residential school site(s) and archives in Ontario during reading week. The costs of these activities are supported by the University of St. Michael's College. Restricted to first-year students. Not eligible for CR/NCR option.

Prerequisite: Admission to SMC One
Exclusion: Innis One, Munk One, New One, Trinity One, Vic One, UC One, Woodsworth One, SMC155H1, SMC165H1, SMC188H1, SMC189H1
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

SMC188H1 - SMC One: The Gilson Seminar in Faith and Ideas

Previous Course Number: SMC188Y1
Hours: 12L/12S

This seminar is an interdisciplinary exploration of leading scholarly, intellectual and public questions related to ecology, science, literature, and public life. From a variety of perspectives, the seminar considers how religion, and how different kinds of religious experience, figure in the broader context of human affairs. Restricted to first-year students. Not eligible for CR/NCR option.

Prerequisite: Admission to SMC One
Exclusion: Innis One, Munk One, New One, Trinity One, Vic One, UC One, Woodsworth One, SMC155H1, SMC165H1, SMC188Y1
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

SMC189H1 - SMC One: The Gilson Seminar in Faith and Rome

Previous Course Number: SMC188Y1
Hours: 24L

This course provides an intensive international learning experience in Rome, Italy. It offers contemporary and historical models of integrating faith with reason, and religious practice with intellectual, creative, and public engagement, specifically the roles that the Catholic Church and Vatican play in Rome, in ecology, science, literature, and public life. This course includes a mandatory travel component to Rome, Italy, which takes place following the Winter term exam period. Restricted to first-year students. Not eligible for CR/NCR option. (An ancillary fee of $2,000 is required to help cover some of the travel costs.)

Prerequisite: SMC188H1
Exclusion: Innis One, Munk One, New One, Trinity One, Vic One, UC One, Woodsworth One, SMC155H1, SMC165H1, SMC188Y1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

SMC195H1 - God and Money in the Middle Ages

Hours: 24S

This seminar considers the ethical, political, and spiritual questions arising from the existence of wealth and poverty in medieval European culture. With readings from Dante, Chaucer, Thomas Aquinas and others, the course will examine how the interaction of spiritual ideals and material realities shaped cultural developments from late antiquity to the Protestant Reformation. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

SMC196H1 - Beauty, Human and Divine

Hours: 24S

What is beauty? A quality of fragile things? Or a manifestation of something transcendent? Is beauty human, divine—or both? This seminar will take up these questions by exploring the great works—and intense debates—inspired by the encounter between Christianity and beauty. We will consider the tensions and paradoxes that arise when artists work with religious subject matter, how Christianity’s central claims expand conventional aesthetics categories, and how secular artists respond to these expressions and developments. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)
SMC197H1 - The Sistine Chapel: History, Imagery, Usage

Hours: 24S

The Sistine Chapel in Rome is a historical artifact, an artistic monument, and a house of worship—at once recognizable and mystifying. This seminar explores fifteenth-century origins, decoration by some of the most accomplished artists of the Italian renaissance, and continuing use (especially the election of popes). Topics will include: art and patronage, rhetoric and ritual, controversial restoration, and the Sistine Chapel in popular culture—with an emphasis on the close analysis of the major frescoes. The seminar will develop the academic skills needed for the analysis and discussion of texts, paintings, and ritual events. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

SMC198H1 - How to Study Video Games

Hours: 36S

Games and play are a fundamental part of human society, and today digital games occupy a central place in popular culture, media industries, and the imaginations of players around the world. This seminar introduces students to the growing academic field of game studies, with an emphasis on close analysis of specific games as cultural objects. Through lectures, discussions, and in-class play sessions, students will build a critical vocabulary and toolbox of techniques for understanding the unique formal, aesthetic, narrative, and thematic properties of games in a variety of platforms and genres, and develop basic academic reading, writing, and research skills. No previous experience or expertise with video games is required to take this course. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

SMC199H1 - Intelligence, Artificial and Human

Hours: 24S

What is human intelligence? How close are we to replicating it? How productive/reductive is the brain-computer analogy? What ethical challenges are posed by AI on workers, society, and the environment? Can we put a hold on “progress”? Is Silicon Valley the seat of a new techno-religion? What can they teach us about today’s research priorities? What insight (or inspiration) can we get from works of science fiction about the future of human-AI interaction? Through reading discussion, written assignment, and workshops, this seminar will present students with the opportunity to integrate their computer science interests with philosophy, history, and literature. There is an equivalent course offered by the Department of Computer Science. Students may take one or the other but not both. Restricted to first-year students. Not eligible for CR/NCR option.

Exclusion: CSC199H1
Distribution Requirements: Science
Breadth Requirements: Society and its Institutions (3)

SOC196H1 - Global Cities and Urban Refugees: Connecting South and North

Hours: 24L

The majority of refugees and asylum seekers today live in cities, above all, in the Global South. This course will introduce and critically assess key theories and concepts on forced migration in relation to cities from a global perspective. By drawing on a wide range of literature and case studies from around the world, the course will explore and compare cities across the Global South and North around questions of law, governance, and politics related to urban refugees and asylum seekers. Restricted to first-year students. Not eligible for CR/NCR option.

Prerequisite: None
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)
SOC197H1 - Future “Agents” & Social Relations: Considering Sociology in a World of Robots, Cyborgs, Bioengineered Agents & Tools

Previous Course Number: SII199H1S-L0391
Hours: 24L

Some people are worried that we risk becoming less human if we allow ourselves or others to engage in widespread self-transformation through the insertion of some kinds of devices into human bodies (e.g., computers, becoming cyborgs) or as a result of interventions such as genetic engineering, etc. Others are concerned that the use of some technologies, or barriers to their use, will increase global inequalities. In this course we will read, talk, and write about these and related issues. We will take a sociological approach, which means that we will attend to contextual forces that shape practices, and material flows, and the meaning of objects. Students will present their final paper in class. Restricted to first-year students. Not available for CR/NCR option.

Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

SOC198H1 - The Social Networks of Students

Hours: 24L

This course is a First-Year Foundation Seminar and provides an opportunity for exploration of different topics and themes. Social networks are the webs of connections between people, the mesh that weaves people into communities and societies. In this course, you will learn about social networks by examining the ones around you: what do student's social networks look like? How do they change from high school, to university, and beyond? You will learn, first hand, how researchers study social networks, and how we work to understand their association with important outcomes like academic achievement, graduation, job-finding, and more. Restricted to first-year students. Not available for CR/NCR option.

Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

SOC199Y1 - How We Use Time in Everyday Life

Hours: 48S

This seminar examines how people use time in their everyday lives: the content, the interpersonal and structural circumstances, and the implications. The seminar will include an examination of seminal writings about people's use of time and hands-on practice in the strategies and techniques of analyzing available data, including the formulation of questions and approaches to answering them. Students will acquire an appreciation not only of the concept of time and how it helps explain important issues in the social sciences but also of how they use time in their daily lives and how time-use analysis can help them better understand many situations. Several skills will be developed in this seminar, including reading, writing, expressing points of view, and asking and answering research questions by using numerical data and computers to organize, analyze, and show results clearly. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

SPA195H1 - Barcelona

Hours: 24L

A deep dive into the modern experience of one of the world’s most compelling cities, this course considers Barcelona from a multidisciplinary perspective that includes study of its architecture, foodways, politics and response to mass tourism. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

SPA196H1 - Class and Work in the Americas

Hours: 24L

This course examines economic and social inequalities in the contemporary Americas. We look at the ways in which class divisions are represented in academic studies, literature, film, and television. From Mexican maquiladoras to indigenous reservations, we consider the global poor and how recent changes in the character of work (automation, outsourcing, free trade zones) have had an impact on class divisions, especially for younger members of society. Can a renewed understanding of class and work help us to negotiate power, privilege, and inequality in this century? Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)
SPA197H1 - Cervantes and Imperial Spain

Hours: 24L

During the lifetime of Miguel de Cervantes, the Spanish monarchy governed an empire that extended across the globe, from its traditional lands in Europe to colonies in the Philippines and the Americas. We will examine the advantages and cost of imperial rule through reading Cervantes’s Exemplary Stories (1613), and diverse collection of short fictional texts. Discussions will centre on such questions as the social impact of imperial wealth, the relationship between external wars and the ideal of peaceful rule, and contact with non-European cultures. Students will be introduced to the University of Toronto’s outstanding resources for studying the literatures and cultures of early modern Europe. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

SPA198H1 - A Brief History of Love in the Western World

Hours: 24L

This course introduces students to the ways in which the foremost thinkers in the history of the Western world (Plato, Ovid, St. Augustine, Ficino, Ebreo) conceived the idea of love; how did the notions of sexuality and gender play into that idea, and how did these notions carry on — or not — into our present understanding of love, sexuality and gender. While the background readings pertain to the general Western cultural heritage, the literary texts through which we will observe particular applications of the theories of love were produced by some of the outstanding 16th and 17th century Spanish authors (for ex. Rodríguez de Montalvo; Jorge de Montemayor; Miguel de Cervantes; Tirso de Molina, María de Zayas, Sor Juana Inés de la Cruz). All the readings will be in English. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

SPA199H1 - More than Nachos and Tequila: Mexican History and Culture

Hours: 24L

This course aims at studying the rich history of Mexico from an interdisciplinary perspective. We will cover a wide range of issues, such as identity, modernity race, immigration, gender, sexuality, globalization, and iconic figures. The issue of identity as construed from the inside, but also from the outside and particularly from the English-speaking world (i.e. current US presidential views on the wall), will be widely examined. Course materials will range from chronicles of conquest to modern reflections and representations by historians, philosophers, filmmakers, musicians, writers and artist, among others. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

STA197H1 - Thinking Better with Statistics

Hours: 24S

This course explores how our statistical intuitions and ways of thinking can let us down. There’s no need to be a math whiz to be a better statistical thinker. Everyone can become a more critical consumer of claims presented in media, advertisements and by politicians—especially those relevant to our own health and wealth. This course uses real-world examples and tours common and avoidable statistical traps and tricks. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

STA198H1 - Probabilities Everywhere

Hours: 24S

This course examines the meaning and mathematics of probabilities, and how they arise in our everyday lives. Specific topics may include: the nature of coincidences, the concept of luck, games involving dice and cards, long run averages in casinos, margins of error in polls, the interpretation of medical studies, crime statistics, decision making, pseudorandomness, and Monte Carlo algorithms. Restricted to first-year students. Not eligible for CR/NCR option.

Prerequisite: Grade 12 Mathematics
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)
STA199H1 - Statistical Evidence: Truth or Myth?

Hours: 24S

This course explores the impact Statistics has made and continues to make on everyday life through science, law, and the modern methods for information processing. Statistical principles will be illustrated using examples from real life including business, romance and health. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

TRN125Y1 - Contemporary Issues in Health Science

Hours: 48S

Can the immune system be strengthened? Are some diseases incurable? What is the best way to stop the spread of a virus? This course examines the scientific principles underlying contemporary issues in the science of human health with the goal of exposing students to the current state of biomedical research. We will develop three distinct types of understanding that are essential to literacy about the science of human health: the basic concepts in science; the nature of scientific research; and the rules that govern how scientists do their work. This course will explore topics such as stem cells, gene editing, regenerative medicine, vaccination, drug development, and personalized medicine. Restricted to first-year students. Not eligible for CR/NCR option.

Exclusion: Innis One, Munk One, New One, SMC One, UC One, Vic One, Woodsworth One
Distribution Requirements: Science; Social Science
Breadth Requirements: Living Things and Their Environment (4); Society and its Institutions (3)

TRN135Y1 - Science and Social Choice

Hours: 48S

Many of the decisions we make as a society rely on advances in scientific knowledge. In this course, we will discuss a number of contemporary medical topics that involve complex scientific discoveries about health, the human body, disease, and infection. We will consider genes and study the medical implications of our growing understanding of the human genome. We will study a number of recent cases in order to explore how scientific findings influence decision-making in hospitals and the selection of social policies. We will also discuss the background forces that shape medical research and how this affects the kinds of health problems that are prioritized. The objective of this course is to develop a solid understanding of biological concepts related to human health and consider them in their wider social and ethical contexts. Restricted to first-year students. Not eligible for CR/NCR option.

Exclusion: Innis One, Munk One, New One, SMC One, UC One, Vic One, Woodsworth One
Distribution Requirements: Science; Social Science
Breadth Requirements: Living Things and Their Environment (4); Society and its Institutions (3)

TRN136Y1 - Canadian Health Policy in the Global Context

Hours: 48S

In this course we consider when our health policies support the highest standards of medical care, consistent with the latest discoveries in medical research. We examine the ways in which debates around ethics, effectiveness and efficiency shape global and national health policy. We begin by exploring the most important advancements in global health policy over the past two decades. We then assess Canada’s experience in providing health care, identifying lessons for national policy reform and for Canada’s role as a leader in global health research and policy. We explore a range of health challenges including universal health care, anti-microbial drug resistance, HIV AIDS, tuberculosis, reproductive, maternal, newborn and child health, cardiovascular care, oncology, environmental health, indigenous health, violence against women and mental health. Restricted to first-year students. Not eligible for CR/NCR option.

Prerequisite: Admission to Trinity One
Corequisite: TRN135Y1
Exclusion: TRN235H1, TRN236H1, Innis One, Munk One, New One, SMC One, UC One, Vic One, Woodsworth One
Distribution Requirements: Science; Social Science
Breadth Requirements: Thought, Belief and Behaviour (2); Society and its Institutions (3)
TRN140Y1 - Ethics, Humans, and Nature

Hours: 48S

This course introduces students to ethical issues arising from the way humans interact with nature. Students will study some theoretical approaches for evaluating how human society affects the planet, ecosystems, and the other animals. Theories will be drawn from philosophy, theology, and ecology, and will include Western and non-Western approaches to living in harmony with one’s environment. Key themes may include speciesism – the idea that human needs are the most important – as well as overpopulation, extinction, vegetarianism, and responsible resource management. The course will also look at how social policy shapes human choices and whether sustainability initiatives should be pursued through the public or private sector. The course will also discuss the spiritual connection between humans and the environment and how society can be organized to promote access to nature in urban communities. Restricted to first-year students. Not eligible for CR/NCR option.

Corequisite: TRN141Y1
Exclusion: Innis One, Munk One, New One, SMC One, UC One, Vic One, Woodsworth One
Breadth Requirements: Thought, Belief and Behaviour (2); Society and its Institutions (3)

TRN141Y1 - Environmental Science and Pathways to Sustainability

Hours: 48S

This course introduces students to fundamental issues in environmental science with a multi-disciplinary focus on human impacts on physical and biological systems, and on identifying pathways to sustainability. Key themes will include energy and resources, climate change, land use, contaminants and protecting biodiversity in the context of the Anthropocene. The course challenges students to apply the scientific method to environmental monitoring, research and problem solving through project design, data collection and analysis. The course also emphasises information literacy, skills to distinguish science from pseudo-science, and considerations around representation of environmental science in the media. Restricted to first-year students. Not eligible for CR/NCR option.

Corequisite: TRN140Y1
Exclusion: Innis One, Munk One, New One, SMC One, UC One, Vic One, Woodsworth One
Breadth Requirements: Living Things and Their Environment (4); The Physical and Mathematical Universes (5)

TRN150Y1 - National versus International

Hours: 48S

The international system today faces extraordinary challenges. Understanding these challenges requires understanding the past. This seminar course briefly reviews the origins and development of the international system from the 17th century through the age of empires and the great wars of the 20th century. It then concentrates on the clash of nationalism with internationalism in the world since 1945, looking at such issues as what drives nationalism and what alternatives there are to it. We will study ideas and ideologies as well as the institutions that make up the current geopolitical world. Restricted to first-year students. Not eligible for CR/NCR option.

Prerequisite: Admission to Trinity One
Exclusion: Innis One, Munk One, New One, St. Mike’s One, Vic One, UC One, Woodsworth One
Distribution Requirements: Social Science
Breadth Requirements: Thought, Belief and Behaviour (2); Society and its Institutions (3)

TRN151Y1 - Global Governance

Hours: 48S

Terrorism, the proliferation of arms (including weapons of mass destruction), environmental degradation, globalization, technological change, and the rise of non-state actors all pose challenges to statecraft and the management of global order. This seminar course explores the changing dynamics of global politics and the responses to them by states (and others). Topics will include an examination of new forms of international collaboration that have developed in the wake of crises in the years following the Second World War. Restricted to first-year students. Not eligible for CR/NCR option.

Prerequisite: Admission to Trinity One
Exclusion: Innis One, Munk One, New One, St. Mike’s One, Vic One, UC One, Woodsworth One
Distribution Requirements: Social Science
Breadth Requirements: Thought, Belief and Behaviour (2); Society and its Institutions (3)
TRN152Y1 - Justice & Global Conflict

Hours: 48S

Modern states face both new and familiar challenges to protecting national security. National insecurity threatens a country’s capacity to protect the well-being of its citizens while at the same time participating in international organizations and treaties. This course explores the origins and management of international conflict from the 17th to the 21st century, focusing on the precursors to war and the markers of peace. We will also consider the ways in which our current global world order promotes and preserves justice between and within nations. Students will consider different theoretical approaches to justice between nations, and apply them to recent security issues. By studying the history of conflict and the difference between justice and injustice students will gain a deeper understanding of how current geopolitical actors can structure and affect the prospects for security policy reform moving forward.

Restricted to first-year students. Not eligible for CR/NCR option.

Corequisite: TRN151Y1
Exclusion: Innis One, Munk One, New One, SMC One, UC One, Vic One, Woodsworth One
Breadth Requirements: Thought, Belief and Behaviour (2); Society and its Institutions (3)

TRN160Y1 - Public Policy and the Public Good

Hours: 48S

What is public policy? Is there such a thing as the public good? This seminar course examines the notion of the “public” through investigating possible answers to a central political question: what is the purpose of government? Drawing on readings in philosophy and political theory, the course considers a variety of approaches to interpreting the nature of the public good and asks how policy makers should respond when competing goods (e.g., freedom and security) clash with each other. The course involves discussion of contemporary issues in public policy. Restricted to first-year students. Not eligible for CR/NCR option.

Prerequisite: Admission to Trinity One
Exclusion: Innis One, Munk One, New One, SMC One, UC One, Vic One, Woodsworth One
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3); Thought, Belief and Behaviour (2)

TRN161Y1 - Making Public Policy Work

Hours: 48S

How do we know what kinds of public policy will work and what will not? How do we assess the effectiveness of a policy? An historical examination of ways in which Canadian governments have addressed a range of policy problems. Case studies of areas of federal and provincial activity today. Restricted to first-year students. Not eligible for CR/NCR option.

Prerequisite: Admission to Trinity One
Exclusion: Innis One, Munk One, New One, SMC One, UC One, Vic One, Woodsworth One
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

TRN162Y1 - Political Economy and Social Inequality

Hours: 48S

What is the relationship between capitalism and democracy? How can studying rational choice theory inform public policy? This course will introduce students to the methods of studying the interplay between economics and political goals. We will focus on specific topics to guide our quantitative analysis, which may include intergenerational poverty, the transfer of wealth, efficiency, and social stratification. Students will learn how to situate a society’s economic institutions within their broader political context, and study how economic outcomes interact with broader policies relating to, for example, health, equality, social mobility, and well-being. We will analyse empirical results while developing critical skills for interpreting economic data and research. Restricted to first-year students. Not eligible for CR/NCR option.

Prerequisite: Admission to Trinity One
Corequisite: TRN160Y1
Exclusion: Innis One, Munk One, New One, SMC One, UC One, Vic One, Woodsworth One
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3); Thought, Belief and Behaviour (2)
TRN170Y1 - Ethics and the Creative Imagination

Hours: 48S

A seminar course that explores ethical issues through the study of works of the creative imagination that pose or provoke questions of right and wrong, good and evil, justice and injustice. The selected works will be drawn from such fields as literature, film, and the visual and performing arts. Open only to students admitted to Trinity One. Restricted to first-year students. Not eligible for CR/NCR option.

Prerequisite: Admission to Trinity One
Exclusion: Innis One, Munk One, New One, St. Mike's One, Vic One, UC One, Woodsworth One
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1); Thought, Belief and Behaviour (2)

TRN171Y1 - Ethics and the Public Sphere

Hours: 48S

What does it mean to be morally required to do something? What rights do we have over ourselves, our bodies, our privacy, our choices? In this course, we will read texts from philosophy, history, political science, cultural studies and beyond that engage with the theme of ethics in the public arena. These will provide valuable analytic tools as we go on to confront contemporary issues that raise urgent ethical questions. Restricted to first-year students. Not eligible for CR/NCR option.

Prerequisite: Admission to Trinity One
Exclusion: Innis One, Munk One, New One, St. Mike's One, Vic One, UC One, Woodsworth One
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3); Thought, Belief and Behaviour (2)

TRN172Y1 - Ethics and the Law

Hours: 48S

What is the relationship between moral values and the law? What role does the law play in enabling people to live better lives? Are legal institutions and actors subject to higher ethical standards? In this course we will read texts from legal theory and political philosophy to try to explain the connection between ethics and the law. This will provide the basis for thinking about some historical and contemporary legal cases, as well as ethical issues judges, lawyers, and lawmakers face in their professional roles. Restricted to first-year students. Not eligible for CR/NCR option.

Corequisite: TRN171Y1
Exclusion: Innis One, Munk One, New One, St. Mike's One, Vic One, UC One, Woodsworth One
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2); Society and its Institutions (3)

TRN191H1 - Disaster and Terrorism: Religion and Ethics at Ground Zero

Hours: 24S

In response to contemporary terrorist attacks and natural disasters, many are led to cry, “The world will never be the same!” How should such statements be evaluated? What impact do they have on social and political life? This course explores religious and cultural responses to human tragedy and cultural shock. Discussion will attend to debates over the meaning of suffering, public reactions to terrorism, the traumas of natural disasters, and the role of media in covering such events. These themes are engaged from the perspectives of ethics, cultural theory, religious studies, and theology. The course focuses on popular responses to events that include: the Lisbon Earthquake of 1755, the First World War, the Holocaust, Hurricane Katrina, the Japanese experiences of Hiroshima and Fukushima, 9/11, and more recent examples of terrorism and disaster. Attention will be given to concerns such as the impact of trauma on social and political debate, the function of religious discourse in the face of tragedy, the nature of ideology, and the relationship between religion and violence. A thematic concern throughout the course will be the nature of ethical commitment in the midst of confusion and social disruption. Restricted to first-year students. Not available for CR/NCR option.

Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

TRN192H1 - Public Health in Canada: Health for the 21st Century

Hours: 24L

This course deals with preventive care and population health. It will also move into new areas like healthcare and the environment (climate change) and the greening of healthcare. It will look at health as an extension of democracy – of how health extends individual rights beyond the political realm to the social realm, of how it can build social capital and knit populations together. It will look at areas inimical to health, ‘detriments to health’ and how economic inequality can lead to health inequality. Along with this it will look at ways of empowering the individual, the public as agent and a role of public engagement by major institutions. It will also push beyond the popular determinants of health to engage students in a paradigm on next steps, the future challenges in population health. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)
TRN193H1 - Canadian Health Policy: Past, Present and Future

**Hours:** 24L

This is a health systems course. It deals with illness care, individual health, and health insurance. It will take a comparative and historical approach. We will look at the genesis of Canadian healthcare, our benefits and those other countries provide (e.g., pharmacare, dental care). We will look at indirect contributors like childcare and basic income. We will examine the public-private debate. We will also take some novel approaches. One is that the university has an expanded role in the 21st century, one that involves public outreach, a role that includes healthcare. Recent academic literature on healthcare notes that it is nation-building. We will look at why. We will examine some cutting-edge ideas, like integrated care, the learning health system, the concept of customer-owners. We will explore whether our healthcare system needs to be anchored by ‘institutions of excellence’ and identify these. Restricted to first-year students. Not eligible for CR/NCR option.

**Distribution Requirements:** Social Science
**Breadth Requirements:** Society and its Institutions (3)

TRN194H1 - Literature and Wicked Problems

**Hours:** 24L

This course explores contemporary literature in relation to the interdisciplinary framework of ‘wicked problems.’ Research emphasizes that complex, entrenched problems, like government relations with Indigenous peoples or human impacts on the climate, involve interconnected systems and require approaches that cross disciplines and types of knowledge. The course examines the role of literary works (mostly 21st-century fiction) in addressing these issues of pressing concern to students as global citizens. Critical thinking, scholarly reading and database research are foundational skills that this course strengthens in order to prepare students for their writing in disciplines across the university. Restricted to first-year students. Not eligible for CR/NCR option.

**Distribution Requirements:** Humanities
**Breadth Requirements:** Creative and Cultural Representations (1)

TRN195H1 - The Literature of Heroes and Horrors

**Hours:** 24L

This course explores contemporary literary works that redefine heroism in light of personal and cultural trauma. What does recent literature (mostly 21st-century fiction) show us about the nature of heroism in our time? To answer this question, the course examines theories of psychological trauma, studies in the field of positive psychology, and research on gothic and dystopian literature. Critical thinking, scholarly reading and database research are foundational skills that the course strengthens in order to prepare students for their writing in disciplines across the university. Restricted to first-year students. Not eligible for CR/NCR option.

**Distribution Requirements:** Humanities
**Breadth Requirements:** Creative and Cultural Representations (1)

TRN196H1 - The Last Roman: Boethius, his Consolation of Philosophy, and the Legacy of the Ancient World

**Hours:** 24L

Anicius Manlius Severinus Boethius (died 524) was the greatest scholar and statesman of Rome after its conquest by the barbarian Ostrogoths. When he was unjustly sentenced to death for treason, he wrote one of the great classics of Western literature, The Consolation of Philosophy. C. S. Lewis remarked of the work that “until about two hundred years ago it would, I think, have been hard to find an educated man in any European country who did not love it.” Boethius confronts the most intractable questions of suffering humanity: Why do bad things happen to good people? What is the point of living a virtuous life? Do we really have free will, or is choice an illusion? In this seminar, we will learn about Boethius’s world and his philosophical sources, and we will analyses the argument he offers in the Consolation. We will then see how Boethius’s ideas are discussed by modern scholars and consider the relevance of Boethius’s ideas to modern life. A highlight of the term will be a visit to the Fisher Rare Book Library to look at manuscripts and early printed books. Restricted to first-year students. Not eligible for CR/NCR option.

**Distribution Requirements:** Humanities
**Breadth Requirements:** Thought, Belief and Behaviour (2)
TRN197H1 - In the Shadow of the Vikings: Depictions of the Early Norse in Medieval, Modern, and Post-Modern Culture

Hours: 24L

Although rarely attested during the historical era when they were active, since the early nineteenth century the word “Viking” has been popularly applied to describe groups of Scandinavian adventurers who marauded along the frontiers of Medieval Europe: in this respect, the image of “the Viking” may be regarded as much a modern, as it is a medieval, creation. The legacy of historical “Viking activities” was a factor in the development of modern nation states in Scandinavia and the Baltic region, and their contributions to the heritage of people residing in Britain, continental Europe, the Middle East, and even the Atlantic coast of Canada have been and continue to be cited to the present day. Aspects of culture attributed to “the Vikings”—their assumed independence, courage, resourcefulness, and tenacity in the face of adversity, as well as the occult characteristics of their cosmology—have, for better and worse, inspired modern artists, writers, composers, intellectuals, explorers and even political leaders, and persist in present day literature, art, music, sport and popular culture as well. Why and how do elements of historic Viking culture continue to evoke traditions and characteristics popularly attributed to “the Vikings”? What are some implications of “Viking-ness” for those people in the post-Viking Age past and/or present who we may regard—or may regard themselves—as the “cultural descendants” of the Vikings? In this seminar, participants will study selected cultural artifacts of the “post-Viking Age,” along with recent multidisciplinary research, to observe how various “post-Viking Age” cultures and subcultures have selectively appropriated elements of the “Viking” past. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

TRN198H1 - The Viking Phenomenon: Commerce, Conflict, and Communication along Europe’s Frontiers, 7th – 15th Century

Hours: 24L

Perspectives on the impact that the Scandinavian raiders and traders popularly referred to as “Vikings” had on European and World history continue to develop as the work of historians, archaeologists, linguists, and scientists expands our understanding of the past. Recent research has revised the traditional view of the “Vikings” as primarily marauding warriors; in its place, a more complex and nuanced conception of the implications that “Viking activity” had on the social, economic, and political development of the peoples with whom they came in contact has emerged. This seminar will consider the relationship between the traditional conception of the “Viking warrior” and recent research that suggests the broader impact that the “Viking Phenomenon” had upon the economic revival and sociopolitical development of medieval Europe and its frontiers. In the course of the seminar, we will examine a selection of historical records and information concerning artifacts of the material culture of “The Viking Age” in order to better understand the activities of early medieval “Vikings,” not only as warriors, but also as agents of commerce, explorers, pioneers, and rulers. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

TRN199H1 - Classical Social and Political Thought from the 18th Century Enlightenment to the 20th Century

Hours: 24L

In the first part of the course, via lectures and readings, we will be examining the Enlightenment, the French and Industrial Revolutions, and the Romantic Conservative Reaction to these revolutions. In part two of the course, we will study Karl Marx, who coined the term “capitalism” to describe the new type of society that had emerged as a product of the Industrial Revolution. Marx, as the severest critic of the capitalist system, called attention to its alienating character. In the 19th Century, his ideas provoked a response that accounts, in large measure, for the character of Western political thought. The discussion of Marx is therefore followed by the intense debate with his “ghost,” the Marxian legacy. We will engage with the participants in the debate - - Weber, Pareto, Mosca, Michels, Durkheim, and Mannheim. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Humanities; Social Science
Breadth Requirements: Thought, Belief and Behaviour (2)
TRN225Y1 - The Art of Health Science Discovery

Hours: 48S

Illustrated by contemporary examples, students go through the stages of the scientific discovery process. From initial idea, through literature review, funding (grant writing and assessment), experimental design and critical analysis of data through to the public dissemination of results by publication, the patent process and development of intellectual property.

Prerequisite: TRN125Y1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4); Society and its Institutions (3)

TRN235H1 - Health Policy in Canada: Past, Present and Future

Hours: 24S

This course explores the nature and impact of public health policy in Canada. The course describes the origins of Canadian health policy, its evolution towards its current form and the choices resulting from aging populations and the increasing costs associated with a high standard of health care.

Prerequisite: TRN135Y1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

TRN236H1 - The Politics of Global Health

Hours: 24S

This course explores the nature and impact of policy relationships designed to improve global public health. We explore the analytical tools necessary to study these institutional arrangements and examine successes and failures of these policy relationships across a range of global health policy challenges including infectious disease and child health.

Prerequisite: TRN135Y1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

UNI101H1 - Citizenship in the Canadian City

Previous Course Number: UNI101Y1
Hours: 36S

Who belongs? Who governs? Who decides? In this course, you will examine the concepts of citizenship, public space, political membership, civic responsibility, and belonging. You will address topics such as Indigenous sovereignty claims, urban multiculturalism, public housing, and greening the city. Restricted to first-year students. Not eligible for CR/NCR option.

Exclusion: Innis One, Munk One, New One, St. Mike's One, Trinity One, Vic One, Woodsworth One
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

UNI102H1 - Performing the City I

Previous Course Number: UNI102Y1
Hours: 36S

In this course we learn about different practices of performative engagement with the city and experiment with them through exercises and creative activities. The goal is to gain, through this mode of embodied engagement with the city, a critical understanding of urban space as a diverse social, cultural, and physical environment. Restricted to first-year students. Not eligible for CR/NCR option.

Exclusion: Innis One, Munk One, New One, St. Mike's One, Trinity One, Vic One, Woodsworth One
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

UNI103H1 - Gradients of Health in an Urban Mosaic

Previous Course Number: UNI103Y1
Hours: 36S

In this course, you will examine how Toronto's varied communities access and use health care, and how they may encounter barriers in doing so. You will study how economic disparities, shifting demographics, and government policies affect health policy and the right to access resources. Restricted to first-year students. Not eligible for CR/NCR option.

Exclusion: Innis One, Munk One, New One, St. Mike's One, Trinity One, Vic One, Woodsworth One
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)
UNI104H1 - Sex in the City

Previous Course Number: UNI104Y1
Hours: 36S

You will learn about the sexual politics of the city and how cities and their neighbourhoods become sexualized and desexualized spaces. In Sex in the City, you will examine what “sex” means to Toronto’s varied, multicultural communities by looking at urban space, cultural productions, law enforcement, safety and health resources and more. Restricted to first-year students. Not eligible for CR/NCR option.

Exclusion: Innis One, Munk One, New One, St. Mike’s One, Trinity One, Vic One, Woodsworth One
Distribution Requirements: Social Science
Breadth Requirements: Thought, Belief and Behaviour (2)

UNI106H1 - Performing the City II

Previous Course Number: UNI102Y1
Hours: 36S

Further exploration of connections between the performing arts, urban spaces, and cultural diversity; complementing UNI102H1. How does theatrical performance affect how people perceive the city? What are the alternatives to established theatres, and how does community activism inform performing arts in Toronto? Restricted to first-year students. Not eligible for CR/NCR option.

Exclusion: Innis One, Munk One, New One, St. Mike’s One, Trinity One, Vic One, Woodsworth One
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

UNI197H1 - Hamilton: Musical and History

Hours: 24S

This course examines the American revolution and its reception in the musical "Hamilton." The American revolution generated multiple stories that included and excluded actors, peoples, perspectives, and more. This course delves into the American revolution and the diversity of those engaged in it and affected by it. The songs, performances, and reception of the musical "Hamilton" are a key resource for exploring the events and role of the American Revolution. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

UNI198H1 - Why Go to University? The Changing Role and Purpose of Higher Education

Hours: 24S

Is higher education about job preparation or about giving students an opportunity to learn about themselves and the world around them? Can higher education in Canada achieve both these aims? This course engages with the spirited conversations and scholarly debates about the ideals of a liberal arts education and how these connect with ancient and contemporary arguments about citizenship. We explore the impact on higher education of globalization and what some call the “corporatization” of universities. Students will be encouraged to think, read, research and write about various models of higher education and explore questions suggested by these debates. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

UNI199H1 - The Construction of Race in America: A History

Hours: 24S

The course will explore the origins of racial categories in America, in particular Negro (later black), Indian, and white. Drawing on primary sources such as memoirs, film, and government records as well as writings by scholars, we will examine how beliefs about these categories changed over time and with what consequences for the unfolding of American history. Arriving at the present day, we will consider such contradictory developments as the accelerating influence of Black Lives Matter and the headline-grabbing white nationalism on display at the “Unite the Right” rally in Charlottesville, Virginia, August, 2017. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Social Science
Breadth Requirements: Thought, Belief and Behaviour (2)

VIC101H1 - Conflict Theory and Practice

Hours: 24S

This course is a general orientation to conflict theory, and develops a basic understanding of essential conflict resolution principles that will complement the study of conflict theory. The course will examine the differences between conflicts and disputes, the functions and desirability of conflict, and the conditions that facilitate conversion of conflicts from destructive to constructive. Not eligible for CR/NCR option.

Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)
VIC102H1 - Ethics and Choices in Times of Crisis

Hours: 24S

This course examines a specific event, or events, in relation to the public sphere. The course will use events or an event as an entry point to discuss the nature of society including topics such as major revolutions, economic crises, the impact of the appearance of significant artistic or cultural works, and the impact of technological changes. Not eligible for CR/NCR option.

Exclusion: VIC102Y1
Distribution Requirements: Humanities; Social Science
Breadth Requirements: Thought, Belief and Behaviour (2)

VIC105H1 - Odysseys: The Search for Meaning

Hours: 24S

Metaphors and motivations of journeying have long intrigued human beings as they have attempted to understand the meaning of their existence: the setting out, the seeking for a desired object, the pilgrimage of religious observance, and the longing to return home. Through texts, art, music and film, this course will explore some of the shaping journey-myths of our culture from classical, Hebrew, medieval and modern sources. Not eligible for CR/NCR option.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

VIC106H1 - Psychology and Society

Hours: 24S

This course explores central developments and ongoing controversies in the scientific study of the human mind, brain and behaviour. It examines topics such as: psychoanalysis, behaviourism, humanistic psychology, evolutionary psychology, intelligence testing, and feminist perspectives. Goals include understanding the historical evolution and social relevance of scientific psychology. Not eligible for CR/NCR option.

Exclusion: VIC206H1
Distribution Requirements: Humanities; Social Science
Breadth Requirements: Thought, Belief and Behaviour (2)

VIC107H1 - Evolution, Genetics, and Behaviour

Hours: 24S

In this course we examine major episodes in the history of evolution and genetics in the twentieth century. Topics include Darwinian evolution, sociobiology and evolutionary psychology, eugenics, and genetic screening and therapy. We will examine different views about the control of evolution and genetic manipulation in their socio-cultural-economic context and discuss the ethical and social implications of those views. Not eligible for CR/NCR option.

Exclusion: VIC207H1
Distribution Requirements: Humanities; Social Science
Breadth Requirements: Thought, Belief and Behaviour (2)

VIC108H1 - Belonging, Imagination and National Identity

Hours: 24S

This course will examine a number of questions related to the origins of national identities and the sustainability of nation-states. Topics covered will include: language, ethnicity, religion, politics, war, symbols, the arts, sport and public spectacle, and cuisine. Not eligible for CR/NCR option.

Exclusion: VIC108Y1
Distribution Requirements: Humanities; Social Science
Breadth Requirements: Society and its Institutions (3)

VIC109H1 - Innovators and Their Ideas

Hours: 24S

A study of the ideas and concerns of innovators who questioned traditional views and values. The course includes creative thinkers who challenged basic concepts on politics, literature, religion, and society. Not eligible for CR/NCR option.

Exclusion: VIC109Y1
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)
### VIC110H1 - Critical Perspectives on Society

**Hours:** 24S

By means of short texts, film or art works this course explores such themes as the effect of technology on the political, the nature of democracy, the question of resistance through art and the role of violence in the social. Not eligible for CR/NCR option.

**Distribution Requirements:** Social Science  
**Breadth Requirements:** Thought, Belief and Behaviour (2)

### VIC112H1 - Puzzles, Discovery and the Human Imagination

**Previous Course Number:** VIC112Y1  
**Hours:** 24S

There has never been a period of time, nor has there ever been a culture, without some kind of puzzle tradition. Are puzzles just playful artefacts, intended merely to entertain? Or are they mirrors of something much more fundamental in human life? The course will take a close look at what puzzles tell us about the human mind and human culture. Not eligible for CR/NCR option.

**Exclusion:** VIC112Y1  
**Distribution Requirements:** Humanities; Social Science  
**Breadth Requirements:** Thought, Belief and Behaviour (2)

### VIC113H1 - Encountering Distant Climes: The Literature of Travel and Exploration

**Hours:** 24S

This course will study accounts of world travelers and explorers from the Middle Ages to the present, including representative examples drawn from the Age of Exploration, the Grand Tour, scientific and map-making expeditions, and the contemporary genre of travel writing. Particular attention will be given to the trans-cultural nature of travel, and the interactive aspects of the gulf between the observer and those observed. Students will analyze the diverse motivational factors behind excursions and expeditions, and apply a critique to written accounts in light of such factors as self-discovery, knowledge and imagination, Eurocentrism, orientalism, cultural relativism, colonialism/imperialism, race, gender, and eco-tourism. Not eligible for CR/NCR option.

**Distribution Requirements:** Humanities  
**Breadth Requirements:** Creative and Cultural Representations (1)

### VIC114H1 - Renaissance in Popular Culture

**Hours:** 24S

This course explores the depiction of the Renaissance in a wide range of plays, films and novels. The focus is on the exchange between film, fiction, and ‘fact’, and on how the values and concerns of the present shape creative recreations of the past in popular culture. Not eligible for CR/NCR option.

**Exclusion:** VIC114Y1  
**Distribution Requirements:** Humanities  
**Breadth Requirements:** Creative and Cultural Representations (1)

### VIC115H1 - Imagined Power: Literature and Film

**Hours:** 24S

In this course we will study a number of literary and cinematic works that take up questions of power, duty, rights, responsibility, and freedom. Our texts will be drawn from a long history, and from many parts of the world. The sequence however will not be chronological. Not eligible for CR/NCR option.

**Exclusion:** VIC115Y1  
**Distribution Requirements:** Humanities; Social Science  
**Breadth Requirements:** Creative and Cultural Representations (1)

### VIC116H1 - Politics of the Pen

**Hours:** 24S

A study of how literature challenges prevailing political beliefs and social norms. We will situate our discussion in the broader context of human rights and freedoms. We will examine cases where literature has been censored and writers have been imprisoned or driven into exile. Part of this course involves a community service-learning component. We will consider how this literature contributes to debate and advocacy around issues of social justice. Not eligible for CR/NCR option.

**Distribution Requirements:** Humanities  
**Breadth Requirements:** Thought, Belief and Behaviour (2)
VIC117H1 - Understanding the Performing Arts: Interpretation and Expression

Hours: 24S

This course examines two key issues about the performing arts that concern both artists and theorists: the nature of interpretation and of expression. What might we mean when we say that a work, a piece of music or a dance for example expresses something? What is it to express? And what is the nature of interpretation? Are there any constraints or boundaries on interpretation? We will draw on both philosophers and non-philosophers to explore these sorts of questions. Not eligible for CR/NCR option.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

VIC122H1 - Scientific Evidence in Public Policy

Hours: 24S

This course investigates issues arising from the translation of scientific evidence for public consumption, including in the development of public policy and in confronting problems of social and global significance. Areas of focus will include climate change, global health, and clinical medicine. Students will explore concepts including the perception and communication of risk, the generalizability of research findings, probabilistic and mechanistic thinking, and the use and abuse of scientific authority and "expertise" in public discourse. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

VIC119H1 - Myths and Legends in Modern Contexts

Hours: 24S

This course provides an introduction to modern forms of ancient narratives, exploring the ways in which selected ancient literary sources and myths have been adapted to modern Canadian literature. Ancient narratives or 'old stories' are often reused, reinterpreted or reconstructed in modern narratives and given new relevance in a contemporary context. Students will encounter sources and contexts of ancient narratives. Not eligible for CR/NCR option.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

VIC134H1 - Globalization

Hours: 24S

This interdisciplinary course explores the contemporary character of globalization. The world is shrinking as money, goods, people, ideas, weapons, and information flow across national boundaries. Some commentators assert that a more tightly interconnected world can exacerbate financial disruptions, worsen the gap between rich and poor nations, undermine democracy, imperil national cultures, harm the environment, and give unconstrained freedom to predatory corporations. Others proclaim that globalization - understood as capitalism and free markets - fosters economic growth, encourages creative collaboration, inspires technological breakthroughs, and enhances human prospects for a better life, in rich and poor countries alike, in unprecedented ways. Our task is to evaluate the evidence and draw our own conclusions. Not eligible for CR/NCR option.

Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

VIC121H1 - Evaluating Healthcare: Problems and Solutions

Hours: 24S

This course introduces students to the study of healthcare by asking foundational questions about how evidence and knowledge are produced in the context of healthcare problems. Students will explore how different frameworks for clinical practise (e.g. Evidence-based Medicine, Person-Centered Healthcare) conceptualize evidence and how different methodologies impact how healthcare research is conceived, reported, and understood. Students will learn to critically appraise healthcare research studies and assess their evidence value and implications for clinical practice. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

VIC135H1 - The Death of Meaning

Hours: 24S

In *The Origin of Species* Darwin concluded there was no evidence to suggest that life was designed by a higher power. A corollary of this is that our lives lack any necessary purpose or meaning. Our readings will be directed to the question of what it means to lack 'Meaning'. Not eligible for CR/NCR option.

Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)
VIC136H1 - How to Study Everyday Life

Hours: 24S

An introduction to the academic study of everyday life. A cross-disciplinary discussion class drawing on a wide variety of examples from ordinary life, fantasy, and culture. We situate the apparently innocuous within larger patterns of social relations and social change. Not eligible for CR/NCR option.

Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

VIC137H1 - Science and Science Fiction

Hours: 24S

Based on reading and discussion of science fiction and popular science in the context of social issues, this seminar course explores the fantastic visions of humanity's future inspired by scientific advances during the twentieth century. Not eligible for CR/NCR option.

Distribution Requirements: Social Science
Breadth Requirements: Thought, Belief and Behaviour (2)

VIC141H1 - Discovery and Revolution

Hours: 24S

This course examines the emergence of a global modern world in relation to the upheavals of the Renaissance (1350-1700) and its discoveries and innovations in culture and society. Not eligible for CR/NCR option.

Exclusion: VIC141Y1
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

VIC142H1 - Machiavelli: The Politics of Power

Hours: 24S

The name of Machiavelli unleashes powerful opinions and responses and conjures up trickery, duplicity and cynicism. Yet Machiavelli himself is arguably the least Machiavellian of political figures of the Italian Renaissance. This course examines the writings of Niccolò Machiavelli, placing them in their historical context in order to understand this most controversial figure of the Renaissance, his influence and his lasting legacy. Not eligible for CR/NCR option.

Exclusion: ITA198H1 (Machiavelli and Machiavellianism); VIC141Y1
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

VIC150Y1 - School and Society

Hours: 48S

This course will be about the social and historical role of the school. The course will examine schools and learning as social, political, intellectual, and economic phenomena. Restricted to first-year students. Not eligible for CR/NCR option.

Prerequisite: Admission to Vic One
Corequisite: VIC151Y1 and PSY100H1
Exclusion: Innis One, Munk One, New One, SMC One, Trinity One, UC One, Woodsworth One, 199 seminars, Vic One Hundred courses.
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

VIC151Y1 - Theories and Practices of Teaching

Hours: 48S

This course focuses on connecting theories and practice of teaching with a view to having students develop their personal understanding of teaching. Students will be involved in a practicum. Restricted to first-year students. Not eligible for CR/NCR option.

Prerequisite: Admission to Vic One
Corequisite: VIC150Y1 and PSY100H1
Exclusion: Innis One, Munk One, New One, SMC One, Trinity One, UC One, Woodsworth One, 199 seminars, Vic One Hundred courses.
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)
VIC159H1 - Vic One Hundred Special Topics Seminar

Hours: 24S

Topics vary from year to year. Not eligible for CR/NCR option.

Distribution Requirements: Humanities; Science; Social Science

VIC159Y1 - Vic One Hundred Special Topics Seminar

Hours: 48S

Topics vary from year to year. Not eligible for CR/NCR option.

Distribution Requirements: Humanities; Science; Social Science

Breadth Requirements: Creative and Cultural Representations (1); Thought, Belief and Behaviour (2)

VIC162H1 - Cultural Forms and Their Meanings

Hours: 24S

A study of culture with a view to developing basic concepts with examples drawn from the visual arts, music, film, literature, architecture, and/or local urban artefacts. Restricted to first-year students. Not eligible for CR/NCR option.

Prerequisite: Admission to Vic One
Corequisite: VIC162H1, VIC164H1, VIC165H1, and 1.0 FCE in any 100-level course in ENG or FAH or PHL
Exclusion: Innis One, Munk One, New One, SMC One, Trinity One, UC One, Woodsworth One, 199 seminars, Vic One Hundred courses.
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

VIC163H1 - Cultural Forms and Their Meanings: People and Ideas

Hours: 24S

A study of culture with a view to developing basic concepts with examples drawn from the visual arts, music, film, architecture, and/or local urban artefacts. We will emphasize how contemporary thought has affected the practice of everyday life. Restricted to first-year students. Not eligible for CR/NCR option.

Prerequisite: Admission to Vic One
Corequisite: VIC162H1, VIC164H1, VIC165H1, and 1.0 FCE in any 100-level course in ENG or FAH or PHL
Exclusion: Innis One, Munk One, New One, SMC One, Trinity One, UC One, Woodsworth One, 199 seminars, Vic One Hundred courses.
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

VIC164H1 - Ideas and Their Consequences: Literary and Artistic Realms of the Imagination

Hours: 24S

A study of the ideas and concerns of creative thinkers and their impact upon cultures. The course includes literary, scientific and/or religious intellectuals from the major traditions. Attention to modes of reasoning, cultural definition and expression. Emphasis on philosophical and artistic concepts. Restricted to first-year students. Not eligible for CR/NCR option.

Prerequisite: Admission to Vic One
Corequisite: VIC162H1, VIC163H1, VIC165H1, and 1.0 FCE in any 100-level course in ENG or FAH or PHL
Exclusion: Innis One, Munk One, New One, SMC One, Trinity One, UC One, Woodsworth One, 199 seminars, Vic One Hundred courses.
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)
VIC165H1 - Ideas and Their Consequences: Isolation and Communion in Modern Culture

Hours: 24S

A study of art, with a focus on poetry, as an essential mode of experience and knowledge, in the context of contemporary and modern society. Along with literary artists, the course includes writers on history and sociology and presents the interplay between artistic vision and socio-political situations. Restricted to first-year students. Not eligible for CR/NCR option.

Prerequisite: Admission to Vic One
Corequisite: VIC162H1, VIC163H1, VIC164H1, and 1.0 FCE in any 100-level course in ENG or FAH or PHL
Exclusion: Innis One, Munk One, New One, SMC One, Trinity One, UC One, Woodsworth One, 199 seminars, Vic One Hundred courses.
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

VIC166H1 - Common Vices and Neglected Virtues: Intro to Ethics of Character

Hours: 24S

Vice is popular: a prestigious university press has brought out a series of seven books on the Seven Deadly Sins. This course examines such questions as the following. Are greed, lust and gluttony just bad names for necessary and otherwise acceptable instincts? What is the place, in a good human life, of such qualities as honesty, trust, civility and the like? Are vices and virtues culturally determined or a matter of individual preference? Can character be taught, or is it rather a matter of genes and luck? Restricted to first-year students. Not eligible for CR/NCR option.

Prerequisite: Admission to Vic One
Corequisite: VIC167H1, VIC168H1, VIC169H1, and 1.0 FCE in any 100-level course in ANT or PHL or RLG
Exclusion: Innis One, Munk One, New One, SMC One, Trinity One, UC One, Woodsworth One, 199 seminars, Vic One Hundred courses.
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

VIC167H1 - Ideas and Fine Thoughts

Hours: 24S

This course examines how political ideas are formed and developed through literature, art, plays, essays and philosophical works in the twentieth century. Restricted to first-year students. Not eligible for CR/NCR option.

Prerequisite: Admission to Vic One
Corequisite: VIC166H1, VIC168H1, VIC169H1, and 1.0 FCE in any 100-level course in ANT or PHL or RLG
Exclusion: Innis One, Munk One, New One, SMC One, Trinity One, UC One, Woodsworth One, 199 seminars, Vic One Hundred courses.
Distribution Requirements: Humanities; Social Science
Breadth Requirements: Creative and Cultural Representations (1)

VIC168H1 - Identity and Equality in the Public Sphere

Hours: 24S

This course explores current legal and philosophical debates around equality, discrimination, and the shaping of individual and group identities. It addresses the way values, affiliation, and identities have an impact on the public sphere of law and policy-making – and the ways in which law and policy, in turn, shape our conceptions (and misconceptions) of people’s identities. Restricted to first-year students. Not eligible for CR/NCR option.

Prerequisite: Admission to Vic One
Corequisite: VIC166H1, VIC167H1, VIC169H1, and 1.0 FCE in any 100-level course in ANT or PHL or RLG
Exclusion: Innis One, Munk One, New One, SMC One, Trinity One, UC One, Woodsworth One, 199 seminars, Vic One Hundred courses.
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

VIC169H1 - Ethical Living in a Pluralistic World

Hours: 24S

This course examines different values, beliefs, and traditions relating to the natural and social world, ethical living, and the common good. Restricted to first-year students. Not eligible for CR/NCR option.

Prerequisite: Admission to Vic One
Corequisite: VIC166H1, VIC167H1, VIC168H1, and 1.0 FCE in any 100-level course in ANT or PHL or RLG
Exclusion: Innis One, Munk One, New One, SMC One, Trinity One, UC One, Woodsworth One, 199 seminars, Vic One Hundred courses.
Distribution Requirements: Social Science
Breadth Requirements: Thought, Belief and Behaviour (2)
VIC170Y1 - The Impact of Science on Our Society

Hours: 48S

How rhetoric and statistical analysis are used to communicate scientific observations and theories to different audiences will be examined in lectures and seminars. Uncertainty, belief, evidence, risk assessment, random error and bias will be discussed using examples drawn from literature, the arts and the physical, life and social sciences. Students will prepare a research grant application on a scientific topic of their own choice. Restricted to first-year students. Not eligible for CR/NCR option.

Prerequisite: Admission to Vic One
Corequisite: VIC171Y1 and 1.0 FCE selected from first-year course offerings in the sciences (0.5 FCE must be a BIO course)
Exclusion: Innis One, Munk One, New One, SMC One, Trinity One, UC One, Woodsworth One, 199 seminars, Vic One Hundred courses.
Distribution Requirements: Humanities; Social Science
Breadth Requirements: Thought, Belief and Behaviour (2)

VIC172Y1 - Physical Sciences Today

Hours: 48S

How is science performed and what enables scientific progress? What are our responsibilities as scientists? We base the discussion mostly on the development of microscopy tools. We look at how scientific discoveries affect and were affected by society. This course explores the complementary skills and knowledge needed by modern scientists. Restricted to first-year students. Not eligible for CR/NCR option.

Prerequisite: admission to Vic One
Corequisite: VIC173Y1 and 1.0 FCE selected from first-year course offerings in the sciences (0.5 FCE must be a CHM, MAT or PHY course)
Exclusion: Innis One, Munk One, New One, SMC One, Trinity One, UC One, Woodsworth One, 199 seminars, Vic One Hundred courses.
Distribution Requirements: Science; Social Science
Breadth Requirements: Society and its Institutions (3)

VIC171Y1 - Methodology, Theory and Practice in the Natural Sciences

Hours: 48S

An examination of scientific theories and their logic in life and physical sciences. Experimental design, novel device production, data analysis and modeling will be discussed using examples drawn from primary source material in the natural sciences. Students will prepare a research paper on a topic designed in consultation with the instructor. Restricted to first-year students. Not eligible for CR/NCR option.

Prerequisite: Admission to Vic One
Corequisite: VIC170Y1 and 1.0 FCE selected from first-year course offerings in the sciences (0.5 FCE must be a BIO course)
Exclusion: Innis One, Munk One, New One, SMC One, Trinity One, UC One, Woodsworth One, 199 seminars, Vic One Hundred courses.
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

VIC173Y1 - Philosophy of Science for Physical Scientists

Hours: 48S

This course introduces students to some of the issues in the philosophy of science, in general, and in the philosophy of physics, in particular. Topics include the scientific method and its controversies, the meaning of time and its properties, realism versus competing approaches, thought experiments, and quantum mechanics. Restricted to first-year students. Not eligible for CR/NCR option.

Prerequisite: admission to Vic One
Corequisite: VIC172Y1 and 1.0 FCE selected from first-year course offerings in the sciences (0.5 FCE must be a CHM, MAT or PHY course)
Exclusion: Innis One, Munk One, New One, SMC One, Trinity One, UC One, Woodsworth One, 199 seminars, Vic One Hundred courses.
Distribution Requirements: Science; Social Science
Breadth Requirements: Thought, Belief and Behaviour (2)
VIC181H1 - Events in the Public Sphere: World Affairs

**Hours:** 24S

This course will review issues in contemporary world affairs, from the fall of the Berlin Wall to the present day. The course will examine the politics and practice of foreign policy decision making. Issues to be covered include the collapse of the Soviet Union, intervention in humanitarian crises, and the conflicts in Afghanistan and Iraq. Restricted to first-year students. Not eligible for CR/NCR option.

**Prerequisite:** Admission to Vic One

**Corequisite:** VIC183H1, VIC184H1, VIC185H1, and 1.0 FCE in any 100-level course in ECO, HIS or POL

**Exclusion:** Innis One, Munk One, New One, SMC One, Trinity One, UC One, Woodsworth One, 199 seminars, Vic One Hundred courses.

**Distribution Requirements:** Social Science

**Breadth Requirements:** Society and its Institutions (3)

VIC183H1 - Individuals and the Public Sphere: Shaping Memory

**Hours:** 24S

This course explores how public service and citizenship are developed. Topics may include the role of law and government, civil liberties, rights and responsibilities, and the role of protest. Emphasis on individuals and movements that have shaped modern memory. Restricted to first-year students. Not eligible for CR/NCR option.

**Prerequisite:** Admission to Vic One

**Corequisite:** VIC181H1, VIC184H1, VIC185H1, and 1.0 FCE in any 100-level course in ECO, HIS or POL

**Exclusion:** Innis One, Munk One, New One, SMC One, Trinity One, UC One, Woodsworth One, 199 seminars, Vic One Hundred courses.

**Distribution Requirements:** Social Science

**Breadth Requirements:** Creative and Cultural Representations (1)

VIC184H1 - Individuals and the Public Sphere: History, Historiography and Making Cultural Memory

**Hours:** 24S

A seminar course that examines the contribution of an individual or individuals to the public sphere. The course will explore how public service and citizenship are developed in social, philosophical, and cultural contexts. We will examine our evolving role in developing collective, cultural and counter memory. Restricted to first-year students. Not eligible for CR/NCR option.

**Prerequisite:** Admission to Vic One

**Corequisite:** VIC181H1, VIC183H1, VIC185H1, and 1.0 FCE in any 100-level course in ECO, HIS or POL

**Exclusion:** Innis One, Munk One, New One, SMC One, Trinity One, UC One, Woodsworth One, 199 seminars, Vic One Hundred courses.

**Distribution Requirements:** Social Science

**Breadth Requirements:** Thought, Belief and Behaviour (2)

VIC185H1 - Events in the Public Sphere: Social Justice

**Hours:** 24S

This course uses events to discuss the nature of society including major revolutions, economic crises, and the impact of significant artistic, cultural and technological developments. Emphasis on our responsibilities towards social justice. Restricted to first-year students. Not eligible for CR/NCR option.

**Prerequisite:** Admission to Vic One

**Corequisite:** VIC181H1, VIC183H1, VIC184H1, and 1.0 FCE in any 100-level course in ECO, HIS or POL

**Exclusion:** Innis One, Munk One, New One, SMC One, Trinity One, UC One, Woodsworth One, 199 seminars, Vic One Hundred courses.

**Distribution Requirements:** Social Science

**Breadth Requirements:** Society and its Institutions (3)
VIC186Y1 - The Art and Literature of Leadership

Hours: 48S

What is a leader? Are leaders born or are they made, and if they are made is there a craft to being able to lead others? Through works of art, film, and literature, this course examines the various types of men and women who become leaders from natural-born talents to statesmen and state-crafters and individual entrepreneurs with the purpose of defining those qualities that make for the leaders of tomorrow. Restricted to first-year students. Not eligible for CR/NCR option.

Prerequisite: Admission to Vic One
Corequisite: VIC187H1, VIC188H1, ECO101H1 and ECO102H1
Exclusion: Innis One, Munk One, New One, SMC One, Trinity One, UC One, Woodsworth One, 199 seminars, Vic One Hundred.
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

VIC188H1 - Corporate Citizenship, Sustainability, and Ethics

Hours: 24S

Drawing together philosophical background readings with contemporary applications, this course addresses issues of corporate social responsibility, business ethics, human rights, diversity, and equity, and considers how these topics intersect with a wide range of global practices. Restricted to first-year students. Not eligible for CR/NCR option.

Prerequisite: Admission to Vic One
Corequisite: VIC186Y1, VIC187H1, ECO101H1 and ECO102H1
Exclusion: Innis One, Munk One, New One, SMC One, Trinity One, UC One, Woodsworth One, 199 seminars, Vic One Hundred.
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

VIC187H1 - Prosperity, Justice, and Sustainability: Introduction to Public Policy

Hours: 24S

This course introduces policy applications of measurement tools and economic concepts by analyzing current issues in the news, such as public spending and debt, health care, social security, energy, climate change, innovation, and education. Concepts from the philosophy and history of economic thought will be used to address such questions as: What is the nature of economic explanations? Do they tell us the truth about reality? Restricted to first-year students. Not eligible for CR/NCR option.

Prerequisite: Admission to Vic One
Corequisite: VIC186Y1, VIC188H1, ECO101H1 and ECO102H1
Exclusion: Innis One, Munk One, New One, SMC One, Trinity One, UC One, Woodsworth One, 199 seminars, Vic One Hundred.
Distribution Requirements: Social Science
Breadth Requirements: Thought, Belief and Behaviour (2)

VIC190Y1 - The Arts and Society

Hours: 48S

The artist, filmmaker, poet or dramatist has changed society and how we imagine our future. The course explores a number of paradigm cases of how the arts have interacted with social problems. Both historical and current examples of the role of the imaginative arts will be explored. Restricted to first-year students. Not eligible for CR/NCR option.

Prerequisite: Admission to Vic One
Corequisite: VIC190Y1 and 1.0 FCE in any 100-level course in ARC or CIN or DRM or ENG or MUS or VIS
Exclusion: Innis One, Munk One, New One, SMC One, Trinity One, UC One, Woodsworth One, 199 seminars, Vic One Hundred courses.
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

VIC191Y1 - Artistic Creation and Public Issues

Hours: 72S

This course addresses social issues through the exploration of creative activity and the imaginative arts. Topics will be discussed from historical, ethical and philosophical perspectives, and might be considered either in a group or individually. Restricted to first-year students. Not eligible for CR/NCR option.

Prerequisite: Admission to Vic One
Corequisite: VIC190Y1 and 1.0 FCE in any 100-level course in ARC or CIN or DRM or ENG or MUS or VIS
Exclusion: Innis One, Munk One, New One, SMC One, Trinity One, UC One, Woodsworth One, 199 seminars, Vic One Hundred courses.
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)
VIC198H1 - Posters and Propaganda

Hours: 24L

How and when have political posters been used? What forms do they take? How have they changed over time? What can these visual artifacts tell us about the relationship between art and propaganda, and about the political movements that have mobilized visual strategies to advance their aims? This course involves visits to several poster collections, develops visual literacy skills, and highlights the role of the visual in societies past and present. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Social Science
Breadth Requirements: Creative and Cultural Representations (1)

VIC199H1 - Thinking with Things

Hours: 24S

This course will examine the materiality of objects with a view to understanding how artefacts are made, their circulation, consumption, and the importance of things to social and cultural life. An investigation of artefacts from various collections in and around the university will be undertaken to develop basic methods for the study, description and analysis of material culture. In addition to hands-on exploration of objects, topics may include antiquarians and their methods, material culture in colonial contexts, and materials in contemporary user-friendly design. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

WDW151H1 - Order and Disorder I: Issues and Perspectives

Hours: 16T/24S

Societies require law and order, but at what point does order become oppression? How do we balance our need for freedom and society’s need for order? This interdisciplinary seminar allows students to explore these and related questions through selected readings introducing theories from sociology, political science, philosophy, and history. Restricted to first-year students. Not eligible for CR/NCR option.

Exclusion: INI One, MUN One, NEW One, SMC One, TRN One, UNI One, VIC One, WDW153H1, WDW154H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

WDW152H1 - Order and Disorder II: Problems and Solutions

Hours: 16T/24S

Building on the questions and theoretical perspectives discussed in WDW151H1, this interdisciplinary seminar introduces students to some of the methods used by scholars and researchers in sociology, political science, philosophy, and history to develop, test, and debate possible solutions to the problems of social order and disorder. Restricted to first-year students. Not eligible for CR/NCR option.

Prerequisite: WDW151H1 or permission of the Woodsworth One Program Coordinator
Exclusion: INI One, MUN One, NEW One, SMC One, TRN One, UNI One, VIC One, WDW153H1, WDW154H1
Distribution Requirements: Social Science
Breadth Requirements: Creative and Cultural Representations (1)

WDW153H1 - Popular Culture Today I: Issues and Perspectives

Hours: 16T/24S

Popular culture, which might best be defined as culture about everyone, by everyone, and for everyone, is an increasingly important part of life. This interdisciplinary seminar examines from multiple perspectives its impact as art movement, agent of social change, and universal language of the digital age. Restricted to first-year students. Not eligible for CR/NCR option.

Exclusion: INI One, MUN One, NEW One, SMC One, TRN One, UNI One, VIC One, WDW151H1, WDW152H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

WDW154H1 - Popular Culture Today II: Special Topics

Hours: 16T/24S

Building on the general introduction to the subject provided by WDW153H1, this interdisciplinary seminar examines one major area of popular culture in greater depth: popular music, genre fiction, online culture, etc. The focus will be different each year, and in some years more than one option may be available. Restricted to first-year students. Not eligible for CR/NCR option.

Prerequisite: WDW153H1 or permission of the Woodsworth One Program Coordinator
Exclusion: INI One, MUN One, NEW One, SMC One, TRN One, UNI One, VIC One, WDW151H1, WDW152H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)
WDW196H1 - From Rayguns to Light Sabers: Science Fiction in Contemporary Culture

Previous Course Number: CCR199Y1
Hours: 24S

This course examines science fiction as pop culture genre, media industry, and sociocultural phenomenon, with attention to some of its key themes, its important texts, creators, and audiences, and its place in contemporary culture. We will study some works chosen by the class as well as by the instructor. Restricted to first-year students. Not eligible for CR/NCR option.

Exclusion: ANT195H1, VIC137H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

WDW197H1 - Jane Austen on Film

Hours: 24S

In the 21st century, Jane Austen’s early 19th-century novels of love and marriage are increasingly experienced through retellings and updatings in theatrical and made-for-television movies. The course will examine highlights from the last 25 years of Austen adaptations for what they can tell us about relationships in our time, including how Austen’s stories are rewritten to please a modern audience. Films in the course will include works from 1995 to 2016 (from 1995, Clueless, Austen’s Emma retold as a Hollywood high school comedy and starring Alicia Silverstone; and Sense and Sensibility, for which Emma Thompson’s screenplay won an Academy Award; and from 2016, the Hallmark Channel’s Unleashing Mr. Darcy, Austen’s Pride and Prejudice transferred to the present-day dog show circuit; and writer/director Whit Stillman’s Love and Friendship, the first-ever film version of Austen’s Lady Susan). Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

WDW198H1 - There and Back Again: Exploring Tolkien

Hours: 24S

Since the mid-twentieth century, J.R.R. Tolkien’s The Hobbit and The Lord of the Rings have become classics of children’s and fantasy literature. In this course, we read Tolkien’s The Lord of the Rings and investigate the world-building and imagined history that lies behind the books. We trace how Tolkien’s own life experience informed his work—his experience as a soldier of the Great War and a civilian during World War Two; as a scholar of medieval language and literature, and of fairy tales; as a Catholic thinker; and as a lover of nature and the past. We also survey the afterlife of the novels in fantasy, film, and the popular imagination. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

WDW199H1 - Indigenous Knowledge and Storytelling in Toronto

Hours: 12T/24S

The land now known as Toronto has a 13,000+ year old history of Indigenous presence that is still unfolding. This history is inscribed in the land—it is visible in the geographical features, place names, and contemporary urban form of the city and is represented through stories (oral and written) told by diverse members of Toronto’s Indigenous community. This course engages with stories of Indigenous history and presence in Toronto through a selection of Indigenous literary works about Toronto, Indigenous guest speakers, and a series of experiential Indigenous storytelling tours of significant locations across the city. Students will be introduced to Indigenous worldviews and ways of knowing and will learn why storytelling remains a significant and culturally-appropriate means for keeping and sharing land-based Indigenous Knowledge. Students will gain a deeper appreciation of the city as a traditional Indigenous territory and will reflect on their own relationships and responsibilities within these lands. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

S.C. Thomas, BA, PhD
N. Yan, BAsc, PhD

Assistant Professors
S. Krigstin, MScF, PhD

Associate Professors
D. Puric-Mladenovic, PhD
B.M. Wotton, PhD

Introduction

Forests have traditionally been managed primarily as sources of timber and revenue. However, there is increasing recognition of their immense cultural, social and environmental role, focused particularly by recent United Nations conferences in Rio de Janeiro and Johannesburg. Increasingly the focus of forest management has shifted to include biodiversity maintenance, ecological sustainability, and the protection of wildlife and their habitats. Canadians, as custodians of 10% of the remaining global forest cover, and 25% of the undisturbed frontier forest, have both the option and the responsibility to provide global leadership in forest conservation and sustainable forest management. Forest conservation programs prepare students for this critically important role by combining traditional ecological (biology, zoology) and physical (soil science, hydrology) sciences with social sciences. Forest conservationists increasingly focus on complex, emerging social and community issues, such as aboriginal rights and land tenure, protection of wilderness parklands, preservation of urban green space, and the use of forests for carbon sequestration.

Responsible stewardship of our forests and the changing focus from industrial timber production to forest conservation has greatly expanded the range of expertise necessary. Graduates can pursue a wide range of new career opportunities developing in private, government and non-government environmental organizations where forest conservationists increasingly work as members of multidisciplinary teams of environmental and resource managers. Graduates from forest conservation programs can also pursue graduate programs in a wide range of disciplines, including forest conservation, forestry, environmental sciences and international development.

Students may take a specialist 4-year degree leading to an H.B.A. in Forest Conservation or an H.B.Sc. in Forest Conservation Science. The arts program focuses on communal forest management, development of forest policies, forest economics and forest product trade, with electives in social sciences, while the science program concentrates on forest biology and ecology with electives in life and physical sciences. The major programs in Forest Conservation are intended to build on a student's interest in forestry and related issues. Students should consider combining these programs with a major in another related discipline such as environment, geography, biology, chemistry, urban studies or architecture.

A minor in Forest Conservation Science (Science program) and a minor in Forest Conservation (Arts program) are also available. Students should consider combining these programs with a minor in other related disciplines.

Forest Biomaterials Science

NOTE: Enrolment in the Forest Biomaterials Science Major and Minor is being administratively suspended as of 1 October 2020 and no new students will be admitted thereafter. Students presently enrolled in the Major or Minor will be able to complete the respective program requirements as described below.

Canada is not only a key player in global forest conservation but also a world leader in Forest Biomaterials Science and Biorefinery education and research. Wise and innovative use of forest biomaterials is a mandatory component of global forest conservation. It is recognized that right and proper use of forest-based materials can help resolve global environmental problems as they are renewable, have low life cycle costs and contribute to carbon sequestration. Traditionally, forest materials have been used in wood construction and paper products. Today, new and exciting technologies are transforming the forest resource into biodegradable polymers, specialty chemicals, nanomaterials and carbon neutral fuels. Students in this program will acquire a thorough understanding of forest sustainability; material science of wood, lightweight composites, pharmaceutical and nutraceutical products, and other forest-based materials; bio-conversion technologies related to forest and agricultural materials and optimal use and maintenance of natural fibre based materials. The program is highly interdisciplinary, combining aspects of forestry, biology, chemistry, chemical and mechanical engineering and building sciences.

The major and minor in Forest Biomaterials Science will be of interest to students that recognize the value of conserving the forest through good design, application and utilization of forest-based products. Graduates from this program can pursue careers in private industry, research and government organizations where knowledge of new and changing technologies will be required to lead the transformation from petro-chemical based industries to ones established on renewable biomaterials.
Forest Conservation and Forest Biomaterials Science Programs

Forest Conservation Science Specialist (Science Program) - ASSPE1102

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

(12 full courses or their equivalent, including at least 3.0 300-series courses and 2.5 400-series courses; other equivalent and approved courses offered by other Faculties, University of Toronto Mississauga or University of Toronto Scarborough may be eligible for inclusion.)

First Year:
BIO120H1; plus 1.5 first year Social Science FCEs ( GGR101H1, CHM135H1, CHM136H1 recommended)

Second Year:
1. ENV234H1; FOR200H1, FOR201H1
2. 1.0 FCE from ECO220Y1, ECO227Y1; GGR270H1, GGR271H1; STA220H1, STA221H1
3. 1.0 FCE from BIO220H1, BIO251H1, BIO260H1; GGR205H1, GGR206H1, GGR272H1, GGR273H1, PHL273H1; ENV221H1, ENV222H1, ENV234H1, ENV237H1, ENV238H1

Third Year:
1. FOR301H1, FOR305H1; 1.0 FCE from FOR300H1, FOR302H1, FOR303H1, FOR306H1, FOR307H1, FOR310H1; EEB321H1
2. At least 1.0 FCE from JGE321H1, JGE331H1; ENV320H1, ENV323H1, ENV347H1; GGR321H1

Fourth Year:
1. FOR400Y1, FOR401H1
2. 1.0 FCE from ANT450H1, FOR403H1, FOR416H1, FOR417H1, FOR418H1; ENV421H1, ENV422H1, ENV440H1, JFG470H1, JFG475H1; GGR416H1

An additional 1.0 FCE can be taken from any 3rd or 4th year elective listed above.

Note: If the FOR301H1 is not on offer, a student may use a substitute field or research course from another department. Contact the Forestry Undergraduate Administrator for details and confirmation.

Forest Biomaterials Science Major (Science Program) - ASMAJ1098

Enrolment Requirements:

Enrolment in the Forest Biomaterials Science Major is being administratively suspended as of 1 October 2020 and no new students will be admitted thereafter. Students presently enrolled in the Major will be able to complete the program requirements as described below.
Forest Conservation and Forest Biomaterials Science

Completion Requirements:

The Forest Biomaterials major or minor may be strengthened by an accompanying major or minor(s) in Biology (major, minor), Biochemistry (major, minor), Forest Conservation (major, minor), Chemistry (major, minor), Environmental Chemistry (minor), Materials Chemistry (minor) or Environment & Science (major, minor).

Consult the Program Coordinator, Professor Sally Krigstin, Room 3029; Earth Sciences Centre (416-946-8507)

(8 full courses or their equivalent, including at least 2.0 300-series courses and 2.0 400-series courses; other equivalent and approved courses offered by other Faculties may be eligible for inclusion.)

1. BIO120H1; 1.0 FCE from MSE101H1; ECO101H1, ECO102H1, ECO105Y1; CHM135H1, CHM136H1; MAT135H1
2. FOR200H1, STA220H1; 1.0 FCE from CHM220H1; ENV221H1, ENV234H1; MSE219H1; BCH210H1; BCH242Y1; STA221H1; EEB225H1; MGT201H1, RSM100Y1; BIO220H1, BIO251H1
3. FOR300H1, FOR310H1; 1.0 FCE from FOR201H1, FOR305H1, ENV350H1; MSE316H1; BCH370H1; GGR348H1
4. FOR401H1, FOR410H1; 1.0 FCE from FOR403H1, FOR405H1, FOR420H1, FOR423H1; CHE475H1

An additional 0.5 FCE can be taken from any 3rd or 4th year elective listed above.

Forest Conservation Major (Arts Program) - ASMAJ1102

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

(8 full courses or their equivalent, including at least 1.5 300-series courses and 1.0 400-series course; other equivalent and approved courses offered by other Faculties, University of Toronto Mississauga or University of Toronto Scarborough may be eligible for inclusion.)

First Year:
BIO120H1; plus 2.5 first year Social Science FCEs

Second Year:
1. ENV234H1; FOR200H1, FOR201H1
2. 1.0 FCE from ANT204H1; ECO220Y1, ECO227Y1; GGR270H1; INS201Y1; STA221H1; ENV221H1, ENV222H1; PHL237H1; STA220H1, STA255H1

Third Year:
FOR305H1; 1.0 FCE from FOR300H1, FOR301H1, FOR302H1, FOR303H1, FOR306H1, FOR307H1, FOR310H1; EEB321H1

Fourth Year:
FOR400Y1

An additional 1.0 FCE can be taken from any 3rd or 4th year elective listed above or under the Forest Conservation Specialist (Arts Program).

Forest Biomaterials Science Minor (Science Program) - ASMIN1098

Enrolment Requirements:

Enrolment in the Forest Biomaterials Science Minor is being administratively suspended as of 1 October 2020 and no new students will be admitted thereafter. Students presently enrolled in the Minor will be able to complete the program requirements as described below.

Completion Requirements:

The Forest Biomaterials major or minor may be strengthened by an accompanying major or minor(s) in Biology (major, minor), Biochemistry (major, minor), Forest Conservation (major, minor), Chemistry (major, minor), Environmental Chemistry (minor), Materials Chemistry (minor) or Environment & Science (major, minor).

Consult the Program Coordinator, Professor Sally Krigstin, Room 3029; Earth Sciences Centre (416-946-8507)

(4 full courses or their equivalent, including at least 1.5 FCE 300-series course and 1.0 FCE 400-series courses)
1. 1.5 FCE from BIO120H1; MSE101H1; CHM135H1, CHM136H1, CHM220H1, FOR200H1, ENV234H1, MGT201H1, FOR300H1, FOR310H1; 0.5 FCE from ENV350H1; MSE219H1, MSE316H1, FOR305H1, BCH370H1, GGR348H1
2. 1.0 FCE from FOR401H1, FOR405H1, FOR410H1, FOR420H1, FOR423H1, 0.5 FCE from FOR300H1, FOR310H1; 0.5 FCE from ENV350H1; MSE219H1, MSE316H1, FOR305H1, BCH370H1, GGR348H1
3. 1.0 FCE from FOR401H1, FOR405H1, FOR410H1, FOR420H1, FOR423H1

Forest Conservation Minor (Arts Program) - ASMIN1100

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

(4 full courses or their equivalent)

First Year: 1.0 FCE from ANT100Y1, ECO101H1, ECO102H, ENV200H1, GGR101H1, JEG100H1

Higher Years: 3.0 FCEs from FOR200H1, FOR201H1, FOR300H1, FOR301H1, FOR302H1, FOR303H1, FOR305H1, FOR306H1, FOR307H1, FOR310H1, FOR400Y1, FOR401H1

Forest Conservation Science Minor (Science Program) - ASMIN1102

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

(4 full courses or their equivalent, including at least 1.0 300-series course and 1.0 400-series course)

First Year: 1.0 FCE from BIO120H1, GGR101H1, CHM135H1, CHM136H1

Second Year: FOR200H1, FOR201H1

Third Year: 1.0 FCE from FOR300H1, FOR301H1, FOR302H1, FOR303H1, FOR305H1, FOR306H1, FOR307H1, FOR310H1

Fourth Year: FOR400Y1

Forest Conservation and Forest Biomaterials Science Courses

FOR200H1 - Conservation of Canada’s Forests

Hours: 24L

Forest conservation issues in Canada; development of forest management philosophy in Canadian and temperate forest regions; and concepts of sustainability. Techniques for more sustainable forest management: structural retention; forest certification; old growth; value-added and non-traditional forest products. Field trip fee: $20.

Recommended Preparation: BIO120H1, GGR100H1, GGR101H1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

FOR201H1 - Conservation of Tropical and Subtropical Forests

Hours: 24L

The world’s major tropical and subtropical forest biomes; prospects for conservation and sustainable management; consequences of different forest development strategies; tropical deforestation and selective logging; agroforestry; biodiversity and non-timber forest products; the fuelwood crisis; large carnivore conservation; ecological, economic and social perspectives.

Recommended Preparation: BIO120H1, GGR100H1, GGR101H1
Distribution Requirements: Science; Social Science
Breadth Requirements: Living Things and Their Environment (4)

FOR300H1 - Forest Products in Sustainable Forestry

Hours: 24L/24P

Traditional and non-traditional forest products; wood structure; properties and material attributes; functional characteristics and logistics of wood product industry. Contribution of innovative product development to conservation; adding value; residue use; biorefinery; under-utilized species; wood protection. Forest product certification; eco-labelling; life cycle analysis.

Recommended Preparation: FOR200H1, FOR201H1
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)
FOR301H1 - Field Methods in Forest Conservation

A practical introduction to the field methods used by forest conservationists in Ontario. This field course will last 10 days from August 30 to September 8 approximately. Field exercises will provide students with practical training in tree identification, forest ecosystem classification, forest inventory, stand management prescriptions, tree marking, and silvicultural systems. Each student is required to pay an ancillary fee of $600 to cover the costs of their transportation and accommodation. Students must contact the Faculty to register; we strongly recommend that you do so by the end of May, but later registrations will be considered if class size permits. Not eligible for CR/NCR option.

Recommended Preparation: ENV234H1, FOR200H1, FOR201H1, GGR205H1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

FOR302H1 - Societal Values and Forest Management

Hours: 24L

The course will provide diverse perspectives about societal values and forests, such as Indigenous perspective, ecosystem services and human well-being, climate change and carbon sequestration, and forest management systems, such as community-based forest management and adaptive management systems; and will develop an understanding of the need of integrative approach to address the social, cultural, economic, and scientific issues associated with forest management.

Recommended Preparation: FOR200H1, FOR201H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

FOR303H1 - Human Dimensions of Global Forests

Hours: 24L

Global forest resources; relationships between societies and forests, consumption, trade and valuation of timber and non-timber products; ecosystem services, climate change and forestry, tropical deforestation and softwood lumber dispute.

Recommended Preparation: FOR200H1, FOR201H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

FOR305H1 - Biology of Trees and Forests

Hours: 24L/40P

An overview of the biology of trees and the ecological principles that govern the structure and function of forests. Topics in tree biology will include tree identification, wood anatomy, tree architecture, resource acquisition and allocation, tree growth and mortality. Topics in forest ecology will include resource competition, stand development, species succession, and the cycling of nutrients and energy. This course will include a substantial field and lab component.

Recommended Preparation: FOR200H1, FOR201H1, BIO120H1, BIO220H1, ENV234H1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

FOR306H1 - Tropical Forest Ecology and Conservation Field Course

Hours: 24P

This course will provide practical experience in tropical forest conservation, introducing tools for rapid assessment of biodiversity, analysis of human use and natural disturbance impacts on forest structure and diversity, and the development of effective forest conservation strategies. The 10-day course will be field-based in the country of Dominica, West Indies. Additional fees of $2700 for field course (e.g. accommodation, food, other within course travel expenses). See Faculty website for details. Not eligible for CR/NCR option.

Prerequisite: FOR201H1, FOR301H1 or FOR305H1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

FOR307H1 - Forest Insect Ecology & Management

Hours: 24L/24P

Insect identification and ecology, biodiversity and conservation, invasive species, insect-tree interaction, biological control, pesticide use, and integrated pest management.

Recommended Preparation: FOR301H1 or FOR305H1, EEB380H1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)
FOR310H1 - Bioenergy from Sustainable Forest Management

Hours: 24L/12T

Socio-economic, technical, political and environmental issues associated with the utilization of forest biomass (e.g., harvesting residues, thinnings, salvage, short rotation woody crops) for a source of renewable energy.

Exclusion: GGR310H1

Recommended Preparation: Completion of at least 6 Science FCEs

Distribution Requirements: Science

Breadth Requirements: Society and its Institutions (3)

FOR403H1 - Directed Readings

Hours: 24S

Provides opportunities for students to carry out individual in-depth study of current forest conservation and forest biomaterials issues, under the direction of a faculty member. Not eligible for CR/NCR option.

Prerequisite: Completion of at least 15 FCEs, including 2 courses from FOR300H1/FOR301H1/FOR302H1/FOR303H1/FOR305H1/ FOR306H1/FOR307H1/FOR310H1

Distribution Requirements: Science; Social Science

FOR405H1 - Forest Products, Processing and Water Relations

Hours: 24L/12P

Processing of wood into commercial products focusing on products produced in conjunction with water. Also includes composite manufacturing; specifications and testing; bending; wood drying; spalting and decay protection; life cycle analysis of wood-based products.

Prerequisite: None

Distribution Requirements: Science

Breadth Requirements: The Physical and Mathematical Universes (5)

FOR410H1 - Bioenergy and Biorefinery Technology

Hours: 24L/24T

Technological advances and approaches in deriving biofuels and chemical feedstocks from forest and other biomass. Fundamental chemical attributes of biomass, as they affect the fuel value and potential for deriving liquid, solid and gaseous fuels and valuable chemicals for other applications will be discussed.

Exclusion: FOR425H1 (APSC)

Recommended Preparation: Completion of at least 10 Science FCEs

Distribution Requirements: Science

Breadth Requirements: The Physical and Mathematical Universes (5)
FOR413H1 - Wildlife Ecology & Conservation

Hours: 24L

Temperate and tropical wildlife ecology and conservation; roles of wildlife in forest conservation; impacts of forestry practices and landscape modification on wildlife; ecology and viability of wildlife populations; human uses and abuses of game and non-game species.

Prerequisite: FOR200H1, FOR201H1, EEB319H1, EEB321H1, EEB323H1, EEB324H1, ENV234H1 + Completion of at least 15 FCEs

Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

---

FOR414H1 - Urban Forest Conservation Field Camp

Hours: 45L/15P

A ten day field course examining urban forestry issues in the GTA, southern and eastern Ontario and Quebec. Topics include: urban forest inventories, nursery production, arboricultural techniques, urban woodland management, urban forest health, urban forest administration, urban dendrology, and urban forestry research. Additional fees of $850 for field course (e.g. accommodation, food, other within course travel expenses) will apply. See Faculty website for details. Not eligible for CR/NCR option.

Prerequisite: FOR200H1, FOR201H1, or permission of the instructor.

Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

---

FOR415H1 - Green Urban Infrastructure

Hours: 24L

Trees in and around the city are key to providing multiple engineered and ecological services that only recently have been brought into the responsible fiscal planning of every municipality around the globe. Reviews the role of trees and woodlands in providing environmental, social and economic benefits to urban and peri-urban residents and to the broader environment. Examines approaches to the characterization of urban forest ecosystems, and their planning and management.

Prerequisite: FOR200H1, FOR201H1
Exclusion: FOR421H1 (APSC)

Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

---

FOR416H1 - Ecological Principles of Agroforestry

Hours: 24L

The roles of trees and forests in agricultural land-use systems primarily in the third world. An examination of the biological and management aspects of agroforestry, within the socio-economic constraints of the developing world. The sustainability of particular agroforestry systems is a theme throughout.

Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

---

FOR417H1 - Forest Fire Behaviour and Management

Hours: 24L/24P

Understanding forest fire activity is important for predicting fire's impact on forests and the wildland-urban interface, as well as understanding the impacts of climate change. Basic principles of forest fuel moisture exchange, fire occurrence and fire behaviour are explored. Emphasis is placed on application of these models to real fire management problems.

Prerequisite: One course in quantitative methods, linear algebra or calculus

Recommended Preparation: ECO220Y1, ECO227Y1, GGR270H1, MAT133Y1, MAT137Y1

Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

---

FOR418H1 - Forest Conservation and Forest Biomaterials Science

Hours: 45L/15P

This course provides an overview of the chemistry of wood and wood materials involving cellulose, hemicellulose, lignin, extractives. It also covers some reaction chemistry associated with these chemical components.

Recommended Preparation: Completion of at least 10 Science FCEs

Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)
FOR423H1 - Sustainable Materials Design and Manufacturing

Hours: 24L/24T

This course focuses on the manufacturing processes, properties and uses of wood and agricultural fibre based products including wood based composites, ligno-cellulosic/thermoplastic composites and structural or engineered composites, and the practical use of these products in design.

Exclusion: FOR424H1 (APSC)
Recommended Preparation: Completion of at least 10 Science FCEs
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)
French

Faculty List

University Professor Emeritus
B.T. Fitch, BA, D 3e C (T)

Professor Emeriti
C. Bertrand-Jennings, Lsl., Ph D (University of Toronto Scarborough)
P.A.R. Bouissac, Lsl., DES, D Phil (V)
N. Bourser, DES, CAPES, D 3e C (U)
D. Clandfield, MA, D 3e C (N)
P. Collet, AM, Ph D (SM)
D. de Kerckhove, MA, Ph D (SM)
L.E. Doucette, BA, Ph D (University of Toronto Scarborough)
A.G. Falconer, MA, D 3e C (U)
P. Fitting, MA, Ph D (N)
C.M. Grisé, MA, Ph D(SM)
E.A. Heinemann, MA, Ph D (N)
E.M. Kushner, MA, Ph D (V)
E. Lehouck, AGR ESS, D Phil (U)
M.M. Léon, Lsl., DES, D 3e C (V)
M. Lord, MA, Ph D (University of Toronto Mississauga)
P. Martin, IRAL BR, D 3e C, D Sc A (SM)
N. Maury, LenD, D 3e C (T)
J.A. McClelland, MA, Ph D (V)
P.W. Nesselroth, MA, Ph D (U)
W.A. Oliver, MA, D 3e C (T)
M. O’Neill-Karch, MA, D U Honoris Causa (WW)
J. Paterson, MA, Ph D (I)
P.J.G.O. Perron, BA, D 3e C (U)
Y. Roberge, MA, Ph D (SM)
H.G. Schogt, MA, Ph D (U)
D.W. Smith, BA, Ph D (V)
R.A. Taylor, MA, Ph D (V)
C.D.E. Tolton, AM, Ph D (I, V)
T.R. Wooldridge, BA, D 3e C (T)

Interim Chair of the Department
A.-M. Brousseau MA, Ph D (SM) (until June 30, 2020)

Associate Chair, Graduate Studies
M. Pirvulescu, MA, Ph D (University of Toronto Mississauga) (until June 30, 2020)

Associate Chair, Undergraduate Studies
G. Holtz, MA, D 3e C (V) (until June 30, 2020)

Professors
C. Elkabas, MA, Ph D (University of Toronto Mississauga)
J. LeBlanc, MA, Ph D (V)
R.J. Le Huenen, Lsl., DES, D Phil (V)
P. Michelucci, MA, Ph D (University of Toronto Mississauga)
A. Tcheuyap, MA, Ph D (SM)

Associate Professors
A.-M. Brousseau, MA, Ph D (SM)
J. Cahill, MA, Ph D (I)
S. Drouin, MA, Ph D (University of Toronto Scarborough)
B. Havercroft, MA, Ph D (V)
G. Holtz, MA, D 3e C (V)
D. Kullmann, MA, Ph D (SM)
S. Mittler, MA, Ph D (University of Toronto Scarborough)
A. Motsch, MA, Ph D (V)
J. Ndayiragije, MA, Ph D (University of Toronto Scarborough)
E. Nikiema, MA, Ph D (University of Toronto Mississauga)
M. Pirvulescu, MA, Ph D (University of Toronto Mississauga)

K. Rehner, B.A., B.Ed, TEL, M.Ed, Ph.D. (University of Toronto Mississauga)
P. Riendeau, MA, Ph D (University of Toronto Scarborough)
J. Steele, MA, Ph D (University of Toronto Mississauga)
P. Thériault, MA, Ph D (SM)

Associate Professors, Teaching Stream
C. Beaquais, MA, Ph D (University of Toronto Scarborough)
J. English, MA, Ph D (University of Toronto Scarborough)
C. Evans, MA, Ph D (University of Toronto Mississauga)
K. McCrindle, MA, Ph D (University of Toronto Scarborough)
F. Mugnier-Manfredi, MA, Ph D (University of Toronto Scarborough)

Emerita
G. Paray, MA, Ph D (SM)
S. Sacré, MA, Ph D (SM)
M. Teimenis, MA, Ph D (University of Toronto Scarborough)
M.-A. Visoi, MA, Ph D (SM)

Assistant Professors
F. Hamlaoui, MA, Ph D (SM)
L. Kastronic, MA, Ph D (SM)
I. Kirouac-Massicotte, MA, Ph D (OH)
M.-P. Lory, Lès L., Mès L., Ph D (University of Toronto Mississauga)
A. Rannaud, LèsL., MèsL., Ph.D. (University of Toronto Mississauga)

Assistant Professors, Teaching Stream
M. Friesner, MA, Ph D (SM)
R. Hong, MA, Ph D (University of Toronto Mississauga)

Lecturer
P. Bessler, MA, Ph D (OH)

Introduction

French is not only one of the official languages of Canada: it is also one of the world’s major international languages. Courses in French studies provide a varied, flexible, and in-depth examination of the French language and the multitude of cultures that it serves. The skills and knowledge acquired will lay the groundwork for careers in teaching, journalism, translation, publishing, and government service as well as research in a variety of fields. In the Canadian job market, command of the French language is a definite asset. The Department offers students an integrated curriculum, which brings together courses in language, linguistics, literature, and French culture. Unless specified otherwise, the language of instruction of all courses is French.

Overview of French Programs

The Department offers two specialists (French Language and French Linguistics, French Language and Literature), three majors (French Language Learning, French Language and French Linguistics, French Language and Literature), three minors (French Language, French Studies, Practical French).

Majors

French Language Learning (FRE): The 200-level mandatory course FSL226H1 introduces students to strategies for autonomous learning in French as a Second Language. Courses at the 300 and 400 levels build on knowledge and skills first introduced in FSL226H1 and provide students with more analytical approaches to French language learning, in its both synchronic structure and historical evolution. They encourage students to learn about the richness of culture across the French-speaking world and improve writing skills for subsequent advanced study.
What can I do with a program in French Language Learning? Career paths include:

- provincial and federal government civil service
- language teaching
- media, public relations, journalism, publishing, editing, copywriting, technical writing
- bilingual customer service

Linguistics (FRE): 200-level mandatory courses initiate students into the analysis of contemporary French and its historical development. 300-level courses break the discipline of linguistic analysis into its chief component parts. 400-level courses initiate students to research in a variety of areas including formal linguistics, bilingualism, second language acquisition, and language contact.

What can I do with a program in French Linguistics? Possible career paths include:

- provincial and federal government civil service
- health professions such as speech pathology, speech therapy, audiology
- language teaching
- computer applications in speech & text recognition, programming
- media, public relations, journalism, publishing, editing, copywriting, technical writing
- bilingual customer service

Literature (FRE): 200-level mandatory courses introduce students to concepts, methodologies, and critical tools elaborated vis-à-vis further literature and theory and that serve as the framework for other literature courses dedicated to the history of French literature and its cultural and social contexts. 300-level courses encourage students to explore sophisticated primary and secondary sources from disciplinary and interdisciplinary perspectives. 400-level courses initiate students to research. The actual content of most 400-level courses varies considerably according to the instructor. Students should consult the French Studies Undergraduate brochure (www.french.utoronto.ca/undergraduate) for content specific to a given year.

What can I do with a program in French Literature? Possible career paths include:

- provincial and federal government civil service
- language teaching
- media, public relations, journalism, publishing, editing, copywriting
- library and information sciences
- foreign services/affairs, international development
- bilingual customer service

Minors

French Language and Practical French: The French language program is designed to accommodate the widest range of previous learning experiences and particular interests of students. Emphasis is placed on both written and spoken language; at higher levels, half-courses allow for specialized study of one or the other.

What can I do with a program in French language? Career paths include:

- provincial and federal government civil service including as a bilingual immigration or customs officer
- private sector positions as a bilingual customer service agent or flight attendant

Students enrolled in two or more French programs are allowed to double-count only 1.0 FCE towards their French programs.

Important policies re French as a Second Language (FSL) courses

The following policies must be respected when registering for French courses. Failure to do so may result in students being automatically withdrawn by the Department from the course in which they are registered:

1) Determining the appropriate level of your first French course: The Department places students in the language course appropriate to their level of linguistic competence based on the results of its Placement Test. Given that 100, 200, 300 and 400-level FSL courses correspond to levels of competence in French and not to years of study, a student may be recommended to enroll in a course at a higher level than his/her year of study. The Placement Test, available at http://www.lang.utoronto.ca/placement/french/, is mandatory for all students who wish to register in an FRE or FSL course for the first time (except true beginners with no knowledge of French who may enroll directly in FSL100H1). The Test can be taken only ONCE and the results of the first test will prevail in the event of multiple attempts. Ideally, the Placement Test should be taken in the term preceding the one in which students wish to register in (e.g., for a course starting in September, students should take the Placement Test in the summer term, prior to their registration date on ACORN and before the beginning of classes). Please allow three to five working days to obtain your test results. Self-placement is not allowed in the Department of French. The administration reserves the right to conduct an additional test if in doubt about a student's undeclared proficiency in French.

2) Sequencing: Students are reminded that they must take FSL courses in the appropriate sequencing (100>200>300>400). In particular,

- If placed at a higher level than FSL221Y1 by the Placement Test, students registered in a Major program must take FSL271H1 before any FSL300 or 400-level course.

3) Auditing: No auditing is allowed in FSL courses.

Study Elsewhere Programs

For more information, please go to https://www.french.utoronto.ca/undergraduate-program/study-elsewhere or email: french.elsewhere@utoronto.ca

Quebec, France and Belgium

Students who have completed at least one year of full-time studies and wish to study abroad for one or two semesters should contact the University of Toronto Centre for International Experience Office, or consult their website. Students may request credit for a course offered by the Department of French, subject to the general rules for eligibility.

Third Year Study Elsewhere: In order to be permitted to participate in this program, a student must satisfy the following requirements:
French Programs

French Language and French Linguistics Specialist (Arts Program) - ASSPE0525

Enrolment Requirements:

This program has no specific admission requirements. All students who have completed at least 4.0 full-course equivalents are eligible to enrol.

Completion Requirements:

(10 full courses or their equivalent):

1) FSL221Y1 (63%). Students not placed in FSL221Y1 or higher by the Placement test must first complete FSL121Y1 before starting this program. Students exempted from FSL221Y1 must replace it with FSL271H1 and any FSL or FRE half-course. FSL271H1 must be completed before enrolling in any higher-level FSL course.

2) FSL321Y1 (Students exempted from this course may replace it with any FRE course): FRE272H1, FRE273H1, FRE274H1, FRE210H1, FRE245H1.

3) FRE376H1, FRE378H1, FRE386H1, and FRE387H1, FRE383H1, FRE379H1, and JFG388H1.

4) 2.0 full-course equivalents from among 400-level French linguistics courses (FRE486H1, FRE487H1, FRE488H1, FRE489H1, FRE490Y1, FRE491H1, FRE492H1).

French Language and Literature Specialist (Arts Program) - ASSPE1295

Enrolment Requirements:

This program has no specific admission requirements. All students who have completed at least 4.0 full-course equivalents are eligible to enrol.

Completion Requirements:

(10 full courses or their equivalent):

1) FSL221Y1 (63%). Students not placed in FSL221Y1 or higher by the Placement test must first complete FSL121Y1 before starting this program. Students exempted from FSL221Y1 may replace it with any FRE200+ or FRE300+ level course.

2) FSL321Y1. Students exempted from FSL321Y1 may replace it with two FRE half-courses at the 300+ level; FRE210H1, FRE245H1, FRE246H1, FRE272H1, FRE273H1.

3) 1.0 full-course equivalent from Group 1 – Literary History (FRE318H1, FRE319H1, FRE320H1, FRE324H1, FRE326H1, FRE344H1); 1.0 full-course equivalent from Group 2 – Genres and Gender (FRE304H1, FRE310H1, FRE345H1); 1.0 full-course equivalents are eligible.
French Language and French Linguistics Major (Arts Program) - ASMAJ0525

Enrolment Requirements:
This program has no specific admission requirements. All students who have completed at least 4.0 full-course equivalents are eligible to enrol.

Completion Requirements:

(7 full courses or their equivalent):

1) FSL221Y1 (63%). Students not placed in FSL221Y1 or higher by the Placement test must first complete FSL212Y1 before starting this program. Students exempted from this course must replace it with FSL271H1 and any FSL or FRE half-course. FSL271H1 must be completed before enrolling in any higher-level FSL course.

2) FRE272H1, FRE273H1, FRE274H1; 0.5 full-course equivalent among FRE210H1, FRE245H1, FSL321Y1. Students exempted from this course may replace it with any FRE course.

3) FRE376H1, FRE378H1, FRE383H1 and FRE379H1, JFG388H1.

4) 1.0 full course equivalent from among 400-level French linguistics courses (FRE486H1, FRE487H1, FRE488H1, FRE489H1, FRE490Y1, FRE491H1, FRE492H1).

French Language and Literature Major (Arts Program) - ASMAJ1295

Enrolment Requirements:
This program has no specific admission requirements. All students who have completed at least 4.0 full-course equivalents are eligible to enrol.

Completion Requirements:

(7 full courses or their equivalent)

1) FSL221Y1 (63%). Students not placed in FSL221Y1 or higher by the Placement test must first complete FSL212Y1 before starting this program. Students exempted from this course may replace it with any FRE 200+ or 300+ level course.

2) FRE210H1, FRE245H1, FRE246H1, FRE272H1, FSL321Y1. Students exempted from FSL321Y1 may replace it with two FRE half-courses at the 300+ level.

French Language Learning Major (Arts Program) - ASMAJ0120

Enrolment Requirements:
This program has no specific admission requirements. All students who have completed at least 4.0 full-course equivalents are eligible to enrol.

Completion Requirements:

(7 full courses or their equivalent including at least 1.5 F.C.E.s FRE courses at the 300+ level)

1) FSL221Y1 (63%). Students not placed in FSL221Y1 or higher by the Placement test must first complete FSL212Y1 before starting this program. Students exempted from this course must replace it with FSL271H1 and any FSL or FRE half-course. FSL271H1 must be completed before enrolling in any higher-level FSL course.

2) FRE226H1, FRE227H1, FRE273H1, FSL321Y1. Students exempted from this course must replace it with 1.0 FCE from the following FRE courses: FRE210H1, FRE245H1, FRE246H1, FRE274H1.

3) FRE383H1, FRE379H1, JFG388H1, FSL421Y1.

4) FSL442H1, FSL443H1.

French Studies Minor (Arts Program) - ASMIN1135

Enrolment Requirements:
This program has no specific admission requirements. All students who have completed at least 4.0 full-course equivalents are eligible to enrol.

Completion Requirements:

(4 full courses or their equivalent)

1) FSL221Y1 (Students not placed in FSL221Y1 or higher by the Placement test must first complete FSL212Y1 before starting this program. Students exempted from FSL221Y1 must replace it with FSL271H1 and any FRE half-course).

2) Three FRE courses at the 200+ level including one full course equivalent at the 300/400-level.
Minor in French Language (Arts Program) - ASMIN0120

Enrolment Requirements:

This program has no specific admission requirements. All students who have completed at least 4.0 full-course equivalents are eligible to enrol.

Completion Requirements:

(4 full-courses or their equivalent)
1) FSL121Y1
2) FSL221Y1 (63%)
3) FSL321Y1
4) FSL421Y1/1.0 FCE in 200-level FRE courses (FRE210H1, FRE226H1, FRE245H1, FRE246H1, FRE272H1, FRE273H1, FRE274H1)

Minor in Practical French (Arts Program) - ASMIN0556

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

4 full courses or their equivalent
1. FSL221Y1 (63%). Students exempted from this course must replace it with FRE245H1/FRE272H1 and any half-course listed immediately below.
2. 1.0 full course equivalent among the following: FSL312H1, FSL313H1, FSL314H1, FSL315H1
3. FSL375Y1
4. FSL473H1, 0.5 FCE from the following: FSL415H1, FSL472H1, FSL475H1

French Courses

FSL100H1 - French for Beginners

Hours: 24L/12T

An intensive basic course in spoken and written French for students who have no knowledge of French: comprehension, speaking, reading, and writing.

Exclusion: FSL102H1 and higher.
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

FSL102H1 - Introductory French

Hours: 24L/12T

An intensive basic course in spoken and written French for students who have studied some French, but who have not yet attained the entry level for FSL121Y1.

Prerequisite: FSL100H1 or, upon first FRE/FSL enrolment, equivalent as determined by the French Placement Test.
Exclusion: FSL121Y1 and higher.
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

FSL121Y1 - French Language I

Hours: 48L/48T

Intended for students having some knowledge of French but wishing to increase their proficiency to that of normal University entrance. Offers training in written and spoken French; reinforcement of reading comprehension and aural abilities; and an introduction to French-Canadian and Québécois cultures.

Prerequisite: FSL102H1 or, upon first FRE/FSL enrolment, equivalent as determined by the French Placement Test.
Exclusion: FSL221Y1 and higher.
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

Students should note that, as explained in this Calendar, the Language Citation is not equivalent to an academic program and that enrolment in a program is not necessary in order to earn the recognition bestowed by the Citation.

Faculty of Arts & Science Language Citation

The Department of French participates in the Faculty of Arts and Science's Language Citation initiative for French.

In order to receive a language citation in French Studies, students should have completed two FCE (Full Course Equivalents) FSL courses at the 300+ level or two FCE FRE courses at the 200+ level with a minimum grade of B- in each course. Please note that a combination of both FRE and FSL courses cannot qualify for the citation.
FCS194H1 - Urban Youth Languages of the World

Hours: 24S

Are there such phenomena as urban youth "languages"? How do they evolve and what commonalities or divergences are there? In this course, we will survey a range of urban youth languages that have emerged in African, North American and European contexts – with specific focus on their structural (linguistic) and social typicalities. Discussions and presentations will focus on the sociolinguistic concepts of language contact, bi/multilingualism, lexical innovation/renovation, language mixing, etc. in relation to youth language practices. We will be comparing major varieties of these language practices within and between the continents, and also be assessing their prospects and implications for language change. This course is taught in English. Restricted to first-year students. Not eligible for CR/NCR option.

Prerequisite: None
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

FCS195H1 - French Culture from Napoleon to Asterix

Hours: 24L

A multi-media course, analyzing the contributions the French have made to world culture in such domains as architecture, art, literature, and music, as well as some of the implications of the appropriation of French cultural icons by big business and the media.

Prerequisite: None
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

FCS196H1 - Exploring Linguistic Variation in Spoken French

Hours: 24S

"R texting n tweeting like" ruining the language? Do young people speak differently than older people? Are teenagers causing language change? How do we adapt the way we speak in certain situations? Are some varieties of French better than others? In this practical introduction to variationist sociolinguistics, we will investigate these and similar questions through the analysis of linguistic variation and change in multiple varieties of French. No knowledge of French is necessary. The course will be held in English. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

FCS197H1 - Pleasure, Pain and Nostalgia in Belle Époque

Hours: 24L

This course will explore ideas and cultural representations of 19th century France through examples from art, philosophy, and literature with an emphasis on the critical discussion of two literary narratives that challenged tradition and authority: Flaubert's "Madame Bovary" and Maupassant's "Bel-ami". The course will be held in English. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

FCS198H1 - Dreaming of Future Worlds: The Making of Modernity in 19th-Century France

Hours: 24L

This interdisciplinary course will analyze the different forms of the imagination of future and the debates between different conceptions of modernity in 19th-century France. From different perspectives, the students will be invited to reflect on the role of utopian imagination, on the emergence of social sciences, and on the force of the philosophies of progress. The course will be held in English. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

FCS199H1 - Marketing in the French Speaking World

Hours: 24S

This course investigates sociocultural and linguistic issues surrounding market expansion and marketing of products and services to French-speaking audiences in Canada and elsewhere. Students consider challenges posed by increased globalization through comparisons of English- and French-speaking communities, while exploring basic marketing theory. Through case studies of successes and failures, students examine how companies develop and adapt branding and messaging for Francophone audiences by integrating differences in humour, values, politics, and financial considerations. Students thus develop an understanding of the Francophone consumer and gain skills for advertising and branding in a Francophone or bilingual environment. This course is taught in English. Restricted to first-year students. Not eligible for CR/NCR option.

Prerequisite: None
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)
FRE210H1 - Introduction to Québec Literature and Culture

Hours: 24L/12T

An introduction to various aspects of Québec literature and culture through the study of literary texts, cinema, and artistic productions, and their role in the evolution of a distinct Québec society. The course also familiarizes students with important socio-cultural and political events, which participated in the evolution of Québec society and provide a better understanding of Québec literature.

Prerequisite: FSL221Y1 or, upon first FRE/FSL enrolment, equivalent as determined by the French Placement Test
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

FSL221Y1 - French Language II

Hours: 48L/48T

Intended for those who have some knowledge of French, this course is the first in a proficiency-sequenced series that provides students with the opportunity to become proficient, focused, autonomous French language learners. Adopting a principally actional approach to second language learning targeting Level A2 objectives of the Common European Framework of Reference for Languages (CEFR), the course’s main objective is to provide a communicative learning environment through activities based in real-world, everyday contexts.

Prerequisite: FSL121Y1 or, upon first FRE/FSL enrolment, equivalent as determined by the French Placement Test
Exclusion: Any FSL 300-level course and higher
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

FRE245H1 - Introduction to French Cultural and Literary Studies

Previous Course Number: FRE240H1
Hours: 24L/12T

This course is a practical introduction to concepts, methods and problems of literary analysis as well as an overview of French artistic culture. Using elements of comparison from fine arts, contemporary and popular culture (including novels and movies) and a variety of emblematic works of French and Francophone literatures (among others: essays by Voltaire, Montesquieu and Simone de Beauvoir; poems by Ronsard, Hugo, Baudelaire and Césaire; excerpts from novels by George Sand, Albert Camus and Patrick Chamoiseau), its objective is to provide students with a practical introduction to the tools of literary analysis, but also to help them better read, understand and appreciate literary texts.

Prerequisite: FSL221Y1 or, upon first FRE/FSL enrolment, equivalent as determined by the French Placement Test.
Exclusion: FRE240H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

FRE246H1 - Introduction to French Literary Analysis

Previous Course Number: FRE241H1
Hours: 24L/12T

This course provides a general introduction to French and francophone literature of different genres and periods. Special emphasis will be placed on concepts, methods, and problems of literary analysis with the goal of helping students to improve their ability to write literary essays. Among the questions to be explored are: What are the rules and conventions of scholarly writing? How does one develop and structure arguments to ensure that a paper is well organized? How are rhetorical devices analyzed? When and how should bibliographical references be inserted?

Prerequisite: FRE245H1 and FSL221Y1 or, upon first FRE/FSL enrolment, equivalent as determined by the French Placement Test.
Exclusion: FRE241H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

FRE226H1 - Tools and Strategies for Learners of French

Hours: 36L/12T

This course provides learners with an understanding of how one best acquires French as a second or third language including tools and strategies that allow for effective, autonomous learning. Students will first learn about the types of knowledge and sub-skills that must be acquired to master French including vocabulary and grammar as well as the four main competences (reading, writing, listening, and speaking). They will then receive practical training in the use of online resources including French language corpora and automatic assessment tools.

Prerequisite: FSL221Y1 or, upon first FRE/FSL enrolment, equivalent as determined by the French Placement Test.
Exclusion: FRE225Y1, any FSL 300+ courses and higher.
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)
FSL271H1 - French Grammar, within Reason

Hours: 36L

An introduction to basic concepts of the French grammar from an analytic and descriptive point of view. Exploration of traditional grammar concepts such as subject, predicate, complement. This course provides understanding of the logic that is often hidden by the apparent complexity of grammatical rules.

Prerequisite: FSL121Y1 or, upon first FRE/FSL enrolment, equivalent as determined by the French Placement Test
Exclusion: Any FSL 300-level course and higher.
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

FRE272H1 - The French Language: A Linguistic Introduction

Hours: 24L/12T

A general introduction to the structure of French language, from a linguistic perspective. Students will become acquainted with the various components of the language (sound, meaning, word formation, sentence structure) through detailed description and basic analysis of Canadian and European varieties of French. Students will also be introduced to the study of French in the context of bilingualism (second language acquisition, sociolinguistics). This course is mandatory in all specialist and major programs.

Prerequisite: FSL221Y1 or, upon first FRE/FSL enrolment, equivalent as determined by the French Placement Test
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

FRE273H1 - Introduction to the History of the French Language

Hours: 24L/12T

A discovery of a long and fascinating history, stretching from the spoken Latin of the Gauls to the many varieties of French found today all over the world via the investigation of the social, political, and cultural causes of language change. Our focus includes topics such as medieval bilingualism, the regulation of language through the Académie française, the political use of the French language, the emergence of the Francophonie and modern Canadian French.

Prerequisite: FSL221Y1 or, upon first FRE/FSL enrolment, equivalent as determined by the French Placement Test.
Recommended Preparation: FRE272H1
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

FRE274H1 - Introduction to the Linguistic Analysis of French

Hours: 24L/12T

An analytical study of contemporary French phonetics and phonology, morphology, syntax and semantics. This course is designed to prepare students for more advanced study of French linguistics at the 300 and 400 levels.

Prerequisite: FRE272H1
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

FCS290H1 - Special Topics in French Cultural Studies I

Hours: 24L

The relation of French popular culture to society. For more information, see http://www.french.utoronto.ca/undergraduate/courses/french_cultural_studies.

Prerequisite: None
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

FCS291H1 - Special Topics in French Cultural Studies I

Hours: 24L

The relation of French popular culture to society. Please go to the French Department website http://www.french.utoronto.ca/undergraduate/courses/french_cultural_studies for the course description.

Prerequisite: None
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)
FCS292H1 - Special Topics in French Cultural Studies I

Hours: 24L

The relation of French popular culture to society. For more information, see http://www.french.utoronto.ca/undergraduate/courses/french_cultural_studies

Prerequisite: None
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

FRE299Y1 - Research Opportunity Program

Credit course for supervised participation in faculty research project. Details at https://www.artsci.utoronto.ca/current/academics/research-opportunities/... Not eligible for CR/NCR option.

Distribution Requirements: Humanities

FRE304H1 - Contemporary French Women's Prose Fiction

Hours: 24L

An analysis of selected prose texts of the last hundred years written by major French women authors, emphasizing themes and textual strategies used to represent the female subject, her relationship to language, and the role of ethnicity, class, and gender in the construction of identity.

Prerequisite: FRE240H1/FRE245H1, FRE241H1/FRE246H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

FRE310H1 - Relations between Text and Other Media

Hours: 24L

Literary texts and other forms of media (photographs, cinematographic images, paintings) have been associated in a fascinating relation in hundreds of works of French literature. An exploration of this inextricable weaving together of verbal and visual experiences as it pertains to literature through the study of interdisciplinary theoretical texts focused on photography, painting, and cinema.

Prerequisite: FRE240H1/FRE245H1, FRE241H1/FRE246H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

FSL312H1 - Writing French: the Language of the Media

Previous Course Number: FSL362H1
Hours: 36L

Using current online French media, broaden your understanding of the French language; deepen your grammatical knowledge; expand your vocabulary (including idioms); review key aspects of French syntax; and fine-tune your reading skills in French. Weekly reading and writing workshops are an integral part of this course.

Prerequisite: FSL221Y1 (63%) or, upon first FRE/FSL enrolment equivalent as determined by the French Placement Test.
Exclusion: FSL321Y1 and higher
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

FCS310Y1 - French Cinema

Hours: 48L/48P

Cinema in France with emphasis on theory and practical criticism, on auteurs and movements such as the avant-garde of the twenties and the New Wave of the late fifties. Films shown are subtitled.

Prerequisite: At least 5 course credits in any subject
Recommended Preparation: INI115Y1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)
FSL313H1 - French for the Workplace

Previous Course Number: FSL363H1
Hours: 36L

This course is designed to enhance students’ existing knowledge of French by giving them a theoretical as well as a practical foundation in the use of French language in the workplace. Special emphasis will be placed on the appropriate vocabulary used within the context of communication in the Francophone workplace. Students will learn how to communicate in a variety of professional contexts as well as how to distinguish between the formal and informal styles of French suitable for diverse situations in the workplace. This course also aims to help students acquire intercultural skills needed in the Francophone workplace.

The redesigned course will provide a hybrid alternative that delivers the same high quality content and high degree of interaction present in traditional in-class course delivery. The new format will consist of weekly one-hour online sessions and two-hour traditional in-class sessions. In this format, further preparation work and homework will continue to be carried on as in the traditional course, i.e. outside of the 3-hour class time.

Prerequisite: FSL221Y1 (63%) or, upon first FRE/FSL enrolment equivalent as determined by the French Placement Test
Exclusion: FSL321Y1 and higher
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

FRE314H1 - Quebec and French-Canadian Literature

Hours: 24L

Literature of the 20th and 21st centuries speaks of contesting social and literary figures of authority, of challenging traditional literary structures, and of accentuating creativity and subjectivity. An exploration of the thematic and formal structures that challenge traditional forms of thinking and writing in contemporary literature from Québec and other French-speaking parts of Canada.

Prerequisite: FRE240H1/FRE245H1, FRE 241H1/FRE246H1
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

FSL314H1 - French for the Arts

Previous Course Number: FSL364H1
Hours: 36L

Introduction to the study of central themes in French artistic expression, designed to familiarize students with key concepts and vocabularies relevant to the subject. Study of modes of artistic representation, (visual, performing arts) and their contribution to the rich heritage and identity of French culture. Observation, description and analysis of various artistic mediums.

Prerequisite: FSL221Y1 (63%) or, upon first FRE/FSL enrolment equivalent as determined by the French Placement Test
Exclusion: FSL321Y1 and higher
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

FSL315H1 - French Oral Communication for Professional and Academic Contexts

Hours: 36L

This course is designed for students who wish to develop their oral communication skills in French in preparation for bilingual employment, community service, and academic activities in Canada and abroad. Emphasis is placed on the development of skills for accurate oral language use in professional and academic contexts: researched oral presentations, debates, interviews, and student-led discussions. Students will learn how to adapt their speaking style and register to different audiences and situations, use appropriate vocabulary, and self-correct.

Prerequisite: FSL221Y1 (63%) or, upon first FRE/FSL enrolment equivalent as determined by the French Placement Test
Exclusion: FSL321Y1 and higher
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

FRE318H1 - Medieval French Literature

Hours: 24L

Religious fervour, chivalry, romance and ribald humour, heroic deeds, marvellous adventures, and exotic travels as found in selected texts from the French Middle Ages. Readings in modern French translations with appropriate reference to the original language.

Prerequisite: FRE240H1/FRE245H1, FRE241H1/FRE246H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)
FRE319H1 - Laughter and Thought in French Renaissance Literature

Hours: 24L

An overview of the fascinating literary diversity, prose, theatre and poetry essential to the changing humanistic discourse of the French Renaissance and Baroque periods. The underscoring of important historical events - Reformation, Great Discoveries, Printing - to explain the philosophical and literary values produced by such violent times.

Prerequisite: FRE240H1/FRE245H1, FRE241H1/FRE246H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

FRE320H1 - French Literature of Classicism and Enlightenment

Hours: 24L

An introduction to French literature between Classicism and the French Revolution with particular emphasis on its relationship to philosophical, cultural, and political movements of the Enlightenment, providing historical depth to philosophical and socio-political foundations of today’s life. A privileged access to, and critique of, modernity in the postmodern age.

Prerequisite: FRE240H1/FRE245H1, FRE241H1/FRE246H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

FRE324H1 - French Literature in the Time of Revolutions and Industrialization

Hours: 24L

The long 19th century (1789-1914) is characterized by change: from political upheavals to literary, scientific, and media revolutions, the spread of literacy, and the rapid development of industrialization and colonization. A study of the evolution of literature (genres, forms, movements), as influenced by these changing socio-political and economic contexts.

Prerequisite: FRE240H1/FRE245H1, FRE241H1/FRE246H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

FRE326H1 - Contemporary French Literature

Hours: 24L

Characterized by experimentation and the crisis of representation, French literature of the 20th and 21st centuries has undergone numerous transformations in form, content, and generic boundaries. A study of these literary movements, trends, and transgressions in poetry, prose, and theatre.

Prerequisite: FRE240H1/FRE245H1, FRE241H1/FRE246H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

FSL321Y1 - French Language III

Hours: 48L/24T

The course is intended for students who have already mastered the basic competences in French language proficiency. The textbook used in this course will follow the B1 level of the Common European Framework of Reference for Languages (CEFR) in its active approach which puts emphasis on the student being at the centre of the learning process. Students will learn the following intermediate-level language skills: writing, speaking as well as understanding written and spoken French.

Prerequisite: FSL221Y1 (63%) or, upon first FRE/FSL enrolment, equivalent as determined by the French Placement Test
Exclusion: FSL375Y1 and higher. May not be taken concurrently with any FSL31*H1 series courses.
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

FRE332H1 - Francophone Literatures

Hours: 24L

A comprehensive introduction to Francophone literatures and cultures, examining the linguistic, aesthetic, and discursive specificities as represented by authors of the Francophone world. Focus on the concepts of colonialism, representation, alienation, emigration, and nationalism.

Prerequisite: FRE240H1/FRE245H1, FRE241H1/FRE246H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

</table>
FRE378H1 - French Syntax

Hours: 24L

A study of the distribution and relationships of the syntagmatic components of contemporary French; of sentential structure, including the principles of coordination, subordination and expansion; and of major theoretical approaches.

Prerequisite: FRE272H1 + FRE274H1
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

FRE379H1 - Sociolinguistics of French

Hours: 24L

The relationship between language use and social factors such as socio-economic status, social context and gender of speaker. Theoretical notions are derived through the analysis of specific data, focusing on Canadian French and other varieties spoken in the Americas.

Prerequisite: FRE272H1 + FRE383H1
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

FRE383H1 - Quantitative Methods for the Study of French

Hours: 24L

An introduction to the foundations of quantitative research on French. Topics include differences between quantitative and qualitative analyses; hypothesis formulation; experimental design; and data collection and analysis including basic statistical methods. Phenomena investigated come from Canadian and European varieties as well as studies of second language learners.

Prerequisite: FRE272H1
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

FRE384H1 - Teaching French as a Second Language

Hours: 24L

This course provides an introduction to recent methods and pedagogical materials published in France and Canada. Emphasis is put on the various approaches in teaching French as a Second Language, with reference to theoretical issues and historical background.

Prerequisite: FRE226H1/FRE225Y1, FRE272H1, FSL321Y1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

FRE386H1 - French Semantics

Hours: 24L

Various approaches to the notion of meaning; its functioning at all levels of representation.

Prerequisite: FRE272H1
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

FRE387H1 - French Morphology

Hours: 24L

A study of the morphological system of modern French, its relationship to syntax and phonology; theoretical notions derived from the analysis of specific data.

Prerequisite: FRE272H1 + FRE274H1
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)
JFG388H1 - Bilingualism, Multilingualism, and Second Language Acquisition

**Previous Course Number:** FRE388H1  
**Hours:** 24L/12T

Knowing and speaking more than one language is the everyday norm of people living in much of the world including in multicultural cities like Toronto. Via an in-depth introduction to the cognitive and social underpinnings of bi- and multilingualism including second language acquisition, this course provides answers to questions such as *How do bilinguals/multilinguals differ from monolinguals in the ways that they process and use language? How does acquiring a language as an adult differ from when we are children? How do an individual’s language repertoires interact with those of their peers and local community?*

**Prerequisite:** (1) Any 100-level or higher language course OR introductory linguistics course (e.g., LIN200H1, FRE272H1, ITA360H1, SLA323H1/SLA380H1, SPA322H1); (2) At least 4 FCEs in any subject.  
**Exclusion:** FRE388H1  
**Distribution Requirements:** Humanities  
**Breadth Requirements:** Thought, Belief and Behaviour (2)

FCS390H1 - Special Topics in French Cultural Studies II

**Hours:** 24L

Studies on an individual writer or specific area of literature. For more information, see [http://www.french.utoronto.ca/undergraduate/courses/french_cultural_studies](http://www.french.utoronto.ca/undergraduate/courses/french_cultural_studies).  
**Prerequisite:** At least 5 courses in any subject  
**Distribution Requirements:** Humanities  
**Breadth Requirements:** Creative and Cultural Representations (1)

FCS391H1 - Special Topics in French Cultural Studies II

**Hours:** 24L

Studies on an individual writer or a specific area of literature. For more information, see [http://www.french.utoronto.ca/undergraduate/courses/french_cultural_studies](http://www.french.utoronto.ca/undergraduate/courses/french_cultural_studies).  
**Prerequisite:** At least 5 course credits in any subject  
**Distribution Requirements:** Humanities  
**Breadth Requirements:** Creative and Cultural Representations (1)

FCS392H1 - Special Topics in French Cultural Studies II

**Hours:** 24L

Studies on an individual writer or specific area of literature. The relation of French popular culture to society. For more information, see [http://www.french.utoronto.ca/undergraduate/courses/french_cultural_studies](http://www.french.utoronto.ca/undergraduate/courses/french_cultural_studies).  
**Prerequisite:** At least 5 courses in any subject  
**Distribution Requirements:** Humanities  
**Breadth Requirements:** Creative and Cultural Representations (1)

FRE398H0 - Research Excursions

**Distribution Requirements:** Humanities

FRE398Y0 - Research Excursions

**Distribution Requirements:** Humanities

FRE399Y1 - Research Opportunity Program

Credit course for supervised participation in faculty research project. Details at [https://www.artsci.utoronto.ca/current/academics/researchopportunities/...](https://www.artsci.utoronto.ca/current/academics/researchopportunities/...). Not eligible for CR/NCR option.
FRE410H1 - Advanced Topics in Quebec Literature:

Hours: 24S

An advanced interdisciplinary research seminar devoted to specific issues of Québécois literature and culture. Focus on a literary genre, a particular subject matter, a literary movement, or based on a multidisciplinary approach to cinema, arts, and music. For more information, see https://www.french.utoronto.ca/undergraduate

Prerequisite: FRE240H1/FRE245H1, FRE241H1/FRE246H1, FRE345H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

FSL415H1 - Business French

Hours: 36S

This course is designed to strengthen oral and written communication skills in French and develop intercultural competence for a variety of career paths including public relations, international development, federal and provincial government. Students will gain expertise in spoken and written French through in-class activities supported by multimedia: interviews, professional presentations, and debates. The course is not open to native French speakers.

Prerequisite: FSL321Y1, FSL315H1
Exclusion: FSL421Y1; not open to native speakers of French. According to our departmental enrollment guidelines, native speakers of French are excluded from all FSL courses with the exception of those needing to improve their written or oral skills who must request permission from the Associate Chair, Undergraduate Studies. Such students will be asked to complete the Placement Test at the Department.
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

FSL421Y1 - French Language IV

Hours: 72L

An advanced course in French including the reading and discussion of texts focusing on the francophone presence and influence in the international context. Emphasis is placed on mastery of complex linguistic skills via use of a variety of reference tools and self-correction.

Prerequisite: FSL321Y1 or, upon first FRE/FSL enrolment, equivalent as determined by the French Placement Test.
Exclusion: FSL442H1, FSL443H1.
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

FRE438H1 - Advanced Topics in Francophone Literatures

Hours: 24S

An advanced seminar dedicated to specific issues of the Francophone literature and culture. Focusing on an author, a literary genre, or based on a multidisciplinary approach involving cinema, arts and music, each seminar reflects the professor’s current research. For more information, see https://www.french.utoronto.ca/undergraduate

Prerequisite: FRE240H1/FRE245H1, FRE241H1/FRE246H1, FRE345H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

FRE441H1 - Advanced Topics in French Literature

Hours: 24S

An advanced, research-oriented seminar devoted to specific issues of French literature and culture. Focus on a literary genre, a particular subject or literary movement, or based on a multidisciplinary approach involving cinema, arts, and music. For more information, see https://www.french.utoronto.ca/undergraduate

Prerequisite: FRE240H1/FRE245H1, FRE241H1/FRE246H1, FRE345H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

FSL442H1 - French Language V: Written French

Hours: 36L

Designed for students who wish to consolidate and perfect their writing abilities. Skills developed include the mastery of register-based differences; use of rhetorical and stylistic techniques; systematic self-correction; and the advanced use of reference tools including on-line dictionaries.

Prerequisite: FSL421Y1 or, upon first FRE/FSL enrolment, equivalent as determined by the French Placement Test
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)
FRE443H1 - Advanced Topics: Authors

Hours: 24S

An advanced, research-oriented seminar devoted to questions concerning the authors practice, originality, and oeuvre. Production, performance and prominence, characteristic genres, religious and philosophical thought, theoretical reflection on literature, language, and belonging as aspects of the analysis of one single authors body of writing. For more information, see https://www.french.utoronto.ca/undergraduate

Prerequisite: FRE240H1/FRE245H1, FRE241H1/FRE246H1, FRE345H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

FRE471H1 - Medieval French Language

Hours: 12T/24S

This course aims to ensure an understanding of Old French, to read most of the medieval texts. From a selection of texts, it explores the form of the language in various centuries and regions and provide a basis for understanding the history of the French language. This course is also listed in the offerings of the Graduate department of French.

Prerequisite: FRE272H1/FRE273H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

FSL443H1 - French Language V: Oral French

Hours: 36L

Designed for students who wish to consolidate and perfect their speaking abilities. This is accomplished through the preparation of longer oral productions involving a rich vocabulary and contextually-appropriate speech registers. Focus on overall pronunciation including fine phonetic detail and fluency.

Prerequisite: FSL421Y1 or, upon first FRE/FSL enrolment, equivalent as determined by the French Placement Test.
Exclusion: Not open to fluent or native speakers of French.
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

FRE446H1 - Advanced Studies in Literary Theory

Hours: 24S

An advanced, research-oriented course devoted to specific issues in French literary theory. Focus on particular theoretical concepts, paradigms, schools, trends, movements or major thinkers. For more information, see https://www.french.utoronto.ca/undergraduate

Prerequisite: FRE240H1/FRE245H1, FRE241H1/FRE246H1, FRE345H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

FRE471H1 - Medieval French Language

Hours: 12T/24S

This course aims to ensure an understanding of Old French, to read most of the medieval texts. From a selection of texts, it explores the form of the language in various centuries and regions and provide a basis for understanding the history of the French language. This course is also listed in the offerings of the Graduate department of French.

Prerequisite: FRE272H1/FRE273H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

FSL472H1 - Reading and Writing Fiction and Non-Fiction in French

Hours: 36L

An online course designed for students who wish to further develop their reading and writing skills in French. Students will acquire analytic tools to comprehend, analyze and write fiction and non-fiction texts. Multimedia approach to understanding the cultural experiences of francophone world.

Prerequisite: FSL375Y1
Exclusion: FSL421Y1, FSL442H1, FSL443H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

FSL473H1 - Oral French in Context

Hours: 36L

Putting students in diverse speaking and listening situations and contexts, this course is designed for those who wish to consolidate and perfect their speaking and listening abilities and take them to the next level. Focusing on a contextual approach of both oral and aural French and various francophone cultures, this course will focus on various aspects and difficulties that come with speaking and understanding French in real-life situations.

Prerequisite: FSL375Y1
Exclusion: Not open to fluent or native speakers of French.
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)
FSL475H1 - Creative Writing in French

Hours: 12L/24P

Do you like creative writing? Are you simply curious about it? Do you want to hone your writing skills in French and develop your creative voice in the process? Then this course is for you. Part workshop in which constructive and supportive feedback will help you develop your writing in French and your creativity, part literary discussion on various aspects of literary technique such as character, setting, plot, point of view, structure or revision (through reading).

Prerequisite: FSL375Y1
Exclusion: Not open to native speakers of French. According to our departmental enrollment guidelines, native speakers of French are excluded from all FSL courses with the exception of those needing to improve their written or oral skills who must request permission from the Associate Chair, Undergraduate Studies to enroll in FSL442H1 or FSL443H1. Such students will be asked to complete the Placement Test at the Department.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

FRE487H1 - Advanced Topics in Bilingualism and L2 acquisition

Hours: 12T/24S

This course examines how adult learners acquire various aspects of French language (vocabulary, syntax and/or phonology). It also provides in-depth, practical training in methodological design and quantitative analysis culminating in students’ undertaking of individual experimental studies.

Prerequisite: FRE376H1 + FRE378H1 + FRE383H1 + FRE388H1/ JFG388H1

Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

FRE488H1 - Special Topics in Advanced Linguistics I

Hours: 12T/24S

An advanced seminar on a specific aspect of French linguistics. For more information, see https://www.french.utoronto.ca/undergraduate.

Prerequisite: Varies according to particular course offering; consult the French Studies Undergraduate brochure (www.french.utoronto.ca/undergraduate) for exact prerequisites.

Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

FRE489H1 - Special Topics in Advanced Linguistics II

Hours: 12T/24S

An advanced seminar on a specific aspect of French linguistics. For more information, see https://www.french.utoronto.ca/undergraduate.

Prerequisite: Varies according to particular course offering; consult the French Studies Undergraduate brochure (www.french.utoronto.ca/undergraduate) for exact prerequisites.

Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)
FRE490Y1 - Senior Essay

A research project on a linguistic, literary, or second language learning topic to be proposed by the student and supervised by a Faculty member, culminating in a major research paper. Not eligible for CR/NCR option.

**Prerequisite:** Any 300+ FRE Linguistics/Literature/Second Language Learning course. Permission of Department.
**Distribution Requirements:** Humanities

FRE491H1 - Independent Study

A research project on a linguistic, literary, or second language learning topic to be proposed by the student and supervised by a Faculty member on a topic of common interest, including readings, discussions, papers. Not eligible for CR/NCR option.

**Prerequisite:** Any 300+ FRE Linguistics/Literature/Second Language Learning course. Permission of Department.
**Distribution Requirements:** Humanities

FRE492H1 - Independent Study

A research project on a linguistic, literary, or second language learning topic to be proposed by the student and supervised by a Faculty member on a topic of common interest, including readings, discussions, papers. Not eligible for CR/NCR option.

**Prerequisite:** Any 300+ FRE Linguistics/Literature/Second Language Learning course. Permission of Department.
**Distribution Requirements:** Humanities

Assistant Professor, Teaching Stream
S. Peirce, MSc, Ph D (CLTA)

Introduction

Geography is the study of the environments created on the earth’s surface by nature and people. The physical and biological elements of these environments, as well as their economic and social structure, historical development, spatial organization, interrelationships, management and planning form the subject matter of Geography. Geography, therefore, relates closely to other fields in natural science, social science and the humanities, and geographers take courses in the related fields along with their geography courses. Students specializing in other subjects often select one or more geography courses to deepen their understanding of the resource base, culture and economy of those parts of the world in which they are interested.

Employment opportunities for geographers exist in many branches of international organizations, government, industry, and education. Geographers work at all levels of government service, especially in agencies responsible for environmental management; land and resource analysis; development of historic districts and sites; urban transportation planning; urban and regional development planning; trade promotion; community social services; geographic systems design and data analysis; transport network design and the processing of archival, survey, and cartographic information. In business, geographers work in marketing, locational analysis, resource development, and in consulting firms engaged in project evaluation, land use planning and natural heritage conservation. They often also find work in the non-profit sector as policy analysts, cartographers and geographic information science specialists, community organizers, and educators.

Students studying Geography may take either an H.B.A. or H.B.Sc., depending upon the subjects they wish to emphasize. The Department offers Specialist, Major and Minor Programs in Geography, and contributes courses to various departmental and college programs including American Studies; Anthropology; Archaeology; Canadian Studies and Peace and Conflict Studies; Equity Studies; School of the Environment; Environmental Geosciences; Urban Studies; Ethics, Society and Law and International Relations; and European Studies. Counselling and advice may be obtained from the Associate Chair, Undergraduate or the Undergraduate Counsellor.

Associate Chair, Undergraduate:
Professor M. Farish, Sidney Smith Hall, Room 5040 (416-978-6671)

Undergraduate Counsellor:
K. Giesbrecht, Sidney Smith Hall, Room 5044 (416-978-6455)

General Enquiries: 416-978-3375
Regarding Geography and Planning Programs

For 2020-21

Admission to major and specialist programs will be determined by a student's mark in 0.5-1.0 GGR FCEs at the 100 and/or 200 level. See program descriptions for details on the entry requirements. These are limited enrolment programs that can only accommodate a limited number of students. Achieving the marks required does not necessarily guarantee admission to the program in any given year.

Double majors in Geography may only overlap 1.0 FCE. Students combining any of our Minor programs with a Specialist/Major program would normally be allowed to overlap only 1.5 FCEs towards both programs. Double minors can overlap 1.0 FCE. Students combining the Focus in Planning and the Focus in Urban Geography can overlap 1.5 FCE. Students that choose to specialize or major in one of the three Geography programs cannot minor in the same program but may do so in another Geography program.

Generally, students may only take 1.0 Independent Research Project FCE toward their program requirements.

Geography and Planning Programs

Human Geography Specialist (Arts Program) - ASSPE1667

Description:

The Human Geography programs provide the opportunity to learn about the relations between landscapes, places, people and nature, and the spatial organization of human activities. While students are encouraged to explore the breadth of the discipline, we also identify courses by theme for students who wish to develop expertise in one or two subfields (e.g., urban geography, cultural and historical geography). The Human Geography programs appeal to students who wish to develop an integrative understanding of the cultural, economic, political and social forces that shape human activities. While students are encouraged to explore the breadth of our courses that exist between places, policy, power, and people. It focuses in on the conscious choices and decision made by various groups to shape the spatial organization of human activities. The Planning Focus will appeal to students who wish to develop an integrative understanding of the cultural, economic, political and social forces that shape the development and redevelopment of metropolitan and rural regions. Students are encouraged to explore the breadth of our courses that engage planning questions in relation to transportation, social segregation, health and housing, economic policy, environment change, and globalization.

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

Variable Minimum Grade

A minimum grade is needed for entry, and this minimum changes each year depending on available spaces and the number of applicants. The following courses must be completed:

- 0.5 credit in GGR courses at the 100- or 200-level, with a minimum grade of 75%, or

1.0 credit in GGR courses at the 100- or 200-level, with a minimum grade of 70%

To ensure that students admitted to the program will be successful, applicants with a final grade or grade average lower than the minimum grades stated above will not be considered for admission. Please note that obtaining this minimum final grade does not guarantee admission to the program. Jointly-offered GGR courses will also be considered (e.g. JEG, JGI, JGE).

Completion Requirements:

First Year Geography Courses: Any 2 courses (1.0 credit) from JEG100H1, GGR101H1, GGR107H1, GGR112H1, GGR124H1, GGR196H1, GGR197H1, GGR198H1, GGR199H1, 200/300-level GGR courses may also be used to meet this requirement. Contact the Undergraduate Administrator to update your program.

Physical and Environmental Geography Course: Any course (0.5 credit) not used to satisfy first year course requirement from JEG100H1, GGR101H1, GGR201H1, GGR203H1, GGR205H1, GGR206H1, GGR223H1

Methods Courses: All (1.5 credits) of GGR270H1, GGR271H1, GGR272H1

Regional Geography Course: Any course (0.5 credit) from GGR240H1, GGR246H1, GGR254H1, GGR341H1, GGR342H1, GGR343H1, GGR344H1

Fourth Year Courses: Any 2 (1.0 credit) 400 series GGR courses, at least one of which must be from Group E. Up to 0.5 credit can be used from GGR493Y1, based on suitability of placement for this program, and approved by department.

Applications: Any 11 courses (5.5 credits) from Group E; Up to 1.5 credits can be used from GGR493Y1, based on suitability of placement for this program, and approved by department.

Note: At least 4.0 credits must be 300/400 series courses. Of these, at least 1.0 credit must be 400 series (includes Fourth Year Course requirement).

Total credits: 10.0

Focus in Planning (Specialist) - ASFOC1667B

Description:

The Planning Focus provides students with the opportunity to learn about how planning is a key component of the dynamic relations that exist between places, policy, power, and people. It focuses in on the conscious choices and decision made by various groups to shape the spatial organization of human activities. The Planning Focus will appeal to students who wish to develop an integrative understanding of the cultural, economic, political and social forces that shape the development and redevelopment of metropolitan and rural regions. Students are encouraged to explore the breadth of our courses that engage planning questions in relation to transportation, social segregation, health and housing, economic policy, environment change, and globalization.
Enrolment Requirements:

Enrolment in the Human Geography Specialist (ASSPE1667) program is required.

Completion Requirements:

Core (required) Courses: 1.0 FCE from GGR217H1 and JGI346H1

Planning Electives: Any 3 courses (1.5 FCE) from GGR241H1, GGR336H1, GGR339H1, GGR343H1, GGR349H1, GGR354H1, GGR359H1, GGR424H1, GGR433H1, GGR434H1, GGR460H1, GGR493Y1 (0.5 FCE can be used based on internship)

Note: At least 1.0 FCE must be 300/400 series courses.

Focus in Urban Geography (Specialist) - ASFOC1667S

Description:

The Focus in Urban Geography provides students with the opportunity to emphasize urban geography as part of their Human Geography specialist or major. Urban geography focuses on the political, social, cultural and economic processes that shape city life, development and policy. This focus will appeal to students registered in the Human Geography specialist or major program who wish to develop an integrative understanding of the dynamics that shape the urban realm. Students are encouraged to explore the breadth of our course offerings in housing, historical, political and transportation.

Enrolment Requirements:

Enrolment in the Human Geography Specialist (ASSPE1667) program is required.

Completion Requirements:

Required Urban Geography Courses: 1.0 FCE from GGR124H1, GGR241H1, JGI216H1

Urban Geography Electives: 1.5 FCE’s from GGR254H1, GGR336H1, GGR339H1, GGR343H1, GGR354H1, GGR359H1, GGR374H1, GGR382H1, GGR424H1, GGR458H1, GGR460H1, GGR482H1

Note: At least 1.0 FCE must be 300/400 series courses.

Human Geography Major (Arts Program) - ASMAJ1667

Description:

The Human Geography programs provide the opportunity to learn about the relations between landscapes, places, people and nature, and the spatial organization of human activities. While students are encouraged to explore the breadth of the discipline, we also identify courses by theme for students who wish to develop expertise in one or two subfields (e.g., urban geography, cultural and historical geography). The Human Geography programs appeal to students who wish to develop an integrative understanding of the cultural, economic, political and social forces that shape how people use and experience the environments they live in. These programs offer training in quantitative and qualitative research methods, including GIS and Remote Sensing.

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

Variable Minimum Grade
A minimum grade is needed for entry, and this minimum changes each year depending on available spaces and the number of applicants. The following courses must be completed:

- 0.5 credit in GGR courses at the 100- or 200-level, with a minimum grade of 67%, or
- 1.0 credit in GGR courses at the 100- or 200-level, with a minimum grade of 63%

To ensure that students admitted to the program will be successful, applicants with a final grade or grade average lower than the minimum grades stated above will not be considered for admission. Please note that obtaining this minimum final grade does not guarantee admission to the program. Jointly-offered GGR courses will also be considered (e.g. JEG, JGI, JGE).

Completion Requirements:

First Year Geography Courses: Any two courses (1.0 credit) from JEG100H1, GGR101H1, GGR107H1, GGR112H1, GGR124H1, GGR196H1, GGR197H1, GGR198H1, GGR199H1, 200/300-level GGR courses may also be used to meet this requirement. Contact the Undergraduate Administrator to update your program.

Physical and Environmental Geography Course: Any course (0.5 credit) not used to satisfy first year course requirement from JEG100H1, GGR101H1, GGR201H1, GGR203H1, GGR205H1, GGR206H1, GGR223H1

Methods Courses: All (1.0 credit) of GGR270H1, GGR271H1

Regional Geography Course: Any course (0.5 credit) from GGR240H1, GGR246H1, GGR254H1, GGR341H1, GGR342H1, GGR343H1, GGR344H1

Fourth Year Course: Any course (0.5 credit) from 400 series courses from Group E.

Applications: Any 7 courses (3.5 credits) from Group E; Up to 1.0 credit can be from Group F. Up to 1.0 credit can be used from GGR493Y1, based on suitability of placement for this program, and approved by department.

Note: At least 2.0 credits must be 300/400 series courses. Of these, at least 0.5 must be 400 series (includes Fourth Year Course requirement).

Total credits: 7.0
Focus in Planning (Major) - ASFOC1667A

Description:

The Planning Focus provides students with the opportunity to learn about how planning is a key component of the dynamic relations that exist between places, policy, power, and people. It focuses on the conscious choices and decision made by various groups to shape the spatial organization of human activities. The Planning Focus will appeal to students who wish to develop an integrative understanding of the cultural, economic, political and social forces that shape the development and redevelopment of metropolitan and rural regions. Students are encouraged to explore the breadth of our courses that engage planning questions in relation to transportation, social segregation, health and housing, economic policy, environment change, and globalization.

Enrolment Requirements:

Enrolment in the Human Geography Major (ASMAJ1667) program is required.

Completion Requirements:

Core (required) Courses: 1.0 FCE from GGR217H1 and JGI346H1

Planning Electives: Any 3 courses (1.5 FCE) from GGR241H1, GGR338H1, GGR339H1, GGR343H1, GGR349H1, GGR354H1, GGR359H1, GGR424H1, GGR433H1, GGR434H1, GGR460H1, GGR493Y1 (0.5 FCE can be used based on internship)

Note: At least 1.0 FCE must be 300/400 series courses.

Focus in Urban Geography (Major) - ASFOC1667M

Description:

The Focus in Urban Geography provides students with the opportunity to emphasize urban geography as part of their Human Geography specialist or major. Urban geography focuses on the political, social, cultural and economic processes that shape city life, development and policy. This focus will appeal to students registered in the Human Geography specialist or major program who wish to develop an integrative understanding of the dynamics that shape the urban realm. Students are encouraged to explore the breadth of our course offerings in housing, historical, political, and transportation.

Enrolment Requirements:

Enrolment in the Human Geography Major (ASMAJ1667) program is required.

Completion Requirements:

Required Urban Geography Courses: 1.0 FCE from GGR124H1, GGR241H1, JGI16H1

Urban Geography Electives: 1.5 FCE’s from GGR254H1, GGR336H1, GGR339H1, GGR349H1, GGR357H1, GGR359H1.

GGR374H1, GGR382H1, GGR424H1, GGR458H1, GGR460H1, GGR482H1

Note: At least 1.0 FCE must be 300/400 series courses.

Human Geography Minor (Arts Program) - ASMIN1667

Description:

The Human Geography programs provide the opportunity to learn about the relations between landscapes, places, people and nature, and the spatial organization of human activities. While students are encouraged to explore the breadth of the discipline, we also identify courses by theme for students who wish to develop expertise in one or two subfields (e.g., urban geography, cultural and historical geography). The Human Geography programs appeal to students who wish to develop an integrative understanding of the cultural, economic, political and social forces that shape how people use and experience the environments they live in. These programs offer training in quantitative and qualitative research methods, including GIS and Remote Sensing.

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

(4.0 credits)

First Year Geography Courses: Any 2 courses (1.0 credit) from JEG100H1, GGR101H1, GGR107H1, GGR108H1, GGR124H1, GGR196H1, GGR197H1, GGR198H1, GGR199H1. 200/300-level GGR courses may also be used to meet this requirement. Contact the Undergraduate Administrator to update your program.

Applications: Any 6 courses (3.0 credits) from higher level GGR/JFG/JGE/JGI/JUG social science or humanities courses, including at least 1.0 credit at the 300/400-level. One course (0.5 credit) can be from Group F. Up to 1.0 credit can be used from GGR493Y1, based on suitability of placement for this program, and approved by department.

Environmental Geography Specialist (Arts Program) - ASSPE1252

Description:

A focus on the human-environment nexus is most explicit in these programs. Students learn about the social, spatial, and biophysical processes that shape society’s relationship to nature, management of resources, and contemporary environmental change. These programs appeal to non-science students who seek an environmental program that allows them to learn more about the natural processes that interact with social factors in shaping environments. These programs offer training in quantitative and qualitative research methods, including GIS and Remote Sensing.
Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

Variable Minimum Grade

A minimum grade is needed for entry, and this minimum changes each year depending on available spaces and the number of applicants. The following courses must be completed:

- 0.5 credit in GGR courses at the 100- or 200-level, with a minimum grade of 75%, or
- 1.0 credit in GGR courses at the 100- or 200-level, with a minimum grade of 70%

To ensure that students admitted to the program will be successful, applicants with a final grade or grade average lower than the minimum grades stated above will not be considered for admission. Please note that obtaining this minimum final grade does not guarantee admission to the program. Jointly-offered GGR courses will also be considered (e.g. JEG, JGI, JGE).

Completion Requirements:

First Year Geography Courses: Any 2 courses (1.0 credit) from GGR107H1 (recommended), JEG100H1, GGR101H1, GGR112H1, GGR124H1, GGR196H1, GGR197H1, GGR198H1, GGR199H1, 200/300-level GGR courses may also be used to meet this requirement. Contact the Undergraduate Administrator to update your program.

Methods & Core Courses: All (2.5 credits) of GGR223H1, GGR270H1, GGR271H1, GGR272H1, JGE331H1

Regional Geography Courses: Any course (0.5 credit) from GGR240H1, GGR246H1, GGR254H1, GGR341H1, GGR342H1, GGR343H1, GGR344H1

Fourth Year Courses: Either GGR491Y1 or one of GGR416H1, GGR492H1, GGR497H1 and one additional 0.5 credit 400 level course from Group A or Group B (1.0 credit). Up to 0.5 credit can be used from GGR493Y1, based on suitability of placement for this program, and approved by department.

Application: Any 8 courses (4.0 credits) from Group A; up to 1.5 credits can be from Group B; up to 1.0 credit can be from Group C. Up to 1.0 credit can be used from GGR493Y1, based on suitability of placement for this program, and approved by department.

Note: At least 4.0 credits must be 300/400 series courses. Of these, at least 1.0 credit must be 400 series (includes Fourth Year Course requirement).

Total credits: 10.0

Up to 0.5 credit can be used from Group B. Up to a 0.5 credit can be used from Group I, but the total number of half courses must not exceed 3. Up to 0.5 credit can be used from CHM138H1, GGR201H1, GGR203H1, GGR205H1, GGR206H1, GGR208H1, GGR209H1, GGR214H1, GGR341H1, GGR344H1, GGR347H1, GGR348H1, GGR373H1, ENV200H1, ENV234H1, ENV238H1.

Applications: Any 5 courses (2.5 credits) from Group A; up to 1.0 credit can be from Group B. Up to a 0.5 credit can be used from CHM138H1, GGR201H1, GGR203H1, GGR205H1, GGR206H1, GGR208H1, GGR209H1, GGR214H1, GGR341H1, GGR344H1, GGR347H1, GGR348H1, GGR373H1, ENV200H1, ENV234H1, ENV238H1.

Note: At least 1.0 credit must be 300/400 series courses.

Physical and Environmental Geography Specialist (Science Program) - ASSPE2030

Description:
Physical and Environmental Geography offers science-based programs for students interested in an integrative approach to understanding the earths biotic and abiotic systems, including their spatial dynamics and the ways they are altered by human action. The programs provide a foundation in the subfields of climatology, biogeography, hydrology, and geomorphology. Students gain practical experience in lab and field settings. Technical skills taught also include data analysis, geospatial analytical tools, including GIS and Remote Sensing.

Enrolment Requirements:
This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

Variable Minimum Grade
A minimum grade is needed for entry, and this minimum changes each year depending on available spaces and the number of applicants. The following courses must be completed:

- 0.5 credit in GGR courses at the 100- or 200-level, with a minimum grade of 75%, or
- 1.0 credit in GGR courses at the 100- or 200-level, with a minimum grade of 70%

To ensure that students admitted to the program will be successful, applicants with a final grade or grade average lower than the minimum grades stated above will not be considered for admission. Please note that obtaining this minimum final grade does not guarantee admission to the program. Jointly-offered GGR courses will also be considered (e.g. JEG, JGI, JGE).

Completion Requirements:

Introductory courses: Any 6 half courses or the equivalent (3.0 credits) from GGR100H1, GGR107H1, GGR108H1, GGR112H1, GGR201H1, GGR203H1, GGR204H1, GGR205H1, GGR206H1, GGR208H1, GGR209H1, GGR214H1, GGR341H1, GGR344H1, GGR347H1, GGR348H1, GGR373H1, ENV200H1, ENV234H1, ENV238H1.

Physical and Environmental Geography Course: Any course (0.5 credit) from GGR201H1, GGR203H1, GGR205H1, GGR206H1, GGR305H1, GGR308H1, GGR314H1, GGR347H1, GGR348H1, ENV200H1, ENV234H1, ENV238H1.

Applications: Any 7 courses (3.5 credits) from GGR273H1, GGR301H1, GGR305H1, GGR308H1, GGR310H1, FOR310H1, GGR314H1, GGR373H1, GGR347H1, GGR348H1, GGR416H1, (but no more than one of GGR273H1, GGR373H1), up to 1.0 credit can be used from GGR493Y1, based on suitability of placement for this program, and approved by department. Any GGR course from the list for Core Courses and Fourth Year Courses not already used. Up to 1.5 credits from Group I (including 300-series courses) must not exceed 3. Up to 0.5 credit can be used from GGR493Y1, based on suitability of placement for this program, and approved by department.

Total credits: 12.0
Physical and Environmental Geography Major (Science Program) - ASMAJ2030

Physical and Environmental Geography offers science-based programs for students interested in an integrative approach to understanding the earth's biotic and abiotic systems, including their spatial dynamics and the ways they are altered by human action. The programs provide a foundation in the subfields of climatology, biogeography, hydrology, and geomorphology. Students gain practical experience in lab and field settings. Technical skills taught also include data analysis, geospatial analytical tools, including GIS and Remote Sensing.

Enrolment Requirements:

This is a limited enrolment program. Students must have completed at least 4.0 credits and meet the requirements listed below to enrol.

Variable Minimum Grade

A minimum grade is needed for entry, and this minimum changes each year depending on available spaces and the number of applicants. The following courses must be completed:

- 0.5 credit in GGR courses at the 100- or 200-level, with a minimum grade of 67%, or
- 1.0 credit in GGR courses at the 100- or 200-level, with a minimum grade of 63%

Completion Requirements:

Introductory Courses: Any 4 half courses or the equivalent (2.0 credits) from JEG100H1, MAT133Y1/136H1, MAT137Y1, MAT223H1/MAT240H1, MAT224H1/MAT247H1, PHY131H1/PHY151H1, PHY132H1/PHY152H1, CHM138H1/CHM139H1, CHM139H1/CHM135H1, CHM151Y1/152Y1, BIO120H1/BIO130H1, at least two of which must be Math or Physics half courses.

Core Courses: Any 3 courses (1.5 credits) from GGR201H1, GGR203H1, GGR205H1, GGR206H1

Regional Geography Course: Any course (0.5 credit) from GGR101H1, GGR240H1, GGR246H1, GGR254H1, GGR341H1, GGR342H1, GGR343H1, GGR344H1

Methods Courses: All (1.5 credits) of GGR270H1, GGR272H1, GGR300H1

Applications: Any 4 courses (2.0 credits) from GGR273H1, GGR301H1, GGR305H1, GGR307H1, GGR308H1, GGR314H1, GGR337H1, GGR373H1, GGR347H1, GGR416H1, GGR418H1. Up to 1.0 credit can be used from GGR493H1, based on suitability of placement for this program, and approved by department. Any GGR course from the list for Core Courses and Fourth Year Courses not already used. Any one half course from Group I. No more than one from GGR273H1, GGR373H1.

Fourth Year Course: Any course (0.5 credit) from GGR401H1, GGR405H1, GGR406H1, GGR413H1, GGR414H1, GGR491Y1, GGR493H1

Total credits: 8.0

Physical and Environmental Geography Minor (Science Program) - ASMIN2030

Description:

Physical and Environmental Geography offers science-based programs for students interested in an integrative approach to understanding the earth's biotic and abiotic systems, including their spatial dynamics and the ways they are altered by human action. The programs provide a foundation in the subfields of climatology, biogeography, hydrology, and geomorphology. Students gain practical experience in lab and field settings. Technical skills taught also include data analysis, geospatial analytical tools, including GIS and Remote Sensing.

Enrolment Requirements:

This is an open enrolment program. A student who has completed at least 4.0 credits may enrol in the program.

 Completion Requirements:

(4.0 credits)

First Year Geography Courses: Any 2 courses (1.0 credit) from JEG100H1 (recommended), GGR101H1, GGR107H1, GGR112H1, GGR124H1, GGR136H1, GGR196H1, GGR197H1, GGR198H1, GGR199H1

Core Courses: Any 2 courses (1.0 credit) from GGR201H1, GGR203H1, GGR205H1, GGR206H1

Methods Courses: One (0.5 credit) of GGR301H1, GGR305H1, GGR308H1 and one (0.5 credit) of GGR272H1, GGR337H1

Applications: Any 2 courses (1.0 credit) from GGR201H1, GGR203H1, GGR205H1, GGR206H1, GGR301H1, GGR305H1, GGR307H1, GGR308H1, GGR310H1, FOR310H1, GGR314H1, GGR347H1, GGR348H1, GGR390H1, GGR401H1, GGR405H1, GGR406H1, GGR413H1, GGR414H1. Up to a 0.5 credit can be used from GGR493H1, based on suitability of placement for this program, and approved by department.

Geographic Information Systems Minor (Arts Program) - ASMIN0305

Description:

The GIS program covers the theoretical, technical and applied foundations for geographic information systems. Students learn
methods for spatial data production, analysis and presentation using computer cartography, spatial analysis, remote sensing, and geovisualization. Problem solving and project design are emphasized in upper level courses, as students apply techniques to answer specific geographic questions. The GIS program is structured to provide a stand-alone minor for students in Geography and other disciplines seeking complementary skills in spatial analysis (e.g., field biology, archaeology).

Note: Students combining this program with a Specialist/Major sponsored by the Department of Geography will normally be allowed to count only 1.5 (of the 4.0) credits towards both programs.

**Enrolment Requirements:**

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

**Completion Requirements:**

(4.0 credits)

**First Year Geography Courses:** Any 2 courses (1.0 credit) from JEG100H1, GGR101H1, GGR107H1, GGR112H1, GGR124H1, GGR196H1, GGR197H1, GGR198H1, GGR199H1. 200/300-level GGR courses may also be used to meet this requirement. Contact the Undergraduate Administrator to update your program.

**Methods & Core Courses:** All (2.0 credits) of GGR270H1, GGR272H1, GGR273H1, GGR373H1

**Applications:** Any 2 courses (1.0 credit) from GGR225H1, GGR337H1, GGR372H1, GGR386H1, GGR413H1, GGR414H1, GGR462H1, GGR472H1, GGR491Y1, GGR492H1, GGR493Y1 (0.5 credit can be used based on internship), GGR497H1, GGR498H1, GGR499H1

Note: At least 1.0 credit must be 300/400 series courses

**Asian Geographies (offered jointly with the National University of Singapore) Minor (Arts Program) - ASMIN2727**

**Description:**

Asian Geographies offers a structure exchange opportunity between the University of Toronto and National University of Singapore (NUS). This program allows students to study geographic themes through the lens of development and change in Asia. They complete half of this minor program while at National University of Singapore (NUS), selecting from courses there that locate geographic questions in a local or regional context.

This minor program represents a unique opportunity to study geography in a different cultural environment. For more information, contact the Undergraduate Office and the Centre for International Experience (CIE, studentlife.utoronto.ca/cie). Students are advised to contact the U of T Geography Department in advance of going abroad to discuss course selection at NUS.

**Enrolment Requirements:**

Enrolment in the Asian Geographies Minor is administratively suspended effective February 28, 2020 and is no longer admitting students. Students currently enrolled will be permitted to finish the program.

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

**Special Requirement**

- A supplementary application is required. For more information, contact the Centre for International Experience (CIE, studentlife.utoronto.ca/cie).

**Completion Requirements:**

**First Year Geography Course:** Any course (0.5 credit) from GGR100H1, JEG100H1, GGR101H1, GGR107H1, GGR112H1, GGR124H1

**Applications (UofT):** Any 3 (1.5 credits) higher level GGR/JGE/JGI/JFG/JUG courses

**Applications (NUS):** Any 4 courses (2.0 credits) from NUS250H0, NUS251H0, NUS252H0, NUS253H0, NUS254H0, NUS255H0, NUS256H0, NUS350H0, NUS351Y0, NUS352H0, NUS353H0, NUS354H0 (or other NUS course with permission of the department)

Note: At least 1.0 credit must be at the 300/400 level (from U of T or NUS)

Total credits: 4.0

**Environment and Energy Minor (Science Program) - ASMIN1552**

**Description:**

Environment and Energy (Science Program) Joint Program with the School of the Environment

Jointly sponsored by the School of the Environment and the Department of Geography, this interdisciplinary program addresses the scientific, technological, environmental and policy aspects of energy use and supply, with a focus on the reduction of environmental impacts.

Note that the four full course equivalents that constitute the Minor Program are those listed below under Higher Years. For more information, please email the School of the Environment’s Undergraduate Student Advisor, David Powell, at ug.office.env@utoronto.ca.

**Enrolment Requirements:**

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

**Completion Requirements:**

(4.0 credits)
Groups

Group A (Environmental Geography Courses)

- GGR201H1 Geomorphology
- GGR203H1 Introduction to Climatology
- GGR205H1 Introduction to Soil Science
- GGR206H1 Introduction to Hydrology
- GGR223H1 Environment, Society and Resources
- GGR272H1 Geographic Information and Mapping I
- GGR273H1 Geographic Information and Mapping II
- GGR301H1 Fluvial Geomorphology
- GGR305H1 Biogeography
- GGR308H1 Canadian Arctic and Subarctic Environments
- GGR310H1 Bioenergy from Sustainable Forest Management
- GGR314H1 Global Warming
- GGR329H1 The Global Food System
- GGR332H1 Social Geographies of Climate Change
- GGR334H1 Water Resource Management
- GGR337H1 Environmental Remote Sensing
- GGR338H1 Environmental Issues in the Global South
- GGR340H1 Health Geography
- GGR341H1 Changing Geography of Latin America
- GGR347H1 Efficient Use of Energy
- GGR348H1 Carbon-Free Energy
- GGR349H1 Managing Urban Natures
- GGR373H1 Advanced Geographic Information Systems
- GGR386H1 Special Topics in Geographic Information Systems
- GGR387H1 Special Topics in Environmental Geography
- GGR388H1 Special Topics in Physical & Environmental Geography
- GGR401H1 Special Topics in Geography II
- GGR405H1 Sustainable Systems for Natural Resources Management
- GGR406H1 Geomorphology and the Anthropocene
- GGR413H1 Watershed Hydroecology
- GGR414H1 Advanced Remote Sensing
- GGR416H1 Environmental Impact Assessment
- GGR418H1 Political Economy of Natural Resources
- GGR419H1 Environmental Justice
- GGR434H1 Building Community Resilience
- GGR438H1 Environment and Development
- GGR481H1 Field Course in Environmental Geography
- GGR491Y1 Research Project
- GGR492H1 Senior Practicum
- GGR497H1 Independent Research
- GGR498H1 Independent Research
- JGE321H1 Multicultural Perspectives on Environmental Management
- JGE331H1 Resource and Environmental Theory
- JIG322H1 Indigenous Worlds, Worldviews and the Environment
- JIG440H1 Indigenous Geographies
- JUG320H1 The Canadian Wilderness

Group B (School of the Environment Courses)

- ENV200H1 Assessing Global Change: Science and the Environment
- ENV234H1 Environmental Biology: Structure and Function of Ecosystems
- ENV307H1 Urban Sustainability
- ENV323H1 Ontario Environmental Policy
- ENV333H1 Ecological Worldviews
- ENV335H1 Environmental Design
- ENV350H1 Energy Policy and Environment
- ENV395Y0 Special Topics Field Course
- ENV396Y0 Special Topics Field Course
- ENV422H1 Environmental Law

Group C

- Any other Geography courses at the 200/300/400 level not listed in Group A.

Group E (Human Geography Courses)

- GGR216H1 Global Cities
- GGR217H1 Urban Landscapes and Planning
- GGR221H1 New Economic Spaces
- GGR223H1 Environment, Society and Resources
- GGR225H1 Power of Maps and Geographic Information
- GGR240H1 Geographies of Colonialism in North America
- GGR241H1 Geographies of Urban Social Exclusion
- GGR246H1 Geography of Canada
- GGR251H1 Geography of Innovation
- GGR252H1 Marketing Geography
- GGR254H1 Geography USA
- GGR272H1 Geographic Information and Mapping I
- GGR273H1 Geographic Information and Mapping II
- GGR299Y1 Research Opportunity Program
- GGR314H1 Global Warming
- GGR320H1 Geographies of Transnationalism, Migration, and Gender
- GGR324H1 Spatial Political Economy
- GGR326H1 Remaking the Global Economy
- GGR327H1 Geography and Gender
- GGR328H1 Labour Geographies
- GGR329H1 The Global Food System
- GGR332H1 Social Geographies of Climate Change
- GGR334H1 Water Resource Management
- GGR336H1 Urban Historical Geography of North America
- GGR338H1 Environmental Issues in the Global South
- GGR339H1 Urban Geography, Planning and Political Processes
- GGR340H1 Health Geography
- GGR341H1 Changing Geography of Latin America
- GGR342H1 The Changing Geography of Southeast Asia
- GGR343H1 The Changing Geography of China
- GGR344H1 Political Economy of Germany and the EU
- GGR349H1 Managing Urban Natures
- GGR352H1 Understanding Spatiality
- GGR354H1 Infrastructure
- GGR357H1 Housing and Community Development
- GGR359H1 Comparative Urban Policy
- GGR360H1 Culture, History, and Landscape
- GGR363H1 Critical Geographies: An Introduction to Radical Ideas on Space, Society and Culture
- GGR372H1 GIS for Public Health
- GGR373H1 Advanced Geographic Information Systems
- GGR374H1 Urban Dynamics
- GGR382H1 Field Course in Human Geography
- GGR386H1 Special Topics in Geographic Information Systems
- GGR387H1 Special Topics in Environmental Geography
- GGR389H1 Special Topics in Human Geography
- GGR400H1 Special Topics in Geography I
- GGR416H1 Environmental Impact Assessment
- GGR418H1 Political Economy of Natural Resources
- GGR419H1 Environmental Justice
- GGR420H1 Critical Development Geography
- GGR421H1 Histories of Geographical Thought
- GGR424H1 Transportation Geography and Planning
- GGR429H1 Innovation and Governance
- GGR430H1 Geographies of Markets
- GGR431H1 Regional Dynamics
- GGR433H1 Built Environment and Health
- GGR434H1 Building Community Resilience
- GGR438H1 Environment and Development
- GGR452H1 Space, Power, Geography: Understanding Spatiality
- GGR456H1 Entanglements of Power: Race, Sexuality and the City
- GGR457H1 The Post-War Suburbs
- GGR458H1 Selected Topics in Urban Geography
- GGR460H1 Global Cities, Urban Planning, Critical Theory
- GGR462H1 GIS Research Project
- GGR472H1 Developing Web Maps
- GGR481H1 Field Course in Environmental Geography
- GGR482H1 Toronto Field Course
- GGR491Y1 Research Project
- GGR492H1 Senior Practicum
- GGR496H1 Independent Research
- GGR497H1 Independent Research
- GGR499H1 Independent Research
- JGE321H1 Multicultural Perspectives on Environmental Management
- JGE331H1 Resource and Environmental Theory
- JIG322H1 Indigenous Worlds, Worldviews and the Environment
- JIG440H1 Indigenous Geographies
- JUG320H1 The Canadian Wilderness
- JUG325H1 Landscapes of Violence in Canada
- JGI216H1 Globalization and Urban Change
- JGI346H1 The Urban Planning Process
- JGI454H1 The Role of the Planner: Making a Difference

Group H

- CHM217H1 Introduction to Analytical Chemistry
- CHM310H1 Environmental Chemistry
- ESS224H1 Introduction to Mineralogy and Petrology
- ESS261H1 Earth System Evolution

Group I

- EEB319H1 Population Ecology
- EEB321H1 Community Ecology
- EEB324H1 Evolutionary Ecology
- EEB328H1 Physiological Ecology
- EEB428H1 Global Change Ecology
- ENV346H1 Terrestrial Energy Systems
- ESS262H1 Earth System Processes
- ESS311H1 Earth System Chemistry 2: Aqueous Geochemistry
- ESS361H1 Atmosphere-Biosphere Interact
- ESS461H1 Palaeoenvironmental Studies
- ESS463H1 Earth System Chemistry 3: Contaminants
- ESS464H1 Biological Perspectives on Earth System Evolution
- FOR301H1 Field Methods in Forest Conservation
- FOR305H1 Biology of Trees and Forests
- FOR306H1 Tropical Forest Ecology and Conservation Field Course
- FOR417H1 Ecological Principles of Agroforestry
- JEE337H1
- PHY392H1 Physics of Climate
- PHY408H1 Time Series Analysis

Group F (Optional Science Courses for Human Geography)

- GGR201H1 Geomorphology
- GGR203H1 Introduction to Climatology
- GGR205H1 Introduction to Soil Science
- GGR206H1 Introduction to Hydrology
- GGR301H1 Fluvial Geomorphology
- GGR305H1 Biogeography
- GGR308H1 Canadian Arctic and Subarctic Environments
- GGR310H1 Bioenergy from Sustainable Forest Management
- FOR301H1 Bioenergy from Sustainable Forest Management
- GGR337H1 Environmental Remote Sensing
- GGR347H1 Efficient Use of Energy
- GGR348H1 Carbon-Free Energy
- GGR388H1 Special Topics in Physical & Environmental Geography
- GGR401H1 Special Topics in Geography II
• GGR405H1 Sustainable Systems for Natural Resources Management
• GGR406H1 Geomorphology and the Anthropocene
• GGR413H1 Watershed Hydroecology
• GGR414H1 Advanced Remote Sensing
• GGR498H1 Independent Research

Regarding Geography and Planning Courses

Prerequisites

NOTE

Recommended Preparation: The course will be taught in a manner that assumes students have achieved the level of study (e.g., third year standing) and completed courses listed (or equivalent background).

Prerequisites: These are strictly monitored requirements. In some cases, prerequisites may be waived if equivalent background exists. Please consult the Associate Chair, Undergraduate or the course instructor.

Geography and Planning Courses

JEG100H1 - Introduction to Physical Geography and Earth Science

Hours: 24L/12P

This introduction to Physical Geography and Earth Sciences examines the atmosphere, lithosphere, hydrosphere, cryosphere and biosphere, emphasizing processes, flows of energy and materials, and the interconnectedness of these Earth systems. Specific topics include weather and climate, earth materials, geological and geomorphic processes involved in the genesis of landforms, river systems, glaciers, soils, and biomes.

Exclusion: GGR100H1, ESS102H1, EESA06H3
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

GGR101H1 - Histories of Environmental Change

Hours: 24L

The course will focus on the processes that drive environmental change and how past societies have responded to the constraints that these impose. The emphasis is on the current interglacial, the Holocene, and how increasing population and technology has affected human-environment interactions.

Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

GGR107H1 - Environment, Food and People

Hours: 24L/12T

Examines the relations between food, nature, and society. Food is fundamental to human existence, and central to most cultures; it also has significant and widespread effects on the physical and social environments. Food is used as a lens to explore human-environment interactions locally and globally. Serves as an introduction to environmental and human geography.

Exclusion: GGR107Y1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

GGR112H1 - Geographies of Globalization, Development and Inequality

Hours: 24L/8T

Economic development and underdevelopment are taking shape in an increasingly interconnected global context. This course examines geographic approaches to "Third World" development, economic globalization, poverty, and inequality. It pays particular attention to the roles of rural-urban and international migration in shaping specific landscapes of development.

Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)
GGR124H1 - Cities and Urban Life

Hours: 24L/6T

Offers an introduction to North American cities and urbanization in a global context. It explores social, cultural, political and economic forces, processes, and events that shape contemporary urbanism. The course adopts the lens of 'fixity' and 'flow' to examine how the movement of people, ideas, goods, and capital, as well as their containment in the infrastructure and space of the city, give rise to particular urban forms.

Exclusion: GGR124Y1; GGR207H5
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

GGR196H1 - Tracking Insect Life: The Political Ecology of “Bugs”

Hours: 24S

Have you wondered why we find a ladybug ‘picturesque’ but a cockroach ‘disgusting’? Have you thought of butterflies as feminine and sublime, and bees as an army? Have you ever received advice in your workplace or school to avoid behaving like a ‘mosquito,’ meaning to resist engaging in micro-aggressive conducts? Have you been curious about why the film industry created an enlarged half human/half ant ‘alien’ creature to feed our worst fears? This course engages with these and other contradictory and complex renderings of insects in Western culture and around the world to investigate how we define the limits of social belonging in relation to space and place. The course explores how the anxieties and wonders around insects’ behaviour are related to aspects of the human/nature relationship. By tracking the political ecology of insects, the course provides a first approximation to arguments about the connection between nature and culture and “lived-in” environments; also exploring themes of class, gender, race and settler colonialism. Because this is a first-year seminar, reading and engaging actively with the course material is important for this course.

The course also serves as an introduction to other subjects that are relevant to navigating post-secondary life, such as: critical reading; conducting university-level research; presenting and communicating ideas in the classroom; teamwork; and how to benefit from it; and developing social networks.

Restricted to newly admitted first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

GGR197H1 - Nature, Conservation and Justice

Hours: 24S

Every day we read about climate change, species extinction, environmental degradation and the need for nature conservation. It is increasingly becoming apparent that the environmental problems that we face today arise from a deeper crisis relating to human ways of viewing and connecting to nature. This course asks how we can rework human ways of relating to nature, while querying the idea of “nature” and questioning the dominant approaches to nature conservation. It asks how can concerns for nature and for other species be balanced with that for human livelihoods and well-being? How can inequalities with regards to the distribution of environmental goods and bads be reduced? How are citizens and communities in the different parts of the world struggling against environmental injustice and to protect their local environments? How do these place-based movements demand justice and what visions do they articulate for a more just and sustainable world? How do indigenous worldviews offer conceptual resources for rethinking nature and our ways of relating to nature? The course will explore these questions using lectures, class discussion, videos and student presentations. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

GGR198H1 - Political Spaces

Hours: 24S

Is space political? In what ways? What are the implications of thinking about politics geographically? How do political conflicts both invoke and transform space and place? What kinds of alternative political relationships to space and alternative mappings can we imagine? This course will attempt to answer those questions while exploring a wide range of possible contexts in which political spaces are evident. These may include: conflicts over the intimate spaces of the body, identity, and the home; the racialization and gendering of space; the politics of cities and urbanization; the boundaries of public and private space; struggles over land, property, resources and ‘nature’; the political geographies of labour, citizenship and migration; globalization of economic markets and alternative economic political and social cartographies; borders, geopolitics, and the territorial politics of empire; and the geographic projects of colonialism, post-coloniality, modernity, and modernization. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)
GGR199H1 - Race, Conflict, and the Urban Landscape

Hours: 24S

This course will focus on how racial conflict affects the size, shape, composition, and landscape of cities. It will emphasize Canadian and American cities, but other international examples will be discussed for comparison. Ethno-racial conflict has been, and continues to be, an important force on cities throughout the world. Course topics will include housing and employment discrimination, ethno-racial uprisings, and inequality. The course will be a discussion-oriented blend of academic readings, popular journalism, and film. It will serve as an introduction to concepts that are dealt with in greater depth in second, third, and fourth year geography courses. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

GGR201H1 - Geomorphology

Hours: 24L/8P

Introduction to the principles of geomorphology; earth materials; major features of crustal morphology; landforming processes of water, wind, waves and ice; human impact on earth surface processes. One hour laboratory session approximately every other week; a local field trip.

Exclusion: GGR201H5
Recommended Preparation: JEG100H1/GGR100H1
Distribution Requirements: The Physical and Mathematical Universes (5)

GGR203H1 - Introduction to Climatology

Hours: 36L

Introduction to the large scale processes responsible for determining global and regional climate and atmospheric circulation patterns, as well as the small scale processes responsible for determining the microclimates of specific environments.

Prerequisite: Physics SPH3U
Recommended Preparation: JEG100H1/GGR100H1; MAT133Y1, MAT135H1, MAT136H1, MAT137Y1; PHY131H1, PHY132H1, PHY151H1, PHY152H1
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

GGR205H1 - Introduction to Soil Science

Hours: 24L/4P

Introduction to soil science dealing with the chemical, physical, and biological properties of soils; soil formation and development; the classification of soils, and the application of soil science to environmental, agricultural and forestry issues. Field trip cost: $20.

Recommended Preparation: CHM138H1/CHM136H1, CHM139H1/CHM135H1; JEG100H1/GGR100H1
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

GGR206H1 - Introduction to Hydrology

Hours: 30L/4P

Introduction to the hydrologic cycle with emphasis on the physical processes, including precipitation, interception, evaporation, runoff, ground water and soil water. Basic hydrological models will be practiced. Field trip cost: $20.

Recommended Preparation: JEG100H1/GGR100H1; MAT135H1
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

JGI216H1 - Globalization and Urban Change

Hours: 24L

Focusing on the impacts that global flows of ideas, culture, people, goods, and capital have on cities throughout the globe, this course explores some of the factors that differentiate the experiences of globalization and urban change in cities at different moments in history and in various geographic locations.

Recommended Preparation: GGR124H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)
GGR217H1 - Urban Landscapes and Planning

Hours: 24L/4T

Considers the role of planning in shaping the urban landscape through historical and contemporary examples that illustrate the interplay of modernist and post-modernist approaches to city building. Traces the origins, competing rationalities and lingering effects of planning in the production of urban space. Broaches possibilities for engaging planning critically to address challenges of social and environmental justice in cities today.

Exclusion: GGR361H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

GGR221H1 - New Economic Spaces

Hours: 24L/4T

Provides an introduction to economic geography and economic geography theory from the 1970s on, illustrating the different ways that geographers have conceptualized the restructuring of resource industries, manufacturing and services. The crisis of Fordism and the rise of new production models will be given particular attention, along with the reorganization of finance, the rise of cultural industries and the globalization of commodity chains. New regimes of governance of the economy will also be considered.

Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

GGR223H1 - Environment, Society and Resources

Previous Course Number: GGR222H1
Hours: 24L/6T

Focuses on society-environment relations and different approaches to resource governance and management. This includes exploration of the spatial, social, and political economic origins and implications of humans' changing relations to nature. Drawing on debates from environmental governance and political ecology literatures, the course also investigates the ways that different actors and institutions have framed and sought solutions to environmental and resource challenges.

Exclusion: GGR222H1/GGR222Y1/GGR233Y1/JGE221Y1/ENV222Y1/ENV222H1 (if ENV222H1 was taken before 2012-13)
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

GGR225H1 - Power of Maps and Geographic Information

Hours: 24L/4P

This course examines the changing role of geographic information and maps in society. It considers how spatial information is produced, organized, and used in different historical, cultural, and political contexts. Topics examined include: the effects of the shift from print to digital mapping; implications of mobile spatial technologies and the geoweb; open source and open access; production and control of spatial data and information; alternative cartographies. Introduces concepts of Geospatial Literacy, Critical Mapping and Critical GIS.

Exclusion: GGR375H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

GGR240H1 - Geographies of Colonialism in North America

Hours: 24L/5T

This course considers the creation and consolidation of settler colonies in the region known to many as North America. With an eye to the colonial present, the course focuses on the period from the 15th century to the early 20th century. Cultural texts and place-specific cases are used to ground themes and processes that also bear on the wider field of historical geography, including narratives of discovery and possession; ecological imperialism and environmental transformation; the (re)settlement of land and colonial government; enslavement and industrialization; frontiers, borders, and resource extraction; and some of the Indigenous geographies that preceded, were transformed by and transformed, and exceeded the reach of colonial power.

Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

GGR241H1 - Geographies of Urban Social Exclusion

Hours: 24L

Introduction to the geographies of urban social exclusion and segregation after 1750. Using a selection of cities from around the world, the course examines the impacts and implications of urban social inequalities.

Distribution Requirements: Humanities; Social Science
Breadth Requirements: Society and its Institutions (3)
GGR246H1 - Geography of Canada

Hours: 24L

Social and economic differences have been, and continue to be, a prominent feature of Canada's geography. In this course these differences are examined at a regional and local scale. The course adopts a thematic approach and considers issues such as historical development, urbanization, industrialization, immigration and population change, Canada's cultural mosaic and native issues. Emphasis will be placed on the evolution of social and economic policies and Canada's incorporation into a global economy.

Exclusion: GGR202H5
Recommended Preparation: GGR107H1, GGR124H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

GGR251H1 - Geography of Innovation

Hours: 24L

Explores how new technologies and industries are generated and sustained, or failed to be. Focuses on the dynamics of leading technological sectors such as electronics, automobiles and biotechnology in their geographical and historical contexts. We critically scrutinise the iconic Silicon Valley along with other major innovative regions/nations, and investigate the key role of universities and finance in driving innovation and entrepreneurship.

Exclusion: GGR300H1 (2014-15)
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

GGR252H1 - Marketing Geography

Hours: 24L/4T

Geography matters in the success of both public and private sector organisations. Using mostly retail examples contemporary location problems are addressed. The geographies of demand and supply are analysed and trade area and site selection techniques are applied. The relevance of the planning context and utility of geovisualisation techniques such as GIS are also briefly considered.

Exclusion: GGR252H5
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

GGR254H1 - Geography USA

Hours: 24L

After a short historical overview of the making of America, this course focuses on contemporary issues in American society, economy, politics, race, regional distinctions and disparities, urban development.

Distribution Requirements: Humanities; Social Science
Breadth Requirements: Society and its Institutions (3)

GGR270H1 - Introductory Analytical Methods

Hours: 24L/12T

Theory and practical application of elementary quantitative techniques in geography emphasizing descriptive, inferential and spatial statistical analysis, probability, and sampling.

Exclusion: ECO220Y1/ ECO227Y1/ EEB225H1/ GGR270Y1/ LIN305H1/ POL322H1/ POL242Y1/ PSY201H1/ SOC202H1/ STA220H1/ STA248H1/ STA250H1/ STA261H1
Recommended Preparation: 0.5 FCE in Geography
Distribution Requirements: Social Science; Science
Breadth Requirements: The Physical and Mathematical Universes (5)

GGR271H1 - Social Research Methods

Hours: 24L

Practical course on field methods designed to enable students to carry out their own research projects. Behavioural observation, interviewing, questionnaire design, sampling theory, content analysis of written and graphic material, data coding and focus groups.

Exclusion: SOC200H1/SOC204H1/CRJ350H1/ENV223H1(from 2010-11)
Distribution Requirements: Social Science
GGR272H1 - Geographic Information and Mapping I

Hours: 24L/24P

Introduction to digital mapping and spatial analysis using geographic information systems (GIS). Students learn how to use GIS software to find, edit, analyze and map geographic data to create their own maps, analyze geographic problems and use techniques that can be applied to a variety of subject areas.

Exclusion: GGRB30H3, GGR272H5

Distribution Requirements: Social Science

Breadth Requirements: The Physical and Mathematical Universes (5)

GGR273H1 - Geographic Information and Mapping II

Hours: 24L/24P

Builds on GGR272H1 by providing students with practical spatial analysis methods and the underlying theory needed to understand how to approach various geographic problems using geographic information system (GIS) software and a variety of data types and sources.

Prerequisite: GGR272H1

Exclusion: GGRB32H3

Distribution Requirements: Social Science

Breadth Requirements: The Physical and Mathematical Universes (5)

GGR299Y1 - Research Opportunity Program

Credit course for supervised participation in faculty research project. Details at https://www.artsci.utoronto.ca/current/academics/research-opportunities/... Not eligible for CR/NCR option.

Distribution Requirements: Social Science

GGR301H1 - Fluvial Geomorphology

Hours: 24L/4P

Elements of drainage basin morphology and hydrology, classification of rivers, stream patterns and hydraulic geometry. Elements of open channel flow, sediment transport and the paleohydrology of river systems. River channel adjustments to environmental change, human impact and the management/design of river habitats. Exercises include experimentation in a laboratory flume. Usually offered every other year. Field trip cost: $20.

Prerequisite: GGR270H1 (or equivalent), and GGR201H1 or permission of instructor

Recommended Preparation: 10.0 FCE's including JEG100H1/ GGR100H1

Distribution Requirements: Science

Breadth Requirements: The Physical and Mathematical Universes (5)

GGR305H1 - Biogeography

Hours: 24L

Identifies patterns in and explains processes behind plant and animal distributions through space and time. Topics covered include ecological and evolutionary dynamics, disturbance, dispersal, migration, continental drift, speciation, extinction, paleoenvironments and island biogeography. We also examine terrestrial and marine biomes, the meaning of biodiversity, conservation challenges, and recent biogeographic changes associated with human impact.

Exclusion: GGR305H5

Recommended Preparation: 8.0 FCE's including JEG100H1/ GGR100H1 or (BIO120H1, BIO130H1)

Distribution Requirements: Science

Breadth Requirements: Living Things and Their Environment (4)

GGR308H1 - Canadian Arctic and Subarctic Environments

Hours: 24L

We will explore the climate geomorphology, soils, hydrology, biogeochemical cycling, limnology and food web structures of the Arctic and Subarctic. Current stresses of climate change and pollution are discussed along with scientific and political solutions.

Prerequisite: Equivalent of one full-year science course at the 200-level or permission from the instructor

Recommended Preparation: JEG100H1

Distribution Requirements: Science

Breadth Requirements: The Physical and Mathematical Universes (5)
GGR310H1 - Bioenergy from Sustainable Forest Management

Hours: 24L/12P

Socio-economic, technical, political and environmental issues associated with the utilization of forest biomass (e.g., harvesting residues, thinnings, salvage, short rotation woody crops) for a source of renewable energy. Field trip cost: $20.

Exclusion: FOR310H1
Recommended Preparation: Completion of at least 6 Science credits
Distribution Requirements: Science
Breadth Requirements: Society and its Institutions (3)

GGR314H1 - Global Warming

Hours: 30L/6T

A comprehensive examination of the greenhouse warming problem, beginning with economic, carbon cycle, and climate model projections; impacts on and adaptive responses of agriculture, forests, fisheries, and water resources; options and policies to reduce greenhouse gas emissions.

Exclusion: GGR377H5
Recommended Preparation: 8.0 FCE's
Distribution Requirements: Science; Social Science
Breadth Requirements: The Physical and Mathematical Universes (5)

GGR320H1 - Geographies of Transnationalism, Migration, and Gender

Hours: 24L

This course examines recent changes in global migration processes. Specifically, the course addresses the transnationalization and feminization of migrant populations and various segments of the global labor force. The coursework focuses on analyzing classical paradigms in migration studies, as well as emerging theoretical approaches to gender and migration. In addition, it traces the shifting empirical trends in gendered employment and mobility patterns. It uses in-depth case study material to query the frameworks employed in migration studies and to understand the grounded implications of gendered migration. It pays particular attention to the interventions made by feminist geographers in debates about work, migration, place, and space.

Recommended Preparation: 8.0 FCE's
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

JUG320H1 - The Canadian Wilderness

Hours: 24L

The idea of wilderness permeates narratives of Canadian national identity, while policy-makers seek to manage and contain natural areas. This course compares and contrasts historical and contemporary wilderness narratives in literature, painting and film with policies in areas such as conservation, urban planning, land claims and tourism.

Recommended Preparation: 8.0 FCE's
Distribution Requirements: Social Science
Breadth Requirements: Thought, Belief and Behaviour (2)

JGE321H1 - Multicultural Perspectives on Environmental Management

Hours: 24L

Diverse approaches to environmental issues in a variety of multicultural settings are introduced, compared and analyzed, using case studies. Perspectives on environmental management will be discussed as they emerge from contexts such as Latin America, Asia, or Africa.

Prerequisite: ENV221H1/ENV222H1/GGR222H1/GGR223H1
Exclusion: ENV321Y1
Recommended Preparation: 8.0 FCE's
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

JIG322H1 - Indigenous Worlds, Worldviews and the Environment

Hours: 24L

Explores the diverse ways of understanding and responding to the world that emerge from indigenous cultures around the world. Examines how indigenous ways of being and relating to their natural environment can help us understand and address the current environmental crisis. Using examples of indigenous activism from Canada and around the world, examines how colonial histories shape dispossession and marginalization and inform visions for the future. Topics include traditional ecological knowledge, place-based social movements, environmental concerns of indigenous peoples, bio-cultural restoration and decolonization of nature-human relations.

Prerequisite: 8.0 credits including one of INS200H1, INS201Y1, INS250H1, GGR107H1, GGR124H1, GGR240H1, GGR246H1, GGR254H1
Exclusion: JAG321H1, GGR321H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)
GGR324H1 - Spatial Political Economy

Previous Course Number: POL371H1
Hours: 24L

This course aims to explore how economic agents act and interact in space and how this creates subdivisions within the global, national and regional political economy. In a largely conceptual and interdisciplinary manner, the course investigates the role of institutions in the relational economy and the spatial construction of the political economy. Institutions are viewed as formal or informal stabilizations of economic interaction. Questions which guide the analysis are related to how institutions are established, how they evolve, how they impact economic action, and how they are changed through political and economic action at different spatial scales. Through this, the course introduces a relational and spatial perspective to the analysis of economic action and institutions. This perspective is based on the assumption that economic action is situated in socio-institutional contexts, evolves along particular paths and, at the same time, remains fundamentally contingent. Topics to be discussed include the social construction of economic space, industrial organization and location, the establishment and maintenance of economic networks, as well as processes of firm formation, learning and knowledge creation.

Prerequisite: 8.0 FCEs
Exclusion: POL371H1
Recommended Preparation: One of ECO101H1, GGR112H1, GGR221H1, GGR251H1, GGR252H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

JUG325H1 - Landscapes of Violence in Canada

Hours: 24L

This course examines how violence is enacted in Canada, at various scales, and across domestic, urban, national, and international landscapes. We will interrogate what is meant by violence; examine its colonial, racial and patriarchal dimensions; explore the impact on people and communities; and attend to forms of resistance and repair.

Recommended Preparation: CDN267H1, CDN268H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

GGR326H1 - Remaking the Global Economy

Hours: 24L

Examines links between global economic integration and geographically uneven economic development. Focuses on debates and empirical studies on global production networks (GPNs), and associated issues such as offshoring, outsourcing, and upgrading. Blends analysis of both theory and practice of business firms and regional development. Seeks to develop an in-depth understanding of the key actors driving contemporary global economic transformation, within the 'transnational space' constituted and structured by transnational firms, state institutions, and ideologies.

Prerequisite: 7.5 FCE's
Exclusion: GGR300H1 (2013-14)
Recommended Preparation: GGR112H1/GGR220H1/GGR221H1/GGR251H1, 1.0 FCE in Geography (SOC SCI/BR=3) at the 200+ level
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

GGR327H1 - Geography and Gender

Hours: 24L

Introduction to the work of feminist geographers. The course will explore the relationship between gender and space, emphasizing spatial cognition, architecture, and layout of the city.

Exclusion: GGR313H5
Recommended Preparation: 8.0 FCE's including 1.0 FCE in Geography (SOC SCI/BR=3)
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

GGR328H1 - Labour Geographies

Hours: 24L

Explores changes in the nature of work and the structure and geography of labour markets. Topics will include globalization, lean production, flexibility and risk, industrial relations, workfare, the body at work, and gender and work.

Prerequisite: 7.5 FCE's including 1.0 FCE in Geography (SOC SCI/BR=3)
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)
GGR329H1 - The Global Food System

Hours: 24L

Explores the changing global geographies of food by tracing international movements of food through both mainstream and 'alternative' supply chains. The implications for sustainability, food security, community autonomy and health are investigated.

Exclusion: GGR287H5
Recommended Preparation: 8.0 FCE's including 1.0 FCE in Geography (SOC SCI/BR=3), GGR107H1 recommended.
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

GGR334H1 - Water Resource Management

Hours: 24L

Managing demand and supply; linkages between water quality and human health. Case studies from the industrial world and from developing countries, rural and urban. Implications of population growth and climate change for water resource management.

Exclusion: GGR288H5
Recommended Preparation: 8.0 FCE's including one of JEG100H1/GGR100H1, GGR107H1, GGR223H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

JGE331H1 - Resource and Environmental Theory

Hours: 24L

Introduction to and critical evaluation of major ideas and conceptual traditions underpinning environmental and natural resource politics and regulation. Topics include: parks and protected areas, market-based environmental regulation, property rights and conservation, Malthusianism, and biodiversity conservation. Emphasis is placed on critical reading of primary texts.

Prerequisite: GGR100H1/JEG100H1/GGR107H1/ENV221H1/ENV222H1/GGR223H1
Recommended Preparation: 8.0 FCE's
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

GGR336H1 - Urban Historical Geography of North America

Hours: 24L

This course explores the emergence and reproduction of class and racial social spaces, the development of new economic spaces, and the growing importance of the reform and planning movements. Emphasis is on metropolitan development between 1850 and 1950.

Recommended Preparation: 8.0 FCE's including one of GGR124H1, GGR241H1, GGR254H1
Distribution Requirements: Humanities; Social Science
Breadth Requirements: Society and its Institutions (3)

GGR337H1 - Environmental Remote Sensing

Hours: 24L/24P

Principles of optical, active and passive microwave remote sensing; satellite orbit and sensor characteristics; image processing and analysis techniques and software; and environmental remote sensing applications.

Exclusion: GGR337H5
Recommended Preparation: JEG100H1/GGR100H1, GGR272H1
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

GGR332H1 - Social Geographies of Climate Change

Previous Course Number: GGR387H1
Hours: 24L

Analyses the social and behavioural geographies of climate change, including: climate change communication (how we interpret and communicate climate science); climate change prevention strategies, from the macro to micro scale; and possibilities for climate change adaptation.

Exclusion: GGR387H1 (Special Topics in Environmental Geography: The Social Geographies of Climate Change), offered in Winter 2020
Recommended Preparation: GGR223H1 and GGR271H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)
GGR338H1 - Environmental Issues in the Global South

Hours: 24L

Describes and analyses a range of key environmental issues in the context of the Global South. Topics covered include: air quality and water supply, solid waste management, impacts of and responses to environmental change. Considers factors that influence distribution of environmental costs and benefits in geographic and historical terms. Also examines technologies and policy paradigms that have framed and sought to address environmental issues in the Global South.

Recommended Preparation: 8.0 FCE's including one of GGR107H1, GGR223H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

GGR339H1 - Urban Geography, Planning and Political Processes

Hours: 24L

Investigates North American urban political geography, exploring conflicts over immigration, environment, gentrification, homelessness, labour market restructuring, 'race' and racism, urban sprawl, nature and environment, gender, sexuality, security, and segregation. Explores competing visions of city life and claims on urban space. The course investigates how these struggles connect to economic, social and environmental politics at larger spatial scales, and considers different theoretical frameworks that geographers have developed to make sense of both the persistence of old problems and the emergence of new ones. Field trip cost: $20.

Exclusion: GGR349H5
Recommended Preparation: 8.0 FCE's including GGR124H1, GGR246H1/GGR254H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

GGR340H1 - Health Geography

Hours: 24L

An exploration of the aspects of health in which place or location matters. Particular attention will be paid to the role of environments (physical, social, etc.) in explaining differences in health between places, the structuring of health-related behaviour in place, and the development of health policy for places.

Prerequisite: GGR270H1, or the combination of STA220H1 and HST250H1
Recommended Preparation: 8.0 FCE's, including GGR223H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

GGR341H1 - Changing Geography of Latin America

Hours: 24L

Seeks to develop a general understanding of present-day Latin America by focusing on human-environment interactions, past and present. Case studies are used to understand the diversity of Latin American landscapes (physical and cultural), and how they are changing within the context of globalization.

Exclusion: GGR249H
Recommended Preparation: 8.0 FCE's including 1.0 in Geography (SOC SCI/BR=3)
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

GGR342H1 - The Changing Geography of Southeast Asia

Hours: 24L

Examines changes in the social, political and economic geography of Southeast Asian countries. Examples drawn from Thailand, Singapore, Indonesia, Vietnam and the Philippines as these emerging newly industrialized countries enter the 21st century. Emphasis on political-economy, urbanization and environment since 1950.

Recommended Preparation: 8.0 FCE's including 1.0 FCE in Geography (SOC SCI/BR=3)
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

GGR343H1 - The Changing Geography of China

Hours: 36L

The evolving social, political and economic landscape of China. Focus on development strategies and their effects on agriculture, industry, urbanization, city planning and the environment since 1949. Special attention paid to the interconnected development trajectories shaping urban and rural areas, together with the complex interactions between the built and social environments.

Prerequisite: 8.0 FCEs
Recommended Preparation: 1.0 FCE in Geography (SOC SCI/BR=3)
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)
GGR344H1 - Political Economy of Germany and the EU

Previous Course Number: POL372H1
Hours: 24L

The goal of this course is to explore the structure and geography of the German political economy in the context of EU integration and economic globalization. This includes providing an understanding of the economic and political system (and its regional manifestations), which was once (and is now again) viewed as a successful socially-balanced alternative to the market-liberal structures in Anglo-Saxon economies. Drawing upon the varieties-of-capitalism approach, the main themes in the course address the institutional conditions for growth. In a comparative perspective, the course explores topics, such as the role of collective agents, corporate governance and finance, collective bargaining, inter-firm co-operation and regional networks, social security systems, and population structure and immigration. In order to understand the heterogeneous challenges to the “German model”, the conditions are explored under which regional economies develop. This includes an analysis of the reunification process, and of the economic and political situation in the new Länder. Further, the question is raised as to how the “German model” can adapt to challenges related to globalization, climate change and economic crises.

Prerequisite: 8.0 FCEs
Exclusion: POL372H1
Recommended Preparation: 1.0 FCE from GGR or POL
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

GGR347H1 - Efficient Use of Energy

Previous Course Number: JGE347H1
Hours: 24L/6T

Examines the options available for dramatically reducing our use of primary energy with no reduction in meaningful energy services, through more efficient use of energy at the scale of energy-using devices and of entire energy systems. Topics covered include energy use in buildings, transportation, industry, and agriculture. Offered alternate years from GGR348H1.

Prerequisite: Physics SPH3U
Exclusion: GGR333H1, JGE347H1
Recommended Preparation: 8.0 FCE’s including first year Math and/or Physics
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

GGR348H1 - Carbon-Free Energy

Previous Course Number: JGE348H1
Hours: 24L/6T

Examines the options available for providing energy from carbon-free energy sources: solar, wind, biomass, nuclear, and fossil fuels with capture and sequestration of CO2. The hydrogen economy is also discussed. Offered alternate years from GGR347H1.

Prerequisite: Physics SPH3U
Exclusion: GGR333H1, JGE348H1
Recommended Preparation: 8.0 FCE’s including first year Math and/or Physics
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

JGI346H1 - The Urban Planning Process

Hours: 24L

Overview of how planning tools and practice shape the built form of cities. This course introduces twentieth century physical planning within its historical, social, legal, and political contexts. Community and urban design issues are addressed at local and regional scales and in both central cities and suburbs. The focus is on Toronto and the Canadian experience, with comparative examples from other countries, primarily the United States. Transportation costs: $20.

Exclusion: GGR361H5
Recommended Preparation: 8.0 FCE’s including GGR124H1, INI235H1, INI236H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)
GGR349H1 - Managing Urban Natures

Hours: 24L

Recent calls to action by the Intergovernmental Panel on Climate Change and the World Wildlife Fund indicate we are at a crossroads in responding to accelerating global warming and biodiversity loss. Cities are often at the forefront of these transformations, both in feeling their effects but also initiating responses. How might we reimagine our cities in a way that promotes thriving and equitable ecosystems? What tools exist in the policy landscape to initiate needed changes? What innovative responses are emerging to confront the challenges of increased flooding, rising temperatures, habitat fragmentation, and food insecurity? How might we reimagine an urban commons? With a primary focus on Canadian cities, in this course we explore the ways divergent conceptualizations of urban-nature have informed policies and practices drawing largely from critical, political ecology, and Indigenous perspectives; the policy landscape that informs current urban planning; and new and innovative approaches that help us to reshape and reimagine our relationships to urban nature, including initiatives led by municipalities, non-government organizations and citizens groups.

Prerequisite: 8.0 FCEs
Exclusion: GGR300H1 (Topics: Managing Urban Natures), offered in Fall 2017
Recommended Preparation: GGR223H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

GGR352H1 - Understanding Spatiality

Hours: 24L

Investigates the changing nature of space and our thinking about it, introducing students to a wide range of contemporary geographers and spatial theorists such as Lefebvre, Soja, Gregory, Harvey, Massey and others as well as challenges to this thinking - voices from the margins or peripheries. It will explore changing conceptions of spatiality that inform geographic thought and that help us understand the ways in which political, economic and social power is constituted and contested at a range of spatial scales.

Recommended Preparation: 8.0 FCE's including 1.0 FCE in Geography (SOC SCI/BR=3)
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

GGR354H1 - Infrastructure

Previous Course Number: GGR300H1 (20175)
Hours: 24L

Infrastructure is the term that describes the transportation systems, sewers, pipes, and power lines that provide urban dwellers with necessary public services. In recent years, billions of dollars of public money have been spent upgrading existing infrastructure, and planning and delivering new facilities. Infrastructure has many impacts on the way that people in cities live. The way that infrastructure systems are planned, financed, and distributed impact on environmental sustainability, job creation, social equity, economic development, and urban livability. Moreover, infrastructure has the potential to both serve existing populations, and shape the way that future communities are built. Through lectures, discussions, workshops, readings of scholarly articles and case studies, the course will aim to engage students in the key topics and debates related to the provision of urban infrastructure. Topics to be covered will include: project planning, causes and cures for cost overruns, funding models, financing mechanisms such as public-private partnerships, and the politics of facility planning and management.

Prerequisite: 8.0 FCEs
Exclusion: GGR300H1 (Topics: Infrastructure), offered in Summer 2017
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

GGR357H1 - Housing and Community Development

Hours: 24L

Focuses on the importance of adequate housing and quality neighbourhoods. It roots theoretical explanations and policy debates in realities using Canada and Toronto as examples. Topics covered include the evolution of public policies relating to social housing, rental housing, homeownership, neighborhoods, and homelessness.

Recommended Preparation: Completion of 8.0 FCE's including GGR124H1 and 1.0 FCE in Geography (SOC SCI/BR=3)
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)
GGR359H1 - Comparative Urban Policy

Hours: 24L

This course considers urban public policy. Urban policy is not natural or inevitable response to urban problems. It is actively produced (and contested) by an array of voices, institutions, and social forces. Actualized urban policies are thus best understood and evaluated as products of these influences. The first half of the course will cover broad theoretical matters pertaining to the production of urban policy. The second half of the course will focus more intensively on one problem—urban decline—and explore the actualized approaches that have been brought to bear to manage it.

Prerequisite: 7.5 FCE’s including 1.0 FCE in Geography (SOC SCI/BR=3)
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

GGR360H1 - Culture, History, and Landscape

Hours: 24L

The history of approaches to the idea of landscape. A consideration of the origins and uses of the term in geographical inquiry will be followed by a series of case studies, global in scope, from the Early Modern period to the present. Emphasis will be placed on the representational and lived aspects of landscapes, as well as struggles over their definition, interpretation, and use.

Recommended Preparation: 8.0 FCE's including 1.0 FCE in Geography (HUM/BR=1 or SOC SCI/BR=3)
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

GGR363H1 - Critical Geographies: An Introduction to Radical Ideas on Space, Society and Culture

Hours: 36L

Introduces a diversity of critical perspectives for geographers and others, including anarchism, Marxism, feminism, sexual politics, postcolonialism, anti-imperialism and anti-racism. In so doing it illustrates how such radical ideas about space, society and culture have contributed to our political thought and action.

Recommended Preparation: 8.0 FCE's including 1.0 FCE in Geography (SOC SCI/BR=3)
Distribution Requirements: Humanities; Social Science
Breadth Requirements: Society and its Institutions (3)

GGR372H1 - GIS for Public Health

Hours: 24L/12P

The goal of this course is to leave students with appreciation of the power of Geographic Information Systems (GIS) to explore and analyze spatial health and medical data. The course will focus on organizing health data in a GIS, clustering detection methods, and basic spatial statistics. Other topics like agent-based models and visualization techniques will be touched upon. Lab work will provide hands on experience with example data, leaving students with a firm grasp of contemporary health and medical problems and a skill set of spatial analytical methods that can be used to solve them.

Prerequisite: 8.0 FCEs
Exclusion: GGR300H1(2015-2016), GGR335H5
Recommended Preparation: GGR270H1, GGR272H1
Distribution Requirements: Science; Social Science
Breadth Requirements: Society and its Institutions (3)

GGR373H1 - Advanced Geographic Information Systems

Hours: 24L/24P

Advanced theory, techniques, and applications in geographic information systems (GIS), including interpolation, geostatistics, modeling, and raster and vector analysis. GIS project design and implementation.

Prerequisite: GGR273H1
Distribution Requirements: Science; Social Science
Breadth Requirements: The Physical and Mathematical Universes (5)

GGR374H1 - Urban Dynamics

Hours: 24L

This course will focus on the social and economic repercussions associated with the formation and evolution of polynuclear urban regions in response to global economic restructuring. Foci will include the importance of knowledge and innovation in the process of economic development, social and economic polarization at multiple spatial scales, planning interventions to address these polarities, and strategies and tactics in the promotion of more sustainable urban-centred regional economies.

Recommended Preparation: 8.0 FCE's including 2.0 FCE's in Geography (SOC SCI/BR=3). A statistics course (GGR270H1 or other) would be an asset.
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)
GGR382H1 - Field Course in Human Geography

Introduction to field studies in human geography. The course includes exercises and a project during a one-week field study in late August or early September, some preparation during the preceding summer and complementary practical work and/or seminars during the Fall Term. Each student is required to pay the costs of their transportation and accommodation (field trip costs: $500). Students must register with the department in the spring. Course is limited by size. Preference given to Geography SPE/MAJ/MIN. Applications open to all students. Not eligible for CR/NCR option.

Prerequisite: Permission of instructor
Exclusion: GGR389H5
Recommended Preparation: 8.0 FCE's
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

GGR385H1 - Special Topics in Geography

Previous Course Number: GGR300H1
Hours: 24L

Content in any given year varies by instructor. Students must meet the prerequisites set by the department (see the Geography website for details in May). The program in which this course can be used depends on its content.

GGR386H1 - Special Topics in Geographic Information Systems

Previous Course Number: GGR300H1
Hours: 24L

Content in any given year varies by instructor. Students must meet the prerequisites set by the department (see the Geography website for details in May). Can be used towards GIS, Human Geography, and Environmental Geography programs.

Prerequisite: GGR272H1

GGR387H1 - Special Topics in Environmental Geography

Previous Course Number: GGR300H1
Hours: 24L

Content in any given year varies by instructor. Students must meet the prerequisites set by the department (see the Geography website for details in May). Can be used towards Environmental Geography and Human Geography programs.

Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

GGR388H1 - Special Topics in Physical & Environmental Geography

Previous Course Number: GGR300H1
Hours: 24L

Content in any given year varies by instructor. Students must meet the prerequisites set by the department (see the Geography website for details in May). Can be used towards Physical & Environmental Geography and Environmental Geography programs.

Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

GGR389H1 - Special Topics in Human Geography

Previous Course Number: GGR300H1
Hours: 24L

Content in any given year varies by instructor. Students must meet the prerequisites set by the department (see the Geography website for details in May). Can be used towards Human Geography programs.

Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)
GGR390H1 - Field Methods

Introduction to field methods in geomorphology, vegetation mapping/analysis, soils, hydrology, and climatology. The course includes exercises and a group project during a one-week field camp, a little preparation during the preceding summer, and complementary practical work and/or seminars during the Fall Term. Each student is required to pay the costs of their transportation and accommodation (field trip costs: $300). This course meets the field requirement for Physical & Environmental Geographical programs. The field camp normally runs for one week at the end of August. Students must register with the Department by April. Consult with the department in case of conflict or concerns. Course may be limited by size. Not eligible for CR/NCR option.

Prerequisite: 1.0 from JEG100H1/GGR100H1, GGR201H1, GGR203H1, GGR205H1, GGR206H1, GGR305H1, ESS102H1, ENV234H1, or permission of the instructor
Recommended Preparation: 8.0 FCE's including GGR270H1
Distribution Requirements: Science

GGR398H0 - Research Excursions

An instructor-supervised group project in an off-campus setting. Details at https://www.artsci.utoronto.ca/current/academics/research-opportunities/... Not eligible for CR/NCR option.

Distribution Requirements: Social Science

GGR398Y0 - Research Excursions

An instructor-supervised group project in an off-campus setting. Details at https://www.artsci.utoronto.ca/current/academics/research-opportunities/... Not eligible for CR/NCR option.

Distribution Requirements: Social Science

GGR399Y1 - Research Opportunity Program

Credit course for supervised participation in faculty research project. Details at https://www.artsci.utoronto.ca/current/academics/research-opportunities/... Not eligible for CR/NCR option.

GGR400H1 - Special Topics in Geography I

Hours: 24S

Content in any given year depends on instructor. The program in which this course can be used depends on its context. Consult Departmental Office in April.

Prerequisite: 10.0 FCE's
Recommended Preparation: 2.0 FCE's in GGR (HUM/BR=1 or SOC SCI/BR=3)
Distribution Requirements: Social Science

GGR401H1 - Special Topics in Geography II

Content in any given year depends on instructor. The program in which this course can be used depends on its context. Consult Departmental Office in April.

Prerequisite: 10.0 FCE's
Recommended Preparation: 2.0 FCE's (science) in any of GGR/ESS/BIO/CHM/EEB/FOR
Distribution Requirements: Science

GGR405H1 - Sustainable Systems for Natural Resources Management

Hours: 24S

This seminar examines the scientific foundations of sustainable natural resource management. Will consider frameworks to assess management and production systems for renewable natural resource and energy development in relation to specific landscapes. Constraints and opportunities to achieving sustainability objectives in different systems will be examined through theoretical and case study evaluations drawn from research literatures. Seminar and self-directed inquiry through individual and team projects. Field trip transportation cost: $100.

Prerequisite: 10.0 FCE's
Exclusion: GGR401H1 (2012-13)
Recommended Preparation: 2.0 FCE's (science) in any of GGR/BIO/CHM/EEB/ESS/FOR
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)
GGR406H1 - Geomorphology and the Anthropocene

**Hours:** 12L/12S

In this seminar course, we will explore the nature of geomorphology and the Anthropocene (the proposed geological time interval during which human activities have greatly impacted the global environment) using a combination of lectures, readings, and discussions. We will consider the ways in which hillslope, fluvial, coastal, aeolian, and other domains have been altered or influenced by humans and consider the role of geomorphology as a science for understanding and examining the changes in landscape form and processes.

**Prerequisite:** GGR201H1  
**Exclusion:** GGR401H1 (Special Topics in Geography II: Geomorphology and the Anthropocene), offered in Winter 2020  
**Recommended Preparation:** GGR272H1  
**Distribution Requirements:** Science  
**Breadth Requirements:** The Physical and Mathematical Universes (5)

GGR413H1 - Watershed Hydroecology

**Hours:** 24L

Modern developments in hydrology and ecology, including form and process models, interactions of hydrology, ecology and geomorphology; the course emphasizes the use of computer simulation models of drainage basin processes.

**Prerequisite:** 10.0 FCE’s  
**Recommended Preparation:** GGR201H1, GGR206H1, GGR270H1, GGR272H1 or GGR337H1  
**Distribution Requirements:** Science  
**Breadth Requirements:** The Physical and Mathematical Universes (5)

GGR414H1 - Advanced Remote Sensing

**Hours:** 18L/8T/4P/2S

Building on GGR337H1 Environmental Remote Sensing with advanced theories and techniques for land cover mapping, vegetation biophysical and biochemical parameter retrievals, optical and thermal remote sensing of urban environment, and application of satellite remote sensing to terrestrial water and carbon cycle estimation. Basic radiative transfer theories as applied to vegetation will be given in some detail as the basis for various remote sensing applications. Optical instruments for measuring vegetation structural parameters will be demonstrated in the field.

**Prerequisite:** 10 FCEs including GGR337H1  
**Recommended Preparation:** GGR272H1, GGR273H1, GGR373H1  
**Distribution Requirements:** Science  
**Breadth Requirements:** The Physical and Mathematical Universes (5)

GGR416H1 - Environmental Impact Assessment

**Hours:** 24L/4T

Environmental impact assessment (EIA) as a mechanism for avoiding or mediating the potential costs of development. The course focuses on the theory and practice of EIA in Canada in general and Ontario in particular. Using a broad definition of environment, various components of EIA are addressed, with an emphasis on principles, legal and institutional frameworks, stages in the process, and specific analytical techniques.

**Prerequisite:** 10.0 FCE’s, 2.0 FCE’s in Geography including GGR270H1, GGR271H1  
**Recommended Preparation:** One of GGR222H1/GGR223H1 or ENV236H1/JGE236H1  
**Distribution Requirements:** Social Science  
**Breadth Requirements:** Society and its Institutions (3)

GGR418H1 - Political Economy of Natural Resources

**Hours:** 24S

Examines political aspects of the appropriation of natural resources, including policy and regulation, environmental impacts, and social justice. Emphasis is placed on reading contemporary literature on the politics of resource access and control from geography and other social science disciplines.

**Prerequisite:** 10.0 FCE’s including GGR223H1  
**Distribution Requirements:** Social Science  
**Breadth Requirements:** Society and its Institutions (3)

GGR419H1 - Environmental Justice

**Hours:** 24S

Examines how environmental problems affect people, communities and societies differentially and how marginalized communities and people often bear the brunt of environmental costs, while contributing little to their creation. It uses readings and case studies from across the globe to address the production of environmental injustice and the struggle for environmental justice.

**Prerequisite:** 10.0 FCE’s  
**Recommended Preparation:** 1.0 FCE in Geography (SOC SCI/BR=3)  
**Distribution Requirements:** Social Science  
**Breadth Requirements:** Society and its Institutions (3)
GGR420H1 - Critical Development Geography

Hours: 24L

Examines the politics and processes shaping economic globalization and international development. The course will review a range of critical approaches to development, the historical geography of uneven development, and some emerging approaches to critical development studies. The course focuses on recent scholarly discussions about how to define international development and pays particular attention to the relationships between migration and development in theory and practice. It takes seriously the politics of difference (race, ethnicity, class, gender, nationality and sexuality) and inequality in the critical study of international development research and practice.

Prerequisite: 10.0 FCEs
Recommended Preparation: GGR112H1 or GGR124H1; GGR320H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

GGR421H1 - Histories of Geographical Thought

Hours: 24S

The history of geography as an intellectual subject, focusing primarily on the modern period, and on the genealogies of central concepts. Disciplinary developments will be situated next to broader contexts, including imperialism and militarism, the relationship between culture and nature, and the shifting social role of the academy.

Prerequisite: 10.0 FCE's
Recommended Preparation: 2.0 FCE's in Geography (HUM/BR=1 or SOC SCI/BR=3)
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

GGR424H1 - Transportation Geography and Planning

Previous Course Number: GGR324H1
Hours: 24L

Introductory overview of major issues in interurban and intraurban transportation at the local, national and international scale. Topics include urban transportation, land use patterns and the environment, causes of and cures for congestion, public transit, infrastructure finance, and transport planning and policy setting.

Prerequisite: 10.0 FCE's including one of GGR124H1/GGR220H1/GGR221H1
Exclusion: GGR324H1, CITC18H3
Recommended Preparation: GGR270H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

GGR429H1 - Innovation and Governance

Previous Course Number: POL408H1
Hours: 24S

The course focuses on a broad range of topics related to innovation and governance, such as (i) technological change and its social and economic consequences, (ii) the spatial effects which result from this, and (iii) the necessities for economic policies at different territorial levels. Since international competitiveness of industrialized economies cannot be based on cost advantages alone, future growth in the knowledge-based economy will be increasingly associated with capabilities related to creativity, knowledge generation and innovation. As a consequence, questions regarding the performance in innovation and effectiveness of policy support become decisive at the firm level, regional level and national level. The first part of the course deals with conceptual foundations of innovation processes, such as evolutionary and institutional views of innovation. In the second part, national configurations of innovation processes are investigated. The third part deals with innovation at the subnational level, focusing on regional clustering, institution building, multilevel governance, and regionalized innovation systems.

Prerequisite: 10.0 FCEs
Exclusion: POL408H1
Recommended Preparation: One of GGR221H1, GGR251H1, GGR324H1, GGR326H1, GGR328H1, GGR374H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

GGR430H1 - Geographies of Markets

Hours: 36S

Focuses on actually-existing markets and their geographically-mediated formation and assemblage. Explores how markets are produced, stabilized, reshaped and fall apart at multiple geographic scales. We examine issues such as the debates on states versus markets, embeddedness of markets, neoliberalism and moral justification of markets, varieties of capitalism, regionally variegated capitalism, post-socialist market transitions, and the dynamic evolution of market institutions and economic landscapes.

Prerequisite: 10.0 FCE's including at least 1.0 FCE in 300+ Geography (SOC SCI/BR=3)
Exclusion: GGR400H1(2013-14)
Recommended Preparation: GGR220H1/GGR221H1, GGR326H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)
GGR431H1 - Regional Dynamics

Hours: 24L

Economic activity, and related indices of socioeconomic well-being and human capital, have always tended to concentrate in space, leaving specific regions to be classified as "creative", "developed", or "core" regions and others as "have-not", "less-developed", "peripheral", or "marginal" regions. As a result, regional economic change has been very difficult to fully explain (and certainly predict) using conventional (orthodox) theories and methods. This course examines the theoretical linkage between related trends in terms of globalization, vertical disintegration, specialization, innovation, and the locational behaviour of firms. We will focus on the seemingly counter-intuitive finding that regional economic change in a time of increasing global interdependence is increasingly dependent on the local context. Topics will include evolutionary economic geography, path dependence, economic clusters, learning regions, the role of institutions, knowledge spill-overs, and the geography of innovation, among others. We will see why the economic activity is becoming ever more concentrated in space even as it globalizes. The course makes extensive use of empirical case studies from around the globe.

Prerequisite: 10.0 FCE’s including GGR221H1 or GGR251H1
Recommended Preparation: GGR326H1, GGR270H1. A statistics course (GGR270H1 or other) would be an asset.
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

GGR433H1 - Built Environment and Health

Hours: 36S

Linking across fields that include public health, geography and planning, this course examines the growing evidence and ways in which human health is affected by the design and development of the built environment in which we live, work and play. The course considers how various planning and development decisions impact population and individual health, particularly in relation to chronic diseases, injuries, and mental health. Field trip transportation cost: $20.

Prerequisite: 10.0 FCE’s
Exclusion: GGR400H1 (2012-13)
Recommended Preparation: 1.0 FCE in Geography (SOC SCI/BR=3)
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

GGR434H1 - Building Community Resilience

Hours: 36S

Examines concepts of resilience as a way of building the capacity of communities to (a) respond to predicted disruptions/shocks associated with climate change, global pandemics, anticipated disruptions in global food supply, energy insecurity, and environmental degradation; and (b) nurture the development of alternative spaces that support the emergence of more life-sustaining structures and practices. Includes explicit attention to equity and public health, and explores issues such as: participatory governance of social-ecological systems, the nature of social change, complexity science, the role of social movements, indigenous and political ecology perspectives.

Prerequisite: 10 FCEs
Exclusion: GGR400H1 (2011-12)
Recommended Preparation: 1.0 FCEs in Geography
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

GGR438H1 - Environment and Development

Hours: 36S

Examines the implications of development – as an economic and social project – for how the environment is used, by whom, and to what ends. Draws on literatures in political ecology and critical development geography. Topics include: interpretations of scarcity and degradation, questions of consumption, and the greening of development. Examines expansion of and struggles over new forms of green infrastructure in urban and rural settings.

Prerequisite: 10 FCE’s
Recommended Preparation: 1.0 FCE in Geography (SOC SCI/BR=3)
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)
JIG440H1 - Indigenous Geographies

Previous Course Number: GGR400H1 in 20199
Hours: 36S

This course draws on theoretical texts of Indigeneity, with a primary focus on Indigenous spaces in the Americas. Course participants will examine how core geographic concepts such as place, territory, land, movement and the scale of the body are sites of colonial dispossession and violence, as well as sites for decolonial and liberatory thought and practice. We will primarily engage with Indigenous-led scholarship within Geography and Indigenous Studies, and creative forms of knowledge production generated across Indigenous communities.

Prerequisite: 10.0 credits including one of INS200H1, INS201Y1, INS250H1, GGR107H1, GGR124H1, GGR240H1, GGR246H1, GGR254H1
Exclusion: GGR400H1 (Special Topics in Geography I: Indigenous Geographies), offered in Fall 2019
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

GGR452H1 - Space, Power, Geography: Understanding Spatiality

Hours: 24S

Our understanding of space and power has shifted radically in the past half century. Space no longer implies only regions, nations or territory; power is not simply a question of domination, control, or forms of political representation. Space and power are intricately related. This course explores a shift in our ways of thinking about space and power, focusing specifically on the works of Michel Foucault and Gilles Deleuze. Through the works of Deleuze and Foucault, students are introduced to a variety of ways that space and power are organized and contested. The course begins with the maps in our heads: what kinds of spatial systems organize dominant world-views, how have these changed over time? What spatial metaphors do we use to think about power – as hidden and operating at a depth, or as a surface effect? How does the social organization of space figure in the development of different technologies and techniques of power? How do technologies of power become organized, serialized, dispersed, transformed and contested?

Prerequisite: 10.0 FCE's including at least one (or an equivalent) of GGR327H1, GGR328H1, GGR339H1, GGR352H1, GGR360H1, GGR363H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

JGI454H1 - The Role of the Planner: Making a Difference

Hours: 24L

Focuses on the role of a planning practitioner in contemporary society using a wealth of examples drawn from recent issues and debates in Canadian cities and regions. The course will walk students through the demands made of planners in terms of both technical expertise as well as political necessity and ask them to think actively about how to prepare for the extraordinary growth of cities during the next century. Examples of issues that will be discussed in some detail include the myths surrounding the city vs. the suburbs, the creativity and passion involved in planning work and the need to see Toronto’s future from a regional perspective.

Prerequisite: 14.5 FCEs, 5.0 of which must be GGR/INI Urban Studies
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

GGR456H1 - Entanglements of Power: Race, Sexuality and the City

Hours: 24S

This course investigates the city as a space sculpted by particular configurations and relations of power, and productive of those forms. It considers shifting urban geographies of identity, economy and desire with a focus on race and racism, settler colonialism, empire, the laboring body, sexuality, and sexual identity. Course participants will engage a series of case studies of particular urban spaces and struggles, drawing on conceptual support from scholarship in urban geography, anti-colonial thought, political economy, black studies, feminist and queer theory, Indigenous and settler colonial studies, as well as literature and other artistic work.

Prerequisite: 10.0 FCEs
Exclusion: GGR400H1 (Special Topics in Geography I: Entanglements of Power: Race, Sexuality and the City), offered in Fall 2018
Recommended Preparation: 2.0 FCEs in GGR
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)
GGR457H1 - The Post-War Suburbs

Hours: 24L

Investigates post-war suburbs, beginning with an examination of their competing contemporary meanings. It considers images of prosperous private enclaves, of declining and difficult to access places, of racialized and segregated areas, of banality and homogeneity, of precarity and polarization, and of creative social struggles. It assesses these different visions through an analysis of urban growth and change since WWII. The course will focus on themes of public and private space; class, race and segregation; gender and suburban space; immigration; urban sprawl, and the changing social and economic geography of the suburbs. It examines North American areas, with examples from Australia and Europe.

Prerequisite: 10 FCEs

Distribution Requirements: Humanities; Social Science

Breadth Requirements: Society and its Institutions (3)

GGR458H1 - Selected Topics in Urban Geography

Hours: 24L

This course focuses on a special topic in urban geography and covers it with more depth than would otherwise be the case in a survey-oriented class. The aim is to utilize this single topic as a vehicle to understanding how urban geographical ideas are produced more widely. Check the department website for the theme (updated each year).

Prerequisite: 10.0 FCE's

Distribution Requirements: Social Science

Breadth Requirements: Society and its Institutions (3)

GGR460H1 - Global Cities, Urban Planning, Critical Theory

Previous Course Number: GGR400H1 (20181)

Hours: 36S

This seminar addresses the relationship between urbanization and global economic, political, cultural, social, demographic, technological and ecological dynamics. It does so with an emphasis on the contested legacies of city planning, urban design, architecture and urban political activism, by drawing on historical studies of global cities as well as critical-theoretical perspectives on the 'production of space'. While broaching the question what's 'production of space' got to do with social justice, we explore—with reference to pioneering thinkers in the fields of planning, architecture and critical theory—such concepts as radical planning, the urban revolution and the right to the city.

Prerequisite: 10.0 FCEs

Exclusion: GGR400H1 (Topics: Planning and Global Cities), offered in Winter 2018

Recommended Preparation: 1.0 FCE in Geography (SOC SCI/BR=3)

Distribution Requirements: Social Science

Breadth Requirements: Society and its Institutions (3)

GGR462H1 - GIS Research Project

Hours: 24L

Students work in groups to develop their own research project and then acquire, organize and analyze geographic data to complete it. Emphasis is placed on research design, project management and the application of GIS concepts and skills learned in previous courses to a practical problem.

Prerequisite: GGR373H1

Distribution Requirements: Science; Social Science

Breadth Requirements: The Physical and Mathematical Universes (5)

GGR472H1 - Developing Web Maps

Hours: 24L

Explores the power of web mapping and CyberGIS, with a focus on hands-on learning and open source software. Students will learn about relevant software (exploring various APIs), data structures, methods, and cartographic and visualization techniques. Finally, students will work in groups to develop and deliver their own online web maps from scratch, on a topic of their choosing.

Prerequisite: 10.0 FCEs including GGR272H1 and GGR273H1

Exclusion: GGR400H1 (2015-2016)

Distribution Requirements: Social Science

Breadth Requirements: The Physical and Mathematical Universes (5)
GGR481H1 - Field Course in Environmental Geography

Introduction to field studies in environmental geography. The course may include individual assignments and group work. Field trips are concentrated during a one-week period in late August or early September. Some preparation during the preceding summer may be required. Periodic course meetings and shorter field trips continue, along with course work, during the Fall Term. Each student is required to pay the costs of their transportation and accommodation (field trip costs: $100). Students must register with the Department by April. Course may be limited by size. Not eligible for CR/NCR option.

**Prerequisite:** Permission of instructor  
**Exclusion:** GGR381H1  
**Recommended Preparation:** 10.0 FCE’s including 3.0 FCE’s in Geography (SOC SCI/BR=3)  
**Distribution Requirements:** Social Science  
**Breadth Requirements:** Society and its Institutions (3)

GGR482H1 - Toronto Field Course

Examines the production of urban landscapes, built environments and social spaces in Toronto and surrounding areas through in-depth case studies. Coverage will vary some depending on instructor. The course consists of local field trips and in-class seminars and lectures. Students must apply with the Department. Contact the Department in January for deadlines. Course is limited by size. Preference given to Geography SPE/MAJ/MIN. Applications open to all students. Not eligible for CR/NCR option. Field trip costs: $150.

**Prerequisite:** 10.0 FCE’s  
**Distribution Requirements:** Social Science  
**Breadth Requirements:** Society and its Institutions (3)

GGR491Y1 - Research Project

Specially designed for students wishing to gain experience in conducting research in their area of specialization. Of particular value for geographers interested in graduate study, or positions in government, planning and consulting firms where research skills may be an asset. Students select a research problem and complete a project under the supervision of a faculty member. Enrolment requires written permission from a faculty supervisor and Associate Chair, Undergraduate; early discussion with a likely supervisor is encouraged. Enrolment may be completed at any time up to September; open to students in a Specialist or Major Program sponsored by the Department of Geography. Not eligible for CR/NCR option.

**Prerequisite:** 10 FCEs  
**Distribution Requirements:** Social Science

GGR492H1 - Senior Practicum

Students design and implement an independent applied geography/planning project in consultation with an employer (paid or volunteer), who will act as their “client.” Enrolment requires written permission from a staff supervisor and Associate Chair, Undergraduate. Only open to students who are enrolled in a Specialist or Major program sponsored by the Department of Geography. Not eligible for CR/NCR option.

**Distribution Requirements:** Social Science

GGR492Y1 - Senior Practicum

Students design and implement an independent applied geography/planning/GIS project in consultation with an employer (paid or volunteer), who will act as their “client”. Enrolment required written permission from a staff supervisor and Associate Chair, Undergraduate. Only open to students who have completed 10 FCEs and who are enrolled in a Specialist, Major or GIS minor program sponsored by the Department of Geography. Not eligible for CR/NCR option.

**Distribution Requirements:** Social Science

GGR493Y1 - Geography Professional Experience

Undertake professional placement matching academic interests and career goals. Students meet regularly during the year in class to cover topics such as: reflective writing, project management, career planning, and the application of academic skills in professional contexts. Research project required that connects a topic related to placement with academic literatures. Normally, one day per week spent at placement site. For students in their final year of a Geography major or specialist program of study, or the GIS Minor. Satisfies program requirements based on placement. Space limited. Applications are reviewed in early spring. Not eligible for CR/NCR option.

**Prerequisite:** 14.5 FCEs; must be enrolled in a GGR Major or Specialist, or GIS Minor; permission of instructor.

GGR496H1 - Independent Research

Independent research extension to one of the courses already completed in Geographic Information Systems. Enrolment requires written permission from a faculty supervisor and Associate Chair, Undergraduate. Only open to students who have completed 10 FCEs and who are enrolled in the GIS program sponsored by the Department of Geography. Not eligible for CR/NCR option.

**Prerequisite:** 10.0 FCEs
GGR497H1 - Independent Research

Independent research extension to one of the courses already completed in Environmental Geography. Enrolment requires written permission from a faculty supervisor and Associate Chair, Undergraduate. Only open to students who have completed 10 FCE’s and who are enrolled in a Specialist or Major program sponsored by the Department of Geography. Not eligible for CR/NCR option.

Prerequisite: 10.0 FCE’s
Distribution Requirements: Social Science

GGR498H1 - Independent Research

Independent research extension to one of the courses already completed in Physical Geography. Enrolment requires written permission from a faculty supervisor and Associate Chair, Undergraduate. Only open to students who have completed 10 FCEs and who are enrolled in a Specialist or Major program sponsored by the Department of Geography. Not eligible for CR/NCR option.

Prerequisite: 10.0 FCE’s
Distribution Requirements: Science

GGR499H1 - Independent Research

Independent research extension to one of the courses already completed in a social science or humanities branch of Geography. Enrolment requires written permission from a faculty supervisor and Associate Chair, Undergraduate. Only open to students who have completed 10 FCEs and who are enrolled in a Specialist or Major program sponsored by the Department of Geography. Not eligible for CR/NCR option.

Prerequisite: 10.0 FCE’s
Distribution Requirements: Humanities; Social Science

National University of Singapore Courses

NUS250H0 - Cities in Transition

This module is concerned with the changing roles of cities in an age of globalization. The first part examines cities as part of urban networks at the national, regional and international levels, and focuses on the implications arising from the rise of mega-cities and global cities. The second half of the module investigates the challenges facing cities on the ground, including issues of the revitalization and re-imaging of city cores, changing retail landscapes, and the impact of telecommunications on the location of urban activities and peoples’ mobility. The module is targeted at students with an interest in urban issues. (Co-listed as GE2204 National University of Singapore)

Recommended Preparation: 4.0 FCEs
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

NUS251H0 - Southeast Asia

This module deals with a multi-disciplinary approach to understanding the regional geography of Southeast Asia. Students are expected not only to critically analyze their readings but also to be able to synthesize materials to provide a holistic understanding of the region. Specifically, it looks at the region through historical, cultural, social and political-economic perspectives. The module also discusses sustainable development issues. This is a module that is open to all students in the Faculty of Arts & Social Sciences, Engineering, Law, Science, School of Design & Environment and School of Business. (Co-listed as GE2226 National University of Singapore)

Exclusion: GGR342H1
Recommended Preparation: 4.0 FCEs
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)
NUS252H0 - Rice, Spice & Trees: Peasants in Southeast Asia

Southeast Asia has been, and still is comprised of predominantly rural and agrarian societies. This module seeks to develop an understanding of peasant life in the region. Topics to be studied include the village as a construct, the “moral economy” of the peasantry, land and man relations, economic output, and peasant beliefs, consciousness, and cultural expressions. With the peasants’ increasing involvement in the world market and the nation-state, it is also important to consider the penetration of capitalism into the rural economy, as well as the demand for supra-village identification and loyalties. Notions of “development” as they pertain to the peasants, and as postulated by the state, non-governmental organizations and the peasants themselves are also discussed. (Co-listed as SE2213 National University of Singapore)

Recommended Preparation: 4.0 FCEs
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

NUS253H0 - Economy and Space

This module examines relationships between economy and space through a focus on ‘development’. Through interrogating theories, strategies and trajectories of ‘development’, students will develop an understanding of the past and contemporary global political economy and its geographies. The course will emphasize the geopolitical and cultural backdrops to ‘development’ and attendant economic geographies amidst debates about ‘globalization’, international trade and investment. (Co-listed as GE2202 National University of Singapore)

Recommended Preparation: 4.0 FCEs
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

NUS254H0 - Geographies of Social Life

This module explores debates in geography about social issues. It emphasizes the relationship between social identity and social space, and how different places reflect and shape diverse ways of life. The module examines the role of space in the interplay of different social groups (e.g. ethnic groups, men/women), and in relation to different aspects of daily life (e.g. housing, leisure). Its emphasis, however, is on how to think about these issues in different scales/contexts (streets, public spaces, global cities). The course is intended for geography majors, and students throughout NUS with an interest in the relationship between society and space. (Co-listed as SE2224 National University of Singapore)

Recommended Preparation: 4.0 FCEs
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

NUS255H0 - Cities and Urban Life in Southeast Asia

Are Southeast Asian urban models unique from those of the West? This module uses historical and emerging developments to re-evaluate debates on Southeast Asian urbanization. The particularities of Southeast Asian urbanisation will be examined both in terms of its intertwined history with the rest of the world as well as the politics of time and space. The module aims at developing a critical understanding of the interaction between historical, political-economic and cultural processes that constitute urbanization in Southeast Asia. (Co-listed as SE2212 National University of Singapore)

Recommended Preparation: 4.0 FCEs
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

NUS256H0 - Changing Landscape of Singapore

This module attempts to understand the rationale of changes in Singapore’s urban landscape. It places these changes within a framework that considers Singapore’s efforts to globalize and examines how policies are formulated with the idea of sustaining an economy that has integral links sub-regionally with Southeast Asia while developing new spatial linkages that will strengthen its position in the global network. Emphasis is also given to recent discussions about how diversity and difference in the perception and use of space pose a challenge to the utilitarian and functional definition adopted by the state. (Co-listed as GEK2001/SSA2202 National University of Singapore)

Recommended Preparation: 4.0 FCEs
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

NUS350H0 - Natural Resources: Policy and Practice

This module examines important geographical, ecological and political concepts and approaches to natural resources management. In particular, we focus on ownership regimes, access, exploitation and conservation in different social, economic and cultural contexts. Detailed cases of fisheries, forestry, freshwater and agriculture conflicts and problems are discussed. (Co-listed as GE3210 National University of Singapore)

Recommended Preparation: 4.0 FCEs
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)
**NUS351Y0 - Field Studies in Geography: SE Asia**

The module exposes students to different geographical methods, both human and physical, and as such it is an ideal preparation for any student wishing to undertake further primary research at higher levels in geography, and other social science disciplines. After a series of lectures/seminars on fieldwork methods, fieldwork ethics, and health and safety issues in the field (which may include some basic introductory language classes), students then undertake a 2 – 5 week period of field study overseas, depending on logistical and other constraints. Previous field studies have been for periods of 4-5 weeks overseas in Thailand and Malaysia. While overseas, students undergo orientation workshops, meet peers in host universities, and visit potential field sites before conducting an intensive period of fieldwork in small groups of 3-5 students. (Co-listed as GE3230A at the National University of Singapore)

**Recommended Preparation:** 4.0 FCEs  
**Distribution Requirements:** Social Science

---

**NUS352H0 - East Asia**

This module examines aspects of the geography of East Asia, which includes China, Hong Kong, Taiwan, Japan and Korea. Emphasis is placed on the developmental processes and the underlying physical, political, socio-cultural and economic factors that account for their development. It evaluates various discourses on East Asian development and also assesses the impact of East Asian development on regional conflicts, patterns of social change, urbanization and sub-regional integration. (Co-listed as GE3209 at the National University of Singapore)

**Recommended Preparation:** 4.0 FCEs  
**Distribution Requirements:** Social Science  
**Breadth Requirements:** Society and its Institutions (3)

---

**NUS353H0 - Globalization and Asian Cities**

This module aims to provide students with an in-depth understanding of the social, political, and economic changes at various geographical scales with respect to globalization. More specifically, the module focuses on developing understandings of the complex forces driving globalization and the related urban and regional changes and the relationship between globalization and regionalization. This module is not just for geography students, but for all students who are interested in the urban and regional changes in the Asia-Pacific with respect to globalization and regionalization and the driving forces of the changes. (Co-listed as GE3219 at the National University of Singapore)

**Recommended Preparation:** 4.0 FCEs  
**Distribution Requirements:** Social Science  
**Breadth Requirements:** Society and its Institutions (3)

---

**NUS354H0 - South Asia: Development, Issues, Debates**

This module is concerned with understanding and assessing the development experiences of the South Asian countries. Students are expected to grapple with concrete case studies of development programs in their work. The coursework covers issues pertaining to rural, agricultural, urban, industrial and human development, as well as their impact upon people and the environment. Particular attention is given to the situation of the poor and the weak, including disadvantaged children, women, and ethnic minorities. (Co-listed as SN3232 at the National University of Singapore)

**Recommended Preparation:** 4.0 FCEs  
**Distribution Requirements:** Social Science  
**Breadth Requirements:** Society and its Institutions (3)
Introduction

German-speaking countries enjoy a long tradition at the cultural and political core of Europe. During the last two hundred years their importance has steadily increased, and with the recent developments in Eastern Europe their influence seems certain to expand even more.

The importance of the German language has grown correspondingly: it is the second foreign language after English in the countries of central and Eastern Europe, and its use is spreading within the European Community. Learning German opens the door to many fields of intellectual, technical and politico-economic endeavor. German scholars have been leaders in philosophy, the sciences, history, archaeology, sociology and political science. German literature is equally distinguished: writers like Goethe, Kafka, Rilke, Brecht, Mann, Wolf, Grass, Jelinek, Özdamar, etc., have dealt with the widest possible range of human problems and concerns, and have been recognized worldwide.

The Department of Germanic Languages and Literatures offers courses on literature from the Middle Ages to the present, so that the student may acquire an overview of this significant element of German life and culture. We offer language courses from beginning and intermediate to advanced levels, with practice in reading, writing, comprehending and speaking German, as well as stylistics, linguistics, and the specialized vocabulary and concepts of business. Language and literature instruction is integrated as far as possible, with the aim of teaching students advanced critical literacy in German. The department offers a minor in Yiddish, with instruction offered from beginning and intermediate to advanced levels. German combines well with other modern languages and literatures, and double-majors are encouraged. Students in a variety of programs, such as Cinema Studies, European Studies, Literary Studies, Drama, Music and others, will benefit from courses in German language, literature and culture. The Department supports opportunities for students to study and work in Germany, by encouraging participation in programs established by the German government, by Canadian universities, and by our own Arts and Science Faculty's Study Elsewhere Program. One of these is the exchange program under which Toronto students can spend the academic year at the Humboldt University in Berlin.

A knowledge of German is a virtual necessity for specialists in many disciplines; it is also very useful in certain career areas (e.g., the foreign service, interpretation and translation, librarianship, business and commerce, music, tourism, and of course teaching). The successful completion of a four-year program, including seven approved courses in German, may entitle the student to enter the M.A. or Ph.D. program in the Graduate Division of the Department.

Students entering with some previous knowledge of German are required to contact the department to write an initial assessment test (placement test) and will then be advised to take courses at the appropriate level. Please check the department's website at german.utoronto.ca for more information.

Information on studies in German Language and/or Literature can be obtained from the Associate Chair for Undergraduate Studies at german.undergrad@utoronto.ca.

German Programs

German Studies in English (Arts Program) - ASMIN1405

Enrolment Requirements:
This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

1. The Minor Program requires 4 full courses (FCE), three of which have to have a GER denominator;
2. GER150H1 is required;
3. A maximum of 1.0 FCE in cognate courses is allowed (i.e. courses offered by other departments containing a relevant Germanic component and a final paper on a Germanic topic); please inquire at the Department and get approved in advance.

For a list of courses taught in English, please check the German Department website.

Note: Students registered for a German Specialist or Major may not simultaneously be registered for a German Minor program.

**German Studies Specialist (Arts Program) - ASSPE1400**

**Enrolment Requirements:**

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

**Completion Requirements:**

(10 full courses or their equivalent)

1. GER100Y1, GER200Y1, GER300Y1, GER400H1
2. GER150H1 (to be taken as early as possible), GER205H1 (should be taken together with GER200Y1, must be taken prior to completing GER300Y1), GER305H1
3. At least 2.5 additional F.C.E. in GER courses on the 300-level
4. At least 1.0 additional F.C.E. in GER courses on the 400-level (except GER401H1)
5. No more than 3.0 F.C.E. courses taught in English
6. Up to 2 F.C.E. in identified or preapproved cognate courses may count (i.e. courses offered by other departments containing a relevant Germanic component and a final paper on a Germanic topic); please inquire at the Department and get approved in advance.

Notes: (a) All majors should schedule an appointment with the Undergraduate Coordinator for personalized counselling as early in their studies as possible; (b) students with prior German knowledge are required to contact the department to take a placement test; self-placement is not allowed; (c) Completion of GER205H1 is a prerequisite for taking ANY 300-level literature courses taught in German; (d) completion of GER305H1 is a prerequisite for taking ANY 400-level literature courses taught in German; (e) 300-level courses may be replaced by 400-level courses (inquire in advance); (f) GER401H1 is not a program requirement, but recommended.

**Al and Malka Green Yiddish Program Minor (Arts Program) - ASMIN1163**

**Enrolment Requirements:**

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

**Completion Requirements:**

(4 full courses or their equivalent)

1. (GER260Y1 and GER360H1), OR GER463Y1
2. GER460H1 OR GER462H1*
3. The remaining courses should be taken from: GER361H1, GER367H1, JGJ360H1, GER100Y1, GER150H1, or any course offered by and crosslisted by the Centre for Jewish Studies

*NOTE: 1. Students who took GER463Y1 cannot take GER260Y1 or GER360H1; students who took GER260Y1 or GER360H1 cannot take GER463Y1. 2. Students who took GER462H1 cannot take GER460H1.

**Business German Minor (Arts Program) - ASMIN2453**

**Enrolment Requirements:**

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

**Completion Requirements:**

(4.0 credits GER courses or their equivalent)
This Minor Program requires 4.0 credits from the Department of German.

1. GER100Y1/GER200Y1, OR proof of comparable German level
2. GER370H1 and GER372H1
3. 1.0 credit must be taken from GER270H1/GER272H1/GER290H1/GER391H1
4. the remainder of the courses or equivalent must have a GER designator OR must be a pre-approved cognate course.

Note: Students enrolled in the German Studies Specialist of Major Program may not simultaneously enroll for a Business German Minor Program.

German Studies Minor (Arts Program) - ASMIN1400

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

(4 full courses or their equivalent)

1. GER100Y1, GER200Y1, GER300Y1
2. 1.0 F.C.E. in courses with a GER designator, but cannot be GER400H1 or GER401H1.
3. No more than 0.5 F.C.E. may be taken in English

Certificate in Global German Studies (UofT Global Scholar) - ASCER1401

Enrolment Requirements:

This is an open enrolment Certificate. A student who has completed 4.0 credits may enrol in the Certificate.

Completion Requirements:

(Total: 2.0 credits)

- 1.0 credit in German language at any level, including GER100Y1, GER101H1, GER200Y1, GER201H1, GER272H1, GER300Y1, GER301H1, GER370H1, GER372H1, GER400H1.
  - Students with very advanced previous knowledge of German may in consultation with the Department take a combination of other 300 or 400-level GER topics courses (taught in German) to meet the requirement.

- GER290H1, "Global Issues / German Contexts".
- 0.5 credit in global experience. May take the form of an internship course. GER391H1 "IPRAKTIKUM Experiential Learning and Internationalization Internship". Students may also complete a study abroad course in a German-speaking country, such as GER354Y0. International Course Modules (ICM) or the GER398H0 Research Excursion Program also fulfil the global experience requirement with the previous consent of the department.

Faculty of Arts & Science Language Citation

The Department of Germanic Languages and Literatures participates in the Faculty of Arts & Science’s Language Citation initiative for German. The study of German is a demanding and intellectually rewarding educational experience, providing students with excellent resources for understanding the culture of the German speaking world. German is now the second foreign language after English in the countries of central and Eastern Europe, and its use is spreading within the European Community. Learning German opens the door to many intellectual, technical, political, and economic fields. Successful study of German demonstrates intelligence, discipline, analytical sophistication, and an excellent memory. The study of any foreign language provides invaluable insights into the varieties of human culture and expression.

The Language Citation recognizes a significant level of achievement in language study with a high level of academic success. The Citation in German is available to students who complete GER100Y1 (or the equivalent prerequisite training) and earn a grade of at least B- in GER200Y1 and GER300Y1.

Students should note that the Language Citation is not equivalent to an academic program and that enrolment in a program is not necessary in order to earn the recognition bestowed by the Citation.

Notes:

1. All students with previous knowledge of the German language, as well as students returning from extended stays in German-speaking countries, are REQUIRED to take a placement test offered at the Department.
2. The Department reserves the right to place students in the language course appropriate to their level of language skill.
3. More detailed course descriptions and reading lists for the various courses are available from the instructor.
4. Courses that indicate "(E)" in the title are taught in English.
German Courses

**GER100Y1 - Introduction to German**

Hours: 96P

This is the language course to take if you have had no previous experience of the German language. The emphasis is on comprehension, speaking, reading, writing, vocabulary and basic grammar. This course can be counted towards all programs in German.

Note: Students with any previous knowledge of German are REQUIRED to take a placement test offered at the department.

**Exclusion:** Senior high school German or equivalent. Note: Students with any previous knowledge of German are required to take a placement test offered at the department.

**Distribution Requirements:** Humanities

**Breadth Requirements:** Creative and Cultural Representations (1)

**GER101H1 - Introduction to German b**

Hours: 48P

This course is intended for students with some prior knowledge of German. It is equivalent to the Spring Term of GER100Y1. The emphasis is on comprehension, speaking, reading, writing, vocabulary and basic grammar.

**Exclusion:** Senior high school German or equivalent. GER100Y1.

**Distribution Requirements:** Humanities

**Breadth Requirements:** Creative and Cultural Representations (1)

**GER150H1 - Introduction to German Culture (E)**

Hours: 24L/12T

This course taught in English is intended for students who are unfamiliar with German culture. It examines historical, political and cultural developments in Germany from about 1871 to the present focusing on literary and non-literary texts. (Note: This course is required for the major and specialist program; it should be taken within the first two years.)

**Distribution Requirements:** Humanities

**Breadth Requirements:** Creative and Cultural Representations (1)

**GER194H1 - The Age of Reason and the New World (E)**

Hours: 24S

In this course we will examine the growing awareness of the strange new world beyond Europe in the so-called Age of Reason. How did writers respond to the challenges of radically different cultures? What did their way of life and their world view mean for a Europe that placed reason above all other human qualities? How did the fact of slavery and exploitation change the way they viewed the "New World"? What did this encounter mean for growing preoccupations with common humanity? We will read a number of classic texts from the European Enlightenment with an eye to these and other questions. All readings and class discussions will be in English. Restricted to first-year students. Not eligible for CR/NCR option.

**Distribution Requirements:** Humanities

**Breadth Requirements:** Creative and Cultural Representations (1)

**GER195H1 - Cities, Real and Imagined (E)**

Hours: 24S

Cities have been described as places of desire and places of fear. They pulse with life, bringing together people from different class, gender, and ethnic backgrounds, simultaneously giving rise to a sense of freedom and oppression, a sense of belonging and alienation. This course will explore the city as a physical reality that shapes our lives, but is also a projection of our deepest imaginings. Through readings of philosophical and sociological texts by influential theorists of the city, we will consider various ancient and modern conceptions of urban space and subjectivity. Alongside these theoretical readings, we will also examine literary and filmic representations of the city as a space of desire, memory and power. All readings and class discussions are in English. Restricted to first-year students. Not eligible for CR/NCR option.

**Distribution Requirements:** Humanities

**Breadth Requirements:** Creative and Cultural Representations (1)
**GER196H1 - "Es war einmal auf Deutsch" - Learning German with Fairy Tales**

**Hours:** 24S

Grimms Fairy Tales – we all know and love them. But what do we really know? Which versions are we familiar with? Most likely not the ones by the Brothers Grimm. And certainly not in German! This course is a journey into the mythical German Schwarzwald, a place of wolves and witches, the realm of the fantastic. It is not a traditional language course, as we won’t be cramming grammar and vocabulary, at least not excessively. Rather, we will learn German playfully by reading, analyzing and acting out original folk tales, their Romantic adaptations and modern retellings. In the process we will enrich our understanding of German language and culture. Please note that basic knowledge of German is required to participate in this course (i.e. at least one year of solid high school instruction). Restricted to first-year students. Not eligible for CR/NCR option.

**Prerequisite:** One year of German instruction, or equivalent  
**Distribution Requirements:** Humanities  
**Breadth Requirements:** Creative and Cultural Representations (1)

**GER197H1 - Automaton, Puppet, Thing in German Literature (E)**

**Hours:** 24S

This course will introduce students to the various attempts in German literature over the course of the past 200 years to define the boundary between human and non-human agents. It will examine the idea of a mechanical being, of prostheses (both physical and emotional), of self-motivated matter, of narrating agency in non-human beings, and of imagining the limits of human action. In reading select texts on this topic, we will explore the physical, mental and moral qualities that purportedly separate human from non-human agents. Students will gain insight into the problem of defining human beings in the context industrialization, mechanization, automation and artificial intelligence. Restricted to first-year students. Not eligible for CR/NCR option.

**Distribution Requirements:** Humanities  
**Breadth Requirements:** Creative and Cultural Representations (1)

**GER198H1 - Technology and the Human in German Literature and Thought (E)**

**Hours:** 24S

Technology has changed our lives, and scientific knowledge has enhanced human capacities. At the same time, though, this development is also experienced as a threat. Killing missiles, controlling 'Big Brothers,' and monstrous creatures are often considered the flip-side of technological advancement. This course asks: What is the relationship between technology and the "human"? Can there be progress of technology without a regress of humanity? Or is technology liberating us from the bonds of nature? We will discuss possible answers to these questions by looking at key texts in German literature, philosophy, and cultural history from the eighteenth century to Post-Modernity. Restricted to first-year students. Not eligible for CR/NCR option.

**Distribution Requirements:** Humanities  
**Breadth Requirements:** Creative and Cultural Representations (1)

**GER199H1 - The Pleasure of Reading: Reading as Self-Emancipation in the German Literary Tradition (E)**

**Hours:** 24S

In this course we read some of the most enjoyable plots and stories in German Literature and examine how the pleasure of reading sets readers free to re-imagine themselves and the world released from everyday pressures and the repressive weight of the status quo. Readings are all in English translation and include texts by Lessing, Goethe, Schiller, Kleist, Keller, Heine and Kafka. Restricted to first-year students. Not eligible for CR/NCR option.

**Distribution Requirements:** Humanities  
**Breadth Requirements:** Creative and Cultural Representations (1)

**GER200Y1 - Intermediate German 1**

**Hours:** 96P

This course continues the work done in GER100Y1 / GER101H1. It further expands on basic grammar and vocabulary, practice in comprehension, composition, and conversation.

**Prerequisite:** GER100Y1/GER101H1 or German placement test, Senior high school German or equivalent  
**Distribution Requirements:** Humanities  
**Breadth Requirements:** Creative and Cultural Representations (1)
GER201H1 - Intermediate German 1b

Hours: 48P

This course is equivalent to the Spring Term of GER200Y1. It further expands on basic grammar and vocabulary, practice in comprehension, composition, and conversation. The Department reserves the right to place students in the appropriate language course on the 200- and 300 levels.

Prerequisite: German placement test
Exclusion: GER200Y1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

GER205H1 - German Literature I

Hours: 36S

This course offers a transition from the language courses to the topic courses on the 300-level. It introduces students to German literature and provides them with working methods and analytical tools relevant for the study of German literary texts in the original German.

Note: This course is required for the major and specialist program

Prerequisite: GER100Y1
Corequisite: GER200Y1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

GER220H1 - German Literature in Translation (E)

Hours: 24L/12T

This course taught in English is an introduction to major authors of German literature, such as J.W. Goethe, F. Kafka, T. Mann, G. Grass, C. Wolf and E.S. Ozdamar, focusing on their key works and introducing central topics.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

GER251H1 - German and European Cinema (E)

Hours: 24P/24S

This course examines German cinema against the backdrop of European film history. European films share common references points anchored in the cataclysms of two world wars, and have also negotiated analogous postwar transformations in family life, urbanization, the regional and the national, cultural identity, labour relations, post-socialist societies, and state security. A comparative approach enables examination of what binds German cinema to European cinema – shared histories and political concerns--as well as what is nationally unique and distinctive. By matching select films with readings from social theory, cultural studies, and film studies, we will compare and contrast these socio-historical concerns while also attending to the medium specificities of film style, aesthetics, and narrative form.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

GER260Y1 - Elementary Yiddish

Hours: 72P

This course introduces Yiddish language, literature, music, theater, and cinema through interactive multi-media seminars, designed to build proficiency in reading, writing and comprehending. No prior knowledge of Yiddish is required.

Exclusion: GER463Y1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

GER270H1 - Money and Economy in German Literature and Culture (E)

Hours: 24L/12T

In this course, we examine key literary, philosophical, and cultural texts, in order to understand how modern culture approaches problems such as property, debt, and exchange value.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)
GER272H1 - Introduction to Business German

Hours: 36P

This course introduces students to basic concepts and vocabulary necessary for the German business context. All the language skills (reading, writing, listening, and speaking) will be practiced in appropriate business contexts.

Corequisite: GER200Y1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

GER275H1 - Marx, Nietzsche, Freud (E)

Hours: 24L/12T

This is an introductory course to the thought of Karl Marx, Friedrich Nietzsche, and Sigmund Freud and their pioneering contributions to the understanding of the individual and society in modernity. Readings include selections from writings of the early Marx, the Communist Manifesto, and Capital, Nietzsche's critique of culture, academe, and nationalism, and Freud's theory of culture, his views on the psychopathology of everyday life, on the meaning of dreams, symptoms, the return of the repressed, and what it might mean to live in a free society.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

GER290H1 - Global Issues - German Contexts (E)

Hours: 24S

The movement of cultural products, material goods, capital, people, ideas, and information across national borders has resulted in a new quality of global interdependency. The course explores the contemporary character of globalization patterns and problems as they bear on German-speaking contexts. Readings in globalization history and theory.

Prerequisite: none
Corequisite: none
Exclusion: none
Recommended Preparation: 2.0 FCE of German language instruction in consultation with department
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

GER299Y1 - Research Opportunity Program

Credit course for supervised participation in faculty research project. Details at https://www.artsci.utoronto.ca/current/academics/research-opportunities/... Not eligible for CR/NCR option.

Distribution Requirements: Humanities

GER300Y1 - Intermediate German 2

Hours: 96P

Continuing the work done in GER100Y1 and GER200Y1, this course offers German at the intermediate level focusing on extension of vocabulary, specific problems of grammar, essay-writing, reading and conversation. The Department reserves the right to place students in the appropriate course in the series GER200Y1 and GER300Y1.

Prerequisite: GER200Y1/GER201H1 or German placement test
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

GER301H1 - Intermediate German 2b

Hours: 48P

This course is equivalent to the Spring Term of GER300Y1. It further expands on basic grammar and vocabulary, practice in comprehension, composition, and conversation at the intermediate level. The Department reserves the right to place students in the appropriate language course on the 200- and 300 levels.

Prerequisite: German placement test
Exclusion: GER300Y1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

GER305H1 - German Literature II

Hours: 36S

Building on the work of GER205H1, this course offers a survey of German literature and culture from the eighteenth to the twentieth century. Within a chronological framework, students read and analyze excerpts from representative works of major German writers. (Note: This course is required for the major and specialist program, and should be taken concurrently with GER300Y1.)

Prerequisite: GER205H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)
GER310H1 - Contemporary German Culture and Media

Hours: 24S

This course focuses on contemporary German culture as expressed through a variety of media. It approaches Germany and Germany’s position within Europe and the world mainly (but not exclusively) through non-literary texts.

Prerequisite: GER200Y1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

GER320H1 - The Age of Goethe

Hours: 24S

Goethe and his contemporaries saw themselves faced with a rapidly changing world. This course examines the innovative literary experiments they developed in response to these changing times.

Prerequisite: GER205H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

GER321H1 - 19th Century German Literature

Hours: 24S

This course focuses on German authors of the nineteenth century. Literary, political and philosophical texts are analyzed as a discussion of political uprisings, the industrial revolution and the emergence of German nationalism.

Prerequisite: GER205H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

GER322H1 - Kafka in Context

Hours: 24S

Franz Kafka's texts are read in the literary, historical, and philosophical context of fin-de-sicle Prague and central Europe.

Prerequisite: GER205H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

GER323H1 - Weimar Culture and Beyond

Hours: 24S

Focusing roughly on the period from 1918 to 1945, this course examines literary and artistic movements like Dada, Bauhaus, the Golden Age in German film in the decades between World War I and Nazism.

Prerequisite: GER205H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

GER326H1 - Writing Memory: Post 1945

Hours: 24S

An examination of post-World War II German literature and culture from Zero Hour through to present-day debates about the Holocaust and its memorialization within a German context.

Prerequisite: GER205H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

GER327H1 - Deviance - Madness - Outsiders

Hours: 24S

An analysis of the artistic confrontation with deviance, madness, and outsiders. The course covers expressions of this confrontation in a variety of genres.

Prerequisite: GER205H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

GER328H1 - Transnational Literatures

Previous Course Number: GER423H1
Hours: 24S

This course investigates contemporary German culture by paying attention to its other or alternate voices and perspectives, i.e. those not usually prevalent in mainstream cultural and sociopolitical discourses.

Prerequisite: GER205H1
Exclusion: GER423H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)
GER336H1 - Focus On Berlin

Hours: 24S

This course offers an exploration of the cultural developments of one of the most exciting capitals of the world, from the Bismarckian era to German reunification and beyond.

Prerequisite: GER205H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

GER340H1 - German Theater Production

Hours: 48S

The course offers close reading, rehearsing and staging of a play. Students will become familiar with the different steps of a theater production, be introduced to basic acting and staging techniques and get acquainted to leading theories of theater.

Prerequisite: GER200Y1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

GER350H1 - German Visual Cultures

Hours: 24P/24S

This course presents students with a survey of the history and development of the German cinema. It examines major trends of German cinematography focusing on thematic and formal aspects.

Prerequisite: GER205H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

GER354Y0 - Special Topics Summer Course in Berlin (E)

The topics of this course taught in English and open to students from other disciplines vary from year to year. Interested students can address questions to Woodsworth College.

Recommended Preparation: 100-level HIS/POL/GER course/International or European Studies
Distribution Requirements: Humanities; Social Science
Breadth Requirements: Creative and Cultural Representations (1)

GER355Y0 - Summer Course in Berlin

Students who wish to petition the department for credit toward a specialist or major program in German will be required to do part of their work in German. Not eligible for CR/NCR option.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

GER360H1 - Intermediate Yiddish

Hours: 36P

The course conducted in Yiddish offers a review of basic grammar, stylistics, study of short literary texts.

Prerequisite: GER260Y1
Exclusion: GER463Y1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

JGJ360H1 - Holocaust in Literature (E)

Hours: 24S

This course examines literary works written in different languages, in ghettos and concentration camps during the Holocaust, as well as those reflecting on the genocide in its aftermath. We focus on literature as a means of engaging with the unimaginable and on the cross analysis of eye-witness and memory writing.

Prerequisite: Completion of a minimum of 4.0 FCEs
Exclusion: CJS220H1, GER367H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

GER361H1 - Yiddish Literature in Translation (E)

Hours: 24S

An overview of the major figures and tendencies in modern Yiddish literature and culture from the beginning of the 19th century to the present. Readings (in English) of modern Yiddish prose, poetry, drama and cinema.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)
GER367H1 - Topics in Yiddish or German Jewish Literature and Culture

Hours: 24S

Topics in modern Yiddish or German Jewish literature and culture from the beginning of the 19th century to the present, featuring a selection of readings of modern Yiddish prose, poetry, drama and cinema. Taught in English and open to students across disciplines.

Prerequisite: Completion of a minimum of 4.0 FCEs
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

GER370H1 - German Business Culture 1

Hours: 36P

This course provides students with a working knowledge of German business culture that allows them to navigate the German workplace. The main focus is to deepen students' knowledge of business concepts.

Note: This course is required for the minor program in Business German

Prerequisite: GER272H1/GER300Y1/GER301H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

GER372H1 - German Business Culture 2

Hours: 36P

This course offers an intensive development of the linguistic skills needed in the context of business transactions and management in German-speaking countries. Through materials from various sources, students develop oral and written skills for competence in German business communication as well as cross-cultural awareness.

Prerequisite: GER370H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

GER391H1 - iPRAKTIKUM Experiential Learning and Internationalization Internship

Hours: 24P

The course provides curricular support for a variety of work and community-engaged, experiential learning placements in the GTA and in German-speaking countries. The placements are designed to deepen linguistic, cultural, and analytical skills acquired in the classroom in work-related environments, create an awareness of the translatability of academic knowledge to other contexts, promote global competency, and foster links to the community. The number of weekly hours spent in the field, the scope of learning objectives, and the nature of reflective activities are determined on an individual basis in consultation with the host institution, the German Department, and other units in which the student is pursuing a program degree (as required). In addition to successfully achieving the formulated learning goals, students must complete assignments such as eJournals and research papers as well as participate in peer-to-peer reporting and post-placement interviews.

Prerequisite: GER100Y1 and GER200Y1 or consent of department (equivalent proficiency level B1)
Recommended Preparation: 3.0 FCE in GER courses
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

GER398H0 - Research Excursions

An instructor-supervised group project in an off-campus setting. Details at https://www.artsci.utoronto.ca/current/academics/research-opportunities/... Not eligible for CR/NCR option.

Distribution Requirements: Humanities

GER398Y0 - Research Excursions

An instructor-supervised group project in an off-campus setting. Details at https://www.artsci.utoronto.ca/current/academics/research-opportunities/... Not eligible for CR/NCR option.

Distribution Requirements: Humanities

GER399Y1 - Research Opportunity Program

Credit course for supervised participation in faculty research project. Details at https://www.artsci.utoronto.ca/current/academics/research-opportunities/... Not eligible for CR/NCR option.
GER400H1 - Advanced German 1

Hours: 48P

This is a course for advanced learners of German reviewing complex features of the language and introducing them to aspects of German stylistics. The emphasis lies on oral and written communication.

Prerequisite: GER300Y1/GER301H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

GER401H1 - Advanced German 2

Hours: 48P

This is a course for advanced learners of German reviewing complex features of the language and introducing them to aspects of German stylistics. The emphasis lies on oral and written communication.

Prerequisite: GER400H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

GER410H1 - Topics in German Intellectual History (E)

Hours: 24S

This course taught in English offers an examination of key moments and themes in German intellectual history from the Enlightenment to the present.

Prerequisite: Advanced status: permission of the department
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

GER426H1 - Medieval Language and Culture

Hours: 36S

This course offers an introduction to the language, literature and culture of Medieval Germany. The reading and translation of exemplary medieval German texts will introduce students to Middle High German and provide an insight into epochal concepts like courtly love and chivalry as well as courtly and monastic designs of identity.

Prerequisite: GER300Y1, GER205H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

GER430H1 - Topics in German Literature and Culture

Hours: 24S

An open course which explores specific aspects of German literature and culture.

Prerequisite: GER305H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

GER431H1 - Topics in Germanic Studies

Hours: 24S

An open course which explores specific aspects of Germanic Studies.

Prerequisite: GER305H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

GER460H1 - Advanced Yiddish

Previous Course Number: GER462H1
Hours: 36P

This course conducted entirely in Yiddish focuses on advanced reading, writing, vocabulary and conversation, the study of poetry, short fiction, and memoir literature by leading authors. Selected advanced grammatical topics are presented in conjunction with the study of texts.

Prerequisite: GER360H1
Exclusion: GER462H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)
GER463Y1 - Yiddish Language for German Speakers

Hours: 48P

The course is designed as an intensive Yiddish language training. The goal is to teach German speakers to read, write and speak in Yiddish. The curriculum relies on the German language skills of the students, and focuses on differences between Yiddish and German grammar and vocabulary. Upon the completion of the course, students should be able to read Yiddish literary texts with a minimal use of dictionary.

Note: Graduate students can take the course in preparation for their Yiddish competency test.

Prerequisite: Either 3 FCE in German language or fluency in German language.
Exclusion: GER260Y1, GER360H1, GER462H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

GER490H1 - Independent Study

Hours: 24S

A reading & research project in Germanic literature and/or culture involving a substantive research component. Not eligible for CR/NCR option.

Prerequisite: Advanced status: permission of the department. Note: permission needs to be obtained by May 1st for the Fall Term and by Nov. 1st for the Spring Term
Distribution Requirements: Humanities

GER491Y1 - Individual Studies

Hours: 48S

A scholarly project chosen by the student and supervised by a member of the staff. The form of the project and the manner of its execution are determined in consultation with the supervisor. Not eligible for CR/NCR option.

Prerequisite: Advanced status: permission of the department. Note: project proposals need to be submitted by June 1st
Distribution Requirements: Humanities

Introduction

Historians study the past to understand it on its own terms, to gain insight into how our world has developed, and in order to influence the present. The study of history covers a wide and diverse range of topics, from the history of aboriginal societies, conquistadors, ethnicity, fascism, labour, psychiatry, patterns of settlement and migration, politics, the Renaissance, revolution, to the automobile, slavery, international relations, trade unions, women’s studies, and more.

The study of history is at the core of any liberal arts education. In order to make sense of political, social, economic, and cultural development, it is essential to understand historical change and continuities. History is also integral to most area studies (East Asian Studies, Near and Middle Eastern Civilizations, Canadian or American Studies, etc.) and is a crucial part of the study of political science, economics, sociology, international relations, religion, art history, English—nearly every discipline in the humanities and social sciences. History as a discipline partakes of both the humanities and social sciences: it is a social science because it studies societies and the processes of change, but the method and analytical approach are those of the humanities. Close analysis of problems, critical examination of evidence, and persuasive oral and written communication are all hallmarks of historical inquiry.

History graduates will gain both a broad overview of the contours of history and in-depth knowledge of one or more specific regions, time periods, or thematic specializations. They will understand how social processes, political ideologies, economic trends, and environmental changes have interacted with individual and collective human actions to shape historical change and, ultimately, the world we live in today. History graduates will comprehend how history is written, including the skills and methods of historical research, the use and interpretation of textual and other evidence, and the choices involved in various theoretical and analytical frameworks. They will be able to critically read and assimilate large amounts of information, weigh evidence, draw well-informed conclusions, and present cogent, analytical arguments.

The analytical and communication skills one develops by studying history are critical to a great variety of careers. History graduates put their training directly to use in such fields as law, politics, business, government service, museums, libraries and archives, documentary filmmaking, journalism, international relations, urban planning, teaching, and many other areas. With emphasis on how to analyze issues, read critically, do productive research, delineate a case, and present evidence in support of that case, studying history equips one with both the skills and knowledge for an ever-changing workplace and society.

Curriculum

The History curriculum is designed to give students a solid grounding in a variety of interpretive and methodological approaches, while allowing them a great deal of flexibility to follow their own particular interests. Breadth requirements (detailed below) ensure that students achieve chronological depth and geographic range. There are courses at most levels in American, Asian, African, Latin American and Caribbean, British, Canadian, European, Russian and East European history. Thematic clusters such as medieval history, gender, international relations, and colonialism/post-colonialism help students pursue areas of particular interest.

The 100-series courses are thematically-based and introduce students to the craft and tools of historical research and writing. The 200-series courses are broad chronological surveys of countries, regions, or time periods. They are open to first-year students and have no prerequisites. The 300-series courses enable students to pursue topics in greater depth and methodological sophistication. They are not open to first-year students and frequently have prerequisites. The 400-series courses represent the culmination of an undergraduate’s study of history. They are taught as small-group seminars in which students draw upon the skills they have developed through the course of their History program in research, analysis, and oral and written presentation.

More detailed information concerning the department, history programs and particular courses can be found on our website: www.history.utoronto.ca. There is a History Students’ Association in the Department and there is student participation in the Department meetings and major standing committees.

History Programs

History Specialist (Arts Program) - ASSPE0652

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

Variable Minimum Grade

A minimum grade is needed for entry, and this minimum changes each year depending on available spaces and the number of applicants. The following courses must be completed:

- 2.0 credits from HIS courses including 1.0 credit at the 100-level (except for HIS First-Year Foundations seminar courses)

To ensure that students admitted to the program will be successful, applicants with a final grade lower than 70% in each course will not be considered for admission. Please note that obtaining this minimum final grade does not guarantee admission to the program.
**Completion Requirements:**

The Specialist program gives students in-depth training in historical research, analysis, and writing for future professional use or graduate study. To tailor the program to your needs, in your third year you have a choice between two pathways: a higher level course-work option in order to further the development of excellent skills via a wider variety of courses or a thesis option where you will be able to do the same while also concentrating on a specific research topic.

(10 full courses) Consult the department for details of equivalent courses.

First year: 1.0 HIS FCE at the 100-level; in addition, students may take 1.0 HIS FCE at the 200-level

Higher Years: Additional HIS courses to a total of 10 FCEs overall, meeting the following requirements:

1. **Geographic Distribution**
   a) 2.0 FCEs Africa/Asia/Middle East with at least .50 FCE in each region
   b) 1.0 FCE Canada/US/Latin America/The Caribbean
   c) 1.0 FCE Europe

   These distribution requirements have to be at the 200-level or above.

2. **Temporal Requirement**
   1.0 FCE in Pre-1800 history course(s)*.

3. **Levels**
   At least 5 FCEs at the 300-level or above, including 1.5 FCEs at the 400-level to be fulfilled in one of the following ways:

4. **Pathways**
   a) Thesis Option: HIS475H1 and HIS476H1 taken in that order, and an additional .50 FCE at the 400-level
   b) Coursework option: 0.5 FCE senior Methodology course* and an additional 1.0 FCE at the 400-level

   Students interested in the Thesis Option should contact the Undergraduate Chair for advice about the pathway, thesis topics, and the selection of an appropriate faculty advisor.

   Students interested in the Thesis Option should contact the Undergraduate Chair for advice about the pathway, thesis topics, and the selection of an appropriate faculty advisor.

   *Courses which satisfy the Geographic, Temporal and Pre-1800 requirements are listed on the History website.

   **Focus in Law and History (Specialist) - ASFOC0652A**

**Description:**

The Focus in Law and History gives students the critical skill-set to interrogate the 'force of law', not only in the sense of law as enforced, but also as a vehicle of cultural, social, and economic knowledge. Importantly, it will ask students to interrogate assumptions of what counts as law across time and space. At the core of this Focus to the Major are fundamental questions of both law and society: Who has law? What does (or should) it look like? Who decides? What sorts of critical histories can be written from and about legal archives that span time, space, and language tradition?

**Enrolment Requirements:**

Enrolment in the History Specialist is required.

**Completion Requirements:**

3.0 FCE

2. Law and History Focus Enrichment: 2.5 FCE from the following list, including at least 1.0 FCE at the 300 level or higher.

   - HIS101Y1
   - HIS230H1
   - HIS231H1
   - HIS283Y1
   - HIS303H1
   - HIS308H1
   - HIS357Y1
   - HIS379H1
   - HIS390H1
   - HIS397H1
   - HIS419H1
   - HIS424H1
   - HIS438H1
   - HIS443H1
   - HIS468H1
   - HIS470H1
   - HIS493H1
   - JHN323H1

   Some offerings of HIS389H1, HIS466H1 and HIS496H1 may also count towards this focus. Check with the department for current offerings.

   Up to 0.5 FCE from non-HIS courses may be substituted for requirement 2, with permission of the department. Substitutions will be reviewed based on a copy of the course syllabus.

**History Major (Arts Program) - ASMAJ0652**

**Enrolment Requirements:**

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

**Completed courses**

The following courses are required:

- 1.0 credit from 100-level HIS courses (except for HIS First-Year Foundations seminar courses)

**Completion Requirements:**

(7 full courses)

First Year: 1.0 HIS FCE at the 100-level; in addition, students may take 1.0 HIS FCE at the 200-level.
History

554

3.0 FCE

Completion Requirements:
Enrolment in the History Major is required.

Enrolment Requirements:
- a) Equivalent Courses: Students may take up to 0.5 history courses taught in other departments from an approved list. These "equivalent" courses may not be used to fulfill the 100-level, geographic, or temporal requirements.

Focus in Law and History (Major) - ASFOC0652B

Description:
The Focus in Law and History gives students the critical skill-set to interrogate the 'force of law', not only in the sense of law as enforced, but also as a vehicle of cultural, social, and economic knowledge. Importantly, it will ask students to interrogate assumptions of what counts as law across time and space. At the core of this Focus to the Major are fundamental questions of both law and society: Who has law? What does (or should) it look like? Who decides? What sorts of critical histories can be written from and about legal archives that span time, space, and language tradition?

Enrolment Requirements:
Enrolment in the History Major is required.

Completion Requirements:
3.0 FCE

1. Methodological Training Requirement: HIS268H1: Law and History
2. Law and History Focus Enrichment: 2.5 FCE from the following list, including at least 1.0 FCE at the 300 level or higher.
   - HIS101Y1, HIS230H1, HIS231H1, HIS283Y1, HIS303H1, HIS308H1, HIS357Y1, HIS379H1, HIS390H1, HIS397H1, HIS419H1, HIS424H1, HIS438H1, HIS443H1, HIS470H1, HIS493H1, JHN323H1

Some offerings of HIS389H1, HIS466H1 and HIS496H1 may also count towards this focus. Check with the department for current offerings.

Up to 0.5 FCE from non-HIS courses may be substituted for requirement 2, with permission of the department. Substitutions will be reviewed based on a copy of the course syllabus.

History Minor (Arts Program) - ASMIN0652

Enrolment Requirements:
This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:
The minor program provides a useful grounding for students interested in the study of the past and contributes to their development of interdisciplinary perspectives from across the Humanities and Social Sciences.

(4 full courses or their equivalent)

First Year:
1.0 HIS FCE at the 100-level is required. It is recommended that students complete this requirement prior to enrolling in the minor program.

Higher Years:
Additional HIS courses to a total of 4.0 FCEs, including at least 1.0 FCE at the 300- or 400-level.

Courses in other departments:
- a) Equivalent Courses: Students may take up to 0.5 history courses taught in other departments from an approved list. These "equivalent" courses may not be used to fulfill the 100-level, geographic, or temporal requirements.

Regarding History Courses

Note: Not all of these courses are taught every year. Please check the Arts & Science timetable or the HIS Department website for the list of courses offered in 2020-2021.

First-Year Foundation Seminars

First-Year Foundation Seminars are open only to newly-admitted, Faculty of Arts & Science students (3.5 credits or less). They are full-credit or half-credit courses that focus on discussion of issues, questions and controversies surrounding a particular discipline (or several disciplines) in a small-group setting that encourages the development of critical thinking, writing skills, oral presentation and research methods. FYF seminars are as rigorous and demanding as any other first-year course and require in addition the acquisition of those skills expected of successful undergraduate students. With a maximum enrolment of 30 students each, they are an ideal way to have an enjoyable and challenging small-class experience in your first year. Details can be found
First-Year Foundation Seminars:

- Count as 1.0 or 0.5 of the 20 credits required for an Hon. B.A., Hon B.Sc. or B. Com.
- First-Year Foundation Seminars are not required to get into any Program of Study. However, they may count towards your Program. Please check with your college registrar for further details.
- Can be counted towards the breadth requirement.

100-Series Courses

All 100-series HIS courses are mutually exclusive, with the exception of AP, IB, CAPE, or GCE transfer credits. Students may enrol in only one 100-series History course. Students enrolled in more than one of these courses (or who have completed one of these courses or a previous HIS 100-series course with a mark of 50% or greater) will be removed at any time. First-Year students can also enrol in 200-series HIS courses.

History Courses

HIS100Y1 - History of the Arctic

Hours: 48L/20T

People have made the Arctic home for millennia, creating circumpolar cultures in its challenging climate. This course compares and examines connections in the contested polar region through several themes: cultures in contact, trade and exploration, environment, crime and punishment, and defense and sovereignty.

Exclusion: HIS101Y1, HIS102Y1, HIS103Y1, HIS106Y1, HIS107Y1, HIS108Y1, HIS110Y1

Distribution Requirements: Humanities

Breadth Requirements: Society and its Institutions (3); Living Things and Their Environment (4)

HIS101Y1 - Histories of Violence

Hours: 48L/20T

Ranging widely chronologically and geographically, this course explores the phenomenon of violence in history. It examines the role and meanings of violence in particular societies (such as ancient Greece and samurai Japan), the ideological foundations and use of violence in the clash of cultures (as in slavery, holy wars, colonization, and genocide), and the effects and memorialization of violence.

Prerequisite: None

Exclusion: HIS100Y1, HIS102Y1, HIS103Y1, HIS106Y1, HIS107Y1, HIS108Y1, HIS109Y1, HIS110Y1

Distribution Requirements: Humanities

Breadth Requirements: Thought, Belief and Behaviour (2); Society and its Institutions (3)

HIS102Y1 - Empires, Encounters and Exchanges

Hours: 48L/20T
