Interactions among peoples, empires, and cultures, with particular attention to the non-European world. Can we speak of "international relations" before the modern concept of nation-states was established? What forms did globalization take in the pre-modern era? Covering a broad chronological sweep from before the Silk Road to the present day, we will look at exchanges of goods and technologies; dissemination of ideas and religions; voyages of migration and exploration; and episodes of conquest and colonization.

Exclusion: HIS100Y1, HIS101Y1, HIS102Y1, HIS103Y1, HIS106Y1, HIS107Y1, HIS108Y1, HIS109Y1, HIS110Y1, HISA04H3/HISA05H3

Distribution Requirements: Humanities

Breadth Requirements: Thought, Belief and Behaviour (2); Society and its Institutions (3)

HIS103Y1 - Statecraft and Strategy: An Introduction to the History of International Relations

Hours: 48L/20T

An analysis of the development of the international system, from 1648 to 1945, which highlights the role of war as an instrument of national policy, as a determinant of the system of states and as a threat to international society.

Exclusion: HIS100Y1, HIS101Y1, HIS102Y1, HIS106Y1, HIS107Y1, HIS108Y1, HIS109Y1, HIS110Y1

Breadth Requirements: Society and its Institutions (3)
HIS106Y1 - The African Diaspora in the Americas, 1492-1804

Hours: 48L/20T

This course introduces the history of the African Diaspora in the Americas, from 1492-1804. Lectures and readings will draw from primary sources and historical scholarship to focus on a range of topics, including slavery and the slave trade, race relations, gender and sexuality, religious and cultural practices, and liberation struggles.

Exclusion: HIS100Y1, HIS101Y1, HIS102Y1, HIS103Y1, HIS107Y1, HIS108Y1, HIS109Y1, HIS110Y1
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

HIS107Y1 - Approaches to East Asian History

Hours: 48L/20T

This course draws on the history of China, Korea and Japan between 1600 to 1950 to explore historical issues of gender, nationalism, war and relations with the West.

Exclusion: HIS100Y1, HIS101Y1, HIS102Y1, HIS103Y1, HIS106Y1, HIS108Y1, HIS109Y1, HIS110Y1, HIS284H5/EAS204Y1
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

HIS108Y1 - What is History?

Hours: 48L/20T

This course offers an introduction to history as a discipline - to the history of the discipline itself, to the questions, categories, and methodologies that constitute it, and how they have evolved in varied times and places, and to the methodologies students need to acquire to engage in historical inquiry and writing. The course will be part methodological workshop, part epistemological reflection.

Exclusion: HIS100Y1, HIS101Y1, HIS102Y1, HIS103Y1, HIS106Y1, HIS107Y1, HIS109Y1, HIS110Y1
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

HIS109Y1 - The Development of European Civilization, 1350-1945

Hours: 48L/20T

The shape of traditional society; the forces at work on the social, political, economic, cultural and intellectual structures of Western Europe since the high Middle Ages: the Structure of Traditional Society; the First Period of Challenges, 1350-1650; the Second Period of Challenges, 1650-1815; Confidence, Stability and Progress, 1815-1914; the Collapse of the Old Order and the Condition of Modern Europe, 1914-1945.

Exclusion: HIS100Y1, HIS101Y1, HIS102Y1, HIS103Y1, HIS106Y1, HIS107Y1, HIS108Y1, HIS110Y1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1); Society and its Institutions (3)

HIS110Y1 - Connected Histories from Dakar to Jakarta

Hours: 48L/20T

In 1325, the twenty-year old Moroccan, Ibn Battuta, began an unprecedented series of journeys by land and sea that stretched between the contemporary capitals of Senegal and Indonesia. His routes wove together large parts of Africa, Central & South Asia, and East & Southeast Asia. For more than a thousand years before Battuta began his journey, other travelers had transported ideas, products, and scripts across each of these routes, connecting the histories of the peoples living throughout this vast landmass. Human migration, economic trade, and religious conversion had linked the lands and the seas, making possible for Ibn Battuta to traverse these territories, and to visit the religious homelands of Buddhism, Judaism, Christianity, and Islam and their expanse across the Africa and Asia. Nearly a thousand years after Ibn Battuta’s travels, human migration, economic trade, and religious conversion continue to affect and connect the cultures, ecology, and economies of these communities. This course investigates how the creation, disruption, and maintenance of the economic, linguistic, and religious communities in the millennium before and after Ibn Battuta’s travels affected the lives and livelihoods of peoples of Africa and Asia, where 80% of the world’s population resided, then and today.

Exclusion: HIS100Y1, HIS101Y1, HIS102Y1, HIS103Y1, HIS106Y1, HIS107Y1, HIS108Y1, HIS109Y1
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)
HIS192H1 - A History of Queer Asia

Hours: 24L

A first-year seminar on the history of queerness, in all its complexity and diversity, in the no less complex and diverse settings of East, South, and Southeast Asia. Our journey will encompass empires and Indigenous peoples, rulers and rebels, and range from early recorded history down to the twentieth century. Focus will be placed on primary sources and introducing students to the evolving definitions of "queerness" itself. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

HIS194H1 - Power, Resistance, and the Graphic Novel

Hours: 24S

This course will look broadly at the question of power and resistance in the Americas (Canada, the United States, and Latin America) through the prism of graphic novels. Each week we will read a graphic novel related to important historical moments or events, drawing on scholarly articles to help us contextualize the novel. We will discuss the medium of graphic novels, their history and place in the broader culture, as well as how they might help or hinder our ability to study and disseminate information about the past. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

HIS195H1 - Drunk History

Hours: 24S

Histories of wine or beer or vodka often focus either on the production of these alcoholic beverages and their role in national economies, or the ways that drinking is part of popular culture, or the ways that drinking is part of daily life. But drunkenness enters the historical record in other ways, too—just as a social lubricant or an agent of social change. This class will consider the many ways that drunkenness has been accepted, denounced, and legislated about in societies around the world. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

HIS196H1 - Religion and Violence

Hours: 24S

In this seminar we will explore the complex roles of religion in cases of extreme violence. Working chronologically backward from the 1990s (Rwanda, former Yugoslavia), we will consider cases from a number of locations and decades in the 20th Century (Cambodia in the 1970s, the Holocaust in the 1940s, Armenians in the 1910s, Southwest Africa in the 1900s). Rather than limiting ourselves to the recent past, we will also explore cases from the 19th century (imperialism) and earlier as well as ongoing situations that connect past and present (aboriginal people in the Americas). Students will be expected to do the assigned reading (from primary accounts, primary sources, and scholarly articles), participate actively in discussions, prepare a series of short responses, and produce a final paper based on original research. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

HIS197H1 - Microhistory, Global History, and Historical Narrative

Hours: 24S

How do historians make arguments and tell stories? How does the scale of their gaze affect their narrative strategies? In this course, we will consider a number of topics and themes related to these questions: the difference between microhistory and biography (or microhistory and regional history); the relationship of microhistory to global history; the role of the historian in these kinds of history; and the ways that microhistory and global history both pose particular problems of narrative. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

HIS198H1 - Decolonizing Women's History

Hours: 24S

This course introduces students to the historiographical and theoretical debates in women's and gender history from a global perspective, with emphasis on the local histories of women in the non-western world. Students will study the themes in women's history as articulated by first and second wave feminists. The second part of the class deconstructs the basic assumptions of Western feminism through the perspective of post-colonial feminist writings and empirical studies. The readings are structured so that you consider how examples from Asia disrupt narratives of universality in Western feminist epistemologies. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)
**HIS199H1 - Soccer: The History of the World’s Game**

**Hours:** 24S

This seminar proposes to consider the history of the world's most popular sport, soccer, in broader political, social, economic, and cultural context. We will consider the emergence of the modern game in industrializing Britain in the 19th century; its globalization; its mobilization as a vehicle for political expression, as well as social cultural, and gendered identities; supporter culture; and soccer as an industry. Students will read scholarly works from a range of disciplinary perspectives, including history, cultural anthropology, sociology, literature, and economics. Restricted to first-year students. Not eligible for CR/NCR option.

**Distribution Requirements:** Humanities

**Breadth Requirements:** Society and its Institutions (3)

**HIS202H1 - Gender, Race and Science**

**Hours:** 24L/10T

This course examines scientific ideas about human difference from the 18th-century to the present. It explores how scientists and their critics portrayed the nature of race, sex difference, and masculinify/femininity in light of debates over nation, citizenship, colonialism, emancipation, knowledge and equality. The course will also introduce students to the uses of gender and race as analytic categories within the practice of history. While the course draws much of its subject matter from the history of the United States, it also explores selective issues in European and colonial contexts.

**Distribution Requirements:** Humanities

**Breadth Requirements:** Society and its Institutions (3)

**HIS205H1 - Topics in Women's History**

**Hours:** 24L/10T

This course introduces students to the diverse experiences of women from a comparative perspective. Students will study how women’s strategies have shaped the major cultural, economic, political and social processes in the world and how these processes have affected women’s experiences in their particular societies. By studying women’s history from both local and global perspectives, students will engage critically with claims that women’s history is universal. The local focus of the course will rotate between Africa, Asia, Europe, and North America, depending on the expertise of the instructors.

**Prerequisite:** None

**Exclusion:** HIS245Y1

**Distribution Requirements:** Humanities

**Breadth Requirements:** Society and its Institutions (3)

**HIS205Y1 - Topics in Women's History**

**Hours:** 48L/20T

This course introduces students to the diverse experiences of women from a comparative perspective. Students will study how women’s strategies have shaped the major cultural, economic, political and social processes in the world and how these processes have affected women’s experiences in their particular societies. By studying women’s history from both local and global perspectives, students will engage critically with claims that women’s history is universal. The local focus of the course will rotate between Africa, Asia, Europe, and North America, depending on the expertise of the instructors.

**Exclusion:** HIS245Y1

**Distribution Requirements:** Humanities

**Breadth Requirements:** Society and its Institutions (3); Thought, Belief and Behaviour (2)

**HIS208Y1 - History of the Jewish People**

**Hours:** 48L/20T

An introduction to the history of the Jews throughout the world over the past two thousand years.

**Recommended Preparation:** HIS102Y1/HIS103Y1/HIS109Y1

**Distribution Requirements:** Humanities

**Breadth Requirements:** Society and its Institutions (3)

**HIS218H1 - Environmental History**

**Hours:** 24L/8T

A lecture-based course designed to introduce students to key moments and concepts in the field of environmental history since c. 1400. This course will track the reciprocal influence of humans and the non-human world since the so-called "Columbian Exchange," emphasizing the ways in which the non-human world-from plants, animals, and disease organisms to water, topography, and geography- have shaped human endeavours. At the same time, students will engage with many of the ways in which human beings have shaped the world around us, from empire and colonization, to industrial capitalism, nuclear power, and modern wildlife conservation.

**Prerequisite:** any 100-level History course

**Distribution Requirements:** Humanities

**Breadth Requirements:** Society and its Institutions (3)
HIS220Y1 - The Shape of Medieval Society

Hours: 48L/20T

Economic, political, religious, and educational ideas and institutions of the Middle Ages, from the late Roman period to the fifteenth century.

Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

HIS221H1 - African American History to 1865

Hours: 24L/10T

An introduction to the history of Africans and people of African descent in the Americas generally, and the United States in particular. Major themes include modernity and the transatlantic slave trade; capitalism and reparations; Atlantic crossings; African women, gender, and racial formations; representation, resistance, and rebellion; nation-building; abolitionism and civil war; historical method and the political uses of the past.

Exclusion: HIS298Y1 (2016-17)
Recommended Preparation: Any 100-level course in Arts or Humanities
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

HIS222H1 - African American History from 1865 to the Present

Hours: 24L/10T

This course examines the history of black people in the United States after the abolition of slavery. Major themes include the promise and tragedy of Reconstruction; gender and Jim Crow; race and respectability; migration, transnationalism, and 20th century black diasporas; black radical traditions and freedom movements; intersectionality and black feminisms; the drug war and mass incarceration; sexuality and the boundaries of blackness.

Exclusion: HIS 298Y1 (2016-17)
Recommended Preparation: Any 100-level course in Arts or Humanities
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

HIS230H1 - Indigenous and Early Colonial Caribbean History

Hours: 24L/12P

This course introduces students to the study of Caribbean history from first human settlement to the late 18th century. Subject matter covered includes indigenous social structures, cosmology and politics; the process of European conquest; the economics, society and political order of colonial society; the Middle Passage; the everyday lives and struggles of enslaved peoples.

Prerequisite: None
Exclusion: HIS294Y1
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

HIS231H1 - Revolution and Emancipation in the Colonial Caribbean

Hours: 24L/12P

This course explores the history of the late eighteenth and nineteenth century Caribbean, from the Haitian Revolution to the U.S. occupation of Cuba and Puerto Rico. Students learn about the first struggles for political independence; the struggle to abolish the slave trade; slave emancipation; indentureship and struggles to define freedom after emancipation.

Exclusion: HIS294Y1
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

HIS241H1 - Europe in the Nineteenth Century, 1815-1914

Hours: 24L/10T

An introduction to modern European history from Napoleon to the outbreak of World War I. Important political, economic, social, and intellectual changes in France, Germany, Austria-Hungary, Italy, and other countries are discussed; revolution of 1848, Italian and German unification, racism and imperialism, the evolution of science, art, and culture, labour protest, and the coming of war.

Recommended Preparation: HIS103Y1/HIS109Y1
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)
HIS242H1 - Europe in the 20th Century

Hours: 24L/10T

The evolution of European politics, culture, and society from 1914: the two world wars, Fascism and Nazism, the post-1945 reconstruction and the movement towards European integration.

Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

HIS243H1 - Early Modern Europe, 1450-1648

Hours: 24L/10T

The political, social, economic, and intellectual history of continental Europe. The Renaissance, the Reformation, Counter-reformation, growth of the territorial monarchies, the religious wars.

Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

HIS244H1 - Early Modern Europe, 1648-1815

Hours: 24L/10T

The political, social, economic, and intellectual history of continental Europe. Development of royal absolutism, social change and the crisis of the ancient regime, the Enlightenment, the French Revolution, the Napoleonic era.

Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

HIS245H1 - European Colonialism, 1700-1965

Hours: 24L

This course will introduce students to the history of European colonialism. It will analyze the nature of colonial rule, the impact of empire on both colonies and metropoles, and delve into questions of power, gender and culture. It considers slavery and abolition, imperial networks, colonial capital, colonial competition, colonial cultures, the twilight of colonial rule, and a variety of settings.

Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

HIS250Y1 - History of Russia

Previous Course Number: HIS250H1
Hours: 48L/20T

This course is an introductory survey that examines the political, social, and cultural developments that shaped the Russian empire from the settlement of Kiev in the 9th century to the collapse of the Soviet Union in 1991.

Exclusion: HIS250H1/HIS250H5
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

HIS251Y1 - History of East Central Europe

Hours: 48L/20T

The Polish, Czech, and Hungarian background; the Balkans in the late medieval and early modern periods. Renaissance, Reformation and Counter-reformation, decline and national awakening to the beginning of the 19th century. Partitioned Poland, nationalism in the 19th century; World War I, Peace Settlement, interwar years and the Communist period.

Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

HIS262H1 - Canada: A Short History of Here

Hours: 24L/10T

Designed for non-history students, this introductory survey fulfills the Society and Its Institutions breadth requirement. It is open to all who want to know more about Canada. Make sense of politics today and develop a deeper understanding of Canadian society and its institutions through study of the major events and demographic trends that have shaped the development of this country. Topics will include First Nations/newcomer relations (including treaties and the Truth & Reconciliation report), French/English relations (including Quebec separatism), regionalism, the North, economic history, constitutional developments, and the development of Canadian identity, including common symbols associated with Canada. No essay requirement. Instead, enhance your critical reading and thinking skills through short writing assignments and weekly discussions of tutorial readings.

*This course will not count towards History program requirements or as a prerequisite for upper level courses*

Exclusion: HIS263Y1, HIS264H1
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)
HIS264H1 - Critical Issues in Canadian History

Hours: 24L/12T

This course introduces key issues in Canadian history and foundational principles of historical analysis. It is primarily designed for potential History majors/specialists. It is not a comprehensive survey. Examples serve to deepen analysis and introduce important methods and debates, preparing students for upper year courses in Canadian history.

Exclusion: HIS262H1, HIS263Y1
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

HIS268H1 - Law and History

Hours: 24L/10T

The Federal Interpretation Act of Canada states that the 'law is always speaking'. If the law is always speaking, then it must be speaking in present tense. But if it only speaks in present tense, does it have a past? How might we consider the field of law from different historical angles? This course will introduce students to different historical approaches to and uses of law. Using examples from a wide array of legal traditions (e.g. Common Law, Civil Law, Indigenous Law, Islamic Law), the course will help students gain a greater appreciation for the function, study, and development of law across different times and places.

Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

HIS271Y1 - American History Since 1607

Hours: 48L/20T

A survey of the economic, social, cultural, and political history of the United States from the colonial era to present times.

Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

HIS280Y1 - History of China

Hours: 48L/20T

A broad overview of the history of China from earliest times to the present. The emphasis is on how the meaning of China and the Chinese people have changed through history.

Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

HIS282Y1 - History of South Asia

Hours: 48L/20T

An introductory survey addressing major themes in the history of South Asia, examining South Asian political economy, social history, colonial power relations and the production of culture. Emphasis is on the period after 1750, particularly the study of colonialism, nationalism, and postcolonial citizenship and modernity.

Exclusion: HIS282H5/HISB57H3
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

HIS283Y1 - History of Southeast Asia: How the Lands Below the Winds Reshaped the World

Hours: 48L/20T

This course examines how the cultural, economic, religious, and social histories of "Southeast Asia" [Brunei, Cambodia, East Timor, Indonesia, Laos, Malaysia, Myanmar (Burma), the Philippines, Thailand, & Vietnam] shaped the world as we see it today. Lectures will demonstrate how the millennia-long cultural and material exchanges Southeast Asians engaged via water across the Indian and Pacific Oceans and the lands across Eurasia affected the lives of its inhabitants and the proximal and distant regions with which it had contact. In Tutorials, students will be trained to read primary sources. Themes to be explored include economic exchange, colonialism and its impact, gender and sexual diversity, and religion and society.

Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

HIS291H1 - Latin America: The Colonial Period

Previous Course Number: HIS291Y1
Hours: 24L/10T

The evolution of Spanish and Portuguese America from pre-Columbian civilizations to the wars of independence.

Exclusion: HIS291Y1/HIS290H5
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)
HIS292H1 - Latin America: The National Period

Previous Course Number: HIS292Y1
Hours: 24L/10T

A survey of Latin American history from the wars of independence to the present day.

Exclusion: HIS292Y1/HIS290H5
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

HIS293H1 - The Making of the Atlantic World, 1480-1804

Hours: 24L/10T

This course introduces students to the social, economic, cultural and political history of the Atlantic world resulting from European exploration and colonization in the Americas beginning in the 1490s and the growth of the transatlantic slave trade. It focuses on interactions between Africans, Europeans, and Amerindians around the Atlantic Ocean.

Prerequisite: HIS102Y1/HIS106Y1/HIS109Y1
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

HIS295Y1 - History of Africa

Hours: 48L/20T

An introduction to African history and the methodology of history more broadly, this course sets out to question how historians do history, examine differences in theories of knowledge, and explore the relationship between academic and cultural representations of the past. The course also draws on anthropology and related disciplines.

Exclusion: HIS381H1/HIS382H1/HIS295H5
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1); Thought, Belief and Behaviour (2)

HIS297Y1 - History of Africa from a Gender Perspective

Hours: 48L/20T

This survey of African history is analytical rather than narrative in its approach. It rethinks the way that African history has hitherto been conceptualized and taught by placing the question of gender at the center of the story of Africa.

Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

HIS298Y1 - Themes & Issues in History

This is a thematic survey course addressing issues of gender, class, ethnicity, religion, war, economics and political strife through broad-sweep coverage of a region’s history. Prepares students for upper-level study through exposure to eyewitness primary sources and conflicting secondary interpretations of events. Consult http://history.utoronto.ca/undergraduate/fw-courses/ for exact prerequisites and for specific content of the course.

Prerequisite: Varies according to particular course offering. See History website for information.
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

HIS299Y1 - Research Opportunity Program

Credit course for supervised participation in faculty research project. Details at https://www.artsci.utoronto.ca/current/academics/research-opportunities/... Not eligible for CR/NCR option.

Distribution Requirements: Humanities

HIS300H1 - Energy and Environment in North American History

Hours: 24L/6T

This course examines the history of energy in North America from the perspective of political economy, environment and social-cultural history. Particular attention is paid to twentieth-century developments and to the relationship between energy and social power. Examples are drawn from both Canada and the United States.

Prerequisite: HIS263Y1 / HIS271Y1/ HIS264H1
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)
JSH300H1 - Literature and History in Russia

Hours: 24L

History and Literature were always interconnected in Russia. Writers not only sought to reflect the society around them, but were themselves often social critics and political figures. The course examines key texts in Russian literary tradition both as works of art and as primary sources for the historian. All readings in English.

Recommended Preparation: HIS250H1/HIS250Y1 or SLA240H1/SLA241H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

HIS304H1 - Topics in Middle East History

Hours: 24L

An in-depth examination of Middle East historical issues. Content in any given year depends on instructor. See History Website for more details.

Prerequisite: HIS108Y1/HIS245H1/HIS231H1
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

HIS302H1 - Material Culture in Victorian Britain

Hours: 24L

An examination of the products of the first and second industrial revolutions in Victorian England. This course focuses on the cultural history of commercialization and consumerism.

Recommended Preparation: HIS109Y1 or HIS241H1
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

HIS303H1 - The Mediterranean, 600-1300: Crusade, Colonialism, Diaspora

Hours: 36L

The course treats contact and conflict between Christians, Muslims, and Jews in the premodern Mediterranean world. Within the framework of broad political and economic developments, the course explores a range of topics, including holy war, slavery, religious polemics, colonialism, the commerce in goods and ideas, and ethnic relations.

Recommended Preparation: HIS220Y1 or NMC273Y1 or some medieval history
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

JHP304Y1 - Ukraine: Politics, Economy and Society

Hours: 48L

The history of Ukraine from earliest times to the present. Economic, political, and cultural movements; Kievan Rus’, Polish-Lithuanian Commonwealth, Cossack state, national revival, twentieth century statehood, and unification. As this course is designed as an introductory course, the professor welcomes first- and second-year students to enroll, as well as upper-level students. (Given by the Departments of History and Political Science)

Distribution Requirements: Humanities; Social Science
Breadth Requirements: Society and its Institutions (3)

HIS306H1 - Islam and Muslims in the Balkans

Hours: 24L

The course examines the history of the Balkans from the fourteenth century until the present day with a particular focus on Islam, Muslims and Muslim culture. Topics include formation of Muslim communities, relations between Muslims and non-Muslims in the Ottoman and Habsburg empires, Sufi Islam, Muslims as minorities and majorities, and their experiences during the break-up of Yugoslavia. No prior knowledge of Balkan history or Islam is assumed.

Prerequisite: 1.0 FCE 200-level HIS course(s)
Exclusion: HIS389H1 (Islam and Muslims in the Balkans)
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)
HIS308H1 - The Mediterranean, 1300-1700

Hours: 36L

This course continues with the themes treated in HIS303H1, specifically in the context of relations between the Ottoman empire and European states and the growing impact of the Atlantic world on the Mediterranean.

Prerequisite: HIS303H1
Exclusion: HIS303Y1
Recommended Preparation: HIS220Y1/HIS243H1/NMC273Y1
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

HIS309H1 - The European Reformations

Hours: 36L

What happens when a culture changes its religious organization and beliefs? Social and intellectual upheavals beginning in fifteenth century Europe created the split between Catholic and protestant Christians and reshaped the spiritual and political landscape of sixteenth century Europe. Issues covered include religion and politics, toleration, gender, popular piety, class.

Prerequisite: HIS243H1 / VIC240Y1 or permission of the instructor
Exclusion: HIS340H5/RLG346H5
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

HIS310H1 - Histories of North American Consumer Culture

Hours: 24L/6T

This course examines the emergence of a modern 'consumer society' in North America from about 1850 to recent times. The aim is to combine political, social, economic and cultural history to chart changing relationships between North Americans, consumer commodities, and identities.

Prerequisite: HIS263Y1/HIS264H1/HIS271Y1
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

HIS311Y1 - Introduction to Canadian International Relations

Hours: 48L/10T

Canadian international affairs in a broader context. Anglo-American as well as Canadian-American relations; the European background to questions such as the League of Nations, appeasement and rearmament, which directly affected Canada without this country being consulted.

Exclusion: HIS311H5/HISC46H3
Recommended Preparation: A course in Canadian history or politics
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

HIS312H1 - Immigration to Canada

Hours: 24L/5T

The peopling of Canada by immigrant groups from the 1660s to the 1970s. Immigration and multiculturalism policies; migration and settlement; ethnic communities; relations with the host society.

Recommended Preparation: HIS263Y1/HIS264H1
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

HIS314H1 - Quebec and French Canada

Previous Course Number: HIS314Y1
Hours: 24L

A general survey tracing the political, social, and cultural development of a distinct society in Quebec and the rise of self-conscious French-speaking communities elsewhere in Canada.

Exclusion: HIS314Y1
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)
HIS316H1 - Competing Colonialism in Northeast China The Harbin Experiment

Hours: 24L

This course explores the political, social, and cultural history of Harbin, one of the major cities of Manchuria/Northeast China, the product of competing Russian, Japanese, and international colonialism during the first half of the twentieth century, and an early case of multi-ethnic emigration and multiculturalism.

Prerequisite: HIS250Y1 or HIS280Y1 or HIS281Y1
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

HIS320H1 - Barbarian Invasions and the Fall of the Roman Empire

Hours: 24L/5T

Covers major events and themes for the period 300-600, including decline of Greco-Roman paganism, conversion to Christianity, individual barbarian groups (Ostrogoths, Visigoths, Huns, Burgundians, Vandals, Franks, Lombards), their culture and impact on empire, Justinians reconquests.

Recommended Preparation: HIS220Y1
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

HIS317H1 - 20th Century Germany

Hours: 24L

A survey of modern German history in the twentieth century. Topics include World War I and the postwar settlement, the Weimar Republic, the National Socialist dictatorship, the Holocaust, the division of Germany, the Cold War, German reunification, Germany and the European Union, nationalism, political culture, war and revolution, religious and ethnic minorities and questions of history and memory.

Prerequisite: HIS103Y1/HIS109Y1/(HIS241H1, HIS242H1)/EUR200Y1
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

HIS321H1 - Dark Age Europe, 7th 10th Centuries

Hours: 24L/5T

Surveys major events and figures for the period c. 600-1000, including: Pope Gregory the Great, the Morovingian Franks, Lombard Italy, Byzantine civilization, the rise of Islam, Charlemagne, the Carolingian Renaissance, the Vikings, Anglo-Saxon England to King Alfred, the Ottonians.

Exclusion: HIS320Y1
Recommended Preparation: Some ancient history, ancient Greek or Latin language, early Christianity, Celtic history, Old Irish and Old English languages.
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

HIS318H1 - The "Wild" West in Canada

Hours: 24L/7T

What happens when histories of Canada begin in the West? This course examines the critical challenges that the myths and legacies of the West pose to Canadian history, from pre-contract to 1990. Themes include First Nations and colonialism, immigration, racism, economic development, regionalism, prostitution and illegal economies.

Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

HIS322H1 - The High Middle Ages

Hours: 48L/10T

Chronological survey of the history of medieval Europe from 1100 to approximately 1450. The three main topics are: the formation of the modern states, the impact of urban development, and the evolution of spirituality.

Prerequisite: HIS220Y1
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)
HIS323H1 - Rites of Passage and Daily Life in the Middle Ages

Hours: 24L/5T

Reflecting on the life cycle and rites of passage in the medieval period gives the opportunity to study the daily lives of peasants, nobles, monks, nuns, and burghers, and to observe from an interesting angle the differences between female and male life experiences.

Prerequisite: A course specifically on the Middle Ages such as HIS220Y1
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

JHN323H1 - Indigeneity in the Caribbean

Hours: 24L

Explores the legacies of the pre-Columbian era, as well as the post-1492 experiences of people of pre-Columbian Caribbean ancestry. Examines the origins and consequences of the Caribbean's narrative of "indigenous absence", as well as the relationship between indigeneity, globalization and diaspora.

Prerequisite: INS201Y1/HIS230H1/HIS231H1/NEW120Y1/NEW220H1/NEW221H1/NEW224Y1/NEW225H1/NEW226H1
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

HIS324H1 - British Imperial Experience, 1600-2000

Hours: 24L

The British empire, at its zenith, covered one-quarter of the earth's land surface. Whatever the rights and wrongs of its history were, the legacies of this global experience continue to influence politics in today's world. Equal coverage is given to early modern and modern history. Some background in British history or international relations is strongly recommended. This course begins at home with English expansionism in the British Isles before moving on to deal with case studies selected from North America, the Caribbean, Africa, South Asia and East Asia. Coherence comes from thematic foci consisting of economics, law, migration, gender and governance.

Prerequisite: HIS103Y1/HIS109Y1/HIS241H1/HIS244H1/HIS245H1/HIS368H1/HIS337H1/HIS349H1
Exclusion: HISB02H3
Recommended Preparation: HIS102Y1/HIS103Y1/HIS109Y1/HIS202H1
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

HIS325H1 - Imperial Russia

Hours: 24L

This course focuses on Russia's history during a period of remarkable change and turbulence, when the country more firmly established its far-flung empire while simultaneously attempting to define itself as a nation. From the wars and reforms of Peter the Great through the end of the empire during the First World War, the course touches on questions of social and cultural change, and the political events that allowed or constrained them.

Prerequisite: HIS250H1/HIS250Y1/permission of instructor
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

HIS326H1 - Topics in Chinese History

Hours: 24L

Selected topics on a specific period in Chinese history. Topics in any given year depend on the instructor.

Prerequisite: HIS280Y1
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

HIS327H1 - Rome: The City in History

Hours: 24L

This course investigates the development of Rome from its mythical foundations, through the Empire, the Middle Ages, Renaissance and Baroque to the modern city, illustrating the shift from the pagan to the papal city and its emergence as the capital of a united Italy after 1870 and a modern European metropolis.

Prerequisite: At least 1.0 credit European History course(s)
Exclusion: VIC348Y1 (offered in Fall/Winter 2012-2013, 2013-2014, 2014-2015 and 2015-2016) and VIC162H1 (offered in Fall 2016, Fall 2017 and Fall 2018)
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)
HIS328H1 - Modern China

Previous Course Number: HIS328Y1
Hours: 24L

An examination of political, social and economic developments in modern Chinese history to the present day. Main topics may include the decline of the Imperial order and the challenge of Western imperialism; the Republican period; the rise of the Communist movement; the Peoples Republic of China.

Prerequisite: HIS280Y1/EAS102Y1
Exclusion: JMC201Y1, HIS328Y1
Recommended Preparation: HIS380H1
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

HIS329H1 - Central Middle Ages (900-1200)

Hours: 24L

A chronological survey from 900, with the foundation of Cluny by the Duke of Aquitaine, the last waves of Vikings, and the decline and end of the Carolingian Empire, up to 1200, with the Battle of Bouvines, the more formal organization of the first universities and the construction of the Gothic cathedrals. The main question will be: what happens when there is no real central power? Why did the term "Feudalism," now nicknamed the F word by medievalists, was judged inappropriate to describe the situation?

Prerequisite: 9.0 FCE including 1.0 FCE in HIS courses
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

HIS330H1 - Germany from Frederick the Great to the First World War

Hours: 24L

Topics include German reactions to the French Revolution, Napoleonic occupation, the Wars of Liberation, industrial expansion, the Revolutions of 1848, unification in 1871, Bismarck and Kaiser Wilhelm II, everyday life, gender relations, avant-garde culture, nationalism, antisemitism, colonialism, and the Great War of 1914-18.

Prerequisite: At least 1.0 FCE HIS course(s) at the 100 or 200 level
Exclusion: HIS341Y1
Recommended Preparation: HIS241H1
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

HIS331H1 - Modern Baltic History

Hours: 24L

The history of the Baltic countries, Estonia, Latvia and Lithuania from 1900 to the present day, with emphasis on the emergence of independent Baltic states, World War II, communist era, the Baltic Revolution, the restoration of independence and European integration.

Recommended Preparation: HIS250H1/HIS250Y1/HIS251Y1
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

HIS333H1 - Catholic Asia in the Early Modern Era, 1500-1800

Hours: 24L

This course examines the impact of Catholicism in Asia, from its introduction to its relevance in the contemporary global order. Students will be introduced to how Catholicism and the technologies accompanying it affected historical transitions in local communities in Asia as well as how the growth of these communities has affected the global Catholic Church.

Prerequisite: 1.0 FCE in European or Asian history, or permission of course instructor
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

HIS335H1 - Soviet Cultural History

Hours: 24L

This course explores Russian culture - art, architecture, film and literature - from 1917 to the post-Soviet present. Readings and screenings trace the relation between culture, history, and revolution from the Russian Avant-Garde and proletarian culture to socialist realism, and from Krushchevs thaw to examples of Soviet postmodernism.

Prerequisite: HIS250H1/HIS250Y1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)
HIS336H1 - Medieval Spain

Hours: 36L

This course emphasizes the interaction of Christians, Muslims, and Jews, and the cultural and political distinctiveness of Castile and Aragon in the development of state, society, and culture in medieval Spain.

Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

HIS339H1 - History of Modern Israel

Hours: 24L

This course explores the history of the Jewish state from the rise of Zionism to the present. Topics include the Zionist-Arab conflict, immigration, the construction of a new Hebrew identity, interactions between religion and state, the impact of the Holocaust, and the relationship between Israel and the Jewish diaspora.

Prerequisite: HIS208Y1
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

HIS337H1 - Culture, Politics and Society in 18th Century Britain

Previous Course Number: HIS337Y1
Hours: 24L

Deals with England, Scotland, Ireland and the Atlantic World. Addresses major political, social, economic, intellectual and cultural highlights of the "long" eighteenth century. Deals with enlightenment, industrialization and the loss of the first British empire. Interrogates Britain’s emerging status as a world power.

Exclusion: HIS337Y1
Recommended Preparation: EUR200Y1/HIS109Y1/HIS243H1/HIS244H1/HIS368H1
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

HIS340H1 - The Ottoman Empire, 1800-1922

Hours: 24L

The course examines the history of the Ottoman Empire from the beginning of the 19th c. until its dissolution in the course of World War I. Topics include Ottoman reforms, relations between the Empire’s populations and the state, the diplomatic interactions known as “the Eastern Question,” the Young Turk revolution, gender, and intellectual, cultural and artistic developments.

Prerequisite: 1.0 FCE 200-level HIS course(s)
Exclusion: HIS389H1 (The Ottoman Empire, 1800-1922)
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

HIS338H1 - The Holocaust, to 1942 (formerly HIS338Y1/398Y1)

Hours: 24L/5T

German state policy towards the Jews in the context of racist ideology, bureaucratic structures, and varying conditions in German-occupied Europe. Second Term considers responses of Jews, European populations and governments, the Allies, churches, and political movements.

Prerequisite: Completion of six undergraduate full-course equivalents
Exclusion: HIS388Y1/HIS398Y1/HIS338H5
Recommended Preparation: A course in modern European history
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

HIS341Y1 - Germany Among the Global Empires 1840-2010

Hours: 48L

This course places Germany’s long national history in a transnational and global context, exploring its place among the global empires of Britain, Russia, France and the United States from the mid-seventeenth century to the present. Events of the German nation-state’s political, social and cultural developments are analyzed through a framework focused on both military expansion and the development of the world economy after 1700. Particular attention is paid to the interplay between strategies for a global expansion and transformations in national culture, looking at Germany in the world and the world in Germany.

Prerequisite: Two HIS courses from the following: HIS102Y1/HIS103Y1/HIS107Y1/HIS109Y1/HIS241H1/HIS242H1/HIS243H1/HIS244H1/EUR200Y1/HIS250Y1/HIS271Y1
Recommended Preparation: HIS102Y1/HIS109Y1/HIS241H1/HIS242H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1); Society and its Institutions (3)
HIS342H1 - Political and Psychological Liberation in 20th Century Africa

Hours: 24L

This course examines the growth of movements for the political liberation of Africa and the psychological liberation of Africans from Western imperialism and cultural hegemony. Postcolonial thinking and art was fundamental to the project of decolonization. It uses primary text and films to explore African cultural and intellectual history.

Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

HIS343H1 - History of Modern Intelligence

Hours: 24L

This course explores the rise of modern intelligence over the long 20th century, from Anglo-Russian imperial competition before World War I through to the post-9/11 era. Students will study the contribution of intelligence services to victories and defeats in war, peace, and the grey areas in between. The course will also examine the relationship between intelligence services and society.

Exclusion: HIS343Y1
Recommended Preparation: HIS103Y1 or an equivalent introduction to modern international relations
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

HIS344H1 - Conflict and Co-operation in the International System Since 1945

Hours: 24L

An examination of the conduct and consequences of international politics in an atomic/nuclear age when the stakes of the Great Game were not just the fates of states and nations, but the survival of humanity itself. The diplomatic, strategic and economic aspects of international relations will all receive appropriate elucidation.

Exclusion: HIS344Y1
Recommended Preparation: EUR200Y1/HIS103Y1/HIS241H1, HIS242H1
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

HIS345H1 - History and Film

Hours: 24L/36P

This course is designed to further students knowledge of films relationship to the events they depict and their undeniable power as representational systems to render history effectively. This will necessarily entail both close examination of the formal systems film rely upon and an understanding of the distinction between fictional and non-fictional forms in film.

Prerequisite: 2 full courses in history or permission of instructor
Recommended Preparation: INI212Y1
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

HIS346H1 - Rice, Sugar, and Spice in Southeast Asia: a History of Food in the Region

Hours: 24L

This course examines the importance of food products in the livelihoods of the inhabitants of Southeast and in the world economy. It traces the circulation of these products within the Southeast Asian region in the pre-modern period, into the spice trade of the early modern era, and the establishment of coffee and sugar plantations in the late colonial period, and the role of these exports in the contemporary global economy.

Recommended Preparation: 1.0 FCE Asian or European history
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

HIS347H1 - The Country House in England 1837-1939

Hours: 24L

This course examines class, distinction and community through the lens of the English country house from 1837 to 1939. Topics include owners, servants, houses, collections, gardens and rituals such as fox hunting.

Prerequisite: A course in British or European history
Recommended Preparation: HIS349H1/HIS302H1
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)
HIS348H1 - Topics in Gender History

Hours: 24L

An in-depth examination of issues in gender history. Content in any given year depends on instructor. See History website for more details.

Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

HIS349H1 - History of Britain: Struggle for Power

Hours: 24L

An introduction to the history of modern England with emphasis on the search for identity with reference to the nation, the crown, class, gender, age, political parties, race and ethnicity.

Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

HIS351Y1 - History of Twentieth-Century Russia

Hours: 48L

A survey of the history of Twentieth-Century Russia. The social, economic, and political development of Twentieth-Century Russia, with an emphasis on the Russian Revolution and Stalinism. Stress is placed on modern historiographical issues.

Exclusion: HIS351H1/HIS351H5
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

HIS352H1 - A History of Women in Pre-colonial East Africa

Hours: 24L

This course examines the lived experience of women in societies, communities and polities of varying sizes across territories that cover eight contemporary East African states. It encompasses the period from 1000 B.C to the end of the nineteenth century. Topics covered are clustered under four broad themes: a) Ecology, work in commodity production, wealth and exchange relations; b) “Institutional” power, ideology and structures; c) “Creative” power particularly in the areas of healing, resistance/contestation and transformation; and d) Violence, war and vulnerability.

The course challenges present day gender and identity categories applied to Africa's deep past and highlights critical nuances of gender, identity and power dynamics in Africa.

Prerequisite: NEW150Y1 or any course in African History
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

HIS353Y1 - Poland: A Crossroads of Europe

Hours: 48L

Social and political history of Poland from the 10th to the 20th century. Analysis of the political history in a broader, central European context; consequences of Christianization of medieval Poland and the Polish-Lithuanian union; Sarmatian culture, Antemurale, Polish Messianism and Cordon sanitaire.

Prerequisite: HIS251Y1/permission of the instructor
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

HIS354H1 - Men, Gender and Power in Europe from the Renaissance to the French Revolution

Previous Course Number: HIS354Y1
Hours: 24L

An investigation of how ideas of masculinity and gender roles shaped the exercise of private and public power in early modern Europe.

Exclusion: HIS354Y1
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

HIS363H1 - Dynamics of Gender in Canadian History

Hours: 24L

A lecture course which deals thematically with gender issues in Canadian history (including familial roles, changing patterns of work and employment, and participation in the public sphere).

Prerequisite: HIS263Y1/HIS264H1
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

HIS364H1 - From Revolution to Revolution: Hungary Since 1848

Hours: 24L

This course offers a chronological survey of the history of Hungary from the 1848 revolution until the present. It is ideal for students with little or no knowledge of Hungarian history but who possess an understanding of the main trends of European history in the 19th and 20th centuries. The focus is on the revolutions of 1848-1849, 1918-1919, the 1956 Revolution against Soviet rule and the collapse of communism in 1989. The story has not been invariably heroic, violent and tragic.

Prerequisite: A 100 level HIS course
Exclusion: None
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

HIS366H1 - Aboriginal Peoples of the Great Lakes from 1815 to the Present

Hours: 24L/5T

Explores the history of Aboriginal peoples (Indigenous and Metis) living in the Great Lakes Region after the Great Lakes were effectively split between British North America (later Canada) to the north and the United States to the south, when a rapidly increasing newcomer population on both sides of the border marginalized Indigenous peoples and settled on their land. Topics include a comparative examination of Indigenous experiences of colonialism, including treaties and land surrenders as well as the development of government policies aimed at removing and/or assimilating Great Lakes peoples. This course will also study resistance by First National and Tribal Councils to those programs over nearly two centuries and assess local strategies used for economic and cultural survival.

Prerequisite: HIS263Y1/HIS264H1/HIS271Y1
Exclusion: HIS369Y1
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

HIS367Y0 - The City in Central Europe – Ideas, Culture, Revolutions and Renewal

Hours: 48L

The cities of Central Europe, and most notably those of the Habsburg Empire, were at the forefront of Europe’s cultural, artistic and intellectual development until the outbreak of the Second World War. Moreover, these cities remain living monuments to the achievements of European culture to the present day. These cities also represent some of the darker aspects of European history. The goal of this course is to familiarize students with the history of Central Europe, the complex historical role of central European cities, their interaction with imperial and then national cultures, economies and societies, and their importance in creating modern nation states.

Offered in summer only as part of the Summer Abroad Program.

Prerequisite: 1 FCE in History
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

HIS368H1 - Early Modern Britain, 1485-1660 (formerly HIS238H1)

Hours: 24L

Introduction to the political, social and religious history of early modern England, Scotland and Ireland. Particular attention will be paid to the history of the monarchy, the Protestant Reformation, gender issues and relations between different parts of the British Isles.

Recommended Preparation: EUR200Y1, HIS109Y1/HIS243H1/HIS244H1
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)
HIS369H1 - Aboriginal Peoples of the Great Lakes from 1500 to 1830

Hours: 24L/5T

Explores the history of Aboriginal peoples (Indigenous and Métis) living in the Great Lakes Region from the 16th century to the aftermath of the war of 1812. Weaving together interdisciplinary sources, this course examines central events in Great Lakes history including the formation of the Wendat and Haudenosaunee Confederacies and key Anishinaabek alliances, the arrival of European newcomers into an Indigenous landscape, the social-political impact of new diseases, reactions to European missionaries, the fur trade, major conflicts and peace processes including the Great Peace of Montreal, the Treaty of Niagara and the 60 Years War for the Great Lakes, and ending with the period of significant encroachment of new settlers on Indigenous lands.

Tutorials, primary source analysis, essay, exam.

Prerequisite: HIS263Y1/HIS264H1/HIS271Y1/INS201Y1
Exclusion: HIS369Y1
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

HIS371H1 - Canadian Political History

Hours: 24L/12T

This course examines the history of Canadian politics from the late colonial period to the recent past. Lectures and tutorials will focus attention on specific political issues (responsible government, Confederation, war, welfare, battles over voting rights, campaigns for social change, etc) but also consider the deeper structural, social, economic, and cultural dynamics that shaped politics over time. The course takes a broad view of politics (elections and parties but also social movements, interest groups, bureaucracy). A key theme is the nature of political power in a democratic polity.

Prerequisite: HIS264H1/HIS263Y1
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

HIS373H1 - Servants and Masters, 1000-1700

Hours: 24L

This course will explore the history of all types of servants, from the ladies-in-waiting to the domestic slaves, in Western Europe between 1000 and 1700. The goal will be to observe especially their working and living conditions, as well as the changing perception of service through time.

Prerequisite: A course on the Middle Ages or on the early Modern Period
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

HIS376H1 - The United States: Now and Then

Hours: 24L

An exploration of some of the historical roots of issues that are of particular importance to understanding the United States of the early 21st century: e.g., the conflicts in Iraq, Afghanistan, and Syria and U.S. global leadership (or hegemony); the impact of globalization on the domestic economy; cultural innovation vs. neo-conservatism.

Prerequisite: HIS271Y1
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

HIS377H1 - 20th-Century American Foreign Relations

Previous Course Number: HIS377Y1
Hours: 24L

A survey of the history of American foreign relations from 1898 to the present. Themes include imperial expansion and the uses of power; the relationship of business and government in U.S. foreign policy; and the role of culture and ideas in Americas relations with the world.

Exclusion: HIS377Y1
Recommended Preparation: HIS271Y1
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

HIS372H1 - Topics in U.S. History

Hours: 24L

In-depth examination of selected periods or themes in U.S. history. Topic in any given year depends on instructor. See History website for more details.

Exclusion: HIS372H5/HISD36H3
Recommended Preparation: HIS271Y1
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)
HIS378H1 - America in the 1960s

Hours: 24L

A survey of one of the most turbulent decades in American history. Examines the political, social, economic and cultural revolutions that transformed the face of America.

Prerequisite: HIS271Y1
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

HIS379H1 - Vietnam at War

Hours: 24L

This course examines war in modern Vietnam, beginning with Vietnamese nationalism in the 19th century to the conflicts with France, the United States, and China. We will consider the military, political, economic, and cultural contexts of these complex and interconnected wars, especially from the viewpoint of the Vietnamese people.

Prerequisite: 1.0 FCE of prior course in History, any field
Exclusion: HIS400H1
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

HIS382H1 - China from the Mongols to the Last Emperor

Hours: 24L/12T

This course traces the history of Chinese empire from its political reorganization, economic expansion, and cultural efflorescence in the 11th century, through its peak of power in the 18th century, and to its decline during the 19th. We will consider how these centuries broke with as well as continued previous developments, and how they have influenced Chinese and world history in the last 150 years.

Prerequisite: HIS280Y1/EAS103H1/EAS209H1 or comparable course in E. Asian/Chinese history
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

HIS383Y1 - Women in African History

Previous Course Number: HIS383H1
Hours: 24L

This course subjects our increasing knowledge about African women’s history from the mid-19th century to the present to critical analysis. It goes beyond restoring women to history and seeing African women as victims impacted upon and struggling against colonialism and neo-colonialism. It examines how African women’s lived experiences have been represented, packaged, and delivered to different audiences.

Prerequisite: HIS295Y1/HIS297Y1/NEW150Y1/NEW250Y1/NEW351Y1/POL301Y1 or permission from the Instructor
Exclusion: HIS383H1/HISC97H3
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

HIS384H1 - The Baltic Sea Region from the Vikings to the Age of Nationalisms

Hours: 24L

This course traces political, cultural and socio-economic developments in North-Eastern Europe, the Baltic Sea region, from the Viking Age to the end of the 19th century. Topics include the crusades, the Hanseatic League and trade, the Reformation, the struggle for hegemony between the Swedish and Russian empires, the Enlightenment, national movements, and industrialization.

Prerequisite: 9.0 FCE including 1.0 FCE in HIS courses
Recommended Preparation: A course in European History
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

JHA384H1 - Japan in the World, Mid-16th to Mid-20th century

Hours: 24L

This course examines Japan within the context of world history from the mid-16th to the mid-20th century. Rather than seek comprehensive coverage of Japan's national history along a linear timeline, we will use Japan as a lens through which to consider key moments in the history of the modern world.

Prerequisite: One course from: HIS102Y1, HIS103Y1, HIS107Y1, HIS241H1, HIS242H1, HIS244H1, HIS250H1, HIS250Y1, HIS271Y1, HIS280Y1, HIS281Y1, HIS282Y1, HIS283Y1, HIS291H1, HIS291Y1, HIS292H1, HIS292Y1, HIS297Y1, or 1.0 credit from CAS200H1, CAS201H1, CAS202H1, CAS310H1, CAS320H1.
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)
HIS385H1 - The History of Hong Kong

Hours: 24L

A study of political, economic, and social change in the British colony of Hong Kong from 1842 until the present day.

Exclusion: Students cannot take both the Y and H version of HIS385
Recommended Preparation: HIS280Y1/JMC201Y1
Distribution Requirements: Society and its Institutions (3)

HIS385Y0 - The History of Hong Kong

Hours: 48L

A study of political, economic, and social change in the British colony of Hong Kong from 1842 until the present day.

Offered in summer only as part of the Summer Abroad Program.

Exclusion: Students cannot take both the Y and H version of HIS385
Recommended Preparation: HIS280Y1/JMC201Y1
Distribution Requirements: Society and its Institutions (3)

HIS386H1 - Fascism

Hours: 24L

A comparative and transnational examination of fascist movements and regimes in Europe during 1919-1945. Beginning with Mussolini in Italy and Hitler in Germany, this course analyzes manifestations of the phenomenon in various European countries, including France, Spain, the Baltic states, Central Europe and Scandinavia. We analyze the factors that led to fascist movements obtaining power in certain countries and to their failure in others. Collaboration with Nazi Germany during the Second World War is also explored. Finally, we discuss whether the concept of 'generic' fascism can also be applied to other regions and periods.

Prerequisite: 9.0 FCE including 1.0 FCE in HIS courses
Exclusion: HIS389H1 (Topics in History: Fascism), offered in Winter 2018 and Winter 2019
Recommended Preparation: A course in European History
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

HIS387H1 - France, 1610-1848

Previous Course Number: HIS388Y1
Hours: 24L

This course considers the history of France, from the rise of absolutist monarchy under the seventeenth-century, Bourbon monarchs, through the Enlightenment, the Revolution and Napoleonic Empire, and the Restoration, to the fall of the constitutional monarchy in 1848.

Prerequisite: one HIS/FRE course
Exclusion: HIS388Y1
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

HIS388H1 - France Since 1830

Previous Course Number: HIS388Y1
Hours: 24L

A study of French society, politics and culture from the Paris Commune to the 1990s. Special attention is paid to watershed events like the Dreyfus Affair and the Vichy regime, to issues of regionalism/nationalism, cultural pluralism, women's rights, intellectual and cultural trends, and decolonization.

Prerequisite: EUR200Y1/one course in HIS/FRE
Exclusion: HIS388Y1
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

HIS389H1 - Topics in History

Hours: 24L

In-depth examination of historical issues. Content in any given year depends on instructor. See History website for more details.

Prerequisite: 9.0 FCEs including 1.0 FCE HIS course. Further pre-requisites vary from year to year, consult the department.
Distribution Requirements: Humanities

HIS389Y1 - Topics in History

Hours: 48L

In-depth examination of historical issues. Content in any given year depends on instructor. See History website for more details.

Prerequisite: 9.0 FCEs including 1.0 FCE HIS course. Further pre-requisites vary from year to year, consult the department.
Distribution Requirements: Humanities
HIS390H1 - Slavery in Latin America

Hours: 24L

This seminar focuses on the history of African slavery in Latin America from its origins in the fifteenth century to its abolition in the nineteenth century. Readings will draw from primary sources and historical scholarship related to a range of topics, including the slave trade, gender, religious and cultural practices, and emancipation.

Prerequisite: HIS106Y1/HIS231H1/HIS291H1/HIS292H1
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

HIS391Y1 - Black Freedom in the Atlantic World

Hours: 72L

Black writers and historical actors were at the vanguard of re-conceiving, implementing, and realizing much of the Enlightenment project of freedom. Africans and people of African descent significantly affected its meaning in the Atlantic world. The course sets out to explore this history as well as the contemporary practice of freedom.

Prerequisite: 1.0 FCE in African, European, Atlantic World history or permission of course instructor
Exclusion: HIS296Y1/HIS371H5/HISC70H3
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

JAH391Y0 - Topics in Anthropology and History

Hours: 48S

Anthropological and Historical perspectives on topics that vary from year to year.

Recommended Preparation: ANT207H1 or a course in European History
Distribution Requirements: Humanities; Social Science
Breadth Requirements: Creative and Cultural Representations (1); Society and its Institutions (3)

HIS392Y1 - Screening Freedom

Hours: 48L

This course examines how filmmakers in Africa, The Americas, and Europe have dealt with subjects such as slavery, colonialism, racism and postcolonial issues such as illegal immigration or structural adjustment. The course interpolates texts from HIS391Y1 into these films in order to bring new perspectives to questions of freedom in different media, times, and places.

N.B. This course supplements HIS391Y1.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1); Society and its Institutions (3)

JAH391H1 - Topics in Anthropology and History

Hours: 24S

Anthropological and Historical perspectives on topics that vary from year to year.

Recommended Preparation: ANT204H1 or a course in European History
Distribution Requirements: Humanities; Social Science
Breadth Requirements: Society and its Institutions (3)

HIS393H1 - Digital History

Hours: 24L

Explores implications for history and its methods of the shift from print to digital sources. Imparts introductory skills in the manipulation digital media, such as the use of maps, GIS and big data.

Prerequisite: 200-level History course or one of WDW235H1/WDW236H1
Exclusion: HIS389H1 (Topics in History: Digital History), offered in Summer 2015, Winter 2016, and Winter 2017
Distribution Requirements: Humanities
Breadth Requirements: The Physical and Mathematical Universes (5)
HIS394H1 - 20th and 21st Century African Icons: Media and Biography

**Hours:** 24L

Superseding 19th century European missionary and explorers' accounts of Africa, media in the 20th and 21st centuries have unequivocally played a key role in shaping the globe's views of Africa and Africans. In 2005, BBC Focus on Africa put out an impressive list of more than 100 "African Icons". Since then, a number of websites have come up with various lists of African icons. Who are the African icons and what makes them icons? How have the media contributed in making them icons?

**Prerequisite:** HIS295Y1/HIS297Y1/HIS383H1/HIS383Y1/HIS386H1/HIS481H1/NEW160Y1/NEW261Y1/NEW351Y1/NEW358H1/NEW358Y1/POL301Y1/POL361H1 or by permission from the Instructor.

**Exclusion:** None

**Distribution Requirements:** Humanities

**Breadth Requirements:** Society and its Institutions (3)

---

JHA394H1 - The Asia Pacific War

**Hours:** 24L

This course examines the Second World War in the Asia Pacific region and highlights: (1) how imperialism and colonialism of both the Euro-American and Japanese varieties were central to the War's outbreak, conduct, and "resolution"; (2) various "local" rather than simply national experiences and memories of the War, including those of marginalized groups in Japan and its colonies, "comfort women," victims of war atrocities, Asian North Americans, African Americans, and Pacific Islanders.

**Prerequisite:** One course from: HIS107Y1, HIS242H1, HIS250H1, HIS251H1, HIS263Y1, HIS271Y1, HIS280Y1, HIS281Y1, HIS282H1, HIS283Y1, HIS284Y1, HIS292Y1, HIS311Y1, HIS317H1, HIS328H1, HIS338H1, HIS343H1, HIS343Y1, HIS344H1, HIS344Y1, HIS351Y1, HIS357Y1, HIS361Y1, HIS377H1, HIS385H1, HIS385Y1, or 1.0 credit from CAS200H1, CAS201H1, CAS202H1, CAS310H1, CAS320H1.

**Recommended Preparation:** One or more courses on Japan, China, Korea, or Southeast Asia in any department.

**Distribution Requirements:** Humanities

**Breadth Requirements:** Society and its Institutions (3)

---

HIS395H1 - Independent Studies

This course provides an opportunity for exceptional third-year students to undertake an independent research project on a topic for which there is not a suitable course offering. Students must find an appropriate supervisor from the Department, submit a proposal, and receive approval for the project. Students must be enrolled in either a History Specialist or Major program; have taken at least 3.0 FCE in HIS with a B+ average; and have approval of an instructor willing to supervise the project. Not eligible for CR/NCR option.

**Prerequisite:** Third-year standing; 77% average in 3.0 HIS FCEs.

**Distribution Requirements:** Humanities

---

HIS395Y1 - Independent Studies

This course provides an opportunity for exceptional third-year students to undertake an independent research project on a topic for which there is not a suitable course offering. Students must find an appropriate supervisor from the Department, submit a proposal, and receive approval for the project. Students must be enrolled in either a History Specialist or Major program; have taken at least 3.0 FCE in HIS with a B+ average; and have approval of an instructor willing to supervise the project. Not eligible for CR/NCR option.

**Prerequisite:** Third-year standing; 77% average in 3.0 HIS FCEs.

**Distribution Requirements:** Humanities

---

HIS396H1 - The Progressive Era and Rise of Big Business in America

**Hours:** 24L

This course examines the rise of big business in America and its relationship to social and economic changes in United States in the so-called Progressive Era (roughly 1880-1920). We will focus on several themes: the evolution and characteristics of big business; rise of organized labor; evolution of business-government relations; social and economic reform movements; and the changing status of immigrants, African Americans, and women (both white and African-American). In short, we will be studying a pivotal moment in the transformation of modern American society.

**Exclusion:** HIS389H1 (Topics in History: Business and Society), offered in Fall 2016 and HIS372H1 (Topics in U.S. History: The Progressive Era and Rise of Big Business), offered in Winter 2018

**Recommended Preparation:** HIS271Y1

**Distribution Requirements:** Humanities

**Breadth Requirements:** Society and its Institutions (3)

---

HIS397H1 - Political Violence and Human Rights in Latin America

**Hours:** 24L

This course will explore human rights theory and practice from a Latin American perspective. There will be a focus on the local derivation, development and impact of the movement for human rights in Latin America. The course will focus on the history of organized protest against violence in the twentieth century.

**Prerequisite:** HIS292H1

**Distribution Requirements:** Humanities

**Breadth Requirements:** Society and its Institutions (3)
HIS398H0 - Research Excursions
An instructor-supervised group project in an off-campus setting. Details at https://www.artsci.utoronto.ca/current/academics/research-opportunities/... Not eligible for CR/NCR option.

Distribution Requirements: Humanities

HIS398Y0 - Research Excursions
An instructor-supervised group project in an off-campus setting. Details at https://www.artsci.utoronto.ca/current/academics/research-opportunities/... Not eligible for CR/NCR option.

Credit course for supervised participation in faculty research project. Details at https://www.artsci.utoronto.ca/current/academics/research-opportunities/... Not eligible for CR/NCR option.

Distribution Requirements: Humanities

HIS400H1 - The American War in Vietnam
Hours: 24S
This course examines the French and American Wars (1945-75) in Vietnam and its effects on the population of Vietnam and Southeast Asia. It begins with a brief overview of pre-colonial Vietnamese history and moves into a study of the impact and legacies of colonial rule and centres on the impact of the Wars on the cultures, economies, and societies of Southeast Asia.

Prerequisite: By permission of the Instructor
Exclusion: HIS315H1
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

HIS401H1 - History of the Cold War
Previous Course Number: HIS401Y1
Hours: 24S
This course covers international relations from World War II to the collapse of the Soviet Union. Topics include the breakdown of the wartime alliance, Soviet predominance in eastern Europe, the Western response, NATO, atomic weaponry.

Prerequisite: HIS311Y1/HIS344H1/HIS344Y1/HIS377H1
Exclusion: HIS401Y1, HIS306H5
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

HIS402H1 - Canada and Decolonization
Hours: 24S
This course will explore the multi-faceted ways in which Canada was shaped by and was an active participant in global decolonization following the Second World War. An emphasis will be placed on the larger global context in which post-war Canadian history unfolded. Topics will include Indigenous politics, changing migration patterns, Quebec nationalism, diasporic politics, anti-colonial thought and oppositional social movements.

Prerequisite: HIS263Y1/HIS264H1
Recommended Preparation: HIS307H1/HIS312H1/HIS314H1
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

HIS403H1 - Jews and Christians in Medieval and Renaissance Europe
Previous Course Number: HIS403Y1
Hours: 24S
The course focuses on aspects of Jewish-Christian relations ca.300-1600, such as royal and ecclesiastical Jewish policies; religious polemics; intellectual collaboration; social and economic interaction; anti-Judaism and religious violence. (Joint undergraduate-graduate)

Exclusion: HIS403Y1
Recommended Preparation: HIS208Y1/HIS220Y1/HIS243H1/
HIS322Y1/HIS357Y1
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)
**HIS404H1 - Topics in U.S. History**

**Hours:** 24S

Selected topics in U.S. history. Topics in any given year depend on the instructor. Please see History website for details.

**Prerequisite:** HIS271Y1

**Distribution Requirements:** Humanities

**Breadth Requirements:** Society and its Institutions (3)

---

**HIS405Y1 - Canadian Foreign Relations**

**Hours:** 48S

A course on Canadian external relations since 1945. Topics include Canada and the Cold War, the Korean War, the Suez crisis and the war in Vietnam, membership in international organizations, and bilateral relations with other countries. (Joint undergraduate-graduate)

**Prerequisite:** HIS311Y1/POL312Y1

**Distribution Requirements:** Humanities

**Breadth Requirements:** Society and its Institutions (3)

---

**HIS406H1 - Advanced Topics in Gender History**

**Hours:** 24S

An in-depth examination of issues in gender history. Content in any given year depends on instructor. See History website for more details.

**Distribution Requirements:** Humanities

**Breadth Requirements:** Society and its Institutions (3)

---

**HIS407H1 - Imperial Germany, 1871-1918**

**Hours:** 24S

Historiographical controversies and the latest empirical findings concerning social conflict and political mobilization under Bismarck and Wilhelm II. Problems raised by competing schools of interpretation include definitions of the authoritarian state, bourgeois hegemony, localism and regionalism, radical nationalism, workers ‘culture, and gender relations. (Joint undergraduate-graduate)

**Prerequisite:** HIS330H1 or permission of the instructor

**Exclusion:** HIS407H5

**Distribution Requirements:** Humanities

**Breadth Requirements:** Society and its Institutions (3)

---

**HIS408H1 - Topics in Environmental History**

**Hours:** 24S

This advanced undergraduate seminar will explore themes in environmental history. Thematic focus will vary from year to year, and may include extinction, nuclear power in environmental history, empire and environment, toxicity and contamination, climate change, the Columbian exchange, the Anthropocene, agriculture, animals, and/or other themes. Time period and geographical focus will also vary in keeping with the thematic focus of this course.

**Prerequisite:** HIS218H1 or HPS316H1

**Distribution Requirements:** Humanities

**Breadth Requirements:** Society and its Institutions (3)

---

**HIS411H1 - Great Trials in History**

**Hours:** 24S

This seminar course will study a handful of great trials in close detail. Using materials from the modern period in Europe and North America, we will look at the clash of ideas represented in these high-profile cases, the historical setting in which they were embedded, the human drama, legal and sometimes constitutional issues, and their impact both on their societies and our own.

**Distribution Requirements:** Humanities

**Breadth Requirements:** Society and its Institutions (3)

---

**HIS413H1 - Slave Emancipation in the Atlantic World**

**Hours:** 24S

Examines the process and consequences of slave emancipation in the Atlantic World, beginning with the French and Haitian Revolutions and concluding with slavery and abolition in West Africa in the early 20th century. Students are introduced to the major literature and historiographical debates surrounding emancipation.

**Distribution Requirements:** Humanities

**Breadth Requirements:** Society and its Institutions (3)
HIS414H1 - Down and Out in Medieval Europe

Hours: 24S

Explores the life conditions of individuals on the lower echelons of medieval society (the poor, servants and apprentices, the exiled, prisoners, slaves, foreigners and lepers). In parallel, we will discuss the various conceptions of poverty that prevailed in the Middle Ages. These objectives will allow us to glimpse the European Middle Ages from an unusual angle as well as reflect on important socio-economic and religious changes.

Prerequisite: HIS220Y1 or 1.0 FCE on the Middle Ages, or permission of course instructor
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

HIS415Y1 - Nationalism & Memory in Modern Europe

Previous Course Number: HIS415H1
Hours: 48S

Investigates the modern concept of the nation and its connections to the idea of collective memory in twentieth-century Europe. Through reading and discussing seminal works on nationalism and national memory, we will discuss the connections between modern notions of nation and practices of remembering.

Prerequisite: Two history courses from the following: HIS102Y1, HIS103Y1, HIS109Y1, HIS241H1, HIS242H1, HIS243H1, HIS244H1, HIS245H1, EUR200Y1, HIS317H1
Exclusion: HIS415H1
Recommended Preparation: HIS102Y1, HIS109Y1, HIS241H1, HIS242H1, HIS243H1
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

HIS416H1 - Orientalism and Nationalism in Nineteenth-Century Germany

Hours: 24S

In 1771, with the translation of the Zend-Avesta by the French Scholar Anquetil-Duperron, a new era opened in German national culture. From the philosophy of Johann Gottfried von Herder to the novels of Thomas Mann, this course analyzes the ways in which German writers defined the substance and place of national culture in their writings about India, Central Asia and the East.

Prerequisite: HIS241H1, 242H1/317H1/Y1
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

HIS417Y1 - The Oldest Profession in Canada: Sex Work Histories in Comparative Contexts

Hours: 48S

This seminar explores the historical effects of the "world's oldest profession" in Canada and beyond. Using a range of texts, including film, memoirs, oral history and visual culture, it seeks to enhance both historical and contemporary discussions of the sex trade by examining its rich, difficult and problematic pasts. Seminar readings and discussions will examine the lives and experiences of multiple sex trade-involved populations, from affluent 19th-century madams to streetwalkers and queer and trans communities.

Prerequisite: HIS263Y1/HIS264H1
Exclusion: HIS417H1
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

HIS418H1 - Themes in Canadian Environmental History

Hours: 24S

Environmental historians study the reciprocal relationship between humans and nature over time. This course examines key themes in the history of Canada's environment. Possible topics include food, energy, pollution, cities, parks, and environmental movements. Specific themes vary by year, depending on the focus of the instructor. Strong emphasis is place on reading and research.

Prerequisite: HIS263Y1/HIS264H1
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

HIS419H1 - Canada By Treaty: Alliances, Title Transfers and Land Claims

Hours: 24S

A detailed study of the treaty process between indigenous peoples and newcomers in Canadian history, with examination of the shift between alliance treaties to land surrender agreements from the colonial period through to the signing of recent treaties including the Nunavut Land Claims Agreement and the Nisga’a Final Agreement.

Prerequisite: HIS263Y1/HIS264H1
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)
HIS420H1 - Russia's Great Patriotic Wars

Hours: 24S

The course examines Russia's wars with Napoleon and Hitler, both as military campaigns and as important nation-building events, largely through memoir literature.

Prerequisite: HIS250H1/HIS250Y1/HIS325H1/HIS351Y1

Breadth Requirements: Humanities

Distribution Requirements: Society and its Institutions (3)

---

HIS421H1 - Early Modern English Popular Culture, 1500-1800

Hours: 24L

Deals with issues of orality, literacy, gender, class, cultural bricolage and vernacular epistemology – the constituents of popular, as opposed to elite knowledge - through the study of folklore, magic, religion, drink, sex, riot and festivity in early modern England. Some background in medieval and/or early modern history or literature is highly recommended. Extensive work will be undertaken with primary printed sources.

Prerequisite: One of HIS10Y1/HIS109Y1/HIS220Y1/HIS243H1/

HIS244H1/HIS368H1/HIS377H1/HIS349H1/HIS357Y1

Exclusion: HIS496H1 (Topics in History: Early Modern English Popular Culture, 1600-1800), offered in Summer 2018

Distribution Requirements: Humanities

Breadth Requirements: Society and its Institutions (3)

---

HIS422H1 - Social History of Medicine in the 19th & 20th Centuries

Hours: 24S

Introduces students to current issues in the social history of medicine and some of the major developments in the modern history of the discipline. The format is class discussion based on themes covered in the course textbook, covering such topics as the history of the doctor-patient relationship, changes in physicians' social status, changing attitudes toward the body, and the evolution of various medical and surgical specialties including obstetrics and gynecology. (Joint undergraduate-graduate).

Exclusion: HIS423Y1

Distribution Requirements: Humanities

Breadth Requirements: Society and its Institutions (3)

---

HIS424H1 - Violence in Medieval Society

Hours: 24S

This seminar explores the social function and meaning of violence in medieval society, and the development of rituals and institutions to control violence. Among the topics treated: Germanic blood feud, aristocratic violence and chivalry, criminal justice systems, violence against minorities, and violence and gender. (Joint undergraduate-graduate)

Prerequisite: HIS220Y1/HIS320H1/HIS321H1/HIS322H1

Exclusion: HIS327Y5

Distribution Requirements: Humanities

Breadth Requirements: Society and its Institutions (3)

---

HIS426H1 - Medieval Italy, 400-1000

Hours: 24S

This course surveys the major developments and figures of Italian history by focusing on key primary texts (in translation) with a particular view to urban and legal history which will form the backdrop to understanding artistic and literary achievements in context.

Distribution Requirements: Humanities

Breadth Requirements: Society and its Institutions (3)

---

HIS427H1 - History and Historiography in the Golden Legend

Hours: 24S

The Golden Legend or Readings on the Saints, compiled by Jacobus de Voragine C. 1260, serves as the basis for a seminar on the relation of history and legend as understood in the High Middle Ages. (Joint undergraduate-graduate)

Prerequisite: HIS220Y1

Distribution Requirements: Humanities

Breadth Requirements: Society and its Institutions (3)
HIS428H1 - Medieval Institutes of Perfection

Hours: 24S

The first goal of this seminar is to help students read the sources with a more critical eye, especially narrative sources (Lives of Saints) and normative sources (rules and customaries). The second goal is to study the evolution of the monastic ideal from its origin to the 12th century. (Joint undergraduate-graduate)

Prerequisite: A course specifically on the Middle Ages such as HIS220Y1
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

HIS429H1 - Canada and Empire in the Twentieth Century

Hours: 24S

This course explores the ways in which twentieth century Canada was shaped by its complex relationship to empire. Course readings place Canadian historiography into dialogue with new theoretical and methodological approaches drawn from postcolonial studies, new imperial history, feminist and critical race theory. Topics include the meaning of empire in everyday life, migration, the impact of global decolonization, and Indigenous politics.

Prerequisite: HIS263Y1/HIS264H1
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

HIS432H1 - Topics in Medieval History

Hours: 24S

The students define together with the professor eight different topics (e.g. relics, masculinity, leprosy, clothes, recluse, peasants houses, gynecology and the peace of God). Each topic is approached through a class discussion, on the basis of a common corpus of secondary sources, plus presentations by the students.

Prerequisite: A course in Medieval history such as HIS220Y1
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

HIS433H1 - Polish Jews Since the Partition of Poland

Hours: 24S

To explore the history of Polish Jews from the Partitions of Poland to the present time, concentrating on the 19th and the first half of the 20th centuries; situation of Polish Jews in Galicia; Congress Kingdom of Poland; Prussian-occupied Poland before 1914; during World War II; and post-war Poland. Focus on an analysis of primary sources. (Joint undergraduate-graduate)

Prerequisite: HIS208Y1/HIS251Y1/permission of the instructor
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

HIS434Y1 - Kievan Rus

Hours: 48S

The origin of Rus, international trade, the impact of nomadic peoples, the introduction of Christianity, the economic system on the problem of feudalism, the political structure and the dilemma of princely succession; literature and architecture; the displacement of political power centres and depopulation, the preservation of the Kievan heritage. (Joint undergraduate-graduate)

Prerequisite: HIS220Y1/HIS250H1/HIS250Y1/HIS320H1/HIS321H1/HIS322H1
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

HIS435H1 - Themes in Toronto History

Hours: 24S

This course will examine aspects of Toronto's history. It is not a general survey of Toronto history; instead, the course will normally revolve around a specific theme or group of themes. Specific themes vary by year, depending on the focus of the instructor. Strong emphasis will be placed on reading and research.

Prerequisite: HIS263Y1/HIS264H1
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)
HIS436H1 - Stalinist Terror

Hours: 24S

This research seminar explores topics and issues of violence in the Soviet Union in the 1930s, beginning with forced collectivization and ending with the Great Terror. The seminar focuses on new archivally-based research and aims to contextualize Stalinist terror within larger theories of political and social violence.

Prerequisite: HIS250Y1 (B or higher) or HIS351Y1 (B or higher)
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

HIS437H1 - Telling Lies About Hitler: Frauds and Famous Feuds Among German Historians

Hours: 24S

Examines historiographical controversies and their public reception. Topics include the forged Hitler diaries, the David Irving trial, German responsibility for 1914, Daniel Goldhagen’s “eliminationist” thesis, Auschwitz as an “Asiatic deed,” Wehrmacht complicity in the Holocaust and retrospective films about East Germany.

Prerequisite: HIS317H1/HIS330H1 or permission of the instructor
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

HIS438H1 - Inquisition and Society in Medieval and Early Modern Europe

Hours: 24S

Focusing on the institution of the inquisition, this seminar explores the response of ecclesiastical and secular authorities to religious heterodoxy. Among the groups prosecuted by the inquisition discussed: Cathar heretics in France, crypto-Jews and crypto-Muslims in Spain, and witches in Italy.

Recommended Preparation: HIS220Y1
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

HIS439H1 - Russia’s Empire

Hours: 24S

This course examines ways in which the Russian Empire and Soviet Union expanded their territories, the ways they controlled those colonies, and the ways in which they dealt with rising nationalism both at home and abroad.

Prerequisite: HIS250H1/250Y1
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

HIS440H1 - Maps and History

Hours: 24S

Examines the use of maps through the ages to depict spatial relationships and political, social, or cultural authority. Explores the visual display of quantitative information, the evolution of historical atlases, and cartographic crime. Such topics as Lebensraum and gerrymandering illustrate how maps can distort historical processes and communal relationships.

Recommended Preparation: at least three History courses at the 200/300 level
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

HIS442H1 - Jews and the Holocaust in the Soviet Union

Hours: 24S

This course is an advanced research seminar in Soviet history. It will explore the Jewish experience in the Soviet Union, with a focus on the Holocaust. The seminar will begin with an examination of the history of Jews in the Russian Empire and the Soviet Union in the years leading up to the Second World War. Then the course will pivot directly to the topic of the Holocaust on Soviet soil. How did the Holocaust in the “east” differ from the Holocaust in the “west”? How did the conduct of war condition genocide in the Soviet Union? How did Soviet Jews and non-Jews respond to the German genocide? What was the response of Stalin and the Soviet government to the Holocaust? How is the Holocaust remembered by the states and people of the former Soviet Union.

Prerequisite: HIS351Y1 or a course on the Holocaust
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)
HIS443H1 - Society, Culture and Religion in the Renaissance and Reformation

Hours: 24S

Developments in popular/lay/local religion as expressed in a variety of cultural, political, and social forms from 1400-1600; the relation of these forms to both Catholic and Protestant institutional churches. Impact of Renaissance humanism on notions of kinship, order, community, perfection.

Prerequisite: HIS309H1/HIS357Y1 or permission of instructor
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

HIS444H1 - Topics in Jewish History

Hours: 24S

Selected topics on a specific period or theme in Jewish history. Topic in any given year will depend on the instructor. Please see History website for details.

Prerequisite: A course in modern European or Jewish history
Recommended Preparation: A course in Jewish history
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

HIS445H1 - Nationalism

Hours: 24S

What is a nation? Are nations ancient or modern, unchanging or malleable? Do nations create states, or does the state create the nation? This course seeks to answer these questions through an examination of nationalism, primarily in Europe, from the 1700s through the present.

Prerequisite: 2.0 FCE HIS courses in European history or permission of instructor
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

HIS446H1 - Gender and Slavery in the Atlantic World

Previous Course Number: HIS446Y1
Hours: 48S

The course examines the relationship between gender and the experience of slavery and emancipating several Atlantic world societies from the 17th-19th centuries. Areas to be covered are the Caribbean, Brazil, the U.S. South, West and South Africa and Western Europe.

Prerequisite: HIS291H1/HIS294Y1/(HIS230H1, HIS231H1)/HIS295Y1
Exclusion: HIS446Y1
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

HIS449Y1 - Ukrainian National Revival

Hours: 48S

The role of the intelligentsia in East European national revivals; the ethnographic and literary revival; the language question; the press and cultural organizations; education; religion; and political movements. (Joint undergraduate-graduate)

Recommended Preparation: One of the following: JHP204Y1/ HIS241H1/HIS251Y1/HIS445H1
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

HIS451H1 - World War II in East Central Europe

Hours: 24S

The fall of the Versailles system, German and Soviet diplomatic and military activities and their occupational policies in East Central Europe during World War II, economic exploitation, collaboration, resistance, and genocide in the discussed region, its liberation and sovietization in 1944-1945. (Joint undergraduate-graduate)

Prerequisite: EUR200Y1/HIS251Y1/HIS334H1
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)
JHP451Y1 - The People from Nowhere

Hours: 48S

This course traces from earliest times to the present the evolution of a people called Carpatho-Rusyns and their historic homeland Carpathian Rus', located in the heart of Europe. The historic survey will deal with political, socioeconomic, and cultural developments, all the while testing the hypothesis that nationalities are imagined communities. (Given by the Departments of History and Political Science)

Recommended Preparation: a course in eastern European history, or in nationalism

Distribution Requirements: Humanities; Social Science

Breadth Requirements: Society and its Institutions (3)

JHP454Y1 - Twentieth Century Ukraine

Hours: 48S

World War I and the Russian Revolution: the Ukrainian independence movement; the Soviet Ukraine and west Ukrainian lands during the interwar period; World War II and the German occupation; the Soviet Ukraine before and after the death of Stalin. Socio-economic, cultural, and political developments. (Given by the Departments of History and Political Science)

Prerequisite: A course in modern European, East European or Russian history or politics such as HIS250Y1/HIS351Y1/HIS353Y1

Distribution Requirements: Humanities; Social Science

Breadth Requirements: Society and its Institutions (3)

HIS457H1 - The French Revolution and the Napoleonic Empire

Hours: 24S

Explores the central themes in the history of France during the Revolution and the First Empire. We will consider the periods principal political, social and cultural aspects: the causes of the French Revolution; the shift from constitutional monarchy to Republic; the relationship between politics and religion; the invention of a new republican political culture; counterrevolution and Terror; the Directory; Bonaparte's rise to power; the Napoleonic Empire; the nature of war during the Empire; the Restoration; and the Revolution's legacy in France and beyond today.

Prerequisite: HIS243H1/HIS244H1/HIS319H1/HIS341Y1/HIS387H1

Exclusion: HISC26H3

Distribution Requirements: Humanities

Breadth Requirements: Society and its Institutions (3)

HIS459H1 - Soviet History and Film, 1921-1946

Hours: 24S

The history of Soviet cinema and the importance of film as a historical source. Documentary and fiction film; editing, narration, and sound; film distribution and exhibition; the Soviet school of montage and socialist realism; nationality and gender; the Soviet musical comedy of the Stalin era; resistance and dissidence.

Prerequisite: CIN105Y1/HIS250Y1/HIS250H1/HIS335H1

Exclusion: HIS450Y1/SLA233H1/SLA234H1

Distribution Requirements: Humanities

Breadth Requirements: Creative and Cultural Representations (1)

HIS460H1 - Soviet History and Film, 1941-1991

Hours: 24S

Soviet film as a historical source and the institutional and ideological history of Soviet film production, distribution, and exhibition. Fiction and documentary film during World War II; the cinema of the Cold War and the Thaw; Soviet new realism and the return of the village; avant-garde cinema of the 1960s-80s; memory and historical revision in late Soviet film. Screenings include never-before-seen archival footage, as well as films and film clips subtitled by the instructor.

Prerequisite: INI115Y1/HIS250Y1/HIS335H1

Exclusion: HIS450Y1/SLA233H1/SLA234H1

Distribution Requirements: Humanities

Breadth Requirements: Creative and Cultural Representations (1)
**HIS461H1 - Poland in the 20th Century**

**Hours:** 24S

The 20th century has been an age of experiments for Poland. Universal, general problems of democracy, authoritarianism, totalitarianism, communism, socialism, free market and centrally planned economies, are examined, as are the ongoing adjustments made by the Polish people. (Joint undergraduate-graduate)

**Prerequisite:** HIS334H1/HIS353Y1/permission of the instructor

**Distribution Requirements:** Humanities

**Breadth Requirements:** Society and its Institutions (3)

**HIS463H1 - Cloth in American History to 1865**

**Hours:** 24S

Cloth was a major commodity in the early modern world. Positioning early America within a global context and employing a material culture framework, textiles and clothing provide the lens through which to view the social, cultural, economic and industrial development of the United States from pre-European contact until the 1860s.

**Prerequisite:** HIS271Y1

**Recommended Preparation:** HIS374H1/VC224Y1

**Distribution Requirements:** Humanities

**Breadth Requirements:** Society and its Institutions (3)

**HIS464H1 - Religion and Violence in Comparative Perspective**

**Hours:** 24S

Examines varying roles of religion in cases of genocide and extreme violence. Seminar proceeds from recent cases (Darfur, Rwanda, wars associated with break-up of Yugoslavia) backward through the 20th century (Cambodia, Indonesia, the Holocaust, Armenians, Herero) and the 19th century (Belgian Congo, Caucasus, native peoples in the Americas).

**Prerequisite:** one course in HIS/REL/Peace and Conflict

**Distribution Requirements:** Humanities

**Breadth Requirements:** Society and its Institutions (3)

**HIS465Y1 - Gender and International Relations**

**Hours:** 48S

This seminar explores the use of gender as a category of analysis in the study of international relations. Topics include gendered imagery and language in foreign policymaking; beliefs about women’s relationship to war and peace; issues of gender, sexuality, and the military; gender and global governance; gender and the global economy; sexual violence; and contributions of feminist theory to international relations theory.

**Exclusion:** JHP440Y1

**Recommended Preparation:** 0.5 credit at the 300-level in HIS/POL/WGS

**Distribution Requirements:** Humanities

**Breadth Requirements:** Society and its Institutions (3); Thought, Belief and Behaviour (2)

**HIS466H1 - Topics in Canadian History**

(formerly HIS466Y1)

**Hours:** 24S

Selected topics in a specific period of Canadian history. Content in any given year depends on instructor. Please see the History Department website for complete description.

**Prerequisite:** HIS263Y1/HIS264H1 or permission of the instructor

**Distribution Requirements:** Humanities

**Breadth Requirements:** Society and its Institutions (3)

**HIS467H1 - French Colonial Indochina: History, Cultures, Texts, Film**

**Previous Course Number:** HIS467Y1

**Hours:** 24S

Examines French colonial Indochina through several different lenses. Themes include the cross-cultural contact zones between colonial and colonized societies, imperial culture, expressions of colonial power, and forms of opposition. Colonial novels, translated resistance literature, documentaries, and films are utilized as primary sources to be examined critically.

**Prerequisite:** ANT344Y1/EAS204Y1/GGR342H1/HIS104Y1/ HIS107Y1/HIS280Y1/HIS283Y1/HIS284Y1/HIS315H1/HIS388H1/ NEW369Y1

**Exclusion:** HIS467Y1

**Distribution Requirements:** Humanities

**Breadth Requirements:** Society and its Institutions (3)
HIS470H1 - History, Rights, and Difference in South Asia

Hours: 24S

Addressing South Asian history after 1750, this course examines ideas of rights, contract, and the rule of law in colonial and postcolonial contexts. Attention is paid to the intellectual history of rights and the central place of colonial and postcolonial questions within that history. Topics include rights and questions concerning indigenous culture, caste and customary practice, gender and capitalist development.

Prerequisite: A mark of 73% or higher in HIS282Y1 or instructors permission
Recommended Preparation: Background in political and social theory and some background in South Asia
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

HIS471H1 - Emancipate Yourselves from Mental Slavery? Historical Narratives of Caribbean Decolonisation

Hours: 24S

This course is a critical intellectual history of Caribbean decolonisation. It begins with the Haitian Revolution, exploring and comparing how history was mobilized to structure anti-colonial theories about the making of postcolonial Caribbean societies. Key conceptual frameworks to be examined include indigenism, noirism, creolization, metissage; Caribbean interpretations of Marxism, Negritude and Pan-Africanism.

Prerequisite: HIS294Y1/(HIS230H1, HIS231H1)
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

HIS472H1 - Indigenous-Newcomer Relations in Canadian History

Hours: 24S

The trajectory of Canadian history has been (and continues to be) shaped significantly by the changing relationships between indigenous peoples and newcomers to what is now Canada. Through discussion of readings on various seminar topics, we will explore the multi-faceted contours of these relationships, from cultural encounters, treaties & alliances, and missionization to colonization, assimilation, residential schools and contemporary issues.

Prerequisite: HIS263Y1 (73%)/HIS264H1 (73%)
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

HIS473H1 - The United States and Asia since 1945

Previous Course Number: HIS473Y1
Hours: 24S

This seminar examines strategic, economic, ideological, and cultural factors in U.S. relations with East and Southeast Asia. Major themes include the role of cultural and informal diplomacy and the effect of perceptions and misperceptions on both sides of U.S. - Asian interactions.

Prerequisite: 1.0 FCE of prior course in History, any field
Exclusion: HIS473Y1
Recommended Preparation: HIS271Y1/HIS280Y1/HIS328H1/ HIS344H1/HIS376H1/HIS377H1/HIS379H1
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

HIS474H1 - Senior Thesis Seminar

Hours: 24S

Compulsory for all Specialists undertaking a one-semester dissertation. Weekly seminars provide training in reviewing literature, writing research proposals, formulating hypotheses and oral presentation of findings.

History Specialists only. Students must find topics and thesis supervisors. Not eligible for CR/NCR option. See department website for prerequisites and specific registration instructions. (http://history.utoronto.ca/undergraduate/senior-thesis)

Prerequisite: Consent of supervisor and department
Exclusion: HIS498H1, HIS499Y1, HIS476Y1
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

HIS475H1 - Senior Thesis

Previous Course Number: HIS476Y1
Hours: 24S

Compulsory for all Specialists undertaking a one-year dissertation.

History Specialists only. Students must find topics and thesis supervisors. Not eligible for CR/NCR option. See department website for prerequisites and specific registration instructions.

Prerequisite: HIS475H1 and consent of supervisor and department
Exclusion: HIS476Y1, HIS498H1, HIS499Y1
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)
HIS477H1 - Topics in the Social and Cultural History of Victorian Britain

Hours: 24S

Examination of the impact of industrialism on Victorian society and values. Concentration on Victorian social critics including Engels, Owen, Maynew, Dickens and Morris.

Recommended Preparation: A course in modern British History/Victorian literature
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

HIS479H1 - US Foreign Policy Since World War II

Hours: 24S

An in-depth study of U.S. behaviour in the global arena since World War II. Particular attention will be paid to the origins and evolution of the Cold War, the Vietnam War, the initiatives of the Nixon-Kissinger years, the end of the Cold War, and the relevance of globalization.

Prerequisite: HIS271Y1/HIS377H1
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

HIS480H1 - Modernity and its Others: History and Postcolonial Critique

Hours: 24S

Engaging with influential perspectives in postcolonial historiography, this seminar tracks three major themes in the history of the idea of modernity from the late 18th through the 20th centuries: political freedom, citizenship and the nation-state; capitalism and its critique; and the relationship of history, memory, and identity. (Joint undergraduate-graduate)

Prerequisite: a mark of 73% or higher in HIS282Y1, or instructors permission; HIS470H1
Recommended Preparation: History of colonialism, political theory, or postcolonial literatures
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

HIS481H1 - Elite Women, Power, and Modernity in Twentieth-Century Africa

Hours: 24S

The role of elite women in twentieth-century Africa has been overshadowed by studies of non-elite women so much so as to suggest that all women lacked power. This course aims to show how a very limited but important group of women negotiated power in a century of increasing patriarchy. It combines gender with class analysis.

Prerequisite: 300-level African History course or any of the African Studies courses offered at U of T.
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

HIS482H1 - Soccer: The History of the World’s Game

Previous Course Number: HIS199H1
Hours: 24S

This seminar proposes to explore the history of the world’s most popular sport, soccer, in broader political, social, and economic context. We will consider critical approaches to the history of sport; modern soccer’s emergence in industrializing Britain; its globalization; its mobilization as a vehicle for political expression, as well as social, cultural, and gendered identities; supporter and soccer as an industry.

Prerequisite: Completion of 9.0 FCEs
Exclusion: HIS199H1
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

HIS484H1 - The Car in North American History

Hours: 24S

This seminar examines the history of the car in North America from the perspective of technology, business, landscape and popular culture. Particular attention is paid to issues of production, consumption, geography, and daily life, and to the importance of class race, gender, region, and age in shaping the meaning and experience of car culture.

Prerequisite: HIS263Y1/HIS264H1/HIS271Y1
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)
HIS485H1 - Topics in Chinese History

Previous Course Number: HIS485Y1
Hours: 24S

A seminar on selected aspects of Chinese history from 1368 to the present. Please see History website for detailed description of topic in any given year.

Prerequisite: EAS102Y1/HIS280Y1/JMC201Y1
Exclusion: HIS485Y1
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

HIS486H1 - Writing and Masculinity in Africa

Hours: 24S

Introduces African cultural and intellectual history via a series of important primary texts. These texts provide important insights into the gendered nature of African intellectual movements for liberation as well as wider political discourses. It examines how these authors developed and deployed concepts such as authenticity, modernity, nation, and personhood.

Prerequisite: HIS391Y or an equivalent course in African history
Exclusion: HIS495H1
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

HIS487H1 - Animal and Human Rights in Anglo-American Culture

Hours: 24S

Examines the parallel discourses of animal and human rights in Anglo-American culture from the eighteenth century to the present. The courses explores issues of subjectivity and consciousness as well as cruelty and pain. Topics include slavery and abolition, animal welfare and antivivisection, anti-colonial liberation movements, and animal rights campaigns.

Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

HIS489H1 - The History of Psychiatry and Psychiatric Illness

Hours: 24S

Introduces students to current issues in the history of psychiatry and some of the major developments in the evolution of this unique medical specialty. the format is class discussion based on themes covered in the course textbook, covering such topics as changing perspectives on the nature of psychotic illness, the psychoneuroses, disorders of the mind/body relationship, psychiatric diagnosis, and presentations of illness. (Joint undergraduate-graduate).

Exclusion: HIS423Y1
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

HIS490H1 - Everyday Stalinism

Hours: 24S

This seminar explores issues of everyday life in Soviet Russia during the Stalin era. What was the Soviet normal? Topics will include belief systems, dreams and myths, terror, fear, repression, and resistance. Texts include a range of different sources, memoirs, diaries, official state documents, and secondary sources.

Prerequisite: grade of A in HIS250Y1/grade of B+ or higher in HIS351Y1
Exclusion: HIS423Y1
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

HIS492H1 - Empire & Colonization in the French Atlantic World

Hours: 16S

The first French empire (1604-1791) is typically considered a failed empire. Beginning with the first French exploratory expeditions in the South Atlantic in the mid-16th century, this course examines the social, economic and political history of French imperial expansion during the Ancien régime in order to consider the meaning of success, as applied to empire during this period. The focus is on the development of the two colonial centres of the French New World: New France and the French Caribbean.

Prerequisite: HIS244H1/HIS294Y1/(HIS230H1, HIS231H1)
Recommended Preparation: HIS387H1
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)
HIS493H1 - Humanity in War: The Modern Evolution of the Law of Armed Conflict

Hours: 24S

This course explores the development of international humanitarian law over the course of the nineteenth and twentieth centuries. Questions asked will include how modern warfare has been understood as a political, cultural, social and legal phenomenon, and the ways in which such perspectives developed into a program of restraint.

Prerequisite: HIS241H1/HIS242H1/HIS344H1/HIS344Y1/ EUR200Y1 or another course in modern history
Exclusion: None
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

HIS495Y1 - Topics in History

Hours: 48S

An in-depth examination of historical issues. Content in any given year depends on instructor. See History website for more details.

Prerequisite: 14.0 FCEs including 2.0 FCE HIS course. Further prerequisites vary from year to year, consult the department.
Recommended Preparation: Varies from year to year
Distribution Requirements: Humanities

HIS496H1 - Topics in History

Hours: 24S

An in-depth examination of historical issues. Content in any given year depends on instructor. See History website for more details.

Prerequisite: 14.0 FCEs including 2.0 FCE HIS course. Further prerequisites vary from year to year, consult the department.
Exclusion: Students may not take both L0601 (“Critical Histories of the Black Canadian Experience”) and L0701 (“Race in Canada”) offered in 2016-17 Fall/Winter.
Distribution Requirements: Humanities

HIS497H1 - Animal Politics and Science

Hours: 24L

Why is thinking about the animal unsettling for some or strange for others? Especially since Darwin, the question of the animal-what it says about being or not being human-has been at the core of important philosophical and scientific debates. This course examines the ways that question has been answered over time.

Prerequisite: 1.0 FCE in political theory, history of science, or intellectual history; or permission of course instructor
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

HIS498H1 - Independent Studies

History Majors only. These courses result in the production of an independent research project. This may not necessarily take the form of a thesis. Students must find topics and project supervisors. Not eligible for CR/NCR option. See department website for prerequisites and specific registration instructions.

Distribution Requirements: Humanities

HIS494H1 - Gandhi's Global Conversations

Hours: 24S

Primary source analysis of global circuits of ethico-political thought via work and life of Gandhi. Charts transnational environment of Gandhian thought (eg. Ruskin and Tolstoy), its critics (advocates of minority rights, also revolutionary violence) and global afterlife (eg. King, Mandela). Teaches methods in intellectual and political history of the global.

Prerequisite: HIS282Y1 with a mark of 76% or above
Distribution Requirements: Humanities

HIS495Y1 - Topics in History (formerly HIS495Y1)

Hours: 48S

An in-depth examination of historical issues. Content in any given year depends on instructor. See History website for more details.

Prerequisite: 14.0 FCEs including 2.0 FCE HIS course. Further prerequisites vary from year to year, consult the department.
Recommended Preparation: Varies from year to year
Distribution Requirements: Humanities

HIS498H1 - Independent Studies

History Majors only. These courses result in the production of an independent research project. This may not necessarily take the form of a thesis. Students must find topics and project supervisors. Not eligible for CR/NCR option. See department website for prerequisites and specific registration instructions.

Distribution Requirements: Humanities
HIS499Y1 - Independent Studies

History Majors only. These courses result in the production of an independent research project. This may not necessarily take the form of a thesis. Students must find topics and project supervisors. Not eligible for CR/NCR option. See department website for prerequisites and specific registration instructions.

Distribution Requirements: Humanities
History and Philosophy of Science and Technology

Faculty List

University Professor and Acting Director (2019-20)
C. Misak, BA, MA, DPhil, FRSC

Associate Professor and Director (on leave 2019-20)
C.-P. Yeang, BS, SM, PhD, Sc D (V)

Associate Professor and Director of Graduate Studies
B. Baigrie, MA, PhD (V)

Associate Professor and Director of Undergraduate Studies
J. Berkovitz, BSc, MA, PhD (V)

Professors
C. Fraser, MA, Ph D (V)
N. Krementsov, Diploma Candidate of Sciences/History and Philosophy of Science and Technology (V)
M. Vicedo, BA, MA, PhD, PhD (V)
D. Walsh, BSc, BA, M Phil, PhD, PhD (V)

Associate Professors
L. Dacome, BA, M Phil, PhD (V)
Y. Fehige, BSc, BPhil, BTheol, MPhil, MTheol, PhD, PhD (V)
M. Solovey, BA, MA, MA, PhD (V)

Assistant Professors
H. Barseghyan, BA, MA, PhD, PhD (V)
W. Sung, BA, MS, MS, PhD (V)
R. Woods, BA, MA, PhD (V)

University Professor Emeritus
T.H. Levere, MA, D Phil, D Litt, FRSC (V)

Professors Emeriti
B.S. Hall, BA, Ph D (V)
J. Langins, M Eng, Ph D (V)
P. M.H. Mazumdar, MB, M Tech, Ph D (V)
P. Thompson, MA, Ph D (V)
M.P. Winsor, M Phil, Ph D (V)

Introduction

How are scientific theories developed? Do values affect science and do scientific theories influence social values? What is the role of science and technology in a democratic society? These are some of the questions that historians and philosophers of science examine. Courses in the philosophy of science engage with the structure of science, its methods, and its special claims to the production of knowledge. Courses in the history of science and technology situate scientific advances in their cultural and socio-economic context.

Students taking HPS courses deepen their understanding of major ideas in science; they learn to think critically about the past and present role of science in human societies, and they improve their skills in oral presentation and debate, research, and writing.

Students pursuing an HPS POST will be ideally suited to any professional or academic context that requires an understanding of science, science in society, and the relation between the sciences and the humanities.

The Minor programs are designed to complement a wide range of Major or Specialist programs including those in the sciences, history, philosophy, or any program for which the combination of sciences and humanities could prove beneficial. The HPS major program is useful for elementary and secondary school teaching, museum and library work, science writing and editing, law, medicine and other fields where competence in both science and humanities is valuable.

Director of Undergraduate Studies:
Professor Joseph Berkovitz

History and Philosophy of Science and Technology Programs

History and Philosophy of Science and Technology Major
(Arts Program) - ASMAJ0667

Enrolment Requirements:
This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:
Students are encouraged to meet with the Director of Undergraduate Studies prior to registering for this degree.

7 full courses or their equivalent

First year (recommended):
1. One 0.5 FCE from any HPS100-level courses; up to a 1.0 FCE at the 100 level will count towards the major.

Higher years (required):
Additional HPS courses, to a total of 7 FCEs and meeting the following two conditions:

1. At least 1.0 FCEs at the 200+ level.
2. At least 2.0 FCEs at the 300+level, 0.5 of which must be at the 400-level.
History and Philosophy of Science and Technology Minor (Arts Program) - ASMIN0667

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

- 4 full courses or their equivalent
- 1. Recommended: 0.5 FCE from any HPS100-level courses. Up to 1.0 FCE HPS courses at the 100-level will be counted towards the minor.
- 2. Recommended: at least 0.5 FCE from any HPS 200-level courses.
- 3. Additional HPS courses to a total of 4 FCEs, with at least one FCE at the 300+ level. JHE353H1, JHE355H1, JPH311H1, PHL245H1, PHL356H1, or PHL357H1 may also be used to fulfill this requirement.

Science and Society Minor (Arts Program) - ASMIN2743

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

The Minor in Science and Society is an interdisciplinary program that focuses on the different ways science and technology shape modern society and, in turn, how society shapes science and technology. From the food we eat to the way we conceive family relations or our obligations to future generations, our daily practices and our beliefs are increasingly influenced by scientific research and its applications. In turn, politics, public opinion, moral beliefs and cultural practices affect scientific and technological development. Courses in this program address such topics as science and values, science-related policy and politics, ethical uses of technology, scientific revolutions and controversies, modeling and communication of scientific research, and knowledge transfer from research to commercial and societal applications.

(4.0 FCEs, including at least 1.0 FCE at 300+ level)

1. HPS200H1
2. 1.0 FCE from: VIC206H1, VIC207H1, VIC242H1, VIC245H1, VIC274H1, VIC343H1, VIC439H1 Y (Science Capstone). Students who achieve at least 77% in VIC121H1, VIC122H1, VIC170Y1 or VIC172Y1 may count up to 1.0 FCE from these courses towards this requirement.
3. 1.0 FCE from: HPS110H1, HPS202H1, HPS210H1, HPS211H1, HPS222H1, HPS245H1, HPS260H1, HPS270H1, HPS272H1, HPS303H1, HPS307H1.

History and Philosophy of Science and Technology Courses

HPS100H1 - Introduction to History and Philosophy of Science

Hours: 24L/10T

An investigation of some pivotal periods in the history of science with an emphasis on the influences of philosophy on the scientists of the period, and the philosophical and social implications of the scientific knowledge, theory and methodology that emerged.

Distribution Requirements: Humanities; Science
Breadth Requirements: Thought, Belief and Behaviour (2)

HPS110H1 - The Science of Human Nature

Hours: 24L/10T

Why do we do what we do? What factors play a role in shaping our personality? What biological and social elements help configure a person’s moral and emotional character? In this course, we examine landmark studies that shook standard beliefs about human nature in their time. We analyze those studies in their historical context and discuss their relevance to social, ethical, and policy debates. The studies may include research on mother love, obedience, conformity, bystander intervention in emergencies, deception, race, and gender stereotypes.

Distribution Requirements: Humanities; Science
Breadth Requirements: Thought, Belief and Behaviour (2)
HPS120H1 - How to Think about Science

Hours: 24L/10T

This course addresses the nature of science and its importance to our understanding of ourselves. Questions include: What is a science? Is science objective? What is scientific reasoning? Has our conception of science changed through history? How does science shape our moral image? Does science reveal our natures as humans?

Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

HPS200H1 - Science and Values

Hours: 24L

An introduction to issues at the interface of science and society. Including the reciprocal influence of science and social norms, the relation of science and religion, dissemination of scientific knowledge, science and policy. Issues may include: Nuclear, Biological and Chemical Weapons; Genetic Engineering; The Human Genome Project; Climate Change.

Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

HPS202H1 - Technology in the Modern World

Hours: 24L/10T

This course examines the reciprocal relationship between technology and society since 1800 from the perspectives of race, class, and gender. From the role of European imperial expansion in 19th-century industrialization and mechanization to the development of nuclear technology, smartphones, and digital computers in the 20th century, we consider cultural responses to new technologies, and the ways in which technology operates as an historical force in the history of the modern world.

Recommended Preparation: HPS201H1
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

HPS203H1 - Making Sense of Uncertainty

Hours: 24L

This course examines issues of uncertainty in various contexts of science, technology, and society since the 19th century. Topics may include randomized controlled trials, statistical identification of normal and pathological, biopolitics, philosophical interpretations of probability, Brownian motions, uncertainty principle in quantum mechanics, cybernetic mind, and chance in avant-garde arts.

Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

HPS210H1 - Scientific Revolutions I

Hours: 24L

Case studies in the history of science from antiquity to 1800, including the revolutionary work of Copernicus, Kepler, Galileo, Descartes, Newton, Linnaeus, Lavoisier, and Herschel. The course is designed to be accessible to science students and non-scientists alike.

Exclusion: HPS200Y1
Distribution Requirements: Humanities; Science
Breadth Requirements: Thought, Belief and Behaviour (2)

HPS211H1 - Scientific Revolutions II

Hours: 24L

Case studies in the history of science from 1800 to 2000, including Volta, Lyell, Darwin, Mendel, Einstein, Schrödinger, Watson, and Crick. The course is designed to be accessible to science students and non-scientists alike

Exclusion: HPS200Y1, HPS300Y0
Distribution Requirements: Humanities; Science
Breadth Requirements: Thought, Belief and Behaviour (2)
HPS222H1 - Science, Paradoxes, and Knowledge

Hours: 24L/10T

What is the nature of science and scientific knowledge? What is the nature of space, time and motion? Does science tell us the truth about the world? What are scientific revolutions and how they occur? The course will address these and various other questions about science. It will focus on the bearings that philosophical views had on science in different periods in history, starting from ancient Greece and concluding in the 20th C.

Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

HPS240H1 - The Influence of the Eugenics Movement on Contemporary Society

Hours: 24L/10T

This course explores present-day topics such as reproductive issues (including "designer babies" and genetic counselling), gender, racism/colonialism, disability and euthanasia through the lens of the history of eugenics. A "scientific" movement which became popular around the world in the early twentieth century, eugenics was based on the principle that certain undesirable human characteristics were hereditary and could be eliminated by controlled reproduction. It resulted in the enactment of laws in numerous places, including Canada, authorizing coerced reproductive sterilization of certain individuals, and other measures intended to "improve" humanity. Today, we see its influences woven through contemporary debates, a number of which we will consider.

Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

HPS245H1 - Visions of Society and Progress

Previous Course Number: HPS352H1
Hours: 24L/12T

This course explores influential visions of society and progress found in the history of the human sciences. It addresses questions such as: Are human beings naturally selfish or cooperative? Is society in harmony with the individual or opposed to the individual? It explores the significance of race, class, population growth, capitalism, and gender in debates about the good society.

Exclusion: HPS352H1
Recommended Preparation: One half-course in any of the following: HPS, history, sociology, economics, political science, anthropology, or another field that intersects with the social sciences such as criminology
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

HPS250H1 - Introductory Philosophy of Science

Hours: 24L/10T

This course introduces and explores central issues in the philosophy of science, including scientific inference, method, and explanation. Topics may include underdetermination, realism and empiricism, and laws of nature.

Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

HPS255H1 - History and Philosophy of Artificial Intelligence

Hours: 24L/12T

This course introduces students to the historical and philosophical issues around artificial intelligence (AI). We will cover the geopolitical, economic, and cultural contexts from which the field of AI emerged, as well as the troubled history of the scientific concept of intelligence and how that has influenced the development of AI. The course will also introduce students to foundational and normative questions, such as how we should define and measure AI, how to evaluate the accomplishments of AI systems, and what the benefits and risks of relying on such systems might be.

Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

HPS260H1 - Biology and the Future: Science and Science Fiction

Hours: 24L

This lecture course explores the fantastic visions of humanity’s future inspired by the advance of the biological sciences during the twentieth century. Biology provided the scientific underpinning for societal hopes and fears embodied in such cultural icons as robots, aliens, "brains in a vat," and super-humans.

Exclusion: HMB444H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)
HPS270H1 - Science and Literature

Hours: 24L/10T

This course will focus on the interplay between science and literature from ancient Greece to the present day. We’ll examine the impact of major scientific paradigm shifts on the literature of their time, and situate literary texts within the context of contemporary scientific discoveries and technological innovations.

Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

HPS272H1 - Science against Religion? A Complex History

Previous Course Number: HPS326H1

Hours: 24L

This course introduces to the central topics arising from the encounter between modern science and religion. It aims to integrate historical and philosophical perspectives about science and religion. Did modern science arise because of Christianity or despite of it? Are science and religion necessarily in conflict? Have they factually always been in conflict throughout history? Are proofs of God’s existence obsolete? Has science secularized society? What role should religions play in liberal democracies?

Exclusion: HPS326H1

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

HPS299Y1 - Research Opportunity Program

Credit course for supervised participation in faculty research project. Details at https://www.artsci.utoronto.ca/current/academics/research-opportunities/... Not eligible for CR/NCR option.

Distribution Requirements: Humanities

HPS300H1 - Topics in History and Philosophy of Science and Technology

Hours: 24L/10T

Topics vary year to year.

Distribution Requirements: Humanities

HPS300Y0 - Britain and the Rise of Modern Science

A Historical exploration of Britain’s role in the rise of modern science, from the Renaissance to the double helix. Students will be introduced to the work of Hooke, Newton, Cavendish, Davy, Faraday, Maxwell, Rutherford, and others.

Exclusion: HPS211H1

Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2); Society and its Institutions (3)

HPS301H1 - Topics in the History of Science

Hours: 24L/10T

This course can concern topics of special interest in the history of science from Antiquity until present. Topics may focus on specific-time periods, fields of inquiry, individuals, scientific institutions, or geographic locations.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

HPS302H1 - Topics in Philosophy of Science

Hours: 24L/10T

This course can concern topics of special interest in the philosophy of science from Antiquity until present. Topics may include scientific change, rationality, method, evidence, progress, reduction, scientific laws, models, representation etc. The course may also focus on specific-time periods, fields of inquiry, individuals, scientific institutions, geographic locations, etc.

Prerequisite: HPS250H1

Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

HPS304H1 - A History Lab: Biomedical Sciences, Past and Present

Hours: 36S

Offers a hands-on introduction to historical research. Through a close examination of classic scholarly texts, archival materials, and recent media publications, this advanced seminar explores the sources, methods, and approaches in historical studies of biomedical twentieth century-sciences.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)
### HPS307H1 - History of Energy

**Hours:** 24L/10T

The history of human control of various sources of energy, including technical developments, scientific theories, and impact on culture and society. Recent debates on fossil fuel and nuclear power examined in historical context. (offered irregularly)

**Recommended Preparation:** HPS201H1/HPS202H1 or any HIS course  
**Distribution Requirements:** Humanities  
**Breadth Requirements:** Society and its Institutions (3)

### HPS313H1 - Two Hundred Years of Electricity

**Hours:** 24S

A history of the science and technology of electricity in the 19th and 20th centuries in its social, economic, and cultural context.

**Prerequisite:** At least one-half CSC/PHY or Electrical Engineering (ECE) course  
**Distribution Requirements:** Humanities; Science  
**Breadth Requirements:** Society and its Institutions (3)

### HPS309H1 - Worldviews: Aristotelian-Medieval Worldview

**Hours:** 24L/10T

This course reconstructs the Aristotelian-medieval mosaic of theories including physics, cosmology, theology, astronomy/astrology, optics, and physiology/medicine. We analyze the role of metaphysics in medieval science, including determinism/indeterminism, plenism/vacuism, finitism/infinitism, theism/deism, and teleology/mechanism. Finally, we explicate the Aristotelian-medieval method, by focusing on the notions of demonstrative truth, intuition, and deduction.

**Recommended Preparation:** HPS100H1  
**Distribution Requirements:** Humanities  
**Breadth Requirements:** Thought, Belief and Behaviour (2)

### JPH311H1 - From Universal Gravity to Quantum Information: The Making of Modern Physics

**Hours:** 24L

Topics in the history of physics from antiquity to the 20th century, including Aristotelian physics, Galileo, Descartes, electromagnetism, thermodynamics, statistical mechanics, relativity, quantum physics, and particle physics. The development of theories in their intellectual and cultural contexts.

**Prerequisite:** At least one-half PHY course at university level  
**Exclusion:** HPS314Y1  
**Distribution Requirements:** Humanities; Science  
**Breadth Requirements:** The Physical and Mathematical Universes (5)

### HPS316H1 - Environment, Technology, and Nature

**Hours:** 24L/10T

This course examines the intersection of technology and environment in the modern world. Whether simple or complex, whether designed for recreation, work, or warfare, our tools and how we use them filter our perceptions of, and engagements with, non-human nature. Emphasis is on case studies from 1800 to the present.

**Prerequisite:** 0.5 FCE in HPS or HIS  
**Recommended Preparation:** HPS201H1/HPS202H1  
**Distribution Requirements:** Humanities  
**Breadth Requirements:** Creative and Cultural Representations (1)

### HPS318H1 - History of Medicine I

**Hours:** 24L/10T

This course explores how medicine was practiced, taught and theorized from ancient Greece to the early modern period. It focuses on the historical development of western medicine in relation to societies, politics and culture, and considers topics such as the creation of medical traditions, the transmission and communication of medical knowledge, the pluralistic world of healers, the role of religion, magic and natural philosophy, the cultural meaning of disease, and the emergence of institutions such as the hospital.

**Prerequisite:** First-year students must have instructors approval  
**Exclusion:** HPS314Y1  
**Distribution Requirements:** Humanities  
**Breadth Requirements:** Society and its Institutions (3)
HPS319H1 - History of Medicine II

**Hours:** 24L/10T

This course examines the development of medicine from the seventeenth to the twentieth century. It focuses on the historical development of western medicine in relation to societies, politics and culture and considers topics such as changing views of the body, the development of medical institutions such as hospitals, asylums and laboratories, the diversifies world of healing and the place of visual and material culture in the production and dissemination of medical knowledge.

**Prerequisite:** First-year students must have instructors approval

**Exclusion:** HPS314Y1; HPS315H1

**Distribution Requirements:** Humanities

**Breadth Requirements:** Society and its Institutions (3)

---

HPS321H1 - Understanding Engineering Practice: From Design to Entrepreneurship

**Hours:** 24S

This course seeks to understand the nature of engineering practice, which comprises complex social, intellectual, and technical actions at various stages from design to entrepreneurship. Building upon the history and social studies of technology, philosophy of engineering, business history, and management science, we introduce ways to analyze such complex actions.

**Prerequisite:** Three half-courses (1.5 FCE) with any combination of engineering, natural sciences, medical sciences, or commerce.

**Distribution Requirements:** Humanities

**Breadth Requirements:** Society and its Institutions (3)

---

HPS322H1 - Complexity, Order, and Emergence

**Hours:** 10T/24S

A survey of the history of and recent developments in the scientific study of complex systems and emergent order. There will be particular emphasis on the biological and cognitive sciences. Topics covered may include: mechanism and teleology in the history of science, 19th and 20th century emergentism, complex systems dynamics, order and adaptiveness, self-organisation in biology and cognitive development.

**Distribution Requirements:** Humanities

**Breadth Requirements:** Thought, Belief and Behaviour (2)

---

HPS324H1 - Natural Science and Social Issues

**Hours:** 24L

Historical examination of the interactions of science (both as body of knowledge and as enterprise) with ideological, political and social issues. The impact of science; attacks on and critiques of scientific expertise as background to contemporary conflicts. Subjects may vary according to students interests. (offered irregularly)

**Distribution Requirements:** Humanities

**Breadth Requirements:** Society and its Institutions (3)

---

HPS325H1 - Modern Science and Holy Texts

**Hours:** 24L

This course explores interdisciplinary topics related to the encounter between modern science and texts accepted as holy by religious communities, such as the Bible in Christianity. What role did holy texts play in the emergence of modern science? Did modern science change the way religious communities interpret their holy texts? What to do with claims such as that the Quran contains quantum physics? Does modern science exhibit the same kind of rationality that we find in rabbinical Judaism? Do holy texts only exist to assist humanity’s attempts at understanding the meaning of the world, while modern science actually explains the world? What role do texts play in modern science compared to holy texts in religious communities? And, what has modern science to say about the very idea of holy texts?

**Distribution Requirements:** Humanities

**Breadth Requirements:** Society and its Institutions (3)

---

HPS333H1 - Famous Debates in Science

**Hours:** 24L/10T

The course focuses on famous debates in science, such as the Leibniz-Clarke debate on the nature of space, time and God, the Huxley-Wilberforce debate on evolution and the Bohr-Einstein debate on the nature of the quantum reality. The main aim is to explore the philosophical ideas involved in these debates in their historical context.

**Distribution Requirements:** Humanities

**Breadth Requirements:** Thought, Belief and Behaviour (2)
HPS345H1 - Quantifying the World: the Debates on the Ethical and Epistemic Implications of AI and Automation

Hours: 24L

The effects of automation, computing, and information technology have had a great impact on our society. The rise of automation and computing the almost cult-like trust in mechanization have transformed our society both at the material and the epistemological level. This course will examine the epistemological and ethical debates that AI and automation have produced in all sectors of society. It will consider a variety of media and instruments from data visualization and mapping, to the use of AI and robotics, contextualizing them within popular and hotly contested examples in the military field and in cybersecurity, in medical diagnostics and epidemiology, in the automotive industry, and in the personal realm.

Prerequisite: Completion of 4.0 credits
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

HPS346H1 - Modifying and Optimizing Life: on the Peculiar Alliance between AI, Biology, and Engineering

Hours: 24L/12T

Taking cue from the entanglements that historically have pervaded the relation between biology and information technology since the early 20th century, this course interrogates the sociocultural and technological conjuncture that has brought computer science, biology and engineering together into peculiar, ingenious, and often controversial alliances. What do AI, synthetic biology, and biotechnology have in common? How have they come to be associated? What are the debates and ethics emerging from such associations? The course will focus on topics such as: geoengineering and bioremediation; GMO and Robotic insects; the use of expert systems and machine learning to optimize synthetic biology; the flourishing and marketing of precision and personalized medicine/immunotherapy; and the ethics behind CRISPR babies.

Prerequisite: Completion of 4.0 credits
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

HPS351H1 - Life Sciences and Society

Hours: 24L/12T

This course examines how the contemporary life sciences intersect with global geopolitics through an introduction to the field of science and technology studies (STS). Using interdisciplinary methodologies and global perspectives, the course addresses key questions including: Who benefits from the development of new biotechnologies, and who is exploited in the process? Who sets the international norms of bioethics and medical market regulation? How are biologists and medical practitioners redefining life for different societies and their diverse constituencies? The course predominantly focuses on humans, but also introduces new scholarship on animal studies and synthetic life forms. It has significant coverage of the Middle East, Africa, and East and South Asia.

Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

JHE353H1 - History of Evolutionary Biology

Hours: 24L/10T

An examination of major ideas about biological evolution from the 18th century to the 1930s and of their impact on scientific and social thought. Topics include the diversity of life and its classification, the adaptation of organisms to their environment, Wallace’s and Darwin’s views on evolution by natural selection, sexual selection, inheritance from Mendel to T.H. Morgan, eugenics, and the implications of evolution for religion, gender roles, and the organization of society. Offered by the Institute for the History and Philosophy of Science and Technology.

Prerequisite: 6 full courses or equivalent
Exclusion: EEB353H1/HPS323H1/HPS353H1
Distribution Requirements: Humanities; Science
Breadth Requirements: Society and its Institutions (3)
JHE355H1 - History and Philosophy of Evolutionary Biology

Hours: 24L/10T

An examination of the place of the organism in evolutionary theory from the early 1900s to the present. Biology is the science of living things, and yet, paradoxically, living things—organisms—have been comprehensively left out of the Modern Synthesis theory of evolution that developed in the twentieth century. This course surveys the reasons—historical, philosophical and empirical—for the marginalisation of organisms from evolutionary theory. It examines the ways in which evolutionary developmental biology attempts to restore the organisms to a central place in evolutionary biology. Offered by faculty in the Institute for the History and Philosophy of Science and Technology.

Prerequisite: 6 full courses, including two half-courses or one full-year course in any one or more of EEB, BIO or HPS
Exclusion: EEB355H1/HPS333H1/HPS355H1
Recommended Preparation: JHE353H1
Distribution Requirements: Humanities; Science
Breadth Requirements: Society and its Institutions (3)

HPS360H1 - History of Modern Cosmology

Hours: 24L

Conceptions of the universe since 1800 with attention to observational sources of changing ideas. History of large telescopes, stellar spectroscopy and radio astronomy. Relativistic conceptions of space and time, models of stellar evolution, discovery of extra-galactic nebulae, Hubble red-shift and microwave background radiation. Philosophical and religious implications are examined.

Distribution Requirements: Humanities; Science
Breadth Requirements: Thought, Belief and Behaviour (2)

HPS370H1 - Philosophy of Medicine

Hours: 24L

This course introduces students to philosophical issues in the study of medicine. The course will cover foundational questions, such as what constitutes evidence that a therapy is effective, how do we define health and disease, and information derived from research is used to support clinical practice. Students will be introduced to different movements in contemporary clinical medicine, such as Evidence-based Medicine, Person-Centered Healthcare, and Precision Medicine.

Prerequisite: Completion of 4.0 credits
Recommended Preparation: HPS250H1
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

HPS371H1 - COVID-19: Epistemology and Societal Implications

Hours: 24L/12T

The COVID-19 pandemic has led to significant changes in our daily lives. This course will examine the pandemic and the public response through a philosophy of science lens. In particular, students will explore philosophical issues about how the healthcare community generates knowledge and how that knowledge is used to inform responses to a major public health crisis. The course will also provide a brief history of pandemics and examine Coronavirus in a historical context. Epistemological issues regarding pandemic modelling and epidemiology, clinical research and generalizability of findings, diagnostic testing, public health response (e.g. border closures, protective masks, social distancing, isolation, testing and tracking), and economic and social impact will be covered. Portrayals of the pandemic by media, government, and scientists will also be examined. Readings will be drawn from a variety of academic disciplines and popular sources.

Prerequisite: 4.0 credits
Breadth Requirements: Thought, Belief and Behaviour (2)

HPS390H1 - The Story of Number: Mathematics from the Babylonians to the Scientific Revolution

Hours: 36L

A survey of ancient, medieval, and early modern mathematics with emphasis on historical issues. (Offered in alternate years)

Prerequisite: At least one full course equivalent at the 200+level from CSC/MAT/STA
Exclusion: HPS310Y1; MAT220Y1
Distribution Requirements: Humanities; Science
Breadth Requirements: Society and its Institutions (3)

HPS391H1 - Rebels Who Count: The History of Mathematics from 1700 to the Present

Hours: 24L/10T

A survey of the development of mathematics from 1700 to the present with emphasis on historical issues. (Offered in alternate years)

Prerequisite: At least one full course equivalent at the 200+level from CSC/MAT/STA
Exclusion: HPS310Y1; MAT220Y1, MAT391H1
Distribution Requirements: Humanities; Science
Breadth Requirements: Society and its Institutions (3)
HPS395Y1 - Science, Development, and Innovation in Contemporary China

Hours: 48L/24P

Science and technology not only are vehicles to build a modern state, but also serve impetus for economic development in many countries. In China, the development of science has intertwined with the transformation from self-reliance to an integrated node of global economy, and from planned to market economy. We will use science and technology as a lens to analyze China's recent social changes from Mao era to post-Mao years. Utilizing interdisciplinary research, we will critically examine the concepts and practices of development, innovation, and science and technology. The course design also includes field trips to key sites of innovations in China, including museums for Chinese medicine, IT and biotech companies, and makers' lab in Shenzhen.

Exclusion: EAS328H1
Distribution Requirements: Humanities; Social Science
Breadth Requirements: Creative and Cultural Representations (1); Society and its Institutions (3)

HPS399Y1 - Research Opportunity Program

Credit course for supervised participation in faculty research project. Details at https://www.artsci.utoronto.ca/current/academics/research-opportunities/... Not eligible for CR/NCR option.

HPS401H1 - Scientific Artifacts

Hours: 12T/24S

This course explores the history of science through direct engagement with location scientific artifacts within the University of Toronto Scientific Instrument Collection (UTSIC.org). Each student will undertake a research project focused on a single artifact within the collection in order to explore both the local history of science and the methodology of material culture research as it relates to science.

Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

HPS402H1 - Beyond the Human, Beyond the West: Animals in Transnational Histories of Science and Technology

Hours: 24S

Nonhuman animals are central to the production of scientific facts and artifacts. They also exhibit little innate respect for anthropogenic political boundaries, making their study an effective way into transnational histories of science and technology. This advanced seminar will revisit classic themes in the history of science and technology—the rise of the laboratory; the development of natural history; experimental systems; categories of race, gender, and sex—from the perspective of nonhuman animals. Doing so will allow us to examine what technoscientific practice looks like when mice, monkeys, and Drosophila flies take center stage; and to bring nonwestern species, knowledges, practices, and places into existing narratives about the history of science and technology in the “West.”

Prerequisite: Any 300-level HPS course or permission of the instructor
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

HPS410H1 - History of Mathematics

Hours: 24S

An historical survey from pre-Greek to the present. Various themes are emphasized year to year, to show mathematics as changing and evolving. A student could expect to gain an historical overview as well as a sense of the unity of the mathematical sciences.

Prerequisite: HPS309Y1/HEPS310Y1/HEPS390H1/HEPS391H1/MAT220Y1 and permission of instructor
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

HPS411H1 - Conceptual Foundations of Mathematics

Hours: 24S

An examination of foundational and conceptual aspects of mathematics such as: the nature of mathematical objects, logicism, Church’s elementalistic mathematics, Gödel’s theorem and formal systems, postulational methods, mathematics and reality, the cardinal, ordinal and abstract approaches to numbers, infinity, and Euclidean and non-Euclidean geometries. Not eligible for CR/NCR option.

Prerequisite: PHL245H1/HEPS390H1 or HEP391H1 or HPS410H1 or permission of the instructor
Exclusion: PHL346H1
Distribution Requirements: Humanities; Science
Breadth Requirements: The Physical and Mathematical Universes (5)
HPS412H1 - History of the Biological Sciences

Hours: 24S

Advanced level survey of biological science from ancient Greece to the 20th century emphasizing primary sources analyses. Not eligible for CR/NCR option.

Prerequisite: Permission of instructor
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

HPS413H1 - Reading and Writing about Physics

Hours: 24S

Historians, philosophers, and sociologists have produced a wealth of literature on the analysis and examination of physics from the early modern period to the present. In this seminar, we read and discuss in depth a collection of recent classics and cutting-edge works on the historical studies of physics. Students also conduct research based on this literature. We aim to use physics as a lens to understanding key themes in the making of modern science, from incommensurability, epistemic cultures, and historical ontology, to materiality, social construction, pedagogy, and countercultures.

Prerequisite: At least one HPS course
Recommended Preparation: Develop the ability to read scholarly books and conduct research in history of science
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

HPS430H1 - History of Technology I

Hours: 24S

An advanced survey of the history of technology from Antiquity to the Industrial Revolution. Not eligible for CR/NCR option.

Prerequisite: Permission of instructor
Recommended Preparation: HPS201H1/HPS202H1
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

HPS411H1 - History of Technology II

Hours: 24S

An advanced survey of the history of technology from the Industrial Revolution to modern times. Not eligible for CR/NCR option.

Prerequisite: Permission of instructor
Recommended Preparation: HPS201H1/HPS202H1
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

HPS440H1 - Topics in History of Medicine

Previous Course Number: HPS303H1
Hours: 24S

This course offers a focused discussion of several aspects of the history of medicine. Various themes are examined in depth year to year so as to familiarize students with different topics and methodological approaches.

Prerequisite: HPS318H1 and/or HPS319H1, or at least 1.0 FCE of HPS courses or History courses with a focus on the history of science at the 300-level or higher, or permission of the instructor
Exclusion: HPS303H1
Recommended Preparation: This course assumes some background in the history of medicine and/or history of science, and having engaged in historical research projects.
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

HPS450H1 - Revolutions in Science

Previous Course Number: HPS350H1
Hours: 24S

A detailed investigation into a highly celebrated and important philosophical idea concerning the development of scientific knowledge: the notion of scientific revolutions. We will consider the process of theory change, whether theory choice is rational, and whether theoretical terms, such as light and space preserve their meanings across revolutions. In addition to classic work by Kuhn, we shall consider approaches that were inspired by Kuhn's work. In particular, we will consider the approaches of sociologists of scientific knowledge. The course is taught as a seminar in which the students play an active role in presenting and discussing the readings.

Prerequisite: HPS250H1 or by permission of the instructor
Exclusion: HPS350H1
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)
HPS481H1 - Special Research Opportunity in History of Medicine

Hours: 24L/6T

This course offers advanced undergraduate students the opportunity to undertake original research into the history of medicine, under the guidance of a faculty mentor.

Prerequisite: Permission of instructor
Recommended Preparation: Preparation with instructor
Distribution Requirements: Humanities

HPS482H1 - Special Research Opportunity in History of Science

Hours: 24L/6T

This course offers advanced undergraduate students the opportunity to undertake original research into the history of the natural or physical sciences, under the guidance of a faculty mentor.

Prerequisite: Permission of instructor
Recommended Preparation: Preparation with instructor
Distribution Requirements: Humanities

HPS483H1 - Special Research Opportunity in History of Technology

Hours: 24L/6T

This course offers advanced undergraduate students the opportunity to undertake original research into the history of the natural or physical sciences, under the guidance of a faculty mentor.

Prerequisite: Permission of instructor
Recommended Preparation: Preparation with instructor
Distribution Requirements: Humanities

HPS484H1 - Special Research Opportunity in Philosophy of Science I

Hours: 24L/6T

This course offers advanced undergraduate students the opportunity to undertake original research into the philosophy of the natural or physical sciences, under the guidance of a faculty mentor.

Prerequisite: Permission of instructor
Recommended Preparation: Preparation with instructor
Distribution Requirements: Humanities

HPS485H1 - Special Research Opportunity in Philosophy of Science 2

Hours: 24L/6T

This course offers advanced undergraduate students the opportunity to undertake original research into the philosophy of the natural or physical sciences, under the guidance of a faculty mentor.

Prerequisite: Permission of instructor
Recommended Preparation: Preparation with instructor
Distribution Requirements: Humanities

HPS495Y1 - Individual Studies

A reading and research project in some aspect of history of science and technology, supervised by a faculty member.

Prerequisite: Two HPS courses
Distribution Requirements: Humanities; Science
Breadth Requirements: Thought, Belief and Behaviour (2)

HPS496H1 - Individual Studies

A reading and research project in some aspect of the social, cultural or intellectual history of science and technology, supervised by a faculty member.

Prerequisite: Two HPS courses
Distribution Requirements: Humanities; Science

HPS497H1 - Individual Studies

A reading and research project in some aspect of the social, cultural or intellectual history of science and technology, supervised by a faculty member.

Prerequisite: Two HPS courses
Distribution Requirements: Humanities

HPS498H1 - Individual Studies in HPS

A reading and research project in some aspect of the development of scientific theory or practice, supervised by a faculty member.

Prerequisite: Two HPS courses
Distribution Requirements: Humanities
HPS499Y1 - Individual Studies

A reading and research project in some aspect of the development of scientific theory or practice, supervised by a faculty member.

**Prerequisite:** Two HPS courses  
**Distribution Requirements:** Humanities
Introduction

The Human Biology Program is an undergraduate collaborative program between the Faculty of Arts and Science and the Faculty of Medicine. Our programs examine the biology of our species through interdisciplinary lenses by integrating topics from the biological and medical sciences, social sciences, and the humanities. The overall structure of the collaborative program is designed to expose students to the transdisciplinary field of human biology with opportunities to specialize in selected areas of inquiry in the field.

A central objective to the Human Biology Program (HMB) is to facilitate the development of core competencies in our students: critical and creative thinking, self-directed learning, quantitative and analytical reasoning, and effective communication and research. HMB aims to prepare students for future careers where an interdisciplinary education in biological and health sciences would be an asset. HMB offers diverse experiential learning opportunities for students which includes a faculty that is at the cutting-edge of teaching innovation, strong academic relationships with other departments and faculties at the University, service learning with organizations in Toronto, and undergraduate research in laboratories on campus and affiliated hospital research institutes.

After first year life science courses, undergraduate students may enter the Human Biology program in their selected HMB program: Fundamental Genetics and its Applications, Global Health, Health and Disease, Human Biology, and Neuroscience. HMB students start by taking foundational courses to provide background on their subject area and introduce students to topics integral to the study of human biology. Students then progress to more specialized topics and have more detailed instruction but are also encouraged to participate in self-directed and group learning. In their final year, HMB students are further engaged to practice critical analysis by taking one of our specialized seminar courses in their program, which focuses on expanding the depth of knowledge the student has acquired while studying human biology at the University of Toronto.

Contact Information:
Human Biology Program Office
Wetmore Hall, Room 105
300 Huron Street

Regarding Human Biology Programs

The Human Biology Program offers five areas of study, all of which offer a major program, and four of which offer a specialist program.

Students are allowed to switch between Human Biology major programs, but should first obtain written permission from the Program Office to determine which of their completed courses will transfer to their new Human Biology major program. Students seeking advice on which HMB major to choose or advise for program completion pathways should view the HMB Program Pathway Tools webpage.

Students are not permitted to be enrolled in more than one Human Biology major program.

Human Biology Programs

Fundamental Genetics and its Applications Specialist (Science Program) - ASSPE1050

Description:

HMB: Fundamental Genetics and its Applications

The objective of the HMB: Fundamental Genetics and its Applications specialist and major programs are to provide students with a solid foundation in the biological sciences with a focus on genetics and its applications in medicine, environment and biotechnology.

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

Note there are different options depending on whether a student has completed between 4.0 and 8.5 credits, or 9.0 or more credits.

For students who have completed between 4.0 and 8.5 credits:

Variable Minimum Grade
A minimum grade is needed for entry, and this minimum changes each year depending on available spaces and the number of applicants. The following courses or their equivalents must be completed:

- BIO130H1
- (CHM135H1, CHM136H1)/CHM151Y1
To ensure that students admitted to the program will be successful, applicants with a final grade lower than 65% in BIO130H1 will not be considered for admission. Please note that obtaining this minimum final grade does not guarantee admission to the program.

### For students who have completed 9.0 or more credits:

#### Variable Minimum Grade

Minimum grades are needed for entry, and these minimums change each year depending on available spaces and the number of applicants. The following courses or their equivalents must be completed:

- BIO220H1
- BIO230H1 / BIO255H1
- HMB265H1 / BIO260H1
- BCH210H1

To ensure that students admitted to the program will be successful, applicants with a final grade lower than 65% in either BIO220H1 or (BIO230H1/BIO255H1) will not be considered for admission. Please note that obtaining the minimum final grades does not guarantee admission to the program.

Students applying for admissions to the program utilizing transfer credits will be considered on a case-by-case basis. Students entering from CEGEP or from another university should contact hmb.undergrad@utoronto.ca after their transfer credit assessment has been complete for program enrolment assessment. Please consult the Arts & Science Program Toolkit for more information on program enrolment.

### Completion Requirements:

#### Required Courses (12.0 credits, including at least 1.0 credit at the 400 level)

**Chemical and Physical Foundations of Biological Systems**

1. (CHM135H1, CHM136H1) / CHM151Y1  
   Transfer credits will be accepted in lieu of the chemistry requirements only if they carry a direct exclusion or equivalency to a pre-approved chemistry course

2. MAT135H1 / PHY131H1 / PHY151H1 / CSC120H1 / CSC148H1

3. BCH210H1

**Biological Foundations of Living Systems**

4. BIO120H1 / BIO130H1
5. BIO220H1
6. BIO230H1 / BIO255H1

#### Courses in Fundamental Genetics

7. HMB265H1 / BIO260H1
8. HMB321H1

To ensure that students admitted to the program will be successful, applicants with a final grade lower than 65% in either BIO220H1 or (BIO230H1/BIO255H1) will not be considered for admission. Please note that obtaining the minimum final grades does not guarantee admission to the program.

### Courses in Applied Genetics

10. HMB201H1
11. HMB301H1 / HMB360H1 / BCH311H1 / CSB349H1 / PSL350H1

12. 1.5 credits from: HMB301H1 / HMB401H1 / HMB431H1 / HMB436H1 / HMB441H1 / BCH311H1 / BCH340H1 / BCH441H1 / BCH447H1 / CSB352H1 / CSB458H1 / CSB459H1 / CSB472H1 / CSB473H1 / CSB474H1 / EEB325H1 / EEB459H1 / EEB460H1 / NFS487H1 / PHL384H1 / PSL350H1 / PSL404H1 / PSY390H1

### Data Analysis and Research-Based Courses

13. 0.5 credit in statistics: EEB225H1 / STA220H1 / STA288H1 / PSY201H1
14. 0.5 credit from bioethics: HMB306H1 / HMB406H1 / PHL289H1
15. 0.5 credit from upper-year lab course: HMB311H1 / HMB314H1 / MGY314H1 / MGY315H1
16. 0.5 credit from: HMB342H1 / HMB360H1 / HST373H1 / MGY377H1 / MGY378H1
17. 1.0 credit from project course: HMB490Y1 / HMB496Y1*

*A research project from a different unit may be accepted with prior written approval from Human Biology if the course is not counting toward a different program.

### Fundamental Genetics and its Applications Specialists Notes:

1. Courses can only count toward one requirement, even if listed as options to multiple requisites of the program.
2. Not all courses listed have priority enrolment for Fundamental Genetics and its Applications specialists. Students are responsible for checking priority of courses and meeting course prerequisites for courses they wish to take.

### Global Health Specialist (Science Program) - ASSPE2575

#### Description:

**HMB: Global Health**

The objective of the HMB: Global Health program is to provide students with instruction in fundamental biological sciences and to integrate a broad understanding of the socio-economic and cultural determinants of health to populations around the world.

#### Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

Note there are different options depending on whether a student has completed between 4.0 and 8.5 credits, or 9.0 or more credits.

### For students who have completed between 4.0 and 8.5 credits:

#### Variable Minimum Grade

A minimum grade is needed for entry, and this minimum changes each year depending on available spaces and the number of applicants. The following courses or their equivalents must be completed:

- BIO130H1
• (CHM135H1, CHM136H1)/CHM151Y1

To ensure that students admitted to the program will be successful, applicants with a final grade lower than 65% in BIO130H1 will not be considered for admission. Please note that obtaining this minimum final grade does not guarantee admission to the program.

For students who have completed 9.0 or more credits:

**Variable Minimum Grade**

A minimum grade is needed for entry, and this minimum changes each year depending on available spaces and the number of applicants. The following courses or their equivalents must be completed:

- BIO230H1/BIO255H1
- BIO220H1
- HMB265H1/BIO260H1
- BCH210H1

To ensure that students admitted to the program will be successful, applicants with a final grade lower than 65% in BIO230H1/BIO255H1 will not be considered for admission. Please note that obtaining this minimum final grade does not guarantee admission to the program.

Students applying for admissions to the program utilizing transfer credits will be considered on a case-by-case basis. Students entering from CEGEP or from another university should contact hmb.undergrad@utoronto.ca after their transfer credit assessment has been complete for program enrolment assessment. Please consult the Arts & Science Program Toolkit for more information on program enrolment.

**Completion Requirements:**

**Required Courses (13.5 credits, including at least 1.0 credit at the 400-level)**

**Chemical and Physical Foundations of Biological Systems**

1. (CHM135H1, CHM136H1)/CHM151Y1
   - Transfer credits will be accepted in lieu of the chemistry requirements only if they carry a direct exclusion or equivalency to a pre-approved chemistry course.
   
2. MAT135H1/PHY131H1/PHY151H1
3. BCH210H1

**Biological Foundations of Living Systems**

4. BIO120H1, BIO130H1
5. BIO220H1
6. BIO230H1/BIO255H1
7. HMB265H1/BIO260H1
8. PSL300H1/PSL301H1
9. 1.0 credit from HMB302H1/ANA300Y1/ANA301H1/BCH311H1/CSB349H1/CSB351Y1/IMM340H1/IMM350H1/MGY377H1/MGY378H1/PSL350H1

**Global Health Concentration Courses**

10. HMB203H1
11. HMB325H1

12. 0.5 credit from: PHS100H1/GGR112H1/PSY100H1/INS201Y1/ANT100Y1/SOC101Y1/ECO100Y1/ECO101H1/ECO102H1/SOC102H1

**SOC100H1** Transfer credits from AP and IB psychology are not accepted.

13. 0.5 credit from Epidemiology Courses: HMB342H1/HST373H1
14. 2.0 credits from courses on the biological dimensions of Global Health: HAJ453H1/HMB323H1/HMB433H1/HMB436H1/HMB437H1/HMB440H1/HMB443H1/HMB446H1/HMB473H1/HMB474H1/HMB496Y1*/JEH455H1/CSB351Y1/EED325H1/EHJ352H1/MGY350H1/MGY373H1/MGY378H1/MJU485H1

15. 1.0 credit from courses on the social and ecological dimensions of Global Health: HMB303H1/HMB306H1/ANT345H1/ANT348H1/ANT358H1/ANT458H1/ANT460H1/ECO314H1/ECO324H1/ECO334H1/ECO342H1/ECO369H1/ECO402H1/EED428H1/ENV341H1/ENV430H1/ENV432H1/GGR433H1/GGR434H1/HST410H1/HST440H1/HST464H1/INS240Y1/INS250H1/INS350H1/INS355H1/JHN350H1/NEW352H1/NEW535H1/NEW453H1/NFS490H1/PHS300H1/PSY320H1/PSY321H1

**Data Analysis and Research-Based Courses**

16. 0.5 credit in statistics: EEB225H1/STA220H1/STA288H1/PSY201H1
17. 0.5 credit in bioethics: HMB306H1/HMB406H1/PHL281H1
18. 1.0 credit from: HMB490Y1/HMB498Y1

* A research project from a different unit may be accepted with prior written approval from Human Biology if the course is not counting toward a different program.

**Global Health Specialists Notes:**

1. Courses can only count toward one requirement, even if listed as options to multiple requisites of the program.
2. Not all courses listed have priority enrolment for Global Health specialists. Students are responsible for checking priority of courses and meeting course prerequisites for courses they wish to take.

**Health & Disease Specialist (Science Program) - ASSPE2013**

**Description:**

**HMB: Health & Disease**

The objective of the HMB: Health & Disease program is to provide students with a solid foundation in the biological sciences as it relates to basic human physiology and the mechanisms of disease and to facilitate the integration of concepts from across the life sciences, social sciences and humanities. In addition, students will acquire skills in laboratory science, experience with quantitative approaches, and develop effective communication skills to provide an appropriate background essential to research and problem solving in this field.

**Enrolment Requirements:**

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

Note there are different options depending on whether a student has completed between 4.0 and 8.5 credits, or 9.0 or more credits.
For students who have completed between 4.0 and 8.5 credits:

**Variable Minimum Grade**
A minimum grade is needed for entry, and this minimum changes each year depending on available spaces and the number of applicants. The following courses or their equivalents must be completed:

- BIO130H1
- (CHM135H1, CHM136H1)/CHM151Y1

To ensure that students admitted to the program will be successful, applicants with a final grade lower than 65% in BIO130H1 will not be considered for admission. Please note that obtaining this minimum final grade does not guarantee admission to the program.

For students who have completed 9.0 or more credits:

**Variable Minimum Grade**
A minimum grade is needed for entry, and this minimum changes each year depending on available spaces and the number of applicants. The following courses or their equivalents must be completed:

- BIO230H1/ BIO255H1
- BIO220H1
- HMB265H1/ BIO260H1
- BCH210H1

To ensure that students admitted to the program will be successful, applicants with a final grade lower than 65% in BIO230H1/ BIO255H1 will not be considered for admission. Please note that obtaining this minimum final grade does not guarantee admission to the program.

Students applying for admissions to the program utilizing transfer credits will be considered on a case-by-case basis. Students entering from CEGEP or from another university should contact hmb.undergrad@utoronto.ca after their transfer credit assessment has been complete for program enrolment assessment. Please consult the Arts & Science Program Toolkit for more information on program enrolment.

**Completion Requirements:**

**Required Courses (13.0 credits, including at least 1.0 credit at the 400-level)**

**Chemical and Physical Foundations of Biological Systems**

1. (CHM135H1, CHM136H1)/CHM151Y1
   
   Transfer credits will be accepted in lieu of the chemistry requirements only if they carry a direct exclusion or equivalency to a pre-approved chemistry course
2. MAT135H1/PHY131H1/PHY151H1
3. BCH210H1

**Biological Foundations of Living Systems**

4. BIO120H1, BIO130H1
5. BIO220H1
6. BIO230H1/ BIO255H1
7. HMB265H1/ BIO260H1
8. PSL300H1, PSL301H1
9. 1.0 credit from depth courses on the molecular biology of cells and tissues: CSB327H1/ CSB328H1/ CSB331H1, BCH311H1/CSB349H1/PSL350H1

**Health & Disease Concentration Courses**

10. HMB202H1
11. HMB302H1
12. HMB322H1
13. 2.0 credits from: HAJ453H1/ HMB401H1/ HMB402H1/ HMB422H1/ HMB432H1/ HMB434H1/ HMB436H1/ HMB437H1/ HMB440H1/ HMB441H1/ HMB443H1/ HMB452H1/ HMB462H1/ HMB470H1/ HMB471H1/ HMB472H1/ HMB473H1/ HMB474H1/ JEH455H1/ ANA300Y1/ ANA301H1/ CSB345H1/ CSB351Y1/ EEB323H1/ IMM340H1/ IMM350H1/ LMP301H1/ LMP365H1/ LMF403H1/ LMF406H1/ MGY377H1/ MGY378H1/ NFS485H1/ NFS486H1/ PCL302H1/ PCL362H1/ PCL469H1/ PCL470H1/ PCL482H1/ PCL483H1/ PCL486H1/ PSL404H1/ PSL421H1/ PSL425H1

**Data Analysis and Research-Based Courses**

14. 0.5 credit in statistics: EEB225H1/ STA220H1/ STA288H1/ PSY201H1
15. 0.5 credit in bioethics: HMB306H1/ HMB406H1/ PHL281H1
16. 0.5 credit from upper-year lab course: HMB312H1/ HMB314H1/ CSB330H1/ PSL372H1/ BCH370H1
17. 0.5 credit from research based courses: HMB323H1/ HMB342H1/ HST373H1
18. 1.0 credit from HMB490Y1/ HMB496Y1*

* A research project from a different unit may be accepted with prior written approval from Human Biology if the course is not counting toward a different program.

**Health & Disease Specialists Notes:**
1. Courses can only count toward one requirement, even if listed as options to multiple requisites of the program
2. Not all courses listed have priority enrolment for Health & Disease specialists. Students are responsible for checking priority of courses and meeting course prerequisites for courses they wish to take.

**Neuroscience Specialist (Science Program) - ASSPE1472**

**Description:**

**HMB: Neuroscience**

Neuroscience is an interdisciplinary field aimed at understanding the brain and nervous system utilizing integration of research at the molecular, cellular, and organismal levels, and through all stages of human development. The application of neuroscience has important implications for understanding human behaviour and for promoting the development of effective strategies for diagnosing and treating nervous system disorders. The objective of the HMB: Neuroscience specialist and major programs is to provide students with a solid foundation and facilitates the integration of concepts from multiple fields to their understanding of neuroscience.

**Enrolment Requirements:**

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

Note there are different options depending on whether a student has completed between 4.0 and 8.5 credits, or 9.0 or more credits.
For students who have completed between 4.0 and 8.5 credits:

**Variable Minimum Grade**
Minimum grades in required courses or their equivalents are needed for entry, and these minimums change each year depending on available spaces and the number of applicants. The following courses must be completed:

- BIO130H1
- (CHM135H1, CHM136H1)/CHM151Y1

To ensure that students admitted to the program will be successful, applicants with a final grade lower than 70% in BIO130H1, a final grade average lower than 70% in (CHM135H1, CHM136H1), or a final grade lower than 70% in CHM151Y1 will not be considered for admission. Please note that obtaining the minimum grades does not guarantee admission to the program.

For students who have completed 9.0 or more credits:

**Variable Minimum Grade**
A minimum grade is needed for entry, and this minimum changes each year depending on available spaces and the number of applicants. The following courses or their equivalents must be completed:

- BIO230H1/BIO255H1
- HMB265H1/BIO260H1
- BCH210H1
- PSL300H1

To ensure that students admitted to the program will be successful, applicants with a final grade lower than 70% in BIO230H1/BIO255H1 will not be considered for admission. Please note that obtaining this minimum final grade does not guarantee admission to the program.

Students applying for admissions to the program utilizing transfer credits will be considered on a case-by-case basis. Students entering from CEGEP or from another university should contact hmb.undergrad@utoronto.ca after their transfer credit assessment has been complete for program enrolment assessment. Please consult the Arts & Science Program Toolkit for more information on program enrolment.

**Completion Requirements:**

**Required Courses (12.0 credits, including at least 1.0 credit at the 400-level)**

**Chemical and Physical Foundations of Biological Systems**

1. (CHM135H1, CHM136H1)/CHM151Y1
   *Transfer credits will be accepted in lieu of the chemistry requirements only if they carry a direct exclusion or equivalency to a pre-approved chemistry course.*
2. MAT135H1/PHY131H1/PHY151H1/CSC120H1/CSC148H1
3. BCH210H1

**Biological Foundations of Living Systems**

4. BIO120H1/BIO130H1
5. BIO230H1/BIO255H1
6. HMB265H1/BIO260H1
7. PSL300H1

**Neuroscience Concentration Courses**

8. PSY100H1 *Transfer credits from AP and IB Psychology are not accepted*
9. HMB200H1
10. HMB300H1
11. CJH332H1
12. HMB320H1
13. JHA410H1/ANA300Y1
14. 2.0 credits from HMB360H1/HMB420H1/HMB430H1/HMB440H1/HMB450H1/HMB471H1/HMB473H1/HMB490Y1/CSC345H1/CSC346H1/CSC430H1/CSC445H1/CSC321H1/LMP410H1/NEW335H1/NFS489H1/PCL475H1/PCL476H1/PSL374H1/PSL432H1/PSL440Y1/PSL445H1/PSL446H1/PSL450H1/PSL452H1/PSL472H1/PSY342H1/PSY371H1/PSY372H1/PSY390H1/PSY395H1/PSY460H1/PSY470H1/PSY471H1/PSY473H1/PSY475Y1/PSY480H1/PSY490H1/PSY492H1/PSY493H1/PSY494H1/PSY496H1

**Data Analysis and Research-Based Courses**

15. 0.5 credit in statistics: EEB225H1/STA220H1/STA288H1/PSY201H1
16. 0.5 credit from bioethics: HMB306H1/HMB406H1/PHL281H1
17. 0.5 credit from upper-year lab course: HMB310H1/HMB314H1/PSY369H1
18. 1.0 credit from project course: HMB496Y1*

* A research project from a different unit may be accepted with prior written approval from Human Biology if the course is not counting toward a different program.

**Neuroscience Specialists Notes:**

1. Courses can only count toward one requirement, even if listed as options to multiple requisites of the program.
2. Not all courses listed have priority enrolment for Neuroscience specialists. Students are responsible for checking priority of courses and meeting course prerequisites for courses they wish to take.

**Fundamental Genetics and its Applications Major (Science Program) - ASMAJ1050**

**Description:**

HMB: Fundamental Genetics and its Applications

The objective of the HMB: Fundamental Genetics and its Applications specialist and major programs are to provide students with a solid foundation in the biological sciences with a focus on genetics and its applications in medicine, environment and biotechnology.

**Enrolment Requirements:**

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.
Completion Requirements:

Required Courses (8.0 credits, including a 0.5 credit at the 400-level)

To help students proceed through the program, it is recommended that first year life science requirements are completed before entering the program.

Chemical and Physical Foundations of Biological Systems

1. (CHM135H1 and CHM136H1)/CHM151Y1 Transfer credits will be accepted in lieu of the chemistry requirements only if they carry a direct exclusion or equivalency to a pre-approved chemistry course.
2. MAT135H1/PHY131H1/PHY151H1/CSC120H1/CSC148H1
3. BCH210H1

Biological Foundations of Living Systems

4. BIO120H1, BIO130H1
5. BIO220H1
6. BIO230H1, BIO255H1

Courses in Fundamental Genetics

7. HMB265H1/BIO260H1
8. HMB321H1
9. 0.5 credit from: HMB360H1/HMB421H1/HMB435H1/HMB437H1/HMB443H1/HMB474H1/BCH311H1/BCH425H1/BCH426H1/BCH440H1/BCH445H1/BCH448H1/CSC326H1/CSC331H1/CSC349H1/CSC351Y1/CSC353H1/CSC428H1/CSC429H1/EEB318H1/EEB323H1/EEB365H1/EJH352H1/MGY314H1/MGY315H1/MGY340H1/MGY428H1/MGY470H1/PSL350H1

Courses in Applied Genetics

10. HMB201H1
11. HMB301H1/HMB360H1/BCH311H1/CSC349H1/PSL350H1
12. 0.5 credit from: HMB301H1/HMB401H1/HMB431H1/HMB436H1/HMB441H1/HMB489H1/BCH311H1/BCH340H1/BCH350H1/BCH441H1/BCH447H1/CSC352H1/CSC458H1/CSC459H1/CSC472H1/CSC473H1/CSC474H1/EEB325H1/EEB459H1/EEB460H1/NFS487H1/PHL384H1/PSL350H1/PSL404H1/PSY390H1

Data Analysis and Research-Based Courses

13. 0.5 credit in statistics: EEB225H1/STA220H1/STA288H1/PSY201H1
14. 0.5 FCE from: HMB311H1/HMB314H1/MGY315H1/HMB342H1/HMB360H1/HMB490Y1/HMB496Y1/HST373H1/MGY314H1/MGY377H1

* A research project from a different unit may be accepted with prior written approval from Human Biology if the course is not counting toward a different program.

Fundamental Genetics and its Applications Major Notes:

1. Courses can only count toward one requirement, even if listed as options to multiple requisites of the program.
2. Not all courses listed have priority enrolment for Fundamental Genetics and its Applications majors. Students are responsible for checking priority of courses and meeting course prerequisites for courses they wish to take.
3. The Fundamental Genetics and its Applications major cannot be paired with any other Human Biology Program managed major program.

Global Health Major (Science Program) - ASMAJ2575

Description:

HMB: Global Health

The objective of the HMB: Global Health program is to provide students with instruction in fundamental biological sciences and to integrate a broad understanding of the socio-economic and cultural determinants of health to populations around the world.

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

Required Courses (8.0 credits, including a 0.5 credit at the 400-level)

To help students proceed through the program, it is recommended that first year life science requirements are completed before entering the program.

Chemical and Physical Foundations of Biological Systems

1. (CHM135H1 and CHM136H1)/CHM151Y1 Transfer credits will be accepted in lieu of the chemistry requirements only if they carry a direct exclusion or equivalency to a pre-approved chemistry course.
2. MAT135H1/PHY131H1/PHY151H1

Biological Foundations of Living Systems

3. BIO120H1, BIO130H1
4. BIO220H1, BIO255H1
5. HMB265H1/BIO260H1
6. PSL300H1, PSL301H1
7. 1.0 credit from: HMB302H1/ANA300Y1/ANA301H1/BCH311H1/CSC349H1/CSC351Y1/IMM340H1/IMM350H1/MGY377H1/MGY378H1/PSL350H1

Global Health Concentration Courses

8. 0.5 credit from: PHS100H1/PSY100H1/INS201Y1/ANT100Y1/SOC101Y/SOC100H1/ECO100Y/ECO101H1 Transfer credits from AP and IB psychology are not accepted.
9. HMB203H1

10. 0.5 credit from courses on the biological dimensions of Global Health: HAJ453H1/HMB323H1/HMB342H1/HMB433H1/HMB436H1/HMB437H1/HMB440H1/HMB443H1/HMB462H1/
To help students proceed through the program, it is recommended that first year life science requirements are completed before entering the program.

Chemical and Physical Foundations of Biological Systems

Description:

HMB: Human Biology

The objective of the HMB: Human Biology program is to provide students with a solid foundation in the biological sciences as it relates to basic human physiology and the mechanisms of disease and to facilitate the integration of concepts from across the life sciences, social sciences and humanities. In addition, students will acquire skills in laboratory science, experience with quantitative approaches, and develop effective communication skills to provide an appropriate background essential to research and problem solving in this field.

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

Required Courses (8.0 credits, including a 0.5 credit at the 400-level)

To help students proceed through the program, it is recommended that first year life science requirements are completed before entering the program.

Data Analysis Courses

1. (CHM135H1 and CHM136H1) or CHM151Y1
   Transfer credits will be accepted in lieu of the chemistry requirements only if they carry a direct exclusion or equivalency to a pre-approved chemistry course
2. MAT135H1/PHY131H1/PHY151H1
3. BCH210H1

Biological Foundations of Living Systems

4. BIO120H1, BIO130H1
5. BIO220H1, BIO230H1, BIO255H1
6. HMB265H1/BIO260H1
7. PSL300H1, PSL301H1

Health & Disease Concentration Courses

8. HMB202H1
9. HMB302H1/HMB322H1

10. 0.5 credit from: HAJ453H1/HMB401H1/HMB402H1/HMB422H1/HMB432H1/HMB434H1/HMB436H1/HMB437H1/HMB440H1/HMB441H1/HMB443H1/HMB452H1/HMB462H1/HMB470H1/HMB471H1/HMB472H1/HMB473H1/HMB474H1/FHJ352H1/JEH455H1/ANA300Y1/ANA301H1/BCH311H1/CSB345H1/EEB325H1/LMP301H1/LMP363H1/LMP403H1/LMP406H1/NFS485H1/NFS486H1/PCL302H1/PCL362H1/PCL469H1/PCL470H1/PCL482H1/PCL483H1/PCL486H1/PSL350H1/PSL404H1/PSL421H1/PSL425H1

Data Analysis and Courses in Advanced Research, Laboratory, or Cellular Molecular Topics

11. 0.5 credit in statistics: EEB225H1/STA220H1/STA288H1/PSY201H1
12. 0.5 credit from: HMB312H1/HMB314H1/HMB323H1/HMB342H1/HST373H1/HMB490Y1/HMB496Y1*/BCH311H1/CSB349H1

Health & Disease Major (Science Program) - ASMAJ2013

Description:

HMB: Health & Disease

Global Health Major Notes:

1. Courses can only count toward one requirement, even if listed as options to multiple requisites of the program
2. Not all courses listed have priority enrolment for Global Health majors. Students are responsible for checking priority of courses and meeting course prerequisites for courses they wish to take.
3. The Global Health major cannot be paired with any other Human Biology Program managed major program.

Global Health Major Notes:

A research project from a different unit may be accepted with prior written approval from Human Biology if the course is not counting toward a different program.

Health & Disease Major Notes:

1. Courses can only count toward one requirement, even if listed as options to multiple requisites of the program
2. Not all courses listed have priority enrolment for Health & Disease majors. Students are responsible for checking priority of courses and meeting course prerequisites for courses they wish to take.
3. The Health & Disease major cannot be paired with any other Human Biology Program managed major program.

Human Biology Major (Science Program) - ASMAJ2035

Description:

HMB: Human Biology

Human Biology is a transdisciplinary field concerned with the study of human health from a biological, sociological, and evolutionary perspective. Research in human biology focuses on impact that genetic variations, development, physical fitness, and nutrition have on the general health of populations and how this compares across cultures and through history. The objective of the HMB: Human Biology Program is to provide students with a solid foundation in the biological sciences as it relates to basic human physiology and the mechanisms of disease and to facilitate the integration of concepts from across the life sciences, social sciences and humanities. In addition, students will acquire skills in laboratory science, experience with quantitative approaches, and develop effective communication skills to provide an appropriate background essential to research and problem solving in this field.

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

Required Courses (8.0 credits, including a 0.5 credit at the 400-level)

To help students proceed through the program, it is recommended that first year life science requirements are completed before entering the program.
Human Biology major program is to provide students with a solid foundation in the life sciences as it relates to human biology and to facilitate the integration of concepts from across the social sciences and humanities, and to equip them with quantitative skills essential to research and success in this field.

Enrolment Requirements:

Neuroscience Major (Science Program) - ASMAJ1472

Description:

HMB: Neuroscience

Neuroscience is an interdisciplinary field aimed at understanding the brain and nervous system utilizing integration of research at the molecular, cellular, and organismal levels, and through all stages of human development. The application of neuroscience has important implications for understanding human behaviour and for promoting the development of effective strategies for diagnosing and treating nervous system disorders. The objective of the HMB: Neuroscience specialist and major programs is to provide students with a solid foundation and facilitates the integration of concepts from multiple fields to their understanding of neuroscience.

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

For students who have completed between 4.0 and 8.5 credits:

Variable Minimum Grade

Minimum grades in required courses or their equivalents are needed for entry, and these minimums change each year depending on available spaces and the number of applicants. The following courses must be completed:

- BIO130H1
- (CHM135H1, CHM136H1)/CHM151Y1

To ensure that students admitted to the program will be successful, applicants with a final grade lower than 55% in BIO130H1, a final grade average lower than 70% in (CHM135H1, CHM136H1), or a final grade lower than 70% in CHM151Y1 will not be considered for admission. Please note that obtaining the minimum final grades does not guarantee admission to the program.

For students who have completed 9.0 or more credits:

Variable Minimum Grade

A minimum grade is needed for entry, and this minimum changes each year depending on available spaces and the number of applicants. The following courses or their equivalents must be completed:

- BIO230H1/BIO255H1
- HMB265H1/BIO260H1
- BCH210H1
- PSL300H1
To ensure that students admitted to the program will be successful, applicants with a final grade lower than 55% in BIO230H1/ BIO255H1 will not be considered for admission. Please note that obtaining this minimum final grade does not guarantee admission to the program.

Students applying for admissions to the program utilizing transfer credits will be considered on a case-by-case basis. Students entering from CEGEP or from another university should contact hmb.undergrad@utoronto.ca after their transfer credit assessment has been complete for program enrolment assessment. Please consult the Arts & Science Program Toolkit for more information on program enrolment.

Completion Requirements:

Required Courses (8.0 credits, including at least 0.5 credit at the 400-level)

Chemical and Physical Foundations of Biological Systems

1. (CHM135H1, CHM136H1)/ CHM151Y1
   Transfer credits will be accepted in lieu of the chemistry requirements only if they carry a direct exclusion or equivalency to a pre-approved chemistry course.

   CSC148H1
3. BCH210H1

Biological Foundations of Living Systems

4. BIO120H1, BIO130H1
5. BIO230H1/ BIO255H1
6. HMB265H1/ BIO260H1
7. PSL300H1

Neuroscience Concentration Courses

8. HMB200H1
9. HMB300H1
10. CJH332H1
11. 0.5 credit from HMB320H1/ JHA410H1/ ANA300Y1
12. 0.5 credit from HMB360H1/ HMB420H1/ HMB430H1/ HMB440H1/ HMB450H1/ HMB471H1/ HMB473H1/ HMB490Y1/ HMB496Y1/ JHA410H1/ CBM135H1/ CBM345H1/ CBM365H1/ CBM385H1/ CBM432H1/ CBM445H1/ CBM452H1/ LMP410H/ NEW335H1/ NFS489H1/ PCL475H1/ PCL476H1/ PSL374H1/ PSL432H1/ PSL440Y1/ PSL445H1/ PSL446H1/ PSL450H1/ PSL452H1/ PSL472H1/ PSY342H1/ PSY371H1/ PSY372H1/ PSY390H1/ PSY395H1/ PSY460H1/ PSY470H1/ PSY471H1/ PSY473H1/ PSY475H1/ PSY480H1/ PSY490H1/ PSY492H1/ PSY493H1/ PSY497H1/ PSY498H1/ PSY499H1/ PSY496H1

Data Analysis and Research-Based Courses

13. 0.5 credit in statistics: EEB225H1/ STA220H1/ STA288H1/ PSY201H1
14. 0.5 credit from a higher-year lab course: HMB310H1/ HMB314H1/ PSY369H1

* A research project from a different unit may be accepted with prior written approval from Human Biology if the course is not counting toward a different program.

Neuroscience Major Notes:

1. Courses can only count toward one requirement, even if listed as options to multiple requisites of the program.
2. Not all courses listed have priority enrolment for Neuroscience majors. Students are responsible for checking priority of courses and meeting course prerequisites for courses they wish to take.
3. The Neuroscience major cannot be paired with any other Human Biology Program managed major program.

Course Groups

Fundamental Genetics and its Applications

Centric Courses

- HMB201H1 Introduction to Fundamental Genetics and its Applications
- HMB301H1 Biotechnology
- HMB311H1 Laboratory in Fundamental Genetics and its Applications
- HMB321H1 Topics in Genetics
- EHJ352H1 Evolution of the Human Genome
- HMB360H1 Neurogenomics
- HMB401H1 Biomedical Advances & Technologies
- HMB431H1 Innovation in Applied Genetics
- HMB441H1 Genetics of Human Disease

Global Health Centric Courses

- HMB203H1 Introduction to Global Health
- HMB303H1 Global Health and Human Rights
- HMB323H1 Global Health Research
- HMB342H1 Epidemiology of Health & Disease
- JNH350H1 AIDS: Challenges and Successes
- HMB433H1 Topics in Global Health
- HMB433H1 Complementary & Integrative Medicine
- HMB443H1 Global Hidden Hunger
- HAJ453H1 AIDS: A Global Perspective
- JEH455H1 Current Issues in Environment and Health
- HMB462H1 Topics in Epidemiology

Health & Disease Centric Courses

- HMB202H1 Introduction to Health and Disease
- HMB302H1 Vertebrate Histology and Histopathology
- HMB312H1 Laboratory in Health and Disease
- HMB322H1 Topics in Health & Disease
- HMB342H1 Epidemiology of Health & Disease
- EHJ352H1 Evolution of the Human Genome
- HMB402H1 Topics in Translational Medicine
- HMB422H1 Seminar in Health & Disease
- HMB432H1 Topics in Histology & Histopathology
- HMB433H1 Complementary & Integrative Medicine
- HMB435H1 Selected Topics in Molecular Cell Biology
- HMB436H1 Medical and Veterinary Mycology
- HMB437H1 The Biology of the Human Metallome
- HMB452H1 Personalized Medicine
- JEH455H1 Current Issues in Environment and Health
- HMB462H1 Topics in Epidemiology
- HMB474H1 Dental Sciences
Neuroscience Centric Courses

- HMB200H1 Introduction to Neuroscience
- HMB300H1 Neurobiology of Behaviour
- HMB310H1 Laboratory in Neuroscience
- HMB320H1 Neuroanatomy
- CJH332H1 Cellular and Molecular Neurobiology of the Synapse
- HMB360H1 Neurogenomics
- JHA410H1 Clinical Neuroimaging
- HMB420H1 Seminar in Neurobiology of Behaviour
- HMB430H1 Trends in Neuroscience
- HMB450H1 Neurodevelopmental Disorders and Diseases
- HMB473H1 Exercise and Mental Health

Important Notes About Human Biology Courses

Human Biology Course Prerequisites & Corequisites

Students are advised that the Human Biology Program enforces prerequisites and corequisites on all courses offered by the program. Students are expected to know the prerequisites of courses they wish to take and ensure they have the necessary prerequisites prior to enrollment.

Should a student wish to seek a prerequisite waiver, the request must be made prior to enrolling in the course. Please email the program office at hmb.undergrad@utoronto.ca with such requests. If a student is enrolled in an Applied Statistics Specialist, or is planning on using transfer credits, or credits obtained from UTSC/UTM, in lieu of stated prerequisites/corequisites, please contact the program office prior to enrolling in courses to ensure your alternate credits will be accepted.

Please note that if a pre-requisites is an FCE count, we generally will allow a 0.5 FCE difference (i.e. have 13.5 FCE complete when 14 FCE is required). Should a student have all other prerequisites and if enrolment pressure is not too high, the FCE pre-requisite will be waived. An email request for a waiver of this type of prerequisite is not necessary.

Please note that 300-level courses with the following joint course codes are automatically accepted when the pre-requisite states "A HMB300-level course:" CJH, EHJ, JNH.

Regarding Human Biology 400-level Courses

Due to popularity of HMB400-level courses, the Human Biology Program Office reserves the right to remove any student who has either completed the required number of courses for their HMB program or has completed the program requisite that the HMB400-level course would count towards utilizing a HMB400-level course taken in a prior school year. The Human Biology Program Office also reserves the right to instruct students enrolled in too many HMB400-level courses to drop to a specified number to allow as many of our HMB students to take a HMB400-level course. This course enrolment limit varies from year to year, generally capping at two if a major student and three if a specialist student. Students in this situation are given five business days' notice via email of their situation to choose which courses they wish to keep. Students are encouraged to routinely check their UTOR email during July and August Course Enrolment.

Students who are removed from HMB400-level courses for the reasons listed above will be permitted to attempt re-enrollment on September 1. This means, that if you were removed from a HMB400 level course not due to failing prerequisite checks, you will be permitted on September 1 to enrol via ACORN either into the course if there is space, or on the waitlist if the course is full.

There are no pre-requisite exceptions on any HMB400-level course.

Students planning on using transfer credits in lieu of the pre-requisites must email hmb.undergrad@utoronto.ca before enrolling in the course to request that transfer credits be accepted in lieu of the stated pre-requisites. Please note that 300-level courses with the following joint course codes are automatically accepted when the pre-requisite states "A HMB300-level course:" CJH, EHJ, JNH.

Regarding Human Biology "Tiered Waitlists"

The Human Biology Program employs "tiered waitlists" on all courses that have the enrolment indicator of R1 or P that has unequal spots. (HMB does not use the R2 enrolment control). For an explanation of how Tiered Waitlists work please visit the HMB Webpage "HMB Tiered Waitlist Explained."

Human Biology Courses

HMB200H1 - Introduction to Neuroscience

Hours: 24L/12T

An introductory course that explores the development, physiology and continually changing function of the nervous system as it relates to certain types of human behaviour. Critical analysis of scientific evidence is used to enrich learning.

Prerequisite: BIO120H1, BIO130H1
Recommended Preparation: PSL300H1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)
HMB201H1 - Introduction to Fundamental Genetics and its Applications

Hours: 24L/12T

The course provides a comprehensive introduction to a variety of therapeutic approaches including gene therapy, CRISPR-based gene editing, epigenetic manipulations & regenerative medicine. This course consists of three parts: tools and techniques of gene & genome manipulations; medical, environmental and agricultural biotechnology applications; and ethical, legal and social aspects of modern biotechnology as it pertains to human health and wellbeing.

Prerequisite: BIO120H1, BIO130H1
Recommended Preparation: HMB265H1/ BIO260H1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

HMB202H1 - Introduction to Health and Disease

Hours: 24L/12P

An introductory course in Health and Disease using an interdisciplinary approach that integrates bacteriology and virology with other aspects of human biology, including chronic disease and neoplasia. An exploration of the key concepts and approaches that are necessary for understanding the dynamic nexus of human health and disease. (Lab Fees: $40)

Prerequisite: BIO120H1, BIO130H1
Exclusion: HMB203H1/
Recommended Preparation: BIO230H1/ BIO255H1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

HMB203H1 - Introduction to Global Health

Hours: 24L/12T

An introductory course covering the theories, operational components and strategies of implementing health care in resource-poor settings. Topics may include education, control of vector-borne diseases, essential drug provision, maternal and child health, nutrition, incorporation of alternative and complementary technologies, community participation and deployment of health service providers

Prerequisite: BIO120H1, BIO130H1
Exclusion: HMB202H1/HMB204H1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

HMB204H1 - Introduction to Human Biology

Hours: 24L/12T

An introduction to the biological, health, environmental, and sociopolitical issues that influence human health and well-being. Topics include genetic variation within and across human populations, biological variation related to the environment, determinants of health and disease, and human behaviour and development.

Prerequisite: BIO120H1, BIO130H1
Exclusion: HMB202H1/ HMB203H1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

HMB226H1 - Indigenous Holistic Health

Hours: 2P/22S

What is holistic health in an Indigenous framework? How can holistic health (physical, mental, emotional, and spiritual) be ethically explored to inform health and healing? What is cultural safety in health care systems? This course explores the effects of traditional practices, culture, activities, arts, land-based healing, music and ceremony in health and healing.

Corequisite: HMB200H1/HMB201H1/HMB202H1/HMB203H1/ HMB204H1/HST209H1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

HMB265H1 - General & Human Genetics

Hours: 24L/12T

An introduction to classical and modern methods of genetic analysis. Topics include Mendelian genetics, the genetics of human population and disease, genomics, and applications of genetics to human society.

Prerequisite: BIO120H1, BIO130H1, (CHM135H1/CHM139H1, CHM136H1/ CHM138H1)/ CHM151Y1
Exclusion: BIO260H1/ BIO207H5
Recommended Preparation: Recommended Co-requisite: BIO230H1/BIO255H1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)
HMB299Y1 - Research Opportunity Program

Hours: TBA

Credit course for supervised participation in faculty research project. Details at https://www.artsci.utoronto.ca/current/academics/research-opportunities/. Not eligible for CR/NCR option.

HMB300H1 - Neurobiology of Behaviour

Hours: 24L/12T

This neuroscience course focuses on higher brain functions and the mechanisms underlying human and animal behaviours. Topics may include the emerging role of the gut microbiome's impact on behaviour, pathogens that alter neuronal development and the biological basis of mindfulness and placebos. In addition, the impact that exercise and sleep play in modulating these behaviours are examined. Common experimental techniques used in neuroscience research such as brain imaging and cellular genetics are emphasized.

Prerequisite: BIO230H1/BIO255H1, HMB200H1/PSY290H1/PSL300H1/CJH332H1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

HMB301H1 - Biotechnology

Hours: 24L/12T

Students gain an appreciation for how science, government and society drive the development of biotechnology products. Topics include stem cells and regenerative medicine, diagnostics, cancer therapy, biotechnology in the developing world, antibiotic alternatives, and patents.

Prerequisite: HMB265H1/BIO260H1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

HMB302H1 - Vertebrate Histology and Histopathology

Hours: 24L/36P

Laboratory and lecture course studying the structure of the cell, various tissues and organ systems. Emphasis is on functional morphology and the adaptive response (including the inflammatory reaction) by comparing histological sections of normal tissues and organs with common diseases including neoplasia, respiratory, and liver disease. (Lab Materials Fee: $27)

Prerequisite: BIO230H1/BIO255H1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

HMB303H1 - Global Health and Human Rights

Hours: 24L/15S

A multidisciplinary emphasis on the economic, historical, social and cultural determinants of health and human rights, and how structural violence prevents progress towards human rights. Case studies reflecting global aspects of health and human rights form a framework for approaching these issues.

Prerequisite: 9 FCE complete, a HST200-level course/ HMB202H1/HMB203H1/HMB204H1
Distribution Requirements: Science; Social Science
Breadth Requirements: Society and its Institutions (3)

HMB306H1 - Ethical Considerations in Emerging Technology

Hours: 14L/10S

Advancing technology increases our ability to intervene in the course of natural events involving human health and well being. Questions arise as whether we ought to and who will benefit or be harmed. This course considers the far-reaching bioethical implications of emerging bio-technology. Topics to be explored include-but are not limited to-ethical considerations in emerging reproductive technologies, genetic alteration/genetic enhancement. Use of life support technologies, synthetic life, life extension.

Prerequisite: BIO230H1, HMB265H1/BIO260H1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)
HMB310H1 - Laboratory in Neuroscience

Hours: 12L/36P

A laboratory course based on current research techniques for students in the Neuroscience program. Lab topics may include human brain imaging and disorders, electrophysiology, cell culture, and changes in gene expression during neuronal development. Labs start in the first week of term. (Lab Materials Fee: $60)

Prerequisite: 9 FCE complete, HMB200H1/PSY290H1, HMB265H1/BIO260H1, BIO230H1/ BIO255H1
Corequisite: PSL300H1
Exclusion: HMB311H1/HMB312H1/HMB314H1/PSY359H1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

HMB311H1 - Laboratory in Fundamental Genetics and its Applications

Hours: 12L/36P

A laboratory course based on current research techniques for students in the Fundamental Genetics and its Applications programs. Lab topics may include molecular biology and animal cell culture techniques, nutrigenomics; an overview of microarrays and a CRISPR module. Labs start in the first week of term. (Lab Materials Fee: $100)

Prerequisite: 9 FCE complete, HMB201H1, HMB265H1/BIO260H1, BIO230H1/ BIO255H1
Exclusion: HMB310H1/HMB312H1/HMB314H1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

HMB312H1 - Laboratory in Health and Disease

Hours: 12L/36P

A laboratory course based on current research techniques and topics which may include basic microbiology, molecular biology and animal cell culture techniques, immunocytochemistry, changes in gene expression, and histological techniques. Labs start in the first week of term. (Lab Materials Fee: $70)

Prerequisite: 9 FCE complete, HMB202H1/HMB203H1/ HMB204H1, HMB265H1/BIO260H1, BIO230H1/ BIO255H1
Corequisite: BCH210H1
Exclusion: HMB310H1/HMB311H1/HMB314H1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

HMB314H1 - Laboratory in Human Biology

Hours: 12L/36P

Students analyze whole body, cellular, and molecular responses to stress. Techniques range from those standard in medical practice (e.g., fitness measures, blood pressure, lung function) to current research techniques (cell culture, changes in gene expression). Students gain technical and analytical skills as they work at the bench to design and carry out individual and group experiments. Labs start in the first week of term. (Lab Materials Fee: $52)

Prerequisite: 9 FCE complete, HMB265H1/BIO260H1, BIO230H1/ BIO255H1
Corequisite: PSL300H1, PSL301H1
Exclusion: HMB310H1/HMB311H1/HMB312H1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

HMB320H1 - Neuroanatomy

Hours: 24L/4T/10P

This is a rigorous, introductory course that addresses the structure of the vertebrate central nervous system with an emphasis on functional human neuroanatomy. It is designed for students who intend to continue with studies in the Neurosciences and related areas.

Prerequisite: 9 FCE completed, HMB265H1/BIO260H1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

HMB321H1 - Topics in Genetics

Hours: 24L/12T

The overall theme of this course is human genetics in disease. Topics include the molecular basis of human disease, using model organisms to identify disease-related genes, and genetic counseling. Expert guest lectures from clinical and basic sciences as well as small group work in tutorials build in-depth understanding.

Prerequisite: 9 FCE completed, HMB265H1/ BIO260H1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)
HMB322H1 - Topics in Health & Disease

Hours: 24L/12T

Explore the scientific basis and interdisciplinary healthcare practices of several diseases (diseases vary by year). Discuss current issues related to the biology and the impact of these diseases.

Prerequisite: 9 FCE complete, HMB202H1/HMB203H1/HMB204H1, BIO230H1/BIO255H1, PSL300H1
Corequisite: PSL301H1
Recommended Preparation: HMB302H1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

HMB323H1 - Global Health Research

Hours: 24L/12T

Globalization of health problems impacts biomedical research. Current global health research advances are explored and global health research skills are developed. Both provide background preparation for global health research, particularly in international settings.

Prerequisite: 9 FCE complete, HMB202H1/HMB203H1/HMB204H1, BIO230H1/BIO255H1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

CJH332H1 - Cellular and Molecular Neurobiology of the Synapse

Previous Course Number: CSB332H1
Hours: 36L

Examination of all aspects of the synapse in both the peripheral and central nervous systems of invertebrates and vertebrates. Topics include: neuroplasticity, synapse formation, synaptic transmission, synaptic modulation, and the molecular biological basis of neurodegenerative disorders.

Prerequisite: BIO271H1/PSL300H1
Exclusion: CSB332H1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

HMB342H1 - Epidemiology of Health & Disease

Hours: 24L/24T

This course engages students in the fundamental science of epidemiology applied to health and disease. After an introduction to various measures of health and disease, the scientific methods used to investigate, analyze, prevent and control health problems will be illustrated using social, biomedical and public health examples.

Prerequisite: 9 FCE complete, (BIO120H1, BIO130H1)/HST209H1
Exclusion: HST373H1
Recommended Preparation: STA288H1 or other statistics course
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

JNH350H1 - AIDS : Challenges and Successes

Previous Course Number: NEW350H1
Hours: 24L

Explores the pandemic of AIDS in Africa through a social science lens. (Given by Human Biology and New College)

Exclusion: NEW350H1
Recommended Preparation: NEW150Y1
Distribution Requirements: Humanities; Science; Social Science
Breadth Requirements: Society and its Institutions (3)

EHJ352H1 - Evolution of the Human Genome

Hours: 24L/12T

Human genome diversity and evolution with a focus on current research. The course integrates applications of human evolutionary genomics to the understanding of human history and adaptation, the causes of disease, and genome structure and function. Topics include: comparative genomics, population genomics of adaptation, association mapping, repetitive/selfish DNA, and gene duplication.

Prerequisite: BIO220H1, BIO260H1/HMB265H1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)
HMB360H1 - Neurogenomics

Hours: 24L/12T

Genetic basis of both the normal and abnormal development of the nervous system and its function. Topics include the regulation of neural gene expression, the role of epigenetics on neuron function, genome wide association studies and disorders of brain and behaviour, optogenetic and pharmacogenetic techniques to probe neural circuit function. Tutorials emphasize critical analysis of primary research.

Prerequisite: 9 FCE complete, HMB265H1/BIO260H1, HMB200H1/HMB201H1

Distribution Requirements: Science

Breadth Requirements: Living Things and Their Environment (4)

HMB394Y0 - International Research Project in Human Biology

Your individual, independent research project is supervised by a faculty member in an approved university. This unique opportunity to conduct a lab-based research project is open to students in any Human Biology program. Coordinated by Centre for International Experience. Not eligible for CR/NCR option.

Prerequisite: At least 8.5 FCEs including relevant courses in human biology.

Distribution Requirements: Science

HMB396Y0 - International Research Project in Human Biology

Your individual, independent research project is supervised by a faculty member in an approved university. This unique opportunity to conduct a lab-based research project is open to students in any Human Biology program. Not eligible for CR/NCR option. Coordinated by Woodsworth College.

Prerequisite: An approved 300-series science laboratory course and permission of the Human Biology Program from which application forms may be obtained.

Distribution Requirements: Science

HMB398Y0 - Research Excursions

Prerequisite: 9 FCE complete and permission of the Human Biology Program from which application forms may be obtained.

Distribution Requirements: Science

HMB399Y1 - Research Opportunity Program

Credit course for supervised participation in faculty research project. Details at https://www.artsci.utoronto.ca/current/academics/research-opportunities/. Not eligible for CR/NCR option.

HMB401H1 - Biomedical Advances & Technologies

Hours: 24L/12T

This course introduces life science students to biomedical advances and technologies in medicine, including drug patents, medical device implants, diagnostic and medical device software. Limitations of patent protection in commercializing medical products, and limitations to scalability may also be discussed. Specific topics vary from year to year and will be based on the course instructor's area(s) of expertise.

Prerequisite: 14 FCE complete, HMB301H1/HMB321H1/BCH311H1/CSB349H1/MGY311Y1/PSL350H1, HMB201H1/HMB202H1/HMB203H1/HMB204H1

Recommended Preparation: a statistics course

Distribution Requirements: Science

Breadth Requirements: Living Things and Their Environment (4)

HMB402H1 - Topics in Translational Medicine

Hours: 18L/6S

The bridge between basic scientific research and clinical practice integrates fundamental knowledge about molecular/cellular mechanisms and clinical disorders to increase the potential for new medical treatments, therapies and interventions as well as understanding of disease processes. Specific topics vary from year to year and will be based on the instructor's area(s) of expertise.

Prerequisite: 14 FCE complete, BCH210H1, BIO230H1/BIO255H1, HMB302H1/HMB321H1/HMB322H1/BCH311H1/CSB349H1/MGY311Y1/PSL350H1, and HMB202H1/HMB203H1/HMB204H1

Recommended Preparation: BCH311H1/CSB349H1/PSL350H1

Distribution Requirements: Science

Breadth Requirements: Living Things and Their Environment (4)
HMB406H1 - Health Care Ethics

Hours: 8L/16S

Since research involving human subjects lays the foundation for innovation in modern health care, this course examines health care ethics along a continuum from bench to bedside. Ethical issues are discussed in the context of specific cases involving human research, as well as contemporary clinical practice.

Prerequisite: 14 FCE complete, A HMB300-level course, HMB306H1/PHL281H1/other ethics course with prior approval from the unit

Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

HMB421H1 - Seminar in Fundamental Genetics and its Applications

Hours: 12L/12S

Theme based lecture and seminar course underlining current medical research in relation to the areas of genes and genetics. Topics vary yearly.

Prerequisite: 14 FCE complete, HMB265H1/BIO260H1, HMB201H1
Recommended Preparation: HMB321H1/BCH311H1/CSB349H1/MGY311Y1/PSL350H1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

JHA410H1 - Clinical Neuroimaging

Hours: 24L/12T

This course focuses on the use of neuroimaging techniques in understanding how trauma, disorders, and disease impact neural structure and function. Lectures will focus on introduction to techniques and clinical/research applications. Lab work will focus on the development of practical skills including image processing, analyses, and experimental design.

Prerequisite: 9 FCE complete, PSL300H1, BIO230H1, HMB200H1/PSY290H1/ANA300Y1
Recommended Preparation: HMB320H1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

HMB422H1 - Seminar in Health & Disease

Hours: 16L/8S

This course focuses on various medical research related to human disease. Topics vary based on course instructor's area(s) of expertise.

Prerequisite: 14 FCE complete, PSL300H1, PSL301H1, HMB302H1/HMB322H1, and HMB202H1/HMB203H1/HMB204H1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

HMB420H1 - Seminar in Neurobiology of Behaviour

Hours: 12L/12S

This seminar course focuses on recent research into the neurobiology underlying human behaviour. A variety of normal and abnormal human behaviours are studied which may include: voluntary action; moral cognition; hedonism; aggression; mental health; addiction; the impact of the gut microbiome on brain development and health.

Prerequisite: 14 FCE complete, HMB200H1, HMB300H1, HMB320H1/ANA300Y1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

HMB430H1 - Trends in Neuroscience

Hours: 18L/6S

Current research covering the breadth of neuroscience is showcased by members of the Collaborative Program in Neuroscience. Topics vary yearly, but cover the spectrum from molecular through genetic, cellular, developmental, systems, behavioural and modelling. As well, approaches to studying neurodegenerative diseases and clinical neurophysiology are introduced.

Prerequisite: 14 FCE complete, HMB200H1, CJH332H1, HMB320H1/JHA410H1/ANA300Y1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)
HMB431H1 - Innovation in Applied Genetics

Hours: 16L/8S

This course explores innovation in research and technology in the field of applied genetics. Specific topics vary from year to year and will be based on the course instructor's area(s) of expertise.

Prerequisite: 14 FCE complete, HMB321H1, HMB201H1/HMB202H1/HMB203H1/HMB204H1
Distribution Requirements: Science
Breadth Requirements: Society and its Institutions (3)

HMB432H1 - Topics in Histology & Histopathology

Hours: 12L/12S

Lecture and seminar course emphasizing current research. Topics may include the digestive system, cardiovascular system, respiratory system, stem cells, and neoplasia. Topics vary depending on class interest.

Prerequisite: 14 FCE complete, HMB302H1/HMB322H1
Recommended Preparation: BCH311H1/CSB349H1/MGY311Y1/PSL350H1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

HMB433H1 - Topics in Global Health

Hours: 16L/8S

Seminar and theme based course examining the opportunity to apply basic knowledge of biological determinants of disease to designing health system interventions and informatics that can have a global impact in the near term.

Prerequisite: 14 FCE complete, HMB303H1/HMB323H1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

HMB434H1 - Complementary & Integrative Medicine

Hours: 20L/4S

Introduction to complementary and alternative medical therapies. Topics include, Traditional Chinese Medicine, Naturopathy, Ayurvedic, and Mind-Body Practices. Biological mechanisms will be emphasized and therapies will be critically analyzed from an evidence-based research perspective. Integrating alternative therapies into Western practices with a focus on personalized medicine will be discussed.

Prerequisite: 14 FCE complete, BCH210H1, BIO230H1/BIO255H1, HMB302H1/HMB312H1/HMB314H1/HMB322H1/HMB323H1/HMB342H1, and HMB202H1/HMB203H1/HMB204H1
Recommended Preparation: HMB342H1/CSB349H1/PSL350H1/BCH311H1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

HMB435H1 - Selected Topics in Molecular Cell Biology

Hours: 16L/8S

Theme-based lecture and seminar course underlining current basic science research in the area of molecular and cell biology, focusing on cell migration and its relevance to human health and disease. Topics may focus on the impact of fundamental processes underlying the cell biology, physiology and pathophysiology of cell motility in a variety of systems (e.g. immune, nervous system, cancer context).

Prerequisite: 14 FCE complete, BCH311H1/CSB349H1/MGY311Y1/PSL350H1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

HMB436H1 - Medical and Veterinary Mycology

Hours: 24L

This lecture-based course will familiarize students with fungi of public health importance, particularly those that cause disease in humans and other animals. The course will focus on the clinical presentation, pathophysiology, and treatment of fungal infections, as well as the ecology, physiology and evolutionary biology of the agents responsible. The course will also address other ways in which fungi influence human and animal health.

Prerequisite: 14 FCE complete, HMB265H1/BIO260H1, BIO220H1
Recommended Preparation: EEB268H1, EEB331H1/CSB353H1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)
HMB437H1 - The Biology of the Human Metallome

Hours: 24L

This course will discuss how heavy metals are integral to organ function through various biological pathways, the importance of metal regulation and control and its relationship with gene transcription. An introduction of metallo-therapeutics will also be featured, ranging from neurodegenerative therapies to cancer treatment.

Prerequisite: 14 FCE complete, HMB265H1/BIO260H1, BIO230H1/BIO255H1, BCH210H1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

HMB440H1 - Dementia

Hours: 24L

This course, featuring a service-learning component, explores dementia. In patients with dementia, intellectual, social and occupational functioning deteriorate. The course addresses the multi-disciplinary aspects of dementia (clinical, genetic, molecular, social) with a focus on the most common cause of dementia, Alzheimer's disease.

A short application to enrol in this course is required. Information may be found via the Human Biology Program website.

Prerequisite: 14 FCE complete, HMB265H1/BIO260H1, PSL300H1, HMB300H1/HMB302H1/HMB320H1/HMB321H1/ANA300Y1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

HMB441H1 - Genetics of Human Disease

Hours: 24L

This advanced course aims to provide students with current, in-depth knowledge of the genetics of specific human diseases, including single gene (e.g., Huntington disease), multifactorial (e.g. Alzheimer's disease), and non-Mendelian (e.g. mitochondrial DNA-related disease) disorders, and how the use of genetics to elucidate disease mechanisms can lead to treatments and personalized medicine in order to improve healthcare.

Prerequisite: 14 FCE complete, HMB265H1/BIO260H1, BCH210H1, HMB302H1/HMB321H1/HMB322H1/BCH311H1/CSB349H1/MGY311Y1/PSL350H1, and HMB201H1/HMB202H1/HMB203H1/HMB204H1
Recommended Preparation: HMB321H1, PSL300H1, PSL301H1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

HMB443H1 - Global Hidden Hunger

Hours: 18L/6S

Vitamin and mineral deficiencies, termed ‘hidden hunger,’ affect about half the world’s population. Explore the global nature, catastrophic consequences, and causes of these deficiencies. Discuss formulation and implementation of international, national, and local policies to alleviate ‘hidden hunger’ especially in infants and young children. A service-learning opportunity is integrated. Students will be required to contribute to a local community organization while using course knowledge to develop a project or initiative beneficial to the organization and community.

A short application to enrol in this course is required. Information may be found via the Human Biology Program website.

Prerequisite: 14 FCE complete, BIO230H1/BIO255H1, HMB302H1/HMB303H1/HMB312H1/HMB314H1/HMB322H1/HMB323H1/CJH332H1 (formerly CSB332H1)/NFS382H1
Recommended Preparation: PSL301H1, CSB349H1/PSL350H1/PSL350H1/BCH311H1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

HMB450H1 - Neurodevelopmental Disorders and Diseases

Hours: 24L/12T

Proper development of the human brain is essential for human health. This course will examine how neurodevelopment failures contribute to neurological disorders and diseases, such as epilepsy and autism. Current research from basic, translational, and clinical perspectives will be examined using case studies.

Prerequisite: 14 FCE complete, HMB200H1, HMB320H1/ANA300Y1
Recommended Preparation: PSL301H1, CSB349H1/PSL350H1/BCH311H1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

HMB452H1 - Personalized Medicine

Hours: 12L/12S

The bridge between basic scientific research and clinical practice integrates fundamental knowledge about molecular/cellular mechanisms and clinical disorders to increase the potential for new medical treatments, therapies and interventions as well as understanding of disease processes. Specific topics vary from year to year and will be based on the course instructor's area(s) of expertise.

Prerequisite: 14 FCE complete, HMB302H1/HMB321H1/HMB322H1/HMB201H1/HMB202H1/HMB203H1/HMB204H1
Distribution Requirements: Science
Breadth Requirements: Society and its Institutions (3)
HAJ453H1 - AIDS: A Global Perspective

Hours: 6L/18S

Seminars explore the global AIDS crisis, adopting the medical-anthropological perspective of Paul Farmer's Infections and Inequalities. Varying epidemiological profiles of AIDS are placed in broader social, cultural, and political-economic frameworks. The impact of globalization and structural inequality on local cultures and lifestyles provides an essential backdrop to the discussions.

Prerequisite: 14 FCE complete, ANT208H1/BIO220H1/PHS300H1/JNH350H1
Distribution Requirements: Science; Social Science
Breadth Requirements: Society and its Institutions (3)

JEH455H1 - Current Issues in Environment and Health

Hours: 16L/8S

This course introduces students to complex issues at the interface between environment and health where health is broadly defined. Each year a current and controversial case study is explored from scientific, medical, political and policy perspectives. The course takes students from the molecular to individual to population and societal levels.

Prerequisite: 14 FCE complete, ENV341H1/HMB302H1/HMB312H1/HMB314H1/HMB322H1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

HMB462H1 - Topics in Epidemiology

Hours: 12L/12S

The focus is on the theory and application of biostatistics and epidemiology to current developments in special topics in substantive areas of epidemiology (e.g., chronic disease, environmental & occupational health, infectious disease, methods, social, etc.).

Prerequisite: 14 FCE complete, HMB342H1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

HMB470H1 - Exercise and Sports Medicine

Hours: 22L/4S

This course considers the health benefits and risks of different forms of exercise, with a goal of understanding how people should exercise, and how much, depending on their athletic and health goals. It introduces elements of exercise science including the biomechanics of tissues and injuries to develop an understanding of how both the quantity and quality of movement and loading contribute to healthy training and/or injury. Some common injuries in sport such as knee injuries and concussions are used as examples of how various patterns of loading can cause injuries.

Prerequisite: 14 FCE complete, PSL300H1, PSL301H1, HMB200H1/HMB201H1/HMB202H1/HMB203H1/HMB204H1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

HMB471H1 - Performance Enhancement

Hours: 24L/4P

Enhancing performance has broad appeal. This course explores current developments for achieving peak performance academically, physically and emotionally. We focus on the scientific basis of the links between performance and stress, and of the benefits and risks of pharmacological methods to achieve performance enhancement. Various stress management skills are introduced.

Prerequisite: 14 FCE complete, PSL300H1, HMB200H1/HMB201H1/HMB202H1/HMB203H1/HMB204H1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

HMB472H1 - Exercise Physiology

Hours: 20L/4S

Examine the physiological and biochemical responses of the human body to both acute and chronic bouts of physical activity. The impact of activity on health, and health on physical activity, is explored by examining adaptations from the cellular to the systemic level of bodily function.

Prerequisite: 14 FCE complete, PSL300H1, PSL301H1, HMB200H1/HMB201H1/HMB202H1/HMB203H1/HMB204H1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)
HMB473H1 - Exercise and Mental Health

Hours: 18L/10P/6S

This course, featuring a service-learning component, discusses how mental well-being is a critical element of total health. We explore the evidence underpinning the role of physical activity in the avoidance of mental disorders, recovery from mental disorders, and the quality of life of those with or without mental disorders.

A short application to enrol in this course is required. Information may be found via the Human Biology Program website.

Prerequisite: 14 FCE complete, PSL300H1, PSL301H1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

HMB474H1 - Dental Sciences

Hours: 20L/4S

Dentistry is one of the oldest branches of medicine responsible for the treatment of diseases of oral cavity. This course will introduce students to the key concepts as well as the latest research in the dental sciences, including but not limited to craniofacial structures, bone physiology, odontogenesis, pathogenesis of oral diseases, and technology in dental sciences.

Prerequisite: 14 FCE complete, BIO230H1/BIO255H1, PSL300H1, PSL301H1, HMB200H1/HMB201H1/HMB202H1/HMB203H1/HMB204H1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

HMB474H1 - Advanced Laboratory in Human Biology

Hours: 36P/12S

Building on their experience in 3rd-year labs, students participate in inquiry-based laboratory experiments in diverse areas of current human biology research. Open to students in any Human Biology program. Labs start in the first week of term. (Lab Materials Fee: $105)

Prerequisite: 14 FCE complete, HMB310H1/ HMB311H1/ HMB312H1/ HMB314H1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

HMB490Y1 - Health in Community

Hours: 24L/24T

An experiential learning course exploring health-related challenges and social determinants of health in partnership with local community organizations. Lectures and tutorials will support learning of selected biological and social aspects of health and disease, neuroscience, genetics or population health, and the development of scientific knowledge translation skills relevant to the community agencies. Cannot be taken concurrently with a full year research project course.

Prerequisite: BIO230H1/BIO255H1, HMB265H1/BIO260H1, BCH210H1, PSL300H1, PSL301H1, HMB200H1/HMB201H1/HMB202H1/HMB203H1/HMB204H1
Exclusion: HMB473H1
Recommended Preparation: a 300-level science lab course
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4); Society and its Institutions (3)

HMB496Y1 - Research Project in Human Biology

A research project course for students enrolled in a Human Biology program, supervised by a faculty member appointed in a faculty or division at St. George Campus (Faculties of Arts & Science, Medicine, Engineering, Dalla Lana School of Public Health, etc.). Open to third and fourth year students.

Students are responsible for securing their own supervisor. Should a HMB Specialist require help securing a supervisor, the request must be made by email to the Human Biology Program Office no later than July 20 for Academic year projects and January 30 for Summer projects.

Completed applications for this course are due to the Human Biology Program Office by September 1 for Academic year projects and May 1 for Summer projects. Please see the application on the Special Enrolment Courses page on the HMB Website.

Not eligible for CR/NCR option.

Prerequisite: Permission of the Human Biology Program; please refer to the Human Biology Program website for more details
Exclusion: Students are not permitted to do a HMB research project concurrently with another research project
Distribution Requirements: Science
HMB499Y1 - Research Project in Human Biology II

A research project course for students enrolled in a Human Biology program, supervised by a faculty member appointed in a faculty or division at St. George Campus (Faculties of Arts & Science, Medicine, Engineering, Dalla Lana School of Public Health, etc.).

Students are responsible for securing their own supervisor. Should a HMB Specialist require help securing a supervisor, the request must be made by email to the Human Biology Program Office no later than July 20 for Academic year projects and January 30 for Summer projects.

Completed applications for this course are due to the Human Biology Program Office by September 1 for Academic year projects and May 1 for Summer projects. Please see the application on the Special Enrolment Courses page on the HMB Website.

Not eligible for CR/NCR option.

**Prerequisite:** HMB496Y1, and permission of the program

**Exclusion:** Students are not permitted to do a HMB research project concurrently with another research project.

**Distribution Requirements:** Science
Hungarian

Given by the Centre for European, Russian, and Eurasian Studies

Hungarian is spoken by ten and a half million inhabitants of present-day Hungary, about three million people in the neighbouring countries, and perhaps as many as an additional two million around the world. These figures make Hungarian, which is related to Finnish, Estonian, and Lappish, but virtually no other language in Europe, by far the largest minority language in the great Indo-European language territory.

Despite the isolation that might have been imposed by the uniqueness of their language, Hungarians have been engaged with, and participants in, greater European affairs since their arrival in the Carpathian basin more than a thousand years ago. Hungarians have made significant contributions in the fields of arts, science, and mathematics, winning Nobel prizes in Chemistry (4), Medicine (3), Physics (3), Economics, and Literature. In the music world the names Bántók, Kodály, Lehár, Liszt, Szell, Ormandy, Schiff, and many others are internationally famous. Leo Szilárd, Edward Teller, Paul Erdös, and John von Neumann are famous figures in theoretical physics and mathematics. Joseph Biró developed the ball-point pen and to this day the British call a ball-point pen, a biro. Hungarians have also become famous in sports, particularly soccer, boxing, and fencing, and in the world of cinema. And who has not played with the Rubik’s cube?

Hungarian studies at the University of Toronto focus on the language, literature, cinema and culture of Hungary and on the international role of Hungary and Hungarians - particularly on Hungarian immigration to Canada. For many of the courses no prior knowledge of the Hungarian language is necessary, making them easily accessible also to students in other programs.

Program Coordinator: Professor Robert Austin, robert.austin@utoronto.ca, Tel. 416.946.8942

Hungarian Programs

Hungarian Studies Major (Arts Program) - ASMAJ1124

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

(6 full courses or their equivalent including two FCEs in Hungarian language study)

First Year:
HUN100Y1
Higher Years:
1. HUN200Y1, HUN310Y1, HUN320Y1
2. Two courses from: EUR200Y1, HIS241H1, HIS242H1, HIS251Y1, HIS389H1 (Hungarian History), HIS453H1, HUN355H1, HUN356H1, HUN440Y1, HUN450H1, HUN455H1, INI381H1

Hungarian Studies Minor (Arts Program) - ASMIN1124

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

(4 full courses or their equivalent, including at least one at the 300+ level)

Four courses from: HUN100Y1, HUN200Y1, HUN310Y1, HUN320Y1, HUN335H1, HUN345H1, HUN351H1, HUN355H1, HUN356H1, HUN440Y1, HUN450H1, HUN455H1, HIS241H1, HIS251Y1, HIS389H1, HIS453H1, INI381H1

Faculty of Arts & Science Language Citation

The Hungarian program participates in the Faculty of Arts and Science’s Language Citation initiative. Students may achieve this Citation in Hungarian.

Language study is a demanding and intellectually rewarding educational experience. Our students learn to communicate both orally and in writing in other languages and are thus able to experience other parts of the world in more intimate ways. Their access to other cultures opens doors for further study and employment. Students in our department also have the opportunity to read a vast array of world-renowned authors in the original languages, as well as works – normally not available in English – in other areas of study, for example, cinema studies, drama, folklore, history, intellectual history, philosophy, mathematics, and political science.

The Language Citation recognizes a significant level of achievement in language study. For course selection students should consult the Undergraduate Coordinator as early as possible since not every language course is offered each year. Students who begin language study at the Intermediate level should consult the Undergraduate Coordinator for approval of advanced literature and culture courses that may satisfy the requirements for the Language Citation.

The Language Citation in Hungarian is available to students who complete HUN200Y1 and HUN310Y1 with a grade of at least B-.

Students should note that, as explained on the page 20 of this Calendar, the Language Citation is not equivalent to an academic program and that enrolment in a program is not necessary in order to earn the recognition bestowed by the Citation.

Note

The Department reserves the right to assign students to courses appropriate to their level of competence in Hungarian.
**Hungarian Courses**

**HUN100Y1 - Elementary Hungarian**

**Hours:** 120P

This course is aimed at students interested in Hungarian but have no prior knowledge of the language. The course emphasizes essential vocabulary, basic comprehension, speaking, reading and writing skills with a balance between communicative activities and grammar practices. Communicative activities will include group and partner work to encourage interactive learning.

**Distribution Requirements:** Humanities  
**Breadth Requirements:** Creative and Cultural Representations (1)

**HUN200Y1 - Intermediate Hungarian**

**Hours:** 96P

Review of descriptive grammar; studies in syntax; vocabulary building; intensive oral practice; composition; reading and translation.

**Prerequisite:** Permission of instructor  
**Distribution Requirements:** Humanities  
**Breadth Requirements:** Creative and Cultural Representations (1)

**HUN310Y1 - Advanced Hungarian**

**Hours:** 48S

This course is intended to build on the skills and knowledge acquired by the students in the previous Hungarian language courses. It will consist of a more advanced study of grammar, more complex vocabulary, higher level of oral skills and longer reading, writing and translation exercises. Communicative activities will include group and partner work to encourage interactive learning.

**Distribution Requirements:** Humanities  
**Breadth Requirements:** Creative and Cultural Representations (1)

**HUN320Y1 - A Survey of Hungarian Literature**

**Hours:** 48S

A chronological study of the development of Hungarian literature since the 12th century; emphasis both on outstanding writers and on significant movements or themes. Transformations of ideas and changes in language and style. No knowledge of Hungarian required.

**Distribution Requirements:** Humanities  
**Breadth Requirements:** Creative and Cultural Representations (1)

**HUN335H1 - Urban vs. Rural: Immigration to and Settlement in North America**

**Hours:** 12L/12S

This course will provide an examination of the history of Hungarian Immigration to and settlement in North America. The course will examine the "push" and "pull" factors, the socio-economic factors involved, their patterns of migration and the organizational development of the communities they founded in North America. The course will compare and contrast the reception the immigrants and later refugees received in the United States and Canada and examine how they adapted to their new homelands.

**Distribution Requirements:** Humanities  
**Breadth Requirements:** Society and its Institutions (3)

**HUN345H1 - The Dynamic of Hungarian Culture, Ethnography, and Folklore**

**Hours:** 12L/12S

Explore the cultural traditions, historical processes, myths, and figures that have shaped and redefined Hungarian civilization and national identity. Theoretical and practical classes on ethno-genesis, anthropology, and folklore. Readings in English (also available in Hungarian).

**Distribution Requirements:** Humanities  
**Breadth Requirements:** Creative and Cultural Representations (1)
HUN355H1 - One Hundred Years of Dramatic Change: History of the Past Century and Reflections of Society in Hungarian Culture

Hours: 12L/12S

Explore Hungary's rapidly changing place in Europe. Focus on political, sociological, and historical understandings of nationalism and identity as they manifest themselves in literature, history, and culture. Knowledge of Hungarian not required.

Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

HUN455H1 - Hungary and Europe: Cultural Adaptation in the Late 20th Century

Hours: 12L/12S

Focus on literature, art, mass media, and popular culture in post-1990 Hungary with special emphasis on the past ties to European culture and the impact of European integration. Readings in English (also available in Hungarian).

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

HUN497Y1 - Independent Study (Hungarian)

Translation course concentrating on Hungarian prose translation. Not eligible for CR/NCR option.

Prerequisite: Permission of Department
Distribution Requirements: Humanities

HUN498H1 - Independent Study (Hungarian)

Translation course concentrating on Hungarian prose translation. Not eligible for CR/NCR option.

Prerequisite: Permission of Department
Distribution Requirements: Humanities
Immunology

P. Vadas, Ph D, MD

Introduction

Immunology is an integrative branch of the medical sciences that draws upon the more traditional disciplines of Molecular Biology, Microbiology, Pathology, and Biochemistry. In essence, Immunology is the study of the physiological responses that result when foreign (i.e. non-self) materials are introduced into a vertebrate organism such as humans. Traditionally, the discipline has focussed on the body’s response to infectious micro-organisms, with the purpose of developing effective vaccines. However, the scope of modern Immunology now encompasses all aspects of self vs. non-self recognition phenomena including organ transplantation, tumour immunology and autoimmune diseases. Recent major advances in our understanding of the cellular and molecular basis of the immune response promise to provide us with a new generation of prophylactic, therapeutic and diagnostic reagents of relevance to human and animal health.

The Department of Immunology, in collaboration with Trinity College, co-ordinates specialist, major, and minor programs in Immunology. The emphasis of the specialist program is to provide students with a sound theoretical understanding of the cellular and molecular basis of non-self recognition, together with sufficient laboratory experience to enable the students to consider embarking on a career in the discipline. The major and minor programs offer students fundamental training in Immunology and gives them the opportunity to combine Immunology with another program in Life Sciences, Basic Sciences, or within the Arts.

Immunologists may have careers in universities and other centres of learning and research, as well as in the biotechnology industries, diagnostic laboratories and various government agencies. Courses in this specialist program are drawn from offerings by the Department, together with courses from other Departments, taught in some cases by members of the Department of Immunology. As enrolment in the specialist and major programs are restricted, please consult specific requirements outlined in the program description section.

Associate Chair, Undergraduate Studies:
Dr. T. Mallevaey

Immunology Programs

Immunology Specialist (Science Program) - ASSPE1002

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

Variable Minimum Grade and Variable Minimum Grade Average
Minimum grades combined with a minimum grade average in required courses or their equivalents are needed for entry, and these minimums change each year depending on available spaces and the number of applicants. The following courses must be completed:

- BIO120H1 and BIO130H1
- CHM135H1 and CHM136H1, or CHM138H1 and CHM139H1, or CHM151Y1
- MAT135H1 and MAT136H1, or MAT137Y1

To ensure that students admitted to the program will be successful, applicants with a final grade lower than 65% in each course, or a final grade average lower than 70% in these required courses will not be considered for admission. Please note that obtaining the minimum final grades and grade average does not guarantee admission to the program. While it is difficult to predict what will be competitive course marks and average in a given year, based on previous years, the estimate is: course marks = mid 70s; average = mid 70s.

Please consult the Arts & Science Program Toolkit for more information on program enrolment. Additional information is also available on the Immunology website at www.immunology.utoronto.ca.

Completion Requirements:

(13.5 credits)

First Year:
BIO120H1; BIO130H1; \{CHM135H1 (formerly CHM139H1); CHM136H1 (formerly CHM138H1)\}/CHM151Y1; \{MAT135H1; MAT136H1\}/MAT137Y1

First Year or upper years:
(PHY131H1; PHY132H1)/ (PHY151H1; PHY152H1)

Second Year:
1. BCH224Y1; BIO230H1; BIO260H1; HMB265H1; CHM220H1; IMM250H1
2. One course from the following list: BIO220H1/ STA288H1/ TRN225Y1/ TRN236H1/ CHM247H1/ CHM249H1

Third Year:
BCH377H1; IMM341H1; IMM351H1; MGY311Y1; MGY377H1; MGY378H1

Fourth Year:
1. IMM435H1
2. 1.0 credit from the following list: IMM428H1/ IMM429H1/ IMM430H1/ IMM431H1/ MLI485H1
3. IMM450Y1 or 1.0 credit at the 400-series in ANA, BCH, IMM, LMP, MGY, CSB.

Notes:

1. PHY131H1; PHY132H1; PHY151H1; PHY152H1) may be taken in the first year or subsequent years and are not required for entrance into the specialist program.
2. IMM435H1 is capped at 40 students. Priority will be given to Immunology Specialist students, followed by Immunology Major students.
3. Students considering graduate school are encouraged to take IMM360H1, if space permits.

Immunology Major (Science Program) - ASMAJ1002

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

Variable Minimum Grade and Variable Minimum Grade Average
Minimum grades combined with a minimum grade average in required courses or their equivalents are needed for entry, and these minimums change each year depending on available spaces and the number of applicants. The following courses must be completed:

- BIO120H1 and BIO130H1
- CHM135H1 and CHM136H1, or CHM138H1 and CHM139H1, or CHM151Y1

To ensure that students admitted to the program will be successful, applicants with a final grade lower than 60% in each course, or a final grade average lower than 70% in these required courses will not be considered for admission. Please note that obtaining the minimum final grades and grade average does not guarantee admission to the program. While it is difficult to predict what will be competitive course marks and average in a given year, based on previous years, the estimate is: course marks = mid 70s; average = mid 70s.

Please consult the Arts & Science Program Toolkit for more information on program enrolment. Additional information is also available on the Immunology website at www.immunology.utoronto.ca.

Completion Requirements:

(8.0 credits, including 1.0 credit at the 400-series)

First Year:
BIO120H1; BIO130H1; \{CHM135H1 (formerly CHM139H1); CHM136H1 (formerly CHM138H1)\}/CHM151Y1

Second Year:
1. BCH210H1; BIO230H1; IMM250H1; BIO260H1; HMB265H1
2. 0.5 credit from the following list: BIO220H1/ STA288H1/ TRN225Y1/ TRN236H1/ CHM247H1/ CHM249H1
Third Year:
IMM340H1; IMM350H1; CSB349H1/BCH311H1; 1.0 credit from the following list: BCH370H1/ MGY377H1/ MGY378H1/ PHL281H1

Fourth Year:
1.0 credit from the following list: IMM428H1/ IMM429H1/ IMM430H1/ IMM431H1/ IMM435H1/ MIJ485H1

Notes:
1. Students considering graduate school are encouraged to add the additional non-compulsory IMM450Y1 research course, if space permits.
2. MIJ485H1 requires MGY377H1 & MGY378H1 as prerequisites.
3. IMM435H1 is capped at 40 students. Priority will be given to Immunology Specialist students, followed by Immunology Major students.

Immunology Minor (Science Program) - ASMIN1002

Enrolment Requirements:
This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:
For more information, refer to the Immunology website at: www.immunology.utoronto.ca.

(4 full courses or their equivalents)

First Year:
BIO120H1; BIO130H1; [ CHM135H1 (formerly CHM139H1); CHM136H1 (formerly CHM138H1)]/ CHM151Y1

Second Year:
BIO230H1; IMM250H1

Third Year:
IMM340H1; IMM350H1

Immunology Courses

IMM199H1 - Immunology in the News Today

Hours: 24S

Why do we get sick? How do vaccines work? Does our diet influence our immunity? This course is intended to inspire curiosity about questions generated by immunology concepts that are prevalent in the news today. Different topics will be explored each week including immunity worldwide, human vaccinations and the mucosal immune system. Topics will be placed in context through real-life case studies, immunology virtual laboratory simulation, interactions with faculty members and extensive coverage of the basic science underlying each topic. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

IMM221H1 - Origins of Immunology

Hours: 24L/12T

This course will examine the milestones in the field of immunology from ancient to current times, with specific emphasis on 1880 to 1980. It will observe how the concept of immunity has changed over time and examine the major events and discoveries that shaped how immunology is viewed today. Pioneers, such as Edward Jenner, Louis Pasteur, Robert Koch, Paul Ehrlich and Brigitte Askonas, and their contributions to the field will be discussed in both historical and scientific context as well as their impact on society. Assignments are staggered for students to build upon instructor's feedback.

Recommended Preparation: BIO120H1, BIO130H1
Distribution Requirements: Social Science
Breadth Requirements: Society and Its Institutions (3)

IMM250H1 - The Immune System and Infectious Disease

Hours: 24L

Students will be introduced to the basic concepts of immunity to infectious disease and how breakdown of the immune response can lead to auto-immunity. We will trace the history of current ideas in immunology and the immune response by examining how bacteria and viruses cause disease and the initial discoveries that led to such developments as vaccination. Current topical and newsworthy infectious diseases (HIV, tuberculosis, SARS, avian flu) will be used as examples of how the immune system copes with microbial infections.

Recommended Preparation: BIO120H1, BIO130H1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)
IMM340H1 - Fundamental Immunology

Hours: 24L/12T

This course introduces the basic principles and key players of the immune system: differences and interplay between innate and adaptive immunity, how immune cells develop and function, how immune cells recognize threats and danger and mount an appropriate and measured response. This course is offered in the Fall term with in-class lectures and tutorials, as well as in the Summer term with hybrid delivery (online lectures and in-class tutorials).

Prerequisite: BIO230H1
Exclusion: IMM334Y1/IMM335Y1/IMM341H1
Recommended Preparation: IMM250H1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

IMM341H1 - Fundamental Immunology (Advanced)

Hours: 24L/12T

This course introduces the fundamental principles and key players of the immune system: differences and interplay between innate and adaptive immunity, how immune cells develop and function, how immune cells recognize threats and danger and mount an appropriate and measured response. Intended for students specializing in Immunology and related programs.

Prerequisite: BIO230H1
Exclusion: IMM334Y1/IMM335Y1/IMM340H1
Recommended Preparation: IMM250H1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

IMM350H1 - The Immune System in Action

Hours: 24L/12T

This course illustrates how different elements of the immune system come together to mount efficient and measured responses. Topics include response to infectious microorganisms, allergy and autoimmunity, immune responses against cancer, and transplantation immunology. Intended for students specializing in Immunology and related programs.

Prerequisite: IMM340H1/IMM341H1
Exclusion: IMM334Y1/IMM335Y1/IMM351H1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

IMM351H1 - The Immune System in Action (Advanced)

Hours: 24L/12T

This course illustrates how different elements of the immune system come together to mount efficient and measured responses. Topics include response to infectious microorganisms, allergy and autoimmunity, immune responses against cancer, and transplantation immunology. Intended for students specializing in Immunology and related programs.

Prerequisite: IMM341H1/IMM340H1
Exclusion: IMM334Y1/IMM335Y1/IMM350H1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

IMM360H1 - Scientific Methods and Research in Immunology

Hours: 24L/24T

This course will provide students with an opportunity to advance their understanding of research in Immunology in accordance with scientific methodology. Students will critically appraise scientific articles, design and analyze scientific experiments, and develop the core skills of data and statistical literacy. This course is well suited for anyone interested in discovering knowledge in Immunology, providing students with a methodology for the achievement of scientific research activities.

Prerequisite: IMM250H1, BCH210H1/BCH242Y1, BIO230H1/BIO255H1, BIO260H1/HMB265H1
Recommended Preparation: STA288H1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

IMM385Y1 - Special Research Project in Immunology

Hours: 180P

This course provides an opportunity for students to conduct a research project under the supervision of a member of the Faculty. Students are expected to devote a minimum of seven hours per week to the course from the week the fall term lectures begin to the last week of the spring term. Research projects will involve experimental design and work, data analyses, literature reading etc.

Prerequisite: IMM250H1
Corequisite: IMM340H1/IMM341H1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)
**IMM428H1 - Molecular Immunology**

**Hours: 24L**

This course will focus on the molecular and cellular biology of immune recognition. The course will emphasize historical and recent experimental evidence leading to our current understanding of immune recognition. Subtopics are subject to change and have recently included mechanisms of diversification of immunoglobulin receptors, T cell –MHC interactions, T cell activation and signaling mechanisms; receptors of the innate immune system, immune recognition by natural killer cells.

**Prerequisite:** BCH210H1/BCH242Y1, BCH311H1/CSB349H1/MGY311Y1/PSL350H1, IMM350H1/IMM351H1/IMM334Y1/IMM335Y1

**Distribution Requirements:** Science

**Breadth Requirements:** Living Things and Their Environment (4)

---

**IMM429H1 - Developmental Immunology**

**Hours: 24L**

Hematopoiesis, myelopoiesis, lymphopoiesis, a study of the development of cells involved in the immune system including their ontogeny, physical, molecular, and biochemical characteristics, regulation of differentiation and maturation, positive and negative selection of lymphocytes.

**Prerequisite:** IMM350H1/IMM351H1 (IMM334Y1/IMM335Y1)

**Distribution Requirements:** Science

**Breadth Requirements:** Living Things and Their Environment (4)

---

**IMM430H1 - Clinical Immunology**

**Hours: 24L/24T**

This course will address the underlying pathogenesis as well as highlight the challenges of treating immune-related conditions such as autoimmunity, cancer, HIV, and transplantation and graft rejection. Half of the lectures will address the genetics and cellular pathogenesis of autoimmune diseases such as multiple sclerosis, type I diabetes and lupus. Other lectures will overview a number of immunological challenges faced in the clinic, such as preventing graft rejection after transplantation or boosting the immune system to fight cancer and HIV.

**Prerequisite:** IMM350H1/IMM351H1 (IMM334Y1/IMM335Y1)

**Distribution Requirements:** Science

**Breadth Requirements:** Living Things and Their Environment (4)

---

**IMM431H1 - Immunotherapy**

**Hours: 24L/12T**

Therapies that enhance, or suppress, the body’s immune response have proven remarkably efficient for the treatment of human diseases such as cancer, autoimmunity and chronic inflammation. Some of these therapies, such as the so-called checkpoint inhibitors and CAR-T cell therapies have recently leaped from bench to bedside. This course will cover the fundamental immune principles at play, how they were discovered, as well as the existing and future immune therapies to treat these diseases.

**Prerequisite:** IMM350H1/IMM351H1

**Recommended Preparation:** IMM428H1

**Distribution Requirements:** Science

**Breadth Requirements:** Living Things and Their Environment (4)

---

**IMM435H1 - Practical Immunology**

**Hours: 72P**

Application of basic principles acquired from IMM350H1/IMM351H1 (IMM334Y1/IMM335Y1); immunological procedures performed in research and diagnostic laboratories using molecular and cellular approaches; instruction through lectures, video tapes, and practical exercises in the laboratory.

**Prerequisite:** BCH210H1/BCH242Y1, IMM350H1/IMM351H1/IMM334Y1/IMM335Y1

**Distribution Requirements:** Science

**Breadth Requirements:** Living Things and Their Environment (4)

---

**IMM450Y1 - Research Project in Immunology**

**Hours: 154P**

An opportunity for specialized research in Immunology under the supervision of a member of the Faculty. There are no pre- or corequisites, although preference is given to Immunology Specialist and Major students. Not eligible for CR/NCR option.

**Distribution Requirements:** Science

**Breadth Requirements:** Living Things and Their Environment (4)
MIJ485H1 - Vaccines and Immunity

Hours: 36L

Analysis of the strategies used by pathogenic microbes to evade specific and innate immune responses, and the strategies used to combat infectious disease using vaccines, with an emphasis on molecular and immunological aspects. Special topics include: molecular basis of pathogenicity and immune-evasion strategies; vaccination strategies; challenges to vaccine implementation (given jointly by the Departments of Molecular Genetics and Immunology).

Prerequisite: (IMM340H1/IMM341H1), (IMM350H1/IMM351H1), MGY377H1, MGY378H1
Exclusion: MBY480H1, MGY485H1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)
Impact Centre

Faculty List

Professor and Director
M. Cynthia Goh, BS, PhD (U)

Cross Appointed
E. Istrate, BASc, PhD

Introduction

The Impact Centre's goal is for proactive knowledge translation, in which university-based expertise is brought to create value to society. Innovation and entrepreneurship are important aspects in this process, and the Impact Centre is home to a number of training activities for students to gain entrepreneurial skills. These skills are useful whether starting a company, or joining an existing company. At the undergraduate level, this program includes lecture-based and experiential-learning courses.

The courses are aimed at students from all disciplines. Inventions sometimes come from the science or engineering labs, but getting them out of the lab and available to meeting society's needs requires a very diverse set of skills. This is usually done by multi-disciplinary teams with representatives from the sciences, the social sciences and the humanities. Therefore, the courses will emphasise such collaborations between students of diverse backgrounds.

Impact Centre Courses

**IMC200H1 - Innovation and Entrepreneurship**

**Hours:** 24L

How do innovations become useful in society? What is needed for a company to use such innovations successfully? Why and how do individuals and companies commercialize new ideas or technologies? This course provides a broad introduction to entrepreneurship, entrepreneurial skills and the methodology used by entrepreneurs to start a new venture.

**Prerequisite:** 4.0 FCEs in any subject
**Exclusion:** RSM100H1
**Recommended Preparation:** No particular preparation needed.

The course is targeted at students from all disciplines (science, humanities, social sciences), who are interested in entrepreneurship. Because this is an introductory course, students who have previously taken entrepreneurship courses are strongly discouraged from registering.

**Distribution Requirements:** Social Science
**Breadth Requirements:** Society and its Institutions (3)

**IMC299Y1 - Research Opportunity Program**

Credit course for supervised participation in faculty research project. Details at https://www.artsci.utoronto.ca/current/academics/research-opportunities/... Not eligible for CR/NCR option.

**Distribution Requirements:** Science; Social Science

**IMC391H1 - Exploring New Ventures**

**Hours:** 12L/48P

This experiential learning course allows students to explore the inner working of new venture companies or other innovative organizations. The majority of the course consists of activities applying entrepreneurial concepts within a local organization, with oversight from the Impact Centre. In-class activities facilitate the application of entrepreneurial tools to develop the students' entrepreneurial skills.

**Prerequisite:** 8.0 FCEs in any subject
**Corequisite:** IMC200H1/RSM100H1/MGT100H1
**Exclusion:** IMC390Y1, IMC392Y1
**Recommended Preparation:** The experiential learning activities are targeted at students from all disciplines including science, social sciences and humanities.

**Distribution Requirements:** Social Science
**Breadth Requirements:** Society and its Institutions (3)

**IVP210H1 - Holography for 3D Visualization**

**Hours:** 24L/36P

An introduction to the theory and practice of holography. Human perception & 3D visualization; fundamentals of 3D modeling; ray and wave optics; interference, diffraction, coherence; transmission and reflection holograms; colour perception; stereograms. Applications of holography in art, medicine, and technology. Computer simulation, design, and construction of holograms.

**Exclusion:** JOP210H1
**Distribution Requirements:** Science
**Breadth Requirements:** The Physical and Mathematical Universes (5)
**IMC392Y1 - Exploring New Ventures**

**Hours:** 12L/96P

This experiential learning course allows students to explore the inner working of new venture companies or other innovative organizations. The majority of the course consists of activities applying entrepreneurial concepts within a local organization, with oversight from the Impact Centre. In-class activities facilitate the application of entrepreneurial tools to develop the students’ entrepreneurial skills.

**Prerequisite:** 8.0 FCEs in any subject.  
**Corequisite:** IMC200H1/RSM100H1/MGT100H1  
**Exclusion:** IMC390Y1, IMC391H1  
**Recommended Preparation:** The experiential learning activities are targeted at students from all disciplines including science, social sciences and humanities.  
**Distribution Requirements:** Science; Social Science  
**Breadth Requirements:** Society and its Institutions (3)

---

**IMC399Y1 - Research Opportunity Program**

Credit course for supervised participation in faculty research project. Details at https://www.artsci.utoronto.ca/current/academics/research-opportunities/... Not eligible for CR/NCR option.

B. Wastasecoot
K. White

Introduction

Indigenous Studies is an interdisciplinary undergraduate program dedicated to the study and research of Indigenous peoples in Canada and throughout the world. The program offers courses that engender a rigorous and respectful understanding of Indigenous peoples’ languages, knowledges, cultures, histories, politics, arts, intellectual traditions and research methodologies. INS offers Specialist, Major, and Minor Programs within the Faculty of Arts & Science. Students are encouraged to seek counselling and information about this program from indigenous.studies@utoronto.ca or on our website at https://www.indigenousstudies.utoronto.ca.

Indigenous Studies Programs

Indigenous Studies Specialist (Arts Program) - ASSPE0115

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

(10 full courses or their equivalents, including at least one 400+level course)

1. INS201Y1
2. INS210Y1/INS220Y1/INS230H1 and INS231H1
3. INS300Y1 and INS301Y1/INS351Y1
4. INS350H1
5. Four additional full-course equivalents from Group A (note: some of these courses have prerequisites)
6. One additional FCE from Group A or Group B below (note: some of these courses have prerequisites)
7. For numbers 5 and 6 above, 2 FCE’s must be at the 300 level and .5 FCE at the fourth year level.

Note: A student who wishes to complete their program in four years should take at least two courses in Indigenous Studies each year for the first two years, for example, INS201Y1 and INS210Y1/

Indigenous Studies Major (Arts Program) - ASMAJ0115

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

(7 full courses or their equivalent, including at least two 300+level courses)

1. INS201Y1
2. INS210Y1/INS220Y1/INS230H1 and INS231H1
3. INS300Y1 and INS301Y1/INS351Y1
4. INS350H1
5. Two additional full-course equivalents from INS or JFP (note: some of these courses have prerequisites)
6. One additional .5 FCE from Group A or one .5 FCE from Group B below (note: some of these courses have prerequisites)
7. Of the courses chosen, at least 2 FCE must be at the 300+ level and .5 FCE at the 400 level.

Note: A student who wishes to complete their program in four years should take at least two courses in Indigenous Studies each year for the first two years, for example, INS201Y1 and INS210Y1/

Indigenous Studies Minor (Arts Program) - ASMIN0115

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

(4 full courses or their equivalent, including at least one full-course equivalent at the 300+ level)

1. INS201Y1
2. INS300Y1/INS301Y1/INS351Y1
3. One additional full-course equivalent from INS or JFP (note: some of these courses have prerequisites)
4. One additional full-course equivalent from Group A below (note: some of these courses have prerequisites)

Note: A student who wishes to complete their program in four years should take at least two courses in Indigenous Studies each year for the first two years, for example, INS201Y1 and INS210Y1/
INS200H1 Introduction to Indigenous Truth and Resilience
INS210H1 Introduction to Indigenous Studies: Foundations, History and Politics
JPI201H Indigenous Politics in Canada
INS205H1 Indigenous Worldviews, Spiritual and Healing Traditions
INS210Y1 Introduction to Anishinaabemowin
INS215Y1 Introduction to an Indigenous Language of Canada
INS220Y1 Introduction to Kanien’kéha (Mohawk Language)
INS230H1 Introduction to Inuktitut
INS231H1 Elementary Inuktitut
INS240Y1 Ecological Interactions: Intro to Indigenous and Western Sciences
INS250H1 Indigenous Environmental Science and Practice
INS261H1 Contemporary Challenges Facing Indigenous Communities
INS300Y1 Worldviews, Indigenous Knowledges, and Oral Tradition
INS301Y1 Indigenous Languages and Cultures
INS302H1 Indigenous Representation in the Mass Media and Society
INS310Y1 Anishinaabemowin II
INS322H1 Indigenous Narratives of Empowerment
JIG322H1 Indigenous Worlds, Worldviews and the Environment
INS323Y1 Kanien’kéha II
INS340Y1 Indigenous Health Science
INS341H1 North American Indigenous Theatre
INS350H1 Indigenous Health Systems
INS351Y1 Indigenous Legends & Teaching
INS352H1 Indigenous Leadership, Policy and Practices in Canada
INS355H1 Current Issues in Indigenous Environment and Health
INS352H1 Indigenous Leadership, Policy and Practices in Canada
INS353H1 First Nations Politics in Canada
INS354H1 Indigenous Governance and Self-Determination
INS360Y1 Politics and Process of Reconciliation in Canada
INS371H1 Topics in Indigenous Literatures
INS372H1 Special Topics in Indigenous Language
INS390H1 Research and Ethics in Indigenous Studies
INS398H0 Research Excursions
INS399Y0
INS491Y1 Topics in International Indigenous Studies
INS402H1 Traditional Indigenous Ecological Knowledge
INS403H1 Indigenous Peoples and the Urban Context

Ins200y1/ins230h1 and ins231h1 the first year; ins300y1 and another 300 level course from the second year; ins301y1/ins351y1 (offered in alternative years) and another 300 level course from ins the third year; and a four hundred level ins or jfp course; or one 400 level half course and one 300 level course in their final year.

Course Groups

Group A

- INS200H1 Introduction to Indigenous Truth and Resilience
- INS201Y1 Introduction to Indigenous Studies: Foundations, History and Politics
- JPI201H Indigenous Politics in Canada
- INS205H1 Indigenous Worldviews, Spiritual and Healing Traditions
- INS210Y1 Introduction to Anishinaabemowin
- INS215Y1 Introduction to an Indigenous Language of Canada
- INS220Y1 Introduction to Kanien’kéha (Mohawk Language)
- INS230H1 Introduction to Inuktitut
- INS231H1 Elementary Inuktitut
- INS240Y1 Ecological Interactions: Intro to Indigenous and Western Sciences
- INS250H1 Indigenous Environmental Science and Practice
- INS261H1 Contemporary Challenges Facing Indigenous Communities
- INS300Y1 Worldviews, Indigenous Knowledges, and Oral Tradition
- INS301Y1 Indigenous Languages and Cultures
- INS302H1 Indigenous Representation in the Mass Media and Society
- INS310Y1 Anishinaabemowin II
- INS322H1 Indigenous Narratives of Empowerment
- JIG322H1 Indigenous Worlds, Worldviews and the Environment
- INS323Y1 Kanien’kéha II
- INS340Y1 Indigenous Health Science
- INS341H1 North American Indigenous Theatre
- INS350H1 Indigenous Health Systems
- INS351Y1 Indigenous Legends & Teaching
- INS352H1 Indigenous Leadership, Policy and Practices in Canada
- INS355H1 Current Issues in Indigenous Environment and Health
- INS352H1 Indigenous Leadership, Policy and Practices in Canada
- INS353H1 First Nations Politics in Canada
- INS354H1 Indigenous Governance and Self-Determination
- INS360Y1 Politics and Process of Reconciliation in Canada
- INS371H1 Topics in Indigenous Literatures
- INS372H1 Special Topics in Indigenous Language
- INS390H1 Research and Ethics in Indigenous Studies
- INS398H0 Research Excursions
- INS399Y0
- INS491Y1 Topics in International Indigenous Studies
- INS402H1 Traditional Indigenous Ecological Knowledge
- INS403H1 Indigenous Peoples and the Urban Context
- INS404H1 Anishinaabewin Intellectual Traditions, Narrative and Culture
- INS405H1 Indigenous Thought & Expression: Creative Non-fiction
- INS407H1 Indigenous Environmental Justice
- JIG440H1 Indigenous Geographies
- JFP450H1 Indigenous Issues in Health and Healing
- INS460H1 Indigenous Theory, Research and Methods
- INS491Y1 Topics in International Indigenous Studies
- INS493H1 Independent Experiential Studies
- INS494Y1 Independent Experiential Studies
- INS495Y1 Independent Research
- INS496H1 Independent Research
- INS497H1 Independent Research
- INS498Y1 Independent Research
- ANT315H1 Arctic Archaeology
- ANT327H1 "Diversity": Critical/Comparative Studies of Indigeneity, Multiculturalism and (Settler) Colonialism
- ANT384H1 Special Topics in Society, Culture and Language
- ANT388H1 Anthropologists and Indigenous Peoples in North America
- ANT458H1 Settler-Colonialism and Indigenous Health in Canada
- ENG254H1 Introduction to Indigenous Literatures
- ENG355Y1 Transnational Indigenous Literatures
- HIS262H1 Canada: A Short History of Here
- HIS366H1 Aboriginal Peoples of the Great Lakes from 1815 to the Present
- HIS369H1 Aboriginal Peoples of the Great Lakes from 1850 to 1830
- HIS419H1 Canada By Treaty: Alliances, Title Transfers and Land Claims
- HIS472H1 Indigenous-Newcomer Relations in Canadian History
- LIN458H1 Revitalizing Languages
- WGS395H1

Group B

- ANT200Y1 Introduction to Archaeology
- ANT204H1 Social Cultural Anthropology and Global Issues
- ANT319Y1 Archaeology of North America
- ANT311Y1 Archaeological Fieldwork
- ANT348H1 Medical Anthropology: Health, Power and Politics
- ANT366H1 Anthropology of Activism and Social Justice
- ANT410H1 Hunter-Gatherers Past & Present
- HIS106Y1 The African Diaspora in the Americas, 1492-1804
- HIS263Y1
- HIS318H1 The "Wild" West in Canada
- HIS365H1
- HIS402H1 Canada and Decolonization
- JHN323H1 Indigeneity in the Caribbean
- LIN351H1 Sociolinguistic Patterns in Language
- NEW225H1 Caribbean Societies
- NEW226H1 Caribbean Political Thought
- NEW240H1 Introduction to Critical Equity and Solidarity Studies
- RLG307H1 Museums and Material Religion
Faculty of Arts & Science Language Citation

Indigenous Studies participates in the Faculty of Arts & Science Language Citation Initiative for Anishinaabemowin. The study of the Anishinaabe language is a demanding and intellectually rewarding educational experience. Successful study of this language demonstrates intelligence, discipline, analytical sophistication, and an excellent memory. The study of any language provides invaluable insights into the varieties of human culture and expression.

In each language the Language Citation recognizes a significant level of achievement in language study with a high level of academic success. The Citation in Anishinaabemowin is available to students who complete INS210Y1 and earn a grade of at least B- in INS310Y1 and INS301Y1/INS351Y1.

Students should note that, as explained in this Calendar, the Language Citation is not equivalent to an academic program and that enrolment in a program is not necessary in order to earn the recognition bestowed by the Citation.

Indigenous Studies Courses

INS200H1 - Introduction to Indigenous Truth and Resilience

Hours: 24L/12T

This course is an interdisciplinary introduction to the historical and contemporary experiences of Indigenous peoples in Canada, with an emphasis on local lands and peoples. The course will explore Indigenous resilience, relationships with settlers and settler states, and principles and ethics of Indigenous Knowledge. Tutorials will focus on critical discussion and experiential learning.

Distribution Requirements: Humanities; Social Science
Breadth Requirements: Society and its Institutions (3)

INS201Y1 - Introduction to Indigenous Studies: Foundations, History and Politics

Hours: 48L/24T

This course is designed to introduce students to the ideas, methods and themes of the discipline of Indigenous Studies. The development of the field of Indigenous Studies in Canada will form an important focus in the first half. The second part of the course will address "history and politics", including an overview of the historical processes of diplomacy, alliances, and treaty-making.

Exclusion: ABS201Y1- Introduction to Aboriginal Studies
Distribution Requirements: Humanities; Social Science
Breadth Requirements: Creative and Cultural Representations (1); Society and its Institutions (3)

JPI201H1 - Indigenous Politics in Canada

Previous Course Number: POL308H1
Hours: 24L/12T

This course explores key issues in Indigenous politics in Canada. Provides students with an overview of historical and contemporary socio-political issues in Indigenous societies and institutions such as Indigenous self-governance, land claims and treaty negotiations.

Prerequisite: 4.0 credits including 1.0 POL credit or INS201Y1
Exclusion: POL308H1
Recommended Preparation: POL214H1 or POL224H1
Distribution Requirements: Social Science
Breadth Requirements: Creative and Cultural Representations (1)

INS205H1 - Indigenous Worldviews, Spiritual and Healing Traditions

Hours: 24L

This course will discuss the relationship between spiritual philosophies, beliefs, traditions and practices that contribute to meaning in Indigenous communities. This course will emphasize traditions and teachings and understanding the role of spirituality historically and within contemporary Indigenous societies, including governance, treaties, environment, culture, healing and everyday life.

Prerequisite: INS201Y1 or INS200H1
Exclusion: ABS205H1
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)
INS210Y1 - Introduction to Anishinaabemowin

Hours: 72L

An introduction to the Anishinaabe language, including the syllabic writing system.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

INS215Y1 - Introduction to an Indigenous Language of Canada

Hours: 72L

This course will offer an introduction to one of Canada's Indigenous languages, including its writing system. Speaking skills will be emphasized.

Exclusion: ABS215H1; ABS215Y1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

INS220Y1 - Introduction to Kanien'kéha (Mohawk Language)

Hours: 72L

An introduction to Kanien'kéha (Mohawk Language), a member of the Iroquoian language family.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

INS230H1 - Introduction to Inuktitut

Hours: 24L

An introduction to one dialect of Inuktitut, the language of the Inuit, including aspects of other dialects and the syllabic writing system.

Exclusion: ABS230H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

INS231H1 - Elementary Inuktitut

Hours: 24L

This course builds on the introduction to Inuktitut from ABS230H. Emphasis will be placed on developing grammatical complexity and vocabulary in students' oral skills, as well as dialect and cultural awareness.

Prerequisite: INS230H1
Exclusion: ABS231H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

INS240Y1 - Ecological Interactions: Intro to Indigenous and Western Sciences

Hours: 72L/72P

Introduction to methodologies and applications of Indigenous and Western sciences, with an emphasis on environmental change, animal behaviour, evolution, sustainable practices, and implications of intrinsic ecological connections. Exploratory labs, often outdoors, develop literacy and skills in each paradigm as well as critical thought, creative reflection, and synthesis of knowledge.

Prerequisite: INS201Y1
Exclusion: ABS240Y1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

INS250H1 - Indigenous Environmental Science and Practice

Hours: 24L

This course is a study of the ecological and scientific teachings of Indigenous peoples. The course provides an overview of Indigenous peoples' relationships with the natural world in historical and contemporary environmental issues and their implications for Indigenous Peoples and others.

Prerequisite: INS201Y1
Exclusion: ABS250H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)
INS261H1 - Contemporary Challenges Facing Indigenous Communities

Hours: 24L

This is a survey course focusing on the contemporary challenges faced by Indigenous peoples in Canada. In this course students research specific challenges facing Indigenous communities today. This includes specific challenges that arise out of the broader topic areas of language and culture, land rights, economics, governance, youth, education, health, social services, environment, violence, healing, community development, repatriation of cultural property, and decolonization.

Prerequisite: INS201Y1
Exclusion: ABS261H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

INS300Y1 - Worldviews, Indigenous Knowledges, and Oral Tradition

Hours: 48L

A study of the languages and culture of Indigenous peoples through exploration of oral histories, from creation stories until present times, including the role of oral history and methods for studying oral history through accounts told by elders.

Prerequisite: 5 FCE including INS201Y1, plus one additional INS full course equivalent
Exclusion: ABS300Y1
Distribution Requirements: Humanities; Social Science
Breadth Requirements: Creative and Cultural Representations (1)

INS301Y1 - Indigenous Languages and Cultures

Hours: 48L

Examination of the historical interplay of Indigenous languages and cultures in Canada. Particular focus is on the language and culture of an Indigenous people of Ontario.

Prerequisite: 5 FCE including INS201Y1, plus one additional INS full course equivalent
Exclusion: ABS301Y1
Distribution Requirements: Humanities; Social Science
Breadth Requirements: Creative and Cultural Representations (1)

INS302H1 - Indigenous Representation in the Mass Media and Society

Hours: 24L

A survey of historical and contemporary representations of Indigenous people in the mass media. Introduction to basic techniques for evaluating, analyzing, and understanding the construction of Indigeneity as it is communicated through film, television, and other media. Examination of racial stereotypes and the role of mass communication in perpetuating and challenging stereotypes, cultural appropriation, Indigenous media production, impact of media portrayal of Indigenous peoples.

Prerequisite: 8 FCE including INS201Y1, plus one additional INS full course equivalent
Exclusion: ABS302H1
Distribution Requirements: Humanities; Social Science
Breadth Requirements: Creative and Cultural Representations (1)

INS310Y1 - Anishinaabemowin II

Hours: 72L

Further study of the Anishinaabe language with emphasis on speaking and writing.

Prerequisite: INS210Y1
Exclusion: ABS310Y1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

INS322H1 - Indigenous Narratives of Empowerment

Hours: 24L

This course explores Indigenous decolonization and empowerment by analysing comparatively theoretical and literary debates that focus on issues of sovereignty, gender, grass-roots activism, and anti-racism. It analyses several emerging paradigm approaches to this set of debates including intersectional critical-race theory, Indigenous feminisms, and decolonization practices in theoretical and literary texts.

Prerequisite: 8 FCE including INS201Y1, plus one additional INS full course equivalent
Exclusion: ABS322H1
Distribution Requirements: Humanities; Social Science
Breadth Requirements: Creative and Cultural Representations (1)
JIG322H1 - Indigenous Worlds, Worldviews and the Environment

Hours: 24L

Explores the diverse ways of understanding and responding to the world that emerge from indigenous cultures around the world. Examines how indigenous ways of being and relating to their natural environment can help us understand and address the current environmental crisis. Using examples of indigenous activism from Canada and around the world, examines how colonial histories shape dispossession and marginalization and inform visions for the future. Topics include traditional ecological knowledge, place-based social movements, environmental concerns of indigenous peoples, biocultural restoration and decolonization of nature-human relations.

Prerequisite: 8.0 credits including one of INS200H1, INS201Y1, INS250H1, GGR107H1, GGR124H1, GGR240H1, GGR246H1, GGR254H1
Exclusion: JAG321H1, GGR321H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

INS323Y1 - Kanien'kéha II

Hours: 72L

Further study of Kanien'kéha.

Prerequisite: INS220Y1
Exclusion: ABS323Y1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

INS331H1 - Indigenous Music: Technical and Theoretical Aspects

Contemporary and historical musical theory of sacred spiritual ceremonial music and social-public performance practices of Indigenous people of North America. This course will have a participatory emphasis on the music of the Haudenosaunee (Longhouse People) of the Great Lakes.

Prerequisite: 8 FCE including INS201Y1, plus one additional INS full course equivalent
Exclusion: ABS331H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

INS340Y1 - Indigenous Health Science

Hours: 48L/48P

This course is themed in six-week quarters addressing four aspects of Western Science (basic, applied, clinical and population health). Within each quarter, the Western Science theme is examined holistically using Indigenous Science and the four aspects of the Medicine Wheel (physical, mental, emotional, spiritual).

Prerequisite: 8 FCE including INS201Y1, plus one additional INS full course equivalent
Exclusion: ABS340Y1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

INS341H1 - North American Indigenous Theatre

Hours: 24L

An introduction to the evolution of Indigenous theatre in North America, examining traditional oratory, ceremony, community responsibility, and social construct and their impact on current Indigenous theatre.

Prerequisite: 8 FCE including INS201Y1, plus one additional INS full course equivalent
Exclusion: ABS341H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

INS350H1 - Indigenous Health Systems

Hours: 24L

An overview of Indigenous health systems, internationally, nationally, provincially and locally, with a focus on Ontario. Discussion of health models and strategies, policy, legislation, jurisdictional issues, Indigenous health initiatives.

Prerequisite: 8 FCE including INS201Y1 or INS200H1
Exclusion: ABS350H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)
**INS351Y1 - Indigenous Legends & Teaching**

*Hours: 24L*

An introduction to laws of Indigenous societies, focusing on the Anishinaabe, as seen through legends and teachings.

**Prerequisite:** 5 FCE including INS201Y1, plus one additional INS full course equivalent  
**Exclusion:** ABS351Y1  
**Distribution Requirements:** Humanities; Social Science  
**Breadth Requirements:** Creative and Cultural Representations (1)

**INS352H1 - Indigenous Leadership, Policy and Practices in Canada**

*Hours: 24L*

A historical and contemporary overview of leadership and politics in First Nation, Inuit and Métis communities in Canada. This course will focus on pre-contact governance structures, contemporary effects of colonization, and processes and strategies for decolonization. Various policy initiatives from Indigenous organizations will be examined.

**Prerequisite:** 5 FCE, including INS201Y1 and one additional INS designator full course equivalent  
**Exclusion:** ABS352H1  
**Distribution Requirements:** Humanities; Social Science  
**Breadth Requirements:** Society and its Institutions (3)

**INS353H1 - First Nations Politics in Canada**

*Hours: 24L*

This course examines recent trends in First Nations politics and their effects on the social, economic and political lives of First Nations Peoples. It provides students with an in-depth understanding of the socio-political and cultural context for First Nations societies in contemporary settings. It explores the legacies of the *Indian Act*, the tabling of the 1969 White Paper and responses to it, the emergence of current Indigenous political movements, Constitutional issues, and First Nations citizenship.

**Prerequisite:** 5 FCE, including INS201Y1 and one additional INS designator full course equivalent  
**Exclusion:** ABS353H1  
**Distribution Requirements:** Humanities; Social Science  
**Breadth Requirements:** Society and its Institutions (3)

**INS354H1 - Indigenous Governance and Self-Determination**

*Hours: 24L*

This course examines the theory and practice of Indigenous governance and self-determination in Canada and abroad. It studies forms of Indigenous governance and self-determination past, present and future, with a special section on Indigenous self-government agreements in Canada.

**Prerequisite:** INS353H1 or equivalent or permission of instructor  
**Exclusion:** ABS354H1  
**Distribution Requirements:** Humanities; Social Science  
**Breadth Requirements:** Society and its Institutions (3)

**INS355H1 - Current Issues in Indigenous Environment and Health**

*Hours: 24L*

This course will examine current views about Indigenous peoples’ health and relationship to environment. The course will focus on Indigenous peoples’ perceptions of health and contemporary health systems, including policy, politics and practices.

**Prerequisite:** 8 FCE, including INS201Y1, plus one additional INS designator course  
**Exclusion:** ABS355H1  
**Distribution Requirements:** Social Science  
**Breadth Requirements:** Society and its Institutions (3)

**INS360Y1 - Politics and Process of Reconciliation in Canada**

This course uses relationship-building methodologies to develop skills to examine and explore the concept and processes, practice and promises of reconciliation. Through class discussion/seminars, guest speakers, and comparative readings in: Canadian and Indigenous colonial history; the findings of the Canadian Truth and Reconciliation Commission; Canadian Human Rights Tribunal Decisions; and Indigenous solidarity movements in Canada. Students will examine reconciliation and determine whether it is a different process than 'decolonization'.

**Prerequisite:** INS201Y1, or permission of instructor  
**Exclusion:** ABS360Y1  
**Distribution Requirements:** Social Science  
**Breadth Requirements:** Society and its Institutions (3)
INS371H1 - Topics in Indigenous Literatures
Hours: 24S

This seminar provides an in-depth examination of Indigenous literatures in a comparative context. Content in any given year depends on the instructor. See Indigenous Studies website for more details.

Prerequisite: 8 FCE, including INS201Y1
Exclusion: ABS371H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

INS372H1 - Special Topics in Indigenous Language
Hours: 36S

This seminar provides an in-depth examination of Indigenous language revitalization efforts in Canada and internationally. Content in any given year depends on the instructor. See Indigenous Studies website for more information.

Prerequisite: 8 FCE, including INS201Y1 and INS210Y1/INS220Y1/(INS230H1 and INS231H1)
Exclusion: ABS372H1
Distribution Requirements: Humanities; Social Science
Breadth Requirements: Creative and Cultural Representations (1)

INS390H1 - Research and Ethics in Indigenous Studies
Hours: 24S

This course examines research approaches, strategies, methods and techniques used in Indigenous studies. It explores a range of topical issues including research ethics and protocols, intellectual property rights, research agreements and community-based research. This course includes the study of quantitative, qualitative and Indigenous methodologies. Critically examines research theories, methodologies and practices used by academic disciplines to study Indigenous peoples. Decolonized research methodologies will form a focus of this course.

Prerequisite: 8 FCEs, including INS201Y1 and at least one additional INS designator full course equivalent
Exclusion: ABS390H1
Distribution Requirements: Humanities; Social Science
Breadth Requirements: Society and its Institutions (3)

INS398H0 - Research Excursions
An instructor-supervised group project in an off-campus setting. Details at https://www.artsci.utoronto.ca/current/academics/research-opportunities/... Not eligible for CR/NCR option.

Prerequisite: 8 FCE including INS201Y1
Exclusion: ABS398H0
Distribution Requirements: Social Science

INS398Y0 - Research Excursions
An instructor-supervised group project in an off-campus setting. Details at https://www.artsci.utoronto.ca/current/academics/research-opportunities/... Not eligible for CR/NCR option.

Prerequisite: 8 FCE including INS201Y1
Exclusion: ABS399Y0
Distribution Requirements: Social Science

INS402H1 - Traditional Indigenous Ecological Knowledge
Hours: 36L

An overview of the relationships between Indigenous peoples and their environments, including an exploration of cultural, historical, and contemporary aspects of Indigenous environmental philosophies; the nature, control and transmission of Traditional Ecological Knowledge (TEK), and historical uses of TEK in managing the environment.

Prerequisite: 10 FCE, INS201Y1, plus two additional full-course equivalents in INS
Exclusion: ABS402H1
Distribution Requirements: Humanities; Social Science
Breadth Requirements: Thought, Belief and Behaviour (2)
INS403H1 - Indigenous Peoples and the Urban Context

Hours: 24S

Critically examines Indigenous peoples’ experiences, encounters and interactions in urban areas in Canada. This course explores the historical and contemporary conditions of Indigenous peoples, including urban governance and the development of Indigenous organizations. This course will focus on youth perspectives and how traditions, cultures and knowledges are expressed in urban settings.

Prerequisite: 10 FCEs, INS201Y1 plus two additional full-course equivalents in INS
Exclusion: ABS403H1
Distribution Requirements: Humanities; Social Science
Breadth Requirements: Society and its Institutions (3)

INS404H1 - Anishinaabewin Intellectual Traditions, Narrative and Culture

Hours: 24S

An examination of oral narratives with an emphasis on the significance of language. This course will give students an in-depth understanding of Anishinaabewin philosophies, teachings and values.

Prerequisite: 10 FCE, including INS201Y1 and at least two additional INS designator full course equivalents.
Exclusion: ABS404H1
Distribution Requirements: Humanities; Social Science
Breadth Requirements: Creative and Cultural Representations (1)

INS405H1 - Indigenous Thought & Expression: Creative Non-fiction

Hours: 24S

An investigation of (Anishnaabe, Iroquoian, Athapaskan, Salish), examined through the study of research and writing of creative-nonfiction.

Prerequisite: 10 FCEs, INS201Y1 plus two additional full-course equivalents in INS
Exclusion: ABS405H1; ABS405Y1
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

INS407H1 - Indigenous Environmental Justice

Hours: 36L

In this course, we will examine how Indigenous land and water governance have been impacted by colonial policies and extractive capitalist developments. We will discuss how Indigenous peoples negotiate and resist such impacts while also renewing responsibilities with land, water, and animal and plant relations. The course is primarily focused on the North American context, with many case studies taking place in Canada.

Prerequisite: Completion of at least 14 FCE, including INS201Y1 and at least two additional INS designator full course equivalents or GGR321H1. Permission of the instructor is required.
Exclusion: ABS407H1
Distribution Requirements: Humanities; Social Science
Breadth Requirements: Society and its Institutions (3)

JIG440H1 - Indigenous Geographies

Previous Course Number: GGR400H1 in 2019

Hours: 36S

This course draws on theoretical texts of Indigeneity, with a primary focus on Indigenous spaces in the Americas. Course participants will examine how core geographic concepts such as place, territory, land, movement and the scale of the body are sites of colonial dispossession and violence, as well as sites for decolonial and liberatory thought and practice. We will primarily engage with Indigenous-led scholarship within Geography and Indigenous Studies, and creative forms of knowledge production generated across Indigenous communities.

Prerequisite: 10.0 credits including one of INS200H1, INS201Y1, INS250H1, GGR107H1, GGR124H1, GGR240H1, GGR246H1, GGR254H1
Exclusion: GGR400H1 (Special Topics in Geography I: Indigenous Geographies), offered in Fall 2019
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

JFP450H1 - Indigenous Issues in Health and Healing

Hours: 24L

This course consists of an examination of health and healing from a holistic perspective (mental, physical, emotional, spiritual) and how colonialism, culture, and public policy have impacted the health of Indigenous peoples in the present day. This course is built around a case-based project in which students working in interdisciplinary groups take on the role of a traditional Indigenous healer, and then assess their healing strategy from a biomedical perspective.

Distribution Requirements: Humanities; Social Science
Breadth Requirements: Society and its Institutions (3)
INS460H1 - Indigenous Theory, Research and Methods

Hours: 36L

This course explores the basis of Indigenous knowledge and how that translates into research theory and methodology. Students will design a research project, consider Indigenous research governance and conduct an ethics review. This is a service learning course. This course is only open to students enrolled in a Specialist or Major in Indigenous Studies.

Prerequisite: 10 FCEs, including INS201Y1 and INS390H1, and at least one additional INS designator full course equivalent. 
Exclusion: ABS460Y1; ABS460H1
Distribution Requirements: Humanities; Social Science 
Breadth Requirements: Society and its Institutions (3)

INS491Y1 - Topics in International Indigenous Studies

Hours: 48S

This seminar provides an in-depth examination of Indigenous studies in international contexts. Content in any given year depends on the instructors. See Indigenous Studies website for more detail. Not eligible for CR/NCR option.

Prerequisite: INS201Y1 and two additional INS designator full-course equivalents. 
Exclusion: ABS491Y1
Recommended Preparation: INS360Y1
Distribution Requirements: Humanities; Social Science 
Breadth Requirements: Society and its Institutions (3)

INS492H1 - Topics in International Indigenous Studies

Hours: 24S

This seminar provides an in-depth examination of Indigenous studies in international contexts. Content in any given year depends on the instructors. See Indigenous Studies website for more detail. Not eligible for CR/NCR option.

Prerequisite: INS201Y1 and two additional INS designator full-course equivalents. 
Recommended Preparation: INS360Y1
Distribution Requirements: Humanities; Social Science 
Breadth Requirements: Society and its Institutions (3)

INS493H1 - Independent Experiential Studies

Students design and implement an independent experiential Indigenous studies research project in consultation with an Indigenous organization and a faculty supervisor. Enrolment requires written permission from a faculty supervisor and Director of Indigenous Studies. Not eligible for CR/NCR option.

Prerequisite: 10 FCEs, completed INS390H1 and enrolled in a major or specialist program in Indigenous Studies
Exclusion: ABS493H1
Distribution Requirements: Humanities; Social Science

INS494Y1 - Independent Experiential Studies

Students design and implement an independent experiential Indigenous studies research project in consultation with an Indigenous organization and a faculty supervisor. Enrolment requires written permission from a faculty supervisor and Director of Indigenous Studies. Not eligible for CR/NCR option.

Prerequisite: 10 FCEs, completed INS390H1 and enrolled in a major or specialist program in Indigenous Studies
Exclusion: ABS494Y1
Distribution Requirements: Humanities; Social Science

INS495Y1 - Independent Research

Supervised independent research on a topic agreed on by the student and the supervisor before enrolment in the course. Available only when someone is willing and able to supervise. Not eligible for CR/NCR option.

Prerequisite: INS201Y1 plus one additional INS designator full-course equivalent
Exclusion: ABS495Y1
Distribution Requirements: Humanities; Social Science

INS496H1 - Independent Research

Supervised independent research on a topic agreed on by the student and the supervisor before enrolment in the course. Available only when someone is willing and able to supervise. Not eligible for CR/NCR option.

Prerequisite: INS201Y1 plus one additional INS designator full-course equivalent
Exclusion: ABS496H1
Distribution Requirements: Humanities; Social Science
INS497H1 - Independent Research

Supervised independent research on a topic agreed on by the student and the supervisor before enrolment in the course. Available only when someone is willing and able to supervise. Not eligible for CR/NCR option.

Prerequisite: INS201Y1 plus one additional INS designator full-course equivalent
Exclusion: ABS497H1
Distribution Requirements: Humanities; Social Science

INS498Y1 - Independent Research

Supervised independent research on a topic agreed on by the student and the supervisor before enrolment in the course. Available only when someone is willing and able to supervise. Not eligible for CR/NCR option.

Prerequisite: INS201Y1 plus one additional INS designator full-course equivalent
Exclusion: ABS498Y1
Distribution Requirements: Humanities; Social Science

† A. Eads, PhD
H. Wang, BSc, MSc, PhD
† Cross-appointed

Introduction

Since 1965, the Centre for Industrial Relations and Human Resources (CIRHR) has brought together professors from many different disciplines and departments at the University of Toronto to teach and conduct research on all aspects of work, the workplace, labour markets and labour relations. The CIRHR’s graduate programs rank among the best in North America and its faculty reflects the depth, breadth and diversity of our university.

The overarching goal of the undergraduate program in Industrial Relations and Human Resources is to offer an interdisciplinary learning opportunity in which to study the ‘world of work and employment’ in a Canadian and global context from the perspectives of economics, history, law, management, political science, psychology and sociology. The program provides students with a theoretical background and knowledge of current developments in the field that will serve as a basis for careers areas such as: a Human Resources Generalist, Recruitment Specialist, HR Consultant, Employment Equity Officer, Training and Development Consultant, Corporate Trainer, Policy Advisor in the Ministry of Labour, Union Representative and Labour Relations Specialist. The undergraduate program in IRHR is also a perfect platform from which to enter post-graduate programs in Industrial Relations and Human Resources, Law with a specialisation in labour and employment, as well as policy and labour studies programs.

Students are encouraged to use the resources available in both the CIRHR Library and Career Centre in order to investigate current labour market trends and career options in Industrial Relations and Human Resources. In Ontario, Human Resources Professionals Association (HRPA) regulates the HR profession and issues the Certified Human Resources Professional (CHRP) designation, the national standard for excellence in human resources management. IRHR students are also encouraged to explore the services offered by HRPA. The IRHR Program Office is located in Woodsworth College and students continue to benefit from the rich academic support services and facilities available at the College.

Program Office | Woodsworth College

Regarding Program Enrolment

Admission to major and specialist programs will be determined by a student’s mark in specific courses. These are limited enrolment programs that can only accommodate a limited number of students. Achieving the marks required does not necessarily guarantee admission to the program in any given year. Requests for admission will be considered in the first program request period only. For detailed program application instructions, please consult the Arts & Science Program Toolkit. Do not change your program after year 3 if you are required to complete your degree in four years as prerequisites and program requirements will not be waived. Due to the limited enrolment nature of this program students are strongly advised to enroll in backup programs.

Industrial Relations and Human Resources Programs

Industrial Relations & Human Resources - Specialist Program (Arts Program) - ASSPE1536

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

Variable Minimum Grade or Variable Minimum Grade Average
A minimum grade/minimum grade average is needed for entry, and this minimum changes each year depending on available spaces and the number of applicants. The following courses must be completed:

Option 1

- (ECO101H1, ECO102H1) with a minimum combined average of 67%, or ECO105Y1 with a minimum grade of 80%
- 1.0 credit from SOC100H1/ SOC150H1/ PSY100H1 with a minimum combined average of 70%
Courses must be taken in the Fall and Winter terms immediately preceding the program enrolment cycle.

**Option 2**

- (ECO101H1, ECO102H1) with a combined average of 67%, or ECO105Y1 with a minimum grade of 80%
- 1.0 credit from 200+ level SOC courses with a minimum combined average of 73%

SOC requirements must be taken in the Fall and Winter terms immediately preceding the program enrolment cycle.

To ensure that students admitted to the program will be successful, students with a final grade/grade average lower than the grades listed above will not be considered for admission. Please note that obtaining this minimum grade average does not guarantee admission to the program.

**Notes:**

- Requests for admission will be considered in the first program request period only.
- Due to the limited enrolment nature of this program students are strongly advised to apply to backup programs.

**Completion Requirements:**

The specialist requires 10.0 credits including a minimum of 4.0 credits that must be at the 300+ level. Of these, at least 1.0 "IRE" credit must be at the 400 level. A course taken on a CR/NCR basis may not be used to satisfy program requirements.

1. ECO101H1 and ECO102H1, or ECO105Y1
2. 1.0 credit from SOC100H1/ SOC150H1/ PSY100H1
3. All of IRE240H1, IRE244H1, IRE260H1, IRE339H1, IRE430H1, IRE431H1
4. 1.0 credit from Group A
5. 1.0 credit from Group B
6. 0.5 credit from Group C
7. 0.5 credit from Group D
8. Additional courses (excluding those already counted) from Groups C and D for a total of 10.0 credits.

**Group A:** ECO321Y1 (or equivalent)/ HIS263Y1/ POL214Y1
**Group B:** ECO220Y1/ IRE379H1/ PSY201H1/ PY202H1/ SOC202H1
**Group C:** IRE444H1/ IRE446H1/ IRE447H1/ IRE472H1
**Group D:** GGR221H1/ HIS313H1/ INI300H1/ IRE242H1/ IRE332Y0/ IRE342H1/ IRE344H1/ IRE345H1/ IRE346H1/ IRE347H1/ IRE348H1/ IRE349H1/ IRE367H1/ IRE378H1/ IRE395H1/
IRE396H1/ IRE432Y0/ IRE449H1/ IRE494H1/ JGI216H1/ SOC367H1/ SOC368H1/ SOC439H1

**Notes:**

1. A maximum of 1.0 credit in IRE395H1 and IRE396H1 can count toward the IRHR specialist program.
2. ECO program students may use ECO339H1 in lieu of IRE339H1. Please contact the Program Office to have the course counted towards the IRHR program requirements.
3. Non "IRE" coded courses are offered by other departments. These courses may be available only to students who have completed specified prerequisites or who are enrolled in a program sponsored by the department offering the course. Check the Faculty of Arts and Science's timetable for details.

---

**Industrial Relations & Human Resources - Major (Arts Program) - ASMAJ1536**

**Enrolment Requirements:**

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

**Variable Minimum Grade Average**

A minimum grade average is needed for entry, and this minimum changes each year depending on available spaces and the number of applicants. The following courses must be completed:

**Option 1**

- (ECO101H1, ECO102H1)/ ECO105Y1
- 1.0 credit from SOC100H1/ SOC150H1/ PSY100H1

To ensure that students admitted to the program will be successful, students with a final grade average lower than 70% will not be considered for admission. Please note that obtaining this minimum grade average does not guarantee admission to the program.

Courses must be taken in the Fall and Winter terms immediately preceding the program enrolment cycle.

**Option 2**

- (ECO101H1, ECO102H1)/ ECO105Y1
- 1.0 credit from 200+ level SOC courses

To ensure that students admitted to the program will be successful, students with a final grade average lower than 70% will not be considered for admission. Please note that obtaining this minimum grade average does not guarantee admission to the program. SOC courses must be taken in the Fall and Winter terms immediately preceding the program enrolment cycle.

**Notes:**

- Requests for admission will be considered in the first program request period only.
- Due to the limited enrolment nature of this program students are strongly advised to apply to backup programs.

**Completion Requirements:**

The major requires 7.0 credits including 2.0 credits at the 300+ level of which 0.5 credit must be at the 400-level. A course taken on a CR/NCR basis may not be used to satisfy program requirements.

**First Year:**

1. ECO101H1 and ECO102H1, or ECO105Y1
2. 1.0 FCE from SOC100H1/ SOC150H1/ PSY100H1

**Higher Years:**

3. All of IRE240H1, IRE244H1, IRE260H1, IRE339H1, IRE431H1
4. 0.5 credit in 300-level IRE course from Group A
5. Additional courses from Groups A and B for a total of 7.0 credits

**Group A:** IRE339H1/ IRE346H1/ IRE347H1/ IRE348H1/ IRE367H1/ IRE378H1/ IRE379H1
Centre for Industrial Relations and Human Resources

Breadth Requirements:

Distribution Requirements:

Eligible for CR/NCR option.

Important goal of the course.

Developing strong analytical and communication skills is an important goal of the course.

Will encourage students to reflect on their own experience of work.

These questions are not as straightforward as they appear. We work for the bulk of our lives and most of our days are spent with coworkers who are neither family nor our closest friends, but we often fail to realize how self-defining work really is. This speaks to work’s centrality but also to its invisibility in reflective discourse.

However, through “popular” representations of work (e.g., such as in story-telling, cave drawings, hieroglyphs, music, writing, painting, television, film, video games, etc.,) we can begin to better understand the meaning of work and how this has changed over time. Readings in anthropology, history, economics, sociology and employment relations plus film and art criticism will help us explore these questions from an interdisciplinary perspective; assignments will encourage students to reflect on their own experience of work.

Developing strong analytical and communication skills is an important goal of the course. Restricted to first-year students. Not eligible for CR/NCR option.

Notes:

1. A maximum of 1.0 credit in IRE395H1 and IRE396H1 may count toward the Industrial Relations and Human Resources (IRHR) major program.
2. ECO program students may use ECO339H1 in lieu of IRE339H1. Please contact the Program Office to have the course counted towards the IRHR major program requirements.
3. Non "IRE" coded courses are offered by other departments. These courses may be available only to students who have completed specified prerequisites or who are enrolled in a program sponsored by the department offering the course. Check the Faculty of Arts and Science’s timetable for details.

Not all courses are offered every year. Please check the timetable for current course offerings and enrolment restrictions/conditions. Students without course prerequisites may be removed at any time they are discovered. Course descriptions, prerequisites, corequisites and exclusions are listed below.

**Industrial Relations and Human Resources Courses**

**IRE199H1 - Why We Work: Understanding Work Through the Prism of Art & Culture**

**Hours:** 24S

Why do we work? What does work mean to the average person? These questions are not as straightforward as they appear. We work for the bulk of our lives and most of our days are spent with coworkers who are neither family nor our closest friends, but we often fail to realize how self-defining work really is. This speaks to work’s centrality but also to its invisibility in reflective discourse.

However, through “popular” representations of work (e.g., such as in story-telling, cave drawings, hieroglyphs, music, writing, painting, television, film, video games, etc.,) we can begin to better understand the meaning of work and how this has changed over time. Readings in anthropology, history, economics, sociology and employment relations plus film and art criticism will help us explore these questions from an interdisciplinary perspective; assignments will encourage students to reflect on their own experience of work.

Developing strong analytical and communication skills is an important goal of the course. Restricted to first-year students. Not eligible for CR/NCR option.

**Distribution Requirements:** Social Science

**Breadth Requirements:** Society and its Institutions (3)

**IRE240H1 - Introduction to Employment Relations**

**Hours:** 36L

An introduction to the study of the world of work and employment, the history and development of employment relations, its central theories and concepts; the behaviours, outcomes, practices and institutions that emerge from or affect the employment relationship; contemporary issues and comparative employment relations systems.

**Prerequisite:** Enrolment in the Industrial Relations & Human Resources program (ASSPE/ASMAJ1536) or 4.0 FCEs and a minimum cgpa of 2.3.

**Exclusion:** WDW240H1

**Distribution Requirements:** Social Science

**Breadth Requirements:** Society and its Institutions (3)

**IRE242H1 - HRM for Industrial Relations and HR Professionals**

**Hours:** 12L/24P

This course explores the relationship between human resource management, employment relations, and industrial relations. Extensive practical course work will expose students to the functions human resource professionals execute to recruit, select, compensate, train, and evaluate the performance of employees. The course prepares students for advanced HR topics in upper level IRE courses.

**Note:** Course will not count towards Rotman Commerce program requirements.

**Prerequisite:** Enrolment in the Industrial Relations & Human Resources program (ASMAJ1536, ASSPE1536)

**Exclusion:** RSM361H1, RSM460H1

**Distribution Requirements:** Social Science

**Breadth Requirements:** Society and its Institutions (3)

**IRE244H1 - Labour Relations**

**Hours:** 36L

Introduction to the institutions, issues and legislation affecting the employment relationship in the public and private sectors in Canada, with emphasis on collective bargaining. The economic and political environment, history of the labour movement, union organization, certification, contract negotiation, strikes, dispute resolution, contract administration and grievances.

**Prerequisite:** Enrolment in the Industrial Relations & Human Resources program (ASSPE1536/ASMAJ1536) or 4.0 or more FCEs and a minimum cgpa of 2.3.

**Exclusion:** ECO244Y1, WDW244H1, WDW244Y1

**Distribution Requirements:** Social Science

**Breadth Requirements:** Society and its Institutions (3)
IRE260H1 - Organizational Behaviour

Hours: 36L

Introduction to the nature of organizations and the behaviour of individuals and groups within organizations, including topics such as culture and diversity, reward systems, motivation, leadership, politics, communication, decision-making, conflict and group processes. Not recommended for students in Commerce programs.

Prerequisite: Enrolment in the Industrial Relations & Human Resources program (ASSPE1536/ASMAJ1536) or 4.0 or more FCEs and a minimum CGPA of 2.3

Exclusion: MGT262H1, RSM260H1, WDW260H1, WDW260Y1

Distribution Requirements: Social Science

Breadth Requirements: Society and its Institutions (3)

IRE299Y1 - Research Opportunity Program

Hours: TBA

Credit course for supervised participation in faculty research project. Details at https://www.artsci.utoronto.ca/current/academics/research-opportunities/... Not eligible for CR/NCR option.

IRE332Y0 - Topics in Employment Relations (Summer Abroad Program)

Topics in Employment Relations offered in an international setting. The content may vary from year to year. For more information check the Summer Abroad website.

Exclusion: WDW332Y0

Distribution Requirements: Social Science

Breadth Requirements: Society and its Institutions (3)

IRE339H1 - Labour Markets and Public Policy

Hours: 36L

This course is designed to provide students in the Employment Relations program with knowledge of how the labour market affects the employment relationship. The basic tools of labour economics are developed and applied to various issues of organizational and government policy such as: the incentive effects of compensation arrangements, government income support programs, and minimum wage policy; the determinants of preferences for hours of work including job-sharing, overtime and retirement; the impacts of unions on compensation and productivity; public-sector employment and alternatives to the right to strike; discrimination in employment on the basis of gender and race as well as related government policies such as pay and employment equity. Note: IRE339H1 will not count towards an ECO program.

Prerequisite: ECO100Y1/ECO105Y1

Exclusion: ECO239Y1, ECO339Y1, ECO339H1, WDW339H1, ECO261H5

Distribution Requirements: Social Science

Breadth Requirements: Society and its Institutions (3)

IRE342H1 - Finance and Accounting for HR/IR Professionals

Hours: 24L/12T

This course introduces Employment Relations students to accounting and finance procedures and concepts used by Human Resources managers and Industrial Relations experts in organizations such as government, trade unions and companies. The course covers both managerial and financial accounting with an applied focus to the employment relations function within organizations. It is geared specifically to students who aspire to become HR/Labour Relations professionals where essential knowledge in finance and accounting is required. Note: Course will not count towards Rotman Commerce program requirements.

Prerequisite: 1.0 FCE from IRE240H1/IRE242H1/IRE244H1/IRE260H1

Exclusion: MGT201H1, RSM222H1

Distribution Requirements: Social Science

Breadth Requirements: Society and its Institutions (3)

IRE344H1 - Topics in Employment Relations

Hours: 36L

Topics vary from year to year, but the objective of the course is to discuss current employment relations issues and their economic, legal, political and social implications.

Prerequisite: IRE244H1, IRE260H1. Additional prerequisites depending on topic.

Exclusion: WDW344H1

Distribution Requirements: Social Science

Breadth Requirements: Society and its Institutions (3)
IRE345H1 - Topics in Employment Relations

Hours: 36L

Topics vary from year to year, but the objective of the course is to discuss current employment relations issues and their economic, legal, political and social implications.

Prerequisite: IRE244H1, IRE260H1. Additional prerequisites depending on topic.
Exclusion: WDW345H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

IRE346H1 - HR Planning & Strategy

Hours: 36L

An understanding is developed of how essential elements of the human resource planning process support organizational goals and strategies. Topics such as environmental influences, job analysis, forecasting human resource needs and ascertaining supply, succession planning, downsizing and restructuring, mergers and acquisitions, outsourcing, and strategic international issues are examined.

Prerequisite: IRE240H1/IRE244H1/IRE260H1
Exclusion: WDW346H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

IRE347H1 - Training & Development

Hours: 36L

The role of training and development initiatives in organizations. Students acquire the knowledge and skills to conduct a training needs assessment, identify training objectives, explore strategies to increase the transfer of training, design and deliver a training activity using various training methodologies, and evaluate its effectiveness.

Prerequisite: IRE260H1
Exclusion: WDW347H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

IRE348H1 - Recruitment & Selection

Hours: 36L

The principles, legal issues, and emerging trends affecting the recruitment process and selection of staff in organizations. Development of recruitment strategies, assessment of applications for employment, interviewing candidates, and the role of testing and measurement of competencies in making hiring decisions.

Prerequisite: IRE240H1/IRE244H1/IRE260H1
Exclusion: WDW348H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

IRE349H1 - Topics in Employment Relations

Hours: 36L

Topics vary from year to year, but the objective of the course is to discuss current employment relations issues and their economic, legal, political and social implications.

Prerequisite: IRE244H1, IRE260H1. Additional prerequisites depending on topic.
Exclusion: WDW349H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

IRE367H1 - Compensation

Hours: 36L

The theory and process of developing and administering compensation systems. Through the core compensation principles of efficiency, equity, consistency and competitiveness we consider such topics as: job analysis, job evaluation, pay levels and structures, pay for performance, benefits, and compensating special groups of workers.

Prerequisite: IRE260H1/RSM260H1
Exclusion: WDW367H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)
IRE378H1 - Employment Health

Hours: 36L

The influence of legislation, the labour market and collective bargaining on health policies and programs in the workplace. The rights and responsibilities of employers, employees, unions and governments for the regulation and promotion of workplace health and safety; and the implications of evolving demographic, economic, and social factors.

Prerequisite: IRE244H1/IRE260H1
Exclusion: WDW378H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

IRE379H1 - Research & Analytics for Industrial Relations and Human Resources

Hours: 24L/12T

Data science is changing the way organizations make decisions. This course introduces a data analytics perspective on employment relations and human resources, including the measurement of performance metrics, analysis of organizational policies, and visualization of data. Students will develop basic data skills in the R statistical computing environment.

Prerequisite: IRE240H1/IRE244H1/IRE260H1
Exclusion: WDW379H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

IRE395H1 - Independent Study

Independent study under the direction of a faculty member. Open only when a faculty member is willing and available to supervise. Application form is due one week before the start of term. Consult the program website for additional information. Not eligible for CR/NCR option.

Prerequisite: IRE244H1, IRE260H1 and 1 300H level IRE course.
Minimum cgpa of 2.3. Approval of the Program Coordinator.
Exclusion: IRE430H1, WDW430Y1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

IRE430H1 - Canadian Employment Law & the Non-Union Workplace

Hours: 24L

The course will focus on the law governing employment in a non-unionized workplace. Specifically, it will cover every phase of the employment relationship from hiring to termination and beyond and the rights and obligations of employers and employees as developed by the Courts and under employment-related statutes (namely the Employment Standards Act, 2000 and the Human Rights Code.) The course will also cover provisions from the Occupational Health and Safety Act.

Prerequisite: IRE244H1 and 1 300H level IRE course
Exclusion: IRE430Y1, WDW430Y1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

IRE431H1 - Canadian Labour Law & the Unionized Workplace

Hours: 24L

The course will focus on the laws impacting unionized workplaces. It will cover every phase of the Ontario Labour Relations Act, 1995 (the “LRA”) from union organizing, certification, negotiation and bargaining, collective agreement arbitration, retention of bargaining rights and decertification and termination of bargaining rights.

Prerequisite: IRE430H1
Exclusion: IRE430Y1, WDW430Y1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)
IRE432Y0 - Advanced Topics in Employment/Labour Relations (Abroad)

Advanced topics in Employment Relations offered in an international setting. The content may vary from year to year. Offered by the Professional & International Programs Office.

Prerequisite: 13 FCEs including IRE244H1, IRE260H1 and 2 300H level IRE courses.
Exclusion: WDW432Y0
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

IRE444H1 - Seminar in Employment Relations

Hours: 24S

An advanced seminar examining contemporary issues in the employment relations and human resources field. Topics vary from year to year, but the objective of the course is to discuss current issues and their economic, legal and social implications.

Prerequisite: IRE244H1, IRE260H1 and 2 300H level IRE courses
Exclusion: WDW444H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

IRE446H1 - Working as an Internal Organizational Consultant

Hours: 24S

This course examines the various elements of the consulting process and the interpersonal skills required to build trust, influence others, contract with clients, and establish and maintain strong working relationships. This seminar may include a compulsory learning format component using a service-learning placement with a community-based agency or organization. Consult the current timetable for details.

Prerequisite: IRE244H1, IRE260H1 and 2 300H level IRE courses
Exclusion: WDW446H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

IRE472H1 - Negotiations

Hours: 24S

Resolving conflicts constructively is a challenge faced by all organizations and most individuals. This course will cover fundamentals of the negotiation process and conflict resolution. This course will apply multiple cases and simulations providing students with several opportunities to build their skills.

Prerequisite: IRE244H1, IRE260H1 and 1 300H level IRE course
Exclusion: WDW372H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

IRE447H1 - Contemporary Challenges Facing Today’s Organizations

Hours: 24S

An advanced seminar exploring significant developments in organizations, and the challenges and opportunities facing professionals in the employment relations field. Emphasis is placed on developing problem solving and critical thinking skills and examining theories and concepts of employment relations.

Prerequisite: IRE244H1, IRE260H1, IRE379H1
Exclusion: WDW447H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

IRE473H1 - Sociology of Industrial Relations

Hours: 24S

This course introduces students to sociological approaches to work and industrial relations. Students are introduced to classical theories and then these perspectives are applied to analyze current labour market and employment relationships. The objective of this course is first to demonstrate how an understanding of industrial relations can be informed and enriched by classical and contemporary sociological perspectives. Second, it is to enable students to familiarise themselves with sociological perspectives so that they can compare and contrast, support or oppose, distinct approaches to industrial relations and the nature of work. This will facilitate a critical view of the theories that will be explored and applied in the course.

Prerequisite: SOC101Y1 or equivalent and at least 1 300 IRE half-credit course
Distribution Requirements: Social Science
IRE474H1 - Labour Arbitration

Hours: 24S

This course will focus on grievance arbitration and examine both procedural and substantive issues, including the scope of arbitration, pre-arbitration and arbitration processes and select issues in arbitration – discipline and discharge, contract interpretation, disability accommodation, privacy and discrimination.

Prerequisite: IRE244H1 and 1 300H level IRE course
Exclusion: IRE1260H1
Distribution Requirements: Social Science

IRE493H1 - Advanced Topics in Employment Relations

Hours: 24S

Advanced topics vary from year to year, but the objective of the course is to explore theories, concepts and emerging issues in Employment Relations and their impact on internal and external environments.

Prerequisite: IRE244H1, IRE260H1 and 2 300H level IRE courses
Exclusion: WDW493H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

IRE494H1 - Advanced Topics in Employment Relations

Hours: 24S

Advanced topics vary from year to year, but the objective of the course is to explore theories, concepts and emerging issues in Employment Relations and their impact on internal and external environments.

Prerequisite: IRE244H1, IRE260H1 and 2 300H level IRE courses
Exclusion: WDW494H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

D.J. Roberts, Ph D

Lecturer, Teaching Stream
S. English, MA

Introduction

Innis College offers courses (designated INI) that sustain two interdisciplinary academic programs: Urban Studies and Writing and Rhetoric. Innis College is also the home of the Cinema Studies Institute, which offers an impressive collection of courses (designated CIN) listed separately under Cinema Studies Institute. Courses for the Innis One Program have been inspired by the College’s two academic programs and its special relationship with the Cinema Studies Institute.

Innis One: The Creative City

Innis One: The Creative City is a first-year foundations program for students who wish to develop their creative and critical capacities by exploring the dynamism of our urban environment. Drawing from the College’s two academic programs — Urban Studies and Writing and Rhetoric — and its special relationship with the Cinema Studies Institute, Innis One coaxes students to venture beyond the academy walls and engage in an imaginative, inquiry-based, and civic-minded learning experience.

In a small-class setting, students will be encouraged to bring their own experience, passions and history into relationship with the civic issues and landscapes of Toronto, thus gaining a greater appreciation of the interplay between personally driven writing, film, and urban life. Seminars featuring guest lecturers, films and special field trips offer a unique experiential learning opportunity that will also help students to develop writing, research, and analytical skills.

All first-year students in the Faculty of Arts and Science (St. George campus) are eligible for admission. Further information is available at innis.utoronto.ca/academic-programs/one/.

Enquiries: Jannie Chien, Innis College Program Coordinator, Room 323E Innis College (416-946-7107), programs.innis@utoronto.ca.

Urban Studies

Urban Studies at Innis College provides students with the tools to make sense of their urban world. The Program examines the complex and dynamic relations among institutions, people, and physical form that create, sustain, or destroy cities.

The Program is suited for those students who wish to study cities using several disciplinary approaches. It is also of interest to those students who wish to become involved in urban issues in Toronto. The Program offers an internship in the office of either a municipal politician, non-profit research group, or other government organization as part of its experiential learning program. Because urban issues are so varied, Urban Studies combines well with many other program areas. Students are advised to consult the Program Director when designing programs that meet their particular interests. The Program encourages students to take advantage of the Study Elsewhere Program at the University of Toronto to broaden their knowledge of cities.

Enquiries: Jannie Chien, Innis College Program Coordinator, Room 323E Innis College (416-946-7107), programs.innis@utoronto.ca. Also see the Urban Studies website at http://sites.utoronto.ca/innis/urban/.

Writing and Rhetoric

Innis College’s Minor Program in Writing and Rhetoric offers a diverse array of courses that explore the worlds of oral, written, and online discourse.

Writing and rhetoric go hand in hand. In an increasingly digital world, where the variety and sheer number of texts are rapidly proliferating, the ability to produce persuasive and eloquent writing, as well as analyze and interpret texts, couldn’t be more foundational. Guiding our program is the premise that students must be equipped to engage both theoretically and practically with the multimodal world of discourse.

Rhetoric, one of the oldest disciplines in the humanities, is fundamentally concerned with how persuasion circulates in society: what transpires in texts necessarily reflects, deflects, and impacts what happens outside of them. The study of rhetoric includes analyzing the circulation of influence, identities, seductions, ideologies, narratives, tropes, ideas, compromises, and effects across a wide variety of contexts: for example, digital media environments (digital rhetoric), marketing campaigns (advertising rhetoric), medical and scientific settings (rhetoric of science and technology), and the contemporary world of political activity and activism (rhetoric of social change—including feminist rhetoric, rhetoric of race, and environmental rhetoric).

Writing, one of the most important rhetorical skills that anyone can develop, is an invaluable craft both in academic programs and beyond the university. Rhetors—who can adapt their language to audience and context and use language skillfully—exert a powerful influence in almost any setting. Our writing courses teach students how to write well in the modes, genres, and styles appropriate to particular disciplinary, institutional, and creative contexts. Each course is oriented towards the specialized writing, reading, research, and editing skills involved in a specific writing genre.

Enquiries: Jannie Chien, Innis College Program Coordinator, Room 323E Innis College (416-946-7107), programs.innis@utoronto.ca. Also see the Writing and Rhetoric website at http://sites.utoronto.ca/innis/wr/.

Innis College Programs

Urban Studies Specialist (Arts Program) - ASSPE2207

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.
Variable Minimum Grade Average
A minimum grade average in required courses is needed for entry, and this minimum changes each year depending on available spaces and the number of applicants. The following courses must be completed:

For students with 4.0 to 8.5 credits:
3.0 credits from three of the following groups:

- 1.0 credit in Economics: ECO101H1, ECO102H1, ECO105Y1
- 1.0 credit in Geography: GGR101H1, GGR107H1, GGR112H1, GGR124H1
- 1.0 credit in Political Science: POL101H1, POL106H1, POL107H1, POL109H1
- 1.0 credit in Sociology: SOC100H1, SOC150H1

For students with 9.0 or more credits:
INI235H1 and INI236H1, or:
3.0 credits from three of the following groups:

- 1.0 credit in Economics: ECO101H1, ECO102H1, ECO105Y1
- 1.0 credit in Geography: GGR101H1, GGR107H1, GGR112H1, GGR124H1
- 1.0 credit in Political Science: POL101H1, POL106H1, POL107H1, POL109H1
- 1.0 credit in Sociology: SOC100H1, SOC150H1

To ensure that students admitted to the program will be successful, applicants with a combined grade average lower than 70% in the required courses will not be considered for admission. Please note that obtaining this minimum grade average does not guarantee admission to the program.

Students are invited to inquire with the program office about possible appropriate substitutions for the courses above.

Completion Requirements:

(11.0 credits including at least 4.0 credits at the 300+ level, 1.0 of which must be at the 400-level)

First Year:
1. Three of the following selections:

- 1.0 credit from the following First year Economics courses: ECO101H1, ECO102H1, ECO105Y1
- 1.0 credit from the following First year Geography courses: GGR101H1, GGR107H1, GGR112H1, and GGR124H1
- 1.0 credit from the following First year Political Science courses: POL101H1 (formerly POL101Y1), POL106H1, POL107H1, POL109H1
- 1.0 credit from the following First year Sociology courses: SOC100H1, SOC150H1

Higher Years:
2. INI235H1 and INI236H1 (formerly INI235Y1)

3. ECO220Y1 or ( GGR270H1 and GGR271H1) or ( POL222H1 and POL232H1) or ( SOC202H1 and SOC252H1)

4. Any of the following to a total of 2.0 credits of which at least 1.0 credit must be at the 400-level: INI333H1, INI336H1, INI337H1, INI338H1, INI339H1, INI342H1, INI430H1, INI432H1, INI433H1, INI437Y1, INI439H1

5. 4.0 credits in at least three of groups A through H, including at least 2.0 credits at the 300-level or above.

Urban Studies Major (Arts Program) - ASMAJ2207

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

Variable Minimum Grade Average
A minimum grade average in required courses is needed for entry, and this minimum changes each year depending on available spaces and the number of applicants. The following courses must be completed:

2.0 credits from two of the following groups:

- 1.0 credit in Economics: ECO101H1, ECO102H1, ECO105Y1
- 1.0 credit in Geography: GGR101H1, GGR107H1, GGR112H1, GGR124H1
- 1.0 credit in Political Science: POL101H1, POL106H1, POL107H1, POL109H1
- 1.0 credit in Sociology: SOC100H1, SOC150H1

To ensure that students admitted to the program will be successful, applicants with a combined grade average lower than 70% in the required courses will not be considered for admission. Please note that obtaining this minimum grade average does not guarantee admission to the program.

Students are invited to inquire with the program office about possible appropriate substitutions for the courses above.

Completion Requirements:

(7.0 credits including at least 2.0 credits at the 300+ level, 0.5 of which must be at the 400-level)

First Year:
1. Two of the following selections:

- 1.0 credit from the following First year Economics courses: ECO101H1, ECO102H1, ECO105Y1
- 1.0 credit from the following First year Geography courses: GGR101H1, GGR107H1, GGR112H1, and GGR124H1
- 1.0 credit from the following First year Political Science courses: POL101H1 (formerly POL101Y1), POL106H1, POL107H1, POL109H1
- 1.0 credit from the following First year Sociology courses: SOC100H1, SOC150H1
Higher Years:

2. INI235H1 and INI236H1 (formerly INI235Y1)

3. Any of the following to a total of 1.0 credit of which at least 0.5 credit must be at the 400-level: INI333H1, INI336H1, INI337H1, INI338H1, INI339H1, INI342H1, INI430H1, INI432H1, INI433H1, INI437Y1, INI439H1

4. Another 0.5 credit from a 300-level or above course listed in Group A: Urban Studies

5. 2.5 credits in at least two of groups A through H, including at least 0.5 credit at the 300-level or above

**Urban Studies Minor (Arts Program) - ASMIN2207**

**Enrolment Requirements:**

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

**Variable Minimum Grade Average**

A minimum grade average in required courses is needed for entry, and this minimum changes each year depending on available spaces and the number of applicants. The following courses must be completed:

1.0 credit from one of the following groups:

- Economics: ECO101H1, ECO102H1, ECO105Y1
- Geography: GGR101H1, GGR107H1, GGR112H1, GGR124H1
- Political Science: POL101H1, POL106H1, POL107H1, POL109H1
- Sociology: SOC100H1, SOC150H1

To ensure that students admitted to the program will be successful, applicants with a combined grade average lower than 70% in the required courses will not be considered for admission. Please note that obtaining this minimum grade average does not guarantee admission to the program.

Students are invited to inquire with the program office about possible appropriate substitutions for the courses above.

**Completion Requirements:**

(4.0 credits, including at least 1.0 credit at the 300+ level)

**First Year:**

1. One of the following selections:

   - 1.0 credit from the following First year Economics courses: ECO101H1, ECO102H1, ECO105Y1;
   - 1.0 credit from the following First year Geography courses: GGR101H1, GGR107H1, GGR112H1, and GGR124H1;
   - 1.0 credit from the following First year Political Science courses: POL101H1 (formerly POL101Y1), POL106H1, POL107H1, POL109H1;
   - 1.0 credit from the following First year Sociology courses: SOC100H1, SOC150H1;

**Higher Years:**

2. INI235H1 and INI236H1 (formerly INI235Y1)

3. 0.5 credit from a 300-level or above course listed in Group A: Urban Studies

4. 1.5 credits in at least two of groups A through H, including at least 0.5 credit at the 300-level or above.

**Writing and Rhetoric Minor (Arts Program) - ASMIN2137**

**Description:**

For Program information, visit the Writing and Rhetoric web site: sites.utoronto.ca/innis/wr/. You may also contact the Writing and Rhetoric Program Coordinator, Room 323E, 2 Sussex Avenue, Innis College (416-946-7107), writingandrhetoric.innis@utoronto.ca.

**Enrolment Requirements:**

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

**Completion Requirements:**

Requirements for the Minor program:

4.0 credits, including 1.0 credit at the 300/400-level. Note: No specialist or major is available in this program.

- 2.5 credits INI writing courses (note: JEI206H1 counts as an INI course in the Writing and Rhetoric Program)
- 1.5 credits from groups A, B, or C. Courses outside these lists may be approved by the Program Director.

Note: No more than a 0.5 credit in transfer credit may be counted towards the program.

**Course Groups**

**Urban Studies Group A: Urban Studies**

- INI234H1 Cities in Popular Culture
- INI333H1 Critical Approaches to Urban Studies
- INI334H1 Urban Field Course
- INI336H1 Creative Cities
- INI337H1 Studies in Contemporary Urban Problems
- INI338H1 Advanced Topics in Urban Studies I
- INI339H1 Divided City / United City
- INI342H1 Urban Studies Research Seminar I
- INI430H1 Advanced Topics in Urban Studies II
- INI431Y1 Special Topics in Urban Studies
- INI432H1 Special Topics in Urban Studies
Urban Studies Group B: Economics

- ECO305H1 Economics of Accounting
- ECO310H1 Empirical Industrial Organization
- ECO313H1 Environmental Economics and Policies
- ECO314H1 Energy and the Environment
- ECO316H1 Applied Game Theory
- ECO320H1 Economic Analysis of Law
- ECO322H1 Canadian Economic History, 1850-1960
- ECO324H1 Economic Development
- ECO332H1 Economics of the Family
- ECO333H1 Urban Economics
- ECO334H1 The Political Economy of Media
- ECO336H1 Public Economics

Innis College Courses

Note

Courses are listed in this order:
- First Year Foundation
- Innis One
- Urban Studies
- Writing and Rhetoric
- Other Innis College courses

For Cinema Studies Courses see Cinema Studies Institute.

INI196H1 - Hoboes, Geniuses and Immigrants: Otherness in Contemporary Culture

Hours: 24L

Hoboes, geniuses, and immigrants all share a sense of Otherness in terms of their identity because they are different from the norm. This course analyzes the factors that create the sense of Otherness in an individual. Can Otherness be chosen as an identity or is it imposed by society? What conditions make Otherness a positive or negative experience? What is the distinction between difference and Otherness? Instances of Otherness both negative and positive are analyzed in contemporary novels and films. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)
Innis One Courses

IN100H1 - The City Where Movies Are Made

Hours: 36S

In this course, first-year students will be introduced to film culture in Toronto from a variety of angles, including: a history of the city onscreen (both as itself and as a popular shooting location for American productions); an account of major Toronto filmmaking sites and institutions; introductions to local directors and producers; and overviews of contemporary local film festival culture (TIFF and beyond) as well as the city’s film-critical community. Through a combination of lectures, screenings, field trips and special guest speakers, the students will be moved to consider both the vitality of Toronto’s film scene as well as its connections to other aspects of the city. Restricted to first-year students. Not eligible for CR/NCR option.

Exclusion: Munk One, New One, St. Mike’s One, Trinity One, Vic One, UC One, Woodsworth One

Distribution Requirements: Humanities

Breadth Requirements: Creative and Cultural Representations (1)

IN101H1 - Blogging the Just City

Hours: 36S

An introduction to the concept of the city as a creative environment promoting not only growth and wealth but also social justice, equality, cooperation, and civility. Students will learn to build their own blog to help them to observe, interpret, and reflect upon the process of urban interaction and the relationship between creativity and justice. Restricted to first-year students. Not eligible for CR/NCR option.

Exclusion: Munk One, New One, St. Mike’s One, Trinity One, Vic One, UC One, Woodsworth One

Distribution Requirements: Social Science

Breadth Requirements: Society and its Institutions (3)

INI102H1 - Telling the Stories of the City: Writing Creative Non-Fiction

Hours: 36S

An introduction to creative writing techniques and the personal essay form through which students will explore and develop their conscious connection to the natural-urban landscape. The course will include activities such as field trips, readings, interviews, and journaling to generate the material for personal essays on engagement with nature in the city. Restricted to first-year students. Not eligible for CR/NCR option.

Exclusion: Munk One, New One, St. Mike’s One, Trinity One, Vic One, UC One, Woodsworth One

Distribution Requirements: Humanities

Breadth Requirements: Creative and Cultural Representations (1)

INI106H1 - Writing Literary Journalism: Telling the Stories of the City

Hours: 36S

An introduction to literary journalism, in which students study the craft of storytelling along with interviewing, reporting, and the journalist’s ethical stance. Guest speakers, field trips, writing activities and course readings will help students engage deeply with their environment and develop the skills and sensitivity required for literary reporting. Restricted to first-year students. Not eligible for CR/NCR option.

Exclusion: Munk One, New One, St. Mike’s One, Trinity One, Vic One, UC One, Woodsworth One

Distribution Requirements: Humanities

Breadth Requirements: Creative and Cultural Representations (1)

Urban Studies Courses

INI234H1 - Cities in Popular Culture

Hours: 24L

By exploring different popular culture phenomena such as the emergence of hiphop in the Bronx, Batman’s Gotham, and Nollywood, this course works to examine the contributions of popular culture in shaping our understandings of cities (as well as providing different perspectives of the city and the urban experience than is generally captured in scholarly/academic literature). Popular culture becomes a vehicle by which we will explore different aspects of urban life and urban representation.

Prerequisite: 4.0 FCEs

Distribution Requirements: Social Science

Breadth Requirements: Society and its Institutions (3)
INI235H1 - A Multidisciplinary Introduction to Urban Studies I: Theoretical Foundations of City Building

Previous Course Number: INI235Y1

Hours: 24L

Focuses on the theoretical foundations of urbanization, urban change, and city building, with particular attention on global urban growth, history of contemporary urbanization, urban planning, governance, built form, and economic development. These topics are explored through a multidisciplinary lens, with an emphasis on understanding urban transitions over time and their meaning for contemporary urban experience.

Prerequisite: Completion of 4.0 FCEs, including 1.0 FCEs from one of the following four course groups. Economics: ECO101H1, ECO102H1, ECO105Y1; Geography: GGR101H1, GGR107H1, GGR112H1, GGR124H1; Political Science: POL101Y1, POL101H1, POL106H1, POL107H1, POL109H1, POL214Y1; Sociology: SOC100H1, SOC150H1.

Distribution Requirements: Social Science

Breadth Requirements: Society and its Institutions (3)

INI236H1 - A Multidisciplinary Introduction to Urban Studies II: Urban Challenges and Theoretical Application

Previous Course Number: INI235Y1

Hours: 24L

Cities are centres of innovation and creative energy, but they also face significant and pressing challenges. This course explores various urban issues including inequality, eroding infrastructure, and concerns arising from globalization, while also examining the ways in which municipal governments and urban citizens are imagining and implementing potential solutions to these challenges.

Prerequisite: INI235H1

Exclusion: INI235Y1

Distribution Requirements: Social Science

Breadth Requirements: Society and its Institutions (3)

INI333H1 - Critical Approaches in Urban Studies

Hours: 24L

How do power and dominance consolidate in urban settings? How do individuals and communities contest this consolidation, and claim spaces and rights in the city? These questions will be taken up through a range of critical approaches, including Indigenous, critical race feminist, political economy, queer, and anarchist perspectives. Students will have the opportunity to carry out interview-based research on an issue of equality and social justice that matters to them.

Prerequisite: INI235H1 and INI236H1

Recommended Preparation: None

Distribution Requirements: Social Science

Breadth Requirements: Society and its Institutions (3)

INI334H1 - Urban Field Course

Hours: 12S

Students will have the opportunity to travel to a destination city for a week-long examination of specific social, economic, physical, and/or environmental issues. The trip will include meetings with municipal representatives and other decision-makers (public and possibly private). The findings of the trip supplemented by bibliographic research and in-class discussion will form the basis of a major research essay. Each student is required to pay the cost of transportation and accommodation. Not eligible for CR/NCR option.

Prerequisite: INI235H1 and INI236H1

Exclusion: INI235Y1

Recommended Preparation: None

Distribution Requirements: Social Science

Breadth Requirements: Society and its Institutions (3)

INI336H1 - Creative Cities

Previous Course Number: INI336Y1

Hours: 24L

A prominent thesis in the fields of planning and economic geography is that the presence of creative occupations in a city correlates positively with the overall health of urban regions. This course will investigate the nature of this link from theoretical and empirical perspectives and examine its potential usefulness in a planning/policy context.

Prerequisite: 1.0 FCE from: GGR101H1/GGR107H1/GGR112H1/GGR124H1; INI235H1, INI236H1

Exclusion: INI336Y1

Recommended Preparation: GGR220Y1

Distribution Requirements: Social Science

Breadth Requirements: Society and its Institutions (3)
INI337H1 - Studies in Contemporary Urban Problems

Hours: 24L

This course will focus on an examination of the immediate difficulties facing Toronto and by extension all Canadian cities. Instruction will consist of a combination of lectures by the instructor and by noted experts/practitioners in a range of topic areas including urban governance, finance, planning, environmental sustainability and social welfare.

Recommended Preparation: GGR124H1/(INI235H1, INI236H1)
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

INI338H1 - Advanced Topics in Urban Studies I

Hours: 24L

This course will expose students to a range of contemporary theoretical, analytical, and policy oriented debates in Urban Studies. The emphasis will be on establishing a broad knowledge base in the multifaceted field of urban studies. The exact topics to be covered will fall broadly under the banner of urban socioeconomic change, and specific syllabi, year to year, will follow contemporary and emerging debates. This will be expanded upon in this course’s 400 level counterpart.

Exclusion: GGR347H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

INI339H1 - Divided City / United City

Hours: 24L

Focus on the impact of increased economic inequality and economic polarization trends that are reshaping Canada's metropolitan areas, changing neighbourhoods, and affecting the lives of our diverse urban population. Using the Toronto area as an example, students explore the consequences of these trends and the implications for public policy.

Prerequisite: A minimum of 8.0 FCEs
Distribution Requirements: Humanities; Social Science
Breadth Requirements: Society and its Institutions (3)

INI342H1 - Urban Studies Research Seminar I

Hours: 24S

This course provides students an opportunity to craft and initiate an Urban Studies capstone research project. Students will gain knowledge, experience and insight in utilizing qualitative research methods including interviewing, focus groups, observational analysis and other techniques. Seminars and assignments focus on the application of qualitative methods to each student’s selected urban research question.

Prerequisite: INI235H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

INI3430H1 - Advanced Topics in Urban Studies II

Hours: 24L

This course is meant to be a senior complement to INI338H1 whereby important theoretical, analytical and/or policy debates are addressed in a research seminar format. Students in INI430H1 will be expected to extend, or refine research topics identified and explored in INI338H1 in a major independent research project. Students will present their proposals, their progress reports, and their final results to the instructor and the class.

Prerequisite: INI235H1, INI236H1, INI336H1/INI338H1. Priority is given to students enrolled in the Urban Studies Major or Specialist Programs. However, consideration may be given to students with suitable course background as determined by the Program Director.
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

INI431Y1 - Special Topics in Urban Studies

From time to time, the Urban Studies Program organizes community outreach and information sessions. At the discretion of the Director, students may enroll in a special topics course and investigate these issues more deeply under the supervision of an agreeable faculty member. Proposals including a letter from an agreeable faculty member should be submitted to the Director by June 1 for a Fall or Year-long course, or by November 1 for a Spring course. Not eligible for CR/NCR option.

Prerequisite: Enrolment in a major or specialist program in Urban Studies.
Recommended Preparation: INI235H1, INI236H1, completion of research design and research methods courses, 14 FCEs in an aligned social science program.
Distribution Requirements: Social Science
INI432H1 - Special Topics in Urban Studies

Special topics courses are offered periodically for senior students in the Urban Studies Program. Offerings in any given year will depend on program priorities, availability of specialized expertise and funding. Not eligible for CR/NCR option.

Prerequisite: Enrolment in a major or specialist program in Urban Studies.

Recommended Preparation: INI235H1 and INI236H1, completion of research design and research methods courses, 14 FCEs in an aligned social science program.

Distribution Requirements: Social Science

INI433H1 - Special Topics in Urban Studies

Hours: 24S

Special topics courses are offered periodically for senior students in the Urban Studies Program. Offerings in any given year will depend on program priorities, availability of specialized expertise and funding. Not eligible for CR/NCR option.

Prerequisite: Enrolment in a major or specialist program in Urban Studies.

Recommended Preparation: INI235H1 and INI236H1, completion of research design and research methods courses, 14 FCEs in an aligned social science program.

Distribution Requirements: Social Science

INI435H1 - Independent Research in Urban Studies

Designed to allow strong students in the Major and Specialist programs to extend a piece of urban research under the supervision of a faculty member from any aligned department. Choice of ‘H’ or ‘Y’ session pursuant to the scope of the research envisioned, the proposed supervisor’s assessment of depth of the inquiry, and the approval of the program director. Proposals, including a letter from an agreeable supervisor should be submitted to the program director by June 1 for a Fall or Year session course and by November 1 for a Spring session course. Not eligible for CR/NCR option.

Prerequisite: INI235H1, INI236H1, completion of research design and research methods courses, 14 FCEs in an aligned social science program. Enrolment in the Urban Studies Major or Specialist programs.

Distribution Requirements: Social Science

INI434Y1 - Independent Research in Urban Studies

Designed to allow strong students in the Major and Specialist programs to extend a piece of urban research under the supervision of a faculty member from any aligned department. Choice of ‘H’ or ‘Y’ session pursuant to the scope of the research envisioned, the proposed supervisor’s assessment of depth of the inquiry, and the approval of the program director. Proposals, including a letter from an agreeable supervisor should be submitted to the program director by June 1 for a Fall or Year session course and by November 1 for a Spring session course. Not eligible for CR/NCR option.

Prerequisite: INI235H1, INI236H1, completion of research design and research methods courses, 14 FCEs in an aligned social science program. Enrolment in the Urban Studies Major or Specialist programs.

Distribution Requirements: Social Science

INI436H1 - Independent Research in Urban Studies

Designed to allow strong students in the Major and Specialist programs to extend a piece of urban research under the supervision of a faculty member from any aligned department. Choice of ‘H’ or ‘Y’ session pursuant to the scope of the research envisioned, the proposed supervisor’s assessment of depth of the inquiry, and the approval of the program director. Proposals, including a letter from an agreeable supervisor should be submitted to the program director by June 1 for a Fall or Year session course and by November 1 for a Spring session course. Not eligible for CR/NCR option.

Prerequisite: INI235H1, INI236H1, completion of research design and research methods courses, 14 FCEs in an aligned social science program. Enrolment in the Urban Studies Major or Specialist programs.

Distribution Requirements: Social Science
INI437Y1 - Urban Experiential Learning in Toronto & the GTA

Previous Course Number: INI306Y1
Hours: 72S
A method of studying city issues that combines readings, seminar discussions, and field trips with an 8 hour / week internship in the office of a municipal politician, local government, or non-profit organization. Readings focus on community development, urban planning, economic development and local governance. Students must fill out a ballot for the course (available by contacting the Urban Studies Program Office) by June 1st. Enrolment in this course is competitive and at the discretion of the Urban Studies Director and/or course instructor.

Prerequisite: INI235H1, INI236H1. Priority is given to students enrolled in the Urban Studies Minor, Major, or Specialist Programs. However, consideration may be given to students with suitable course background as determined by the Program Director. Note: INI437Y1 cannot be taken concurrently with JGI450Y1.
Exclusion: INI306Y1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

INI438H1 - Advanced Urban Research Project

Hours: 24S
This course will allow students to investigate an urban topic of their choice in a guided seminar environment. This course will guide students through the various steps of the research process including: proposal writing and refinement, secondary research, primary data acquisition, analysis and the production of a senior research paper. The course emphasizes the connections between the design, implementation and write-up of an in-depth research paper. Not eligible for CR/NCR option.

Prerequisite: INI235H1 and INI236H1
Exclusion: INI438Y1
Recommended Preparation: INI342H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

INI439H1 - Cities and Mega-events: Place-making, Contestation and Urban Citizenship

Hours: 24S
Mega-events, like the Olympics, give cities the opportunity to showcase themselves to the world, but the production of television-friendly urban images do much to obscure the processes, compromises and social consequences in host cities. These events are powerful tools for city branding. They are also potential opportunities for social movements and other groups and individuals to highlight their own sets of concerns. This course will explore the challenges and opportunities that cities face in hosting such events.

Prerequisite: 12.0 FCEs
Exclusion: INI430H1 (topic of same name in 2013-14), INI332H1, INI432H1 (2016)
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

JGI216H1 - Globalization and Urban Change

Hours: 24L
Focusing on the impacts that global flows of ideas, culture, people, goods, and capital have on cities throughout the globe, this course explores some of the factors that differentiate the experiences of globalization and urban change in cities at different moments in history and in various geographic locations.

Recommended Preparation: GGR124H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

JGI346H1 - The Urban Planning Process

Hours: 24L
Overview of how planning tools and practice shape the built form of cities. This course introduces twentieth century physical planning within its historical, social, legal, and political contexts. Community and urban design issues are addressed at local and regional scales and in both central cities and suburbs. The focus is on Toronto and the Canadian experience, with comparative examples from other countries, primarily the United States. Transportation costs: $20.

Exclusion: GGR361H5
Recommended Preparation: 8.0 FCE’s including GGR124H1, INI235H1, INI236H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)
JGI450Y1 - Planning for Change: Community Development in Practice

Hours: 48S

Offers senior undergraduates the opportunity to participate in a service learning course alongside graduate students. Students will examine theory and practice related to service learning and will conduct a research project designed with a community organization. The course aims to unite theory and practice by providing analytical tools to connect academic and community development work.

Prerequisite: 15 FCEs, 5.0 of which must be GGR/INI. Note: JGI450Y1 cannot be taken concurrently with INI437Y1.
Exclusion: JGI450Y1

Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

JGI454H1 - The Role of the Planner: Making a Difference

Hours: 24L

Focuses on the role of a planning practitioner in contemporary society using a wealth of examples drawn from recent issues and debates in Canadian cities and regions. The course will walk students through the demands made of planners in terms of both technical expertise as well as political necessity and ask them to think actively about how to prepare for the extraordinary growth of cities during the next century. Examples of issues that will be discussed in some detail include the myths surrounding the city vs. the suburbs, the creativity and passion involved in planning work and the need to see Toronto’s future from a regional perspective.

Prerequisite: 14.5 FCEs, 5.0 of which must be GGR/INI Urban Studies
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

INI104H1 - Writing Reports

Hours: 36S

Introduces the fundamentals of report writing within an interdisciplinary context. This writing intensive course focuses on improving writing skills appropriate to report writing genres. Informal, formal, research, and professional workplace reports are examined in terms of purpose, audience, structure, style, persuasive strategies, and use of visual rhetoric (tables, charts, graphs). This course also examines qualitative and quantitative research methods.

Distribution Requirements: Humanities; Social Science
Breadth Requirements: Thought, Belief and Behaviour (2)

INI201H1 - Theories of Rhetoric: A Brief History of Persuasion

Hours: 36S

The history of rhetoric, the philosophical art of persuasion, is a complex one bound up with the histories of philosophy, literature, and religion, the rise and fall of empires, and the emergence of modern science and media technology. We will examine the development of rhetoric over time, from the roots of the discipline in classical antiquity to the genesis of modern and postmodern rhetoric, including the New Rhetoric. We will then focus on contemporary rhetorical currents in language philosophy, gender studies, critical race studies, and affect theory.

Prerequisite: Completion of 4.0 full-course equivalents.
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

INI203H1 - Foundations of Written Discourse

Previous Course Number: INI203Y1
Hours: 36S

Designed to teach students to write persuasively and to recognize persuasive strategies at work in writing they analyze. Classical rhetorical terms, elements of style, and modes of argument are central to the course. Assignments include a rhetorical analysis, in-class close reading exercises, and a term essay. Readings include prose from a variety of disciplines, excluding fiction and poetry. Students who enrol in the course must demonstrate competence in the English language.

Prerequisite: Completion of 4.0 full-course equivalents.
Exclusion: INI203Y1
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

Writing and Rhetoric Courses

INI103H1 - Writing Essays

Hours: 24L/12T

A course on essay writing designed to equip students with the skills required to write on different subjects and in a variety of different genres (including critical analysis, the narrative essay, and argumentative writing). By unpacking the stages of the writing process, this course helps students develop research, critical reading, planning, organization, writing, editing, and proofreading skills.

Distribution Requirements: Humanities; Social Science
Breadth Requirements: Thought, Belief and Behaviour (2)
INI204H1 - The Academic Writing Process

Hours: 36S

The strategy necessary to write complete pieces of non-fiction prose, especially exposition and argument. Concepts of planning and organization include: focusing, research, outlining, patterns of logical development, introduction, paragraph development, conclusion, argumentation and persuasion, documentation, and revision. Students for whom English is a second language should have an advanced level of fluency in English before enrolling.

Prerequisite: Completion of 4.0 full-course equivalents.
Exclusion: INI204Y1
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

INI211H1 - Introduction to Creative Writing

Hours: 36S

This introductory course focuses on the process and craft of creative writing. Students will study short fiction, creative nonfiction and poetry by established writers, and learn to respond to works-in-progress by their peers. A variety of activities will help students generate, develop, and revise a portfolio of original creative work.

Prerequisite: 4.0 full-course equivalents
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

INI300H1 - Strategic Writing in Business and the Professions: Theory and Practice

Previous Course Number: INI300Y1
Hours: 36S

Aims to teach students to recognize the rhetoric of the professional workplace and to communicate strategically and ethically using written and oral discourse appropriate to business, government, and not-for-profit organizations. Case study analysis using ethical reasoning models is a central component of the course.

Prerequisite: Completion of 4.0 full-course equivalents.
Exclusion: INI300Y1; INI302H1
Distribution Requirements: Humanities; Social Science
Breadth Requirements: Creative and Cultural Representations (1)

INI301H1 - Contemporary Issues and Written Discourse: Rhetoric and the Print Media

Hours: 36S

Examines how the language and rhetoric of print media shape social issues. Rhetorical strategies at work in the media reporting of such controversial issues as international crises and military actions are examined. The construction of the columnists persona and the role of editorials are also examined.

Prerequisite: Completion of 4.0 full-course equivalents.
Distribution Requirements: Humanities; Social Science
Breadth Requirements: Society and its Institutions (3)

INI302H1 - Writing in Business and the Professions for Rotman Commerce students

Hours: 24L/12T

Designed for and restricted to undergraduates in Rotman Commerce. Assignments and course aims reflect the learning goals of the Rotman Commerce program. This course focuses on critical thinking, ethical reasoning, and the rhetoric of the world of business. The theory and practice of written and oral communication are also central. Case study analysis using ethical reasoning models is a central pedagogical tool.

Prerequisite: Completion of 4.0 full-course equivalents.
Exclusion: INI300Y1/INI300H1
Distribution Requirements: Humanities; Social Science
Breadth Requirements: Creative and Cultural Representations (1)

INI303H1 - Digital Rhetoric

Hours: 36S

Examines the profound impact of digital media on contemporary culture and discourse. Students will explore recent currents in rhetoric and digital media. Students will investigate the rhetorical operation of digital media in domains ranging from academia to politics to popular culture. The class will analyze the role of rhetorical principles, such as persuasion and identification, in a diverse array of online discourse such as discussion forums, social media, and the blogosphere.

Prerequisite: Completion of 4.0 full-course equivalents.
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)
INI304H1 - The Illusion and Reality of Evidence

Hours: 24L

This seminar in critical reading, analysis, and writing focuses on the nature, the evaluation, and the use and abuse of evidence in the process of formulating and supporting an argument. The case study method will be employed to assess the level of authority, credibility, and objectivity evident in public discourse, official sources, and academic inquiry.

Prerequisite: Completion of 4.0 full-course equivalents, and a writing course offered by the Writing and Rhetoric Program (or equivalent).
Distribution Requirements: Humanities; Social Science
Breadth Requirements: Thought, Belief and Behaviour (2)

INI305H1 - Word and Image in Modern Writing

Hours: 36S

The rhetorical term Ekphrasis, which refers to writing that is about visual art, is central in the examination of the persuasive power of the conversation or discourse that is produced when the written word attempts the evocation of visual images. Course readings will include ekphrastic texts drawn from several disciplines and genres: journalism, informal essays, poetry, and scholarly writing.

Prerequisite: Completion of 4.0 full-course equivalents.
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

INI308H1 - Selected Topics in Writing and Rhetoric

Hours: 24S

Courses on selected topics in Writing and Rhetoric.

Prerequisite: 4.0 FCEs
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

INI310H1 - Stylistic Editing and Copy Editing

Hours: 36S

This course introduces students to professional editorial conventions at two later stages of the editorial process. Both stages require analytical skills and sentence expertise. Through stylistic editing, students learn how to improve a writer’s literary style; through copy editing, they learn how to ensure both accuracy and consistency (editorial style).

Prerequisite: Completion of 4.0 full-course equivalents.
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

INI311Y1 - Seminar in Creative Writing

Hours: 72S

This workshop course examines methodological approaches to literary fiction from the perspective of the creator. Through course readings, discussion, and creative writing assignments, student writers will learn how prose writers combine stylistic techniques, point-of-view, setting, character, scenes, and structure to produce literary effects.

Prerequisite: 4.0 full-course equivalents, fluency in English.
Recommended Preparation: Experience or strong interest in writing fiction.
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

INI316H1 - Developmental and Substantive Editing

Hours: 36S

This course introduces professional editorial conventions at two early stages of the editorial process. Both stages require editors to think critically and creatively as they assess content, organization, and argument. Students learn how to analyze and evaluate these elements, envision possible improvements, and explain these suggestions persuasively.

Prerequisite: Completion of 4.0 full-course equivalents.
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)
INI405Y1 - Independent Studies in Writing and Rhetoric

Independent research projects devised by students and supervised by the Writing and Rhetoric staff. Open only to students who are completing the Minor Program in Writing and Rhetoric Program. Applications should be submitted to the Program Director by June 1 for a Fall session course or by November 1 for a Spring session course. Not eligible for CR/NCR option.

Prerequisite: Permission of Program Director.
Distribution Requirements: Humanities; Social Science

INI406H1 - Independent Studies in Writing and Rhetoric

Independent research projects devised by students and supervised by the Writing and Rhetoric staff. Open only to students who are completing the Minor Program in Writing and Rhetoric Program. Applications should be submitted to the Program Director by June 1 for a Fall session course or by November 1 for a Spring session course. Not eligible for CR/NCR option.

Prerequisite: Permission of Program Director.
Distribution Requirements: Humanities; Social Science

INI407H1 - Independent Studies in Writing and Rhetoric

Independent research projects devised by students and supervised by the Writing and Rhetoric staff. Open only to students who are completing the Minor Program in Writing and Rhetoric Program. Applications should be submitted to the Program Director by June 1 for a Fall session course or by November 1 for a Spring session course. Not eligible for CR/NCR option.

Prerequisite: Permission of Program Director.
Distribution Requirements: Humanities; Social Science

INI408Y1 - Special Topics in Writing and Rhetoric

Seminars in special topics designed for students who are completing the Minor Program in Writing and Rhetoric.

Prerequisite: Permission of instructor.
Distribution Requirements: Humanities; Social Science

INI409H1 - Special Topics in Writing and Rhetoric

Hours: 36S

Seminars in special topics designed for students who are completing the Minor Program in Writing and Rhetoric.

Prerequisite: Permission of instructor.
Distribution Requirements: Humanities; Social Science

INI410H1 - Special Topics in Writing and Rhetoric

Hours: 36S

Seminars in special topics designed for students who are completing the Minor Program in Writing and Rhetoric (e.g., "Analyzing Creative Non-Fiction").

Prerequisite: Completion of 4.0 full-course equivalents.
Distribution Requirements: Humanities; Social Science

INI413H1 - Visual Rhetoric of the Aesthetic Movement

Hours: 36L

Explores the role of writing and rhetoric in the shaping of material culture and public taste in Victorian illustrated magazines and newspapers in the Aesthetic period (1860-1900). The Great Exhibition of 1851 will provide the context for this study of texts and objects, including the decorative arts.

Prerequisite: Completion of 4.0 full-course equivalents.
Recommended Preparation: INI103H1 / INI203Y1 / INI204Y1
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

INI414H1 - Writing for Social Change

Hours: 36S

We will read and write a variety of texts focused on effecting social change. Students will be encouraged to engage with different theories of social change and an array of writing genres, ranging from journalism to critical theory to fiction. Ultimately, students will focus on one or several key social issues that they wish to write about for their final project.

Prerequisite: Completion of 4.0 full-course equivalents.
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)
**JEI206H1 - Writing English Essays**

**Hours:** 24L/12T

This course teaches students who already write effectively how to write clear, compelling, research-informed English essays. The course aims to help students recognize the function of grammar and rhetoric, the importance of audience, and the persuasive role of style.

**Prerequisite:** 1.0 ENG FCE or any 4.0 FCE. English students have priority.
**Distribution Requirements:** Humanities
**Breadth Requirements:** Creative and Cultural Representations (1)

**Other Innis College Courses**

**INI299Y1 - Research Opportunity Program**

Credit course for supervised participation in faculty research project. Details at [https://www.artsci.utoronto.ca/current/academics/research-opportunities/...](https://www.artsci.utoronto.ca/current/academics/research-opportunities/...). Not eligible for CR/NCR option.

**INI399Y1 - Research Opportunity Program**

Credit course for supervised participation in faculty research project. Details at [https://www.artsci.utoronto.ca/current/academics/research-opportunities/...](https://www.artsci.utoronto.ca/current/academics/research-opportunities/...). Not eligible for CR/NCR option.

**INI400Y1 - Independent Research**

Under the supervision of a faculty member, students explore topics of their own choice and design their own research projects for a course not otherwise available within the Faculty. The student should submit a detailed proposal and a letter of support from the supervisor by June 1 for Y and F courses and by September 1 for S courses. Not eligible for CR/NCR option.

**Prerequisite:** Normally requires completion of 15.0 full-course equivalents with 3.3 CGPA and permission of the Innis College Vice-Principal.

**INI401H1 - Independent Research**

Under the supervision of a faculty member, students explore topics of their own choice and design their own research projects for a course not otherwise available within the Faculty. The student should submit a detailed proposal and a letter of support from the supervisor by June 1 for Y and F courses and by September 1 for S courses. Not eligible for CR/NCR option.

**Prerequisite:** Normally requires completion of 15.0 full-course equivalents with 3.3 CGPA and permission of the Innis College Vice-Principal.

**INI402H1 - Independent Research**

Under the supervision of a faculty member, students explore topics of their own choice and design their own research projects for a course not otherwise available within the Faculty. The student should submit a detailed proposal and a letter of support from the supervisor by June 1 for Y and F courses and by September 1 for S courses. Not eligible for CR/NCR option.

**Prerequisite:** Normally requires completion of 15.0 full-course equivalents with 3.3 CGPA and permission of the Innis College Vice-Principal.

M. Scardi, MA, Ph D (V)

Senior Lecturers Emeritae
R. Longo Lavorato, MA, Ph D (SM)
A. Urbancic, B Ed, MA, Ph D (V)

Introduction

To study Italian is not only to acquire a language, but also to study a rich literature and a many-sided culture which have played an important, and sometimes dominant, role in Western civilization. For Canadians, the Italian contribution bears a special significance: the vast influx of Italians has brought changes in our way of life and a new living presence to reinforce traditional Italian influences, thus enriching the meaning of the term Canadian. Italian combines well with other modern languages and literatures, and other programs such as European Studies, Literary Studies, and Mediaeval and Renaissance Studies, but is by no means restricted to these. Students may choose from Specialist, Major and Minor programs in Italian Studies. Italian courses are offered for beginners as well as for students who may have prior knowledge or instruction in Italian. Oral practice is included in all language courses. Students well qualified in the Italian language may be excused from language courses in first year (please see the Undergraduate Coordinator). 300- and 400-series courses are available to qualified third and fourth-year students and may be taken concurrently. These courses offer a wide range of options in language, literature, linguistics, culture and cinema. There are courses in Italian literature, culture and cinema that are given in English and have no language requirement. In conjunction with Woodsworth College, ITA courses may be taken in Italy at the University of Siena during July and August. A number of bursaries are available. Students may apply to take their Third Year in Italy under the Study Abroad Program in conjunction with the Centre for International Experience (http://www.studentlife.utoronto.ca/cie). Undergraduate Coordinator: 416-926-2338 Email: italian.undergrad@utoronto.ca Enquiries: 100 St. Joseph St. Room 204 (416-926-2345) Website: https://italianstudies.utoronto.ca/

Italian Programs

Italian Specialist (Arts Program) - ASSPE2524

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

(10 full courses or their equivalent, including at least one full course equivalent at the 400 level)

1. The following language courses: ITA100Y1, ITA250Y1, ITA350Y1, ITA450H1
2. One additional 200-series ITA full course equivalent
3. Two full course equivalents at the 300+ level in literature, including 0.5 FCE in each of the THREE periods of Italian literature:
   - Medieval / Renaissance: ITA300H1, ITA310H1, ITA311H1
   - Baroque / Enlightenment: ITA310H1, ITA311H1, ITA320H1
   - Modern / Contemporary: ITA301H1, ITA302H1, ITA303H1

4. One half course from the following: ITA360H1, ITA363H1, ITA364H1, ITA431H1
5. One half course from the following: ITA311H1, ITA320H1, ITA321H1, ITA330H1, ITA332H1, ITA341H1, ITA342H1, ITA345H1, ITA348H1, ITA350Y1, ITA370H1, ITA380H1, ITA390H1, ITA400H1, ITA400H1, ITA410H1, ITA421H1, ITA445H1
6. Two additional full course equivalents at the 300+ level with at least one half course at the 400 level
7. ITA495H1

NOTE: No more than TWO full courses or equivalent where the language of instruction is English may be counted towards the Specialist Program.
Italian Major (Arts Program) - ASMAJ2524

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

Any 4 ITA courses (at least one full course equivalent must be a 300/400-level literature course)

Faculty of Arts & Science Language Citation

The Department of Italian Studies participates in the Faculty of Arts and Science’s Language Citation initiative for Italian. Proficiency in Italian is an invaluable asset for those wishing to pursue a career in social work, business, applied science, government, law, medicine or education. A knowledge of Italian complements undergraduate studies in other areas, such as music, fine art, literary studies, European history or political science, to name a few.

The Language Citation recognizes a significant level of achievement in language study with a high level of academic success. The Citation in Italian is available to students who, having completed a first year language course in Italian (ITA100Y1/ITA151Y1) (or the equivalent prerequisite training), earn a grade of at least B- in a second-year language course (ITA250Y1/ITA251Y1) and in a third year language course (ITA350Y1/ITA351Y1).

Students should note that the Language Citation is not equivalent to an academic program and that enrolment in a program is not necessary in order to earn the recognition bestowed by the Citation.

Guidelines for students who wish to begin the study of the Italian language at the university level

ITA100Y1 - Italian Language for Beginners – An introductory course for students with no previous knowledge of the Italian language. Not open to students with grade 11 and/or 12 U or M Italian or with previous experience, exposure or instruction in Italian.

ITA250Y1 - Intermediate Italian – The subsequent course for students who have completed ITA100Y1 or ITA151Y1.

This course is also open to students who have completed Grade 11 and/or 12 Italian (U or M level) or with previous experience or instruction in Italian. For this group, the Department may conduct assessment to determine appropriate placement.

The Department reserves the right to place students in the language course appropriate to their level of language skill.

Italian Culture and Communication Studies Minor (Arts Program) - ASMIN1245

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

4 full courses (or equivalent) including one full course equivalent from any of the following:

ITA340H1/ITA341H1/ITA342H1/ITA345H1/ITA441H1/ITA445H1 (Italian cinema courses)

ITA360H1/ITA363H1/ITA364H1/ITA431H1/ITA432H1/ITA433H1 (Italian linguistics courses)

ITA356Y0/ITA357Y0/ITA358Y0/ITA359Y0 (Italian culture courses)

Italian Minor (Arts Program) - ASMIN2524

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

(4 full courses or their equivalent)
**Italian Courses**

**ITA100Y1 - Italian Language for Beginners**

*Hours: 72S*

An introduction to the main elements of the Italian language. The development of speaking, reading, and writing skills. Introduction to Italian culture and texts.

**Exclusion:** Grade 11 and/or 12 Italian (U or M level) or previous experience or instruction in Italian.

**Distribution Requirements:** Humanities
**Breadth Requirements:** Creative and Cultural Representations (1)

**ITA102Y0 - Practical Italian**

*Hours: 48L/24P*

A course specifically designed for students who wish to take Italian as a breadth requirement. Emphasis will be given to basic aspects of communication in a functional context. This course cannot be used towards any Minor, Major or Specialist program in Italian. (Offered in Siena only)

**Exclusion:** 4U Italian or any previous university level Italian language course

**Distribution Requirements:** Humanities
**Breadth Requirements:** Creative and Cultural Representations (1)

**ITA135Y0 - Conversation and Culture: An Introduction to Italian**

*Hours: 72S*

The course is designed to introduce students to Italian grammar and develop basic oral and comprehension skills. Elements of Italian culture, past and present, are also examined in the context of language and communication. To select the appropriate second-year follow-up course, students are asked to contact the Undergraduate Coordinator. (Offered in Siena only)

**Distribution Requirements:** Humanities
**Breadth Requirements:** Creative and Cultural Representations (1)

**ITA196H1 - Image and Text in Medieval and Renaissance Italian Culture**

*Hours: 24L*

The course will explore various aspect of the interaction between literature and the visual arts in Italy from the Middle Ages to the end of the Renaissance. The focus will be on the intersection between the literary and visual modes of perception in the works of representative Italian authors from the Fourteenth to the Sixteenth Centuries. Restricted to first-year students. Not eligible for CR/NCR option.

**Distribution Requirements:** Humanities
**Breadth Requirements:** Creative and Cultural Representations (1)

**ITA197H1 - The Fine Art of Murder: Reading Detective Fiction**

*Hours: 24L*

Since its inception in the Nineteenth century, detective fiction has been one of the most popular literary genres, proving adept at both entertaining and shining a critical light on social and political problems. This course will explore the many faces of detective fiction addressing questions such as: Why does crime hold such a fascination for modern audiences? What kind of pleasure do we derive from reading stories that often follow established conventions and rules? What do these novels about crime and punishment tell us about broader social and political issues? Restricted to first-year students. Not eligible for CR/NCR option.

**Distribution Requirements:** Humanities
**Breadth Requirements:** Creative and Cultural Representations (1)

**ITA198H1 - Machiavelli and Machiavellianism**

*Hours: 24L*

An examination of Machiavelli’s political doctrine in *The Prince* and the development of his ideas in politics, ethics and the arts. Special attention will be paid to the enduring relevance of his legacy in the modern world. Restricted to first-year students. Not eligible for CR/NCR option.

**Exclusion:** VIC142H1
**Distribution Requirements:** Humanities
**Breadth Requirements:** Creative and Cultural Representations (1)
ITA199H1 - Italian Fascism and Global Responses: The Dark Side of Italianità

Hours: 24L

After WWI, Italian society faced a political, economic, and moral crisis that resulted in the rise of fascism. Using diverse sources (media, literary texts, movies, architecture and design), this course explores various reactions in Italy and abroad to the rise of Mussolini and the totalitarian State. Why did common people, intellectuals, politicians, and business and community leaders around the globe succumb to the seduction of fascism? How did other people denounce fascist violence? After an introduction to Italian fascism, the course will consider global reactions to Italian fascism and diverse responses in Italian communities abroad (e.g. Canada, USA, Argentina). Restricted to first-year students. Not eligible for CR/NCR option.

Prerequisite: None
Corequisite: None
Exclusion: None
Recommended Preparation: None
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

ITA200H1 - Major Italian Authors in Translation: from Dante to Tasso

Hours: 24L

The course will focus on authors from the Middle Ages to the Renaissance who had a defining influence on Western literature, such as Dante, Petrarca, Boccaccio, Machiavelli, Ariosto and Tasso. This course includes a component designed to enhance students' research experience. (Given in English)

Exclusion: ITA300H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

ITA201H1 - Major Italian Authors in Translation: from Marino to Calvino

Hours: 24L

The course will focus on authors from the Baroque to the Twentieth Century who had a defining influence on Western literature, such as Marino, Goldoni, Manzoni, Pirandello, Calvino. This course includes a component designed to enhance students’ research experience. (Given in English)

Exclusion: ITA301H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

ITA233H1 - Italian-Canadian Literature

Hours: 24L

The course will explore how notions of identity and (self)-representation emerge in literature by Canadian writers of Italian descent, illustrating the critical evolution of the immigrant journey from its historical experience to its current condition. This course includes a component designed to enhance students’ research experience. (Given in English)

Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

ITA235Y0 - Conversation and Culture: Intermediate Italian Intensive Oral Practice

Hours: 72S

This course is designed to enhance students oral proficiency in Italian, improve listening and reading comprehension and develop a broad lexical base for more effective communicating skills. Elements of Italian culture are also examined in the context of language and communication through a series of topical readings which form the basis of discussions. (Offered in Siena only)

Prerequisite: ITA100Y1/ITA101Y1/ITA102Y1/ITA135Y0/ITA151Y1/ITA152Y1 or permission of Department
Exclusion: ITA252Y1 (and/or higher)
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

ITA240Y1 - History of Italian Cinema

Hours: 48L/72P

This course surveys the history of Italian cinema and the sociopolitical circumstances surrounding the film industry, from its early days to the present, while also introducing the students to methods of analysis and research appropriate to the field. Emphasis will be placed on films from the silent era to the 1960s, and from the 1960s to the present. This course includes a component designed to introduce students to methods of scholarly research appropriate to the field.

The course is given in English and all films shown have English subtitles.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)
**ITA250Y1 - Intermediate Italian**

**Hours:** 72S

Grammar review, readings of Italian authors and oral practice to enhance comprehension and expressive skills.

**Prerequisite:** ITA100Y1/ITA151Y1; Grade 11 and/or 12 Italian (U or M level), or previous experience or instruction in Italian, or permission of the Department.

**Exclusion:** ITA251Y1

**Distribution Requirements:** Humanities

**Breadth Requirements:** Creative and Cultural Representations (1)

**JCI250H1 - Italian Canadian Communities**

**Hours:** 24S

This course examines the past and present settlement patterns of those of Italian descent in Canada, in rural areas and cities, including increasing suburbanization. Students will address issues such as work and employment and political participation. Challenges and opportunities will be examined, with respect to issues such as migration, community-building, belonging, and discrimination.

**Distribution Requirements:** Social Science

**Breadth Requirements:** Society and its Institutions (3)

**ITA299Y1 - Research Opportunity Program**

Credit course for supervised participation in faculty research project. Details at https://www.artsci.utoronto.ca/current/academics/research-opportunities/... Not eligible for CR/NCR option.

**Distribution Requirements:** Humanities

**ITA300H1 - History of Italian Literature: Middle Ages and Renaissance**

**Hours:** 24L

This course provides a chronological, comprehensive view of Italian literature and its major authors and trends, in their socio-historical contexts from its beginnings to the Renaissance. This course includes a component designed to enhance students' research experience.

**Prerequisite:** ITA250Y1/ITA251Y1

**Exclusion:** ITA200H1

**Distribution Requirements:** Humanities

**Breadth Requirements:** Creative and Cultural Representations (1)

**ITA301H1 - History of Italian Literature: Baroque to Contemporary**

**Hours:** 24L

This course provides a chronological, comprehensive view of Italian literature and its major authors and trends, in their socio-historical contexts from the Baroque period to the present day. This course includes a component designed to enhance students' research experience.

**Prerequisite:** ITA250Y1/ITA251Y1

**Exclusion:** ITA201H1

**Distribution Requirements:** Humanities

**Breadth Requirements:** Creative and Cultural Representations (1)

**ITA310H1 - The 'Journey' in 19th Century Italian Literature**

**Hours:** 24L

The course illustrates Italy's contribution to the history of the trope during a time when countries became increasingly interdependent and conscious of each other's cultures. Through literary and social analysis the course traces the most vital aspects of the journey motif. This course includes a component designed to enhance students' research experience. (Given in English)

**Distribution Requirements:** Humanities

**Breadth Requirements:** Creative and Cultural Representations (1)

**ITA311H1 - Mediaeval Italian Literature in Translation: Dante**

**Hours:** 24L

A study of the *Vita Nuova* and of the *Divine Comedy* within the literary and cultural contexts of the Middle Ages. This course includes a component designed to enhance students' research experience. (Given in English)

**Exclusion:** ITA320H1/ITA321H1

**Distribution Requirements:** Humanities

**Breadth Requirements:** Creative and Cultural Representations (1)
ITA312H1 - Mediaeval Italian Literature in Translation: Petrarch and Boccaccio

Hours: 24L

A study of Petrarch's Canzoniere and of Boccaccio's Decameron in relation to later Middle Ages. This course includes a component designed to enhance students' research experience. (Given in English)

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

ITA320H1 - Dante: Vita Nuova and Divina Commedia (Inferno)

Hours: 24L

Dante's poetry and great Christian epic of conversion explode with the passions of this world. This course focuses on intertextual and rhetorical strategies used to fashion the author's complex vision of contemporary society within the framework of providential history. This course includes a component designed to enhance students' research experience.

Prerequisite: ITA250Y1/ITA251Y1
Exclusion: ITA311H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

ITA321H1 - Dante: Divina Commedia (Purgatorio and Paradiso)

Hours: 24L

A continuation of ITA320H1, this course examines the Purgatorio and the Paradiso in the context of Dante's vision of contemporary society. This course includes a component designed to enhance students' research experience.

Prerequisite: ITA320H1
Exclusion: ITA311H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

ITA330H1 - Alessandro Manzoni and the 19th Century

Hours: 24L

Italy's foremost author's conscious attempt to write the great representative ("epic") work of the Risorgimento. This course explores Manzoni's continuing struggle to find the appropriate language, style, and genre to express his vision of history. This course includes a component designed to enhance students' research experience.

Prerequisite: ITA250Y1/ITA251Y1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

ITA332H1 - Love in the Renaissance

Hours: 24L

An exploration of the theme of love in the Renaissance and its development in a variety of literary forms. Analysis of treatises, poetry, short stories and letters with the purpose of examining intertextuality and the practice of imitation, as well as the social and political aspects of love, such as marriage, women's position in society, pornography, homosexuality and other issues. This course includes a component designed to enhance students' research experience. (Given in English)

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

ITA340H1 - Italian Neorealist Cinema

Hours: 24L/36P

The focus of this course is the films of Italian Neorealism, one of the most influential, artistic, and intellectual movements in the history of world cinema. While emphasis will be placed primarily on the work of Roberto Rossellini, Vittorio De Sica, and Luchino Visconti, the course will also offer a detailed discussion of the historical context and of the sociopolitical issues of postwar Italy. This course includes a component designed to enhance students' research experience. (Given in English)

Recommended Preparation: ITA240Y1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)
ITA341H1 - Gender and Genre in Italian Cinema

**Hours:** 24L/36P

The course looks at Italian cinema from the perspective of gender and genre studies. While the focus will be primarily on film, the course will also engage with different media and discuss how these have informed and influenced Italian notions of masculinity and femininity throughout the Twentieth Century. The emphasis on genre will provide the structure to organize a discourse that will embrace very diverse and multifaceted texts, and will enable students to develop their analytical and critical skills in the field. This course includes a component designed to enhance students' research experience. (Given in English)

**Distribution Requirements:** Humanities  
**Breadth Requirements:** Creative and Cultural Representations (1)

ITA342H1 - Popular Italian Cinema

**Hours:** 24L

This course discusses the notion of the *Popular* as applied to Italian cinema. By focusing on the number of films that have appropriated popular international genres such as Spaghetti Westerns, Horror, and Poliziotteschi, this course will discuss Italian cinema in a global context, drawing parallels and comparisons with other national industries. Students will gain a broader understanding of Italian film culture, and will apply their critical and research skills to a wide range of texts. This course includes a component designed to enhance students' research experience. (Given in English)

**Distribution Requirements:** Humanities  
**Breadth Requirements:** Creative and Cultural Representations (1)

ITA345H1 - Cinema of the Italian Diasporas

**Hours:** 24L/36P

This course will examine how several filmmakers of Italian descent engage with the representation of their diasporic identity. Particular emphasis will be placed on Italian-Canadian and Italian-American cinema, as well as on Italian cineastes working in Argentina, Brazil, and Australia. The course will analyze films that span from silent to contemporary, from the formation of the stereotypical images to the re-appropriation of archetypes on the part of “ethnic” filmmakers. This course includes a component designed to enhance students' research experience.(Given in English)

**Distribution Requirements:** Humanities  
**Breadth Requirements:** Creative and Cultural Representations (1)

ITA348H1 - Mass Media in Italy: The European Context

**Hours:** 24L

This course investigates Italy's pivotal role in epochal cultural changes: from manuscript to print and from print to computers. The impacts of Print Technology in the Renaissance and of Electronic Technology from Marconi onward are thoroughly analyzed. This course includes a component designed to enhance students' research experience. (Given in English)

**Distribution Requirements:** Humanities  
**Breadth Requirements:** Creative and Cultural Representations (1)

ITA350Y1 - Language Practice

**Hours:** 24P/48S

For students who have completed ITA250Y1/ITA251Y1. Discussion of problems of grammar, style, and composition. Language analysis based on readings of Italian authors. One hour a week of oral practice. This course includes a component designed to enhance students' research experience.

**Prerequisite:** ITA250Y1/ITA251Y1  
**Exclusion:** ITA351Y1  
**Distribution Requirements:** Humanities  
**Breadth Requirements:** Creative and Cultural Representations (1)

JCI350H1 - Italian Canadian Culture and Identity

**Hours:** 24S

This course examines the contributions of Canadians of Italian descent to arts, culture, identity and heritage in Canada, with attention to the diversity of the community with respect to issues such as language, religion, gender, class, sexuality, etc. A core concept addressed by the course is immigration, whether from the experiences of migrants themselves or later generations.

**Recommended Preparation:** JCI250H1/ITA233H1  
**Distribution Requirements:** Humanities  
**Breadth Requirements:** Society and its Institutions (3)
**ITA356Y0 - Italian Culture from the Middle Ages to the Renaissance**

**Hours:** 24L/24T

A survey of artists, writers, and thinkers from the time of Dante to the days of Leonardo. During field trips, the streets, squares, churches, and palazzi of many cities serve as living laboratories for a discussion of the topography of mediaeval and Renaissance cities. This course includes a component designed to enhance students’ research experience. (Offered in Siena only.)

**ITA356Y0:** This course is taught in English and is open to students from other disciplines.

**Distribution Requirements:** Humanities

**Breadth Requirements:** Creative and Cultural Representations (1); Society and its Institutions (3)

**ITA357Y0 - Italian Culture from the Middle Ages to the Renaissance**

**Hours:** 24L/24T

A survey of artists, writers, and thinkers from the time of Dante to the days of Leonardo. During field trips, the streets, squares, churches, and palazzi of many cities serve as living laboratories for a discussion of the topography of mediaeval and Renaissance cities. This course includes a component designed to enhance students’ research experience. (Offered in Siena only.)

**ITA357Y0:** Students who wish to petition the Department for credit towards a Specialist or Major in Italian will be required to do the readings in Italian.

**Distribution Requirements:** Humanities

**Breadth Requirements:** Creative and Cultural Representations (1); Society and its Institutions (3)

**ITA358Y0 - Modern Italian Culture**

**Hours:** 24L/24T

Analysis of a selection of philosophical, artistic, musical, and literary works from the age of the Baroque to the present. The main topics of discussion include: Romanticism, Italian unification, theatre, opera, Futurism, fascism, Neorealism, regional differences, and industrialization. Field trips and viewing of movies included. This course includes a component designed to enhance students’ research experience. (Offered in Siena only.)

**ITA358Y0:** This course is taught in English and is open to students from other disciplines.

**Distribution Requirements:** Humanities

**Breadth Requirements:** Creative and Cultural Representations (1); Society and its Institutions (3)

**ITA359Y0 - Modern Italian Culture**

**Hours:** 24L/24T

Analysis of a selection of philosophical, artistic, musical, and literary works from the age of the Baroque to the present. The main topics of discussion include: Romanticism, Italian unification, theatre, opera, Futurism, fascism, Neorealism, regional differences, and industrialization. Field trips and viewing of movies included. This course includes a component designed to enhance students’ research experience. (Offered in Siena only.)

**ITA359Y0:** Students who wish to petition the Department for credit towards a Specialist or Major in Italian will be required to do the readings in Italian.

**Distribution Requirements:** Humanities

**Breadth Requirements:** Creative and Cultural Representations (1); Society and its Institutions (3)

**ITA360H1 - Italian Linguistics**

**Hours:** 24L

For students having a knowledge of Italian and/or Italian dialects but no background in linguistics. Concepts of general linguistics. Italy as a linguistic entity. The structure of contemporary Italian, with special regard to its sound system and grammatical categories. This course includes a component designed to enhance students’ research experience. (Given in English)

**Prerequisite:** ITA250Y1/ITA251Y1

**Distribution Requirements:** Humanities

**Breadth Requirements:** Thought, Belief and Behaviour (2)

**ITA363H1 - Italian Sociolinguistics**

**Hours:** 24L

Starting with a survey of the sociolinguistic situation in Italy before Unification, this course deals with the complex relationship between regional languages and dialects on the one hand and Common Italian on the other. The recent rise of regional variants of Italian and its impact on the dialects are also discussed. This course includes a component designed to enhance students’ research experience.

**Prerequisite:** ITA250Y1/ITA251Y1

**Distribution Requirements:** Humanities

**Breadth Requirements:** Thought, Belief and Behaviour (2)
**ITA364H1 - Italian and Social Media**

**Hours:** 24L

The aim of this course is to examine how media can influence the evolution of language in contemporary Italy. The first part of this course has an historical goal and will be devoted to the role played by 'traditional' media (television, radio, newspapers) in the linguistic history of Italian. The second part will be devoted to the impact that social media is having on Italian. Empirical quantitative research will be based on the most important databases for contemporary Italian.

**Prerequisite:** ITA250Y1/ITA251Y1
**Distribution Requirements:** Humanities
**Breadth Requirements:** Thought, Belief and Behaviour (2)

**ITA367H1 - Topics in Italian Linguistics**

**Hours:** 2L

An open course that explores specific aspects of Italian Linguistics. This course includes a component designed to enhance students' research experience. (Given in English)

**Prerequisite:** ITA250Y1/ITA251Y1
**Distribution Requirements:** Humanities
**Breadth Requirements:** Thought, Belief and Behaviour (2)

**ITA370H1 - Power and Success in the Renaissance**

**Hours:** 24L

Concepts of power and strategies for success in Renaissance texts including Machiavelli's *Il principe*, Castiglione's *Il libro del cortegiano* and Della Casa's *Galateo*. This course includes a component designed to enhance students' research experience.

**Prerequisite:** ITA250Y1/ITA251Y1
**Distribution Requirements:** Humanities
**Breadth Requirements:** Thought, Belief and Behaviour (2)

**ITA378H1 - Topics in Italian Studies**

**Hours:** 24L

An open course that explores specific aspects of Italian Studies. This course includes a component designed to enhance students' research experience. (Given in English)

**Distribution Requirements:** Humanities
**Breadth Requirements:** Creative and Cultural Representations (1)
ITA395Y0 - Special Topics in Italian Studies

Hours: 48S

The area of concentration will depend upon the instructor teaching the course in any given year. (Offered only during the summer through the Summer Abroad Program.) Not available for CR/NCR option.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

ITA398H0 - Research Excursions

An instructor-supervised group project in an off-campus setting. Details at https://www.artsci.utoronto.ca/current/academics/research-opportunities/... Not eligible for CR/NCR option.

Distribution Requirements: Humanities

ITA398Y0 - Research Excursions

An instructor-supervised group project in an off-campus setting. Details at https://www.artsci.utoronto.ca/current/academics/research-opportunities/... Not eligible for CR/NCR option.

Distribution Requirements: Humanities

ITA399Y1 - Research Opportunity Program

Credit course for supervised participation in faculty research project. Details at https://www.artsci.utoronto.ca/current/academics/research-opportunities/... Not eligible for CR/NCR option.

ITA400H1 - Machiavelli

Hours: 24S

An intensive study of Machiavelli’s major works in English translation, including his political treatises (The Prince, excerpts from The Discourses), plays (The Mandrake Root), letters, and short story (Belfagor), in the context of Renaissance Florence, the history of Machiavelli criticism, and modern ethical debates. This course includes a component designed to enhance students’ research experience. (Given in English)

Prerequisite: Completion of at least 10.0 FCEs
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

ITA410H1 - Masterpieces of Modern Drama

Hours: 24L

This course will study works by the major Italian playwrights of the Twentieth Century, including two of Italy’s Literature Nobel Prize winners, Luigi Pirandello and Dario Fo. Particular attention will be paid to the relationship between individual works and broader literary and cultural movements, as well as to issues regarding staging and production of the plays under discussion. The course includes a component designed to enhance students’ research experience.

Prerequisite: ITA250Y1/ITA251Y1, and at least 0.5 FCE ITA literature courses at the 300-level
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

ITA420H1 - Spinning a Tale: The Italian Short Story from Boccaccio to Basile

Hours: 24L

The short story genre and its development from the Middle Ages to the Baroque. In addition to Boccaccio’s tales, included are some of the most famous stories of Western literature, which later inspired masterpieces in all art forms, such as Romeo and Juliet, Othello and Puss in Boots. This course includes a component designed to enhance students’ research experience.

Prerequisite: ITA250Y1/ITA251Y1, and at least 0.5 FCE ITA literature courses at the 300-level
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

ITA421H1 - Spinning a Tale: The Italian Short Story after 1800

Hours: 24L

Focusing on short stories by some of the most important authors of the Twentieth Century, such as Pirandello and Calvino, this course will provide an introduction to the major tendencies of contemporary Italian literature. This course includes a component designed to enhance students’ research experience.

Prerequisite: ITA250Y1/ITA251Y1, and at least 0.5 FCE ITA literature courses at the 300-level
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)
ITA425H1 - Special Topics in Italian Studies

Hours: 24L

A course on specific topics in Italian Studies, designed for advanced students. This course includes a component designed to enhance students' research experience. (Given in English)

Prerequisite: Completion of at least 7.0 FCEs
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

ITA426H1 - Special Topics in Italian Studies

Hours: 24L

A course on specific topics in Italian Studies, designed for advanced students. This course includes a component designed to enhance students' research experience.

Prerequisite: ITA250Y1/ITA251Y1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

ITA427H1 - Special Topics in Italian Linguistics

Hours: 24L

A course on specific topics in Italian Linguistics, designed for advanced students. This course includes a component designed to enhance students' research experience.

Prerequisite: ITA250Y1/ITA251Y1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

ITA431H1 - History of Italian Language I-from Middle ages to Cinquecento

Hours: 24L

An historical overview of the Italian language from the first Medieval documents to the texts of the Questione della Lingua. It deals with historical grammar and the analyses of early Italian texts. An introduction to notions of linguistic statistics. Empirical quantitative methods are based on the three most important databases of old Italian: TLIO, OVI, BIZ. This course includes a component designed to enhance students' research experience.

Prerequisite: ITA250Y1/ITA251Y1
Exclusion: ITA430H1
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

ITA432H1 - History of Italian Language II-from Cinquecento to Contemporary

Hours: 24L

The evolution of the Italian Language from the Questione della lingua to Contemporary issues pertaining to reading of literary and non literary documents and analyses of the social, political and economic conditions which influenced Early Modern, Modern and Contemporary Italian. Introduction to techniques pertaining to notions of linguistic statistics. Quantitative methods will be based on the three most important databases for the Early modern, Modern and Contemporary Italian: Vocabolario della Crusca (online), BaDIP and BIZ. This course includes a component designed to enhance students' research experience.

Prerequisite: ITA250Y1/ITA251Y1
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

ITA433H1 - Italian Language and Italian Dialects in Toronto

Hours: 24L

Through an historical overview of Italian immigration in Toronto, the role of Italian and Italian dialects in the city will be examined. As part of the topic studied in course, students will contribute to the website of the OIM by collecting varied forms of empirical linguistic evidence.

Prerequisite: ITA250Y1/ITA251Y1
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

ITA441H1 - Italian Cinematic Adaptation

Hours: 24L

An analysis of the process of adaptation in an exploration of the ideological and narratological perspectives as well as the stylistic elements of literary and cinematic discourse. Selections include novels by Verga, Tomasi di Lampedusa, Moravia, Bassani and their filmic adaptations by directors such as Visconti, De Sica, Bertolucci. This course includes a component designed to enhance students' research experience. (Given in English)

Recommended Preparation: One of: ITA240Y1/ITA340H/ ITA341H1/ITA347H1. Knowledge of Italian recommended
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)
ITA445H1 - Literature of the Italian Diasporas

Hours: 24L

This course examines works by writers of Italian descent, focusing on themes linked to the second-generation experience, such as intergenerational conflict, gender relations, the return journey, and the quest for identity. The comparative approach of this investigation will bring within the same framework the diasporic literatures of Canada, the United States, Argentina, Brazil, Australia, and of other countries. (Texts available in English and in their original language). This course includes a component designed to enhance students' research experience. (Given in English)

Recommended Preparation: ITA233H1/ITA345H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

ITA450H1 - Advanced Italian

Hours: 36S

This advanced-level course is designed to provide students with further study of the Italian language and culture with emphasis on varied methods of expression. This course will improve students' oral and written communication skills.

Prerequisite: ITA350Y1 /ITA351Y1
Exclusion: ITA451H1/ITA452H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

ITA455H1 - Women Writers in Italy

Hours: 24L

The course will focus on the writings of women in different periods of Italian history. Spanning a variety of genres, from the novel to autobiography, from poetry to essayism, the course will discuss various aspects of the debate regarding the changing roles of women in society. This course includes a component designed to enhance students' research experience.

Prerequisite: ITA250Y1 /ITA251Y1, and at least 0.5 FCE ITA literature courses at the 300-level
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

ITA460Y1 - Internship in Italian

Hours: 48P

Opportunity to apply acquired knowledge in a work placement environment. The placement will take place in local community organizations, Private Business Associations and local media.

Prerequisite: ITA350Y1/ITA351Y1/ITA352Y1 or ITA371Y1
Corequisite: Must be enrolled in 4th year.
3.0 CGPA required.
Departmental interview.
Distribution Requirements: Humanities

ITA489H1 - Independent Studies

An opportunity to pursue at the 400-level an independent course of study not otherwise available. A written proposal, co-signed by the instructor, must be submitted on the appropriate proposal form for approval by the Department of Italian Studies. Application deadline: April 30 for F courses, November 30 for S courses.

Prerequisite: Permission of Department
Distribution Requirements: Humanities

ITA490Y1 - Independent Studies

In exceptional circumstances, students may request to pursue at the 400-level an independent course of study not otherwise available. A written proposal, co-signed by the instructor, must be submitted on the appropriate proposal form for approval by the Department of Italian Studies. Application deadline April 30.

Prerequisite: Permission of Department
Distribution Requirements: Humanities

ITA495H1 - Directed Research

Based on a professor’s research project currently in progress, this course will enable an undergraduate student to play a useful role in the project while receiving concrete training in research. This course is mandatory for all students enrolled in the specialist’s program.

Prerequisite: Permission of Department
Distribution Requirements: Humanities

ITA496H1 - Research Methods

This course, linked to the instructor's research project, will provide training in a variety of research methods. This course includes a component designed to enhance students’ research experience.

Prerequisite: Permission of Department
Distribution Requirements: Humanities

Introduction

The undergraduate program at the Anne Tanenbaum Centre for Jewish Studies (CJS) builds on the expertise and range of the faculty. The program is organized around four areas of interest that reflect the diverse strengths of the CJS. The Specialist and Major programs of study requires one of the gateway courses, CJS200H1 or CJS201H1, and a half credit course at the 400-level. The Minor program of study requires either CJS200H1 or CJS201H1.

Four Areas of Interest:

I. Classical Judaism

The civilization of the people of the book has produced a rich, classical literature: the Hebrew Bible, the Dead Sea Scrolls, Hellenistic texts, as well as rabbinic literature from the earliest targumic and midrashic interpretations through the Talmuds and geonic traditions to medieval commentators on Talmudic texts. We situate these texts in their linguistic and cultural contexts, and study them with philological rigour. Our students learn to trace the development of the Jewish imagination in its interactions with surrounding cultures and to appreciate its many expressions: legal, exegetical, mythic, and mystical. Jewish civilization emerges as a highly variegated collection of phenomena and traditions.

II. Jewish Philosophy and Thought

Both in the ancient world and contemporary society, many vital questions have arisen from Jewish experience and its interaction with diverse religions and philosophies. Why would the perfect, all-sufficient God care to speak to human beings? How could God’s inner life be described? What is the relationship between law and ethics? What future could a particular, religious identity have in a secular democracy based on universal values? What can traditional Jewish sources contribute to contemporary feminism and what does contemporary feminism have to say about the traditionally gendered
view of Jewish commandments? In addressing these questions, we teach students to engage critically with the great figures in the history of Jewish thought, from Philo to Maimonides, from Spinoza to Rosenzweig.

III. Jewish History and Social Sciences

Covering the whole range of Jewish history, from ancient Israelites to modern Israel, from medieval Spain to the Holocaust and beyond, our courses explore both the ideal and material aspects of the many contexts in which Jewish civilization has survived and thrived, while offering a unique perspective on world history. Social sciences such as anthropology, political science, and sociology enrich our comprehension of today as well as yesterday by exploring phenomena such as collective memory, group identity, and intergroup conflict. Our courses give students the tools not only to understand the past but also to shape the future.

IV. Jewish Cultures, Languages, and Literatures

We offer a rich variety of courses in Jewish literature, film, and theatre, as well as Yiddish and Hebrew language. How have Jews expressed their resilience and imagination under the extreme conditions of the Holocaust or within communist societies? What is the Jewish contribution to North American popular culture? From the social lives of contemporary Russian Jews to the impact of Israeli folk dance on national identity, from experimental Jewish photography to Jewish involvement in Broadway musicals, we investigate the many ways in which Jews express their identity and creativity in cultures around the world.

Centre for Jewish Studies Programs

Jewish Studies Specialist (Arts Program) - ASSPE0385

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

(10 FCEs, including at least 4 FCEs at the 300+ level and at least 1 FCE at the 400-level.)

1. CJS200H1/ CJS201H1 (See Note)

2. 1 FCE at the 400 level in any of the four areas of Jewish Studies (see CJS website for the list of approved and available courses: www.cjs.utoronto.ca/undergraduate/courses).

3. 3 FCEs or proof of proficiency in one of the following languages: Aramaic, Hebrew, Yiddish. Other languages are accepted with special permission. Students entering the program with requisite linguistic proficiency in a Jewish language will choose any 3 FCEs in an area of concentration (see below) in addition to the regular requirements described in section 4.

4. 5 FCEs in any of the four areas of Jewish Studies.

5. Note: From section 3 and 4, at least 4 FCEs at the 300+ level.

6. DTS300H1 or 0.5 FCE to satisfy the Quantitative Reasoning competency of the program, to be chosen from courses in Jewish Studies developing this competency. If none is available, 0.5 FCE from Breadth Requirement Category #5: The Physical & Mathematical Universe, or 0.5 FCE approved by the Undergraduate Director.

Note: There are no specific first-year requirements; however, first-year students are welcome to take CJS200H1, CJS201H1, Hebrew Language courses (MHB155H1 and MHB156H1) and Yiddish (GER260Y1), which count towards the Jewish Studies Specialist.

Jewish Studies Major (Arts Program) - ASMAJ0385

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

(6.5 FCEs, including at least 2 FCEs at the 300+ level, 0.5 of which must be at the 400-level)

1. CJS200H1/ CJS201H1 (See Note)

2. 0.5 FCE in a 400-level course in any area of Jewish Studies (see CJS website for the list of available courses for any given year: www.cjs.utoronto.ca/undergraduate/courses)

3. 5 FCEs in any of the four areas of Jewish Studies, with at least 2 FCEs at the 300+ level.

4. DTS300H1 or 0.5 FCE to satisfy the Quantitative Reasoning competency of the program, to be chosen from courses in Jewish Studies developing this competency. If none is available, 0.5 FCE from Breadth Requirement Category #5: The Physical & Mathematical Universe, or 0.5 FCE approved by the Undergraduate Director.

Note: There are no specific first-year requirements; however, first-year students are welcome to take CJS200H1, CJS201H1, Hebrew Language courses (MHB155H1 and MHB156H1) and Yiddish (GER260Y1), which count towards the Jewish Studies Major.
Jewish Studies Minor (Arts Program) - ASMIN0385

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

(4 FCEs, including at least 1 FCE at the 300+ level)

1. CJS200H1/ CJS201H1 (See Note)

2. 3.5 FCEs in any of the four areas of Jewish Studies, including at least 1 FCE at the 300+ level (see CJS website for the list of available courses for any given year: www.cjs.utoronto.ca/undergraduate/courses)

Note: There are no specific first-year requirements; however, first-year students are welcome to take CJS200H1, CJS201H1, and Hebrew Language courses (MHB155H1 and MHB156H1) and Yiddish Language courses (GER260Y1), which count towards the Jewish Studies Minor.

Centre for Jewish Studies Courses

CJS200H1 - Introduction to Jewish Thought

Hours: 24L

A balanced presentation of the multifaceted approach to the discipline by treating Jewish religion and thought. The course introduces students not only to a chronological and thematic overview of the subject, but also to different methodological approaches.

Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

CJS201H1 - Introduction to Jewish Culture

Hours: 24S

General introduction to history, literatures and cultures of Jewish people from antiquity to contemporary. A balanced presentation of multi-disciplinary approaches and multi-methodological approaches to Jewish studies, with a special emphasis on Jewish cultural studies and Jewish secularity.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

CJS220H1 - The Holocaust in Fiction

Hours: 24S

The course examines literary works written in different languages, in ghettos and concentration camps during the Holocaust, as well as those reflecting on the genocide in its aftermath. We focus on literature as a means of engaging with the unimaginable and on the cross analysis of eye-witness and memory writing.

Recommended Preparation: CJS200H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

CJS230H1 - God, Nation, and Self Transformed: The Secularization of the Jewish Experience

Hours: 24S

The course provides a theoretical background to the issue of secularization and examines the diverse attempts to define on a secular basis the Jew, the Jewish nation, and the Jewish God since the breakdown of traditional Jewish society. A variety of Jewish secularisms are examined in a larger, non-Jewish context.

Recommended Preparation: CJS200H1
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

CJS290H1 - Topics in Jewish Studies

Hours: 24L/24T

An examination of issues in Jewish Studies. Content in any given year depends on instructor.

Distribution Requirements: Humanities
CJS330H1 - Who's a Jew? Theory, Myth, and Practice

Hours: 24L

This course introduces students to the host of core concepts in terms of which Jewish identity has been and continues to be defined and debated. Topics include: the difference between insiders and outsiders; collective vs individual identity; the nature of the bond between group members; identification across time, space, and disagreements; social and gendered hierarchies; joining and leaving the group; the identities of outsiders.

Exclusion: CJS290H1 (Topics in Jewish Studies: Who is a Jew?), offered in Fall 2014 and Fall 2015
Recommended Preparation: CJS200H1 or CJS201H1
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

CJS340H1 - Mizrahim in Israel: History, Politics, and Culture

Hours: 24L

What is the significance of the designation "Mizrahi" in Israel today? Does it refer to people who share a common geographical and ethnic origin or does it indicate a shared worldview that draws upon Middle Eastern Arabic culture? What are its relations with other terms, such as “Sephardi,” “Oriental,” or “Levantine”? What kind of political membership does it entail? Does it possess a certain cultural, religious, or political vocabulary? And, ultimately, does the diasporic concept of “Mizrahiyut” (mizrahiness) undermine national homogeneity or rather facilitate and enable its enforcement?

Exclusion: CJS390H1 (Special Topics in Jewish Studies: Mizrahim in Israel: History, Politics, and Culture), offered in Summer 2017
Recommended Preparation: CJS201H1
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

CJS383H1 - Jews and Power

Hours: 24L

This course will explore the relationship of Jews to political power. Among the themes to be covered are: How has the relationship of the Jewish community to political authority changed over time? What is the Jewish conception of political authority? How did Jews protect their communal and individual rights in the absence of sovereignty? How did the dynamics of antisemitism, philosemitism, and anti-Jewish violence change over time? How did Zionism and the revival of Jewish sovereignty change the position of Jews in the political order? What are the political and moral dilemmas posed by statehood? And what are the implications of Jewish sovereignty for Jews in the Diaspora?

Prerequisite: POL101Y1 or CJS200H1 or CJS201H1
Exclusion: POL383H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

CJS389H1 - Jewish Secularism and Messianic Thought: From Spinoza to Derrida

Hours: 24S

This course examines the critical role that Messianic thought plays in the emergence of modern Jewish secular thought. A study of the secular dimension of Messianism in the writings of Jewish philosophers, from Spinoza to Derrida, leading to the larger question of its place in the project of Jewish modernity.

Recommended Preparation: CJS200H1
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

CJS390H1 - Special Topics in Jewish Studies

Hours: 24L

An examination of issues in Jewish Studies. Content in any given year depends on instructor.

Prerequisite: Permission of the instructor/program
Distribution Requirements: Humanities

CJS391H1 - Special Topics in Jewish Studies

Hours: 24L

An examination of issues in Jewish Studies. Content in any given year depends on instructor.

Prerequisite: Permission of the instructor/program
Distribution Requirements: Humanities
CJS392H1 - Special Topics in Jewish Studies

Hours: 24L
An examination of issues in Jewish Studies. Content in any given year depends on instructor.

Prerequisite: Permission of the instructor/program
Distribution Requirements: Humanities

CJS400H1 - Research Seminar in Jewish Studies

Hours: 24S
An interdisciplinary seminar in which Jewish Studies topics are explored intensively, culminating in a major research paper by each student. Not eligible for CR/NCR option.

Prerequisite: JSP200H1; permission of the instructor/program
Distribution Requirements: Humanities

CJS401H1 - Community & Identity

Hours: 24S
Exploration of Jewish notions of community, identity, and humanity in classic and contemporary sources as well as through experiential learning in which students are placed in internships at organizations and institutions that identify themselves as Jewish and as serving the Jewish community in the GTA. Not eligible for CR/NCR option.

Prerequisite: CJS200H1 or CJS201H1 and at least two other half-courses in Jewish Studies; permission of instructor
Distribution Requirements: Social Science
Breadth Requirements: Thought, Belief and Behaviour (2)

CJS401Y1 - Community & Identity

Hours: 48S
Exploration of Jewish notions of community, identity, and humanity in classic and contemporary sources as well as through experiential learning in which students are placed in internships at organizations and institutions that identify themselves as Jewish and as serving the Jewish community in the GTA. Not eligible for CR/NCR option.

Prerequisite: CJS200Y1 or CJS201Y1 and at least two other half-courses in Jewish Studies; permission of instructor
Distribution Requirements: Social Science
Breadth Requirements: Thought, Belief and Behaviour (2)

CJS430H1 - Encounters between Jewish and Modern Thought

Hours: 24L
A detailed exploration of how Jewish thought develops in relationship to key figures or moments in modern European philosophy (e.g., Spinoza, Kant, Hegel, Kierkegaard, Marx, Nietzsche, Heidegger). The particular focus varies from year to year.

Exclusion: CJS490H1 (Advanced Topics in Jewish Studies: Kierkegaard and Modern Jewish Philosophy), offered in Fall 2015
Recommended Preparation: CJS201H1 or a course in either modern European philosophy
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

CJS440H1 - The Arab Jew: A History of a Concept

Hours: 24L
This course invites students to explore the debates around the term "Arab Jews." A cultural, historical, and historiographical designation, the term encompasses a range of experiences for Arabic-speaking Jews. These Jews lived in diverse cultural worlds across the Middle East and North Africa, where they developed deep and enduring relationships with non-Jews, and were instrumental in shaping local, regional and national cultures and politics. By engaging with the term "Arab Jews" in its various incarnations, the course offers new perspectives on questions of Zionism and nationalism, colonialism and geography, religion and secularization, as well as historiography and memory.

Exclusion: CJS491H1 (Advanced Topics in Jewish Studies: The Arab Jew: A History of a Concept), offered in Winter 2017
Recommended Preparation: CJS201H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

CJS444H1 - Topics in the Study of Antisemitism

Hours: 24L
This seminar explores in depth one of the many theoretical or methodological issues that confront scholars of antisemitism. Possible topics include: definitions of antisemitism and their purposes; philosemitism and its conceptual and real connection with antisemitism; Jewish self-hatred; contextualist vs eternalist accounts of antisemitism; classic and contemporary theories of antisemitism.

Recommended Preparation: RLG344H1
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)
CJS490H1 - Advanced Topics in Jewish Studies

Hours: 24S

An in-depth investigation of topics in Jewish Studies. Content in any given year depends on instructor.

Prerequisite: Permission of the instructor/program
Distribution Requirements: Humanities

CJS491H1 - Advanced Topics in Jewish Studies

Hours: 24S

An in-depth investigation of topics in Jewish Studies. Content in any given year depends on instructor.

Prerequisite: Permission of the instructor/program
Distribution Requirements: Humanities

CJS498Y1 - Independent Study

A scholarly project on an approved topic supervised by a faculty affiliated with the Centre for Jewish Studies. Not eligible for CR/NCR option.

Prerequisite: CJS200H1 and permission of the Centre
Recommended Preparation: CJS400H1
Distribution Requirements: Humanities

CJS499H1 - Independent Study

A scholarly project on an approved topic supervised by a faculty affiliated with the Centre for Jewish Studies. Not eligible for CR/NCR option.

Prerequisite: CJS200H1 and permission of the Centre
Recommended Preparation: CJS400H1
Distribution Requirements: Humanities
Laboratory Medicine and Pathobiology

Faculty List

Professor and Chair of the Department
R. Kandel, MD (Professor and Chair)

Professors
K. Adeli, PhD
S.L. Asa, MD, PhD
I. Aubert, PhD
B. Bapat, PhD
M. Bendeck, PhD
C. Bergeron MD
J. Butany, PhD
D.E.C. Cole, MD, PhD
M. Cybulsky, MD
E.P. Diamandis, MD, PhD
A.I. Gotlieb, MDCM
M.D. Grynpas, PhD
P. Hamel, PhD
R.G. Hegele, MD, PhD
A. Hinek, PhD
D.M. Irwin, PhD
S. Jothy, MD, PhD
S. Kamel-Reid, PhD
R. Kandel, MD
F.W. Keeley, PhD
G.A. Levy, MD
C.A. Lingwood, PhD
D. Mahuran, PhD
P.A. Marsden, MD
T. Mazzulli, MD
A. McGeer, MD
C. McKerlie, DVM, DVSc
J. McLaurin, PhD
H. Ni, MD, PhD
M. Ohh, PhD
M. Opas, PhD
M. Pollanen, PhD, MD
J. Prud'homme, MD
S. Richardson, MD
J. Robertson, PhD
A. Seth, PhD
P. Shek, PhD
A.E.M. Simor, MD
B. Strauss, MD, PhD
D.M. Templeton, PhD, MD
P. Thorner, MD, PhD
M.S. Tsao, MD
G.A. Wilson, MD
B. Yang, PhD
H. Yeger, PhD
G. Yousef, MD, PhD
L. Zhang, PhD
M. Zielenska, PhD

Assistant Professors
L. Fu, PhD
P. Yip, PhD

Introduction

The Department of Laboratory Medicine and Pathobiology provides a bridge between the basic sciences and medicine. Investigating the molecular mechanisms of disease is an important priority of the department. Faculty are concerned with the biochemical changes that may be associated with cell and tissue injury and with the etiology, pathogenesis and behaviour of disease. Research is carried out in such areas as cardiovascular disease, immunopathobiology, neuropathology, endocrinology and metabolism, neoplasia, bone and connective tissue disease, clinical and molecular epidemiology, antibiotic resistance, and molecular pathogenesis of infectious disease.

The Pathobiology Specialist program gives students a broad understanding of contemporary medical research and basic scientific insights that have revolutionized our understanding of disease in recent years. Aspects of biochemistry, chemistry, cellular and molecular biology, and genetics are brought to bear upon human pathology. Graduates from the program will frequently pursue graduate studies in medical research and eventual research careers in academic, industrial, pharmaceutical, or governmental laboratories. A knowledge of cellular and molecular mechanisms of disease processes is also useful in a wide variety of multidisciplinary careers in government, regulatory agencies, law, and environment.

Co-Associate Chairs, Undergraduate Life Science Education:
Dr. Karim Mekhail and Dr. Jeffrey Lee
(imp.undergradcoordinator@utoronto.ca)

Undergraduate Office/General inquiries:
Louella D’Cunha (imp.undergrad@utoronto.ca; Medical Sciences Building, Room 6209; 416-946-0136)

More information is available on our website:
http://www.imp.utoronto.ca/

Consult the Arts & Science Specialist Program in Pathobiology website for additional contact information aimed at specific LMP courses.

Laboratory Medicine and Pathobiology Programs

Pathobiology Specialist (Science Program) - ASSPE2025

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

Variable Minimum Grade or Variable Minimum Grade Average
A minimum grade/minimum grade average in required courses or their equivalents is needed for entry, and this minimum changes each year depending on available spaces and the number of applicants. The following courses must be completed:
Laboratory Medicine and Pathobiology Courses

LMP299Y1 - Research Opportunity Program

Credit course for supervised participation in faculty research project. Details at https://www.artsci.utoronto.ca/current/academics/research-opportunities/. Not eligible for CR/NCR option.

Distribution Requirements: Science

LMP301H1 - Introduction to the Biochemistry of Human Disease

Hours: 24L

Introduces concepts and mechanisms of disease processes as they arise from disturbances of normal biochemical and physiological functions. The rational use of the clinical biochemistry laboratory in the diagnosis and management of disease is explained. Not intended for students in the Pathobiology Specialist program.

Prerequisite: BCH210H1/BCH242Y1
Exclusion: LMP300Y1
Recommended Preparation: PSL201Y1/PSL300H1/PSL301H1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

LMP340H1 - Introduction to Pathobiology I

Previous Course Number: LMP300Y1
Hours: 18L/12T/6P

Concepts in pathogenesis, cell injury, adaptation and death: oxidative stress, ion channels and pumps, calcium homeostasis. Molecular basis of diseases affecting iron, blood and the cardiovascular system. The laboratory examines anatomical and histopathological specimens in cardiac disease.

Prerequisite: Enrolment is limited to students specializing in Pathobiology who have completed, or are completing, the first and second year requirements of the program.
Exclusion: LMP300Y1, LMP301H1, LMP363H1
Recommended Preparation: Second Year required courses for the Pathobiology Specialist Program
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

LMP350H1 - Introduction to Pathobiology II

Previous Course Number: LMP300Y1
Hours: 24L/12T

Molecular basis of tissue repair and fibrosis, endocrine and signaling disorders, introduction to neurodegenerative diseases. Animal models and genetic basis of disease. Mechanisms infection by virus, bacteria and parasites. Topics are chosen to complement LMP340H1 and introduce areas that may be explored in more depth in 400-level LMP courses. Enrolment is limited to students specializing in Pathobiology who have completed LMP340H1.

Prerequisite: LMP340H1
Exclusion: LMP300Y1, LMP301H1, LMP363H1
Recommended Preparation: Second Year required courses for the Pathobiology Specialist Program
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)
LMP363H1 - Principles of Pathobiology

Hours: 24L

Pathological changes brought on by foreign compounds; mechanisms of pathologic, toxic and carcinogenic change.

Prerequisite: BIO230H1, CHM247H1/CHM249H1
Exclusion: LMP300Y1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

LMP365H1 - Neoplasia

Hours: 20L/4P

A general introduction to the cellular and molecular aspects of cancer and its etiology. The laboratory component presents the range of benign and malignant tumor types at the gross and histological levels. Pathophysiology of cancer, invasion and metastases, role of the immune system.

Corequisite: LMP300Y1 or permission of department
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

LMP399Y1 - Research Opportunity Program

Credit course for supervised participation in faculty research project. Details at https://www.artsci.utoronto.ca/current/academics/research-opportunities/... Not eligible for CR/NCR option.

LMP402H1 - Inflammation and Infection

Hours: 24L

Mechanisms that allow microbial pathogens to cause disease and the host to detect infection, mount an inflammatory response and resolve the infection. Primary research articles are discussed. Topics include commensal bacteria, bacterial toxins, pattern recognition receptors, leukocyte emigration, chemotaxis, and the role of non-coding RNAs in immunity.

Prerequisite: (IMM340H1, IMM350H1)/(IMM341H1, IMM351H1)
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

LMP403H1 - Immunopathology

Hours: 24L

The immune system in disease. Responses of the immune system to host invasion, injurious stimuli, and transplantation. Immunopathology of organ-specific diseases including pancreas, gut, liver, heart, kidney, and blood. Intended for students specializing in pathobiology or related programs.

Prerequisite: (IMM340H1, IMM350H1)/(IMM341H1, IMM351H1)
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

LMP405Y1 - Project in Pathobiology

Hours: 154P

A self-contained research project to be completed under the supervision of a faculty member. The main areas of research are as listed in the description of the Department (above). The student will normally have completed three full years of study, and is expected to devote at least one full day per week to the project. Admission is by arrangement with the Department and with a particular supervisor. A list of potential supervisors is available from the Departmental Office and on our web site. Not eligible for CR/NCR option.

Prerequisite: BCH210H1/BCH242Y1, LMP300Y1/(LMP340H1, LMP350H1)/LMP363H1/LMP365H1, and permission of department
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

LMP406H1 - Pathobiology of the Cardiovascular System

Hours: 24L

Pathobiology of the heart, blood vessels, and lymphatic system. Congenital diseases of the heart, ischemic injury, stroke. Treatments of vascular disease and cardiovascular biomaterials. Major focus on atherosclerosis and hypertension. The emphasis is on the underlying cell biology of these processes.

Prerequisite: (PSL300H1, PSL301H1)/PSL302Y1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)
LMP408H1 - Genetic Modelling of Human Development and Disease

Hours: 24L

Introduces use of genetic model systems and organisms in exploring aspects of human reproduction, development, and disease. A major focus is on the impact of the genetic models on understanding human health, and disease. Ethical issues in animal research, genetic manipulation, and disease modeling are highlighted.

Prerequisite: LMP300Y1/(LMP340H1, LMP350H1)/BIO260H1/HMB265H1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

LMP410H1 - Pathobiology of Neurodegenerative Disease

Hours: 24L

Molecular basis of neurodegenerative diseases of the central and peripheral nervous systems. Emphasis on the molecular pathobiology of neurodegenerative diseases, current research developments and guidance with writing of research proposals. Mid-term and final exams will practice assembly of a succinct research proposal and query neurodegenerative disease material taught in course.

Prerequisite: BCH311H1/(PSL300H1, PSL301H1)
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

LMP415H1 - Forensic Pathobiology

Hours: 24L

A thematic review of the major scientific areas and research controversies in forensic medicine. The approach is mechanistic analysis and evidence-based medicine. Classical forensic medicine is critically analyzed with emphasis on experimental methods to resolve controversies. We also explore how the justice system utilizes medical and scientific data.

Prerequisite: LMP300Y1/(LMP340H1, LMP350H1)/permission of department
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

LMP436H1 - Microbial Pathogenesis

Hours: 36L

Molecular mechanism involved in pathogenesis of infectious disease. Topics include recurrent themes in the establishment of infectious disease, such as adherence and spread of pathogenic bacteria as well as evasion of host defences. Emphasis is placed on genetic characterization and expression of virulence determinants and on interactions between bacterial pathogens and their hosts.

Prerequisite: BCH210H1/BCH242Y1, (IMM340H1, IMM350H1)/(IMM341H1, IMM351H1)
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)
Latin American Studies

Faculty List

Professors
Anne-Emmanuelle Birn (International Development & Public Health)
Gustavo J. Bobonis (Economics)
Laura Colantoni (Spanish and Portuguese)
Kevin L. O’Neill (Religion)
Ana Teresa Pérez-Leroux (Spanish and Portuguese)
Jeffrey M. Pilcher (History)
Rosa Sarabia (Spanish and Portuguese)
Judith Teichman (Political Science)

Associate Professors
Christian Abizaid (Geography & School for the Environment)
Susan Antebi (Spanish and Portuguese)
Kevin P. Coleman (Historical Studies)
María Cristina Cuervo (Spanish and Portuguese)
Rubén Gaztambide-Fernández (OISE)
Gustavo Indart (Economics)
Eva-Lynn Jagoe (Spanish and Portuguese, Centre for Comparative Literature)
Teresa Kramarz (Munk School of Global Affairs and Public Policy)
Christopher Krupa (Anthropology)
Marina Mota Prado (Law)
Valentina Napolitano (Anthropology)
Melanie J. Newton (History)
Alejandro Paz (Anthropology)
Néstor E. Rodríguez (Spanish and Portuguese)
Luisa Farah Schwartzman (Sociology)
Edward R. Swenson (Anthropology)

Assistant Professors
Martha Balaguera (Political Science)
Laura Doering (Rotman)
Jerry Flores (Sociology)
Ryan Isaakson (Geography and Planning)
Suzi Lima (Linguistics)
Sharlene Molot (Critical Development Studies & Human Geography)
Lena Mortensen (Anthropology)
Jeff Packman (Music History and Culture)
Victor Rivas (Spanish and Portuguese)
Luis van Isschot (History)

Senior Lecturer
Manuel Ramirez (Spanish and Portuguese)

Sessional Lecturers
Bernardo García Dominguez (New College & Latin American Studies)
Donald Kingsbury (Political Science & Latin American Studies)

Professors Emeriti
Albert Berry (Economics)
Peter Blanchard (History)
Ricardo Sternberg (Spanish and Portuguese)

Introduction

The Latin American Studies program at the Department of Spanish and Portuguese provides students in the social sciences and humanities an opportunity to engage and deepen their understanding of Latin American regions, their histories, politics, cultures, economies and societies. Courses encourage students to situate both their special interests and the contemporary debates in fields such as anthropology, political science, geography, literature, or history within a broader interdisciplinary framework, while at the same time committing themselves to an understanding of the historical, cultural and political experiences of Spanish and Portuguese America. Through an engagement with different texts and faculty expertise, this program trains students in current themes such as postcolonial thinking, critical readings of colonial histories, literary and anthropological genres, comparative politics, politics of indigeneity and human rights, as well as in environmental policies and political economy of Latin America and the Americas as a transnational whole. With the possibility to carry out curricula experience in Latin America, this program also offers an important lead for career development experiences on Latin America. This knowledge is increasingly necessary for Canada, as the country enters into new trade, political, environmental, and academic agreements with our emerging hemispheric partners.

Students seeking counselling and information should visit the LAS website: http://las.utoronto.ca and/or contact the Associate Chair, Undergraduate Studies.

Latin American Studies Programs

Latin American Studies Major (Arts Program) - ASMAJ0552

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

There are no specific first-year requirements. However, first-year students are encouraged to take a Spanish or Portuguese language course (SPA100Y1, SPA219Y1, SPA220Y1, SPA220Y1, PRT100Y1, PRT110Y1, PRT219Y1, or PRT220Y1), which counts towards the Latin American Studies Major.

(7.0 credits. Includes a minimum of 2.0 credits at the 300+ level, of which a 0.5 credit must be at the 400-level.)

A. Course work: Students must successfully complete seven full courses or their equivalents sponsored or approved by LAS, as well as satisfy the requirements of their departmental specialization.

Of the required courses:
1. LAS200H1 and LAS201H1 (previously LAS200Y1).
2. LAS300H1 or LAS301H1. Please note that if the subject matter and/or instructor has changed, it will be possible to take, and be credited for, LAS300H1 or LAS301H1 more than once.
3. JQR360H1 or an alternative, but similar, 0.5 credit course on a combination of quantitative and qualitative reasoning / research design can be taken in consultation with LAS administration.
4. LAS400H1, LAS401H1, or an equivalent 0.5 credit 400-level course, approved by LAS administration.

B. Language: Students must successfully complete (with a minimum grade of 65%) at least the second level of language instruction in Spanish or Portuguese by the end of the third year of study (SPA220Y1 or PRT220Y1). Spanish Heritage speakers must successfully complete (with a grade of at least 65%) SPA219Y1 (previously SPA319Y1), as this course is considered an equivalent
of SPA220Y1. Portuguese Heritage speakers must successfully complete (with a minimum grade of 65%) PRT219Y1, as this course is considered an equivalent of PRT220Y1. Students can also demonstrate equivalent proficiency in the given language through completion of 1.0 credit of Spanish and/or Portuguese courses in Latin American topics as approved by LAS administration at a second-year level of instruction or higher.

**Latin American Studies Minor (Arts Program) - ASMIN0552**

**Enrolment Requirements:**

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

**Completion Requirements:**

There are no specific first-year requirements. However, first-year students are welcome to take a Spanish or Portuguese language course (SPA100Y1, SPA219Y1, SPA220Y1, PRT100Y1, PRT110Y1, PRT219Y1, or PRT220Y1), which counts towards the Latin American Studies Minor.

(4.0 credits, including LAS200H1, LAS201H1, and at least 1.0 credit at the 300+ level.)

1. LAS200H1 and LAS201H1 (previously LAS200Y1).
2. LAS300H1 or LAS301H1.
3. 2.5 credits chosen from LAS courses on the list of approved courses eligible for programme credit. A minimum of a 0.5 credit must be from the Social Sciences; another 0.5 credit must be from the Humanities. (LAS300H1 can be used to cover the Social Science requirement and LAS301H1, towards the Humanities requirement).

Spanish or Portuguese language study is recommended, but not a requirement.

**Courses eligible for programme credit**

The following is a list of undergraduate courses offered by academic units affiliated with LAS. Courses not appearing below may be considered for credit in a Latin American Studies program with permission of the Associate Chair, Undergraduate Studies. For up-to-date information on this list, please check our website: http://las.utoronto.ca Students are responsible for checking the co- and prerequisites for all courses in this list. For updates on courses being offered by affiliated units, please check individual departmental websites.

**Course Groups**

**Anthropology**

- ANT320H1 Ancient Cultures of the Andes
- ANT340H1 Anthropology of Latin America
- ANT407H1 Inka and Aztec States

**Diaspora and Transnational Studies**

- DTS200Y1 Introduction to Diaspora and Transnational Studies I
- DTS300H1 Qualitative and Quantitative Reasoning

**Economics**

- ECO324H1 Economic Development
- ECO403H1 Topics in Development Economics and Policy

**Forest Conservation and Forest Biomaterial Sciences**

- FOR201H1 Conservation of Tropical and Subtropical Forests

**Geography**

- GGR101H1 Histories of Environmental Change
- GGR216H1 Global Cities
- GGR341H1 Changing Geography of Latin America
- JGE321H1 Multicultural Perspectives on Environmental Management

**History**

- HIS291H1 Latin America: The Colonial Period
- HIS292H1 Latin America: The National Period
- HIS359H1 Regional Politics and Radical Movements in the 20th Century Caribbean
- HIS390H1 Slavery in Latin America
- HIS397H1 Political Violence and Human Rights in Latin America

**Music**

- MUS305H1 Latin American and Caribbean Music

**New College Caribbean Studies**

- NEW120Y1 Introduction to Caribbean Studies
- NEW220H1 Comparative Caribbean Literature I: Canonical Readings
- NEW221H1 Comparative Caribbean Literature II: Contemporary Readings
- NEW324H1 The Contemporary Caribbean in a Global Context
- JLN327H1 Regional Perspectives on the Hispanic Caribbean
- JLN427H1 Advanced Topics: The Hispanic Caribbean
- JQR360H1 The Canadian Census: Populations, Migrations and Demographics

**Political Science**

- POL305Y1 Politics and Society in Latin America
- POL360H1 Topics in Latin American Politics
Latin American Studies Courses

**LAS200H1 - Introduction to Latin American Studies I: Foundational Themes**

*Hours: 24L/12T*

An introductory course studying the development of Latin American societies from their precolumbian past to the 19th century building of modern nations. Cultural, historical, political, and social topics are examined combining historical documents with art, music and other texts from popular culture.

*Exclusion: IAS200Y1, LAS200Y1*

*Distribution Requirements: Humanities*

*Breadth Requirements: Creative and Cultural Representations (1)*

**LAS201H1 - Introduction to Latin American Studies II: Current Issues**

*Hours: 24L/12T*

An introductory course studying the development of Latin American societies from the 20th century to the present. Cultural, historical, political, and social topics are examined combining historical documents with art, music and other texts from popular culture.

*Exclusion: IAS200Y1 and LAS200Y1*

*Recommended Preparation: LAS200H1*

*Distribution Requirements: Humanities*

*Breadth Requirements: Society and its Institutions (3)*

**LAS300H1 - Topics in the Social Sciences**

*Hours: 24S*

The goal of this course is to critically analyze the current economic, social, and political realities of Latin America, based on an insightful knowledge of its past and present. Topics of the course vary depending on the needs of the program and the interests of students.

*Prerequisite: IAS200Y1/LAS200Y1/(LAS200H1, 201H1)/POL305Y1*

*Distribution Requirements: Social Science*

*Breadth Requirements: Society and its Institutions (3)*

---

**Portuguese**

- PRT100Y1 Portuguese for Beginners
- PRT120Y1 Portuguese for Spanish Speakers
- PRT219Y1 Academic Portuguese
- PRT220Y1 Intermediate Portuguese
- PRT258H1 Introduction to Lusophone Literature
- PRT320Y1 Advanced Portuguese
- PRT368H1 Brazilian Indigenous Languages
- PRT458H1 The Lusophone Short Story

**Spanish**

- SPA100Y1 Spanish for Beginners
- SPA219Y1 Academic Spanish
- SPA220Y1 Intermediate Spanish
- SPA258H1 Introduction to Hispanic Literary Studies
- SPA259H1 Introduction to Hispanic Cultural Studies
- SPA320Y1 Advanced Spanish
- SPA326H1 Latin American Varieties of Spanish Through the Media
- SPA375H1 Latin American Cinema
- SPA381H1 Nation, Identity and Modernity in Spanish-America
- SPA382H1 Spanish American Women in Art, Film, and Literature
- SPA384H1 Avant-Garde Movements in Spanish America
- SPA385H1 Literature and Social Change in Spanish America
- SPA386H1 Literary Landscapes of the Mexican Revolution
- SPA387H1 Latin American Perforative Expression
- SPA422H1 Sociolinguistics of Spanish
- SPA467H1 Topics in Spanish-American Literature and Culture
- SPA480H1 Icons and Iconography in Latin American Culture
- SPA482H1 20th-Century Spanish American Narrative
- SPA486H1 Contemporary Caribbean Literatures and Identities
- SPA488H1 Central America Postwar Narrative
LAS301H1 - Topics in the Humanities

Hours: 24S

The goal of this course is to critically analyze the Latin American social imaginaries as expressed in art, literature and/or film, based on close readings of texts. Topics of the course vary depending on the needs of the program and the interests of students.

Prerequisite: IAS200Y1/LAS200Y1/LAS201H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

LAS302H1 - Topics in Latin American Studies

Hours: 24S

The goal of this course is to critically explore debates and perspectives on development and on the politics of inequality in Latin American contexts. Topics of the course may vary, depending on the needs of the program and the interests of students and instructors.

Recommended Preparation: LAS200H1, LAS201H1, LAS300H1, POL305Y1
Distribution Requirements: Humanities; Social Science

JQR360H1 - The Canadian Census: Populations, Migrations and Demographics

Hours: 24L/12T

Examines the Canadian population census through the experience of diasporic groups in Canada. Approaches the census as a statistical tool, an historical source and an ideological project of citizenship and nationalism. Uses census data to explore mathematical and statistical concepts and to integrate numerical ways of thinking with qualitative analysis. (Jointly sponsored by African Studies, Diaspora and Transnational Studies, Caribbean Studies, Equity Studies and Latin American Studies).

Prerequisite: DTS200Y1/HIS230H1/HIS231H1/LAS200H1/LAS201H1/NEW120Y1/NEW150Y1/NEW220H1/NEW221H1/NEW224Y1/NEW225H1/NEW226H1/NEW240Y1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

LAS400H1 - Topics in Latin American Studies

Hours: 24S

An upper level seminar. Topics of the course vary from year to year, depending on the needs of the program and the interests of students. Offered in alternate years.

Prerequisite: LAS200Y1/LAS200H1, LAS201H1 & LAS300H1/LAS301H1
Distribution Requirements: Humanities; Social Science

LAS401H1 - Latinos in Canada

Hours: 48T/24S

A historical survey of migration from Latin American countries to Canada, this course examines mediation strategies of Latinos as they adjust to a new home: negotiation of national identities, political participation, entrepreneurship, cultural representations, and charitable work. Students engage in service with organization working with/in LatAm communities.

Prerequisite: LAS200H1, LAS201H1, one LAS 300-level course, interview
Recommended Preparation: JQR360: The Canadian Census: Populations, Migrations, and Demographics
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

LAS410H1 - Independent Study

This course provides an opportunity for students to do academic research related to Latin American issues under the supervision of a faculty member. The intent is that the student, aided and advised by the supervisor, will read relevant literature, and plan, execute, analyze and report on an original and independent investigation of an appropriate topic. For application forms, please visit the "Resources" section of the programme's website. Not eligible for CR/NCR option.

Prerequisite: LAS200Y/(LAS200H1, 201H1) and LAS300H/LAS301H
Distribution Requirements: Humanities; Social Science
LAS411Y1 - Independent Study

This course provides an opportunity for students to do academic research related to Latin American issues under the supervision of a faculty member. The intent is that the student, aided and advised by the supervisor, will read relevant literature, and plan, execute, analyze and report on an original and independent investigation of an appropriate topic. For application forms, please visit the "Resources" section of the programme's website. Not eligible for CR/NCR option.

Prerequisite: LAS200Y/(LAS200H1, LAS201H1) and LAS300H1/LAS301H1/LAS302H1
Exclusion: LAS410H1
Distribution Requirements: Humanities; Social Science
Life Sciences

The following Life Science departments and programs are listed in this Calendar:

- Biochemistry
- Biology
- Cell & Systems Biology
- Ecology & Evolutionary Biology
- Human Biology
- Immunology
- Laboratory Medicine & Pathobiology
- Molecular Genetics & Microbiology
- Nutritional Sciences
- Pharmaceutical Chemistry
- Pharmacology & Toxicology
- Physiology
- Psychology

Many of the Life Science programs are collaborative programs given by the Faculty of Arts and Science and departments in the Faculty of Medicine. The Life Sciences all focus on the scientific study of life. The study of biological processes has enormous importance for:

- Understanding one’s own body and those of other organisms sharing our planet, both in health and sickness;
- Analysing the behaviour of humans and other organisms;
- Understanding the interdependent web of living organisms on the planet, and their evolutionary relationships;
- Preparing for ethical, social and political questions arising from our increasing ability to modify living systems;
- Enhancing our ability to protect the delicate and complex ecological balance that sustains this world.

Today, the biological sciences are experiencing a revolution. Important discoveries occur almost weekly as scientists and students around the world develop and use techniques, theories and approaches. Increasingly, we need people with advanced knowledge and training who can contribute to these discoveries and their application. Equally, we need people who know enough about life sciences generally to make informed judgments about critical issues such as global warming, population growth, the emergence of drug resistance and new diseases, and the degradation of the environment.

On the St. George campus, undergraduate education, graduate education and research in the Life Sciences is carried out in departments within the Faculty of Arts and Science and the Faculty of Medicine.

The programs offered in the Life Sciences are listed below. Admission to all programs occurs after completion of 4.0 credits. Admission to some programs is limited. Please see individual program listings for admission criteria and procedures. Also check the Arts & Science Program Toolkit for details and application procedures.

**Specialist Programs**

Biochemistry, Biological Chemistry (Chemistry), Bioinformatics and Computational Biology (Cell & Systems Biology), Biology, Biophysics (Physics), Cell and Molecular Biology (Cell & Systems Biology), Ecology and Evolutionary Biology (Ecology & Evolutionary Biology), Environment and Health (School of the Environment), Fundamental Genetics and its Applications (Human Biology), Global Health (Human Biology), Health and Disease (Human Biology), Immunology, Molecular Genetics & Microbiology, Neuroscience (Human Biology), Pathobiology, Pharmaceutical Chemistry (Chemistry), Pharmacology, Physiology, Psychology, Psychology Research, Toxicology.

**Major Programs**

Animal Physiology (Cell & Systems Biology), Biochemistry, Biodiversity and Conservation Biology (Ecology & Evolutionary Biology), Biology, Cell and Molecular Biology (Cell & Systems Biology), Ecology & Evolutionary Biology, Environmental Biology (Ecology & Evolutionary Biology), Environment and Health (School of the Environment), Fundamental Genetics and its Applications (Human Biology), Genome Biology (Biological Sciences), Global Health (Human Biology), Health & Disease (Human Biology), Human Biology, Immunology, Neuroscience (Human Biology), Nutritional Sciences, Pharmacology, Physiology, Psychology, Toxicology.

**Minor Programs**

Biology, Environmental Biology (Ecology & Evolutionary Biology), NUS Biology (Ecology & Evolutionary Biology), Immunology, Physiology, Psychology.

**Animal Use in Laboratories**

Laboratory investigations are part of life science programs at the University of Toronto. Programs in life sciences at the University of Toronto include courses that involve observation, handling, or experimentation on animals or on samples derived from animals. The use of animals in teaching and research is regulated by ethical and procedural guidelines and protocols. These are approved on an ongoing basis by the University Animal Care Committee, and follow provincial and federal government rules. We recognize, however, that some students may have strong reservations about personal exposure to any use of animal material in teaching. Students who want to avoid registration in programs or courses that include such labs are, therefore, encouraged to check in advance with the departments involved.
Linguistics

Faculty List

Professors Emeriti
J.K. Chambers, MA, PhD
E.A. Cowper, AM, PhD
B.E. Dresher, BA, PhD
A. Johns, MA, PhD
D. Massam, MA, PhD
P.A. Reich, MS, PhD
R. Wardhaugh, MA, PhD

University Professor and Chair
S.A. Tagliamonte, MA, PhD

Professors and Associate Chair, Undergraduate
A. Kochetov, MA, PhD

Professors
N. Nagy, PhD
A.T. Perez-Leroux, MA, PhD
K.D. Rice, MA, PhD

Associate Professors
M.C. Cuervo, MA, PhD
D. Heller, MA, PhD
M. Ippolito, MA, PhD
P. Jurgec, MA, PhD

Assistant Professors
S. Bejar, MA, PhD
M. Grigoroglou, MA, PhD
S. Lima, MA, PhD
P. Mateo Pedro, MA, PhD
K. Moulton, MA, PhD
N. Sanders, MA, PhD
G. Thomas, MA, PhD

Adjunct Professor
M.L. Chasin, MSc, AuD

Retired Lecturer
E.M. Gold, MA, PhD

Introduction

Linguistics can trace its roots back to the ancient Sanskrit grammarians, and the study of language is probably as old as language itself. However, the twentieth century has produced an explosion in the scientific study of language. As our understanding of the nature and structure of human language develops, linguistics is becoming relevant to many other areas of research such as Cognitive Science, Artificial Intelligence, Speech-Language Pathology, Audiology, Psychology, and Philosophy.

On its own, linguistics represents an invaluable key to the nature of the mind and the diverse elements of human culture; as a tool, linguistics is unmatched in preparing one for the learning and teaching of languages and for integrating language with technology.

Part-time students should note that most of the summer and evening courses available to them are offered on a rotating basis only. Consequently, students wishing to take such courses should enroll in them at the earliest opportunity after completing the necessary prerequisites.

In addition to the undergraduate curriculum within the Department of Linguistics, there are courses relating to linguistics offered in other departments such as the language departments, Anthropology, Computer Science, Philosophy, and Psychology, and in the Cognitive Science and Artificial Intelligence program.

Students seeking counselling and information should contact the Undergraduate Administrator (undergrad.linguistics@utoronto.ca) or the Associate Chair, Undergraduate, Prof. Alexei Kochetov (ugling@chass.utoronto.ca).

Linguistics Programs

Linguistics Specialist (Arts Program) - ASSPE0506

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

(12 full courses or their equivalent)

Language Requirement (2 FCEs): Two years of study or its equivalent of one non-Germanic, non-Romance language in courses using the spoken language (courses must be approved by the Undergraduate Coordinator). We encourage you to begin this language study in your first or second year.

Required Courses (5.5 FCEs):

First Year: LIN101H1, LIN102H1
Second Year: LIN228H1, LIN229H1, LIN322H1, LIN241H1, LIN251H1
Third and Fourth Years: LIN321H1, LIN331H1, JAL401H1 plus at least one of JLP374H1 or JLP315H1

Elective Courses (4.5 FCEs):

A total of 4.5 FCEs in LIN/JAL/JFL/JLP/JLS (excluding LIN200H1, LIN203H1, LIN204H1) including:
- a 1.5 FCEs at the 300+ level
- a .5 FCE at the 400 level

Up to 1 FCE may be from other departments. Approved courses include ANT329H1, ANT425H1, ANT427H1, COG250Y1, CSC384H1, CSC401H1, CSC448H1, CSC485H1, FIN320H1, FIN305H1, FRE272H1, FRE273H1, FRE274H1, FRE376H1, FRE378H1, FRE379H1, FRE383H1, FRE388H1, FRE471H1, FRE487H1, FRE488H1, FRE489H1, GER400H1, GER426H1, GER462H1, HPS250H1, HPS322H1, HPS352H1, ITA360H1, ITA363H1, NML315H1, NML463H1, PHL210Y1, PHL245H1, PHL310H1, PHL311H1, PHL325H1, PHL326H1, PHL340H1, PHL342H1, PHL345H1, PHL347H1, PHL351H1, PHL355H1, PHL405H1, PHL415H1, PHL479H1, PHA480H1, PHT364H1, PRT368H1, SLA255H1, SLA380H1, SLA452Y1, SPA322H1, SPA324H1, SPA421H1, SPA422H1, SPA423H1, VJC223Y1. Other courses...
might also qualify; consult the Department of Linguistics for approval.

Linguistics Major (Arts Program) - ASMAJ0506

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

Requirements (7.0 FCEs):

1) All of: LIN101H1, LIN102H1
2) All of: LIN228H1, LIN229H1, LIN232H1, LIN241H1, LIN251H1
3) 0.5 FCE from: JLP374H1 or JLP315H1
4) A further 1.0 LIN/JAL/JFL/JLP/JLS FCE at the 300+ level
5) 0.5 LIN/JAL/JFL/JLP/JLS FCE at the 400-level
6) An additional 1.5 FCEs in LIN/JAL/JFL/JLP/JLS (excluding LIN200H1, LIN203H1, LIN204H1)

Linguistics Minor (Arts Program) - ASMIN0506

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

(4 full courses or their equivalent)

First Year: LIN101H1, LIN102H1
Higher Years: Three FCE’s in LIN/JAL/JFL/JLP/JLS (excluding LIN200H1) at least one of which must be at the 300+ level

Linguistics Courses

LIN101H1 - Introduction to Linguistics: Sound Structure

Hours: 24L/12T

Introduction to fundamental principles of linguistics with particular attention to sound structure and its acquisition, processing, and variation; practice in elementary analytic techniques using data from a broad spectrum of languages.

Exclusion: LIN100Y1, LIN101H5, LINA01H3, LINA02H3
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

LIN102H1 - Introduction to Linguistics: Sentence Structure and Meaning

Hours: 24L/12P

Introduction to fundamental principles of linguistics with particular attention to sentence and meaning structure, their acquisition, processing, and variation; practice in elementary analytic techniques using data from a broad spectrum of languages.

Exclusion: LIN100Y1, LIN102H5, LINA01H3, LINA02H3
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

LIN194H1 - The Science Behind Our Accents

Previous Course Number: TBB199H1
Hours: 24P

When we speak, the sound is transmitted through the air as a complex sound wave. How are various speech sounds – vowels and consonants – manifested acoustically? What does it mean, in physical terms, to have an accent? These and other related questions will be explored through computer-based acoustic analysis and perceptual experimentation. Upon completion of this course, students will (i) have overview knowledge of basic acoustic properties characterizing phonetic variation pertaining to speech, and accents in particular, (ii) be able to conduct simple speech production and perception experiments, and write up results in the form of scientific research reports, (iii) begin to read and understand scientific literature pertaining to acoustic phonetic variation and its relevance for communication. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)
LIN195H1 - Babel: Language in the Mind of Speakers

Hours: 24L

What is the relation between language and thought? In this course we examine how language is represented in our minds, and how language and cognitive processes interact. While the link between words and meanings is arbitrary and reflects culture, language is considered to be a universal property of our species. We will examine the place of language in the architecture of the mind; the debates about the universality of language structure vs. linguistic relativism; and how language and thought interact in children's development. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Social Science  
Breadth Requirements: Thought, Belief and Behaviour (2)

LIN196H1 - Language and Communication

Hours: 24L

We will explore the ways in which information is communicated in conversation. We will consider systematic ways in which what a speaker intends to communicate with language goes beyond what one says in conversation. The goal of the course is to investigate the ways in which speakers rely on knowledge of language and implicit "rules" to enrich and transform the literal content of someone's utterance.

Students will familiarize themselves with some fundamental concepts in linguistic semantics and pragmatics. They will develop analytic skills necessary to analyze a text in an academic context and beyond. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Social Science  
Breadth Requirements: Thought, Belief and Behaviour (2)

LIN197H1 - Language and Social Justice

Hours: 24L

This course explores how language is used to construct and reinforce unjust social structures. Topics may include: the underlying sexism, classism, racism, and ableism of prestige dialects and prescriptive language education; the history and consequences of national language movements; language endangerment, documentation, and revival; sign languages and language rights for the deaf and hard-of-hearing; popular media representations of linguistic variation, especially vocal fry, uptalk, and regional accents; and the relationships between language and sex, gender identity, and sexuality.

Students will develop research, analytic, and writing skills through critique and discussion of assigned texts, independent research projects, and regular written and oral presentation of their work. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Social Science  
Breadth Requirements: Thought, Belief and Behaviour (2)

LIN198H1 - Language Diversity

Hours: 24L

There are estimated to be about 7000 languages currently spoken in the world. What do they have in common? In what ways are they different? This course will explore these questions, covering such topics as meaning, sound systems, the structure of words, the order of words in sentences, question formation, concepts such as subject and object, tense systems, pronoun systems. We will also discuss language loss and revival. Students will develop analytic skills as they consult published grammars and other resources to address these issues. Students will share their findings through oral and written presentation. Examples will be drawn from a wide range of languages. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Social Science  
Breadth Requirements: Thought, Belief and Behaviour (2)
LIN199H1 - Exploring Heritage Languages

Hours: 24L

We will explore how speakers use Heritage Languages in Toronto, using data recently collected in the GTA, so students should be familiar with one of these languages. We will collect, organize and interpret information about heritage languages in Toronto. We will look for speech patterns that differentiate first, second and third generation speakers in Toronto from corresponding speakers in their countries of origin, and look at the effects of cultural and language attitudes and usage.

Students will develop analytic skills as they explore a range of research methods and resources to address these issues. Students will share their findings through oral and written presentation, including online formats. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Social Science
Breadth Requirements: Thought, Belief and Behaviour (2)

LIN200H1 - Introduction to Language

Hours: 24L/12T

Introduction to Language is a general-interest course on language. Possible topics include: the structure of language; how language changes over time, the social and psychological aspects of language, language and culture, the origin of language, writing systems, and language acquisition. (This course cannot be used as an entrance to programs in linguistics, and cannot be used as a prerequisite to any linguistics courses unless otherwise indicated.)

Exclusion: LIN100Y1, LIN101H1, LIN102H1, LIN101H5, LIN102H5, LINA01H3, LINA02H3, ANT253H1
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

LIN203H1 - English Words

Hours: 24L/12T

English has a rich vocabulary. We will learn how it has developed over time, and investigate aspects of the meaning and pronunciation of words. Most of all, we will study how words are put together, so that students will be able to recognize and analyze unfamiliar words.

Exclusion: LIN203H5
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

LIN204H1 - English Grammar

Hours: 24L/12T

How the English language works: students analyze a wide variety of English grammatical structures and learn how they vary across dialects and change through time.

Exclusion: LIN204H5, LINB18H3
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

LIN228H1 - Phonetics

Hours: 24L/12T

Phonetics is a linguistics course that investigates the sounds most commonly used in languages from an articulatory and acoustic point of view, with practice in their recognition and production. Students will learn the International Phonetic Alphabet (IPA) and practice transcribing a wide variety of speech sounds.

Exclusion: LIN228H5, LINB09H3
Recommended Preparation: LIN101H1/LIN200H1
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

LIN229H1 - Sound Patterns in Language

Hours: 24L/12T

The nature and organization of phonological systems, with practical work in linguistic analysis.

Prerequisite: LIN101H1, LIN228H1
Exclusion: LIN229H5, LINB04H3
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)
LIN232H1 - Syntactic Patterns in Language

Hours: 24L/12T

The nature and organization of syntactic systems; their relation to semantic systems and the linguistic organization of discourse; practical work in linguistic analysis.

Prerequisite: LIN102H1
Exclusion: LIN232H5, LINB06H3
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

LIN241H1 - Introduction to Semantics

Hours: 24L/12T

An introduction to meaning within linguistics and the interpretation of language in context. Topics include logical and semantic relations, pragmatic concepts such as presupposition and implicature, the nature of thematic roles, quantifiers and scope relations, the expressions of temporal and modal relations in natural language.

Prerequisite: LIN102H1
Exclusion: LIN247H5, LINC12H3
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

LIN251H1 - Introduction to Sociolinguistics

Hours: 24L/12T

How does linguistic variation construct identity? Introduction to recent sociolinguistic literature on language contact, multilingualism, code-switching, expressions of ethnic solidarity and regional identity, sex and gender differentiation, dialect geography, sociophonetics, perceptual dialectology, diffusion of norms in mobile populations, documentation of variation in lesser studied languages, and changes across the life-span.

Prerequisite: LIN101H1, LIN102H1
Exclusion: LIN256H5, LINB20H3
Distribution Requirements: Social Science
Breadth Requirements: Thought, Belief and Behaviour (2)

LIN299Y1 - Research Opportunity Program

Credit course for supervised participation in faculty research project. Details at https://www.artsci.utoronto.ca/current/academics/research-opportunities/... Not eligible for CR/NCR option.

Distribution Requirements: Social Science

LIN305H1 - Quantitative Methods in Linguistics

Hours: 36L

Principles of research design, data collection, and a wide variety of statistical techniques for research in various subfields of linguistics.

Prerequisite: LIN101H1, LIN102H1 and one full course in LIN/JAL/JFL/JLP
Distribution Requirements: Social Science
Breadth Requirements: Thought, Belief and Behaviour (2)

LIN306H1 - Language Diversity and Language Universals

Hours: 24L

This linguistics course examines cross-linguistic typological features found in the languages of the world. Special attention is given to describing morphological and syntactic patterns found cross-linguistically. The goal of the course is to draw on the diversity of languages in order to uncover language universals. (Not offered every year)

Prerequisite: LIN232H1
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

JLP315H1 - Language Acquisition

Hours: 36L

Infants’ abilities at birth, prelinguistic development, the first words, phonological, syntactic and semantic development. Social variables influencing language acquisition, bilingualism, models of development, language play. (Sponsored by the Departments of Linguistics and Psychology, but administered solely by the Dept. of Linguistics).

Prerequisite: One full course equivalent at the 200+-level in LIN/JAL/JUP/PSL/PSY/COG
Exclusion: PSY315H5, PLIC24H3
Distribution Requirements: Science
Breadth Requirements: Thought, Belief and Behaviour (2)
LIN322H1 - Phonological Theory

Hours: 36L

Basic issues in current phonological theory. Problems focusing on analysis and theory. (Students who want to pursue graduate studies in linguistics are strongly advised to include this course in their program.)

Prerequisite: LIN229H1
Exclusion: LIN322H5, LINC02H3
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

LIN333H1 - Morphological Patterns in Language

Hours: 36L

The nature and organization of morphological systems, with practical work in linguistic analysis.

Prerequisite: LIN229H1, LIN232H1
Exclusion: LIN331H5, LINC11H3
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

LIN323H1 - Acoustic Phonetics

Hours: 24L

This linguistics course is an introduction to the acoustic phonetics of the vocal tract, including acoustic properties of speech and its analysis using instrumental techniques.

Prerequisite: LIN101H1, LIN102H1, LIN228H1
Exclusion: LIN328H5
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

LIN331H1 - Syntactic Theory

Hours: 36L

A course in syntactic theory and analysis within a current formal framework. (Students who want to pursue graduate studies in linguistics are strongly advised to include this course in their program.)

Prerequisite: LIN232H1
Exclusion: LIN331H5, LINC11H3
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

LIN341H1 - Semantic Theory

Hours: 36L

This linguistics course focuses on the study of natural language semantics and the relation between interpretation and syntactic structure. Topics include predication and quantification, scope and anaphora, problems of discourse analysis, the interpretation of different types of pronouns, and ellipsis.

Prerequisite: LIN241H1
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

JAL328H1 - Writing Systems

Hours: 36L

Introduction to writing systems; their historical development, their relationship to language, and their role in culture and society. (Given by the Departments of Anthropology and Linguistics) (Not offered every year)

Prerequisite: ANT100Y1/LIN101H1/LIN200H1
Distribution Requirements: Social Science
Breadth Requirements: Thought, Belief and Behaviour (2)

LIN351H1 - Sociolinguistic Patterns in Language

Hours: 24L/12T

In this sociolinguistics course, we explore linguistic variation and its social implications, especially the quantitative study of phonological and grammatical features and their correlations with age, sex, ethnicity, and other social variables.

Prerequisite: LIN251H1, or permission of the instructor
Distribution Requirements: Humanities; Social Science
Breadth Requirements: Society and its Institutions (3)
JAL353H1 - Conversational Structures

Hours: 36L

Conversational Structures in an introduction to the detailed observation of ordinary conversational interaction, and to some of the main ways in which such interaction is organized. The focus is on developing the capacity to discern orderliness in the details of everyday interaction, and beginning independent research in this area. (Given by the Departments of Anthropology and Linguistics). Not offered every year.

Prerequisite: (LIN101H1, LIN102H1)/LIN200H1/ANT253H1
Distribution Requirements: Social Science
Breadth Requirements: Thought, Belief and Behaviour (2)

JAL355H1 - Language and Gender

Hours: 24L

An introduction to some of the principal questions of feminist theory, as viewed from sociolinguistics. Topics include: socialization into gendered discourse patterns, cultural and ethnic differences in gendered interactions; the role of language and gender in legal, medical and labour settings; multilingualism, migration, imperialism and nationalism; sexuality, desire and queer linguistics, language, gender and globalization.

Prerequisite: One FCE at the 200-level in LIN/ANT/JAL/SOC/WGS
Recommended Preparation: ANT204H1/ANT253H1/SOC200H1/SOC214H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

LIN362H1 - Historical Linguistics

Hours: 24L

An introduction to diachronic linguistics. Theories of language change; the comparative method, internal reconstruction, linguistic geography, the origin of languages; language death.

Prerequisite: LIN229H1
Exclusion: LIN360H5
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

JLP374H1 - Psychology of Language

Hours: 36L

In Psychology of Language, we investigate human and other animal communication, structure of human language, word meaning and semantic memory, psychological studies of syntax, bilingualism, language and thought, language errors and disorders. (Sponsored by the Departments of Linguistics and Psychology, but administered solely by the Dept. of Linguistics).

Prerequisite: One FCE from LIN228H1, LIN229H1, LIN232H1, LIN241H1, PSY260H1, PSY270H1, PSY280H1, PSY290H1, COG250Y1
Exclusion: LIN258H5, PSY374H5, PLIC55H3
Distribution Requirements: Science
Breadth Requirements: Thought, Belief and Behaviour (2)

LIN398H0 - Research Excursions

An instructor-supervised group project in an off-campus setting. Details at https://www.artsci.utoronto.ca/current/academics/research-opportunities/... Not eligible for CR/NCR option.

Distribution Requirements: Humanities

LIN398Y0 - Research Excursions

An instructor-supervised group project in an off-campus setting. Details at https://www.artsci.utoronto.ca/current/academics/research-opportunities/... Not eligible for CR/NCR option.

Distribution Requirements: Humanities

LIN399Y1 - Research Opportunity Program

Credit course for supervised participation in faculty research project. Details at https://www.artsci.utoronto.ca/current/academics/research-opportunities/... Not eligible for CR/NCR option.
JAL401H1 - Field Linguistics

Hours: 48P

Field Linguistics provides practice in language analysis based on elicited data from a native speaker of an indigenous or foreign language, emphasizing procedures and techniques. (Given by the Departments of Anthropology and Linguistics)

Prerequisite: Completion of LIN322H1 and LIN331H1 or permission of the instructor
Exclusion: LIND46H3
Distribution Requirements: Social Science
Breadth Requirements: Thought, Belief and Behaviour (2)

LIN402H1 - Linguistic Typology and Constructed Languages

Hours: 36L

This course uses constructed languages (e.g., Esperanto, Klingon, Dothraki) to explore crosslinguistic patterns in language structure. Topics include phonological and morphosyntactic typology, language change over time, effects of culture and environment on language, history of language construction, standards in writing descriptive grammars, and critical analysis of research on language diversity.

Prerequisite: 5 required 200-level courses (LIN228H1, LIN229H1, LIN232H1, LIN241H1, LIN251H1), AND LIN322H1 Phonological Theory OR LIN331H1 Syntactic Theory, or permission of the instructor.
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

LIN405H1 - Advanced Quantitative Methods in Linguistics

Hours: 36L

This course introduces advanced statistical modeling techniques using the statistical software R, tailored specifically to the needs of linguistic research.

Prerequisite: LIN305H1
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

LIN409H1 - Structure of a Specific Language

Hours: 24L

Topics may include: the phonological, morphological, syntactic, and semantic systems; the writing system; a brief diachronic sketch; linguistic variation and sociolinguistic aspects. (Not offered every year).

Prerequisite: LIN228H1, LIN229H1, LIN232H1 + 1 FCE at THE 300+ level in LIN/JAL/JFL/JLP/JLS
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

LIN423H1 - Phonetic Analysis

Hours: 36S

This course provides students with hands-on experience with main methods of linguistic phonetic (acoustic and articulatory) analysis through project-based group work and training in writing up experimental results.

Prerequisite: LIN323H1
Distribution Requirements: Humanities; Social Science
Breadth Requirements: The Physical and Mathematical Universes (5)

LIN429H1 - Research in Phonology

Hours: 24S

Research in Phonological Theory, including guided instruction in how to undertake critical reading of primary literature, develop an original topic, write a research paper, an abstract, a handout, and give an oral presentation. Not eligible for CR/NCR option.

Prerequisite: LIN322H1
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

LIN432H1 - Advanced Morphology

Hours: 24L

Current research involving morphology, including the role of morphology in the grammar, the nature of inflectional paradigms, affixes affecting grammatical relations constitute this linguistics course. Each year one topic will be a special focus and will be dealt with at length. (Not offered every year)

Prerequisite: LIN333H1
Corequisite: LIN331H1
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)
LIN439H1 - Research in Syntax

Hours: 24S

Research in Syntactic Theory, including guided instruction in how to undertake critical reading of primary literature, develop an original topic, write a linguistics research paper, an abstract, a handout, and give an oral presentation. Not eligible for CR/NCR option. (Not offered every year)

Prerequisite: LIN331H1
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

LIN441H1 - Advanced Semantics and Pragmatics

Hours: 24S

This course covers current research in formal semantics and pragmatics. Topics may vary from year to year. The course is intended to be a seminar-style course; it includes reading primary literature and writing a research paper.

Prerequisite: LIN341H1
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

LIN451H1 - Urban Dialectology

Hours: 24L

Ways in which urban sub-cultures differ in their use of language. How speakers dialects reflect their ethnicity, group affiliation, and other social categories. Practice in dialect analysis based on data from the speech community, emphasizing procedures and techniques.

Prerequisite: LIN351H1 plus 2 FCE at the 200+ level in LIN/JAL/JLP
Distribution Requirements: Humanities; Social Science
Breadth Requirements: Society and its Institutions (3)

LIN456H1 - Language Variation and Change: Theory and Analysis

Hours: 36L

The theory and practice of sociolinguistics. The inter-relationship between language and society from the perspective of collecting, organizing, and analyzing patterns in natural speech data, including field methods and quantitative methods for correlating linguistic and social variables.

Prerequisite: LIN351H1
Distribution Requirements: Humanities; Social Science
Breadth Requirements: Society and its Institutions (3)

LIN458H1 - Revitalizing Languages

Hours: 24L

A study of language endangerment and language revitalization efforts, focusing on Indigenous languages of Canada. Topics include language classification and a survey of major features of the languages, what it means for a language to be endangered, the factors that contribute to language shift, and efforts to reverse language shift, including discussion of literacy, documentary linguistics and dictionaries.

Prerequisite: LIN101H1, LIN102H1 plus 2 FCE at the 200+ level in LIN/JAL
Distribution Requirements: Humanities; Social Science
Breadth Requirements: Society and its Institutions (3)

JLP471H1 - Advanced Psycholinguistics

Hours: 24S

Seminar in advanced topics in psycholinguistics. Content varies from year to year. (Sponsored by the Departments of Linguistics and Psychology, but administered solely by the Dept. of Linguistics).

Prerequisite: JLP374H1
Distribution Requirements: Science
Breadth Requirements: Thought, Belief and Behaviour (2)
**JLS472H1 - Child Language Disorders**

*Hours: 36L*

Students are introduced to the etiologies and characteristics of speech and language disorders in children, associated with autism, intellectual disabilities, and specific language impairment. Theoretical underpinnings of the major intervention approaches for children with speech and language disorders are discussed. (Given by the Departments of Linguistics and Speech Language Pathology)

**Prerequisite:** LIN101H1, LIN102H1, LIN228H1, and 1 FCE at the 300+ level

**Distribution Requirements:** Science

**Breadth Requirements:** Living Things and Their Environment (4)

---

**JLS476H1 - Linguistics in the Workforce: Clinical Practice and Research**

*Hours: 36S*

This course exposes students to research and practical approaches in the context of health professions of relevance to linguistics students, especially audiology and speech-language pathology. Students learn about evidence-informed practice, research methodologies, practice approaches and theories in the health professions. Students will be poised to benefit from optional service learning placements during or following the course, in research laboratories or clinical settings. Successful completion of this course provides students with exposure and experience of use in their applications to audiology, speech-language pathology, and other clinical programs and in their future health or graduate studies. Not eligible for CR/NCR option. (Not offered every year)

**Prerequisite:** LIN101H1, LIN102H1, and one FCE at the 300+ level

**Distribution Requirements:** Science

**Breadth Requirements:** Living Things and Their Environment (4)

---

**JLS473H1 - Adult Speech and Language Disorders**

*Hours: 36L*

Students are introduced to the etiologies and characteristics of speech and language disorders in adults, associated with aphasia, neurodegenerative disorders, and head injuries. The effects of communication handicaps on the individual and theoretical underpinnings of the major intervention approaches for adults are discussed. Given by the Departments of Linguistics and Speech Language Pathology. (Not offered every year)

**Prerequisite:** LIN101H1, LIN102H1, and one FCE at the 300+ level

**Distribution Requirements:** Science

**Breadth Requirements:** Living Things and Their Environment (4)

---

**JLS475H1 - Literacy and Reading Disorders**

*Hours: 36L*

Literacy and Reading Disorders is an introduction to the typical development of emergent literacy skills, including oral language, phonological awareness, narratives, and emergent writing in children; a discussion of the effects of language disorders on emergent literacy skills; a survey of approaches to intervention for children’s emergent literacy skills. Given by the Departments of Linguistics and Speech Language Pathology. (Not offered every year)

**Prerequisite:** LIN101H1, LIN102H1, and one FCE at the 300+ level

**Distribution Requirements:** Science

**Breadth Requirements:** Living Things and Their Environment (4)

---

**LIN481H1 - Introduction to Analysis and Argumentation**

*Hours: 36L*

Linguistic argumentation, practice in constructing and evaluating hypotheses, and critical evaluation of representative articles. Emphasis on the structure of arguments rather than on the analysis of a particular language.

**Prerequisite:** LIN322H1/LIN331H1

**Distribution Requirements:** Humanities

**Breadth Requirements:** Thought, Belief and Behaviour (2)

---

**LIN490H1 - Special Topics in Linguistics**

*Hours: 24S*

A specific topic in linguistics will be explored in depth in Special Topics in Linguistics. Students will learn about a narrowly-focused area of linguistics, including guided instruction in how to undertake critical reading of primary literature, develop a research topic and write a linguistics research paper. Not eligible for CR/NCR option. (Not offered every year)

**Prerequisite:** 2.0 LIN FCE at the 200+ level, of which 1.0 LIN FCE must be at the 300+ level. Permission of the instructor will also be required.

**Distribution Requirements:** Humanities

**Breadth Requirements:** Thought, Belief and Behaviour (2)
LIN495Y1 - Individual Project

A research or reading project in linguistics undertaken by the student under the supervision of a staff member. Open only when a faculty member is willing and available to supervise. Not eligible for CR/NCR option.

Prerequisite: Permission of the Department

Distribution Requirements: Humanities; Social Science

LIN496H1 - Individual Project

A research or reading project in linguistics undertaken by the student under the supervision of a staff member. Open only when a faculty member is willing and available to supervise. Not eligible for CR/NCR option.

Prerequisite: Permission of the Department

Distribution Requirements: Humanities; Social Science

LIN497Y1 - Individual Project

A research or reading project in linguistics undertaken by the student under the supervision of a staff member. Open only when a faculty member is willing and available to supervise. Not eligible for CR/NCR option.

Prerequisite: Permission of the Department

Distribution Requirements: Humanities; Social Science

LIN498H1 - Individual Project

A research or reading project in linguistics undertaken by the student under the supervision of a staff member. Open only when a faculty member is willing and available to supervise. Not eligible for CR/NCR option.

Prerequisite: Permission of the Department

Distribution Requirements: Humanities; Social Science

LIN499H1 - Individual Project

A research or reading project in linguistics undertaken by the student under the supervision of a staff member. Open only when a faculty member is willing and available to supervise. Not eligible for CR/NCR option.

Prerequisite: Permission of the Department

Distribution Requirements: Humanities; Social Science
Materials Science

Materials science is the study of the structure, properties and applications of all types of materials including metals, ceramics, glasses and polymers. Currently many exciting scientific developments are in the materials field. Notable advances have been made recently in studies of amorphous metals, the quasicrystalline state, liquid crystals, semiconductors, nanostructured materials, high critical temperature superconductors, biomaterials, high strength polymers, materials processing techniques such as ion implantation and laser melting, and in new categories of engineered materials such as advanced industrial ceramics or composite materials.

Materials science is interdisciplinary, drawing on the basic sciences of chemistry and physics and on more applied subjects such as metallurgy, ceramics and polymer science. Its tools and techniques include electron microscopy, x-ray diffraction, surface analysis using Auger emission spectroscopy, x-ray photoelectron spectroscopy, etc.

Introduction to Materials Science, MSE101H1, is designed to appeal to a wide variety of student interests. Other materials science courses are available to students having the prescribed prerequisites and the approval of the Undergraduate Student Counsellor. The specialist program in Materials Science is coordinated jointly by the Departments of Chemistry and Materials Science and Engineering. For further information on the program, consult the undergraduate coordinators for both departments.

Materials Science Programs

Materials Science Specialist (Science Program) - ASSPE2424

Description:
Consult Professor Andrew Dicks, Department of Chemistry.

This program draws both on the basic sciences of chemistry and physics, and on the more applied areas such as metallurgy or ceramics. Courses dealing with these latter fields are offered through the Department of Materials Science in the Faculty of Applied Science and Engineering. This would be an appropriate program for students with career interests in solid-state, polymer or composite materials industries, or for graduate work in either chemistry or materials science, with an appropriate choice of options. Students may follow the Materials Chemistry path by taking the research course CHM499Y1 or the Materials Science and Engineering path by taking the research course MSE498Y1.

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

Completed courses (with minimum grades)
The following courses with the stated minimum grades are required:

• (CHM135H1 and CHM136H1) (63% in each)/CHM151Y1 (63%)

Completion Requirements:

(14.0 credits, including 1.0 credit from 400-series courses)

First Year: BIO120H1, CHM151Y1 (strongly recommended)/(CHM135H1 and CHM136H1)/MAT135Y1/MAT136Y1/MSE120H1

First or Second Year: BIO130H1/BIO220H1/(PHY131H1 and PHY132H1)/(PHY151H1 and PHY152H1)

Second Year and Higher Years

1. (CHM220H1/CHM222H1 and CHM223H1/MSE202H1), CHM238Y1, CHM247H1/CHM249H1
2. MSE219H1, MSE318H1, MSE335H1
3. CHM325H1, CHM327H1, CHM338H1, CHM343H1/CHM348H1, CHM426H1, CHM434H1
4. At least three of the following one of which must be a 400-series: MSE302H1, MSE316H1, MSE343H1, CHM343H1, CHM446H1, MSE415H1, MSE430H1, MSE432H1, MSE440H1, MSE442H1, MSE451H1, MSE458H1, MSE459H1, MSE461H1
5. CHM499Y1/MSE498Y1

Regarding Materials Science Courses

Notes

1. The MSE courses below are administered by the Faculty of Applied Science and Engineering, and are subject to the rules and regulations of that Faculty, including those for term dates, examination periods and deferral practices.
2. The CHM courses listed for the Materials Science program are described in the Chemistry section of this Calendar.
3. Enrollment in MSE courses is done through your own College Registrar. It is not necessary to petition as the courses listed below have been pre-approved for this Specialist Program.
4. Deferment of Final Exams is NOT generally granted in the Faculty of Applied Science and Engineering.
Materials Science Courses

MSE120H1 - Materials Engineering, Processing and Application

Hours: 38.4L/6.4T/12.8P

This course covers an introduction to the field of materials science and engineering following a design-led approach. Application areas such as stiffness-limited design, fracture-limited design, strength-limited design will be used to guide further investigations into elements of the processing-structure-properties-performance paradigm. Topics covered will include material property charts, computer-aided design and materials selection, crystallographic planes and directions, crystal structures, stiffness, strength, plasticity, yielding, ductility, fracture and fracture toughness, cyclic loading and fatigue, friction and wear, thermal properties of materials, electrical properties, optical properties, materials corrosion, and materials processing.

MSE219H1 - Structure and Characterization of Materials

Hours: 39L/13T/39P

Introduction to two and three-dimensional crystallography and crystal structures of solids. Topics include: Pearson and Hermann-Mauguin symbols, reciprocal space, point group and space group symmetry analysis, stereographic projections. Introduction to tensor analysis of crystalline material properties, and symmetry breakdown by imperfections in crystals. Experimental techniques used to interpret structure and chemistry of solids and their defects will be covered theoretically and in the laboratory including: X-ray diffractometry, optical, electron and scanning probe microscopy, and surface/bulk spectroscopies based on optical, X-ray, electron and ion-beam analysis methods.

MSE316H1 - Mechanical Behaviour of Materials

Hours: 39L/13T/20P

The mechanical behaviour of engineering materials including metals, alloys, ceramics and polymeric materials. The following topics will be discussed: macro- and micro-structural response of materials to external loads; load-displacement and stress-strain relationships, processes and mechanisms of elastic, visco-elastic, plastic and creep deformation, crystallographic aspects of plastic flow, effect of defects on mechanical behaviour, strain hardening theory, strengthening mechanisms and mechanical testing.

MSE318H1 - Phase Transformations

Hours: 39L/13T/20P

MSE335H1 - Materials Physics

Hours: 39L/13T

MSE342H1 - Nanomaterials

Hours: 26L/13T

An introduction to nanostructured materials. Topics include: the different classes of nanomaterials, synthesis and characterization methods, changes in physical properties on the nanometer scale, areas of application of nanostructured materials and materials issues in nanotechnology. (Quarter term course taught over the entire Fall term, worth .25 credits).

MSE343H1 - Biomaterials

Hours: 26L/13P

The course will provide an overview of the applications of materials (metals, polymers, ceramics, composites and modified tissue-based materials) for surgical implant fabrication. The important considerations in selection of materials for fabrication of these devices with an introduction to the biological responses expected with implantation will also be discussed. The concept of biocompatibility will be introduced as well as the essential elements of biology related to an understanding of this criterion for biomaterial selection and implant design. (Quarter term course taught over the entire Fall term, worth .25 credits).
MSE351H1 - Design and Sim of Materials Processes

Hours: 36L/12T/24P

Various phenomena involved in materials processing and design will be modeled using a software package based on the finite element method. Examples will include aspects of solid state diffusion, structural stress, heat transfer, fluid flow and chemical reactions. The problems will involve unsteady state as well as 3 dimensional systems. Multi-physics phenomena such as heating of an electric component by an electric current, resulting in a change in physical properties affecting thermal properties will also be introduced. The main objective of this course is to introduce students to the use of a commercial software package to solve fairly common but complex physical and chemical phenomena related to the materials industry.

MSE430H1 - Electronic Materials

Hours: 26L/13T

Materials parameters and electronic properties of semiconductors are discussed as basic factors in the engineering of semiconductor devices. Materials parameters are related to preparation and processing methods, and thus to the electronic properties. The implications of materials parameters and properties on selected simple devices are discussed.

MSE440H1 - Biomedical Processing and Properties

Hours: 39L/13T

Currently used biomaterials for formation of surgical implants and dental restorations include selected metals, polymers, ceramics, and composites. The selection and processing of these materials to satisfy biocompatibility and functional requirements for applications in selected areas will be presented. Materials used for forming scaffolds for tissue engineering, and strategies for repair, regeneration and augmentation of degenerated or traumatized tissues will be reviewed with a focus on biocompatibility issues and required functionality for the intended applications.

Prerequisite: MSE343H1

MSE451H1 - Advanced Physical Properties of Structural Nanomaterials

Hours: 39L/13T/39P

This course deals with the physical properties of bulk nanostructured materials. Included are mechanical properties (elastic behavior, tensile and compressive strength, creep, wear and fatigue properties) electrical properties (electrical transport phenomena, electrical resistivity) magnetic properties (paramagnetic, diamagnetic, soft and hard ferromagnetic, superparamagnetic and antiferromagnetic properties), thermodynamic properties (interfacial enthalpy, thermal stability, phase transformations, heat capacity). The considerable differences observed for nanocrystalline solids compared to conventional polycrystalline and amorphous solids will be discussed in terms of the microstructural differences for these materials.

MSE459H1 - Synthesis of Nanostructured Materials

Hours: 39L/26P

Various synthesis techniques to produce nanostructured materials will be introduced. These include methods involving the vapor phase (physical and chemical vapor deposition, organometallic chemical vapor deposition), the liquid phase (rapid solidification, spark erosion), the solid phase, (mechanical attrition, equal channel deformation) as well techniques producing these structures from solution (electrodeposition, electroless processing, precipitation). Secondary processing techniques to produce final products or devices will also be discussed.

MSE461H1 - Engineered Ceramics

Hours: 39L/24T

The unique combinations of physical, electrical, magnetic, and thermomechanical properties exhibited by advanced technical ceramics has led to a wide range of applications including automobile exhaust sensors and fuel cells, high speed cutting tool inserts and ball bearings, thermal barrier coatings for turbine engines, and surgical implants. This course examines the crystal and defect structures which determine the electrical and mass transport behaviours and the effects of microstructure on optical, magnetic, dielectric, and thermomechanical properties. The influence of these structure-property relations on the performance of ceramic materials in specific applications such as sensors, solid oxide fuel cells, magnets, and structural components is explored.
MSE498Y1 - Capstone Project: Design of Materials Processes

Hours: 12.8L/25.6T/12.8P

The students, working in small groups complete a project involving design of a materials processing plant, leading to a design report delivered at the conclusion of the course. The topics covered in the lectures and design process include basic materials processing flowsheet for primary processing and recycling of materials, materials and energy balance of individual units and of overall process flowsheets, use of computer software for flowsheet evaluation, translating process flowsheets to resource and utility requirements, energy analysis, capital/operating cost, basics of equipment sizing, operation scheduling, safety and HAZOP, plant layout, and design for sustainability.

Exclusion: CHM499Y1
Faculty List

Professor and Chair of the Department
J. Quastel, MSc, Ph D, FRSC

Professor and Associate Chair (Research)
S. Alexakis, BA, Ph D

Professor and Associate Chair (Graduate)
K. Rafi, B Sc, Ph D

Professor and Associate Chair (Undergraduate)
J. Repka, B Sc, Ph D (U)

University Professors
J.G. Arthur, MA, Ph D, FRSC, FRS
J. Friedlander, MA, Ph D, FRSC (UTSC)
I.M. Sigal, BA, Ph D, FRSC

Professors
D. Bar-Natan, B Sc, Ph D
E. Bierstone, MA, Ph D, FRSC
I. Binder, B Sc, M Sc, Ph D (UTM)
J. Bland, M Sc, Ph D
A. Braverman, B Sc, Ph D
A. Burchard, B Sc, Ph D
G. Elliott, B Sc, Ph D, FRSC
M. Goldstein, B Sc, Ph D (UTSC)
M. Gualtieri, B Sc, Ph D
V. Ivrii, MA, Ph D, Dr Math, FRSC
L. Jeffrey, AB, Ph D, FRSC (UTSC)
R. Jerrard, M Sc, Ph D (U), FRSC
J. Kamnitzer, B Sc, Ph D
V. Kapovich, B Sc, Ph D
Y. Karshon, B Sc, Ph D (UTM)
K. Khanin, M Sc, Ph D (UTM)
B. Khesin, M Sc, Ph D
A. Khovanski, M Sc, Ph D
H. Kim, B Sc, Ph D
S. Kudla, B A, MA, Ph D, FRSC
M. Marcolli, M Sc, Ph D
R. McCann, BSc, Ph D, FRSC
E. Meinrenken, B Sc, Ph D, FRSC
P. Milman, Dipl Maths, Ph D, FRSC
F. Murtagh, M Sc, Ph D
K. Murty, B Sc, Ph D, FRSC
A. Nabutovsky, M Sc, Ph D
A. Nachman, B Sc, Ph D
D. Panchenko, B Sc, M Sc, Ph D
M. Pugh, BSc, Ph D
R. Rotman BA, Ph D
L. Seco, BA, Ph D (UTM)
C. Sulem, M Sc, Dr D’Etat, FRSC

Introduction
Mathematics is the study of shape, quantity, pattern and structure. It serves as a tool for our scientific understanding of the world. Knowledge of mathematics opens gateways to many different professions such as economics, finance, computing, engineering, and the natural sciences. Aside from practical considerations, mathematics can be a highly satisfying intellectual pursuit, with career opportunities in teaching and research.

The department counts many of Canada’s leading research mathematicians among its faculty. Our mathematics programs are flexible, allowing students to select courses based on specialization and interest. Contents range from calculus and linear algebra in the non-specialist programs to more advanced topics such as real and complex analysis, ordinary and partial differential equations, differential geometry, topology, commutative algebra, graph theory, mathematical logic, number theory, and functional analysis.

The department offers eight specialist programs in addition to the major and minor programs.

In the Mathematics, Applied Mathematics, Mathematics and Physics, and Mathematics and Philosophy specialist programs, students acquire an in-depth knowledge and expertise in mathematical reasoning and the language of mathematics, with its emphasis on rigor and precision. These programs are designed for students wishing to pursue graduate studies; most of the graduates of these programs continue on to graduate school with some of them gaining admission to the world’s best graduate schools.

The Mathematical Applications in Economics and Finance specialist program is designed to prepare students for direct entry into the world of finance. It can also serve as a gateway to an MBA or a Master of Finance degree, possibly followed by an eventual doctorate.

The Mathematics and its Applications specialist programs offer three areas of concentration: teaching, physical science, and probability/statistics. These specialist programs are designed as ‘enhanced double majors.’ The required courses for these concentrations are almost identical for the first two years, but they diverge in the upper years. Students in these programs can also continue on to graduate studies.

The Major and Minor programs are intended for students who want to combine mathematical skills with work in other subjects. These programs require less coursework than the specialist programs, but still require the completion of some upper year mathematics courses.

Students interested in becoming K-12 teachers should consider applying to the combined degree program --- a six-year program that leads to an Honours Bachelor of Science (HBSc) from the University of Toronto and a Master of Teaching (MT) from the Ontario Institute for Studies in Education (OISE). The HBSc part of this program involves completing a Math Major, a Minor in Education and Society (offered by Victoria College) and a Minor in an area that would lead to a second "teachable" subject. Please see the Victoria College website for more information.

The Professional Experience Year Co-op Program is available to eligible full-time Specialist and Major students after their second or third year of study. The PEY Co-op program is an optional 12-16-month work term providing industrial experience. It gives students an opportunity to apply their skills in the context of a paid internship.

The Department of Mathematics offers introductory courses for incoming students to foster the development of mathematics skills.

PUMP Level 1 and PUMP Level 2 (Preparing for University Mathematics Program)

Both programs are non-credit courses that equip students with the necessary background knowledge required to succeed in first year mathematics courses. The content for the courses may be viewed at http://www.math.toronto.edu/cms/undergraduate-program/current-students-ug/pump-courses-2/.

PUMP Level 1 provides a quick math review during the months of July and August, for students who would like to take six weeks prior to the start of the first semester to practice pre-calculus math skills. During other terms, it is scheduled as a longer course, for students who have not taken the appropriate high school mathematics prerequisites for university calculus and linear algebra. This course is recommended for any student who wishes to close any existing gap between high school math and University level math courses or anyone who wishes to review high school math before attempting University level math or other science courses.

PUMP Level 2 is an Introduction to Proofs course. The curriculum provides background knowledge that is a preparation for MAT137Y1, MAT157Y1, MAT240H1, MAT247H1, MAT237Y1, and other proof-oriented advanced courses. The course covers the reading and comprehension of mathematical statements, analyzing definitions and properties, formulation of arguments, and strategies for proofs. This course is recommended for any student who wish to add to their knowledge by joining the group of students who will commence their preparation for the more challenging concepts in the advance analytical programs, during the months of July and August.

Visit https://www.math.toronto.edu/cms/undergraduate-program/potential-students-ug/ for up-to-date information on the availability of PUMP Level 1 and PUMP Level 2. If you have questions about the content of these courses, e-mail inquiries@math.utoronto.ca.

Course Change Dates

Some of the more advanced first- and second-year courses have "change dates" during the first few weeks of the academic year. The "change date" occurs after the general "add date" for courses and before the "drop date" for courses. For example, a student enrolled in MAT157Y1 can change their enrolment to MAT137Y1 or MAT135H1 at any time on or before the change date. For deadlines and further details, see https://www.math.toronto.edu/cms/undergraduate-program/current-students-ug/change-dates/.

Enquiries and student counseling: Bahen Centre, Room 6291

Departmental Office: Bahen Centre, Room 6290 (416-978-3323)
Mathematics Programs

Mathematics Specialist (Science Program) - ASSPE1165

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

(12.5 FCE, including at least 3.0 FCE at the 400-level)

The Specialist Program in Mathematics is directed toward students who hope to pursue mathematical research as a career.

First Year:
MAT157Y1, MAT240H1, MAT247H1

Second Year:
MAT257Y1, MAT267H1

Second and Higher Years:

1. 0.5 FCE with a significant emphasis on ethics and social responsibility: ANT100Y1/ANT253H1/CSC300H1/EEB215H1/
   ENV200H1/ENV333H1/ESS205H1/ETH201H1/ETH210H1/
   ETH220H1/FOR200H1/HMB203H1/HPS200H1/HPS250H1/
   HPS301H1/HST209H1/IMC200H1/JPH441H1/PHL240H1/
   PHL244H1/PHL265H1/PHL271H1/PHL273H1/PHL275H1/
   PHL281H1/PHL295H1 or another H course approved by the
   Department.

NOTE: Students may use the CR/NCR option with this H course and have it count toward the Mathematics Specialist program. Students in the Vic program may also use VIC172Y1.

2. MAT327H1

Third and Fourth Years:
1. MAT347Y1, MAT354H1, MAT357H1, MAT363H1/MAT367H1
   (MAT363H1 can be taken in the second year, if desired)
2. 2.0 FCE of: MAT309H1, MAT351Y1, ANY 400-level APM/MAT
3. 3.0 FCE of APM/MAT at the 300+ level, including at least 2.0 FCE
   at the 400 level (these may include options above not already
   chosen)
4. MAT477H1

NOTE:
1. The Department recommends that PHY151H1 and PHY152H1 be taken in the First Year, and that CSC148H1 and STA257H1 be taken during the program. If you do not have a year-long course in programming from high school, the Department strongly recommends that you take CSC108H1 prior to CSC148H1.

2. Students planning to take specific fourth year courses should ensure that they have the necessary second and third year prerequisites.

3. Students with a CGPA of 3.5 and above may apply to have graduate level math courses count towards their 400-level course requirements.

Applied Mathematics Specialist (Science Program) - ASSPE2053

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

(13.0-13.5 FCE, including at least 1.5 FCE at the 400-level)

The Specialist Program in Applied Mathematics is directed toward students who hope to pursue applied mathematical research as a career.

First Year:
MAT157Y1, MAT240H1, MAT247H1, (CSC108H1, CSC148H1)/
CSC150H1

Second Year:
MAT257Y1, MAT267H1, STA257H1, STA261H1

Second and Higher Years:

1. 0.5 FCE with a significant emphasis on ethics and social responsibility: ANT100Y1/ANT253H1/CSC300H1/EEB215H1/
   ENV200H1/ENV333H1/ESS205H1/ETH201H1/ETH210H1/
   ETH220H1/FOR200H1/HMB203H1/HPS200H1/HPS250H1/
   HPS301H1/HST209H1/IMC200H1/JPH441H1/PHL240H1/
   PHL244H1/PHL265H1/PHL271H1/PHL273H1/PHL275H1/
   PHL281H1/PHL295H1 or another H course approved by the
   Department.

NOTE: Students may use the CR/NCR option with this H course and have it count toward the program. Students in the Vic program may also use VIC172Y1.

Third and Fourth Years:
1. MAT351Y1, MAT327H1, MAT347Y1, MAT354H1, MAT357H1,
   MAT363H1/MAT367H1 (MAT363H1 can be taken in the second
   year, if desired), STA347H1
2. At least 1.5 FCE chosen from: MAT332H1, MAT344H1,
   MAT454H1, MAT457H1, MAT458H1, MAT464H1, STA302H1,
   STA457H1, CSC336H1, CSC436H1, CSC446H1, CSC456H1
3. 1.0 FCE from: APM421H1, APM426H1, APM441H1, APM446H1,
   APM461H1, APM462H1, APM466H1
4. MAT477H1

NOTE:
1. The Department recommends that PHY151H1 and PHY152H1 be taken in the First Year, and that CSC148H1 and STA257H1 be taken during the program. If you do not have a year-long course in programming from high school, the Department strongly recommends that you take CSC108H1 prior to CSC148H1.
2. Students planning to take specific fourth year courses should ensure that they have the necessary second and third year prerequisites.

3. Students with a CGPA of 3.5 and above may apply to have graduate level math courses count towards their 400-level course requirements.

Mathematics and Physics Specialist (Science Program) - ASSPE0397

Enrolment Requirements:
This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:
(14.5-15.5 FCE, including at least 1.0 FCE at the 400-level)

First Year:
MAT157Y1, MAT240H1, MAT247H1, PHY151H1, PHY152H1

Second Year:
MAT257Y1, MAT267H1, PHY224H1, PHY250H1, PHY252H1, PHY254H1, PHY256H1

Second and Higher Years:
1. 0.5 FCE with a significant emphasis on ethics and social responsibility: ANT100Y1/ANT253H1/CSC300H1/EEB215H1/ENV200H1/ENV333H1/ESS205H1/ETH210H1/ETH210H1/ETH220H1/FOR200H1/HMB203H1/HPS200H1/HPS250H1/HPS301H1/IMC200H1/JPY411H1/PHY240H1/PHY244H1/PHY256H1/PHY271H1/PHY273H1/PHY275H1/PHY281H1/PHY295H1 or another H course approved by the Department.

NOTE: Students may use the CR/NCR option with this H course and have it count toward the program. Students in the VIC program may also use VIC172Y1.
2. Note: PHY252H1 and PHY324H1 may be taken in the 2nd or 3rd year.

Third Year:
1. MAT351Y1, MAT334H1/MAT354H1, MAT357H1
2. One of: MAT327H1, MAT347Y1, MAT363H1/MAT367H1 (MAT363H1 can be taken in the second year, if desired)
3. PHY324H1, PHY350H1, PHY354H1, PHY356H1

Fourth Year:
1. Two of: APM421H1, APM426H1, APM446H1, APM441H1
2. Two of: PHY450H1, PHY452H1, PHY454H1, PHY456H1, PHY460H1
3. One of: MAT477H1, PHY424H1, PHY478H1, PHY479Y1

NOTE: 1. Students who are intending to apply to graduate schools in mathematics would be well-advised to take MAT347Y1.
2. Students planning to take specific fourth year courses should ensure that they have the necessary second and third year prerequisites.
3. Students with a CGPA of 3.5 and above may apply to have graduate level math courses count towards their 400-level course requirements.

Mathematics and Philosophy Specialist (Science Program) - ASSPE1361

Enrolment Requirements:
This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:
Consult the Undergraduate Coordinators of the Departments of Mathematics and Philosophy.

(12.0 FCE including at least 1.0 FCE at the 400-level)

First Year:
MAT157Y1, MAT240H1, MAT247H1, PHL232H1 or PHL233H1

Higher Years:
1. MAT257Y1, MAT327H1, MAT347Y1, MAT354H1/MAT357H1
2. PHL345H1, MAT303H1/PHL348H1
3. Four of: PHL325H1, PHL331H1, PHL332H1, PHL346H1/PHL347H1, PHL347H1, PHL348H1, PHL355H1, PHL451H1, PHL480H1
4. 1.0 FCE from PHL200Y1/PHL205H1/PHL206H1/PHL210Y1
5. PHL265H1/PHL275H1
6. 2.0 FCE of PHL/APM/MAT at the 300+ level, to a total of 12.0 FCE.

NOTE: Students with a CGPA of 3.5 and above may apply to have graduate level math courses count towards their 400-level course requirements.

Mathematical Applications in Economics and Finance Specialist (Science Program) - ASSPE1700

Enrolment Requirements:
This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:
(12-12.5 FCE, including at least 1.5 FCE at the 400-level)

First Year:
ECO100Y1/ECO101H1, ECO102H1; MAT137Y1/MAT157Y1, MAT223H1, MAT224H1

Fourth Year:
1. Two of: APM421H1, APM426H1, APM446H1, APM441H1
2. Two of: PHY450H1, PHY452H1, PHY454H1, PHY456H1, PHY460H1
3. One of: MAT477H1, PHY424H1, PHY478H1, PHY479Y1

NOTE: Please check the requirements for ECO206Y1 to ensure that you pass these first year courses with grades that allow registration in ECO206Y1.

Second Year:
ECO206Y1, MAT237Y1, MAT244H1, MAT246H1 (waived for students taking MAT157Y1); STA257H1, STA261H1
Second and Higher Years:
1. 0.5 FCE with a significant emphasis on ethics and social responsibility: ANT100Y1/ ANT253H1/ CSC300H1/ EEB215H1/ ENV200H1/ ENV333H1/ ESS205H1/ ETH201H1/ ETH210H1/ ETH220H1/ FOR200H1/ HMB203H1/ HPS200H1/ HPS250H1/ HPS301H1/ HST209H1/ IMC200H1/ JPH441H1/ PHL240H1/ PHL244H1/ PHL265H1/ PHL271H1/ PHL273H1/ PHL275H1/ PHL281H1/ PHL295H1 or another H course approved by the Department.

Note: Students may use the CR/NCR option with this H course and have it count toward the program. Students in the VIC program may also use VIC172Y1.

Third Year:
1. APM346H1/ ECO358H1/ ECO359H1/ MAT337H1/ STA302H1/ ECO375H1/ STA347H1
2. One of: MAT332H1, MAT344H1, MAT334H1, MAT475H1

Fourth Year:
APM462H1, APM466H1; STA457H1

NOTE:
1. Students planning to take specific fourth year courses should ensure that they have the necessary second and third year prerequisites.
2. Please note that STA457H1 lists STA302H1 as one of the prerequisites so you are encouraged to plan ahead.

Mathematics & Its Applications Specialist (Physical Science) (Science Program) - ASSPE1758

Enrolment Requirements:
This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:
(13.5-14.5 FCE, including at least 1.0 FCE at the 400 level)

Core Courses:

First Year:
( CSC108H1, CSC148H1)/ CSC150H1, MAT137Y1/ MAT157Y1, MAT223H1/ MAT240H1, MAT224H1/ MAT247H1 (recommended, can also be taken in 2nd year)

Second Year:
MAT235Y1/ MAT237Y1/ MAT257Y1, MAT246H1 (waived for students taking MAT157Y1), MAT244H1/ MAT267H1, STA257H1

Second and Higher Years:
1. 0.5 FCE with a significant emphasis on ethics and social responsibility: ANT100Y1/ ANT253H1/ CSC300H1/ EEB215H1/ ENV200H1/ ENV333H1/ ESS205H1/ ETH201H1/ ETH210H1/ ETH220H1/ FOR200H1/ HMB203H1/ HPS200H1/ HPS250H1/ HPS301H1/ HST209H1/ IMC200H1/ JPH441H1/ PHL240H1/ PHL244H1/ PHL265H1/ PHL271H1/ PHL273H1/ PHL275H1/ PHL281H1/ PHL295H1 or another H course approved by the Department.

Note: Students may use the CR/NCR option with this H course and have it count toward the program. Students in the VIC program may also use VIC172Y1.

Higher Years:
MAT302H1, MAT334H1

Mathematics & Its Applications Specialist (Probability/Statistics) (Science Program) - ASSPE1890

Enrolment Requirements:
This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:
(11.5-13.0 FCE, including at least 1.0 FCE at the 400 level)

Core Courses:

First Year:
( CSC108H1, CSC148H1)/ CSC150H1, MAT137Y1/ MAT157Y1, MAT223H1/ MAT240H1, MAT224H1/ MAT247H1

Second Year:
MAT235Y1/ MAT237Y1/ MAT257Y1, MAT246H1 (waived for students taking MAT157Y1), MAT244H1/ MAT267H1, STA257H1

Second and Higher Years:
1. 0.5 FCE with a significant emphasis on ethics and social responsibility: ANT100Y1/ ANT253H1/ CSC300H1/ EEB215H1/ ENV200H1/ ENV333H1/ ESS205H1/ ETH201H1/ ETH210H1/ ETH220H1/ FOR200H1/ HMB203H1/ HPS200H1/ HPS250H1/ HPS301H1/ HST209H1/ IMC200H1/ JPH441H1/ PHL240H1/ PHL244H1/ PHL265H1/ PHL271H1/ PHL273H1/ PHL275H1/ PHL281H1/ PHL295H1 or another H course approved by the Department.

Note: Students may use the CR/NCR option with this H course and have it count toward the program. Students in the VIC program may also use VIC172Y1.

Higher Years:
MAT302H1, MAT334H1
NOTE:
1. Students planning to take specific fourth year courses should ensure that they have the necessary second and third year prerequisites.

Probability/Statistics Concentration:
1. APM346H1/ MAT351Y1/ APM462H1/ MAT337H1/ STA261H1/ STA302H1/ STA347H1/ STA352Y1/ STA452H1/ STA453H1
2. Additional 1.0 FCE at the 300+ level from APM/MAT/STA
3. Two of: STA437H1, STA442H1, STA447H1, STA457H1

Mathematics & Its Applications Specialist (Teaching) (Science Program) - ASSPE1580

Enrolment Requirements:
This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:
(11.5-12.0 FCE, including at least 1.0 FCE at the 400 level)

Core Courses:
First Year:
CSC108H1/ MAT137Y1/ MAT157Y1, MAT223H1/ MAT240H1, MAT247H1/ MAT248H1 (recommended, can also be taken in 2nd year)

Second Year:
MAT235Y1/ MAT237Y1/ MAT257Y1, MAT246H1 (waived for students taking MAT157Y1), MAT244H1/ MAT267H1; STA257H1

Teaching Concentration:
For course selection, note that OISE requires students to have a second teachable subject:
1. MAT329Y1, HPS390H1/ MAT390H1, HPS391H1/ MAT391H1
2. Two of: MAT332H1/ MAT344H1, MAT335H1, MAT337H1, MAT363H1/ MAT367H1
3. Two of: MAT309H1, MAT315H1/ STA302H1/ STA347H1
4. MAT401H1/ MAT402H1 and 0.5 FCE at the 400-level from MAT, APM, STA

Mathematics Major (Science Program) - ASMAJ1165

Enrolment Requirements:
This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:
(7.5 full courses or their equivalent. These must include at least 2.5 full course equivalent (FCE) at the 300+ level. Of those 2.5 FCE, at least 0.5 FCE must be at the 400 level).

First Year:
MAT135H1, MAT136H1/ MAT137Y1/ MAT157Y1, MAT223H1/ MAT224H1/ MAT240H1/ MAT247H1

Second Year:
MAT235Y1/ MAT237Y1/ MAT257Y1, MAT244H1, MAT246H1

NOTE:
1. MAT224H1 may be taken in first year

Second and Higher Years:
1. 0.5 FCE with a significant emphasis on ethics and social responsibility: ANT100Y1/ ANT253H1/ CSC300H1/ EEB215H1/ ENV200H1/ ENV333H1/ ESS209H1/ ETH201H1/ ETH210H1/ ETH220H1/ FOR200H1/ HMB203H1/ HPS250H1/ HPS251H1/ HST209H1/ HST218H1/ JPH441H1/ PHL244H1/ PHL257H1/ PHL271H1/ PHL273H1/ PHL275H1/ PHL281H1/ PHL295H1 or another H course approved by the Department.

Note: Students may use the CR/NCR option with this H course and have it count toward the program. Students in the VIC program may use VIC172Y1.

Higher Years:
MAT301H1, MAT334H1

NOTE:
1. Students planning to take specific fourth year courses should ensure that they have the necessary second and third year prerequisites.
2. In the major program, higher level courses within the same topic are acceptable substitutions. With a judicious choice of courses, usually including introductory computer science, students can fulfill the requirements for a double major in mathematics and one of several other disciplines.

3. Students planning to take specific fourth year courses should ensure that they have the necessary second and third year prerequisites.

4. Students interested in becoming K-12 teachers should consider applying to the combined degree program --- a six-year program that leads to an Honours Bachelor of Science (H B Sc) from the University of Toronto and a Master of Teaching (M T) from the Ontario Institute for Studies in Education (OISE). The HBSc part of this program involves completing a Math Major, a Minor in Education and Society (offered by Victoria College) and a Minor in an area that would lead to a second "teachable" subject. Please see the Victoria College website for more information.

Mathematics Minor (Science Program) - ASMIN1165

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

(4.0 FCE)

1. ( MAT135H1, MAT136H1)/ MAT137Y1/ MAT157Y1
2. MAT221H1/ MAT223H1/ MAT240H1, MAT235Y1/ MAT237Y1/ MAT257Y1, MAT224H1/ MAT244H1/ MAT246H1/ APM236H1/ MAT247H1

Note: MAT221H1/ MAT223H1 should be taken in first year.
3. Additional 1.0 FCE at the 300+ level from APM/MAT/ HPS390H1/ HPS391H1/ PSL432H1 [note that APM306Y1 will be counted as 0.5 FCE towards this requirement].

NOTE:
1. In the minor program, higher level courses within the same topic are acceptable substitutions.
2. Students planning to take specific third and fourth year courses should ensure that they have the necessary first, second and third year prerequisites.
3. APM306Y1 will be counted for 0.5 credits of Society and its Institutions (BR3) and 0.5 credits of The Physical and Mathematical Universes (BR5).

Joint Programs

- Economics and Mathematics, see Economics
- Statistics and Mathematics, see Statistics
- Combined Degree Program: STG, Honours Bachelor of Science, Major in Mathematics / Master of Teaching

Combined Degree Program (CDP) in Science and Education: Mathematics (Major), Honours Bachelor of Science/Master of Teaching

The Combined Degree Program in Arts/Science and Education is designed for students interested in studying the intersections of teaching subjects and Education, coupled with professional teacher preparation. Students earn an Honours Bachelor’s degree from the Faculty of Arts and Science (St. George) and an accredited professional Master of Teaching (MT) degree from the Ontario Institute for Studies in Education (OISE). They will be recommended to the Ontario College of Teachers for an Ontario Teacher’s Certificate of Qualifications as elementary or secondary school teachers. The CDP permits the completion of both degrees in six years with 1.0 FCE that may be counted towards both the undergraduate and graduate degrees.

Program requirements:
1. Minor in Education and Society, Victoria College
2. Major in Mathematics (first teaching subject)
3. Minor in an area corresponding to the second teaching subject as determined by OISE
(see http://pepper.oise.utoronto.ca/~jhowitt/mtrresoures/intermediate_senior_teaching_subject_prerequisites_2016-17.pdf)

See here for additional information on the CDP, including admission, path to completion and contact information.
Mathematics Courses

MAT133Y1 - Calculus and Linear Algebra for Commerce

Hours: 72L

Mathematics of finance. Matrices and linear equations. Review of differential calculus; applications. Integration and fundamental theorem; applications. Introduction to partial differentiation; applications.

NOTE: please note Prerequisites listed below. Students without the proper prerequisites for MAT133Y1 may be deregistered from this course.

Note that MAT133Y is not a valid prerequisite for a number of more advanced quantitative courses. Students who are considering a quantitative non-Commerce PoSt, such as a math minor or a stats minor, may want to consider MAT135H and MAT136H, MAT137Y, or MAT157Y instead of MAT133Y. Specifically, a student who took MAT133Y may need to subsequently take MAT135H and MAT136H as "extra" or take MAT137Y or MAT157Y in order to proceed in non-Commerce PoSts.

Prerequisite: High school level calculus
Exclusion: MAT135H1, MAT136H1, MAT137Y1, MAT157Y1, MATA30H3, MATA31H3, MATA32H3, MATA33H3, MATA35H3, MATA36H3, MATA37H3, MAT133Y5, MAT134Y5, MAT135Y5, MAT137Y5, MAT138Y5, MAT186H, MAT187H, MAT196H, MAT197H, ESC194H, ESC195H.
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

MAT135H1 - Calculus I

Hours: 36L/12T

In this first introduction to Calculus, students will be introduced to the tools of differential calculus, the branch of calculus that is motivated by the problem of measuring how quantities change. Students will use these tools to solve other problems, including simplifying functions with straight lines, describing how different types of change are related, and computing maximum and minimum quantities. This course will focus on developing a deep understanding of why the tools of calculus make sense and how to apply them to the social, biological, and physical sciences. It will also emphasize translating between algebraic, graphical, numerical and verbal descriptions of each concept studied.

Prerequisite: High school level calculus
Exclusion: MAT133Y1, MAT136H1, MAT137Y1, MAT157Y1, MATA30H3, MATA31H3, MATA32H3, MATA33H3, MATA35H3, MATA36H3, MATA37H3, MAT133Y5, MAT134Y5, MAT135Y5, MAT137Y5, MAT138Y5, MAT186H, MAT187H, MAT196H, MAT197H, ESC194H, ESC195H.
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

MAT136H1 - Calculus II

Hours: 36L/12T

This second part of the introductory Calculus sequence focuses on integral calculus beginning with the Fundamental Theorem of Calculus, the connection between two seemingly unrelated problems: measuring changing quantities and finding areas of curved shapes. Students will develop a deep understanding of the integral, and use it to: unpack equations involving derivatives; to make sense of infinite sums; to write complicated functions as "infinite polynomials"; and to compute areas, volumes, and totals in applied problems. This course will further develop students' abilities to translate between algebraic, graphical, numerical, and verbal descriptions of mathematics in a variety of applied contexts.

Prerequisite: MAT135H1
Exclusion: MAT133Y1, MAT137Y1, MAT157Y1, MATA32H3, MATA33H3, MATA36H3, MATA37H3, MAT133Y5, MAT134Y5, MAT135Y5, MAT137Y5, MAT138Y5, MAT186H, MAT187H, MAT196H, MAT197H, ESC194H, ESC195H.
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)
**MAT137Y1 - Calculus with Proofs**

**Hours:** 72L/24T

A conceptual approach for students with a serious interest in mathematics. Attention is given to computational aspects as well as theoretical foundations and problem solving techniques. Review of Trigonometry. Limits and continuity, mean value theorem, inverse function theorem, differentiation, integration, fundamental theorem of calculus, elementary transcendental functions, Taylor's theorem, sequence and series, power series. Applications.

**Prerequisite:** High school level calculus

**Exclusion:** MAT135H1, MAT136H1, MAT157Y1, MATA35H3, MATA36H3, MATA37H3, MAT135Y5, MAT137Y5, MAT138Y5, MAT167H, MAT196H, MAT197H, ESC194H, ESC195H.

**Recommended Preparation:** Students will receive credit for both MAT137Y1 and MAT138H1 if MAT138H1 is taken before or along with MAT137Y1.

**Distribution Requirements:** Science

**Breadth Requirements:** The Physical and Mathematical Universes (5)

---

**MAT157Y1 - Analysis I**

**Hours:** 72L/48T

A theoretical course in calculus; emphasizing proofs and techniques, as well as geometric and physical understanding. Trigonometric identities. Limits and continuity; least upper bounds, intermediate and extreme value theorems. Derivatives, mean value and inverse function theorems. Integrals; fundamental theorem; elementary transcendental functions. Techniques of integration. Taylor's theorem; sequences and series; uniform convergence and power series.

**Prerequisite:** High school level calculus

**Exclusion:** MAT137Y1, MATA37H3, MAT137Y5, MAT157Y5, MAT197H1, ESC195H1.

**Recommended Preparation:** Students should consider taking the Preparing for University Math Level II in order to prepare in advance for MAT157Y1. Students may also take MAT138H1 concurrently with MAT157Y1. Students will receive credit for both MAT157Y1 and MAT138H1 if MAT138H1 is taken before or along with MAT157Y1.

**Distribution Requirements:** Science

**Breadth Requirements:** The Physical and Mathematical Universes (5)

---

**MAT138H1 - Introduction to Proofs**

**Hours:** 36L/12T

The goal of this course is for students to become comfortable with abstraction, rigour, logic, and proofs. They will practice reading and understanding mathematical statements, analyzing definitions and properties, formulating conjectures and generalizations, providing and writing reasonable and precise arguments, writing and critiquing proofs. The instructor may use specific mathematical content, which could vary from year to year, to practice these skills. The course is aimed at students interested in the creative character of mathematics, particularly those planning to take any of our proof-oriented courses, and is an excellent preparation for MAT137Y1, MAT157Y1, or MAT240H1.

Note: students may take this course concurrently with MAT157Y1 or MAT137Y1, or prior to registering in MAT157Y1 or MAT137Y1. This course can also be used by students who have already taken MAT136H1 and wish to bridge the gap to MAT237Y1.

**Prerequisite:** High school level calculus

**Exclusion:** MAT157Y1

**Distribution Requirements:** Science

**Breadth Requirements:** The Physical and Mathematical Universes (5)

---

**JMB170Y1 - Biology, Models, and Mathematics**

**Hours:** 48L/24T

Applications of mathematics to biological problems in physiology, genetics, evolution, growth, population dynamics, cell biology, ecology, and behaviour. Mathematical topics include: power functions and regression; exponential and logistic functions; binomial theorem and probability; calculus, including derivatives, max/min, integration, areas, integration by parts, substitution; differential equations, including linear constant coefficient systems; dynamic programming; Markov processes; and chaos. This course is intended for students in Life Sciences.

**Corequisite:** BIO120H1

**Distribution Requirements:** Science

**Breadth Requirements:** The Physical and Mathematical Universes (5)
MAT193H1 - Mathematics through Literature & Poetry

Hours: 36S

Mathematics intersects with literature and poetry in a multitude of ways. In this seminar, students will study literary works that include mathematicians, are about mathematicians, and contain mathematical forms. These works will be a springboard for mathematical investigations that build a deeper understanding of and appreciation for mathematics. This course is appropriate for students with all mathematical backgrounds who are not taking another math course. Restricted to first-year students. Not eligible for CR/NCR option.

Prerequisite: High school level algebra.
Exclusion: Not intended for students in a Mathematics Specialist or Major program.
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

MAT198H1 - Cryptology: The Mathematics of Secrecy and Security

Hours: 24S

How do we send our own confidential information through secure channels, and how can we break codes to uncover the secret information of our adversaries? The mathematical field of cryptology is dedicated to answering such questions. In this course we will study breakthroughs in cryptology, from secret messages in the ancient world and the Enigma cipher in World War II, to modern cryptosystems that facilitate online commerce. Along the way, you will develop a sophisticated understanding of how numbers interact and develop the ability to communicate messages secretly and mathematics clearly. Restricted to first-year students. Not eligible for CR/NCR option.

Prerequisite: High school level algebra.
Exclusion: Not intended for students in a Mathematics Specialist or Major program.
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

MAT199H1 - Women's Mathematics

Hours: 36S

Mathematics has been shaped in significant ways by the work of outstanding female mathematicians such as Hypatia, Emmy Noether, Sofia Kovalevskaya, and Maryam Mirzakhani. Despite these successes, women still experience barriers to entering the field and participating at the highest levels. This course will blend an exploration of mathematics created by women with a study of the issue of women in mathematics. Students will have the opportunity to examine the complex factors that impact women’s participation in STEM, learn about the lives of female mathematicians, create their own mathematics, and sharpen their spatial cognition and logical thinking skills. Restricted to first-year students. Not eligible for CR/NCR option.

Prerequisite: High school level algebra
Exclusion: Not intended for students in a Mathematical Specialist or Major program.
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

JUM202H1 - Mathematics as an Interdisciplinary Pursuit

Hours: 24L/12T

A study of the interaction of mathematics with other fields of inquiry: how mathematics influences, and is influenced by, the evolution of science and culture. Art, music, and literature, as well as the more traditionally related areas of the natural and social sciences may be considered. (Offered every three years)

JUM202H1 is particularly suited as a Science Distribution Requirement course for Humanities and Social Science students.

Exclusion: JUM102H1
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)
JUM203H1 - Mathematics as a Recreation

Hours: 24L/12T

A study of games, puzzles and problems focusing on the deeper principles they illustrate. Concentration is on problems arising out of number theory and geometry, with emphasis on the process of mathematical reasoning. Technical requirements are kept to a minimum. A foundation is provided for a continuing lay interest in mathematics. (Offered every three years)

JUM203H1 is particularly suited as a Science Distribution Requirement course for Humanities and Social Science students.

Exclusion: JUM103H1

Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

JUM205H1 - Mathematical Personalities

Hours: 24L/12T

An in-depth study of the life, times and work of several mathematicians who have been particularly influential. Examples may include Newton, Euler, Gauss, Kowalewski, Hilbert, Hardy, Ramanujan, Gödel, Erdős, Coxeter, Grothendieck. (Offered every three years)

JUM205H1 is particularly suited as a Science Distribution Requirement course for Humanities and Social Science students.

Exclusion: JUM105H1

Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

MAT221H1 - Applied Linear Algebra

Hours: 36L/12T

An application-oriented approach to linear algebra, based on calculations in standard Euclidean space. Systems of linear equations, matrices, Gauss-Jordan elimination, subspaces, bases, orthogonal vectors and projections. Matrix inverses, kernel and range, rank-nullity theorem. Determinants, eigenvalues and eigenvectors, Cramer's rule, diagonalization. This course has strong emphasis on building computational skills in the area of algebra. Applications to curve fitting, economics, Markov chains and cryptography.

Prerequisite: High school level calculus
Exclusion: MAT223H1, MAT223H3, MAT223H5, MAT224H1, MAT240H1, MAT240H5, MAT247H1, MAT247H5

Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

MAT223H1 - Linear Algebra I

Hours: 36L/12T

Systems of linear equations, matrix algebra, real vector spaces, subspaces, span, linear dependence and independence, bases, rank, inner products, orthogonality, orthogonal complements, Gram-Schmidt, linear transformations, determinants, Cramer's rule, eigenvalues, eigenvectors, eigenspaces, diagonalization.

Prerequisite: High school level calculus
Exclusion: MAT222H3, MAT223H3, MAT223H5, MAT224H1, MAT240H1, MAT240H5, MAT247H1, MAT247H5

Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

MAT224H1 - Linear Algebra II

Hours: 36L/12T

Fields, complex numbers, vector spaces over a field, linear transformations, matrix of a linear transformation, kernel, range, dimension theorem, isomorphisms, change of basis, eigenvalues, eigenvectors, diagonalizability, real and complex inner products, spectral theorem, adjoint/self-adjoint/normal linear operators, triangular form, nilpotent mappings, Jordan canonical form.

Prerequisite: MAT221H1(80%)/MAT223H1/MAT240H1/MATA22H3
Exclusion: MAT247H1

Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

MAT235Y1 - Calculus II

Hours: 72L

Parametric equations and polar coordinates. Vectors, vector functions and space curves. Differential and integral calculus of functions of several variables. Line integrals and surface integrals and classic vector calculus theorems. Examples from life sciences and physical science applications.

Exclusion: MAT237Y1, MAT257Y1, MATB41H3, MATB42H3, MAT232H5, MAT233H5, MAT236H5, MAT368H5, MAT291H & MAT294H

Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)
APM236H1 - Applications of Linear Programming

Hours: 36L

Introduction to linear programming including a rapid review of linear algebra (row reduction, matrix inversion, linear independence), the simplex method with applications, the duality theorem, complementary slackness, the dual simplex method and the revised simplex method.

Prerequisite: MAT221H1/MAT223H1/MAT240H1 (Note: no waivers of prerequisites will be granted)

Distribution Requirements: Science

Breadth Requirements: The Physical and Mathematical Universes (5)

MAT237Y1 - Multivariable Calculus

Hours: 72L

Prerequisite: MAT137Y1/MAT157Y1, MAT223H1/MAT240H1

Exclusion: MAT235Y1, MAT237Y1, MAT240H1, MAT247H1

Distribution Requirements: Science

Breadth Requirements: The Physical and Mathematical Universes (5)

MAT244H1 - Introduction to Ordinary Differential Equations

Hours: 36L

Exclusion: MAT267H1, MAT212H5, MAT258Y5

Distribution Requirements: Science

Breadth Requirements: The Physical and Mathematical Universes (5)

MAT245H1 - Mathematical Methods in Data Science

Hours: 36L/24P

An introduction to the mathematical methods behind scientific techniques developed for extracting information from large data sets. Elementary probability density functions, conditional expectation, inverse problems, regularization, dimension reduction, gradient methods, singular value decomposition and its applications, stability, diffusion maps. Examples from applications in data science and big data.

Prerequisite: MAT137Y1/MAT157Y1, MAT223H1/MAT240H1, MAT224H1/MAT247H1

Corequisite: MAT237Y1/MAT257Y1

Distribution Requirements: Science

Breadth Requirements: The Physical and Mathematical Universes (5)
MAT246H1 - Concepts in Abstract Mathematics

Hours: 36L/12T

Designed to introduce students to mathematical proofs and abstract mathematical concepts. Topics may include modular arithmetic, sizes of infinite sets, and a proof that some angles cannot be trisected with straightedge and compass.

Prerequisite: MAT133Y1/(MAT135H1, MAT136H1)/MAT137Y1,MAT223H1
Exclusion: MAT157Y1
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

MAT247H1 - Algebra II

Hours: 36L

Prerequisite: MAT240H1/MAT240H5
Corequisite: MAT157Y1
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

MAT257Y1 - Analysis II

Hours: 72L/48T

Topology of R^n; compactness, functions and continuity, extreme value theorem. Derivatives; inverse and implicit function theorems, maxima and minima, Lagrange multipliers. Integration; Fubini's theorem, partitions of unity, change of variables. Differential forms. Manifolds in R^n; integration on manifolds; Stokes' theorem for differential forms and classical versions.

Prerequisite: MAT157Y1/MAT157Y5, MAT247H1/MAT247H5
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

MAT267H1 - Advanced Ordinary Differential Equations

Hours: 36L/12T

Prerequisite: MAT157Y1/MAT157Y5, MAT247H1/MAT247H5
Corequisite: MAT257Y1
Exclusion: APM288H1, MAT244H1, MATB44H3, MAT242H5, MAT252H5, MAT234H1, MAT292H1
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

MAT271H1 - Insights from Mathematics

Hours: 36L/6T

This breadth course is accessible to students with limited mathematical background. Various mathematical techniques will be illustrated with examples from humanities and social science disciplines. Some of the topics will incorporate user friendly computer explorations to give participants the feel of the subject without requiring skill at calculations.

Note: This course cannot be used to satisfy requirements of program in the math department.

Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

MAT282H1 - Topics in Mathematics

Hours: 36L

A course in mathematics on a topic outside the current undergraduate offerings. For information on the specific topic to be studied and possible additional prerequisites, go to http://www.math.toronto.edu/cms/current-students-ug/

Prerequisite: 1.0 FCE in 100-level MAT courses. Possible additional topic-specific prerequisites.
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)
MAT295H1 - Independent Reading in Mathematics

Independent study under the direction of a faculty member. Topic must be outside undergraduate offerings. Similar workload to a 36L course. Not eligible for CR/NCR option.

Prerequisite: Minimum GPA of 3.5 in APM and MAT courses. Permission of the Associate Chair for Undergraduate Studies and of the prospective supervisor.

Distribution Requirements: Science

Breadth Requirements: The Physical and Mathematical Universes (5)

MAT296H1 - Independent Reading in Mathematics

Independent study under the direction of a faculty member. Topic must be outside undergraduate offerings. Workload equivalent to a 36L course. Not eligible for CR/NCR option.

Prerequisite: Minimum GPA of 3.5 in APM and MAT courses. Permission of the Associate Chair for Undergraduate Studies and of the prospective supervisor.

Distribution Requirements: Science

Breadth Requirements: The Physical and Mathematical Universes (5)

MAT297Y1 - Research Project in Mathematics

Independent research under the direction of a faculty member. Similar workload to a 72L course. Not eligible for CR/NCR option.

Prerequisite: Minimum GPA of 3.5 in APM and MAT courses. Permission of the Associate Chair for Undergraduate Studies and of the prospective supervisor.

Distribution Requirements: Science

Breadth Requirements: The Physical and Mathematical Universes (5)

MAT299Y1 - Research Opportunity Program

Credit course for supervised participation in faculty research project. Details at https://www.artsci.utoronto.ca/current/academics/research-opportunities/. Not eligible for CR/NCR option.

Distribution Requirements: Science

MAT301H1 - Groups and Symmetries

Hours: 36L

Prerequisite: MAT224H1/MAT247H1, MAT235Y1/MAT237Y1, MAT246H1/CSC236H1/CSC240H1. (These Prerequisites will be waived for students who have MAT257Y1.) For FASE students, MAT185H, MAT194H, MAT195H.

Exclusion: MAT347Y1

Distribution Requirements: Science

Breadth Requirements: The Physical and Mathematical Universes (5)

APM306Y1 - Mathematics and Law

Hours: 72L

This course examines the relationship between legal reasoning and mathematical logic; provides a mathematical perspective on the legal treatment of interest and actuarial present value; critiques ethical issues; analyzes how search engine techniques on massive databases transform legal research and considers the impact of statistical analysis and game theory on litigation strategies.

NOTE

This course counts as 0.5 FCE in BR3 and 0.5 FCE in BR5.

This course will only contribute 0.5FCE to the Math Minor program.

Prerequisite: (MAT135H1/MAT136H1)/MAT137Y1, MAT221H1/MAT223H1/MAT240H1

Exclusion: JUM206Y1

Distribution Requirements: Science

Breadth Requirements: The Physical and Mathematical Universes (5); Society and its Institutions (3)
MAT309H1 - Introduction to Mathematical Logic

Hours: 36L

Predicate calculus. Relationship between truth and provability; Gödel's completeness theorem. First order arithmetic as an example of a first-order system. Gödel's incompleteness theorem; outline of its proof. Introduction to recursive functions.

Prerequisite: MAT223H1/MATA23H3/MAT223H5/MAT240H1/MAT240H5, MAT235Y1/MAT235Y5/(MATB41H3, MATB42H3, MATB43H3)/MAT237Y1/MAT237Y5, MAT246H1/CSC236H1/CSC240H1 (These Prerequisites will be waived for students who have MAT257Y1)
Exclusion: CSC438H1
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

MAT315H1 - Introduction to Number Theory

Hours: 36L

Elementary topics in number theory: arithmetic functions; polynomials over the residue classes modulo m, characters on the residue classes modulo m; quadratic reciprocity law, representation of numbers as sums of squares.

Prerequisite: (MAT223H1/MATA23H3/MAT223H5/MAT240H1/MAT240H5, MAT235Y1/MAT235Y5/(MATB41H3, MATB42H3)/MAT237Y1/(MATB41H3, MATB42H3, MATB43H3)/MAT237Y5, MAT246H1/CSC236H1/CSC240H1/MAT157Y1/MAT157Y5/MAT247H1/MAT247H5
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

MAT327H1 - Introduction to Topology

Hours: 36L

Metric spaces, topological spaces and continuous mappings; separation, compactness, connectedness. Fundamental group and covering spaces. Brouwer fixed-point theorem. Students in the math specialist program wishing to take additional topology courses are advised to obtain permission to take MAT1300H, MAT1301H.

Prerequisite: MAT157Y1/MAT157Y5/(MATB41H3, MATB42H3, MATB43H3)/MAT237Y1/MAT237Y5, MAT246H1 and permission of the instructor
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

MAT329Y1 - Concepts in Elementary Mathematics

Hours: 72L

This course is aimed at students intending to become elementary school teachers. Emphasis is placed on the formation and development of fundamental reasoning and learning skills required to understand and to teach mathematics at the elementary level. Topics may include: Problem Solving and Strategies, Sets and Elementary Logic, Numbers and Elements of Number Theory, Introductory Probability and Fundamentals of Geometry.

The course may include an optional practicum in school classrooms.

Prerequisite: MAT137Y1/MAT138H1/MAT223H1/MAT246H1 and any 5.0 FCE with a CGPA of at least 2.5
Exclusion: MAT382H5
Recommended Preparation: Participation in the practicum requires the presentation of an Ontario Police Report that declares suitability to work with minors and other special groups.
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

MAT332H1 - Introduction to Graph Theory

Hours: 36L

This course will explore the following topics: Graphs, subgraphs, isomorphism, trees, connectivity, Euler and Hamiltonian properties, matchings, vertex and edge colourings, planarity, network flows and strongly regular graphs. Participants will be encouraged to use these topics and execute applications to such problems as timetabling, tournament scheduling, experimental design and finite geometries.

Prerequisite: MAT224H1/MATB24H3/MAT224H5/MAT247H1/MAT247H5
Corequisite: Recommended Corequisite: MAT301H1/MAT347Y1
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)
MAT334H1 - Complex Variables
Hours: 36L

The theory of functions of one complex variable, analytic and meromorphic functions. Cauchy’s theorem, residue calculus, conformal mappings, introduction to analytic continuation and harmonic functions.

Prerequisite: MAT223H1/MATA23H3/MAT223H5/MAT240H1/MAT240H5, MAT235Y1/MAT235Y5/(MATB41H3, MATB42H3)/MAT237Y1/(MATB41H3, MATB42H3, MATB43H3)/MAT237Y5/MAT257Y1
Exclusion: MAT354H1
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

MAT335H1 - Chaos, Fractals and Dynamics
Hours: 36L

Prerequisite: MAT137Y1/(MATA30H3, MATA31H3, MATA37H3)/MAT137Y5/MAT157Y1/MAT157Y5/(MATB41H3, MATB42H3)/MAT237Y1/(MATB41H3, MATB42H3, MATB43H3)/MAT237Y5/MAT223H1/MAT237H5/MAT240H1/MAT240H5
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

MAT336H1 - Elements of Analysis
Hours: 36L/12T

This course provides the foundations of analysis and rigorous calculus for students who will take subsequent courses where these mathematical concepts are central to applications, but who have only taken courses with limited proofs. Topics include topology of Rn, implicit and inverse function theorems and rigorous integration theory.

Prerequisite: MAT223H1/MATA23H3/MAT223H5/MAT240H1/MAT240H5, MAT235Y1/MAT235Y5/(MATB41H3, MATB42H3)/MAT237Y1/(MATB41H3, MATB42H3, MATB43H3)/MAT237Y5; (for FASE students, MAT185H, MAT195H/ESC195H)
Exclusion: MAT257Y1, MAT337H1
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

MAT337H1 - Introduction to Real Analysis
Hours: 36L

Prerequisite: MAT224H1/MATB24H3/MAT224H5/MAT247H1/MAT247H5, MAT235Y1/MAT235Y5/(MATB41H3, MATB42H3)/MAT237Y1/(MATB41H3, MATB42H3, MATB43H3)/MAT237Y5/MAT246H1; NOTE: These Prerequisites will be waived for students who have MAT257Y1
Exclusion: MAT357H1 & MAT378H5
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

MAT344H1 - Introduction to Combinatorics
Hours: 36L

Basic counting principles, generating functions, permutations with restrictions. Fundamentals of graph theory with algorithms; applications (including network flows). Combinatorial structures including block designs and finite geometries.

Prerequisite: MAT223H1/MATA23H3/MAT223H5/MAT240H1/MAT240H5
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

APM346H1 - Partial Differential Equations
Hours: 36L

Sturm-Liouville problems, Green's functions, special functions (Bessel, Legendre), partial differential equations of second order, separation of variables, integral equations, Fourier transform, stationary phase method.

Prerequisite: MAT235Y1/MAT235Y5/(MATB41H3, MATB42H3)/MAT237Y1/(MATB41H3, MATB42H3, MATB43H3)/MAT237Y5/MAT257Y1, MAT244H1/MAT244H5/MAT267H1
Exclusion: MAT351Y1
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)
MAT347Y1 - Groups, Rings and Fields

Hours: 72L/24T

Groups, subgroups, quotient groups, Sylow theorems, Jordan-Hölder theorem, finitely generated abelian groups, solvable groups. Rings, ideals, Chinese remainder theorem; Euclidean domains and principal ideal domains: unique factorization. Noetherian rings, Hilbert basis theorem. Finitely generated modules. Field extensions, algebraic closure, straight-edge and compass constructions. Galois theory, including insolubility of the quintic.

Prerequisite: MAT257Y1/(85% in MAT247H1/MAT247H5)
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

APM348H1 - Mathematical Modelling

Previous Course Number: MAT482
Hours: 36L/22P

An overview of mathematical modelling. A variety of approaches for representing physical situations mathematically followed by analytical techniques and numerical simulations to gain insight. Questions from biology, economics, engineering, medicine, physics, physiology, and the social sciences formulated as problems in optimization, differential equations, and probability. Precise content varies with instructor.

Prerequisite: MAT244H1/MAT267H1, MAT224H1/MAT247H1, STA237H1/STA247H1/STA257H1/MAT377H1
Exclusion: MAT482H1 (Topics in Mathematics: Topics in Mathematical Modelling), offered in Winter 2019
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

MAT351Y1 - Partial Differential Equations

Hours: 72L

This is a first course in Partial Differential Equations, intended for Mathematics students with interests in analysis, mathematical physics, geometry, and optimization. The examples to be discussed include first-order equations, harmonic functions, the diffusion equation, the wave equation, Schrodinger's equation, and eigenvalue problems. In addition to the classical representation formulas for the solutions of these equations, there are techniques that apply more broadly: the notion of well-posedness, the method of characteristics, energy methods, maximum and comparison principles, fundamental solutions, Green's functions, Duhamel's principle, Fourier series, the min-max characterization of eigenvalues, Bessel functions, spherical harmonics, and distributions. Nonlinear phenomena such as shock waves and solitary waves are also introduced.

Prerequisite: MAT257Y1/85% in MAT237Y1, MAT267H1
Exclusion: APM351Y1
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

MAT354H1 - Complex Analysis I

Hours: 36L

Complex numbers, the complex plane and Riemann sphere, Möbius transformations, elementary functions and their mapping properties, conformal mapping, holomorphic functions, Cauchy's theorem and integral formula. Taylor and Laurent series, maximum modulus principle, Schwarz' lemma, residue theorem and residue calculus.

Prerequisite: MAT257Y1
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

MAT357H1 - Foundations of Real Analysis

Hours: 36L

Prerequisite: MAT257Y1/(MAT327H1 and permission of instructor)
Exclusion: MAT438H5
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)
MAT363H1 - Geometry of Curves and Surfaces

Hours: 36L

Prerequisite: MAT224H1/MATB24H3/MAT224H5/MAT247H1/ MAT247H5, MAT237Y1/(MATB41H3, MATB42H3, MATB43H3)/MAT237Y5/MAT257Y1 (MAT257Y1 can be taken concurrently). For FASE students, MAT185H, MAT194H, MAT195H, AER210H.
Exclusion: MAT367H1
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

MAT367H1 - Differential Geometry

Hours: 36L

Manifolds, partitions of unity, submersions and immersions, vector fields, vector bundles, tangent and cotangent bundles, foliations and Frobenius’ theorem, multilinear algebra, differential forms, Stokes’ theorem, Poincare-Hopf theorem

Prerequisite: MAT257Y1/(MAT224H1, MAT237Y1,MAT246H1,and permission of instructor)
Recommended Preparation: Multivariable calculus (MAT257Y1), Linear algebra (MAT240H1, MAT247H1)
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

MAT377H1 - Mathematical Probability

Hours: 36L/12T

This course introduces students to various topics in mathematical probability theory. Topics include basic concepts (such as probability, random variables, expectations, conditional probability) from a mathematical point of view, examples of distributions and stochastic processes and their properties, convergence results (such as the law of large numbers, central limit theorem, random series, etc.), various inequalities, and examples of applications of probabilistic ideas beyond statistics (for example, in geometry and computer science).

Prerequisite: MAT247H1/MAT247H5, MAT257Y1
Exclusion: STA347H1
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

MAT382H1 - Topics in Mathematics

Hours: 36L

A course in mathematics on a topic outside the current undergraduate offerings. For information on the specific topic to be studied and possible additional prerequisites, go to http://www.math.toronto.edu/cms/current-students-ug/

Prerequisite: 2.5 FCE in 100-level or 200-level APM or MAT courses. Possible additional topic-specific prerequisites.
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

MAT390H1 - History of Mathematics up to 1700

Hours: 36L

A survey of ancient, medieval, and early modern mathematics with emphasis on historical issues. (Offered in alternate years)

Prerequisite: At least 1.0 FCE in APM/MAT at the 200 level.
Exclusion: HPS309H1, HPS310Y1, HPS390H1
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

MAT391H1 - History of Mathematics after 1700

Hours: 24L/12T

A survey of the development of mathematics from 1700 to the present with emphasis on technical development. (Offered in alternate years)

Prerequisite: At least 1.0 FCE in APM/MAT at the 200 level.
Exclusion: HPS309H1, HPS310H1, HPS391H1
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)
MAT395H1 - Independent Reading in Mathematics

Independent reading under the direction of a faculty member. Topic must be outside current undergraduate offerings. Similar workload to a 36L course. Not eligible for CR/NCR option.

Prerequisite: Minimum GPA of 3.5 in APM and MAT courses. Permission of the Associate Chair for Undergraduate Studies and of the prospective supervisor.

Distribution Requirements: Science

Breadth Requirements: The Physical and Mathematical Universes (5)

APM396H1 - Independent Reading in Applied Mathematics

Independent study under the direction of a faculty member. Topic must be outside undergraduate offerings. Similar workload to a 36L course. Not eligible for CR/NCR option.

Prerequisite: Minimum GPA 3.5 for APM and MAT courses. Permission of the Associate Chair for Undergraduate Studies and of the prospective supervisor.

Distribution Requirements: Science

Breadth Requirements: The Physical and Mathematical Universes (5)

MAT396H1 - Independent Reading in Mathematics

Independent study under the direction of a faculty member. Topic must be outside undergraduate offerings. Similar workload to a 36L course. Not eligible for CR/NCR option.

Prerequisite: Minimum GPA of 3.5 in APM and MAT courses. Permission of the Associate Chair for Undergraduate Studies and of the prospective supervisor.

Distribution Requirements: Science

Breadth Requirements: The Physical and Mathematical Universes (5)

MAT397Y1 - Research Project in Mathematics

Independent research under the direction of a faculty member. Workload similar to a 72L course. Not eligible for CR/NCR option.

Prerequisite: Minimum GPA of 3.5 in APM and MAT courses. Permission of the Associate Chair for Undergraduate Studies and of the prospective supervisor.

Distribution Requirements: Science

Breadth Requirements: The Physical and Mathematical Universes (5)

MAT398H0 - Research Excursions

An instructor-supervised group project in an off-campus setting. Details at https://www.artsci.utoronto.ca/current/academics/research-opportunities/... Not eligible for CR/NCR option.

Distribution Requirements: Science

MAT398Y0 - Research Excursions

An instructor-supervised group project in an off-campus setting. Details at https://www.artsci.utoronto.ca/current/academics/research-opportunities/... Not eligible for CR/NCR option.

MAT399Y1 - Research Opportunity Program

Credit course for supervised participation in faculty research project. Details at https://www.artsci.utoronto.ca/current/academics/research-opportunities/... Not eligible for CR/NCR option.

MAT401H1 - Polynomial Equations and Fields

Hours: 36L

Prerequisite: MAT301H1

Exclusion: MAT347Y1

Distribution Requirements: Science

Breadth Requirements: The Physical and Mathematical Universes (5)
MAT402H1 - Classical Geometries

Hours: 36L

Euclidean and non-euclidean plane and space geometries. Real and complex projective space. Models of the hyperbolic plane. Connections with the geometry of surfaces.

Prerequisite: MAT301H1/MAT347Y1, MAT235Y1/MAT237Y1/MAT257Y1
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

MAT409H1 - Set Theory

Hours: 36L

Set theory and its relations with other branches of mathematics. ZFC axioms. Ordinal and cardinal numbers. Reflection principle. Constructible sets and the continuum hypothesis. Introduction to independence proofs. Topics from large cardinals, infinitary combinatorics and descriptive set theory.

Joint undergraduate/graduate course - MAT409H1/MAT1404H

Prerequisite: MAT357H1
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

MAT415H1 - Algebraic Number Theory

Hours: 36L

A selection from the following: finite fields; global and local fields; valuation theory; ideals and divisors; differentials and discriminants; ramification and inertia; class numbers and units; cyclotomic fields; diophantine equations.

Prerequisite: MAT347Y1 or permission of instructor
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

MAT417H1 - Analytic Number Theory

Hours: 36L

A selection from the following: distribution of primes, especially in arithmetic progressions and short intervals; exponential sums; Hardy-Littlewood and dispersion methods; character sums and L-functions; the Riemann zeta-function; sieve methods, large and small; diophantine approximation, modular forms.

Joint undergraduate/graduate course - MAT417H1/MAT1202H

Prerequisite: MAT334H1/MAT354H1/permission of instructor
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

APM421H1 - Mathematical Foundations of Quantum Mechanics

Hours: 36L

Key concepts and mathematical structure of Quantum Mechanics, with applications to topics of current interest such as quantum information theory. The core part of the course covers the following topics: Schroedinger equation, quantum observables, spectrum and evolution, motion in electro-magnetic field, angular momentum and O(3) and SU(2) groups, spin and statistics, semi-classical asymptotics, perturbation theory. More advanced topics may include: adiabatic theory and geometrical phases, Hartree-Fock theory, Bose-Einstein condensation, the second quantization, density matrix and quantum statistics, open systems and Lindblad evolution, quantum entropy, quantum channels, quantum Shannon theorems.

Joint undergraduate/graduate course - APM421H1/MAT1723H

Prerequisite: (MAT224H1, MAT337H1)/MAT357H1
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

MAT425H1 - Differential Topology

Hours: 36L

Prerequisite: MAT257Y1, MAT327H1
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)
**APM426H1 - General Relativity**

**Hours:** 36L

Joint undergraduate/graduate course - APM426H1/MAT1700H

**Prerequisite:** MAT363H1/MAT367H1

**Distribution Requirements:** Science

**Breadth Requirements:** The Physical and Mathematical Universes (5)

---

**MAT436H1 - Introduction to Linear Operators**

**Hours:** 36L

The course will survey the branch of mathematics developed (in its abstract form) primarily in the twentieth century and referred to variously as functional analysis, linear operators in Hilbert space, and operator algebras, among other names (for instance, more recently, to reflect the rapidly increasing scope of the subject, the phrase non-commutative geometry has been introduced). The intention will be to discuss a number of the topics in Pedersen's textbook Analysis Now. Students will be encouraged to lecture on some of the material, and also to work through some of the exercises in the textbook (or in the suggested reference books).

Joint undergraduate/graduate course - MAT436H1/MAT1011H

**Prerequisite:** 5.0 FCE from MAT, including MAT224H1/MAT247H1 and MAT237Y1/MAT257Y1.

**Distribution Requirements:** Science

**Breadth Requirements:** The Physical and Mathematical Universes (5)

---

**MAT437H1 - K-Theory and C* Algebras**

**Hours:** 36L

The theory of operator algebras was begun by John von Neumann eighty years ago. In one of the most important innovations of this theory, von Neumann and Murray introduced a notion of equivalence of projections in a self-adjoint algebra (*-algebra) of Hilbert space operators that was compatible with addition of orthogonal projections (also in matrix algebras over the algebra), and so gave rise to an abelian semigroup, now referred to as the Murray-von Neumann semigroup.

Later, Grothendieck in geometry, Atiyah and Hirzebruch in topology, and Serre in the setting of arbitrary rings (pertinent for instance for number theory), considered similar constructions. The enveloping group of the semigroup considered in each of these settings is now referred to as the K-group (Grothendieck's terminology), or as the Grothendieck group.

Among the many indications of the depth of this construction was the discovery of Atiyah and Hirzebruch that Bott periodicity could be expressed in a simple way using the K-group. Also, Atiyah and Singer famously showed that K-theory was important in connection with the Fredholm index. Partly because of these developments, K-theory very soon became important again in the theory of operator algebras. (And in turn, operator algebras became increasingly important in other branches of mathematics.)

The purpose of this course is to give a general, elementary, introduction to the ideas of K-theory in the operator algebra context. (Very briefly, K-theory generalizes the notion of dimension of a vector space.)

The course will begin with a description of the method (K-theoretical in spirit) used by Murray and von Neumann to give a rough initial classification of von Neumann algebras (into types I, II, and III). It will centre around the relatively recent use of K-theory to study Bratteli's approximately finite-dimensional C*-algebras—both to classify them (a result that can be formulated and proved purely algebraically), and to prove that the class of these C*-algebras—what Bratteli called AF algebras—is closed under passing to extensions (a result that uses the Bott periodicity feature of K-theory).

Students will be encouraged to prepare oral or written reports on various subjects related to the course, including basic theory and applications.

Joint undergraduate/graduate course - MAT437H1/MAT1016H

**Prerequisite:** 5.0 FCE from MAT, including MAT224H1/MAT247H1 and MAT237Y1/MAT257Y1.

**Recommended Preparation:** Students are encouraged to execute basic research that answers the question, what is an abelian group?

**Distribution Requirements:** Science

**Breadth Requirements:** The Physical and Mathematical Universes (5)
APM441H1 - Asymptotic and Perturbation Methods

Hours: 36L

Prerequisite: APM346H1/MAT351Y1, MAT334H1/MAT354H1

Distribution Requirements: Science

Breadth Requirements: The Physical and Mathematical Universes (5)

MAT445H1 - Representation Theory

Hours: 36L

Joint undergraduate/graduate - MAT445H1/MAT1196H

Prerequisite: MAT347Y1

Distribution Requirements: Science

Breadth Requirements: The Physical and Mathematical Universes (5)

APM446H1 - Applied Nonlinear Equations

Hours: 36L

Partial differential equations appearing in physics, material sciences, biology, geometry, and engineering. Nonlinear evolution equations. Existence and long-time behaviour of solutions. Existence of static, traveling wave, self-similar, topological and localized solutions. Stability. Formation of singularities and pattern formation. Fixed point theorems, spectral analysis, bifurcation theory. Equations considered in this course may include: Allen-Cahn equation (material science), Ginzburg-Landau equation (condensed matter physics), Cahn-Hilliard (material science, biology), nonlinear Schrödinger equation (quantum and plasma physics, water waves, etc), mean curvature flow (geometry, material sciences), Fisher-Kolmogorov-Petrovskii-Piskunov (combustion theory, biology), Keller-Segel equations (biology), and Chern-Simmons equations (particle and condensed matter physics).

Joint undergraduate/graduate course - APM446H1/MAT1508H

Prerequisite: APM346H1/MAT351Y1

Distribution Requirements: Science

Breadth Requirements: The Physical and Mathematical Universes (5)

MAT448H1 - Introduction to Commutative Algebra and Algebraic Geometry

Hours: 36L

Basic notions of algebraic geometry, with emphasis on commutative algebra or geometry according to the interests of the instructor. Algebraic topics: localization, integral dependence and Hilbert's Nullstellensatz, valuation theory, power series rings and completion, dimension theory. Geometric topics: affine and projective varieties, dimension and intersection theory, curves and surfaces, varieties over the complex numbers. This course will be offered in alternating years.

Joint undergraduate/graduate course - MAT448H1/MAT1155H

Prerequisite: MAT347Y1

Distribution Requirements: Science

Breadth Requirements: The Physical and Mathematical Universes (5)
**MAT449H1 - Algebraic Curves**

*Hours: 36L*

Projective geometry. Curves and Riemann surfaces. Algebraic methods. Intersection of curves; linear systems; Bezout's theorem. Cubics and elliptic curves. Riemann-Roch theorem. Newton polygon and Puiseux expansion; resolution of singularities. This course will be offered in alternating years.

**Prerequisite:** MAT347Y1, MAT354H1  
**Distribution Requirements:** Science  
**Breadth Requirements:** The Physical and Mathematical Universes (5)

---

**MAT454H1 - Complex Analysis II**

*Hours: 36L*

Joint undergraduate/graduate course - MAT454H1/MAT1002H

**Prerequisite:** MAT354H1  
**Distribution Requirements:** Science  
**Breadth Requirements:** The Physical and Mathematical Universes (5)

---

**MAT457H1 - Advanced Real Analysis I**

*Hours: 36L*

Joint undergraduate/graduate course - MAT457H1/MAT1000H

**Prerequisite:** MAT357H1  
**Exclusion:** MAT457Y1  
**Distribution Requirements:** Science  
**Breadth Requirements:** The Physical and Mathematical Universes (5)

---

**MAT458H1 - Advanced Real Analysis II**

*Hours: 36L*

Joint undergraduate/graduate course - MAT458H1/MAT1001H

**Prerequisite:** MAT457H1  
**Exclusion:** MAT457Y1  
**Distribution Requirements:** Science  
**Breadth Requirements:** The Physical and Mathematical Universes (5)

---

**APM461H1 - Combinatorial Methods**

*Hours: 36L*

A selection of topics from such areas as graph theory, combinatorial algorithms, enumeration, construction of combinatorial identities.

Joint undergraduate/graduate course - APM461H1/MAT1302H

**Prerequisite:** MAT224H1/MAT247H1, MAT137Y1/MAT157Y1, MAT301H1/MAT347Y1  
**Recommended Preparation:** MAT344H1  
**Distribution Requirements:** Science  
**Breadth Requirements:** The Physical and Mathematical Universes (5)

---

**APM462H1 - Nonlinear Optimization**

*Hours: 36L*

An introduction to first and second order conditions for finite and infinite dimensional optimization problems with mention of available software. Topics include Lagrange multipliers, Kuhn-Tucker conditions, convexity and calculus variations. Basic numerical search methods and software packages which implement them will be discussed.

**Prerequisite:** MAT223H1, MAT224H1, MAT235Y1/MAT237Y1/MAT257Y1  
**Recommended Preparation:** MAT336H1/MAT337H1  
**Distribution Requirements:** Science  
**Breadth Requirements:** The Physical and Mathematical Universes (5)
MAT464H1 - Riemannian Geometry

Hours: 36L

Joint undergraduate/graduate course - MAT464H1/MAT1342H

Prerequisite: MAT367H1
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

APM466H1 - Mathematical Theory of Finance

Hours: 36L

Introduction to the basic mathematical techniques in pricing theory and risk management: Stochastic calculus, single-period finance, financial derivatives (tree-approximation and Black-Scholes model for equity derivatives, American derivatives, numerical methods, lattice models for interest-rate derivatives), value at risk, credit risk, portfolio theory.

Joint undergraduate/graduate course - APM466H1/MAT1856H

Prerequisite: APM346H1, STA347H1
Corequisite: STA457H1
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

MAT475H1 - Problem Solving Seminar

This course addresses the question: How do you attack a problem the likes of which you have never seen before? Students will apply Polya's principles of mathematical problem solving, draw upon their previous mathematical knowledge, and explore the creative side of mathematics in solving a variety of interesting problems and explaining those solutions to others.

Prerequisite: MAT224H1/MAT247H1, MAT235Y1/MAT237Y1/ MAT257Y1, and at least 1.0 FCE at the 300+ level in APM/MAT
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

MAT477H1 - Seminar in Mathematics

Seminar in an advanced topic. Content will generally vary from semester to semester. Student presentations are required.

Prerequisite: MAT347Y1, MAT354H1, MAT357H1; or permission of instructor.
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

MAT478H1 - Seminar in Mathematics

Seminar in an advanced topic. Content will generally vary from semester to semester. Student presentations are required.

Prerequisite: MAT347Y1, MAT354H1, MAT357H1; or permission of instructor.
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

MAT482H1 - Topics in Mathematics

Hours: 36L

A course in mathematics on a topic outside the current undergraduate offerings. For information on the specific topic to be studied and possible additional prerequisites, go to http://www.math.toronto.edu/cms/current-students-ug/

Joint undergraduate/graduate course - MAT482H1/MAT1901H

Prerequisite: 6.0 FCE in 100-level, 200-level, and 300-level APM and MAT courses. Possible additional topic-specific prerequisites.
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

MAT483H1 - Topics in Mathematics

Hours: 36L

A course in mathematics on a topic outside the current undergraduate offerings. For information on the specific topic to be studied and possible additional prerequisites, go to http://www.math.toronto.edu/cms/current-students-ug/

Joint undergraduate/graduate course - MAT483H1/MAT1901H

Prerequisite: 6.0 FCE in 100-level, 200-level, and 300-level APM and MAT courses. Possible additional topic-specific prerequisites.
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)
MAT495H1 - Independent Reading in Mathematics

Independent study under the direction of a faculty member. Topic must be outside undergraduate offerings. Workload equivalent to a 36L course. Not eligible for CR/NCR option.

Prerequisite: Minimum GPA of 3.5 in APM and MAT courses. Permission of the Associate Chair for Undergraduate Studies and of the prospective supervisor.

Distribution Requirements: Science

Breadth Requirements: The Physical and Mathematical Universes (5)

APM496H1 - Independent Readings in Applied Mathematics

Independent study under the direction of a faculty member. Topic must be outside current undergraduate offerings. Similar workload to a course that has 36 lecture hours. Not eligible for CR/NCR option.

Prerequisite: minimum GPA 3.5 for APM and MAT courses. Permission of the Associate Chair for Undergraduate Studies and of the prospective supervisor.

Distribution Requirements: Science

Breadth Requirements: The Physical and Mathematical Universes (5)

MAT496H1 - Independent Reading in Mathematics

Independent study under the direction of a faculty member. Topic must be outside undergraduate offerings. Workload equivalent to a 36L course. Not eligible for CR/NCR option.

Prerequisite: Minimum GPA of 3.5 in APM and MAT courses. Permission of the Associate Chair for Undergraduate Studies and of the prospective supervisor.

Distribution Requirements: Science

Breadth Requirements: The Physical and Mathematical Universes (5)

MAT497Y1 - Research Project in Mathematics

Independent research under the direction of a faculty member. Not eligible for CR/NCR option. Similar workload to a 72L course.

Prerequisite: Minimum GPA of 3.5 in APM and MAT courses. Permission of the Associate Chair for Undergraduate Studies and of the prospective supervisor.

Distribution Requirements: Science

Breadth Requirements: The Physical and Mathematical Universes (5)

Introduction

Molecular biology has revolutionized the fields of genetics and microbiology. The Department of Molecular Genetics offers Specialist and Major programs in Molecular Genetics and Microbiology, which emphasize the molecular aspects of both disciplines. Genetics, the science of heredity, and microbiology, the study of microorganisms (microbes), have long served as meeting grounds for a variety of biological disciplines. Development in genetics and microbiology have contributed greatly to our basic understanding of the fundamental processes of life as well as to the treatment of genetic and infectious diseases.

Of particular significance in molecular genetics has been the development of techniques that permit the isolation, through cloning, of the genes responsible for specific traits, and the detailed analysis of their regulation, interactions, and products. More recently the advent of genome sequencing has fueled efforts to understand in full the information content of the genome and to assign function to every gene, using methods that allow systematic, genome-scale analyses of gene expression, the phenotypic consequences of gene disruption, and the interactions between genes and gene products. Molecular techniques have increased our ability to diagnose and understand viral and bacterial disease, and the complex microbe/host interactions that are involved. The impact of these and other technological advances extend to such diverse fields as plant and animal developmental biology, virology, immunology, cancer biology, and biotechnology. Studies at a molecular level are essential to understanding the consequences to life when fundamental processes are altered by mutation, by infection, or by the environment.

The Molecular Genetics and Microbiology Specialist program is a research-intensive program and is designed to provide strong in-depth training in science, including critical analyses of scientific concepts and literature, advanced laboratory experience, and detailed understanding and application of molecular biology. Specialists enter the program in 2nd year and then choose one of two Streams, called Genetics and Microbiology, by the start of the third year. Each Stream provides focused training, but there is considerable overlap between the streams, reflective of both the cross-disciplinary requirements of these two rapidly evolving disciplines and the impact of each on areas spanning modern biomedical science.

The Molecular Genetics and Microbiology Major program offers students fundamental training in molecular genetics and microbiology. Students tailor their own program and may focus on a microbiology major, a genetic major, or a combination; they choose a path to suit their specific interests. Students take several advanced courses in these disciplines, but the Major allows them to choose the breadth of their training by combining the MGY Major with another Major of interest.

The Department of Molecular Genetics is also a cosponsor of the Major program in Genome Biology, with the Departments of Cell and Systems Biology (CSB), and Ecology and Evolutionary Biology (EEB). See the Biology program listings for details of the Genome Biology Major.

Career opportunities for graduates include employment in research institutes, universities and other educational institutions, and industry. The programs provide excellent preparation for postgraduate research and professional programs.

Undergraduate Coordinator: Dr. Rick Collins (email: mgy.info@utoronto.ca)

Undergraduate Office/General Inquiries: Medical Sciences Building Rm 4396 (416-978-8359; email: mgy.info@utoronto.ca)

Molecular Genetics and Microbiology Programs

Molecular Genetics and Microbiology Specialist (Science Program) - ASSPE1387

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

Variable Minimum Grade and Variable Minimum Grade Average

Minimum grades combined with a minimum grade average in required courses or their equivalents are needed for entry, and these minimums change each year depending on available spaces and the number of applicants. The following courses must be completed:

- BIO120H1, BIO130H1
- (CHM135H1 and CHM136H1) / CHM151Y1
- (MAT135H1 and MAT136H1) / MAT137Y1 / MAT157Y1

To ensure that students admitted to the program will be successful, applicants with a final grade lower than 75% in each course, or a grade average lower than 80% in these required courses will not be considered for admission. Please note that obtaining the minimum final grades and grade average does not guarantee admission to the program. While it is difficult to predict what will constitute "competitive" course marks in a given year, based on previous years the estimate is: course marks = mid 80s; average = mid 80s.

Please consult the Arts & Science Program Toolkit for more information on program enrolment. Additional information is also available by contacting the Undergraduate Coordinator.

Completion Requirements:

(14.0 credits)

First Year:
- BIO120H1, BIO130H1; (CHM135H1, CHM136H1) / CHM151Y1;
  (MAT135H1, MAT136H1) / MAT137Y1

First or Second Year:
- (PHY131H1, PHY132H1) / (PHY151H1, PHY152H1)

Second Year:
- BCH242Y1; BIO230H1 / BIO255H1, HMB265H1; MGY280H1,
  CHM247H1, STA220H1

Third Year:
ENROLMENT REQUIREMENTS

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

Variable Minimum Grade and Variable Minimum Grade Average
Minimum grades combined with a minimum grade average in required courses or their equivalents are needed for entry, and these minimums change each year depending on available spaces and the number of applicants. The following courses must be completed:

- BIO120H1, BIO130H1
- (CHM135H1 and CHM136H1)/CHM151Y1
- (MAT135H1 and MAT136H1)/MAT137Y1/MAT157Y1

To ensure that students admitted to the program will be successful, applicants with a final grade lower than 75% in each course, or a grade average lower than 80% in these required courses will not be considered for admission. Please note that obtaining the minimum final grades and grade average does not guarantee admission to the program. While it is difficult to predict what will constitute "competitive" course marks in a given year, based on previous years the estimate is: course marks = mid 80s; average = mid 80s.

Please consult the Arts & Science Program Toolkit for more information on program enrolment. Additional information is also available by contacting the Undergraduate Coordinator.

Molecular Genetics And Microbiology Specialist: Genetics Stream - ASSPE1388

Admission Requirements:
Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

Variable Minimum Grade and Variable Minimum Grade Average
Minimum grades combined with a minimum grade average in required courses or their equivalents are needed for entry, and these minimums change each year depending on available spaces and the number of applicants. The following courses must be completed:

- BIO120H1, BIO130H1
- (CHM135H1 and CHM136H1)/CHM151Y1
- (MAT135H1 and MAT136H1)/MAT137Y1/MAT157Y1

To ensure that students admitted to the program will be successful, applicants with a final grade lower than 75% in each course, or a grade average lower than 80% in these required courses will not be considered for admission. Please note that obtaining the minimum final grades and grade average does not guarantee admission to the program. While it is difficult to predict what will constitute "competitive" course marks in a given year, based on previous years the estimate is: course marks = mid 80s; average = mid 80s.

Please consult the Arts & Science Program Toolkit for more information on program enrolment. Additional information is also available by contacting the Undergraduate Coordinator.

Molecular Genetics And Microbiology Specialist: Microbiology Stream (Science Program) - ASSPE1389

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

Variable Minimum Grade and Variable Minimum Grade Average
Minimum grades combined with a minimum grade average in required courses or their equivalents are needed for entry, and these minimums change each year depending on available spaces and the number of applicants. The following courses must be completed:

- BIO120H1, BIO130H1
- (CHM135H1 and CHM136H1)/CHM151Y1
- (MAT135H1 and MAT136H1)/MAT137Y1/MAT157Y1

To ensure that students admitted to the program will be successful, applicants with a final grade lower than 75% in each course, or a grade average lower than 80% in these required courses will not be considered for admission. Please note that obtaining the minimum final grades and grade average does not guarantee admission to the program. While it is difficult to predict what will constitute "competitive" course marks in a given year, based on previous years the estimate is: course marks = mid 80s; average = mid 80s.

Please consult the Arts & Science Program Toolkit for more information on program enrolment. Additional information is also available by contacting the Undergraduate Coordinator.
Completion Requirements:

(14.0 credits)

First Year:
(BIO120H1, BIO130H1), (CHM135H1, CHM136H1), CHM151Y1, (MAT135H1, MAT136H1), MAT137Y1

Second Year:
BCH242Y1, BIO230H1, BIO255H1, HMB265H1, MGY280H1, CHM247H1, STA220H1

Third Year (Microbiology Stream):
1. IMM341H1, IMM351H1, MGY311Y1, MGY377H1, MGY378H1, MGY379Y1, (MGY380H1, MGY381H1)

Fourth Year (Microbiology Stream):
2.5 credits from Microbiology Lists 1 and 2, distributed as follows:
1. At least 1.5 credits must be taken from list 1: MGY428H1, MGY434H1, MGY440H1, MGY458H1, BCH449H1, IMM428H1, IMM430H1, IMM435H1, LMP402H1, LMP403H1, LMP436H1, NFS485H1
2. Up to 1.0 credit may be taken from list 2: MGY360H1, MGY420H1, MGY425H1, MGY470H1, BCH342H1, BCH428H1, CSB472H1, BCH445H1

Molecular Genetics and Microbiology Major (Science Program) - ASMAJ1387

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

Variable Minimum Grade and Variable Minimum Grade Average
Minimum grades combined with a minimum grade average in required courses or their equivalents are needed for entry, and these minimums change each year depending on available spaces and the number of applicants. The following courses must be completed:

- BIO120H1, BIO130H1
- (CHM135H1 and CHM136H1) / CHM151Y1
- (MAT135H1 and MAT136H1) / MAT137Y1 / MAT137Y1

To ensure that students admitted to the program will be successful, applicants with a final grade lower than 60% in each course, or a grade average lower than 70% in these required courses will not be considered for admission. Please note that obtaining the minimum final grades and grade average does not guarantee admission to the program. While it is difficult to predict what will be competitive course marks and average in a given year, based on previous years, the estimate is: course marks = mid 70s; average = mid 70s.

Please consult the Arts & Science Program Toolkit for more information on program enrolment. Additional information is also available by contacting the Undergraduate Coordinator.
MGY250H1 - Introduction to Medical Genetics

Hours: 36L

An introduction to medical genetics including the "omics" revolution, stem cells, cancer genetics, finding disease-causing mutations, genetic counselling and gene therapy. The course material is delivered online and is approximately equivalent to 36 lecture hours. Midterm and final exam are taken on campus or at a pre-approved site off-campus.

Prerequisite: BIO120H1, BIO130H1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

MGY277H1 - Introduction to Medical Microbiology

Hours: 36L

An online introductory survey course that explores the agents of infectious disease including bacteria, viruses, and parasites as well as the host immune response. Other topics include the fundamentals of disease diagnosis and epidemiology. This course will use web-based delivery of lectures and tutorials and utilize a range of communication tools equivalent to approximately three lectures per week. The final exam will require student attendance on the St. George campus.

Prerequisite: BIO120H1, BIO130H1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

MGY280H1 - Second Year Specialist Research

Hours: 48P/12S

This course gives students enrolled in the Molecular Genetics and Microbiology Specialist or Biochemistry Specialist program an opportunity to conduct an original research project in the second semester of their second year in a research laboratory in either of those Departments. Laboratory assignments are chosen during the first semester of second year by agreement with a Departmental faculty member and the Course Coordinator. Attendance at a weekly meeting is mandatory and students will present a report at the end of term. Details can be found on the departmental website. Not eligible for CR/NCR option.

Prerequisite: Enrollment in the Specialist Program in Molecular Genetics and Microbiology or in Biochemistry. Student cannot have completed more than 8.5 FCE.
Exclusion: MGY299Y1 and other ROP299Y1 courses
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

MGY299Y1 - Research Opportunity Program

Credit course for supervised participation in faculty research project. Details at https://www.artsci.utoronto.ca/current/academics/research-opportunities/... Not eligible for CR/NCR option.

Distribution Requirements: Science

MGY311Y1 - Molecular Biology

Hours: 72L

This course examines the design and interpretation of experiments that have led to our current understanding of the biological roles of DNA, RNA and proteins. Intended for students considering graduate or professional work in molecular biology or a related field or wanting a deeper understanding of these topics.

Prerequisite: BIO120H1, BIO230H1/BIO255H1, BCH242Y1 (Note: BCH210H1 may be acceptable with permission of instructor)
Exclusion: BCH311H1, CSB349H1, JBC372H5(UTM), PSL350H1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

MGY314H1 - Principles of Genetic Analysis I

Hours: 12T/36P

Laboratory experiments in genetics, with the focus on microbial and prokaryotic genetics. Topics and experiments include mutagenesis and genetic selection, linkage and recombination, genetic crosses, gene regulation, suppressor analyses, and genetic mapping. (Lab fee: $25)

Prerequisite: BIO230H1/BIO255H1, BIO260H1/HMB265H1
Exclusion: MGY312H1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

MGY315H1 - Principles of Genetic Analysis II

Hours: 12T/36P

Laboratory experiments in eukaryotic genetics, using two of the most powerful eukaryotic model systems, the yeast Saccharomyces cerevisiae and fruit fly Drosophila melanogaster. The course follows MGY314H1; topics include analysis of genetic networks and pathways, meiotic segregation analysis, recombination mapping, genetic crosses, and phenotypic analyses. (Lab fee: $25)

Prerequisite: BIO230H1/BIO255H1, BIO260H1/HMB265H1, MGY314H1/MGY340H1
Exclusion: MGY312H1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)
MGY340H1 - Molecular Genetics

Hours: 36L

This course gives students an in-depth understanding of how genetics, the study of mutations and their resulting phenotypes, are used to probe and understand a variety of biological phenomena ranging from metabolism, to development, to cancer.

Prerequisite: BIO120H1, BIO130H1, BIO230H1/BIO255H1, BIO260H1/HMB265H1

Distribution Requirements: Science

Breadth Requirements: Living Things and Their Environment (4)

MGY350H1 - Model Organisms to Disease

Hours: 36L

The concepts of genetics in the context of human development, disease and evolution. Topics include genetic interactions and complex traits, variation in disease phenotype, signalling and development, stem cells and epigenetic regulation.

Prerequisite: BIO120H1, BIO230H1/BIO255H1, BIO260H1/HMB265H1

Corequisite: BCH311H1/CSB349H1/MGY311Y1

Distribution Requirements: Science

Breadth Requirements: Living Things and Their Environment (4)

MGY360H1 - Whole-Genome Sequencing and Analysis Laboratory

Hours: 36P

The principles and practice of whole-genome sequencing. Each student team will sequence an entire eukaryotic genome and analyze it. Topics will include: modern sequencing technology, yeast husbandry, genomic library construction and quality control, 'next-generation' sequencing, sequence assembly using a reference genome, principles of genome organization, mutation detection and interpretation.

Prerequisite: BIO230H1/BIO255H1, BIO260H1/HMB265H1

Distribution Requirements: Science

Breadth Requirements: Living Things and Their Environment (4)

MGY377H1 - Microbiology I: Bacteria

Hours: 36L

An in depth study of bacteria including their structure, their biology, their ability to adapt, and their effects on human health. Provides a foundation for advanced studies in bacterial physiology, bacterial genetics, molecular pathogenesis of disease, immunology, and environmental studies.

Prerequisite: BCH210H1/BCH242Y1, BIO120H1, BIO230H1/BIO255H1

Exclusion: BIO370Y5 (UTM)

Distribution Requirements: Science

Breadth Requirements: Living Things and Their Environment (4)

MGY378H1 - Microbiology II: Viruses

Hours: 36L

Detailed study of viruses in terms of structure, classification, replication and interaction with the host. Basis for advanced study in virology. Requires some familiarity with molecular and cellular biology. A concurrent course in immunology (IMM340H1, IMM350H1) or (IMM341H1, IMM351H1) is recommended.

Prerequisite: BCH210H1/BCH242Y1, BIO120H1, BIO230H1/BIO255H1, BIO260H1/HMB265H1

Corequisite: BCH311H1/CSB349H1/MGY311Y1

Exclusion: BIO351Y1, CSB351Y1

Distribution Requirements: Science

Breadth Requirements: Living Things and Their Environment (4)

MGY380H1 - Microbiology Laboratory I: Bacteria

Previous Course Number: MGY379Y1

Hours: 12L/36P

A laboratory course in bacteriology. Students will perform a variety of genetic and biochemical experiments to identify and characterize unknown organisms, and learn how bacteria live together in biofilm and become resistance to antibiotics. Students will also learn important research tools and concepts including CRISPR, transduction, and conjugation through experiments. Valuable not only for advanced work in microbiology but also in related fields that make use of bacteria and bacteriophages as research tools.

Prerequisite: BIO120H1, BIO230H1/BIO255H1, HMB265H1/BIO260H1

Corequisite: MGY377H1

Exclusion: MGY379Y1

Distribution Requirements: Science

Breadth Requirements: Living Things and Their Environment (4)
MGY381H1 - Microbiology Laboratory II: Viruses

Previous Course Number: MGY379Y1
Hours: 12L/36P

Hands-on experiments provide the opportunity to develop skills in working safely with human viruses. Important concepts are learned through analysis of results. Topics include propagation and assay of viruses, examination of viruses by electron microscopy, replication kinetics, host response to infection and viral vectors. Valuable not only in microbiology but in fields using viruses as vectors.

Prerequisite: BIO120H1, BIO230H1/BIO255H1, HMB265H1/BIO260H1, MGY380H1
Corequisite: MGY378H1
Exclusion: MGY379Y1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

MGY399Y1 - Research Opportunity Program

Credit course for supervised participation in faculty research project. Details at https://www.artsci.utoronto.ca/current/academics/research-opportunities/. Not eligible for CR/NCR option.

MGY420H1 - Regulation of Gene Expression

Hours: 24L

Regulatory mechanisms controlling gene expression in eukaryotes; students will read, discuss, and present the primary research literature in class. Topics include: assembly of the initiation complex; roles of transcription factors, co-activators and cis-acting regulatory elements; promoter escape; mechanisms that control elongation, termination and anti-termination of transcription; chromatin control of transcription.

Prerequisite: BCH311H1/CSB349H1/MGY311Y1
Exclusion: BIO477H5 (UTM)
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

MGY425H1 - Signal Transduction and Cell Cycle Regulation

Hours: 24L

This course presents and integrates molecular aspects of signal transduction and cell cycle regulation in eukaryotic cells from yeast to humans. Emphasis is on recent advances in growth factor receptor signalling, modular protein domains, and the recurrent role of protein phosphorylation and protein-protein interactions in cell regulation.

Prerequisite: BCH311H1/MGY311Y1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

MGY428H1 - Functional Genomics

Hours: 24L

A broad-ranging course that covers many aspects of genomics and functional genomics, which is the discipline of defining and attributing function to all of the heritable material of an organism on a genome-wide scale, as applied to invertebrates and vertebrates. The primary and review literature will be the basis of all lectures.

Prerequisite: BCH210H1/BCH242Y1; BIO260H1/HMB265H1; MGY311Y1/CSB349H1/BCH311H1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

MGY434H1 - Bacterial Signalling and Physiological Regulation

Hours: 36L

An in-depth look at bacteria, their evolution and genomes, and how they sense their environment and adapt to environmental stimuli. Topics discussed include the human microbiome, modern bacterial genomics and metagenomics and how they affect diagnosis and treatment of disease, bacterial community structures including biofilms and quorum sensing, and the contribution of metabolism to disease and stress resistance.

Prerequisite: BCH210H1/BCH242Y1, BCH311H1/CSB349H1/MGY311Y1, MGY377H1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)
MGY440H1 - Virus-Host Interactions

**Hours:** 36L

Analysis of virus/host interactions at the molecular level with a view to understanding how viruses cause disease. Course material is based on recent research publications. Topics may include: virus entry and intracellular trafficking, activation of host cell signalling pathways, viral and host determinants of tissue tropism within the host and transmission between hosts.

**Prerequisite:** BCH311H1/CSB349H1/ MGY311Y1; CSB351Y1/ MGY378H1

**Recommended Preparation:** IMM340H1/IMM341H1, IMM350H1/ IMM351H1

**Distribution Requirements:** Science

**Breadth Requirements:** Living Things and Their Environment (4)

MGY460H1 - Genetic Analysis of Development

**Hours:** 24L

Basic and advanced principles of genetic analysis applied to the study of the best-understood eukaryotic model organisms including the nematode worm Caenorhabditis elegans, the zebrafish, and the laboratory mouse. We emphasize the use of genetic approaches to address problems in cell biology and development, such as the regulation of cell fate and tissue development. Much of the knowledge gained from these experimentally tractable organisms has proven broadly applicable, and the same principles of developmental genetic analysis underlie efforts to understand the development of humans.

**Prerequisite:** BIO260H1/HMB265H1, MGY311Y1/CSB349H1/ BCH311H1

**Exclusion:** MGY451H1, MGY452H1

**Recommended Preparation:** MGY340H1, MGY350H1

**Distribution Requirements:** Science

**Breadth Requirements:** Living Things and Their Environment (4)

MGY470H1 - Human and Molecular Genetics

**Hours:** 24L

Current aspects of human and molecular genetics including: chromosome structure and function, inheritance of mutations and disease, the human genome and disease gene mapping, cancer genetics, mouse disease models and gene based diagnostics and therapiess.

**Prerequisite:** BCH311H1/MGY311Y1 (Note: CSB349H1 is acceptable with permission of the instructor)

**Distribution Requirements:** Science

**Breadth Requirements:** Living Things and Their Environment (4)

MGY480Y1 - Special Research Project

An opportunity for specialized individual research in molecular genetics and microbiology by arrangement with the course coordinator. Students are required to perform an original research project and attend relevant research seminars. Not eligible for CR/NCR option.

**Prerequisite:** (MGY314H1/MGY315H1/MGY379Y1/MGY380H1/ MGY381H1), (MGY311Y1/BCH311H1/CSB349H1)

**Distribution Requirements:** Science

**Breadth Requirements:** Living Things and Their Environment (4)

MGY481H1 - Independent Research Project

**Hours:** 120P

This course provides an opportunity for individual research with a specific topic of study. Students are mentored and supervised by research scientists and faculty associated with the University of Toronto. It provides students an opportunity to enhance and apply their knowledge and understanding learned in other courses. Not eligible for CR/NCR option.

**Prerequisite:** (MGY314H1/MGY315H1/MGY379Y1/MGY380H1/ MGY381H1), (MGY311Y1/BCH311H1/CSB349H1)

**Exclusion:** MGY480Y1

**Distribution Requirements:** Science

**Breadth Requirements:** Living Things and Their Environment (4)

MGY482H1 - Independent Research Project

**Hours:** 120L

This course provides an opportunity for individual research with a specific topic of study. Students are mentored and supervised by research scientists and faculty associated with the University of Toronto. It provides students an opportunity to enhance and apply their knowledge and understanding learned in other courses. Not eligible for CR/NCR option.

**Prerequisite:** (MGY314H1/MGY315H1/MGY379Y1/MGY380H1/ MGY381H1), (MGY311Y1/BCH311H1/CSB349H1)

**Exclusion:** MGY480Y1

**Breadth Requirements:** Living Things and Their Environment (4)
**MIJ485H1 - Vaccines and Immunity**

**Hours:** 36L

Analysis of the strategies used by pathogenic microbes to evade specific and innate immune responses, and the strategies used to combat infectious disease using vaccines, with an emphasis on molecular and immunological aspects. Special topics include: molecular basis of pathogenicity and immune-evasion strategies; vaccination strategies; challenges to vaccine implementation (given jointly by the Departments of Molecular Genetics and Immunology).

**Prerequisite:** (IMM340H1/IMM341H1), (IMM350H1/IMM351H1), MGY377H1, MGY378H1

**Exclusion:** MBY480H1, MGY485H1

**Distribution Requirements:** Science

**Breadth Requirements:** Living Things and Their Environment (4)
Munk One

Faculty List

Professor
J. Wong, MA, PhD

Associate Professor
R. Levi, BCL, LLB, LLM, SJD

Assistant Professor
T. Kramarz, MA, MSc, PhD

Introduction

Munk One, provided by the Munk School of Global Affairs & Public Policy, provides first-year students with an interdisciplinary program focused on innovation and global problem-solving, investigating the central questions that lie at the heart of teaching and research in the Munk School of Global Affairs, namely issues of global institutions, markets and civil society. Through case studies of some of the most complex challenges worldwide, students in Munk One will examine innovations that have succeeded and failed, when innovation occurs, how innovation can be fostered, and how obstacles to innovation can be overcome. Students, faculty members, and practitioners working together draw on the breadth of interdisciplinary research and teaching in the Munk School to examine problems and solutions for complex global problems.

The Munk One experience integrates small group seminars with hands-on research and analysis of global problems. Limited to an enrolment of 25, students in Munk One enroll in the two (2.0 FCE) courses offered in the Program. The seminar courses promote small-group discussion and emphasize research, analytical, and presentation skills. A lab course gives students the unique opportunity to tackle real-world problems with faculty and graduate students, building connections with their coursework through research-based opportunities that identify problems around the globe and seek to address them through innovative and empirically-grounded solutions. Beyond the classroom, Munk One engages students in the dynamic global conversation occurring in the Munk School, and offers students a vast array of co-curricular offerings such as access to the Munk School’s 500 events each year, insights from leading practitioners, field visits, leadership events, curated readings and films. In the summer following their first year, Munk One offers students opportunities to apply these skills in the field by taking part in courses offered in places like Argentina, Israel and Singapore.

By focusing on innovation throughout their foundational year, undergraduate students will receive early immersion in leading thinking on the current global architecture across the sciences, professional fields, humanities, and with perspectives drawn from around the world. Because of the intensive intellectual experience that Munk One will provide, we deliver these offerings through collaboration with the School’s flagship Master of Global Affairs Program. The result is a unique bridging of foundational year undergraduate education with the insights being developed in the School’s professional graduate program. In so doing, we expect that Munk One: Global Innovation will build a community of undergraduate students who are passionate about the increasingly interconnected and multipolar world in which we live, and who are also linked in closely with the graduate and professional student cohorts pursuing related questions across the Munk School.

The course offerings for Munk One are specifically designed to meet these goals. Global Innovation I: Issues and Perspectives emphasizes innovation as a key driver of economic growth, population health, and societal success. Relying on contemporary and historical cases across the globe, this course engages students on the question of when innovation occurs, how to identify moments of innovation, motivates students to explore who benefits from innovation and how innovation can be fostered. Global Innovation II: Challenges and Solutions, pushes students to explore the potential problems that often limit or hamper innovation – such as the challenges of implementation and scale. In so doing, students engage directly with the problem-solving approach that is also core to the Munk School’s graduate program, by relying on case studies of some of the most complex challenges worldwide, and examining interventions that have succeeded and failed to address them.

As identified above, in addition to seminar courses and co-curricular activities, students in Munk One will each be placed in research labs working on real-world global problems, such as digital governance, environment, global health, ethnic conflict and security, and economic development. Through these laboratory opportunities students will work with interdisciplinary teams to conduct research, develop reports, participate in roundtables, and learn how to identify and address complex global problems. These labs uniquely provide students a platform to draw from and refine their Foundational Year experience. Students will gain experience in a structured multidisciplinary approach to addressing global problems, engage in innovative global problem-solving, and drill down on substantive areas of interest within the field of global affairs.

All first-year students in the Faculty of Arts and Science (St. George campus) are eligible for admission. Students must submit an online application with a resume and personal statement.

Program Director: Teresa Kramarz, teresa.kramarz@utoronto.ca
Program Coordinator: Jona Maille, munk.one@utoronto.ca or 416-946-0326.

Regarding Munk One Courses

Munk One students intending to pursue Peace, Conflict and Justice, Contemporary Asian Studies, and Public Policy programs (undergraduate programs run through the Munk School of Global Affairs & Public Policy), are also eligible to count some of their Munk One coursework toward their degree requirements.
Munk One Courses

MUN101H1 - Global Innovation I: Issues and Perspectives

Hours: 24L

Innovation has always been a key driver of economic growth, population health, and societal success. Transformative change has historically been linked to major innovations such as urban sanitation, pasteurization, the printing press and the industrial revolution. Currently, the opportunity to enhance life chances worldwide relies on innovating for the poor, social innovation, and the ability to harness scientific and technological knowledge. What precisely is innovation? When does innovation happen? Who benefits from innovation? How can innovation be fostered, and how do innovations spread? Relying on major global transformations and country-specific case studies (for example, South Korea, Taiwan, Israel and India), this course examines the drivers of innovation, the political, social, economic, and scientific and technological factors that are critical to promoting innovation and addressing current global challenges, and the consequences of innovation. Restricted to first-year students. Not eligible for CR/NCR option.

Prerequisite: Admission to Munk One
Exclusion: Innis One, New One, St. Mike's One, Trinity One, UC One, Vic One, Woodsworth One
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

MUN102H1 - Global Innovation II: Challenges and Solutions

Hours: 24L

Governing public goods has been an age-old concern for social scientists and policymakers alike. This is not surprising since the provision of global public goods is riddled by problems of collective action. In this course, we focus on how to implement solutions through states, markets and communities.

The first objective is to familiarize students with the concept of global public goods, the different mechanisms that can provide these goods and the challenges that emerge from lacking incentives to secure their provision. To this end, the course will introduce theories from sociology, political science, philosophy, and history to help us understand different types of governance mechanisms and how they may be used to scale global solutions. Theories can help us explain the tensions between cooperating for the public good at the expense of sacrificing individual goals, or why certain areas of our lives, like the Internet, seem to produce public goods without any formal mechanism of cooperation.

The second objective is to use the class and subject of study as an arena to model and practice the kind of learning that is expected of university students. The main skills that the course will help students target and develop are: research (finding, evaluating and assimilating reliable information); writing (developing ideas into logically written arguments); and critical analysis of arguments presented in the readings and debated in class (this includes identifying the key assumptions that are implicit in different theories as well as inherent in our own positions on various questions related to governance). Restricted to first-year students. Not eligible for CR/NCR option.

Prerequisite: Admission to Munk One
Exclusion: Innis One, New One, St. Mike's One, Trinity One, UC One, Vic One, Woodsworth One
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)
MUN105Y1 - Global Problem-Solving: Laboratory Opportunities

Hours: 48L

This course teaches students how to conduct analytically rigorous social science research to improve their insights into complex global problems and devise innovative solutions to address them. A unique feature of this class is that students have the opportunity to learn by doing. Students work hands-on in one of several labs dealing with some of the most intractable global problems of our time in the areas of the environment, health, digital governance, security and the gap between rich and poor. By the end of this course students will be able to:

1. Experience and practice the process of social science research
2. Narrow the scope of a complex global challenge into a manageable research problem that can be tackled over the course of the semester
3. Improve their knowledge and insights on a particular global problem
4. Develop a viable, compelling and implementable solution that can help address an aspect of a global problem
5. Pitch a solution in a compelling way to a jury of experts in global affairs

Students will work with their peers in small seminar classes and lab group settings, mentored by graduate teaching assistants specializing in global affairs, expert faculty and senior policy advisors dedicated to addressing global issues in the fields of the environment, health, security, digital governance and political economy. Restricted to first-year students. Not eligible for CR/NCR option.

Prerequisite: Admission to Munk One
Exclusion: Innis One, New One, St. Mike's One, Trinity One, UC One, Vic One, Woodsworth One
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)
Music

Faculty List

Faculty: Music History & Culture

Professors

C. Clark, MA, Ph D (T)
R. Elliott, MA, Ph D (M)
J. Haines, MA, Ph D (T)

Associate Professor

S. Lee, MA, Ph D
K. McLeod, MA, Ph D
J. Pilzer, MA, Ph D

Assistant Professors

S. Gutsche-Miller, MA, Ph D
F. Hemmasi, MA, Ph D
E. Lockhart, Ph D
J. Packman, MA, Ph D

Faculty: Music Theory

Professors

R. McClelland, Ph D
D. McLean, MA, Ph D

Associate Professors

S. Vande Moortele, MA, Ph D

Assistant Professor

D. Tan, Ph D

Associate Professor, Teaching Stream

M. Sallmen, MA, Ph D

Assistant Professor, Teaching Stream

S. Bisciglia, Ph D

Lecturer

L. Kuzmenko, Mus Bac

Introduction

In the Faculty of Arts and Science, Music is approached as one of the liberal arts and taught as cultural history. This humanistic emphasis aims at a high degree of correlation with other disciplines such as Fine Art, Cultural Anthropology, Languages and Literatures, History, and Philosophy. Note that unlike students in the Mus.Bac. program at the Faculty of Music, students in the Specialist and Major programs are not given individual applied music instruction (e.g. piano or voice lessons). They are, however, offered a thorough grounding in musicology, and strong training in both ethnomusicology and music theory, with the option of increasing their exposure to the latter two disciplines via their upper-year option courses.

The courses with the prefix MUS are open to any student of the University. Even students with a strong music background should find them stimulating explorations of the world of music.

Students wishing to enter the Specialist or Major Program should examine the courses listed under HMU History of Music and TMU Theory of Music in the Faculty of Music Calendar. First-year specialist/major courses are available to a small number of students, who are admitted to them by audition and interview during Registration week. Those interested in ethnomusicology and the study of world music may audition on the basis of their comparable accomplishments in a non-Western instrumental or vocal performing tradition. All students are required to have completed Level 8 Theory and Level 9 Harmony from the Royal Conservatory of Music or equivalent as prerequisite, prior to the audition-interview. Knowledge of Western music history and theory ensures that students are not disadvantaged when facing the curricular requirements of the program. In this program the humanistic and historical approach is supported by courses in music theory which provide craft and analytical tools. The Specialist Program provides excellent preparation for a variety of professional activities including music criticism, library science, positions in the publishing, broadcasting, and recording industries, as well as for graduate studies in musicology, ethnomusicology, and music theory, leading to careers in university teaching. The program leads to the degree of Bachelor of Arts (honours). For programs leading to the degree of Bachelor of Music, the student should consult the Calendar of the Faculty of Music.

Students are encouraged to attend events sponsored by the Faculty of Music such as the Thursday Noon and Faculty Artists’ Series, opera productions and numerous concerts. For information refer to www.music.utoronto.ca or telephone 416-978-3740. Faculty of Music Representative: Professor R. McClelland, Associate Dean, Edward Johnson Building, Room 256 (416-946-0802); email: ryan.mcclelland@utoronto.ca

Enquiries: Jennifer Panasiuk, Admissions Officer, Edward Johnson Building, Room 145 (416-978-3741); email: undergrad.music@utoronto.ca

Regarding Music Programs

Enrolment in HMU and TMU courses, and, therefore, in the Specialist and Major programs, is limited to students who pass the audition-interview, held annually in September. Students are required to complete and submit the Student Profile available online, normally prior to mid-August each year. Detailed information is available on the Faculty of Music website. Hard copies are available from the Faculty of Music Registrar’s Office. You will then be assigned an audition/interview time. Prospective candidates must perform at the Royal Conservatory of Music Grade Eight level, and demonstrate that they have RCM Level 8 Theory (formerly Advanced Rudiments) and RCM Level 9 Harmony (formerly Basic Harmony) or equivalents. Students interested in pursuing the Major or Specialist with the Ensemble option are required to pass an additional audition-interview for ensemble placement. Please refer to MUS120Y1. An information sheet is available at the Faculty of Music and online at www.music.utoronto.ca under "Music for Arts & Science Students". (Note: No audition is required for the Music Minor program, see below.)

Music Programs

Music Specialist (Arts Program) - ASSPE2276

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

Special Requirement

Music Specialist (Arts Program) - ASSPE2276
Music Specialist with Ensemble Option (Arts Program) - ASSPE2027

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

Special Requirement

- Students must pass an audition-interview to enroll in the program. The audition is held annually in September. Students are required to complete and submit the Student Profile available on-line, normally prior to mid-August each year. Detailed information is available on the Faculty of Music website.
- Prospective candidates must perform at the Royal Conservatory of Music Grade Eight level, and demonstrate that they have RCM Level 8 Theory (or equivalent) and RCM Level 9 Harmony (or equivalent). Students who do not meet the Level 9 Harmony requirement (or equivalent) will be required to attend an additional hour of tutorial during the fall term of TMU140Y1.
- 1.0 credits at the 100-level or above in a language other than English
- Students are required to complete and submit the Student Profile available on-line, normally prior to mid-August each year. Detailed information is available on the Faculty of Music website.
- Prospective candidates must perform at the Royal Conservatory of Music Grade Eight level, and demonstrate that they have RCM Level 8 Theory (or equivalent) and RCM Level 9 Harmony (or equivalent). Students who do not meet the Level 9 Harmony requirement (or equivalent) will be required to attend an additional hour of tutorial during the fall term of TMU140Y1.
- Students interested in pursuing the Major or Specialist with the Ensemble option are required to pass an additional audition-interview for ensemble placement. Please refer to MUS120Y1. An information sheet is available at the Faculty of Music and online at http://www.music.utoronto.ca/ under "Music for Arts & Science Students"

Completion Requirements:

(11.5 full courses or equivalent)

First Year:
HMU111H1, HMU126H1, MUS120Y1, TMU115H1, TMU140Y1 (3.5 credits)

Higher Years:
1. HMU225H1, HMU240H1 or HMU245H1, TMU240Y1 (2.0 credits)
2. 3.0 credits from: HMU425H1, HMU426H1, HMU430H1, HMU431H1, HMU432H1, HMU433H1, HMU435H1
3. 1.5 credits in music history (HMU) or music theory (TMU) with at least 1.0 credit at the 300-level
4. 1.0 credits at the 100-level or above in a language other than English

Music Major (Arts Program) - ASMAJ2276

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

Special Requirement

- Students must pass an audition-interview to enroll in the program. The audition is held annually in September. Students are required to complete and submit the Student Profile available on-line, normally prior to mid-August each year. Detailed information is available on the Faculty of Music website.
- Prospective candidates must perform at the Royal Conservatory of Music Grade Eight level, and demonstrate that they have RCM Level 8 Theory (or equivalent) and RCM Level 9 Harmony (or equivalent). Students who do not meet the Level 9 Harmony requirement (or equivalent) will be required to attend an additional hour of tutorial during the fall term of TMU140Y1.

Completion Requirements:

(7 credits)

First Year:
HMU111H1, HMU126H1, TMU115H1, TMU140Y1 (2.5 credits)

Higher Years:
1. HMU225H1, TMU240Y1 (1.5 credits)
2. 2.0 credits in music history (HMU), including at least one half-course at the 300+ level and one half-course at the 400-level
3. 1.0 credit at the 300+ level in music history (HMU) or music theory (TMU)

Music Major with Ensemble Option (Arts Program) - ASMAJ2027

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

Special Requirement

- Students must pass an audition-interview to enroll in the program. The audition is held annually in September. Students are required to complete and submit the Student Profile available on-line, normally prior to mid-August each year. Detailed information is available on the Faculty of Music website.
- Prospective candidates must perform at the Royal Conservatory of Music Grade Eight level, and demonstrate that they have RCM Level 8 Theory (or equivalent) and RCM Level 9 Harmony (or equivalent). Students who do not meet the Level 9 Harmony requirement (or equivalent) will be required to attend an additional hour of tutorial during the fall term of TMU140Y1.

Completion Requirements:

(11.5 full courses or equivalent)
• Students must pass an audition-interview to enroll in the program. The audition is held annually in September. Students are required to complete and submit the Student Profile available on-line, normally prior to mid-August each year. Detailed information is available on the Faculty of Music website.
• Prospective candidates must perform at the Royal Conservatory of Music Grade Eight level, and demonstrate that they have RCM Level 8 Theory (or equivalent) and RCM Level 9 Harmony (or equivalent). Completion Requirements:

(8 credits)

First Year:
HMU111H1, HMU126H1, MUS120Y1, TMU115H1, TMU140Y1 (3.5 credits)

Higher Years:
1. HMU225H1, TMU240Y1 (1.5 credits)
2. MUS220Y1 (1.0 credit)
3. 1.0 credit in music history (HMU) at the 300+ level, including at least one half-course at the 400-level
4. 1.0 credit at the 300+ level in music history (HMU) or music theory (TMU)

Music History & Culture Minor (Arts Program) - ASMIN0695

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

(4 full courses or equivalent)

1. MUS110H1, MUS111H1
2. MUS200H1 or an alternative 200-level 0.5 credit in world music (MUS209H1, MUS211H1, MUS212H1, or MUS215H1)
3. 2.5 credits in MUS courses from the list below, including one credit at the 300+ level. Either MUS120Y1 or MUS220Y1 can be counted towards the 2.5 credits in MUS courses

Regarding Music Courses

HMU and TMU Courses

HMU111H1, TMU115H1, and TMU140Y1 are Prerequisites for all other HMU/TMU courses which are offered annually. Full details on these, and other HMU/TMU courses may be found in the Calendar of the Faculty of Music. (The link can be found here: https://music.utoronto.ca/#students.)

HMU111H, TMU115H1, and TMU140Y1, for the purposes of an Arts & Science degree, are considered category 1 (Creative and Cultural Representations) for breadth requirements, and are considered as Humanities courses for distribution requirements.

Music Courses

MUS110H1 - Introduction to Music History and Culture

Hours: 24L

Introduction to form, style and the interrelationship of music and culture. A basic ability to read music is required.

Exclusion: HMU111H1, VPMA80H3
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

MUS111H1 - Historical Survey of Western Music

Historical survey of Western art music from the Middle Ages to the present. A basic ability to read music is required.

Exclusion: HMU111H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)
MUS120Y1 - Vocal and Instrumental Ensembles I

Hours: 144P

Students rehearse and perform in concerts and reading sessions as assigned by the Faculty of Music. Provides experience in choral groups, orchestra, or in concert band and large wind groups of diverse instrumentation. Development of musicianship skills through performance of large ensemble works; emphasis on sight-reading, ear-training, and musical knowledge.

Attendance at all sessions is required. Placement audition and permission of the Department required. Download the excerpt that is relevant to the instrument you would like to audition on; excerpts will be available at www.music.utoronto.ca beginning early July. Complete and return the MUS120Y1 & MUS220Y1 Audition Request Form before August 15, 2020.

Once your request form is received, you will be notified of your audition time. Placement audition will be held on September 8th, 9th or 10th in the Edward Johnson Building. The audition will be 10 minutes in length.

Exclusion: MUS291Y1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

MUS200H1 - Music of the World's Peoples

Hours: 24L

A survey of musical traditions from various regions of the world, with particular emphasis on the sociocultural contexts in which those musics are created and appreciated. No prior background in music or ability to read music is required.

Exclusion: HMU111H1, VPMA99H3
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

MUS202H1 - Beethoven

Hours: 24L

A study of Beethoven’s musical style in historical context, including a non-technical consideration of Beethoven’s innovations based on listening to music and reading history. No prior background in music or ability to read music is required.

Exclusion: HMU111H1, VPMC85H3
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

MUS204H1 - The Age of Bach & Handel

Hours: 24L

A study of the representative major works in their social and cultural setting with emphasis on the high baroque style of Bach and Handel. No prior background in music or the ability to read music is required.

Exclusion: HMU111H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

MUS206H1 - The World of Opera

Hours: 24L

Examination of selected operas from the eighteenth to the early twentieth century. Musical and dramatic styles will be considered in their cultural context. The ability to read music is not required.

Exclusion: HMU111H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

MUS207H1 - Music for Orchestra

Hours: 24L

Study of selected orchestral works from 1700 to the present. No prior background in music or ability to read music is required.

Exclusion: HMU111H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

MUS209H1 - Performing Arts of South Asia

Hours: 24L

Survey of classical, devotional, folk and popular musics and dances from the Indian subcontinent and their toll in the sociocultural life of the region. No prior background in music or ability to read music is required.

Exclusion: HMU111H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)
MUS210H1 - Music in Film

Hours: 24L

The theory and practice of how music is used in a variety of film genres, drawing on case studies from different eras in film history. Examples will be drawn primarily from European and North American cinema.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

MUS211H1 - The World of Popular Music

Hours: 24L

A survey of popular music traditions from various regions of the world with particular emphasis on the sociocultural contexts in which those musics are created and appreciated. Explores the role of the recording industry, media, festivals, and local institutions in shaping these music cultures both at home and in the international arena. No prior background in music or ability to read music is required.

Exclusion: HMU111H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

MUS212H1 - Music, Sound & Power in the Middle East

Hours: 24L

An investigation of the social life of classical, devotional, folk and popular music and dance from across the Middle East, North Africa and Central Asia.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

MUS215H1 - Performing Arts of East Asia

Hours: 24L

An investigation of the social life of classical, devotional, theatrical, folk, and popular music and dance across East Asia.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

MUS210H1 - Music in Film

Hours: 24L

The theory and practice of how music is used in a variety of film genres, drawing on case studies from different eras in film history. Examples will be drawn primarily from European and North American cinema.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

MUS220Y1 - Vocal and Instrumental Ensembles II

Hours: 144P

Students rehearse and perform in concerts and reading sessions as assigned by the Faculty of Music. Provides experience in choral groups, orchestra, or in concert band and large wind groups of diverse instrumentation. Development of musicianship skills through performance of large ensemble works; emphasis on sight-reading, ear-training, and musical knowledge. Attendance at all sessions is required. Placement audition and permission of the Department required. Download the excerpt that is relevant to the instrument you would like to audition on; excerpts will be available at www.music.utoronto.ca beginning early July. Complete and return the MUS120Y1 & MUS220Y1 Audition Request Form before August 15, 2020. Once your request form is received, you will be notified of your audition time. Placement audition will be held on September 8th, 9th or 10th in the Edward Johnson Building. The audition will be 10 minutes in length.

Prerequisite: MUS120Y1. Placement audition and permission of the Department required.
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

MUS225H1 - Music: Islamic World

Hours: 24L

A survey of the musical systems of Muslim societies from North Africa to Southeast Asia, with special focus on the broader cultural contexts in which they are created, used, and appreciated. No prior background in music or ability to read music is required.

Exclusion: HMU111H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

MUS230H1 - Music of the 1960s

Hours: 24L

Examination of musical and cultural aspects of the decade, with emphasis on North America. No prior background in music or ability to read music is required.

Exclusion: HMU111H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)
MUS235H1 - Survivors' Music

**Hours:** 24L

Investigating music’s myriad roles in the lives of survivors of violence and traumatic experience, for example, in health and recovery, witnessing, and advocacy—and the hidden histories these musics reveal. We encounter survivors of the Holocaust, Hiroshima, the Japanese “comfort women” system, and quotidian domestic and sexual violence.

**Exclusion:** HMU111H1

**Distribution Requirements:** Humanities

**Breadth Requirements:** Creative and Cultural Representations (1)

MUS240H1 - Heavy Music

An investigation of different world genres of “heavy music” as creations of sounding figures of social order, practices of destruction, practices of personal and collective power, social critique, parody, and so on. Includes obvious suspects—metal, punk, gangsta rap—but also opera, military musics, ritual musics, and others.

**Prerequisite:** None

**Corequisite:** None

**Exclusion:** HMU111H1

**Recommended Preparation:** None

**Distribution Requirements:** Humanities

**Breadth Requirements:** Creative and Cultural Representations (1)

MUS300H1 - Music, Media and Technology

**Hours:** 24L

This course explores some of the ways in which music has been shaped through history, and particularly during the last 100 years, by technology and the media. Special attention will be paid to the record industry, broadcasting, and cinema. Examples from popular and art music traditions of the world will be used to illustrate the symbolic relationship between music and media. No prior background in music or ability to read music is required.

**Exclusion:** HMU111H1

**Distribution Requirements:** Humanities

**Breadth Requirements:** Creative and Cultural Representations (1)

MUS302H1 - Symphony

**Hours:** 24L

Masterpieces in the symphonic genre from the eighteenth to the twentieth centuries. No prior background in music or ability to read music is required.

**Exclusion:** HMU111H1

**Distribution Requirements:** Humanities

**Breadth Requirements:** Creative and Cultural Representations (1)

MUS303H1 - Music in the Contemporary World

**Hours:** 24L

The modern musical repertoire, including popular and traditional music from various parts of the world, will be studied from a variety of theoretical perspectives. No prior background in music or ability to read music is required.

**Exclusion:** HMU111H1

**Distribution Requirements:** Humanities

**Breadth Requirements:** Creative and Cultural Representations (1)

MUS305H1 - Latin American and Caribbean Music

**Hours:** 24L

A survey of popular, folk, and religious music from Latin America and the Caribbean. Each practice will be considered in its socio-cultural context with attention to the histories and discourses of racial and cultural mixing that deeply inform everyday life in nations-states including Peru, Brazil, Haiti, and Jamaica among others.

**Exclusion:** HMU111H1

**Distribution Requirements:** Humanities

**Breadth Requirements:** Creative and Cultural Representations (1)
MUS306H1 - Popular Music in North America

Hours: 24L

A selected survey of North American popular music from the 1930s through present. Students will develop a critical framework for listening to and analyzing popular music in historical and social context by focusing on aspects of performance, representation, composition, mass media, aesthetics, and commodification. No prior background in music or ability to read music is required.

Exclusion: HMU111H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

MUS308H1 - Handel

Hours: 24L

Handel’s life and music will be examined in its cultural contexts.

Exclusion: HMU111H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

MUS315H1 - North American Vernacular Music

Hours: 24L

Explores vernacular music in North America, considering how musical performances and festivals of vernacular music map local, regional, and ethnic identities in North America. Specific case studies will include Scottish Highland, Tejano Conjunto, Métis Fiddling, Powwow, and Zydeco. No prior background in music or ability to read music is required.

Exclusion: HMU111H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

MUS321H1 - The Beatles

Hours: 24L

In The Ultimate Encyclopedia Of Rock, it was written of the Beatles that “From three-minute pop classics to the psychedelic extravaganza of ‘Sgt. Pepper’, their songs soundtracked the Sixties. They were the greatest group in history. They probably always will be”. In addition to a survey of the group’s history, their recordings, and their films, this course aims to answer two basic questions: (1) what made the songs of The Beatles so successful? (2) in what ways did the band’s artistic output “soundtrack” the 1960s? No prior background in music or ability to read music is required.

Exclusion: HMU111H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

MUS325H1 - The Age of Haydn & Mozart

Hours: 24L

Selected works from the second half of the eighteenth century by Haydn, Mozart, and their contemporaries will be examined in cultural and historical context. No prior background in music or ability to read music is required.

Exclusion: HMU111H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

MUS330H1 - Music, Violence, and War

Hours: 24L

An inquiry into the social life of music in situations of violence, war, social domination, and traumatic experience. Case studies include music and African-American slavery, the First World War, Nazi Germany and the Holocaust, the Asia-Pacific War, Khmer Rouge Cambodia, the Iraq Wars and others.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)
MUS335H1 - A Social History of the Piano

Hours: 24L

A survey of the changing roles and gendered associations of the piano c.1700 to the present day. Examples from the western art music tradition are compared to the acculturating force of the piano in other cultures, representations in the visual arts and film, and contemporary contexts of piano performance.

Exclusion: VPMB76
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

MUS340H1 - 20th Century Music for Theatre

Hours: 24L

An examination of the role that music has played in modern Western theatre, with specific case studies drawn from one or more of the following genres: ballet, modern dance, musical theatre, opera, spoken theatre.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

MUS408H1 - Wagner

Hours: 24L

A study of the life and works of the composer Richard Wagner, and of his influence on European cultural life from his time to the present day.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)
Near and Middle Eastern Civilizations

K. Sunahara, MA, PhD, Assistant Professor

Introduction

The Department is concerned with the interdisciplinary study of the civilizations and cultures of the Near and Middle East from Neolithic times until the present, including their archaeology, history, mythology, religion and thought, art and architecture, and language and literature (Akkadian, Ancient Egyptian, Arabic, Aramaic, Coptic, Ge’ez, Hebrew, Persian, Sumerian, Syriac, and Turkish). The Department’s programs provide students with a unique opportunity to study non-Western complex societies and civilizations.

The term Near East has been used in scholarship to refer to the region of Southwest Asia at the eastern end of the Mediterranean, including the Levant, Mesopotamia, Egypt, and Anatolia, from ancient times until the advent of Islam in the seventh century AD. The term Middle East refers to a broader geographical area stretching from North Africa to West and Central Asia. Although Islam became the predominant religious culture and remains so to the present day, the Middle East has been home to many religious communities, including Christians, Jews, Zoroastrians, and others. And while Arabic functioned as the interlanguage in much the same way as Latin did in the Christian West, many other languages and cultures (notably Persian and Turkish) contributed to the formation of Islamic civilization.

The Department welcomes students of all academic backgrounds who wish to learn about the Near and Middle East. Many courses do not require knowledge of the languages of the region. However, the Department strongly believes that a deeper understanding of the cultures of the Near and Middle East can be achieved through the study of one or more of its languages.

Additional information about programs and courses offered in a particular year, as well as about the NMC Students’ Union, can be found on the Department’s website: www.nmc.utoronto.ca. Undergraduate enquiries should be directed to the Undergraduate Coordinator, Bancroft Building, 4 Bancroft Ave., Rm. 200 (nmc@utoronto.ca).

Near and Middle Eastern Civilizations Programs

Near and Middle Eastern Civilizations Specialist (General) (Arts Program) - ASSPE1019

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

(11 FCEs, including at least 4 300+ FCEs, 1 FCE of which must be at the 400-level.)

At least 9 FCEs must be NMC and/or NML courses. Others may be taken only from a list of pre-approved courses offered by other departments.
Near and Middle Eastern Civilizations Specialist (Ancient) (Arts Program) - ASSPE2665

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

(11 FCEs, including at least 4 300+ FCEs, 1 FCE of which must be at the 400-level.)

At least 9 FCEs must be NMC and/or NML courses. Others may be taken only from a list of pre-approved courses offered by other departments.

1. First Year: 1 FCE from NMC101H1/ NMC102H1/ NMC103H1/ NMC104H1.

2. 4 FCEs in one or two primary source languages (with NML designator) from among the following languages: Akkadian, Ancient Egyptian, Arabic, Aramaic, Coptic, Ge’ez, Hebrew, Persian, Syriac, Turkish.

3. Higher years:

- 3 FCEs from NMC245H1, NMC248H1, NMC270H1, NMC271H1, NMC334H1, NMC344H1, NMC346H1, NMC347H1, NMC359H1, NMC370H1, NMC446H1, NMC449H1, NMC471H1, NMC472H1 (History & Society courses) and NMC247H1, NMC254H1, NMC289H1, NMC380H1, NMC381H1, NMC382Y1 (Religious & Thought courses).

- 2 FCEs from NMC260H1, NMC261Y0, NMC262H1, NMC263H1, NMC264H1, NMC265H1, NMC266H1, NMC269H1, NMC271H1, NMC336H1, NMC340H1, NMC398Y0, NMC445H1, NMC461H1, NMC462H1, NMC463H1, NMC464H1, NMC465H1, NMC467H1, NMC468H1, NMC470H1, NMC474H1 (Archeology courses) and NMC246H1, NMC251H1, NMC252H1, NMC253H1, NMC259H1, NMC351H1, NMC352H1, NMC450H1, NMC480H1, NMC491H1 (Art, Architecture, & Literature courses).

- 4. 1 additional FCE in Medieval or Modern stream courses or those from a list of pre-approved courses offered by other departments.

Near and Middle Eastern Civilizations Specialist (Medieval) (Arts Program) - ASSPE2667

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

(11 FCEs, including at least 4 300+ FCEs, 1 FCE of which must be at the 400-level.)

At least 9 FCEs must be NMC and/or NML courses. Others may be taken only from a list of pre-approved courses offered by other departments.

1. First Year: 1 FCE from NMC101H1/ NMC102H1/ NMC103H1/ NMC104H1.

2. 4 FCEs in one or two primary source languages (with NML designator) from among the following languages: Arabic, Aramaic, Coptic, Ge’ez, Hebrew (Biblical, Middle), Persian, Syriac, Turkish.

3. Higher years:

- 3 FCEs from NMC270H1, NMC273Y1, NMC274H1, NMC275H1, NMC276H1, NMC344H1, NMC346H1, NMC347H1, NMC359H1, NMC370H1, NMC446H1, NMC449H1, NMC471H1, NMC472H1 (History & Society courses) and NMC247H1, NMC254H1, NMC289H1, NMC380H1, NMC381H1, NMC382Y1 (Religious & Thought courses).

- 2 FCEs from NMC260H1, NMC261Y0, NMC262H1, NMC263H1, NMC264H1, NMC265H1, NMC266H1, NMC269H1, NMC336H1, NMC340H1, NMC398Y0, NMC445H1, NMC461H1, NMC462H1, NMC463H1, NMC464H1, NMC465H1, NMC467H1, NMC468H1, NMC470H1, NMC474H1 (Archeology courses) and NMC246H1, NMC251H1, NMC252H1, NMC253H1, NMC259H1, NMC351H1, NMC352H1, NMC450H1, NMC480H1, NMC491H1 (Art, Architecture, & Literature courses).

- 4. 1 additional FCE in Medieval or Modern stream courses or those from a list of pre-approved courses offered by other departments.

1. First Year: 1 FCE from NMC101H1/ NMC102H1/ NMC103H1/ NMC104H1.

2. 4 FCEs in one or two primary source languages (with NML designator) from among the following languages: Akkadian, Ancient Egyptian, Aramaic, Coptic, Ge’ez, Hebrew (Biblical, Middle), Persian (Old Persian, Avestan, Pahlavi), Syriac.

3. Higher years:
Near and Middle Eastern Civilizations Specialist (Modern) (Arts Program) - ASSPE2669

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

(11 FCEs, including at least 4 300+ FCEs, 1 FCE of which must be at the 400-level.)

At least 9 FCEs must be NMC and/or NML courses. Others may be taken only from a list of pre-approved courses offered by other departments.

1. First Year: 1 FCE from NMC101H1/ NMC102H1/ NMC103H1/ NMC104H1.

2. 4 FCEs in one or two primary source languages (with NML designator) from among the following languages: Arabic, Hebrew, Persian, Turkish.

3. Higher years:

   3 FCEs from NMC241H1, NMC270H1, NMC274H1, NMC275H1, NMC276H1, NMC277H1, NMC278H1, NMC348Y1, NMC355H1, NMC358H1, NMC373H1, NMC377Y1, NMC378H1, NMC386H1, NMC452H1, NMC471H1, NMC472H1, NMC473H1, NMC475H1, NMC476H1, NMC477H1, NMC478H1 (History & Society courses) and NMC284H1, NMC289H1, NMC381H1, NMC384H1, NMC385H1, NMC394H1, NMC395H1 (Religion & Thought courses).

   2 FCEs from NMC261Y0, NMC264H1, NMC367H1, NMC368H1, NMC464H1, NMC465H1 (Archaeology courses) and NMC243H1, NMC315H1, NMC316H1, NMC353H1, NMC394H1, NMC395H1, NMC480H1 (Art, Architecture, & Literature courses).

4. 1 additional FCE in Ancient or Medieval stream courses or those from a list of pre-approved courses offered by other departments.

Near and Middle Eastern Civilizations Major (General) (Arts Program) - ASMAJ2665

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

(6 FCEs including at least 2 300+ level FCEs, 1 FCE of which must be at the 400-level)

At least 5 FCEs must be NMC and/or NML courses. 1 FCE may be taken from a list of pre-approved courses offered by other departments or in consultation with the Undergraduate Coordinator.

1. First Year: 0.5 FCE from NMC101H1/ NMC102H1/ NMC103H1/ NMC104H1.

2. Higher years:

3 to 4 FCEs from any NMC courses.

1 to 2 FCEs in language (NML courses)

Near and Middle Eastern Civilizations Major (Ancient) (Arts Program) - ASMAJ2667

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

(6 FCEs including at least 2 300+ level FCEs, 1 FCE of which must be at the 400-level)

At least 5 FCEs must be NMC and/or NML courses. 1 FCE may be taken from a list of pre-approved courses offered by other departments or in consultation with the Undergraduate Coordinator.

1. First Year: 0.5 FCE from NMC101H1/ NMC102H1/ NMC103H1/ NMC104H1.

2. Higher years:

2 to 3 FCEs from Group A and 1 FCE from Group B/Group C.

1 to 2 FCEs in Ancient Stream languages: Akkadian, Ancient Egyptian, Aramaic, Coptic, Ge'ez, Hebrew (Biblical, Middle), Persian (Old Persian, Avestan, Pahlavi), Syriac.

Near and Middle Eastern Civilizations Major (Medieval) (Arts Program) - ASMAJ1019

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

(6 FCEs including at least 2 300+ level FCEs, 1 FCE of which must be at the 400-level)

At least 5 FCEs must be NMC and/or NML courses. 1 FCE may be taken from a list of pre-approved courses offered by other departments or in consultation with the Undergraduate Coordinator.

1. First Year: 0.5 FCE from NMC101H1/ NMC102H1/ NMC103H1/ NMC104H1.

2. Higher years:

3 to 4 FCEs from any NMC courses.

1 to 2 FCEs in language (NML courses)
2. Higher years:

2 to 3 FCEs from Group B and 1 FCE from Group A/Group C.

1 to 2 FCEs in Medieval Stream languages: Arabic, Aramaic, Coptic, Hebrew (Biblical, Middle), Persian, Syriac, Turkish.

Near and Middle Eastern Civilizations Major (Modern) (Arts Program) - ASMAJ2669

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

(6 FCEs including at least 2 300+-level FCEs, 1 FCE of which must be at the 400-level)

At least 5 FCEs must be NMC and/or NML courses. 1 FCE may be taken from a list of pre-approved courses offered by other departments or in consultation with the Undergraduate Coordinator.

1. First Year: 0.5 FCE from NMC101H1/ NMC102H1/ NMC103H1/ NMC104H1.

2. Higher years:

2 to 3 FCEs from Group C and 1 FCE from Group A/Group B.

1 to 2 FCEs in Modern Stream languages: Arabic, Hebrew, Persian, Turkish.

Near and Middle Eastern Civilizations Minor (Arts Program) - ASMIN1019

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

Four FCEs, including at least one 300+ series course. All four must be NMC and/or NML courses.

Course Groups

Group A (Ancient Stream)

- NMC196H1 Law and Order in the Ancient Near East
- NMC197H1 Myth and History in the Bible
- NMC199H1 Babylon: Fact vs. Fiction
- NMC245H1 Women in the Ancient Near East
- NMC246H1 Sumerian and Babylonian Literature in Translation
- NMC247H1 The Intellectual History of the Ancient Near East
- NMC248H1 Ancient Bureaucracies
- NMC251H1 Voices from Ancient Egypt
- NMC252H1 Hebrew Bible
- NMC253H1 Egyptian Myths
- NMC254H1 The Mummy: Technology and Transformation
- NMC255H1 Literature of Ancient and Late Antique Iran
- NMC260H1 Why the Ancient Near East? Investigating the Great Transformations in Pre- and Proto-History
- NMC261Y0 Field Archaeology
- NMC262H1 Why the Ancient Near East? The Historic Periods
- NMC263H1 The Archaeology of Gods, Ghosts, Witches and Demons
- NMC264H1 The Archaeology of Stuff
- NMC265H1 Archaeology in War Zones: Syria, Iraq, Afghanistan
- NMC266H1 Archaeologies of Power
- NMC270H1 Christians of the Middle East
- NMC276H1 Topics in Near & Middle Eastern Civilizations
- NMC277H1 Topics in Near & Middle Eastern Civilizations
- NMC289H1 Research Opportunity Program
- NMC343H1 Farmers to Pyramid Builders: Cultural and Political History of Ancient Egypt I
- NMC344H1 Hyksos Subjects to Empire Builders: Cultural and Political History of Ancient Egypt II
- NMC346H1 Ancient Mesopotamia I: Sumerians and Akkadians
- NMC347H1 Ancient Mesopotamia II: Assyrians and Babylonians
- NMC351H1 Dead Sea Scrolls
- NMC352H1 Ancient Egyptian Literature
- NMC359H1 Nomads in the Ancient Near East
- NMC360H1 Archaeology of the Biblical World I: The Bronze Age
- NMC361H1 The Archaeology of the Biblical World II: The Iron Age
- NMC362Y1 Ancient Egyptian Sites
- NMC363H1 Ancient Iraq
- NMC364H1 Art and Archaeology of Syria
- NMC370H1 Ancient Israel
- NMC380H1 Religion in the Ancient Near East
- NMC382Y1 Mummies, Myth and Magic: The Religion of Ancient Egypt
- NMC398Y0 Research Excursions
- NMC399Y1 Research Opportunity Program
- NMC445H1 Sacred and Secular Spaces: Mesopotamian Architecture in Context
- NMC446H1 The Babylonian City
- NMC447H1 The Neo-Assyrian Empire
- NMC449H1 Mesopotamian Society and Economy
- NMC450H1 Research Seminar on Ancient Jewish Literature
- NMC451H1 The History and Archaeology of the Horn of Africa and South Arabia
- NMC462H1 Polarized-light Microscopy in Archaeology I: Foundations
- NMC463H1 Warfare: the Archaeology of Conflict in the Ancient Near East
Group B (Medieval Stream)

- NMC464H1 The Archaeology of Stuff at the ROM
- NMC465H1 Ceramic Analysis
- NMC466H1 Near Eastern Ceramics
- NMC467H1 Seminar in Egyptian Archaeology I
- NMC468H1 Seminar in Egyptian Archaeology II
- NMC470H1 Polarized-light Microscopy in Archaeology II: Applications
- NMC471H1 Advanced Topics in Near and Middle Eastern Civilizations
- NMC472H1 Theory & Method in Middle East Studies
- NMC474H1 The Archaeology of Death
- NMC480H1 Structural Development of the Iranian Languages
- NMC491H1 Mesopotamian Material Culture: Art and Artifacts
- NMC495Y1 Independent Studies
- NMC496H1 Independent Studies
- NMC497H1 Independent Studies
- NMC499Y1 Senior Thesis

Group C (Modern Stream)

- NMC399Y1 Research Opportunity Program
- NMC464H1 The Archaeology of Stuff at the ROM
- NMC465H1 Ceramic Analysis
- NMC469Y1 Medieval Middle Eastern Ceramics
- NMC471H1 Advanced Topics in Near and Middle Eastern Civilizations
- NMC472H1 Theory & Method in Middle East Studies
- NMC480H1 Structural Development of the Iranian Languages
- NMC484H1 Gender-related Topics in Jewish Law and Religion
- NMC495Y1 Independent Studies
- NMC496H1 Independent Studies
- NMC497H1 Independent Studies
- NMC499Y1 Senior Thesis

- NMC355H1 Love, Battle, and Wit: Classics of Premodern Arabic Literature
- NMC256H1 1001 Nights Around the World
- NMC258H1 The Book of Kings: Persian Myth, History, and Art
- NMC259H1 Literature of Ancient and Late Antique Iran
- NMC261Y0 Field Archaeology
- NMC264H1 The Archaeology of Stuff
- NMC270H1 Christians of the Middle East
- NMC271Y1 Early Islamic History: The Prophet and the Caliphates
- NMC274H1 The Turks in History: From Nomads of the Steppe Frontier to Islamic Rulers
- NMC275H1 The Mongol Empire and the World It Made
- NMC276H1 Topics in Near & Middle Eastern Civilizations
- NMC277H1 Topics in Near & Middle Eastern Civilizations
- NMC278H1 Introduction to the Modern Middle East
- NMC284H1 Topics in Judaism and Feminism: Conflict, Competition, Complement
- NMC289H1 Introduction to Coptic Studies
- NMC299Y1 Research Opportunity Program
- NMC300Y1 Language and Culture in the Modern Middle East
- NMC315H1 The Structure of Arabic Language
- NMC316H1 Cultural Encounter in Arabic Narrative
- NMC348Y1 History of Iran: From the Sasanians to the Safavids
- NMC353H1 Possible Worlds: Arabic Speculative Fiction
- NMC355H1 The Ottoman Empire in the Age of Reform, 1808-1918
- NMC356H1 Anthropology of Islam
- NMC358H1 Gender and Sexuality in Modern Arabic Literature
- NMC367H1 Archaeology & Architecture of Egyptian Monasticism
- NMC368H1 Coptic Art & Archaeology
- NMC374H1 The Mamluks: from Slaves to Sultans
- NMC376H1 History of Islamic Spain and North Africa (640-1492)
- NMC377Y1 The Ottoman Empire to 1800
- NMC384H1 Life Cycle and Personal Status in Judaism
- NMC385H1 Introduction to Islamic Law
- NMC386H1 Muslims, Christians, and Jews in the Ottoman Empire
- NMC394H1 Persianate Art & Architecture
- NMC395H1 Iconography of the Art and Material Culture of the Islamic World
- NMC399Y1 Research Opportunity Program
Faculty of Arts & Science Language Citation

The Department of Near and Middle Eastern Civilizations participates in the Faculty of Arts & Science’s Language Citation for Arabic, modern Hebrew, Persian, Turkish, Biblical Hebrew, and Ancient Egyptian. The study of languages is a demanding and intellectually rewarding educational experience that provides access to the varieties of human culture and expression. The Language Citation requires the completion of 3 FCEs and recognizes a significant level of achievement in the advanced study of a language.

The Citation in Arabic is available to students who, having completed the introductory course in Arabic (NML110Y1 or the equivalent prerequisite training), earn a grade of at least B- in two additional FCEs in Arabic language (NML210Y1, NML310Y1, or NML410Y1).

The Citation in modern Hebrew is available to students who, having completed the introductory courses in modern Hebrew (NML155H1 and NML166H1 or the equivalent prerequisite training), earn a grade of at least B- in two additional FCEs in modern Hebrew language (NML255H1, NML256H1, NML355H1, and NML356H1).

The Citation in Persian is available to students who, having completed the introductory Persian language course (NML260Y1 or the equivalent prerequisite training), earn a grade of at least B- in two additional FCEs in Persian language/literature (NML360Y1, NML461H1, NML462H1, NML466H1, NML467H1, or NML468H1).

The Citation in Turkish is available to students who, having completed the introductory course in Turkish (NML270Y1 or the equivalent prerequisite training), earn a grade of at least B- in two additional FCEs in Turkish language (NML370Y1 and NML470Y1).

The Citation in Biblical Hebrew is available to students who, having completed the introductory course in Biblical Hebrew (NML250Y1 or the equivalent prerequisite training), earn a grade of at least B- in two additional FCEs in Biblical Hebrew language (NML350H1, NML351H1, NML450H1, and NML459H1).

The Citation in Ancient Egyptian is available to students who, having completed the introductory course in Ancient Egyptian (NML240Y1 or the equivalent prerequisite training), earn a grade of at least B- in two additional FCEs in Ancient Egyptian language/literature (NML340Y1, NML440H1, and NML441H1).

Students should note that the Language Citation is not equivalent to an academic program for purposes of degree completion; however, language courses taken as part of the Requirements for an NMC Program of study may count towards a Language Citation in the relevant language(s).

Near and Middle Eastern Civilizations Courses

Note Regarding Courses: Not all courses are taught every year. Please check the Faculty of Arts & Science Timetable for the list of courses offered in 2020–2021. Courses with the designator NML indicate courses devoted to the study of the languages of the Near and Middle East (at Introductory, Intermediate, and Advanced levels), as well as courses that study texts written in the original languages. The Department reserves the right to place students in the course level best suited to their linguistic preparation.

First-Year Foundation Courses

First-Year Foundation Seminars are open only to newly-admitted Faculty of Arts & Science students. They offer the opportunity to explore interesting and often controversial topics in a small-group setting with professors who are among the Faculty’s leading scholars. Students engage in academically rigorous discussions and develop strong written and oral communication skills in the process. The Department offers five FYF Seminars on topics ranging from the ancient to the modern. First-Year Foundation Seminars:

• Count as 0.5 of the 20 credits required for an Hon. B.A., Hon B.Sc., or B. Com.
• First-Year Foundation Seminars may count towards your Program. Please check with your college registrar or the NMC Department for further details.
• Can be counted towards the breadth requirement.

For the list of NMC First-Year Foundation Seminars see the Faculty of Arts & Science Calendar.

Gateway Courses

These courses are designed to introduce students to the major civilizations and cultures of the Near and Middle East—ancient, medieval, and modern—and to present students with the range of possibilities for further study in their chosen area of interest. These courses provide an opportunity for students to improve their writing skills under the supervision of the Writing Integrated Teaching (WIT) program of the Faculty of Arts & Science. Students pursuing any one of the NMC Specialist Programs are required to take two of these Gateway courses, whereas students opting to do any one of the Major Programs are required to take only one.
**Gateway Courses**

**NMC101H1 - Land of the Pharaohs**

**Hours:** 24L/12T

The course traces the history of ancient Egypt from the foundation of the Egyptian state around 3050 BCE to its incorporation into the Roman Empire. The focus is on various aspects of Egyptian culture, including the institution of kingship, the role of women, and the peculiarities of Egyptian art, literature, and religion. Emphasis is placed on the methods by which knowledge about this ancient civilization can be obtained.

**Distribution Requirements:** Humanities  
**Breadth Requirements:** Society and its Institutions (3)

**NMC102H1 - Heartland of Ancient Empires**

**Hours:** 24L/12T

From city state to empire. The peoples and polities of Mesopotamia and the Near East, including Sumerians, Assyrians, Babylonians, and Persians. Their cultural contributions, from the development of writing to their achievements in law, administration, science, art and architecture, religion, and literature.

**Distribution Requirements:** Humanities  
**Breadth Requirements:** Society and its Institutions (3)

**NMC103H1 - The Islamic World**

**Hours:** 24L/12T

What makes a certain thing (a state, art, law) Islamic? When and how did we think about as the Islamic today come about? How has “the Islamic” changed over time? With these questions in mind, this course introduces students to major peoples, events, intellectual currents, and institutions in Islamic history.

**Distribution Requirements:** Humanities  
**Breadth Requirements:** Society and its Institutions (3)

**NMC104H1 - The Biblical World**

**Hours:** 24L/12T

Examine the history, lands, peoples, religions, literatures and cultures that produced the Hebrew Bible/Old Testament. Topics to be covered include an overview of the geography and history of Ancient Israel and Judea, the role of the Hebrew, Aramaic, and Greek languages, the literary genres reflected in biblical and some contemporary non-biblical texts, and the scholarly methods by which the Bible is studied.

**Distribution Requirements:** Humanities  
**Breadth Requirements:** Society and its Institutions (3)

**Culture and Civilization Courses**

**NMC195H1 - Rebels, Misfits, and Outcasts in Modern Arabic Literature**

**Previous Course Number:** NMC242H1  
**Hours:** 36S

Examines modern Arabic literary works that portray marginalized social figures and groups, including the criminal, the urban poor, the peasantry, the delinquent, the prostitute, and the political outcast. Explores issues such as political violence, marginality, precarity, social reform and social exclusion. Restricted to first-year students. Not eligible for CR/NCR option.

**Exclusion:** NMC242H1  
**Distribution Requirements:** Humanities  
**Breadth Requirements:** Creative and Cultural Representations (1)

**NMC196H1 - Law and Order in the Ancient Near East**

**Hours:** 24S

Are human beings basically evil or good? What creates order in society? Coercion? Religion? Can societies operate without law? This course explores different systems of authority and control through ancient texts, focusing on the very first ideas of law in human history. We examine actual law codes, court cases on real estate disputes and conspiracy to commit murder and rape, as well as alternative means of regulating communities such as ideology, ritual and magic. While most courses on ancient law approach the topic from the perspective of modern concerns, this course situates the first law in its own historical, social and political context. Restricted to first-year students. Not eligible for CR/NCR option.

**Distribution Requirements:** Humanities  
**Breadth Requirements:** Creative and Cultural Representations (1)
NMC197H1 - Myth and History in the Bible

Hours: 24S

Reading the Bible is easy, but reading it well isn’t. Should we read its stories as history? All of it? Or perhaps only part of it? If so, which parts? And if some parts aren’t meant to be read as history, then what are they? Was Jonah really swallowed by a large fish? Did the sun and moon stand still for Joshua? Did Moses really part the Red Sea? Did Jesus really raise Lazarus from the dead? Are miracles necessarily fiction? In this seminar, we will read together many of the most colourful stories of the Bible, sometimes alongside similar stories from the cultural context of ancient Israel, and discuss what genre (history, myth, legend, folktale) they belong to and how this affects our reading of these texts. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

NMC198H1 - Iranian Women Reveal their Lives: the First Generation

Hours: 24S

The narrative of women speaking out begins in Iran in the first decades of the 20th century. In this course, we will look at an early generation of educated Iranian females who although from varied backgrounds have a common desire to make their lives public. We will refer to a mix of sources including memoirs, interviews and poems to explore how feminist aspirations are repressed or expressed in a society dominated by patriarchal values. We will analyse how a woman’s childhood experience affects her personal expectations for the future and whether the cultural environment restricted this generation or encouraged women to make a social contribution. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

NMC199H1 - Babylon: Fact vs. Fiction

Hours: 24S

The ancient city of Babylon, now a vast archaeological site in Iraq about 100km south of Baghdad, has captured people’s imagination up to this day. Who has not heard of the Hanging Gardens of Babylon, the Biblical Tower of Babel, or the sci-fi TV series Babylon 5? Yet, how much of that reflects the reality of ancient Babylon? This course will explore the city of Babylon through its texts and archaeology and contrast this data with the way the city has been remembered over the past two thousand years. However, the goal of the course is not only to investigate how myths about Babylon have been constructed throughout the centuries. It will also look at the shortcomings of contemporary academic research on Babylon, and how difficult it is to reconstruct humankind’s distant past. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

NMC241H1 - Anthropology of the Middle East

Hours: 24L

This course offers an introduction to the contemporary Middle East from an anthropological perspective. Topics will include gender, kinship, religion, modernity, popular culture, and the study of everyday life.

Exclusion: RLG355H1
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

NMC243H1 - The Arabic Novel

Hours: 24L

Focuses on the origins and development of the novel genre in the Arabic tradition. Examines the aesthetic qualities of the genre as an artistic form and the ways that it has depicted and intervened in the modern social, political, and cultural upheavals that have shaped the Arab world in the 20th century. Readings of novels and criticism in English.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)
NMC245H1 - Women in the Ancient Near East

Hours: 24L

The course examines written and archaeological sources to discuss the status and role of women in the ancient Near East, focusing in particular on the first millennium BCE.

Recommended Preparation: NMC101H1, NMC102H1
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

NMC246H1 - Sumerian and Babylonian Literature in Translation

Hours: 24L

This course explores some of the world’s oldest literature, including the Epic of Gilgamesh and the Babylonian Epic of Creation. It surveys the major genres from ancient Mesopotamia, including epics, myths, lyrical poetry, wisdom literature, and humorous tales.

Recommended Preparation: NMC102H1
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

NMC247H1 - The Intellectual History of the Ancient Near East

Hours: 24L

Survey of the intellectual life in the Ancient Near East from the emergence of writing in Mesopotamia and Egypt at the end of the third millennium BCE until the Hellenistic and Roman periods. Covers issues of orality vs. literacy, state and scribal control, notions of progress, origins and purpose of knowledge, as well as areas such as taxonomy of the natural world, astronomy, mathematics, medicine, divination.

Recommended Preparation: NMC101H1, NMC102H1, or NMC104H1
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

NMC248H1 - Ancient Bureaucracies

Hours: 24L

A survey course on the evolution of bureaucracies in the ancient Near East (Iraq, Iran, Syria, Turkey, the Levant) and Egypt. Covering the period from 9,000 to 600 B.C.E., the course will track the development from simple storage and accounting procedures in Neolithic villages to administrative complexities in urban settings, leading to the advent of writing systems.

Prerequisite: None
Corequisite: None
Exclusion: None
Recommended Preparation: NMC102H1
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

NMC249H1 - Voices from Ancient Egypt

Hours: 24L

Introduces students to the culture of ancient Egypt through the study of ‘functional’ textual materials, including domestic, religious (including funerary and ritual), historical, and scientific texts, to paint a rich picture of the daily life and experiences of the ancient Egyptians. No knowledge of Egyptian required; all texts read in translation.

Recommended Preparation: NMC101H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

NMC250H1 - Hebrew Bible

Hours: 24L

An introduction to the critical study of the Hebrew Bible/Old Testament and the related literature of ancient Jewish communities (Apocrypha, Pseudepigrapha, Dead Sea Scrolls). English translations used; no knowledge of Hebrew is required. (Offered alternate years)

Recommended Preparation: NMC104H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)
NMC253H1 - Egyptian Myths

Hours: 24L

Explores Egyptian mythical writings, starting with the myths contained in the Pyramid Texts of the 3rd Millennium BCE and ending with the narrative mythical tales of the 1st Millennium BCE and beyond. Definitions and historical developments will be discussed. All texts will be read in translation.

Recommended Preparation: NMC101H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

NMC254H1 - The Mummy: Technology and Transformation

Hours: 24L

This course explores the significance of mummies in contexts ranging from ancient Egyptian to modern, tracing the development of Egyptian mumification techniques and the roles and uses of mummies as transformative elements allowing access to the afterlife, sources of information about ancient individuals, characters in literature and film, and objects for display in museums.

Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

NMC255H1 - Love, Battle, and Wit: Classics of Premodern Arabic Literature

Hours: 24L

Students read closely classic works in translation, through class discussion, in-class exercises, and short essays. Readings include: narratives like Kalila wa-Dimna and Ibn Hazm’s love treatise; poems by Labid, Jarir, Abu Nuwas, al-Mutanabbi, and Ibn Nubata; and an obscene shadow play by Ibn Daniyal.

Recommended Preparation: 1 FCE in Humanities.
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

NMC256H1 - 1001 Nights Around the World

Hours: 24L

Reveals how the 1001 Nights was created, transformed, and disseminated. We consider the politics and aesthetics of medieval and modern adaptations - manuscripts, films, ballet, novels, and short stories produced around the world. Builds toward a final project -- either a creative project or an essay.

Recommended Preparation: 1 FCE in Humanities
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

NMC258H1 - The Book of Kings: Persian Myth, History, and Art

Hours: 24L

The Persian Book of Kings, or Shahnameh, composed in the 11th century by Ferdowsi, is the most important book in Iranian national culture and one of the great works of world literature. The course examines the book’s presentation of the history of the pre-Islamic kings of Iran, the exploits of Iran’s heroes, and the myths and legends of ancient Iran, which were frequently illustrated in manuscript copies over the centuries.

Recommended Preparation: NMC103H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

NMC259H1 - Literature of Ancient and Late Antique Iran

Hours: 24L

This course explores the shared world of myth and ritual between Zoroastrianism and Hinduism and examines the contours of early Iranian thought. The course will survey mythoepic literature in translation from the archaic Avesta through the late antique Middle Persian (Pahlavi) corpus. The course will include a broad introduction to ancient and late antique Iran.

Prerequisite: None
Recommended Preparation: NMC102H1 or NMC103H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)
NMC260H1 - Why the Ancient Near East? Investigating the Great Transformations in Pre- and Proto- History

Hours: 48L

This is an experiential course that asks what it would have been like for people in the ancient Near East as their world underwent the profound changes wrought by domestication, farming, urbanism, and state formation. We focus on the sensory experiences of the body, and their effect upon the mind, by reconstructing and using spaces and objects that have come to define the archaeological periods from 10,000 to 2500 BCE. From circular communal buildings and the constraints and possibilities they offer, to replastering skulls and making hand-held figurines, to the performance of a ritual text, we link traditional teaching with walking a mile in ancient footwear. Participation in this course requires an active imagination and a willingness to get physical.

Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

NMC261Y0 - Field Archaeology

Participation for 4 - 7 weeks during the summer in an approved archaeological excavation in the eastern Mediterranean/Middle East. This experience is then critiqued in a previously assigned essay researched and written under guidance upon return. Departmental permission is required in December-February prior to the fieldwork. Not eligible for CR/NCR option.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

NMC262H1 - Why the Ancient Near East? The Historic Periods

Hours: 48L

From 2500 to 333 BCE, the ancient Near East saw the world’s first empire, the birth of international diplomacy, burgeoning sea-trade and piracy, perennial warfare and the emergence of new ethnic identities like the Philistines and Israelites. Explore the archaeological evidence for these events in Mesopotamia, Egypt, Anatolia and the Levant.

Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

NMC263H1 - The Archaeology of Gods, Ghosts, Witches and Demons

Hours: 24L

This class investigates archaeological traces of human interaction with the supernatural world in the ancient Near East, including figurines, temples, skulls, statues, and cylinder seals. In order to contextualize different ways of thinking about other worlds, we also look at cross-cultural comparisons ranging from Africa to the Americas.

Prerequisite: None
Corequisite: None
Exclusion: None
Recommended Preparation: NMC102H1
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

NMC264H1 - The Archaeology of Stuff

Previous Course Number: NMC369Y1
Hours: 24L

Discover how the structure of animal skin enables the making of leather and tattoos; why mighty kings boasted about tree-cutting expeditions; how chariots, stirrups, and gunpowder changed the very structure of contemporary societies; why spears are better than swords. Understand and appreciate the materials in the world around you.

Exclusion: NMC369Y1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

NMC265H1 - Archaeology in War Zones: Syria, Iraq, Afghanistan

Hours: 24L

Focusing on Syria, Iraq and Afghanistan, this course raises some controversial issues in coming to grips with the impact of war on retrieving, interpreting, and preserving the past. Find out the many ways we can work to preserve the history and culture of places at risk, now and in the future.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)
NMC266H1 - Archaeologies of Power

Hours: 24L

What does archaeological evidence tell us about political and social power? Explore the origins and rise of leadership in the Near East from the Neolithic period to the famous kings and military commanders of Sumer, Assyria and Babylon.

Recommended Preparation: NMC102H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

NMC270H1 - Christians of the Middle East

Hours: 24L

The course will introduce students to the Christian communities living in the Middle East since the distant past, identified by ecclesiastical and or ethnic terms, including Armenian, Copt, Greek-Melkite, Maronite, and Syriac. The course will discuss the plurality of their cultural, literary, and theological traditions, the social and intellectual roles of their monasteries, the contributions of their top religious authorities in diplomacy between Byzantium and the Sassanians, their position in the Islamic world and contributions to Islamic culture, philosophy, sciences, and theology, interreligious dialogues and polemics with Islam. (Offered in alternate years)

Recommended Preparation: NMC102H1
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

NMC273Y1 - Early Islamic History: The Prophet and the Caliphates

Hours: 72L

Builds a solid foundation in Middle East & Islamic Studies, giving students an understanding of major themes and events, movements and individuals in early Islamic history and an awareness of the tools and sources available for study, problems historians have encountered in using them, and interpretive approaches to these sources.

Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

NMC274H1 - The Turks in History: From Nomads of the Steppe Frontier to Islamic Rulers

Hours: 24L

Explores the roles of Turks as raiders, migrants, slave-soldiers, and empire-builders in the formation of the Islamic world prior to the Ottomans (1300). Readings include primary sources in translation on the Islamization of the Turks in Central Asia and their gradual takeover of Iranian and Arab lands.

Exclusion: NMC274Y1
Recommended Preparation: NMC103H1
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

NMC275H1 - The Mongol Empire and the World It Made

Hours: 24L

The rise of the Mongols and creation of their world empire and its role in the making of the modern world. Political, military, cultural, and economic aspects of the formation and disintegration of the largest land empire in world history (1200-1800).

Exclusion: NMC274Y1
Recommended Preparation: NMC103H1, NMC274H1
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

NMC276H1 - Topics in Near & Middle Eastern Civilizations

Topics vary from year to year, depending on instructor.

Distribution Requirements: Humanities

NMC277H1 - Topics in Near & Middle Eastern Civilizations

Topics vary from year to year, depending on instructor.

Distribution Requirements: Humanities
**NMC278H1 - Introduction to the Modern Middle East**

**Hours:** 36L

The emergence of modern states in the Middle East, against a background of empire, world wars, and national and religious movements. Students will learn why the modern map looks the way it does, and how Middle Eastern peoples' self-identifications have changed over the past 200 years.

**Recommended Preparation:** NMC103H1  
**Distribution Requirements:** Humanities  
**Breadth Requirements:** Society and its Institutions (3)

---

**NMC284H1 - Topics in Judaism and Feminism: Conflict, Competition, Complement**

**Hours:** 24L

Explores the interaction between Jewish religious and secular movements and feminism, focusing on conflicts between Jewish law (*halakhah*) and ideas of egalitarianism, particularly in legal disabilities for women connected to marriage and divorce, lack of access to high-level Torah study, and discrimination in public religious roles. Examines competition among the movements to include women in Torah study has led to, and the extent to which inclusion and egalitarianism have become a complement in Judaism. (Offered in alternate years, topic changes)

**Distribution Requirements:** Humanities  
**Breadth Requirements:** Thought, Belief and Behaviour (2)

---

**NMC289H1 - Introduction to Coptic Studies**

**Hours:** 24L

Overview of the history of the Copts from political, religious, social and economic perspectives. Literary and documentary sources will illustrate these different aspects of Coptic Civilization. The focus on Coptic Monasticism will underline the role of monasteries as conservers of the Coptic Orthodox Church tradition.

**Distribution Requirements:** Humanities  
**Breadth Requirements:** Thought, Belief and Behaviour (2)

---

**NMC315H1 - The Structure of Arabic Language**

**Previous Course Number:** NML315H1

This course investigates formal properties of Arabic language. It provides students with an in-depth knowledge of the grammar of the language focussing on the areas of phonetics, phonology, morphology, syntax, and the interaction between phonology and morphology.

**Prerequisite:** NML210Y1 or LIN100Y1, or permission of the instructor  
**Exclusion:** NML315H1  
**Recommended Preparation:** LIN229H1, LIN232H1  
**Distribution Requirements:** Humanities  
**Breadth Requirements:** Creative and Cultural Representations (1)

---

**NMC316H1 - Cultural Encounter in Arabic Narrative**

**Hours:** 36S

Explores the cultural politics of encounter, narrative, and representation in modern Arabic narrative. Examines literary, historical, anthropological, and visual texts to consider how Arab writers have imagined and documented their cultural and political encounters with difference both in and outside the Arab world.

**Prerequisite:** 3 FCE in Humanities  
**Distribution Requirements:** Humanities  
**Breadth Requirements:** Creative and Cultural Representations (1)

---

**NMC342H1 - History & Sources of Egyptian Monasticism**

**Hours:** 24L

Presents an historical overview on the origins of Egyptian monasticism based on written sources. Comparison of written sources with archaeological artifacts reveals the relation between spiritual and material aspects of monastic life. Literary sources produced for different monastic orders -- such as sermons, canons and biographies -- will be studied.

**Recommended Preparation:** NMC289H1/NMC368H1  
**Distribution Requirements:** Humanities  
**Breadth Requirements:** Society and its Institutions (3)
NMC343H1 - Farmers to Pyramid Builders: Cultural and Political History of Ancient Egypt I

Hours: 24L/12T

Exploration of the primary archaeological, architectural, and inscriptional sources, questioning and analyzing ideas about Egypt's development from farming communities at the dawn of history to an early state that built great pyramids for its kings, collapsed into civil war, and grew to become a colonizing power in the Middle Kingdom.

Prerequisite: 5 FCE in any field or 1 FCE in NMC
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

NMC344H1 - Hyksos Subjects to Empire Builders: Cultural and Political History of Ancient Egypt II

Hours: 24L/12T

Exploration of the primary archaeological, architectural, and inscriptional sources, questioning interpretations and analyzing how Egypt confronted foreign domination and developed into a major empire in the New Kingdom under Thutmose III, Hatshepsut, Akhenaten, and Ramesses II, then fragmented politically in the Third Intermediate Period and ultimately became a colony itself.

Prerequisite: 5 FCE in any field or 1 FCE in NMC
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

NMC346H1 - Ancient Mesopotamia I: Sumerians and Akkadians

Hours: 24L

The political and cultural history of the peoples of ancient South-Western Asia from 3000 BCE to the destruction of Babylon by the Hittites ca. 1600 BCE. (Offered in alternate years)

Prerequisite: 3 FCEs in Humanities
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

NMC347H1 - Ancient Mesopotamia II: Assyrians and Babylonians

Hours: 24L

Traces the political development and cultural history of Mesopotamia, from the territorial states of the Late Bronze Age to the world's first empires in the first millennium BC (Assyria, Babylonia, Achaemenid Persia).

Prerequisite: 3 FCE in Humanities.
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

NMC348Y1 - History of Iran: From the Sasanians to the Safavids

Hours: 48L

Examines the political history and cultural legacy of the Sasanian empire and transmission of Persian concepts of kingship, administration, and social organization into Islamic civilization, Perso-Islamic cultural synthesis under the Samanids, the interaction between nomadic and sedentary cultures under the rule of Turkic and Turko-Mongolian dynasties, and the Safavid state.

Prerequisite: Any half-credit course in the history of the ancient or early Islamic world offered by academic units within the Faculty of Arts & Science
Recommended Preparation: NMC273Y1
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

NMC350H1 - Christian Literature from the Middle East in Translation

Hours: 24L

Survey of various literary genres from works produced by Armenian, Coptic, Maronite, Melkite, and Syriac authors between the 3rd and the 19th centuries CE. Genres include theology in poetry, biblical commentaries, historiography and chronicles, hagiography, songs and epics, apologetics, and travel accounts.

Prerequisite: NMC270H1
Recommended Preparation: NMC102H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)
NMC351H1 - Dead Sea Scrolls

Hours: 24L

This course provides an examination of the historical and cultural context in which the Dead Sea Scrolls were authored and copied, the types of writings included in the Scrolls, and the ancient Jewish groups behind these texts. It also discusses the significance of the Scrolls for understanding the textual development of the Hebrew Bible, ancient scriptural interpretation, and the thought world of the Jews during the period that gave birth to both Rabbinic Judaism and early Christianity. No knowledge of Hebrew or Aramaic is required. (Offered alternate years)

Prerequisite: 9 FCEs
Recommended Preparation: NMC104H1 or NMC252H1, or equivalent in another humanities department
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

NMC352H1 - Ancient Egyptian Literature

Hours: 24L

Focuses on analysis of examples of the different genres of ancient Egyptian literary texts, including wisdom literature, poetry, literary narratives, and mythical tales. We question how to define literature and discuss how literary texts developed in pharaonic Egypt. No knowledge of ancient Egyptian is required; all texts read in translation.

Prerequisite: Any H course (0.5 FCE) on ancient Egypt offered by academic units within the Faculty of Arts & Science
Recommended Preparation: NMC101H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

NMC353H1 - Possible Worlds: Arabic Speculative Fiction

Hours: 24S

Arabic speculative fiction from the medieval to the modern period, discussed with attention to early Arabic novel’s adaptation of the medieval maqama genre, and the relation between speculative fiction and political and social critique. Texts include al-Ma‘arri, Ibn Shuhayd, maqamat, al-Muwaylihi, science fiction, and dystopic novels and conceptual art.

Prerequisite: 4 FCE in Humanities
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

NMC355H1 - The Ottoman Empire in the Age of Reform, 1808-1918

Hours: 24L

The last phase of the Ottoman empire has long been viewed by Orientalists and Middle East nationalists as a period of inevitable decline. More recently, cultural historians of the Middle East have framed the long 19th. century as a period of grand reforms - or Tanzimat. This course seeks to critically examine the notions of reform of the state and reform of the individual between Sultan Mahmud IIs accession and the defeat of the Ottoman empire in World War I. Focusing largely on Istanbul and the Ottoman capitals political relations with the Arab provinces, we will relate economic, social and intellectual transformations to state laws and policies, Mediterranean capitalism and the rise of sectarianism and nationalism in the Middle East.

Recommended Preparation: NMC278H1, NMC377Y1, NMC378H1
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

NMC356H1 - Anthropology of Islam

Hours: 24L

Combines theoretical reflections on an anthropology of Islam with ethnographic readings on Muslim practices in communities around the world.

Exclusion: RLG355H1
Recommended Preparation: NMC241H1
Distribution Requirements: Humanities, Social Science
Breadth Requirements: Society and its Institutions (3)

NMC357H1 - Gender and Sexuality in Premodern Arabic Literature

Hours: 24S

Students read translations of Arabic literary texts: texts composed by women, and texts that deal with gender, homoeroticism, and sexuality. Class discussion considers debates in the field about how to analyze these texts in their historic context and in a theoretically grounded manner.

Prerequisite: 3 FCE in Humanities.
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)
NMC358H1 - Gender and Sexuality in Modern Middle Eastern Cultures

Hours: 24L

Examines questions of gender and sexuality in the broader Middle East (Iran, Turkey, and the Arab world) from the colonial period to the present through readings of religious, cultural, historical, and literary texts. Focuses on the development of modern secular and religious feminist thought, cultural representations of gender and sexuality, and critical approaches to theorizing gender and sexuality in the Middle East.

Prerequisite: 3 FCEs in Humanities
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

NMC359H1 - Nomads in the Ancient Near East

Hours: 24L

Using ancient archaeological and textual sources as well as modern ethnographies and political theories, this class takes a critical look at the role of mobile populations in Near Eastern history from the fourth to first millennium BCE, assessing modern perspectives as well as the ancient evidence.

Prerequisite: None
Corequisite: None
Exclusion: None
Recommended Preparation: NMC102H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

NMC360H1 - The Archaeology of the Biblical World I: The Bronze Age

Hours: 24L

The archaeology of Syria-Palestine from prehistoric times until the end of the Late Bronze Age (ca. 1200 BCE), with a special emphasis on the development of complex society, and inter-relations with the neighboring regions of Egypt and Syro-Mesopotamia. Attention will also be given to the history of archaeological research in the region, current field techniques and methods of archaeological analysis, and the relationship between archaeological evidence and contemporary written records, including the Hebrew Bible. (Offered in alternate years)

Prerequisite: 1 FCE in Humanities
Recommended Preparation: NMC102H1 or NMC104H1 or NMC260H1 or NMC262H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

NMC361H1 - The Archaeology of the Biblical World II: The Iron Age

Hours: 24L

The archaeology of Syria-Palestine from the collapse of the Late Bronze Age until the Persian Period, with a special emphasis on the emergence of Israel and the small territorial nation-states of the eastern Mediterranean seaboard. Particular attention will be given to the relationship between the archaeological evidence and contemporary written records, including the Hebrew Bible. (Offered in alternate years)

Prerequisite: 1 FCE in Humanities
Recommended Preparation: NMC102H1 or NMC104H1 or NMC260H1 or NMC262H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

NMC362Y1 - Ancient Egyptian Sites

Hours: 48L

Detailed examination of significant sites for the understanding of ancient Egyptian cultural development, encompassing the study of spatial organization, architecture, artifactual material, and archaeological evidence from each site. (Offered in alternate years)

Prerequisite: NMC343H1 and NMC344H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1); Society and its Institutions (3)

NMC363H1 - Ancient Iraq

Hours: 36L

Comprehensive survey class on the archaeology of Mesopotamia (Sumer, Assyria, Babylon) from the Neolithic period to time of Alexander the Great (10,000 – 333 BC). Focuses on the area of modern-day Iraq but also includes western Iran, eastern Syria, and southeastern Turkey.

Prerequisite: NMC102H1
Recommended Preparation: NMC260H1, NMC262H1
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

NMC377Y1 - The Ottoman Empire to 1800

Hours: 48L

A survey of the Ottoman Empire from its late 13th/early 14th century origins as a border principality through the classical age of Mehmed the Conqueror and Süleyman the Magnificent when as a mature Islamic empire it ruled lands in Europe, Asia, and Africa, to the internal and external challenges faced by the empire during the 17th and 18th centuries when it underwent substantial transformation. Coverage includes topics in Ottoman institutions, economy, society, and culture. (Offered in alternate years)

Prerequisite: NMC273Y1
Exclusion: NMC377H1
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

NMC381H1 - Modern Islamic Thought

Hours: 24L

Survey of major intellectual trends in the Islamic tradition, particularly those identified with Middle Eastern Muslim thinkers, from the early 19th century to the present. Topics include reformism, modernism, hermeneutics, feminism, Islamism, and liberal and progressive trends in contemporary Muslim thought. Readings in English translation.

Prerequisite: NMC103H1
Recommended Preparation: NMC278H1, NMC283Y1, RLG204Y1/RLG204H1
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

NMC378H1 - Modern Arab History

Hours: 36L

A thematic treatment of the Arab lands of the Middle East and North Africa from 1700 onward, focusing on the Ottoman and colonial periods.

Prerequisite: NMC278H1 and permission of instructor
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

NMC382Y1 - Mummies, Myth and Magic: The Religion of Ancient Egypt

Hours: 72L

Religious belief and practice in ancient Egypt. The course will focus on gods and mythology, which will be studied through primary sources in translation. (Offered in alternate years)

Prerequisite: NMC101H1
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

NMC380H1 - Religion in the Ancient Near East

Hours: 48S

Primary sources from Mesopotamia, Syria and the Levant reveal profound awareness of the human condition. What do they tell us about religion in the ancient Near East, and why do Judaism, Christianity and Islam share some stories? Takes a critical approach to the ways we read texts and reconstruct beliefs.

Prerequisite: 3 FCE in any field
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

NMC384H1 - Life Cycle and Personal Status in Judaism

Hours: 24L

The course explores Jewish attitudes to various personal status issues, utilizing material from biblical and rabbinic sources to modern Jewish positions. The specific topics covered vary from year to year.

Recommended Preparation: NMC104H1
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

NMC447H1 - The Neo-Assyrian Empire

Hours: 24L

Investigates how one of the world’s first empires worked. Topics include Assyrian kingship, imperial administration, and daily life as reflected in the written sources (royal inscriptions, official correspondence, and everyday documents) and archaeological evidence.

Prerequisite: 9 FCE in any field
Recommended Preparation: NMC102H1, NMC346H1/NMC347H1
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

NMC452H1 - Iranian Modernity

Hours: 36S

This course explores competing conceptions of Iranian modernity within a comparative historical framework on “multiple modernities.” A major theme is the exploration of the temporality and historicity in discussions of Iranian modernity.

Prerequisite: Permission of instructor
Corequisite: None
Exclusion: None
Recommended Preparation: None
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

NMC449H1 - Mesopotamian Society and Economy

Hours: 24L

Examines Mesopotamian society and economy from third to first millennium BC, using everyday cuneiform documents in translation. Focuses on the key institutions (palace, temple, private household), tracing their changing organisation and economic role over the course of Mesopotamian history. Examines theoretical approaches to the study of ancient society and economy.

Prerequisite: 9 FCE in any field
Recommended Preparation: NMC102H1, NMC346H1/NMC347H1
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

NMC450H1 - Research Seminar on Ancient Jewish Literature

Hours: 24S

A seminar focusing on the critical analysis of the Hebrew Bible and related ancient Jewish texts. Literary genre and critical topics will vary according to instructor’s research interests. Focus will be given to developing research skills by working with accepted critical methodologies. Not eligible for CR/NCR option. (Offered every 3 years)

Prerequisite: Permission of the instructor is required.
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

NMC461H1 - The History and Archaeology of the Horn of Africa and South Arabia

Previous Course Number: NMC461Y1
Hours: 24S

The cultures of the Horn of Africa and South West Arabia, separated by the Red Sea, have long been intertwined. This course explores the history and archaeology from the emergence of the hominids in Ethiopia, to the rise of the Sabean and Axumite kingdoms, until the Middle Ages, highlighting their interactions and the roles they played in the development of their respected cultures.

Prerequisite: NMC260H1 or NMC262H1
Exclusion: NMC461Y1
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

NMC462H1 - Polarized-light Microscopy in Archaeology I: Foundations

Hours: 24L/24P

Provides students with training in the use of polarized-light microscopy in the examination of archaeological materials, particularly pottery (ceramic petrology). Students will apply the knowledge they gain from lectures to hands-on work with materials in the lab, covering instruction in crystallography, optics, mineralogy, lithology, and other aspects of the petrology of ceramics and other materials. Labs comprise eight three-hour sessions during the term, working with the polarized-light microscope to examine and analyze thin-sections. No prior knowledge of geology is required.

Prerequisite: NMC264H1 or permission of the instructor.
Exclusion: NMC462Y1
Distribution Requirements: Social Science
Breadth Requirements: The Physical and Mathematical Universes (5)
NMC463H1 - Warfare: the Archaeology of Conflict in the Ancient Near East

Hours: 36S

A seminar on warfare in the ancient Near East (10,000 – 333 BC) using archaeological data and historical sources. Topic to be covered include origins of conflict, armies and weapons, siege techniques, urban combat, and of war.

Prerequisite: NMC260Y
Recommended Preparation: NMC102H, NMC363H
Breadth Requirements: Humanities
Distribution Requirements: Society and its Institutions (3)

NMC464H1 - The Archaeology of Stuff at the ROM

Previous Course Number: NMC369Y1
Hours: 36P

Hands-on analysis of actual materials from the Middle and Near East, including Egypt, Iraq, Iran, Syria, and Turkey. Students learn the techniques by which archaeologists understand objects from the past: what they are made of, how they were made, and what they reveal about the people who made them.

Prerequisite: NMC264H1
Exclusion: NMC369Y1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

NMC465H1 - Ceramic Analysis

Hours: 6P/24S

A survey of methods of classification and analysis (form, fabric and style) involved in the study of archaeological ceramics, and the use of ceramics to infer patterns of production, distribution, and social organization; linking research questions with appropriate analytical techniques.

Prerequisite: 9 FCEs in any field
Distribution Requirements: Social Science
Breadth Requirements: Creative and Cultural Representations (1)

NMC466H1 - Near Eastern Ceramics

Hours: 6P/24S

An introduction to the basic corpus of Near Eastern ceramics, from the invention of pottery production in the Neolithic until the Persian period, utilizing existing collections at the University and in the Royal Ontario Museum.

Prerequisite: 9 FCEs in any field
Recommended Preparation: ARH312Y1 or NMC264H1 or NMC360H1 or NMC361H1 or NMC464H1 or NMC465H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

NMC467H1 - Seminar in Egyptian Archaeology I

Hours: 24S

Seminar focuses on the social and cultural development of Egypt from the Predynastic Period through the Middle Kingdom, engaging with major theories regarding social complexity, state formation, urbanism, social organization, and regionalism. An independent research project and hands-on experience with artifacts at the ROM are important features of the course. (Offered every 3 years.)

Prerequisite: NMC101H1 or NMC343H1 or permission of instructor
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

NMC468H1 - Seminar in Egyptian Archaeology II

Hours: 24S

Seminar focuses on the social and cultural development of Egypt from the Middle Kingdom through the Ptolemaic Period, engaging with major theories regarding urbanism, ethnicity, core-periphery relationships, cultural interaction, and social organization. An independent research project and hands-on experience with artifacts at the ROM are important features of the course. (Offered every 3 years.)

Prerequisite: NMC101H1 or NMC344H1 or permission of instructor
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)
NMC469Y1 - Mediaeval Middle Eastern Ceramics

Hours: 72S

An introduction to the ceramics of the Middle or Near East from the time of Alexander until recent times. A particular emphasis will be the elite glazed wares of the mediaeval and Islamic periods. Apart from providing a history of the production of ceramics and their social and archaeological context, this course is intended to train archaeologists and art-historians in the fundamental field recognition and identification of the various types and their production origins, and the course will rely heavily on the collections of the ROM.

Prerequisite: NMC260H1, NMC262H1, and at least one other half-credit 300- or 400-level course in archaeological materials

Distribution Requirements: Humanities

Breadth Requirements: Creative and Cultural Representations (1); Society and its Institutions (3)

NMC470H1 - Polarized-light Microscopy in Archaeology II: Applications

Previous Course Number: NMC462Y1

Hours: 24L/24P

Explores further applications of polarized-light microscopy in the examination of archaeological materials, particularly pottery (ceramic petrology). The focus is on seminal case-studies of materials from around the world, and in particular on material from the Middle East, Central America, and East Asia that UofT researchers have studied, ranging in date from Neolithic to modern. Labs comprise eight three-hour sessions during the term, working with the polarized-light microscope to examine and analyze thin-sections. No prior knowledge of geology is required.

Prerequisite: NMC462H1

Exclusion: NMC462Y1

Distribution Requirements: Social Science

Breadth Requirements: The Physical and Mathematical Universes (5)

NMC471H1 - Advanced Topics in Near and Middle Eastern Civilizations

Hours: 24S

An advanced seminar organized around readings on a topic selected by the instructor.

Distribution Requirements: Humanities

Breadth Requirements: Society and its Institutions (3)

NMC472H1 - Theory & Method in Middle East Studies

Hours: 24S

Examines current theoretical and methodological trends in the study of the Near/Middle East. A seminar course, it consists of presentations, discussions, lectures, guest speakers, and documentaries. No previous knowledge of methodology required. Special attention will be paid to the politics, culture, political economy, gender, and ethics of various research practices. Intended for 4th year students only.

Prerequisite: Permission of the instructor

Distribution Requirements: Humanities

Breadth Requirements: Society and its Institutions (3)

NMC473H1 - Intellectuals of the Modern Arab World

Hours: 24S

The course is designed to re-examine the role of intellectuals in the Arab world and political events that shaped their thinking. It introduces the life and thought of some leading thinkers of the Arab world and relates their thought to the lived experience of political, social, economic and cultural change in the Middle East. Intended for upper year students.

Prerequisite: 1 FCE from NMC278H1, NMC377Y1, NMC378H1

Recommended Preparation: Fluency in reading Arabic

Distribution Requirements: Humanities

Breadth Requirements: Society and its Institutions (3)

NMC474H1 - The Archaeology of Death

Hours: 36S

This is an intensive education in the archaeology of death. Working as a study group, the participants in this class will examine in detail the primary archaeological data for mortuary practices in the third millennium in the Big Bend region of the Euphrates River.

Prerequisite: ANT200Y1 or NMC260H1 or NMC262H1

Recommended Preparation: ANT334H1

Distribution Requirements: Humanities

Breadth Requirements: Creative and Cultural Representations (1)
NMC475H1 - Orientalism & Occidentalism

Hours: 24S

This course probes the contemporaneous formation of modern Oriental Studies in Europe and the emergence of discourses on Europe (Ifranj/Farang) in the Middle East from the eighteenth century to the present. Special emphasis will be devoted to encounters between scholars in Western Europe, Iran, India, and the Ottoman Empire. This seminar-style course explains that Orientals gazed and returned the gaze, and in the process of cultural looking, they, like their Occidental counterparts, exoticized and eroticized the Farangi-Other. In the interplay of looks between Orientals and Occidentals, there was no steady position of spectatorship, no objective observer, and no aperspectival position. Intended for upper year students.

Prerequisite: Permission of the instructor.
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

NMC476H1 - Politics of Archaeology in the Modern Middle East

Hours: 24S

This course examines the role nineteenth and twentieth-century archaeology played in Middle Eastern politics, the culture of colonialism and in nationalist struggles. The course will first familiarize the students with the diplomatic and intellectual context of the formation of archaeology as a field of study in Europe and analyse the role archaeology played in the production of knowledge about the Middle East. Next, the course will examine the archaeological practices on the ground (and underground) and inquire what happens in the contact zone between foreign and local archaeologists. Finally, we will trace the ways in which emergent nationalist discourse challenge, appropriate and imitate the historical narratives of Western archaeology.

Prerequisite: Permission of instructor is required.
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

NMC477H1 - Modern Turkey

Hours: 24L

This seminar examines the history and politics of Turkey since 1923. It explores issues such as the Ottoman roots of Turkey’s early leadership, the establishment of the republic, Ataturk’s reforms and legacy, internal political and social transformations, and the country’s changing geopolitical role. The course also explores some aspects of Turkish literature and culture. No knowledge of Turkish is required.

Prerequisite: NMC278H1
Recommended Preparation: NMC274Y1
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

NMC478H1 - Modern Arab Societies

Hours: 24S

A seminar built around thematic readings of social and economic history of the modern Arab world. Offered every other year.

Prerequisite: NMC378H1 and permission of instructor
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

NMC479H1 - Nationalism in the Arab World

Hours: 24S

A seminar that critically examines the types and varieties of national expression in Arab societies of the Middle East and North Africa, through a reading of common texts and students’ individual research projects. (Offered in alternate years)

Prerequisite: NMC378H1 and permission of instructor
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

NMC480H1 - Structural Development of the Iranian Languages

Previous Course Number: NML463H1
Hours: 24S

This interdisciplinary course focuses on chronological development of Persian language from Old Persian (551 BC) to Modern Persian (7th century) with the emphasis on the word formation and grammar. This course also examines the role of language in maintaining cultural identity and civilization through structural analysis of Iranian languages including Farsi, Dari, Tajiki, Baluchi, Kurdish and Pashtu.

Prerequisite: NML360Y1 or 1 FCE in Linguistics or permission of instructor
Exclusion: NML463H1
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)
NMC484H1 - Gender-related Topics in Jewish Law and Religion

Hours: 36L

Abortion, rape, family violence, age-related issues, and similar topics from the perspective of historical and legal development, scientific theory, socio-ethical attitudes and anthropological comparison in the Bible and other ancient Near Eastern sources, through Jewish legal texts to modern responses.

Prerequisite: Permission of instructor
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

NMC491H1 - Mesopotamian Material Culture: Art and Artifacts

Hours: 24S

This course focuses on a comprehensive introduction and discussion of Mesopotamian artwork from the Neolithic to the Iron Age periods (ca. 6000 - 300 BCE). Following an introduction of major artifact classes (including sculpture, relief, and glyptics [seals and sealings]), students will learn to describe and catalogue works of Mesopotamian art, allowing them to critically use and evaluate primary and secondary publications. Systematic descriptions and labels for key characteristics such as the object materials, size, iconography, genre, style, and theme will be established to show how meaningful artifact typologies can be constructed. The potential as well as limitations of art-historical approaches for archaeological work, especially for the chronology and interpretation of archeological contexts, will be discussed and examined on selected cases. Several classes will be taught at the Royal Ontario Museum to demonstrate the handling and physical analysis of artifacts.

Prerequisite: Permission of the instructor
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

Research Courses

Research Excursions

NMC398Y0

Distribution Requirements: Humanities

Research Opportunity Program

NMC399Y1

Credit course for supervised participation in faculty research project. Details at https://www.artsci.utoronto.ca/current/academics/research-opportunities/research-opportunities-program. Not eligible for CR/NCR option.

Distribution Requirements: Humanities

Independent Studies

NMC495Y1

Open only when an NMC full-time faculty member is willing and available to supervise. Student must find an appropriate NMC supervisor for the desired topic and obtain the approval of the departmental Associate Chair/Undergraduate Coordinator. Obtain details and a course form from the Department Undergraduate Administrator. Not eligible for CR/NCR option.

Prerequisite: Permission of Department
Distribution Requirements: Humanities

NMC496H1

Open only when an NMC full-time faculty member is willing and available to supervise. Student must find an appropriate NMC supervisor for the desired topic and obtain the approval of the departmental Associate Chair/Undergraduate Coordinator. Obtain details and a course form from the Department Undergraduate Administrator. Not eligible for CR/NCR option. Not eligible for CR/NCR option.

Prerequisite: Permission of Department
Distribution Requirements: Humanities
NMC497H1 - Independent Studies

Open only when an NMC full-time faculty member is willing and available to supervise. Student must find an appropriate NMC supervisor for the desired topic and obtain the approval of the departmental Associate Chair/Undergraduate Coordinator. Obtain details and a course form from the Department Undergraduate Administrator. Not eligible for CR/NCR option.

Prerequisite: Permission of Department
Distribution Requirements: Humanities

NMC499Y1 - Senior Thesis

A 40-60 page (15,000-20,000 word) research paper (100% of the final mark) written under the supervision of a full-time NMC faculty member. Not eligible for CR/NCR option.

Prerequisite: 4th year status in NMC Specialist program; supervisor’s approval; departmental approval.
Exclusion: NMC495Y1/NMC496H1/NMC497H1 may not be taken in the same session
Distribution Requirements: Humanities

Language Courses

NML110Y1 - Elementary Standard Arabic

Hours: 96L/24P

This course is designed for students with no prior knowledge of Arabic. It places equal emphasis on the development of all language skills: reading, writing, listening, and speaking. The learning philosophy underlying this approach is that proficiency in a foreign language is best achieved through consistent, deliberate, and systematic practice. From the outset, students are strongly encouraged to develop the habit of consistently practicing learned material.

Prerequisite: Priority enrollment will be given to declared NMC majors/specialists.
Exclusion: Native speakers/NML210Y1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

NML156H1 - Elementary Modern Hebrew II

Hours: 48L

See MHB156H1 in Religion.

NML210Y1 - Intermediate Standard Arabic I

Previous Course Number: NML211Y1
Hours: 96L/24P

This course assumes active knowledge of the content covered in NML110Y. It places equal emphasis on the development of all language skills. As the course progresses, students are introduced to the fundamentals of Arabic morphology and syntax. This is achieved through analysis of texts covering a wide range of topics. By the end of the course, students are expected to achieve upper intermediate level of proficiency.

Prerequisite: NML110Y1 or permission of the instructor.
Exclusion: Native speaker. Priority enrollment will be given to declared NMC majors/specialists.
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

NML220Y1 - Introductory Aramaic

Hours: 72S

Introduction to Aramaic grammar. Readings from biblical Aramaic. (Offered in alternate years)

Prerequisite: NML250Y1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

NML230H1 - Elementary Coptic I

Hours: 48S

Introduces the student to the last stage of the Egyptian language, written mostly in Greek characters. The course will first concentrate on the grammar of the language and go on to read short texts.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

NML155H1 - Elementary Modern Hebrew I

Hours: 48L

See MHB155H1 in Religion.
NML231H1 - Elementary Coptic II

Hours: 48S

A continuation of NML230H1.

Distribution Requirements: Humanities  
Breadth Requirements: Creative and Cultural Representations (1)

NML240Y1 - Introduction to Middle Egyptian

Hours: 72L

Grammar and reading of selected hieroglyphic texts.

Distribution Requirements: Humanities  
Breadth Requirements: Creative and Cultural Representations (1)

NML250Y1 - Introductory Biblical Hebrew

Hours: 72S

An introduction to biblical Hebrew prose. Grammar and selected texts. For students with no previous knowledge of Hebrew.

Exclusion: Those who have completed Grade 8 Hebrew (or Grade 6 in Israel)  
Distribution Requirements: Humanities  
Breadth Requirements: Creative and Cultural Representations (1)

NML255H1 - Intermediate Modern Hebrew I

Hours: 48L

See MHB255H1 in Religion.  
Prerequisite: MHB156H1/NML156H1

Exclusion: Those who have completed Grade 8 Hebrew (or Ulpan level 2 in Israel), MHB255H1  
Distribution Requirements: Humanities  
Breadth Requirements: Creative and Cultural Representations (1)

NML256H1 - Intermediate Modern Hebrew II

Hours: 48L

See MHB256H1 in Religion.  
Prerequisite: NML255H1/MHB255H1

Exclusion: Those who have completed Grade 8 Hebrew (or Ulpan level 2 in Israel), MHB256H1  
Distribution Requirements: Humanities  
Breadth Requirements: Creative and Cultural Representations (1)

NML260Y1 - Introductory Persian

Hours: 96L

The fundamentals of modern standard Persian grammar, with emphasis on attaining fluency in reading and writing simple texts. Also serves as a basis for classical Persian. (Offered in alternate years)

Exclusion: Native users. Priority enrollment will be given to declared NMC majors/specialists  
Distribution Requirements: Humanities  
Breadth Requirements: Creative and Cultural Representations (1)

NML262Y1 - Old Persian

Hours: 36L

This course will survey the language, epigraphy, and political theology of the imperial inscriptions of the Persian Empire (550-330 BCE). By the end of the year students will have acquired a strong understanding of the cuneiform script, grammar, and syntax and be able to comfortably read the entire inscriptional corpus.

Recommended Preparation: NML260Y1  
Distribution Requirements: Humanities  
Breadth Requirements: Creative and Cultural Representations (1); Society and its Institutions (3)

NML270Y1 - Introductory Turkish

Hours: 96L

This course covers the essentials of Turkish grammar, and introduces students to reading and translation of passages of elementary difficulty. Designed for students with no previous knowledge of Turkish. This course also serves as a basis for the study of Ottoman Turkish and other Turkic languages.

Exclusion: Native speakers  
Distribution Requirements: Humanities  
Breadth Requirements: Creative and Cultural Representations (1)
NML305Y1 - Introductory Akkadian

Hours: 48S

Introduction to Old Babylonian. Grammar and the reading of selected texts. (Offered in alternate years)

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

NML310Y1 - Intermediate Standard Arabic II

Hours: 96L/24P

This course assumes active knowledge of the content covered in NML210Y. As the course progresses, students are introduced to increasingly complex morphological and syntactic patterns of Arabic. This is achieved through analysis of texts covering a wide range of genres. By the end of the course, students are expected to achieve advanced level of proficiency.

Prerequisite: NML210Y1 or permission of the instructor.
Exclusion: Native speakers. Priority enrollment will be given to declared NMC majors/specialists.
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

NML320H1 - Aramaic Bible Translations

Hours: 24S

An intensive study of various Targumim to the Pentateuch: Onkelos, Pseudo-Jonathan, Neophyti, Samaritan and Fragment Targumim. Differences among them in vocabulary, syntax and verb usage are discussed, as well as their relationship to the Palestinian midrashim. (Offered in alternate years)

Prerequisite: NML220Y1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

NML340Y1 - Intermediate Egyptian

Hours: 72S

Middle Egyptian texts.

Prerequisite: NML240Y1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

NML350H1 - Intermediate Biblical Hebrew I

Hours: 24S

A continuation of the study of ancient Hebrew grammar and texts. Focus is given to covering a wide variety of genres, e.g., narrative, chronicle, genealogy, oracle, prayer, hymn, and proverb.

Prerequisite: NML250Y1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

NML351H1 - Intermediate Biblical Hebrew II

Hours: 24S

A continuation of the study of ancient Hebrew grammar and texts. Focus is given to covering a wide variety of genres, e.g., narrative, chronicle, genealogy, oracle, prayer, hymn, and proverb.

Prerequisite: NML350H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

NML355H1 - Advanced Modern Hebrew I

Hours: 48S

See MHB355H1 in Religion.

Prerequisite: MHB256H1/NML256H1
Exclusion: OAC Hebrew, MHB355H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

NML356H1 - Advanced Modern Hebrew II

Hours: 48S

See MHB356H1 in Religion.

Prerequisite: NMLNML355H1/MHB355H1
Exclusion: OAC Hebrew, MHB356H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)
NML357H1 - Legends of the Jews (Aggadah)

**Hours:** 24S

An introduction to the exegetical methods of the rabbis in their analysis of biblical texts, with special attention to issues of intertextuality. The textual and thematic topic will vary by year.

**Prerequisite:** Intermediate Hebrew (Modern or Biblical)

**Distribution Requirements:** Humanities

**Breadth Requirements:** Creative and Cultural Representations (1)

NML358H1 - Middle Hebrew: Mishnah and Tosefta

**Hours:** 24S

Introduction to Mishnah and Tosefta, two of the three foundational documents of Middle Hebrew. In addition to studying specific features of this level of Hebrew, examining these compositions independently, and analyzing their interaction, students will examine current scholarly literature on these documents and their relationship to each other. (Offered in alternate years)

**Prerequisite:** Intermediate Hebrew (Modern or Biblical)

**Distribution Requirements:** Humanities

**Breadth Requirements:** Creative and Cultural Representations (1)

NML359Y1 - Babylonian Talmud

**Hours:** 48S

Selections from a tractate in Babylonian Talmud in order to gain facility in the understanding of the dialogic structure of the legal discussions. Practice in the use of classical commentaries and critical aids to allow independent study of the text.

**Prerequisite:** Intermediate Hebrew (Modern or Biblical)

**Distribution Requirements:** Humanities

**Breadth Requirements:** Creative and Cultural Representations (1)

NML360Y1 - Intermediate Persian

**Hours:** 144L

This course involves reading, grammatical analysis, and translation of representative samples of contemporary Persian prose of intermediate difficulty. The reading materials are selected from a wide range of sources in order to ensure balanced, yet comprehensive exposure to the different usage of the language. The course serves as preparation for courses on both classical and contemporary Persian literature.

**Exclusion:** Native users. Priority enrollment will be given to declared NMC majors/specialists

**Recommended Preparation:** NML260Y1 and/or adequate knowledge of modern Persian

**Distribution Requirements:** Humanities

**Breadth Requirements:** Creative and Cultural Representations (1)

NML362Y1 - Middle Persian (Pahlavi)

**Hours:** 48L

This course will survey the grammar and religious concepts found within the Book Pahlavi or Zoroastrian Middle Persian corpus from late antique and early Islamic Iran. By the end of the year students will have acquired a strong understanding of the script, grammar, and syntax of the Pahlavi corpus. Some knowledge of Persian is an advantage.

**Prerequisite:** None

**Corequisite:** None

**Exclusion:** None

**Recommended Preparation:** NML260Y1 or NML262Y1

**Distribution Requirements:** Humanities

**Breadth Requirements:** Creative and Cultural Representations (1)

NML370Y1 - Intermediate Turkish

**Hours:** 96L

This course involves reading, grammatical analysis and translation of modern Turkish texts of intermediate difficulty. The reading materials are selected from a wide range of literary genres. Included is a basic review of grammar as well as more advanced grammatical topics. Course serves as preparation for advanced study of Turkish as well as study of Ottoman Turkish language and literature.

**Prerequisite:** NML270Y1 or permission of instructor.

**Distribution Requirements:** Humanities

**Breadth Requirements:** Creative and Cultural Representations (1)
Introduction to Ge'ez (Classical Ethiopic)

**NML380H1**

*Hours: 36L*

This course covers the essentials of Ge'ez (Classical Ethiopic) grammar, and introduces students to Ge'ez texts of elementary to intermediate difficulty. Designed for students with no previous knowledge of Ge'ez.

**Prerequisite:** NML110Y1/NML220Y1/NML250Y1  
**Distribution Requirements:** Humanities  
**Breadth Requirements:** Creative and Cultural Representations (1)

Intermediate Ge'ez

**NML381H1**

*Hours: 36L*

This course continues the study of Ge'ez (Classical Ethiopic) grammar and progresses to a survey of classical Ge'ez literature. Linguistic connections to Amharic and Tigrinya will also be introduced.

**Prerequisite:** NML380H1 or permission of instructor  
**Distribution Requirements:** Humanities  
**Breadth Requirements:** Creative and Cultural Representations (1)

Intermediate Akkadian

**NML405Y1**

*Hours: 48S*  
*(Offered in alternate years)*

**Prerequisite:** NML305Y1  
**Distribution Requirements:** Humanities  
**Breadth Requirements:** Creative and Cultural Representations (1)

Advanced Standard Arabic

**NML410Y1**

*Hours: 96S*

This course assumes active knowledge of the content covered in NML310Y. Its goal is to strengthen the students reading and writing skills, refine their knowledge of syntax and morphological patterns, and enrich their cultural background. This is achieved through analysis of sophisticated authentic texts covering a wide range of genres. In addition, Classical Arabic literary texts will be incrementally introduced. By the end of the course, students are expected to reach a superior level of proficiency.

**Prerequisite:** NML310Y1 or permission of instructor.  
**Exclusion:** Native speakers of Arabic must obtain permission of instructor.  
**Distribution Requirements:** Humanities  
**Breadth Requirements:** Creative and Cultural Representations (1)

Media Arabic

**NML411H1**

*Hours: 24S*

This course familiarizes advanced students of Arabic with structural properties, styles, and discourse features of the language used in the Arabic media. Class time is devoted to analysis of authentic texts covering a wide range of topics and drawn from various online media outlets.

**Prerequisite:** NML310Y1 or adequate reading knowledge of Arabic.  
**Exclusion:** Native speakers of Arabic must obtain permission of instructor.  
**Distribution Requirements:** Humanities  
**Breadth Requirements:** Creative and Cultural Representations (1)

Adab and Arabic Literary Prose

**NML412H1**

*Hours: 24L*

Students read original Arabic texts representing a rich variety of premodern prose genres. Critical review of scholarly approaches to adab, defined as the historic practice of teaching composition, and the canons used in that pedagogy. Texts include: Kalila wa-Dimna, travel narratives, 1001 Nights, and al-Jahiz.

**Prerequisite:** NML310Y1 (third-year Arabic) or permission of the instructor. Heritage speakers are encouraged to take this class, and should seek permission of the instructor.  
**Distribution Requirements:** Humanities  
**Breadth Requirements:** Creative and Cultural Representations (1)

Premodern Arabic Poetry

**NML413H1**

*Hours: 24L*

Every week we read a poem by a new poet, focusing on the most famous and frequently quoted poems of the pre-modern Arabic literary tradition. Students learn how to identify meters and recognize the rhetorical tropes described by Arabic rhetoric. Poets include: Labid, Abū Nuwās, Abū Tammām, and al-Mutanabbī.

**Prerequisite:** NML310Y1 (third-year Arabic) or permission of the instructor. Heritage speakers are encouraged to take this class, and should seek permission of the instructor.  
**Distribution Requirements:** Humanities  
**Breadth Requirements:** Creative and Cultural Representations (1)
NML415H1 - The Arabic Short Story

Hours: 24S

Examines the modern Arabic short story as a literary genre by reading selected works of major figures in the genre, including Yusif Idris, Zakariyya Tamir, Tawfiq al-Hakim, Alifa Rifaat, Ghada al-Samman, and Fu’ad al-Taklarli. Readings focus on the development and evolution of language, style, and form.

Prerequisite: NML310Y1 (third-year Arabic) or permission of the instructor.
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

NML420Y1 - Jerusalem Talmud

Hours: 48S

The Talmud of the Land of Israel, also called Talmud Yerushalmi or Palestinian Talmud, is written in a mixture of Jewish Western Aramaic and Mishnaic Hebrew. It is the principal document of the Land of Israel in Late Antiquity. The course examines the legal argumentation, terminology and language which differ from those of the Babylonian Talmud. (Offered in alternate years)

Prerequisite: Permission of instructor
Recommended Preparation: NML220Y1/NML320H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1); Thought, Belief and Behaviour (2)

NML421Y1 - Classical Syriac

Hours: 48S

This course is primarily a reading course in Syriac literature with reference to specific points in grammar and syntax as contrasted with Aramaic. The texts are read with reference to the history of Syriac literature. (Offered in alternate years)

Prerequisite: NML220Y1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

NML440H1 - Ancient Egyptian Historical Texts

Hours: 48S

Texts of significance for the reconstruction and understanding of Egyptian history will be read in the original, and analyzed for content, style, and grammar. The social and archaeological context of these texts will also receive attention.

Prerequisite: NML340Y1 or permission of instructor
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

NML441H1 - Ancient Egyptian Religious and Funerary Texts

Hours: 48S

Readings, analysis, and comparisons of selections from the Pyramid Texts, the Coffin Texts, and the New Kingdom mortuary literature; study of cultic, magical, and mythological texts relating to funerary and cultic beliefs and practices. All texts to be read in the original.

Prerequisite: NML340Y1 or permission of instructor
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

NML450H1 - Advanced Biblical Hebrew

Hours: 24S

Continuation of the study of Biblical Hebrew language. Combination of reading more advanced texts and Hebrew composition exercises. Introduction to the standard reference works for advanced study of the phonology, morphology, syntax, and semantics of Biblical Hebrew.

Prerequisite: NML350H1 or NML351H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

NML452H1 - Halakhic Midrashim

Hours: 24S

This course familiarizes students with the methodology and terminology of the two midrashic systems: Devei R. Akiba and Devei R. Ishmael. Sections of all the midrashic halakha (Mekhillot, Sifra and Sifre) are studied and compared to other Tannaitic materials.

Prerequisite: Intermediate Hebrew (Modern or Biblical)
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)
NML455H1 - Modern Hebrew Poetry

Hours: 36S

A study of the poetic works of a major modern Hebrew poet. (Conducted in Hebrew) (Offered in alternate years)

**Prerequisite:** Permission of instructor
**Distribution Requirements:** Humanities
**Breadth Requirements:** Creative and Cultural Representations (1)

NML456H1 - Modern Hebrew Prose

Hours: 36S

A study of an important modern writer of Hebrew fiction. (Conducted in Hebrew) (Offered in alternate years)

**Prerequisite:** Permission of instructor
**Distribution Requirements:** Humanities
**Breadth Requirements:** Creative and Cultural Representations (1)

NML459H1 - Readings in Second Temple Period Texts

Hours: 24S

This course provides an advanced investigation of selected issues in ancient Jewish texts stemming from the Second Temple Period (5th cent. BCE 1st cent. CE), and includes comparative study of biblical writings, apocrypha and pseudepigrapha, the Dead Sea Scrolls, and writings of ancient Jewish historians and philosophers. The specific topic for the course varies from one semester to another. The course has a strong research and writing component.

**Prerequisite:** NML350H1 or NML351H1. Depending on the specific topic of the semester, knowledge of Greek or Aramaic may be recommended.
**Recommended Preparation:** NMC252H1, NMC351H1
**Distribution Requirements:** Humanities
**Breadth Requirements:** Thought, Belief and Behaviour (2)

NML461H1 - Modern Persian Poetry

Hours: 24S

A survey of Persian literature, mainly modern poetry from 19th–21st centuries, focusing on linguistics and literary approaches in modern poetry. The course includes detailed discussion of the influence and effect of western and world poetry on Iranian poets, and critical reflections on works of leading contemporary poets. (Conducted in Persian)

**Prerequisite:** NML360Y1 or permission of instructor.
**Distribution Requirements:** Humanities
**Breadth Requirements:** Creative and Cultural Representations (1)

NML462H1 - Modern Persian Prose

Hours: 24S

A survey of contemporary Persian prose, focusing on fiction, novel and short story. The course includes discussion of main elements of the story such as plot, scene, characters, theme, topic, point of view, etc. and develops the ability to analyze any genres of literary prose through analyzing different Persian short stories. (Conducted in Persian)

**Prerequisite:** NML360Y1 or permission of instructor.
**Distribution Requirements:** Humanities
**Breadth Requirements:** Thought, Belief and Behaviour (2)

NML465Y1 - Young Avestan

Hours: 48L

This course surveys the grammar and religious concepts found within the Young(er) Avestan corpus of Zoroastrianism from the 2nd to 1st millennium BCE. Students will acquire a strong understanding of phonology, morphology, and syntax, and be able to comfortably read selections from the Avesta by the end of the year. Knowledge of Sanskrit, Greek or Latin is an advantage.

**Prerequisite:** None
**Corequisite:** None
**Exclusion:** None
**Recommended Preparation:** NML362Y1
**Distribution Requirements:** Humanities
**Breadth Requirements:** Creative and Cultural Representations (1)
NML466H1 - Theory and Practice of Translation from and into Persian

Hours: 24S

An introduction to theories and techniques involved in English/Persian translation, focusing on translation practice and theoretical discussions on linguistic, cognitive, socio-political, and cultural aspects of translation. Through analysis and application of translation theory, students practice the art of translation and develop awareness of issues that translators face.

Prerequisite: NML360Y1 or permission of instructor
Corequisite: N/A
Exclusion: N/A
Recommended Preparation: None
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

NML467H1 - Persian Literature: The Epic Tradition

Previous Course Number: NML460Y1
Hours: 36S

Explores iconic masterpieces of classical Persian heroic and romantic epic poetry, including the Persian national epic, Shahnameh, of Ferdowsi; the magisterial odes of Khaqani; and the Khamseh, or Quintet, of Nezami and its many literary responses. Emphasizes close reading and analysis of the texts and their historical and cultural backgrounds.

Prerequisite: NML360Y1 or adequate knowledge of Persian
Exclusion: NML460Y1
Recommended Preparation: NML260Y1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

NML468H1 - Persian Literature: Ethical, Erotic, and Mystical

Previous Course Number: NML460Y1
Hours: 36S

Explores the ethical works of Sa'di (Bustan and Gulistan); the mystical Mantiq al-Tayr of 'Attar and the Masnavi of Rumi; and the ghazals, or mystico-erotic poems, of Rumi and Hafiz. Emphasizes close reading and analysis of the texts and their historical, cultural, and religious backgrounds.

Prerequisite: NML360Y1 or adequate knowledge of Persian
Exclusion: NML460Y1
Recommended Preparation: NML260Y1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

NML470Y1 - Advanced Turkish

Hours: 48S

Advanced Turkish language practice designed to enable students to pursue independent work in Turkish and Ottoman studies. Differences between modern Turkish and Ottoman grammar will be pointed out. Elements of Arabic and Persian grammar that occur in Ottoman will be presented.

Prerequisite: NML370Y1 or adequate knowledge of Turkish
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

NML471H1 - Modern Turkish Literature in Perspective

Hours: 36L

This course surveys the main literary currents, figures, major themes, and motifs that define modern Turkish literature. Selected readings, including a variety of genres, such as short story, poetry, and the novel, will be used to map out a possible trajectory of modern Turkish literature, ranging from national allegories that pervaded early Republican Period to postmodern orientations.

Prerequisite: NML370Y1
Recommended Preparation: NMC278H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

NML490H1 - Topics in Near and Middle Eastern Languages

Hours: 36S

An advanced language seminar organized around grammatical issues or texts selected by the instructor.

Prerequisite: Permission of the Instructor
Corequisite: N/A
Exclusion: N/A
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)
Introduction

New College courses have in common a commitment to socially engaged learning and to explorative and inventive pedagogy that widens students’ experience by critically examining relationships among academic disciplines. We offer four degree programs: African Studies; Buddhism, Psychology and Mental Health; Caribbean Studies; and Critical Studies in Equity and Solidarity. These programs are open to all students in the Faculty of Arts and Science.

We also offer interdisciplinary courses that can enhance any degree program. Integration of student experience is a major priority in a college with students from all faculties in the University. The Independent Studies courses provide an opportunity for students to design their own programs and to test their research, analytic, synthetic, and creative skills by writing a major research paper. The Community Engaged Learning program supports course-based service learning and independent community engaged learning opportunities. These allow students to integrate their theoretical knowledge with practical experience, while engaging in meaningful work in campus and community organizations.

New One: Learning Without Borders

New One provides first year students with a comprehensive foundation for successful undergraduate study. It encourages active, engaged learning and creative forms of inquiry, and supports communication abilities. In the second semester particularly, students will practice and develop skills in research and knowledge presentation, showcasing their projects at the annual end-of-year “Knowledge Fair.”

New One gives students the tools to think deeply, critically, and creatively about these topics and what they can teach us about the ways our lives are connected “beyond borders.” Inspired by the social advocacy focus of New College’s academic programs, the program grapples with the core question: how do we imagine responsible global citizenship and build a more equitable and just society?

New One offers up to ten interdisciplinary small-class seminars annually. Students join the program by simply registering in one of our courses, whether in the Fall or Winter term. The courses explore themes that connect to our daily lives such as the food we eat, the languages we speak, the technology we use, the art that we create and surrounds us, and the science that impacts our lives. We encourage students to take a course in both the Fall and Winter terms for a more complete experience.

New One courses meet for 3 hours each week. A portion of those sessions will occasionally be allocated to “Learning Labs.” All students in the program come together in these Learning Labs to engage in joint activities and explore issues that are common to the four topics. Both in seminars and Learning Labs, students will experience a variety of ways of learning (through, for example, guest lectures, group work, workshops, field trips to local community organizations, and panels of senior students sharing their experience and insights).

New One does not require a specific application. All first-year students in the Faculty of Arts and Science on the St. George campus are eligible to register in our courses. Students, however, can only take courses in one College One program in the same term. For more information about the program, go to http://uoft.me/NewOne or contact new.one@utoronto.ca.

The African Studies Program

(Specialist, Major, Minor) The African Studies Program examines the dynamics, challenges and processes of socio-economic, environmental and political transformations in Africa, the varied histories, societies, ideas, institutions of Africa and its diasporas through interdisciplinary lenses. The interdisciplinary courses, through innovative and critical pedagogies deal with cutting edge subjects such as political economy, African inventions, development, aid, humanitarianism, NGOs, conflict and peacemaking, activism and political struggles, politics, African cultures, migration and
displacement, gender and development, environment, health, black freedom, urbanization, African systems of thought, the slave trade, colonialism, the post-colonial state, Africa and its diaspora, Pan-Africanism, and globalization. Innovative pedagogies nurturing students’ intellectual curiosity, cultivating engaged, creative and critical thinking and teaching cutting edge courses that recognize Africa as a living place rather than merely as a site for intellectual speculation and study inform our teaching. The program also offers practical courses in African languages. Additional cross-listed courses, drawn from disciplines in humanities, social sciences and sciences complement the program offerings.

Consult Program Director, Prof. M. Lo, 416-946-3218 or marieme.lo@utoronto.ca. For general enquiries call 416-978-5404 or email nc.undergradadmin@utoronto.ca.

The Buddhism, Psychology and Mental Health Program

(Minor) An interdisciplinary Minor program, BPMH focuses on the growing convergence between western psychology and the psychological aspects of Buddhism as expressed in the recent interest in mindfulness meditation as a means of enhancing health and wellness. The program allows students to investigate the diverse ways that Buddhist and western psychology and science intersect, bringing together academic, clinical and contemplative traditions. Students choose from a wide range of courses on mind, consciousness, mindfulness meditation, social implications and applications of Buddhism, cognitive science, psychotherapy and the psychology of religion. The program encourages a critical examination of the ways that Buddhist psychology can contribute to the modern understanding of consciousness, wisdom, mental health and physical health.

Consult Program Director, Dr. T. Toneatto, 416-946-0282/416-875-2533 or email tony.toneatto@utoronto.ca. For general enquiries, call 416-978-5404 or email nc.undergradadmin@utoronto.ca.

The Caribbean Studies Program

(Specialist, Major, Minor) Caribbean Studies is an interdisciplinary undergraduate program that consists of courses on Caribbean history and society, politics and economic development, literature and thought. Our courses deal with a wide range of issues including gender, religion, culture, ethnicity, race, development, language, colonialism, the environment and regional common markets. Caribbean Studies equips students to think about broad, theoretical and challenging intellectual issues and, at the same time, to ground that expansive thinking in deep understanding of the particular historical, political, economic, geographical, cultural and linguistic realities of the Caribbean and its diasporas. This combined interdisciplinary and area studies approach prepares students to think across disciplines about these kinds of questions, and to base their comparative, transnational and interdisciplinary thinking in concrete knowledge of the Caribbean and its people. The study of the Caribbean equips students to question the order of things, reflect on their own place in the world, and see past the Caribbean’s size or current level of geo-political influence to recognize the inherent value and intellectual significance of all places and all people.

Consult Program Director, Prof. N. Rodriguez, 416-585-4438 or email crb.program@utoronto.ca. For general enquiries, call 416-978-5404 or email nc.undergradadmin@utoronto.ca.

Critical Studies in Equity and Solidarity

(Major, Minor) Critical Studies in Equity and Solidarity (CSES) is an interdisciplinary program that explores how social relations and practices of power and privilege are (re)produced locally and transnationally. In CSES we question the dominant conceptualization of equity by the state, educational programs, the non-profit sectors and community organizations as individualized and de-historicized social differences. CSES is a hub of critical disability studies teaching and learning. The program provides students with theoretical and practical tools to study social, political, economic and historical injustices. CSES takes a unique approach to undergraduate education that values student experiential learning and community knowledge. The learning goal of CSES is to provide frameworks on theories of transformative social change rooted in political activism and formations of solidarity. The program encourages students to apply theory in action through organizing and practicing solidarity in making a more just world. CSES creates a dynamic learning environment that extends far beyond the university walls. With a vibrant student body, dynamic faculty members, connection with a wide range of community partners and a bold curriculum, CSES at New College is a leader in studies of social justice, settler colonialism, race, gender, sexuality, disability, land/water and sustainability, activism, solidarity and the art of resistance, and global food equity and security.

Consult Program Director, Prof. S. Mojab, 416-978-0829 or email shahrzad.mojab@utoronto.ca. For general enquiries, call 416-978-5404 or email nc.undergradadmin@utoronto.ca.

Community Engaged Learning (CEL)

New College offers several community engaged courses. These provide students the opportunity to integrate academic, experiential and practice-based learning as they participate in meaningful work in community or campus organizations.

Two forms of community engaged learning courses are offered: embedded and independent. In the former, a community service component is either a mandatory or optional component of the course syllabus. (Examples of such courses are NEW342H1 and NEW232H1). In the independent community engaged learning courses, upper level students, with various academic backgrounds, are placed with a social purpose community or campus-based organization for several hours per week, contributing to the mission of that organization in program support work or research. Through seminar discussions and critical reflection on their experiences, students learn how to mobilize their academic knowledge, deepen their appreciation of community engagement and social justice, explore social and ethical issues, and build professional dispositions and work-place skills relevant to the social sector.

Information about CEL can be found at http://www.newcollege.utoronto.ca/academics/new-college-academic-programs/community-engaged-learning.

Enquiries: nc.engagedlearning@utoronto.ca or 416-978-8821.

Independent Studies

New College Independent Study courses are designed both to complement regular offerings in New College Programs and to provide an opportunity for New College students in any program to enrich their studies. The normal expectation of a project course is that the student, aided and advised by their supervisor, will read relevant literature, and plan, analyze and report on an original and independent investigation of an appropriate topic. Written applications, including a detailed proposal, should be made through the Programs Office for approval by the Vice Principal of New College or a designate by April 15 for the Summer Session; by July 15 for the Fall Term; or by November 15 for the Winter Term. Should the deadline fall on a weekend, applications will be accepted until the following Monday. Students will be notified of the acceptance or rejection of an application. If the project requires ethics approval, please be advised that you should find and consult with a supervisor about meeting this requirement at least a semester in advance of
these deadlines. For more information and application forms, please see the Independent Studies website: http://www.newcollege.utoronto.ca/new-college-academic-programs/independent-studies.

Enquiries: New College Program Administrator - Wetmore Hall, room 133; nc.undergradadmin@utoronto.ca or 416-978-5404.

Interdisciplinary Courses on Jungian Theory

This suite of courses offers students opportunities for sustained, interdisciplinary engagement with the thought of Carl Jung. Courses invite students to consider Jung's thought and practice in relation to a range of disciplinary and cultural issues in order to open up conversations about models of consciousness and mind.

The International Foundation Program

is designed for international students who need to meet the University's English language requirement. Students will acquire the academic and language skills necessary for full admission to undergraduate studies. Core courses include one first year history credit course (IFP100Y1), three non-credit language courses and one non-credit discipline-specific course. Courses are open only to students admitted to the program. For program and admission information, please see https://internationalprograms.utoronto.ca.

The Human Biology Programs

offer a broad education in life sciences with courses offered by departments in both the Faculties of Arts and Science, and Medicine (see Human Biology section of the Calendar.)

The Women and Gender Studies Program

(Specialist, Major, Minor) provides an interdisciplinary and culturally inclusive approach to understanding gender (see Women and Gender Studies section of the Calendar.)

New College Programs

African Studies Specialist (Arts Program) - ASSPE1707

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

Consult Program Administrator: nc.undergradadmin@utoronto.ca or 416-978-5404.

(11 full courses or their equivalent, including at least four 300+ series courses with at least one FCE at the 400-level)

First Year:
1. NEW150Y1

Higher Years:
2. JQR360H1
3. NEW450Y1
4. 2.5 full course equivalents from Group A, to be chosen from at least two different departments/programs
5. Two full course equivalents from Group B
6. Two full course equivalents from Groups A or B
7. A combination of two language full course equivalents as outlined in Group C

Note: Four FCEs of the eleven courses must be 300/400 series (including at least one 400-series FCE) of which at least one FCE must be from Group A and another from Group B

African Studies Major (Arts Program) - ASMAJ1707

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

Consult Program Administrator: nc.undergradadmin@utoronto.ca or 416-978-5404.

(6 full courses or their equivalent, including two FCEs at the 300+level)

First Year:
1. NEW150Y1

Higher Years:
2. JQR360H1
3. NEW450Y1
4. 1.5 full course equivalents from Group A
5. Two full course equivalents from Group B, or NEW280Y1 and NEW380Y1

Note: At least two full course equivalents from Groups A and/or B must be at the 300/400 level

African Studies Minor (Arts Program) - ASMIN1707

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

Consult Program Administrator: nc.undergradadmin@utoronto.ca or 416-978-5404.

(4 full courses or their equivalent, including one FCE at the 300+level)

First Year:
1. NEW150Y1

Higher Years:
2. One full course equivalent from Group A
3. One full course equivalent from Group B, or another one from
Buddhism, Psychology and Mental Health Minor (Arts Program) - ASMIN1017

Enrolment Requirements:
This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:
Consult Program Administrator: nc.undergradadmin@utoronto.ca or 416-978-5404.

(4 full courses or their equivalent, including one FCE at the 300+ level)

First Year:
No specific first-year courses required.

Higher Years:
1. NEW232H1
2. 2.0 full course equivalents from the Core Group
3. 1.5 full course equivalents from Group A

Core Group:
NEW214H1, NEW214Y1, NEW330H1, NEW332H1, NEW333H1,
NEW334H1, NEW430H1, NEW432H1, NEW433H1

Group A:

Caribbean Studies Specialist (Arts Program) - ASSPE1545

Enrolment Requirements:
This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:
Consult Program Administrator: nc.undergradadmin@utoronto.ca or 416-978-5404.

(10 full courses or their equivalent, including at least four FCEs at the 300+ level, one FCE of which must be at the 400-level.)

First Year:
1. NEW120Y1
Higher Years:
2. 1.0 full course or its equivalent from HIS230H1/ HIS231H1/
NEW220H1/ NEW221H1/ NEW225H1/ NEW226H1
3. JQR360H1
4. 3.5 full courses or their equivalent from the Core Group (including at least 2.5 FCE at the 300+ level, at least 1.0 FCE of which must be at the 400-level)
5. 2.0 full courses or their equivalent from Group A (including at least 1.0 FCE at the 300+ level)
6. 2.0 full courses or their equivalent from Group A or B

Caribbean Studies Major (Arts Program) - ASMAJ1545

Enrolment Requirements:
This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:
Consult Program Administrator: nc.undergradadmin@utoronto.ca or 416-978-5404.

(7 full courses or their equivalent including at least two FCEs at the 300+ level, 0.5 of which must be at the 400-level)

First Year:
1. NEW120Y1
Higher Years:
2. 1.0 full course or its equivalent from HIS230H1/ HIS231H1/
NEW220H1/ NEW221H1/ NEW225H1/ NEW226H1
3. JQR360H1
4. 2.0 full courses or their equivalent from the Core Group at the 300+ level, at least 0.5 of which must be at the 400-level
5. EITHER 2.5 full courses or their equivalent from Group A or B OR
2.0 full courses or their equivalent if taking 1.5 FCE from HIS230H1/
HIS231H1/ NEW220H1/ NEW221H1/ NEW225H1/ NEW226H1 OR
1.5 full courses or their equivalent if taking 2.0 FCE from HIS230H1/
HIS231H1/ NEW220H1/ NEW221H1/ NEW225H1/ NEW226H1
Caribbean Studies Minor (Arts Program) - ASMIN1545

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

Consult Program Administrator: nc.undergradadmin@utoronto.ca or 416-978-5404.

(4 full courses or their equivalent including at least 1.0 FCE at the 300+ level)

First Year:
1. NEW120Y1

Higher Years
2. 1.0 full course or its equivalent from HIS230H1/ HIS231H1/ NEW220H1/ NEW221H1/ NEW225H1/ NEW226H1
3. 1.0 full course or its equivalent from the Core Group
4. 1.0 full course or its equivalent from the Core Group or Group A

Critical Studies in Equity and Solidarity Minor (Arts Program) - ASMAJ1141

Description:

Critical Studies in Equity and Solidarity (CSES) is an interdisciplinary program that explores how social relations and practices of power and privilege are (re)produced locally and transnationally. In CSES, we question the dominant conceptualization of equity by the state, educational programs, the non-profit sectors and community organizations as individualized and de-historicized social differences. CSES is a hub of critical disability studies teaching and learning. The program encourages students to apply theory in action through organizing and practicing solidarity in making a more just world. Equity Studies creates a dynamic learning environment that extends far beyond the university walls. With a vibrant student body, dynamic faculty members, connection with a wide range of community partners and a bold curriculum, CSES at New College is a leader in studies of social justice, settler colonialism, race, gender, sexuality, disability, land/water and sustainability, activism, solidarity and the art of resistance, and global food equity and security.

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

Consult Program Administrator: nc.undergradadmin@utoronto.ca or 416-978-5404.

(7 full courses or their equivalent, including two FCEs at the 300+ level)

First Year:
1. No specific first-year courses required.

Higher Years
1. NEW240H1
2. NEW341H1
3. JQR360H1
4. 2.0 additional full course equivalents from the core group, including at least 0.5 at the 400-level
5. 3.5 FCEs from Groups A, B, C, D (including one or more FCEs from at least three of the four groups)

Critical Studies in Equity and Solidarity Major (Arts Program) - ASMAJ1141

Description:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

Consult Program Administrator: nc.undergradadmin@utoronto.ca or 416-978-5404.

(4 full courses or their equivalent, including at least one FCE at the 300+ level)

First Year:
1. No specific first-year courses required.

Higher Years
1. NEW240H1
2. 1.0 FCE in any area from the Core Group
3. 1.5 additional FCE in any area from the Core Group or 1.5 FCEs from Groups A, B, C, D
4. An additional 1.0 FCE from Groups A, B, C, D
Course Groups

African Studies Group A

- ENG367H1 African Literatures in English
- FCS392H1 Special Topics in French Cultural Studies II
- HIS295Y1 African History and Historical Methodology
- HIS297Y1 History of Africa from a Gender Perspective

New College Courses

New One: Learning Without Borders

NEW101H1 - The Everyday Politics of Food

Hours: 12L/24S

How often do we reflect on the environmental, social and economic impact of our everyday food choices? This course offers an introduction to the key concepts, terms and theories that underlie our current food system. The course links the food we eat to global forces and considers how these forces affect food distribution, access and consumption. Restricted to first-year students. Not eligible for CR/NCR option.

Exclusion: INI/Munk/SMC/TRN/UNI/VIC/WDW One; NEW102H1/NEW103H1/NEW104H1/NEW105H1/NEW106H1

Distribution Requirements: Social Science

Breadth Requirements: Society and its Institutions (3)

NEW102H1 - Exploring Multilingual Toronto

Hours: 12L/24S

How does language connect and divide people, places and communities? This course considers how interactions between people in Toronto are shaped by language as well as history, economy, architecture and urban landscapes. Students engage with the city both in and out of class to think about a range of questions linked to gender and sexuality, indigeneity, migration, race, ethnicity, and public/private space. Restricted to first-year students. Not eligible for CR/NCR option.

Exclusion: INI/Munk/SMC/TRN/UNI/VIC/WDW One; NEW101H1/NEW103H1/NEW104H1/NEW105H1/NEW106H1

Distribution Requirements: Humanities

Breadth Requirements: Society and its Institutions (3)

NEW103H1 - Digital Technology and Society

Hours: 12L/24S

While the internet and other forms of digital technology have created new forms of social relationships and widened access to information, they have also raised concerns. This course explores issues such as surveillance, addiction and bullying as well as the potential of digital technologies (e.g. smart cities, Big Data, and the internet of things). The course engages students’ own experience of digital technology. Restricted to first-year students. Not eligible for CR/NCR option.

Exclusion: INI/Munk/SMC/TRN/UNI/VIC/WDW One; NEW101H1/NEW102H1/NEW104H1/NEW105H1/NEW106H1

Distribution Requirements: Social Science

Breadth Requirements: Society and its Institutions (3)

NEW104H1 - Creating Community: Art, Identity and Belonging

Hours: 12L/24S

How is art implicated in the process of community building? How does art foster a sense of community identity and belonging? This course explores how communities, in Toronto and beyond, engage a variety of art forms including graffiti, spoken-word, hip-hop, digital art, traditional dance and music to connect people and express community identity. Students will have the opportunity to visit community arts projects. Restricted to first-year students. Not eligible for CR/NCR option.

Exclusion: INI/Munk/SMC/TRN/UNI/VIC/WDW One; NEW101H1/NEW102H1/NEW103H1/NEW105H1/NEW106H1

Distribution Requirements: Humanities

Breadth Requirements: Creative and Cultural Representations (1)

NEW105H1 - Current Issues Without Borders I

Hours: 12L/24S

This interdisciplinary course addresses a current issue that exemplifies the themes of “Learning Without Borders” in New One. It investigates how this issue is implicated in connecting us with others around the globe; it engages different kinds of knowledge and community perspectives; and integrates students’ own experience as related to the issue. Restricted to first-year students. Not eligible for CR/NCR option.

Exclusion: INI/Munk/SMC/TRN/UNI/VIC/WDW One; NEW101H1/NEW102H1/NEW103H1/NEW104H1/NEW106H1

Distribution Requirements: Social Science

Breadth Requirements: Society and its Institutions (3)
NEW106H1 - Science, Health and Social Justice

Hours: 12L/24S

How can scientific knowledge and research be mobilized to impact individual and global health? How is health impacted by social, racial and economic inequalities? This course explores scientific research and practice with special attention to the translation of scientific knowledge in the public sphere, and its ability to inform policies, practices and laws. Students have the opportunity to meet with clinician-scientists, policy-makers, and other professionals connected to the health care system. Restricted to first-year students. Not eligible for CR/NCR option.

Exclusion: INI, SMC, TRI, UC, VIC, WDW One, Munk One; NEW101H1/NEW102H1/NEW103H1/NEW104H1/NEW105H1
Recommended Preparation: None
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

NEW112H1 - Language Freedom and Power

Hours: 12L/24S

How do we imagine a balance between the need for communication, freedom of expression, and protection for marginalized groups? This course considers how language shapes and is shaped by the relations of power not only in such sites as colonies, nations and institutions, but also in popular culture and how we communicate online. It explores the key role of language in activism and youth cultures and allows students to focus on an issue of particular interest. Restricted to first-year students. Not eligible for CR/NCR option.

Prerequisite: NEW101H1/NEW102H1/NEW103H1/NEW104H1/NEW105H1/NEW106H1/Permission of the New One Coordinator
Exclusion: INI/Munk/SMC/TRN/UNI/VIC/WDW One; NEW111H1/NEW113H1/NEW114H1/NEW115H1/NEW116H1
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

NEW111H1 - Food, Ethics and Sustainability

Hours: 12L/24S

How do we produce and ensure access to nutritious and environmentally sustainable food for all? This course explores what is involved in achieving ethical food production and food security, examining topics such as: the paradox of food waste amidst scarcity, the relationship between food production and climate change, community-led alternatives to dominant food systems, and the role of biotechnology. Research projects allow students to focus on an issue of particular interest. Restricted to first-year students. Not eligible for CR/NCR option.

Prerequisite: NEW101H1/NEW102H1/NEW103H1/NEW104H1/NEW105H1/NEW106H1/Permission of the New One Coordinator
Exclusion: INI/Munk/SMC/TRN/UNI/VIC/WDW One; NEW112H1/NEW113H1/NEW114H1/NEW115H1/NEW116H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

NEW113H1 - Unpacking Digital Technology

Hours: 12L/24S

What are the social and material implications of the digital technologies we use every day - for the present and for the future? This course explores how digital technologies have been remaking the world and affecting our lives by tracing their historical development, their social effects, and the impact of their physical presence. It also peers into scenarios of the future in this digital world. Students engage in research on a topic of their own interest. Restricted to first-year students. Not eligible for CR/NCR option.

Prerequisite: NEW101H1/NEW102H1/NEW103H1/NEW104H1/NEW105H1/NEW106H1/Permission of the New One Coordinator
Exclusion: INI/Munk/SMC/TRN/UNI/VIC/WDW One; NEW111H1/NEW112H1/NEW114H1/NEW115H1/NEW116H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)
NEW114H1 - Art for Social Change

**Hours:** 12L/24S

How does art contribute to social change? Artistic productions can draw attention to social problems, mobilize support for and symbolize social movements, and inspire new visions for imagined futures. This course will explore case studies of the role of various art forms in relation to past and current social change initiatives. Students will have the opportunity to engage in research on an art project of their choice. Restricted to first-year students. Not eligible for CR/NCR option.

**Prerequisite:** NEW101H1/NEW102H1/NEW103H1/NEW104H1/NEW105H1/NEW106H1/Permission of the New One Coordinator

**Exclusion:** INI/Munk/SMC/TRN/UNI/VIC/WDW One; NEW111H1/NEW112H1/NEW113H1/NEW115H1/NEW116H1

**Distribution Requirements:** Humanities

**Breadth Requirements:** Creative and Cultural Representations (1)

NEW116H1 - Science and Global Threats

**Hours:** 12L/24S

What is the role of science in addressing current global threats? What are the possibilities and the limitations of scientific research and knowledge in tackling complex problems such as climate change, pandemics and pollution? In this course, students explore these questions by examining case studies, meeting with specialists in various scientific fields, and engaging in research on a topic of their own choice. Restricted to first-year students. Not eligible for CR/NCR option.

**Prerequisite:** NEW101H1/NEW102H1/NEW103H1/NEW104H1/NEW105H1/NEW106H1, or permission of the New One Coordinator

**Exclusion:** INI, SMC, TRI, UC, VIC, WDW One, Munk One; NEW111H1/NEW112H1/NEW113H1/NEW114H1/NEW115H1

**Recommended Preparation:** None

**Distribution Requirements:** Social Science

**Breadth Requirements:** Society and its Institutions (3)

NEW115H1 - Current Issues Without Borders II

**Hours:** 12L/24S

Building on the integrated learning from any New One course, this course explores, in more depth, the social and ethical implications of a current issue exemplifying the themes of "Learning without Borders." Normally, this course would address the same current issues as offered in NEW105H1 in the preceding term. The course also considers examples of policy and community organizing responses. Restricted to first-year students. Not eligible for CR/NCR option.

**Prerequisite:** NEW101H1/NEW102H1/NEW103H1/NEW104H1/NEW105H1/NEW106H1/Permission of the New One Coordinator

**Exclusion:** INI/Munk/SMC/TRN/UNI/VIC/WDW One; NEW111H1/NEW112H1/NEW113H1/NEW114H1/NEW116H1

**Distribution Requirements:** Social Science

**Breadth Requirements:** Society and its Institutions (3)

African Studies Courses

NEW150Y1 - Introduction to African Studies

**Hours:** 48L/24T

**Exclusion:** AFSA01H3

**Distribution Requirements:** Humanities; Social Science

**Breadth Requirements:** Society and its Institutions (3)
NEW250Y1 - Africa in the 21st Century: Challenges and Opportunities

Hours: 48L

A critical examination of Africa as a living space rather than merely a site of intellectual speculation and study. Uses scholarly and popular literature to explore the issues that engage the attention of ordinary Africans, ranging from the dramatic to the seemingly trivial, as they struggle to fashion meaningful lives in fast-changing societies. Topics include urban transition and city life; economic, political and cultural impacts of globalization; new religious movements and changing conceptions of selfhood; new African diasporas in the West; dynamics of gender relations, kinships and identities; and the politics of liberalization. Materials studied will include print and electronic news media and other mass media resources from Africa and across the world.

Distribution Requirements: Humanities; Social Science
Breadth Requirements: Creative and Cultural Representations (1); Society and its Institutions (3)

NEW280Y1 - Introductory Swahili

Hours: 24L/72T

Introduction to grammar and basic vocabulary of Swahili. Emphasis on comprehension and oral practice. Reading of selected texts. Relation of the language to its East African cultural context.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

NEW322H1 - The Contemporary African Novel

Previous Course Number: NEW322Y1
Hours: 24S

Novels written in the last forty years by English, French and Portuguese-speaking Africans. Ideological views concerning colonialism and neo-colonialism. Tradition, religious and secular; the use of African symbolism. A small number of historical and sociological texts are recommended as essential background reading. Works not written in English are read in translation. (Offered in alternate years)

Exclusion: NEW322Y1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

NEW350H1 - AIDS: Challenges and Successes

Previous Course Number: NEW350H1
Hours: 24L

Explores the pandemic of AIDS in Africa through a social science lens. (Given by Human Biology and New College)

Exclusion: NEW350H1
Recommended Preparation: NEW150Y1
Distribution Requirements: Humanities; Science; Social Science
Breadth Requirements: Society and its Institutions (3)

NEW351Y1 - African Systems of Thought

Previous Course Number: NEW252Y1
Hours: 48L

The exploration of a range of African cosmologies, epistemologies, and theologies, as well as specific case studies on justice, the moral order, and gender relations. The influence of these richly diverse traditions is traced as well in the writings of African thinkers in the Diaspora.

Exclusion: NEW252Y1, JAP256H1/JAP356H1
Recommended Preparation: NEW150Y1
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3); Thought, Belief and Behaviour (2)

NEW352H1 - International Organizations, NGOs, Development and Change in Africa

Hours: 24L

Critically explores the role of international organizations such as the World Bank Group, the UN and NGOs in the economic development of Africa.

Prerequisite: NEW150Y1/NEW250Y1
Distribution Requirements: Humanities; Social Science
Breadth Requirements: Society and its Institutions (3)
NEW353H1 - International Relations of Africa

Hours: 24L

Explores inter-state relations in Africa, African states’ relations with the West, China, India, Brazil, and international political, economic and financial institutions.

Prerequisite: NEW150Y1/NEW250Y1
Exclusion: POLC80H3
Distribution Requirements: Humanities; Social Science
Breadth Requirements: Society and its Institutions (3)

NEW354H1 - African Cultures and Development

Hours: 24L

Critically examines scholarly debates on the relationships between African cultures and development in various regions of the continent. Draws on interdisciplinary scholarship and development discourses to enhance students’ understanding of African conditions and cultures in the context of development thinking.

Prerequisite: NEW150Y1/NEW250Y1
Exclusion: NEW358H1 (Special Topics in African Studies: Culture and Development in Postcolonial Africa), offered in Winter 2015, Winter 2016, Fall 2017, Fall 2018, Fall 2019
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

NEW355H1 - African Youth Languages and Cultures

Hours: 24L

Examines the nature of youth languages and cultures in contemporary Africa with a focus on their characteristics and the conditions under which they develop. Also considers similarities and/or differences between youth languages and cultures in different regions of Africa and the general youth condition. Includes urban youth languages such as Sheng, Engsh, Tsotsital, etc. and music genres associated with youth such as hip hop, Bongo flava, etc. Discusses challenges and opportunities associated with African youth languages as they relate to questions of identity, national integration, regional integration, and development.

Prerequisite: NEW150Y1/NEW250Y1/NEW280Y1
Exclusion: NEW358H1 (Special Topics in African Studies: African Youth Languages and Cultures), offered in Winter 2018
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

NEW357H1 - Special Topics in African Studies

Hours: 24L

An upper level course. Topics of study vary from year to year.

Prerequisite: NEW150Y1/NEW250Y1

NEW358H1 - Special Topics in African Studies

Hours: 24L

An upper level course. Topics of study vary from year to year.

Prerequisite: NEW150Y1/NEW250Y1

Distribution Requirements: Humanities; Social Science

NEW359H1 - The Horn of Africa - Critical Perspectives

Hours: 24L

Examines the Horn of Africa, its diversity, geopolitics, cultural politics, present conditions and current debates through a critical and comparative lens. Considers social forces in contemporary politics within the region including competing claims, explanations of the underpinnings of the Horn’s conflict, and the promise of peace. draws upon interdisciplinary scholarship, public discourse, texts and media to reflect on the future of the Horn of Africa at this historical moment.

Prerequisite: Completion of at least 4.0 FCEs
Exclusion: NEW357H1 (Special Topics in African Studies: The Horn of Africa: Critical Perspectives) offered in Fall 2018, Fall 2019
Recommended Preparation: NEW150Y1/NEW250Y1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)
JQR360H1 - The Canadian Census: Populations, Migrations and Demographics

Hours: 24L/12T

Examines the Canadian population census through the experience of diasporic groups in Canada. Approaches the census as a statistical tool, an historical source and an ideological project of citizenship and nationalism. Uses census data to explore mathematical and statistical concepts and to integrate numerical ways of thinking with qualitative analysis. (Jointly sponsored by African Studies, Diaspora and Transnational Studies, Caribbean Studies, Equity Studies and Latin American Studies).

Prerequisite: DTS200Y1/HIS230H1/HIS231H1/LAS200H1/LAS201H1/NEW120Y1/NEW150Y1/NEW220H1/NEW221H1/NEW224Y1/NEW225H1/NEW226H1/NEW240Y1

Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

NEW380Y1 - Intermediate Swahili

Hours: 24L/72T

Prerequisite: NEW280Y1

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

NEW450Y1 - African Studies Honours Research Seminar

Hours: 24S

This honours research seminar required of all specialists and majors in African Studies offers critical explorations of the genealogy of African Studies, the transnational study of Africa, Africa’s place in a globalized world, the historical, intellectual and institutional contexts of Africanist knowledge production, its dissemination and consumption in Africa, Europe, the Americas and emerging academic sites in Asia. It engages with the paradigm shifts and vibrant scholarly and epistemic debates across disciplines and geographies as well as unfolding events, public discourses, geopolitics, African popular cultures and the reimagining of African futures through canonical, emergent scholarship and creative media and emphasizes students’ original and creative research explorations, engaged praxis and search for alternative theorizing and epistemologies.

Prerequisite: NEW150Y1/NEW250Y1/400-level Group A Course

Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

NEW451H1 - Special Topics in African Studies

Hours: 24L

An upper level course. Topics of study vary from year to year.

Prerequisite: NEW150Y1/NEW250Y1

Distribution Requirements: Humanities; Social Science

NEW453H1 - Language and Postcolonial Education in East Africa

Hours: 24S

Examines the choice of languages for education in East Africa using critical perspectives. Pays particular attention to the influences of the historical experience of colonialism, the socio-linguistic contours of each country and the strength of linguistic and educational lobby groups in East African countries.

Prerequisite: NEW150Y1/NEW250Y1

Exclusion: NEW453Y1

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

NEW453Y1 - Language and Postcolonial Education in East Africa

Hours: 48S

Examines the choice of languages for education in East Africa using critical perspectives. Pays particular attention to the influences of the historical experience of colonialism, the socio-linguistic contours of each country and the strength of linguistic and educational lobby groups in East African countries.

Prerequisite: NEW150Y1/NEW250Y1

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1); Society and its Institutions (3)
NEW454H1 - Migration, Mobility, and Displacement in Contemporary Africa

Hours: 24S

Why do people move voluntarily or involuntarily? What are the causes and consequences of migration and displacement in Africa? This course critically examines the multifaceted dimensions of migration, mobility, and displacement, with a specific focus on communities and populations displaced by war, environmental destruction and disaster, economic failings, and the quest for economic opportunities, love, education, or individual freedom.

Prerequisite: NEW150Y1/NEW250Y1 or permission of the instructor.
Exclusion: NEW451H1 (Fall 2016)
Recommended Preparation: JQR360H1/NEW351Y1
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

NEW455H1 - Conflicts, Negotiations and Peacebuilding in Africa

Hours: 24S

Examines conflicts and peace negotiations in African contexts such as Somalia, Sudan, the Democratic Republic of Congo, and North Africa through public discourse, citizen actions, policy debates and mobilizations. Explores formal, informal, indigenous and institutional mediation and peace negotiation platforms, strategies, and impulses. Analyzes various conflict zones, case studies and intervention strategies for negotiating and sustaining peace in Africa in the broader context of the war on terror, increasing militarism, and securitization in peacebuilding.

Prerequisite: NEW150Y1/NEW250Y1
Exclusion: NEW451H1 (Special Topics in African Studies: Conflicts, Negotiations and Peacebuilding in Africa), offered in Winter 2019, Winter 2020; NEW452H1
Recommended Preparation: NEW353H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

NEW459H1 - Advanced Special Topics in African Studies

Hours: 24L

An upper-level course. Topics of study vary from year to year.

Prerequisite: NEW150Y1/NEW250Y1
Distribution Requirements: Humanities; Social Science

Buddhism, Psychology and Mental Health Courses

NEW214H1 - Socially Engaged Buddhism

Hours: 24L

Socially Engaged Buddhism applies traditional Buddhist spiritual, ethical and social teachings to improve society. This course will focus on contemporary movements in Vietnam, Tibet, China & Taiwan, Sri Lanka, Thailand and India, as well as its ramifications in the West that have inspired movements such as Buddhist prison ministries and the Peacemaker Order.

Exclusion: NEW214Y1
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

NEW232H1 - Buddhist Psychology

Previous Course Number: NEW232Y1
Hours: 36L

Describes the psychology inherent within the original teachings of Buddhism. Primary focus is on the understanding of the causes of suffering and happiness, the nature of cognition and emotion, characteristics of the self/ego, personality transformation, the role of the unconscious, and mindfulness meditation. Includes an option for Community Engaged Learning experience.

Exclusion: NEW232Y1
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

JNR301H1 - The History of Buddhist Meditation

Hours: 36L

This course will survey historical, cultural, and textual contexts for Buddhist meditative and contemplative practices and techniques.

Prerequisite: RLG206H1/NEW232Y1/NEW232H1
Corequisite: None
Exclusion: None
Recommended Preparation: None
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)
NEW330H1 - Mindfulness-Informed Interventions for Mental Health

Hours: 36L

An exploration of the current interest in incorporating mindfulness into western mental health interventions. Examines the concept of mindfulness closely to show how mindfulness is implicitly a component of western psychological theories and interventions. Also discussed is how mindfulness is used directly and indirectly as a psychological intervention.

Prerequisite: Completion of 9 FCEs
Recommended Preparation: NEW232H1/NEW232Y1
Distribution Requirements: Social Science
Breadth Requirements: Thought, Belief and Behaviour (2)

NEW332H1 - Buddhism and Psychotherapy

Hours: 36L

Evaluates the relationship between Buddhist psychology and the practice of Western psychotherapy. Areas that will be studied include positive psychology, psychoanalysis, cognitive-behaviour therapy, mindfulness meditation and Jungian psychology. Comparisons with original Buddhist teachings and commentaries will be made.

Recommended Preparation: NEW232H1/NEW232Y1
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

NEW333H1 - Buddhism and Cognitive Science

Hours: 36L

Explores some important connections between Cognitive Science and Buddhism. In particular it will examine the insights of cognitive science into central Buddhist concepts such as wisdom, mindfulness, meditation, insight and self-control, as well as related concepts such as flow and mystical experience.

Recommended Preparation: NEW232H1/NEW232Y1/RLG206H1
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

NEW334H1 - Science of Wisdom: Buddhist and Western Traditions

Hours: 36L

Provides a conceptual and practical exploration of several ancient wisdom traditions. Buddhist approaches to self-actualization and wisdom will be compared to several other wisdom traditions (e.g. Mesopotamia, classical Greece, Christianity, Renaissance, etc.) Includes guided experiential exercises for each of the wisdom traditions.

Recommended Preparation: NEW232H1/NEW232Y1
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

NEW335H1 - Meditation and the Body

Hours: 36L

In recent years, the effects of meditation on the body have been widely researched. There is an increasing body of evidence that mindfulness meditation can affect brain activity, brain structure, neurochemistry and other psychobiological processes (e.g. blood pressure, cardiac function). This course will examine the research in this emerging field.

Prerequisite: Completion of 9.0 FCEs
Recommended Preparation: NEW232H1/NEW232Y1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

NEW336H1 - Special Topics in Buddhism, Psychology and Mental Health

Hours: 36L

Topics vary from year to year depending on the instructor.

Recommended Preparation: NEW232H1/NEW232Y1
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

NEW337H1 - Special Topics in Buddhism, Psychology and Mental Health

Hours: 36L

Topics vary from year to year.

Prerequisite: 0.5 FCE from the Buddhism, Psychology and Mental Health Core Course Group.
Recommended Preparation: NEW232H1/NEW232Y1
Distribution Requirements: Social Science
NEW338H1 - Exploring Mindful Awareness

Hours: 36L

Mindfulness meditation is a systematic investigation of subjective experience. Classic and modern descriptions of mindfulness and the recent scientific literature are surveyed. In addition to exploring a variety of meditative practices in the class, students are also required to maintain an ongoing meditation practice outside of class time over the duration of the course.

Prerequisite: NEW232H1/NEW232Y1/NEW332H1/NEW333H1/NEW334H1/NEW335H1/NEW339H1
Exclusion: NEW432H1 (Advanced Special Topics in Buddhism, Psychology and Mental Health: Cultivating Consciousness), offered in Fall 2012, Fall 2013, Fall 2014, Summer 2015, and Winter 2016
Distribution Requirements: Social Science
Breadth Requirements: Thought, Belief and Behaviour (2)

NEW339H1 - Yogacara Buddhism and Western Psychology

Hours: 36L

A comparative study of the nature of mind in Indian Yogacara Buddhism and modern psychology. Yogacara Buddhist teachings address the three aspects of mind, the storehouse consciousness, and the theory of consciousness-only, allowing an interdisciplinary dialogue with modern scientific understandings of the mind in psychology.

Recommended Preparation: NEW232H1/NEW232Y1
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

NEW430H1 - Jungian Psychology and Tantric Buddhism

Hours: 36L

Jung wrote extensively on the benefits of Buddhism to personal development and transformation. This course explores the contribution of Jungian psychology to understanding Tantric (or Vajrayana) Buddhism. Through experiential exercises, students will investigate the role of archetypal psychology as a mediator of the spiritual transformation described in Tantric Buddhism.

Prerequisite: NEW232H1/NEW232Y1
Exclusion: NEW433H1 (Advanced Special Topics in Buddhism, Psychology and Mental Health: The Psychology of Tantric Buddhism), offered in Winter 2015 and Winter 2016
Recommended Preparation: NEW302Y1/NEW303H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

NEW432H1 - Advanced Special Topics in Buddhism, Psychology and Mental Health

Hours: 36L

An upper-level seminar. Topics vary from year to year, depending on the instructor.

Recommended Preparation: NEW232H1/NEW232Y1/RLG206H1
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

NEW433H1 - Advanced Special Topics in Buddhism, Psychology and Mental Health

Hours: 36S

An upper-level seminar. Topics vary from year to year, depending on the instructor.

Recommended Preparation: NEW232H1/NEW232Y1/RLG206H1
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

NEW438H1 - Mindfulness Meditation: Science and Research

Hours: 36S

Critically evaluates the empirical research literature relevant to the study of mindfulness meditation. Conceptual, methodological and interpretive limitations of the scientific literature are discussed. Comparisons between the scientific models of mindfulness meditation and Buddhist descriptions will be made.

Prerequisite: A statistics course (e.g. PSY201H1, SOC202H1, STA220H1)
Recommended Preparation: NEW232H1/NEW232Y1/NEW331H1/NEW333H1
Distribution Requirements: Social Science
Breadth Requirements: The Physical and Mathematical Universes (5)
Caribbean Studies Courses

NEW120Y1 - Introduction to Caribbean Studies

Hours: 48L/24T

Explores the complex and diverse languages, geographies, regional and national histories, cultural practices, intellectual traditions and political and economic landscapes of the Caribbean region, its people and its diasporas. Students will be introduced to the main questions, themes, and debates in Caribbean Studies. Lectures and readings develop the skills to take an interdisciplinary approach to Caribbean Studies.

Distribution Requirements: Humanities; Social Science
Breadth Requirements: Creative and Cultural Representations (1); Society and its Institutions (3)

NEW220H1 - Comparative Caribbean Literature I: Canonical Readings

Hours: 24L

Introduction to the rich and multi-linguistic literary traditions of the Caribbean and its diaspora, focusing on canonical texts of Caribbean literature. Texts not originally written in English are read in translation.

Exclusion: NEW222H1, NEW222Y1, NEW223Y1
Recommended Preparation: NEW120Y1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

NEW221H1 - Comparative Caribbean Literature II: Contemporary Readings

Hours: 24L

Focuses on recent literary production, written in the last decade, from the Caribbean, insular and continental, and its diaspora. Texts not originally written in English are read in translation. While NEW220H1 is an excellent companion course, NEW221H1 can be taken independently.

Exclusion: NEW222H1, NEW222Y1, NEW223Y1
Recommended Preparation: NEW120Y1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

NEW225H1 - Caribbean Societies

Hours: 24L/12T

Offers an interdisciplinary introduction to Caribbean sociology, focusing on the writings of thinkers and scholars from the era of decolonization to the more contemporary period. Themes may include: colonial encounters in the making of Caribbean societies; the role of religion; popular consciousness; histories of capitalism and exploitation; the relationship between political institutions and the wider society; "development", dependency and "underdevelopment".

Exclusion: NEW224Y1
Recommended Preparation: NEW120Y1
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

NEW226H1 - Caribbean Political Thought

Hours: 24L/12T

Examines currents of Caribbean political thought from the Haitian Revolution to the present. Themes may include: struggles for independence and liberation, particularly the Haitian and Cuban Revolutions; theories of dependency; Caribbean political systems; regional integration; contemporary political issues facing Caribbean societies today; analyses of capitalism by Caribbean thinkers.

Exclusion: NEW224Y1
Recommended Preparation: NEW120Y1
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

NEW315H1 - Caribbean Foodways Across History, Culture and Diaspora

Hours: 24L

Examines the historical roots of regional Caribbean food from the colonial period to the present day, and then moves to study Caribbean food in the global and Caribbean-Canadian diasporas, in the literary imagination, as a marker of personal, group and national identity, and as cultural expression.

Prerequisite: Completion of 4.0 FCE.
Recommended Preparation: HIS230H1/HIS231H1/NEW120Y1/NEW220H1/NEW221H1/NEW224Y1/NEW225H1/NEW226H1/NEW240Y1
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)
NEW316H1 - Caribbean Religions

Hours: 24L

Explores the complex and dynamic practices, philosophies and political and cultural contexts of Caribbean religions. Topics may include the profound impact - in both the Caribbean and its diasporas - of Caribbean Christianities, Hinduism and Islam as well as Afro-Creole religions such as Vodun, Rastafari and Santeria.

Prerequisite: HIS230H1/HIS231H1/NEW120Y1/NEW220H1/NEW221H1/NEW224Y1/NEW225H1/NEW226H1
Exclusion: NEW329H1 Special Topics in Caribbean Studies: Caribbean Religions
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

NEW317H1 - Caribbean Women Writers

Hours: 24L

A critical feminist reading of selected works of fiction, poetry and essays by Caribbean women writers. The aim is to appraise the development of this literature, situate texts within the key social and political debates which have influenced the region’s literary output, as well as to consider the implications of the environments within which these writers function.

Prerequisite: Completion of 4.0 FCEs
Exclusion: WGS330H1
Recommended Preparation: NEW120Y1/NEW220H1/NEW221H1/WGS160Y1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

NEW321H1 - Caribbean Visual Arts, Social Media and Performance

Hours: 24L

Explores themes relating to visual arts, social media and theatre in the Caribbean. Topics may include: theatre, film, mixed media arts, the role of the internet and online publishing in the arts and the relationship between artists, the state and wider society.

Prerequisite: HIS230H1/HIS231H1/NEW120Y1/NEW220H1/NEW221H1/NEW224Y1/NEW225H1/NEW226H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

NEW324H1 - The Contemporary Caribbean in a Global Context

Hours: 24L

This upper level course examines the interplay between wider global processes and intra-regional responses that together help shape contemporary Caribbean realities. Topics include: economic crisis and structural adjustment; tourism; the agricultural sector; the Caribbean Single Market and Economy; migration and diaspora.

Prerequisite: HIS230H1/HIS231H1/NEW120Y1/NEW220H1/NEW221H1/NEW224Y1/NEW225H1/NEW226H1
Exclusion: NEW324Y1
Distribution Requirements: Humanities; Social Science
Breadth Requirements: Society and its Institutions (3)

NEW325H1 - Caribbean Women Thinkers

Hours: 24L

An examination of the historical and political significance of writings (literary, political, scholarly) by Caribbean women who engage problems within Caribbean culture and provide insights into the endeavours of the peoples of the region.

Prerequisite: Completion of 4.0 FCE.
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

JHN323H1 - Indigeneity in the Caribbean

Hours: 24L

Explores the legacies of the pre-Columbian era, as well as the post-1492 experiences of people of pre-Columbian Caribbean ancestry. Examines the origins and consequences of the Caribbean’s narrative of "indigenous absence", as well as the relationship between indigeneity, globalization and diaspora.

Prerequisite: INS201Y1/HIS230H1/HIS231H1/NEW120Y1/NEW220H1/NEW221H1/NEW224Y1/NEW225H1/NEW226H1
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)
JLN327H1 - Regional Perspectives on the Hispanic Caribbean

Hours: 24L

Explores the Hispanic areas of the Caribbean including the Caribbean areas of continental Spanish-speaking America. Topics may include: regional politics, state and economy; revolutions and authoritarian regimes; popular culture, the arts and media; religion and society; gender and sexuality; state structures; diasporas and migration.

Prerequisite: HIS230H1/HIS231H1/NEW120Y1/NEW220H1/NEW221H1/NEW224Y1/NEW225H1/NEW226H1/LAS200H1/LAS201H1

Distribution Requirements: Social Science

Breadth Requirements: Society and its Institutions (3)

NEW328H1 - Caribbean Indentureship and its Legacies

Hours: 24L

Explores indentured migration and its legacies from the 17th century through to the present. Encourages students to think comparatively and transnationally about indentureship and diaspora, as well as indentured migration's relationship to contract and labour law.

Prerequisite: HIS230H1/HIS231H1/NEW120Y1/NEW220H1/NEW221H1/NEW224Y1/NEW225H1/NEW226H1

Exclusion: NEW326Y1

Distribution Requirements: Humanities

Breadth Requirements: Society and its Institutions (3)

NEW329H1 - Special Topics in Caribbean Studies

Hours: 24L

An upper level course. Topics of study vary from year to year.

Distribution Requirements: Humanities; Social Science

JQR360H1 - The Canadian Census: Populations, Migrations and Demographics

Hours: 24L/12T

Examines the Canadian population census through the experience of diasporic groups in Canada. Approaches the census as a statistical tool, an historical source and an ideological project of citizenship and nationalism. Uses census data to explore mathematical and statistical concepts and to integrate numerical ways of thinking with qualitative analysis. (Jointly sponsored by African Studies, Diaspora and Transnational Studies, Caribbean Studies, Equity Studies and Latin American Studies).

Prerequisite: DTS200Y1/HIS230H1/HIS231H1/LAS200H1/LAS201H1/NEW120Y1/NEW150Y1/NEW220H1/NEW221H1/NEW224Y1/NEW225H1/NEW226H1/NEW240Y1

Distribution Requirements: Social Science

Breadth Requirements: Society and its Institutions (3)

NEW421H1 - Global Perspectives on the Haitian Revolution

Hours: 24S

Examines the colonial pre-history of the Haitian Revolution (1791-1804). Explores how this transatlantic revolution unfolded, including the emancipation of slaves, Toussaint, Louverture, and the roles played by Spain, the United States and Britain. A reflection on the Revolution in contemporary literature and film.

Prerequisite: HIS230H1/HIS231H1/NEW120Y1/NEW220H1/NEW221H1/NEW224Y1/NEW225H1/NEW226H1

Distribution Requirements: Humanities; Social Science

Breadth Requirements: Society and its Institutions (3)
NEW422H1 - Caribbean Regionalism

Hours: 24S

In a public lecture in 1958, Trinidadian CLR James described Federation as the means to "accomplish the transition from colonialism to national independence." This course explores the shift from James' vision to Jamaican economist Norman Girvan's observation that contemporary "...governments tend to perceive supranationality as less an exercise in collective sovereignty and more a diminution of national sovereignty." Among the topics to be considered are: histories of regionalism; formal and informal dimensions of regional identity-making practices; freedom of movement; governance mechanisms; and widening and deepening debates, with particular reference to the non-Anglophone Caribbean and Latin America.

Prerequisite: Completion of at least 1.0 FCE at the 300-level.
Exclusion: NEW329H1 (Special Topics in Caribbean Studies: Caribbean Regionalism), offered in Winter 2018; NEW423H1 (Special Topics in Caribbean Studies: Caribbean Regionalism), offered in Winter 2019
Recommended Preparation: NEW120Y1/NEW220H1/NEW221H1/HIS231H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

NEW426Y1 - Special Topics in Caribbean Studies

Hours: 72S

An upper level seminar. Topics vary from year to year, depending on the instructor.

Distribution Requirements: Humanities

JLN427H1 - Advanced Topics: The Hispanic Caribbean

Hours: 24S

Explores, in depth, a country in the Hispanic Caribbean or a theme relating to the Hispanic Caribbean. Topics vary each year and may include: Cuban society; Hispanic Caribbean revolutions; Hispanic Caribbean music, art and popular cultures; Hispanic Caribbean diasporas.

Prerequisite: HIS230H1/HIS231H1/JLN327H1/LAS200H1/LAS201H1/NEW120Y1/NEW220H1/NEW221H1/NEW224Y1/NEW225H1/NEW226H1
Exclusion: NEW427H1
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

NEW428H1 - Caribbean Migrations and Diasporas

Hours: 24S

Examines Caribbean migration in the post-slavery era. Topics include: Caribbean diasporas in the West; labour migrations such as the Panama Canal migration; Caribbean migrant communities in Central America; intra-regional migrations between the Caribbean islands; 'guest worker' programs; remittances and their impact; heritage tourism and 'return' migrations.

Prerequisite: HIS230H1/HIS231H1/NEW120Y1/NEW220H1/NEW221H1/NEW224Y1/NEW225H1/NEW226H1
Exclusion: HISC70H3
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)
**NEW429H1 - Caribbean Diaspora in Canada**

**Hours:** 24S

Explores the transnational circuits through which the Caribbean diaspora makes a living and makes life in contemporary Canada. How do we make sense of the Caribbean experience in Canada? What might an engagement with the Caribbean teach us about Canada as a diasporic space?

**Prerequisite:** CDN355H1/HIS230H1/HIS231H1/NEW120Y1/NEW220H1/NEW221H1/NEW224Y1/NEW225H1/NEW226H1

**Exclusion:** NEW329H1 (if taken in Summer 2013 or Summer 2014 as "The Caribbean Diaspora: Travels and Tribulations")

**Distribution Requirements:** Social Science

**Breadth Requirements:** Society and its Institutions (3)

---

**NEW241Y1 - Introduction to Critical Disability Studies**

**Hours:** 48L/24T

Draws on an intersectional history and politics of normativity and bodily difference to understand disability as a diverse and materially salient social category that can be used as a lens to better understand systems and experiences of colonization, race, class, gender, age, etc. Explores scenes of disability or 'crip' solidarity, resistance and cultural production, disability D/deaf and mad arts, coalitional movements for disability justice, collective approaches to access and other non-normative ways of knowing and being.

**Distribution Requirements:** Humanities; Social Science

**Breadth Requirements:** Creative and Cultural Representations (1); Society and its Institutions (3)

---

**NEW240H1 - Introduction to Critical Equity and Solidarity Studies**

**Previous Course Number:** NEW240Y1

**Hours:** 24L/12T

An interdisciplinary intersectional interrogation and examination of systemic inequity and social justice in local and global contexts. Provides a foundation for the field of critical equity and solidarity studies through a concentrated focus on theory and practice as it relates to major concepts, historical perspectives, key debates and radical grassroots community resistance to inequity. Introduces and foregrounds the concept of critical equity as both a theoretical framework and as a lived contestation of the structural nature and effects of systemic inequity.

**Exclusion:** NEW240Y1

**Distribution Requirements:** Humanities; Social Science

**Breadth Requirements:** Society and its Institutions (3)

---

**NEW270H1 - Community (dis)Engagement and Solidarity**

**Hours:** 24L/12T

An introduction to issues and questions arising from the field of 'community engagement'. Explores the meaning, practices and implications of 'community' and 'community (dis)engagement' from multiple perspectives (e.g. the State and its agencies, institutional power, colonial discourse, communities of embodied difference, etc.) Takes a multi-media and arts-based approach to examining self-care from an anti-colonial perspective of central importance in the practice and pedagogy of critical equity and solidarity in the collective struggle for freedom and transformation.

**Distribution Requirements:** Social Science

**Breadth Requirements:** Society and its Institutions (3)

---

**NEW340H1 - Special Topics in Equity Studies**

**Hours:** 36L

An upper level course. Topics of study vary from year to year.

**Prerequisite:** NEW240H1/NEW240Y1

**Distribution Requirements:** Social Science

**Breadth Requirements:** Society and its Institutions (3)
NEW341H1 - Theorizing Settler Colonialism, Capitalism and Race

Hours: 24S

Provides students with a theoretical background for understanding settler colonialism, capitalist social relations and difference (including race, class, gender, disability and sexuality) and solidarity. Provides an analysis of state violence and the formation of hegemonic power relations. Introduces students to the method of thinking *dialectically* to examine the social world as a set of relations between multiple phenomena occurring at the same time. Articulates an emancipatory politics of knowledge production and strategies of building solidarities to enable the imagination of a different future.

Prerequisite: NEW240H1/NEW240Y1
Distribution Requirements: Humanities; Social Science
Breadth Requirements: Society and its Institutions (3)

NEW342H1 - Theory and Praxis in Food Security

Hours: 24S

Explores the concept of food security in the context of equity issues related to global food systems. Students participate in food-related field work activities outside of regular classroom time.

Prerequisite: NEW240H1/NEW240Y1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

NEW344H1 - Body Matters: Oppression, Solidarity and Justice

Hours: 24L

Through lectures, small-group discussions and experiential activities, explores how intersecting cultural stories impact our bodies and how stories inscribed upon us shape and constrain our relations, perceptions, experiences and vulnerabilities as embodied subjects. Draws on work in cultural studies, critical race and decolonial theory, gender studies, queer, trans and disability theory and fat studies to ask: Whose bodies matter? How do bodies come to matter? And, how are we - as embodied beings - engaged in acts of rewriting, resisting and otherwise transforming the body means and what it can do?

Prerequisite: NEW240H1/NEW240Y1/NEW241Y1
Exclusion: NEW344H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1); Society and its Institutions (3)

NEW344Y1 - Body Matters: Oppression, Solidarity and Justice

Hours: 48L

Through lectures, small-group discussions and experiential activities, explores how intersecting cultural stories impact our bodies and how stories inscribed upon us shape and constrain our relations, perceptions, experiences and vulnerabilities as embodied subjects. Draws on work in cultural studies, critical race and decolonial theory, gender studies, queer, trans and disability theory and fat studies to ask: Whose bodies matter? How do bodies come to matter? And, how are we - as embodied beings - engaged in acts of rewriting, resisting and otherwise transforming the body means and what it can do?

Prerequisite: NEW240H1/NEW240Y1/NEW241Y1
Exclusion: NEW344H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1); Society and its Institutions (3)

NEW345H1 - Equity and Activism in Education

Hours: 24L

Examines contemporary issues in education and schooling from a social justice and equity perspective. Engages with a variety of theoretical frameworks including anti-homophobia education, critical pedagogy, critical race theory, decolonizing knowledges, and intersectionality. Includes an overview of educational activist projects.

Prerequisite: NEW240H1/NEW240Y1
Distribution Requirements: Humanities; Social Science
Breadth Requirements: Society and its Institutions (3)

NEW346H1 - Community Organizing and Global Solidarity

Hours: 24L

Considers, from an interdisciplinary perspective, the evolution of community organizations and non-profits in the context of neoliberalism, settler colonialism, and imperialism. Examines the inter-woven relations of political economy, local community development, marginalized communities in Canada, and emergent forms of global/local solidarity.

Prerequisite: NEW240H1/NEW240Y1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)
NEW347H1 - Critical Race and Anti-Racism Studies

Hours: 36L

Considers what it means to pursue integrative anti-racism in organizational/institutional settings such as the workplace, justice system, media and education through a study of theories on race and philosophical tenets of anti-racism. Examines the concept of race as a pedagogical discourse and social-political practice across local, national and global contexts.

Prerequisite: NEW240H1/NEW240Y1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

NEW348H1 - Special Topics in Equity Studies

Hours: 24L

An upper level course. Topics of study vary from year to year.

Prerequisite: NEW240H1/NEW240Y1
Distribution Requirements: Humanities; Social Science
Breadth Requirements: Society and its Institutions (3)

NEW349H1 - Disability Arts and Culture

Hours: 24S

Explores the work of disabled, mad, sick and/or Deaf artists and considers how disability disrupts - or 'crips' - artistic spaces and cultural movements. Engaged with contemporary debates emanating from within these spaces and movements to renewal disability as a dynamic range of bodily practices, aesthetics and relations.

Prerequisite: NEW240H1/NEW240Y1
Distribution Requirements: Humanities; Social Science
Breadth Requirements: Society and its Institutions (3)

JQR360H1 - The Canadian Census: Populations, Migrations and Demographics

Hours: 24L/12T

Examines the Canadian population census through the experience of diasporic groups in Canada. Approaches the census as a statistical tool, an historical source and an ideological project of citizenship and nationalism. Uses census data to explore mathematical and statistical concepts and to integrate numerical ways of thinking with qualitative analysis. (Jointly sponsored by African Studies, Diaspora and Transnational Studies, Caribbean Studies, Equity Studies and Latin American Studies).

Prerequisite: DTS200Y1/HIS230H1/HIS231H1/LAS200H1/ LAS201H1/NEW120Y1/NEW150Y1/NEW220H1/NEW221H1/ NEW224Y1/NEW225H1/NEW226H1/NEW240Y1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

NEW440Y1 - Advanced Special Topics in Equity Studies

Hours: 72L

An advanced level seminar course. Topics of study vary from year to year.

Prerequisite: NEW240H1/NEW240Y1 and an additional 0.5 Equity Studies Core Group 300+ level course
Distribution Requirements: Social Science
Breadth Requirements: Thought, Belief and Behaviour (2); Society and its Institutions (3)

NEW441H1 - Advanced Topics in Equity Studies

Hours: 24S

An advanced level seminar course. Topics vary from year to year.

Prerequisite: NEW240H1/NEW240Y1
Distribution Requirements: Humanities
NEW442H1 - Food Systems and the Politics of Resistance

Hours: 36L

Examines the food we eat in the local and global context of food systems, food sovereignty and food movements. Explores the possibilities for food as a catalyst for learning, resistance and social change. Consult the Program Office for course enrolment procedures.

Note: This is a joint graduate/undergraduate course.

**Prerequisite:** 14.0 credits, NEW240H1/NEW240Y1, NEW342H1, an additional 0.5 Equity Studies Core Group 300+ level course, a GPA of at least 3.5 in NEW Equity Studies courses.

**Distribution Requirements:** Social Science  
**Breadth Requirements:** Society and its Institutions (3)

NEW446H1 - Community Development and Social Change

Hours: 36L

Explores the significance of community development as a social change strategy, through a critical social analysis of local and global case studies and policies. Consult the Program Office for course enrolment procedures.

Note: This is a joint graduate/undergraduate course.

**Prerequisite:** 14.0 credits, NEW240H1/NEW240Y1, NEW346H1, an additional 0.5 Equity Studies Core Group 300+ level course, a GPA of at least 3.5 in NEW Equity Studies courses.

**Distribution Requirements:** Social Science  
**Breadth Requirements:** Society and its Institutions (3)

NEW443H1 - Advanced Special Topics in Equity Studies

Hours: 36S

An advanced level seminar course. Topics of study vary from year to year.

**Prerequisite:** NEW240H1/NEW240Y1 and an additional 0.5 Equity Studies Core Group 300+ level course.

**Distribution Requirements:** Social Science  
**Breadth Requirements:** Society and its Institutions (3)

NEW444H1 - Anti-Colonization and the Politics of Violence

Hours: 24S

Interrogates how theorizations, embodied lived experiences and lived resistance to structural violence can create social, epistemological, ontological and political decolonizing/anti-colonial transformation. Examines the work of Frantz Fanon, Kwame Ture, Eric Williams, Walter Rodney, The Black Panther Party for Self-Defense, Elaine Brown and Assata Shakur amongst others to search for alternative and oppositional ways to rethink and respond to violence. Pursues a nuanced understanding of disability as a socio-political phenomenon.

**Prerequisite:** NEW240H1/NEW240Y1 and an additional 0.5 Equity Studies Core Group 300+ level course.

**Distribution Requirements:** Humanities  
**Breadth Requirements:** Society and its Institutions (3)

NEW447H1 - Race, Ethnicity and Educational Praxis

Hours: 36L

An application of critical race, ethnicity and social difference discourse to educational praxis. Examines the articulation of theoretical perspectives to explain particular incidents in society, and to understand forms of institutional racism and emerging minority responses. Explores the implications for pedagogical practices in education.

**Prerequisite:** NEW240H1/NEW240Y1, NEW347H1 and one additional half-course at the 300+ level in Equity Studies; permission of Program Director.

**Distribution Requirements:** Social Science  
**Breadth Requirements:** Society and its Institutions (3)

NEW448H1 - Disability and the Child

Hours: 24S

Examines a range of historical and present-day meanings associated with the figure of the disabled child. Draws on work emanating from a variety of disciplines, including history, psychology, neuroscience, visual arts, film and literature, and engaging with critical theories of race, class, gender, sexuality and disability, to discuss ideas and issues relevant to the construction of 21st century disabled childhoods. Counters the near monolithic story of disability as threat to the presumed goodness of normative childhood by asking: what alternate depictions and narratives of disabled childhood exist and what can they teach us?

**Prerequisite:** NEW240H1/NEW240Y1/NEW241Y1 and an additional 0.5 Equity Studies Core Group 300+ level course

**Exclusion:** NEW448H1 (Advanced Special Topics in Disability Studies: Disability and the Child), offered in Fall 2016, Fall 2018 and Fall 2019

**Distribution Requirements:** Social Science  
**Breadth Requirements:** Society and its Institutions (3)
NEW449H1 - Contemporary Theories in Critical Disability Studies

**Hours:** 24S

Explores competing conceptions, definitions and practices of disability through a range of critical disability theories, including crip-of-colour critique, decolonial theories of disability studies and black feminist disability frameworks. Enacts disability studies as a justice-oriented methodology or practice that has value for understanding and responding to colonial systems of race, class, gender and disability. Interrogates the shape and limits of disability and disability studies to ask the provocative question: what can disability studies do?

**Prerequisite:** NEW240H1/NEW240Y1 and 0.5 FCE from NEW241Y1/NEW344Y1/NEW349H1/NEW448H1

**Distribution Requirements:** Humanities; Social Science

**Breadth Requirements:** Society and its Institutions (3)

JNS450H1 - Sexuality & Disability

**Hours:** 24S

An interdisciplinary and intersectional approach to the study of disability and sexuality. Students will engage with historical, mainstream and critical discourses and explore complex issues and representations pertaining to disability, sexuality, sexual practices and desire. Draws from a range of writings and cultural texts in queer, crip and sexuality studies.

**Prerequisite:** SDS255H1/SDS256H1 (UNI255H1/UNI256H1) or NEW240Y1/NEW241Y1 or permission of the instructor

**Exclusion:** SDS455H1: Special Topics in Sexual Diversity: Sexuality & Disability (2015)

**Distribution Requirements:** Social Science

**Breadth Requirements:** Society and its Institutions (3)

NEWT469Y1 - Decolonizing Research Methodologies for New Researchers

**Hours:** 48S

A feminist/anti-racist/anti-colonial/anti-imperialist exploration of research methods. Examines the work of researchers and scholar-activists who seek to humanize research with communities detrimentally impacted by colonial, imperialist, heteropatriarchal research agendas and processes. Supports students’ independent research projects through guidance from the course instructor. Prepares students for graduate studies or research-oriented careers. Not eligible for CR/NCR option.

**Prerequisite:** NEW240H1/NEW240Y1, 1.0 FCE from Equity Studies Core Group 300+ level courses and a GPA of 3.0 from NEW Equity Studies Core courses.

**Distribution Requirements:** Social Science

**Breadth Requirements:** Creative and Cultural Representations (1); Society and its Institutions (3)

**Community Engaged Learning (CEL) Courses**

NEW495Y1 - Independent Community Engaged Learning

**Hours:** 96P/24S

A placement-based course in which students develop knowledge, practice and professional skills appropriate to the social purpose sector while working to support programming for community partners. The accompanying seminar considers social justice issues and models community-engagement practice, supporting students’ experiential, participatory and reflective learning. Not eligible for CR/NCR option.

**Recommended Preparation:** NEW120Y1/NEW150Y1/NEW220H1/NEW221H1/NEW224Y1/NEW225H1/NEW226H1/NEW232H1/NEW232Y1/NEW240H1/NEW241Y1/NEW270H1/HIS230H1/HIS231H1/other NEW courses

**Distribution Requirements:** Humanities; Social Science

**Breadth Requirements:** Society and its Institutions (3)
NEW496H1 - Independent Community Engaged Learning

Hours: 48P/12S

A placement-based course in which students develop knowledge, practice and professional skills appropriate to the social purpose sector while working to support programming for community partners. The accompanying seminar considers social justice issues and models community-engagement practice, supporting students’ experiential, participatory and reflective learning. Not eligible for CR/NCR option. (Offered only in special circumstances)

Recommended Preparation: NEW120Y1/ NEW150Y1/ NEW220H1/ NEW221H1/ NEW224Y1/ NEW225H1/ NEW226H1/ NEW232H1/ NEW232Y1/ NEW240H1/ NEW240Y1/ NEW241Y1/ NEW270H1/ HIS230H1/ HIS231H1/ other NEW courses

Distribution Requirements: Humanities; Social Science

Breadth Requirements: Society and its Institutions (3)

NEW497Y1 - Community Based Research as Resistance and Social Change

Hours: 96P/24S

Explores how research is conducted and mobilized by marginalized communities as a form of resistance, knowledge mobilization and social change. Examines the foundations of empirical research, the role of the university as a site of research activity and knowledge production and the ethics and methods of community-based research. Informed by examples of grassroots research projects from Black, Indigenous and racialized communities locally, nationally and globally, students engage in community-based and participatory action research projects. Not eligible for CR/NCR option.

Prerequisite: Completion of a minimum of 9.0 FCE and successful completion of the application process.

Recommended Preparation: NEW120Y1/ NEW150Y1/ NEW220H1/ NEW221H1/ NEW224Y1/ NEW225H1/ NEW226H1/ NEW232H1/ NEW232Y1/ NEW240Y1/ NEW241Y1/ NEW270H1/ HIS230H1/ HIS231H1/ other NEW courses

Distribution Requirements: Social Science

Breadth Requirements: Society and its Institutions (3)

Independent Studies Courses

NEW299Y1 - Research Opportunity Program

Credit course for supervised participation in faculty research project. Details at https://www.artsci.utoronto.ca/current/academics/research-opportunities/... Not eligible for CR/NCR option.

Distribution Requirements: Humanities

NEW390Y1 - New College Independent Studies

Prerequisite: Minimum of 8.0 FCEs completed and permission of College

NEW391H1 - New College Independent Studies

Prerequisite: Minimum of 8.0 FCEs completed and permission of College
NEW398Y0 - Research Excursion
Credit course for supervised participation in faculty research project. Details at https://www.artsci.utoronto.ca/current/academics/research-opportunities/... Not eligible for CR/NCR option.

Distribution Requirements: Humanities; Social Science

NEW490Y1 - New College Independent Studies

Prerequisite: Minimum of 12.0 FCEs completed and permission of College

NEW491H1 - New College Independent Studies

Prerequisite: Minimum of 12.0 FCEs completed and permission of College

Interdisciplinary Courses

NEW198H1 - Myths of French Sensuality
Hours: 24S
A study of French cultural history with respect to the French reputation for the indulgence and refinement of all the senses in visual arts, music, cuisine, perfume and fashion. Supporting mythologies are investigated, along with stereotype formation, exoticism and cultural appropriation. Through various research, writing and presentation techniques, including mini-essays, poster displays and pecha kucha, students will explore what is left of this reputation in an era of globalization. No knowledge of French is necessary. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

NEW199H1 - We Are What We Eat: The Example of French Cuisine
Hours: 24S
The historical study of French cuisine reveals a culture rich in controversy and conflicting narratives. These include contested origins, court intrigues, sensual delight, revolutions, colonialism and slavery, controversial farm practices, haute cuisine, cuisine bourgeoise, regionalism, European regulation. Through various research, writing and presentation techniques, including mini-essays, wikis and pecha kucha, students will explore what is left of French food culture in an era of globalization. No knowledge of French is necessary. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

NEW271H1 - Interdisciplinary Special Topics
Hours: 24L
Topics vary from year to year depending on the instructor. Consult timetable for current offering information.

JQR360H1 - The Canadian Census: Populations, Migrations and Demographics
Hours: 24L/12T
Examines the Canadian population census through the experience of diasporic groups in Canada. Approaches the census as a statistical tool, an historical source and an ideological project of citizenship and nationalism. Uses census data to explore mathematical and statistical concepts and to integrate numerical ways of thinking with qualitative analysis. (Jointly sponsored by African Studies, Diaspora and Transnational Studies, Caribbean Studies, Equity Studies and Latin American Studies).

Prerequisite: DTS200Y1/HIS230H1/HIS231H1/LAS200H1/LAS201H1/NEW120Y1/NEW150Y1/NEW20H1/NEW21H1/NEW224Y1/NEW225H1/NEW226H1/NEW240Y1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

NEW370Y1 - Interdisciplinary Special Topics
Hours: 48L
Topics vary from year to year depending on the instructor.
NEW371H0 - International Field Course

Provides opportunities for students to engage in an international experiential learning program related to their academic areas of study. The course involves seminars, group exercises, site visits and a final project. Some sessions will be held in Toronto prior to and following the trip. Not eligible for CR/NCR option.

Prerequisite: Foundational course from participating programs (Indigenous Studies; African Studies; Buddhism, Psychology and Mental Health; Caribbean Studies; Equity Studies; Human Biology)

Distribution Requirements: Social Science

NEW372H1 - Interdisciplinary Special Topics

Hours: 24L

Topics vary from year to year depending on the instructor. Consult timetable for current offering information.

Prerequisite: None

NEW471H1 - Interdisciplinary Special Topics

Hours: 24S

Topics vary from year to year depending on the instructor.

Distribution Requirements: Humanities

Interdisciplinary Courses in Jungian Theory

NEW302Y1 - C.G. Jung: Stories, Patterns, Symbols

Hours: 48L/24S

Impact of Jung's analytical psychology, critical methodology and interpretative practice on issues in religion, anthropology, art and literature, popular culture, gender studies and postmodernist critique. Theoretical studies include traditional Jungian and contemporary post-Jungian texts together with feminist and non-Jungian sources.

Prerequisite: Four FCEs, at least one of which should be in the humanities

Distribution Requirements: Humanities

Breadth Requirements: Creative and Cultural Representations (1); Thought, Belief and Behaviour (2)

NEW303H1 - Hypotheses of the Unconscious

Hours: 12L/12S

Current discussions of the hypotheses, starting with Freud's and Jung's hypotheses, especially Jung's collective unconscious; critical examination through retrospective analysis of the evolution and development of the concept in works from philosophy, psychology, poetry, ethnology, science and popular culture that anticipated, influenced or were influenced by the work of Freud and Jung, post-Freudians and post-Jungians.

Prerequisite: Four FCEs, at least one of which should be in the humanities

Recommended Preparation: NEW302Y1

Distribution Requirements: Humanities

Breadth Requirements: Thought, Belief and Behaviour (2)

NEW402Y1 - Advanced Special Topics in Jungian Theory

Hours: 48S

Topics vary from year to year, depending on the interests of students and instructors.

Prerequisite: Permission of instructor

Distribution Requirements: Humanities

NEW403H1 - Advanced Special Topics in Jungian Theory

Hours: 24S

Topics vary from year to year depending on the interests of students and instructors.

Prerequisite: Permission of instructor

Distribution Requirements: Humanities
International Foundation Program Courses

IFP100H1 - Themes in World History

Hours: 24L

Surveys the development of human societies from their origins to the present. Topics may include the environment, cultural development and interaction, the creation and nature of belief systems, political, economic and social structures, gender relations, and the relationship between global patterns and local development. Restricted to students enrolled in the summer offering of the International Foundation Program (IFP). Not eligible for CR/NCR option.

Exclusion: IFP100Y1/UTP100H1
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

IFP100Y1 - Themes in World History

Hours: 48L/36T

Surveys the development of human societies from their origins to the present using examples from across the world. Topics may include the environment, cultural development and interaction, the creation and nature of belief systems, political, economic and social structures, gender relations, and the relationship between global patterns and local developments. Enrolment is restricted to students registered in the International Foundation Program. Not eligible for CR/NCR option.

Distribution Requirements: Humanities; Social Science
Breadth Requirements: Society and its Institutions (3); Thought, Belief and Behaviour (2)

UTP100H1 - Themes in World History

Hours: 24L

Surveys the development of human societies from their origins to the present. Topics may include the environment, cultural development and interaction, the creation and nature of belief systems, political, economic and social structures, gender relations, and the relationship between global patterns and local development. Restricted to students enrolled in the UTPrep program.

Exclusion: IFP100H1/IFP100Y1
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)
Nutritional Sciences

Introduction

Nutritional Sciences represents an exciting and challenging area of study of a truly interdisciplinary nature. Understanding of the impact of nutrition on health and its role in disease is based upon a knowledge of the metabolic processes involved (nutrient requirements and utilization, food additive metabolism and safety), of the chemistry of foods (food preservation, food production) and of social and behavioural factors (determinants of food selection). Thus, in this program, the physical, biological and social sciences are integrated in consideration of the national and international goals of achieving optimal health through proper nutrition.

Most career opportunities in Nutritional Sciences require training beyond the undergraduate level. The Major Program provides excellent preparation for entry into postgraduate studies in nutrition research or for a professional faculty such as Medicine and Dentistry.

Please note that this Department does not offer an undergraduate dietetics program. Students interested in this qualification should contact Dietitians of Canada for information (www.dietitians.ca).

Students interested in applying to the MPH: Nutrition and Dietetics Program, through the Dalla Lana School of Public Health, are advised to contact the program director during their second year of undergraduate studies.

Undergraduate Coordinator:
Dr. Ahmed El-Sohemy

Medical Sciences Building, 5th Floor, Room 5255 (416-978-2747)

Nutritional Sciences Programs

Nutritional Sciences Major
(Science Program) - ASMAJ1068

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

Variable Minimum Grade/Grade Average
A minimum grade average in required courses or their equivalents is needed for entry, and this minimum changes each year depending on available spaces and the number of applicants. The following courses must be completed:

- BIO120H1, BIO130H1
- (CHM135H1, CHM136H1)/(CHM138H1, CHM139H1)/CHM151Y1

To ensure that students admitted to the program will be successful, applicants with a final grade lower than 60% in each course, or a final grade average lower than 70% in these required courses will not be considered for admission. Please note that obtaining this minimum grade average does not guarantee admission to the program.

Please consult the Arts & Science Program Toolkit for more information on program enrolment.

Completion Requirements:

First Year:
( BIO120H1, BIO130H1); ( CHM135H1, CHM136H1)/( CHM138H1, CHM139H1)/CHM151Y1

Second Year:
NFS284H1; BCH210H1; ( STA220H1, STA221H1)/( PSY201H1, PSY202H1)

Third Year:
( PSL300H1, PSL301H1)/PSL302Y1; CSB349H1/PSL350H1/BCH311H1; any two of NFS382H1, NFS386H1, NFS301H1,NFS302H1, NFS394Y1

Fourth Year:
Any three of: NFS400H1, NFS484H1, NFS485H1, NFS486H1, NFS487H1, NFS488H1, NFS489H1, NFS490H1, NFS494Y1
**Nutritional Sciences Courses**

**NFS284H1 - Basic Human Nutrition**

**Hours:** 36L

An introductory course to provide the fundamentals of human nutrition to enable students to understand and think critically about the complex interrelationships between food, nutrition, health and the environment.

**Exclusion:** HLTB11H3

**Recommended Preparation:** (BIO120H1, BIO130H1)/BIO150Y1; (CHM138H1, CHM139H1)/(CHM135H1, CHM136H1)/CHM151Y1

**Distribution Requirements:** Science

**Breadth Requirements:** Living Things and Their Environment (4)

**NFS301H1 - Nutrition Literacy: Sorting Science from Snake Oil**

**Hours:** 36L

This course will help students learn how to recognize the strengths and limitations of various nutrition research methods, find reliable nutrition information on the Internet and develop systematic thinking skills to critically evaluate the quality of nutrition information in both the scientific literature and popular media.

**Prerequisite:** NFS284H1

**Distribution Requirements:** Science

**Breadth Requirements:** Living Things and Their Environment (4)

**NFS302H1 - Nutrition, Athletics, Performance and Behaviour**

**Hours:** 36L

This course will give an overview of the emerging and advancing role of chronic diet and supplements in athletics, performance and behavior.

**Prerequisite:** NFS284H1

**Exclusion:** KPE328H1

**Distribution Requirements:** Science

**Breadth Requirements:** Living Things and Their Environment (4)

**NFS382H1 - Vitamin and Mineral Metabolism Throughout the Life Cycle**

**Hours:** 36L

Micronutrients are essential for health throughout the life cycle. This course examines the role of micronutrients during development and ageing with some emphasis on disease prevention and pathogenesis. Students develop critical appraisal skills, an understanding of the principles of study design and learn to write in a scientific style.

**Prerequisite:** NFS284H1

**Distribution Requirements:** Science

**Breadth Requirements:** Living Things and Their Environment (4)

**NFS386H1 - Food Chemistry**

**Hours:** 36L

Structure, composition and chemical and biochemical reactions in foods during postharvest/postmortem, processing, storage and utilisation. Implications for organoleptic properties, nutritional value, toxicity and human health.

**Prerequisite:** CHM138H1/CHM139H1/CHM135H1/CHM136H1

**Recommended Preparation:** NFS284H1

**Distribution Requirements:** Science

**Breadth Requirements:** Living Things and Their Environment (4)

**NFS394Y1 - Research Course in Nutritional Science**

**Hours:** 144P

Research experience under the supervision of a Departmental staff member. The course entails designing and carrying out a small research project and the preparation and presentation of both a research proposal and a final report. Note that the research project NFS394Y1 requires the prior consent of a staff member who will supervise the project and departmental approval before enrolment. The student is responsible for locating a supervisor. Not eligible for CR/NCR option.

**Prerequisite:** NFS284H1, Permission of Department and Project Supervisor

**Distribution Requirements:** Science

**Breadth Requirements:** Living Things and Their Environment (4)
NFS400H1 - Functional Foods and Nutraceuticals in Human Nutrition

Hours: 36L

This course will demonstrate the rationale, including health benefits, development and marketing of functional foods and nutraceuticals.

Prerequisite: BCH210H1, NFS284H1, (PSL300H1, PSL301H1)/PSL302Y1

Recommended Preparation: CSB349H1/PSL350H1/BCH311H1, NFS386H1

Distribution Requirements: Science

Breadth Requirements: Living Things and Their Environment (4)

NFS484H1 - Advanced Nutrition

Hours: 24L/12T

Physiological and biochemical features of nutrient needs. The roles of nutrients in the development and adaptability of the whole body, organs and cells. Interpretation of current research data.

Prerequisite: BCH210H1, CSB349H1/PSL350H1/BCH311H1, NFS284H1, (PSL300H1, PSL301H1)/PSL302Y1, (STA220H1, STA221H1)/JBS229H1 or permission of instructor

Distribution Requirements: Science

Breadth Requirements: Living Things and Their Environment (4)

NFS485H1 - Diet, Microbiome & Health (formerly Nutritional Microbiology)

Hours: 36L

Provides an integrated approach to how prokaryotes modulate nutrient availability and how they interact with the host to impact human health from a molecular perspective.

Prerequisite: BCH210H1, CSB349H1/PSL350H1/BCH311H1/MGY311Y1, NFS284H1, (PSL300H1, PSL301H1)/PSL302Y1 or permission of the instructor

Distribution Requirements: Science

Breadth Requirements: Living Things and Their Environment (4)

NFS486H1 - Obesity: Metabolic and Clinical Aspects

Hours: 36L

Obesity and its co-morbidities illustrated with pathophysiological and biochemical principles and clinical case studies.

Prerequisite: BCH210H1, NFS284H1, (PSL300H1, PSL301H1)/PSL302Y1

Recommended Preparation: CSB349H1/PSL350H1/BCH311H1,(STA220H1, STA221H1)

Distribution Requirements: Science

Breadth Requirements: Living Things and Their Environment (4)

NFS487H1 - Nutrigenomics and Personalized Nutrition

Hours: 36L

The impact of the human genome on nutrition research. Experimental approaches to investigating gene-diet interactions. Understanding how genetic variability affects nutrient response, and how dietary factors regulate gene expression. Application of the various 'omics' technologies to nutrition research as well as exploring the social, legal and ethical issues associated with direct-to-consumer marketing of genetic tests for personalized nutrition.

Prerequisite: NFS284H1, CSB349H1/PSL350H1/BCH311H1

Distribution Requirements: Science

Breadth Requirements: Living Things and Their Environment (4)

NFS488H1 - Nutritional Toxicology

Hours: 36L

Occurrence, mechanism of action, safety and health implications of chemicals naturally present in or added to foods. Interactions of nutrients and toxicants and the effects on their metabolism and utilization. Food safety evaluation and regulatory control.

Prerequisite: BCH210H1, NFS284H1

Distribution Requirements: Science

Breadth Requirements: Living Things and Their Environment (4)
NFS489H1 - Nutritional Neurosciences

Hours: 36L

This course provides an integrated approach to how brain function regulates and in turn is regulated by nutrition from a biochemical perspective.

Prerequisite: BCH210H1, BCH311H1/CSB349H1/PSL350H1, NFS284H1, PSL300H1, PSL301H1, PSL302Y1

Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

NFS490H1 - International and Community Nutrition

Hours: 36L

This course focuses on current issues in international and community nutrition including global and domestic food security, micronutrient deficiencies and other forms of undernutrition, maternal and infant/child nutrition, dietary guidance, and food and nutrition policy. The course will consider the environmental, sociopolitical, cultural and biosocial contexts of nutrition.

Prerequisite: NFS284H1
Recommended Preparation: GGR107Y1/POL103Y1/SOC101Y1
Distribution Requirements: Science
Breadth Requirements: Society and its Institutions (3)

NFS494Y1 - Research Projects in Nutritional Sciences

Hours: 144P

Research experience under the supervision of a Departmental staff member. The course entails designing and carrying out a small research project and the preparation and presentation of both a research proposal and a final report. Note that the research project NFS494Y1 requires the prior consent of a staff member who will supervise the project and departmental approval before enrolment. The student is responsible for locating a supervisor. Not eligible for CR/NCR option.

Prerequisite: NFS284H1, Permission of Department and Project Supervisor
Distribution Requirements: Science
Peace, Conflict and Justice

Faculty List

Associate Professors
Ron Levi, BCL, LLB, LLM, SJD (George Ignatieff Chair of Peace and Conflict Studies)
Nancy Bertoldi, MESc, MA, PhD

Assistant Professors
Jon Lindsay, BS, MS, PhD
Laura Niemi, BA, MA, PhD
Paola Salaridi, BA, MA, PhD

Introduction

The Trudeau Centre for Peace, Conflict and Justice administers the program in Peace, Conflict and Justice, at the Munk School of Global Affairs & Public Policy.

The Peace, Conflict and Justice program provides undergraduates with an interdisciplinary education covering three central pillars: the meanings and causes of conflict, peace, and justice; the lived experiences of living in the context of conflict and struggles for peace and justice; and approaches to resolving conflict and producing peace and/or justice. The topics of study are wide-ranging, including the study of peacemaking and peace-building, interstate war and intrastate conflicts, insurgencies, revolutions and rebellions, ethnic strife, global justice, and negotiation theory. In doing so, we address some of the world’s most urgent humanitarian problems, and train students to deeply analyze these issues across several levels of analysis, from the local through the national and the global. Students interested in this program are strongly encouraged to consider pursuing a double major in related fields, especially International Relations. Other related fields include: Economics, Political Science, Sociology, Psychology, Anthropology, Geography, History, Diaspora and Transnational Studies, Ethics, Society and Law and Women and Gender Studies.

Peace, Conflict and Justice Programs

Peace, Conflict and Justice Specialist (Arts Program) - ASSPE1228

Enrolment Requirements:

This is a limited enrollment program that can only accommodate a limited number of students. Admission is determined by a range of criteria, including at the initial stage a student's academic background, a statement of interest in the program, and as a later stage of the process, a personal interview on invitation of the Program Director. In some cases, reference letters may be requested by the Program Director. In the past, enrollment in Peace, Conflict and Justice has proven to be extremely competitive across all these dimensions, and an applicant's success in any one of these dimensions does not necessarily guarantee admission to the program in any given year.

Completion Requirements:

(12 full courses or their equivalent, including at least one 400-series course)

1. (ECO101H1 + ECO102H1 + ECO105Y1 + HIS103Y1; (PSY100H1 + PSY220H1) + SOC100H1 + SOC150H1; POL208H1; 0.5 FCE in quantitative methods from one of the following courses: ECO220Y1, GGR270H1, POL222H1, PSY201H1, PSY202H1, SOC202H1, STA201H1, STA220H1, STA221H1, or an appropriate substitution on the approval of the Program Director.

Except for POL208H1, substitutions may be permitted for other introductory courses in relevant disciplines, based on a student’s rationale and on approval of the Program Director.

2. PCJ260Y1; PCJ360H1; PCJ362H1; PCJ363H1; PCJ460H1; PCJ461H1

3. Three FCEs from one of Groups A, B, C, D, E or F (below), or substitutions with a rationale that must be approved by the Program Director. Students may substitute from different disciplines or with different courses from within these disciplines. At least one FCE must be at the 300+-level.

4. Three complementary FCEs with either a disciplinary, regional, or thematic focus relevant to Peace, Conflict and Justice (on approval of the Director, based on the needs of students interdisciplinary programs of study). At least two FCEs must be at the 300+-level. Up to 1.0 FCEs of MUN courses may be used to fulfill this requirement, subject to approval by the Director.

Disciplinary focus:

3.0 FCEs from one of ANT, ECO, GGR and Environmental Studies (combined), HIS, PHL, POL, PSY, RLG, SLA, SOC, or from other units with a rationale approved by the Program Director.

(Note: The disciplinary focus in this cluster must be different from the discipline chosen in requirement 3. For instance, HIS is excluded for students who have taken 3 HIS FCEs to meet requirement 3; POL is excluded for students who have taken 3 POL FCEs, etc.)
Peace, Conflict and Justice

needs of students interdisciplinary programs of study.

PSY220H1
POL345Y1
MUN102H1
HIS241H1

must be at the 300+ series level, from:

2. rationale and on approval of the Program Director.

introductory courses in relevant disciplines, based on a student's academic background, a short essay, a writing sample, a resume, and as a later stage of the process, a personal interview on invitation of the Program Director. In some cases, reference letters may be requested by the Program Director. In the past, enrollment in Peace, Conflict and Justice has proven to be extremely competitive across all of these dimensions, and an applicant's success in any one of these dimensions does not necessarily guarantee admission to the program in any given year. While it is not a prerequisite for program admission, students in their first year who are interested in the program in Peace, Conflict and Justice are advised to take three introductory courses in History, Economics, Psychology, Sociology and/or Political Science (courses listed in Cluster 1 for the major and specialist).

Completion Requirements:

(7.5 full courses or their equivalent)

1. (ECO101H1+ ECO102H1/ ECO105Y1/ HIS103Y1; (PSY100H1+ PSY220H1)/ (SOC100H1+ SOC150H1); POL208H1; 0.5 FCE in quantitative methods from one of the following courses: ECO220Y1, GGR270H1, POL222H1, PSY201H1, PSY202H1, SOC202H1, STA201H1, STA220H1, STA221H1, or an appropriate substitution on the approval of the Program Director.

Except for POL208H1, substitutions may be permitted for other introductory courses in relevant disciplines, based on a student's rationale and on approval of the Program Director.

2. PCJ260Y1; PCJ360H1; PCJ362H1/ PCJ363H1; PCJ460H1

3. 2.0 FCE of complementary courses, at least 1.0 FCE of which must be at the 300+ series level, from: CR142H1; ECO200Y1; ECO202Y1; ECO220Y1; GGR240H1; GGR241H1; GGR419H1; HIS241H1; HIS242H1; HIS401H1; JPR364Y1; MUN101H1/ MUN102H1; PHL378H1; POL201Y1; POL326Y1; POL340Y1; POL345Y1; PHL373H1; POL412H1; POL417Y1; POL459Y1; PSY220H1; PSY270H1; PSY322H1; RLG280Y1; RLG309H1; SOC210H1; SOC260H1; SOC249H1; SOC367H1 or alternative courses from within these disciplines below. Please note that not all courses may be offered in a given year, and students are responsible for checking and meeting co- and prerequisites for all courses.

Peace, Conflict and Justice Major

(Arts Program) - ASMAJ1228

Enrolment Requirements:

While we welcome students with diverse experiences, this is a limited enrollment program that can accommodate a limited number of students. Admission is determined by a range of criteria, including at the initial stage a student's academic background, a short essay, a writing sample, a resume, and as a later stage of the process, a personal interview on invitation of the Program Director. In some cases, reference letters may be requested by the Program Director. In the past, enrollment in Peace, Conflict and Justice has proven to be extremely competitive across all of these dimensions, and an applicant's success in any one of these dimensions does not necessarily guarantee admission to the program in any given year. While it is not a prerequisite for program admission, students in their first year who are interested in the program in Peace, Conflict and Justice are advised to take three introductory courses in History, Economics, Psychology, Sociology and/or Political Science (courses listed in Cluster 1 for the major and specialist).

Course Groups

Group A

- HIS103Y1 Statecraft and Strategy: An Introduction to the History of International Relations
- HIS106Y1 The African Diaspora in the Americas, 1492-1804
- HIS202H1 Gender, Race and Science
- HIS241H1 Europe in the Nineteenth Century, 1815-1914
- HIS242H1 Europe in the 20th Century
- HIS243H1 Early Modern Europe, 1450-1648
- HIS244H1 Early Modern Europe, 1648-1815
- HIS250Y1 History of Russia
- HIS251Y1 History of East Central Europe
- HIS271Y1 American History Since 1607
- HIS303H1 The Mediterranean, 600-1300: Crusade, Colonialism, Diaspora
- HIS311Y1 Introduction to Canadian International Relations
- HIS325H1 Imperial Russia
- HIS329H1 Central Middle Ages (900-1200)
- HIS338H1 The Holocaust, to 1942 (formerly HIS338Y1/398Y1)
- HIS343H1 History of Modern Intelligence
- HIS344H1 Conflict and Co-operation in the International System Since 1945
- HIS347H1 The Country House in England 1837-1939
- HIS355H1 A History of Pre-modern Medicine
- HIS359H1 Regional Politics and Radical Movements in the 20th Century Caribbean
- HIS364H1 From Revolution to Revolution: Hungary Since 1848
- HIS376H1 The United States: Now and Then
- HIS377H1 20th-Century American Foreign Relations
- HIS386H1 Fascism
- HIS390H1 Slavery in Latin America
- HIS401H1 History of the Cold War
- HIS405Y1 Canadian Foreign Relations
- HIS407H1 Imperial Germany, 1871-1918
- HIS414H1 Down and Out in Medieval Europe
- HIS415Y1 Nationalism & Memory in Modern Europe
- HIS424H1 Violence in Medieval Society
- HIS436H1 Stalinist Terror
- HIS451H1 World War II in East Central Europe
- HIS461H1 Poland in the 20th Century
- HIS473H1 The United States and Asia since 1945
- HIS475H1 Senior Thesis Seminar
- HIS480H1 Modernity and Its Others: History and Postcolonial Critique
Group B

- POL101H1 The Real World of Politics: An Introduction
- POL106H1 Contemporary Challenges to Democracy: Democracy in the Social Media Age
- POL107H1 What Went Wrong? A Post Mortem of Political Disasters, Catastrophic Policy Failures, and Epic Marches of Folly
- POL109H1 Might and Right: Power and Justice in International Relations
- POL105H1 Settler Colonialism and Enduring Indigeneity
- POL201H1 Politics of Development
- POL205H1 International Relations in the Anthropocene
- POL208H1 Introduction to International Relations
- POL211H1 Intelligence, Disinformation, and Deception: Challenges of Global Governance in the Digital Age
- POL223H1 Globalization and Development: Issues and Challenges
- POL301Y1 Government and Politics in Africa
- POL305Y1 Politics and Society in Latin America
- POL312Y1 Canadian Foreign Policy
- POL324H1 European Union: Politics, Institutions and Society
- POL326Y1 United States Foreign Policy
- POL330Y1 Politics and Morality
- POL340Y1 International Law
- POL354H1 Politics and Society in Russia
- POL412H1 Human Rights and International Relations
- POL416H1 Civil War and Counterinsurgency
- POL417Y1 Global South in International Politics
- POL419H1 Quantitative Methods and Data Analysis
- POL432H1 Feminist Theory: Challenges to Legal and Political Thought
- POL442H1 Topics in Latin American Politics
- POL447H1 Political Economy of Development
- POL459Y1 The Military Instrument of Foreign Policy
- POL464H1 Urban Policy and Policymaking
- POL467H1 The Politics of Immigration and Multiculturalism in Canada
- POL468H1 International Relations of Ethnic Conflict
- POL476H1 Topics in Public Policy
- POL479H1 Topics in Middle East Politics
- POL480H1 Studies in Comparative Political Theory
- POL486H1 Topics in International Politics I
- POL487H1 Topics in International Politics II
- NEW250Y1 Africa in the 21st Century: Challenges and Opportunities
- NEW354H1 African Cultures and Development
- NMC476H1 Politics of Archaeology in the Modern Middle East
- NMC477H1 Modern Turkey

Group C

- PSY100H1 Introductory Psychology
- PSY201H1 Statistics I
- PSY210H1 Introduction to Development
- PSY220H1 Introduction to Social Psychology
- PSY270H1 Introduction to Cognitive Psychology
- PSY280H1 Sensation and Perception
- PSY311H1 Social Development
- PSY312H1 Cognitive Development
- PSY320H1 Social Psychology: Attitudes
- PSY321H1 Cross-Cultural Psychology
- PSY322H1 Intergroup Relations
- PSY324H1 Moral Thought and Behaviour
- PSY326H1 Social Cognition
- PSY328H1 Psychology and the Law
- PSY331H1 Social Psychology of Emotion
- PSY370H1 Thinking and Reasoning
- PSY372H1 Human Memory
- PSY420H1 Social Psychology Seminar
- PSY471H1 Cognition Seminar
- JLP374H1 Psychology of Language
- JLP471H1 Advanced Psycholinguistics

Group D

- ENV200H1 Assessing Global Change: Science and the Environment
- ENV234H1 Environmental Biology: Structure and Function of Ecosystems
- GGR107H1 Environment, Food and People
- GGR112H1 Geographies of Globalization, Development and Inequality
- GGR124H1 Cities and Urban Life
- GGR203H1 Introduction to Climatology
- GGR240H1 Geographies of Colonialism in North America
- GGR241H1 Geographies of Urban Social Exclusion
- GGR314H1 Global Warming
- GGR320H1 Geographies of Transnationalism, Migration, and Gender
- GGR338H1 Environmental Issues in the Global South
- GGR343H1 The Changing Geography of China
- GGR398H0 Research Excursions
- GGR399Y1 Research Opportunity Program
- GGR418H1 Political Economy of Natural Resources
- GGR419H1 Environmental Justice
- GGR452H1 Environmental Issues in the Global South
- GGR471H1 Environmental Ethics
- GGL373H1 Environmental Ethics

Group E

- ECO200Y1 Microeconomic Theory
- ECO202Y1 Macroeconomic Theory and Policy
- ECO209H1 Mathematical Methods for Economic Theory
- ECO220Y1 Introduction to Data Analysis and Applied Econometrics
- ECO231H1 Economics of Global Trade
- ECO232H1 Global Macroeconomics and Policies
Peace, Conflict and Justice

Courses

PCJ260Y1 - Introduction to Peace and Conflict Studies

Previous Course Number: PCS260Y1, UNI110Y1, UNI260Y1

Hours: 48L/24S

The course reviews theories exploring the causes of conflict, the possibilities for the pursuit of peace, and the role of justice in both. Drawing on a wide range of disciplines and perspectives, including political science, psychology, sociobiology, economics, and religion, it offers an introduction to diverse approaches to conflict resolution and peace-building. After examining the role of individual characteristics, social group dynamics, and structural processes in generating conflict, the course interrogates different conceptions of peace and justice as well as the dilemmas involved in pursuing them in practice. Case studies and examples are used to help students apply the conceptual tools they acquire to prominent world conflicts.

Prerequisite: Only for current PCJ program students in second year and higher/permission of the Program Director

Exclusion: PCS260Y1, UNI110Y1, UNI260Y1

Distribution Requirements: Social Science

Breadth Requirements: Society and its Institutions (3)

Group F

- ANT100Y1 Introduction to Anthropology
- ANT204H1 Social Cultural Anthropology and Global Issues
- ANT358H1 Medical Anthropology and Social Justice
- ANT427H1 Language in Anthropological Thought
- ANT426H1 Western Views of the Non-West
- ANT440H1 Society in Transition
- ANT450H1 Multispecies Cities
- COG250Y1 Introduction to Cognitive Science (formerly JUP250Y1, UNI250Y1)
- CRI364H1 Indigenous Peoples & Criminal Justice
- CRI427H1 Organized Crime and Corruption
- CRI429H1 Youth Culture, Racialization and Crime in the Global Context
- INS360Y1 Politics and Process of Reconciliation in Canada
- JPR364Y1 Religion and Politics
- PHL232H1 Knowledge and Reality
- PHL235H1 Philosophy of Religion
- PHL240H1 Persons, Minds and Bodies
- PHL244H1 Human Nature
- PHL271H1 Law and Morality
- PHL273H1 Environmental Ethics
- PHL275H1 Introduction to Ethics
- PHL317H1 Marx and Marxism
- PHL340H1 Issues in Philosophy of Mind
- PHL341H1 Freedom, Responsibility, and Human Action
- PHL351H1 Philosophy of Language
- PHL357H1 Philosophy of Biology
- PHL365H1 Political Philosophy
- PHL370H1 Issues in Philosophy of Law
- PHL373H1 Issues in Environmental Ethics
- PHL375H1 Ethics
- PHL380H1 Global Bioethics
- PHL394H1 Markets and Morals
- RLG309H1 Religion and Human Rights
- RLG389H1 Special Topics II
- SOC205H1 Urban Sociology
- SOC210H1 Sociology of Race and Ethnicity
- SOC212H1 Sociology of Crime & Deviance
- SOC213H1 Sociological Social Psychology
- SOC220H1 Social Inequality in Canada
- SOC249H1 Sociology of Migration
- SOC250Y1 Sociology of Religion
- SOC260H1 Fundamentals of Political Sociology
- SOC306H1 Economic Sociology
- SOC312H1 Population and Society
- SOC320H1 Family Demography
- SOC330H1 Introduction to Social Network Analysis
- SOC344H1 Sociology of Everyday Life
- SOC348H1 Culture and Inequality
- SOC356H1 Sociology of Technology
- SOC360H1 Social Movements
- SOC365H1 Gender Relations
- SOC367H1 Race, Class, and Gender
- SOC386H1 New Topics in Sociology
- SOC495H1 New Topics in Sociology
- SOC498H1 New Topics in Sociology
PCJ360H1 - Topics in Peace, Conflict and Justice

Hours: 24L

This course explores selected issues in the field of Peace, Conflict and Justice. Topics may vary from year to year. Through a suite of recent readings, students will strive to critically examine implications and challenges of, and solutions to the issues being studied. Please visit the Trudeau Centre for Peace, Conflict and Justice website for current offering information.

Prerequisite: PCJ260Y1 or permission of the Program Director.
Exclusion: PCS360Y1, UNI360Y1
Recommended Preparation: POL208Y1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

PCJ361H1 - Special Topics in Peace, Conflict and Justice Studies

Hours: 24S

An exploration of selected issues in the field of Peace, Conflict and Justice involving an overseas and/or practicum component.

Exclusion: PCS361H1, UNI361Y1
Recommended Preparation: POL208Y1
Distribution Requirements: Social Science

PCJ361Y1 - Special Topics in Peace and Conflict Studies (formerly PCS361Y1, UNI361Y1)

Hours: 48S

An exploration of selected issues in the field of Peace, Conflict and Justice involving an overseas and/or practicum component.

Prerequisite: PCJ260Y1 or permission from the Program Director
Exclusion: PCS361H1, PCS361Y1, UNI361Y1
Recommended Preparation: POL208Y1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

PCJ362H1 - Service Learning

Hours: 24S

Students are given a service learning placement in the GTA in partnership with local, national, or international not-for-profits or governmental organizations. Students work in teams of 2-7 students, and help partner organizations solve important problems. Student teams mostly work independently of the organization, while receiving some mentoring, critique, and advice from the organizations. Students are expected to invest 5-7 hours per week in course projects, in addition to class time. In this non-competitive course, students are asked to engage in deep personal reflection, help teammates, advise other teams, and contribute their skills and talents to their community partners. The course will emphasize how groups work to achieve community goals, how grassroots politics works, the power of social capital, and how these topics link to questions of conflict resolution, brokering peace, and achieving justice.

Prerequisite: PCJ260Y1
Exclusion: PCJ361H1, PCJ363H1
Recommended Preparation: POL208Y1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

PCJ363H1 - Study Abroad Module

Using Quercus, Skype, and email, students meet weekly in a virtual class that will assign readings, provide written assignments, and require a final assignment. Students are asked to situate their training from the PCJ program within the context of their academic study abroad experiences, though they may also have the opportunity to reflect on volunteer, activist, and social experiences. In written assignments, students are required to reflect on how their thinking has been influenced by their study abroad experiences, what they will do with their new perspectives upon returning to the University of Toronto, and how these affect how they think about peace, conflict, and justice.

Prerequisite: PCJ260Y1
Exclusion: PCJ361H1, PCJ362H1
Recommended Preparation: POL208Y1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

PCJ399Y1 - Research Opportunity Program

Credit course for supervised participation in faculty research project. Details at https://www.artsci.utoronto.ca/current/academics/research-opportunities/research-opportunities-program. Not eligible for CR/NCR option.
PCJ444H1 - Special Topics in Peace and Conflict Studies

**Previous Course Number:** PCS444H1

Topics vary annually. The objective of the course is to explore emerging issues in Peace and Conflict Studies. The focus of the course will be on a specific topic, rather than a broad survey of the field.

**Prerequisite:** PCJ260Y1, PCJ360Y1 or permission of the instructor
**Exclusion:** PCS444H1
**Distribution Requirements:** Social Science
**Breadth Requirements:** Society and its Institutions (3)

PCJ460H1 - Causes and Consequences of Civil Wars and Violence

**Previous Course Number:** PCS460H1, UNI460H1
**Hours:** 24S

This course explores the links between violent conflict and socioeconomic development. It focuses on the macro- and micro-level processes leading to conflict and how conflict and political violence affect people’s lives at the household and community levels. It also examines how these micro-level processes are linked to wider political and economic issues, including governance and institutional development. Tools from economic theory are applied alongside country-specific and cross-national empirical evidence.

**Prerequisite:** PCJ360H1 and PCJ362H1, or permission of the Program Director, enrolment restricted to students enrolled in Peace, Conflict and Justice Specialist program
**Exclusion:** PCS460H1, PCS460Y1, UNI460H1
**Distribution Requirements:** Social Science
**Breadth Requirements:** Society and its Institutions (3)

PCJ461H1 - Research Methods in Peace, Conflict and Justice

**Previous Course Number:** PCS461H1, UNI460Y1
**Hours:** 48S

This course guides each student through their own individual research project, embedded in an interactive group learning process, in order to offer an applied introduction to research methods for peace, conflict and justice studies. Students work through the full research process, including: identifying a research question, learning how to conduct effective literature reviews, developing a rigorous research design, and applying quantitative and qualitative methods to answering questions. Rather than conducting research independently or studying research methods in isolation, the course combines the two: students learn collectively about the different steps in the research process while simultaneously applying those steps to their own research project. This is then complemented by presenting that research and discussing different research projects in class, so as to receive continuous feedback and be exposed to a variety of research methods and approaches.

**Prerequisite:** PCJ460H1; enrolment restricted to students enrolled in the Peace, Conflict and Justice Specialist program
**Exclusion:** PCS460Y1, PCS461H1
**Distribution Requirements:** Social Science
**Breadth Requirements:** Society and its Institutions (3)

PCJ499H1 - Peace and Conflict Studies Independent Study Course

**Previous Course Number:** PCS499H1

This course is designed to provide students with the opportunity to explore topics not covered in the curriculum, or to develop a more detailed focus on topics covered. Approval of the program director is required. The student must obtain written agreement of the instructor who will supervise the independent study, submit the proposal to and obtain approval from the director and program administrator, who will then add the student to the course. Not eligible for CR/NCR option.

Applications are due two weeks before course enrollment deadlines for each semester.

**Prerequisite:** PCJ260Y1
**Exclusion:** PCS499H1
**Recommended Preparation:** For students enrolled in the Peace, Conflict and Justice Major or Specialist program.
**Distribution Requirements:** Social Science
**Breadth Requirements:** Society and its Institutions (3)
PCJ499Y1 - Peace and Conflict Studies
Independent Study Course

This course is designed to provide students with the opportunity to explore topics not covered in the curriculum, or to develop a more detailed focus on topics covered. Approval of the program director is required. The student must obtain written agreement of the instructor who will supervise the independent study, submit the proposal to and obtain approval from the director and program administrator, who will then add the student to the course. Not eligible for CR/NCR option.

Applications are due two weeks before course enrollment deadlines for each semester.

Prerequisite: PCJ260Y1
Exclusion: PCS499H1
Recommended Preparation: For students enrolled in the Peace, Conflict and Justice Major or Specialist program.
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)
Pharmaceutical Chemistry

Collaborative Program of the Faculty of Arts & Science and the Leslie Dan Faculty of Pharmacy

Pharmaceutical Chemistry combines knowledge of the biological, medical, and physical sciences in the study of drug therapy. The emphasis is on the chemical nature of the reactions and interactions involved in drug therapy. The students will receive a solid background in the facets of chemistry most relevant to drugs: physical, organic, and analytical chemistry. They will also learn the fundamental aspects of the synthesis, manufacture, use, and mode of action of drugs.

Undergraduate Office – General Enquiries: Nicole Treston, (416-978-6033), chem.undergrad@utoronto.ca

Program Director: Dr. David Dubins, (416-976-5303), d.dubins@utoronto.ca

Regarding Pharmaceutical Chemistry Programs

Pharmaceutical Chemistry combines knowledge of the biological, medical and physical sciences in the study of the scientific aspect of drug therapy. The emphasis is on the chemical nature of the reactions and interactions involved in drug therapy.

This program is offered jointly by the Leslie Dan Faculty of Pharmacy and the Faculty of Arts and Science. Students in the Pharmaceutical Chemistry Specialist program will receive a solid background in physical, organic and analytical chemistry, and will also learn the fundamental aspects of the synthesis, manufacture, use, and mode of action of drugs. The fourth-year project course gives students direct involvement in research.

We also offer an internship in which qualified students may spend 12 or 16 months working at a pharmaceutical company or research lab. This is a project-based, paid employment placement that takes place between the third and fourth years of undergraduate study. It provides the student with an opportunity to apply the knowledge acquired in the first three years of university to private or public-sector settings. Placements are available in pharmaceutical and biotechnology companies, university research labs, university-affiliated organizations, or government research agencies.

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

Variable Minimum Grade Average
A minimum grade average is needed for entry, and this minimum changes each year depending on available spaces and the number of applicants. The following courses must be completed:

- BIO120H1 and BIO130H1
- (CHM135H1 and CHM136H1) CHM151Y1
- (PHY131H1 and PHY132H1) PHY151H1 and PHY152H1

To ensure that students admitted to the program will be successful, applicants with a final grade lower than 60%, or a grade average lower than 70% will not be considered for admission. Please note that obtaining this minimum final grade or minimum grade average does not guarantee admission to the program.

Completion Requirements:

(13.0 credits, including 1.0 credit from 400-series courses)

NOTE: Some of the courses listed below may have prerequisites.

First Year:
- BIO120H1, BIO130H1, (CHM135H1 and CHM136H1) CHM151Y1
- (PHY131H1 and PHY132H1) PHY151H1 and PHY152H1

Second Year:
- BCH210H1, BIO230H1, CHM220H1, CHM222H1, CHM223H1, CHM247H1, CHM249H1, PCL201H1, PHC230H1

Third Year:
- CHM217H1, PHC300H1, PHC301H1, PHC320H1, PHC330H1, PHC340Y1

Fourth Year:
1. PHC489Y1 or CHM499Y1
2. 2.0 credits from: CHM317H1, CHM342H1, CHM347H1, CHM379H1, CHM410H1, CHM414H1, CHM417H1, CHM427H1, CHM440H1, JPM300H1, JPM400Y1, PCL362H1, PCL486H1, PHC331H1, PHC401H1, PHC420H1, PHC421H1, PHC430H1, PHC431H1, PHC432H1, PHC435H1, PHC460H1, PHC462H1, PHC470H1, PSL300H1, PSL301H1

Note that not all of the 400-series PHC courses are offered every academic year.

We also offer an optional 12- or 16-month internship program to qualified students. This is a project-based, paid employment placement that takes place between the third and fourth years of undergraduate study. It provides the student with an opportunity to
apply the knowledge acquired in the first three years of university to private- or public-sector settings. Placements are available in pharmaceutical and biotechnology companies, university research labs, university-affiliated organizations, or government research agencies.

Pharmaceutical Chemistry

Courses

PHC230H1 - Pharmaceutics 1

Hours: 36L/12T

An introduction to the key concepts in the design, manufacture, and use of efficacious dosage forms. The course covers the characteristics of different delivery routes.

Prerequisite: (CHM135H1, CHM136H1)/(CHM138H1, CHM139H1)/CHM151Y1; CHM220H1/CHM222H1
Exclusion: PHM141H1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

PHC301H1 - Molecular Pharmacology 2

Hours: 36L/12T

Structural and mechanistic determinants of drug action via macromolecules that effect cellular signalling. Neurohumoral receptors and other signalling proteins are grouped according to their structure and mechanism of action. Native properties and their modulation by drugs are discussed in the context of basic principles of molecular pharmacology.

Prerequisite: (CHM135H1, CHM136H1)/(CHM138H1, CHM139H1)/CHM151Y1; CHM220H1/CHM222H1; BCH210H1
Exclusion: PCL302H1, PHM140H1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

PHC300H1 - Molecular Pharmacology 1

Hours: 24L/12T

Structural and mechanistic determinants of drug action at the molecular level. Topics include the physicalchemical properties of drugs per se as they relate to therapeutic intervention and the biophysical and biochemical properties of enzymes and nucleic acids that underlie and are affected by their interactions with drugs.

Prerequisite: (CHM135H1, CHM136H1)/(CHM138H1, CHM139H1)/CHM151Y1; CHM220H1/CHM222H1
Exclusion: PCL302H1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

PHC320H1 - Medicinal Chemistry

Hours: 36L

Modern discovery and synthesis of antibiotics, antineoplastics, antiviral and other therapeutic agents.

Prerequisite: BCH210H1, CHM247H1/CHM249H1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

PHC330H1 - Pharmaceutics 2

Hours: 36L/12T

This course presents a detailed examination of the material properties of pharmaceuticals and the role of cellular processes in delivery of a drug to its site of action.

Prerequisite: (CHM135H1, CHM136H1)/(CHM138H1,CHM139H1)/CHM151Y1; CHM220H1/CHM222H1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)
PHC331H1 - Establishing the Bioequivalence of Pharmaceutical Products

Hours: 48L

Introduction to human clinical trial design for the demonstration of pharmaceutical bioequivalence of drug products. Students will learn the principles underlying the regulations and methods employed in bioequivalence studies.

Prerequisite: BCH210H1, CHM247H1/CHM249H1, (MAT135H1, MAT136H1)/MAT137Y1, PHC230H1, PHC330H1

Distribution Requirements: Science

Breadth Requirements: Living Things and Their Environment (4)

PHC340Y1 - Pharmaceutical Chemistry Laboratory

Hours: 24L/96P

The scientific basis and practical techniques relevant to modern pharmaceutical development. This course is restricted to Pharmaceutical Chemistry Specialist program students.

Prerequisite: CHM247H1/CHM249H1; (CHM220H1/CHM222H1), CHM223H1; BCH210H1

Distribution Requirements: Science

Breadth Requirements: Living Things and Their Environment (4)

PHC401H1 - Drug Transport across Biological Membranes

Hours: 24L

The goal of this course is to provide students with knowledge of the molecular processes involved in drug transport across biological cell membranes with emphasis on their physiological and clinical significance. This course is restricted to Pharmaceutical Chemistry Specialist program students.

Prerequisite: PHC301H1, and enrolled as a Year 4 student in the Pharmaceutical Chemistry specialist program.

Corequisite: PHC300H1

Exclusion: JFK1122H

Distribution Requirements: Science

Breadth Requirements: Living Things and Their Environment (4)

PHC420H1 - Application of Medicinal Chemistry to Pharmacology

Hours: 24L

This course shows students the links between basic science and the drugs used therapeutically to treat clinical problems. This course is restricted to Pharmaceutical Chemistry specialist program students.

Prerequisite: PHC301H1, PHC320H1, and enrolled as a Year 4 student in the Pharmaceutical Chemistry specialist program.

Exclusion: PHM240H1

Distribution Requirements: Science

Breadth Requirements: Living Things and Their Environment (4)

PHC421H1 - Biomolecular Interactions and Thermodynamics I

Hours: 36L

This course will consider many of the topics presented in the first half in much greater detail including a rigorous examination of the interpretation of experimental data. This course is intended for students whose research or interest is in the thermodynamics of biological molecules. This course is restricted to Pharmaceutical Chemistry specialist program students.

Prerequisite: Enrolled as a Year 4 student in the Pharmaceutical Chemistry specialist program.

Exclusion: PHM1130H

Distribution Requirements: Science

Breadth Requirements: Living Things and Their Environment (4)

PHC430H1 - Recent Developments in Dosage Form Design

Hours: 24L

Introduction to controlled drug delivery: Mechanisms and kinetics of controlled drug release. Fundamental theories and mathematical tools for the design of modern dosage forms. Development and applications of controlled drug delivery dosage forms. This course is restricted to Pharmaceutical Chemistry specialist program students.

Prerequisite: Enrolled as a Year 4 student in the Pharmaceutical Chemistry specialist program.

Exclusion: PHM324H1, PHM1109H

Recommended Preparation: PHC230H1, PHC330H1, PHC340Y1.

Distribution Requirements: Science

Breadth Requirements: Living Things and Their Environment (4)
PHC431H1 - Selected Topics in Drug Development

Hours: 24L

In-depth discussion of implementation of pharmaceutical sciences in drug development strategies. Students will apply fundamental principles of pharmaceutics and drug delivery to current problems in the pharmaceutical industry. This course is restricted to Pharmaceutical Chemistry specialist program students.

Prerequisite: Enrolled as a Year 4 student in the Pharmaceutical Chemistry specialist program.
Exclusion: JFK1120H
Recommended Preparation: PHC230H1, PHC330H1, PHC340Y1.
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

PHC432H1 - Nanomedicines in Oncology

Hours: 24L

This course covers a range of topics that pertain to the development and application of nanomedicines in oncology. Students will gain an understanding of the biological barriers to drug delivery in oncology as well as the tremendous heterogeneity in cancer and the challenges this presents for treatment. The concepts of passive and active targeting of nanomedicines will be covered with critical assessment of the enhanced permeability and retention effect. A detailed overview of the most advanced nanotechnology-platforms for drug delivery (i.e., liposomes, block copolymer micelles and polymer-drug conjugates) will be provided with additional discussion of new emerging platforms. The integration of imaging in drug development and development of theranostics and therapeutic-diagnostic pairs will also be discussed. Special emphasis on critical evaluation of scientific literature and pre-clinical/clinical studies will be made throughout the course.

Prerequisite: PHC230H1, PHC330H1 and enrolled as a Year 4 student in the Pharmaceutical Chemistry specialist program.
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

PHC435H1 - Pharmaceutical Data Acquisition and Analysis

Hours: 26P

Application and development of devices for the purpose of collecting and analyzing experimental data in pharmaceutical development and manufacture.

Prerequisite: BCH210H1, CHM247H1/CHM249H1, (MAT135H1, MAT136H1)/MAT137Y1, PHC340Y1 and enrolled as a Year 4 student in the Pharmaceutical Chemistry specialist program.
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

PHC460H1 - Fundamentals of Drug Discovery

Hours: 24L

Lectures by scientists from academia and industry, and student seminars based on journal articles dealing with strategies for discovering new drugs for therapy and diagnosis. This course is restricted to Pharmaceutical Chemistry specialist program students.

Prerequisite: BIO120H1, BIO130H1, PHC301H1 and enrolled as a Year 4 student in the Pharmaceutical Chemistry program.
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

PHC462H1 - Clinical Drug Development

Hours: 24L

This course is designed to broaden student’s understanding of the development and licensing of new drugs and how scientific principles, ethics, governmental regulations and commercial considerations are coordinated for designing clinical trials. The format involves lectures, group discussion and student presentations. This course is restricted to Pharmaceutical Chemistry specialist program students.

Prerequisite: PHC230H1, PHC301H1, PHC340Y1 and enrolled as a Year 4 student in the Pharmaceutical Chemistry specialist program.
Exclusion: JFK1120H
Distribution Requirements: Science
Breadth Requirements: Society and its Institutions (3)
PHC470H1 - Global Pharmaceutical Policy

Hours: 24L/2T

This course is designed for students who are interested in the critical analysis of global health policy and the interrelationship between global and domestic policy issues. The course will introduce students generally to the basic concepts and issues in global health with a particular focus on pharmaceutical policy. We will address key issues in health and discuss core institutional and transnational actors, how governments in different jurisdictions manage public health responsibilities, the tension between economic imperatives and health objectives, global obligations, and pressure from special interest groups. More narrowly, we will analyse a breadth of complex policies questions. Examples include: the research and development global divide, policy influences on pharmaceutical policy, how global commitments, such as membership in the World Trade Organization, conflict with or correspond to domestic policy directions and national sovereignty. Guest speakers will lead some sessions. This course will consist of lectures, guest discussions, case studies and student-led presentations. This is restricted to students in the Pharmaceutical Chemistry specialist program.

Prerequisite: Enrolled as a Year 4 student in the Pharmaceutical Chemistry specialist program.
Exclusion: PHM320H1, PHM1124H
Breadth Requirements: Society and its Institutions (3)

PHC489Y1 - Pharmaceutical Chemistry Research

Hours: 144P

This course will provide research experience under the supervision of a Departmental staff member. The goal is to deepen the student’s understanding of the scientific basis and practical techniques relevant to modern pharmaceutical development. This course is restricted to Pharmaceutical Chemistry specialist program students. Not eligible for CR/NCR option.

Prerequisite: Permission from the Course Coordinator and enrolled as a Year 4 student in the Pharmaceutical Chemistry specialist program.
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)
Pharmacology and Toxicology

Faculty List

Professors Emeriti
W.M. Burnham, Ph D

Introduction
Pharmacology and Toxicology are integrative biological sciences that examine the properties of chemical compounds and their
interactions with living systems. They provide the scientific basis for the study of chemical actions in the health sciences, the use of drugs as therapeutic agents or as tools in scientific research, the development and control of pharmaceutical products, and the investigation and control of pollutants and poisons in natural and social environments. The Department of Pharmacology and Toxicology offers four Specialist and two Major undergraduate programs of study that are jointly sponsored by the Faculties of Arts and Science and Medicine. The Specialist programs have the added benefit of providing students with opportunities to learn advanced laboratory techniques and to gain real-world experience through supervised independent research projects and participation in the Professional Experience Year Co-op (see below). Students who intend to pursue graduate research and/or careers in pharmacology or toxicology are encouraged to enroll in a Specialist program because of the opportunities for additional experiential learning.

Students wishing to enroll in the Biomedical Toxicology Specialist (ASSPE2573) or in the Pharmacology Specialist (ASSPE2082) will initially apply to the Joint Pharmacology and Biomedical Toxicology Specialist (ASSPE2340) at the end of their first year of study. Students wishing to enroll in the Biomedical Toxicology Major (ASMAJ2573) or in the Pharmacology Major (ASMAJ2082) will initially apply to a general departmental Major (ASMAJ2675) at the end of their first year of study and then select the focus for their future studies (Biomedical Toxicology or Pharmacology) prior to the start of the third year of study. Students wishing to enroll in the Environment and Toxicology Specialist (ASSPE0605) will apply directly to the program after completion of first year prerequisite courses. First and second year courses are the same for students within either the Specialist programs (ASSPE2082/ASSPE2340/ASSPE2573) or the Major programs (ASMAJ2675/ASMAJ2082/ASMAJ2573) within the Department.

For further information about registration and courses, consult the Arts & Science Program Toolkit and Course Enrolment Instructions, and visit our website at: www.pharmtox.utoronto.ca.

Regarding Pharmacology and Toxicology Programs

Professional Experience Year Co-op

The Professional Experience Year Co-op (PEY Co-op) program is a 12-16 month paid employment placement within pharmaceutical/biotechnology/chemical companies, university research laboratories, university-affiliated organizations, consulting companies or government research agencies. The PEY Co-op takes place between the 3rd and 4th years of undergraduate study and is open to Specialists in Pharmacology, Biomedical Toxicology and Environment and Toxicology who have a cGPA of at least 3.0. Students who participate in this program agree to return to their Specialist program within the Department to complete their 4th year and degree program as enrolled prior. The PEY Co-op provides an excellent opportunity for real-world experience in drug development, project management, client relations, basic and clinical research, information management and regulatory affairs.

NOTE: Students cannot combine any MAJOR from this program with another MAJOR or SPECIALIST from this program for their degree.

Pharmacology and Toxicology Programs

Biomedical Toxicology Specialist (Science Program) - ASSPE2573

Description:

Biomedical toxicology has emerged as an important science addressing drug safety and the adverse consequences of chemical exposure. The Biomedical Toxicology Specialist program examines the harmful effects of chemicals on the health and behaviour of individuals and society. The safety/toxicity of a wide array of chemicals is examined including pharmaceutical preparations, herbal products, natural toxins and environmental contaminants, with a focus on their effects on human health. This program emphasizes the application of toxicological knowledge and risk assessment and prepares students for a variety of job opportunities following its completion as well as for further study in graduate research or professional programs such as Medicine, Dentistry, and Pharmacy. (Note: Students interested in professional programs should contact the respective faculties to inquire about specific transfer credits.) Many graduates of the Biomedical Toxicology Specialist program pursue careers in scientific research, forensic science, nutrition and food sciences, governmental agencies, consulting agencies, and industrial settings including the pharmaceutical and chemical industries. Students learn about basic and clinical toxicology and related areas through lectures, tutorials, laboratories, and independent research projects. The senior research project course enables students to gain valuable research experience while working under the supervision of an individual faculty member in either a laboratory-based or a non-laboratory-based setting.

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

Variable Minimum Grade or Variable Minimum Grade Average

A minimum grade/minimum grade average in required courses is needed for entry, and this minimum changes each year depending on available spaces and the number of applicants. The following courses or their equivalents must be completed:

- BIO120H1 and BIO130H1
- (CHM135H1, CHM136H1)/CHM151Y1
- 1.0 credit from (MAT135H1 and MAT136H1)/MAT137Y1/MAT157Y1/(PHY131H1 and PHY132H1)/(PHY151H1 and PHY152H1)

To ensure that students admitted to the program will be successful, applicants with a final grade lower than 60% in each course, or a combined grade average lower than 70% in these required courses will not be considered for admission. Please note that obtaining this minimum final grade or minimum grade average does not guarantee...
admission to the program. Please consult the Arts & Science Program Toolkit for more information on program enrolment.

Notes:

- While it is difficult to predict what will be competitive course marks and average in a given year, based on previous years, the estimate is: course marks = mid 80s; average = mid 80s.
- Students wishing to enroll in the Biomedical Toxicology Specialist will initially apply to the Joint Specialist in Pharmacology and Biomedical Toxicology (ASSPE2340). After admission, students can then choose to transfer to the Biomedical Toxicology Specialist. First and second year courses are the same for all Specialist programs within the Department (ASSPE2082/ASSPE2340/ASSPE2573).
- Students cannot combine the Biomedical Toxicology Specialist with either departmental Major programs (Biomedical Toxicology or Pharmacology).
- Students wishing to enroll after their second year who have taken PCL201H1 will be considered on a case by case basis. Successful completion of required pre-requisite courses is required to further enroll in upper level program courses. Students may not transfer to the Major program from the Specialist after completion of PCL474Y1 or PEY Co-op.

Completion Requirements:

(14.5 credits)

First Year: BIO120H1; BIO130H1; (CHM135H1, CHM136H1)/CHM151Y1; and 1 FCE from any combination of (MAT135H1, MAT136H1); PHY131H1/PHY151H1; PHY132H1/PHY152H1 (see NOTE 1)

Second Year: BCH210H1; BIO230H1/BIO255H1; BIO260H1/HMB265H1; CHM247H1/CHM249H1; STA288H1; PCL201H1; (PSL300H1, PSL301H1) (NOTE: PSL201Y1 is not acceptable)

Third Year: PCL302H1; PCL362H1; at least 0.5 credit from PCL367H1 or PCL368H1

Third or Fourth Year: LMP363H1 and 2.5 credits at least 1.5 credits from PCL courses: JPM300H1; PCL345H1; PCL367H1 or PCL368H1 (see NOTE 2)/PCL389H1/PCL475H1/PCL476H1/PCL475Y1/PCL477H1/PCL484H1/PCL486H1/PCL490H1/JPM400Y1/ANA301H1/CHM310H1/EAA346H1/LMP301H1

Fourth Year: PCL402H1; (PCL482H1, PCL483H1)/PCL473Y1/PCL474Y1/JPM400Y1 (see NOTE 3); PCL481H1

An Integrative, Inquiry-Based Activity Requirement must be satisfied.

The requirement for an integrative, inquiry-based and/or experiential activity must be met by completing at least one of the following: PCL297H1, PCL389H1, PCL397H1, PCL472Y1, PCL474Y1, JPM400Y1, Professional Experience Year Co-op Program

NOTES:

1. Any PHY/MAT courses should be completed during the first year and included for program enrolment.
2. At least 0.5 credit from PCL367H1 or PCL368H1 is required for the program, however if desired the alternative course can be taken as a program elective.
3. Enrolment in any of PCL474Y1 or JPM400Y1 is limited and requires permission from the Department of Pharmacology and Toxicology. Students must receive prior consent from the course coordinator according to Departmental guidelines before the Department will register them in the course. Students can take either course as their required independent project, or may take JPM400Y1 as an additional elective. It is the student's responsibility to make all necessary preparations before the session starts (see course description).

Professional Experience Year Co-op Program:

The Professional Experience Year Co-op Program (PEY Co-op) is a 12-16 month paid employment placement within pharmaceutical/biotechnology/chemical companies, university research laboratories, university-affiliated organizations, consulting companies or government research agencies. The PEY Co-op takes place between the 3rd and 4th years of undergraduate study and is open to Specialists in Biomedical Toxicology who have a CGPA of at least 3.0. Students who participate in this program agree to return to their SPE program in the Department to complete their 4th year and their degree. The PEY Co-op provides an excellent opportunity for real-world experience in drug development, project management, client relations, basic and clinical research, information management and regulatory affairs.

Environment & Toxicology Specialist (Science Program) - ASSPE0605

Description:

This program is jointly sponsored by the Department of Pharmacology and Toxicology and the School of the Environment. For additional information see “School of the Environment” (www.environment.utoronto.ca) or consult our website: www.pharmtox.utoronto.ca. The Environment and Toxicology Specialist program is an interdisciplinary program which spans the social, physical and life sciences and integrates study of the effects of chemicals not only on the health and behaviour of human beings but on whole ecosystems as the adverse effects associated with therapeutic and environmental chemicals are discussed. This program emphasizes the application of knowledge of environmental toxicology and risk assessment and prepares students for a variety of job opportunities following its completion. Graduates of the Environment and Toxicology program may pursue careers in scientific research, environmental science, conservation science, governmental agencies, consulting agencies, and within chemical, manufacturing or agriculture industries. Students learn to integrate basic environmental and life science with particular aspects of clinical toxicology and related areas through lectures, tutorials, and laboratory and independent research project experience. The senior independent research project course enables students to gain valuable research experience while working under the supervision of an individual faculty member in either a laboratory-based or a non-laboratory-based setting.

The Professional Experience Year Co-op Program (PEY Co-op) is a 12-16 month paid employment placement within pharmaceutical/biotechnology/chemical companies, university research laboratories, university-affiliated organizations, consulting companies or government research agencies. The PEY Co-op takes place between the 3rd and 4th years of undergraduate study and is open to Specialists in Pharmacology and Biomedical Toxicology who have a CGPA of at least 3.0. Students who participate in this program
agree to return to their SPE program in the Department to complete their 4th year and their degree. The PEY Co-op provides an excellent opportunity for real-world experience in drug development, project management, client relations, basic and clinical research, information management and regulatory affairs.

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

Variable Minimum Grade Average

A minimum grade average in required courses is needed for entry, and this minimum changes each year depending on available spaces and the number of applicants. The following courses or their equivalents must be completed:

- BIO120H1 and BIO130H1
- CHM135H1 and CHM136H1
- 1.0 credit from PHY131H1, PHY132H1, MAT135H1, MAT136H1

To ensure that students admitted to the program will be successful, applicants with a final combined grade average lower than 70% in these required courses will not be considered for admission. Please note that obtaining this minimum grade average does not guarantee admission to the program. Please consult the Arts & Science Program Toolkit for more information on program enrolment.

Notes:

- Students cannot combine a Biomedical Toxicology Major program with an Environment and Toxicology Specialist program for their degree.
- Students who wish to enroll in the program after their second year will be considered on a case-by-case basis. Successful completion of required prerequisite courses is required to enroll in further upper-level program courses.

Completion Requirements:

(14 credits, including 4.0 credits at the 300+ level or higher, 1.0 credit of which must be at the 400-level).

First Year: BIO120H1, BIO130H1, CHM135H1, CHM136H1, and at least 1.0 credit from PHY131H1, PHY132H1, MAT135H1, MAT136H1

Second Year: BCH210H1, BIO230H1, BIO255H1, ENV221H1, ENV222H1, PCL201H1, and CHM247H1, 1.0 credit from (BIO270H1, BIO271H1) or (PSL300H1, PSL301H1) (see NOTE 1)

Third and Fourth Years:

BIO220H1, ENV234H1, JGE321H1, ENV334H1, CHM210H1, PCL302H1, PCL362H1, (PCL482H1, PCL483H1)/PCL473Y1
One of: STA220H1/STA221H1/STA288H1/EEB225H1 (see NOTE 2)
One of: ENV421H1/ PCL367H1/PCL474Y1 (see NOTE 2)
At least 1.0 credit from: ENV341H1, PHY231H1, ENV337H1, JEE337H1, CHM310H1, ESS463H1, JPM300H1, PCL477H1, PCL481H1, PCL484H1, PCL486H1, PCL490H1, LMP301H1, LMP363H1 (see NOTE 3)

An Integrative, Inquiry-Based Activity Requirement must be satisfied.

The requirement for an integrative, inquiry-based and/or experiential activity must be met by completing at least one of the following: PCL297H1, PCL367H1, PCL397Y0, ENV421H1, PCL474Y1.

Professional Experience Year Co-op Program

Notes:

1. PSL300H1 and PSL301H1 require MAT100/PHY100 - series courses.
2. PCL201H1, and PCL302H1 are pre-requisites for students intending to take PCL474Y1. Students intending to take PCL474Y1 must obtain permission from the Undergraduate Student Advisor of the School of the Environment 3 months prior to the intended date of enrolment. Students must also consult with the Department of Pharmacology and Toxicology at least 3 months prior to the intended date of enrolment.
3. Students taking PCL461H1 must take PCL302H1 and PCL362H1 as prerequisites. Students taking PCL477H1 must take BCH210H1 prior. Students taking ENV421H1 or PCL367H1 must take 1.5 credits from program electives requirement list of courses to ensure 14 program credits.

Pharmacology Specialist (Science Program) - ASSPE2082

Description:

Pharmacology is an integrative medical science that builds upon the core foundational disciplines of the basic life sciences. The Pharmacology Specialist program aims to provide students with an understanding of the therapeutic properties and clinical uses of externally administered chemical substances in the whole body, as well as the mechanisms of their actions and interactions with molecular, cellular and tissue targets. This understanding prepares students for a variety of either research-based or non-research-based careers, including positions in the pharmaceutical and biotechnology industries, in government agencies, in research institutes and in universities. Students learn about both basic and clinical pharmacology through lectures, tutorials, laboratories and independent research projects. The senior research project course enables students to gain valuable research experience while working under the supervision of an individual faculty member in either a laboratory-based or a non-laboratory-based setting.

Pharmacology (and its application in clinical therapeutics) plays a prominent role in society, and a comprehension of drug mechanisms and uses is fundamental to career success in the fields of medicine, dentistry, pharmacy and nursing. While some students take the Pharmacology Specialist program in preparation for these professional programs, students are advised to contact the respective Faculties directly for questions related to transfer credits.

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

Variable Minimum Grade or Variable Minimum Grade Average

A minimum grade/minimum grade average in required courses is needed for entry, and this minimum changes each year depending on available spaces and the number of applicants. The following courses or their equivalents must be completed:

- BIO120H1 and BIO130H1
- (CHM135H1, CHM136H1)/CHM151Y1
To ensure that students admitted to the program will be successful, applicants with a final grade lower than 60% in each course, or a combined grade average lower than 70% in these required courses will not be considered for admission. Please note that obtaining this minimum final grade or minimum grade average does not guarantee admission to the program. Please consult the Arts & Science Program Toolkit for more information on program enrolment.

Notes:

- While it is difficult to predict what will be competitive course marks and average in a given year, based on previous years, the estimate is: course marks = mid 80s; average = mid 80s.
- Students cannot combine the Biomedical Toxicology Specialist with either departmental Major programs (Biomedical Toxicology or Pharmacology).
- Students wishing to enroll after their second year who have taken PCL201H1 will be considered on a case by case basis. Successful completion of required pre-requisite courses is required to further enroll in upper level program courses. Students may not transfer to the Major program from the Specialist after completion of PCL472Y1 or PEY Co-op.

Completion Requirements:

(14.5 credits)

First Year: BIO120H1; BIO130H1; (CHM135H1, CHM136H1)/CHM151Y1; and 1 credit from any combination of (MAT135H1, MAT136H1); PHY131H1/PHY151H1; PHY132H1/PHY152H1 (see NOTE 1)

Second Year: BCH210H1; BIO230H1/BIO255H1; BIO260H1/HMB263H1/CHM247H1/CHM249H1; STA268H1; PCL201H1; (PSL300H1, PSL301H1) (NOTE: PSL201Y1 is not acceptable)

Third Year: BCH311H1/PSL350H1/PCL302H1; at least 0.5 credits from PCL367H1 or PCL368H1

Third or Fourth Year: PCL469H1 and 3.5 credits with at least 1.5 credits from PCL courses: JPM300H1/PCL345H1/PCL367H1 or PCL368H1 (see NOTE 2) PCL389H1/PCL475H1/PCL476H1/PCL475Y1/PCL477H1/PCL484H1/PCL486H1/PCL490H1/JPM400Y1/ANA300Y1/BCH340H1/BCH350H1

Fourth Year: PCL402H1; PCL470H1/PCL470Y1; PCL472Y1/JPM400Y1 (see NOTE 3)

An Integrative, Inquiry-Based Activity Requirement must be satisfied.

The requirement for an integrative, inquiry-based and/or experiential activity must be met by completing at least one of the following: PCL297H1; PCL389H1; PCL397Y0/PCL472Y1; PCL474Y1; JPM400Y1. Professional Experience Year Co-op Program

Notes:

1. Any PHY/MAT courses should be completed during the first year and included for program enrolment.

2. At least 0.5 credit from PCL367H1 or PCL368H1 is required for the program, however if desired the alternative course can be taken as a program elective.

3. Enrolment in either PCL472Y1 or JPM400Y1 is limited and requires permission from the Department of Pharmacology and Toxicology. Students must receive prior consent from course coordinator according to Departmental guidelines before the Department will register them in the course. Students can take either course as their required independent project, or may take JPM400Y1 as an additional elective. It is the student’s responsibility to make all necessary preparations before the session starts (see course description).

Professional Experience Year Co-op Program:

The Professional Experience Year Co-op Program (PEY Co-op) is a 12-16 month paid employment placement within pharmaceutical/biotechnology/chemical companies, university research laboratories, university-affiliated organizations, consulting companies or government research agencies. The PEY Co-op takes place between the 3rd and 4th years of undergraduate study and is open to Specialists in Pharmacology who have a cGPA of at least 3.0. Students who participate in this program agree to return to their SPE program in the Department to complete their 4th year and their degree. The PEY Co-op provides an excellent opportunity for real-world experience in drug development, project management, client relations, basic and clinical research, information management and regulatory affairs.

Specialist in Pharmacology and Biomedical Toxicology (Science Program) - ASSPE2340

Description:

Pharmacology and Biomedical Toxicology are complementary sciences, and the Pharmacology and Biomedical Toxicology Specialist combines the requirements of the two distinct specialist programs. The Specialist program integrates knowledge of pharmacology – the understanding of the therapeutic properties and clinical applications of externally administered chemical substances in the whole body and the mechanisms of their actions and interactions with their intended targets, while biomedical toxicology examines the harmful effects of exogenous chemicals on the health and behaviour of individuals and society, addressing drug safety and the adverse consequences of chemical exposure. Biomedical toxicology includes understanding the safety/toxicity of a wide array of chemicals (pharmaceutical preparations, herbal products, natural toxins and environmental contaminants) with a focus on their effects and adverse consequences on human health.

Both Pharmacology and Biomedical Toxicology are integrative life sciences which build on the core foundational disciplines of the basic life sciences and the prominent role each science plays in society. A comprehension of the biological mechanisms of action and potential uses of chemicals are key to career success in the fields of medicine, dentistry, pharmacy and nursing. The Specialist program prepares students for a variety of job opportunities following its completion as well as for further study in graduate research or professional programs such as Medicine, Dentistry, and Pharmacy. (Note: Students interested in professional programs should contact the respective faculties to inquire about specific transfer credits.) Graduates of this rigorous program will have access to an impressive variety of job opportunities in either research-based or non-research-based careers, including scientific research in research institutes and in universities, positions in the pharmaceutical, biotechnology and chemical industries, forensic
science, nutrition and food sciences, government or consulting agencies. Students learn about both basic and clinical pharmacology and biomedical toxicology through lectures, tutorials, small group sessions, laboratories and independent research projects. The senior research project course enables students to gain valuable research experience while working under the supervision of an individual faculty member in either a laboratory-based or a non-laboratory-based setting.

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

Variable Minimum Grade or Variable Minimum Grade Average
A minimum grade/minimum grade average in required courses is needed for entry, and this minimum changes each year depending on available spaces and the number of applicants. The following courses or their equivalents must be completed:

- BIO120H1 and BIO130H1
- (CHM135H1, CHM136H1)/CHM151Y1
- 1.0 credit from (MAT135H1 and MAT136H1)/MAT137Y1/MAT157Y1/(PHY131H1 and PHY132H1)/PHY151H1 and PHY152H1)

To ensure that students admitted to the program will be successful, applicants with a final grade lower than 60% in each course, or a combined grade average lower than 70% in these required courses will not be considered for admission. Please note that obtaining this minimum final grade or minimum grade average does not guarantee admission to the program. Please consult the Arts & Science Program Toolkit for more information on program enrolment.

Notes:

- While it is difficult to predict what will be competitive course marks and average in a given year, based on previous years, the estimate is: course marks = mid 80s; average = mid 80s.
- Students cannot combine the Biomedical Toxicology Specialist with either departmental Major programs (Biomedical Toxicology or Pharmacology).
- Students wishing to enroll after their second year who have taken PCL201H1 will be considered on a case by case basis. Successful completion of required pre-requisite courses is required to further enrol in upper level program courses. Students may not transfer to the Major program from the Specialist after completion of PCL472Y1/PCL474Y1 courses or PEY Co-op.

Completion Requirements:

(15 credits)

First Year: BIO120H1; BIO130H1; (CHM135H1, CHM136H1)/CHM151Y1; and 1 credit from any combination of (MAT135H1, MAT136H1); PHY131H1/PHY151H1; PHY132H1/PHY152H1 (see Note 1)

Second Year: BCH210H1; BIO230H1; BIO255H1; BIO260H1/HMB265H1; CHM247H1/CHM249H1; STA288H1; PCL201H1; (PSL300H1, PSL301H1) (NOTE: PSL201Y1 is not acceptable)

Third Year: BCH311H1/PSL350H1; PCL302H1; PCL362H1; at least 0.5 credit from PCL367H1 or PCL368H1 (see Note 2)

Third or Fourth Year: LMP363H1; PCL469H1, and 1.5 credits from the following courses: JPM300H1/PCL345H1/PCL367H1 or PCL368H1 (see Note 2); PCL389H1/PCL475H1/PCL476H1/PCL475Y1/PCL477H1/PCL484H1/PCL486H1/PCL490H1/JPM400Y1; LMP301H1. Additional courses that may strengthen your background in this program can be taken, but will not count towards your program: ANA300Y1/ANA301H1/BCH340H1/CHM310H1/ESS463H1

Fourth Year: PCL402H1; PCL470H1; PCL470Y1; (PCL482H1, PCL483H1)/PCL473Y1/PCL472Y1/PCL474Y1/JPM400Y1 (see Note 3); PCL481H1

An Integrative, Inquiry-Based Activity Requirement must be satisfied.

The requirement for an integrative, inquiry-based and/or experiential activity must be met by completing at least one of the following: PCL297H1, PCL389H1, PCL397Y0, PCL472Y1, PCL474Y1, JPM400Y1, Professional Experience Year Co-op Program.

Notes:

1. Any PHY/MAT courses should be completed during the first year and included for program enrolment.
2. At least 0.5 FCE from PCL367H1 or PCL368H1 is required for the program, however if desired the alternative course can be taken as a program elective.
3. Enrolment in any of PCL472Y1/PCL474Y1 or JPM400Y1 is limited and requires permission from the Department of Pharmacology and Toxicology. Students must receive prior consent from the course coordinator according to Departmental guidelines before the Department will register them in the course. Students can take either course as their required independent project, or may take JPM400Y1 as an additional elective. It is the student’s responsibility to make all necessary preparations before the session starts (see course description).

Professional Experience Year Co-op Program:

The Professional Experience Year Co-op Program (PEY Co-op) is a 12-16 month paid employment placement within pharmaceutical/biotechnology/chemical companies, university research laboratories, university-affiliated organizations, consulting companies or government research agencies. The PEY Co-op takes place between the 3rd and 4th years of undergraduate study and is open to Specialists in Pharmacology and Biomedical Toxicology who have a CGPA of at least 3.0. Students who participate in this program agree to return to their SPE program in the Department to complete their 4th year and their degree. The PEY Co-op provides an excellent opportunity for real-world experience in drug development, project management, client relations, basic and clinical research, information management and regulatory affairs.

Biomedical Toxicology Major (Science Program) - ASMAJ2573

Description:

Biomedical toxicology has emerged as an important science addressing drug safety and the adverse consequences of chemical exposure. The Biomedical Toxicology Major program examines the harmful effects of chemicals on the health and behavior of individuals. The safety/toxicity of a wide array of chemicals is examined including pharmaceutical preparations, herbal products, natural toxins, and environmental contaminants, with a focus on their effects on human health. Students learn about...
basic and clinical toxicology and related areas through lectures, tutorials and class discussions/debates.

This program includes the application of toxicological knowledge and risk assessment and prepares students for a variety of job opportunities following its completion as well as for further study in graduate research or professional programs such as Medicine, Dentistry, and Pharmacy. (Note: Students interested in professional programs should contact the respective faculties to inquire about specific transfer credits.) Many graduates of the Biomedical Toxicology major program pursue careers in scientific research, forensic science, nutrition and food sciences, governmental agencies, consulting agencies, and industrial settings including the pharmaceutical and chemical industries.

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

Variable Minimum Grade or Variable Minimum Grade Average
A minimum grade/minimum grade average in required courses is needed for entry, and this minimum changes each year depending on available spaces and the number of applicants. The following courses or their equivalents must be completed:

- BIO120H1 and BIO130H1
- (CHM135H1, CHM136H1)/CHM151Y1

To ensure that students admitted to the program will be successful, applicants with a final grade lower than 60% in each course, or a combined grade average lower than 70% in these required courses will not be considered for admission. Please note that obtaining this minimum final grade or minimum grade average does not guarantee admission to the program. Please consult the Arts & Science Program Toolkit for more information on program enrolment.

Notes:

- While it is difficult to predict what will be competitive course marks and average in a given year, based on previous years, the estimate is: course marks = mid 80s; average = mid 80s.
- Students wishing to enroll in this program will initially apply to a general departmental Major (ASMAJ2675) after their first year. After admission, and prior to the start of their third year of study, students will select the focus for their future studies (Biomedical Toxicology or Pharmacology). First and second year courses are the same for all Major programs within the Department (ASMAJ2675/ASMAJ2082/ASMAJ2573).
- Students cannot combine a Biomedical Toxicology Major program with a Pharmacology Major or Specialist program for their degree.
- Students wishing to enroll after their second year who have taken PCL201H1 will be considered on a case by case basis. Successful completion of required pre-requisite courses is required to further enroll in upper level program courses.

Completion Requirements:

(8 credits)

First Year: BIO120H1; BIO130H1; (CHM135H1, CHM136H1)/CHM151Y1

Second Year: BCH210H1; BIO230H1; BIO255H1; PCL201H1; CHM247H1/CHM249H1; (PSL300H1, PSL301H1) (NOTE: PCL201Y1 is not acceptable)

Third Year: PCL302H1; PCL362H1

Third or Fourth Year: 1.0 credit with at least 0.5 credit from PCL courses: JPM300H1/JPM400Y1/PCL345H1/PCL367H1/PCL368H1/PCL389H1/PCL402H1/PCL425H1/PCL475H1/PCL476H1/PCL475Y1/PCL477H1/PCL481H1/PCL484H1/PCL486H1/PCL490H1/ANA301H1/LMP301H1/LMP363H1

Fourth Year: (PCL482H1, PCL483H1)/PCL473Y1

Notes:

1. Students are not allowed to enroll concurrently in the Major Program in Pharmacology and the Major Program in Toxicology.
2. Students are not allowed to enroll concurrently in the Major Program in Pharmacology and a Specialist Program in Toxicology.
3. Students are not permitted to take PCL472Y1 or PCL474Y1.

Pharmacology Major (Science Program) - ASMAJ2082

Description:

Pharmacology is an integrative medical science that builds upon the core foundational disciplines of the basic life sciences. This program is intended for students who want to gain knowledge in Pharmacology in combination with a separate and complementary area of study and is designed for students interested in broad, multidisciplinary training. The Pharmacology Major program is designed to provide students with a broad understanding of the therapeutic properties and clinical uses of externally administered chemical substances in the whole body, as well as the mechanisms of their actions and interactions with molecular, cellular and tissue targets. Students learn about both basic and clinical pharmacology through lectures, tutorials and small group sessions.

This understanding prepares students for a variety of either research-based or non-research-based careers, including positions in the pharmaceutical and biotechnology industries, in government agencies, in research institutes and in universities. Pharmacology (and its application in clinical therapeutics) plays a prominent role in society, and a comprehension of drug mechanisms and uses is fundamental to career success in the fields of medicine, dentistry, pharmacy and nursing. While some students take the Pharmacology Major program in preparation for these professional programs, students are advised to contact the respective Faculties directly for questions related to transfer credits.

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

Variable Minimum Grade or Variable Minimum Grade Average
A minimum grade/minimum grade average in required courses is needed for entry, and this minimum changes each year depending on available spaces and the number of applicants. The following courses or their equivalents must be completed:
To ensure that students admitted to the program will be successful, applicants with a final grade lower than 60% in each course, or a combined grade average lower than 70% in these required courses will not be considered for admission. Please note that obtaining this minimum final grade or minimum grade average does not guarantee admission to the program. Please consult the Arts & Science Program Toolkit for more information on program enrolment.

**Notes:**

- While it is difficult to predict what will be competitive course marks and average in a given year, based on previous years, the estimate is: course marks = mid 80s; average = mid 80s.
- Students wishing to enroll in this program will initially apply to a general departmental Major (ASMAJ2675) after their first year. After admission, and prior to the start of their third year of study, students will select the focus for their future studies (Biomedical Toxicology or Pharmacology). First and second year courses are the same for all Major programs within the Department (ASMAJ2675/ASMAJ2082/ASMAJ2573). Students cannot combine a Pharmacology Major program with a Pharmacology Major or Specialist program for their degree.
- Students wishing to enroll after their second year who have taken PCL201H1 will be considered on a case by case basis. Successful completion of required pre-requisite courses is required to further enroll in upper level program courses.

**Completion Requirements:**

(8 credits)

First Year: BIO120H1; BIO130H1; (CHM135H1, CHM136H1)/CHM151Y1

Second Year: BCH210H1; BIO230H1; BIO255H1; PCL201H1; CHM247H1/CHM249H1; (PSL300H1, PSL301H1) (NOTE: PSL201Y1 is not acceptable)

Third Year: PCL302H1; BCH311H1/PSL350H1

Third or Fourth Year: PCL469H1 and 1.0 credit from: JPM300H1/JPM400Y1/PCL345H1/PCL367H1/PCL368H1/PCL389H1/PCL402H1/PCL475H1/PCL476H1/PCL475Y1/PCL477H1/PCL484H1/PCL486H1/PCL490H1

Fourth Year: PCL470H1/PCL470Y1

**Notes:**

1. Students are not allowed to enroll concurrently in the Major Program in Pharmacology and the Major Program in Toxicology.
2. Students are not allowed to enroll concurrently in the Major Program in Pharmacology and a Specialist Program in Toxicology.
3. Students are not permitted to take PCL472Y1 or PCL474Y1.

---

**Pharmacology and Toxicology Courses**

**PCL102H1 - The Art of Drug Discovery**

**Hours:** 24L

This course introduces students to the processes and strategies for discovering new drugs with a special focus on current and emerging approaches for the rational design of drugs that are both effective and safe.

**Distribution Requirements:** Science

**Breadth Requirements:** Living Things and Their Environment (4)

**PCL200H1 - Drugs & the Brain**

**Hours:** 24L

Lectures introduce students to prescribed and illicit drugs that affect the brain. Lectures cover drug pharmacology and explain how drugs alter mood, perception, cognition, and arousal by affecting different aspects of brain function. The societal impact of these prescribed and illicit drugs is also discussed.

**Note:** This course is not intended for upper year students who have already completed BCH210H1 or other exclusion courses. Upper year Life Science students who are excluded and are interested in this content should look into PCL475H1 and/or PCL476H1 as the more appropriate choice.

**Prerequisite:** None

**Exclusion:** PSY396H1, PCL302H1, BCH210H1, BCH242Y1

**Distribution Requirements:** Science

**Breadth Requirements:** Living Things and Their Environment (4)

**PCL201H1 - Introduction to Pharmacology and Pharmacokinetic Principles**

**Hours:** 36L/6T

A general introduction to the principles of pharmacology and pharmacokinetics. Topics include chemical (drug) absorption, distribution, biotransformation, elimination; the calculation of dosages and pharmacokinetic parameters, variability in drug response, adverse drug reactions and special interest topics.

**Prerequisite:** BIO130H1

**Corequisite:** Recommended Co-requisites: BIO230H1/BIO255H1, PSL300H1/PSL301H1

**Distribution Requirements:** Science

**Breadth Requirements:** Living Things and Their Environment (4)
PCL218H1 - Cannabis the Drug

Hours: 24L

There is a critical need for a breadth of understanding regarding its mechanism of action, pharmacological effects and its potential benefits and harms (short- and long-term). Students will gain a breadth of understanding in cannabis-related topics including pharmacology and toxicology, its role in mental health and addictions, medical use, drug policy and new drug development that stems from increased access to cannabis constituents. They will learn to differentiate myths and anecdotes from evidence-based knowledge. Going forward it is imperative that students spanning basic sciences through business, arts and engineering have a comprehensive understanding of these topics. PCL218H1 will give students for a variety of academic backgrounds a basic understanding of the health implications of cannabis which have broad implications for both our professional and personal lives.

Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

PCL297H1 - Research Experience in Pharmacology & Toxicology

Hours: 60P

A formal opportunity to gain hands-on experience and develop their skills within a research laboratory setting. Students will have a chance to become familiar and efficient at good lab practices, develop critical thinking and evaluation skills while applying their knowledge and developing trouble shooting skills to practical research questions. This course is Pass/Fail. Not eligible for CR/NCR option.

Prerequisite: None; Permission of Faculty Supervisor and Departmental Undergraduate Coordinator required.
Corequisite: None
Recommended Preparation: Completion of at least first year of Life Sciences program.
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

JPM300H1 - Research Readiness and Advancing Biomedical Discoveries

Hours: 12L/24T

Explore how scientists leverage their knowledge and skills to advance academic biomedical discoveries from the laboratory to improve patient health through either commercialization or not-for-profit approaches. Students will learn about innovation and develop key research and industry skills including intellectual property, ethics, budget and project management; learn how to critically evaluate scientific evidence and effectively communicate to a wide audience. This hybrid student-centered course will include interactive online modules and in-class group work. Course work will focus on developing skills and knowledge to help you be successful in diverse research courses and future careers. Not eligible for CR/NCR.

Prerequisite: 10.0 FCE completed; BCh210H1/BCh242Y1
Recommended Preparation: PSL300H1, PSL301H1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

PCL302H1 - Pharmacodynamic Principles

Hours: 36L

Topics include biological action of drugs on membranes, enzymes, receptors, neural and hormonal systems, transmission and modulation.

Prerequisite: (PSL300H1, PSL301H1)
Exclusion: PHC300H1, PHC301H1
Recommended Preparation: PCL201H1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

PCL345H1 - Experimental Approaches in Drug Discovery

Hours: 24L

Lecturers use their own research to demonstrate how they approach a biological question. The lectures emphasize why one approach is chosen over other possible approaches, and explain the strengths and limitations of techniques. Following the one-hour lecture there is an interactive discussion of the experimental approach covered in the lecture.

Prerequisite: One of PSL300H1/PSL301H1/BiO270H1/BiO271H1, and completion of at least 10.0 FCE, or permission of Department
Recommended Preparation: BCh210H1, PCL201H1, PCL302H1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)
PCL362H1 - Introductory Toxicology

Hours: 27L/5T

Toxicological problems encountered in animals and humans; biochemical mechanisms and clinical factors of toxicological significance; models of drug-related diseases.

Prerequisite: BIO130H1, PCL201H1 or Permission of the Department
Corequisite: Recommended Co-requisite: PCL302H1, BCH311H1/CSB349H1
Recommended Preparation: BCH210H1, CHM247H1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

PCL366H1 - Basic Pharmacology and Toxicology Laboratory

Hours: 16T/32P

Through practical hands-on laboratory experiments and tutorials, students will be introduced to some basic experimental techniques and laboratory skills that are used within pharmacology and toxicology research. (Ancillary lab fee $25)

Prerequisite: PCL201H1, PSL300H1/PSL301H1
Corequisite: PCL302H1
Exclusion: PCL365Y1/PCL471Y1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

PCL367H1 - Drug Development Pipeline I: In vitro

Hours: 8T/40P

This course will provide a learning experience that simulates the process, techniques, analysis and evaluation methods used for early-stage in vitro drug development. Modules will build on the student's fundamental knowledge and will simulate and illustrate the thought processes and techniques used during drug development in academic research institutes, clinical research organizations and pharmaceutical and biotechnology companies worldwide. Modules will include pharmacokinetic and pharmacodynamic analyses and pharmacogenetic screening approaches in model systems and humans. This experience will allow students to leverage their learned skills and knowledge to improve their comprehension and employability in this area, while honing critical thinking and analytical skills.

Prerequisite: PSL300H1, PSL301H1, PCL201H1, PCL302H1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

PCL368H1 - Drug Development Pipeline II: In vivo

Hours: 8T/40P

This course will provide a learning experience that parallels and simulates the process, protocols, methods and evaluation tools used for later-stage in vivo drug development. Modules will build on the student’s fundamental knowledge and simulate the thought processes and techniques used during drug development in research institutes, clinical research organizations and pharmaceutical and biotechnology companies worldwide. Modules will include pharmacokinetic and pharmacodynamic analyses and pharmacogenetic screening approaches in model systems and humans. This experience will allow students to leverage their learned skills and knowledge to improve their comprehension and employability in this area, while honing critical thinking and analytical skills.

Prerequisite: PSL300H1, PSL301H1, PCL201H1, PCL302H1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

PCL376H1 - Experimental Design and Data Analysis for Pharmacology and Toxicology

Hours: 30L/6T

This course includes lectures focused on experimental design and the analysis of pharmacological and toxicological data. Topics include: principles of experimental design, data analysis and statistical tests appropriate for each type, use of computing statistical packages, analysis of dose-response and time-response curves and analysis of receptor binding assays. Practical applications and problem sets will be taken up in class and in tutorials.

Prerequisite: PCL201H1
Corequisite: PCL302H1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

PCL389H1 - Understanding the Role of Pharmacology and Toxicology in Society

Hours: 24L

This service learning course explores issues surrounding the effects that pharmaceuticals and chemicals have in society. Specifically, it integrates pharmacology and toxicology with social, health and political issues as they relate to drug abuse and addiction. Students are required to interact and work with community partners during the semester (approx 20hrs). Classroom discussions will integrate community experiences with lecture material.

Prerequisite: PCL201H1
Corequisite: PCL302H1; (PSL300H1, PSL301H1)
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)
PCL397Y0 - Research Abroad in Pharmacology and Toxicology

Hours: 200P

An independent research project in a pharmacology and/or toxicology laboratory in an approved partner university. This international research experience will be supervised by a faculty member at the partner institution and will allow students to develop critical thinking and evaluation skills while applying their knowledge and problem-solving skills to practical research questions. Not eligible for CR/NCR option.

Prerequisite: PCL201H1 (65%), PSL300H1 (65%), PSL301H1 (65%); permission from the Undergraduate Coordinator

Recommended Preparation: PCL302H1 (65%)

Distribution Requirements: Science

Breadth Requirements: Living Things and Their Environment (4)

PCL399Y1 - Research Opportunity Program

Credit course for supervised participation in faculty research project. Details at https://www.artsci.utoronto.ca/current/academics/research-opportunities/research-opportunities-program. Not eligible for CR/NCR option.

JPM400Y1 - Biomedical Incubator Capstone Project

Hours: 240P/16S

Discover what it is like to be part of a biomedical innovation team. Develop and engage in biomedical research in a simulated small business/incubator setting under the guidance of a faculty mentor. Bring your proposed JPM300H1 project to life, while acquiring budget management, research, business and communication workplace skills for future careers. Enrolment is application-based. Proposals will be reviewed by committee and successful proposals will be matched to a mentor. Not eligible for CR/NCR option.

Students will form teams and develop a research proposal based on either:

1. Faculty led concept requiring further development and testing, which would not normally be funded grants and would be tangential to ongoing research in the lab.

2. Student developed innovative idea that requires further development and testing. This should be a project that is not being investigated in a UofT research lab.

Prerequisite: A minimum of 75% in JPM300H1; completion of any of PCL367H1/PCL368H1/PSL372H1/BCH370H1/BCH377H1. Application required; see department for more information.

Distribution Requirements: Science

Breadth Requirements: Living Things and Their Environment (4)

PCL402H1 - Pharmacology and Toxicology in Drug Development

Hours: 24L

This course provides the basic principles of drug development, with a primary focus on the application of fundamental principles of pharmacology and toxicology to the design and conduct of early phase clinical trials. This is the phase of the drug development process where much of the innovation and science occurs.

Prerequisite: PCL201H1, PCL302H1

Corequisite: PCL470H1 or PCL473Y1

Recommended Preparation: PSL300H1, PSL301H1

Distribution Requirements: Science

Breadth Requirements: Living Things and Their Environment (4)

PCL461H1 - Advanced Pharmacology and Toxicology Laboratory

Hours: 12T/36P

Advanced laboratory exercises and discussions through tutorials and presentations in selected areas of pharmacology. Enrollment in this course is generally restricted to students enrolled in the Pharmacology Specialist and Pharmacology and Biomedical Toxicology Specialist programs. (Ancillary lab fee $25).

Prerequisite: PCL201H1, PCL302H1, PSL300H1/PSL301H1, PCL366H1

Exclusion: PCL365Y1/PCL471Y1

Recommended Preparation: PCL469H1

Distribution Requirements: Science

Breadth Requirements: Living Things and Their Environment (4)

PCL469H1 - Systems Pharmacology I

Previous Course Number: PCL470Y1

Hours: 31L/4T

A culmination of pharmacological principles discussing concepts of drug properties and their interactions within the body. The mechanism of action, pharmacological properties including clinical use and adverse effects of drugs acting on the autonomic nervous systems, cardiovascular, renal, respiratory, gastrointestinal and endocrine systems will be examined. Critical evaluation of primary literature and examination of clinical problem-based case studies will be integrated with lecture material through small group sessions.

Prerequisite: PCL201H1, PCL302H1, (PSL300H1, PSL301H1)

Exclusion: PCL470Y1

Recommended Preparation: BCH210H1

Distribution Requirements: Science

Breadth Requirements: Living Things and Their Environment (4)
PCL470H1 - Systems Pharmacology II

**Previous Course Number:** PCL470Y1  
**Hours:** 31L/4T

A culmination of pharmacological principles discussing concepts of drug properties and their interactions within the body. The mechanism of action, pharmacological properties including clinical use and adverse effects of drugs acting on the central nervous systems and immunological system; antimicrobial and cancer chemotherapeutic agents as well as the potential therapeutic use of endogenous/herbal compounds will be examined. Critical evaluation of primary literature and examination of clinical problem-based case studies will be integrated with lecture material through small group sessions.

**Prerequisite:** PCL201H1, PCL302H1, (PSL300H1, PSL301H1), a minimum of 14 FCE or Permission of the Department.  
**Exclusion:** PCL470Y1  
**Recommended Preparation:** BCH210H1  
**Breadth Requirements:** Living Things and Their Environment (4)

---

PCL472Y1 - Project in Pharmacology

This course affords students an opportunity for hands-on research experience in a laboratory or applied pharmacology setting. Students will work under the supervision of a staff member and will submit a final written report and oral presentation. Enrollment is limited and requires permission from the Department of Pharmacology and Toxicology. It is the student’s responsibility to secure a placement with an approved supervisor before the course begins (a list of potential supervisors can be obtained from the Department of Pharmacology and Toxicology). Students will be registered in the course once their ballot form (obtained from the Department of Pharmacology and Toxicology) is signed by an approved supervisor and approved by the Department of Pharmacology and Toxicology. Students are expected to spend approximately 200 hours towards this project but this will be project/supervisor dependent. Not eligible for CR/NCR option.

**Prerequisite:** PCL201H1, PCL302H1, PCL366H1/PCL367H1/ PCL368H1, STA288H1/PCL376H1, and permission of Department  
**Exclusion:** PCL472Y1  
**Distribution Requirements:** Science  
**Breadth Requirements:** Living Things and Their Environment (4)

---

PCL475Y1 - Project in Toxicology

This course affords students an opportunity for hands-on research experience in a laboratory or applied toxicology setting. Students will work under the supervision of a staff member and will submit a final written report and oral presentation. Enrollment is limited and requires permission from the Department of Pharmacology and Toxicology. It is the student’s responsibility to secure a placement with an approved supervisor before the course begins (a list of potential supervisors can be obtained from the Department of Pharmacology and Toxicology). Students will be registered in the course once their ballot form (obtained from the Department of Pharmacology and Toxicology) is signed by an approved supervisor and approved by the Department of Pharmacology and Toxicology. Students are expected to spend approximately 200 hours towards this project but this will be project/supervisor dependent. Not eligible for CR/NCR option.

**Prerequisite:** PCL201H1, PCL302H1, PCL366H1/PCL367H1/ PCL368H1, STA288H1/PCL376H1, and permission of Department  
**Exclusion:** PCL472Y1  
**Distribution Requirements:** Science  
**Breadth Requirements:** Living Things and Their Environment (4)

---

PCL475H1 - Neuropsychopharmacology 1

**Previous Course Number:** PCL475Y1  
**Hours:** 36L/12T

Students will explore the major CNS neurological syndromes, examples include pain, epilepsy, the sleep-wake cycle and relate neurological abnormalities. Lectures will discuss major classes of drugs used to mitigate and treat these disorder, their mechanisms of action, clinical use and unwanted effects. This course was previously offered as PCL475Y1.

**Prerequisite:** Completion of at least 9.0 FCE  
**Exclusion:** PCL475Y1  
**Distribution Requirements:** Science  
**Breadth Requirements:** Living Things and Their Environment (4)

---

PCL476H1 - Neuropsychopharmacology 2

**Previous Course Number:** PCL475Y1  
**Hours:** 36L/12T

Students will explore the major CNS neurological syndromes which may include anxiety, schizophrenia and depression/mania and their relate neurological abnormalities. Lectures will discuss major classes of drugs used to mitigate and treat these disorders, their mechanisms of action, clinical use and unwanted effects.

**Prerequisite:** Completion of at least 9.0 FCE, and PCL475H1 (or Permission of the Department)  
**Exclusion:** PCL475Y1, PSY396H1  
**Distribution Requirements:** Science  
**Breadth Requirements:** Living Things and Their Environment (4)
PCL477H1 - The DNA Damage Response in Pharmacology and Toxicology

Hours: 24L

Many anticancer drugs and environmental agents exert their cytotoxic effects through DNA damage. This course explores specific pharmacological and toxicological agents that damage DNA and discusses how mammalian cells respond to this DNA damage.

Prerequisite: BCH210H1/BCH242Y1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

PCL481H1 - The Molecular and Biochemical Basis of Toxicology

Hours: 24L

The biochemical principles and molecular mechanisms underlying the toxicity of drugs and foreign agents. The sequence of events at the molecular level leading to impairment of cell function and the factors which determine and affect toxicity.

Prerequisite: PCL302H1
Recommended Preparation: PCL362H1, BCH210H1/BCH242Y1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

PCL482H1 - Biomedical Toxicology

Previous Course Number: PCL473Y1
Hours: 24L

This course explores several contemporary topics in biomedical toxicology with emphasis on how chemicals affect human health. Lectures cover principles of toxicology, the mechanisms of toxicity of a wide variety of toxic agents and the associated toxicities, methodologies used to examine chemical toxicities, risk assessment, and the applications of toxicology.

Prerequisite: (PCL201H1, PCL302H1, PCL362H1), a minimum of 14 FCE or Permission of Department.
Exclusion: PCL473Y1
Recommended Preparation: BCH210H1 + BCH311H1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

PCL483H1 - Interdisciplinary Toxicology

Previous Course Number: PCL473Y1
Hours: 24L

This course explores several contemporary topics in biomedical and environmental toxicology with emphasis on how chemicals affect human health. Lectures cover principles of toxicology, the mechanisms of toxicity of a wide variety of toxic agents and the associated toxicities, methodologies used to examine chemical toxicities, risk assessment, and the applications of toxicology.

Prerequisite: (PCL201H1, PCL302H1, PCL362H1) or Permission of the Course Coordinator
Exclusion: PCL473Y1
Recommended Preparation: BCH210H1 + BCH311H1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

PCL484H1 - Seminars in Pharmacokinetics and Toxicokinetics

Hours: 24S

Each week a scientist affiliated with the Department of Pharmacology and Toxicology will discuss the application of pharmacokinetic and/or toxicokinetic principles to their research. This area of study plays an important role in clinical medicine and drug development

Prerequisite: PCL201H1
Recommended Preparation: PCL302H1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

PCL486H1 - Pharmacology of Cancer Signaling

Hours: 24L

This course will expand on both classical and cutting edge pharmacological strategies proposed to mitigate the consequences of altered signal transduction in cancer. Students will have the opportunity to develop knowledge on these molecular events and how they can be targeted to improve clinical outcomes. Students will integrate lecture material with assigned readings and assignments.

Prerequisite: PCL302H1
Recommended Preparation: BCH210H1/BCH242Y1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)
PCL490H1 - Advanced Topics in Pharmacology and Toxicology

Hours: 12L/12S

An opportunity to expand on innovative and unique topics in Pharmacology and Toxicology that are not already extensively addressed. The course will reveal the dynamic nature of the field and the diverse interests of our faculty. Students will be introduced to leading edge topics and research within the discipline of Pharmacology and Toxicology.

Prerequisite: PCL302H1, and one of STA288H1/STA220H1/ PCL376H1, a minimum of 14.0 FCE or Permission of the Department

Recommended Preparation: PCL469H1/PCL470H1/PCL482H1/ PCL483H1

Distribution Requirements: Science

Breadth Requirements: Living Things and Their Environment (4)
Introduction

The Greek words from which "Philosophy" is formed mean "love of wisdom" and all great philosophers have been moved by an intense devotion to the search for wisdom. Philosophy takes no belief for granted, but examines the grounds for those beliefs which make up people’s fundamental views of the world. Philosophers think about these beliefs as thoroughly and systematically as possible, using methods of conceptual analysis, reasoning, and detailed description.

What distinguishes Philosophy from the physical and social sciences is its concern not only with the truths which are discovered by means...
of specialized methods of investigation, but with the implications that such discoveries have for human beings in their relations with one another and the world. Moreover, Philosophy has an abiding interest in those basic assumptions about the nature of the physical and social world, and about the nature of enquiry itself, which underlie our scientific and practical endeavours.

The Philosophy Department at the University of Toronto offers courses in most of the main periods and areas of Philosophy, which are listed here with a typical question or the name of one or two central figures: Ancient Philosophy (Plato, Aristotle); Mediaeval Philosophy (Augustine, Aquinas); Early Modern Philosophy (Descartes, Hume, Kant); Nineteenth-Century Philosophy (Hegel, Mill, Marx); Asian Philosophy (Chinese Philosophy) Continental Philosophy and Phenomenology (Husserl, Heidegger, Sartre); Analytic Philosophy (Quine, Russell, Wittgenstein); Epistemology and Metaphysics (What can be known? What is the ultimate nature of reality?); Moral Philosophy (How should we argue rationally about right and wrong?); Philosophy of Mind (What is mind? Is there free will?); Logic and Philosophy of Mathematics (What is sound reasoning? Do numbers exist?); Philosophy of Language (What is the meaning of “meaning”?); Philosophy of Natural Science (What is scientific method?); Social and Political Philosophy (What justifies the state?); Aesthetics (What is art? Must it be beautiful?). In addition, the Department offers Seminars (numbered PHL400H1 - PHL488H1), Individual Studies courses (numbered PHL495H1 - PHL499H1) and the Socrates Project (PHL489Y1).

Counselling is available in the main departmental office, 170 St. George St., 4th floor. In particular, students may wish to get advice about how best to combine philosophy programs with other majors or minors, given that various co-specialist programs with other disciplines have been discontinued. In addition, the Department publishes an annual Bulletin. It contains full and up-to-date information on programs and courses, including names of instructors and descriptions of particular course sections. The Bulletin is published in the summer (for the succeeding year) and is available on the Department’s website and at 170 St. George Street.

Undergraduate Coordinator:
Prof. Peter King, 170 St. George Street, Room 521 (416-978-3314), undergrad.phil@utoronto.ca

Undergraduate Counsellor:
Mr. Eric Correia, 170 St. George Street, Room 403 (416-978-3314), eric.correia@utoronto.ca

**Philosophy Programs**

**Bioethics Specialist (Arts Program) - ASSPE1001**

**Enrolment Requirements:**

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

**Completion Requirements:**

10 full courses or their equivalent including at least 4.0 FCEs at the 300+ level of which 1.0 FCE must be at the 400 level

First year (recommended):
PHL100Y1/ PHL101Y1

BIO120H1, BIO220H1

Higher Years (required):
1. PHL261H1, PHL271H1, PHL275H1
2. PHL245H1/ PHL246H1
3. 1.5 FCEs from Group 1 (Advanced Bioethics)
4. 1.0 FCE from Group 2 (Value Theory)
5. 0.5 FCEs from Group 3 (Metaphysics and Epistemology).
6. Additional philosophy courses, to a total of 10 FCEs, or else additional philosophy courses to a total of 9.0 FCEs and 1.0 FCE from Group 4 (Interdisciplinary)

**Philosophy Specialist (Arts Program) - ASSPE0231**

**Enrolment Requirements:**

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

**Completion Requirements:**

(10 full courses or their equivalent, including PHL100Y1/ PHL101Y1 if taken)

First year (recommended):
PHL100Y1/ PHL101Y1

Higher Years (required):
1. 2.0 FCEs from the following: PHL200Y1/ PHL205H1, PHL206H1/ PHL210Y1
2. 1.0 FCE from the following: PHL217H1/ PHL232H1/ PHL233H1/ PHL240H1
3. PHL265H1/ PHL275H1
4. PHL245H1/ PHL246H1
5. Additional philosophy courses, to a total of 10 FCEs, including 4.0 PHL FCEs at the 300+ level, of which 1.0 FCE must be at the 400 level.

**Physics and Philosophy Specialist (Science Program) - ASSPE2584**

**Description:**

Physics has deep historical roots in natural philosophy and many aspects of contemporary Physics raise profound philosophical questions about the nature of reality. The interdisciplinary Physics and Philosophy Program allows the student to engage with both Physics and Philosophy at their deepest levels, and to more fully explore the connections between them.

Consult Associate Chair (Undergraduate Studies), Department of Physics or Philosophy.
**Enrolment Requirements:**

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

**Completion Requirements:**

(15.0 full courses or their equivalent (FCE), including at least 1.5 FCE at the 400 level)

First Year: (2.5 FCE)

MAT135H1/MAT136H1/MAT137Y1/MAT157Y1/MAT223H1/MAT240H1/PHY131H1/PHY151H1, PHY132H1/PHY152H1 (The courses MAT137Y1, MAT223H1, PHY151H1, PHY152H1 are recommended.)

First or Second Year: (1.5 FCE)

1.5 FCE of: PHL232H1/PHL233H1/PHL240H1/PHL245H1/HPS250H1 (PHL245H1 may only be counted here if MAT157Y1 is not taken)

Second Year: (3.0 FCE)

MAT237Y1/MAT257Y1/MAT235Y1/MAT244H1/MAT267H1, PHY250H1, PHY254H1, PHY256H1 (The courses MAT237Y1, MAT244H1 are recommended.)

Third Year: (2.0 FCE)

MAT334H1/MAT354H1, PHY252H1, (PHY350H1/PHY354H1), PHY356H1

Fourth Year: (1.0 FCE)

PHY456H1, PHY491H1

Any Year: (5.0 FCE)

(PHL345H1/PHL347H1), PHL355H1, PHL356H1, (PHL415H1/PHL455H1/PHL482H1), plus 1.0 FCE of (PHL325H1/PHL331H1/PHL332H1/PHL346H1/PHL354H1/PHL357H1) plus 2.0 FCE additional PHL courses, at least 0.5 FCE of which must be from the Philosophy Value Theory Course Group (The courses PHL265H1, PHL275H1 are recommended.)

---

**Bioethics Major (Arts Program) - ASMAJ0231**

**Enrolment Requirements:**

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

**Completion Requirements:**

(7 full courses or their equivalent, including PHL100Y1/PHL101Y1 if taken)

First year (recommended): PHL100Y1/PHL101Y1

Higher Years (required):

1. PHL281H1
2. PHL245H1/PHL246H1
3. 1.0 FCE from Group 1 (Advanced Bioethics)
4. 1.5 FCEs from PHL271H1/PHL275H1/Group 2 (Value Theory)
5. 0.5 FCE from Group 3 (Metaphysics and Epistemology).
6. Additional philosophy courses, to a total of 7.0 FCEs, or else additional philosophy courses to a total of 6.5 FCEs, plus 0.5 FCE from Group 4 (Interdisciplinary).

---

**Bioethics Minor (Arts Program) - ASMIN1001**

**Enrolment Requirements:**

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

**Completion Requirements:**

(4 full courses or their equivalent including at least 1.0 FCE at 300+ level)

1. PHL281H1
2. PHL245H1/PHL246H1
3. 0.5 FCE from Group 1 (Advanced Bioethics)
4. 1.0 FCE from PHL271H1/PHL275H1/Group 2 (Value Theory)
5. Additional philosophy courses to a total of 4.0 FCEs.
Philosophy Minor (Arts Program) - ASMIN0231

Enrolment Requirements:
This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:
(4 full courses or their equivalent, including PHL100Y1/PHL101Y1 if taken)
1. 1.0 FCE from the following: PHL200Y1/PHL205H1/PHL206H1/PHL210Y1/PHL217H1/PHL232H1/PHL233H1/PHL240H1/PHL265H1/PHL275H1
2. Additional philosophy courses, to a total of 4.0 FCE's, including 1.0 FCE at the 300+ level.

Mathematics and Philosophy Specialist (Science Program) - ASSPE1361

Enrolment Requirements:
This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:
Consult the Undergraduate Coordinators of the Departments of Mathematics and Philosophy.

(12.0 FCE including at least 1.0 FCE at the 400-level)
First Year:
MAT157Y1, MAT240H1, MAT247H1; PHL232H1 or PHL233H1

Higher Years:
1. MAT257Y1, MAT327H1, MAT347Y1, MAT354H1/MAT357H1
2. PHL345H1, MAT309H1/PHL348H1
3. Four of: PHL325H1, PHL331H1, PHL332H1, PHL346H1/PHL354H1, PHL347H1, PHL349H1, PHL355H1, PHL451H1, PHL483H1
4. 1.0 FCE from PHL200Y1/PHL205H1/PHL206H1/PHL210Y1
5. PHL265H1/PHL275H1
6. 2.0 FCE of PHL/APM/MAT at the 300+ level, to a total of 12.0 FCE.

NOTE: Students with a CGPA of 3.5 and above may apply to have graduate level math courses count towards their 400-level course requirements.

Course Groups

Group 1 - Advanced Bioethics
- PHL380H1 Global Bioethics
- PHL381H1 Ethics and Medical Research

Group 2 - Value Theory
- PHL265H1 Introduction to Political Philosophy
- PHL295H1 Business Ethics
- PHL365H1 Political Philosophy
- PHL366H1 Topics in Political Philosophy
- PHL370H1 Issues in Philosophy of Law
- PHL375H1 Ethics
- PHL407H1 Seminar in Ethics
- PHL412H1 Seminar in Political Philosophy
- PHL413H1 Seminar in Applied Ethics
- PHL483H1 Advanced Topics in Social and Political Philosophy

Group 3 - Metaphysics and Epistemology
- PHL232H1 Knowledge and Reality
- PHL233H1 Philosophy for Scientists
- PHL240H1 Persons, Minds and Bodies
- PHL331H1 Metaphysics
- PHL332H1 Epistemology
- PHL340H1 Issues in Philosophy of Mind
- PHL341H1 Freedom, Responsibility, and Human Action
- PHL342H1 Minds and Machines
- PHL355H1 Philosophy of Natural Science
- PHL357H1 Philosophy of Biology
- HPS250H1 Introductory Philosophy of Science

Group 4 - Interdisciplinary
- ANT348H1 Medical Anthropology: Health, Power and Politics
- GER338H1 Narratives of the Body (E)
- GGR340H1 Health Geography
- HIS423H1 Social History of Medicine in the 19th & 20th Centuries
- HIS489H1 The History of Psychiatry and Psychiatric Illness
- HMB201H1 Introduction to Fundamental Genetics and its Applications
- HMB202H1 Introduction to Health and Disease
- HPS318H1 History of Medicine I
- HPS319H1 History of Medicine II
- JHE353H1 History of Evolutionary Biology
- SOC243H1 Sociology of Health and Illness
- SOC309H1 HIV and AIDS: Social Policies and Programs
- SOC363H1 Sociology of Mental Health and Mental Disorders
- SOC427H1 Families and Health
- WGS367H1 The Politics of Gender and Health
Environmental Ethics (Arts Program): see School of the Environment

Regarding Philosophy Courses

The following courses do not have PHL prefixes but may still be counted towards a philosophy program. Students should consult the primary listings for their course descriptions: COG250Y1, COG401H1, HPS250H1, TRN200Y1.

300-SERIES COURSES

All 300-series courses have a prerequisite of three half credits (or equivalent) in philosophy, with the exception of PHL345H1 - PHL349H1 and PHL356H1. There is also a general prerequisite of 7.5 courses (in any field). Only specific courses required or recommended are listed below. Students who do not meet the prerequisite for a particular course but believe that they have adequate preparation must obtain the permission of the instructor to gain entry to the course.

400-SERIES COURSES

1. The general prerequisite for ALL 400-level courses is eight half-courses in philosophy. Most courses also have specific prerequisites. Students who do not meet the prerequisite for a particular course but believe that they have adequate preparation must obtain the permission of the instructor in order to gain entry to the course.
2. PHL400H1-PHL451H1 are undergraduate-level courses. PHL470H1-PHL488H1 are cross-listed graduate courses, available to undergraduates as well. Enrolment in cross-listed graduate courses requires the permission of the instructor and the Department in addition to the completion of the prerequisites indicated below.
3. Students in 400-level courses must attend the first class, or contact the instructor to explain their absence. Failure to do so may result in removal from the course.
4. Individual Studies courses (PHL495H1/PHL496H1/PHL497H1), which involve directed study and research, are available to advanced students. Arrangements must be made with a faculty supervisor, and approval of the Undergraduate Coordinator obtained before registration.
5. No more than one individual studies credit can be counted towards any philosophy program and normally, no more than one individual studies half credit can be counted towards the 400-level course requirement for any Specialist or Combined Specialist Philosophy program.
6. The Socrates Project (PHL489Y1) is a special enrolment course. If you are interested in this course, please contact the department.

Philosophy Courses

PHL100Y1 - Introduction to Philosophy (Historical)

Hours: 48L/24T

An introduction to the central branches of philosophy, such as logic, theory of knowledge, metaphysics, ethics, and political philosophy. Writings from the central figures in the history of Western and non-Western philosophy, as well as contemporary philosophers, may be considered.

Exclusion: PHL101Y1, PHL201H1, PHLA10H3, PHLA11H3, PHL101H5, PHL102H5, PHL105Y5

Distribution Requirements: Humanities

Breadth Requirements: Thought, Belief and Behaviour (2)

PHL101Y1 - Introduction to Philosophy (Thematic)

Hours: 48L/24T

An introduction to some of the central problems of philosophy. Examples of questions that may be considered include: What is sound reasoning? What can we know? What is ultimately real? Is morality rational? Do humans have free will? Is there a God? What is consciousness? Should we fear death? What is justice?

Exclusion: PHL100Y1, PHL201H1, PHLA10H3, PHLA11H3, PHL101H5, PHL102H5, PHL105Y5

Distribution Requirements: Humanities

Breadth Requirements: Thought, Belief and Behaviour (2)
PHL196H1 - Multiculturalism, Philosophy and Film

Hours: 48S

This course will critically examine the role of cinema in the construction and exploration of the figure of the racial, ethnic, cultural and social "other". Our topics will include (1) racial, ethnic and cultural identity and its reciprocal relationship with cinema, (2) the notion of realism in relation to the representation of race and ethnicity in film, (3) the cinematic representation of intra-ethnic and extra-ethnic conflict, and (4) the position of cinema in the debate between assimilation and multiculturalism, and (5) the ways in which cinema can help illuminate a cluster of relevant notions in political philosophy including citizenship, communitarianism, cosmopolitanism, and the relation between individual rights and group rights. Films will be screened in class and discussed against the background of focused critical readings. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

PHL197H1 - Introduction to Philosophical Anthropology

Hours: 24S

Philosophical anthropology is the subject that poses the most fundamental questions about human nature and the human condition. Taking as its point of departure the most up-to-date scientific understanding of human nature, from anthropology broadly conceived, it goes on to inquire, in a disciplined fashion, about the implications of these views for perennial philosophical questions about human rationality, morality, the possibility of progress, the existence of god and the meaning of life. This course will examine one or more topics in this domain, as a more general introduction to the discipline. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

PHL198H1 - Philosophy of Time

Hours: 24S

The passage of time is a fundamental aspect of human experience: we are born, we grow older, and eventually we pass away. During our lives our experience of the past, present, and future are distinct. We can influence the world in the present and the future, but it does not seem that we can influence the past. We have hopes about the future, memories of the past, and experiences of the present. In this seminar we will explore insights from contemporary philosophy and physics concerning the nature of the passage of time. Questions to be considered may include the following: What does it mean to say that time passes? Does time really pass at all? How do we experience time? Why can we influence the future but not the past? Is it possible to travel backward in time? Is time even real? What is time? Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

PHL199H1 - Ethics and Fiction

Hours: 24S

The goal of this seminar is to investigate ethical questions via works of fiction, primarily novels. The idea is not to see fiction as a pedantic vehicle for ethical argument, but rather to consider how, and with what effect, fiction functions as an ethical medium. We will not judge characters as 'likeable' or 'relatable'; rather, we will reflect on what fiction can teach us about the pressing challenges of choice and responsibility, and how it can (perhaps) enhance empathy.

The focus is on issues of individual identity and integrity: creating and maintaining oneself as a moral whole within environments hostile or indifferent to that end. All the works considered are novels or plays from the period between about 1900 and 2020—for convenience, the 'modern' and 'postmodern' ages, though we will query those notions. A running theme in the chosen readings is what is usually called 'existential' philosophy, but we will query the validity of that label as well. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

PHL200Y1 - Ancient Philosophy

Hours: 72L

Central texts of the pre-Socratics, Plato, Aristotle, and post-Aristotelian philosophy.

Exclusion: PHLB31H3, PHL202H5
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)
PHL201H1 - Introductory Philosophy

Hours: 36L

An introduction to philosophy focusing on the connections among its main branches: logic, theory of knowledge, metaphysics, and ethics. This course is intended for those with little or no philosophy background but who have completed four FCEs in any subject.

Prerequisite: Four FCEs in any subject
Exclusion: PHL100Y1, PHL101Y1, or more than 1.0 PHL course
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

PHL205H1 - Early Medieval Philosophy

Hours: 36L

A study of issues such as the relations of reason and faith, the being and the nature of God, and the problem of universals, in the writings of such philosophers as Augustine, Boethius, Anselm and Abelard.

Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

PHL206H1 - Later Medieval Philosophy

Hours: 36L

A study of issues such as the relations of reason and faith, the being and the nature of God, and the structure of the universe, in the writings of such philosophers as Aquinas and Ockham.

Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

PHL217H1 - Introduction to Continental Philosophy

Hours: 36L

An introduction to some of the post-Hegelian thinkers who inspired the various philosophical movements broadly referred to as continental, such as phenomenology, existentialism, deconstruction, and post-modernism. Questions include the will, faith, death, existence, history and politics, rationality and its limits, encountering an other. Authors studied may include: Kierkegaard, Schopenhauer, Nietzsche, Marx, Freud, Heidegger, Sartre.

Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

PHL232H1 - Knowledge and Reality

Hours: 36L

An introduction to issues in the fundamental branches of philosophy: metaphysics, which considers the overall framework of reality; epistemology, or the theory of knowledge; and related problems in the philosophy of science. Topics in metaphysics may include: mind and body, causality, space and time, God, freedom and determinism; topics in epistemology may include perception, evidence, belief, truth, skepticism.

Exclusion: PHLB20H3, PHLB60H3
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

PHL233H1 - Philosophy for Scientists

Hours: 24L/12T

An introduction to philosophy tailored for students with backgrounds in mathematics and science. Topics include causation, explanation, the relation between scientific and mathematical theories and reality, the role of mathematics in scientific theories, the relevance of scientific and mathematical discoveries to “big” traditional philosophical questions such as the nature of consciousness, whether we have free will, and the meaning of life.

Corequisite: 1.0 FCE in Mathematics, Physics, Chemistry, Engineering, or Computer Science
Recommended Preparation: Background in science and/or mathematics will be presupposed.
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

PHL201Y1 - 17th-and 18th-Century Philosophy

Hours: 72L

Central texts of such philosophers as Hobbes, Descartes, Spinoza, Leibniz, Locke, Berkeley, Hume, and Kant.

Exclusion: PHLB35H3, PHL210Y5
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)
PHL235H1 - Philosophy of Religion

Hours: 36L

Some central issues in the philosophy of religion such as the nature of religion and religious faith, arguments for the existence of God, the problem of evil, varieties of religious experience, religion and human autonomy.

Exclusion: PHL235H5
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

PHL237H1 - History of Chinese Philosophy

Hours: 36L

An historical and systematic introduction to the main phases of Chinese philosophical development, including Confucianism, Taoism, Buddhism, and Neo-Confucianism; the challenge of Western thought and the development of modern Chinese Philosophy.

Exclusion: EAS241H1
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

PHL238H1 - Critical Reasoning

Previous Course Number: PHL247H1
Hours: 36L

The area of informal logic - the logic of ordinary language, usually non-deductive. Criteria for the critical assessment of arguments as strong or merely persuasive. Different types of arguments and techniques of refutation; their use and abuse.

Exclusion: TRN200Y1, PHL247H1, PHL145H5, PHL238H5, PHL247H5
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

PHL239H1 - Introduction to South Asian Philosophy

Hours: 36L

An introduction to the main schools of Indian philosophical thought (Nyaya, Vaisheshika, Samkhya, Yoga, Mimamsa, and Vedanta) and other South Asian philosophies and their approaches to fundamental problems of philosophy such as epistemology and ethics.

Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

PHL240H1 - Persons, Minds and Bodies

Hours: 36L

Consciousness and its relation to the body; personal identity and survival; knowledge of other minds; psychological events and behaviour.

Exclusion: PHLB81H3
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

PHL243H1 - Philosophy of Human Sexuality

Hours: 36L

Philosophical issues about sex and sexual identity in the light of biological, psychological and ethical theories of sex and gender; the concept of gender; male and female sex roles; perverse sex; sexual liberation; love and sexuality.

Exclusion: PHLB12H3, PHL243H5
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

PHL244H1 - Human Nature

Hours: 36L

Aspects of human nature, e.g., emotion, instincts, motivation, Theories of human nature, e.g., behaviourism, psychoanalysis.

Exclusion: PHLB91H3, PHL244H5
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

PHL245H1 - Modern Symbolic Logic

Hours: 36L

An introduction to formal deductive logic. Semantics, symbolization, and techniques of natural deduction in sentential logic. Symbolization and natural deduction with polyadic predicates. Introduction to advanced concepts in first-order logic, such as operations, identity, and models.

Exclusion: PHLB50H3, PHL245H5
Breadth Requirements: Thought, Belief and Behaviour (2)
PHL246H1 - Probability and Inductive Logic
Hours: 36L
The elements of axiomatic probability theory and its main interpretations (frequency, logical, and subjective). Reasoning with probabilities in decision-making and science.

Exclusion: PHL246H5
Recommended Preparation: PHL245H1
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

PHL256H1 - Philosophy in the Age of the Internet
Hours: 36L
The internet and digital technology have had a transformative impact on the economy, society and politics, art and culture, and everyday life. This course explores the fascinating, often urgent, new philosophical questions raised by these changes as well as the way they invite a rethinking of many older philosophical questions. Topics to be addressed may include artificial intelligence and the singularity; identity through social media; digital ownership and privacy; and collective/distributed knowledge its relation to information, among others.

Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

PHL265H1 - Introduction to Political Philosophy
Hours: 36L
An introduction to central issues in political philosophy, e.g., political and social justice, liberty and the criteria of good government. The writings of contemporary political philosophers, as well as major figures in the history of philosophy, may be considered.

Exclusion: PHLB17H3, PHL265H5
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

PHL268H1 - Philosophy and Social Criticism
Hours: 36L
Is the objective of philosophy to understand and interpret the world, or to change it? A study of theorists who have taken philosophy to be a tool for social criticism. Topics studied may include feminism, critical race theory, anti-consumerism, the critique of mass society, and conservative cultural criticism.

Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

PHL271H1 - Law and Morality
Hours: 36L
Justifications for the legal enforcement of morality; particular ethical issues arising out of the intersection of law and morality, such as punishment, freedom of expression and censorship, autonomy and paternalism, constitutional protection of human rights.

Exclusion: PHLB11H3, PHL271H5
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

PHL273H1 - Environmental Ethics
Hours: 36L
A study of environmental issues raising questions of concern to moral and political philosophers, such as property rights, responsibility for future generations, and the interaction of human beings with the rest of nature. Typical issues: sustainable development, alternative energy, the preservation of wilderness areas, animal rights.

Exclusion: PHLB02H3, PHL273H5
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

PHL275H1 - Introduction to Ethics
Hours: 36L
An introduction to central issues in ethics or moral philosophy, such as the objectivity of values, the nature of moral judgements, rights and duties, the virtues, and consequentialism. Readings may be drawn from a variety of contemporary and historical sources.

Exclusion: PHLB07H3, PHL275H5
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)
PHL281H1 - Bioethics

Hours: 36L

An introduction to the study of moral and legal problems in medical practice and in biomedical research; the development of health policy. Topics include: concepts of health and disease, patient rights, informed consent, allocation of scarce resources, euthanasia, abortion, genetic and reproductive technologies, human research, and mental health.

Exclusion: PHLB09H3, PHL283H5
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

PHL285H1 - Aesthetics

Hours: 36L

An historical and systematic introduction to the main questions in the philosophy of art and beauty from Plato to the present. These include the relation between art and beauty, the nature of aesthetic experience, definitions and theories of art, the criteria of excellence in the arts, and the function of art criticism.

Exclusion: PHLB03H3, PHL285H5
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

PHL295H1 - Business Ethics

Hours: 36L

Philosophical issues in ethics, social theory, and theories of human nature insofar as they bear on contemporary conduct of business. Issues include: Does business have moral responsibilities? Can social costs and benefits be calculated? Does modern business life determine human nature or the other way around? Do political ideas and institutions such as democracy have a role within business?

Exclusion: PHLB06H3, PHL295H5
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

PHL299Y1 - Research Opportunity Program

Credit course for supervised participation in faculty research project. Details at https://www.artsci.utoronto.ca/current/academics/research-opportunities/research-opportunities-program. Not eligible for CR/NCR option.

Distribution Requirements: Humanities

PHL301H1 - Early Greek Philosophy

Hours: 36L

A study of selected Greek philosophers before Plato. Topics may include the Pre-Socratic natural philosophers, Parmenides and the Eleatics, and the so-called sophistic movement.

Prerequisite: PHL200Y1, 7.5 courses (in any field) with at least 1.5 in philosophy
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

PHL302H1 - Ancient Philosophy After Aristotle

Hours: 36L

A study of selected themes in post-Aristotelian philosophy. Topics may include Stoicism, Epicureanism, Neoplatonism, and various forms of scepticism.

Prerequisite: PHL200Y1, 7.5 courses (in any field) with at least 1.5 in philosophy
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

PHL303H1 - Plato

Hours: 36L

Selected metaphysical, epistemological, and ethical themes in Plato’s dialogues.

Prerequisite: PHL200Y1, 7.5 courses (in any field) with at least 1.5 in philosophy
Exclusion: PHL301H5
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

PHL304H1 - Aristotle

Hours: 36L

Selected anthropological, ethical and metaphysical themes in the works of Aristotle.

Prerequisite: PHL200Y1, 7.5 courses (in any field) with at least 1.5 in philosophy
Exclusion: PHL302H5
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)
PHL307H1 - Augustine

Hours: 36L

Central themes in St. Augustine's Christian philosophy, such as the problem of evil, the interior way to God, the goal of human life and the meaning of history.

Prerequisite: PHL200Y1/PHL205H1, 7.5 courses (in any field) with at least 1.5 in philosophy
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

PHL308H1 - Aquinas

Hours: 36L

Philosophical innovations that St. Thomas Aquinas made in the course of constructing a systematic theology: essence and existence, the Five Ways, separate intelligences, the human soul and ethics.

Prerequisite: PHL200Y1/PHL205H1/PHL206H1, 7.5 courses (in any field) with at least 1.5 in philosophy
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

PHL309H1 - Topics in Medieval Philosophy

Hours: 36L

Study of a major philosophical figure from the medieval period, such as Anselm, Abelard, Bonaventure, Maimonides, Avicenna, Duns Scotus, William of Ockham; or consideration of a central philosophical topic in a variety of medieval authors, for example, universals, individuation, the existence of God, free will and free choice, eternity and creation.

Prerequisite: PHL200Y1/PHL205H1/PHL206H1, 7.5 courses (in any field) with at least 1.5 in philosophy
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

PHL310H1 - The Rationalists

Hours: 36L

Central philosophical problems in philosophers such as Descartes, Spinoza, Leibniz, and their contemporaries.

Prerequisite: PHL210Y1, 7.5 courses (in any field) with at least 1.5 in philosophy
Exclusion: PHLC35H3
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

PHL311H1 - The Empiricists

Hours: 36L

Central philosophical problems in philosophers such as Locke, Berkeley, Hume, and their contemporaries.

Prerequisite: PHL210Y1, 7.5 courses (in any field) with at least 1.5 in philosophy
Exclusion: PHLC36H3
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

PHL313H1 - Topics in 17th and 18th Century Philosophy

Hours: 36L

Central philosophical problems arising in the early modern period.

Prerequisite: PHL210Y1, 7.5 courses (in any field) with at least 1.5 in philosophy
Exclusion: PHL313H5
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

PHL314H1 - Kant

Hours: 36L

A systematic study of The Critique of Pure Reason.

Prerequisite: PHL210Y1, 7.5 courses (in any field) with at least 1.5 in philosophy
Exclusion: PHLC37H3, PHL314H5
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

PHL315H1 - Topics in 19th-Century Philosophy

Hours: 36L

Central philosophical problems arising in the 19th century.

Prerequisite: PHL210Y1, 7.5 courses (in any field) with at least 1.5 in philosophy
Exclusion: PHL315H5
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

</table>
PHL337H1 - Topics in Chinese Philosophy

Hours: 36L

An intermediate level treatment of such topics as: human nature; good and evil; the role of emotions; the metaphysical ultimate.

Prerequisite: PHL237H1, 7.5 courses (in any field) with at least 1.5 in philosophy
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

PHL341H1 - Freedom, Responsibility, and Human Action

Hours: 36L

Human action, and the nature of freedom and responsibility in the light of contemporary knowledge concerning the causation of behaviour.

Prerequisite: PHL210Y1/PHL232H1/PHL233H1/PHL240H1, 7.5 courses (in any field) with at least 1.5 in philosophy
Exclusion: PHL341H5
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

PHL338H1 - Jewish Philosophy

Hours: 36L

A selection of texts and issues in Jewish philosophy, for example, Maimonides' Guide of the Perplexed, Buber's The Prophetic Faith, prophecy and revelation, Divine Command and morality, creation and eternity, the historical dimension of Jewish thought.

Prerequisite: 7.5 courses (in any field) with at least 1.5 in philosophy
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

PHL342H1 - Minds and Machines

Hours: 36L

Topics include: philosophical foundations of artificial intelligence theory; the computational theory of the mind; functionalism vs. reductionism; the problems of meaning in the philosophy of mind.

Prerequisite: 7.5 courses (in any field) including COG250Y1 or at least 1.5 in philosophy
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

PHL339H1 - Topics in South Asian Philosophy

Hours: 36L

An intermediate level study of one or more topics in South Asian Philosophy.

Prerequisite: 7.5 FCE (in any field) with at least 1.5 FCE in philosophy
Recommended Preparation: PHL239H1
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

PHL344H1 - Philosophy of Emotions

Hours: 36L

A survey of philosophical topics related to the emotions, from a range of philosophical perspectives. Questions to be considered may include the following: What exactly is an emotion? Are emotions feelings? What emotions are there, and how are they shaped by culture and society? How are emotions related to reason, the brain and the body? What role do -- and should -- the emotions play in decision-making? Can an emotion be morally right or wrong, and what makes it so?

Prerequisite: PHL240H1/PHL244H1/PHL342H1, 7.5 courses (in any field) with at least 1.5 in philosophy
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

PHL340H1 - Issues in Philosophy of Mind

Hours: 36L

Typical issues include: the mind-brain identity theory; intentionality and the mental; personal identity.

Prerequisite: One of COG250Y1/PHL240H1, 7.5 courses (in any field) with at least 1.5 in philosophy
Exclusion: PHLC95H3, PHL340H5
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)
PHL345H1 - Intermediate Logic

Hours: 36L

A continuation of PHL245H1, requiring no other prior knowledge of philosophy or mathematics. First-order logic, including basic metalogical results such as soundness and completeness. An introduction to basic set theory and metalogic. Topics may include the Loewenheim-Skolem theorems for first-order logic, Goedel’s incompleteness theorems.

Prerequisite: PHL245H1/MAT157Y1 and a full course in PHL/CSC/MAT
Exclusion: PHL351H3, PHL345H5
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

PHL347H1 - Modal Logic and Philosophical Applications of Logic

Hours: 36L

Formal study of the concepts of necessity and possibility, modal, propositional and quantificational logic, possible-worlds semantics, and the metaphysics of modality. Other topics may include counterfactuals, truth, vagueness, epistemic logic, temporal logic, or non-classical logic.

Prerequisite: PHL245H1/MAT157Y1 and a full course in PHL/CSC/MAT
Exclusion: PHL347H5
Recommended Preparation: PHL345H1
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

PHL348H1 - Logic and Computation

Hours: 36L

Topics will include Kurt Gödel's celebrated incompleteness theorems, the technical ideas and methods involved in proving them, their relation to the abstract theory of computation, and their philosophical implications. Are there mathematical truths that cannot be known? Are mathematical concepts such as number and set indeterminate to some extent? Are there limits to what can be modeled formally?

Prerequisite: PHL245H1/MAT157Y1 and a full course in PHL/CSC/MAT
Exclusion: MAT309H1/CSC438H1
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

PHL349H1 - Set Theory

Hours: 36L

An introduction to set theory emphasizing its philosophical relevance as a unifying framework for mathematics and logic. Topics examined may include the paradoxes of the ‘naive’ conception of sets and their resolution through axiomatization, the construction of natural numbers and real numbers in set theory, equivalents of the axiom of choice, and model theory.

Prerequisite: PHL245H1/MAT157Y1 and a full course in PHL/CSC/MAT
Exclusion: PHL347H5
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

PHL351H1 - Philosophy of Language

Hours: 36L

The nature of language as a system of human communication, theories of meaning and meaningfulness, the relation of language to the world and to the human mind.

Prerequisite: PHL245H1/MAT157Y1 and one of PHL232H1/PHL233H1/PHL240H1, 7.5 courses (in any field) with at least 1.5 in philosophy
Exclusion: PHLC80H3, PHL350H5
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

PHL354H1 - Philosophy of Mathematics

Previous Course Number: PHL346H1
Hours: 36L

Platonism versus nominalism, the relation between logic and mathematics, implications of Gödel's theorem, formalism and intuitionism.

Prerequisite: PHL245H1/MAT157Y1 and a full course in PHL/CSC/MAT
Exclusion: PHL346H1, PHL346H5, PHL344H5, PHL354H5
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)
PHL355H1 - Philosophy of Natural Science

Hours: 36L

The structure and methods of science: explanation, methodology, realism and instrumentalism.

Prerequisite: 7.5 courses (in any field) with at least 1.5 in philosophy
Exclusion: PHL355H5
Recommended Preparation: A solid background in science or HPS250H1/PHL246H1
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

PHL356H1 - Philosophy of Physics

Hours: 36L

Introduction to philosophical issues which arise in modern physics, especially in Relativity and Quantum Mechanics. Topics include: the nature of spacetime, conventionality in geometry, determinism, and the relation between observation and existence.

Prerequisite: One full course in MAT/PHY; two full courses are recommended.
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

PHL357H1 - Philosophy of Biology

Hours: 36L

Philosophical issues in the foundations of biology, e.g., the nature of life, evolutionary theory; controversies about natural selection; competing mechanisms, units of selection; the place of teleology in biology; biological puzzles about sex and sexual reproduction; the problem of species; genetics and reductionism; sociobiology; natural and artificial life.

Prerequisite: 7.5 courses (in any field) with at least 1.5 in philosophy. Students with a background in Biology are exempt from the prerequisite of 1.5 courses in Philosophy
Exclusion: PHL357H5
Recommended Preparation: HPS250H1/PHL246H1
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

PHL362H1 - Philosophy of History

Hours: 36L

Typical questions include: Has history any meaning? Can there be general theories of history? How are the findings of historians related to the theories of metaphysics and of science? Is history deterministic? Must the historian make value judgements? Is history science or an art? Are there historical forces or spirits of an epoch?

Prerequisite: 7.5 courses (in any field) with at least 1.5 in philosophy
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

PHL365H1 - Political Philosophy

Hours: 36L

A study of some of the central problems of political philosophy, addressed by historical and contemporary political theorists.

Prerequisite: PHL265H1/POL200Y1, 7.5 courses (in any field) with at least 1.5 in philosophy
Exclusion: PHLC92H3
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

PHL366H1 - Topics in Political Philosophy

Hours: 39L

A focused examination of a selected issue in political philosophy.

Prerequisite: PHL265H1/POL200Y1, 7.5 courses (in any field) with at least 1.5 in philosophy
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

PHL367H1 - Philosophy of Feminism

Hours: 36L

Selected issues and topics in the philosophy of feminism.

Prerequisite: PHL265H1/PHL268H1, 7.5 courses (in any field) with at least 1.5 in philosophy
Exclusion: PHLC13H3, PHL367H5
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)
PHL370H1 - Issues in Philosophy of Law

Hours: 36L

Major issues in philosophy of law, such as legal positivism and its critics, law and liberalism, feminist critiques of law, punishment and responsibility.

Prerequisite: PHL271H1, 7.5 courses (in any field) with at least 1.5 in philosophy
Exclusion: PHL370H5
Recommended Preparation: PHL265H1
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

PHL378H1 - War and Morality

Hours: 36L

Moral and political issues concerning warfare: the theory of the just war, pacifism, moral constraints on the conduct of war, war as an instrument of foreign policy, the strategy of deterrence. Special attention to the implications of nuclear weapons.

Prerequisite: PHL265H1/PHL275H1, 7.5 courses (in any field) with at least 1.5 in philosophy
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

PHL373H1 - Issues in Environmental Ethics

Hours: 36L

An intermediate-level examination of key issues in environmental philosophy, such as the ethics of animal welfare, duties to future generations, deep ecology, ecofeminism, sustainable development and international justice.

Prerequisite: PHL273H1, 7.5 courses (in any field) with at least 1.5 in philosophy
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

PHL375H1 - Ethics

Hours: 36L

An intermediate-level study of selected issues in moral philosophy, or of influential contemporary or historical works in ethical theory.

Prerequisite: PHL275H1, 7.5 courses (in any field) with at least 1.5 in philosophy
Exclusion: PHLC05H3
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

PHL376H1 - Topics in Moral Philosophy

Hours: 36L

A focused examination of a selected issue in moral philosophy.

Prerequisite: PHL275H1, 7.5 courses (in any field) with at least 1.5 in philosophy
Exclusion: PHLC06H3
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

PHL380H1 - Global Bioethics

Hours: 36L

An intermediate-level study of moral problems that arise in international contexts, including issues of special interest in bioethics: moral universalism and relativism; global distributive justice; poverty relief and international aid; international health disparities; globalization and health; HIV/AIDS; intellectual property and access to essential medicines; clinical trials in developing countries; exploitation and the 10/90 gap.

Prerequisite: PHL281H1, 7.5 courses (in any field) with at least 1.5 in philosophy
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

PHL381H1 - Ethics and Medical Research

Hours: 36L

An intermediate-level study of problems in biomedical and behavioural research with human subjects: informed voluntary consent, risk and benefit, experimental therapy, randomized clinical trials, research codes and legal issues, dependent groups (human embryos, children, the aged, hospital patients, the dying, prisoners, the mentally ill).

Prerequisite: PHL281H1, 7.5 courses (in any field) with at least 1.5 in philosophy
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)
PHL382H1 - Ethics: Death and Dying

Hours: 36L

An intermediate-level study of moral and legal problems, including the philosophical significance of death, the high-tech prolongation of life, definition and determination of death, suicide, active and passive euthanasia, the withholding of treatment, palliative care and the control of pain, living wills; recent judicial decisions.

Prerequisite: PHL281H1, 7.5 courses (in any field) with at least 1.5 in philosophy
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

PHL383H1 - Ethics and Mental Health

Hours: 36L

An intermediate-level study of moral and legal problems, including the concepts of mental health and illness, mental competence, dangerousness and psychiatric confidentiality, mental institutionalization, involuntary treatment and behaviour control, controversial therapies; legal issues: the Mental Health Act, involuntary commitment, the insanity defence.

Prerequisite: PHL281H1, 7.5 courses (in any field) with at least 1.5 in philosophy
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

PHL384H1 - Ethics, Genetics and Reproduction

Hours: 36L

An intermediate-level study of moral and legal problems, including the ontological and moral status of the human embryo and fetus; human newborn, carrier and prenatal genetic screening for genetic defect, genetic therapy; the reproductive technologies (e.g., artificial insemination, in vitro fertilization); recent legislative proposals and judicial decisions.

Prerequisite: PHL281H1, 7.5 courses (in any field) with at least 1.5 in philosophy
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

PHL385H1 - Issues in Aesthetics

Hours: 36L

Selected topics in the philosophy of art. Such issues as the following are discussed: whether different arts require different aesthetic principles; relations between art and language; the adequacy of traditional aesthetics to recent developments in the arts; art as an institution.

Prerequisite: 7.5 courses (in any field) with at least 1.5 in philosophy
Exclusion: PHLC03H3
Recommended Preparation: PHL285H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

PHL388H1 - Literature and Philosophy

Hours: 36L

The literary expression of philosophical ideas and the interplay between literature and philosophy. Such philosophical issues as the nature and origin of good and evil in human beings, the nature and extent of human freedom and responsibility, and the diverse forms of linguistic expression. Such authors as Wordsworth, Mill, Dostoyevsky, Tolstoy, Miller, Camus, and Lawrence are studied.

Prerequisite: 7.5 courses (in any field) with at least 1.5 in philosophy
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

PHL394H1 - Markets and Morals

Hours: 36L

A study of the standards that can be used to judge the performance of economic systems, e.g., efficiency, fairness, maximization, along with the different institutional mechanisms that can be used to organize economic activity, e.g., markets or hierarchies, public or private ownership.

Prerequisite: One of PHL265H1/PHL275H1/POL200Y1, 7.5 courses (in any field) with at least 1.5 in philosophy
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)
PHL395H1 - Issues in Business Ethics

Hours: 36L

A focused examination of moral issues that arise in the conduct of business, in areas such as accounting and finance, corporate governance, human resources, environmental conduct, business lobbying and regulatory compliance.

Prerequisite: PHL295H1, 7.5 courses (in any field) with at least 1.5 in philosophy
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

PHL398H0 - Research Excursions

Distribution Requirements: Humanities

PHL398Y0 - Research Excursions

Distribution Requirements: Humanities

PHL399Y1 - Research Opportunity Program

Credit course for supervised participation in faculty research project. Details at https://www.artsci.utoronto.ca/current/academics/research-opportunities/research-opportunities-program. Not eligible for CR/NCR option.

PHL400H1 - Seminar in Ancient/Medieval Philosophy

Hours: 36S

Advanced discussion of the principal figures and themes in ancient and/or medieval philosophy.

Prerequisite: PHL200Y1, 4.0 credits in philosophy
Distribution Requirements: Humanities

PHL401H1 - Seminar in the History of Philosophy

Hours: 36S

Advanced study of some of the principal figures in a particular historical, philosophical tradition.

Prerequisite: PHL200Y1/PHL210Y1
Distribution Requirements: Humanities

PHL402H1 - Seminar in Early Modern Philosophy

Hours: 36S

Advanced discussion of the principal figures and themes in the philosophy of the 17th and/or 18th centuries.

Prerequisite: PHL210Y1, 4.0 credits in philosophy
Distribution Requirements: Humanities

PHL403H1 - Seminar in 19th-Century Philosophy

Hours: 36S

Advanced discussion of some principal figures and themes in 19th century philosophy.

Prerequisite: PHL210Y1/PHL217H1/PHL315H1/PHL316H1, 4.0 credits in philosophy
Distribution Requirements: Humanities

PHL404H1 - Seminar in Epistemology

Hours: 36S

Typical problems include the nature of knowledge and belief; perception; theories of truth and necessity; skepticism.

Prerequisite: PHL232H1/PHL233H1, 4.0 credits in philosophy
Distribution Requirements: Humanities
PHL405H1 - Seminar in Philosophy of Mind

Hours: 36S

Advanced study of a problem in the philosophy of mind.

Prerequisite: PHL240H1/PHL342H1/COG250Y1, 4.0 credits in philosophy

Distribution Requirements: Humanities

PHL406H1 - Seminar in Metaphysics

Hours: 36S

Typical problems include causality and determinism; ontological categories; mind and body; the objectivity of space and time.

Prerequisite: PHL232H1/PHL233H1, 4.0 credits in philosophy

Distribution Requirements: Humanities

PHL407H1 - Seminar in Ethics

Hours: 36S

Advanced discussion of issues in moral philosophy, including issues of applied ethics.

Prerequisite: PHL275H1, 4.0 credits in philosophy

Distribution Requirements: Humanities

PHL408H1 - Seminar in Philosophy

Hours: 36S

Topics vary but bridge two or more areas or traditions of philosophy.

Prerequisite: 4.0 credits in philosophy

Distribution Requirements: Humanities

PHL409H1 - New Books Seminar

Hours: 36S

Advanced study of key philosophical works published within the last five years.

Prerequisite: 4.0 credits in philosophy

Distribution Requirements: Humanities

PHL410H1 - Seminar in Continental Philosophy

Hours: 36S

Advanced study of recent philosophical discussions within the continental tradition.

Prerequisite: PHL217H1/PHL315H1/PHL316H1/PHL319H1/PHL320H1/PHL321H1/PHL322H1, 4.0 credits in philosophy

Distribution Requirements: Humanities

PHL411H1 - Seminar in Analytic Philosophy

Hours: 36S

Advanced study of some topic of current philosophical interest within the analytic tradition.

Prerequisite: PHL245H1/MAT157Y1 and one of PHL232H1/PHL233H1/PHL240H1, 4.0 credits in philosophy

Distribution Requirements: Humanities

PHL412H1 - Seminar in Political Philosophy

Hours: 36S

Advanced study of some topic in social or political philosophy.

Prerequisite: PHL265H1/PHL271H1, 4.0 credits in philosophy

Distribution Requirements: Humanities

PHL413H1 - Seminar in Applied Ethics

Hours: 36S

Advanced study of some topic in an area of applied ethics, including bioethics, environmental ethics, and so on.

Prerequisite: PHL271H1/PHL273H1/PHL275H1/PHL281H1, 4.0 credits in philosophy

Distribution Requirements: Humanities
PHL414H1 - Seminar in Philosophy of Religion

Hours: 36S

Advanced study of topics in the philosophy of religion.

Prerequisite: PHL235H1/PHL335H1, 4.0 credits in philosophy
Distribution Requirements: Humanities

PHL416H1 - Seminar in Philosophy of Law

Hours: 36S

Advanced discussion of issues in the philosophy of law.

Prerequisite: PHL265H1/PHL271H1, one of PHL365H1/PHL370H1/PHL375H1; 4.0 FCE in philosophy
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

PHL417H1 - Seminar in History of Analytic Philosophy

Hours: 36S

Advanced study of a figure or topic from the history of analytic philosophy.

Prerequisite: PHL325H1, 4.0 credits in philosophy
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

PHL418H1 - Seminar in South Asian Philosophy

Hours: 36S

Advanced study of one or more topics in South Asian Philosophy.

Prerequisite: 4.0 FCEs in PHL, or permission of the instructor
Recommended Preparation: PHL339H1
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

PHL440H1 - Clinical Bioethics

Hours: 36S

Advanced study of topics in bioethics, taught in conjunction with clinical bioethicists associated with the health care organization partners of the University of Toronto Joint Centre for Bioethics.

Prerequisite: PHL281H1, 4.0 credits in philosophy. Limited to students enrolled in the Bioethics Specialist or Bioethics Major programs.
Distribution Requirements: Humanities

PHL445H1 - Metalogic

Hours: 36S

A continuation of PHL345H1, this is a course in the mathematical study of logic, also known as metalogic. We will investigate and prove theorems about logical systems. Topics covered may include: important results in metalogic, second and higher-order logic, or lambda-calculus.

Prerequisite: PHL345H1/MAT309H1; 4.0 credits in philosophy
Exclusion: PHL445H5; PHLD51H3
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

PHL446H1 - Seminar in Decision Theory

Hours: 36S

Decision theory studies what one ought to do when some more or less desirable outcomes of one’s actions depend on external facts about which one is uncertain. Uncertainty is characterized in terms of probabilities, desires are characterized in terms of utilities, and together they determine the expected utility of one’s actions. This course introduces these notions and their mathematical representations, as well as critically reflects on philosophical questions such as whether one should always take the action that maximize one’s expected utility, whether uncertainty is subjective or objective, and why uncertainty does, or ought to, obey the laws of probability.

Prerequisite: PHL246H1, 4.0 Credits in Philosophy
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)
PHL447H1 - Seminar in Philosophical Logic

Hours: 36S

Advanced discussion of some topic in philosophical logic.

Prerequisite: PHL245H1/MAT157Y1; one of PHL246H1/PHL345H1/PHL445H1/MAT309H1; 4.0 credits in philosophy

Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

PHL451H1 - Seminar in Philosophy of Language

Hours: 36S

Advanced study of some topic in the philosophy of language.

Prerequisite: PHL245H1/MAT157Y1 and one of PHL232H1/PHL233H1/PHL240H1/PHL246H1, 4.0 credits in philosophy

Distribution Requirements: Humanities

PHL455H1 - Seminar in Philosophy of Science

Previous Course Number: PHL415H1

Hours: 36S

Advanced study of some area or problem in the philosophy of science.

Prerequisite: One of PHL355H1, PHL357H1 or HPS250H1, 4.0 credits in philosophy

Distribution Requirements: Humanities

PHL470H1 - Advanced Bioethics

Hours: 36S

Philosophical exploration of the foundations and methodology of bioethics. Offered jointly with PHL2145H.

Prerequisite: PHL281H1 and one of PHL380H1/PHL381H1/PHL382H1/PHL383H1/PHL384H1, and permission of the instructor and Department (by ballot). Limited to students enrolled in the Bioethics Specialist or Bioethics Major programs.

Distribution Requirements: Humanities

PHL471H1 - Advanced Topics in Greek Philosophy

Hours: 36S

Advanced Topics in Greek Philosophy

Prerequisite: PHL200Y1 and permission of the instructor and Department (by ballot)

Distribution Requirements: Humanities

PHL472H1 - Advanced Topics in Medieval Philosophy

Hours: 36S

Advanced Topics in Medieval Philosophy

Prerequisite: PHL200Y1/PHL205H1/PHL206H1 and permission of the instructor and Department (by ballot)

Distribution Requirements: Humanities

PHL473H1 - Advanced Topics in Modern Philosophy

Hours: 36S

Advanced Topics in Modern Philosophy

Prerequisite: PHL210Y1 and permission of the instructor and Department (by ballot)

Distribution Requirements: Humanities

PHL475H1 - Advanced Topics in Moral Philosophy

Hours: 36S

Advanced Topics in Moral Philosophy

Prerequisite: PHL275H1 and permission of the instructor and Department (by ballot)

Distribution Requirements: Humanities

Faculty List

Professor and Chair of the Department
K. Strong, B Sc, D Phil, FRSC

Professor and Associate Chair (Graduate Studies)
Y-J. Kim, BS, Ph D

Professor and Associate Chair (Undergraduate Studies)
P. Krieger, M Sc, Ph D

University Professors (including cross-appointments)
J.R. Bond, OC, MS, Ph D, FRSC, FRS
S. John, B Sc, Ph D, FRSC
J.R.D. Miller, R.J.D., B Sc, Ph D, FRSC
W.R. Peltier, M Sc, Ph D, FRSC

Professors (including cross-appointments)
J. Abbatt, MA, Ph D, FRSC
V. Barzda, M Sc, Ph D (UTM)
D.J. Donaldson, B Sc, Ph D
C. Gradinaru, M Sc, Ph D, FRSC
H-K. Lo, Ph D
J. Lowman, B A, M Sc, Ph D (UTSC)
M. Luke, Ph D
G.W.K. Moore, B Sc, Ph D (UTM)
S.W. Morris, B Sc, M Sc, Ph D
N. Murray, Ph D
B. Netterfield, BS, Ph D
R.S. Orr, B Sc, Ph D, FRSC
A. Paramekanti, B Tech, Ph D
A.W. Peet, B Sc, Ph D
U-L. Pen, M Sc, Ph D
E. Poppitz, Ph D
R. Pyskylywec, M Sc, Ph D
J. Repka, B Sc, Ph D
P. Savard, M Sc, Ph D
D. Segal, B Sc, Ph D
P.K. Sinervo, B Sc, Ph D, FRSC, CM
J.E. Sipe, M Sc, Ph D, FRSC (T)
A.M. Steinberg, MA, Ph D, FRSC
R. Teuscher, M Sc, Ph D
A.C. Thompson, BS, Ph D, FRSC
J. Thywissen, MS, Ph D
W. Trischuk, B Sc, Ph D
K. Walker, B Sc, Ph D
R.P. Young, Ph D

Associate Professors (including cross-appointments)
D.C. Bailey, B Sc, Ph D
A-A. Dhirani, B Sc, Ph D
R. Ghent, Ph D
Q. Liu, B Sc, Ph D
R.S. Marjoribanks, MS, Ph D
D. McMullen, B Sc, M Sc, Ph D (UTM)
K. Menou, Ph D (UTSC)
J.N. Milstein, BS, Ph D (UTM)
H. Rein, Ph D (UTSC)
W. Ryu, AB, Ph D
K. Vanderlinde, B Sc, Ph D
J.T. Wei, MS, Ph D
M. Wells, B Sc, Ph D (UTSC)
A. Zilman, B Sc, M Sc, Ph D

Associate Professors, Teaching Stream
V.B. Deyirmenjian, B Sc, Ph D
J. Harlow, B Sc, Ph D
R.M. Serbanescu, M Sc, Ph D

Assistant Professors (including cross-appointments)
D. Curtin, Ph D
M. Diamond, Ph D
S. Goyal, B Tech, M Sc, Ph D
N. Grisouard, B S, M S, Ph D
A. Hilfinger, Ph D (UTM)
N. Ilic, Ph D
C. Lee, Ph D
S. Rauscher, Ph D (UTM)
T. Scaffidi, D Phil
Z. Su, Ph D
D. Valencia, Ph D (UTSC)
A. Vutha, Ph D
D. Wunch, Ph D
L. Yang, BS, MA, Ph D

Part-Time Lecturers
B. Wilson, Ph D

University Professor Emeritus
A.E. Litherland, B Sc, Ph D, FRSC, FRS

Professors Emeriti
R.L. Armstrong, MA, Ph D, FRSC
R. C. Bailey, B Sc., Ph D.
R.F. Code, AM, Ph D (UTM)
R.C. Desai, B Sc, Ph D
T.E. Drake, M Sc, Ph D
J.R. Drummond, MA, D Phil, FRSC
D.J. Dunlop, MA, Ph D, FRSC (UTM)
C. Dyer, Ph D
R. N. Edwards, BSc, Ph.D., C Phys, F Inst P
R.M. Farquhar, MA, Ph D, FRSC (UTM)
G.M. Graham, M Sc, Ph D
R. Holdom, MA, Ph D
A.W. Key, MA, D Phil (I)
J.D. King, BA, D Phil (UTSC)
P.P. Kronberg, M Sc, Ph D, D Sc
R.K. Logan, B Sc, Ph D (N)
J. Martin, B.Sc, D. Phil
A.D. May, MA, Ph D
B. Milkerite, M Sc, Ph D
J.W. Moffat, Ph D, D Sc
K.H. Norweich, M Sc, MD, Ph D
D.A.L. Paul, BA, Ph D
J.M. Perz, MA Sc, Ph D (UTSC)
D.J. Rowe, MA, D Phil, FRSC
H.M. van Driel, M Sc, Ph D, FRSC
G.F. West, MA, Ph D, FRSC
S.S.M. Wong, M Sc, Ph D
T.S. Yoon, M Sc, Ph D

Senior Lecturer Emeritus
D. Harrison, B Sc, Ph D

Introduction

Physics forms the bedrock of our understanding of Nature. Any physical object or process, or even the structure of the whole universe itself, can be the subject of physics. Physicists study an
extremely diverse array of systems, from the simplest subatomic particles to the most complex processes found in biological cells or in the Earth's climate. Physics provides a comprehensive set of fundamental tools that can be brought to bear on many problems across a wide variety of fields.

Students can choose between Specialist Programs in Physics or Physics combined with numerous other sciences, as well as Philosophy. In addition, the Physics Major and Minor programs give the student the option of mixing Physics with the nearly limitless array of science and non-science programs available across the University. As well, students have the opportunity to do original research and to undertake independent supervised studies for course credit.

A program in physics has much to offer. Beyond the traditional careers of teaching and research, a knowledge of physics is a powerful asset in professions like Medicine or Law, or for careers involving the environmental, geological or biological sciences. An understanding of physics is essential for those who are concerned about how society is affected by climate change or advanced technology. The conceptual problem-solving tools one acquires as a physicist can be applied with great success to many occupations.

The Physics Specialist Program offers intensive training in all aspects of physics. Courses can be selected in order to emphasize the experimental, theoretical or applied sides of physics. In fourth year, students intending to undertake graduate studies are encouraged to take advanced optional courses. These courses, which reflect the excellence and research diversity of the faculty, are offered in areas such as Relativity, High Energy Physics, Quantum Optics, Condensed Matter, Geophysics and Atmospheric Physics.

The Specialist Program in Biological Physics combines the analytical problem solving skills of the physicist with sound backgrounds in relevant biology and biochemistry. The interface between biology and physics lies at the forefront of the rapidly growing field of quantitative biology.

The Professional Experience Year Co-op program ("PEY Co-op": see also https://engineeringcareers.utoronto.ca/) is available to eligible, full-time Arts & Science Specialist students after their second year of study. Physics students are encouraged to take advantage of this opportunity to apply their scientific and mathematical skills in a 12-16-month professional internship.

The Departmental website gives detailed information on programs and courses, and describes the operation of the Department and the counseling services available. All students, most particularly those entering first year, are strongly urged to consult the web site before term begins.

Physics Programs

Biological Physics Specialist
(Science Program)

Description:

The Biological Physics specialist program focuses on the physical principles that organize complex biological phenomena. How do cells use chemical energy to generate motion? How does diffusion limit the ability of cells to measure the concentration of chemicals? How do neurons transmit and process information? How does blood flow through a beating heart? Biological Physics deals with problems at the interface of Physics, Molecular Biology, and Physiology, and covers the full range of scales, from the molecular, to the organismic. Students in this program will be trained to think rigorously and quantitatively about a wide range of interdisciplinary problems, will be well prepared to work in a variety of fields such as medicine and biotechnology, and will be ready to undertake graduate work in the fast-emerging field of Biological Physics and its related specialties including Immunology, Physiology, Neuroscience, and Bioengineering.

The program is offered as a partnership between the Departments of Physics, Biochemistry, Chemistry, Immunology, and Physiology (referred to as "partner departments"). All students take the Core courses in Physics, Mathematics, Biology, Biochemistry, and Chemistry. The Core also includes a specialized course in Biological Physics (PHY331H1) and a third-year laboratory course from one of the partner departments. Students then choose one of four Streams (below) consisting of additional courses from the partner departments.

Biological Physics Specialist: Advanced Physics Stream
(Science Program) - ASSPE2739

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

Core Biological Physics Courses (11.5 FCE)

First Year (3.0 FCE): (CHM138H1, CHM136H1, CHM139H1, CHM135H1, CHM151Y1, MAT135H1, MAT136H1, MAT137Y1, PHY131H1, PHY132H1, PHY136H1, PHY152H1 (PHY151H1, PHY152H1 recommended)

First or Second Year (1.0 FCE): BIO130H1, MAT223H1

Second Year (3.0 FCE): BCH210H1, MAT235Y1, MAT237Y1, MAT244H1, PHY250H1, PHY252H1

Second or Third Year (0.5 FCE): BIO230H1, BIO255H1

Third Year (2.0 FCE): PHY224H1, PHY254H1, PHY256H1, PHY354H1
Third or Fourth Year (2.0 FCE):

1. PHY331H1
2. PHY324H1/ BCH370H1/ CHM327H1/ PSL372H1
3. 1.0 FCE, including at least 0.5 FCE at the 400 level, from APM346H1/ MAT334H1/ MAT354H1/PHY-300 level courses/PHY-400 level courses.

Additional Requirements for the Advanced Physics Stream (2.5 FCE):

1. (BCH311H1, BCH340H1)/( PSL300H1, PSL301H1)
2. PHY431H1 and 1.0 FCE from additional courses from APM346H1/ MAT334H1/ MAT354H1/PHY-300 level courses /PHY 400-level courses/ JPE395H1/ JPE493H1

Integrative, Inquiry-Based Activity Requirement

The choices in the program must satisfy the requirement for an integrative, inquiry-based activity by including at least one of the following courses: IMM435H1, PHY371Y1, PHY372H1, PHY396Y0, PHY397Y0, PHY398H0, PHY399Y0, PHY407H1, PHY424H1, PHY426H1, PHY428H1, PHY429H1, PHY471Y1, PHY472H1, PHY478H1, PHY479Y1, PSL304H1, PSL305H1, and PSL372H1

Notes:

Students are encouraged but not required to enroll in the independent project courses PHY478H1/ PHY479Y1. These students may be supervised by faculty in the Departments of Physics, Biochemistry, Chemistry, Immunology, and Physiology. Students are required to have a B average in the program courses, identify a supervisor, and consult the Associate Chair of Physics (Undergraduate Studies) before enrolling in PHY478H1/ PHY479Y1.

Students might wish to enroll in 300- and 400-level courses in the partner life science departments that are not listed above. These students will need approval to take these courses from the Associate Chair (Undergraduate Studies) prior to enrollment in the course.

Biological Physics Specialist:
Biochemistry Stream (Science Program) - ASSPE2737

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

Core Biological Physics Courses (11.5 FCE):

First Year (3.0 FCE): ( CHM138H1/ CHM136H1, CHM139H1/ CHM135H1)| CHM151Y1, (MAT135H1, MAT136H1)/ MAT137Y1, PHY131H1/ PHY151H1, PHY132H1/ PHY152H1 ( PHY151H1, PHY152H1 recommended)

First or Second Year (1.0 FCE): BIO130H1, MAT223H1

Second Year (3.0 FCE): BCH210H1, (MAT235Y1/ MAT237Y1), MAT244H1, PHY250H1, PHY252H1

Second or Third Year (0.5 FCE): BIO230H1/ BIO255H1

Third Year (2.0 FCE): PHY224H1, PHY254H1, PHY256H1, PHY354H1

Third or Fourth Year (2.0 FCE):

1. PHY331H1
2. PHY324H1/ BCH370H1/ CHM327H1/ PSL372H1
3. 1.0 FCE, including at least 0.5 FCE at the 400 level, from APM346H1/ MAT334H1/ MAT354H1/PHY-300 level courses/PHY-400 level courses.

Additional Courses for the Biochemistry Stream (2.5 FCE):

1. BCH311H1, BCH340H1
2. 1.5 FCE from BCH370H1/ CBS428H1/BCH400-level BCH courses. Excludes BCH472Y1, BCH473Y1, BCH478H1, BCH479H1

Integrative, Inquiry-Based Activity Requirement

The choices in the program must satisfy the requirement for an integrative, inquiry-based activity by including at least one of the following courses: IMM435H1, PHY371Y1, PHY372H1, PHY396Y0, PHY397Y0, PHY398H0, PHY399Y0, PHY407H1, PHY424H1, PHY426H1, PHY428H1, PHY429H1, PHY471Y1, PHY472H1, PHY478H1, PHY497Y1, PSL304H1, PSL305H1, and PSL372H1

Notes:

Students are encouraged but not required to enroll in the independent project courses PHY478H1/ PHY479Y1. These students may be supervised by faculty in the Departments of Physics, Biochemistry, Chemistry, Immunology, and Physiology. Students are required to have a B average in the program courses, identify a supervisor, and consult the Associate Chair of Physics (Undergraduate Studies) before enrolling in PHY478H1/ PHY479Y1.

Students might wish to enroll in 300- and 400-level courses in the partner life science departments that are not listed above. These students will need approval to take these courses from the Associate Chair (Undergraduate Studies) prior to enrollment in the course.

On approval of the Department of Physics, students who take CHM222H1/ CHM225Y1 will not have to take PHY252H1.

Biological Physics Specialist:
Immunology Stream (Science Program) - ASSPE2740

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

Core Biological Physics Courses (11.5 FCE):

First Year (3.0 FCE): ( CHM138H1/ CHM136H1, CHM139H1/ CHM135H1)/ CHM151Y1, (MAT135H1, MAT136H1)/ MAT137Y1, PHY131H1/ PHY151H1, PHY132H1/ PHY152H1 ( PHY151H1, PHY152H1 recommended)

First or Second Year (1.0 FCE): BIO130H1, MAT223H1

Second Year (3.0 FCE): BCH210H1, (MAT235Y1/ MAT237Y1), MAT244H1, PHY250H1, PHY252H1

Second or Third Year (0.5 FCE): BIO230H1/ BIO255H1

Third Year (2.0 FCE): PHY224H1, PHY254H1, PHY256H1, PHY354H1

Third or Fourth Year (2.0 FCE):

1. PHY331H1
2. PHY324H1/ BCH370H1/ CHM327H1/ PSL372H1
3. 1.0 FCE, including at least 0.5 FCE at the 400 level, from APM346H1/ MAT334H1/ MAT354H1/PHY-300 level courses/PHY-400 level courses
First or Second Year (1.0 FCE): BIO130H1, MAT223H1

Second Year (3.0 FCE): BCH210H1, (MAT235Y1/ MAT237Y1), MAT244H1, PHY250H1, PHY252H1

Second or Third Year (0.5 FCE): BIO230H1/ BIO255H1

Third Year (2.0 FCE): PHY224H1, PHY254H1, PHY256H1, PHY354H1

Third or Fourth Year (2.0 FCE):
1. PHY331H1
2. PHY324H1/ BCH370H1/ CHM327H1/ PSL372H1
3. 1.0 FCE, including at least 0.5 FCE at the 400 level, from APM346H1/ MAT334H1/ MAT354H1/PHY-300 level courses/PHY-400 level courses.

Additional Courses for the Immunology Stream (2.0 FCE):

1. IMM341H1, IMM351H1 (Students in the Biological Physics Specialist Immunology Stream are permitted to take BIO230H1 as a co-requisite to IMM341H1, instead of as a prerequisite, by permission of the Department of Immunology)
2. 1.0 FCE from IMM400-level courses.

Integrative, Inquiry-Based Activity Requirement

The choices in the program must satisfy the requirement for an integrative, inquiry-based activity by including at least one of the following courses: IMM435H1, PHY371Y1, PHY372H1, PHY396Y0, PHY426H1, PHY428H1, PHY429H1, PHY471Y1, PHY472H1, PHY478H1, PHY479Y1, PSL304H1, PSL305H1, and PSL372H1

Notes:

Students are encouraged but not required to enroll in the independent project courses PHY478H1/ PHY479Y1. These students may be supervised by faculty in the Departments of Physics, Biochemistry, Chemistry, Immunology, and Physiology. Students are required to have a B average in the program courses, identify a supervisor, and consult the Associate Chair of Physics (Undergraduate Studies) before enrolling in PHY478H1/ PHY479Y1.

Students might wish to enroll in 300- and 400-level courses in the partner life science departments that are not listed above. These students will need approval to take these courses from the Associate Chair (Undergraduate Studies) prior to enrollment in the course.

On approval of the Department of Physics, students who take CHM222H1/ CHM225Y1 will not have to take PHY252H1.

Biological Physics Specialist: Physiology Stream (Science Program) - ASSPE2738

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.
Physics and Philosophy Specialist (Science Program) - ASSPE2584

Description:

Physics has deep historical roots in natural philosophy and many aspects of contemporary Physics raise profound philosophical questions about the nature of reality. The interdisciplinary Physics and Philosophy Program allows the student to engage with both Physics and Philosophy at their deepest levels, and to more fully explore the connections between them.

Consult Associate Chair (Undergraduate Studies), Department of Physics or Philosophy.

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

(15.0 full courses or their equivalent (FCE), including at least 1.5 FCE at the 400 level)

First Year: (2.5 FCE)

( MAT135H1, MAT136H1)/ MAT137Y1/ MAT157Y1, MAT223H1/ MAT240H1, PHY131H1/ PHY151H1, PHY132H1/ PHY152H1 (The courses MAT137Y1, MAT223H1, PHY151H1, PHY152H1 are recommended.)

First or Second Year: (1.5 FCE)

1.5 FCE of: PHL232H1/ PHL233H1/ PHL240H1/ PHL245H1/ HPS250H1 (PHL245H1 may only be counted here if MAT157Y1 is not taken)

Second Year: (3.0 FCE)

MAT237Y1/ MAT257Y1/ MAT235Y1, MAT244H1/ MAT267H1, PHY250H1, PHY254H1, PHY256H1 (The courses MAT237Y1, MAT244H1 are recommended.)

Third Year: (2.0 FCE)

MAT334H1/ MAT354H1, PHY252H1, (PHY350H1/ PHY354H1), PHY356H1

Fourth Year: (1.0 FCE)

PHY456H1, PHY491H1

Any Year: (5.0 FCE)

( PHL345H1/ PHL347H1), PHL355H1, PHL356H1, (PHL415H1/ PHL455H1/ PHL482H1), plus 1.0 FCE of ( PHL325H1/ PHL331H1/ PHL332H1/ PHL346H1/ PHL354H1/ PHL357H1) plus 2.0 FCE additional PHL courses, at least 0.5 FCE of which must be from the Philosophy Value Theory Course Group (The courses PHL265H1, PHL275H1 are recommended.)

Physics Specialist (Science Program) - ASSPE1944

Description:

The Physics Specialist Program offers rigorous training in the full spectrum of core physics subfields, as well as their numerous important applications. Practical courses treat the experimental and computational aspects and complement the lecture courses. Physics concerns many of the most fundamental questions in our scientific understanding of the universe. What is the nature of matter and energy at the smallest scales? What are the physical processes that govern the Earth’s climate? What is the nature of light and how can it be controlled? How do the collective properties of solids emerge from those of individual atoms? How do biological processes organize themselves to maintain their survival? What is the structure and evolution of the Earth and the other planets? How can quantum information be used for computation? Physics seeks answers to these questions using a combination of theory, computation and precise experimental work, and the results find application across all of science.

Consult the Associate Chair (Undergraduate Studies), Department of Physics.

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

(13.5 FCE, including at least one full course at the 400 level)

First Year: (2.5 FCE)

( MAT135H1, MAT136H1)/ MAT137Y1/ MAT157Y1, MAT223H1/ MAT240H1, PHY131H1/ PHY151H1, PHY132H1/ PHY152H1 (The courses MAT137Y1, MAT223H1, PHY151H1, PHY152H1 are recommended.)

Second Year: (4.0 FCE)

MAT237Y1/ MAT257Y1/ MAT235Y1, MAT244H1/ MAT267H1, PHY224H1, PHY250H1, PHY254H1, PHY256H1 (The courses MAT237Y1, MAT244H1 are recommended.)

Second or Third Year: (0.5 FCE)

PHY324H1

Third Year: (3.0 FCE)

1. APM346H1, MAT334H1/ MAT354H1, PHY350H1, PHY354H1, PHY356H1

2. Additional 0.5 FCE from PHY-300 level courses/PHY-400 level courses/ JPE395H1/ JPE493H1, excluding JPH311H1.

JPH441H1
Third or Fourth Year: (3.5 FCE)

1. PHY424H1

2. 1.0 FCE from PHY450H1, PHY452H1, PHY454H1, PHY456H1, PHY460H1

3. PHY405H1/PHY407H1/PHY408H1/PHY426H1/PHY478H1. See Note 2.

4. 1.0 FCE, including at least 0.5 FCE at the PHY-400 level, from PHY-300 level courses/PHY-400 level courses/ JPE395H1/ JPE493H1, excluding JPH311H1, JPH441H1

5. Ethics and Social Responsibility Requirement: The Physics course JPH441H1 meets this requirement as well as any of the following courses: ETH201H1/ETH210H1/ETH220H1/ETH230H1/ HPS200H1/PHL233H1/PHL265H1/PHL273H1/PHL275H1/ PHL281H1/IMC200H1/VIC172Y1/ENV333H1. See Note 3.

Notes:

1. Students are encouraged but not required to enrol in the independent study and project courses such as PHY371Y1, PHY478H1, etc.

2. PHY479Y1 (Undergraduate Research Project) satisfies Requirement 3 in Third or Fourth Year and counts as 0.5 FCE at the PHY-400 level for Requirement 4 in Third or Fourth Year. Students may use MAT351Y1 instead of APM346H1 for Requirement 1 in Third Year.

3. Requirement 5 in Third or Fourth Year represents 0.5 FCE with a significant emphasis on "Ethics and Social Responsibility". Students may use the CR/NCR option towards any of the courses listed in Requirement 5. Another Arts & Science course with a significant emphasis on "Ethics and Social Responsibility" may be substituted subject to approval from the Associate Chair (Undergraduate Studies).

4. The requirement for an integrative, inquiry-based activity is satisfied by the required course PHY424H1.

Physics Major (Science Program) - ASMAJ1944

Description:

A Physics Major program is appropriate for students interested in a more flexible and diverse undergraduate physics program. A Physics Major may be tailored to be a natural counterpart to a second Major in mathematics, astronomy, computer science, environmental science, geology or the life sciences. Students should consult the Associate Chairs (Undergraduate Studies) of Physics and the respective departments for advice on course selections.

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

(8.0 FCE including at least 2.0 FCE at the 300+ level, with at least 0.5 FCE at the 400 level)

First Year: (2.0 FCE)

(MAT135H1, MAT136H1)/MAT137Y1/MAT157Y1, PHY131H1/ PHY151H1, PHY132H1/PHY152H1

Second Year: (3.0 FCE)

1. MAT235Y1/MAT237Y1/MAT257Y1, MAT223H1/MAT240H1, PHY224H1

2. 1.0 FCE from PHY231H1, PHY331H1, PHY250H1, PHY252H1, PHY254H1, PHY256H1

Third Year: (2.5 FCE)

1. MAT244H1/MAT267H1, PHY324H1/MAT405H1/PHY407H1/ PHY408H1

2. 1.5 FCE, including at least 0.5 FCE at the PHY400 level, from APM346H1/MAT334H1/MAT354H1; PHY-300 level courses/PHY- 400 level courses/ JPE395H1/ JPE493H1, excluding JPH311H1, JPH441H1

Third or Fourth Year: (0.5 FCE)

1. Ethics and Social Responsibility Requirement: The Physics course JPH441H1 meets this requirement as well as any of the following courses: ETH201H1/ETH210H1/ETH220H1/ETH230H1/ HPS200H1/PHL233H1/PHL265H1/PHL273H1/PHL275H1/ PHL281H1/IMC200H1/VIC172Y1/ENV333H1. See Note 2.

Notes:

1. Students in the Physics Major program who are intending to pursue graduate studies in Physics should consult with the Associate Chair (Undergraduate Studies).

2. Requirement 1 in Third or Fourth Year represents 0.5 FCE with a significant emphasis on "Ethics and Social Responsibility". Students may use the CR/NCR option towards any of the courses listed in Requirement 1. Another Arts & Science course with a significant emphasis on "Ethics and Social Responsibility" may be substituted subject to approval from the Associate Chair (Undergraduate Studies).

Physics Minor (Science Program) - ASMIN1944

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

(4.0 FCE)

First Year: (1.0 FCE)
PHY131H1/PHY151H1, PHY132H1/PHY152H1

Second Year: (2.0 FCE)

1. PHY224H1
2. 1.5 FCE from PHY231H1, PHY250H1, PHY252H1, PHY254H1, PHY256H1

Third Year: (1.0 FCE)

1. PHY324H1/PHY405H1/PHY407H1/PHY408H1
2. 0.5 FCE from: PHY-300 level course/PHY-400 level course/JPE395H1/JPE493H1, excluding JPH311H1, JPH441H1

Regarding Physics Courses

Note

More detailed and current information on courses is available through the Physics Department website. Many course numbers have changed in recent years: check the course descriptions and exclusions below for course equivalencies. Pre- and co-requisites are strictly enforced and may only be waived in special circumstances. Students should consult the Physics Associate Chair (Undergraduate Studies) with questions about pre- and co-requisites prior to the beginning of term if they are requesting a waiver. Students without the required pre- and co-requisites will be removed from courses.

Physics Courses

PHY100H1 - The Magic of Physics

Hours: 24L/12T

This course provides a survey of Physics, including both Classical and Modern Physics. It is designed for non-scientists, and assumes no background in either science or mathematics. The approach to the course is broad rather than deep. We will concentrate on the concepts underlying such fascinating topics as planetary motion, chaos, the nature of light, time travel, black holes, matter waves, Schrödinger's cat, quarks, and climate change. We will uncover the wonders of the classical and the quantum worlds courtesy of Galileo, Newton, Maxwell, Einstein, Heisenberg and many others.

PHY100H1 is primarily intended as a Breadth Requirement course for students in the Humanities and Social Science.

Exclusion: PHY131H1/PHY132H1/PHY151H1/PHY152H1 taken previously or concurrently

Distribution Requirements: Science

Breadth Requirements: The Physical and Mathematical Universes

PHY131H1 - Introduction to Physics I

Hours: 36L/20P

A first university physics course primarily for students not intending to pursue a Specialist or Major program in Physical or Mathematical Sciences. Topics include: classical kinematics & dynamics, momentum, energy, force, friction, work, power, angular momentum, oscillations, waves, sound.

Corequisite: MAT135H1/MAT137Y1/MAT157Y1 recommended, but may be required prerequisite in 2nd year Physics courses

Exclusion: PHY151H1

Recommended Preparation: MCV4U Calculus & Vectors / MHF4U Functions & Calculus, SPH4U Physics

Distribution Requirements: Science

Breadth Requirements: The Physical and Mathematical Universes

PHY132H1 - Introduction to Physics II

Hours: 36L/20P

The second university physics course primarily for students not intending to pursue a Specialist or Major program in Physical or Mathematical Sciences. Topics include: electricity, magnetism, light, optics, special relativity.

Prerequisite: PHY131H1/PHY151H1

Corequisite: MAT136H1/MAT137Y1/MAT157Y1 recommended, but may be required prerequisite in 2nd year Physics courses

Exclusion: PHY152H1

Distribution Requirements: Science

Breadth Requirements: The Physical and Mathematical Universes

PHY151H1 - Foundations of Physics I

Hours: 36L/30P

The first physics course in many of the Specialist and Major Programs in Physical Sciences. It provides an introduction to the concepts, approaches and tools the physicist uses to describe the physical world while laying the foundation for classical and modern mechanics. Topics include: mathematics of physics, energy, momentum, conservation laws, kinematics, dynamics, and special relativity.

Prerequisite: MCV4U Calculus & Vectors / MCB4U Functions & Calculus; SPH4U Physics

Corequisite: MAT137Y1/MAT157Y1

Exclusion: PHY131H1/PHY110Y1/PHY138Y1/PHY140Y1

Distribution Requirements: Science

Breadth Requirements: The Physical and Mathematical Universes

(5)
PHY152H1 - Foundations of Physics II

Hours: 36L/30P

The concept of fields will be introduced and discussed in the context of gravity and electricity. Topics include rotational motion, oscillations, waves, electricity and magnetism.

Prerequisite: PHY131H1/PHY151H1/PHY180H1
Corequisite: MAT137Y1/MAT157Y1
Exclusion: PHY132H1/PHY110Y1/PHY138Y1/PHY140Y1
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

PHY196H1 - Emergence in Nature

Hours: 24S

The universe is not a rigid clockwork, but neither is it formless and random. Instead, it is filled with highly organized, evolved structures that have somehow emerged from simple rules of physics. Examples range from the structure of galaxies to the pattern of ripples on windblown sand, to biological and even social processes. These phenomena exist in spite of the universal tendency towards disorder. How is this possible? Self-organization challenges the usual reductionistic scientific method, and begs the question of whether we can ever really understand or predict truly complex systems. Restricted to first-year students. Not eligible for CR/NCR.

Breadth Requirements: The Physical and Mathematical Universes (5)

PHY197H1 - Modern Physics for the Curious

Hours: 24S

Have you wondered about the origin and workings of the natural world around us? Have you found physical science interesting but inaccessible because it was too full of math and jargon? Have you felt a pull to become more science-literate? If so, this seminar course is for you -- or for anyone interested in understanding more about the universe, including our planet, seen through the lens of modern physics. Ideas on the menu will include: particle physics, space and time, relativity, black holes, quantum physics, unification forces, string theory, and big bang cosmology. The intriguing story of these integrated phenomena unfolds over a wide distance and a long time. Students from diverse academic backgrounds are warmly welcome. Restricted to first-year students. Not eligible for CR/NCR option.

Prerequisite: No prior experience with physical science will be required, but familiarity with Grade 10 mathematics will be assumed.
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

PHY198H1 - Physics at the Cutting Edge

Previous Course Number: PHY289H1
Hours: 24L/12S

A limited enrollment seminar course for First Year Science students interested in current research in Physics. Students will meet active researchers studying the universe from the centre of the earth to the edge of the cosmos. Topics may range from string theory to experimental biological physics, from climate change to quantum computing, from superconductivity to earthquakes. The course may involve both individual and group work, essays and oral presentations. Restricted to first-year students. Not eligible for CR/NCR option.

Prerequisite: PHY151H1
Corequisite: PHY152H1, MAT137Y1/MAT157Y1
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

PHY199H1 - Dark Matter and Dark Energy are the New Black

Hours: 24S

It is now 90 years since astronomers found the first evidence for a form of matter that wasn't part of the stars in our galaxies, but rather is "dark" and has a gravitational attraction to ordinary matter. Other lines of evidence lead us to believe that there is six times more dark matter than the ordinary matter we are familiar with. Despite this, we have no credible, direct evidence for what this dark matter might be. It is one of the biggest puzzles in particle physics and cosmology. In the last decade, we have also discovered that something else is going on -- the universe appears to be filled with "dark energy" that causes the expansion of our universe to speed up instead of slowdown. We will discuss what we know about the hypotheses of dark matter and dark energy, and the debates about what might really be going on. Are we seeing science in crisis, with a revolution just around the corner, or is this just the "normal science" talked about by Kuhn and other philosophers of science? Participants will be expected to participate in seminar-style discussions, as well as take the lead on at least one topic of discussion. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)
PHY202H1 - The Physics of Science Fiction and Gaming

Hours: 24L/12T

The physics of time travel, teleportation, levitation, invisibility, special effects, and other physics related topics found in literature, film, and gaming. The course will analyze the realism of physical phenomena in these media, and consider the impact of these concepts on science and society.

PHY202H1 is primarily intended as a Breadth Requirement course for students in the Humanities and Social Sciences.

Exclusion: PHY131H1/PHY132H1/PHY151H1/PHY152H1 taken previously or concurrently.
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

PHY205H1 - The Physics of Everyday Life

Hours: 24L/12T

An introduction to the physics of everyday life. This conceptual course looks at everyday objects to learn about the basis for our modern technological world. Topics may include anything from automobiles to weather.

PHY205H1 is primarily intended as a Breadth Requirement course for students in the Humanities and Social Sciences.

Exclusion: PHY131H1/PHY132H1/PHY151H1/PHY152H1 or equivalent, taken previously or concurrently.
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

PHY207H1 - The Physics of Music

Hours: 24L/12T

An online course intended to provide non-science students with a basic understanding of the science behind sound and music. Topics include oscillations, waves, human hearing and perception of music, musical scales, musical instruments, recording and storing sound digitally, producing sound and broadcasting. Lectures will be delivered via the web and mandatory tutorials will require live webinar participation. The final exam will require attendance on the St. George campus.

Exclusion: PHY131H1/PHY132H1/PHY151H1/PHY152H1 or equivalent, taken previously or concurrently.
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

IVP210H1 - Holography for 3D Visualization

Hours: 24L/36P

An introduction to the theory and practice of holography. Human perception & 3D visualization; fundamentals of 3D modeling; ray and wave optics; interference, diffraction, coherence; transmission and reflection holograms; colour perception; stereograms. Applications of holography in art, medicine, and technology. Computer simulation, design, and construction of holograms.

Exclusion: JOP210H1
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

PHY224H1 - Practical Physics I

Hours: 72P

Develops the core practical experimental and computational skills necessary to do physics. Students tackle simple physics questions involving mathematical models, computational simulations and solutions, experimental measurements, data and uncertainty analysis.

Prerequisite: PHY132H1/PHY152H1, (MAT135H1,MAT136H1)/MAT137Y1/MAT157Y1
Corequisite: PHY231H1/PHY250H1/PHY252H1/PHY254H1/PHY256H1/ENV235H1
Exclusion: PHY225H1
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

PHY231H1 - Physics of Living Systems

Hours: 24L/18P

An introductory course for students interested in understanding the physical phenomena occurring in biological systems and the applications of physics in life sciences. Topics may include physical processes inside living cells and systems, medical physics and imaging.

Prerequisite: PHY132H1/PHY152H1,(MAT135H1,MAT136H1)/MAT137Y1/MAT157Y1
Exclusion: PHY238YH1
Recommended Preparation: BIO130H1
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)
PHY250H1 - Electricity and Magnetism

Hours: 24L/12T

An introductory course in Electromagnetism. Topics include: Point charges, Coulomb’s law, electrostatic field and potential, Gauss’s Law, conductors, electrostatic energy, magnetostatics, Ampere’s Law, Biot-Savart Law, the Lorentz Force Law, Faraday’s Law, Maxwell's equations in free space.

Prerequisite: PHY132H1/PHY152H1, (MAT135H1, MAT136H1)/MAT137Y1/MAT157Y1
Corequisite: MAT235Y1/MAT237Y1/MAT257Y1
Exclusion: PHY238Y1, PHY251H1
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

PHY252H1 - Thermal Physics

Hours: 24L/12T

The quantum statistical basis of macroscopic systems; definition of entropy in terms of the number of accessible states of a many particle system leading to simple expressions for absolute temperature, the canonical distribution, and the laws of thermodynamics. Specific effects of quantum statistics at high densities and low temperatures.

Prerequisite: PHY132H1/PHY152H1, (MAT135H1, MAT136H1)/MAT137Y1/MAT157Y1
Corequisite: MAT235Y1/MAT237Y1/MAT257Y1
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

PHY254H1 - Classical Mechanics

Hours: 24L/12T

The course analyzes the linear, nonlinear and chaotic behaviour of classical mechanical systems such as harmonic oscillators, rotating bodies, and central field systems. The course will develop the analytical and numerical tools to solve such systems and determine their basic properties. The course will include mathematical analysis, numerical exercises using Python, and participatory demonstrations of mechanical systems.

Prerequisite: PHY132H1/PHY152H1 (PHY152H1 recommended), (MAT135H1, MAT136H1)/MAT137Y1/MAT157Y1
Corequisite: MAT235Y1/MAT237Y1/MAT257Y1
Exclusion: PHY255H1
Recommended Preparation: MAT244H1/MAT267H1, PHY224H1
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

PHY256H1 - Introduction to Quantum Physics

Hours: 24L/12T

Failures of classical physics; the Quantum revolution; Stern-Gerlach effect; harmonic oscillator; uncertainty principle; interference packets; scattering and tunneling in one-dimension.

Prerequisite: PHY132H1/PHY152H1, (MAT135H1, MAT136H1)/MAT137Y1/MAT157Y1
Corequisite: MAT235Y1/MAT237Y1/MAT257Y1, (MAT223H1/MAT240H1 recommended)
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

PHY299Y1 - Research Opportunity Program

Credit course for supervised participation in faculty research project. Details at https://www.artsci.utoronto.ca/current/academics/research-opportunities/research-opportunities-program. Not eligible for CR/NCR option.

Distribution Requirements: Science

JPH311H1 - From Universal Gravity to Quantum Information: The Making of Modern Physics

Hours: 24L

Topics in the history of physics from antiquity to the 20th century, including Aristotelian physics, Galileo, Descartes, electromagnetism, thermodynamics, statistical mechanics, relativity, quantum physics, and particle physics. The development of theories in their intellectual and cultural contexts.

Prerequisite: At least one-half PHY course at university level
Exclusion: HPS311H1
Distribution Requirements: Humanities; Science
Breadth Requirements: The Physical and Mathematical Universes (5)
PHY324H1 - Practical Physics II

Hours: 72P

A modular practical course that further develops the core experimental and computational skills necessary to do physics. Modules include: experimental skills building, computational tools in data and uncertainty analysis, and independent experimental projects.

Prerequisite: PHY224H1
Exclusion: PHY225H1
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

PHY331H1 - Introduction to Biological Physics

Hours: 24L/18P

A course for students interested in a deeper understanding of physical phenomena occurring in biological systems. Thermodynamics, diffusion, entropic forces, fluids, biological applications.

Prerequisite: PHY252H1/CHM222H1/CHM225Y1, PHY231H1/PHY250H1/PHY254H1/PHY256H1
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

PHY350H1 - Electromagnetic Theory

Hours: 24L/12T

This course builds upon the knowledge and tools developed in PHY250H1. Topics include: solving Poisson and Laplace equations via method of images and separation of variables, multipole expansion for electrostatics, atomic dipoles and polarizability, polarization in dielectrics, multipole expansion in magnetostatics, magnetic dipoles, magnetization in matter, Maxwell’s equations in matter, conservation laws in electrodynamics, and electromagnetic waves.

Prerequisite: MAT223H1/MAT240H1, MAT244H1/MAT267H1, MAT235Y1/MAT237Y1/MAT257Y1, PHY250H1, PHY254H1
Exclusion: PHY352H1
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

PHY354H1 - Advanced Classical Mechanics

Hours: 24L/12T

Symmetry and conservation laws, stability and instability, generalized coordinates, Hamilton's principle, Hamilton's equations, phase space, Liouville's theorem, canonical transformations, Poisson brackets, Noether's theorem.

Prerequisite: MAT244H1/MAT267H1, PHY254H1
Exclusion: PHY351H1
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

PHY356H1 - Quantum Mechanics I

Hours: 24L/12T

The general structure of wave mechanics; eigenfunctions and eigenvalues; operators; orbital angular momentum; spherical harmonics; central potential; separation of variables; hydrogen atom; Dirac notation; operator methods; harmonic oscillator and spin.

Prerequisite: MAT223H1/MAT240H1, PHY250H1, PHY256H1/(CHM222H1,CHM223H1)/CHM225Y1, (PHY256H1 recommended)
Corequisite: MAT244H1/MAT267H1
Exclusion: CHM326H1, PHY355H1
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

PHY357H1 - Nuclear and Particle Physics

Hours: 24L/12T

The subatomic particles; nuclei, baryons and mesons, quarks, leptons and bosons; the structure of nuclei and hadronic matter; symmetries and conservation laws; fundamental forces and interactions, electromagnetic, weak, and strong; a selection of other topics: CP violation, nuclear models, standard model, proton decay, supergravity, nuclear and particle astrophysics. This course is not a prerequisite for any PHY400-level course.

Prerequisite: PHY356H1
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)
PHY385H1 - Introductory Optics

Hours: 24L/20P

An introduction to the physics of light. Topics covered include: electromagnetic waves and propagation of light; the Huygens and Fermat principles; geometrical optics and optical instruments; interference of waves and diffraction; polarization; introduction to photons, lasers, and optical fibers.

Prerequisite: PHY250H1, PHY254H1
Exclusion: ECE318H1
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

PHY392H1 - Physics of Climate

Hours: 24L

This course provides an introduction to climate physics and the earth-atmosphere-ocean system. Topics include solar and terrestrial radiation; global energy balance; radiation laws; radiative transfer; atmospheric structure; convection; the meridional structure of the atmosphere; the general circulation of the atmosphere; the ocean and its circulation; and climate variability.

Prerequisite: PHY250H1/PHY252H1, MAT235Y1/MAT237Y1/MAT257Y1
Exclusion: PHY315H1
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

JPE395H1 - Physics of the Earth

Hours: 24L

Designed for students interested in the physics of the Earth and the planets. Study of the Earth as a unified dynamic system; development and evolution of the Earth's large scale surface features through plate tectonics; the age and thermal history of the planet; Earth's gravitational field and the concept of isostasy; mantle rheology and convection; Earth tides; geodetic measurement techniques, in particular modern space-based techniques.

Prerequisite: PHY132H1/PHY152H1/PHY180H1/MIE100H1, MAT235Y1/MAT237Y1/MAT291H1/AER210H1, PHY254H1/PHY293H1/MAT244H1/MAT267H1/MAT290H1/MAT292H1
Exclusion: PHY359H1, PHY395H1
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)
PHY396Y0 - Research Topic Abroad

Course credit for research or field studies abroad under the supervision of a faculty member. Not eligible for CR/NCR option.

Prerequisite: At least 8.5 FCEs and no more than 14.0 FCEs
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

PHY397Y0 - Exchange Research Project Abroad

Course credit for research or field studies abroad under the supervision of a faculty or staff member from an exchange institution. Consult the Physics Department web pages for information about opportunities. Not eligible for CR/NCR option.

Prerequisite: Consult the Physics Associate Chair (Undergraduate Studies)
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

PHY398H0 - Research Excursions

Distribution Requirements: Science

PHY398Y0 - Research Excursions

Distribution Requirements: Science

PHY399Y1 - Research Opportunity Program

Credit course for supervised participation in faculty research project. Details at https://www.artsci.utoronto.ca/current/academics/research-opportunities/research-opportunities-program. Not eligible for CR/NCR option.

PHY405H1 - Electronics Lab

Hours: 12L/36P

Electrical circuits, networks and devices are all-pervasive in the modern world. This laboratory course is an introduction to the world of electronics. Students will learn the joys and perils of electronics, by designing, constructing and debugging circuits and devices. The course will cover topics ranging from filters and operational amplifiers to micro-controllers, and will introduce students to concepts such as impedance, transfer functions, feedback and noise. The course will include lectures, assigned readings, and a final circuit project.

Prerequisite: PHY224H1, PHY250H1. PHY405H1 may be taken in third or fourth year
Exclusion: PHY305H1
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

PHY407H1 - Computational Physics

Hours: 12L/36P

This is an introduction to scientific computing in physics. Students will be introduced to computational techniques used in a range of physics research areas. By considering selected physics topics, students will learn computational methods for function analysis, ODEs, PDEs, eigenvalue problems, non-linear equations and Monte Carlo techniques. A physicist's "computational survival toolkit" will also be developed to introduce students to topics such as command line programming, bash scripting, debugging, solution visualization, computational efficiency and accuracy. The course is based on python and will involve working on a set of computational labs throughout the semester as well as a final project.

Prerequisite: PHY224H1/PHY254H1
Corequisite: Any third or fourth year course in Physics
Exclusion: PHY307H1
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

PHY408H1 - Time Series Analysis

Hours: 12L/24P

The analysis of digital sequences; filters; the Fourier Transform; windows; truncation effects; aliasing; auto and cross-correlation; stochastic processes, power spectra; least squares filtering; application to real data series and experimental design.

Prerequisite: PHY407H1/PHY224H1/PHY250H1/PHY254H1/PHY324H1. PHY408H1 may be taken in third or fourth year
Corequisite: Any third or fourth year lecture course in Physics
Exclusion: PHY308H1
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

PHY452H1 - Statistical Mechanics

Hours: 24L/12T

Classical and quantum statistical mechanics of noninteracting systems; the statistical basis of thermodynamics; ensembles, partition function; thermodynamic equilibrium; stability and fluctuations; formulation of quantum statistics; theory of simple gases; ideal Bose and Fermi systems.

Prerequisite: PHY252H1, PHY356H1
Exclusion: PHY480H1
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

PHY454H1 - Continuum Mechanics

Hours: 24L/12T

The theory of continuous matter, including solid and fluid mechanics. Topics include the continuum approximation, dimensional analysis, stress, strain, the Euler and Navier-Stokes equations, vorticity, waves, instabilities, convection and turbulence.

Prerequisite: PHY254H1, MAT235Y1/MAT237Y1/MAT257Y1, APM346H1/APM351Y1
Exclusion: PHY459H1
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

PHY456H1 - Quantum Mechanics II

Hours: 24L/12T

Quantum dynamics in Heisenberg and Schrödinger pictures; WKB approximation; variational method; time-independent perturbation theory; spin; addition of angular momentum; time-dependent perturbation theory; scattering.

Prerequisite: PHY356H1
Exclusion: PHY457H1
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

PHY460H1 - Nonlinear Physics

Hours: 24L/12T

The theory of nonlinear dynamical systems with applications to many areas of physics. Topics include stability, bifurcations, chaos, universality, maps, strange attractors and fractals. Geometric, analytical and computational methods will be developed.

Prerequisite: PHY354H1
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

PHY471Y1 - Supervised Study in Physics

An individual study program chosen by the student with the advice of, and under the direction of, a staff member. A student may take advantage of this course either to specialize further in a field of interest or to explore interdisciplinary fields not available in the regular syllabus. Consult the department web pages for some possible topics. This course may also be available in the summer. Not eligible for CR/NCR option.

Prerequisite: Consult the Physics Associate Chair (Undergraduate Studies).
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

PHY472H1 - Supervised Study in Physics

An individual study program chosen by the student with the advice of, and under the direction of, a staff member. A student may take advantage of this course either to specialize further in a field of interest or to explore interdisciplinary fields not available in the regular syllabus. Consult the department web pages for some possible topics. This course may also be available in the summer. Not eligible for CR/NCR option.

Prerequisite: Consult the Physics Associate Chair (Undergraduate Studies).
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)
PHY478H1 - Undergraduate Research Project

An individual experimental or theoretical research project undertaken with the advice of, and under the direction of, a staff member. A student may take advantage of this course either to specialize further in a field of interest or to explore independent research. Consult the department web site for some possible topics. This course may also be available in the summer. Not eligible for CR/NCR option.

**Prerequisite:** Consult the Physics Associate Chair (Undergraduate Studies)
**Distribution Requirements:** Science
**Breadth Requirements:** The Physical and Mathematical Universes (5)

PHY479Y1 - Undergraduate Research Project

An individual experimental or theoretical research project undertaken with the advice of, and under the direction of, a faculty member. A student may take advantage of this course either to specialize further in a field of interest or to explore independent research. Consult the department web site for possible topics. This course may also be available in the summer. Not eligible for CR/NCR option.

**Prerequisite:** Consult the Physics Associate Chair (Undergraduate Studies)
**Distribution Requirements:** Science
**Breadth Requirements:** The Physical and Mathematical Universes (5)

PHY483H1 - Relativity Theory I

**Hours:** 24L/12T

Basis of Einstein's theory: differential geometry, tensor analysis, gravitational physics leading to General Relativity. Theory starting from solutions of Schwarzschild, Kerr, etc.

**Prerequisite:** PHY350H1, PHY354H1
**Distribution Requirements:** Science
**Breadth Requirements:** The Physical and Mathematical Universes (5)

PHY484H1 - Relativity Theory II

**Hours:** 24L

Applications of General Relativity to Astrophysics and Cosmology. Introduction to black holes, large-scale structure of the universe.

**Prerequisite:** PHY483H1
**Recommended Preparation:** APM346H1/APM351Y1
**Distribution Requirements:** Science
**Breadth Requirements:** The Physical and Mathematical Universes (5)

PHY485H1 - Laser Physics

**Hours:** 24L

This course, which is intended to be an introduction to research in optical sciences, covers the statistics of optical fields and the physics of lasers. Topics include the principles of laser action, laser cavities, properties of laser radiation and its propagation, the diffraction of light, and spatial and temporal coherence.

**Prerequisite:** PHY350H1, PHY358H1, PHY385H1/ECE318H1
**Distribution Requirements:** Science
**Breadth Requirements:** The Physical and Mathematical Universes (5)

PHY487H1 - Condensed Matter Physics

**Hours:** 24L

Introduction to foundational concepts of condensed matter physics in the solid state. Main topics to be covered: crystal structure, reciprocal lattice, x-ray diffraction, crystal binding, lattice vibrations, phonons and electrons in solids, Fermi surfaces, energy bands, semiconductors and magnetism. Special topics to be surveyed: superconductivity and nanoelectronic transport.

**Prerequisite:** PHY250H1, PHY252H1, PHY356H1
**Distribution Requirements:** Science
**Breadth Requirements:** The Physical and Mathematical Universes (5)
PHY489H1 - Introduction to High Energy Physics

Hours: 24L

This course introduces the basics of fundamental particles and the strong, weak and electromagnetic forces that govern their interactions in the Standard Model of particle physics. Topics include relativistic kinematics, conservation laws, particle decays and scattering processes, with an emphasis on the techniques used for calculating experimental observables.

Prerequisite: PHY354H1, PHY356H1
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

PHY491H1 - Current Interpretations of Quantum Mechanics

Hours: 24L/24T

Review of conventional, textbook quantum mechanics. Formal measurement theory and wave function collapse; quantum states and nonseparability, violation of local causality; Bell theorems; quantum tricks; decoherence and the emergence of classical behaviour. Hidden variables; deBroglie-Bohm theory and generalizations; many-worlds interpretation and other theories of beables. Consistent histories approach of Omnes and Gell-Mann and Hartle; nature of True and Reliable statements.

Prerequisite: PHY456H1
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

PHY492H1 - Advanced Atmospheric Physics

Hours: 24L/12T

A preparatory course for research in experimental and theoretical atmospheric physics. Content will vary from year to year. Themes may include techniques for remote sensing of the Earth's atmosphere and surface; theoretical atmosphere-ocean dynamics; the physics of clouds, precipitation, and convection in the Earth's atmosphere.

Prerequisite: PHY250H1, MAT235Y1/MAT237Y1/MAT257Y1
Exclusion: PHY498H1
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

JPE493H1 - Seismology

Hours: 24L

Why do earthquakes occur and how are they related to tectonic motion of the Earth's surface? What is the physics behind the propagation of seismic waves through the Earth, and how can it be used to determine the internal structures of the Earth? This introductory course is aimed at understanding the physics behind seismic wave propagation, as well as asymptotic and numerical solutions to the elastodynamic equation. Travel time and amplitude of seismic waves are discussed based on seismic ray theory, while numerical methods are introduced to obtain accurate solutions to more complex velocity structures. Seismic tomographic methods, including their applications to hydrocarbon reservoir imaging, are also covered.

Prerequisite: JPE395H1, APM346H1/APM351Y1/MAT351Y1
Exclusion: PHY493H1
Recommended Preparation: ESS345H1
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

Introduction

Physiology is the study of living matter in action. It integrates physical and life science disciplines in order to understand body functions and the origins of disease. Beyond the study of control mechanisms, compensations, and cooperation among body molecules, cells, tissues and organs, the interaction between the body's external and internal environments is a key theme in Physiology. Most importantly, Physiology unifies the life sciences from molecule to organism, providing the link from genomics and molecular signaling pathways to behaviour and disease. Emerging fields for physiologists are the analysis of the functional implications of genomic sequence variation, developmental factors leading to chronic illness, and novel approaches for regenerative medicine.

Biological function -- of molecules, cells, and organs -- is at the heart of Physiology, and this knowledge is fundamental to the life sciences in general. Accordingly, Physiology provides an excellent and often necessary background for subsequent training in Medicine, Dentistry, Pharmacy, Nursing, Physical or Occupational Therapy, and other health-related professions. It is also excellent preparation for graduate work in Physiology and related areas; or for the teaching of Biological Science in secondary schools. Physiologists are needed in hospitals and departments of medicine as teachers and research personnel. Other outlets would be in agriculture and veterinary medicine, in military research establishments and in life science-based industry. The development of air and space travel, the exploration of the continental shelf, the development of Northern regions, and increased emphasis on exercise and fitness, all provide business and research opportunities for the person trained in Physiology.

Physiology at the research level covers a variety of specialties (e.g. Endocrinology, Cardiovascular Physiology, Neurophysiology, Respiratory Physiology, Reproductive Physiology, Sensory Physiology), each with a wide variety of technical and analytical methods. More information is available on the departmental website (www.physiology.utoronto.ca).

Undergraduate Coordinator: Dr. Nohjin Kee, Medical Sciences Building, Room 3368, (416-978-6379)

Undergraduate Assistant: Eva Eng, Medical Sciences Building, Room 3368, physiology.undergrad@utoronto.ca, (416-978-5077)

Physiology Programs

Physiology Specialist (Science Program) - ASSPE0482

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

Variable Minimum Grade Average
A minimum grade average in required courses is needed for entry, and this minimum changes each year depending on available spaces and the number of applicants. The following courses or their equivalents must be completed:

- BIO130H1
- (CHM135H1 and CHM136H1)/CHM151Y1
- 1.5 credits from BIO120H1, MAT135H1, MAT136H1, MAT137Y1, PHY131H1, PHY132H1, PHY151H1, PHY152H1

To ensure that students admitted to the program will be successful, applicants with a final grade lower than 60% in each course, or a grade average lower than 70% in these required courses will not be considered for admission. Please note that obtaining this minimum final grade or minimum grade average does not guarantee admission to the program. Please consult the Arts & Science Program Toolkit for more information on program enrolment, or the Physiology website at www.physics.utoronto.ca.

Completion Requirements:

(14 credits)

First Year:
BIO120H1, BIO130H1; (CHM135H1, CHM136H1)/CHM151Y1; (PHY131H1, PHY132H1)/(PHY151H1, PHY152H1)

First Year or Upper Years:
(MAT135H1, MAT136H1)/MAT137Y1/MAT157Y1*

Second Year:
1. 2.5 credits from BCH210H1; BIO230H1/BIO255H1; CHM220H1/CHM247H1/CHM249H1; PSL300H1, PSL301H1
2. 1.5 credits from BIO220H1, BIO260H1/160H1; MAT235Y1, PHY231H1, PSL299Y1/PSL399Y1, STA220H1/STA250H1

Third Year:
1. 3 credits from BCH370H1; PSL304H1, PSL305H1, PSL350H1/CBS349H1/BCH311H1, PSL372H1, PSL374H1
2. 1 credit from the following list: ANA300Y1, ANA301H1; BME498H1; CBS329H1, CBS332H1/CJH332H1, CBS343H1, CBS345H1/CBS445H1, CBS346H1, CBS347H1, IMM340H1/IMM341H1, IMM350H1/IMM351H1; JPM300H1, PCL201H1, PCL285H, PCI302H1/PHY331H1, PSL310H1, PSL378H1/PSL397H0/PSL398H0/PSL399H0; STA397H1

Fourth Year: (at least 2 credits at 400-level)
1. PSL496Y1/PSL497H1/PSL498Y1/PSL499H1/JPM400Y1
2. 1-1.5 credits from PSL400-series or HMB430H1/HMB470H1/HMB472H1

* These courses may be taken in the first year or subsequent years, and are not required for entrance into the specialist program.

Physiology Major (Science Program) - ASMAJ0482

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

Variable Minimum Grade Average
A minimum grade average in required courses is needed for entry, and this minimum changes each year depending on available...
spaces and the number of applicants. The following courses or their equivalents must be completed:

- BIO120H1 and BIO130H1
- (CHM135H1, CHM136H1)/CHM151Y1
- 1.0 credit from MAT135H1, MAT136H1, MAT137Y1, MAT157Y1, PHY131H1, PHY132H1, PHY151H1, PHY152H1

To ensure that students admitted to the program will be successful, applicants with a final grade lower than 60% in each course, or a grade average lower than 70% in these required courses will not be considered for admission. Please note that obtaining this minimum final grade or minimum grade average does not guarantee admission to the program. Please consult the Arts & Science Program Toolkit for more information on program enrolment.

Completion Requirements:

(8 credits, including 0.5 credits at the 400-level)

First Year:
1. 2 credits from (BIO120H1, BIO130H1)/BIO150Y; (CHM135H1, CHM136H1)/CHM151Y1
2. 1 credit from any of the following: MAT135H1, MAT136H1, MAT137Y1, MAT157Y1, PHY131H1, PHY132H1, PHY151H1, PHY152H1

Second Year:
2 credits from BCH210H1; BIO230H1/ BIO255H1; PSL300H1, PSL301H1

Higher Years:
1. 1 credit from PSL372H1, PSL350H1/ BCH311H1/ CSB349H1
2. 1 credit from ANA300Y1, ANA301H1, CSB325H1, CSB330H1, CSB332H/CHJ332H1, CSB343H1, CSB345H1/CSB445H1, CSB346H1, CSB347H1, IMM340H1, IMM341H1, IMM350H1, IMM351H1, JPM300H1, NFS284H1, PCL201H1, PCL285H, PCL302H1, PSY397H1, STA220H1
3. 1 credit from HMB430H1/HMB470H/HMB472H1; JPM400Y1; PSL304H1, PSL305H1, PSL310H1, PSL374H1, PSL378H1, PSL379H1/PSL379H0, PSL398H0, PSL399Y1, PSL400-series courses

Physiology Minor (Science Program) - ASMIN0482

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

(4 credits, including 0.5 credits at the 300+ level)

1. 2 credits from: (BIO120H1, BIO130H1); PSL201Y1/PSL300H1, PSL301H1)
2. 2 credits from: BIO251H1, BIO270H1, BIO271H1; CSB325H1, CSB332H/CHJ332H1, CSB343H1, CSB344H1, CSB345H1, CSB445H1, CSB346H1, CSB347H1, EEB328H1, HMB200H1/HMB220H, HMB430H1, HMB470H1, HMB472H1, PSL280H1, PSL299Y1, PSL300-series (excluding PSL300H1, PSL301H1), PSL400-series; PSY290H1, PSY396H1, PSY397H1, PSY399H1, PSY400H1, PSY492H1, PSY494H1, PSY497H1

Biological Physics: see Physics

Physiology Courses

PSL190H1 - Biomedical Research at the Cutting Edge

Hours: 24L/6S

Explore the thought processes, logic, motivation, techniques, analysis and impact of recent high-profile publications to gain insight into the enterprise of science. Outstanding scientists present recent high-impact papers, and students will examine the research in depth, focusing on the underlying questions, experimental approach, results and significance. Restricted to first-year students. Not available for CR/NCR option.

Prerequisite: SBI4U and SCH4U (Grade 12 University Preparation Biology and Chemistry); permission of Department

Distribution Requirements: Science

Breadth Requirements: Living Things and Their Environment (4)

PSL201Y1 - Basic Human Physiology

Hours: 44L/24P

A survey course covering all organ systems intended for students who are not proceeding further in Physiology.

Exclusion: Any 300-level PSL course taken previously or concurrently

Recommended Preparation: 100-level course in BIO or equivalent

Distribution Requirements: Science

Breadth Requirements: Living Things and Their Environment (4)

PSL280H1 - Introduction to Physiologic Adaptations of Marine Mammals

Hours: 24L/14P

Systems approach to physiology of marine mammals in their aquatic environment. Highlights unique features of cardiovascular, respiratory, renal, urinary, and reproductive systems. Introduces relevant physiology, and makes comparisons to human condition and disease.

Prerequisite: (BIO120H1, BIO130H1), CHM136H1/CHM138H1/CHM151Y1 or permission of the course coordinator.

Distribution Requirements: Science

Breadth Requirements: Living Things and Their Environment (4)
PSL299Y1 - Research Opportunity Program
Credit course for supervised participation in faculty research project. Details at https://www.artsci.utoronto.ca/current/academics/research-opportunities/research-opportunities-program. Not eligible for CR/NCR option.

Distribution Requirements: Science

JPM300H1 - Research Readiness and Advancing Biomedical Discoveries
Hours: 12L/24T
Explore how scientists leverage their knowledge and skills to advance academic biomedical discoveries from the laboratory to improve patient health through either commercialization or not-for-profit approaches. Students will learn about innovation and develop key research and industry skills including intellectual property, ethics, budget and project management; learn how to critically evaluate scientific evidence and effectively communicate to a wide audience. This hybrid student-centered course will include interactive online modules and in-class group work. Course work will focus on developing skills and knowledge to help you be successful in diverse research courses and future careers. Not eligible for CR/NCR.

Prerequisite: 10.0 FCE completed; BCH210H/1/BCH242Y1
Recommended Preparation: PSL300H1, PSL301H1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

PSL300H1 - Human Physiology I
Hours: 36L/5T
Principles of neurophysiology, endocrinology and reproductive physiology for students enrolled in Life Science programs.

Exclusion: PSL201Y1, PSL302Y1
Recommended Preparation: BIO130H1; CHM136H1/CHM138H1/CHM151Y1; and 1 FCE from any of the following: MAT135H1, MAT136H1, MAT137Y1, MAT157Y1, PHY131H1, PHY132H, PHY151H1, PHY152H1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

PSL301H1 - Human Physiology II
Hours: 36L/4T
Principles of respiratory, cardiovascular, gastrointestinal, and renal physiology for students enrolled in Life Science programs.

Exclusion: PSL201Y1, PSL302Y1
Recommended Preparation: BIO130H1; CHM136H1/CHM138H1/CHM151Y1; and 1 FCE from any of the following: MAT135H1, MAT136H1, MAT137Y1, MAT157Y1, PHY131H1, PHY132H, PHY151H1, PHY152H1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

PSL304H1 - Topics in Cellular, Molecular and Organismic Physiology I
Hours: 32L/16T
Control systems, feedback, networks, and both neonatal and adult cardiovascular and respiratory control are topics examined in detail using homeostasis as a unifying theme. Tutorials involve computer simulations, case studies and/or experimental design. This course is designed for students in the Physiology Specialist and Biological Physics Specialist Programs, although permission is granted to students in other programs upon approval by the Department.

Prerequisite: BCH210H1, PSL300H1, PSL301H1, MAT100-series
Exclusion: PSL303Y1
Recommended Preparation: PSL372H1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

PSL305H1 - Topics in Cellular, Molecular and Organismic Physiology II
Hours: 32L/16T
Molecular, cellular and organismic physiology of the central nervous system, gut, pancreas and glucose-sensing tissues; CNS diseases, obesity and diabetes are used as model systems. Tutorials involve computer simulations. This course is designed for students in the Physiology Specialist and Biological Physics Specialist Programs, although permission is granted to students in other programs upon approval by the Department.

Prerequisite: BCH210H1, PSL300H1, PSL301H1, MAT100-series
Exclusion: PSL303Y1
Recommended Preparation: PSL372H1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)
PSL310H1 - Clinical Reasoning

Hours: 24L/12S

Improved clinical reasoning will reduce the current likelihood that most people will suffer at least one medical diagnostic error, errors that contribute to ~10% of patient deaths. Learn to apply strategies of critical thinking and principles of physiology to solve clinical cases. Shadow a healthcare professional. Not eligible for CR/NCR option.

Prerequisite: BCH210H1, BIO230H1/BIO255H1, PSL300H1, PSL372H1, PSL301H1
Corequisite: PSL301H1
Exclusion: HMB322H1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

PSL350H1 - Mammalian Molecular Biology

Hours: 18L/12T/6S

Extend molecular biology concepts to current scientific literature in mammalian physiology. Apply these principles to disease and complex behaviours. Discuss bioethical issues raised by these techniques and their application. Benefit from three weeks in small group seminars lead by research professors focusing on current advances in mammalian molecular biology.

Prerequisite: BIO230H1/BIO255H1, PSL300H1, BCH210H1
Corequisite: PSL301H1
Exclusion: BCH311H1/BIO349H1/MGY311Y1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

PSL372H1 - Mammalian Physiology Laboratory

Hours: 12L/36P

A laboratory course covering selected topics in physiology.

Prerequisite: BIO230H1/(BIO240H1, BIO241H1)/BIO255H1, BCH210H1/BCH242Y1, MAT100-series/PHY100-series, PSL300H1, PSL301H
Corequisite: BCH370H1 (recommended)
Exclusion: CSB348H1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

PSL374H1 - Advanced Physiology Laboratory

Hours: 12L/36P/12S

A problem-based laboratory course focused on the integration and control of organ systems to understand body functions. Enrollment in this course is restricted to students in the Physiology Specialist and Major Programs although permission is granted to students in other programs upon approval by the Department.

Prerequisite: BIO230H1/(BIO240H1, BIO241H1)/BIO255H1, PSL300H1, PSL301H1, PSL372H1
Exclusion: CSB348H1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

PSL378H1 - Field Physiology: Marine Mammal Autopsy

Hours: 12L/24T/36P

An opportunity to go outside of the traditional university classroom and actively participate in a marine mammal autopsy. Learn the diversity and adaptive nature of marine mammalian physiology/anatomy as it compares to human. The course is 2 weeks (in May), one week of hands-on tissue dissection, and one week of group discussions of the findings and draft report preparation. Not eligible for CR/NCR option.

Prerequisite: BIO270H1, BIO271H1/PSL201Y1/PSL280H1/PSL300H1, PSL301H, PSL372H1 or permission of the course coordinator
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

PSL379H0 - Comparative Marine Mammal Physiology in the Field

Hours: 24T/36P

Hands-on monitoring of physiological measures with live dolphins, manatees and sea lions; field observations and applied learning to a physiology project. Two-weeks at the end of April early May: 1st week at marine research center in Mexico, 2nd week of wrap-up discussion and integration of data at U of T. Not eligible for CR/NCR option.

Prerequisite: BIO220H1/BIO230H1/BIO270H1/BIO271H1/CSB343H1/PS280H1/PSL201Y1/PSL300H1/PSL301H1/PSY362H1/any other relevant course
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)
PSL398H0 - Research Excursions

Distribution Requirements: Science

PSL399Y1 - Research Opportunity Program

Credit course for supervised participation in faculty research project. Details at https://www.artsci.utoronto.ca/current/academics/research-opportunities/research-opportunities-program. Not eligible for CR/NCR option.

JPM400Y1 - Biomedical Incubator Capstone Project

Hours: 240P/16S

Discover what it is like to be part of a biomedical innovation team. Develop and engage in biomedical research in a simulated small business/incubator setting under the guidance of a faculty mentor. Bring your proposed JPM300H1 project to life, while acquiring budget management, research, business and communication workplace skills for future careers. Enrolment is application-based. Proposals will be reviewed by committee and successful proposals will be matched to a mentor. Not eligible for CR/NCR option.

Students will form teams and develop a research proposal based on either:

1. Faculty led concept requiring further development and testing, which would not normally be funded grants and would be tangential to ongoing research in the lab.

2. Student developed innovative idea that requires further development and testing. This should be a project that is not being investigated in a UofT research lab.

Prerequisite: A minimum of 75% in JPM300H1; completion of any of PCL367H1/PCL368H1/PSL372H1/BCH370H1/BCH377H1. Application required; see department for more information.

Distribution Requirements: Science

Breadth Requirements: Living Things and Their Environment (4)

PSL404H1 - Regenerative Medicine

Hours: 24L/12T

Regenerative medicine promises to restore body function that has been lost due to disease, damage or age. Students will explore selected molecular, stem cell and tissue engineering developments to better understand how the body normally functions and how cells, tissues, and organs can be repaired or replaced.

Prerequisite: PSL300H1, PSL301H1

Recommended Preparation: PSL350H1/BCH311H1/CSB349H1/MGY311Y1

Distribution Requirements: Science

Breadth Requirements: Living Things and Their Environment (4)

PSL420H1 - Reproduction: Development and Function

Hours: 24L

This course provides an in-depth review of the development and function of the male and female reproductive systems. Topics include sex determination and differentiation, steroidogenesis, gametogenesis, hormonal control of the reproductive axis, the female ovulatory cycle, fertilization and implantation, infertility and assisted reproduction approaches.

Prerequisite: PSL300H1, PSL301H1

Distribution Requirements: Science

Breadth Requirements: Living Things and Their Environment (4)

PSL421H1 - Pregnancy and Birth: From Implantation to Newborn Life

Hours: 24L

General overview of the integrated physiological events associated with fetal development, pregnancy and birth. The approach emphasizes physiological processes using insights gained from studies of humans, animals, cells and genes. Where appropriate the clinical consequences of aberrant development are reviewed.

Prerequisite: PSL300H1, PSL301H1

Recommended Preparation: PSL420H1

Distribution Requirements: Science

Breadth Requirements: Living Things and Their Environment (4)
PSL424H1 - Cellular and Molecular Basis of Endocrine Disorders

Hours: 24S

Explore how researchers uncover the molecular and cellular basis of endocrine disorders. Learn about experimental design, state-of-the-art research tools, and data interpretation. Topics include disorders in: hormone regulation, secretion and action; circadian rhythms; and sexual development and reproduction. Each week students engage in class discussion related to research seminars delivered by faculty.

Prerequisite: PSL300H1, PSL301H1, PSL350H1/BCH311H1/CSB349H1/MGY311Y1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

PSL425H1 - Integrative Metabolism and its Endocrine Regulation

Hours: 24L

This course integrates the newest findings and experimental approaches from cellular and molecular biology into metabolic function at the tissue, organ and whole body level.

Prerequisite: BCH210H1, PSL300H1, PSL301H1
Recommended Preparation: PSL350H1/PSL303Y1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

PSL432H1 - Theoretical Physiology

Hours: 24L

Theoretical treatment of neurophysiology. Mathematical modeling and analysis of neurophysiological systems.

Prerequisite: MAT235Y1/MAT237Y1; APM346H1/MAT244H1
Recommended Preparation: PHY200-series; PSL201Y1/PSL300H1/(BIO270H1, BIO271H1)
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

PSL440Y1 - Neuroscience: Systems and Behaviour

Hours: 96L

Introduction to systems neuroscience. A review of basic neuroanatomy and physiology followed by in-depth study of selected sensory and motor systems, with an emphasis on clinical applications in the second term. Students with an elementary neuroscience background progress to reading neuroscience literature on their own.

Prerequisite: PSL300H1/PSY290H1/CSB332H1 or equivalent
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

PSL445H1 - Neuroscience: Cellular and Molecular

Previous Course Number: PSL444Y1
Hours: 36L

Overview of the fundamentals of cellular and molecular aspects of brain function. Course material is updated yearly to reflect the rapid evolution of ideas in Neuroscience.

Prerequisite: PSL300H1, PSL301H1, CJH332H1 or permission of instructor
Exclusion: PSL444Y1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

PSL446H1 - Neural Disorders

Previous Course Number: PSL444Y1
Hours: 36L

Explore topics in neurological disorders and treatments to reinforce and expand your knowledge of cellular and molecular neurophysiology. Course material is updated yearly to reflect the rapid evolution of ideas in this area.

Prerequisite: PSL300H1, PSL301H1, CJH332H1 or permission of instructor
Exclusion: PSL444Y1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)
**PSL450H1 - Mechanisms of Neural and Endocrinal Secretion**

**Hours:** 24L

Exocytosis and other aspects of secretion mainly in neurons and neuroendocrine cells, but also in pancreatic cells. Topics include synapse anatomy and physiology, synaptic plasma membrane and vesicle proteins, membrane fusion, genetic tools, endocrine secretion, plasticity in neurotransmitter release, diseases arising from secretion defects.

**Prerequisite:** BCH210H1, PSL300H1/(BIO240H1, BIO241H1), PSL350H1/CSB349H1/BCH311H1/MGY311Y1

**Distribution Requirements:** Science

**Breadth Requirements:** Living Things and Their Environment (4)

**PSL452H1 - Membrane Physiology**

**Hours:** 24L

Biophysics and molecular biology of ion channels. Topics include equivalent circuits for cells, molecular structure of voltage-gated channels, distribution of channels, relationship between single-channel and whole-cell recording, and regulation of channel function by voltage, phosphorylation, G-proteins and metabolites.

**Prerequisite:** PSL300H1, PSL301H1

**Distribution Requirements:** Science

**Breadth Requirements:** Living Things and Their Environment (4)

**PSL462H1 - Molecular Aspects of Cardiovascular Function**

**Hours:** 36L

Heart anatomy and development, ion channels and contractile proteins involved in cardiac and smooth muscle contraction are studied. Emphasis is on regulation of electrical and contractile function of kinases, metabolism, volume and ions.

**Prerequisite:** PSL300H1, PSL301H1

**Distribution Requirements:** Science

**Breadth Requirements:** Living Things and Their Environment (4)

**PSL470H1 - Cardiovascular Physiology**

**Hours:** 24L

Development of the cardiovascular system from conception to adulthood with particular emphasis on maturational changes, age-related differences and developmental problems from cellular/molecular to whole organ/system.

**Prerequisite:** PSL300H1, PSL301H1

**Distribution Requirements:** Science

**Breadth Requirements:** Living Things and Their Environment (4)

**PSL472H1 - Sleep Physiology and Chronobiology**

**Hours:** 24L

This course covers the physiology underlying sleep and circadian rhythms, and their impact on important physiological processes and health. The integrative nature of the basic physiological processes is emphasized via discussions and clinical presentations. Overall, the aim is to present the full spectrum of integrative physiology from molecules and cells to understanding the sick patient.

**Prerequisite:** PSL300H1, PSL301H1

**Distribution Requirements:** Science

**Breadth Requirements:** Living Things and Their Environment (4)

**PSL480H1 - Diving Physiology of Marine Mammals**

**Hours:** 24L/6T

This course compares and contrasts the physiological and anatomical adaptations exhibited by the different species of marine mammals in relationship to humans, with respect to diving.

**Prerequisite:** (BIO270H1, BIO271H1)/PSL201Y1/PSL300H1, PSL301H1; PSL280H1

**Distribution Requirements:** Science

**Breadth Requirements:** Living Things and Their Environment (4)
PSL495H1 - Communicate Biomedical Science

Hours: 6L/2T/18S

Research, critique and write a manuscript on a topic of your choice in the scientific literature while guided by classes and assignments that develop advanced science communication skills; and by a mentor expert in your area of clinical or basic physiology.

Prerequisite: PSL300H1; PSL301H1; PSL372H1; 13.5 additional credits; and permission of Department
Exclusion: BCH479H1; HMB490H1; HMB491H1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

PSL496Y1 - Translational Physiology Research Project

Hours: 144P

Engage in supervised original science research, either basic or clinical, combined with a healthcare placement. Develop skills in defining scientific questions, designing experiments, analyzing data, and communicating your results. Gain insight into the power of translational bench-to-bedside research. Discover your interest in becoming a science researcher. Not eligible for CR/NCR option.

Prerequisite: PSL300H1, PSL301H1, PSL310H1, PSL372H1, permission of Department.
Exclusion: PSL497H1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

PSL497H1 - Translational Physiology Research Project

Hours: 72P

Engage in original science research, either basic or clinical, combined with a healthcare placement. Develop skills in defining scientific questions, designing experiments, analyzing data, and communicating your results. Gain insight into the power of translational "bench-to-bedside" research. Discover your interest in becoming a science researcher. Not eligible for CR/NCR option.

Prerequisite: PSL300H1, PSL301H1, PSL310H1, PSL372H1, permission of Department.
Exclusion: PSL496Y1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

PSL498Y1 - Project in Physiology

Hours: 144P

Laboratory research project with reading assignments leading to a final report. By special arrangement with a Physiology staff member after admission to course. PSL498Y1 is recommended for students applying to the Physiology graduate program. Enrollment in this course is restricted to students in the Physiology Specialist and Major Programs, although permission is granted to students in other programs upon approval by the Department. Not eligible for CR/NCR option.

Prerequisite: (PSL304H1, PSL305H1)/PSL303Y1, PSL372H1, PSL374H1, permission of Department
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

PSL499H1 - Project in Physiology

Hours: 72P

Laboratory research project with reading assignments leading to a final report. By special arrangement with a Physiology staff member after admission to course. PSL499H1 is recommended for students applying to the Physiology graduate program. Enrollment in this course is restricted to students in the Physiology Specialist and Major Programs, although permission is granted to students in other programs upon approval by the Department. Not eligible for CR/NCR option.

Prerequisite: (PSL304H1, PSL305H1)/PSL303Y1, PSL372H1, PSL374H1, permission of Department
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)
Planetary Science

Planetary Science Programs

Planetary Science Specialist (Science Program) - ASSPE1073

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

One 300+ level FCE must be included in the program.

(14 full courses or equivalent, including at least one 400+ series FCE)

First Year:

(CHM135H1, CHM136H1) / CHM151Y1; (MAT135H1, MAT136H1) / MAT137Y1; (PHY131H1, PHY132H1) / (PHY151H1, PHY152H1)
(MAT137Y1 and PHY151H1, PHY152H1 preferred)

First or Second Year:

MAT223H1 / MAT240H1

Second or Third Year:

AST221H1, AST222H1; (CHM222H1, CHM223H1) / (PHY252H1, PHY256H1); CHM238Y1; ESS223H1, ESS261H1, ESS262H1;
MAT235Y1 / MAT237Y1 (MAT237Y1 preferred); MAT244H1 / MAT267H1; PHY250H1, PHY254H1

Third and/or Fourth Years:

JPE395H1;

At least four of (2.0 FCE) AST325H1; CHM327H1, CHM338H1; PHY354H1, PHY407H1, PHY408H1; GGR201H1; ESS223H1,
ESS241H1, ESS445H1, ESS462H1;

Fourth Year:

PLN420H1, PLN425H1

Planetary Science Courses

PLN420H1 - Interdisciplinary Seminar in Planetary Science

Hours: 24S

Discussion of topics of current interest in planetary science with emphasis on papers published in scientific journals. This course is intended for students in the final year of the Planetary Science specialist program. Students must enrol with the course coordinator.

Distribution Requirements: Science

Breadth Requirements: The Physical and Mathematical Universes

(5)

PLN425H1 - Research in Planetary Science

Hours: 120P

Research report by student in consultation with individual staff member in Astronomy, Chemistry, Geology or Physics. This course is intended for students in the final year of the Planetary Science specialist program. Students must enrol with the course coordinator.

Not eligible for CR/NCR option.

Distribution Requirements: Science

Breadth Requirements: The Physical and Mathematical Universes

(5)
Political Science

Faculty List

University Professor Emeritus
P.H. Russell, DSc, MA, LLD, FRSC, OC (I, T)

University Professor
J.G. Stein, MA, PhD, LLD, FRSC, OC, OOnt (U)

Professors Emeriti
E. Adler, MA, PhD, FRSC
E.G. Andrew, BA, PhD
J.S. Barker, MA, PhD (N)
† A.S. Brudner, LLB, MA, PhD, FRSC
J.H. Carens, MPhil (Theol), MPhil, PhD, FRSC
† F.A. Cunningham, MA, PhD, FRSC (I)
M.W. Donnelly, MA, PhD
V.C. Falkenheim, MA, PhD
J. Fletcher, MA, PhD
H.D. Forbes, MA, PhD
F.J.C. Griffiths, MIA, PhD (U)
G. Horowitz, MA, PhD
B. Kovrig, MA, PhD (T)
† A.M. Kruger, BA, PhD
L. LeDuc, MA, PhD (SM)
R.A. Manzer, MA, PhD (University of Toronto Scarborough)
R.O. Matthews, BA, MA, PhD (T)
† J. Nedelsky, MA, PhD
N. Nevitte, MA, PhD, FRSC
J. Nun, LLM, PhD
D.M. Rayside, AM, PhD, FRSC (U)
A.G. Rubinooff, MA, PhD (University of Toronto Scarborough)
K.R.J. Sandbrook, MA, DPhil, FRSC
D.V. Schwartz, MA, PhD
P.H. Solomon, MA, PhD
S.G. Solomon, MA, PhD (University of Toronto Scarborough)
R.E. Stren, MA, PhD, Dhc (I)
C. Tuohy, MA, PhD, FRSC
† M.H. Watkins, BCOM, LLD (U)
G. White, MA, PhD (University of Toronto Mississauga)

Associate Professor and Chair
A. Handley, MPhil, PhD

Professor and Associate Chair (Graduate Studies)
J. Bertrand, MSc, MA, PhD

Associate Professor and Associate Chair (Undergraduate Studies)
† D.L. Eyoh, MA, PhD (N)

Professors
† A.B. Bakan, BAH, MA, PhD
R.K. Balot, MA, PhD
S. Bashevkin, MA, PhD, FRSC (U)
R.S. Beiner, BA, DPhil, FRSC (University of Toronto Mississauga)
S. Bernstein, MA, PhD (University of Toronto Mississauga)
† S. Borins, BA, MPP, PhD
A. Braun, MA, PhD (University of Toronto Mississauga) (T)
† D. Breznitz, BA, PhD
D.R. Cameron, MSc, PhD, FRSC, CM
J. Clark, PhD (University of Toronto Mississauga)
† D.B. Cook, MA, PhD (V)
R.B. Day, Dip REES, MA, PhD (University of Toronto Scarborough)
† R.B. Deber, SM, PhD, FRSC
† R.J. Deibert, MA, PhD, OOnt (T)
† K.H. Green, MA, PhD (U)
R.S. Haddow, MSc, PhD
R. Hansen, MPhil, DPhil (T)
† R. Hirschl, LLB, MA, MPhil, PhD, FRSC
M.J. Hoffmann, MPhil, PhD (University of Toronto Scarborough)
C. Jung, MA, PhD
P.W.T. Kingston, MA, MPhil, DPhil (University of Toronto Scarborough)
R.E. Kingston, MA, PhD
J.J. Kirton, MA, PhD (T)
M. Kohn, MA, PhD (University of Toronto Scarborough)
† F.J. Loewen, BA, PhD
P.R. Magocsii, MA, MA, PhD, FRSC
C. Orwin, AM, PhD (SM)
L.W. Pauly, MA, MSc, PhD, FRSC (T)
† I. Peng, MA, PhD (T)
† K. Roach, LLB, LLM, FRSC
A. Sabl, AB, PhD
† D. Schneideman, LLB, LLM
† A. Shachar, BA, LLB, LLM, JSD, FRSC
G. Skogstad, MA, PhD (University of Toronto Scarborough)
† A. Stark, MSc, AM, PhD
J.A. Teichman, MA, PhD, FRSC (University of Toronto Scarborough)
R. Vipond, AM, PhD (V)
† L. Way, MA, PhD (University of Toronto Scarborough)
† L.E. Weinrib, BA, LLB, LLM
† L. White, MA, PhD
M.S. Williams, AM, PhD (T)
N. Wiseman, MA, PhD (U)
D.A. Wolfe, MA, PhD (University of Toronto Mississauga)
J. Wong, MA, PhD
W. Wong, MA, PhD

Associate Professors
A.S. Ahmad, MA, PhD (University of Toronto Scarborough)
† N. Bertoldi, MA, PhD
C. Cochrane, MA, PhD (University of Toronto Scarborough)
J. Craft, MA, PhD
† Y. Dawood, MA, JD, PhD
T. Enright, BA, PhD
D. Fu, MPhil, DPhil (University of Toronto Scarborough)
L. Glady, MA, MPhil, PhD
† J.F. Green, MPA, PhD
S. Guntisky, MA, MPhil, PhD
† R. Levi, BCL, LLB, LLM, JSD
† M. Light, MA, JD, PhD
† P. Lipscy, MA, PhD
† M.S. Manger, MSc, PhD

Assistant Professors
E. Acorn, MA, PhD (University of Toronto Scarborough)
N. Anderson, BA, PhD (University of Toronto Mississauga)
M. Balaguer, MA, PhD (University of Toronto Mississauga)
R. Besco, MA, PhD (University of Toronto Scarborough)
O. Chyzh, MA, PhD
C. de Miguel Moyer, MA, PhD
† M.J. Donnelly, MA, PhD
F. Kahraman, MA, PhD (University of Toronto Scarborough)
† J. Lindsay, MS, PhD
Introduction

The study of Political Science at the University of Toronto is wide-ranging and diverse. Courses are offered in political theory, Canadian government, international relations, and the politics of societies that are industrialized, developing, and in transition. Many courses deal with issues (such as environmental politics, diversity, peace and conflict, globalization) that cut across fields. Course offerings are designed to introduce students to Political Science at the first year level, provide the foundations for further study at the second year level, and provide specialized lecture and seminar courses at the intermediate and advanced levels. Studies in Political Science provide students with a good grounding in one of the chief social science disciplines and an opportunity to explore the issues that confront us as individuals, groups, societies and on the international level in the twenty-first century. In addition to the materials covered, Political Science courses are set up to offer students an opportunity to learn writing and analytical skills to support a challenging and diverse career.

Courses in Political Science dovetail with programs in many other disciplines of the social sciences and the humanities: Economics, Sociology, History, Philosophy, and Psychology. A student interested in Canadian studies or urban problems, for example, would be well advised to choose courses from all these disciplines, as would someone interested in international affairs or environmental studies. A student planning graduate work in the social sciences should seek to obtain a basic understanding of each of these disciplines.

Detailed information on our programs, extended descriptions of courses, and background information on the interests of our instructors can be found on our website. The Association of Political Science Students, the students’ organization for Political Science undergraduates, has an office in Room 1091, Sidney Smith Hall.

Enquiries: Mary-Alice Bailey, Sidney Smith Hall, Room 3032, (416) 978-6567, undergrad.polsci@utoronto.ca

Political Science Programs

Political Science Specialist (Arts Program) - ASSPE2015

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

Completed courses (with minimum grades)
The following courses with the stated minimum grades are required for students who have completed 4.0 to 8.5 credits:

- 1.0 credits in 100-level POL courses (65%), or
- One 0.5 credit in a 100-level POL course (65%), and one 0.5 credit in a POL First-Year Foundations Seminar (65%), or
- One 0.5 credit in a 100-level POL course (65%), and one 0.5 credit in a First-Year Seminar (65%) from another unit approved by the Department of Political Science.

For students who have completed 9.0 credits or more:

- 2.0 credits in POL courses (70%), or
- One 0.5 credit in a POL course (70%), and one 0.5 credit in a POL First-Year Foundations Seminar (70%), or
- One 0.5 credit in POL courses (70%) and one 0.5 credit in a First-Year Seminar (70%) from another unit approved by the Department of Political Science.

Completion Requirements:

The following requirements are effective for all students registering in the program as of March 1, 2020.

(10.0 POL credits. Of these, 3.0 credits must be 300+ series courses and 1.0 credit must be 400 series.)

First Year:

- 1.0 credit in POL courses at the 100-level
- 0.5 credit in a First-Year Foundations Seminar in relevant topics (from POL or an approved topic from another unit) may be substituted.

Higher Years:

1. POL200Y1
2. 0.5 credit from: POL201H1/ POL208H1/ POL218H1
3. POL214H1/ POL224H1 and 0.5 credit at the 200-level or higher years in Canadian Politics
4. POL222H1
5. POL232H1
6. 1.0 credit in Diversity and Identity courses
Political Science Major (Arts Program) - ASMAJ2015

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

Completed courses (with minimum grades)
The following courses with the stated minimum grades are required for students who have completed 4.0 to 8.5 credits:

• 1.0 credit in 100-level POL courses (65%), or
• One 0.5 credit in a 100-level POL course (65%), and one 0.5 credit in a POL First-Year Foundations Seminar (65%), or
• One 0.5 credit in a 100-level POL course (65%), and one 0.5 credit in a First-Year Seminar (65%) from another unit approved by the Department of Political Science.

For students who have completed 9.0 or more credits:

• 2.0 credits in POL courses (70%), or
• 1.5 credits in POL courses (70%), and one 0.5 credit in a POL First-Year Foundations Seminar (70%), or
• 1.5 credits in POL courses (70%), and one 0.5 credit in a First-Year Seminar (70%) from another unit approved by the Department of Political Science.

Completion Requirements:

The following requirements are effective for all students registering in the program as of March 1, 2020.

(7.0 POL credits. Of these, 1.5 credits must be 300+ series courses and a 0.5 credit must be 400 series.)

First Year:

• 1.0 credit in POL courses at the 100-level
0.5 credit in a First-Year Foundations Seminar in relevant topics (from POL or an approved topic from another unit) may be substituted.

Higher Years:

1. POL320Y1
2. 0.5 credit from: POL201H1/ POL208H1/ POL218H1
3. POL214H1/ POL224H1 and 0.5 credit at the 200-level or higher years in Canadian Politics
4. POL222H1
5. 1.0 credit in Diversity and Identity courses
6. Additional POL courses to a total of 7.0 credits.

Note:

• No more than 1.0 credit 100-level courses may be used to fulfill the program requirements.
• No more than 1.0 credit NON-POL courses approved for POL program requirements may be used to fulfill the program requirements.
• Some courses may contribute to both the Canadian Politics and Diversity and Identity requirements (in requirements 3 and 6). Refer to the Department website for a full list of courses that meet these requirements.

Political Science Minor (Arts Program) - ASMIN2015

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

Completed courses (with minimum grades)
The following courses with the stated minimum grades are required for students who have completed 4.0 to 8.5 credits:

• 1.0 credit in 100-level POL courses (65%), or
• One 0.5 credit in a 100-level POL course (65%), and one 0.5 credit in a POL First-Year Foundations Seminar (65%), or
• One 0.5 credit in a 100-level POL course (65%), and one 0.5 credit in a First-Year Seminar (65%) from another unit approved by the Department of Political Science.

For students who have completed 9.0 or more credits:

• 1.0 credit in POL courses (65%), or
• 0.5 credits in POL courses (65%) in each, and one 0.5 credit in a POL First-Year Foundations Seminar (65%), or
• 0.5 credits in POL courses (65%) in each and one 0.5 credit in a First-Year Seminar (65%) from another unit approved by the Department of Political Science.

Completion Requirements:

(4.0 POL credits)

• 4.0 POL credits. Of these, at least 1.0 FCE must be 300+ series courses.

Note:

• No more than 1.0 credit 100-level courses may be used to fulfill the program requirements.
Regarding Political Science Courses

PLEASE NOTE:

- Not all courses listed in the 2020-2021 calendar are offered every year. Please check the Department’s website for the list of courses offered in 2020-21.
- Prerequisites and exclusions are enforced for all 2nd, 3rd and 4th year courses. Please consult the POL section of the Faculty of Arts & Science Registration Instructions and Course Enrolment Instructions for details. Students without course prerequisites will be removed at any time they are discovered.
- Enrolment is limited for all 300-level and 400-level courses. See the Registration Instructions and Course Enrolment Instructions for details.
- Nearly all POL 400-level courses are offered as joint undergraduate-graduate seminars with class sizes ranging from 15-25.

Political Science Courses

POL101H1 - The Real World of Politics: An Introduction

Previous Course Number: POL101Y1
Hours: 24L/12T

This course introduces students to compelling issues of contemporary politics through the lens of classic and important texts in political science. The course covers the politics of climate change, Indigenous rights, elections and electoral systems, terrorism, social movements and political activism, voting, democracy, and power.

Exclusion: POL101Y1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

POL106H1 - Contemporary Challenges to Democracy: Democracy in the Social Media Age

Hours: 24L/12T

This course examines the latest evidence-based research on the effects of social media on democracy. We cover surveillance capitalism, privacy, disinformation, and the often-overlooked ecological implications of data consumption. We also examine targeted digital espionage against civil society, Citizen Lab research reports, and explore solutions and alternatives to social media.

Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

POL107H1 - What Went Wrong? A Post Mortem of Political Disasters, Catastrophic Policy Failures, and Epic Marches of Folly

Hours: 24L/12T

Why do individuals, groups, and societies make repeated, and often easily predictable mistakes? Why do they persist in courses of action that produce disastrous results? Why is it that in the political world good intentions are insufficient to ensure good results? This course employs the political science analytical toolkit to answer these questions and examines an array avoidable disasters, from the local to the international.

Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

POL109H1 - Might and Right: Power and Justice in International Relations

Hours: 24L/12T

This course explores the relationship between justice, power, and interests in the works of prominent ancient, modern, and contemporary thinkers. It adopts a problem-driven approach and engages with current controversies in international relations in light of insights from classic books. Special attention is paid to the prospects of a just world order, the causes and justifications of war, the construction of images of citizens and enemies, and the nature of duties to outsiders.

Exclusion: POL323Y1
Distribution Requirements: Social Science
Breadth Requirements: Thought, Belief and Behaviour (2)
POL193H1 - The Politics of Representation  

**Hours:** 24S  

This course examines the politics of representation in Canada from a political science perspective. What is representation? Why are some groups under-represented? How can we increase the representation of marginalized groups? Students will learn to evaluate qualitative, quantitative and normative scholarship; develop their own arguments; and communicate their arguments effectively. Restricted to first-year students. Not available for CR/NCR option.  

**Distribution Requirements:** Social Science  
**Breadth Requirements:** Society and its Institutions (3)  

---  

POL196H1 - The China Challenge  

**Hours:** 24S  

China’s meteoric rise to great power status has triggered an intense international debate over its global implications. While many analysts see Beijing’s rise as posing a threat to global political and economic stability, Chinese leaders have argued forcefully that China’s efforts to regain its historic preeminence will result in a “win-win” outcome for all states. This course will assess the merits of these contending positions through an historical examination of China’s 20th century renaissance. The course will begin by tracing the long period of imperial decline in the 19th century, culminating in China’s revolutionary rebirth as a Marxist state in 1949. A major focus will be on the Mao-era legacy of revolutionary diplomacy and the foreign policy consequences of its later transformation into a market-authoritarian powerhouse. Restricted to first-year students. Not available for CR/NCR option.  

**Distribution Requirements:** Social Science  
**Breadth Requirements:** Society and its Institutions (3)  

---  

POL194H1 - Race  

**Hours:** 24S  

This course is an introduction to the history, politics, economics, and psychology of race and racism, as well as intersections between race and class, gender, and indigeneity. The course focuses attention on the ways that states structure race, and the ways race is differently conceptualized around the world. Restricted to first-year students. Not eligible for CR/NCR option.  

**Distribution Requirements:** Social Science  
**Breadth Requirements:** Society and its Institutions (3)  

---  

POL197H1 - Solidarity in Diverse Societies  

**Hours:** 24S  

Liberal democracies in the “populist” age are increasingly defined by polarization, and many observers fear that liberal democracies are having trouble accommodating diversity and protecting the rule of law and the integrity of their elections. This course will explore how these societies can better accommodate diversity and preserve liberal democracy. It will consider patriotism and nationalism, as well as arguments that seek to empower citizens with the techniques of “political friendship” required to manage difference and disagreement. The course will also consider critical arguments, that solidarity can only be attained by juxtaposing the political community against an “enemy.” Restricted to first-year students. Not eligible for CR/NCR option.  

**Distribution Requirements:** Social Science  
**Breadth Requirements:** Thought, Belief and Behaviour (2)  

---  

POL195H1 - Settler Colonialism and Enduring Indigeneity  

**Hours:** 24S  

What is settler colonialism and how does Indigeneity endure it? This course explores the many, diverse ways that Indigenous peoples resist settler colonization and persist beyond it. We will examine Indigenous activism, legal orders, political philosophies, and cultural productions that demonstrate settler colonialism is indeed a failing project. Restricted to first-year students. Not eligible for CR/NCR option.  

**Distribution Requirements:** Social Science  
**Breadth Requirements:** Society and its Institutions (3)  

---  

POL198Y1 - Social Justice and the City  

**Hours:** 48S  

Who benefits and who loses from urban transformation? This course is an introduction to the concept of social justice from an urban perspective. It will highlight how unequal relations of race, class, gender, sexuality, and ability operate through the urban environment, and how these conditions can be contested through political mobilization. A variety of cases from cities around the world are used to explore issues related to segregation, gentrification, policing, migration, and access to public spaces and services. Restricted to first-year students. Not eligible for CR/NCR option.  

**Distribution Requirements:** Social Science  
**Breadth Requirements:** Society and its Institutions (3)
POL199H1 - Utopias and Dystopias
Previous Course Number: POL199Y1
Hours: 12T/24S
This course explores alternative visions of good and bad social, economic and political orders. Students are expected to think about how work, income, and power should be allocated, what social norms regarding gender and sexuality should prevail, how children should be raised and educated, and so on. Restricted to first-year students. Not eligible for CR/NCR option.
Exclusion: POL199Y1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

POL201H1 - Politics of Development
Previous Course Number: POL201Y1
Hours: 24L/12T
This course offers an introduction to the history and politics of economic and political development, starting with the Industrial Revolution and then turning to a critical analysis of the politics of economic growth, international trade, debt, state intervention, protectionism, and neo-liberalism in the global periphery, including Africa, Asia, and Latin America.
Prerequisite: 4.0 credits including 1.0 POL credit
Exclusion: POL201Y1/POLB90H3/POLB91H3
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

POL200Y1 - Political Theory: Visions of the Just/Good Society
Hours: 48L/24T
A selective presentation of critical encounters between philosophy and politics, dedicated to the quest for articulation and founding of the just/good society. Among the theorists examined are Plato, Aristotle, Machiavelli, Hobbes and Locke.
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3); Thought, Belief and Behaviour (2)

POL205H1 - International Relations in the Anthropocene
Hours: 24L/12T
Humans have altered the planet so dramatically that some geologists have coined a new epoch: the Anthropocene. Is our study of global politics up to the challenge of human-driven environmental change? In this course, we consider multiple perspectives on IR to make sense of geopolitics on a changing planet.
Prerequisite: 4.0 credits including 1.0 POL credit
Distribution Requirements: Social Science
Breadth Requirements: Living Things and Their Environment (4)

JPI201H1 - Indigenous Politics in Canada
Previous Course Number: POL308H1
Hours: 24L/12T
This course explores key issues in Indigenous politics in Canada. Provides students with an overview of historical and contemporary socio-political issues in Indigenous societies and institutions such as Indigenous self-governance, land claims and treaty negotiations.
Prerequisite: 4.0 credits including 1.0 POL credit or INS201Y1
Exclusion: POL308H1
Recommended Preparation: POL214H1 or POL224H1
Distribution Requirements: Social Science
Breadth Requirements: Creative and Cultural Representations (1)

POL208H1 - Introduction to International Relations
Previous Course Number: POL208Y1
Hours: 24L/12T
This introductory course examines some key themes and issues in global politics, including interstate war, human rights, international institutions, and the evolution of the global order.
Prerequisite: 4.0 credits or 1.0 POL credit
Exclusion: POL208Y1/POL208Y5/POLB80H3/POLB81H3
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)
POL211H1 - Intelligence, Disinformation, and Deception: Challenges of Global Governance in the Digital Age

Hours: 24L/12T

Knowledge is power, but knowledge is often unreliable in the digital world. This course introduces students to the challenges of global governance and decision making in the face of ambiguous evidence, information overload, political spin, disinformation, subversion, and deception. Students will learn conceptual tools for understanding and solving complex problems.

Prerequisite: 4.0 credits including 1.0 POL credit
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

POL214H1 - Canadian Government

Previous Course Number: POL214Y1
Hours: 24L/12T

An introduction to the study of Canadian government. Topics include institutions of governance: the constitution, machinery of government, charter of rights and freedom, and the electoral system.

Prerequisite: 4.0 credits including 1.0 POL credit
Exclusion: POL214Y1/POL214Y5/POL224H1/POL224Y1/POLB50Y3
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

POL218H1 - State, Society and Power in Comparative Perspective

Hours: 24L/12T

This course is designed to introduce students to major issues and challenges that shape states, determine how they are governed, and how they change. The course helps to explain major events such as state transformation, democratization, authoritarian rule, civil conflict and social mobilization.

Prerequisite: 4.0 credits including 1.0 POL credit
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

POL219H1 - Unpacking Political Systems: Institutions and Behavior in Comparative Perspective

Hours: 24L/12T

This course aims to unpack the institutional and behavioral variation within political systems. The goal is to expose students to the key questions and theories in comparative politics around three themes: a) the origins and effects of political institutions (federalism, electoral rules, bicameralism, courts…); b) party and electoral behavior across democracies and authoritarian regimes; and c) explaining quality of governance (issues of representation, accountability, trust, corruption). We will draw on cutting edge research and touch on current events and a variety of cases.

Prerequisite: 4.0 credits including 1.0 POL credit
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

POL220H1 - Immigration, Multiculturalism, and Citizenship in Canada

Hours: 24L/12T

This course deals with three inter-related themes – immigration, multiculturalism, and citizenship – by focusing on a single unifying question: What does it mean to “belong” to the Canadian political community? Who belongs, on what terms, and to what ends? A range of materials – normative, empirical, historical, and contemporary – will be used.

Prerequisite: 4.0 credits including 1.0 POL credit
Recommended Preparation: POL214H1 or POL224H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

POL222H1 - Introduction to Quantitative Reasoning I

Previous Course Number: POL322H1
Hours: 24L/12T

Introduces the foundations of quantitative empirical research methods - increasingly popular and important part of political science research and public policy debates - to enable you to interpret and evaluate the results of the studies that employ these methods. Topics include scientific study of politics, empirical research designs, and regression analysis.

Prerequisite: 1.0 POL credit
Exclusion: POL242Y1/POL242Y5/POL322H1/ECO220Y1/GGR270H1/PSY201H1/SOC202H1/STA220H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)
POL223H1 - Globalization and Development: Issues and Challenges

Hours: 24L/12T

This course examines how globalization creates opportunities and challenges to development in the Global South. Key issues considered include globalization and dynamics of inequality amongst and within nations, human rights and democratic struggles, environmental sustainability and justice, gender and racialized patterns of inequality, trade, foreign aid and poverty alleviation.

Prerequisite: 4.0 credits including 1.0 POL credit
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

POL224H1 - Canada in Comparative Perspective

Previous Course Number: POL224Y1
Hours: 24L/12T

This course introduces students to aspects of Canadian political life by comparing them with those that prevail in other advanced democracies. Themes covered will include the Canadian constitution, federalism, parties and elections, political culture and social and economic institutions and policies.

Prerequisite: 4.0 credits including 1.0 POL credit
Exclusion: POL111H5/POL214H1/POL214Y1/
POL214Y5/POL224Y1/POLB50Y3
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

POL232H1 - Introduction to Quantitative Reasoning II

Hours: 24L/12T

Building up on POL222H1, students will continue to build theoretical foundations of quantitative empirical research, such as probability theory and statistical inference. They will also learn the basic use of statistical software and have become able to conduct a basic data analysis by themselves by the end of semester.

Prerequisite: POL222H1
Exclusion: POL242Y1/POL242Y5
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

POL299Y1 - Research Opportunity Program

Credit course for supervised participation in faculty research project. Details at https://www.artsci.utoronto.ca/current/academics/research-opportunities/research-opportunities-program. Not eligible for CR/NCR option.

Distribution Requirements: Social Science

POL300Y1 - Topics in Comparative Politics

Hours: 48L

An introduction to the field of comparative politics. Content in any given year depends on instructor.

Prerequisite: 1.0 POL credit
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

POL301Y1 - Government and Politics in Africa

Hours: 48L

The continuing relevance of pre-colonial Africa; the nature and legacy of colonial rule; African nationalism and the consolidation of power in the newly-independent states; government, party and the people; the role of the military; national integration; dependency and neo-colonialism; socialism and development; democracy and human rights.

Prerequisite: 1.0 POL credit
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

POL302Y1 - State & Society in 20th Century China

Previous Course Number: JMC301Y1
Hours: 48L

This course explores China’s efforts to construct a modern and effective political order in the face of powerful demographic and revolutionary challenges. The clash between competing ideologies, political and social movements and institutional alternatives in the context of rapid social and economic change are analyzed.

Prerequisite: EAS105H1/HIS280Y1/POL215Y1
Exclusion: JMC301Y1/POLC16H3
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)
**POL303H1 - Women in Western Political Thought**

**Previous Course Number:** JPP343H1  
**Hours:** 24L

Examines contemporary feminist perspectives in political theory as responses to the limitations of western tradition of modern political theory.

**Prerequisite:** PHL265H1/POL200Y1/POL200Y5/(POLC70H3, POLC71H3)  
**Exclusion:** JPP343H1/JPP343Y1/POLC76H3/POLC77H3  
**Distribution Requirements:** Humanities; Social Science  
**Breadth Requirements:** Thought, Belief and Behaviour (2)

**JHP304Y1 - Ukraine: Politics, Economy and Society**

**Hours:** 48L

The history of Ukraine from earliest times to the present. Economic, political, and cultural movements; Kievan Rus', Polish-Lithuanian Commonwealth, Cossack state, national revival, twentieth century statehood, and unification. As this course is designed as an introductory course, the professor welcomes first- and second-year students to enroll, as well as upper-level students. *(Given by the Departments of History and Political Science)*

**Distribution Requirements:** Humanities; Social Science  
**Breadth Requirements:** Society and its Institutions (3)

**POL304H1 - Topics in Methods**

**Hours:** 24L

Various topics are taken up each year, the content of which depends on the instructor.

**Prerequisite:** POL232H1 or equivalent  
**Distribution Requirements:** Social Science  
**Breadth Requirements:** Society and its Institutions (3)

**POL305Y1 - Politics and Society in Latin America**

**Hours:** 48L

The colonial heritage, the failure of nation-states to develop as integrated and autonomous power structures, dependent capitalism and political order, contrasting types of domination, rigid monopolization and the flexible use of the state by the ruling sectors, national revolution and the socialist alternative.

**Prerequisite:** 1.0 POL credit  
**Exclusion:** POLC91H3/POLC99H3/POL360H5  
**Distribution Requirements:** Social Science  
**Breadth Requirements:** Society and its Institutions (3)

**POL312Y1 - Canadian Foreign Policy**

**Hours:** 48L

Canada's response to the challenges of globalization and the post-cold war world. The major alternative theoretical approaches, the changing doctrines and patterns of Canadian foreign policy from 1945 to the present, the making of Canadian foreign policy, relations with the United States, within NAFTA, and with other global regions.

**Prerequisite:** POL208Y1/POL208Y5/(POLB80H3, POLB81H3)  
**Distribution Requirements:** Social Science  
**Breadth Requirements:** Society and its Institutions (3)

**JPS315H1 - Sexual Diversity Politics**

**Hours:** 24L

This is an interdisciplinary course examining the development of the Lesbian, Gay, Bisexual, Transgender and Queer (LGBTQ) movement and its interaction with the state in the US and Canada. *(Given by the Department of Political Science and the Sexual Diversity Studies Program)*

**Prerequisite:** SDS255H1/SDS256H1/UNI255H1/UNI256H1/one full course on the politics of 20th century Europe, U.S., or Canada/one full course on gender or sexuality/permission of the instructor  
**Exclusion:** JPU315H1  
**Distribution Requirements:** Social Science  
**Breadth Requirements:** Society and its Institutions (3)
POL316Y1 - Contemporary Canadian Federalism

Hours: 48L

Constitutional, political, administrative, and financial aspects of federal-provincial relations, regionalism, and cultural dualism.

Prerequisite: POL214Y1/POL214Y5/POLB50Y3/POL224Y1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

POL317H1 - Comparative Public Policy

Hours: 24L

Draws from the major theoretical traditions in public policy and policymaking of the advanced industrial world, and applies these theories in understanding the developing world context and the new challenges of global change.

Prerequisite: EUR200Y1/POL101Y1/POL203Y1/
POL203Y5/POL214Y1/POL214Y5/POLB50Y3/POL224Y1
Exclusion: POL317Y1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

POL320Y1 - Modern Political Thought

Hours: 48L/24T

The development of political thought from the Enlightenment and through the 19th century; implications for political thought in the 20th century. Democratic and anti-democratic tendencies.

Prerequisite: POL200Y1/POL200Y5/(POLC70H3, POLC71H3)
Exclusion: POLC73H3/POLC74H3/POL320Y5
Distribution Requirements: Social Science
Breadth Requirements: Thought, Belief and Behaviour (2)

POL324H1 - European Union: Politics, Institutions and Society

Hours: 24L

The course provides an in-depth understanding of the history, political institutions, and policies of the European Union. It also explores the key contemporary social and political debates facing the European Union today such as the eurozone crisis, the rise of euroskepticism, issues of democratic legitimacy, Brexit, issues of enlargement, immigration and the recent migrant crisis.

Prerequisite: EUR200Y1/POL207Y1/POL302Y5
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

POL326Y1 - United States Foreign Policy

Hours: 48L

The foreign policy of the United States: tradition and context of American decision-making, the process by which it is formulated, application to a number of specific regions and problems in the world.

Prerequisite: POL203Y1/POL203Y5/POL208Y1/
POL208Y5/(POLB80H3, POLB81H3)
Exclusion: POL327Y5
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

POL328Y1 - Politics and Government in South Asia

Hours: 48L

The course introduces students to politics and government in South Asia in the period after independence from colonial rule. It focuses on the experiences of India, Pakistan, Sri Lanka and Bangladesh.

Prerequisite: POL201Y1/(POLB90H3, POLB91H3)
Exclusion: POL328H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)
POL329H1 - Experiences of Conflict

Hours: 24L

The course reviews selected novels that deal with personal and collective experiences of conflict. It focuses on representations of how conflict is experienced. It gives students a practical understanding of the human dimension of selected major conflicts and explores possibilities for personal and social resistance to injustice and violence. Special attention is paid to questions of identity formation and moral choice in contexts of war and nationalism.

Prerequisite: POL208Y1/POL208Y5/POLB80H3, POLB81H3
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

POL330Y1 - Politics and Morality

Hours: 72L

Is it possible to provide politics with a solid moral foundation? If so, what are the moral principles that should guide political order? The course examines these questions through the study of key figures in 20th-century political thought, including Max Weber, Hannah Arendt, Frantz Fanon, Mahatma Gandhi, Michel Foucault, Isaiah Berlin, John Rawls, and Jürgen Habermas.

Prerequisite: POL200Y1/POL200Y5/(POLC70H3, POLC71H3)
Distribution Requirements: Social Science
Breadth Requirements: Thought, Belief and Behaviour (2)

JPA331Y1 - Issues in Contemporary Chinese Politics

Hours: 48L

The course covers topics of interest in China from the Communist takeover in 1949 through to the reform period of the 1980s, 1990s and 2000s. It will also address aspects of China’s diplomacy related to its growing economic power. (Given by the Department of Political Science and the Contemporary Asian Studies Program)

Prerequisite: 2.0 POL FCEs or 1.0 CAS FCEs
Exclusion: POLC16H3
Distribution Requirements: Humanities; Social Science
Breadth Requirements: Society and its Institutions (3)

POL334H1 - Ontario and Quebec Politics

Hours: 24L

An examination of politics in Canada’s two most populous provinces. Drawing insights from comparative political economy scholarship, the course compares their politics in term of their distinctive historical origins, and their political economies, party systems, cultures, and relations with the federal government.

Prerequisite: POL214Y1/POL214Y5/POLB50Y3/POL224Y1
Exclusion: POL334Y1/POL336H1/POL336Y1 (taken before 2012-2013)/POLC55H3
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

POL336H1 - Topics in Provincial Politics

Hours: 24L

Content in any given year depends on instructor.

Prerequisite: POL214Y1/POL214Y5/POLB50Y3/POL224Y1
Exclusion: POL336Y5
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

POL337Y1 - The Canadian Constitution

Hours: 48L

The moral foundations, historical events, political forces and legal ideas that have shaped the Canadian constitution; the roots, legacies, and judicial interpretation of the Constitution Act 1867, the Constitution Act 1982, and in particular the Charter of Rights and Freedoms; the constitutional framework of federalism; the politics of constitutional change; multiculturalism, ‘rights talk’, and the judicialization of politics.

Prerequisite: POL214Y1/POL214Y5/POLB50Y3/POL224Y1
Exclusion: POLC68H3
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)
POL339H1 - Ethnic Mobilization and Conflict

Hours: 24L

The course introduces students to the politics of ethnic identity and the circumstances under which ethnicity is mobilized for political goals. It includes a discussion of ethnic and religious identity, their politicization, the causes of conflict, and institutional solutions to the management of ethnic conflict.

Prerequisite: POL101Y1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

POL340Y1 - International Law

Hours: 48L

International law as an instrument of conflict resolution. Recognition, sovereign immunity, subjects of international law, jurisdiction.

Prerequisite: POL208Y1/POL208Y5/(POLB80H3, POLB81H3)
Exclusion: POLC38H3/POL340Y5
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

POL344H1 - Social Movements in Europe and North America

Hours: 24L

A comparative examination of the development of a variety of social movements, and their engagement with state institutions. Among the activist movements being examined are those dealing with gender, the environment, and labour.

Exclusion: POL344H1
Recommended Preparation: One full course on 20th century politics or history of Europe, U.S. or Canada/one full course on gender or sexuality
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

POL344Y1 - Social Movements in Europe and North America

Hours: 48L

A comparative examination of the development of a variety of social movements, and their engagement with state institutions. Among the activist movements being examined are those dealing with gender, the environment, and labour.

Exclusion: POL344H1
Recommended Preparation: One full course on 20th century politics or history of Europe, U.S. or Canada/one full course on gender or sexuality
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

POL349H1 - Global Urban Politics

Hours: 24L

An examination of how political life is being transformed in the global urban age. Concepts such as territory, the state, citizenship, agency, sovereignty, and power will be reconsidered through a particularly urban lens.

Prerequisite: 1.0 POL credit
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

POL351H1 - Gender, Politics, and Public Policy in Comparative Perspective

Hours: 24L

An introduction to gender and politics that examines women as political actors and their activities in formal and grassroots politics. The course also explores the impact of gender in public policy and how public policies shape gender relations. Cases to be drawn on include Canada, other countries in North America and Europe, and the developing world.

Prerequisite: 1.0 POL credit
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)
POL354H1 - Politics and Society in Russia
Hours: 24L
Explores tensions between democracy and authoritarianism after communist rule. Topics include: legacy of Soviet Union; political leadership; presidential power and executive - legislative conflict; federalism; elections and parties; civil society; ethnonationalism; corruption and organized crime.
Prerequisite: 1.0 POL credit
Exclusion: POL354Y5
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

POL355Y1 - Topics in Classical Political Thought
Hours: 48L
Leading texts and issues in classical political thought, as expressed in the various classical genres, including epic, tragedy, comedy, history, dialogues, and treatises.
Prerequisite: POL200Y1/POL200Y5/(POLC70H3, POLC71H3)
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

POL356H1 - Canadian Political Parties
Hours: 24L
The evolution and setting of Canada's federal and provincial party systems. Topics include historical and theoretical perspectives, ideology, leadership selection, elections, financing, media, and representing interests.
Prerequisite: POL214Y1/POL214Y5/POL224Y1/POLB50Y3
Exclusion: POL356Y1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

POL356Y1 - Canadian Political Parties
Hours: 48L
The evolution and setting of Canada's federal and provincial party systems. Topics include historical and theoretical perspectives, ideology, leadership selection, elections, financing, media, and representing interests.
Prerequisite: POL214Y1/POL214Y5/POLB50Y3/POLB22Y1
Exclusion: POL356H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

POL357Y1 - Topics in South Asian Politics
Hours: 48L
Selected issues in South Asian politics. Content in any given year depends on instructor.
Prerequisite: POL201Y1/(POLB90H3, POLB91H3)
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

POL359Y1 - Enlarging Europe: The European Union and Its Applicants
Hours: 48L
The course provides an overview of the salient issues in the past enlargement rounds, furnishing the context for the study of current and future integration efforts. Readings will cover the current round of enlargement to the Central and East European countries, efforts related to South-Eastern Europe, as well as Turkey. Issues between the EU and Ukraine and Russia will also be studied, as will the relationship between the Union and its Southern Rim. Security issues related to NATO integration and operations will also be covered.
Prerequisite: POL207Y1/POL302Y5/ EUR200Y1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

POL360H1 - Topics in Latin American Politics
Hours: 24L
Selected issues in Latin American politics. Content and instructor varies from year to year.
Prerequisite: POL201Y1/(POLB90H3, POLB91H3)
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

POL360Y1 - Topics in Latin American Politics
Hours: 48L
Selected issues in Latin American politics. Content and instructor varies from year to year.
Prerequisite: POL201Y1/(POLB90H3, POLB91H3)
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)
POL361H1 - Global Political Economy I: History and Theory

Previous Course Number: POL370Y1
Hours: 24L

The course introduces the contemporary history of world economic order and the ideas underpinning that order. It also provides an orientation to the field of study devoted to understanding and explaining underlying political dynamics.

Prerequisite: 1.0 POL credit; ECO100Y1/(ECO101H1, ECO102H1)/ECO105Y1
Exclusion: POL370H1/POL370Y1/POLC69H3
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

JPR364Y1 - Religion and Politics

Hours: 48L

This course examines the evolving role of religions in contemporary public, political contexts. Themes include: democracy and secularism; religion, human rights, law and justice; party politics, identity-formation and citizenship; gender and sexuality; interreligious conflict. *(Given by the Departments of Political Science and Religion)*

Prerequisite: 1.0 POL credit/1.5 full course equivalents in Religious Studies
Exclusion: RLG230H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3); Thought, Belief and Behaviour (2)

POL362H1 - Global Political Economy II: Policy and Analysis

Hours: 24L

The course builds on themes introduced in POL361H1. It focuses on key aspects of world economic order, like policies governing trade, capital flows, migration, development, and telecommunications. Methods for analyzing the background and implications of such policies are introduced.

Prerequisite: 1.0 POL credit; ECO100Y1/(ECO101H1, ECO102H1)/ECO105Y1
Exclusion: POL370H1; POL370Y1
Recommended Preparation: POL361H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

POL363H1 - Canadian Political Development

Hours: 24L

This course introduces students to Canadian political development – an approach that shows how attention to history can illuminate and explain patterns of Canadian politics. The course introduces students to core theories and tools of a developmental approach, then applies this approach to key moments, contestations, and institutions in Canadian politics.

Prerequisite: 4.0 credits including 1.0 POL credit
Exclusion: POL382H1 (Topics in Canadian Politics: Canadian Political Development), offered in Winter 2018, Winter 2019
Recommended Preparation: POL214H1 or POL224H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

POL367Y0 - Australia in Transition

Hours: 48L

This course focuses on the dynamic changes that have been taking place in Australia since 1901. It examines Australia's rich indigenous and non-indigenous history; the complexity and challenges of Australia's migration and multiculturalism; key issues and practices in contemporary Australian politics; the complex interplay between institutional processes, political interest and the media; and the dynamics of Australia's engagement with the region and the rest of the world. Not eligible for CR/NCR option.

Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

POL373H1 - Emotions in Political Theory

Hours: 24L

Emotions are central to political life but have often been marginalized in political theory. This course explores various ways in which emotions are relevant to political theory and examines a number of contemporary debates around the new possibilities in bringing a positive consideration of the emotions back into political theory.

Prerequisite: POL200Y1/POL200Y5/(POLC70H3, POLC71H3)
Exclusion: POL373Y1
Recommended Preparation: POL320Y1
Distribution Requirements: Social Science
Breadth Requirements: Thought, Belief and Behaviour (2)

**Prerequisite:**
- A combined minimum of 1.0 credit from POL and/or SDS courses

**Exclusion:**
- POL378H1 (Topics in Comparative Politics II: Sex and the State), offered in Fall 2017 and Fall 2018
- SDS375H1 (Special Topics in Sexual Diversity Studies A: Sex and the State), offered in Fall 2017 and Fall 2018

**Distribution Requirements:**
- Social Science

**Breadth Requirements:**
- Society and its Institutions (3)
POL380H1 - Topics in International Politics

Hours: 24L

Content in any given year depends on instructor.

Prerequisite: POL208Y1/POL208Y5/(POLB80H3, POLB81H3)
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

POL380Y1 - Topics in International Politics

Hours: 48L

Content in any given year depends on instructor.

Prerequisite: POL208Y1/POL208Y5/(POLB80H3, POLB81H3)
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

POL381H1 - Topics in Political Theory

Hours: 24L

A detailed examination of particular authors or topics in political theory. Content in any given year depends on instructor.

Prerequisite: POL200Y1/POL200Y5/(POLC70H3, POLC71H3)
Distribution Requirements: Social Science
Breadth Requirements: Thought, Belief and Behaviour (2)

POL381Y1 - Topics in Political Theory

Hours: 48L

A detailed examination of particular authors or topics in political theory. Content in any given year depends on instructor.

Prerequisite: POL200Y1/POL200Y5/(POLC70H3, POLC71H3)
Distribution Requirements: Social Science
Breadth Requirements: Thought, Belief and Behaviour (2)

POL382H1 - Topics in Canadian Politics

Hours: 24L

Examines in depth enduring and emerging issues in Canadian politics. Content in any given year depends on instructor.

Prerequisite: POL214Y1/POL214Y5/(POLB50Y3/POL224Y1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

POL382Y1 - Topics in Canadian Politics

Hours: 48L

Examines in depth enduring and emerging issues in Canadian politics. Content in any given year depends on instructor.

Prerequisite: POL214Y1/POL214Y5/(POLB50Y3/POL224Y1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

POL384H1 - Global Environmental Governance from the Ground Up

Hours: 24L

This course focuses on non-state actors in global environmental governance, considering the motivations, actions, and strategies of non-governmental organizations, grassroots communities, and corporations. The course uses analytic tools from international relations and comparative politics to understand patterns of environmental protest, resistance, and change over time.

Prerequisite: 1.0 FCE POL 200-level (POL201Y1 or POL208Y1 recommended)
Exclusion: POL300H1 (Topics in Comparative Politics: Protest, Politics, and Power: Reshaping Global Environmental Governance from the Ground Up), offered in Fall 2015 and Fall 2016
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)
POL385H1 - Issues in Contemporary Greece

Hours: 24L

This course is designed to comprehensively explore the theoretical, conceptual and empirical dimensions through the political history of the Greek state from the 19th c. to the present, and, to provide students with the critical skills to follow, understand and systematically analyze contemporary Greek politics. The class will alternate between highlights of Greek political history, theoretical foundations of major themes in Comparative Politics, and their empirical application to the politics of the Modern Greek state.

Prerequisite: POL201Y1/POL203Y1/POL203Y5/POL207Y1/POL208Y1/POL208Y5/POL214Y1/POL214Y5/POL215Y1/POL224Y1/POLB50Y3/(POLB60H3, POLB81H3)/(POLB90H3, POLB91H3)

Exclusion: POL300H1 (Topics in Comparative Politics: Issues in Contemporary Greece), offered in Fall 2014, Winter 2016, and Winter 2017

Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

POL386Y1 - U.S. Government and Politics

Previous Course Number: POL203Y1

Hours: 48L

An introduction to U.S. government and politics within an analytical framework that helps us understand how institutions structure incentives and decisions in the U.S. system. This class examines the political forces that forged contemporary American institutions to understand how these political institutions continue to provide stability while allowing opportunities for political change. We investigate whether these forces make American institutions different and why. Special attention is paid to current events and contemporary policy dilemmas.

Prerequisite: 4.0 credits including 1.0 POL credit
Exclusion: POL203Y1/POL203Y5/POLC92H3/POLC93H3
Recommended Preparation: POL218H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

POL387H1 - Politics in Europe

Previous Course Number: POL207Y1

Hours: 24L

This course applies the basic concepts in comparative politics to the political systems of Europe. We will cover theories of transitions to democracy, formation and development of the nation-state, political institutions and their effects, parties and party systems and elections and electoral behaviour. We will use these theories to gain a better understanding of politics in Europe. We will also address some of the major challenges that Europe and the EU have recently faced such as the eurozone crisis, Brexit, the rise of populism and extreme right parties and the challenges of immigration and incorporation of minorities. The goal is for students to become familiar with the politics and governments of contemporary Europe through the lens of current and classic themes in comparative politics.

Prerequisite: 4.0 credits including either 1.0 POL credit or EUR200Y1
Exclusion: POL207Y1/POL302Y5
Recommended Preparation: POL218H1, POL219H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

POL388H1 - Politics and Government of Southeast Asia

Hours: 24L

This course provides an overview of political regimes in Southeast Asia, as well as some of the main issues that shape its political life. It includes legacies of colonial rule, nationalist struggles, democratization, ethnic and secessionist conflict, as well as social movement.

Prerequisite: 4.0 credits including 1.0 POL credit
Recommended Preparation: POL218H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

POL395H1 - Research Participation

Credit course for supervised participation in a faculty research project. Offered only when a faculty member is willing and available to supervise. Interested faculty review plans with the Undergraduate Director, and then make the opportunity known to students as appropriate. Check with Undergraduate Office for more details and faculty proposal form. Not eligible for CR/NCR option.

Prerequisite: Available to students in their third year of study (who have completed at least 9 full courses or their equivalent)
Exclusion: POL299Y1
Distribution Requirements: Social Science
POL396H1 - Research Participation
Credit course for supervised participation in a faculty research project. Offered only when a faculty member is willing and available to supervise. Interested faculty review plans with the Undergraduate Director, and then make the opportunity known to students as appropriate. Check with Undergraduate Office for more details and faculty proposal form. Not eligible for CR/NCR option.

Prerequisite: Available to students in their third year of study (who have completed at least 9 full courses or their equivalent)
Exclusion: POL299Y1
Distribution Requirements: Social Science

POL397Y1 - Research Participation
Credit course for supervised participation in a faculty research project. Offered only when a faculty member is willing and available to supervise. Interested faculty review plans with the Undergraduate Director, and then make the opportunity known to students as appropriate. Check with Undergraduate Office for more details and faculty proposal form. Not eligible for CR/NCR option.

Prerequisite: Available to students in their third year of study (who have completed at least 9 full courses or their equivalent)
Exclusion: POL299Y1
Distribution Requirements: Social Science

POL398H0 - Research Excursions

Distribution Requirements: Social Science

POL398Y0 - Research Excursions

Distribution Requirements: Social Science

POL399Y1 - Research Opportunity Program
Credit course for supervised participation in faculty research project. Details at https://www.artsci.utoronto.ca/current/academics/research-opportunities/research-opportunities-program. Not eligible for CR/NCR option.

JRA401H1 - Topics in Comparative Politics V
Hours: 24S
Selected issues in comparative politics. Content and instructor varies from year to year. (Given by the Department of Political Science and the Centre for European, Russian and Eurasian Studies)

Prerequisite: 2.0 POL credits in comparative politics. See the Department's website http://politics.utoronto.ca/undergraduate/courses/fallwinter-timetable/ for POL courses by area group.
Exclusion: POL 438H (taken in 2013-14 and 2014-15)
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

JRA401Y1 - Topics in Comparative Politics V
Hours: 48S
Selected issues in comparative politics. Content and instructor varies from year to year. (Given by the Department of Political Science and the Centre for European, Russian and Eurasian Studies)

Prerequisite: 2.0 POL credits in comparative politics. See the Department's website http://politics.utoronto.ca/undergraduate/courses/fallwinter-timetable/ for POL courses by area group.
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)
POL401H1 - Political Parties in Comparative Perspective

Hours: 24S

Course surveys the main puzzles and theories on the origins, nature and effects of parties and party systems. We explore how institutions, societal cleavages and strategic action shape parties. We study the impact of parties on policy outcomes, and we examine issues of party collapse, ethnic parties, clientelism, and dominant parties.

Prerequisite: 2.0 POL credits in comparative politics (See the Departments website http://politics.utoronto.ca/undergraduate/courses/fallwinter-timetable/ for POL courses by area group) and minimum 14.0 credits

Exclusion: POL438H1 (Topics: Parties in Comparative Perspective), offered in Winter 2016, and (Topics: Parties and Party Systems in Comparative Perspective) offered in Fall 2016.

Distribution Requirements: Social Science

Breadth Requirements: Society and its Institutions (3)

JRA402H1 - Topics in Comparative Politics VI

Hours: 24S

Selected issues in comparative politics. Content and instructor varies from year to year. (Given by the Department of Political Science and the Centre for European, Russian and Eurasian Studies)

Prerequisite: 2.0 POL credits in comparative politics. See the Department's website http://politics.utoronto.ca/undergraduate/courses/fallwinter-timetable/ for POL courses by area group.

Exclusion: POL 410H (taken in 2013-14 and 2014-15)

Distribution Requirements: Social Science

Breadth Requirements: Society and its Institutions (3)

POL402H1 - Problems in the Political Thought of the Socratic School

Previous Course Number: POL402Y1

Hours: 24S

Study of a small number of texts illuminating the origins and/or legacy of Socratic political philosophy.

Prerequisite: POL200Y1/POL200Y5/(POLC70H3, POLC71H3)

Exclusion: POL402Y1

Distribution Requirements: Social Science

Breadth Requirements: Thought, Belief and Behaviour (2)

POL403Y1 - Problems in the Political Thought of the Socratic School

Hours: 24S

Study of a small number of texts illuminating the origins and/or legacy of Socratic political philosophy.

Prerequisite: POL200Y1/POL200Y5/(POLC70H3, POLC71H3)

Exclusion: POL402H1

Distribution Requirements: Social Science

Breadth Requirements: Thought, Belief and Behaviour (2)

POL404Y1 - Public, Private and the Liberal State

Hours: 48S

Liberalism, it is sometimes said, stands or falls with the distinction between public and private. The seminar examines how these terms are conceptualized and how they affect the practice of liberal democracy, especially in Canada and the U.S. We will spend the first term developing a conceptual toolkit that will help us understand some of the ways in which public and private are conventionally understood. In the second term we will explore some of the new (and often unexpected) ways in which public and private are playing out these days in public policy – for instance, in education, health, welfare, multiculturalism, professional sports, and war-making.

Prerequisite: POL203Y1/POL203Y5/POL24Y1/POL214Y5/POLB50Y3

Exclusion: POL410Y1 (2014-15)

Distribution Requirements: Social Science

Breadth Requirements: Society and its Institutions (3)

POL409H1 - Political Economy of Technology: From the Auto-Industrial to the Information Age

Hours: 24S

The course explores the centrality of science and technology in political affairs generally and its current significance for public policy in particular. It applies the conceptual tools of political economy to analyze the nature of technological change in industrial democracies. It assesses the social and political consequences of the current wave of technological innovation and alternative responses of industrial democracies. (Offered in alternate years)

Prerequisite: CSC300H1/GGR431H1/HPS201H1/HPS202H1/HPS431H1/POL218Y5/a POL 300 or 400 level course in comparative politics. See the Department's website http://politics.utoronto.ca/undergraduate/courses/fallwinter-timetable/ for POL courses by area group/SOC356Y1.

Distribution Requirements: Social Science

Breadth Requirements: Society and its Institutions (3)
POL410H1 - Topics in Comparative Politics III

Hours: 24S

Selected issues in comparative politics. Varies from year to year.

Prerequisite: 2.0 POL credits in comparative politics. See the Department's website http://politics.utoronto.ca/undergraduate/courses/fallwinter-timetable/ for POL courses by area group.
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

POL410Y1 - Topics in Comparative Politics III

Hours: 48S

Selected issues in comparative politics. Varies from year to year.

Prerequisite: 2.0 POL credits in comparative politics. See the Department's website http://politics.utoronto.ca/undergraduate/courses/fallwinter-timetable/ for POL courses by area group.
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

POL412H1 - Human Rights and International Relations

Hours: 24S

Human rights have become dominant in international politics since the end of World War II. The process of creating and implementing human rights is political. We explore historical, philosophical, and empirical explanations of the roots, effects, and implications of human rights today through a variety of topics.

Prerequisite: POL201Y1/(POLB90H3, POLB91H3)/POL208Y1/ POL208Y5/(POLB80H3, POLB81H3)
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

POL413H1 - Global Environmental Politics

Hours: 24S

Examines the challenges faced by humanity in dealing with global environmental problems and the politics of addressing them. Focuses on both the underlying factors that shape the politics of global environmental problems such as scientific uncertainty, North-South conflict, and globalization and explores attempts at the governance of specific environmental issues.

Prerequisite: POL208Y1/POL208Y5/(POLB80H3, POLB81H3)
Exclusion: POLD89H3
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

POL416H1 - Civil War and Counterinsurgency

Hours: 24S

This course provides an overview on the origins, dynamics, and outcomes of civil war and counterinsurgency. It provides a theoretical, empirical, and methodological foundation for understanding these forms of conflict, the logic of their violence, and the determinants of their duration and outcomes.

Prerequisite: POL208H1 or POL208Y1 or POLB80H3 or POLB81H3
Exclusion: POL487H1 (Topics in International Politics II: Civil War and Counterinsurgency), offered in Winter 2018, Winter 2019
Recommended Preparation: Familiarity with quantitative methods is strongly recommended (ex. POL222H1, POL232H1, POL419H1)
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

POL417Y1 - Global South in International Politics

Hours: 48S

The countries of Africa, Asia, Latin America, and the Middle East; their impact on the international system, and the external and internal factors that influence their international behaviour, with particular focus on civil wars.

Prerequisite: POL201Y1/(POLB90H3, POLB91H3)/POL208Y1/ POL208Y5/(POLB80H3, POLB81H3)/POL215Y1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)
JPR419H1 - Secularism and Religion

Previous Course Number: RLG419H1
Hours: 24S

Themes considered include what notion of religion is necessary for secular governance, and how secularity relates to particular discourses of citizenship and practices of political rule. Case studies include the effects of colonial rule on religious life; Jewish emancipation in Europe; and religious freedom in France and North America. (Given by the Departments of Political Science and Religion)

Registration in this course is through the Department of Religion.

Prerequisite: 2.0 200-level (or above) credits in Political Science or Study of Religion/permission of the instructor
Exclusion: RLG419H1
Distribution Requirements: Humanities; Social Science
Breadth Requirements: Society and its Institutions (3)

POL419H1 - Quantitative Methods and Data Analysis

Hours: 24S

Covers advanced level treatment of quantitative empirical research methods in political science. The emphasis is given to theoretical foundations, various research designs, and statistical methods of "causal inference." Students will also be exposed to prominent applications of these methods and learn how to use statistical software to apply these methods in data analysis.

Prerequisite: POL232H1/POL242Y1/one course in STA
Exclusion: POL419Y1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

POL421H1 - Maimonides and His Modern Interpreters

Hours: 24S

The course offers an introduction to the seminal work of Jewish philosophy, 'The Guide of the Perplexed' by Moses Maimonides. We will delve into some of the basic themes of Jewish philosophical theology and religion as they are treated by Maimonides.

Prerequisite: POL200Y1/POL200Y5/(POLC70H3, POLC71H3)
Exclusion: RLG433H1
Distribution Requirements: Social Science
Breadth Requirements: Thought, Belief and Behaviour (2)

POL426H1 - Democracy and Dictatorship

Hours: 24S

The course provides an in-depth introduction to theories of the origins of democracy and dictatorship. In the first part of the course, we examine and compare theories rooted in economic development, voluntarism, institutional design, and historical institutionalism. The latter half of the course applies these different approaches to debates over the origins of Nazi rule in Germany in the 1930s, military dictatorship in Chile in the 1970s, and non-democratic rule in contemporary Russia.

Prerequisite: 1.0 POL credit; minimum 14 credits
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

POL428H1 - Federalism and Diversity in Canada (and Beyond)

Hours: 24S

Canada as a key case in comparative federalism studies, with a particular focus on the management of diversity and conflict. Federal theory is applied to analyze federal institutions and dynamics in Canada (and other cases). Topics include the distribution of power, the judiciary’s role and group representation.

Prerequisite: POL214H1 and POL316Y1
Exclusion: POL491H1 offered in Winter 2014 (Topic: Canadian Federalism, from a Comparative Perspective) and Winter 2015 (Topic: Federalism and Diversity in Canada and Beyond)
Recommended Preparation: POL224H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

POL430Y1 - Comparative Studies in Jewish and Non-Jewish Political Thought

Hours: 48S

A comparative examination of major texts of the Jewish tradition, ranging from the Torah to modernity, and texts of the classical or Western traditions raising similar questions. Close reading of a small number of capital works, with special attention to the problem of reason and revelation.

Prerequisite: POL200Y1/POL200Y5/(POLC70H3, POLC71H3)
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3); Thought, Belief and Behaviour (2)
POL431Y1 - Politics and Society in Contemporary China

Hours: 48S

Issues and themes in China’s modernization effort with emphasis on 20th century social, political and economic developments.

Prerequisite: 2.0 POL credits; minimum 14 credits
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

POL432H1 - Feminist Theory: Challenges to Legal and Political Thought

Hours: 24S

Feminist theory offers basic challenges to the foundations of modern political and legal thought. It suggests a different conception of human nature and a different model of epistemology and of appropriate forms of argument about the traditional issues of legal and political theory: justice, power, equality and freedom. Introduction to the foundations of feminist theory, an analysis of its implications for traditional liberal theory, and an application of feminist theory to law.

Prerequisite: POL200Y1/POL200Y5/(POLC70H3, POLC71H3)
Distribution Requirements: Social Science
Breadth Requirements: Thought, Belief and Behaviour (2)

POL433H1 - Topics in United States Government and Politics

Hours: 24S

Selected issues and topics in U.S. politics. Varies from year to year.

Prerequisite: 1.0 POL credit
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

POL434H1 - Enlightenment and its Critics

Previous Course Number: POL434Y1
Hours: 24S

This course explores, through the writings of its foremost advocates and adversaries, the Enlightenment, the movement to found political life on the principles of scientific reason, universally applicable and accessible to human beings.

Prerequisite: POL200Y1/POL200Y5/(POLC70H3, POLC71H3)
Exclusion: POL434Y1
Distribution Requirements: Social Science
Breadth Requirements: Thought, Belief and Behaviour (2)

POL435H1 - Business and Politics: Power in a Global World

Hours: 24S

This seminar course examines the political power of business from an international and comparative perspective. Topics include the role of public authority in governing business behavior, the formation of business interests, corporate lobbying, structural and ideational business power, corporate social responsibility, and transnational private governance.

Prerequisite: 2.0 POL credits in International Relations or Comparative Politics. See the Department's website http://politics.utoronto.ca/undergraduate/courses/fallwinter-timetable/ for POL courses by area group
Exclusion: POL438H1 (Topics: Business Politics), taken in Winter 2015 or Winter 2016
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

JRA437H1 - Government, Law and Politics in Russia

Previous Course Number: POL437H1
Hours: 24S

Law in the governance of Russia, in the Soviet and post Soviet periods, including constitutional development, courts, business disputes, crime and criminal justice, corruption, cultural obstacles to legal order, and legal transition in comparative perspective. (Given by the Department of Political Science and the Centre for European, Russian, and Eurasian Studies)

Prerequisite: HIS351Y1/POL354H1/a course in Russia or Soviet politics
Exclusion: POL437H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)
POL438H1 - Topics in Comparative Politics I

Hours: 24S

Selected issues in comparative politics. Varies from year to year.

Prerequisite: 2.0 POL credits in comparative politics. See the Department's website http://politics.utoronto.ca/undergraduate/courses/fallwinter-timetable/ for POL courses by area group.

Distribution Requirements: Social Science

Breadth Requirements: Society and its Institutions (3)

POL438Y1 - Topics in Comparative Politics I

Hours: 48S

Selected issues in comparative politics. Varies from year to year.

Prerequisite: 2.0 POL credits in comparative politics. See the Department's website http://politics.utoronto.ca/undergraduate/courses/fallwinter-timetable/ for POL courses by area group.

Distribution Requirements: Social Science

Breadth Requirements: Society and its Institutions (3)

POL439H1 - The Canadian Welfare State in Comparative Perspective

Hours: 24S

The course examines contemporary Canadian social policy in light of the scholarly literature on the welfare states of advanced industrial societies. Topics include the variety of welfare state regimes in rich nations, and their comparative performance in reducing inequality and poverty, in labour market and economic outcomes, and in addressing the specific circumstances of women. Specific Canadian policy fields examined will include pensions, social assistance, child care and health insurance.

Prerequisite: POL214Y1/POL214Y5/POLB50Y3/POL224Y1

Distribution Requirements: Social Science

Breadth Requirements: Society and its Institutions (3)

POL441H1 - Topics in Asian Politics

Hours: 24S

Selected issues in Asian politics. Content in any given year depends on instructor.

Prerequisite: POL201Y1/(POLB90H3, POLB91H3); minimum 14 credits

Distribution Requirements: Social Science

Breadth Requirements: Society and its Institutions (3)

POL442H1 - Topics in Latin American Politics

Hours: 24S

The seminar focuses on five countries in the Andean region of Latin America: Venezuela, Colombia, Ecuador, Peru and Bolivia. First part deals with the challenges to democracy in the region. Second part explores potential solutions - in particular the drafting of new constitutions by popularly elected constituent assemblies.

Prerequisite: POL201Y1/(POLB90H3, POLB91H3); POL305Y1

Distribution Requirements: Social Science

Breadth Requirements: Society and its Institutions (3)

POL443H1 - Topics in Comparative Politics II

Hours: 24S

Selected issues in comparative politics. Varies from year to year.

Prerequisite: 2.0 POL credits in comparative politics. See the Department's website http://politics.utoronto.ca/undergraduate/courses/fallwinter-timetable/ for POL courses by area group.

Distribution Requirements: Social Science

Breadth Requirements: Society and its Institutions (3)

POL443Y1 - Topics in Comparative Politics II

Hours: 48S

Selected issues in comparative politics. Varies from year to year.

Prerequisite: 2.0 POL credits in comparative politics. See the Department's website http://politics.utoronto.ca/undergraduate/courses/fallwinter-timetable/ for POL courses by area group.

Distribution Requirements: Social Science

Breadth Requirements: Society and its Institutions (3)
POL445H1 - Politics of Growth in Developing Countries

Hours: 24S

The course examines the politics of economic growth in developing countries. It focuses on political factors to analyze why some developing countries have done better in terms of growth than others. Conceptual frameworks of growth and related themes such as regime type, institutions, inequality and ethnicity will be addressed.

Prerequisite: POL201Y1/(POLB90H3, POLB91H3); minimum 14 credits
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

POL446H1 - 20th-Century Political Thought

Hours: 24S

The goal of this course is to introduce students to some of the themes and approaches of critical theory (power, subjectivity, ideology, and hegemony).

Prerequisite: POL200Y1/POL200Y5/(POLC70H3, POLC71H3)
Distribution Requirements: Social Science
Breadth Requirements: Thought, Belief and Behaviour (2)

POL447H1 - Political Economy of Development

Hours: 24S

The course explores the rise, evolution, and performance of the dominant neoliberal approach to development and poverty reduction. It also assesses the feasibility and efficacy of alternative development strategies. Case studies are drawn from Latin America, Asia, and Africa.

Prerequisite: POL201Y1/POL215Y1/POL301Y1/POL305Y1/(POLB90H3, POLB91H3); minimum 14 credits
Recommended Preparation: Introductory economics is helpful
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

POL450H1 - Women and Politics

Hours: 24S

This course uses theories of representation as well as gender and politics analyses of elected women as starting points to evaluate appointed women elites at the international level, notably with reference to linkages between those decision-makers and feminist perspectives on domestic and global politics.

Prerequisite: POL344H1/POL344Y1/JPP343H1/JPP343Y1
Exclusion: POL368H5
Recommended Preparation: At least one course in both political behaviour and women's studies
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

JHP451Y1 - The People from Nowhere

Hours: 48S

This course traces from earliest times to the present the evolution of a people called Carpatho-Rusyns and their historic homeland Carpathian Rus', located in the heart of Europe. The historic survey will deal with political, socioeconomic, and cultural developments, all the while testing the hypothesis that nationalities are imagined communities. (Given by the Departments of History and Political Science)

Recommended Preparation: a course in eastern European history, or in nationalism
Distribution Requirements: Humanities; Social Science
Breadth Requirements: Society and its Institutions (3)

POL451H1 - Contentious Politics and Social Movements

Hours: 24S

Provides an introduction to various perspectives on contentious politics, social movements, and civil society. Students will acquire a solid foundation in the theories of contention as well as examine case studies of civil society in a comparative context.

Prerequisite: POL201Y1/(POLB80H3, POLB91H3)/POL203Y1/POL203Y5/POL207Y1/POL214Y1/POL214Y5/POLB50Y3/POL215Y1/POL224Y1/POL302Y5 and minimum 14 credits
Exclusion: POLD91H3
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)
POL453H1 - Authoritarianism in Comparative Perspective

Hours: 24S

This course examines the politics of authoritarianism in theory and practice. It covers major theories in authoritarian politics, ranging from selectorate theory, authoritarian institutions, impact of institutions on political outcome, ways of measuring authoritarian state power, democracy and development, to social movement and state repression in authoritarian regime, and political transitions. On empirical application, we will draw on cases from around the world, with some emphasis on Asian authoritarian states.

Prerequisite: 2.0 POL FCEs
Exclusion: POL410H1 (Topics in Comparative Politics III: Authoritarianism in Comparative Perspective), offered in Winter 2017, Fall 2017, and Fall 2018
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

JPF455Y1 - Cities

Hours: 48S

Examines disciplinary and developmental boundaries relating to cities. By bringing together a cross-disciplinary faculty who focus on cities within Political Science, History, Philosophy, Literature, Design, Environment and Health, Geography or Social Work, the course explores inter-disciplinary city issues: global change; environment; economic adjustment; state reform and city politics; citizenship; community development; economic development; physical form, territory and political-economy of cities. (Given by the Departments of Literature, Philosophy, Political Science, Urban Studies, Faculty of Social Work and Faculty of Architecture, Landscape and Design)

Prerequisite: Minimum 14 credits/permission of instructor
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

JHP454Y1 - Twentieth Century Ukraine

Hours: 48S

World War I and the Russian Revolution: the Ukrainian independence movement; the Soviet Ukraine and west Ukrainian lands during the interwar period; World War II and the German occupation; the Soviet Ukraine before and after the death of Stalin. Socio-economic, cultural, and political developments. (Given by the Departments of History and Political Science)

Prerequisite: A course in modern European, East European or Russian history or politics such as HIS250Y1/HIS351Y1/HIS353Y1
Distribution Requirements: Humanities; Social Science
Breadth Requirements: Society and its Institutions (3)

POL456Y1 - The G8, G20 and Global Governance

Hours: 48S

The development, operation, and participants of the Group of Eight (G8) and Group of Twenty (G20) of institutions, their growth and performance as centres of global governance, and their relationship with the United Nations (UN) and Bretton Woods galaxy in providing public goods in economic, social, environmental and security realms.

Prerequisite: POL208Y1/POL208Y5/(POLB80H3, POLB81H3)/POL312Y1/POL343Y1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

POL457Y1 - Markets, Justice and the Human Good

Hours: 48S

The course offers a philosophical perspective on the advantages and disadvantages of markets as ways of organizing economic activity. It asks in what ways markets and market-like arrangements can contribute to or create obstacles to the achievement of justice and human well-being.

Prerequisite: POL200Y1/POL200Y5/(POLC70H3, POLC71H3)
Distribution Requirements: Social Science
Breadth Requirements: Thought, Belief and Behaviour (2)
JPR458H1 - Postsecular Political Thought: Religion, Radicalism and the Limits of Liberalism

Hours: 24S

The course will examine debates on postsecularism and religion’s public, political role as articulated by political thinkers such as Jurgen Habermas, by focusing on politically radical or revolutionary challenges to liberalism in the 20th and 21st century, especially from the postcolonial world, whose theoretical arguments are grounded upon or draw their inspiration from religious traditions, doctrines and practices.

Prerequisite: A 3rd year course in Political Science and/or Study of Religion
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

JPR459H1 - Fanaticism: A Political History

Hours: 24S

This seminar in theory will explore the modern history of the concept of ‘fanaticism’ and its role in the development of political modernity. A focus on the concept of the “fanatic” (and its cognates) from the perspective of its various uses in political and religious thought from the Early Modern period through the Enlightenment and up to the present day, provides a fascinating opportunity for a critical review of the secular, rationalist, and scientific assumptions underwriting modern political forms and concepts, especially those of liberal democracy. At the same time, the course will offer critical insight into the ways in which religious and political differences among colonial “others” were, and continue to be, central to the elaboration of Western theoretical discourse on fanaticism and extremism as forms of “political pathology”. (Given by the Departments of Political Science and Religion)

Prerequisite: (2 FCEs in Political Theory and/or Philosophy including 1.0 FCE at the 300 level) or (0.5 FCE in Method and Theory in the Study of Religion and 1 FCE at the 300 level in the Study of Religion)
Distribution Requirements: Social Science; Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

POL460H1 - Studies in Modern Political Theory

Hours: 24S

Studies on a modern political thinker or thinkers since Machiavelli.

Prerequisite: POL200Y1/POL200Y5/(POLC70H3, POLC71H3)
Distribution Requirements: Social Science
Breadth Requirements: Thought, Belief and Behaviour (2)

POL461H1 - Studies in Civic Republicanism

Hours: 24S

The course focuses on texts in the history of political thought drawn from the tradition of civic republicanism. The texts treated vary from year to year.

Prerequisite: POL200Y1/POL200Y5/(POLC70H3, POLC71H3)
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

POL464H1 - Urban Policy and Policymaking

Hours: 24S

This course examines the varied drivers and challenges of urban policy and policymaking processes, focusing primarily on the U.S. and Canada but also extending globally. It includes discussion of the policy challenges confronting cities in the contemporary context, theoretical approaches to understanding their origins and solutions, and an exploration of the available solutions.

Prerequisite: POL203Y1/POL203Y5/POL214Y1/POL214Y5/POL224Y1/POLB50Y3
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

POL466H1 - Topics in International Politics III

Hours: 24S

For advanced students of international relations. Various topics are taken up each year, the content of which depends on the instructor.

Prerequisite: POL208Y1/POL208Y5/(POLB80H3, POLB81H3)
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)
POL467H1 - The Politics of Immigration and Multiculturalism in Canada

Hours: 24S

This course examines Canadian immigration and multiculturalism from theoretical, empirical and applied perspectives. It includes a discussion of normative foundations, an analysis of the components of the policy framework, and an assessment of the impact of immigration and multiculturalism on other aspects of social, cultural and political life.

Prerequisite: POL214Y1/POL214Y5/POLB50Y3/POL224Y1
Exclusion: POL490H1 (Topics in Canadian Politics I: Immigration and Multiculturalism in Canada), offered in Winter 2014
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

POL468H1 - International Relations of Ethnic Conflict

Hours: 24S

This course explores the internationalization of ethnic conflict and the international drivers of civil war. It covers diaspora politics, contagion and demonstration effects, regional security complexes, separatism and irredentism, and international interventions. Students are expected to write an original social science research paper, and participate in discussions, simulations, and teamwork.

Prerequisite: POL208Y1/POL208Y5/(POLB80H3, POLB81H3)
Exclusion: POL466H1 (Topics in International Politics III: International Relations of Ethnic Conflict), offered in Fall 2013, Winter 2015, and Winter 2016; POLD09H3
Recommended Preparation: A 300-level course in International Security is recommended.
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

POL469H1 - Ethics and International Relations

Hours: 24S

The course aims to explore the requirements of justice and fairness in international affairs. It is common to theorize international relations in terms of interests and power. But even the most cursory look at what important actors actually do in their international interactions reveals that they use normative language all the time. This has not gone unnoticed, with investigations of ethics in the international arena multiplying in recent years. Drawing on readings from political philosophy, legal theory, and normative international relations theory, the course will take up practical ethical dilemmas encountered in world affairs. The main focus of the course will be on institutions. Examples will be drawn from the issue areas of trade, health, and the environment, among others.

Prerequisite: POL200Y1/POL200Y5/(POLC70H3, POLC71H3)/POL208Y1/POL208Y5/(POLB80H3, POLB81H3)
Distribution Requirements: Social Science
Breadth Requirements: Thought, Belief and Behaviour (2)

POL472H1 - The Comparative Political Economy of Industrial Societies

Hours: 24S

Topics discussed will include the historical origins of advanced capitalist political economies, the 'Varieties of Capitalism' debate, current trajectories of different political economies, labour politics and regulation, the politics of macro-economic policy, the political economy of growth, and Canada's political economy.

Prerequisite: POL207Y1/POL224Y1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

POL474H1 - Politics and Policy Analysis

Hours: 24S

Major theories of public policy-making and related approaches to policy analysis are examined from the perspective of political science. Key contributions to the theoretical literature pertaining to leading models are read and discussed. Models of public policy-making are successively applied to analysis of cases of Canadian and comparative policy development.

Prerequisite: POL214Y1/POL214Y5/POLB50Y3/POL224Y1/ POL317H1/POL317Y1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)
POL475Y1 - Post-Modern and Contemporary Thought

Previous Course Number: JPD439Y1
Hours: 48S

The development of post-modern thought, particularly in French social philosophy, is examined. Topics such as the nature of exchange, the impact of technology, virtual reality, and the digital class are explored. Authors include Jean Baudrillard, Paul Virilio, Gilles Deleuze, Arthur Kroker, Francois Lyotard.

Exclusion: JPD439Y1
Recommended Preparation: POL200Y1/POL200Y5/(POLC70H3, POLC71H3)
Distribution Requirements: Social Science
Breadth Requirements: Thought, Belief and Behaviour (2)

POL476Y1 - Topics in Public Policy

Hours: 48S

The course is designed for advanced students with serious interests in the public policy field. Specific topics covered will vary from year to year.

Prerequisite: POL214Y1/POL214Y5/POLB50Y3/POL224Y1/POL31Y1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

POL476H1 - Topics in Public Policy

Hours: 24S

The course is designed for advanced students with serious interests in the public policy field. Specific topics covered will vary from year to year.

Prerequisite: POL214Y1/POL214Y5/POLB50Y3/POL224Y1/POL31Y1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

POL477H1 - Advanced Topics in International Political Economy

Hours: 24S

The course is designed for advanced students with serious interests in the subfield of international political economy. Specific topics covered will vary, but all involve the deep interplay between politics and economics in the contemporary world.

Prerequisite: POL208Y1/POL208Y5/(POLB80H3, POLB81H3); ECO100Y/(ECO101H1, ECO102H1)
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

POL478H1 - Topics in Methods

Hours: 24S

Various topics are taken up each year, the content of which depends on the instructor.

Prerequisite: POL232H1/POL242Y1/POL322H1/equivalent
Distribution Requirements: Social Science

POL479H1 - Topics in Middle East Politics

Hours: 24S

The course examines the contemporary politics of the Middle East and North Africa. It seeks to examine the relative importance of political, socio-economic and ideological factors in the context of such issues as the resilience of authoritarianism, the rise of civil society, and the resurgence of Islamic activism. Theoretical discussion is followed by case studies.

Prerequisite: POL201Y1/(POLB90H3, POLB91H3); minimum 14 credits
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)
**POL480H1 - Studies in Comparative Political Theory**

*Hours: 36S*

We will critically examine what “comparative political theory” is and what it would mean to genuinely “deparochialize” political theory, that is, to de-center Euro-American thought in the study of political ideas. The course neither presupposes background knowledge of any non-Western tradition nor does it aspire to provide students with sufficient knowledge of particular traditions to ground serious scholarly contributions to this emerging field. To provide that background would require a series of specialized courses in, e.g., East Asian political thought, Indian political thought, Latin American political thought, Indigenous political thought, African political thought, and so on. Rather, the course aims at sharpening our understanding of (a) the purposes served by “deparochializing” political theory; and (b) the various methods by which we can seek to serve these purposes.

**Prerequisite:** POL200Y1/POL200Y5/(POLC70H3, POLC71H3)  
**Distribution Requirements:** Social Science  
**Breadth Requirements:** Thought, Belief and Behaviour (2)

**POL481H1 - Geopolitics of Cyberspace**

*Hours: 24S*

The Geopolitics of ICTs course is an intensive examination of the ways in which states and non-state actors are contesting the newly evolving terrain of global digital-electronic-telecommunications. Topics covered include Internet censorship and surveillance, information warfare, computer network attacks, hacktivism, and governance of global communications. The course is organized as a series of intensive modules. One feature of the class will be a “hands-on” analysis of censorship circumvention and network interrogation techniques at the Citizen Lab (http://www.citizenlab.org/).

**Prerequisite:** POL208Y1/POL208Y5/(POLB80H3, POLB81H3)  
**Exclusion:** POL481Y1/POL486Y1 (taken in 2008-09)  
**Distribution Requirements:** Social Science  
**Breadth Requirements:** Society and its Institutions (3)

**POL484H1 - Topics in Political Thought I**

*Hours: 24S*

A seminar on a central problem in political thought. It proceeds through the reading of a small number of major texts. Content in any given year depends on instructor.

**Prerequisite:** POL200Y1/POL200Y5/(POLC70H3, POLC71H3)  
**Distribution Requirements:** Social Science  
**Breadth Requirements:** Thought, Belief and Behaviour (2)

**POL484Y1 - Topics in Political Thought I**

*Hours: 48S*

A seminar on a central problem in political thought. It proceeds through the reading of a small number of major texts. Content in any given year depends on instructor.

**Prerequisite:** POL200Y1/POL200Y5/(POLC70H3, POLC71H3)  
**Distribution Requirements:** Social Science  
**Breadth Requirements:** Thought, Belief and Behaviour (2)

**POL485H1 - Topics in Political Thought II**

*Hours: 24S*

A seminar on a central problem in political thought. It proceeds through the reading of a small number of major texts. Content in any given year depends on instructor.

**Prerequisite:** POL200Y1/POL200Y5/(POLC70H3, POLC71H3)  
**Distribution Requirements:** Social Science  
**Breadth Requirements:** Thought, Belief and Behaviour (2)

**POL485Y1 - Topics in Political Thought II**

*Hours: 48S*

A seminar on a central problem in political thought. It proceeds through the reading of a small number of major texts. Content in any given year depends on instructor.

**Prerequisite:** POL200Y1/POL200Y5/(POLC70H3, POLC71H3)  
**Distribution Requirements:** Social Science  
**Breadth Requirements:** Thought, Belief and Behaviour (2)

**POL486H1 - Topics in International Politics I**

*Hours: 24S*

For advanced students of international relations. Various topics are taken up each year, the content of which depends on the instructor.

**Prerequisite:** POL208Y1/POL208Y5/(POLB80H3, POLB81H3)  
**Distribution Requirements:** Social Science  
**Breadth Requirements:** Society and its Institutions (3)
POL486Y1 - Topics in International Politics I

Hours: 48S

For advanced students of international relations. Various topics are taken up each year, the content of which depends on the instructor.

Prerequisite: POL208Y1/POL208Y5/(POLB80H3, POLB81H3)
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

POL487H1 - Topics in International Politics II

Hours: 24S

For advanced students of international relations. Various topics are taken up each year, the content of which depends on the instructor.

Prerequisite: POL208Y1/POL208Y5/(POLB80H3, POLB81H3)
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

POL487Y1 - Topics in International Politics II

Hours: 48S

For advanced students of international relations. Various topics are taken up each year, the content of which depends on the instructor.

Prerequisite: POL208Y1/POL208Y5/(POLB80H3, POLB81H3)
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

POL488H1 - Topics in African Politics I

Hours: 24S

In depth examination of specific themes relating to contemporary African politics. Content in any given year depends on instructor.

Prerequisite: POL201Y1/(POLB90H3, POLB91H3)/POL301Y1; minimum 14 credits
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

POL488Y1 - Topics in African Politics I

Hours: 48S

In depth examination of specific themes relating to contemporary African politics. Content in any given year depends on instructor.

Prerequisite: POL201Y1/(POLB90H3, POLB91H3)/POL301Y1; minimum 14 credits
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

POL489H1 - Topics in African Politics II

Hours: 24S

In depth examination of specific themes relating to contemporary African politics. Content in any given year depends on instructor.

Prerequisite: POL201Y1/(POLB90H3, POLB91H3)/POL301Y1; minimum 14 credits
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

POL489Y1 - Topics in African Politics II

Hours: 48S

In depth examination of specific themes relating to contemporary African politics. Content in any given year depends on instructor.

Prerequisite: POL201Y1/(POLB90H3, POLB91H3)/POL301Y1; minimum 14 credits
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

POL490H1 - Topics in Canadian Politics I

Hours: 24S

Examines in depth enduring and emerging issues in Canadian politics. Content in any given year depends on instructor.

Prerequisite: POL214Y1/POL214Y5/POLB50Y3/POL224Y1; 1.0 other POL credit in Canadian politics. See the Department's website http://politics.utoronto.ca/undergraduate/courses/fallwinter-timetable/ for POL courses by area group.
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)
POL490Y1 - Topics in Canadian Politics I

Hours: 48S

Examines in depth enduring and emerging issues in Canadian politics. Content in any given year depends on instructor.

Prerequisite: POL214Y1/POL214Y5/POLB50Y3/POL224Y1; 1.0 other POL credit in Canadian politics. See the Department's website for POL courses by area group.

Distribution Requirements: Social Science

Breadth Requirements: Society and its Institutions (3)

POL491H1 - Topics in Canadian Politics II

Hours: 24S

Examines in depth enduring and emerging issues in Canadian politics. Content in any given year depends on instructor.

Prerequisite: POL214Y1/POL214Y5/POLB50Y3/POL224Y1; 1.0 other POL credit in Canadian politics. See the Department's website for POL courses by area group.

Distribution Requirements: Social Science

Breadth Requirements: Society and its Institutions (3)

POL491Y1 - Topics in Canadian Politics II

Hours: 48S

Examines in depth enduring and emerging issues in Canadian politics. Content in any given year depends on instructor.

Prerequisite: POL214Y1/POL214Y5/POLB50Y3/POL224Y1; 1.0 other POL credit in Canadian politics. See the Department's website for POL courses by area group.

Distribution Requirements: Social Science

Breadth Requirements: Society and its Institutions (3)

POL492H1 - Topics in Comparative Politics IV

Hours: 24S

Selected issues in comparative politics. Varies from year to year.

Prerequisite: 2.0 POL credits in comparative politics. See the Department's website for POL courses by area group.

Distribution Requirements: Social Science

Breadth Requirements: Society and its Institutions (3)

POL492Y1 - Topics in Comparative Politics IV

Hours: 48S

Selected issues in comparative politics. Varies from year to year.

Prerequisite: 2.0 POL credits in comparative politics. See the Department's website for POL courses by area group.

Distribution Requirements: Social Science

Breadth Requirements: Society and its Institutions (3)

POL493H1 - Topics in Politics I

Hours: 24S

An in-depth examination of a "big issue" in Political Science. Content in any given year depends on instructor.

Prerequisite: 3.0 POL credits; minimum 14 credits

Distribution Requirements: Social Science

Breadth Requirements: Society and its Institutions (3)

POL494H1 - Topics in Politics II

Hours: 36S

An in-depth examination of a "big issue" in Political Science. Content in any given year depends on instructor.

Prerequisite: 3.0 POL credits; minimum 14 credits

Distribution Requirements: Social Science

Breadth Requirements: Society and its Institutions (3)

POL495Y1 - Independent Studies

Open only when a Political Science full-time faculty member is willing and available to supervise. Students must find an appropriate supervisor in the Department of Political Science and obtain the approval of the Director of Undergraduate Studies before enrolling. Obtain details and an application form from the Department Undergraduate Office. Application forms can also be downloaded from the Department's website at www.politics.utoronto.ca. Not eligible for CR/NCR option.

Exclusion: POL496H1/POL497H1

Distribution Requirements: Social Science
**POL496H1 - Independent Studies**

Open only when a Political Science full-time faculty member is willing and available to supervise. Students must find an appropriate supervisor in the Department of Political Science and obtain the approval of the Director of Undergraduate Studies before enrolling. Obtain details and an application form from the Department Undergraduate Office. Application forms can also be downloaded from the Department's website at www.politics.utoronto.ca. Not eligible for CR/NCR option.

**Exclusion:** POL495Y1  
**Distribution Requirements:** Social Science

**POL497H1 - Independent Studies**

Open only when a Political Science full-time faculty member is willing and available to supervise. Students must find an appropriate supervisor in the Department of Political Science and obtain the approval of the Director of Undergraduate Studies before enrolling. Obtain details and an application form from the Department Undergraduate Office. Application forms can also be downloaded from the Department's website at www.politics.utoronto.ca. Not eligible for CR/NCR option.

**Exclusion:** POL495Y1  
**Distribution Requirements:** Social Science

**POL498H1 - Intensive Course**

Content in any given year depends on instructor. Intensive courses are offered by distinguished visitors from around the world. Students in their 4th year are strongly encouraged to take advantage of this unique opportunity to study with one or more outstanding visiting international scholars that the Department brings from time to time. The intensive course usually runs for approximately 3-4 weeks.

**Distribution Requirements:** Social Science

**POL499Y1 - Senior Thesis and Thesis Seminar**

A 40 to 60 page (15,000 to 20,000 word) research paper (75% of the final mark) written under the supervision of a political science faculty member and a companion thesis seminar (25% of final mark). The seminar provides a forum for students to periodically present and discuss their on-going research and to examine issues and approaches related to the structure, organization and presentation of the thesis. Not eligible for CR/NCR option.

**Prerequisite:** 4th year status in Specialist or Joint Specialist programs in Political Science; 3.0 GPA in Political Science courses; supervisor's approval; an approved thesis proposal.  
**Exclusion:** POL495Y1/POL496H1/POL497H1 (taken in the same session)  
**Distribution Requirements:** Social Science

Lecturer (Instituto Camões)
- Luçiana Graça

Introduction

Overview:

Portuguese is the sixth most widely used language in the world. It is spoken by more than two hundred and sixty million people on four continents inhabited by the Lusophone population: Europe, Africa, Asia, and the Americas. Twenty percent of all residents of the Western Hemisphere are Brazilians, a fact attesting to the truth that one out of every five Americans - North, Central, South - speaks Portuguese as his or her native language. The literature of Portugal has a tradition that goes back as far as the twelfth century, and the discoveries of its Renaissance seafarers led the language and the culture to all corners of the globe.

The Department offers an integrated curriculum, combining courses in language, linguistics, literature, and culture. Courses in the studies of the Lusophone world provide a diverse, flexible and detailed examination of the Portuguese language and its cultures. The skills and knowledge developed in these courses lay the groundwork for careers in teaching, journalism, translation, publishing, and foreign services, as well as for research in a variety of fields. In the Canadian job market, command of the Portuguese language is a definite advantage. Toronto has one of the largest Portuguese speaking diasporas, and Canada has been establishing strong cultural, political and business ties with Brazil.

Why should I learn Portuguese?

- Portuguese gives you access to a rich and fascinating culture.
- Portuguese is the world’s sixth most widely spoken language.
- Portuguese is a mother tongue in the 5 continents, parallel only to English and Spanish.
- Portuguese is the most widely spoken language in the Southern Hemisphere.
- Portuguese unites Portuguese-speaking diasporas all over the world in countries such as Canada, the United States, South-Africa, France or Switzerland.

- Portuguese has one of the highest growth rates as a second language in the Internet, in social networks and in learning as a foreign language.
- Portuguese is a Romance language, so if you already know another Romance language (Spanish, Italian, etc.), you will find it easier to learn it.
- Portuguese is now the first foreign language in the educational system of many countries.
- Portuguese is the official language of some of the fastest growing economies in the world, namely Brazil and Angola.

What can I do with a degree in Portuguese?

- Education
- Marketing, Editing, Copywriting
- Journalism, Media
- Library and Information Sciences
- Public Relations
- Research
- Foreign Services/Foreign Affairs Specialist
- International development
- Political Aid
- National and international law

How is the program structured?

For many students, our program begins with the language sequence.

Language sequence:

1. The Department reserves the right to place students in the language course best suited to their linguistic preparation. Please contact the Associate Chair, Undergraduate Studies if you would like to take a Placement test to help you determine your level of linguistic competence in Portuguese.

2. Students who, in the department's assessment, have an adequate knowledge of Portuguese may be required to take Portuguese literature, culture or linguistic course instead of a language course at any level.

The progression of courses in the language sequence is designed to accommodate a wide range of previous language experience. Students are placed in the appropriate language course based on their proficiency as determined by departmental assessment.

Students who have had little to no previous experience in studying Portuguese may enroll in an intensive course, PRT100Y1.

Students who have a strong background in Spanish language (native fluency or minimum SPA320Y1), should enroll in PRT120Y1.

Students who have had previous experience in studying Portuguese may enroll in several intermediate and advanced courses, depending on their background and their level of preparation. Speakers with an intermediate level of Portuguese, including those who successfully completed PRT100Y1 should enroll in PRT220Y1.

Those students who have had exposure to spoken Portuguese in an informal context (i.e., those who live in a Portuguese-speaking environment; for instance, those who have grown up in a Portuguese-speaking country, or who live in Portuguese speaking families), but who have had little to no exposure to written
Portuguese, should enrol in PRT219Y1. Students who qualify for this course are able to understand and speak Portuguese. They speak Portuguese relatively fluently, but they usually do not write or read Portuguese.

Students who have completed PRT120Y1 or PRT220Y1 should proceed to PRT320Y1. Those students who come to the program with an advanced level of Portuguese as assessed by the department should also proceed to take PRT320Y1 or PRT420H1.

Following PRT320Y1, students are qualified to enroll in PRT420H1. This course is appropriate for students with a relatively high vocabulary base and good command of grammar and academic writing who need to increase their lexicon, and who need further formal instruction in grammar and writing.

PRT423H1, a course for advanced speakers of Portuguese, trains students to develop their skills in a range of professional language fields, such as finances, law, medicine, and education.

Students who are unsure of what is the most appropriate placement for them in the language sequence should contact the Associate Chair, Undergraduate Studies to receive personal assessment and recommendation for proper placement.

Fluent speakers of Portuguese who have received a high school or a higher level of education in the Portuguese language, and who in the department's assessment does not need further training in language, may enroll immediately in any linguistics, literature or culture course.

Literature, culture and linguistics courses:

Portuguese opens the door to a rich range of cultural expressions in literature, film, and art, from the world-changing contribution of Renaissance Portugal to the contemporary Brazilian and Lusophone diaspora. Whether it is Nobel-prize winning Portuguese literature or the excitement of the Brazilian cinema novo, Lusophone writers, filmmakers, and artists continue to shape and change contemporary global culture.

Portuguese also opens the door to the study of the Romance language family. The Department offers students the opportunity to advance their language skills through the systematic reflection on the language structure. Through a variety of courses with a theoretical and experimental focus in linguistics, students acquire basic skills that can be transferred to teaching or research programs. Through collaboration with other language and linguistics programs, students are provided with opportunities and training to conduct research in linguistics with a focus on the Portuguese language.

The Department encourages students to consider completing part of their course work at a university in Portugal or Brazil.

Students should contact the Undergraduate Coordinator early on in the course of their university career to receive advice on how to proceed with their studies and to thus assure that they can receive their degree by the time of planned graduation. For further information, please contact us in the Department of Spanish and Portuguese, Victoria College, Room 208.

### Portuguese Programs

#### Portuguese Specialist (Arts Program) - ASSPE0338

**Enrolment Requirements:**

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

**Completion Requirements:**

Consult the Associate Chair, Undergraduate Studies, Department of Spanish and Portuguese.

(10.0 credits, including at least 1.0 400-level credit)

**First Year:**

PRT100Y1/ PRT120Y1/ PRT219Y1/ PRT220Y1

**Second Year:**

1. PRT220Y1/ PRT320Y1
2. PRT258H1

**Third and Fourth Years:**

1. PRT320Y1
2. PRT420H1 / PRT423H1
3. Plus additional PRT courses to make 10.0 credits. Up to 2.0 credits may be taken from cognate departmental or college offerings: EUR, GGR, HIS, LAS, POL, SPA. A complete list of eligible courses is available at the departmental website.

#### Portuguese Major (Arts Program) - ASMAJ0338

**Enrolment Requirements:**

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

**Completion Requirements:**

Consult the Associate Chair, Undergraduate Studies, Department of Spanish and Portuguese.

(7.0 credits)

**First Year:**

PRT100Y1/ PRT120Y1/ PRT219Y1/ PRT220Y1

**Second Year:**

1. PRT220Y1/ PRT320Y1
2. PRT258H1

**Third and Fourth Years:**

1. PRT320Y1
2. PRT420H1 is recommended for students who start in PRT100Y1, and is required for students who start in PRT220Y1 or higher language course.
3. Plus additional PRT courses to make 7.0 credits. Up to 1.0 credit may be taken from cognate departmental or college offerings: EUR, GGR, HIS, LAS, POL, SPA. A complete list of eligible courses is available at the departmental website.

**Portuguese Minor (Arts Program) - ASMIN0338**

**Enrolment Requirements:**

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

**Completion Requirements:**

Consult the Associate Chair, Undergraduate Studies, Department of Spanish and Portuguese.

4.0 credits, including 1.0 credit at the 300+ level.

First Year:
PRT100Y1/ PRT220Y1; PRT219Y1 (for native / bilingual speakers of Spanish)

Second Year:
PRT220Y1 / PRT320Y1;

Third Year:
PRT320Y1

Additional PRT courses to a total of 4.0 credits. Up to 1.0 cognate credit may be taken in Spanish.

**Faculty of Arts & Science Language Citation**

The Department of Spanish and Portuguese participates in the Faculty of Arts and Science’s Language Citation initiative for Portuguese. For a full description of the Language Citation requirements, see the Calendar in the “Degree Requirements” section.

To complete the language citation in Portuguese students will normally complete the two language-sequence courses that follow the introductory level:

PRT220Y1 or PRT320Y1

Native and bilingual speakers should complete PRT219Y1 and two additional half-courses in Portuguese in the 300- or 400-series.

Students should note that, as explained in this Calendar, the Language Citation is not equivalent to an academic program and that enrolment in a program is not necessary in order to earn the recognition bestowed by the Citation.

To request the citation, e-mail your request with your student ID number to the Associate Chair, Undergraduate Studies.

**Regarding Portuguese Courses**

**Note**

- Portuguese: see also European Studies; Latin American Studies

**Notes**

- The Department reserves the right to place students in the language course best suited to their linguistic preparation.
- Students who, in the department’s assessment, have an adequate knowledge of Portuguese may be required to take a Portuguese linguistics, literature or culture course instead of a language course at any level.

**Portuguese Courses**

**PRT100Y1 - Portuguese for Beginners**

**Hours:** 48L/48T

An intensive basic course in spoken and written Portuguese for students who have no knowledge of this language or advanced Spanish. It aims to give students a basic knowledge of reading, listening, spoken and written skills in a dynamic and communicative way. Presentation of cultural aspects of the Portuguese-speaking world.

**Prerequisite:** No previous knowledge of Portuguese or advanced Spanish.

**Exclusion:** PRT110Y1, PRT120Y1, PRT219Y1, PRT220Y1, PRT320Y1, PRT420H1, PRT420Y1

**Distribution Requirements:** Humanities

**Breadth Requirements:** Creative and Cultural Representations (1)

**PRT120Y1 - Portuguese for Spanish Speakers**

**Hours:** 48L/24T

Introduction to the Portuguese language for speakers of Spanish. Development of listening, speaking, reading, and writing skills with an emphasis on communication, and an overview of basic grammatical structures and building of vocabulary. Presentation of cultural aspects of the Portuguese-speaking world.

**Prerequisite:** Native or advanced knowledge of Spanish (min. SPA320Y1 for non-native speakers of Spanish); no previous knowledge of Portuguese.

**Exclusion:** PRT100Y1, PRT110Y1, PRT220Y1, PRT320Y1, PRT420Y1, PRT420H1, PRT219Y1

**Distribution Requirements:** Humanities

**Breadth Requirements:** Creative and Cultural Representations (1)
PRT219Y1 - Academic Portuguese

Hours: 48L/24T

Meets the needs of students who have had exposure to spoken Portuguese in an informal context (living in a Portuguese speaking country, or in a Portuguese speaking family) but little to no exposure to written Portuguese. Besides reviewing English/Portuguese spelling differences, written and spoken registers of Portuguese, and basic aspects of the grammatical system, the course (1) provides students with the essential understanding of Portuguese grammatical system; (2) builds their vocabulary; and (3) trains them to express themselves formally in both spoken and written Portuguese.

Prerequisite: Basic to relatively high ability to speak and understand Portuguese; limited or no formal education in Portuguese.
Exclusion: PRT100Y1, PRT110Y1, PRT120Y1, PRT220Y1, PRT320Y1
Breadth Requirements: Creative and Cultural Representations (1)

PRT220Y1 - Intermediate Portuguese

Hours: 48L/24T

This course will bring together Portuguese grammar and language skills into a useful and practical framework, in order to develop students' skills to communicate in an accurate, effective, and informed manner within a variety of socio-cultural situations. Besides introducing new grammar topics corresponding to the intermediate level, it also includes a grammar review with extra work on vocabulary acquisition. Focuses on comprehension, development of a greater complexity in students' written and oral productions, and gaining a better understanding of Portuguese-speaking cultures.

Prerequisite: PRT100Y1
Exclusion: PRT219Y1/PRT110Y1/PRT120Y1/PRT220Y1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

PRT221H1 - Portuguese Pronunciation

Hours: 24L

Overview of Portuguese speech sounds (articulation and transcription). The course provides perception and pronunciation training of Portuguese vowels, consonants, stress, intonation, and co-articulation phenomena in connected speech. The main focus will be on European Portuguese and Brazilian Portuguese, but differences between these two and other Portuguese accents will be discussed as well.

Prerequisite: PRT100Y1
Corequisite: PRT120Y1/PRT220Y1
Exclusion: PRT219Y1, native speakers of Portuguese
Breadth Requirements: Thought, Belief and Behaviour (2)

PRT250H1 - Introduction to Lusophone Culture

Hours: 24L

A survey of historical and cultural trends in the Portuguese-speaking world, from colonial past to the present. (Offered in alternate years; taught in English)

Exclusion: PRT252
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

PRT258H1 - Introduction to Lusophone Literature

Previous Course Number: PRT258Y1
Hours: 24L

Introduction to literary studies in Portuguese and information literacy. Representative selection of Lusophone prose, poetry, and drama, with a focus on critical terminology and methods of literary analysis. Required for a program degree.

Prerequisite: First semester PRT220Y1
Exclusion: PRT258Y1
Recommended Preparation: PRT219Y1/PRT220Y1/PRT120Y1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

PRT299Y1 - Research Opportunity Program

Credit course for supervised participation in faculty research project. Details at https://www.artsci.utoronto.ca/current/academics/research-opportunities/research-opportunities-program. Not eligible for CR/NCR option.

Distribution Requirements: Humanities

PRT320Y1 - Advanced Portuguese

Hours: 48L/24T

Intensive practice in written and oral Portuguese for the advanced student. Selective review of grammar with emphasis on complex language structures.

Prerequisite: PRT120Y1, PRT220Y1 or placement test
Exclusion: PRT219Y1, PRT420H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)
PRT322H1 - Introduction to Portuguese Linguistics

Hours: 24L

An overview of theoretical and methodological aspects of Portuguese linguistics: phonology, morphology, syntax, and semantics. Analysis of structural similarities and differences between the two worldwide main Portuguese varieties - Brazilian and European Portuguese.

Prerequisite: PRT219Y1 or PRT220Y1 or PRT120Y1 or Permission of the Department
Corequisite: PRT320Y1
Recommended Preparation: PRT320Y1
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

PRT342H1 - History of Portuguese Language

Hours: 24L

This interdisciplinary course provides an overview of the evolution of Portuguese language from 15th century to the present. It discusses linguistic change by analyzing texts from a variety of genres in different historical periods and geographical contexts.

Prerequisite: PRT219Y1 or PRT220Y1 or PRT120Y1 or Permission of the Department
Corequisite: PRT320Y1
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

PRT350H1 - Portuguese Language and Society

Hours: 24L

Explores how factors such as ethnicity, gender, social class and age affect the use of Portuguese language and determine its characteristics. The course overviews mostly the aspects of Brazilian and European Portuguese. (Offered in alternate years.)

Prerequisite: PRT219Y1 or PRT220Y1 or PRT120Y1 or Permission of the Department
Corequisite: PRT320Y1
Recommended Preparation: PRT320Y1
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

PRT356H1 - Topics in Portuguese Linguistics

Hours: 24S

A course on a specific topic in Portuguese linguistics, designed for advanced students. Course content and instructor are established on a yearly basis.

Prerequisite: PRT219Y1 or PRT220Y1 or PRT120Y1 or Permission of the Department
Corequisite: PRT320Y1
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

PRT358H1 - Topics in Portuguese Studies

Hours: 24L

In years when this course is offered, topics are described in detail on the departmental webpage. Students can enrol in this course multiple times, as long as the topic of the course is different. For any questions, please check with the department.

Prerequisite: PRT219Y1 or PRT220Y1 or PRT120Y1; PRT258H1; or Permission of the Department
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

PRT364H1 - Portuguese Language in the World

Hours: 24L

An overview of the varieties of Portuguese spoken in four continents (Europe, South America, Africa, Asia) and a discussion of the structural similarities and differences between the two most extensively studied varieties: European and Brazilian Portuguese. Analysis of linguistic variation in contemporary Portuguese in terms of phonetics, syntax and lexicon. (Offered in alternate years.)

Prerequisite: PRT219Y1 or PRT120Y1 or PRT220Y1 or Permission of the Department
Recommended Preparation: PRT320Y1
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)
PRT368H1 - Brazilian Indigenous Languages

Hours: 24L

Overview of linguistic diversity of Brazil, current practices in the maintenance and revitalization of languages and strategies for empowering indigenous peoples. Linguistic properties of Brazilian languages; introduction to language description by working on small data sets; discussion of the influence of Brazilian indigenous languages on Brazilian Portuguese. Taught in English. (Offered in alternate years.)

Prerequisite: Any 200-level course

Distribution Requirements: Humanities

Breadth Requirements: Thought, Belief and Behaviour (2)

PRT368H1 - Advanced Academic Portuguese

Hours: 24L

A study of advanced aspects of formal Portuguese through reading and extensive writing practice, with an aim at developing skills necessary for academic and professional writing and oral presentations.

Prerequisite: PRT320Y1 or PRT219Y1 or Placement test

Exclusion: PRT420Y1

Distribution Requirements: Humanities

Breadth Requirements: Creative and Cultural Representations (1)

PRT398H0 - Research Excursions

Distribution Requirements: Humanities

PRT398Y0 - Research Excursions

Distribution Requirements: Humanities

PRT399Y1 - Research Opportunity Program

Credit course for supervised participation in faculty research project. Details at https://www.artsci.utoronto.ca/current/academics/research-opportunities/research-opportunities-program. Not eligible for CR/NCR option.

PRT420H1 - Community Engaged Learning of Portuguese in Toronto and the GTA

Hours: 24L/12P

This course combines advanced language instruction with the richness and complexity of the Lusophone work experience in Toronto, promoting Community Engaged Learning (CEL) as a vehicle for greater linguistic fluency and cultural understanding. Students are placed with community organizations within the Greater Toronto Area and volunteer for 2 hours per week, furthering their language skills and their cultural knowledge. Class work focuses on developing students' communication skills through exposure to a range of topics, from financial, legal, medical to educational, and to an extensive variety of styles and registers in Portuguese. Therefore, students meet real needs in the community by applying knowledge from their Portuguese courses.

Prerequisite: PRT320Y1

Recommended Preparation: PRT420H1

Distribution Requirements: Humanities

Breadth Requirements: Society and its Institutions (3)

PRT423H1 - Lusophone Cinema

Hours: 24L

Explores the films of Portuguese-speaking countries and iconic Angolan, Brazilian, Cape Verdean, Mozambican and Portuguese directors in the context of political and cultural national movements. (Offered in alternate years.)

Prerequisite: PRT258H1

Recommended Preparation: PRT320Y1, PRT420H1

Distribution Requirements: Humanities

Breadth Requirements: Creative and Cultural Representations (1)
PRT458H1 - The Lusophone Short Story

Hours: 24S

Overview of the short story in the particular context of Portuguese-speaking countries. Examination of theories of the genre as they relate to short stories of Portuguese-speaking writers. (Offered in alternate years)

Prerequisite: PRT258H1
Recommended Preparation: PRT320Y1, PRT420H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

PRT470H1 - Acquisition of Portuguese as a Second Language

Hours: 24S

Invites critical reflection about the acquisition of Portuguese as a second language. Analyzes phonological, morphosyntactic, semantic and lexical aspects in the linguistic performance of bilingual speakers, and of learners of Portuguese as a second language. (Offered in alternate years)

Prerequisite: PRT219Y1/PRT220Y1
Corequisite: PRT320Y1
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

PRT490H1 - Independent Study

Individual study with a member of staff on a topic of common interest including readings, discussion and written assignments. Not eligible for CR/NCR option.

Prerequisite: PRT320Y1 and written approval of the Undergraduate Coordinator
Distribution Requirements: Humanities
Psychology

H. Gordon, PhD
W. Huggon, PhD
N. Stuckless, PhD
P. Whissell, PhD

Introduction

Psychology is the branch of science that focuses on the behaviour of human beings and animals. Our courses span the various areas of psychology and introduce students to the methods used in psychological research. The basic tools of a research psychologist include experimentation in the laboratory and field, naturalistic observation, and the use of statistical methods in interpreting data.

Our faculty have highly diversified interests which are reflected in the number and variety of our undergraduate course offerings. These include courses in cognitive neuroscience, cognitive psychology, computational neuroscience, developmental psychology, human and animal learning, perception, personality psychology, physiological psychology, and social psychology.

For more information, please consult our website (https://www.psych.utoronto.ca/), or the Undergraduate Administrator in Sidney Smith Hall, Room 4014, by phone at (416) 978-3407 or via email (undergrad@psych.utoronto.ca).

Regarding Psychology Programs

Psychology programs at the St. George Campus are limited enrolment, which means there are a limited number of spaces to offer students. Please note that just meeting the minimum admission requirements does not guarantee one a spot in any of our programs and, in most cases, students will need to exceed them to be competitive because of the volume of applications in comparison to the number of program spaces available.

Entry into all Psychology programs requires Grade 12 Calculus and Grade 12 Biology (we will also accept these two courses taken at the college and university-level). Please note that these two requirements will not be waived.
Psychology Programs

Psychology Research Specialist - Thesis (Science Program) - ASSPE1958

Description:

This program is designed for students who have demonstrated a particular interest and aptitude for research and who want to complete a thesis. Admission to the program is based on strong academic performance and expressed interest in research.

Enrolment Requirements:

This is a limited enrolment program. Students interested in the Psychology Research Specialist - Thesis typically apply and enrol after the end of second year, from the Psychology Major or Psychology Specialist (Non-thesis).

Variable Minimum Grade Average

A minimum grade average in required courses is needed for entry, and this minimum changes each year depending on the number of applicants. Up to 15 students are admitted each year.

The following courses and requirements must be completed:

For students who have completed 8.0 credits or more:

1. Gr. 12 Calculus
2. Gr. 12 Biology
3. PSY100H1 (80%) (or one of ECO220Y1/ EEB225H1/ GGR270H1/ POL222H1/ SOC202H1/ STA220H1/ STA248H1/ STA288H1), and PSY202H1 (or one of ECO220Y1/ STA221H1/ SOC252H1/ SOC300H1), with a 75% minimum grade average.
4. 2.0 PSY 200-level credits (not including statistics), with a 78% minimum grade average

Special Requirement

In addition to applying via ACORN, students must also send in a supplementary application directly to the department via the Research Specialist Online Application.

To ensure that students admitted to the program will be successful, applicants with a grade average lower than those listed in required courses must be considered for admission. Please note that obtaining this minimum grade average does not guarantee admission to the program.

Notes:

Interested students should ideally apply for a PSY Major or Specialist (Non-thesis) at the end of their first year. Prior research experience is helpful, but not necessary for admission to the program.

All students accepted into or considering the Research Specialist program should enrol into a 300-level PSY lab course in Year 3. Prior research experience is helpful, but not necessary for admission to the program. Enrolment is limited to 15 students per year.

Completion Requirements:

(10 credits):

1. First Year: PSY100H1
2. Statistics: PSY201H1 (or one of ECO220Y1/ EEB225H1/ GGR270H1/ POL222H1/ SOC202H1/ STA220H1/ STA248H1/ STA288H1), and PSY202H1 (or one of ECO220Y1/ STA221H1/ SOC252H1/ SOC300H1)
3. 1.0 credit (from Cluster A) PSY210H1, PSY220H1, PSY230H1, PSY240H1
4. 1.0 credit (from Cluster B) PSY260H1, PSY270H1, PSY280H1, PSY290H1 (NOTE: HMB200H1 or PSL300H1 cannot be used in place of PSY290H1)
5. 0.5 credit in PSY at the 300/400-level from Group 1 in Cluster A
6. 0.5 credit in PSY at the 300/400-level from Group 1 in Cluster B
7. 1.0 credit in PSY at the 300/400-level from Group 1 (any Cluster)
8. One lab course (0.5 credit), and no more, taken from PSY319H1, PSY329H1, PSY339H1, PSY349H1, PSY359H1, PSY369H1, PSY379H1, or PSY389H1
9. PSY309H1
10. PSY409H1
11. PSY400Y1
12. 2.0 credits from Groups 1 and/or 2, at any level

(Please note that these are all individual requirements and cannot overlap or be used twice).

Psychology Specialist (Science Program) - ASSPE1160

Description:

You should consider pursuing the Specialist Program in Psychology if you want a greater concentration in Psychology than provided by the Major Program. Please note that having a Specialist is not required in order to be admitted to a graduate program in Psychology later on.

Enrolment Requirements:

This is a limited enrolment program. Note there are different options depending on whether a student has completed between 4.0 and 7.5 credits, or 8.0 or more credits.

Variable Minimum Grade or Minimum Grade Average

A minimum final grade or grade average in required courses is needed for entry, and these minimums change each year depending on available spaces and the number of applicants. The following courses must be completed:

For students who have completed 4.0 to 7.5 credits:

1. PSY100H1 (80%) (AP and IB Psychology are not accepted)
2. Gr. 12 Calculus
3. Gr. 12 Biology

To ensure that students admitted to the program will be successful, applicants with a final grade lower than 80% in required courses will not be considered for admission. Please note that obtaining this minimum final grade does not guarantee admission to the program.

For students who have completed 8.0 or more credits:

1. PSY100H1 (AP and IB Psychology are not accepted)
2. Gr. 12 Calculus
3. Gr. 12 Biology
Psychology

Enrolment Requirements:

- **PSY201H1** (or **ECO220Y1**/ **EEB225H1**/ **GGR270H1**/ **POL222H1**/ **SOC202H1**/ **STA220H1**/ **STA248H1**/ **STA288H1**), and **PSY202H1** (or **ECO220Y1**/ **STA211H1**/ **SOC252H1**/ **SOC300H1**). 1.0 credits in PSY from the **PSY210H1** to **PSY290H1** series of courses, and a grade average of 75% across all four courses. If more than 1.0 200-level PSY credits have been completed, the two with the highest grades will be used.

To ensure that students admitted to the program will be successful, applicants with a minimum grade average lower than 75% in required courses will not be considered for admission. Please note that obtaining this minimum grade average does not guarantee admission to the program.

**Note:**
In past admission cycles, the average grade cut-off for the Specialist program ranged from approximately 80-83%.

Completion Requirements:

(10.0 credits):

1. First Year: **PSY100H1**
2. Statistics: **PSY201H1** (or one of **ECO220Y1**/ **EEB225H1**/ **GGR270H1**/ **POL222H1**/ **STA220H1**/ **STA248H1**/ **STA288H1** and **PSY202H1** (or one of **ECO220Y1**/ **STA211H1**/ **SOC252H1**/ **SOC300H1**)
3. 1.0 credit (from Cluster A) **PSY210H1**, **PSY220H1**, **PSY230H1**, **PSY240H1**
4. 1.0 credit (from Cluster B) **PSY260H1**, **PSY270H1**, **PSY280H1**, **PSY290H1** (NOTE: **HMB200H1** or **PSL300H1** cannot be used in place of **PSY290H1**)
5. 0.5 credit in PSY at the 300/400-level from Group 1 in Cluster A
6. 0.5 credit in PSY at the 300/400-level from Group 1 in Cluster B
7. 1.5 credits in PSY at the 300/400-level from Group 1 (any Cluster)
8. One lab course (0.5 credit), and no more, taken from **PSY319H1**, **PSY329H1**, **PSY339H1**, **PSY349H1**, **PSY359H1**, **PSY369H1**, **PSY379H1**, or **PSY389H1**
9. Two seminar courses (1.0 credit), and no more, taken from **JLP471H1**, **PSY410H1**, **PSY420H1**, **PSY430H1**, **PSY440H1**, **PSY460H1**, **PSY470H1**, **PSY471H1**, **PSY480H1**, **PSY490H1**, **PSY497H1**
10. 2.5 credits from Groups 1 and/or 2, at any level

(Please note that these are all individual requirements and cannot overlap or be used twice).

Psychology Major (Science Program) - **ASMAJ1160**

**Description:**

You should consider pursuing the Major Program in Psychology if you want to concentrate in Psychology together with another discipline.

Enrolment Requirements:

This is a limited enrolment program. Note there are different options depending on whether a student has completed between 4.0 and 7.5 credits, or 8.0 or more credits.
Environment & Behaviour Minor (Science Program) - ASMIN1551

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

Special Requirement

- Students must be enrolled in the Psychology Minor, Major or Specialist, to be considered for enrolment.

Completion Requirements:

(4.0 credits; must include at least 1.0 credit at the 300+-level.)

For more information, please email the School of the Environment’s Undergraduate Student Advisor, David Powell, at ug.office.env@utoronto.ca.

Higher Years:
1. ENV221H1, ENV222H1, PSY220H1, PSY335H1/ PSY435H1
2. 1.0 credit from ENV333H1, ENV335H1; ENV361H1; ENV381H1
   (if ENV381H1 taken in 2015-16 or 2016-17); JGE321H1; JGE331H1
3. 1.0 credit from PSY320H1, PSY321H1, PSY327H1/ PSY427H1, PSY336H1

Psychology Minor (Science Program) - ASMIN1160

Description:

You should consider pursuing the Minor Program in Psychology if you are interested in Psychology as a part of your general education or as a compliment to your training in another profession (i.e., nursing, rehabilitation medicine, physical health and education, social work, etc.).

Enrolment Requirements:

This is a limited enrolment program. Note there are different options depending on whether a student has completed between 4.0 and 7.5 credits, or 8.0 or more credits.

Variable Minimum Grade or Minimum Grade Average

A minimum final grade or grade average in required courses is needed for entry, and these minimums change each year depending on available spaces and the number of applicants. The following courses must be completed:

For students who have completed 4.0 to 7.5 credits:

- PSY100H1 (73%) (AP and IB Psychology are not accepted)
- Gr. 12 Calculus
- Gr. 12 Biology

To ensure that students admitted to the program will be successful, applicants with a final grade lower than 73% in required courses will not be considered for admission. Please note that obtaining this minimum final grade does not guarantee admission to the program.

For students who have completed 8.0 credits or more:

- PSY100H1 (AP and IB Psychology are not accepted)
- Gr. 12 Calculus
- Gr. 12 Biology
- PSY201H1 or (ECO220Y1/ EEB225H1/ GGR270H1/ POL222H1/ SOC202H1/ STA220H1/ STA248H1/ STA288H1), 1.0 200-level PSY credits from the PSY210H1 - PSY290H1 series, and a grade average of 70% across all three courses. If more than 1.0 200-level PSY credits have been completed, the two with the highest grades will be used.

To ensure that students admitted to the program will be successful, applicants with a grade average lower than 70% in required courses will not be considered for admission. Please note that obtaining the minimum grade average does not guarantee admission to the program.

Note:

In past admission cycles, the average grade cut-off for the Minor program ranged from approximately 74-76%.

Completion Requirements:

(4.0 credits):

1. First Year: PSY100H1
2. Statistics: PSY201H1 or one of ECO220Y1/ EEB225H1/ GGR270H1/ POL222H1/ SOC202H1/ STA220H1/ STA248H1/ STA288H1
3. 1.0 credit from PSY210H1/ PSY220H1/ PSY230H1/ PSY240H1/ PSY260H1/ PSY270H1/ PSY280H1/ PSY290H1 (NOTE: HMB200H1 or PSL300H1 cannot be used in place of PSY290H1)
4. 1.0 credit in PSY at the 300/400-level from Group 1 (any Cluster)
5. 1.0 credit from Groups 1 and/or 2, at any level

(Please note that these are all individual requirements and cannot overlap or be used twice).

Psychology of Economics and Management Certificate - ASCER1160

Description:

The Certificate in Psychology of Economics and Management explores the interdisciplinary connections between social psychology, economics, and business, covering the role of motivation, culture and leadership in organizations. This Certificate is not open to students pursuing a Psychology Specialist, Major, or Minor.

Enrolment Requirements:

This is a limited enrolment Certificate. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

Completed courses (with minimum grades)

The following courses with the stated minimum grades are required:
• PSY100H1 (70%)
• RSM100H1 (63%)/ MGT100H1 (63%)/ ECO101H1 (63%)

Special Requirement
This Certificate is open to students not enrolled in a Psychology Specialist, Major, or Minor.

Completion Requirements:

(3.0 credits)
In first year or higher (1.0 credit):
- PSY100H1 (grade of 70%)
- RSM100H1/ MGT100H1/ ECO101H1 (grade of 63%)

In second year and higher (2.0 credits):
- PSY220H1
- PSY322H1 or RSM260H1
- 1.0 credit from: PSY326H1, PSY321H1, PSY336H1, PSY322H1

Group 1 Courses:

Some PSY courses are included in both of Clusters A and B and may count in either cluster, but not both, for program requirements. For Individual Projects or Special Topics courses being used to complete the cluster requirement, please confirm group cluster with the Undergraduate Administrator (PSY405H1/405Y1/406H1/406Y1 and PSY307H1/308H1/407H1/408H1). No more than 1 FCE of PSY405H1/405Y1/406H1/406Y1 can be used towards any PSY program. PSY202H1, PSY203H1, PSY299Y1, PSY305H1, and PSY399Y1 can also be used towards program requirements as part of the final requirement for each program (except for PSY202H1 with the Specialist programs, as they are already required).

Group 2 Courses:

Please note that the non-PSY courses in Group 2 are optional and that enrolment priority is not given to PSY program students.

Course Groups

Group 1 (Cluster A)

- JLP315H1 Language Acquisition
- PSY195H1 The Science of Babies
- PSY197H1 The Individual and Society
- PSY210H1 Introduction to Development
- PSY220H1 Introduction to Social Psychology
- PSY230H1 Personality and Its Transformations
- PSY240H1 Introduction to Abnormal Psychology
- PSY306Y0 Special Topics in Psychology Abroad
- PSY307H1 Special Topics in Psychology
- PSY308H1 Special Topics in Psychology
- PSY311H1 Social Development
- PSY312H1 Cognitive Development
- PSY313H1 Psychology of Aging
- PSY316H1 Perceptual Development
- PSY319H1 Developmental Laboratory
- PSY320H1 Social Psychology: Attitudes
- PSY321H1 Cross-Cultural Psychology
- PSY322H1 Intergroup Relations
- PSY323H1 Sex Roles and Behaviour
- PSY324H1 Moral Thought and Behaviour
- PSY326H1 Social Cognition
- PSY328H1 Psychology and the Law
- PSY339H1 Social Psychology Laboratory
- PSY330H1 Psychological Measurement
- PSY331H1 Social Psychology of Emotion
- PSY332H1 Organizational Behaviour
- PSY333H1 Health Psychology
- PSY336H1 Positive Psychology
- PSY337H1 Advanced Personality Psychology
- PSY339H1 Individual Differences Laboratory
- PSY341H1 Psychopathologies of Childhood
- PSY342H1 Cognition and Psychopathology
- PSY343H1 Theories of Psychopathology and Psychotherapy
- PSY349H1 Laboratory in Social Psychological Field Methods
- PSY402H1 Psychology Seminar
- PSY403H1 Psychology Seminar
- PSY404H1 Psychology Seminar
- PSY405H1 Individual Projects
- PSY405Y1 Individual Projects
- PSY406H1 Individual Projects
- PSY406Y1 Individual Projects
- PSY407H1 Special Topics in Psychology
- PSY408H1 Special Topics in Psychology
- PSY410H1 Developmental Psychology Seminar
- PSY414H1 Moral Development
- PSY417H1 Aging and Social Cognition
- PSY420H1 Social Psychology Seminar
- PSY421H1 Person Perception
- PSY424H1 Social Psychology of Interpersonal Relationships
- PSY425H1 Self-Consciousness
- PSY426H1 Motivational Theories in Social Psychology
- PSY427H1 Media Psychology
- PSY428H1 Critical Psychology
- PSY430H1 Personality Seminar
- PSY434H1 Maps of Meaning: The Architecture of Belief
- PSY435H1 Environmental Psychology
- PSY440H1 Abnormal Psychology Seminar
- PSY450H1 History of Psychology

Group 1 (Cluster B)

- JLP374H1 Psychology of Language
- JLP471H1 Advanced Psycholinguistics
- PSY196H1 Critical Periods, Brain Plasticity and Development
- PSY198H1 The Psychology of Magic
- PSY199H1 Psychology and History of Drug Use
- PSY260H1 Learning and Plasticity
- PSY270H1 Introduction to Cognitive Psychology
- PSY280H1 Sensation and Perception
- PSY290H1 Physiological Psychology

Combined Degree Program (CDP) in Science and Education: Psychology (Major), Honours Bachelor of Science/Master of Teaching

The Combined Degree Program in Arts/Science and Education is designed for students interested in studying the intersections of teaching subjects and Education, coupled with professional teacher preparation. Students earn an Honours Bachelor’s degree from the Faculty of Arts and Science (St. George) and an accredited professional Master of Teaching (MT) degree from the Ontario Institute for Studies in Education (OISE). They will be recommended to the Ontario College of Teachers for an Ontario Teacher’s Certificate of Qualifications as elementary or secondary school teachers. The CDP permits the completion of both degrees in six years with 1.0 FCE that may be counted towards both the undergraduate and graduate degrees.

Program requirements:
1. Minor in Education and Society, Victoria College
2. Major in Psychology (first teaching subject)
3. Minor in an area corresponding to the second teaching subject as determined by OISE (see http://pepper.oise.utoronto.ca/~jhewitt/mtresources/intermediat e_senior_teaching_subject_prerequisites_2016-17.pdf)

See here for additional information on the CDP, including admission, path to completion and contact information.

Regarding Psychology Courses

We encourage students at all levels, and particularly those who are beginning a program in Psychology, to consult the undergraduate section of the Psychology website (http://www.psych.utoronto.ca/undergraduate) before selecting courses and to discuss their proposed programs with the Undergraduate Administrator.

Courses in the various areas within Psychology and the numbering system associated with these courses follow a specific pattern: PSYXXX. The first digit represents the year, and the second digit represents the area in which the course belongs. Social Psychology, for example, is identified by “2.” Therefore, PSY220 at the second year, PSY320, 321, 322, etc. at the third year, and PSY420, 421, 424, etc. at the fourth year represent the Social Psychology courses. Other areas within Psychology follow a similar pattern, with their own identifying number in the middle.

Please note that the Department of Psychology will not waive course prerequisites under any circumstances and that Psychology courses do not have co-requisites. Students will need to have prerequisites completed BEFORE taking a course.

200-Series Courses

Students registered in a St. George campus PSY program will be given priority to enrol in all PSY courses above the 100-level. Please see the online Arts and Science Registration Instructions and Timetable for more details on enrolment controls.

300-Series Courses

Almost all 300/400-level lecture courses require PSY201H1 (Statistics I), or its equivalent, as one of their prerequisites. This will not be waived. Students must complete the statistics requirement before taking any 300- or 400-level PSY lecture courses. Similarly, 300-level lab and 400-level seminar courses require PSY202H1 (Statistics II) or its equivalent.

400-Series Courses

The 400-series courses comprise of lecture courses, seminars, individual projects, and the thesis course for Research Specialists.

Psychology Courses

PSY100H1 - Introductory Psychology

Hours: 36L

A brief introductory survey of psychology as both a biological and social science. Topics will include physiological, learning, perceptual, motivational, cognitive, developmental, personality, abnormal, and social psychology.

Prerequisite: None
Exclusion: PSY100Y5/PSYA01Y3/(PSYA01H3 + PSYA02H3)
Distribution Requirements: Science
Breadth Requirements: Thought, Belief and Behaviour (2)
PSY195H1 - The Science of Babies

Hours: 24S

Up until roughly four decades ago, infants were seen as cute, clueless creatures. Yet, research from a range of fields has led to a radical consideration of this claim; infants may be cute but they are not clueless! In this class, we will consider and discuss the science of babies. In particular, we will take a second look at long-held beliefs about the nature of infants and their knowledge. We will learn that studying infants’ perception, cognition and behaviour can offer us critical insights into long-standing philosophical questions. This course provides an interdisciplinary introduction to infancy, that includes content from psychology, philosophy, neuroscience, as well as biology and anthropology. Upon completion of this class, students will (1) have overview knowledge of aspects of infancy as it relates to perception, cognition and behavior; (2) be able to use exploratory writing to develop arguments and develop their understanding of subject matter; and (3) begin to be able to read and summarize a scientific research paper in Developmental Psychology. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Science
Breadth Requirements: Thought, Belief and Behaviour (2)

PSY196H1 - Critical Periods, Brain Plasticity and Development

Hours: 24S

This course will ask how changes in the developing brain can influence our understanding of how humans learn. To answer this question, we will learn about how the brain changes and about how learning changes. We will dig into brain plasticity and ask how this influences “critical” or “sensitive” periods for learning: a phenomenon whereby learning can only take place during a particular time in an organism’s life. We will explore learning in a number of different ways including learning in sensory and motor systems and the development of multiple aspects of learning and memory. In all cases, we will ask how changes in the developing brain impact learning outcomes. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

PSY197H1 - The Individual and Society

Hours: 24S

How does one develop a sense of individuality? Can individual will and freedom be reconciled with the interests of society? Are we determined by society or culture or do we, in some important sense, determine our own behaviour and futures? In this course, we will use classic and contemporary readings from psychology, sociology, anthropology, philosophy, and law to explore general characterizations of the individual and society. Basic questions will be examined in light of these characterizations such as: Is there a universal human nature? Who is a “person”? and What is the ideal society? We will examine these questions in light of various social issues, such as debates about multiculturalism and democracy, whether children have rights to freedom of speech, and women’s equality in society. Throughout the course, the emphasis will be on the different views of the person underlying and informing contrasting perspectives on important social questions. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Science
Breadth Requirements: Thought, Belief and Behaviour (2)

PSY198H1 - The Psychology of Magic

Hours: 24S

Magicians entertain us with their tricks. What appears as “Magic” is based on fundamental aspects of human psychology: visual and auditory perception, decision making, logic, memory, and verbal abilities. In this class, we will consider and discuss the psychological basis of magic tricks and use magic to explore aspects of psychology. The class will require reading of scientific articles and book chapters as well as watching and analyzing magical tricks. The only prerequisite is a curious and critical mind. The course puts great emphasis on writing and on starting to read primary scientific literature. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Science
Breadth Requirements: Thought, Belief and Behaviour (2)

PSY199H1 - Psychology and History of Drug Use

Hours: 24S

This seminar will examine the historical and contemporary use of drugs. Students will be introduced to the general psychological and neuroscientific mechanisms by which drugs affect human behavior, and explore highlights of current research on drug effects in animals and humans. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Science
Breadth Requirements: Thought, Belief and Behaviour (2)
PSY201H1 - Statistics I

Hours: 36L

Fundamentals of descriptive and inferential statistics, including population and sampling distributions, simple association, probability, estimation, and hypothesis testing.

Prerequisite: PSY100H1
Exclusion: ECO220Y1/EEB225H1/GGR270H1/POL222H1/SOC202H1/STA220H1/STA248H1/STA288H1
Recommended Preparation: Grade 12 Calculus
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

PSY202H1 - Statistics II

Hours: 36L

Fundamentals of statistical analysis of experimental and observational data including linear models, the analysis of variance, a priori contrasts, post-hoc tests, power analysis and effect size calculations.

Prerequisite: PSY201H1/EEB225H1/GGR270H1/POL222H1/SOC202H1/STA220H1/STA248H1/STA288H1
Exclusion: ECO220Y1/ECO227Y1/STA221H1/SOC250H1
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

PSY203H1 - Psychological Research

Hours: 36P

This course provides an introduction to conceiving, designing, and conducting research in psychology. It prepares students to be both consumers and producers of scientific research, and also addresses basic issues related to the work of psychological scientists such as theory development, research ethics, and scientific writing. Students in this course will gain insight into the scientific process as a whole – its advantages, difficulties, and limitations. As such, students will be able to better evaluate the knowledge that psychological science can provide, and integrate that knowledge into a broader worldview.

Prerequisite: PSY100H1
Corequisite: PSY201H1/ECO220Y1/EEB225H1/GGR270H1/POL222H1/SOC202H1/STA220H1/STA248H1/STA288H1
Distribution Requirements: Science
Breadth Requirements: Thought, Belief and Behaviour (2)

PSY210H1 - Introduction to Development

Hours: 36L

The developmental approach to the study of behaviour with reference to sensorimotor skills, cognition, socialization, personality, and emotional behaviour.

Prerequisite: PSY100H1/COG250Y1
Exclusion: PSY210H5/PSYB20H3/PSYB21H3
Distribution Requirements: Science
Breadth Requirements: Thought, Belief and Behaviour (2)

PSY220H1 - Introduction to Social Psychology

Hours: 36L

Contemporary areas of research in social psychology: social perception, attitudes, inter-personal relations, and group processes.

Prerequisite: PSY100H1/COG250Y1
Exclusion: PSY220H5/PSYB10H3/SOC213H1
Distribution Requirements: Science
Breadth Requirements: Thought, Belief and Behaviour (2)

PSY230H1 - Personality and Its Transformations

Hours: 36L

Theory and research in personality structure and dynamics: the interaction of cultural and biological factors in the development and expression of individual differences.

Prerequisite: PSY100H1/COG250Y1
Exclusion: PSY230H5/PSYB30H3
Distribution Requirements: Science
Breadth Requirements: Thought, Belief and Behaviour (2)

PSY240H1 - Introduction to Abnormal Psychology

Hours: 36L

A critical survey of concepts, theories, and the state of research in the area of psychopathology and therapeutic methods.

Prerequisite: PSY100H1/COG250Y1
Exclusion: PSY240H5/PSYB32H3
Distribution Requirements: Science
Breadth Requirements: Thought, Belief and Behaviour (2)
PSY260H1 - Learning and Plasticity

Hours: 36L

Concepts, theories, and applications of classical and contemporary learning theories, including classical and operant conditioning. Current theories of the physiological and anatomical basis of learning and memory, including synaptic plasticity, the role of the hippocampus, amygdala, frontal cortex and other brain regions. Theories will be related to a practical understanding and applications such as drug addiction, phobias and other disorders.

Prerequisite: PSY100H1/COG250Y1, OR registered in the Cognitive Science program
Exclusion: PSYB38H3
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

PSY270H1 - Introduction to Cognitive Psychology

Hours: 36L

An introduction to research and theory on the neural and cognitive architecture of attention, memory, language, thinking and reasoning.

Prerequisite: PSY100H1/COG250Y1, OR registered in the Cognitive Science program
Exclusion: PSY270H5/PSYB57H3
Distribution Requirements: Science
Breadth Requirements: Thought, Belief and Behaviour (2)

PSY280H1 - Sensation and Perception

Hours: 36L

An introduction to the physiological and psychological basis of perception across the different sensory modalities in humans and lower animals, with an emphasis on vision. Exploring visual perception such as shape and objects, scenes, colour, space, and motion as well as auditory perception of simple and complex sounds, and location. Further topics may include touch, including perception of temperature, pain and body posture, the chemical senses, and cross-modal influences of the senses on one another. In-class demonstrations may supplement the lectures.

Prerequisite: PSY100H1/COG250Y1, OR registered in the Cognitive Science program
Exclusion: PSY280H5/PSYB51H3
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

PSY290H1 - Physiological Psychology

Hours: 36L

Provides students with a solid background into the biological basis of behaviour. Animal and human research topics include functional neuroanatomy, neural signalling, sensory and motor control, motivational systems, and hormones, and emotions.

Prerequisite: PSY100H1/COG250Y1, OR registered in the Cognitive Science program
Exclusion: HMB200H1/HMB220H1/PSL300H1/PSY290H5/PSYB64H3
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

PSY299Y1 - Research Opportunity Program

Credit course for supervised participation in faculty research project. Details at https://www.artsci.utoronto.ca/current/academics/research-opportunities/research-opportunities-program. Not eligible for CR/NCR option.

Distribution Requirements: Science

PSY305H1 - The Treatment of Psychological Data

Hours: 36L

This course provides a practical yet intensive introduction to the research pipeline, with a focus on research data management and advanced statistical analysis and inference. Students learn how to find, organize, and analyze data sets in a transparent and reproducible way. Students also learn more about statistical inference, focusing on how the design and analysis of data shape the interpretation of results.

Prerequisite: PSY202H1/ECO220Y1/ECO227Y1/STA221H1/SOC252H1/SOC300H1
Exclusion: EEB313H1
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)
PSY306Y0 - Special Topics in Psychology Abroad

Hours: 48L

Special Topics in Psychology for the Summer Abroad Program. Course topics, content, and instructor may vary from one year to another. More information about Psychology course offerings can be obtained from the Professional & International Programs office at Woodsworth College.

Prerequisite: Registration in any psychology and/or social science Major or Specialist, and the completion of at least 8 FCEs.

Distribution Requirements: Science

PSY307H1 - Special Topics in Psychology

Hours: 36L

A lecture course providing in-depth examination of specific topics/themes relating to Psychology. Content in any given year depends on instructor. Priority is given to PSY Major program students during the first enrolment period.

Prerequisite: PSY100H1, PSY201H1/ECO220Y1/EEB225H1/GGR270H1/POL222H1/SOC202 H1/STA220H1/STA248H1/STA288H1, and one further 200-level PSY half-course

Distribution Requirements: Science

Breadth Requirements: Thought, Belief and Behaviour (2)

PSY308H1 - Special Topics in Psychology

Hours: 36L

A lecture course providing in-depth examination of specific topics/themes relating to Psychology. Content in any given year depends on instructor. Priority is given to PSY Major program students during the first enrolment period.

Prerequisite: PSY100H1, PSY201H1/ECO220Y1/EEB225H1/GGR270H1/POL222H1/SOC202 H1/STA220H1/STA248H1/STA288H1, and one further 200-level PSY half-course

Distribution Requirements: Science

Breadth Requirements: Thought, Belief and Behaviour (2)

PSY309H1 - Research Specialization: Practicum

Hours: 36P

Research Specialists learn about the research opportunities within our department, and develop skills in the areas of critical thinking, writing, and oral presentation. Students also conduct a pre-thesis research project under the supervision of a faculty member. Students should complete a PSY lab course (PSY3*9H1) prior to taking this course; however, taking the lab course concurrently will be considered in consultation with the instructor. Enrolment is restricted to PSY Research Specialists.

Prerequisite:

Distribution Requirements: Science

PSY309H5

PSY311H1 - Social Development

Hours: 36L

Theory and research in social attachment, aggression, morality, imitation and identification, altruism, and parental discipline, with discussion of methodological issues.

Prerequisite:

Exclusion: PSY311H5/PSYC21H3

Distribution Requirements: Science

Breadth Requirements: Thought, Belief and Behaviour (2)

PSY312H1 - Cognitive Development

Hours: 36L

Examines the developmental of knowledge in fundamental domains such as spatial perception, navigation, object perception, number, language, and theory of mind. Emphasis is on current experimental findings and how they address centuries-old debates surrounding the origin and nature of human knowledge.

Prerequisite:

Exclusion: PSY312H5

Distribution Requirements: Science

Breadth Requirements: Thought, Belief and Behaviour (2)
PSY313H1 - Psychology of Aging

Hours: 36L

Age changes in sensory and perceptual processes, motor skill, learning, memory, and personality. Theory, methodological problems, social, cultural, and environmental influences that shape behaviour and attitudes towards and among the elderly.

Prerequisite:
PSY201H1/ECO220Y1/EEB225H1/GGR270H1/POL222H1/SOC202H1/STA220H1/STA248H1/STA288H1, PSY210H1
Exclusion: PSY213H5/PSY313H5/PSYC21H3
Distribution Requirements: Science
Breadth Requirements: Thought, Belief and Behaviour (2)

PSY319H1 - Developmental Laboratory

Hours: 36P

Provides an overview of developmental psychology methods. The class conducts an original research project, including design, data collection, data analysis, and a written report. Course capacity is limited to 15 students and priority is given to PSY Specialists and Research Specialists during the first enrolment period.

Prerequisite:
PSY202H1/ECO220Y1/ECO227Y1/STA221H1/SOC252H1/SOC300H1, PSY210H1
Exclusion: PSY319H5/PSYC26H3
Recommended Preparation: PSY203H1
Distribution Requirements: Science
Breadth Requirements: Thought, Belief and Behaviour (2)

JLP315H1 - Language Acquisition

Hours: 36L

Infants' abilities at birth, prelinguistic development, the first words, phonological, syntactic and semantic development. Social variables influencing language acquisition, bilingualism, models of development, language play. (Sponsored by the Departments of Linguistics and Psychology, but administered solely by the Dept. of Linguistics).

Prerequisite: One full course equivalent at the 200+-level in LIN/JAL/JUP/PSL/PSY/COG
Exclusion: PSY315H5, PLIC24H3
Distribution Requirements: Science
Breadth Requirements: Thought, Belief and Behaviour (2)

PSY320H1 - Social Psychology: Attitudes

Hours: 36L

Intensive study of social attitude development, description, measurement, modification, and organization.

Prerequisite:
PSY201H1/ECO220Y1/EEB225H1/GGR270H1/POL222H1/SOC202H1/STA220H1/STA248H1/STA288H1, PSY220H1
Exclusion: PSY320H5
Distribution Requirements: Science
Breadth Requirements: Thought, Belief and Behaviour (2)

PSY316H1 - Perceptual Development

Hours: 36L

The course examines human perceptual development during the first 2-3 years of life. Vision and audition are emphasized. Some topics are: pattern and colour vision, depth perception, infant speech perception.

Prerequisite:
PSY201H1/ECO220Y1/EEB225H1/GGR270H1/POL222H1/SOC202H1/STA220H1/STA248H1/STA288H1, PSY280H1
Exclusion: PSY316H5
Recommended Preparation: PSY210H1
Distribution Requirements: Science
Breadth Requirements: Thought, Belief and Behaviour (2)

PSY321H1 - Cross-Cultural Psychology

Hours: 36L

One of the hallmarks of human behaviour is its diversity. Some of the ways in which we differ are thought to be relatively idiosyncratic (e.g., specific aspects of personality), whereas others are fairly systematic. Cultural psychology is one area of research in human behaviour that examines systematic differences resulting from individuals' cultural backgrounds. This course will introduce you to the consideration of cultural variation in the study of human thought and behaviour.

Prerequisite:
PSY201H1/ECO220Y1/EEB225H1/GGR270H1/POL222H1/SOC202H1/STA220H1/STA248H1/STA288H1, PSY220H1
Exclusion: PSY321H5/PSYC14H3
Distribution Requirements: Science
Breadth Requirements: Thought, Belief and Behaviour (2)
**PSY322H1 - Intergroup Relations**

*Hours: 36L*

An in-depth examination of theories and research in intergroup relations; focuses on stereotyping, prejudice, discrimination, and stigma.

**Prerequisite:**
PSY201H1/ECO220Y1/EEB225H1/GGR270H1/POL222H1/SOC202H1/STA220H1/STA248H1/STA288H1, PSY220H1

**Exclusion:** PSYC12H3

**Distribution Requirements:** Science

**Breadth Requirements:** Thought, Belief and Behaviour (2)

**PSY326H1 - Social Cognition**

*Hours: 36L*

An examination of theory and research on how we make sense of ourselves and our social world. Topics covered include goals, mood, memory, hypothesis testing, counterfactual thinking, stereotypes, and culture.

**Prerequisite:**
PSY201H1/ECO220Y1/EEB225H1/GGR270H1/POL222H1/SOC202H1/STA220H1/STA248H1/STA288H1, PSY220H1

**Exclusion:** PSY326H5/PSYC39H3

**Distribution Requirements:** Science

**Breadth Requirements:** Thought, Belief and Behaviour (2)

**PSY323H1 - Sex Roles and Behaviour**

*Hours: 36L*

The effect of sex-role expectations on how men and women behave and perceive the world: theories of sex-role development, physiological and cultural determinants of sex differences, power relationships between men and women.

**Prerequisite:**
PSY201H1/ECO220Y1/EEB225H1/GGR270H1/POL222H1/SOC202H1/STA220H1/STA248H1/STA288H1, PSY210H1/PSY220H1/PSY230H1/PSY240H1

**Exclusion:** PSY317H5/PSYD18H3

**Distribution Requirements:** Science

**Breadth Requirements:** Thought, Belief and Behaviour (2)

**PSY328H1 - Psychology and the Law**

*Hours: 36L*

This course deals with psychological issues in the law, with particular reference to criminal law. It focuses mainly on research that has been done on pretrial publicity, eyewitness testimony, rules of evidence, and other factors that might affect jury decisions.

**Prerequisite:**
PSY201H1/ECO220Y1/EEB225H1/GGR270H1/POL222H1/SOC202H1/STA220H1/STA248H1/STA288H1, PSY220H1

**Exclusion:** PSY328H5/PSYC39H3

**Distribution Requirements:** Science

**Breadth Requirements:** Thought, Belief and Behaviour (2)

**PSY324H1 - Moral Thought and Behaviour**

*Hours: 36L*

Moral values vary considerably across individuals, groups, countries, and cultures. What explains the emergence of these differential moral systems? What psychological processes are involved in moral decisions and actions? How might insights from psychological research shed light on contemporary, 'hot-button' moral issues? How are moral decisions similar to – and different from – other types of everyday decisions? What is the role of emotion in moral decision making? As an introduction to the field of moral psychology, this 300-level course will cover research from a range of sub-disciplines within psychology including social-personality psychology, cognitive neuroscience, and developmental psychology. In addition, students will gain exposure to related material in other fields including philosophy, ethology, and economics. Students will gain a firm understanding of the key debates and issues in the study of the moral mind and will gain skills in critical thinking and writing.

**Prerequisite:**
PSY201H1/ECO220Y1/EEB225H1/GGR270H1/POL222H1/SOC202H1/STA220H1/STA248H1/STA288H1 and PSY220H1; or permission of the instructor

**Exclusion:** PSY214H3

**Distribution Requirements:** Science

**Breadth Requirements:** Thought, Belief and Behaviour (2)

**PSY329H1 - Social Psychology Laboratory**

*Hours: 36P*

Illustrates major methodologies within social psychology, such as attitude measurement, observation of small groups, and experiments. Course capacity is limited to 15 students and priority is given to PSY Specialists and Research Specialists during the first enrolment period.

**Prerequisite:**
PSY202H1/ECO220Y1/ECO227Y1/STA221H1/SOC252H1/SOC300H1, PSY220H1

**Recommended Preparation:** PSY203H1

**Distribution Requirements:** Science

**Breadth Requirements:** Thought, Belief and Behaviour (2)
PSY330H1 - Psychological Measurement

Hours: 36L

This course focuses on the development and evaluation of psychological measures, including the measurement of knowledge, abilities, attitudes, and personality traits. We will discuss theoretical and methodological issues in psychological measurement, covering important concepts such as reliability and validity and how these affect the interpretation of test scores and research findings. There will be some discussion of the application of psychological measures to various settings and the ethics of psychological assessment.

Prerequisite:
PSY201H1/ECO220Y1/EEB225H1/GGR270H1/POL222H1/SOC202H1/STA220H1/STA248H1/STA288H1

Exclusion: PSYC37H3

Recommended Preparation:
PSY202H1/ECO227Y1/STA221H1/SOC252H1/SOC300H1

Distribution Requirements: Science

PSY331H1 - Social Psychology of Emotion

Hours: 36L

An in-depth review of the role of emotion in human psychology, with an emphasis on the links between emotion and cognition. Topics include theories of emotion, emotion regulation, emotional expression, and emotional experience, the role of emotion in decision-making, and the relationships between emotion, motivation and behaviour.

Prerequisite:
PSY201H1/ECO220Y1/EEB225H1/GGR270H1/POL222H1/SOC202H1/STA220H1/STA248H1/STA288H1, PSY220H1

Exclusion: PSYC18H3

Distribution Requirements: Science

Breadth Requirements: Thought, Belief and Behaviour (2)

PSY332H1 - Organizational Behaviour

Hours: 36L

An analysis of the individual, group, and institutional structures and processes that influence behaviour within organizations. Topics include motivation, leadership, communication, management theory, group processes and team work, supervision, and organizational culture.

Prerequisite:
PSY201H1/ECO220Y1/EEB225H1/GGR270H1/POL222H1/SOC202H1/STA220H1/STA248H1/STA288H1, PSY220H1/PSY230H1

Exclusion: RSM260H1/IRE260H1

Distribution Requirements: Science

Breadth Requirements: Society and its Institutions (3)

PSY333H1 - Health Psychology

Hours: 36L

Examines research evidence concerning the impact of psychological factors on physical health and illness.

Prerequisite:
PSY201H1/ECO220Y1/EEB225H1/GGR270H1/POL222H1/SOC202H1/STA220H1/STA248H1/STA288H1, PSY230H1/PSY240H1

Distribution Requirements: Science

Breadth Requirements: Thought, Belief and Behaviour (2)

PSY336H1 - Positive Psychology

Hours: 36L

A review of the field of positive psychology, which is the study of happiness and fulfillment. Topics include personal growth, meaning, hedonic and eudaimonic approaches to well-being, gratitude, awe, flow states, mindfulness and meditation.

Prerequisite: PSY201H1 (or exclusion), PSY220H1/PSY230H1/PSY240H1

Exclusion: PSYC324H5

Distribution Requirements: Science

Breadth Requirements: Thought, Belief and Behaviour (2)

PSY337H1 - Advanced Personality Psychology

Hours: 36L

This course covers major topics in personality psychology including prominent theories and current research in the area. Theoretical frameworks are integrated with specific applications in primary sources. Specific topics may include personality structure, personality development, psychodynamic approaches, genetic methodology, and emotion regulation.

Prerequisite:
PSY201H1/ECO220Y1/EEB225H1/GGR270H1/POL222H1/SOC202H1/STA220H1/STA248H1/STA288H1, PSY230H1/PSY240H1

Exclusion: PSYC35H3

Distribution Requirements: Science

Breadth Requirements: Thought, Belief and Behaviour (2)
PSY339H1 - Individual Differences Laboratory

Hours: 36P

Introduction to methods involved in individual differences or personality research. Group and individual projects focus on assessment of individual difference characteristics and on experimentation including such characteristics. Course capacity is limited to 15 students and priority is given to PSY Specialists and Research Specialists during the first enrolment period.

Prerequisite: PSY202H1/ECO220Y1/ECO227Y1/STA221H1/SOC252H1/SOC300H1, PSY220H1/PSY230H1
Exclusion: PSY329H5
Recommended Preparation: PSY203H1
Distribution Requirements: Science
Breadth Requirements: Thought, Belief and Behaviour (2)

PSY341H1 - Psychopathologies of Childhood

Hours: 36L

This course focuses on cognitive and neuropsychological aspects of neurodevelopmental and psychiatric disorders in children from clinical and theoretical perspectives.

Prerequisite: PSY201H1/ECO220Y1/EEB225H1/GGR270H1/POL222H1/SOC202H1/STA220H1/STA248H1/STA288H1, PSY210H1/PSY230H1/PSY240H1
Exclusion: PSY341H5
Distribution Requirements: Science
Breadth Requirements: Thought, Belief and Behaviour (2)

PSY342H1 - Cognition and Psychopathology

Hours: 36L

Work in psychological disorders has increasingly used the theories and methodologies of cognitive psychology to guide research. This course will examine accounts of clinical disorders informed by cognitive experimental psychology, with emphasis on recent work in affective disorders.

Prerequisite: PSY201H1/ECO220Y1/EEB225H1/GGR270H1/POL222H1/SOC202H1/STA220H1/STA248H1/STA288H1, PSY230H1/PSY240H1/PSY270H1
Exclusion: PSY340H5
Distribution Requirements: Science
Breadth Requirements: Thought, Belief and Behaviour (2)

PSY343H1 - Theories of Psychopathology and Psychotherapy

Hours: 36L

Examines various theories of how personality functioning may become impaired and corresponding psychotherapeutic interventions. Emphasis on empirical assessment of personality dysfunction and therapy effectiveness.

Prerequisite: PSY201H1/ECO220Y1/GGR270H1/POL222H1/SOC202H1/STA220H1/STA248H1/STA288H1, PSY230H1/PSY240H1
Exclusion: PSY343H5/PSYC36H3
Distribution Requirements: Science
Breadth Requirements: Thought, Belief and Behaviour (2)

PSY349H1 - Laboratory in Social Psychological Field Methods

Hours: 36P

This laboratory class introduces students to field methods in social psychology used to study social processes as they unfold in daily life and public spaces. Students will get hands on experience to collecting, managing, storing, and communicating data collected through observational and longitudinal methods, including data collection in public spaces around Toronto and online. Course capacity is limited to 15 students and priority is given to PSY Specialists and Research Specialists during the first enrolment period.

Prerequisite: PSY202H1/ECO220Y1/ECO227Y1/STA221H1/SOC252H1/SOC300H1; PSY220H1
Recommended Preparation: PSY203H1
Distribution Requirements: Science
Breadth Requirements: Thought, Belief and Behaviour (2)

PSY359H1 - Human Neuroimaging Laboratory

Hours: 36P

Introduction to brain imaging methods used in cognitive, developmental, and social neuroscience. Course projects will cover experimental design, imaging techniques, and data analysis. Course capacity is limited to 15 students and priority is given to PSY Specialists and Research Specialists during the first enrolment period.

Prerequisite: PSY202H1/ECO220Y1/ECO227Y1/STA221H1/SOC252H1/SOC300H1, PSY270H1/PSY280H1, PSY210H1/PSY220H1/PSY230H1/PSY240H1
Exclusion: HMB310H1
Recommended Preparation: PSY203H1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)
PSY362H1 - Animal Cognition

Hours: 36L

The study of memory, representation, concept learning, and other cognitive processes in non-human animals.

Prerequisite:
PSY201H1/ECO220Y1/EEB225H1/GGR270H1/POL222H1/SOC202H1/STA220H1/STA248H1/STA288H1, PSY260H1
Exclusion: PSY362H5
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

PSY369H1 - Psychobiology Laboratory

Previous Course Number: PSY399H1
Hours: 36P

This lab is an introduction to experimental methods in behavioural neuroscience, including neuroanatomical and psychopharmacological methods in rodents. Course projects will cover experimental design, laboratory techniques, data analysis, and scientific writing. Course capacity is limited to 12-15 students and priority is given to PSY Specialists and Research Specialists during the first enrolment period.

Prerequisite:
PSY202H1/ECO220Y1/ECO227Y1/STA221H1/SOC252H1/SOC300H1, PSY290H1/HMB200H1
Exclusion: HMB310H1/PSY369H5/PSYC06H3
Recommended Preparation: PSY203H1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

PSY370H1 - Thinking and Reasoning

Hours: 36L

Problem-solving as a model of directed thinking; conceptual behaviour and mental representation; induction, deduction and learning; probabilistic reasoning; creative thinking and complex problem solving.

Prerequisite: PSY270H1/COG250Y1
Distribution Requirements: Science
Breadth Requirements: Thought, Belief and Behaviour (2)

PSY371H1 - Higher Cognitive Processes

Hours: 36L

This course covers selected topics pertaining to higher cognitive processes including expertise, consciousness, creativity, and human and artificial intelligence.

Prerequisite: PSY270H1/PSY370H1/COG250Y1
Exclusion: PSY371H5
Distribution Requirements: Science
Breadth Requirements: Thought, Belief and Behaviour (2)

PSY372H1 - Human Memory

Hours: 36L

Current theories and data on human memory: processes involved in encoding, storage, and retrieval.

Prerequisite:
PSY201H1/ECO220Y1/EEB225H1/GGR270H1/POL222H1/SOC202H1/STA220H1/STA248H1/STA288H1, PSY260H1/PSY270H1/COG250Y1
Exclusion: PSY372H5
Distribution Requirements: Science
Breadth Requirements: Thought, Belief and Behaviour (2)

JLP374H1 - Psychology of Language

Hours: 36L

In Psychology of Language, we investigate human and other animal communication, structure of human language, word meaning and semantic memory, psychological studies of syntax, bilingualism, language and thought, language errors and disorders. (Sponsored by the Departments of Linguistics and Psychology, but administered solely by the Dept. of Linguistics).

Prerequisite: One FCE from LIN228H1, LIN229H1, LIN232H1, LIN241H1, PSY260H1, PSY270H1, PSY280H1, PSY290H1, COG250Y1
Exclusion: LIN258H5, PSY374H5, PLIC55H3
Distribution Requirements: Science
Breadth Requirements: Thought, Belief and Behaviour (2)

**PSY378H1 - Engineering Psychology**

**Hours:** 36L

The application of our knowledge of human information processing capabilities to improve human-machine systems design in a number of engineering environments including aviation, computer software, human-computer interaction, and nuclear power plants.

**Prerequisite:**  
PSY201H1/ECO220Y1/EEB225H1/GGR270H1/POL222H1/SOC202H1/STA220H1/STA248H1/STA288H1, PSY270H1/PSY280H1/COG250Y1

**Recommended Preparation:**  
PSY202H1/ECO227Y1/STA221H1/SOC252H1/SOC300H1

**Distribution Requirements:** Science  
**Breadth Requirements:** Thought, Belief and Behaviour (2)

**PSY379H1 - Human Memory and Learning Laboratory**

**Hours:** 36P

Examination of issues and methods in human memory research. Students conduct supervised research projects, and read, critique, and write research articles. Course capacity is limited to 15 students and priority is given to PSY Specialists and Research Specialists during the first enrolment period.

**Prerequisite:**  
PSY202H1/ECO220Y1/ECO227Y1/STA221H1/SOC252H1/SOC300H1

**Exclusion:** PSY379H5/PSYC58H3  
**Recommended Preparation:** PSY203H1

**Distribution Requirements:** Science  
**Breadth Requirements:** Thought, Belief and Behaviour (2)

**PSY380H1 - Vision Science**

**Hours:** 36L

Integrates psychology, neuroscience, and computer science approaches to the study of vision science. Topics include: history and philosophy of vision science, low-level vision, motion perception, spatial vision, perception of objects and scenes, colour perception, attention and consciousness, and multisensory integration. Demonstrations/in-class experiments supplement lectures and readings. Emphasis on reading and writing scientific articles in vision science.

**Prerequisite:**  
PSY201H1/ECO220Y1/EEB225H1/GGR270H1/POL222H1/SOC202H1/STA220H1/STA248H1/STA288H1, PSY280H1

**Exclusion:** PSYC51H3

**Distribution Requirements:** Science  
**Breadth Requirements:** Living Things and Their Environment (4)

**PSY389H1 - Perception Laboratory**

**Hours:** 36P

Examination of issues and methods in perception research. Students conduct supervised research projects, and read, critique, and write research articles. Course capacity is limited to 15 students and priority is given to PSY Specialists and Research Specialists during the first enrolment period.

**Prerequisite:**  
PSY202H1/ECO220Y1/ECO227Y1/STA221H1/SOC252H1/SOC300H1

**Recommended Preparation:** PSY203H1

**Distribution Requirements:** Science  
**Breadth Requirements:** Living Things and Their Environment (4)

**PSY390H1 - Behavioural Genetics**

**Hours:** 36L

An examination of how genes contribute to the production of behaviour, either as structural elements or direct participants in behavioural regulation. Covers molecular genetics, natural selection, and genetic methods followed by specific examples of congenic disorders that affect behaviour and studies of normal behaviours in human and animal models.

**Prerequisite:**  
PSY201H1/ECO220Y1/EEB225H1/GGR270H1/POL222H1/SOC202H1/STA220H1/STA248H1/STA288H1, PSY260H1/PSY290H1/HMB200H1/HMB265H1

**Exclusion:** PSY355H5

**Distribution Requirements:** Science  
**Breadth Requirements:** Living Things and Their Environment (4)

**PSY395H1 - Neuroethics**

**Hours:** 36L

An examination of how developments in neurology and neuroscience can be used to inform ethical and legal issues related to free will, responsibility, competence, education, morality, and empathy in healthy people and in people with confirmed or suspected neurological disorders.

**Prerequisite:**  
PSY201H1/ECO220Y1/EEB225H1/GGR270H1/POL222H1/SOC202H1/STA220H1/STA248H1/STA288H1, PSY260H1/PSY270H1/PSY280H1/PSY290H1

**Recommended Preparation:** Review of basic brain functions

**Distribution Requirements:** Science  
**Breadth Requirements:** Thought, Belief and Behaviour (2)
PSY396H1 - Neurochemical Basis of Behaviour

Hours: 36L

The functional relevance of neurotransmitters, with particular emphasis on their role in mediating behaviour.

Prerequisite: PSY201H1/ECO220Y1/EEB225H1/GGR270H1/POL222H1/SOC202 H1/STA220H1/STA248H1/STA288H1, PSY290H1/HMB200H1
Exclusion: PCL200H1/PCL476H1/PSYC62H3
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

PSY397H1 - Biological Rhythms

Hours: 36L

Daily, monthly, annual and other rhythms and methods of measuring them. Behavioural and physiological aspects of biological clocks. The importance of rhythms in experimental design, in research on brain function, in affective disorders, and the use animals make of rhythms in migration and other behaviours.

Prerequisite: PSY290H1/HMB200H1/PSL300H1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

PSY399Y1 - Research Opportunity Program

Credit course for supervised participation in faculty research project. Details at https://www.artsci.utoronto.ca/current/academics/research-opportunities/research-opportunities-program. Not eligible for CR/NCR option.

PSY400Y1 - Research Specialization: Thesis

An individual thesis done under the direction of a faculty member. Lecture and seminar presentations of proposals in the Fall session. Enrolment is restricted to PSY Research Specialists. Not eligible for CR/NCR option.

Prerequisite: Enrolment in the PSY Research Specialist program, PSY309H1, and one of PSY319H1/PSY329H1/PSY339H1/PSY359H1/PSY369H1/PSY379H1/PSY389H1
Exclusion: PSY400Y5/PSYC88Y3
Distribution Requirements: Science

PSY402H1 - Psychology Seminar

Hours: 24S

Examination in depth of specific topics in psychology at the graduate level. These seminars vary from year to year in terms of the number given, the topics, and the restrictions on enrolment. Students must get prior consent from the instructor of the graduate seminar they are interested in taking and submit this consent in writing to the department at which time you will be enrolled for undergraduate credit. Consult the Undergraduate Administrator for more details.

Distribution Requirements: Science

PSY403H1 - Psychology Seminar

Hours: 24S

Examination in depth of specific topics in psychology at the graduate level. These seminars vary from year to year in terms of the number given, the topics, and the restrictions on enrolment. Students must get prior consent from the instructor of the graduate seminar they are interested in taking and submit this consent in writing to the department at which time you will be enrolled for undergraduate credit. Consult the Undergraduate Administrator for more details.

Distribution Requirements: Science

PSY404H1 - Psychology Seminar

Hours: 24S

Examination in depth of specific topics in psychology at the graduate level. These seminars vary from year to year in terms of the number given, the topics, and the restrictions on enrolment. Students must get prior consent from the instructor of the graduate seminar they are interested in taking and submit this consent in writing to the department at which time you will be enrolled for undergraduate credit. Consult the Undergraduate Administrator for more details.

Distribution Requirements: Science

PSY405H1 - Individual Projects

An intensive laboratory or applied research project under the supervision of a Department of Psychology faculty member. Project must be academically demanding and uniquely suitable for the individual student. Additional information and applications are available at the department and on its website. This course is open to all Psychology program students.

Prerequisite: PSY202H1/ECO220Y1/ECO227Y1/STA221H1/SOC252H1/SOC300 H1, and appropriate background for the proposed work
Distribution Requirements: Science
PSY405Y1 - Individual Projects

An intensive laboratory or applied research project under the supervision of a Department of Psychology faculty member. Project must be academically demanding and uniquely suitable for the individual student. Additional information and applications are available at the department and on its website. This course is open to all Psychology program students.

Prerequisite: PSY202H1/ECO220Y1/ECO227Y1/STA221H1/SOC252H1/SOC300 H1, and appropriate background for the proposed work

Distribution Requirements: Science

---

PSY406H1 - Individual Projects

An intensive laboratory or applied research project under the supervision of a Department of Psychology faculty member. Project must be academically demanding and uniquely suitable for the individual student. Additional information and applications are available at the department and on its website. This course is open to all Psychology program students.

Prerequisite: PSY202H1/ECO220Y1/ECO227Y1/STA221H1/SOC252H1/SOC300 H1, and appropriate background for the proposed work

Distribution Requirements: Science

---

PSY407H1 - Special Topics in Psychology

Hours: 36L

A lecture course providing in-depth examination of specific topics/themes relating to Psychology. Content in any given year depends on instructor. Priority is given to PSY Major program students during the first enrolment period.

Prerequisite: PSY100H1, PSY201H1 (or exclusion), and one further 200-level PSY half-course

Distribution Requirements: Science

Breadth Requirements: Thought, Belief and Behaviour (2)

---

PSY408H1 - Special Topics in Psychology

Hours: 36L

A lecture course providing in-depth examination of specific topics/themes relating to Psychology. Content in any given year depends on instructor. Priority is given to PSY Major program students during the first enrolment period.

Prerequisite: PSY100H1, PSY201H1 (or exclusion), and one further 200-level PSY half-course

Distribution Requirements: Science

Breadth Requirements: Thought, Belief and Behaviour (2)

---

PSY409H1 - Research Specialization: Theoretical Foundations

Hours: 24S

Addresses the central theoretical issues that structure contemporary research in each of the major areas of psychology. The aim is to provide an informal overview of the field as a whole. Enrolment is restricted to PSY Research Specialists.

Prerequisite: Enrolment in the PSY Research Specialist program, PSY309H1

Distribution Requirements: Science

Breadth Requirements: Thought, Belief and Behaviour (2)

---

PSY410H1 - Developmental Psychology Seminar

Hours: 24S

Examination in depth of a limited topic within developmental psychology. Content in any given year depends on instructor. Course capacity is limited to 20 students and enrolment priority is given to PSY Specialists and Research Specialists.

Prerequisite: PSY202H1/ECO220Y1/ECO227Y1/STA221H1/SOC252H1/SOC300 H1, PSY210H1

Exclusion: PSY410H5/PSYD20H3

Distribution Requirements: Science

Breadth Requirements: Thought, Belief and Behaviour (2)
PSY414H1 - Moral Development

Hours: 36L

Lecture courses examining cognitive-developmental, psychoanalytic, sociobiological, behaviouristic and cultural-anthropological approaches to moral development. Issues covered include definitions of morality, the relationship between moral judgement and action, gender differences and commonalities, and the role of culture in moral development.

Prerequisite: PSY201H1/ECO220Y1/EEB225H1/GGR270H1/POL222H1/SOC202 H1/STA220H1/STA248H1/STA288H1, PSY210H1

Distribution Requirements: Science
Breadth Requirements: Thought, Belief and Behaviour (2)

PSY417H1 - Aging and Social Cognition

Hours: 36L

Lecture course examining theory and research on the social cognitive aspect of aging. Topics range from impression formation and causal attributions to perceptions of control and emotions.

Prerequisite: PSY201H1/ECO220Y1/EEB225H1/GGR270H1/POL222H1/SOC202 H1/STA220H1/STA248H1/STA288H1, PSY220H1

Exclusion: PSY415H5
Distribution Requirements: Science
Breadth Requirements: Thought, Belief and Behaviour (2)

PSY420H1 - Social Psychology Seminar

Hours: 24S

Examination in depth of a limited topic within social psychology. Content in any given year depends on instructor. Course capacity is limited to 20 students and enrolment priority is given to PSY Specialists and Research Specialists.

Prerequisite: PSY202H1/ECO220Y1/EEB225H1/GGR270H1/SOC202 H1/STA220H1/STA248H1/STA288H1, PSY220H1

Exclusion: PSY420H5
Distribution Requirements: Science
Breadth Requirements: Thought, Belief and Behaviour (2)

PSY421H1 - Person Perception

Hours: 36L

This lecture course discusses how we perceive, categorize, and form impressions of other people, relying on readings from primary sources in the scientific literature.

Prerequisite: PSY201H1/ECO220Y1/EEB225H1/GGR270H1/POL222H1/SOC202 H1/STA220H1/STA248H1/STA288H1, PSY220H1, and PSY270H1 or PSY280H1

Distribution Requirements: Science
Breadth Requirements: Thought, Belief and Behaviour (2)

PSY424H1 - Social Psychology of Interpersonal Relationships

Hours: 36L

This lecture course focuses on the social psychology of interpersonal relationships between individuals, especially romantic or close relationships and friendships. It surveys what social psychologists have learned about the development, maintenance, disruption or dissolution of personal relationships, as well as current social psychological theories of interpersonal relationships.

Prerequisite: PSY201H1/ECO220Y1/EEB225H1/GGR270H1/POL222H1/SOC202 H1/STA220H1/STA248H1/STA288H1, PSY220H1

Exclusion: PSY327H5/PSYD11H3
Distribution Requirements: Science
Breadth Requirements: Thought, Belief and Behaviour (2)

PSY425H1 - Self-Consciousness

Hours: 36L

The distinguishing feature of our species is the reflexivity of our consciousness -- the ability to conceive of and interpret ourselves and our experiences. For us, consciousness involves self-consciousness. All our higher symbolic capabilities rest upon this foundation. The aim of this lecture course is to trace out a variety of frames through which we can examine and understand the shared aspects of our subjectivity as self-conscious agents. Using a multidisciplinary approach that draws together ideas and insights from psychology, sociology, philosophy, anthropology, and biology, the course is designed to foster articulacy and critical acumen in how we think about reflexive experience.

Prerequisite: PSY201H1/ECO220Y1/EEB225H1/GGR270H1/POL222H1/SOC202 H1/STA220H1/STA248H1/STA288H1, PSY220H1

Distribution Requirements: Science
Breadth Requirements: Thought, Belief and Behaviour (2)
PSY426H1 - Motivational Theories in Social Psychology

Hours: 36L

With intensive reading and discussion of ‘classic’ and contemporary articles, this advanced lecture course in social psychology focuses on the central issues, methods, and findings in the study of motivation. Topics include self-regulation, achievement, and reward/punishment.

Prerequisite: PSY201H1/ECO220Y1/EEB225H1/GGR270H1/POL222H1/SOC202H1/STA220H1/STA248H1/STA288H1, PSY220H1
Distribution Requirements: Science
Breadth Requirements: Thought, Belief and Behaviour (2)

PSY427H1 - Media Psychology

Hours: 36L

This lecture course examines how we come to understand ourselves and our world, and learn to feel, judge, and act, through the simulative mediation of personal and mass communication technologies. The aim is to provide students with a deeper understanding of the highly commodified symbolic environment that surrounds them and in which they participate as audience and, increasingly, producer. Although the focus is psychological, the history, sociology, political economy, and technology of various media will be discussed in relation to the changing forms of public and private life in the 21st century.

Prerequisite: PSY201H1/ECO220Y1/EEB225H1/GGR270H1/POL222H1/SOC202H1/STA220H1/STA248H1/STA288H1, PSY220H1
Distribution Requirements: Science
Breadth Requirements: Thought, Belief and Behaviour (2)

PSY428H1 - Critical Psychology

Hours: 36L

This lecture course examines the place of psychology in broader society and culture. What are the consequences of our research and professional practices for how we understand and govern ourselves and others? What is the extent of our authority and power to describe, define, and explain human behaviour and experience? How do our values direct our activities and interpretations as psychologists? How can we critically evaluate the assumptions, commitments, and shortcomings of our discipline in relation to real or imagined alternatives?

Prerequisite: PSY201H1/ECO220Y1/EEB225H1/GGR270H1/POL222H1/SOC202H1/STA220H1/STA248H1/STA288H1, PSY220H1
Distribution Requirements: Science
Breadth Requirements: Thought, Belief and Behaviour (2)

PSY430H1 - Personality Seminar

Hours: 24S

Examination in depth of a limited topic within the area of personality. Content in any given year depends on instructor. Course capacity is limited to 20 students and enrolment priority is given to PSY Specialists and Research Specialists.

Prerequisite: PSY202H1/ECO220Y1/ECO227Y1/STA221H1/SOC252H1/SOC300H1, PSY230H1/PSY240H1
Exclusion: PSY430H5/PSYD30H3/PSYD32H3
Distribution Requirements: Science
Breadth Requirements: Thought, Belief and Behaviour (2)

PSY434H1 - Maps of Meaning: The Architecture of Belief

Hours: 36L

This lecture course is based on the book Maps of Meaning: The Architecture of Belief. Maps of Meaning lays bare the grammar of mythology, and describes the relevance of that grammar for interpretation of narrative and religion, comprehension of ideological identification, and understanding of the role that individual choice plays in the maintenance, transformation and destiny of social systems.

Prerequisite: PSY201H1/ECO220Y1/EEB225H1/GGR270H1/POL222H1/SOC202H1/STA220H1/STA248H1/STA288H1, PSY230H1/PSY240H1
Distribution Requirements: Science
Breadth Requirements: Thought, Belief and Behaviour (2)

PSY435H1 - Environmental Psychology

Hours: 36L

This lecture course explores how psychologists can contribute to finding solutions to today's pressing environmental challenges. Topics include persuasion, community-based social marketing, social influence, social capital, and the many ways in which the physical environment affects psychological processes. The course takes a multi-scalar approach to the human-environment relationship, covering individual, community, cultural and global levels of scale, through the lens of complex dynamic systems theories.

Prerequisite: PSY100H1, PSY220H1, OR registered in an Environmental Studies/Science program
Distribution Requirements: Science
Breadth Requirements: Thought, Belief and Behaviour (2)
PSY440H1 - Abnormal Psychology Seminar

**Hours:** 24S

Examination in depth of a limited topic within abnormal psychology. Content in any given year depends on instructor. Course capacity is limited to 20 students and enrolment priority is given to PSY Specialists and Research Specialists.

**Prerequisite:**
- PSY202H1/ECO220Y1/ECO227Y1/STA221H1/SOC252H1/SOC300 H1, PSY230H1/PSY240H1

**Exclusion:** PSY440H5/PSYD33H3

**Distribution Requirements:** Science

**Breadth Requirements:** Thought, Belief and Behaviour (2)

PSY470H1 - Memory Seminar

**Hours:** 24S

Examination in depth of a limited topic within the area of memory. Content in any given year depends on instructor. Course capacity is limited to 20 students and enrolment priority is given to PSY Specialists and Research Specialists.

**Prerequisite:**
- PSY202H1/ECO220Y1/ECO227Y1/STA221H1/SOC252H1/SOC300 H1, PSY270H1/COG250Y1

**Exclusion:** PSYD50H3

**Distribution Requirements:** Science

**Breadth Requirements:** Thought, Belief and Behaviour (2)

PSY450H1 - History of Psychology

**Hours:** 36L

This lecture course discusses the philosophical predecessors and early development of modern psychology, schools of thought, and shifts in areas of theory and research, as well as history and philosophy of science, in general.

**Prerequisite:** One full course equivalent at the PSY 200+-level

**Exclusion:** PSYC85H3

**Distribution Requirements:** Science

**Breadth Requirements:** Society and its Institutions (3)

PSY460H1 - Learning Seminar

**Hours:** 24S

Examination in depth of a limited topic in human or animal learning. Content in any given year depends on instructor. Course capacity is limited to 20 students and enrolment priority is given to PSY Specialists and Research Specialists.

**Prerequisite:**
- PSY202H1/ECO220Y1/ECO227Y1/STA221H1/SOC252H1/SOC300 H1, PSY260H1

**Distribution Requirements:** Science

**Breadth Requirements:** Living Things and Their Environment (4)

PSY471H1 - Cognition Seminar

**Hours:** 24S

Examination in depth of a limited topic in cognition. Content in any given year depends on instructor. Course capacity is limited to 20 students and enrolment priority is given to PSY Specialists and Research Specialists.

**Prerequisite:**
- PSY202H1/ECO220Y1/ECO227Y1/STA221H1/SOC252H1/SOC300 H1, PSY270H1/COG250Y1 (may be additional prerequisites based on seminar topic given)

**Exclusion:** PSY471H5/PSY50H3

**Distribution Requirements:** Science

**Breadth Requirements:** Thought, Belief and Behaviour (2)
PSY473H1 - Social Cognitive Neuroscience

Hours: 36L

Social cognitive neuroscience is an emerging interdisciplinary field that seeks to integrate theories of social psychology and cognitive neuroscience to understand behaviour at three fundamentally interconnected levels of analysis (social, cognitive, and neural). Topics such as self-regulation, cooperation, decision-making, emotion, morality, and prejudice will be examined in this lecture course.

Prerequisite:
PSY201H1/ECO220Y1/EEB225H1/GGR270H1/POL222H1/SOC202H1/STA220H1/STA248H1/STA288H1, PSY220H1, and PSY270H1/PSY290H1
Exclusion: PSY353H5/PSYD17H3
Recommended Preparation: PSY326H1
Distribution Requirements: Science
Breadth Requirements: Thought, Belief and Behaviour (2)

PSY474H1 - Computation in Psychology

Hours: 36L

This lecture course surveys computational perspectives on the mind and brain and introduces computational tools for connecting psychological and neural data to theory. Topics may include neural networks, probabilistic models, pattern recognition, and other techniques applicable to psychological research and general analysis. Basic familiarity with programming is recommended but not required.

Prerequisite:
PSY202H1/ECO220Y1/ECO227Y1/STA221H1/SOC252H1/SOC300H1
Exclusion: PSY471H1 (Fall of 2015)
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

PSY475H1 - Attention and Performance

Hours: 36L

This lecture course discusses visual attention; attentional selection for object recognition, feature integration, and action; attention in action-relevant space; movements of attention; eye-hand coordination, eye and limb movements; action-specific perception and effort-based models of perception; ecological perception and the perception of affordances.

Prerequisite:
PSY201H1/ECO220Y1/EEB225H1/GGR270H1/POL222H1/SOC202H1/STA220H1/STA248H1/STA288H1, PSY270H1/PSY280H1/COG290Y1
Distribution Requirements: Science
Breadth Requirements: Thought, Belief and Behaviour (2)

PSY480H1 - Seminar in Perception

Hours: 24S

An in-depth examination of current issues in perception (e.g. perceptual organization, object and face recognition, motion perception). Emphasis is on the psychological perspective, but integrates physiological and computational perspectives as well. Content in any given year depends on instructor. Course capacity is limited to 20 students and enrolment priority is given to PSY Specialists and Research Specialists.

Prerequisite:
PSY202H1/ECO220Y1/ECO227Y1/STA221H1/SOC252H1/SOC300H1, PSY280H1
Exclusion: PSY480H5/PSYD51H3
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

PSY490H1 - Brain Activity & Behaviour Seminar

Hours: 24S

An in-depth examination of current issues in brain and behaviour science (e.g. activity of neurons, sensory, motor, motivational, and higher cortical systems). Content in any given year depends on instructor. Course capacity is limited to 20 students and enrolment priority is given to PSY Specialists and Research Specialists.

Prerequisite:
PSY202H1/ECO220Y1/ECO227Y1/STA221H1/SOC252H1/SOC300H1, PSY290H1/HMB200H1
Exclusion: PSY490H5/PSYD66H3
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

PSY492H1 - Neurobiology of Learning and Memory

Hours: 36L

Understanding the complexities of how the mammalian nervous system acquires and stores information and how it transforms this information into appropriate behavior is fundamentally important to our understanding of both animal and human behavior. This lecture course explores empirical and theoretical contributions to our understanding of the neural basis of learning and memory.

Prerequisite:
PSY201H1/ECO220Y1/EEB225H1/GGR270H1/POL222H1/SOC202H1/STA220H1/STA248H1/STA288H1, PSY260H1/PSY290H1/HMB200H1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)
PSY493H1 - Cognitive Neuroscience

Hours: 36L

This is a capstone lecture course surveying research on how the mind arises from the brain. The first objective of the course is to understand how processes in human brains (ranging from the firing of a single neuron to the dynamics of billions) support cognitive abilities (such as recognizing a face, remembering a birthday from childhood, understanding the words in a spoken lecture, or planning a route home from class). The second objective of the course is to understand the methods of contemporary cognitive neuroscience research, to enable students to read primary literature and to understand ongoing debates.

Prerequisite:
PSY201H1/ECO220Y1/EEB225H1/GGR270H1/POL222H1/SOC202H1/STA220H1/STA248H1/STA288H1, PSY260H1/PSY270H1/PSY290H1/HMB200H1
Exclusion: PSYC55H3
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

PSY494H1 - Physiology and Psychology of Emotion

Hours: 36L

This lecture course discusses the role of brain and body in the expression and experience of emotion in humans considered through the experimental, physiological, theoretical, and clinical literatures.

Prerequisite:
PSY201H1/ECO220Y1/EEB225H1/GGR270H1/POL222H1/SOC202H1/STA220H1/STA248H1/STA288H1, PSY260H1/PSY270H1/PSY290H1/HMB200H1
Exclusion: PSYC18H3
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

PSY495H1 - Sex and the Brain

Hours: 36L

This lecture course explores the scientific literature underlying the concept that female/male, gay/straight, and transgendered behaviours are based on brain differences. Original scientific papers will be read in close detail for design and interpretation of the experiments. The goal is to gain an understanding of the science and psychology underlying sex/gender, popular conceptions of sex, and the sexual brain. Topics include: the making of sex, hormone action, brain-based sexual behaviours, sex and cognition, and sex and sexuality/gender identification.

Prerequisite:
PSY201H1/ECO220Y1/EEB225H1/GGR270H1/POL222H1/SOC202H1/STA220H1/STA248H1/STA288H1, PSY290H1/HMB200H1
Exclusion: PSY354H5/PSY395H5
Distribution Requirements: Science
Breadth Requirements: Thought, Belief and Behaviour (2)

PSY496H1 - Cognitive Dysfunction in Neurological Disorders

Hours: 36L

This lecture course provides an in-depth examination of the cognitive dysfunction found in neurological disorders, including Alzheimer’s Disease, Parkinson’s Disease, and Schizophrenia. The course focuses on how cognitive impairments relate to neuropsychological models of the specific disease (specifically how these models provide insights into the biological mechanisms underlying the cognitive symptoms) and cognition, more broadly.

Prerequisite:
PSY201H1/ECO220Y1/EEB225H1/GGR270H1/POL222H1/SOC202H1/STA220H1/STA248H1/STA288H1, PSY290H1/PSY270H1/HMB200H1
Exclusion: PSY471H1 (Winter of 2015)
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

PSY497H1 - Advanced Topics in Biological Rhythms

Hours: 24S

This seminar course discusses circadian rhythms with emphasis on non-photic entrainment and phase shifting of rhythms by behaviour (e.g., social interactions, becoming active). Properties and physiological mechanisms for non-photic effects and comparisons with those for photic effects. Although the emphasis is on basic principles, possible applications will also be discussed. Course capacity is limited to 20 students and enrolment priority is given to PSY Specialists and Research Specialists.

Prerequisite: PSY397H1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

P. Selby, MBBS, MHSc
R. Summerbell, Ph D

Assistant Professors
P. Kaufman, PhD
K. Urbanoski, PhD

Offered by the Dalla Lana School of Public Health

Introduction

Public health is the science and art of preventing disease and promoting health through organized population-based efforts. The focus of public health is to prevent rather than treat disease and to positively affect determinants of health through a wide range of strategies, including the surveillance and assessment of population health and the promotion of healthy behaviours, healthy environments and healthy public policies. In addition to these activities, the identification and treatment of those with disease may be vital to preventing it in others, such as during an outbreak of an infectious disease. Hand washing, vaccination programs, the inspection of restaurants, laws banning smoking in public places and tax credits for childhood physical activity programs are examples of public health measures. Public health includes sub-disciplines such as epidemiology, biostatistics, occupational and environmental health, public health policy, and social and behavioural health sciences.

Associate Dean, Academic Affairs: Professor Andrea Sass-Kortsak, a.sass@utoronto.ca

Enquiries: Room 688, Health Sciences Building

Public Health Sciences Courses

PHS100H1 - Global Health Grand Opps

Hours: 24L/24T

This course introduces students to basic public health-related concepts, significant aspects of the historical development of global health, and a selection of topics illustrating the broad and evolving nature of this field. In addition, it helps students explore the contributions that various disciplines/fields offer to global health.

Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

PHS300H1 - HIV Prevention Research

Hours: 24L

This course engages students in in-depth learning about HIV research. In addition to learning about methods and issues from a variety of research disciplines as applied to HIV, students will be expected, with guidance, to design a study relevant to the content of the course.

Recommended Preparation: STA220H1 or equivalent
Distribution Requirements: Science; Social Science
Breadth Requirements: Society and its Institutions (3)

HMB342H1 - Epidemiology of Health & Disease

Hours: 24L/24T

This course engages students in the fundamental science of epidemiology applied to health and disease. After an introduction to various measures of health and disease, the scientific methods used to investigate, analyze, prevent and control health problems will be illustrated using social, biomedical and public health examples

Prerequisite: 9 FCE complete, (BIO120H1, BIO130H1)/HST209H1
Exclusion: HST373H1
Recommended Preparation: STA288H1 or other statistics course
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)
STA365H1 - Applied Bayesian Statistics

Hours: 36L

Bayesian inference has become an important applied technique and is especially valued to solve complex problems. This course first examines the basics of Bayesian inference. From there, this course looks at modern, computational methods and how to make inferences on complex data problems.

Prerequisite: STA302H1/STAC67H3/STA302H5
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

PSY407H1 - Special Topics in Psychology

Hours: 36L

A lecture course providing in-depth examination of specific topics/themes relating to Psychology. Content in any given year depends on instructor. Priority is given to PSY Major program students during the first enrolment period.

Prerequisite: PSY100H1, PSY201H1/ECO220Y1/GGR270H1/POL222H1/SOC202 H1/STA220H1/STA248H1/STA288H1, and one further 200-level PSY half-course
Distribution Requirements: Science
Breadth Requirements: Thought, Belief and Behaviour (2)

GGR433H1 - Built Environment and Health

Hours: 36S

Linking across fields that include public health, geography and planning, this course examines the growing evidence and ways in which human health is affected by the design and development of the built environment in which we live, work and play. The course considers how various planning and development decisions impact population and individual health, particularly in relation to chronic diseases, injuries, and mental health. Field trip transportation cost: $20.

Prerequisite: 10.0 FCE's
Exclusion: GGR400H1 (2011-12)
Recommended Preparation: 1.0 FCE in Geography
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (2)

GGR434H1 - Building Community Resilience

Hours: 36S

Examines concepts of resilience as a way of building the capacity of communities to (a) respond to predicted disruptions/shocks associated with climate change, global pandemics, anticipated disruptions in global food supply, energy insecurity, and environmental degradation; and (b) nurture the development of alternative spaces that support the emergence of more life-sustaining structures and practices. Includes explicit attention to equity and public health, and explores issues such as: participatory governance of social-ecological systems, the nature of social change, complexity science, the role of social movements, indigenous and political ecology perspectives.

Prerequisite: 10 FCEs
Exclusion: GGR400H1 (2011-12)
Recommended Preparation: 1.0 FCEs in Geography
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

HMB436H1 - Medical and Veterinary Mycology

Hours: 24L

This lecture-based course will familiarize students with fungi of public health importance, particularly those that cause disease in humans and other animals. The course will focus on the clinical presentation, pathophysiology, and treatment of fungal infections, as well as the ecology, physiology and evolutionary biology of the agents responsible. The course will also address other ways in which fungi influence human and animal health.

Prerequisite: 14 FCE complete, HMB265H1/BIO260H1, BIO220H1
Recommended Preparation: EEB268H1, EEB331H1/CSB353H1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

STA465H1 - Theory and Methods for Complex Spatial Data

Hours: 36L

Data acquisition trends in the environmental, physical and health sciences are increasingly spatial in character and novel in the sense that modern sophisticated methods are required for analysis. This course will cover different types of random spatial processes and how to incorporate them into mixed effects models for Normal and non-Normal data. Students will be trained in a variety of advanced techniques for analyzing complex spatial data and, upon completion, will be able to undertake a variety of analyses on spatially dependent data, understand which methods are appropriate for various research questions, and interpret and convey results in the light of the original questions posed.

Prerequisite: STA302H1/STAC67H3/STA302H5, STA303H1
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)
Public Policy

Introduction

Solving real-world policy challenges requires the use of multi-disciplinary tools to analyze problems, determine the best means to deal with those problems, and decide on the best course of action. An undergraduate Major in Public Policy provides a unique opportunity for students in Social Science disciplines to think in an interdisciplinary way, by drawing on theories and approaches, as well as tools and kits developed in the core disciplines of Economics and Political Science, and beyond. Students in this program develop theoretical and applied reasoning skills in policy analysis, as well as a solid grounding in quantitative methods and research.

Regarding Public Policy Programs

The Major program in Public Policy is offered jointly by the Munk School of Global Affairs and Public Policy, the Department of Economics, and the Department of Political Science. Students may enroll after their first- or second-year of undergraduate studies, and must meet the prerequisite conditions for all second-year and higher courses.

The Program Director and Program Assistant are available for consultation. For enquiries or an appointment call the Undergraduate Administrator, Petra Jory at 416-978-5402 or send an e-mail to p.jory@utoronto.ca.

Public Policy Programs

Major in Public Policy (Arts Program) - ASMAJ2660

Description:

The Major program in Public Policy is offered jointly by the School of Public Policy, the Department of Economics, and the Department of Political Science. Students enroll after first-year, and must meet the prerequisite conditions for all second-year and higher courses.

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

Variable Minimum Grade

A minimum grade/minimum grade average in required courses is needed for entry, and this minimum changes each year depending on available spaces and the number of applicants. The following courses must be completed:

- ECO101H1 & ECO102H1 (with an average final mark of at least 67%), or ECO105Y1 (with a final mark of at least 80%), and

One of the following four options (1.0 credit):

- POL101Y1, or 1.0 credit from POL101H1, POL106H1, POL107H1 or POL109H1, with a grade of 67% in each course
- 1.0 credit from Munk One courses ( MUN105Y1, MUN101H1, MUN102H1), with a grade of 75% in each course
- 1.0 credit from Trinity One Public Policy courses ( TRN160Y1 or TRN161Y1) with a grade of 75%
- 1.0 credit from Vic One Pearson policy stream courses ( VIC181H1, VIC183H1, VIC184H1 or VIC185H1) with a grade of 75% in each course

To ensure that students admitted to the program will be prepared, applicants with a final grade lower than the minimum grades stated above will not be considered for admission. Please note that obtaining this minimum final grade does not guarantee admission to the program.

Notes:

- Students entering from Munk One/Trinity One/Vic One courses options will be ineligible to take upper year POL courses until they have completed POL214Y1 or ( POL218H1, POL219H1)
- Students expecting to choose ECO courses in their second year or higher must complete MAT133Y1 or equivalent in their first year, to meet required prerequisites for ECO courses. If MAT133Y1 or equivalent is not taken, students will not be eligible to enrol in 200+ level ECO courses, and must take PPG200H1 to fulfill program requirements in lieu of ECO200Y1/ ECO204Y1/ ECO206Y1.

Completion Requirements:

(7.5 FCEs)

First Year:

1. One of the following four options (1.0 credit):
   - POL101Y1, or 1.0 credit from POL101H1, POL106H1, POL107H1 or POL109H1, with a grade of 67% in each course
   - 1.0 credit from Munk One courses ( MUN105Y1, MUN101H1, MUN102H1), with a grade of 75% in each course
   - 1.0 credit from Trinity One Public Policy courses ( TRN160Y1 or TRN161Y1) with a grade of 75%
   - 1.0 credit from Vic One Pearson policy stream courses ( VIC181H1, VIC183H1, VIC184H1 or VIC185H1) with a grade of 75% in each course

2. ECO100Y1 or ECO101H1 & ECO102H1 (with a combined average of at least 67%) or ECO105Y1 (with a final mark of at least 80%).

3. Students expecting to choose ECO courses in their second year or higher must complete MAT133Y1 or equivalent in their first year, to meet required prerequisites for ECO courses. If MAT133Y1 or equivalent is not taken, students will not be eligible to enrol in 200+ level ECO courses, and must take PPG200H1 to fulfill program requirements in lieu of ECO200Y1/ ECO204Y1/ ECO206Y1.

Second Year:

1. ECO200Y1/ ECO204Y1/ ECO206Y1/ PPG200H1

2. Students expecting to choose ECO courses in their second year or higher must complete MAT133Y1 or equivalent in their first year, to meet required prerequisites for ECO courses. If MAT133Y1 or equivalent is not taken, students
will not be eligible to enrol in 200+-level ECO courses, and must take PPG200H1 to fulfil program requirements in lieu of ECO200Y1/ECO204Y1/ECO206Y1.

3. ECO220Y1/(POL222H1+POL232H1)/SOC202H1/STA220H1/STA221H1/STA248H1/STA255H1/STA261H1 (1.0 credit)

4. POL214Y1, or the combination of POL218H1 and POL219H1

Third and Fourth Years:

1. PPG301H1
2. PPG401H1
3. Remaining courses to reach the 7.5 credits will be drawn from 300+-level drawn from Economics, Political Science, Sociology, or related disciplines.

A non-exhaustive list of eligible courses includes:

ECO313H1/ECO314H1/ECO320H1/ECO324Y1/ECO331H1/ECO333H1/ECO334H1/ECO336Y1/ECO339Y1/ECO349H1/ECO364H1/ECO365H1/ECO369H1/ECO402H1/ECO403H1/ECO407H1/ECO410H1/ECO413H1/ECO414H1/ECO416H1/ECO425H1/ECO426H1

With the approval of the program director, students can take public policy oriented courses outside this list.

Public Policy Courses

PPG200H1 - Microeconomics for Policy Analysis

Hours: 24L

The objectives are: (1) To provide students with a foundation in microeconomic analysis and; (2) To demonstrate how this foundation can be applied to design, predict the effects of and evaluate public policies.

Students will be equipped to understand the main issues on a range of policy topics such as taxation, social insurance, welfare and income support programs.

Prerequisite: ECO100Y1 / ECO101H1/ECO102H1 / ECO105Y1
Exclusion: ECO200Y1, ECO204Y1, ECO206Y1
Recommended Preparation: POL101Y1
Breadth Requirements: Society and its Institutions (3)

PPG301H1 - Introduction to Public Policy

Hours: 24L

The course introduces students to the study of public policy, the policy process and our policy institutions in Canada. The course examines how issues emerge, how important ideas are framed, priorities are established, and agendas are set and managed. It explores how institutions – formal and informal rules which enable and constrain actors – shape policy-making in Canada.

Prerequisite: (ECO200Y1/ECO204Y1/ECO206Y1/PPG200H1), (ECO220Y1/POL242Y1/SOC202H1/STA220H1/STA221H1/STA248H1/STA255H1/STA261H1), POL214Y1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

PPG401H1 - The Role of Government

Hours: 24L

This course explores the government’s role in promoting efficiency and equity in both the financing and delivery of public policy goals. It examines the conditions when government involvement is important, the policy levers available to government in promoting social policy, market failures, and conditions for efficiency. It examines the role of government in many of the major areas of social policy such as health care, education, redistribution, the environment, financial regulations and other important issues.

Corequisite: PPG301H1
Recommended Preparation: ECO200Y1/ECO204Y1/ECO206Y1/PPG200H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)
The Study of Religion

As an intellectual inquiry into an important dimension of human experience, the study of religion enables students to grasp an essential aspect of the cultures of the world and the interactions among them. We look at the development of religious beliefs, practices, and doctrines as they intersect with the history of peoples and cultures right up to the contemporary world. The study of religion also prepares students for a wide range of careers, such as social work, law, politics from the local to the international level, teaching, medicine, or leadership in religious organizations. Combined with appropriate language preparation, it can also open out into graduate work leading to the M.A. and Ph.D. in the growing number of universities offering advanced graduate degrees in the field, and in our University’s own Graduate programs.

Historically, the academic study of religion has taken a variety of forms, each with its own rationale. The Department identifies itself with a model in which the major religious traditions (e.g., Buddhism, Christianity, Hinduism, Islam, Judaism) are studied within a comparative frame. We employ and encourage a variety of approaches (e.g., historical, textual, social scientific) without sacrificing specialized skills and training. The diversity which characterizes this model is reflected in the variety of courses offered or cross-listed by the Department, and by the wide range of training and expertise of our faculty.

Information about programs, courses, including a number of cross-listed courses offered by Colleges or departments such as East Asian Studies, History, Near and Middle Eastern Civilizations, Philosophy, and Sociology can be found on the Department's website. Students aiming to complete any RLG program should consult the Undergraduate Administrator at least once a year for assistance in selecting courses that address the student's interests and fulfill the programs requirements.

Undergraduate Administrative Assistant: Jackman Humanities Building, Room 310 (416-978-2395)
Enquiries: Jackman Humanities Building (416-978-2395)

Religion Programs

Buddhist Studies Specialist (Arts Program) - ASSPE1525

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

(10 full courses or their equivalent)

1. One RLG FCE at the 100-level.
2. No later than the third year of study: RLG200H1. RLG200H1 is a prerequisite for all 400-level courses.
3. RLG206H1.
4. One course drawn from RLG209H1/ RLG211H1/ RLG212H1/ RLG213H1
5. Two consecutive (FCE) language courses in one of: Chinese,
Religion: Christian Origins Specialist (Arts Program) - ASSPE1520

Enrolment Requirements:

Enrolment in the Christian Origins Specialist has been administratively suspended as of 28 February 2020 and is no longer admitting students. Students presently enrolled in the Specialist will be able to complete the program requirements as described below.

Completion Requirements:

(10 full courses or their equivalent)

1. One RLG FCE at the 100-level.
2. RLG241H1.
3. RLG203H1.
4. No later than the third year of study: RLG200H1. RLG200H1 is a prerequisite for all 400-level courses.
5. Four half-courses in Greek, normally fulfilled by GRK101H1, GRK102H1 + GRK200H1, and GRK201H1 and GRK202H1. (Note: Upon approval of the program coordinator, students may be permitted to substitute for these courses two full courses in another ancient language, e.g., Syriac, Aramaic.)
6. Four 300+ half-courses chosen from RLG319H1, RLG320H1, RLG321H1, RLG322H1, RLG332H1, RLG324H1, RLG326H1, RLG327H1, RLG328H1.
7. One half-course from RLG448H1, RLG449H1, RLG451H1, RLG452H1, RLG453H1, RLG454H1, RLG455H1, RLG458H1.
8. Three half-courses of the equivalent chosen from CLA204H1, CLA230H1, CLA231H1, CLA232H1, CLA233H1, CLA305H1, CLA308H1, CLA310H1, CLA364H1, CLA368H1, CLA369H1, CLA371H, CLA378H1, NMC351H, NMC252H1, NMC270H1, NMC351H, NMC360H1, NMC361H1, NML352H1, NML353H1, NML356Y1, NML357H1, NML359H1, NML451H1, NML452H1, FAH309H1, FAH313H1, FAH318H1, FAH319H1, FAH424H1.
9. Two half-courses in another religious tradition, preferably an Asian tradition such as Hinduism, Sikhism or Buddhism.
10. RLG404H1 or RLG405H1, or RLG407H1, a capstone integrative course. (Note: this does not fulfill the requirement of the 400-level FCE in #7 above.)

Buddhist Studies Major (Arts Program) - ASMAJ1525

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

(7 full courses or their equivalent)

1. One RLG FCE at the 100-level.
2. No later than the third year of study: RLG200H1. RLG200H1 is a prerequisite for all 400-level courses.
3. RLG206H1.
4. A total of eight half-courses (or equivalent) chosen from the following list: at least six half-courses must be RLG courses ( EAS324H1, EAS325H1, and EAS361Y1 are

Courses from UTM/UTSC/other Departments may be considered with permission.

Religion Specialist (Arts Program) - ASSPE0151

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

(10 full courses or their equivalent)

1. One RLG FCE at the 100-level.
2. No later than the third year of study: RLG200H1. RLG200H1 is a prerequisite for all 400-level courses.
3. One course from RLG201H1/ RLG202H1/ RLG203H1/ RLG204H1/ RLG205H1/ RLG206H1/ RLG208H1/ RLG241H1.
4. One course from RLG209H1/ RLG211H1/ RLG212H1/ RLG213H1.
5. Five other RLG half-courses at any level.
9. RLG404H1 or RLG405H1 or RLG407H1 a capstone integrative course (note: this does not fulfill the requirement of the 400-level courses in #7, above.)

Four half-course cross-listed courses may be counted towards the fulfillment of the degree (consult the Religion website for a list of eligible courses).

It is highly recommended that Religion Specialists who are interested in pursuing graduate training also complete two full years of a relevant foreign language. This should be discussed early in a student's program with the Associate Chair or other Religion professors.

Japanese, Korean, Sanskrit, Pali or Tibetan.
6. A total of nine half-courses (or equivalent) chosen from the list below. At least five half-courses (or equivalent) must be RLG courses (EAS324H1, EAS325H1, EAS326Y1 are counted as RLG courses here). At least five half-courses (or equivalent) must be taken at the 300-level or higher.

Second year courses: RLG205H1, FAH260H1, EAS209H1, EAS219H1, HIS280Y1, HIS282Y1, HIS283Y1, NEW214H1, NEW232H1, PHL237H1.

Third year courses: RLG311H1, RLG316H1, RLG356H1, RLG361H1, RLG363H1, RLG366H1, RLG368H1, RLG372H1, RLG373H1, RLG374H1, RLG375H1, RLG377H5, RLG378H5, RLG379H1, RLG407H3S, FAH363H1, FAH364H1, FAH368H1, EAS338H1, EAS346H1, EAS361H1, HIS380H1, JNR301H1, NEW332H1, NEW333H1, NEW339H1, PHL337H1.

Fourth year courses: RLG462H1, RLG463H1, RLG465H1, RLG466H1, RLG467H1, RLG468H1, RLG469Y1, RLG470H1, RLG470H5, FAH461H1, HIS485H1, NEW433H1.

1. One course cross listed (note: this does not fulfill the requirement).
Religion Minor (Arts Program) - ASMIN0151

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

(6.5 full courses or their equivalent)

1. One RLG FCE at the 100-level.
2. No later than the third year of study: RLG200H1. RLG200H1 is a prerequisite for all 400-level courses.
3. One course from RLG201H1/RLG202H1/RLG203H1/RLG204H1/RLG205H1/RLG206H1/RLG208H1/RLG241H1.
4. Four RLG half-courses at the 300+ level, one of which must be in the same tradition as was chosen from #3 above.
5. Five half-courses chosen from other RLG courses.
6. RLG404H1 or RLG405H1 or RLG407H1, a capstone, integrative course.

Two half-course cross-listed courses may be counted towards the fulfillment of the degree (consult the Religion website for a list of eligible courses).

Regarding Courses in Religion

200-Series Courses

No 200-series course has a 100-series RLG course prerequisite or Co-requisite.

300-Series Courses

All 300-series courses normally presuppose that a student has already completed, by the first day of the course, at least 4.0 FCEs (or their equivalent). Only specific Prerequisites or recommended preparations are listed below. Students who do not meet the Prerequisites, but believe they have adequate academic preparation, should consult the Undergraduate Administrator regarding entry to the course.

400-Series Courses

400-series courses are intended primarily for Specialists and Majors who have already completed several RLG courses. Almost all 400-level courses are E indicator courses and require the instructor's permission. Students must enrol at the Department.

Independent Research Courses

Student-initiated intensive research courses supervised by faculty members of the Department. The student must obtain both a Supervisor's agreement and the Department's approval in order to...
register. The maximum number of Independent Research courses one may take is two full-course equivalents. Deadline for submitting applications to Department, including Supervisor's approval, is the first week of classes of the session. A full-course may be compressed into a single session or spread through two sessions; a half-course may similarly be done in either one session or across two sessions. These courses are open to majors and specialists only.

Religion Courses

RLG100Y1 - World Religions

Hours: 48L/24T

An introduction to the history, philosophy, and practice of the major religions of the world, including Judaism, Christianity, Islam, Hinduism, Buddhism, Confucianism and Taoism.

Exclusion: RLG280Y1, RLG01H3, RLG02H3. Note: RLG01H3 and RLG02H3 taken together are equivalent to RLG100Y1. Note: RLG101H5 is not equivalent to RLG100Y1

Distribution Requirements: Humanities

Breadth Requirements: Society and its Institutions (3); Thought, Belief and Behaviour (2)

RLG101H1 - Introducing Religion

Hours: 24L

An introduction to topics in the study of Religion. Topics will vary by semester and year. Check the department website for upcoming topics.

Distribution Requirements: Humanities

Breadth Requirements: Thought, Belief and Behaviour (2)

RLG102H1 - Introducing Religion

Hours: 24L/12T

An introduction to topics in the study of Religion. Topics will vary by semester and year. Check the department website for upcoming topics.

Exclusion: RLG101H1 or RLG103H1 with the same subtitle

Distribution Requirements: Humanities

Breadth Requirements: Thought, Belief and Behaviour (2)

RLG103H1 - Introducing Religion

Hours: 24L/12T

An introduction to topics in the study of Religion. Topics will vary by semester and year. Check the department website for upcoming topics.

Exclusion: RLG101H1 or RLG102H1 with the same subtitle

Distribution Requirements: Humanities

Breadth Requirements: Thought, Belief and Behaviour (2)

MHB155H1 - Elementary Modern Hebrew I

Hours: 36L/12T

Introduction to the fundamentals of Hebrew grammar and syntax. Emphasis on the development of oral and writing skills.

Exclusion: Grade 4 Hebrew (or Grade 2 in Israel)/NML155H1

Distribution Requirements: Humanities

Breadth Requirements: Creative and Cultural Representations (1)

MHB156H1 - Elementary Modern Hebrew II

Hours: 36L/12T

Continued introduction to the fundamentals of Hebrew grammar and syntax. Emphasis on the development of oral and writing skills.

Prerequisite: MHB155H1/NML155H1 or permission of instructor

Exclusion: Grade 4 Hebrew (or Grade 2 in Israel)/NML156H1

Distribution Requirements: Humanities

Breadth Requirements: Creative and Cultural Representations (1)

RLG196H1 - Innocence and Ecstasy

Hours: 24S

Religion can be understood as a set of aspirations that manages and moralizes the most intimate matters of social life, including sexual intercourse, bodily fluids, and mind-altering substances. This course engages fundamental theories of religion to consider an eclectic set of case studies that troubles a clean divide between purity and danger. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Humanities

Breadth Requirements: Creative and Cultural Representations (1)
RLG197H1 - Enchantment, Disenchantment, Re-Enchantment

Hours: 24L

Modernity is associated with disenchantment, secularisation and progress, and has traditionally been understood as the successor to the enchanted, spiritual, and transcendent worldviews of antiquity and the middle ages. Re-enchantment, a term increasingly encountered in popular and academic contexts alike, demonstrates nostal gia for an enchanted past, a discomfort with the modern narrative, and a desire to recover wonder. This course will examine the history of enchantment through a series of readings taken from literature, philosophy, theology, ranging from Plato to contemporary magical realism. Restricted to first-year students. Not available for CR/NCR option.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

RLG198H1 - Dystopia: Religion & Gender in Science Fiction

Hours: 24L

This course will examine the "what ifs" and imagined worlds of ideal utopias and oppressive dystopias through the lens of religion and gender in Margaret Atwood’s The Handmaid’s Tale and Charlotte Perkins Gilman’s Herland. Because science fiction and utopian/dystopian literature expresses what an author sees as possible or hopes is possible, but also fears is possible, we will consider science fiction as a political and social critique. Themes to be covered include fundamentalism, totalitarianism, the relationship between technology and religion, religion and reproductive rights, and the potential relationship between religion, gender and oppression. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

RLG199H1 - Religion for Grown-Ups?

Hours: 24L

Kant, the great modern philosopher, famously describes enlightenment as our release from self-incurred immaturity or minority. That is, according to Kant, we don’t want to grow up. Our immaturity is facilitated especially by religion, whose demands for deference to the authority of texts, traditions, and gods often prevent us from taking full responsibility for our thoughts and actions. But need religion play this role? Is there a religion for grown-ups? This course explores those questions by reading autobiographical accounts of philosophers who describe how their study of philosophy either strengthened or strangled their youthful religious convictions. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

RLG200H1 - The Study of Religion

Previous Course Number: RLG200Y1
Hours: 24L/12T

An introduction to the discipline of the study of religion. This course surveys methods in the study of religion and the history of the discipline in order to prepare students to be majors or specialists in the study of religion.

Prerequisite: Open to Religion Specialists and Majors
Exclusion: RLG200Y1, RLG810H5, RLG405H5
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

RLG201H1 - Indigenous Religions

Hours: 24L/12T

A historical and thematic introduction to Indigenous religions.

Prerequisite: None
Corequisite: None
Exclusion: None
Recommended Preparation: None
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

RLG202H1 - Judaism

Hours: 24L/12T

An introduction to the religious tradition of the Jews, from its ancient roots to its modern crises. Focus on great ideas, thinkers, books, movements, sects, and events in the historical development of Judaism through its four main periods - biblical, rabbinic, medieval, and modern.

Exclusion: RLG202H5, RLG202Y1
Recommended Preparation: RLG100Y1/RLG200H1/RLG280Y1
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

RLG203H1 - Christianity

Hours: 24L/12T

An introduction to the Christian religious tradition as it has developed from the 1st century C.E. to the present and has been expressed in teachings, institutions, social attitudes, and the arts.

Exclusion: RLG203H5, RLG203Y1
Recommended Preparation: RLG100Y1/RLG200H1/RLG280Y1
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)
RLG204H1 - Islam
Hours: 24L/24T
The faith and practice of Islam: historical emergence, doctrinal development, and interaction with various world cultures. Note: this course is offered alternatively with NMC283Y1, to which it is equivalent.

Exclusion: NMC185Y1, NMC185H1, NMC283Y, RLG204H5, RLG204Y1
Recommended Preparation: RLG100Y1/RLG200H1/RLG280Y1
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

RLG205H1 - Hinduism
Hours: 24L/24T
A historical and thematic introduction to the Hindu religious tradition as embedded in the socio-cultural structures of India.

Exclusion: RLG205H5, RLG205Y1
Recommended Preparation: RLG100Y1/RLG200H1/RLG280Y1
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

RLG206H1 - Buddhism
Hours: 24L/24T
The development, spread, and diversification of Buddhist traditions from southern to northeastern Asia, as well as to the West.

Exclusion: RLG206H5, RLG206Y1
Recommended Preparation: RLG100Y1/RLG200H1/RLG280Y1
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

RLG208H1 - Sikhism
Hours: 24L
A historical and thematic introduction to the Sikh religious tradition as embedded in the socio-cultural structures of India.

Prerequisite: None
Corequisite: None
Exclusion: RLG207H5
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

RLG209H1 - Justifying Religious Belief
Hours: 24L
A survey course that introduces students to a range of epistemological and ethical issues in the study of religion. The issues include: the justification of religious belief; the coherence of atheism; reason vs. faith; the nature of religious language; religious pluralism, exclusivism, and inclusivism.

Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

RLG211H1 - Psychology of Religion
Hours: 24L/12T
A survey of the psychological approaches to aspects of religion such as religious experience, doctrine, myth and symbols, ethics and human transformation. Attention will be given to phenomenological, psychoanalytic, Jungian, existentialist, and feminist approaches.

Distribution Requirements: Social Science
Breadth Requirements: Thought, Belief and Behaviour (2)

RLG212H1 - Anthropology of Religion
Previous Course Number: RLG212Y1
Hours: 24L/24T
Anthropological study of the supernatural in small-scale non-literate societies. A cross-cultural examination of systems of belief and ritual focusing on the relationship between spiritual beings and the cosmos as well as the rights and obligations which arise therefrom. Among the topics covered are: myth and ritual; shamanism and healing; magic, witchcraft and sorcery; divination; ancestor worship.

Exclusion: RLG212Y1
Distribution Requirements: Social Science
Breadth Requirements: Thought, Belief and Behaviour (2)
RLG213H1 - Embarrassment of Scriptures

Hours: 24L/12T

Surveys interpretative traditions related to sacred texts, focusing on reading strategies that range from the literal to the figurative with attention to rationales that transform literal textual meanings and copyists manipulations of texts. May focus on various religious traditions from year to year, targeting a single canonical tradition or comparative analysis. Students will gain insight into literalist, environmentalist, secularist and erotic approaches to texts. Prior exposure to the study of religion is not required; all readings will be in English.

Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

RLG214H1 - Mythologies and Religion

Hours: 24L

Myths and legends are narrative means for humans to make sense of their environment, the organization of their societies, and their social practices. This course introduces the principal myths and mythological figures of a selection of mythic systems (Near Eastern, Celtic, Nordic, Slavic and Indigenous North American) as way of modelling the world. Such topics as creation, chaos and order, love and death, coming of age, the monstrous, and explanations of evil and misfortune, and the survival and the transformation of mythic and folkloric elements.

Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

RLG230H1 - Religion, Law and Society

Hours: 24L/12T

The course examines various issues, including: Canadian society and secularization; religious pluralism and legal pluralism; the role of religions in public contexts; land and property; marriage and women’s rights; and the place of minority religious communities.

Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

RLG232H1 - Religion and Film

Previous Course Number: RLG390H1
Hours: 24L

The role of film as a mediator of thought and experience concerning religious worldviews. The ways in which movies relate to humanity’s quest to understand itself and its place in the universe are considered in this regard, along with the challenge which modernity presents to this task. Of central concern is the capacity of film to address religious issues through visual symbolic forms.

Prerequisite: 4.0 credits
Exclusion: RLG390H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

RLG233H1 - Religion and Popular Culture

Hours: 36L

A course on the interactions, both positive and negative, between religion and popular culture. We look at different media (television, advertising, print) as they represent and engage with different religious traditions, identities, and controversies.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

RLG235H1 - Religion, Gender, and Sexuality

Hours: 24L

Examination of gender as a category in the understanding of religious roles, symbols, rituals, deities, and social relations. Survey of varieties of concepts of gender in recent feminist thought, and application of these concepts to religious life and experience. Examples will be drawn from a variety of religious traditions and groups, contemporary and historical.

Prerequisite: See note above for general prerequisites
Exclusion: RLG314H5
Distribution Requirements: Social Science
Breadth Requirements: Thought, Belief and Behaviour (2)

RLG239H1 - Special Topics

Hours: 24L

Some topic of central interest to students of religion, treated on a once-only basis. For details of this years offering, consult the Departments current undergraduate handbook.

Distribution Requirements: Humanities
RLG241H1 - Early Christian Writings I

Hours: 24L/12T

An introduction to early Christian writings, including the 'New Testament,' examined within the historical context of the first two centuries. No familiarity with Christianity or the New Testament is expected.

Exclusion: RLG241H5; RLG341H5; HUMC14H3; RLG241Y1
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

MHB255H1 - Intermediate Modern Hebrew I

Hours: 36L/12T

Intensive study of written and spoken Hebrew.

Prerequisite: MHB156H1/NML156H1 or permission of instructor
Exclusion: Grade 8 Hebrew (or Ulpan level 2 in Israel)/NML255Y1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

MHB256H1 - Intermediate Modern Hebrew II

Hours: 36L/12T

Continued intensive study of written and spoken Hebrew.

Prerequisite: MHB255H1/NML156H1 or permission of instructor
Exclusion: Grade 8 Hebrew (or Ulpan level 2 in Israel)/NML255Y1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

RLG260H1 - Introduction to Sanskrit I

Previous Course Number: RLG260Y1
Hours: 48L

The first semester of an introduction to Classical Sanskrit for beginners. Students build grammar and vocabulary, and begin to read texts in Sanskrit. Complete beginners are welcome. Two sections of the course will be offered: an on-campus class meeting and an online section via live webinar participation. The final exam will require attendance on the St. George campus, or in another authorized exam centre.

Exclusion: RLG260Y1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

RLG261H1 - Introduction to Tibetan I

Previous Course Number: RLG261Y1
Hours: 48L

An introduction to Classical Tibetan language for beginners. Development of basic grammar and vocabulary, with readings of simple texts. Two sections of the course may be offered: an on-campus class meeting and an online section. The final exam will require attendance on the St. George campus, or in another authorized exam centre.

Exclusion: RLG261Y1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

RLG262H1 - Introduction to Tibetan II

Previous Course Number: RLG261Y1
Hours: 48L

The second semester of an introduction to Classical Tibetan language course for beginners. Continued work on grammar and vocabulary, advancing to reading texts. Two sections of the course may be offered: an on-campus class meeting and an online section. The final exam will require attendance on the St. George campus, or in another authorized exam centre.

Prerequisite: RLG261H1
Exclusion: RLG261Y1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

RLG263H1 - Introduction to Sanskrit II

Previous Course Number: RLG260Y1
Hours: 48L

The second semester of an introduction to Classical Sanskrit for beginners. Students continue to build grammar and vocabulary, and use that knowledge to read texts in Sanskrit. Two sections of the course will be offered: an on-campus class meeting and an online section via live webinar participation. The final exam will require attendance on the St. George campus, or in another authorized exam centre.

Prerequisite: RLG260H1
Exclusion: RLG260Y1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)
RLG264H1 - Introductory Pali I

Hours: 36L

This course offers an opportunity to students interested in Buddhism to read, analyze, and discuss select simple passages from the scriptures of the Theravada canon in their original language. It will cover philosophical, psychological, and narrative texts and their interpretation, as well as provide a first exposure to the Pali Language.

Prerequisite: None
Corequisite: None
Exclusion: None
Recommended Preparation: None
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

RLG265H1 - Introductory Pali II

Hours: 24L/12T

This course offers an opportunity to students interested in Buddhism and with basic knowledge of Pali to read, analyze, and discuss select simple passages from the scriptures of the Theravada canon in their original language. It will cover philosophical, psychological, and narrative texts and their interpretation.

Prerequisite: RLG264H1 or equivalent capacity to read Pali texts in the original
Corequisite: None
Exclusion: None
Recommended Preparation: None
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

RLG280Y1 - World Religions: A Comparative Study

Hours: 48L/24T

An alternative version of the content covered by RLG100Y1, for students in second year or higher who cannot or do not wish to take a further 100-level course. Students attend the RLG100Y1 lectures and tutorials but are expected to produce more substantial and more sophisticated written work, and are required to submit an extra written assignment.

Prerequisite: Completion of 5.5 full course equivalents
Exclusion: RLG100Y1/RLGA01H3/RLGA02H3
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3); Thought, Belief and Behaviour (2)

RLG290Y1 - Special Topics

Hours: 24S

Topics vary from year to year Please check Department handbook.

Distribution Requirements: Humanities

JAR301H1 - Plagues and Peoples: From Divine Intervention to Public Health

Hours: 24L/12T

Infectious diseases have afflicted human societies throughout the history of our species. How are diseases shaped by the societies in which they spread, and how do they change culture and politics in turn? This course introduces perspectives from medical anthropology and religious studies to analyze the intersection of cultural, religious and scientific narratives when people confront plagues. We focus on historical and contemporary examples, such as the Spanish flu and COVID-19, giving students the tools to understand how cultural institutions, religious worldviews, and public health epidemiology shape living and dying during a pandemic.

Prerequisite: At least 4.0 credits
Distribution Requirements: Social Science
Breadth Requirements: Thought, Belief and Behaviour (2)

JNR301H1 - The History of Buddhist Meditation

Hours: 36L

This course will survey historical, cultural, and textual contexts for Buddhist meditative and contemplative practices and techniques.

Prerequisite: RLG206H1/NEW232Y1/NEW232H1
Corequisite: None
Exclusion: None
Recommended Preparation: None
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)
RLG301H1 - Religion on the Couch: Freud and Jung on Religion

Hours: 24L

Critical analysis of Freud's main writings on religion, with particular attention paid to the concepts unconscious, Oedipal trauma and its transmission, dreams, symbols, and unconscious communication. Comparisons with Jung include approaches to the unconscious, symbols and archetypes. Jung's theory of synchronicity and Freud's theory of thought-transference, and their implications for different understandings of the unconscious and archaic inheritance, along with their implications for Freud's and Jung's approach to religion will be explored.

Prerequisite: Completion of 4.0 credits
Distribution Requirements: Social Science
Breadth Requirements: Thought, Belief and Behaviour (2)

RLG302H1 - Dreams, Visions and the Invisible

Previous Course Number: RLG249H1

In many cultures, dreaming is understood to open pathways to unseen realities and worlds populated by spirit beings, souls of the dead, noetic powers and avenues to mystical union. Dreams include visions, daydreams, and dissociative, altered states of consciousness. This course examines contributions from a variety of disciplines such as psychoanalytic psychology, anthropology, biblical criticism, neuroscience, and paleo-archaeology to the study of religious experiences. Topics include how human beings negotiate the contents of their minds that result in social and political agreements that distinguish what is deemed as real, thereby constituting acceptable religious experience. The course will also discuss crisis apparitions, alien abduction accounts, spirit possession and existence of life after death as culturally specific religious narratives that seek to articulate and organize dreams and other visionary experiences.

Prerequisite: Completion of 4.0 credits
Exclusion: RLG249H1
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

RLG303H1 - Evil and Suffering

Hours: 24L

The existence of evil poses a problem to theistic beliefs and raises the question as to whether a belief in a deity is incompatible with the existence of evil and human (or other) suffering. This course examines the variety of ways in which religions have dealt with the existence of evil.

Prerequisite: Completion of 4.0 credits
Distribution Requirements: Social Science
Breadth Requirements: Thought, Belief and Behaviour (2)

RLG304H1 - Language, Symbols, Self

Hours: 24L

Theories of the self that involve the constitutive role of language in its various forms. Problems of socially-conditioned worldviews and sense of self as related to discourse. Myth, symbol, metaphor, and literary arts as vehicles for personality development and self-transformation along religious lines.

Prerequisite: Completion of 4.0 credits
Distribution Requirements: Social Science
Breadth Requirements: Thought, Belief and Behaviour (2)

RLG305H1 - Material Religion

Hours: 24L

Religions are constituted by material forms, including bodies, shrines, films, icons, and ‘kitsch’. Anti-material impulses have also prompted many religious impulses, involving forms of iconoclasm that ironically demonstrate the power of objects. What is at stake in studying materiality? How might such a perspective transform our view of religion?

Prerequisite: Completion of 4.0 credits
Distribution Requirements: Creative and Cultural Representations (1)

RLG306H1 - Anthropology of Christianity

Hours: 24L

This course focuses on current debates in the fast-developing field of the anthropology of Christianity. Topics possibly included: the past and present influence of Christianity on anthropological thinking; historical interactions between missionaries and anthropologists; emerging transnational, charismatic Christian networks; the ‘Southernization’ of Christianity; Christianity and competing ideas of ‘the modern’.

Prerequisite: Completion of 4.0 credits
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)
RLG307H1 - Museums and Material Religion

Hours: 24L

Museums have long collected and curated religious objects for public audiences, with missionaries as a primary collections source. Multiple visits to the Royal Ontario Museum and other museums will enable students to think critically about how museums received and presented these objects, while engaging with the challenges of museum curation.

Prerequisite: Completion of 4.0 credits
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

RLG310H1 - Modern Atheism and the Critique of Religion: Hobbes to Kant

Hours: 24L

This course examines select modern thinkers and their critical approaches to the nature and significance of religious beliefs and practices. Hobbes, Spinoza, Hume, and Kant are among the major thinkers studied.

Prerequisite: Completion of 4.0 credits
Exclusion: RLG310Y1
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

RLG308H1 - Migration, Religion and City Spaces

Hours: 24L

Immigrants have transformed cities through religious practices. Explore how transnational migration has affected religious diversity and vitality in metropolitan areas. Through discussion, site visits and analysis, students will examine the ways that immigrants use religion to make home, challenges around the establishment of new religious structures, and policy designed to accommodate new religious practices and communities.

Prerequisite: 4.0 FCE
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

RLG311H1 - Gender, Body and Sexuality in Asian Traditions

Previous Course Number: RLG236H1
Hours: 24L/12T

A study of women in the religious traditions of South and East Asia, including historical developments, topical issues, and contemporary women’s movements.

Prerequisite: Completion of 4.0 credits
Exclusion: RLG236H1
Recommended Preparation: RLG235H1
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

RLG309H1 - Religion and Human Rights

Hours: 24L

The relationship and interaction between religious and ethical norms, social and political ideals, and systems of law. The course concerns the ongoing dialectic between religious and other values, the application of religious ideas to social orders, and questions of religious and human rights.

Prerequisite: Completion of 4.0 credits
Exclusion: RLG309H5, RLG309Y1
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

RLG312H1 - Gender, Body and Sexuality in Islam

Hours: 24L

An introduction to the role of women in Muslim societies in past and present. Topics include the status of women in the Quran and Islamic law, veiling, social change, and Islamic feminism.

Prerequisite: Completion of 4.0 credits
Exclusion: RLG251H1
Recommended Preparation: RLG100Y1/RLG200H1/RLG204H1/RLG204Y1/NMC283Y1/RLG204H5/RLG235H1
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)
RLG313H1 - Gender, Sexuality and Religion in the West

**Previous Course Number:** RLG237H1  
**Hours:** 24L/12T

This course is a comparative study of the significance of gender and sexuality within Judaism, Christianity, Islam, and new religious movements in Europe and the Americas. Topics may include historical, political, social, and legal contexts for changing approaches to gender and sexuality in these religions.

**Prerequisite:** Completion of 4.0 credits  
**Exclusion:** RLG237H1  
**Recommended Preparation:** RLG235H1  
**Distribution Requirements:** Humanities  
**Breadth Requirements:** Society and its Institutions (3)

---

RLG314H1 - Pilgrimage as Idea and Practice

**Previous Course Number:** RLG215H1  
**Hours:** 24L

The study of pilgrimage has become increasingly prominent in anthropology and religious studies in recent decades. Why should this be? This course provides some answers while engaging in a cross cultural survey and analysis of pilgrimage practices. We also explore whether research into pilgrimage has wider theoretical significance.

**Prerequisite:** Completion of 4.0 credits  
**Exclusion:** RLG215H1  
**Distribution Requirements:** Humanities  
**Breadth Requirements:** Society and its Institutions (3)

---

RLG316H1 - Martyrs, Mystics, and Saints

**Hours:** 24L/12T

An examination of the variety of ways in which religious traditions construct sanctity, articulate categories of exceptionalism, and how exceptional persons function within social systems. Consideration of gender and social status in definitions of sanctity. Focus varies from year to year, and may focus either on constructions of sanctity in one religious tradition, or comparatively, comparing and contrasting ideas of sainthood and martyrdom in Christianity, Judaism, Islam, Hinduism and/or Buddhism.

**Prerequisite:** Completion of 4.0 credits  
**Distribution Requirements:** Humanities  
**Breadth Requirements:** Thought, Belief and Behaviour (2)

---

RLG317H1 - Religious Violence and Nonviolence

**Hours:** 24L

Religious violence and nonviolence as they emerge in the tension between strict adherence to tradition and individual actions of charismatic figures. The place of violence and nonviolence in selected faith traditions.

**Prerequisite:** Completion of 4.0 credits  
**Exclusion:** RLG317H5  
**Distribution Requirements:** Humanities  
**Breadth Requirements:** Thought, Belief and Behaviour (2)

---

RLG318H1 - Religion and Nature

**Previous Course Number:** RLG228H1  
**Hours:** 24L

There is a complex relationship between nature, religion and the aesthetic expression of human spirituality. Religion and Nature will explore this relationship across a range of periods, from the antique to the contemporary. Our journeys, both philosophical and literary, will take participants through a range of biomes—desert, countryside, forest, mountains, tundra—and explore how these texts can help to redefine our place both in nature and as part of it.

**Prerequisite:** Completion of 4.0 credits  
**Exclusion:** RLG228H1  
**Distribution Requirements:** Humanities  
**Breadth Requirements:** Creative and Cultural Representations (1)

---

RLG319H1 - Death, Dying and Afterlife

**Previous Course Number:** RLG229H1  
**Hours:** 24L

This course introduces students to various religious approaches to death, the dead, and afterlife. Through considering different ways in which death has been thought about and dealt with, we will also explore different understandings of life and answers to what it means to be human.

**Prerequisite:** Completion of 4.0 credits  
**Exclusion:** RLG229H1  
**Distribution Requirements:** Humanities  
**Breadth Requirements:** Thought, Belief and Behaviour (2)
RLG320H1 - Judaism and Christianity in the Second Century

Hours: 24L

Judaism and Christianity in the period from 70 C.E. to 200 C.E. The course focuses on the relationship between the two religious groups, stressing the importance of the setting within the Roman Empire.

Prerequisite: Completion of 4.0 credits
Recommended Preparation: RLG241H1/RLG241Y1
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

RLG324H1 - The Apostle Paul and His Enemies

Hours: 24L

An examination of Paul's life and thought as seen in the early Christian literature written by him (the seven undisputed letters), about him (the Acts of the Apostles, the Acts of Paul) and in his name (the six disputed NT letters).

Prerequisite: Completion of 4.0 credits
Recommended Preparation: RLG241H1/RLG241Y1
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

RLG322H1 - Early Christian Gospels

Hours: 24L

Literary, historical, and rhetorical analyses of selected early Christian gospels. The gospels to be treated will vary, but each year will include a selection from the four canonical gospels and extra-canonical gospels (the Gospel of Thomas, the Gospel of Philip, the Gospel of Peter, the Gospel of Truth, infancy gospels, and fragments of Jewish-Christian gospels).

Prerequisite: Completion of 4.0 credits
Recommended Preparation: RLG241H1/RLG241Y1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

RLG326H1 - Roots of Early Christianity and Rabbinic Judaism

Hours: 24L

Analysis of selected documents of Second Temple Judaism in their historical contexts, as part of the generative matrix for both the early Jesus movement and the emergence of rabbinic Judaism.

Prerequisite: Completion of 4.0 credits including RLG202H1/RLG202Y1/RLG203H1/RLG203Y1
Exclusion: RLG326H5
Recommended Preparation: RLG241H1/RLG241Y1
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

RLG323H1 - Jesus of Nazareth

Hours: 24L

An examination of the historical Jesus based on a critical study of the earliest accounts of Jesus, with intensive study of the Gospels to determine what can be said about Jesus activities and teachings.

Prerequisite: Completion of 4.0 credits
Exclusion: RLG323H5
Recommended Preparation: RLG241H1/RLG241Y1
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

RLG328H1 - The Politics of Belief in Early Christianity

Hours: 24L

This course examines historical processes, negotiations, and strategies involved in the consolidation of discourses and practices of orthodoxy and heresy in Christianity from the second through fifth centuries. Topics include: intellectual, therapeutic, and social models of orthodoxy; methods of discipline; historical events and contexts; the political and social contexts of theological conflict; and the gendered production of the orthodox subject.

Prerequisite: Completion of 4.0 credits
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)
RLG329H1 - New Atheism and the Study of Religion

Hours: 24L

A course to look at the rise of a “new atheism” in the late 20th- and early 21st-century. This popular movement has gained traction in late modernity, renewing older arguments about the negative consequences of religion in public life. We shall examine this movement, tracking its rise, fall, and future, as we ponder the implications of New Atheism for the academic study of religion.

Prerequisite: 4.0 credits
Recommended Preparation: RLG200H1
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

RLG331H1 - Creation Narratives and Epistemologies

Hours: 24S

The course will examine the importance of Indigenous cultural knowledge and values as presented in various Indigenous Creation Narratives. Creation Narratives or Cosmological narratives have long been studied as mere mythology. Yet, it is in these very narratives that complex, layered, and nuanced epistemologies emerge. Often, these narratives not only lay the epistemological frameworks of cultural value systems, but they also contain what many refer to as original instructions and purpose for the “Original People”.

Prerequisite: 4.0 FCE
Breadth Requirements: Creative and Cultural Representations (1)

RLG334H1 - Religion, Space and Diaspora

Hours: 24L

This course explores the transformation of religion, space and practices in diasporic settings. How is space adapted to the sensibilities of diasporic subjects, and how are the ritual practices that take place in those spaces transformed? The course examines historical and contemporary examples of the impact of diasporas, exile, and immigration on spatial practices in synagogues, churches, mosques, and temples, and ritual transformations in diaspora.

Prerequisite: Completion of 4.0 credits
Recommended Preparation: RLG100Y1; RLG200H1
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

RLG336H1 - Religion and its Monsters

Hours: 24L

A course looking at the theories about and responses to the monstrous in global religious traditions and practices.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

RLG337H1 - Witchcraft and Magic in Christian Tradition

Hours: 24L/12T

This course considers the history and theory of Western witchcraft, magic, and heresy in the medieval and early modern periods. Consideration of relevant anthropological theory, the relationship between constructions of witchcraft, the Enlightenment and the rise of science, and the role of gender in definitions of witchcraft.

Prerequisite: Completion of 4.0 credits
Recommended Preparation: RLG203H1/RLG203Y1/RLG203H5
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

RLG339H1 - Religious Ethics: The Jewish Tradition

Previous Course Number: RLG221H1
Hours: 24L

A brief survey of the Jewish biblical and rabbinic traditions; the extension of these teachings and methods of interpretation into the modern period; common and divergent Jewish positions on pressing moral issues today.

Prerequisite: Completion of 4.0 credits
Exclusion: RLG221H1
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)
RLG340H1 - Classical Jewish Theology

Hours: 24L

A study of four great figures during critical moments in Jewish history, each of whom represents a turning point: Jeremiah (biblical era), Rabbi Akiva (rabbinic era), Moses Maimonides (medieval era), Franz Rosenzweig (modern era). Belief in God; Torah as law, teaching, tradition, revelation, eternity of Israel, meaning of Jewish suffering, problem of radical evil, history and messianism.

Prerequisite: Completion of 4.0 credits
Exclusion: RLG340Y1
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

RLG341H1 - Dreaming of Zion: Exile and Return in Jewish Thought

Hours: 24L

An inquiry into the theme of exile and return in Judaism, often called the leading idea of Jewish religious consciousness. Starting from Egyptian slavery and the Babylonian exile, and culminating in the ideas of modern Zionism, the course will examine a cross-section of Jewish thinkers--ancient, medieval, and modern.

Prerequisite: Completion of 4.0 credits
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

RLG342H1 - Judaism in the Early Modern Era

Previous Course Number: RLG342Y1

Hours: 24L

The development and range of modern Jewish religious thought from Spinoza, Mendelssohn and Krochmal, to Cohen, Rosenzweig and Buber. Responses to the challenges of modernity and fundamental alternatives in modern Judaism.

Prerequisite: Completion of 4.0 credits
Exclusion: RLG342Y1
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

RLG343H1 - Kabbala: A History of Mystical Thought in Judaism

Hours: 24L

A historical study of the Kabbala and the mystical tradition in Judaism, with emphasis on the ideas of Jewish mystical thinkers and movements.

Prerequisite: Completion of 4.0 credits
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

RLG344H1 - Antisemitism

Hours: 24L

Explores how “Jews” have been viewed (often mistakenly and confusedly) in various contexts from pre-Christian antiquity to the contemporary world. Emphasis is on problems involved in defining and explaining antisemitism, especially concerning the difference between religious and racial forms of antisemitism.

Prerequisite: Completion of 4.0 credits
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

RLG345H1 - Social Ecology and Judaism

Hours: 24L

The environment and human society studied as systems of organization built for self-preservation. Such topics as vegetarianism and the humane treatment of animals, suicide and euthanasia, sustainability and recycling, explored from the perspective of Judaism.

Prerequisite: Completion of 4.0 credits
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

RLG346H1 - Time and Place in Judaism

Hours: 24L

The meaning of holy time and holy place, the physics and metaphysics of time and space within Judaism. Topics include the garden of Eden, the temple, the netherworld, the land of Israel, and exile; the sabbath and the week; the human experience of aging as fulfillment and failing.

Prerequisite: Completion of 4.0 credits
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)
RLG347H1 - Judaism in the Late Modern Era
Hours: 24L
Continuing from, but not presupposing, "Judaism in the Early Modern Era," the course will trace the late modern stages in the development of Jewish thought, and will bring the history of modern Jewish thought to the present.

Prerequisite: Completion of 4.0 credits
Recommended Preparation: RLG342H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

RLG348H1 - Philosophical Responses to the Holocaust
Previous Course Number: RLG220H1
Hours: 24L
This course deals with how the momentous experience of the Holocaust, the systematic state-sponsored murder of six million Jews as well as many others, has forced thinkers, both religious and secular, to rethink the human condition.

Prerequisite: Completion of 4.0 credits
Exclusion: RLG220H1
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

RLG349H1 - Special Topics in Judaism
Hours: 24S
Topics in Judaism. Themes vary from year to year.

Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

RLG350H1 - The Life of Muhammad
Hours: 24L
This course examines Muhammad's life as reflected in the biographies and historical writings of the Muslims. Students will be introduced to the critical methods used by scholars to investigate Muhammad's life. Issues include: relationship between Muhammad's life and Quran teachings and the veneration of Muhammad.

Prerequisite: Completion of 4.0 credits
Recommended Preparation: RLG204H1/RLG204H5
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

RLG351H1 - The Quran: An Introduction
Hours: 24L
The revelatory process and the textual formation of the Quran, its pre-eminent orality and its principal themes and linguistic forms; the classical exegetical tradition and some contemporary approaches to its interpretation.

Prerequisite: Completion of 4.0 credits
Exclusion: NMC285H1, NMC285Y1,NMC286H1
Recommended Preparation: RLG204H1/RLG204H5
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

RLG352H1 - Post-Colonial Islam
Hours: 24L
This course will study Islam in a post-colonial framework. It will introduce students to the work of post-colonial studies, and how critical scholarship has transformed our understanding of monolithic concepts such as modernity, the nation and Islam. It will focus on the particular case of Islam in South Asia and the Middle East by exposing students to the transformative impact of colonialism. It will equip students with the tools to challenge the hegemonic notion of a singular 'tradition' in Islam by tracing its lineages in the post-colony.

Prerequisite: Completion of 4.0 credits
Exclusion: NMC381Y1, RLG250H1
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

RLG353H1 - The Politics of Charity
Previous Course Number: RLG250H1
Hours: 24L
The course examines religious charitable giving, philanthropic foundations, and humanitarian aid and asks: Is charitable giving altruistic or is it always partly self-interested? Could aid perpetuate poverty? What kinds of "strings" come with receiving aid and is there such thing like a free gift?

Prerequisite: Completion of 4.0 credits
Exclusion: RLG250H1
Distribution Requirements: Social Science
Breadth Requirements: Thought, Belief and Behaviour (2)
MHB355H1 - Advanced Modern Hebrew I

Hours: 36L/12T

Advanced intensive study of written and spoken Hebrew.

Prerequisite: MHB256H1/NML255Y1 or permission of instructor
Exclusion: OAC Hebrew/NML355Y1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

MHB356H1 - Advanced Modern Hebrew II

Hours: 37L/12T

Continued advanced intensive study of written and spoken Hebrew.

Prerequisite: MHB355H1 or permission of instruc
Exclusion: OAC Hebrew/NML355Y1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

RLG355H1 - Living Islam

Hours: 24S

This course introduces students to studies of contemporary Islam that are based on extensive periods of research with Muslim communities in their own languages using anthropological methods. What do such studies teach us about the varied ways Muslims engage their religious tradition in the modern world? And how can such studies make us think differently about gender, economy, medicine, and secularism?

Prerequisite: Completion of 4.0 credits
Distribution Requirements: Social Science
Breadth Requirements: Thought, Belief and Behaviour (2)

RLG356H1 - Islam in China

Hours: 24S

Despite having an estimated Muslim population of 20 million, the place of Islam within the Peoples Republic of China is not widely understood. This course will examine the history of Islam in China from its introduction in the seventh century through the modern period. Emphasis will be placed on the variety of practices within Chinas contemporary Muslim communities. Specific attention will be paid to official state policy toward the Hui and Uygur ethnic minorities, including laws governing pilgrimage, the veil, the formation of Islamic organizations, the reformation of writing systems and so on.

Prerequisite: Completion of 4.0 credits
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

RLG358H1 - Special Topics in Hinduism

Hours: 24L

Topics in Hinduism. Themes vary from year to year.

Prerequisite: Completion of 4.0 credits
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

RLG359H1 - Intermediate Sanskrit I

Hours: 24L

Review of grammar and the development of vocabulary with a focus on reading simple narrative prose and verse.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

RLG360H1 - Intermediate Sanskrit II

Hours: 24S

Review of grammar and the further development of vocabulary with a focus on reading simple narrative prose and verse.

Prerequisite: RLG359H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)
RLG361H1 - Literatures of Hinduism

Hours: 24L

A study of the literatures of Hinduism in India and the diaspora, including issues of identity formation, nostalgic constructions of the "homeland", fictional representations, and the quest for authenticity.

Prerequisite: Completion of 4.0 credits
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

RLG362H1 - Rama of Ayodhya: From Literature to Politics

Hours: 24L

A study of the figure of Rama, from his genesis in the Valmiki Ramayana, to his historical evolution as a cultural and political icon through mediaeval and modern India.

Prerequisite: Completion of 4.0 credits
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

RLG363H1 - Bhakti Hinduism

Hours: 24L

A study of Hindu bhakti traditions through classical and vernacular texts, in conversation with colonial and post-colonial theoretical perspectives on the notion of "bhakti" in Hinduism.

Prerequisite: Completion of 4.0 credits
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

JPR364Y1 - Religion and Politics

Hours: 48L

This course examines the evolving role of religions in contemporary public, political contexts. Themes include: democracy and secularism; religion, human rights, law and justice; party politics, identity-formation and citizenship; gender and sexuality; interreligious conflict. (Given by the Departments of Political Science and Religion)

Prerequisite: 1.0 POL credit/1.5 full course equivalents in Religious Studies
Exclusion: RLG230H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3); Thought, Belief and Behaviour (2)

RLG365H1 - Modern Hinduism

Hours: 24L

The development of modern Hindu religious thought in the contexts of colonialism, dialogue with the West and the secular Indian state.

Prerequisite: RLG100Y1/RLG205Y1/RLG280Y1; see note above for general Prerequisites
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

RLG366H1 - Hindu Philosophy

Hours: 24L

A study of different schools, texts, and issues of Hindu philosophy.

Prerequisite: RLG100Y1/RLG205Y1/RLG280Y1; See note above for general Prerequisites
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

RLG368H1 - Hindu Ways of Living

Hours: 24L

The course surveys the textual sources of the practices of Yoga, Ayurveda and Hindu traditions such as domestic rituals, rites of passage and community centered religious activity. It critically evaluates the assumption of an unbroken continuity of tradition of these practices from antiquity onwards and comes to consider what they have come to constitute as a result of modernity and globalization.

Prerequisite: Completion of 4.0 credits
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

RLG369H1 - The Mahabharata

Hours: 24L

A study of the great Sanskrit epic, the Mahabharata.

Prerequisite: Completion of 4.0 credits
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)
RLG370Y1 - Intermediate Tibetan

Hours: 48L

Intermediate level language course focusing on both spoken and literary forms of Tibetan.

Prerequisite: The equivalent of one year of Tibetan language training.

Distribution Requirements: Humanities

Breadth Requirements: Creative and Cultural Representations (1)

RLG371H1 - Interdependence

Hours: 24L/12P

An exploration of the Buddhist concept of interdependence, or interdependent origination, from doctrinal and contemplative perspectives, as presented in classic Buddhist texts and as used in contemporary environmental and activist movements globally.

Prerequisite: Completion of 4.0 credits

Recommended Preparation: RLG206H1

Distribution Requirements: Humanities

Breadth Requirements: Creative and Cultural Representations (1)

RLG372H1 - Engaging Tibet

Hours: 24L

A course in Tibetan Studies, with a different focus each year. Topics may include Tibetan Buddhist literature, Tibetan Buddhism and medicine, Tibet as a historical entity, the Tibetan diaspora, geographic perceptions of Tibet, or foreign representations of Tibet and Tibetan Buddhism.

Prerequisite: Completion of 4.0 credits

Recommended Preparation: RLG206H1/RLG206H5

Distribution Requirements: Humanities

Breadth Requirements: Thought, Belief and Behaviour (2)

RLG373H1 - Buddhist Ritual

Hours: 24L

Daily worship, the alms round, life-crisis celebrations, healing rituals, meditation, festivals, pilgrimage, the consecration of artefacts and taking care of the ancestors are among the forms of Buddhist ritual introduced and analyzed in this course. Liturgical manuals, ethnographic descriptions and audiovisual records form the basis for a discussion of the role of ritual as text and event.

Prerequisite: See note above for general prerequisites

Recommended Preparation: RLG206Y1/RLG206H5

Distribution Requirements: Humanities

Breadth Requirements: Thought, Belief and Behaviour (2)

JPR374H1 - Religion and Power in the Postcolony

Hours: 24L

This course examines the role of a variety of religious forms and spiritual practices in the politics of postcolonial societies, tracing their genealogies from the colonial period to the present. Cases taken principally from Africa and Asia. (Given by the Departments of Political Science and Religion)

Prerequisite: 1.0 POL 200-level credit/1.5 full course equivalents in Religious Studies

Distribution Requirements: Social Science

Breadth Requirements: Society and its Institutions (3)

RLG374H1 - Buddhist Life Stories

Hours: 24L

This course explores the genres of autobiography and biography in Buddhist literature. The course will begin with theoretical studies on narrative and religious life-writing. We will then consider the development and distinctive features of auto/biographies and hagiographies in the literature of one or more Buddhist cultures, analyzing representative examples of these genres from a range of traditions and historical periods, and considering how these sources have been understood and used in secondary scholarship.

Prerequisite: Completion of 4.0 credits

Distribution Requirements: Humanities

Breadth Requirements: Creative and Cultural Representations (1)
RLG375H1 - Biohacking Breath - Experiential Learning

**Hours:** 24L/24P

This course explores Buddhist practices of manipulating – or “biohacking” – the breath or “winds” (prāna) of the human body, covering relevant theories of human anatomy and physiology and the religious, philosophical, and medical teachings alongside which these practices developed. Intentional breathing practices in the history of European thought and the role of breathwork in contemporary global biohacking movements will also be studied for comparison and contrast. During experiential lab sessions, basic prānāyāma and other breathing practices will be learned and practiced with the guidance of qualified teacher-practitioners.

**Prerequisite:** 4.0 credits
**Distribution Requirements:** Humanities
**Breadth Requirements:** Creative and Cultural Representations (1)

RLG379H1 - Religions of the Silk Road

**Previous Course Number:** RLG245H1
**Hours:** 24L

An historical introduction to the religious traditions that flourished along the Silk Road, including Zoroastrianism, Manichaeanism, Nestorian Christianity, Judaism, Buddhism and Islam. Drawing on a variety of sources (textual, archaeological, works of art), the course will focus on the spread and development of these traditions through the medieval period. Issues include cross-cultural exchange, religious syncretism, ethnic identity formation and so on. Emphasis will also be placed on religious and political events in modern Central Asia.

**Prerequisite:** Completion of 4.0 credits
**Exclusion:** RLG245H1
**Distribution Requirements:** Humanities
**Breadth Requirements:** Thought, Belief and Behaviour (2)

RLG383H1 - Interpretation and Dialogue

**Hours:** 24L

Can we understand the beliefs and behaviors of people whose religious and cultural outlooks differ radically from our own? Do we always impose our preconceptions on them? Or are there cognitive, imaginative, and emotional resources that enable us to see people on their own terms? These questions, which beset the practices of anthropologists and historians of religions, are central to the philosophy of the human sciences. This course explores the theoretical issues involved in interpretation and dialogue across cultural and historical divides by reading seminal texts by Dilthey, Collingwood, Heidegger, Quine, Davidson, Winch, MacIntyre, Benedict, Geertz, and Rorty.

**Prerequisite:** Completion of 4.0 credits
**Distribution Requirements:** Humanities
**Breadth Requirements:** Thought, Belief and Behaviour (2)

RLG384H1 - Pluralism and Toleration

**Hours:** 24L

This course traces the development of philosophical arguments in favor of toleration or pluralism that emerged first in response to bitter religious conflicts and then out of a growing recognition of the potential benefits of the normative diversity characteristic of modern societies. Typical philosophers to be studied are Bodin, Spinoza, Locke, Bayle, Lessing, Herder, and Mill.

**Prerequisite:** Completion of 4.0 credits
**Distribution Requirements:** Humanities
**Breadth Requirements:** Society and its Institutions (3)

RLG385H1 - Becoming Modern

**Hours:** 24L

What does it mean to be modern? Words like “modern,” “modernity,” and “modernism” are used to mark a fundamental boundary between our era and all that came before it (or lies outside of it); but most of us are hard-pressed to offer a solid account of what exactly this boundary is. This course examines the relationship between: a fundamental shift in the nature of daily experience; an order-of-magnitude expansion of the power of the State; a dramatic reorganization of religious experience and cultures; and a tremendous growth in the enterprise of Western science and technological production. We trace this reorientation over the last two centuries and examine its consequences using philosophical, literary, theological, and scientific sources, as well as recent scholarly work on the topic.

**Prerequisite:** Completion of 4.0 credits
**Recommended Preparation:** RLG231H1/RLG387H1
**Distribution Requirements:** Humanities
**Breadth Requirements:** Society and its Institutions (3)

RLG386H1 - Devotional Literature of Early Modern India

**Hours:** 24L/12T

This class is an introduction to the devotional literature of early modern India (c. 1500-1800), but more importantly, it is about thinking critically and developing skills in close reading of texts. In addition to learning about historical, religious, and social contexts of various literary traditions in Brajbhasha, students will be expected to demonstrate their ability to analyze and interpret texts by actively participating in class discussions and by writing a well-argued final paper. The focus will be on the what of literary traditions but also on the how and why these traditions made sense to people in the past and are still relevant to us, today.

**Prerequisite:** 4.0 credits
**Distribution Requirements:** Humanities
**Breadth Requirements:** Creative and Cultural Representations (1)
RLG387H1 - Religion and Science

Previous Course Number: RLG231H1
Hours: 24L

Course explores issues at the intersection of religion and science which may include such topics as evolution and the assessment of its religious significance by different traditions, conceptions of God held by scientists (theism, pantheism, panentheism), ethical issues raised by scientific or technological developments (cloning or embryonic stem cell research), philosophical analysis of religious and scientific discourses.

Prerequisite: Completion of 4.0 credits
Exclusion: RLG231H1
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

RLG388H1 - Special Topics I

Hours: 24L

Special Topics.

Distribution Requirements: Humanities

RLG389H1 - Special Topics II

Hours: 24L

Special Topics

Distribution Requirements: Humanities

RLG391H1 - Modern Atheism and Critique of Religion: Hegel to Nietzsche

Hours: 24L

Examines select modern thinkers and their critical approaches to the nature and significance of religious beliefs and practices. Hegel, Feuerbach, Marx, and Nietzsche are among the major thinkers studied.

Prerequisite: Completion of 4.0 credits
Exclusion: RLG310Y1
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

RLG392H1 - The European Enlightenment and Religion

Hours: 24L

This course explores some of the major thinkers of the European Enlightenment and their philosophical inquiries into the meaning and significance of religion as a set of cultural institutions. Special attention is paid to the analysis of religious concepts and institutions along epistemological, ethical, and political lines.

Prerequisite: Completion of 4.0 credits
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

RLG393H1 - Graphic Religion: Myth and the Spiritual in Graphic Novels

Previous Course Number: RLG234H1
Hours: 24L

Survey of themes connecting religious ideas, symbols, and representations with graphic novels and sequential art. The course will explore techniques of story-telling in mythic and visual representations in religious traditions and explore how these techniques and images are mirrored within popular comic-style (sequential) art.

Prerequisite: Completion of 4.0 credits
Exclusion: RLG234H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

RLG394H1 - Religion in the Game of Thrones

Hours: 24L

Religion weaves complex social logics and social rationales imbedded in all levels of culture. This course explores multiple questions of religion as a cultural element, both visible and invisible. Theories of religion as well as questions of gender, authority, and power will be examined. The course culminates in a student project oriented toward an academically oriented “Handbook” for the study of religion in the Game of Thrones.

Prerequisite: Completion of 4.0 credits
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)
RLG397H1 - Readings in Early Sikh Texts

**Hours:** 24L

This class is an introduction to early Sikh texts in their original language and in translation. In addition to learning the grammar of what Christopher Shackle has called 'the sacred language of the Sikhs' and acquiring translation skills, students will be expected to demonstrate their ability to analyze and interpret texts in relation to their contexts of production.

**Prerequisite:** Completion of 4.0 credits

**Distribution Requirements:** Humanities

**Breadth Requirements:** Creative and Cultural Representations (1)

---

RLG404H1 - Departmental Capstone-Research

**Hours:** 24S

An integrative capstone seminar that emphasizes iterative development of a research project, locating a research specialization within its broader disciplinary audience, and communicating the process and results of a research project to non-specialists within the study of religion. Open to Religion Specialists and Majors only.

**Prerequisite:** open to 4th year Religion Specialists and Majors

**Distribution Requirements:** Humanities
RLG405H1 - Departmental Capstone - Practical

Hours: 24S

A capstone seminar that emphasizes integration of the study of religion with contemporary public life in the development of a research project, locating a research specialization in relation to non-academic contexts, and communicating the process and results of a research project to non-academic audiences.

Prerequisite: open to 4th year Religion Specialists and Majors
Distribution Requirements: Humanities

RLG406H1 - Constructing Religion

Hours: 24S

How have different researchers constructed 'religion' as their object of study, and are some frameworks simply incompatible with each other? We discuss -- but also provide critical assessments of -- different theoretical and methodological frameworks.

Prerequisite: open to 4th year Religion Specialists and Majors
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

RLG407H1 - The World of "World Religion"

Hours: 24S

A seminar examining the development of western discourses of world religions. We shall explore the roots of these discourses and examine their implications in the academic study of religion in North America and in other parts of the world.

Prerequisite: Open to 4th year Religion Specialists and Majors
Recommended Preparation: RLG100Y1; RLG200H1
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

RLG410Y1 - Advanced Topics in Religion

Hours: 24S

Advanced Topics in Religion

Distribution Requirements: Humanities

RLG411H1 - Advanced Topics in Religion

Hours: 24S

Advanced Topics in Religion

Distribution Requirements: Humanities

RLG412H1 - Advanced Topics in Religion

Hours: 24S

Advanced Topics in Religion

Distribution Requirements: Humanities

RLG414H1 - Comparing Religions

Hours: 24S

Few methods have been more foundational to the scholarly study of religion, or more subject to searching criticism, than the practice of comparison. This seminar offers an advanced introduction to comparative method through close study of 4-6 recent works, from ritual studies, philosophy of religion, comparative theology and/or ethnography.

Prerequisite: Permission of instructor
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

RLG416H1 - Topics in Religion and Gender

Hours: 24S

Advanced study in specialized topics focusing on the intersection of religion and gender.

Prerequisite: Permission of instructor
Distribution Requirements: Humanities
RLG417H1 - Radical Evil

Hours: 24S

Interrogation of the concept of 'radical evil' from perspectives of philosophy, critical theory, psychoanalysis and the study of religion.

Prerequisite: Permission of instructor
Corequisite: None
Exclusion: None
Recommended Preparation: None
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

RLG418H1 - Advanced Topics in the Philosophical Study of Religion

Hours: 24S

A seminar that explores a topic in the philosophical study of religion. Possible topics include: the nature of religious truth; the phenomenology of religion; descriptions of the holy; religion and the meaning of life; God-talk as literal or metaphorical language; naturalizing religious belief.

Prerequisite: RLG209H1; Permission of instructor
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

JPR419H1 - Secularism and Religion

Previous Course Number: RLG419H1
Hours: 24S

Themes considered include what notion of religion is necessary for secular governance, and how secularity relates to particular discourses of citizenship and practices of political rule. Case studies include the effects of colonial rule on religious life; Jewish emancipation in Europe; and religious freedom in France and North America. (Given by the Departments of Political Science and Religion)

Registration in this course is through the Department of Religion.

Prerequisite: 2.0 200-level (or above) credits in Political Science or Study of Religion/permission of the instructor
Exclusion: RLG419H1
Distribution Requirements: Humanities; Social Science
Breadth Requirements: Society and its Institutions (3)

RLG420H1 - Religion and Philosophy in the European Enlightenment

Hours: 24S

An advanced study of selected Enlightenment thinkers with a focus on their interpretations of religion. The main thinkers discussed are Spinoza, Hume, and Kant. Issues include the rational critique of traditional religion, the relations among religion, ethics and politics, and the pursuit of universal approaches to religion.

Prerequisite: Permission of instructor
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

RLG421H1 - The Psychoanalytic Study of Religion

Hours: 24S

Advanced study of key figures past and present in the psychoanalytic study of religion, including Freud and other psychoanalytic interpreters from both Anglo-American and European traditions. Crucial distinctions between psychology of religion and the psychoanalytic study of religion. Permission of instructor.

Prerequisite: Permission of instructor
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

RLG422H1 - Kant's Theory of Religion

Hours: 24L/12S

An advanced study of Immanuel Kant’s theory of religion, as developed in major writings such as Critique of Practical Reason and Religion within the Boundaries of Mere Reason. Emphasizes rational ethical criteria as the basis for analyzing the doctrines, symbols, and institutions of historical religions.

Prerequisite: Permission of instructor
Recommended Preparation: RLG310Y1
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)
RLG425H1 - Hermeneutics and Religion

Hours: 24S

A study of how principles of textual interpretation and theories of language have been central to modern philosophy of religion. We begin with Schleiermacher, and then move to an in-depth treatment of the 20th century hermeneutical theories of Heidegger, Gadamer, and Ricoeur.

Prerequisite: Permission of instructor
Recommended Preparation: RLG310Y1
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

RLG426H1 - Religion in the Public Sphere Service-Learning Internship

Hours: 24S

For upper-year students, from any discipline. In a 40-hour community service placement, discover first-hand religion’s significance in Toronto and examine how religion manifests in public spaces, institutions, and interactions, while critically reflecting on the experience of working with professionals and their “clients” in settings where religious diversity is at play.

Prerequisite: RPS coordinator's permission required for admission to course
Distribution Requirements: Humanities

RLG428H1 - Religion and Economy

Hours: 24L

This course introduces students to classical and contemporary social scientific work on the relation between religion and economy. It draws on classics such as Marx, Weber, and Mauss, as well as recent anthropological work. Topics may include sacrifice, the gift, commodity fetishism, prosperity gospel, neoliberalism, charity, and development.

Prerequisite: Permission of instructor
Recommended Preparation: RLG212H1
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

RLG430H1 - Advanced Topics in Judaism

Hours: 24S

Advanced Topics in Judaism

Prerequisite: Permission of instructor
Distribution Requirements: Humanities

RLG431H1 - Advanced Topics in Judaism

Hours: 24S

Advanced Topics in Judaism

Prerequisite: Permission of the instructor
Distribution Requirements: Humanities

RLG432Y1 - Advanced Topics in Judaism

Hours: 48S

Advanced Topics in Judaism

Prerequisite: Permission of instructor
Distribution Requirements: Humanities

RLG433H1 - Maimonides and His Modern Interpreters

Hours: 24S

An introduction to The Guide of the Perplexed by Moses Maimonides, and to some of the basic themes in Jewish philosophical theology and religion. Among topics to be considered through close textual study of the Guide: divine attributes; biblical interpretation; creation versus eternity; prophecy; providence, theodicy, and evil; wisdom and human perfection. Also to be examined are leading modern interpreters of Maimonides.

Prerequisite: Permission of instructor
Exclusion: POL421H1
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

RLG434H1 - Modern Jewish Thought

Hours: 24S

Close study of major themes, texts, and thinkers in modern Jewish thought. Focus put on the historical development of modern Judaism, with special emphasis on the Jewish religious and philosophical responses to the challenges of modernity. Among modern Jewish thinkers to be considered: Spinoza, Cohen, Rosenzweig, Buber, Scholem, Strauss, and Fackenheim.

Prerequisite: Permission of instructor
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)
RLG435H1 - The Thought of Leo Strauss

Hours: 24S

The philosophic thought of Leo Strauss approached through his writings on modern Judaism. Primarily addressed will be the mutual relations between philosophy, theology, and politics. Among other topics to be dealt with: origins of modern Judaism, Zionism, liberal democracy, and biblical criticism; meaning of Jerusalem and Athens; cognitive value in the Hebrew Bible.

Prerequisite: Permission of instructor
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

RLG441H1 - Words and Worship in Christian Cultures

Hours: 24S

How are we to analyze the words that Christians use? And how are such words related to ritual forms? We explore techniques for the analysis of texts, while looking at forms of verbal discourse ranging from prayers, speaking in tongues, and citing the Bible to more informal narratives.

Prerequisite: ANT356H1/RLG212Y1 and permission of instructor
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

RLG443H1 - Genealogies of Christianity

Hours: 24S

How do disciplinary commitments shape theoretical and historical accounts of Christianity’s relationship to “modernity”? Through comparative analysis (including topics of science, colonialism, capitalism, and gender) students will develop an historically-grounded critique of the key terms: genealogy, Christianity, and modernity. Based on reading and seminar discussion, the course encourages interdisciplinary exchange.

Prerequisite: 3.0 FCEs in Religion or cognate courses; permission of the instructor
Recommended Preparation: Religion, history, anthropology, literature courses; writing intensive courses
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

RLG447H1 - Magic and Miracle in Early Christianity

Hours: 24L

Magic, religion, astrology, alchemy, theurgy, miracle, divination all of these phenomena characterize the context and practice of ancient Christianity. This course examines the constitution of these categories, the role and character of these phenomena in the Graeco-Roman world, and the interaction with and integration of these phenomena by ancient Christianity.

Prerequisite: RLG241Y1;
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

RLG448H1 - Pseudepigraphy in Ancient Mediterranean Religion

Hours: 24S

A seminar examining the phenomenon of falsely claimed and/or attributed authorship in religions of the ancient Mediterranean, mainly Christianity and Judaism. The course examines understandings of authorship and other cultural forms that facilitate or inhibit ancient pseudepigraphy, ancient controversies over authorship, as well as specific pseudepigraphical writings.

Prerequisite: Two half FCEs numbered RLG32*; permission of instructor
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

RLG449H1 - The Synoptic Problem

Hours: 24S

Investigation of the history of solutions to the Synoptic Problem from the eighteenth century to the present paying special attention to the revival of the Griesbach hypothesis and recent advances in the Two-Document hypothesis.

Prerequisite: RLG241Y1 or RLG241H1, and at least one of RLG320H1/RLG321H1/RLG322H1/RLG323H1/RLG324H1/RLG325H1/RLG326H1, and permission of instructor
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)
RLG451H1 - The Parables of Jesus

Hours: 24S

Examination of the parables in the gospels and other early Christian writers, and major trends in the modern analyses of the parables. Special attention will be paid to the social and economic world presupposed by the parables.

Prerequisite: RLG241Y1 or RLG241H1, and at least one of RLG320H1/RLG321H1/RLG322H1/RLG323H1/RLG324H1/RLG325H1/RLG326H1, and permission of instructor

Distribution Requirements: Humanities

Breadth Requirements: Creative and Cultural Representations (1)

RLG452H1 - The Death of Jesus

Hours: 24S

Examination of the accounts of the passion and death of Jesus in their original historical and literary contexts.

Prerequisite: RLG241Y1 or RLG241H1, and at least one of RLG320H1/RLG321H1/RLG322H1/RLG323H1/RLG324H1/RLG325H1/RLG326H1, and permission of instructor

Distribution Requirements: Humanities

Breadth Requirements: Creative and Cultural Representations (1)

RLG453H1 - Christianity and Judaism in Colonial Context

Hours: 24S

Sets the study of early Christianity and Second Temple Judaism into relation with postcolonial historiography. Topics include hybridity, armed resistance, the intersection of gender and colonization, diaspora, acculturation, and the production of subaltern forms of knowledge. Comparative material and theories of comparison are also treated.

Prerequisite: Permission of instructor

Distribution Requirements: Humanities

Breadth Requirements: Society and its Institutions (3)

RLG454H1 - Social History of the Jesus Movement

Hours: 24S

The social setting of the early Jesus movement in Roman Palestine and the cities of the Eastern Empire. Topics will include: rank and legal status; patronalia and clientalia; marriage and divorce; forms of association outside the family; slavery and manumission; loyalty to the empire and forms of resistance.

Prerequisite: RLG241Y1 or RLG241H1, and at least one of RLG320H1/RLG321H1/RLG322H1/RLG323H1/RLG324H1/RLG325H1/RLG326H1, and permission of instructor

Distribution Requirements: Humanities

Breadth Requirements: Society and its Institutions (3)

RLG455H1 - Heresy and Deviance in Early Christianity

Hours: 24S

A study of the construction of deviance or heresy within the literature of first and second century Christianity: tasks include a survey of sociological theory in its application to deviance in the ancient world and close readings of selected texts from first and second century Christian and pre-Christian communities.

Prerequisite: RLG241Y1 or RLG241H1, and at least one of RLG320H1/RLG321H1/RLG322H1/RLG323H1/RLG324H1/RLG325H1/RLG326H1, and permission of instructor

Distribution Requirements: Humanities

Breadth Requirements: Society and its Institutions (3)

JPR458H1 - Postsecular Political Thought: Religion, Radicalism and the Limits of Liberalism

Hours: 24S

The course will examine debates on postsecularism and religion’s public, political role as articulated by political thinkers such as Jurgen Habermas, by focusing on politically radical or revolutionary challenges to liberalism in the 20th and 21st century, especially from the postcolonial world, whose theoretical arguments are grounded upon or draw their inspiration from religious traditions, doctrines and practices.

Prerequisite: A 3rd year course in Political Science and/or Study of Religion

Distribution Requirements: Humanities

Breadth Requirements: Thought, Belief and Behaviour (2)
RLG458H1 - Advanced Topics in Islam

Hours: 24S

Advanced study of specialized topics in Islam.

Prerequisite: Permission of the instructor
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

JPR459H1 - Fanaticism: A Political History

Hours: 24S

This seminar in theory will explore the modern history of the concept of 'fanaticism' and its role in the development of political modernity. A focus on the concept of the "fanatic" (and its cognates) from the perspective of its various uses in political and religious thought from the Early Modern period through the Enlightenment and up to the present day, provides a fascinating opportunity for a critical review of the secular, rationalist, and scientific assumptions underwriting modern political forms and concepts, especially those of liberal democracy. At the same time, the course will offer critical insight into the ways in which religious and political differences among colonial "others" were, and continue to be, central to the elaboration of Western theoretical discourse on fanaticism and extremism as forms of "political pathology". (Given by the Departments of Political Science and Religion)

Prerequisite: (2 FCEs in Political Theory and/or Philosophy including 1.0 FCE at the 300 level) or (0.5 FCE in Method and Theory in the Study of Religion and 1 FCE at the 300 level in the Study of Religion)
Distribution Requirements: Social Science; Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

RLG460H1 - Ramayana in Literature, Theology, and Political Imagination

Hours: 24S

This course explores how this conception is the result of a historical process by examining documentable transformations in the reception of the Ramayana. Our focus will be on the shift in the classification of the Ramayana from the inaugural work of Sanskrit literary culture (adi-kavya) in Sanskrit aesthetics to a work of tradition (smrti) in theological commentaries, the differences between the Ramayanas ideal of divine kingship and medieval theistic approaches to Rama identification with Visnu, the rise of Rama worship, and the use of Rama divinity in contemporary political discourse.

Prerequisite: Permission of instructor
Recommended Preparation: RLG205Y1/RLG205H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

RLG462H1 - Newar Religion

Hours: 24L/24T

An academic legend recounts that if you ask a Newar whether he is Hindu or Buddhist the answer is yes. The course deals with the problem of how to study religions which coexist and compete with each other creating shifting coordinates of religious identification from the perspective of one specific Nepalese community.

Prerequisite: Permission of instructor
Recommended Preparation: RLG205Y1/ RLG206Y1/ RLG205H5/RLG206H5
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

RLG463H1 - Tibetan Buddhism

Hours: 24S

Close study of major themes, texts, and thinkers in Tibetan Buddhism. Themes and texts will vary by year; consult the departmental website for this year's course description.

Prerequisite: Permission of Instructor
Recommended Preparation: RLG206Y1/ RLG206H5
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

RLG465H1 - Readings in Buddhist Texts

Hours: 24S

An advanced study of select Buddhist texts with a focus on issues of translation, interpretation, commentarial approaches, narrative strategies, as well as issues related to the production, circulation, and consumption of these works. Themes and texts will vary by year; consult the departmental website for this year’s course description.

Prerequisite: Reading knowledge of Sanskrit/Pali/Tibetan or Chinese; permission of instructor
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)
RLG466H1 - Sravakayana and Theravada Text

Hours: 24S

An advanced study of key texts pertaining to the Theravada and other Sravakayana schools produced in Southern and Southeastern Asia from the early centuries BC till today with a focus on issues of translation, interpretation, commentarial approaches, doctrinal and narrative strategies, as well as issues related to the production, circulation, and consumption of these works. Texts will vary by year; consult the departmental website for this year’s course description.

Prerequisite: Reading knowledge in Sanskrit, Pali, Tibetan, Chinese or a pertinent Asian vernacular literary language
Corequisite: None
Exclusion: None
Recommended Preparation: Any 200 or 300 level Buddhism course
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

RLG467H1 - Reading Mahayana Texts

Hours: 24L

An advanced study of key texts pertaining to the Mahayana schools with a focus on issues of translation, interpretation, commentarial approaches, doctrinal and narrative strategies, as well as issues related to the production, circulation, and consumption of these works. Texts will vary by year; consult the departmental website for this year’s course description.

Prerequisite: Permission of the instructor
Recommended Preparation: Any 200- and 300-level Buddhism course
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

RLG468H1 - Special Topics in Buddhism

Hours: 24L

Advanced study of specialized topics in Buddhist Studies

Prerequisite: Permission of instructor
Recommended Preparation: RLG206Y1Y
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

RLG469Y1 - Readings in Tibetan

Hours: 48L/24S

Advanced readings in Tibetan literature using Tibetan language. Tibetan language skills required.

Prerequisite: Instructor's permission required for admission to course
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1); Thought, Belief and Behaviour (2)

RLG470H1 - Buddhist Tantra

Hours: 24L

A study of Tantric Buddhism, addressing ritual and scholastic practices, and problems of translation and interpretation. Themes will vary by year; consult the departmental website for this year’s course description.

Prerequisite: Permission of instructor
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

RLG471H1 - Special Topics in Hinduism

Hours: 24L

Advanced study in specialized topics on Hinduism.

Prerequisite: RLG205Y; Permission of instructor
Distribution Requirements: Humanities

RLG474H1 - Sanskrit Readings (1)

Hours: 24S

This course will have students read choice pieces of South Asian literature. While tackling a text in Sanskrit from a major literary tradition, Buddhist or Hindu, and discussing its content and context, students will learn strategies for translating and interpreting Sanskrit literature.

Prerequisite: Intermediate Sanskrit
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)
RLG478H1 - Burmese Religions

Hours: 24L

This course will question the statement that "to be a Burmese is to be a Buddhist" by introducing students to the variegated religious landscapes of Buddhist, Christian, Hindu, Judaic, and Muslim Burma/Myanmar through an analysis and discussion of historical, art-historical, anthropological, and literary sources.

Prerequisite: No
Corequisite: None
Recommended Preparation: RLG206H1 or RLG206H5
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

RLG479H1 - Burmese Buddhist Literature

Hours: 4L/20S

Burma, also known as Myanmar, offers one of the richest literary landscapes in the Buddhist world. This course introduces students to the Buddha’s sermons, to the animal lives of struggling bodhisattvas, to the poetic creativity of Mandalay princesses, to the intricacies of the Buddhist philosophy of mind, to the textual regimes of monastic dress codes, and to cosmographies of Buddhist kingship in the interface of South and Southeast Asian religions. Students will be trained to take a critical look at the fascinating world of Buddhist texts, inflected by the scriptural language of Pali, through a specifically Burmese prism.

Prerequisite: 4.0 FCE
Recommended Preparation: RLG206H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

RLG481H1 - Islamic Intellectual Tradition

Hours: 24S

This seminar covers three main areas of the Islamic intellectual tradition: legal, theological and mystical. Each section will be covered by reading an original work translated into English with the aid of secondary literature. The seminar will develop the students’ knowledge of the classical Islamic tradition. Students will choose a research topic and develop and present to the class a synopsis of their research. The seminar culminates in writing a research paper on one aspect of the Islamic religious tradition.

Prerequisite: Permission of the instructor
Recommended Preparation: RLG204H1/RLG204H5
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

RLG490Y1 - Independent Research

Hours: 48S

Student-initiated intensive research courses supervised by faculty members of the Department. The student must obtain both a Supervisor's agreement and the Department's approval in order to register. The maximum number of Independent Research courses one may take is two full-course equivalents. Deadline for submitting applications to Department, including Supervisor's approval, is the first week of classes of the session. A full-course may be compressed into a single session or spread through two sessions; a half-course may similarly be done in either one session or across two sessions. These courses are open to majors and specialists only. Not eligible for CR/NCR option.

Distribution Requirements: Humanities

RLG492H1 - Independent Research

Hours: 24S

Student-initiated intensive research courses supervised by faculty members of the Department. The student must obtain both a Supervisor's agreement and the Department's approval in order to register. The maximum number of Independent Research courses one may take is two full-course equivalents. Deadline for submitting applications to Department, including Supervisor's approval, is the first week of classes of the session. A full-course may be compressed into a single session or spread through two sessions; a half-course may similarly be done in either one session or across two sessions. These courses are open to majors and specialists only. Not eligible for CR/NCR option.

Distribution Requirements: Humanities

RLG493H1 - Independent Research

Hours: 24S

Student-initiated intensive research courses supervised by faculty members of the Department. The student must obtain both a Supervisor's agreement and the Department's approval in order to register. The maximum number of Independent Research courses one may take is two full-course equivalents. Deadline for submitting applications to Department, including Supervisor's approval, is the first week of classes of the session. A full-course may be compressed into a single session or spread through two sessions; a half-course may similarly be done in either one session or across two sessions. These courses are open to majors and specialists only. Not eligible for CR/NCR option.

Introduction

Rotman Commerce at the University of Toronto offers a rigorous curriculum combining studies in management, economics, and the arts and sciences for an enriched professional undergraduate experience. The program explores the role of commerce in modern society while developing skill and confidence in analysis, effective communications and decision making.

The Bachelor of Commerce degree builds on a common foundation of a range of business disciplines and economics. Rotman Commerce students specialize in one of three areas: Accounting, Finance and Economics, or Management. Each stream combines courses in management and applied economics with a variety of courses in the arts and sciences. The balance assures graduates of a solid understanding of business and modern society along with a command of critical skills across business disciplines, decision-making, and leadership.

Rotman Commerce graduates enter a wide range of professions, and frequently become financial analysts, accountants, marketing analysts, economists, managers of firms and government, or entrepreneurs. Some commerce students elect to undertake post-graduate studies. Law schools and MBA programs have been particularly favoured destinations of recent graduates.

Faculty from the Rotman School of Management who teach in Rotman Commerce are listed above.

General Enquiries: Rotman Commerce Academic Program Services; Rotman Commerce, 125 St. George Street; email: rotmancommerce.info@utoronto.ca; telephone: 416.978.3339; www.rotmancommerce.utoronto.ca

Registration Instructions for the Faculty of Arts & Science may be found on the Program Toolkit and Course Enrolment Instructions pages.

Bachelor of Commerce (BCom) Degree Requirements

Requirements for the BCom are stated on the Degree Requirements page.

Rotman Commerce Notes

Enrolment in Rotman Commerce programs is limited. Most students are admitted to first-year with a Rotman Commerce Admission Guarantee (see below for terms and conditions). Rotman Commerce students choose their Specialist program after first year, provided that the conditions of the “guarantee” have been met. A number of spaces are also available in second-year for other Arts & Science
students who were not admitted with the guarantee (see enrolment requirements language below for details).

Part-Time Students:
Students holding the Rotman Commerce Admission Guarantee, who have applied for and been admitted to Part-Time study, will be assessed for entry into Rotman Commerce programs at the point when they have completed 4.0 credits including the required courses (see above for Rotman Commerce Guarantee). To qualify under the Part-Time provision, students must have been enrolled in a part-time course load from the beginning of each session. They may repeat each of the required courses only once in order to attain the minimum marks.

Additional Notes:

- Tuition Fees: Students enrolling in Rotman Commerce programs pay fees that are higher than other Arts & Science programs.
- Mathematics Note: MAT133Y1 satisfies the minimum Program requirements. Students who are likely to enroll in 200+ series MAT, STA and/or CSC courses are advised to take MAT135H1 and MAT136H1 or MAT137Y1 instead, noting that MAT137Y1 is a theoretically-oriented course for mathematically-based disciplines such as Mathematics, Computer Science, and Statistics.
- Maximum Term Load: Rotman Commerce students are limited to a maximum of 6.0 credits in any Fall/Winter session of their program and a maximum of 2.0 credits in their Summer session.
- Students who have completed the requirements of their Admission Guarantee by the end of the Winter Session are eligible to enroll in 200-level RSM courses during the Summer Session following their first-year.

Rotman Commerce Programs

Accounting Specialist (BCom) - ASSPE2676

Description:
Rotman Commerce at the University of Toronto offers an innovative curriculum combining studies in management, economics, and the liberal arts for an enriched professional undergraduate experience. The program explores the role of commerce in modern society while developing skill and confidence in analysis, effective communication, and decision making. The Rotman Commerce program offers a Bachelor of Commerce (BCom) degree in three different specialist programs, Finance & Economics, Accounting, and Management.

All programs within the Bachelor of Commerce degree build on a common foundation of business and liberal arts courses. Rotman Commerce students specialize in one of three programs: Accounting, Finance and Economics, or Management. Each program combines courses in management and applied economics with a variety of advanced courses in the liberal arts and sciences. The balance assures graduates of a solid understanding of business and modern society along with a command of critical skills in decision-making and organizational leadership.

Rotman Commerce graduates frequently become economists, accountants, actuaries, financial analysts, marketing analysts, managers of firms and government, or proprietors of small businesses. Some Rotman Commerce students elect to undertake post-graduate studies in the form of further university education: law schools and MBA programs have been particularly favoured destinations of recent graduates.

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

For students admitted to the Rotman Commerce admission category in Year 1:

Special Requirement

- Students are admitted to Year 1 of the Faculty of Arts and Science in the Rotman Commerce admission category with an “admission guarantee.” Students admitted with the guarantee are invited to enroll in the program after first year, provided that the course and grade requirements below (i.e., Guaranteed Admission requirements) are met.
- Failure to meet any of these requirements, or failure to complete all the required courses within the calendar year (assuming full-time studies), will result in losing the admission guarantee.

Completed courses (with minimum grades)
The following courses with the stated minimum grades are required:

- RSM100H1 (67%)
- ECO101H1 (63%) and ECO102H1 (63%)
- MAT133Y1 (63%)/(MAT135H1 (60%), MAT136H1 (60%))/(MAT137Y1 (55%)/(MAT157Y1 (55%))

Notes:

- Students may repeat any of the required courses once, in order to attain the requisite mark. The repeated course(s) must be completed within the calendar year (as per the terms of the “guarantee”), as such, the repeated course(s) must be taken during either the Winter or Summer Session of first-year (i.e. a student may not extend the terms of their guarantee in order to attain the minimum marks).
- Note that none of the required courses may be completed using the CR/NCR option.

For students NOT admitted to the Year 1 Rotman Commerce admission category:

Special Requirement

- Students must complete the Rotman Commerce Supplemental Application in late April or May of each year.
- All course admission requirements must be completed by May 1 to be eligible.
- For information regarding admission to the program, contact Rotman Commerce at cc.admissions@utoronto.ca

Minimum Course Grades and Minimum Grade Average
A limited number of spaces in Rotman Commerce are available to Arts & Science students who were not admitted to first year with the Admission Guarantee.
Minimum grades in each listed course, combined with a minimum grade average in required courses, is needed for entry. The following courses with the stated minimum grades are required:

- **MGT100H1** (67%)/ RSM100H1 (67%)
- **ECO101H1** (63%) and ECO102H1 (63%)
- **MAT133Y1** (63%)/( MAT135H1 (60%), MAT136H1 (60%))/ MAT137Y1 (55%)/ MAT157Y1 (55%)
- Note: in the case of repeated attempts, the highest mark attained will be considered when calculating this average

Admission will be based on marks and the Rotman Commerce Supplemental Application. Admission to Rotman Commerce is competitive. Meeting the minimum academic requirements does not guarantee admission to the program. An average of at least 73% in prerequisite courses is needed for admission consideration.

Notes:

- If an Arts and Science student is admitted to Rotman Commerce, then MGT100H1 will be considered equivalent to RSM100H1.

**Completion Requirements:**

(15.5 credits)

First Year:

1. *(ECO101H1, ECO102H1), RSM100H1/MGT100H1*

2. **MAT133Y1/** MAT135H1, MAT136H1/ MAT137Y1/ MAT157Y1

3. Students are strongly encouraged to take RSM219H1, RSM230H1 and RSM250H1 in their first year of study

4. Students are encouraged to take one course towards the Breadth Requirement in their first year of study

Higher Years:

5. **ECO204Y1/ ECO206Y1; ECO220Y1/ ECO227Y1/** (STA220H1, STA255H1)/ (STA237H1, STA238H1)/ (STA257H1, STA261H1)

6. RSM219H1, RSM220H1, RSM221H1, RSM222H1, RSM225H1, RSM230H1, RSM250H1, RSM260H1, RSM270H1

7. RSM320H1, RSM321H1, RSM323H1, RSM324H1, RSM326H1, RSM327H1, RSM333H1, RSM392H1

8. Any 0.5 credit in 300+ ECO

9. **RSM420H1, RSM422H1, RSM424H1, RSM426H1**

*The combination of (STA220H1, STA255H1) is considered equivalent to ECO220Y1 for the purposes of completing Rotman Commerce program requirements only. It is not considered equivalent by the Department of Economics. Therefore (STA220H1, STA255H1) will not count towards an ECO major nor will it count as a pre-requisite for 300+ level ECO courses where ECO220Y1 is required. Please consult the Rotman Commerce Program office if you are considering taking (STA220H1, STA255H1) to complete your requirements.

Notes:

- Students may enrol in only one Rotman Commerce Specialist.
- Students must take a minimum of 8.0 credits in RSM and 8.0 credits in non-RSM courses to complete their Specialist requirements. MGT100H1 is considered equivalent to RSM100H1 and counts as 0.5 credit in RSM courses towards this requirement.
- The CR/NCR option cannot be used for any program completion requirements, including focus requirements and the 8.0 RSM credit requirement. Students may request to use the CR/NCR option for any RSM courses they take beyond their program requirements. Requests will be considered on a case-by-case basis and require the approval of the Director, Rotman Commerce. Students may contact the Rotman Commerce Program office to make a request.

**Finance and Economics Specialist (BCom) - ASSPE2038**

**Description:**

Rotman Commerce at the University of Toronto offers an innovative curriculum combining studies in management, economics, and the liberal arts for an enriched professional undergraduate experience. The program explores the role of commerce in modern society while developing skill and confidence in analysis, effective communication, and decision making. The Rotman Commerce program offers a Bachelor of Commerce (BCom) degree in three different specialist programs, Finance & Economics, Accounting, and Management.

All programs within the Bachelor of Commerce degree build on a common foundation of business and liberal arts courses. Rotman Commerce students specialize in one of three programs: Accounting, Finance and Economics, or Management. Each program combines courses in management and applied economics with a variety of advanced courses in the liberal arts and sciences. The balance assures graduates of a solid understanding of business and modern society along with a command of critical skills in decision-making and organizational leadership.

Rotman Commerce graduates frequently become economists, accountants, actuaries, financial analysts, marketing analysts, managers of firms and government, or proprietors of small businesses. Some Rotman Commerce students elect to undertake post-graduate studies in the form of further university education: law schools and MBA programs have been particularly favoured destinations of recent graduates.

**Enrolment Requirements:**

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

**For students admitted to the Rotman Commerce admission category in Year 1:**

**Special Requirement**

- Students are admitted to Year 1 of the Faculty of Arts and Science in the Rotman Commerce admission category with an “admission guarantee.” Students admitted with the guarantee are invited to enroll in the program after first
year, provided that the course and grade requirements below (i.e., Guaranteed Admission requirements) are met.

- Failure to meet any of these requirements, or failure to complete all the required courses within the calendar year (assuming full-time studies), will result in losing the admission guarantee.

**Completed courses (with minimum grades)**
The following courses with the stated minimum grades are required:

- **RSM100H1** (67%)
- **ECO101H1** (63%) and **ECO102H1** (63%)
- **MAT133Y1** (63%)/(**MAT135H1** (60%), **MAT136H1** (60%))/**MAT137Y1** (55%)/**MAT157Y1** (55%)

**Notes:**

- Students may repeat any of the required courses once, in order to attain the requisite mark. The repeated course(s) must be completed within the calendar year (as per the terms of the "guarantee"); as such, the repeated course(s) must be taken during either the Winter or Summer Session of first-year (i.e. a student may not extend the terms of their guarantee in order to attain the minimum marks).

- All course admission requirements must be completed by May 1 to be eligible.
- For information regarding admission to the program, contact Rotman Commerce at rc.admissions@utoronto.ca

**Minimum Course Grades and Minimum Grade Average**

A limited number of spaces in Rotman Commerce are available to Arts & Science students who were not admitted to first year with the Admission Guarantee.

Minimum grades in each listed course, combined with a minimum grade average in required courses, is needed for entry. The following courses with the stated minimum grades are required:

- **MGT100H1** (67%)/**RSM100H1** (67%)
- **ECO101H1** (63%) and **ECO102H1** (63%)
- **MAT133Y1** (63%)/(**MAT135H1** (60%), **MAT136H1** (60%))/**MAT137Y1** (55%)/**MAT157Y1** (55%)

**Notes:**

- Note: in the case of repeated attempts, the highest mark attained will be considered when calculating this average.

Admission will be based on marks and the Rotman Commerce Supplemental Application. Admission to Rotman Commerce is competitive. Meeting the minimum academic requirements does not guarantee admission to the program. An average of at least 73% in prerequisite courses is needed for admission consideration.

**Notes:**

- If an Arts and Science student is admitted to Rotman Commerce, then **MGT100H1** will be considered equivalent to **RSM100H1**.

**Completion Requirements:**

(15.0 credits)

First Year:

1. (**ECO101H1**, **ECO102H1**), **RSM100H1**, **MGT100H1**

2. **MAT133Y1**/(**MAT135H1**, **MAT136H1**) // **MAT137Y1**/**MAT157Y1**

3. Students are strongly encouraged to take **RSM219H1**, **RSM230H1**, and **RSM250H1** in their first year of study.

4. Students are encouraged to take one course towards the Breadth Requirement in their first year of study.

Higher Years:

5. **ECO204Y1**/**ECO206Y1**; **ECO208Y1**/**ECO209Y1**; **ECO220Y1**/**ECO227Y1**/(**STA220H1**, **STA255H1**)/(**STA237H1**, **STA238H1**)/(**STA257H1**, **STA261H1**)

6. **RSM219H1**, **RSM222H1**, **RSM230H1**, **RSM250H1**, **RSM260H1**, **RSM270H1**

7. **RSM330H1**, **RSM336H1**, **RSM332H1**, **RSM333H1**, **RSM392H1**

8. Any 2.5 credits in 300+ ECO

9. 2.0 credits from: **RSM430H1**, **RSM432H1**, **RSM433H1**, **RSM434H1**, **RSM435H1**, **RSM437H1**, **RSM439H1**

*The combination of (**STA220H1**, **STA255H1** is considered equivalent to **ECO220Y1** for the purposes of completing Rotman Commerce program requirements only. It is not considered equivalent by the department of Economics. Therefore (**STA220H1**, **STA255H1** will not count towards an ECO major nor will it count as a pre-requisite for 300+ level ECO courses where **ECO220Y1** is required. Please consult the Rotman Commerce Program office if you are considering taking (**STA220H1**, **STA255H1**) to complete your requirements.*

**Notes:**

- Students may enrol in only one Rotman Commerce Specialist.
- Students must take a minimum of 8.0 credits in RSM and 8.0 credits in non-RSM courses. **MGT100H1** is considered equivalent to **RSM100H1** and counts as 0.5 credit in RSM courses towards this requirement.
- The CR/NCR option cannot be used for any program completion requirements, including focus requirements and the 8.0 RSM credit requirement. Students may request to use the CR/NCR option for any RSM courses they take beyond their program requirements. Requests will be considered on a case-by-case basis and require the approval of the Director, Rotman Commerce. Students may contact the Rotman Commerce Program office to make a request.
Management Specialist (BCom) - ASSPE2431

Description:

Rotman Commerce at the University of Toronto offers an innovative curriculum combining studies in management, economics, and the liberal arts for an enriched professional undergraduate experience. The program explores the role of commerce in modern society while developing skill and confidence in analysis, effective communication, and decision making. The Rotman Commerce program offers a Bachelor of Commerce (BCom) degree in three different specialist programs, Finance & Economics, Accounting, and Management.

All programs within the Bachelor of Commerce degree build on a common foundation of business and liberal arts courses. Rotman Commerce students specialize in one of three programs: Accounting, Finance and Economics, or Management. Each program combines courses in management and applied economics with a variety of advanced courses in the liberal arts and sciences. The balance assures graduates of a solid understanding of business and modern society along with a command of critical skills in decision-making and organizational leadership.

Rotman Commerce graduates frequently become economists, accountants, actuaries, financial analysts, marketing analysts, managers of firms and government, or proprietors of small businesses. Some Rotman Commerce students elect to undertake post-graduate studies in the form of further university education: law schools and MBA programs have been particularly favoured destinations of recent graduates.

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

For students admitted to the Rotman Commerce admission category in Year 1:

Special Requirement

- Students are admitted to Year 1 of the Faculty of Arts and Science in the Rotman Commerce admission category with an "admission guarantee." Students admitted with the guarantee are invited to enroll in the program after first year, provided that the course and grade requirements below (i.e., Guaranteed Admission requirements) are met.
- Failure to meet any of these requirements, or failure to complete all the required courses within the calendar year (assuming full-time studies), will result in losing the admission guarantee.

Completed courses (with minimum grades)
The following courses with the stated minimum grades are required:

- RSM100H1 (67%)
- ECO101H1 (63%) and ECO102H1 (63%)
- MAT133Y1 (63%) / (MAT135H1 (60%), MAT136H1 (60%))/MAT137Y1 (55%)/MAT157Y1 (55%)

Notes:

- Students may repeat any of the required courses once, in order to attain the requisite mark. The repeated course(s) must be completed within the calendar year (as per the terms of the "guarantee"); as such, the repeated course(s) must be taken during either the Winter or Summer Session of first-year (i.e. a student may not extend the terms of their guarantee in order to attain the minimum marks).
- Note that none of the required courses may be completed using the CR/NCR option.

For students NOT admitted to the Year 1 Rotman Commerce admission category:

Special Requirement

- Students must complete the Rotman Commerce Supplemental Application in late April or May of each year.
- All course admission requirements must be completed by May 1 to be eligible.
- For information regarding admission to the program, contact Rotman Commerce at rc.admissions@utoronto.ca

Minimum Course Grades and Minimum Grade Average

A limited number of spaces in Rotman Commerce are available to Arts & Science students who were not admitted to first year with the Admission Guarantee.

Minimum grades in each listed course, combined with a minimum grade average in required courses, is needed for entry. The following courses with the stated minimum grades are required:

- MGT100H1 (67%)/ RSM100H1 (67%)
- ECO101H1 (63%) and ECO102H1 (63%)
- MAT133Y1 (63%)/(MAT135H1 (60%), MAT136H1 (60%))/MAT137Y1 (55%)/MAT157Y1 (55%)
- Note: in the case of repeated attempts, the highest mark attained will be considered when calculating this average

Admission will be based on marks and the Rotman Commerce Supplemental Application. Admission to Rotman Commerce is competitive. Meeting the minimum academic requirements does not guarantee admission to the program. An average of at least 73% in prerequisite courses is needed for admission consideration.

Notes:

- If an Arts and Science student is admitted to Rotman Commerce, then MGT100H1 will be considered equivalent to RSM100H1.

Completion Requirements:

(12.5 credits)

First Year:

1. (ECO101H1, ECO102H1), RSM100H1/ MGT100H1
2. MAT133Y1/(MAT135H1, MAT136H1)/MAT137Y1/MAT157Y1
3. Students are strongly encouraged to take RSM219H1, RSM230H1 and RSM250H1 in their first year of study
4. Students are encouraged to take one course towards the Breadth Requirement in their first year of study
Focus in Financial Statement Analysis - ASFOC2431E

Enrolment Requirements:
Enrolment in the Management Specialist Program (ASSPE2431).

Completion Requirements:

This Focus requires the completion of 3.0 FCE.

1. Required courses (1.0 FCE): RSM220H1, RSM29H1, RSM429H1
2. 2.0 FCE from the following list: RSM221H1, RSM322H1, RSM323H1, RSM324H1, RSM327H1, RSM328H1, RSM425H1, RSM428H1, and any accounting-themed RSM special topics and RSM Summer Abroad courses as determined by the Director of Rotman Commerce.

Alternative courses may be substituted with approval of the Director, Rotman Commerce. Contact the Rotman Commerce Program office for more information.

Focus in International Business (UofT Global Scholar) - ASFOC2431F

Enrolment Requirements:
Enrolment in the Management Specialist Program (ASSPE2431).

Completion Requirements:

This Focus requires the completion of 2.5 FCE.

1. 1.5 FCE from: RSM437H1, RSM480H1, RSM490H1, ECO324H1, ECO364H1, ECO365H1, ECO419H1
2. 1.0 FCE from either the remaining courses in requirement 1 or the following: RSM295Y0, RSM296Y0, RSM395Y0, RSM461H1, RSM462H1, RSM481H1, RSM491H1, ECO341H1, ECO342H1, ECO362H1, ECO403H1, ECO406H1, ECO435H1, language courses at the 200+ level and any international business-themed RSM special topics courses as determined by the Director of Rotman Commerce. Transfer credits from participation in an international exchange may count up to 1.0 FCE towards this requirement.

Alternative courses may be substituted with approval of the Director, Rotman Commerce. Contact the Rotman Commerce Program office for more information.

Focus in Finance - ASFOC2431B

Enrolment Requirements:
Enrolment in the Management Specialist Program (ASSPE2431).

Completion Requirements:

This Focus requires the completion of 2.5 FCE.

1. Complete 1.0 FCE from the following courses: RSM330H1, RSM336H1, RSM433H1, RSM435H1
2. Complete 1.5 FCE from the remaining course in requirement 1 and the following courses: RSM329H1, RSM429H1, RSM430H1, RSM432H1, RSM434H1, RSM435H1, RSM437H1, RSM438H1, RSM439H1, and any finance-themed RSM special topics and RSM Summer Abroad courses as determined by the Director of Rotman Commerce.

Alternative courses may be substituted with approval of the Director, Rotman Commerce. Contact the Rotman Commerce Program office for more information.
Focus in Leadership in Organizations - ASFOC2431C

Enrolment Requirements:

Enrolment in the Management Specialist Program (ASSPE2431).

Completion Requirements:

This Focus requires the completion of 2.5 FCE.

1. Complete 1.0 FCE from the following courses: RSM361H1, RSM461H1, RSM462H1, RSM463H1, RSM464H1, RSM465H1
2. Complete 1.5 FCE from remaining courses in requirement 1, or the following courses: RSM340H1, RSM341H1, RSM370H1, RSM394H1, RSM405H1, RSM410H1, RSM438H1, RSM464H1, RSM491H1, RSM494H1, RSM495H1, RSM496H1, and any leadership in organizations-themed RSM special topics and RSM Summer Abroad courses as determined by the Director of Rotman Commerce.

Alternative courses may be substituted with approval of the Director, Rotman Commerce. Contact the Rotman Commerce Program office for more information.

Focus in Marketing - ASFOC2431A

Enrolment Requirements:

Enrolment in the Management Specialist Program (ASSPE2431).

Completion Requirements:

This Focus requires completion of 2.5 FCE.

1. Complete 1.5 FCE of the following required courses: RSM251H1, RSM350H1, RSM352H1, RSM353H1
2. Complete 1.0 FCE from the following: RSM450H1, RSM454H1, RSM455H1, RSM456H1, RSM457H1, RSM458H1, RSM459H1, and any marketing-themed RSM special topics and RSM Summer Abroad courses as determined by the Director of Rotman Commerce.

Alternative courses may be substituted with approval of the Director, Rotman Commerce. Contact the Rotman Commerce Program office for more information.

Focus in Strategy and Innovation - ASFOC2431D

Enrolment Requirements:

Enrolment in the Management Specialist Program (ASSPE2431).

Completion Requirements:

This Focus requires the completion of 2.5 FCE.
MGT201H1 - Introduction to Financial Accounting

Hours: 24L

Introduction to financial reporting and analysis that is used by companies to organize and evaluate data in light of their organization's goal. Emphasis is on decision-making and interpretation of financial statements and how they can be used to plan a firm's overall business activities through the use of real-world companies. Not open to Rotman Commerce students. Not eligible for CR/NCR option. Contact Rotman Commerce for details.

Exclusion: RSM219H1

RSM210H1 - Special Topics in Management

Hours: 24L

Topics and Issues in Management. Content in any given year will depend on the instructor. Consult the Rotman Commerce Portal for course description and prerequisites. Not eligible for CR/NCR option. Contact Rotman Commerce for details.

Distribution Requirements: Social Science

RSM211H1 - Special Topics in Management

Hours: 24L

Topics and Issues in Management. Content in any given year will depend on the instructor. Consult the Rotman Commerce Portal for course description and prerequisites. Not eligible for CR/NCR option. Contact Rotman Commerce for details.

Distribution Requirements: Social Science

RSM212H1 - Special Topics in Management

Hours: 24L

Topics and Issues in Management. Content in any given year will depend on the instructor. Consult the Rotman Commerce Portal for course description and prerequisites. Not eligible for CR/NCR option. Contact Rotman Commerce for details.

Distribution Requirements: Social Science

RSM213H1 - Special Topics in Management

Hours: 24L

Topics and Issues in Management. Content in any given year will depend on the instructor. Consult the Rotman Commerce Portal for course description and prerequisites. Not eligible for CR/NCR option. Contact Rotman Commerce for details.

Distribution Requirements: Social Science

RSM219H1 - Introduction to Financial Accounting

Hours: 24L/24T

Basic introduction to financial reporting and analysis. Emphasis is on decision-making and interpretation of financial statements and how they can be used to plan a firm's overall business activities through the use of real-world companies. Coverage includes the use of accounting information to prepare a basic set of financial statements. Not eligible for CR/NCR option. Contact Rotman Commerce for details.

Note: This course is normally taken in first year.

Distribution Requirements: Social Science

RSM220H1 - Intermediate Financial Accounting I

Hours: 24L/24T

Foundations of financial reporting and analysis in Canada. Financial accounting topics are covered at an intermediate level, including both conceptual and technical aspects. Not eligible for CR/NCR option. Contact Rotman Commerce for details.

Prerequisite: RSM219H1

Distribution Requirements: Social Science

RSM221H1 - Intermediate Financial Accounting II

Hours: 24L/12T

Covers topics such as income statement and balance sheet topics with an emphasis on quality of earnings. Not eligible for CR/NCR option. Contact Rotman Commerce for details.

Prerequisite: RSM220H1

Distribution Requirements: Social Science
**RSM222H1 - Management Accounting I**

**Hours:** 24L/24T

Covers the conceptual and analytical foundations of management accounting and the applications of cost accounting information. Costing and control concepts are analyzed to equip students with tools for establishing costing systems, making business decisions, and evaluating management performance. Materials are designed to help students understand strategic cost management principles. Not eligible for CR/NCR option. Contact Rotman Commerce for details.

**Prerequisite:** RSM219H1

**Distribution Requirements:** Social Science

**RSM225H1 - Legal Environment of Business I**

**Hours:** 24L

Introduces students to the Canadian legal system as it relates to business entities. The course focuses on general legal concepts, including sources of law and the court structure; business entity law (including corporate law), commercial law (contract) as well as the law of torts. Not eligible for CR/NCR option. Contact Rotman Commerce for details.

**Prerequisite:** RSM100H1/MGT100H1/RSM100Y1

**Distribution Requirements:** Social Science

**Breadth Requirements:** Society and its Institutions (3)

**RSM230H1 - Financial Markets**

**Hours:** 24L

Introduction to Canadian and international financial markets. This course provides an overview of the major financial institutions, financial markets, financial securities, and an introduction to valuation and trading of securities. Securities discussed include stocks and bonds, as well as some content on derivatives. Not eligible for CR/NCR option. Contact Rotman Commerce for details.

**Note:** This course is normally taken in first year.

**Distribution Requirements:** Social Science

**Breadth Requirements:** Society and its Institutions (3)

**RSM250H1 - Principles of Marketing**

**Hours:** 24L

Students receive an introduction to the basic concepts, theories, and methods of contemporary marketing. The course offers a comprehensive framework to develop successful marketing efforts and allows students to create a marketing plan. Specific topics examined: market research, consumer behaviour, segmentation, product policy, pricing, distribution, communications, sales, and direct marketing. Not eligible for CR/NCR option. Contact Rotman Commerce for details.

**Note:** This course is normally taken in first year.

**Distribution Requirements:** Social Science

**Breadth Requirements:** Thought, Belief and Behaviour (2)

**RSM260H1 - Organizational Behaviour**

**Hours:** 24L

Theoretical ideas and practical applications concerning the behaviour of individuals and groups in organizations. We explore relevant topics for management: motivation, personality, perception, decision-making, groups, and negotiation. A fee of $10 will be charged to your student account for a simulation handbook. Not eligible for CR/NCR option. Contact Rotman Commerce for details.

**Prerequisite:** RSM100H1/MGT100H1/RSM100Y1

**Exclusion:** IRE260H1, PSY332H1, WDW260H1

**Distribution Requirements:** Social Science

**Breadth Requirements:** Thought, Belief and Behaviour (2)

**RSM270H1 - Operations Management**

**Hours:** 24L

Introduction to the management of business processes that convert inputs (labor, material, equipment) into outputs (goods and services) for internal and external markets. Topics include aggregate planning, inventory processes, supply chain management and service operations management. Presents modern quantitative and computing tools necessary for in-depth operational design and analysis. Not eligible for CR/NCR option. Contact Rotman Commerce for details.

**Prerequisite:** RSM100H1/MGT100H1/RSM100Y1

**Distribution Requirements:** Social Science

**Breadth Requirements:** The Physical and Mathematical Universes (5)
RSM295Y0 - Special Topics

Hours: 24L

The areas of concentration depend on the instructor teaching the course. (Offered only during the summer session through the Summer Abroad Program). Not eligible for CR/NCR option. Contact Rotman Commerce for details.

Distribution Requirements: Social Science

MGT301H1 - Independent Study

Hours: TBA

Open when a faculty member is willing and able to supervise. Students must obtain the approval of the Director of Rotman Commerce and the supervising faculty member before enrolling. Enrolment is restricted to 3rd year Rotman Commerce students. Consult the Rotman Commerce Office for details. Not eligible for CR/NCR option.

Prerequisite: 10.0 credits, Cumulative GPA of at least 2.70
Distribution Requirements: Social Science

RSM301H1 - Independent Study

Open when a faculty member is willing and able to supervise. Students must obtain the approval of the Director of Rotman Commerce and the supervising faculty member before enrolling. Enrolment is restricted to 3rd year Rotman Commerce students. Consult the Rotman Commerce Office for details. Not eligible for CR/NCR option.

Prerequisite: 10.0 credits, Cumulative GPA of at least 2.70
Distribution Requirements: Social Science

MGT302H1 - Independent Study

Hours: TBA

Open when a faculty member is willing and able to supervise. Students must obtain the approval of the Director of Rotman Commerce and the supervising faculty member before enrolling. Enrolment is restricted to 3rd year Rotman Commerce students. Consult the Rotman Commerce Office for details. Not eligible for CR/NCR option.

Prerequisite: 10.0 credits, Cumulative GPA of at least 2.70
Distribution Requirements: Social Science

RSM302Y1 - Independent Study

Open when a faculty member is willing and able to supervise. Students must obtain the approval of the Director of Rotman Commerce and the supervising faculty member before enrolling. Enrolment is restricted to 3rd year Rotman Commerce students. Consult the Rotman Commerce Office for details. Not eligible for CR/NCR option.

Prerequisite: 10.0 credits, Cumulative GPA of at least 2.70
Distribution Requirements: Social Science

MGT303Y1 - Independent Study

Hours: TBA

Open when a faculty member is willing and able to supervise. Students must obtain the approval of the Director of Rotman Commerce and the supervising faculty member before enrolling. Enrolment is restricted to 3rd year Rotman Commerce students. Consult the Rotman Commerce Office for details. Not eligible for CR/NCR option.

Prerequisite: 10.0 credits, Cumulative GPA of at least 2.70
Distribution Requirements: Social Science

RSM303Y1 - Independent Study

Open when a faculty member is willing and able to supervise. Students must obtain the approval of the Director of Rotman Commerce and the supervising faculty member before enrolling. Enrolment is restricted to 3rd year Rotman Commerce students. Consult the Rotman Commerce Office for details. Not eligible for CR/NCR option.

Prerequisite: 10.0 credits, Cumulative GPA of at least 2.70
Distribution Requirements: Social Science

MGT304Y1 - Independent Study

Hours: TBA

Open when a faculty member is willing and able to supervise. Students must obtain the approval of the Director of Rotman Commerce and the supervising faculty member before enrolling. Enrolment is restricted to 3rd year Rotman Commerce students. Consult the Rotman Commerce Office for details. Not eligible for CR/NCR option.

Prerequisite: 10.0 credits, Cumulative GPA of at least 2.70
Distribution Requirements: Social Science
RSM310H1 - Special Topics in Management

Topics and Issues in Management. Content in any given year will depend on the instructor. Consult the Rotman Commerce Portal for course description and prerequisites. Enrolment is restricted to 3rd and 4th year Rotman Commerce students. Not eligible for CR/NCR option. Contact Rotman Commerce for details.

Distribution Requirements: Social Science

RSM315H1 - Special Topics in Management

Topics and Issues in Management. Content in any given year will depend on the instructor. Consult the Rotman Commerce Portal for course description and prerequisites. Enrolment is restricted to 3rd and 4th year Rotman Commerce students. Not eligible for CR/NCR option. Contact Rotman Commerce for details.

Topics and Issues in Management. Content in any given year will depend on the instructor. Consult the Rotman Commerce Portal for course description and prerequisites. Enrolment is restricted to 3rd and 4th year Rotman Commerce students. Not eligible for CR/NCR option. Contact Rotman Commerce for details.

Distribution Requirements: Social Science
RSM320H1 - Intermediate Financial Accounting III

Hours: 24L

Covers broader areas in financial reporting, drawing upon regulatory documents and corporate communications. Topics include corporate reporting quality, employee future benefits, employee compensation disclosure and analysis, income tax accounting, narrative reporting. Emphasis on the context of financial reporting including an organization's ‘tone at the top’ and the adoption of international standards. Not eligible for CR/NCR option. Contact Rotman Commerce for details.

Prerequisite: RSM221H1
Distribution Requirements: Social Science
Breadth Requirements: The Physical and Mathematical Universes (5)

RSM321H1 - Advanced Financial Accounting Topics

Hours: 24L/12T

This course covers accounting issues and practices relating to long-term investments, consolidations, foreign transactions and foreign investments. International accounting issues are also introduced. Not eligible for CR/NCR option. Contact Rotman Commerce for details.

Prerequisite: RSM320H1
Distribution Requirements: Social Science
Breadth Requirements: The Physical and Mathematical Universes (5)

RSM322H1 - Managerial Accounting and Decision Making

Hours: 24L

The course focuses on making managerial decisions based on cost information. The relationship between strategy and costing systems is explored as are the economic characteristics which form the context for business decisions. Not eligible for CR/NCR option. Contact Rotman Commerce for details.

Prerequisite: RSM222H1
Distribution Requirements: Social Science
Breadth Requirements: The Physical and Mathematical Universes (5)

RSM323H1 - Auditing I

Hours: 24L/12T

This course introduces students to the concepts and theory underlying audit practice. Practical examples are used to help students develop skills in exercising professional judgment. Not eligible for CR/NCR option. Contact Rotman Commerce for details.

Prerequisite: RSM221H1
Distribution Requirements: Social Science
Breadth Requirements: The Physical and Mathematical Universes (5)

RSM324H1 - Canadian Income Taxation I

Hours: 24L/12T

This course emphasises the fundamentals of the Canadian tax system. Included are topics, such as, residence of corporations and individuals, effective tax rates for corporations and individuals, business income, integration, capital gains and losses, to name a few. A key objective of this course is to assist students in learning to read, interpret and apply provisions of the Income Tax Act to practical problems and cases. Not eligible for CR/NCR option. Contact Rotman Commerce for details.

Prerequisite: RSM220H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

RSM325H1 - Legal Environment of Business II

Hours: 24L

This course canvasses several areas of law that impact a business entity. Topics dealt with include agency law, employment law, the Personal Property Security Act and the rights of the secured creditor, bankruptcy law, relevant consumer protection legislation, intellectual property and other specific legal topics. Not eligible for CR/NCR option. Contact Rotman Commerce for details.

Prerequisite: RSM225H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)
RSM326H1 - Data Analytics with Financial Accounting Information

Previous Course Number: RSM311H1 - Analytical Insights using Financial Data

Hours: 24L/12T

Students will learn how to better understand and analyze accounting information through empirical analysis. The course will teach students how to extract information from rich accounting and finance datasets to help provide insights in a wide range of corporate business problems in both equity and debt markets. Different modeling approaches are used to analyze accounting data and disclosure information. Not eligible for CR/NCR.

Prerequisite: RSM219H1, ECO220Y1/ECO227Y1/(STA220H1, STA255H1)/(STA237H1, STA238H1)/(STA257H1, STA261H1)
Exclusion: RSM311H1 (Special Topics in Management: Analytical Insights using Financial Data), offered in Fall 2019
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

RSM327H1 - Business Information Systems

Hours: 24L/12T

This course helps students use, develop, and manage computer-based systems. The first half covers the basic features of hardware, software, communications, and databases. The second half examines how users, businesses, the economy, and society are affected by the development of this technology. No previous background in computing is assumed. Not eligible for CR/NCR option. Contact Rotman Commerce for details.

Exclusion: CSC340H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

RSM328H1 - Financial Distress and Insolvency

Hours: 24L

This course explores the reasons for financial distress and introduces options for managers, creditors, lenders, and directors of firms in financial distress. The use of financial ratios to predict solvency problems is covered as well as strategies both for restructuring companies having financial difficulties and for negotiation with creditors. Not eligible for CR/NCR option. Contact Rotman Commerce for details.

Prerequisite: RSM219H1, RSM222H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

RSM329H1 - Accounting for Finance Professionals

Previous Course Number: RSM212H1
Hours: 24L/12T

Finance professionals often rely heavily on accounting information obtained from financial statements and other sources of financial reporting. This course builds on the basic foundations provided in RSM219H1, Introduction to Financial Accounting, and provides an intermediate-level discussion of key concepts required to competently read, analyze, interpret, and evaluate financial statement information. Following topics are discussed from the perspectives of International Financial Reporting Standards (IFRS) and U.S. Generally Accepted Accounting Principles (US GAAP): revenue recognition, cash flows, inventories, long-lived assets, non-current liabilities, income taxes, and financial statement analysis. Not eligible for CR/NCR option.

Prerequisite: RSM219H1
Exclusion: RSM212H1 (Special Topics in Management: Accounting for Finance Professionals), offered in Winter 2018 and Winter 2019
Recommended Preparation: RSM332H1 and RSM333H1
Distribution Requirements: Social Science
Breadth Requirements: The Physical and Mathematical Universes (5)

RSM332H1 - Capital Market Theory

Hours: 24L

An introduction to capital market theory explaining how financial securities are priced. Topics covered include the time and risk value of money, the use of discounted cash flow techniques, efficient set theory, asset pricing and market efficiency. Not eligible for CR/NCR option. Contact Rotman Commerce for details.

Prerequisite: RSM230H1
Corequisite: ECO204Y1/ECO206Y1, ECO220Y1/ECO227Y1/(STA220H1, STA255H1)/(STA237H1, STA238H1)/(STA257H1, STA261H1)
Exclusion: ACT349H1, ECO358H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)
RSM333H1 - Introduction to Corporate Finance

Hours: 24L/12T

Application and development of the ideas in RSM332H1 to corporate finance problems such as determining the weighted average cost of capital, project evaluation, corporate financing decisions, working capital management and initial public offerings. Not eligible for CR/NCR option. Contact Rotman Commerce for details.

Prerequisite: RSM219H1, RSM332H1
Exclusion: ACT349H1, ECO359H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

RSM336H1 - Investments

Previous Course Number: RSM330H1
Hours: 24L

This course provides an introduction to financial theories and analytical tools for making investment decisions and for understanding how prices are determined for stocks and bonds. The course covers a broad range of topics including asset allocation, technical analysis, fundamental analysis, anomalies, and bond portfolio management. Not eligible for CR/NCR option. Contact Rotman Commerce for details.

Prerequisite: RSM230H1, RSM332H1
Corequisite: ECO220Y1/ECO227Y1/(STA220H1, STA255H1)/(STA237H1, STA238H1)/(STA257H1, STA261H1)
Exclusion: ACT349H1, RSM330H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

RSM340H1 - The Opposable Mind: Approaches to Integrative Thinking

Previous Course Number: RSM310H1
Hours: 24L

Beginning with an exploration of integrative thinking and the tools associated with it, this course asks students to apply integrative thinking to complex problems that span traditional disciplines. Throughout the course, students will learn practical tools aimed at helping integrate between models, build new models and create new value. Not eligible for CR/NCR option. Contact Rotman Commerce for details.

Prerequisite: RSM100H1/MGT100H1/RSM100Y1
Completion of 10.0 full-course equivalents.
Exclusion: RSM310H1 The Opposable Mind -- Approaches to Integrative Thinking
Distribution Requirements: Social Science
Breadth Requirements: Thought, Belief and Behaviour (2)

RSM341H1 - Model-Based Decision Making

Hours: 24L

This course aims to introduce logically disciplined approaches to decision making under uncertainty. Managers are continually barraged with information that may be unreliable. They must choose courses of action in the face of many uncertainties. How can we define and assess the "optimality" of their decisions in a consistent manner? By building upon the answers to these questions, the course will consider the problem of rational choice when the outcome is determined by the actions of, and interactions between, multiple individuals. Not eligible for CR/NCR option. Contact Rotman Commerce for details.

Prerequisite: Completion of 10.0 FCEs; ECO204Y1/ECO206Y1; ECO220Y1/ECO227Y1/(STA220H1, STA255H1)/(STA237H1, STA238H1)/(STA257H1, STA261H1)
Distribution Requirements: Thought, Belief and Behaviour (2)

RSM350H1 - Marketing Management

Previous Course Number: RSM251H1
Hours: 24L

This course employs the case method of instruction to develop the skills required of marketing managers. Students will learn to diagnose marketing problems and develop, present, and defend their recommendations. They will also gain experience analyzing marketing situations, identifying market opportunities, developing marketing strategies, and designing the marketing mix. Not eligible for CR/NCR option. Contact Rotman Commerce for details.

Prerequisite: RSM250H1
Exclusion: RSM251H1
Distribution Requirements: Social Science
Breadth Requirements: Thought, Belief and Behaviour (2)

RSM352H1 - Marketing Research

Hours: 24L

Marketing research is studied from the perspective of the marketing manager. The course focuses on the initiation, design, and interpretation of research as an aid to marketing decision making. Case studies and projects are used to provide students with some practical research experiences. Not eligible for CR/NCR option. Contact Rotman Commerce for details.

Prerequisite: ECO220Y1/ECO227Y1/(STA220H1, STA255H1)/(STA237H1, STA238H1)/(STA257H1, STA261H1)
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)
RSM353H1 - Consumer Behaviour

Hours: 24L

Formulating successful marketing strategies requires an understanding of consumers' cultures, motivations, cognitions, and emotions. Students will learn how to use theoretical perspectives from psychology, economics, anthropology, and other disciplines to generate predictions about consumers, interpret consumer reactions to marketing stimuli, and develop rigorous skills in marketing analysis. Not eligible for CR/NCR option. Contact Rotman Commerce for details.

Corequisite: RSM251H1/RSM350H1
Distribution Requirements: Social Science
Breadth Requirements: Thought, Belief and Behaviour (2)

RSM355H1 - Managing Customer Value

Previous Course Number: RSM310H1 - Managing Customer Value
Hours: 24L

This course builds on the foundation developed in RSM250H1 (Principles of Marketing) in a competitive simulation environment. While RSM250H1 focuses on the fundamental marketing elements for operationalizing this basic philosophy - segmentation, targeting, positions and 3 of the 4 Ps, this course is designed to advance a participant's understanding of designing and implementing marketing strategies and explore the management of the 4th P (promotion) in greater depth. In particular, participants will make decisions about all 4 Ps simultaneously and manage the interactions between them. Not eligible for CR/NCR.

Prerequisite: RSM250H1; Completion of 9.0 FCEs
Exclusion: RSM310H1 (Special Topics in Management: Managing Customer Value), offered in Winter 2019 and Winter 2020
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

RSM361H1 - Human Resource Management

Previous Course Number: RSM460H1
Hours: 24L

Human resource management is studied from the perspective of the manager/practitioner. The course focuses on decisions about whom and whom to hire, how much to pay, what training to offer, and how to evaluate employees. Class exercises and projects are used to provide students with some practical experience with these topics. Not eligible for CR/NCR option. Contact Rotman Commerce for details.

Prerequisite: RSM260H1
Exclusion: RSM460H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

RSM362H1 - Leading Across Differences

Hours: 24L

This course makes linkages between a leader's stance and how strong preferences come to life and influence perspectives at the individual and organizational level. There is a deep exploration of one's knowledge system and a particular focus upon uncovering innovative frames around diversity that directly impact organizational strategy. Not eligible for CR/NCR option.

Exclusion: RSM315H1 - Leading Across Differences
Distribution Requirements: Social Science
Breadth Requirements: Thought, Belief and Behaviour (2)

RSM370H1 - Supply Chain Management

Previous Course Number: RSM311H1
Hours: 24L

Globalization increasingly intertwines the Canadian and world economies. Understanding how firms can successfully link with worldwide suppliers and markets is central to growth. Supply chain management issues covered include: advanced inventory and production models; supply contracts; the bullwhip effect; vendor-managed inventories; distribution strategies; third-party logistics; product variety; current information technology. Not eligible for CR/NCR option. Contact Rotman Commerce for details.

Prerequisite: Completion of 10.0 full-course equivalents
Corequisite: RSM270H1
Exclusion: RSM311H1 Supply Chain Management
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

RSM392H1 - Strategic Management

Hours: 24L

Introduces core ideas, concepts and models in the area of Strategic Management. Addresses the following questions: Why does firm performance vary across industries, and across firms within a given industry? What types of competitive strategies can managers pursue? When are different types of strategies more or less likely to be successful? Enrolment is restricted to 3rd or 4th year Rotman Commerce students. Not eligible for CR/NCR option. Contact Rotman Commerce for details.

Prerequisite: RSM219H1, RSM222H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)
RSM393H1 - Strategic Case Analysis

Hours: 24L

This course provides students with the opportunity to hone the critical skills of effective presentation, decisiveness and business acumen with a focus on learning-by-doing. Students will analyze and recommend solutions to business problems and develop abilities to present and defend recommendations in an impactful and effective manner. Not eligible for CR/NCR option. Contact Rotman Commerce for details.

Prerequisite: RSM392H1. Completion of 10.0 full-course equivalents.
Exclusion: RSM312H1 Case Analysis for Strategic Management
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

RSM394H1 - Social Entrepreneurship

Previous Course Number: RSM318H1
Hours: 24L

In this course, students will learn how entrepreneurs create organizations that address social problems using innovative, sustainable approaches. Students will examine a variety of social venture forms and consider how such ventures can be evaluated, managed, and financed. Not eligible for CR/NCR option. Contact Rotman Commerce for details.

Prerequisite: Completion of 10.0 FCEs
Exclusion: RSM318H1 (Special Topics in Management: Social Entrepreneurship), offered in Winter 2018; RSM318H1 (Special Topics in Management: Entrepreneurship for Social Ventures), offered in Winter 2015 and Winter 2016
Distribution Requirements: Social Science
Breadth Requirements: Thought, Belief and Behaviour (2)

RSM395Y0 - Special Topics

The areas of concentration depend on the instructor teaching the course. (Offered only during the summer through the Woodsworth Summer Abroad Program). Not eligible for CR/NCR option. Contact Rotman Commerce for details.

Distribution Requirements: Social Science

MGT401H1 - Independent Study Course

Hours: TBA

Open when a faculty member is willing and able to supervise. Students must obtain the approval of the Director of Rotman Commerce and the supervising faculty member before enrolling. Enrolment is restricted to 4th year students not in a Rotman Commerce program. Consult the Rotman Commerce Office for details. Not eligible for CR/NCR option.

Prerequisite: Cumulative GPA of at least 2.70
Distribution Requirements: Social Science

RSM401H1 - Independent Study Course

Open when a faculty member is willing and able to supervise. Students must obtain the approval of the Director of Rotman Commerce and the supervising faculty member before enrolling. Enrolment is restricted to 4th year Rotman Commerce students. Consult the Rotman Commerce Office for details. Not eligible for CR/NCR option.

Prerequisite: Cumulative GPA of at least 2.70
Distribution Requirements: Social Science

MGT402H1 - Independent Study Course

Open when a faculty member is willing and able to supervise. Students must obtain the approval of the Director of Rotman Commerce and the supervising faculty member before enrolling. Enrolment is restricted to 4th year Rotman Commerce students. Consult the Rotman Commerce Office for details. Not eligible for CR/NCR option.

Prerequisite: Cumulative GPA of at least 2.70
Distribution Requirements: Social Science

RSM405H1 - The CEO's Toolkit

Hours: 24L
A highly practical course designed for prospective Executives and the Professionals who will work with them. The course develops simple, powerful tools and strategies required to build, run, fix, change and evolve successful organizations. Lectures and case analysis integrate core management concepts from previous courses.

Prerequisite: RSM222H1
Corequisite: RSM332H1
Exclusion: RSM415H1 (2016-17)
Distribution Requirements: Social Science
Breadth Requirements: Thought, Belief and Behaviour (2)

RSM410H1 - Special Topics in Management

Topics and issues in Management. Content in any given year will depend on the instructor. Consult the Rotman Commerce Portal for course description and prerequisites. Enrolment is restricted to 4th year Rotman Commerce students. Not eligible for CR/NCR option. Contact Rotman Commerce for details.

Distribution Requirements: Social Science

RSM420H1 - Advanced IT Audit and Data Analytics

Hours: 24L/12T

This course is an extension of the study of areas covered in the introductory audit course and will include the application of risk and materiality to more advanced topic areas with a focus on digitized information. Other topics include special reports, future-oriented financial information and prospectuses. The course will incorporate the use of data analytics in auditing and will explore how to analyze financial data in order to assist in audit engagements. Not eligible for CR/NCR.

Prerequisite: RSM323H1

Distribution Requirements: Social Science

RSM422H1 - Management Control

Hours: 24L/12T

This course considers the processes and systems, many accounting-based, by which key managers allegedly ensure that resources are acquired and used effectively and efficiently in the accomplishment of an organization’s goals. Not eligible for CR/NCR option. Contact Rotman Commerce for details.

Prerequisite: RSM222H1

Distribution Requirements: Social Science

Breadth Requirements: Society and its Institutions (3)

RSM423H1 - Auditing II

Hours: 24L

The course focuses on the reasoning and evidence theory underlying audit decision making. Coverage includes professional judgment, statistical auditing, audit of accounting estimates, framework for assurance engagements, and responsibilities to detect fraud. Not eligible for CR/NCR option. Contact Rotman Commerce for details.

Prerequisite: RSM323H1

Distribution Requirements: Social Science

Breadth Requirements: The Physical and Mathematical Universes (5)
RSM424H1 - Canadian Income Taxation II

Hours: 24L/12T

This course is designed to give the student an understanding of more complex issues of Canadian income tax law and tax planning. Included are topics, such as, computation of taxes, corporate reorganizations, business acquisitions and divestitures, partnerships, joint ventures and trusts, to name a few. The two course sequence (RSM324H1 and RSM424H1) has been designed to provide coverage of the tax content required by the professional accounting bodies. Not eligible for CR/NCR option. Contact Rotman Commerce for details.

Prerequisite: RSM324H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

RSM425H1 - Financial Reporting and Control: Theory and Contemporary Topics

Hours: 24L

This course guides students to learn financial reporting theory and critically evaluate the research findings in accounting. It covers a broad range of topics such as information and measurement perspectives of accounting, agency theory and its implications and the role of network in management control. Not eligible for CR/NCR option. Contact Rotman Commerce for details.

Prerequisite: RSM222H1, RSM332H1
Corequisite: RSM333H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

RSM426H1 - Critical Thinking, Analysis and Decision Making

Hours: 24L/12T

This is a capstone case course stressing the pervasive competencies and critical thinking skills required from Rotman Commerce graduates, professional accountants and advisors. The course integrates the technical and practical knowledge obtained in previous courses by applying this knowledge to case type situations. Aimed at students seeking an accounting designation. Enrolment is restricted to 4th year Rotman Commerce students. Not eligible for CR/NCR option. Contact Rotman Commerce for details.

Prerequisite: RSM222H1, RSM323H1, RSM324H1
Corequisite: RSM321H1
Distribution Requirements: Social Science
Breadth Requirements: Thought, Belief and Behaviour (2)

RSM427H1 - Auditing and Information Systems

Hours: 24L/12T

This course investigates strategies and procedures used to audit computerized accounting systems based upon their special control characteristics. Special attention is devoted to computerized statistical procedures. Not eligible for CR/NCR option. Contact Rotman Commerce for details.

Prerequisite: RSM323H1
Distribution Requirements: Social Science
Breadth Requirements: The Physical and Mathematical Universes (5)

RSM428H1 - Analysis of Banking Financial Institutions and Instruments

Hours: 24L

We analyze the financial statements of banks to learn about the risk and return of bank financial assets and financial liabilities. Topics covered include interest rate risk, credit risk, market risk, fair value accounting, securitizations, derivatives and hedging of the banking firm as reflected through bank financial statements. Not eligible for CR/NCR option. Contact Rotman Commerce for details.

Prerequisite: RSM219H1, RSM222H1, RSM333H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

RSM429H1 - Financial Statement Analysis and Valuation

Hours: 24L

This course is of interest to those pursuing a career where one needs to analyze financial statements "intelligently". This obviously includes those interested in finance related professions such as Investment Banking, Research and Investment Management. Students interested in consulting and marketing will also find this course useful because of its approach that focuses on business analysis with tie-ins to corporate strategy. This is a capstone course for students completing the Financial Reporting and Control stream in the Accounting Specialist. Not eligible for CR/NCR option. Contact Rotman Commerce for details.

Prerequisite: RSM219H1, RSM222H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)
RSM430H1 - Fixed Income Securities
Hours: 24L

Describes important fixed income securities and markets. The course emphasizes traditional bond and term structure concepts crucial to understand the securities traded in these markets. Students are required to work in the Rotman Financial Research & Trading Lab to solve the assigned problems using real time data. Not eligible for CR/NCR option. Contact Rotman Commerce for details.

Prerequisite: Rotman Commerce: RSM332H1; Actuarial Science: ACT349H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

RSM432H1 - Risk Management for Financial Managers
Hours: 24L

This course examines the ways in which risks are quantified and managed by financial institutions. The principal risks considered include market risk, credit risk and operational risk. The course also covers the evolution of bank regulation and the regulatory limits on risk taking. Not eligible for CR/NCR option. Contact Rotman Commerce for details.

Prerequisite: RSM333H1
Distribution Requirements: Social Science
Breadth Requirements: The Physical and Mathematical Universes (5)

RSM433H1 - Advanced Corporate Finance
Hours: 24L

Applying fundamental finance ideas developed in RSM332H1 and RSM333H1 to real-life problems. The course will focus on business valuation and financial decisions in practical situations, on the assumption that students are already familiar with basic concepts from previous finance courses. Not eligible for CR/NCR option. Contact Rotman Commerce for details.

Prerequisite: Rotman Commerce: RSM333H1; Actuarial Science: ACT349H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

RSM434H1 - Financial Trading Strategies
Previous Course Number: RSM412H1
Hours: 24L

This course will use finance theory applied with Excel applications to understand potential returns and risks inherent in particular investment/trading strategies. Learning-by-doing will be facilitated by simulation-based Rotman Interactive Trader cases focused on particular risks. This training will be analogous to using a flight simulator for learning to fly. Not eligible for CR/NCR option. Contact Rotman Commerce for details.

Prerequisite: RSM332H1
Exclusion: RSM412H1 Financial Trading Strategies
Distribution Requirements: Social Science
Breadth Requirements: The Physical and Mathematical Universes (5)

RSM435H1 - Futures and Options Markets
Hours: 24L

This course covers the analysis of derivative instruments such as forwards, futures, swaps and options. By the end of the course, students will have good knowledge of how these contracts work, how they are used and how they are priced. A fee of $35 will be charged to your student account for software purchase. Not eligible for CR/NCR option. Contact Rotman Commerce for details.

Prerequisite: ECO204Y1/ECO206Y1, RSM332H1
Exclusion: ACT370H1
Distribution Requirements: Social Science
Breadth Requirements: The Physical and Mathematical Universes (5)

RSM437H1 - International Finance
Hours: 24L

International financial markets, exchange rates, forward markets, interest rate parity. International dimensions of investment, including both portfolio and foreign direct investment. International dimensions of corporate finance, including valuation and the cost of capital of foreign investments. Not eligible for CR/NCR option. Contact Rotman Commerce for details.

Prerequisite: Rotman Commerce: RSM333H1; Actuarial Science: ACT349H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)
**RSM438H1 - Investing for Impact**

**Hours:** 24L

This course is designed to be an introduction to the field of impact investing - investments that seek to generate financial and social environmental returns. In this course, we will examine different models of impact investing in both emerging and developed markets, the life-cycle of impact investments, new financial instruments and more.

**Prerequisite:** RSM222H1, RSM333H1  
**Distribution Requirements:** Social Science  
**Breadth Requirements:** Society and its Institutions (3)

---

**RSM439H1 - Private Equity and Entrepreneurial Finance**

**Hours:** 24L

The primary objective of the course is to improve students' ability to understand the concepts and institutions involved in private equity. The course will provide students with skill sets so they can analyze and understand private equity from multiple perspectives: the perspective of the individual/firm seeking and receiving private equity finance; the perspective of the private equity fund; and, the perspective of the limited partners that provide finance for private equity funds. Students will also learn how to build Leveraged Buyout (LBO) models. Enrolment is restricted to 4th year Rotman Commerce students. Not eligible for CR/NCR option. Contact Rotman Commerce for details.

**Prerequisite:** RSM333H1  
**Exclusion:** RSM410H1 (Special Topics in Management: Private Equity and Entrepreneurial Finance), offered in Winter 2015, Winter 2018, and Fall 2018  
**Distribution Requirements:** Social Science  
**Breadth Requirements:** Society and its Institutions (3)

---

**RSM450H1 - Marketing andBehavioural Economics**

**Previous Course Number:** RSM418H1  
**Hours:** 24L

What motivates consumers, investors, employees, and managers? In this highly interdisciplinary course, we will examine topics such as the role of emotions in decision-making, "irrational" patterns of how people think about products, money, or investments, and how expectations shape perceptions. Enrolment is restricted to 3rd and 4th year Rotman Commerce students. Not eligible for CR/NCR option. Contact Rotman Commerce for details.

**Prerequisite:** Completion of 10.0 full-course equivalents.  
**Exclusion:** RSM418H1 Integrative Thinking: Psychology and Markets  
**Distribution Requirements:** Social Science  
**Breadth Requirements:** Thought, Belief and Behaviour (2)

---

**RSM452H1 - Creativity and Business Innovation**

**Previous Course Number:** RSM414H1- Creativity for Business Innovation  
**Hours:** 12L/2T/12P

Creativity is identified as the most important skill business leaders need at all levels. As humans, we must first embrace and develop our creativity, and then use technology to creatively solve business problems. This course guides individuals to combine their thinking, knowledge and skills in imaginative ways, develop key creative behaviours and build personal and professional creative confidence. Through a combination of active lectures, immersive in-class and in-field activities along with online tutorials, you will engage in creative ways to see business problems and opportunities in new ways and develop solutions unseen and unimagined by others. Not eligible for CR/NCR.

**Prerequisite:** RSM250H1; Completion of 14.0 FCEs  
**Exclusion:** RSM414H1 (Special Topics in Management: Creativity for Business Innovation), offered in Fall 2018 and Fall 2019  
**Distribution Requirements:** Social Science  
**Breadth Requirements:** Creative and Cultural Representations (1)

---

**RSM454H1 - Sales and Distribution Strategy**

**Hours:** 24L

Once you have a great product or service to sell, you need the right channel partners and strategies to bring your offering to the end-user. This course discusses what and how many intermediaries to partner with, partner roles and responsibilities, and how to stimulate high performance from channel partners.

**Prerequisite:** RSM250H1  
**Distribution Requirements:** Social Science  
**Breadth Requirements:** Society and its Institutions (3)

---

**RSM455H1 - Pricing**

**Hours:** 24L

Approaches pricing decision as an intersection of economics and psychology. Using product categories as diverse as financial services, healthcare, industrial products and consumer packaged goods, students study dynamic pricing, value pricing, price customization, price bundling and multi-part tariffs, menu costs and price stickiness, sales promotions, and pricing in two-sided markets. Enrolment is restricted to 3rd and 4th year Rotman Commerce students. Not eligible for CR/NCR option. Contact Rotman Commerce for details.

**Prerequisite:** RSM250H1  
**Distribution Requirements:** Social Science  
**Breadth Requirements:** Society and its Institutions (3)
RSM456H1 - Big Data and Marketing Analytics

Previous Course Number: RSM411H1
Hours: 24L

The course is designed to introduce students to tools used in marketing analytics. Companies have been collecting vast databases to aid them in making sound marketing decisions. Examples include retail scanner panel data which keeps track of customers’ purchase histories, loyalty-program data monitoring purchasing under different promotional environments, social network and online shopping history data. The course uses several marketing data sources to illustrate how to use statistical marketing models to evaluate the impacts of marketing-mix, and manage customer lifetime value. Not eligible for CR/NCR option. Contact Rotman Commerce for details.

Prerequisite: ECO220Y1/ECO227Y1/(STA220H1, STA255H1)/(STA237H1, STA238H1)/(STA257H1, STA261H1)
Distribution Requirements: Social Science
Breadth Requirements: The Physical and Mathematical Universes (5)

RSM457H1 - Strategic Marketing Communication

Hours: 24L

This course covers how marketers communicate with customers - knowledge that is useful to students both as a manager and a consumer. The course will introduce the foundation knowledge of marketing communications as well as new trends in non-traditional media including sponsorships, social media, and digital marketing.

Prerequisite: RSM251H1/RSM350H1
Exclusion: RSM414H1 (Special Topics in Management: Strategic Marketing Communication), offered in Winter 2014 and Winter 2015
Distribution Requirements: Social Science
Breadth Requirements: Thought, Belief and Behaviour (2)

RSM458H1 - Branding Strategy

Hours: 24L

Students will assume the role of senior marketing managers responsible for the design, implementation, and evaluation of branding strategies. Brands represent valuable assets that must be created, sustained, leveraged, and defended. This course will use case analysis and a group project to reinforce successful decision making and communication skills. Enrolment is restricted to 3rd and 4th year Rotman Commerce students. Not eligible for CR/NCR option. Contact Rotman Commerce for details.

Prerequisite: RSM251H1/RSM350H1/(RSM392H1, RSM250H1)
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

RSM459H1 - Business Design

Hours: 24L

What are the principles and practices that drive innovation in organizations? Create breakthrough solutions and businesses? This course teaches students how to identify customer needs, prototype new solutions and design business strategies to create competitive advantage. Students will apply the learning in real time and on real world challenges.

Prerequisite: RSM250H1
Exclusion: RSM412H1
Distribution Requirements: Social Science
Breadth Requirements: Thought, Belief and Behaviour (2)

RSM461H1 - Managerial Negotiations

Hours: 24L

Students learn to recognize, understand, analyze, and practice essential concepts in negotiations required for understanding more complex relations within and between organizations. The main objective is to learn how to analyze the critical factors of a negotiation situation and then to be able to prescribe a course of action. Enrolment is restricted to 3rd and 4th year Rotman Commerce students. A fee of $50 will be charged to your student account for role play materials. Not eligible for CR/NCR option. Contact Rotman Commerce for details.

Prerequisite: RSM260H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)
RSM462H1 - Managing People in the Context of Globalization

Previous Course Number: RSM410H1  
Hours: 24L

This course introduces students to the impact of globalization on managing people. Understanding how organizational behaviour and human resource management processes work in the international context is essential for business success. This course helps students to develop a better understanding of how effective people management can create a competitive advantage in the international context. Enrolment is restricted to 3rd and 4th year Rotman Commerce students. Not eligible for CR/NCR option. Contact Rotman Commerce for details.

Prerequisite: RSM260H1  
Exclusion: RSM410H1 Managing Human Resources in Context of Globalization  
Distribution Requirements: Social Science  
Breadth Requirements: Society and its Institutions (3)

RSM463H1 - The Socially Intelligent Manager

Previous Course Number: RSM412H1  
Hours: 24L

One of the most critical skills in leadership is the ability to manage social relationships. The purpose of this course is to introduce you to the science of social intelligence so that you are knowledgeable and confident about how to handle interpersonal issues when you enter the business world. Enrolment is restricted to 3rd and 4th year Rotman Commerce students. Not eligible for CR/NCR option. Contact Rotman Commerce for details.

Prerequisite: RSM260H1  
Exclusion: RSM412H1 The Socially Intelligent Manager  
Distribution Requirements: Social Science  
Breadth Requirements: Thought, Belief and Behaviour (2)

RSM464H1 - Organization Theory and Its Applications

Hours: 24L

Organization theory is an evidence-based approach that allows managers to analyze and design organizations more effectively. Focusing on organizations as social systems, the course emphasizes practical implications in topics that are essential to business success, including strategy implementation, organizational structure and culture, change management, globalization, and the organizational sources of enduring competitive advantage. Enrolment is restricted to 3rd and 4th year Rotman Commerce students. Not eligible for CR/NCR option. Contact Rotman Commerce for details.

Prerequisite: RSM260H1  
Distribution Requirements: Social Science  
Breadth Requirements: Society and its Institutions (3)

RSM465H1 - Understanding Motivation and Incentives: Theory and Practice

Hours: 24L

This course is designed to introduce you to the fundamental principles of incentives and motivation, which are essential tools for managers. The course takes an interdisciplinary approach and you will be exposed to theories on these topics from a variety of different disciplines – behavioral decision-making, economics, organizational behavior, and psychology. Enrolment is restricted to 3rd and 4th year Rotman Commerce students. Not eligible for CR/NCR option. Contact Rotman Commerce for details.

Prerequisite: RSM260H1  
Exclusion: RSM410H1 Incentives and Motivation  
Distribution Requirements: Social Science  
Breadth Requirements: Thought, Belief and Behaviour (2)

RSM466H1 - Environmental and Social Responsibility

Hours: 24L

This course examines how corporations engage in the social economy through corporate social responsibility work and how corporations are increasingly "going green.” It will cover current thinking and practice on corporate social responsibility and emphasize sustainability in business practices while allowing students to give voice to their own values.

Prerequisite: Must have completed at least 9.0 FCEs.  
Distribution Requirements: Social Science  
Breadth Requirements: Society and its Institutions (3)

RSM470H1 - Management Science Modeling with Spreadsheets

Hours: 24L

The course presents quantitative methods of modeling business and other systems in order to objectively evaluate available alternatives and select the ‘best’ one with respect to pre-defined criteria. Topics include: Decision Analysis, Linear Programming, Integer Programming, Network Methods, Simulation and Waiting Line Models. Enrolment is restricted to 3rd and 4th year Rotman Commerce students. Not eligible for CR/NCR option. Contact Rotman Commerce for details.

Prerequisite: ECO220Y1/ECO227Y1/STA220H1,STA255H1/(STA237H1, STA238H1)/(STA257H1,STA261H1)  
Distribution Requirements: Social Science  
Breadth Requirements: The Physical and Mathematical Universes (5)
RSM480H1 - Business in a Global Economy

Hours: 24L

Application of the analytic framework of international trade, foreign investment and exchange rate economics to management of business. Special topics include the industrial effects of trade liberalization, the role of the World Trade Organization, foreign exchange risk management, competition policy and international taxation. Not eligible for CR/NCR option. Contact Rotman Commerce for details.

Prerequisite: RSM333H1

Distribution Requirements: Social Science

Breadth Requirements: Society and its Institutions (3)

RSM481H1 - Outsourcing and the Organization of Firms

Hours: 24L

Explores the issue of outsourcing, broadly defined: which activities should a firm do "in house" and which should it take outside? Using a combination of cases and economic analysis, it develops a framework for determining the "best" organizational structure. Not eligible for CR/NCR option. Contact Rotman Commerce for details.

Prerequisite: ECO204Y1/ECO206Y1, ECO220Y1/ECO227Y1/(STA220H1, STA255H1)/(STA237H1, STA238H1)/(STA257H1, STA261H1)

Distribution Requirements: Social Science

Breadth Requirements: Society and its Institutions (3)

RSM482H1 - Game Theory for Business Strategy

Hours: 24L

Applies game-theoretic reasoning to analyze business strategy problems, focusing specifically on pricing, advertising, product positioning, product introduction, and relationships with upstream and downstream firms. Not eligible for CR/NCR option. Contact Rotman Commerce for details.

Prerequisite: ECO204Y1/ECO206Y1

Distribution Requirements: Social Science

Breadth Requirements: Society and its Institutions (3)

RSM483H1 - Real Estate Markets

Hours: 24L

This course uses economic methods to analyze real estate markets. Topics covered include the determinants of real estate values, the location decisions of households and firms, land use, urban growth and agglomeration, behavioural real estate economics and real options. Not eligible for CR/NCR option. Contact Rotman Commerce for details.

Prerequisite: ECO204Y1/ECO206Y1, ECO220Y1/ECO227Y1/(STA220H1, STA255H1)/(STA237H1, STA238H1)/(STA257H1, STA261H1), RSM332H1

Distribution Requirements: Social Science

Breadth Requirements: Society and its Institutions (3)

RSM484H1 - Real Estate Finance and Investment

Previous Course Number: RSM380H1

Hours: 24L

Real estate assets account for about one-third of the value of all capital assets in the world. This course provides an understanding of real estate investment, valuation and liabilities along with the public policy associated with home ownership, using modern finance and economic tools. Not eligible for CR/NCR option. Contact Rotman Commerce for details.

Prerequisite: ECO204Y1/ECO206Y1, ECO220Y1/ECO227Y1/(STA220H1, STA255H1)/(STA237H1, STA238H1)/(STA257H1, STA261H1), RSM332H1

Corequisite: RSM333H1

Exclusion: RSM380H1

Distribution Requirements: Social Science

Breadth Requirements: Society and its Institutions (3)

RSM490H1 - International Strategy

Hours: 24L

Focuses on developing an understanding of the fundamentals of doing business in an international environment. Based on the application of management theory (trade theory, modes of entry, foreign direct investment, theory of the multinational) to the strategic management problems of organizing business in the international arena. Not eligible for CR/NCR option. Contact Rotman Commerce for details.

Prerequisite: RSM392H1

Distribution Requirements: Social Science

Breadth Requirements: Society and its Institutions (3)
RSM491H1 - Global Capital Market Strategy

Hours: 24L

This course exposes students to the intersection of global political economy and investment strategies, with particular emphasis on current global economic trends. The last 15 years have seen a dramatic expansion in the geographic scope for private equity investments, and in the risk involved in such investments. RSM491H1 will teach students to think through the issues facing executives, investors and policy makers considering investments. Not eligible for CR/NCR option. Contact Rotman Commerce for details.

Prerequisite: RSM332H1
Exclusion: RSM413H1 Globalization and Capital Markets: Political Economy and Investment Strategy
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

RSM492H1 - Cooperative Strategy

Previous Course Number: RSM419H1
Hours: 24L

Cooperation to create economic value is a central feature of markets: from sophisticated coordination in strategic alliances to simple acts of agreement between buyers and sellers. This course goes beyond Porter's Five Forces to develop a rigorous understanding of the connections between value creation, competition and firm performance. Not eligible for CR/NCR option.

Prerequisite: RSM392H1
Exclusion: RSM419H1 Cooperative Strategy
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

RSM493H1 - Entrepreneurship

Hours: 24L

Introduces essentials of starting a new business: how to evaluate new opportunities, craft strategy, obtain resources, manage growth, and distribute ownership. Applies concepts from strategic management to challenges facing new/small businesses. Examines the role of entrepreneurs in spurring technological innovation and economic growth, and the effect of government policy on entrepreneurial activity. Not eligible for CR/NCR option. Contact Rotman Commerce for details.

Prerequisite: RSM392H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

RSM494H1 - Technology Strategy

Hours: 24L

Teaches about technological evolution and how evolutionary stages impact firms' strategic choices. Important issues in technological evolution are technological discontinuities, standards wars, dominant designs and patenting. Important strategic decisions concern innovation management, product versus process focus and intellectual property strategies. Project oriented coursework based on patent and business data bases. Not eligible for CR/NCR option. Contact Rotman Commerce for details.

Prerequisite: RSM392H1
Exclusion: RSM413H1 Globalization and Capital Markets: Political Economy and Investment Strategy
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

RSM495H1 - Management Consulting

Previous Course Number: RSM416H1
Hours: 24L

This course examines the management consultant's role and how the consulting industry serves to enhance effectiveness of client organizations. Future management advisors will learn skills necessary to support successful consulting business models and how to professionally engage clients to assist in generating competitive advantage through design/implementation of innovative approaches. Not eligible for CR/NCR option. Contact Rotman Commerce for details.

Prerequisite: RSM392H1.
Exclusion: RSM416H1 Management Consulting
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

RSM496H1 - Catastrophic Failure in Organizations

Hours: 24L

Addressing the risk of catastrophic failure is an increasingly important strategic challenge for firms. This course explores why modern organizations are vulnerable to catastrophic failure and how managers and consultants can manage catastrophic risks more effectively.

Prerequisite: RSM260H1 or RSM270H1 or RSM392H1
Exclusion: RSM418H1 - Catastrophic Failure in Organizations
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)
RSM498Y1 - Special Topics in Management

**Hours:** 24L

Topics and issues in Management. Content in any given year will depend on the instructor. Consult the Rotman Commerce Portal for course description and prerequisites. Enrolment is restricted to 4th year Rotman Commerce students. Not eligible for CR/NCR option. Contact Rotman Commerce for details.
Introduction

The programs at St. Michael's College emerge from its academic strength in various scholarly fields and reflect its centuries-old Christian intellectual traditions. The College is home to the Mediaeval Studies program, the Celtic Studies program, the Book and Media Studies program and the Christianity and Culture program. These programs are linked with our first year seminars: the Gilson Seminar in Faith and Ideas, the Boyle Seminar in Scripts and Stories, the McLuhan Seminar in Creativity and Technology and our new Seminar in Christianity, Truth and Reconciliation. More information can be found on the St. Michael's College website: stmikes.utoronto.ca

Programs

Book and Media Studies

The Book and Media Studies program is an interdisciplinary and historical investigation of the role of printing, books, reading, and electronic and digital media in cultures past and present. It includes both print and electronic media, covering topics like manuscript and book production, internet publishing, book illustrations, advertising, censorship, and reading and entertainment alongside the development of mass media, the advent of radio, the emergence of television, global telecommunications, social media, and the internet.

Celtic Studies

The Celtic Studies Program offers a wide variety of undergraduate courses on the languages, literature, history, music, folklore, art and archaeology of the peoples of Ireland, Scotland and Wales. We examine Celtic identities in the modern as well as the ancient and medieval world and explore the transmission of these traditions to Canada and the United States.

Christianity and Culture

The Christianity and Culture Program offers students an opportunity to study Christianity from a variety of perspectives, including its self-understanding, history, and interaction with various facets of western and world culture. The program also explores how Christian experience continues to develop in its encounter with contemporary culture and issues.

Mediaeval Studies

Mediaeval Studies is an interdisciplinary program encompassing all aspects of European culture from the fall of Rome to the fall of Constantinople. Students examine the mediaeval foundations of modern culture through history, thought, literature, and art.

For more information about our programs please see the St. Michael's College website or email smc.programs@utoronto.ca.

SMC One: First-Year Seminars

The Gilson Seminar in Faith and Ideas

First-year students explore the intersection of faith with today's most important questions. This course also features a two-week international learning experience in Rome that explores the roles that the Catholic Church and Vatican have played in ecology, science, literature and politics.

The Boyle Seminar in Scripts and Stories

First-year students investigate the intersection of Celtic and mediaeval cultures through manuscript analysis and language instruction. Participants are invited to travel to Ireland with the course instructors for an out-of-course international learning experience the following summer.

The McLuhan Seminar in Creativity and Technology

First-year students explore the relationship between creativity and technology and the individual, social, and cultural effects of innovation. The McLuhan Seminar will include a one-week trip to Silicon Valley, California.

The Seminar in Christianity, Truth and Reconciliation

First-year students critically explore the complex relations of Christianity and Indigenous peoples of Turtle Island, with a special
focus on education. The course includes guest speakers and travel to residential school site(s) and archives in Ontario.

First-Year Foundations Seminars

We offer small first-year seminars taught by St. Michael’s College professors that offer a topic-based and inter-disciplinary introduction to university-level studies.

Principal & Vice President: 81 St. Mary Street, Room 127, Odette Hall (416-926-7148)

St. Michael’s College Programs

Book and Media Studies Major (Arts Program) - ASMAJ1300

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

Completed courses (with minimum grades)
The following courses with the stated minimum grades are required:

- Any 100+ level course (67%)

Completion Requirements:

(6 full courses or their equivalent, including at least 2 FCEs at the 300+level, 0.5 FCE of which must be at the 400-level)

1. SMC219Y1
2. SMC228H1: SMC229H1
3. 1.5 FCE SMC courses as designated by the program:
   - SMC155H1/SMC165H1/SMC188H1/SMC189Y/SMC203Y1/SMC210H1/SMC212H1/SMC229H1/SMC291H1/SMC300H1/SMC301H1/SMC305H1/SMC314H1/SMC315H1/SMC316H1/SMC317H1/SMC318H1/SMC319H1/SMC358H1/SMC364H1/SMC367H1/SMC374H1/SMC382H1/SMC386H1/SMC387H1/SMC388Y1/SMC392H1/SMC397H1/SMC398H1
4. 1.5 FCE from:
   - Second Year Offerings: ANT253H1/ARC232H1/CDN221H1/ENG232H1/ENG234H1/ENG235H1/ENG287H1/FCS291H1/HIS241H1/HPS201H1/HPS202H1/SLA203H1/SLA254H1/SMC203Y1/SMC210H1/SMC212H1/SMC255H1/SMC291H1/Vis206H1/WGS271Y1
   - Third and Fourth Year Offerings: CIN389H1/ENG322Y1/FAH319H1/FRE308H1/FRE310H1/FRE324H1/GER310H1/HIS302H1/HIS316H1/HIS347H1/INS300Y1/INS302H1/JAL328H1/MUS300H1/SMC300H1
5. 0.5 FCE from:
   - SMC406H1/SMC425H1/SMC430H1/SMC431H1/SMC435H1/SMC462H1/SMC463H1/SMC464H1/SMC465H1/SMC466H1/SMC467H1/SMC470H1/SMC475H1
6. SMC385H1 or any course from Breadth Requirement Category 5: The Physical and Mathematical Universes

Book and Media Studies Minor (Arts Program) - ASMIN1300

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

Completed courses (with minimum grades)
The following courses with the stated minimum grades are required:

- Any 100+ level course (67%)

Completion Requirements:

(4 full courses or their equivalent, including at least one 300+ series full-course equivalent)

1. SMC219Y1
2. SMC228H1: SMC229H1
3. Two full courses or their equivalent from the following:
   - SMC155H1/SMC165H1/SMC188H1/SMC189Y
   - Second Year Offerings: ANT253H1/ARC232H1/CDN221H1/ENG232H1/ENG234H1/ENG235H1/ENG287H1/FCS291H1/HIS241H1/HPS201H1/HPS202H1/SLA203H1/SLA254H1/SMC203Y1/SMC210H1/SMC212H1/SMC255H1/SMC291H1/Vis206H1/WGS271Y1
   - Third and Fourth Year Offerings: CIN389H1/ENG322Y1/FAH319H1/FRE308H1/FRE310H1/FRE324H1/GER310H1/HIS302H1/JAL328H1/MUS300H1/SMC300H1
4. SMC301H1/SMC305H1/SMC314H1/SMC315H1/SMC316H1/SMC317H1/SMC318H1/SMC319H1/SMC355H1/SMC358H1/SMC364H1/SMC367H1/SMC374H1/SMC382H1/SMC386H1/SMC387H1/SMC388Y1/SMC392H1/SMC397H1/SMC398H1
5. SMC385H1 or any course from Breadth Requirement Category 5: The Physical and Mathematical Universes

Celtic Studies Specialist (Arts Program) - ASSPE1682

Description:

Examines the literature, languages, history, music, folklore and archaeology of the peoples of Ireland, Scotland and Wales in the
ancient and modern worlds, including the transmission of Celtic traditions to Canada and the United States.

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

(10.5 FCEs including 4.0 300+ series FCEs, 1.0 of which must be at the 400-level)

1. SMC240H1 and SMC241H1
2. 2.0 FCEs from the following language courses: SMC141Y1/SMC242Y1/SMC243Y1/SMC251H1/SMC252H1/SMC331H1/SMC332H1/SMC440H1/SMC441Y1/SMC445H1
3. 6.0 FCEs from the list above and/or SMC165H1/SMC188Y/SMC226H1/SMC250H1/SMC333H1/SMC334H1/SMC335Y1/SMC337H1/SMC338H1/SMC341H1/SMC342Y1/SMC343H1/SMC344Y1/SMC345H1/SMC346H1/SMC347H1/SMC348H1/SMC350H1/SMC351H1/SMC355H1/SMC356H1/SMC373H1/SMC374H1/SMC375H1/SMC376H1/SMC377H1/SMC378H1/SMC395Y1/SMC396H1/SMC411H1/SMC412H1/SMC413H1/SMC416H1/SMC444H1/SMC457H1
4. SMC451H1
5. 0.5 FCE from SMC232H1/SMC341H1/SMC348H1/SMC370H1/SMC371H1/SMC377H1/SMC383H1/SMC385H1/SMC444H1 or 0.5 FCE 200+ level from Breadth Requirement Category 5: The Physical and Mathematical Universes.

Celtic Studies Minor (Arts Program) - ASMIN1682

Description:

Examines the literature, languages, history, music, folklore and archaeology of the peoples of Ireland, Scotland and Wales in the ancient and modern worlds, including the transmission of Celtic traditions to Canada and the United States.

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

4.0 FCEs chosen from those listed for the Specialist program, including at least 1.0 FCE at 300+ level

Christianity And Culture Specialist (Arts Program) - ASSPE0463

Completion Requirements:

Admission to the Christianity and Culture Specialist has been administratively suspended as of 1 April 2015 and is no longer admitting students. Students presently enrolled in the Specialist will be able to complete the program requirements as described below.

Consult Principal’s Office, St. Michael’s College

The courses of the Christianity and Culture Program include (1) all the SMC prefixed courses listed below under the Christianity and Culture heading, and (2) the following courses of other programs and departments: HPS326H1/ITA311H1/SMC270H1/SMC289H1/RLG228H1/SMC176Y1/SMC213H1/SMC326H1/SMC464H1. In addition to Christianity and Culture courses, a number of other courses are cross-listed and may be counted towards the major and specialist programs as specified below. This list is available from the Program Co-ordinator, or on the St. Michael’s College web site: http://stmikes.utoronto.ca/christianity/courses

11 full courses or their equivalent; at least four 300+ series courses, including at least one full course at the 400 level; a total of up to 2.5 full courses may be selected from the approved list of cross-listed courses.

1. SMC103Y1/SMC188Y1/SMC189H1 and SMC189H1
2. SMC203Y1
3. 1.0 FCE from SMC200H1/SMC201H1/SMC205H1/SMC208Y1/SMC215H1/SMC232H1/SMC233H1
4. 0.5 FCE from SMC233H1/SMC385H1
5. Three of the following four options; see the list of courses in each group below:
(a) Two FCEs from “Christianity and Society”
(b) Two FCEs from “Christianity and the Intellectual Tradition”
(c) Two FCEs from “Christianity, Arts and Letters”
Christianity And Culture Major
(Arts Program) - ASMAJ0463

Description:
A multidisciplinary exploration of Christian traditions from artistic, literary, philosophical, theological, scientific, social and historical perspectives.

Enrolment Requirements:
This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:
(6.0 FCEs including at least 2.0 FCEs at the 300+ level, 0.5 of which must be at the 400 level.)

First year: No specific first-year requirements

1. SMC203Y1
2. 1.5 FCEs from SMC200H1/SMC215H1/SMC218H1/SMC232H1
3. 3.0 additional FCEs from the Christianity and Culture courses, with at least 2.0 FCEs from the following courses with an SMC designator. Students can choose courses from all course groups. Courses from other departments may be accepted on a case-by-case basis. Please contact the Program Coordinator, preferably before taking the course. It will help to have a syllabus for the course being considered.

(d) Two FCEs from “Christianity and Science”
6. 1.5 FCEs from Christianity and Culture or the list of approved cross-listed courses.

(a) Christianity and Society:
SMC204H1/SMC205H1/SMC215H1/SMC308H1/SMC309H1/SMC312H1/SMC313H1/SMC362Y1/SMC366H1/SMC456H1/SMC459H1/NMC270H1; relevant Independent Studies or Special Topic courses SMC390Y1/SMC391H1/SMC400Y1/SMC401H1/SMC433Y1/SMC434H1/SMC457H1; or relevant cross-listed courses.

(b) Christianity and the Intellectual Tradition:
SMC176Y1/SMC208Y1/SMC213H1/SMC307H1/SMC311H1/SMC322H1/SMC327H1/SMC330H1/SMC417H1/SMC418H1/NMC289H1; relevant Independent Studies or Special Topic courses SMC390Y1/SMC391H1/SMC400Y1/SMC401H1/SMC433Y1/SMC434H1/SMC457H1; or relevant cross-listed courses.

(c) Christianity, Arts and Letters:

Christianity And Culture Minor
(Arts Program) - ASMIN0463

Description:
An exploration of Christian traditions which may include artistic, literary, philosophical, theological, scientific, social or historical perspectives.

Enrolment Requirements:
This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:
(4.0 FCEs, including at least 1.0 FCE at 300+level)

First year: No specific first-year requirements

1. SMC203Y1
2. 1.0 FCEs from SMC200H1/SMC215H1/SMC218H1/SMC232H1
3. 2.0 FCEs from the Christianity and Culture courses listed in Requirement 3 of the Christianity and Culture Major, with at least 1.5 FCEs from courses with an SMC designator. Students can choose courses from all course groups. Courses from other departments may be accepted on a case-by-case basis. Please contact the Program Coordinator, preferably before taking the course. It will help to have a syllabus for the course being considered.
Minor Program in Christianity and Education (Arts Program) - ASMIN1014

Description:
This program offers students the opportunity to consider the theory, practice and history of Christian pedagogy.

Enrolment Requirements:
This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:
(4.0 FCEs, including at least 1.0 FCE at 300+ level)
First Year: No specific first-year requirements
1. SMC203Y1
2. SMC218H1, SMC312H1 and SMC313H1
3. 1.5 FCEs from the Christianity and Culture courses listed in Requirement 3 of the Christianity and Culture Major, with at least 1.0 FCE from courses with an SMC designator. Students can choose courses from all course groups. Courses from other departments may be accepted on a case-by-case basis. Please contact the Program Coordinator, preferably before taking the course. It will help to have a syllabus for the course being considered.

Christianity and Culture: Major Program in Religious Education (Arts Program) - ASMAJ1021

Completion Requirements:
Admission to the Christianity and Culture: Major Program in Religious Education has been administratively suspended as of 1 April 2015 and is no longer admitting students. Students presently enrolled in the minor will be able to complete the program requirements as described below.

IMPORTANT NOTE: Status may be reviewed at the end of each fall-winter session to determine progress to subsequent years.

Consult Principal's Office, St. Michael's College.

Program requirements: 8 full courses or their equivalent, at least 2.0 FCE at 300+ series, including at least 0.5 FCE at 400 level.
1. SMC103Y1
2. Two FCEs as follows: JSV200H1; JSV201H1 (formerly SMC272H1); JSV202H1 (formerly SMC271H1); SMC313H1
3. 0.5 FCEs from the following (internship options): SMC366H1 (formerly SMC218Y1)/ SMC362Y1/ SMC471H1
4. 4.5 FCEs from Christianity and Culture courses (including RLG100Y1/ RLG280Y1, SMC472Y1), with at least 1.5 FCE from the following: SMC203Y1/ SMC217H1/

Mediaeval Studies Specialist (Arts Program) - ASSPE1231

Description:
An interdisciplinary treatment of the history, art, literature and thought of the Middle Ages.

Enrolment Requirements:
This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:
(12.0 FCEs, including at least 4.0 FCEs at the 300+ level, 1.0 of which must be at the 400 level)
1. 0.5 FCE from the introductory courses: SMC165H1/ SMC176Y1/ SMC210H1/ SMC212H1.
2. 2.0 FCEs from the foundational courses which provide further introduction into more specific aspects of Mediaeval Studies: SMC176Y1/ SMC200H1/ SMC222H1 / SMC307H1 / SMC323H1 / SMC327H1 / SMC328H1 / SMC358H1 / SMC359H1 / SMC361H1 / SMC367H1
3. 2.0 FCEs from the following Latin courses: SMC176Y1/ LAT101H1/ LAT102H1/ LAT201H1/ LAT202H1/ SMC222H1/ SMC323H1/ SMC328H1/ SMC436H1
4. 6.0 FCEs from the following elective courses, with at least 2.0 FCEs from courses with an SMC designator. Students can choose courses from all four groups.

History:
SMC165H1/ SMC211H1/ SMC215H1/ SMC322H1/ SMC337H1/ SMC338H1/ SMC344Y1/ CLA378H1/ HIS208Y1/ HIS220Y1/ HIS251Y1/ HIS320H1/ HIS321H1/ HIS322H1/ HIS323H1/ HIS336H1/ HIS403H1/ HIS424H1/ HIS426H1/ HIS427H1/ HIS428H1/ HIS432H1/ HIS434Y1/ HIS438H1/ HPS201H1/ HPS430H1/ MST201H1/ MST202H1/ MST300H1/ NMC270H1/ NMC273Y1/ NMC275H1/ NMC342H1/ NMC376H1/ NMC377Y1/ SMC436H1/ SMC471H1

- SMC196H1 Beauty, Human and Divine
- SMC197H1 The Sistine Chapel: History, Imagery, Usage
- SMC198H1 How to Study Video Games
- SMC199H1 Intelligence, Artificial and Human

St. Michael's College Courses

SMC195H1 - God and Money in the Middle Ages

Hours: 24S

This seminar considers the ethical, political, and spiritual questions arising from the existence of wealth and poverty in medieval European culture. With readings from Dante, Chaucer, Thomas Aquinas and others, the course will examine how the interaction of spiritual ideals and material realities shaped cultural developments from late antiquity to the Protestant Reformation. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)
SMC196H1 - Beauty, Human and Divine

Hours: 24S

What is beauty? A quality of fragile things? Or a manifestation of something transcendent? Is beauty human, divine—or both? This seminar will take up these questions by exploring the great works—and intense debates—inspired by the encounter between Christianity and beauty. We will consider the tensions and paradoxes that arise when artists work with religious subject matter, how Christianity's central claims expand conventional aesthetics categories, and how secular artists respond to these expressions and developments. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

SMC197H1 - The Sistine Chapel: History, Imagery, Usage

Hours: 24S

The Sistine Chapel in Rome is a historical artifact, an artistic monument, and a house of worship—at once recognizable and mystifying. This seminar explores fifteenth-century origins, decoration by some of the most accomplished artists of the Italian renaissance, and continuing use (especially the election of popes). Topics will include: art and patronage, rhetoric and ritual, controversial restoration, and the Sistine Chapel in popular culture—with an emphasis on the close analysis of the major frescoes. The seminar will develop the academic skills needed for the analysis and discussion of texts, paintings, and ritual events. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

SMC198H1 - How to Study Video Games

Hours: 36S

Games and play are a fundamental part of human society, and today digital games occupy a central place in popular culture, media industries, and the imaginations of players around the world. This seminar introduces students to the growing academic field of game studies, with an emphasis on close analysis of specific games as cultural objects. Through lectures, discussions, and in-class play sessions, students will build a critical vocabulary and toolbox of techniques for understanding the unique formal, aesthetic, narrative, and thematic properties of games in a variety of platforms and genres, and develop basic academic reading, writing, and research skills. No previous experience or expertise with video games is required to take this course. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

SMC199H1 - Intelligence, Artificial and Human

Hours: 24S

What is human intelligence? How close are we to replicating it? How productive/reductive is the brain-computer analogy? What ethical challenges are posed by AI on workers, society, and the environment? Can we put a hold on "progress"? Is Silicon Valley the seat of a new techno-religion? What can they teach us about today's research priorities? What insight (or inspiration) can we get from works of science fiction about the future of human-AI interaction? Through reading discussion, written assignment, and workshops, this seminar will present students with the opportunity to integrate their computer science interests with philosophy, history, and literature. There is an equivalent course offered by the Department of Computer Science. Students may take one or the other but not both. Restricted to first-year students. Not eligible for CR/NCR option.

Exclusion: CSC199H1
Distribution Requirements: Science
Breadth Requirements: Society and its Institutions (3)

SMC One: First-Year Seminars

SMC155H1 - SMC One: The McLuhan Seminar in Creativity and Technology

Hours: 12L/12S

This seminar is an interdisciplinary exploration of the relationship between creativity and technology. Inspired by the innovative thinking of Marshall McLuhan, it explores how the humanities relate to other fields of thought and research in addressing the individual, social and cultural experiences and effects of technological innovation. This course includes a mandatory travel component to Silicon Valley, California. Restricted to first-year students. Not eligible for CR/NCR option. (An ancillary fee of $1,000 is required to help cover some of the travel costs.)

Prerequisite: Admission to SMC One
Exclusion: Innis One, Munk One, New One, Trinity One, Vic One, UC One, Woodsworth One, SMC165H1, SMC188H1, SMC189H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)
SMC165H1 - SMC One: The Boyle Seminar in Scripts and Stories

Hours: 24L/12S

This seminar introduces students to university-level studies through an interdisciplinary exploration of Celtic influences in the mediaeval world, with a particular focus on early books and historical artifacts as physical objects and bearers of meaning. Students will learn how to read and analyse these books and artifacts to decode their meanings, and, in support of that, take introductory language instruction in Latin or Irish. Subjects discussed will include intercultural encounter and dialogue, research methods with historical sources, and the relationship between the written word and lived experience, then and now. There is a co-curricular travel opportunity to Dublin, Ireland associated with this course which takes place following the Winter term exam period. Restricted to first-year students. Not eligible for CR/NCR option. (If you choose to go on the trip to Ireland, an ancillary fee of $1,000 is required to help cover some of the travel costs.)

Prerequisite: Admission to SMC One
Exclusion: Innis One, Munk One, New One, Trinity One, Vic One, UC One, Woodsworth One, SMC155H1, SMC188H1, SMC189H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

SMC188H1 - SMC One: The Gilson Seminar in Faith and Ideas

Previous Course Number: SMC188Y1
Hours: 12L/12S

This seminar is an interdisciplinary exploration of leading scholarly, intellectual and public questions related to ecology, science, literature, and public life. From a variety of perspectives, the seminar considers how religion, and how different kinds of religious experience, figure in the broader context of human affairs. Restricted to first-year students. Not eligible for CR/NCR option.

Prerequisite: Admission to SMC One
Exclusion: Innis One, Munk One, New One, Trinity One, Vic One, UC One, Woodsworth One, SMC155H1, SMC165H1, SMC188Y1
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

SMC189H1 - SMC One: The Gilson Seminar in Faith and Rome

Previous Course Number: SMC188Y1
Hours: 24L

This course provides an intensive international learning experience in Rome, Italy. It offers contemporary and historical models of integrating faith with reason, and religious practice with intellectual, creative, and public engagement, specifically the roles that the Catholic Church and Vatican play in Rome, in ecology, science, literature, and public life. This course includes a mandatory travel component to Rome, Italy, which takes place following the Winter term exam period. Restricted to first-year students. Not eligible for CR/NCR option. (An ancillary fee of $2,000 is required to help cover some of the travel costs.)

Prerequisite: SMC188H1
Exclusion: Innis One, Munk One, New One, Trinity One, Vic One, UC One, Woodsworth One, SMC155H1, SMC165H1, SMC188Y1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)
Book and Media Studies

SMC219Y1 - Media in Culture and Society

Hours: 48L/24T

Designed to acquaint students with the essential notions of media studies, and to promote a conscious utilization of contemporary media. Starting with the preliminary definitions of media, mass, and communications, the student is invited to consider critically the cultural constructs created by modern media, from print to photography, filming, TV, computer and Internet.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1); Society and its Institutions (3)

SMC228H1 - Book History and Print Culture

Hours: 36L

An historical introduction to the evolution of printing processes since Gutenberg. Attention is given to topics such as the mechanization of printing, the industrialization of the book chain since the nineteenth century, typography and publishing. Visits to rare book collections are an integral part of the course. Note: this course is not intended as a guide to self-publishing nor as a workshop on book making.

Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

SMC229H1 - Readers and Readerships

Hours: 36L

An introduction to the history of reading in western culture, from ancient Greece to the twenty-first century. Attention is given to topics such as the causes and effects of different modes of reading (silent or vocalized, intensive or extensive, educational or escapist), book clubs, censorship, and the ways in which readers have influenced cultural production.

Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

SMC255H1 - Critical Approaches to Media

Hours: 24L/5T

This course provides students the opportunity to explore the concepts of critical information literacy and critical media literacy in order to develop practical techniques for analyzing media messages and understanding implications of information production, distribution and ownership.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

SMC291H1 - Broadcast Media and Culture

Hours: 24L/12T

A survey of historical and contemporary developments in radio, television, and the internet, and their impact on culture. Lectures examine technological innovations, commercialization, nationalization of the airwaves, government regulation, censorship, ratings & viewership, broadcasting and popular culture, propaganda, and the evolution of the radio-television personality. Examples from Canadian and international media.

Prerequisite: Priority to BMS Students
Recommended Preparation: SMC219Y1/SMC228H1/SMC229H1
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

SMC300H1 - Special Topics in Book and Media Studies I

Hours: 24L

Designed to provide for individual half-courses not already covered in the listed range of the Book and Media Studies Program offerings. Students should check the college website for details.

Prerequisite: Priority to BMS students
Recommended Preparation: SMC219Y1; SMC228H1; SMC229H1
Distribution Requirements: Humanities
SMC301H1 - Special Topics in Book and Media Studies II

Hours: 24L

Various topics are taken up each year, the content of which depends on the instructor. Students should check the college website for details.

Prerequisite: Priority to BMS students
Exclusion: SMC301H1 (Special Topics in Book and Media Studies II: Seriality) completed in Fall 2016; SMC301H1 (Special Topics in Book and Media Studies II: Seriality and Transmedia) completed in Winter 2018
Recommended Preparation: SMC219Y1; SMC228H1; SMC229H1
Distribution Requirements: Humanities

SMC316H1 - Social Technology and Networks

Hours: 24L

Social media tools and platforms are deeply embedded in our contemporary lives. But what consequences do they have for how we think, how we feel, how we socialize, how we understand ourselves, and how our networked society and culture functions? Students in this course will explore, examine, and debate these questions with reference to their everyday experiences and current examples.

Prerequisite: Enrolment priority for students enrolled in a Book and Media Studies program
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

SMC314H1 - Media Revolutions

Hours: 24L

A deeper examination of key cases in the development of media, such as the invention of movable type, the mechanization of the printing press, standardization of call number systems (Dewey, LC, etc.), the advent of radio, television and internet. Topics vary from year to year, according to the instructor.

Recommended Preparation: SMC219Y1; SMC228H1; SMC229H1
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

SMC317H1 - Books, Media, and Music

Hours: 24L

Applying the thought of key media theorists (Innis, McLuhan, Habermas, Fiske, etc.) to the historical symbiosis between music and media, students in this course explore communications from oral storytelling to YouTube, as well as examine the relationship between music and other arts.

Recommended Preparation: SMC219Y1/SMC228H1/SMC229H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

SMC315H1 - The Newspaper in Canadian Society

Hours: 24L/9T

Through lectures, field trips and encounters with major personalities in the print media industry, this course examines the past, present and future of Canadian newspapers at a time when the survival of the industry is at stake. Research projects will focus on the enormous influence of newspapers in Canada’s formation, how newspapers are adapting to today’s on-line, social media and revenue challenges and how the future might lie with the past.

Recommended Preparation: SMC219Y1; SMC228H1; SMC229H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

SMC318H1 - Early Television

Hours: 24L

An exploration of early television programming in the light of critical media theory.

Prerequisite: SMC219Y1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)
SMC319H1 - Media Ethics

Hours: 24L

Provides students with a theoretical foundation that enables them to identify and analyze ethical issues in mainstream and non-mainstream media. Traditional principles of journalistic truth-seeking, objectivity, and minimizing harm are revisited in the light of global, interactive media, produced by both citizens and professionals.

Prerequisite: SMC219Y1/SMC228H1/SMC229H1
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

SMC386H1 - Book and Media Internship

Hours: 48P

Credit is offered to a student doing an internship with a media organization formally recognized as a partner of St. Michael's College and the Book and Media Studies Program. A faculty supervisor assesses and assigns the necessary written component cognate to the internship.

Prerequisite: Permission of the Program Coordinator and Principal
Recommended Preparation: SMC219Y1/SMC228H1/SMC229H1
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

SMC387H1 - Advertising and Media

Hours: 24L

An introduction to advertising and its use in global media. Emphasis is placed on the creative and manipulative character of contemporary advertising, the specialized messaging employed in public life and politics, and the growth of modern agencies for marketing and product promotion.

Prerequisite: SMC219Y1
Corequisite: None
Exclusion: None
Recommended Preparation: None
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

SMC388Y1 - Independent Study in Book and Media Studies

An independent research project to be proposed by the student and supervised by a full-time faculty member affiliated with the Book and Media Studies Program. Not eligible for CR/NCR option.

Prerequisite: SMC219Y1; SMC228H1; SMC229H1; enrolment in the Major program; approval of Program Director
Distribution Requirements: Humanities

SMC392H1 - Media Identities

Hours: 24L

An exploration of media's relation to constructions and representations of identity and power across race, gender and class in private and social spheres. Applies a social justice framework to media technologies and industries as mechanisms for socio-political influence on identity and potential vehicles for restoration and evolution of identity.

Recommended Preparation: SMC219Y1/SMC228H1/SMC229H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

SMC397H1 - Religion, Media and Culture

Hours: 24L

An overview of how religious groups use print and broadcast media to advance their theological, political, social, and economic views. An encounter with Christian, Muslim, Jewish, and South Asian faith groups and their use of newspapers, magazines, radio, television, and the internet. Emphasis on North American religious media, with reference to broadcasting elsewhere.

Prerequisite: Priority to BMS Students
Recommended Preparation: SMC219Y1/SMC228H1/SMC229H1
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

SMC398H1 - Independent Study in Book and Media Studies

An independent research project to be proposed by the student and supervised by a full-time faculty member affiliated with the Book and Media Studies Program. Not eligible for CR/NCR option.

Prerequisite: SMC219Y1; SMC228H1; SMC229H1; enrolment in the Major program; approval of Program Director
Distribution Requirements: Humanities
SMC430H1 - Advanced Topics in Book and Media Studies I
Hours: 24S
A course/seminar on a topic to be determined annually.

Recommended Preparation: SMC219Y1; SMC228H1; SMC229H1
Distribution Requirements: Humanities

SMC431H1 - Advanced Topics in Book and Media Studies II
Hours: 24S
A course/seminar on a topic to be determined annually.

Recommended Preparation: SMC219Y1; SMC228H1; SMC229H1
Distribution Requirements: Humanities

SMC462H1 - Contemporary Issues in Media and Music
Hours: 24S
This seminar explores the digital revolution in music—innovation in production and distribution, mobile devices and changing patterns of listening, and the role of digital media in teaching and learning (secondary orality)—as well as elements of resistance, e.g., the rise of small performance venues, and the revival of vinyl.

Recommended Preparation: SMC317H1
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

SMC463H1 - Media in Education
Hours: 24S
A senior seminar which examines various theories of education to create critical discourse on the role of media in the classroom.

Prerequisite: SMC219Y1
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

SMC464H1 - Church, Ethics, and Media
Hours: 24S
This advanced seminar explores the Catholic Church's use of and reflection on the media of social communication since Vatican II. It brings the key Vatican teaching documents into dialogue with contemporary media ethical theory, and roots the discussion in specific issues and case studies.

Prerequisite: SMC103Y1/SMC203Y1/SMC219Y1/SMC291H1
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

SMC465H1 - McLuhan
Hours: 24S
An advanced seminar on McLuhan's theory of technology, perception, and social media.

Prerequisite: SMC219Y1
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

SMC466H1 - Media and Cultural Industries in Canada (formerly Public Broadcasting in Canada)
Hours: 24S
This research seminar focuses on Canadian media and cultural industries and the institutions that shape them. Industries, institutions, and issues to be discussed may include film, television, music, radio, digital games, publishing, social media, the Canadian Broadcasting Corporation, cultural policy and regulation, public and private funding structures, changing conceptions of Canadian content, the influence of American media, digitization, and media labour organizing.

Prerequisite: Enrolment priority for students enrolled Book and Media Studies Major POST
Recommended Preparation: SMC291H1
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)
SMC467H1 - What is Information?

Hours: 24S

What is information? – The relativistic nature of information. Information as a process, a verb and not a noun. Role of information in the digital age. Information overload and how to deal with it. Shannon information and the relationship of information to meaning.

Prerequisite: 8.0 FCE completed
Distribution Requirements: Social Science
Breadth Requirements: Creative and Cultural Representations (1)

SMC470H1 - Media Manipulation and History

Hours: 24S

This course assesses way in which governments, political parties, news agencies and other groups and institutions use media to shape particular messages or describe current events. Each week the seminar will focus on a major historical event, the manner in which it was reported and interpreted, and principal challenges to that interpretation. A wide variety of media will be analyzed including: books, newspapers, film, radio, television, and the internet. Events such as the War on Terror, the Great War, the Dreyfus Affair, the Irish Famine, and the “Red Scare” are among some of the topics that will be discussed. Students will prepare unique assignments akin to the work done by communications officers.

Exclusion: SMC430H1S (2015-2016)
Recommended Preparation: SMC219Y1/SMC228H1/SMC229H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

SMC240H1 - The Celts in the Ancient and Medieval World

Previous Course Number: SMC240Y1
Hours: 24L

An introduction to the culture and literature of the Celtic peoples in pre-history and in the Middle Ages.

Prerequisite: None
Exclusion: SMC240Y1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

SMC241H1 - The Celts in the Modern World

Hours: 24L

An introduction to the culture and literature of the modern Celtic nations from 1600 to the present.

Exclusion: SMC240Y1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

SMC242Y1 - An Introduction to Scottish Gaelic

Hours: 48L/24T

An introduction to Scottish Gaelic language and culture. Students will master fundamentals of reading, writing, and the basics of grammar and will begin to speak Gaelic. Proverbs, poetry, songs and folktales introduce students to the language, literature and folklore of Gaelic Scotland and immigrant North America. No prior knowledge of the language is required.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

SMC243Y1 - Modern Welsh

Hours: 48L/24T

An introductory course intended to provide a basic speaking and reading knowledge of Modern Welsh. Open to students with no prior experience of Welsh.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)
SMC250H1 - Celtic Mythology

Previous Course Number: SMC250Y1

Hours: 24L

This course covers the range of the Celtic mythological record from all the Celtic areas through an examination of the archaeological, inscriptive and textual sources. A critical evaluation is offered of various relevant mythic approaches.

Exclusion: SMC250Y1

Distribution Requirements: Humanities

Breadth Requirements: Thought, Belief and Behaviour (2)

SMC251H1 - Intermediate Irish Language I

Hours: 24L/12T

This course builds on SMC141Y1 Introduction to the Irish Language. It will provide further expansion of the four language skills: listening, speaking, reading and writing.

Prerequisite: SMC141Y1

Distribution Requirements: Humanities

Breadth Requirements: Creative and Cultural Representations (1)

SMC252H1 - Intermediate Irish Language II

Hours: 24L/12T

This course is a continuation of SMC251H1 Intermediate Irish Language I. It will provide further expansion of language skills. We will examine literary texts, both prose and poetry.

Prerequisite: SMC251H1

Distribution Requirements: Humanities

Breadth Requirements: Creative and Cultural Representations (1)

SMC250H1 - Celtic Mythology

Previous Course Number: SMC250Y1

Hours: 24L

This course covers the range of the Celtic mythological record from all the Celtic areas through an examination of the archaeological, inscriptive and textual sources. A critical evaluation is offered of various relevant mythic approaches.

Exclusion: SMC250Y1

Distribution Requirements: Humanities

Breadth Requirements: Thought, Belief and Behaviour (2)

SMC251H1 - Intermediate Irish Language I

Hours: 24L/12T

This course builds on SMC141Y1 Introduction to the Irish Language. It will provide further expansion of the four language skills: listening, speaking, reading and writing.

Prerequisite: SMC141Y1

Distribution Requirements: Humanities

Breadth Requirements: Creative and Cultural Representations (1)

SMC252H1 - Intermediate Irish Language II

Hours: 24L/12T

This course is a continuation of SMC251H1 Intermediate Irish Language I. It will provide further expansion of language skills. We will examine literary texts, both prose and poetry.

Prerequisite: SMC251H1

Distribution Requirements: Humanities

Breadth Requirements: Creative and Cultural Representations (1)

SMC250H1 - Celtic Mythology

Previous Course Number: SMC250Y1

Hours: 24L

This course covers the range of the Celtic mythological record from all the Celtic areas through an examination of the archaeological, inscriptive and textual sources. A critical evaluation is offered of various relevant mythic approaches.

Exclusion: SMC250Y1

Distribution Requirements: Humanities

Breadth Requirements: Thought, Belief and Behaviour (2)

SMC251H1 - Intermediate Irish Language I

Hours: 24L/12T

This course builds on SMC141Y1 Introduction to the Irish Language. It will provide further expansion of the four language skills: listening, speaking, reading and writing.

Prerequisite: SMC141Y1

Distribution Requirements: Humanities

Breadth Requirements: Creative and Cultural Representations (1)

SMC252H1 - Intermediate Irish Language II

Hours: 24L/12T

This course is a continuation of SMC251H1 Intermediate Irish Language I. It will provide further expansion of language skills. We will examine literary texts, both prose and poetry.

Prerequisite: SMC251H1

Distribution Requirements: Humanities

Breadth Requirements: Creative and Cultural Representations (1)

SMC250H1 - Celtic Mythology

Previous Course Number: SMC250Y1

Hours: 24L

This course covers the range of the Celtic mythological record from all the Celtic areas through an examination of the archaeological, inscriptive and textual sources. A critical evaluation is offered of various relevant mythic approaches.

Exclusion: SMC250Y1

Distribution Requirements: Humanities

Breadth Requirements: Thought, Belief and Behaviour (2)

SMC251H1 - Intermediate Irish Language I

Hours: 24L/12T

This course builds on SMC141Y1 Introduction to the Irish Language. It will provide further expansion of the four language skills: listening, speaking, reading and writing.

Prerequisite: SMC141Y1

Distribution Requirements: Humanities

Breadth Requirements: Creative and Cultural Representations (1)

SMC252H1 - Intermediate Irish Language II

Hours: 24L/12T

This course is a continuation of SMC251H1 Intermediate Irish Language I. It will provide further expansion of language skills. We will examine literary texts, both prose and poetry.

Prerequisite: SMC251H1

Distribution Requirements: Humanities

Breadth Requirements: Creative and Cultural Representations (1)

SMC331H1 - Advanced Irish Language I

Hours: 24L/12T

An advanced course in the Irish language, this builds on the speaking, listening, reading and writing competencies developed in SMC331H1 (Advanced Irish Language I).

Prerequisite: SMC331H1

Exclusion: SMC333H1 (Special Topics in Celtic Studies I: Advanced Irish Language), offered in Fall 2018

Distribution Requirements: Humanities

Breadth Requirements: Creative and Cultural Representations (1)

SMC332H1 - Advanced Irish Language II

Hours: 24L/12T

An advanced course in the Irish language, this builds on the speaking, listening, reading and writing competencies developed in SMC331H1 (Advanced Irish Language I).

Prerequisite: SMC331H1

Exclusion: SMC333H1 (Special Topics in Celtic Studies I: Advanced Irish Language), offered in Fall 2018

Distribution Requirements: Humanities

Breadth Requirements: Creative and Cultural Representations (1)

SMC333H1 - Special Topics in Celtic Studies I

Hours: 24S

Various topics are taken up each year, the content of which depends on the instructor. Students should check the college web site for details.

Prerequisite: Permission of the instructor.

Distribution Requirements: Humanities

SMC334H1 - Special Topics in Celtic Studies II

Hours: 24S

Various topics are taken up each year, the content of which depends on the instructor. Students should check the college web site for details.

Prerequisite: Permission of the instructor.

Distribution Requirements: Humanities

SMC335Y1 - Special Topics in Celtic Studies III

Hours: 48S

Topic varies from year to year, depending on the instructor. Students should check the college web site for details.

Prerequisite: Permission of the instructor.

Distribution Requirements: Humanities
SMC337H1 - Early Celtic History 450-1000

Hours: 24L

The history of the insular Celtic nation groups from the post-Roman period to the end of the first millennium, the course will trace settlement history and social organization, the making of Celtic nations, the process of Christianization, the impact of the Vikings, and the rise of paramount kings (offered every three years).

Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

SMC338H1 - The Celtic Nations in the Later Middle Ages 1000-1550

Hours: 24L

Later medieval development of Ireland, Scotland and Wales: development of kingship, trade and urban settlement, arrival and colonizing patterns of the Normans, role of English administration and aggression, resurgence of native elites, development of frontier zones, beginning of the more complete English conquest of Ireland and Wales (offered every three years)

Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

SMC339H1 - Global Irish Diaspora

Hours: 24L

Over 70 million people in the world can claim Irish descent. Since the 17th century, Irish people have voluntarily migrated and have been forcibly transported to a variety of global destinations. This course explores the "push and pull" factors that prompted these migrations and focuses on the diasporic communities created by Irish Catholics and Protestants in Great Britain, Canada, the United States, Continental Europe, the Caribbean, Argentina, South Africa, India, Australia, and New Zealand.

Recommended Preparation: SMC348H1/SMC378H1
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

SMC342Y1 - Literature of Three Nations: Ireland, Scotland and Wales

Hours: 48L

This course examines the way in which modern Irish, Scottish and Welsh writers have responded to the pressures of anglicization and modernization, and discusses literary reactions to social, ethnic and gender issues in contemporary culture. (Offered every three years)

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1); Society and its Institutions (3)

SMC343H1 - Medieval Celtic Narratives

Previous Course Number: SMC343Y1
Hours: 24L

Course explores the full range of Celtic narratives, mythic, heroic, romantic, and voyage lore from medieval Ireland and Wales.

Prerequisite: Completion of at least 5.0 FCEs
Exclusion: SMC343Y1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

SMC344Y1 - Celtic Archaeology

Hours: 48L

The archaeology of the Celtic peoples, with special reference to settlement patterns and material culture in Great Britain and Ireland. (offered every three years)

Distribution Requirements: Social Science
Breadth Requirements: Creative and Cultural Representations (1); Society and its Institutions (3)
SMC345H1 - Writing Ireland

Hours: 24L

This course looks at some of the major literary figures of Ireland in the twentieth and twenty-first centuries, writing in both Irish and English. Authors examined may include W. B. Yeats, Patrick Pearse, Nuala Ní Dhomhnaill, Seán Ó Riordáin, Seamus Heaney and Claire Keegan. Through a close reading of poetry, prose and critical texts, students will examine how Ireland's past, present and future are variously figured in its greatest modern literature. All Irish-language works will be read in English translation.

Prerequisite: 8 FCE or permission of the instructor.
Recommended Preparation: SMC241H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

SMC346H1 - Celtic Folklore

Hours: 24L

This course examines the relationship between folklore and national identity in Ireland, Scotland and Wales, with special emphasis on storytelling traditions.

Prerequisite: Completion of five undergraduate full course equivalents
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

SMC347H1 - Traditional Music in Ireland and Scotland

Hours: 24L

From Medieval harp playing to the emergence of reels and jigs during the eighteenth century, this course explores the changes and continuities in traditional music, and its place in contemporary culture.

Prerequisite: Completion of five undergraduate full course equivalents
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

SMC348H1 - Early Modern Ireland

Hours: 24L

This course focuses on Irish history from the early seventeenth century to the Great Famine of the mid nineteenth century. Topics include the Ulster plantation, Catholic resistance, the Penal Laws, the United Irishmen, the Act of Union, Catholic Emancipation and the Famine.

Prerequisite: Completion of five undergraduate full course equivalents
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

SMC349H1 - Celtic Spirituality

Hours: 24L

The religious culture of the early and mediaeval Celtic Church as manifested in the material and written record, and its significance for contemporary religious movements. Texts studied include the Patrician dossier, early monastic Rules and Liturgies, selected hagiographical, homiletic, devotional and lyric texts.

Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

SMC350H1 - The Blasket Island Writings

Hours: 24L

The Blasket Islands lie off the southwest coast of Ireland. This course will examine the important library of books written and orally recorded by the islanders from the 1920s onwards. Special attention will be paid to The Island Man, Peig and Twenty Years a Growing. Texts studied in translation (offered every three years).

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

SMC351H1 - Contemporary Celtic Cinema

Hours: 36L

An exploration of contemporary films of Ireland, Scotland and Wales from 1980 to the present, as they relate to representations of Celtic identity and the formation of national cinema.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)
SMC356H1 - The Continental Celts

Hours: 24L

The course examines the early history of the Celtic peoples in Europe from their first appearance in the material culture of prehistoric Europe to their eventual disappearance as a political power in the first century of Roman conquest (offered every three years; will be offered in 2014-2015).

Recommended Preparation: SMC240Y1/SMC240H1
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

SMC376H1 - Irish Canadian Literature

Hours: 24L

This course examines the ways their Irish background and Canadian experiences influenced Irish writers in Canada, and discusses their impact on Canadian literature. Figures to be studied include nineteenth-century writers such as Isabella Valancy Crawford and Thomas D’Arcy McGee, and more recent writers such as Brian Moore and Emma Donoghue.

Prerequisite: Completion of five undergraduate full course equivalents
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

SMC337H1 - Medieval Celtic Poetry

Hours: 24L

A comparative study of medieval Irish and Welsh poetry - lyric, courtly, saga, bardic, romantic, erotic, monastic, and comedic - from the late sixth century to the end of the Middle Ages. All works will be read in translation.

Exclusion: SMC411H1 (2013-2014)
Recommended Preparation: SMC240Y1/SMC240H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

SMC377H1 - The Celts in Cape Breton

Hours: 24L

An examination of the ways in which Scottish, Irish, Newfoundlander, and other Celtic immigrants shaped the culture of Cape Breton and by extension Canada, with particular reference to language, literature, music and folklore.

Prerequisite: Completion of five undergraduate full course equivalents
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

SMC374H1 - The Celtic Book

Hours: 24L

A study of the production of manuscripts, books and tracts that played a crucial role in the historical evolution of a national culture or cultures in the Celtic world.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

SMC378H1 - Ireland Since the Famine

Hours: 24L

This course examines the relationship between nationalism and unionism in post-Famine Ireland, with particular emphasis on the debates over Home Rule, the Irish Revolution and Civil War of 1916-23, the effects of partition, and the Troubles in Northern Ireland.

Prerequisite: Completion of five undergraduate full course equivalents
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

SMC375H1 - The Contemporary Irish Novel

Hours: 24L

This course examines the Irish novel after Joyce. Particular attention is paid to writers such as Molly Keane, Edna O’Brien, Anne Enright, John Banville, Patrick McCabe and Roddy Doyle

Prerequisite: Completion of five undergraduate full course equivalents
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

SMC395Y1 - Independent Study in Celtic Studies

A research project chosen by the student in consultation with an instructor and approved by the Program Co-ordinator. Arrangements for the choice of topic and supervisor must be completed by the student before registration. Not eligible for CR/NCR option.

Prerequisite: Approval of Instructor and Program Director
Distribution Requirements: Humanities
SMC396H1 - Independent Study in Celtic Studies

A research project chosen by the student in consultation with an instructor and approved by the Program Co-ordinator. Arrangements for the choice of topic and supervisor must be completed by the student before registration. Not eligible for CR/NCR option.

Prerequisite: Approval of Instructor and Program Director
Distribution Requirements: Humanities

SMC411H1 - Advanced Topics in Celtic Studies I

Hours: 24S

Various topics are taken up each year, the content of which depends on the instructor. Students should check the college web site for details.

Prerequisite: Permission of the instructor
Distribution Requirements: Humanities

SMC412H1 - Advanced Topics in Celtic Studies II

Hours: 24S

Various topics are taken up each year, the content of which depends on the instructor. Students should check the college web site for details.

Prerequisite: Permission of the instructor
Distribution Requirements: Humanities

SMC413H1 - The Irish in Canada

Hours: 24S

This course explores the history of Irish migration and settlement in Canada with a special emphasis on political, social, economic and religious themes.

Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

SMC416H1 - Irish Nationalism in Canada

Hours: 24S

An in-depth examination of the Fenian underground in Canada during the 1860s, using primary sources to examine such issues as ethno-religious conflict, the relationship between Catholicism and Irish nationalism, and the efforts of the secret police force to infiltrate and undermine the Fenian Brotherhood. Special attention is paid to the ways in which the state responded to the threat posed by Irish revolutionaries who supported an Irish-American invasion of Canada as a means to hit back at the British Empire and pave the way for Irish independence.

Prerequisite: Permission of the instructor
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

SMC416H1 - Irish Nationalism in Canada

SMC440H1 - Middle Welsh

Previous Course Number: SMC440Y1
Hours: 24L

Middle Welsh, the native Celtic language of medieval Wales, was for centuries the language in which the Welsh celebrated their medieval princes and ancestral heroes, was the medium for the preservation of native British legend and Welsh law, and was the vehicle for the earliest narratives of Arthur. Students will be introduced to reading and translating Middle Welsh, and by the course’s end will have read one complete text of Middle Welsh literature in the original. Students will learn Welsh specifically but will also learn the characteristic linguistic features of a Celtic language. No prior knowledge of Welsh or any other Celtic language is assumed.

Prerequisite: Permission of the instructor
Exclusion: SMC440Y1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

SMC441Y1 - Old and Middle Irish

Hours: 48L

An introduction to Old and Middle Irish language and literature from the 7th to the 11th century.

Prerequisite: Permission of instructor
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)
SMC444H1 - The Great Irish Famine in an International Context

Hours: 24S

An examination of the Great Irish Famine, 1845-1851, in its economic, political, social, demographic and religious dimensions and issues of collective and created memory. By use of manuscript and routinely generated records students will explore mass migration from Ireland to Britain, the Americas, and the Antipodes.

Recommended Preparation: SMC348H1/SMC378H1/HIS263Y1
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

Christianity & Culture

SMC120H1 - Catholicism in Conversation

Hours: 24L/12T

What is Catholicism, as an idea, as a social movement, as an object of scorn, devotion or delight? What meaning does Catholic tradition have in the contemporary world? This seminar explores these and similar questions through lectures and conversations with diverse scholars—faculty, fellows and friends—of the St. Michael's College community.

Exclusion: SMC103Y1
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

SMC445H1 - Directed Research in Middle Welsh

Previous Course Number: SMC440Y1
Hours: 24S

In this course the student will gain practical experience assisting the instructor on an original research project in Middle Welsh. The course is designed to follow on SMC440H1 and will involve transcribing and translating a Middle Welsh text from a facsimile of a Middle Welsh manuscript. The student will gain experience in reading and transcribing from a medieval manuscript, in preparing original translations from a medieval Welsh text and in working with the principal scholarly aids used by professional researchers in the field.

Prerequisite: SMC440H1; permission of instructor
Exclusion: SMC440Y1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

SMC200H1 - Christianity and the Arts

Hours: 24L/12T

This course introduces students to creative works from throughout the global Christian tradition. The course explores the complex relationships that exist between religious and aesthetic imperatives, between theological and material sources, between beauty and suffering, and between artists and their patrons and audiences.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

SMC203Y1 - Christianity and Society Through the Ages

Hours: 48L/24T

This course explores the historical engagement of various Christian traditions with the prevailing political, social, and ethnic cultures in the western world and beyond. Students will also examine the development of Christianity as it confronts changes in the symbolic and intellectual universes from antiquity to post-modernity.

Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3); Thought, Belief and Behaviour (2)

SMC451Y1 - Senior Essay in Celtic Studies

A scholarly project chosen by the student in consultation with an instructor and approved by the Program Co-ordinator. Arrangements for the choice of topic must be completed by the student before registration.

Prerequisite: Permission of instructor
Distribution Requirements: Humanities
SMC215H1 - Varieties of Christian Community

Hours: 24S

Christian history has been characterized by an enduring and fruitful search for forms of religious community. This course surveys some communal attempts to express Christianity, monasticism, forms of common life for clerics, the Mendicants, lay confraternities, religious orders, and contemporary lay movements.

Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

SMC218H1 - Christianity and Education

Hours: 24L

An exploration of pedagogy and child development theory, with a particular focus on the way Christians have employed these educational techniques historically. Attention will be given to the diversity of institutions and approaches to curriculum development across Christian history.

Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

SMC232H1 - Christianity and Science

Hours: 24L

This course examines different models of relating Christianity and Science. Beginning with the biblical view on the natural world and moving to the present, the lectures develop a wide range of approaches.

Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

SMC230H1 - Global Christianities

Hours: 24L/12T

An advanced introduction to the diverse traditions and movements of contemporary Christianity, with special emphasis on the global South. Sample topics include new ecclesial communities, the rise of Pentecostalism and independent churches, liberation and indigenized theologies, and new forms of martyrdom in the 21st century.

Prerequisite: Completion of 4.0 FCEs
Exclusion: SMC204H1; SMC207H1; SMC209H1
Recommended Preparation: SMC203Y1; SMC215H1
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

SMC304H1 - Christianity, Law and Society

Hours: 24L

An examination of Canon Law; the process by which it came into being, and its impact on contemporary culture. Premises and techniques of ecclesial law-making are compared to those of other systems of legislation. Specific sections of the Code of Canon Law are examined.

Prerequisite: Completion of 4.0 FCEs
Recommended Preparation: SMC203Y1; SMC215H1
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

SMC305H1 - Christianity and Popular Culture

Hours: 36L

An examination of both overt and covert representations of Christian ideas in contemporary popular media. We examine the ways in which Christian themes have been appropriated and subverted in mass media, while also examining the innovative ways these themes, such as redemption, sacrifice, vocation, and hope, are presented anew.

Prerequisite: Completion of 4.0 FCEs
Recommended Preparation: SMC200H1/SMC367H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

SMC306H1 - The Catechism of the Catholic Church

Previous Course Number: SMC310H1
Hours: 24L

Introduces students to the Catechism of the Catholic Church (1994) and its antecedents. After an historical survey of religious instruction in the Church, the students will engage in a close reading of selected sections of the Catechism of the Catholic Church.

Prerequisite: Completion of 4.0 FCEs
Exclusion: SMC310H1
Recommended Preparation: SMC203Y1; SMC215H1
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)
SMC307H1 - Scripture in Christian Tradition

Hours: 24L/12T

The formation and content of the Christian Bible; an introduction to the history of its interpretation and of the role it has played and continues to play in Christian life and culture.

Prerequisite: Completion of 4.0 FCEs
Exclusion: SMC307Y1
Recommended Preparation: SMC203Y1; SMC215H1
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

SMC308H1 - Marriage and the Family in the Catholic Tradition

Hours: 24L

A close reading of the Code of Canon Law touching on the themes of marriage and the family; relationship to other fundamental Church statements (e.g. Familiaris Consortio); examination of issues raised by opposition between church teaching and other views.

Prerequisite: Completion of 4.0 FCEs
Recommended Preparation: SMC203Y1; SMC215H1
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

SMC309H1 - Christianity and Politics

Hours: 24L/12T

This course explores developments in the relations between the Catholic Church and the states of Western Europe and America from the Enlightenment to the present. Of particular concern is Catholicism's response to the political theories of the Enlightenment, the secularization of the state and social justice issues.

Prerequisite: Completion of 4.0 FCEs
Recommended Preparation: SMC203Y1; SMC215H1; HIS241H1
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

SMC311H1 - Why the Church

Hours: 24S

The Catholic Church claims to be the continuation of the event of Christ in history, the guarantor of the authenticity of each person's encounter with Christ, and the means by which His memory may be cultivated. The course examines the reasons for these claims and the forms they have taken.

Prerequisite: Completion of 4.0 FCEs
Recommended Preparation: SMC200H1/SMC327H1/SMC367H1/SMC368H1
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

SMC312H1 - Catholicism and Education

Hours: 24S

The Catholic Church has developed a distinctive approach to the pedagogical enterprise. This course explores aspects of this approach by an examination of canonical legislation and other texts published by ecclesiastical authorities and their application in Canada.

Prerequisite: Completion of 4.0 FCEs
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

SMC313H1 - Catholic Education in Ontario

Hours: 24L

An historical appraisal of the evolution of Catholic schools, universities, and catechetical education in Ontario. Special emphasis is placed on the evolution of Ontario's separate school system.

Prerequisite: Completion of 4.0 FCEs
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)
SMC322H1 - Women and Christianity

Hours: 24S

An exploration of what Pope John Paul II, among others, called the "feminine tradition" in Christian life and thought. Possible topics include women's roles in the early church, Marian dogmas and devotions, women mystics and Doctors of the Church, and Christian feminisms and New Feminisms in the contemporary period.

Prerequisite: Completion of 4.0 FCEs
Recommended Preparation: SMC203Y1/SMC215H1
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

SMC327H1 - Ritual and Worship

Hours: 24L/12T

Prerequisite: Completion of 4.0 FCEs
Exclusion: SMC216Y1
Recommended Preparation: SMC203Y1
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

SMC330H1 - Christ in Christian Tradition

Hours: 24L/12T

Faith in Christ is central to Christianity. This course offers an advanced introduction to classical debates about the person and work of Christ, the modern Quest of the Historical Jesus, and selected feminist, liberationist and indigenized perspectives on Christ from Asia, Africa and Latin America.

Prerequisite: Completion of 4.0 FCEs
Exclusion: SMC330Y1
Recommended Preparation: SMC203Y1
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

SMC362H1 - International Development, Justice, and Human Dignity

Previous Course Number: SMC362Y1
Hours: 24L

This seminar raises critical questions of social justice and international development from diverse religious and disciplinary perspectives. It is required preparation for the international community-engaged learning course, SMC453H1 Development and Justice Internship.

Prerequisite: Completion of 4.0 FCEs and permission of instructor
Exclusion: SMC362Y1
Recommended Preparation: SMC203Y1/SMC215H1
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

SMC364H1 - The Christian Book

Hours: 24L

An interdisciplinary examination of the Bible as artifact and as an index of culture, art, and language. Topics include: the mediaeval giant Bibles, illuminated and illustrated Bibles, the Gutenberg Bible, The King James Bible, the Bible industry, the Bible online, the Bible as sacred object, sacred language and vernacular.

Prerequisite: Completion of 4.0 FCEs
Recommended Preparation: SMC200H1/SMC228H1/SMC229H1/SMC367H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

SMC365H1 - Christianity, Art, and Architecture

Hours: 24L/12T

An exploration of visual arts and architecture as mediums for expressing Christian faith. The course will examine notable developments in Christian history, the proliferation of new forms in the contemporary period, and important local works, such as the Donovan Collection and/or the rich legacy of church architecture in the GTA.

Prerequisite: Completion of 4.0 FCEs
Recommended Preparation: SMC203Y1/SMC200H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)
SMC367H1 - Christianity, Literature, and Theatre

Previous Course Number: SMC201H1
Hours: 24L

This course introduces students to works of literary and dramatic arts from throughout the global Christian tradition. The course explores the complex relationships that exist between religious, narrative, and performative imperatives; between theological and cultural sources; between authority and experience; and between writers, playwrights, and their readerships and audiences.

Prerequisite: Completion of 4.0 FCEs
Exclusion: SMC201H1
Recommended Preparation: SMC203Y1; SMC215H1; SMC200H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

SMC368H1 - Varieties of Christian Experience

Previous Course Number: SMC205H1
Hours: 24L

Exploration of the variety of forms which Christian personal experience has taken in the course of history (martyrdom, mysticism, monasticism, sanctification of ordinary life, etc.) in order to appreciate their variety, complexity, and deep unity.

Prerequisite: Completion of 4.0 FCEs
Exclusion: SMC205H1
Recommended Preparation: SMC203Y1; SMC215H1
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

SMC369H1 - Christianity and Music

Previous Course Number: SMC206H1
Hours: 24L

The various roles given music in Christian tradition and the impact of Christianity on Western music. Case studies from Gregorian chant to the present illustrate major issues (sacred vs. profane, acceptable styles or instruments, text and music, emotion and rationalism) to provide a critical vocabulary applicable to present works. Some background in music is required.

Prerequisite: Completion of 4.0 FCEs
Exclusion: SMC206H1
Recommended Preparation: SMC203Y1; SMC215H1; SMC200H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

SMC370H1 - The Bible and Biology

Hours: 24L/12T

Episodes and issues in the development of biology, genetics and evolutionary theory in relation to Christian understandings of the natural world, the human person, and God. Possible topics include genetic determinism, mind and intelligence, gender, reproductive technologies, cosmology and ecology.

Prerequisite: Completion of 4.0 FCEs
Recommended Preparation: SMC203Y1/SMC232H1
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

SMC371H1 - Faith and Physics

Hours: 24L

The complex interplay between religious belief, culture, and the emergence of modern physical theory: rise and fall of mechanistic theories, relativity, particle physics and models of the Universe, Big Bang theory and Black Holes, etc.

Prerequisite: Completion of 4.0 FCEs
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

SMC372H1 - The Catholic Church in Canada

Previous Course Number: SMC320H1
Hours: 24L

An exploration of the historical development of Catholic communities and institutions in all regions of Canada since the 16th century. Emphasis placed on themes of mission, church-state relations, ethnicity, belief and practice, social justice, gender, and secularization.

Prerequisite: Completion of 4.0 FCEs
Exclusion: SMC320H1
Recommended Preparation: SMC203Y1
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)
SMC379H1 - Major Christian Thinkers

Previous Course Number: SMC208Y1
Hours: 24L/12T

An advanced introduction to the Christian intellectual tradition through a study of key figures from several different historical periods and cultural contexts. Selected authors discuss a range of religious, intellectual and social issues, from foundational Christian beliefs to the challenges of modern, post-modern and secular cultures.

Prerequisite: Completion of 4.0 FCEs
Exclusion: SMC208Y1
Recommended Preparation: SMC203Y1; SMC215H1
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

SMC382H1 - Literature and the Christian Child

Previous Course Number: SMC217H1
Hours: 24L/12T

An exploration of connections between a child's moral development and literature in Christian traditions. We examine literary, historical and philosophical developments appropriate to the child's imagination. The course will include the study of poems, catechetical materials, novels and other texts written for children.

Prerequisite: Completion of 4.0 FCEs
Exclusion: SMC217H1
Recommended Preparation: SMC203Y1; SMC215H1; SMC200H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

SMC383H1 - God and Geometry

Previous Course Number: SMC233H1
Hours: 24L

This course engages controversial issues in the natural sciences of importance to Christian faith, with particular emphases on their ancient and the medieval origins and enactments. Examples include: Harmony vs. Chaos, Creation vs. Evolution, Free Will vs. Determinism, Reason vs. Revelation, Miraculous vs. Natural Causation.

Prerequisite: Completion of 4.0 FCEs
Exclusion: SMC233H1
Recommended Preparation: SMC203Y1; SMC232H1
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

SMC384H1 - Music and Liturgy

Previous Course Number: SMC363H1
Hours: 24L

An exploration of the place of music in Christian worship, with a focus on contemporary Eucharist. Examination of the development of liturgico-musical principles and their practical implementation. Topics may include styles and repertoires, singing liturgical texts, hymnody and other forms of congregational singing, choirs and cantors, the use of instruments.

Prerequisite: Completion of 4.0 FCEs
Exclusion: SMC363H1
Recommended Preparation: SMC203Y1; SMC215H1; SMC369H1; SMC327H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

SMC390Y1 - Independent Studies in Christianity and Culture

A concluding course in Christianity and Culture, providing an opportunity to synthesize insights acquired during the course of the program (enrolment subject to availability of a supervisor). Not eligible for CR/NCR option.

Prerequisite: Completion of 4.0 FCEs and written approval of Program Director
Distribution Requirements: Humanities

SMC391H1 - Independent Studies in Christianity and Culture

Prerequisite: Completion of 4.0 FCEs and written approval of Program Director
Distribution Requirements: Humanities

SMC433Y1 - Independent Studies in Christianity and Culture

An independent research project to be proposed by the student and supervised by a Christianity and Culture faculty member. The student, in consultation with the faculty member, may choose either a one-term (H) or a two-term (Y) project. Not eligible for CR/NCR option.

Prerequisite: Completion of 8.0 FCEs; permission of Program Director
Distribution Requirements: Humanities
SMC434H1 - Independent Studies in Christianity and Culture

An independent research project to be proposed by the student and supervised by a Christianity and Culture faculty member. The student, in consultation with the faculty member, may choose either a one-term (H) or a two-term (Y) project. Not eligible for CR/NCR option.

Prerequisite: Completion of 8.0 FCEs; permission of Program Director
Distribution Requirements: Humanities

SMC456H1 - Indian Christianity

Hours: 24S

An advanced study of the historical development, major theological writings and contemporary ethnographic studies of diverse Christian traditions in South Asia. Topics to be covered include the legacy of Thomas Christianity, Hindu-Christian dialogue, the Christian ashram movement, liturgical inculturation and religious hybridity.

Prerequisite: Completion 8.0 FCEs
Recommended Preparation: SMC203Y1; SMC303H1; RLG203H1 and/or RLG205H1
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

SMC472H1 - Research Seminar in Christianity and Culture

Previous Course Number: SMC472Y1
Hours: 24S

The seminar provides majors in their final year of study with the opportunity to pursue advanced research projects in Christianity and Culture.

Prerequisite: Completion of 8.0 FCEs
Exclusion: SMC472Y1
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

Mediaeval Studies

SMC210H1 - The Early Mediaeval Tradition

Hours: 24L/12T

An introduction to the thought and culture of early mediaeval Europe. Students are introduced to important monuments of early mediaeval History, Thought, Literature, and Art. They follow some of the common threads that run through these disciplines and explore chief expressions of early mediaeval life and thought.

Recommended Preparation: SMC175H1
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

SMC211H1 - The Middle Ages and the Movies

Hours: 24L/12T

This course examines the ways mediaeval themes have been presented in the cinema over the last century by taking exemplary films from different countries and epochs. The purpose is to explore each on three levels: the mediaeval reality, the subsequent legendary or literary elaboration, and the twentieth-century film rendition, regarded equally as work of art, ideology and economic product.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

SMC212H1 - The Later Mediaeval Tradition

Hours: 24L/12T

An introduction to the thought and culture of later mediaeval Europe. Students are introduced to important monuments of later mediaeval History, Thought, Literature, and Art. They follow some of the common threads that run through these disciplines and explore chief expressions of later mediaeval life and thought.

Recommended Preparation: SMC175H1
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)
### SMC213H1 - Dante and the Christian Imagination

**Hours:** 24L

A study of selections from various works by Dante as an expression of the medieval imagination, viewed against the background of medieval Christian doctrine and psychology and in relation to various contemporary approaches to the study of medieval Christian culture.

**Distribution Requirements:** Humanities  
**Breadth Requirements:** Thought, Belief and Behaviour (2)

### SMC222H1 - Mediaeval Latin Literature

**Hours:** 48S

This course studies a selection of Mediaeval Latin prose and poetry. Emphasis is on the linguistic differences between Mediaeval Latin and its classical antecedent, especially in regard to vocabulary, grammar and orthography. A review of Latin grammar is part of the course.

**Prerequisite:** SMC176Y1/LAT102H1  
**Distribution Requirements:** Humanities  
**Breadth Requirements:** Creative and Cultural Representations (1)

### SMC226H1 - King Arthur

**Hours:** 24L

A survey of the Arthurian legends from the earliest Latin histories through selected Welsh, French and German Romances to the English-language classic, Morte d'Arthur of Malory. Emphasis will be on reading the primary sources (in translation).

**Prerequisite:** Completion of five undergraduate full course equivalents  
**Distribution Requirements:** Humanities  
**Breadth Requirements:** Creative and Cultural Representations (1)

### SMC232H1 - Mediaeval Latin Prose

**Hours:** 48S

Comprising an immersion in Mediaeval Latin prose texts, this course gives students a deepened acquaintance with the linguistic features of Mediaeval Latin, as well as with its literature, and generic and stylistic conventions. A solid foundation in basic Latin morphology, syntax and vocabulary is assumed.

**Prerequisite:** LAT202H1/SMC222H1  
**Distribution Requirements:** Humanities  
**Breadth Requirements:** Creative and Cultural Representations (1)

### SMC242H1 - The Study of the Bible in the Middle Ages

**Hours:** 24L/12T

This course explores mediaeval biblical commentary and the various approaches taken by the exegetes to uncover the secrets of the sacred page, for instance through the four senses of Scripture: history, allegory, tropology, and anagogy.

**Recommended Preparation:** SMC210H1/SMC212H1  
**Distribution Requirements:** Humanities  
**Breadth Requirements:** Thought, Belief and Behaviour (2)

### SMC256H1 - Mediaeval Music: thought and practice

**Hours:** 24L

An introduction to musical theory and practice in the middle ages: sacred and secular music, monophony and polyphony, performers and patrons, notation and orality. No prior background in music or ability to read music is required.

**Prerequisite:** SMC203Y1/SMC206H1/SMC210H1/SMC212H1/MUS111H1  
**Distribution Requirements:** Humanities  
**Breadth Requirements:** Creative and Cultural Representations (1)

### SMC282H1 - Mediaeval Latin Poetry

**Hours:** 48L

This course studies selections from the rich variety of Mediaeval Latin poetry, rhymed as well as rhythmic, and provides a survey of prosody and metrics. A solid foundation in basic Latin morphology, syntax and vocabulary is assumed.

**Prerequisite:** SMC222H1/LAT202H1  
**Distribution Requirements:** Humanities  
**Breadth Requirements:** Creative and Cultural Representations (1)
SMC358H1 - The Mediaeval Book

Hours: 24S

This course examines the most salient aspects of mediaeval manuscript culture. We will study, first, how the parchment for books was folded, pricked, ruled and bound, and second, what scripts were employed in the different codices. We will also examine the various types of books made in the Middle Ages and the challenges they pose to modern scholars.

Recommended Preparation: LAT102H1; SMC210H1/SMC212H1 or a course in mediaeval history.
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

SMC359H1 - Mediaeval Theology

Hours: 24L

An introduction to the discipline of theology as taught in the mediaeval schools. Building on a basic knowledge of Christian scriptures and of philosophical argument, this course will offer an organic exposition of mediaeval theology, together with an introduction into the scientific method of theological investigation as practised in the Middle ages.

Recommended Preparation: SMC210H1/SMC212H1
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

SMC361H1 - Mediaeval Law

Hours: 24S

Mediaeval jurisprudence combines the high technical quality of Roman law with the requirements of Christianity. The seminar provides an overview of the development of mediaeval learned jurisprudence; select texts from Roman and canon law, with their glosses, are read in order to explore more specifically the methods and concerns of mediaeval jurists.

Recommended Preparation: HIS220Y1/SMC210H1/SMC212H1
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

SMC406H1 - Mediaeval Seminar II

Hours: 12T/24S

A fourth-year seminar on a topic to be determined annually.

Prerequisite: Permission of the instructor
Recommended Preparation: SMC210H1/SMC212H1 or other mediaeval courses
Distribution Requirements: Humanities

SMC407Y1 - Mediaeval Seminar I

Hours: 24T/48S

A fourth-year seminar on a topic to be determined annually.

Prerequisite: Permission of the instructor
Recommended Preparation: SMC210H1/SMC212H1 or other mediaeval courses
Distribution Requirements: Humanities

SMC435H1 - Independent Studies in Mediaeval Studies

An independent research project to be proposed by the student and supervised by a member of faculty affiliated with the Mediaeval Studies Program. Not eligible for CR/NCR option.

Prerequisite: Ten full courses
Distribution Requirements: Humanities

SMC436H1 - Advanced Latin Seminar

Hours: 24S

This seminar is devoted to the in-depth study of one or a number of related Mediaeval Latin text(s) in their linguistic, historical, and intellectual context. Readings in the original Latin will be discussed and commented upon by students.

Prerequisite: SMC323H1/SMC328H1
Recommended Preparation: SMC210H1/SMC212H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)
SMC490Y1 - Senior Essay in Mediaeval Studies

Hours: 24S

A scholarly project chosen by the student in consultation with an instructor and approved by the Program Co-ordinator. Arrangements for the choice of topic and supervisor must be completed by the student before registration. The project will be accompanied by a research seminar component. Not eligible for CR/NCR option.

Prerequisite: Permission of instructor and program coordinator
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1); Society and its Institutions (3)

SMC380H1 - St. Michael's College Independent Studies

An opportunity for students to pursue an independent course of study not otherwise available in the Faculty of Arts and Science. Not eligible for CR/NCR option.

Prerequisite: Permission of the Principal of St. Michael's College. Normally restricted to students who have completed at least ten full courses with a CGPA of at least 2.5. Application forms are available in the St. Michael's College Principal's Office. A completed application signed by the student and by the supervising instructor must be submitted to the St. Michael's College Principal's Office for approval; at least one month before the beginning of the semester.

SMC381Y1 - St. Michael's College Independent Studies

An opportunity for students to pursue an independent course of study not otherwise available in the Faculty of Arts and Science. Not eligible for CR/NCR option.

Prerequisite: Permission of the Principal of St. Michael's College. Normally restricted to students who have completed at least ten full courses with a CGPA of at least 2.5. Application forms are available in the St. Michael's College Principal's Office. A completed application signed by the student and by the supervising instructor must be submitted to the St. Michael's College Principal's Office for approval; at least one month before the beginning of the semester.

SMC385H1 - Multicultural Toronto by the Numbers

Hours: 24L/24T

An introduction to research methods in the Humanities focusing on quantification, the use of routinely generated records, forensic analysis, and data collection and analysis. Critique of these methods. The course focuses on multiculturalism and ethnicity in Toronto. Students will reconstruct the life of immigrant, religious, and occupational groups in the city by use of municipal assessment records, the censuses of 1901 and 1911, church records, newspapers, maps, city directories, and online databases.

Prerequisite: Students must be registered in major or specialist programs in SMC/SLA/FRE/GER/ITA.
Distribution Requirements: Humanities

Other SMC Courses

SMC471H1 - Internship

Arranged by each student in consultation with faculty, the internship enables teacher candidates to integrate, extend and deepen their learning experiences in a way not otherwise available in the program. Those wishing to take this course must have their program approved by the Program Director. Not eligible for CR/NCR option.

Prerequisite: Enrolment in Christianity and Culture CTEP Major
Distribution Requirements: Social Science

SMC299Y1 - Research Opportunity Program

Credit course for supervised participation in faculty research project. Details at https://www.artsci.utoronto.ca/current/academics/research-opportunities/research-opportunities-program. Not eligible for CR/NCR option.

Distribution Requirements: Humanities

SMC399Y1 - Research Opportunity Program

Credit course for supervised participation in faculty research project. Details at https://www.artsci.utoronto.ca/current/academics/research-opportunities/research-opportunities-program. Not eligible for CR/NCR option.
SMC457H1 - Directed Research

**Hours:** 24S

Based on a professor's research project currently in progress, this course will enable an undergraduate student to play a useful role in the project while receiving hands-on training in research. Not eligible for CR/NCR option.

**Prerequisite:** Permission of Department

**Distribution Requirements:** Humanities

---

SMC480H1 - St. Michael's College Independent Studies

An opportunity for students to pursue an independent course of study not otherwise available in the Faculty of Arts and Science. Not eligible for CR/NCR option.

**Prerequisite:** Permission of the Principal of St. Michael's College. Normally restricted to students who have completed at least fifteen full courses with a CGPA of at least 2.5. Application forms are available in the St. Michael's College Principal's Office. A completed application signed by the student and by the supervising instructor must be submitted to the St. Michael's College Principal's Office for approval at least one month before the beginning of the semester.

---

SMC481Y1 - St. Michael's College Independent Studies

An opportunity for students to pursue an independent course of study not otherwise available in the Faculty of Arts and Science. Not eligible for CR/NCR option.

**Prerequisite:** Permission of the Principal of St. Michael's College. Normally restricted to students who have completed at least fifteen full courses with a CGPA of at least 2.5. Application forms are available in the St. Michael's College Principal's Office. A completed application signed by the student and by the supervising instructor must be submitted to the St. Michael's College Principal's Office for approval at least one month before the beginning of the semester.

Introduction

The Sexual Diversity Studies program (Specialist, Major, Minor) enables students to explore, analyze, and challenge the ways in which sexuality shapes people’s lives in both local and global contexts. The program provides vibrant interdisciplinary scholarship and academic learning on the historical and contemporary formations of sexual practices at the intersections of race, class, gender, disability, and citizenship status, among other social relations and processes. Our courses are designed to foster critical conversations of queer and normative sexualities; the formation of sexual, racial, and gender, and gender-non-conforming personhood; and the role of sexuality in culture and politics both in North America and transnationally.

Sexual Diversity Studies Programs

Sexual Diversity Studies Specialist (Arts Program) - ASSPE1240

Description:

The Sexual Diversity Studies program (Specialist, Major, Minor) enables students to explore, analyze, and challenge the ways in which sexuality shapes people’s lives in both local and global contexts. The program provides vibrant interdisciplinary scholarship and academic learning on the historical and contemporary formations of sexual practices at the intersections of race, class, gender, disability, and citizenship status, among other social relations and processes. Our courses are designed to foster critical conversations of queer and normative sexualities; the formation of sexual, racial, and gender, and gender-non-conforming personhood; and the role of sexuality in culture and politics both in North America and transnationally.

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

(10 full courses or their equivalent, including 4.0 FCE at the 300+ level, 1.0 of which must be at the 400-level.)

1. One course from: WGS160Y1, NEW240H1, or SOC209H1. Students may substitute with another introductory course that emphasizes intersectionality of sexuality, with the approval of the Director or Undergraduate Director.

2. SDS Foundational Courses (1.5 FCE):
   - SDS255H1: Histories of Sexuality
   - SDS256H1: Methods in Sexual Diversity Studies
   - SDS355H1: Theories of Sexuality

3. Thematic Clusters (3.0 FCE): 1.0 FCE from each of the three Thematic Clusters.
   - Politics & Policy
     JSU237H1, SDS345H1, SDS365H1, JPS378H1, SDS378H1, JPS315H1, SDS425H1
   - Formations & Practices
     SDS377H1, SDS380H1, SDS381H1, SDS382H1, SDS385H1, JNS450H1, SDS465H1
   - Media & Aesthetics
     CIN336H1, ENG273Y1, JSU325H1, SDS346H1, SDS279H1, SDS470H1, SDS478H1

4. Capstone (1.0 FCE): SDS460Y1

5. Other Electives (3.5-4.0 FCE): Remaining credits selected from the SDS Electives Group

Other courses, such as Special Topics courses in other Departments or Programs, may be approved by the Director or Undergraduate Director on an individual basis. Students are responsible for checking co- and prerequisites for courses from the SDS Electives Group.
Sexual Diversity Studies Major (Arts Program) - ASMAJ1240

Description:

The Sexual Diversity Studies program (Specialist, Major, Minor) enables students to explore, analyze, and challenge the ways in which sexuality shapes people’s lives in both local and global contexts. The program provides vibrant interdisciplinary scholarship and academic learning on the historical and contemporary formations of sexual practices at the intersections of race, class, gender, disability, and citizenship status, among other social relations and processes. Our courses are designed to foster critical conversations of queer and normative sexualities; the formation of sexual, racial, and gender, and gender-non-conforming personhood; and the role of sexuality in culture and politics both in North America and transnationally.

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

(6 full courses or their equivalent including at least 2.5 FCEs at the SDS 300+ level, 1.0 of which must be at the 400-level)

1. One course from: WGS160Y1, NEW240H1, or SOC209H1. Students may substitute with another introductory course that emphasizes intersectionality of sexuality, with the approval of the Director or Undergraduate Director.

2. 1.0 FCE from the SDS Foundational Courses:
   - SDS255H1: Histories of Sexuality
   - SDS266H1: Methods in Sexual Diversity Studies
   - SDS355H1: Theories of Sexuality

3. Thematic Clusters (1.5 FCE): 0.5 FCE from each of the three Thematic Clusters:
   - Politics & Policy
     JSU237H1, SDS345H1, SDS365H1, JPS378H1, SDS378H1, JPS315H1, SDS425H1
   - Formations & Practices
     SDS377H1, SDS380H1, SDS381H1, SDS382H1, SDS385H1, JNS450H1, SDS465H1
   - Media & Aesthetics
     CIN336H1, ENG273Y1, JSU325H1, SDS346H1, SDS279H1, SDS470H1, SDS478H1

4. Capstone requirement (a minimum of 0.5 FCE from the following list):
   All 400-level SDS and JNS courses.

5. Other Electives (1.5-2.5 FCE): Remaining credits from the SDS Electives Group.

Other courses, such as Special Topics courses in other Departments or Programs, may be approved by the Director or Undergraduate Director on an individual basis. Students are responsible for checking co- and pre-requisites for courses from the SDS Electives Group.

Sexual Diversity Studies Minor (Arts Program) - ASM1240

Description:

The Sexual Diversity Studies program (Specialist, Major, Minor) enables students to explore, analyze, and challenge the ways in which sexuality shapes people’s lives in both local and global contexts. The program provides vibrant interdisciplinary scholarship and academic learning on the historical and contemporary formations of sexual practices at the intersections of race, class, gender, disability, and citizenship status, among other social relations and processes. Our courses are designed to foster critical conversations of queer and normative sexualities; the formation of sexual, racial, and gender, and gender-non-conforming personhood; and the role of sexuality in culture and politics both in North America and transnationally.

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

(4 full courses or their equivalent.)

1. 0.5 FCE from SDS Foundational Courses: SDS255H1, SDS266H1, SDS355H1.

2. Thematic Clusters (1.5 FCE): 0.5 FCE from each of the three Thematic Clusters. May substitute 0.5 FCE in this requirement from the list of Capstone courses; refer to the SDS website for current options.
   - Politics & Policy
     JSU237H1, SDS345H1, SDS365H1, JPS378H1, SDS378H1, JPS315H1, SDS425H1
   - Formations & Practices
     SDS377H1, SDS380H1, SDS381H1, SDS382H1, SDS385H1, JNS450H1, SDS465H1
   - Media & Aesthetics
     CIN336H1, ENG273Y1, JSU325H1, SDS346H1, SDS279H1, SDS470H1, SDS478H1

3. Other Electives (2.0 FCE): Remaining credits selected from the SDS Electives Group.

POL377H1, PSY323H1, RLG235H1, RLG311H1, RLG312H1, RLG313H1, SDS199H1, SDS255H1, SDS266H1, SDS279H1, SDS345H1, SDS346H1, SDS365H1, SDS378H1, SDS379H1, SDS405H1, SDS415H1, SDS425H1, SDS456Y1, SDS457H1, SDS458H1, SDS459Y1, SDS460Y1, SDS465H1, SDS470H1, SDS475H1, SDS478H1, SDS485H1, SDS490Y1, SOC209H1, SOC309H1, VIC343H1, WGS160Y1, WGS275H1, WGS374H1, WGS480H1, WGS481H1, WGS369H1, WGS374H1.
Breadth Requirements:

- Distribution Requirements:
  - Humanities; Social Science
  - Society and its Institutions (3)

Distribution Requirements: Social Science

Breadth Requirements: Society and its Institutions (3)

Other courses, such as Special Topics courses in other Departments or Programs, may be approved by the Business Officer/Associate Director on an individual basis. Students are responsible for checking co- and pre-requisites for courses from the SDS Electives Group.

Students who do not meet stated course pre-requisites can contact the program office to inquire further.

Sexual Diversity Studies Courses

**SDS199H1 - Sexuality at the Intersections**

**Hours:** 24L

This First-Year Foundations seminar will explore sexuality at the intersections of race, gender, class, disability, citizenship status, and geography, among other social relations and processes as a foundational practice in Sexual Diversity Studies. In an intimate seminar setting, students will develop reading, writing, and presentation skills necessary for engaging in Sexual Diversity Studies across a wide array of disciplinary traditions. Restricted to first-year students. Not eligible for CR/NCR option.

**Distribution Requirements:** Humanities; Social Science

**Breadth Requirements:** Society and its Institutions (3)

**SDS256H1 - Methods in Sexual Diversity Studies**

**Previous Course Number:** UNI256H1

**Hours:** 24L/12T

This course examines a variety of methodological approaches used in humanities and humanist social sciences concerning sexuality and gendered diversity. Students will explore some of the popular methods in sexuality studies including ethnography, archival research, visual cultural studies, oral history, and media and discourse analysis.

**Exclusion:** UNI255H1

**Distribution Requirements:** Social Science

**Breadth Requirements:** Society and its Institutions (3)

**SDS255H1 - Histories of Sexuality**

**Previous Course Number:** UNI255H1

**Hours:** 24L/12T

An interdisciplinary examination of sexuality across cultures and periods. How are sexualities represented? How are they suppressed or celebrated? How and why are they labeled as straight, gay, lesbian, bisexual, queer, or perverse? How do sexualities change with race/ethnicity, class, gender, and geographies?

**Exclusion:** UNI255H1

**Distribution Requirements:** Humanities; Social Science

**Breadth Requirements:** Society and its Institutions (3)

**JSU237H1 - Introduction to HIV/AIDS: Health, Sexuality and Gender (formerly UNI237H1)**

**Hours:** 24L

A critical examination of the HIV/AIDS global pandemic from a multidisciplinary perspective and with an emphasis on sexuality. The course examines the basic biology of HIV/AIDS and then covers social, historical, political, cultural, gender, and public health aspects of HIV/AIDS. Attention is given to the distinct features of vulnerable and marginalized populations, prevention, treatment, drug development, and access to medicines.

**JSU237H1 is particularly intended for students in the Health Studies and/or Sexual Diversity Studies programs.**

**Distribution Requirements:** Social Science

**Breadth Requirements:** Society and its Institutions (3)
SDS279H1 - Queer Popular Culture

Previous Course Number: UNI379H1, SDS379H1
Hours: 24L

This introductory course examines the critical relationship between popular culture and queer sexualities in historical and contemporary contexts. The course will draw upon literature from performance studies, media studies, and queer of colour cultural productions. Students will engage with a range of queer public cultures and arts, including drag performance, queer musics, social media networks, and popular media.

Exclusion: SDS379H1, UNI379H1
Recommended Preparation: Introductory course in Sexual Diversity Studies, Women and Gender Studies, or Equity Studies
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

JPS315H1 - Sexual Diversity Politics

Hours: 24L

This is an interdisciplinary course examining the development of the Lesbian, Gay, Bisexual, Transgender and Queer (LGBTQ) movement and its interaction with the state in the US and Canada. (Given by the Department of Political Science and the Sexual Diversity Studies Program)

Prerequisite: SDS255H1/SDS256H1/UNI255H1/UNI267H1 or one full course on the politics of 20th century Europe, U.S., or Canada/one full course on gender or sexuality/permission of the instructor
Exclusion: JPU315H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

JSU325H1 - Queerly Canadian

Previous Course Number: UNI325H1
Hours: 36L

This course focuses on Canadian literary and artistic productions that challenge prevailing notions of nationality and sexuality, exploring not only how artists struggle with that ongoing Canadian thematic of being and belonging, but also celebrate pleasure and desire as a way of imagining and articulating an alternative national politics.

Prerequisite: SDS255H1/SDS256H1/CDN267H1 (formerly UNI267H1)/CDN268H1 (formerly UNI268H1) or permission of the instructor
Exclusion: SDS375H1 Special Topics: Queerly Canadian, UNI325H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

SDS345H1 - Sex and the Epidemic: Social Work, HIV, and Human Sexuality

Previous Course Number: UNI345H1
Hours: 36L

HIV has forever changed the way human beings understand sexuality. Through a social justice lens, this course examines the nature of community norms, laws, popular media, and the academy to explore how the epidemic has impacted the provision of social services in relation to the diversity of human sexuality.

Prerequisite: 0.5 credit in SDS
Exclusion: UNI345H1
Recommended Preparation: JSU237H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

SDS346H1 - Feminist and Queer Approaches to Technology

Previous Course Number: UNI346H1
Hours: 24L

What do electronic technologies mean for feminist and queer identity, activism, sociability, art, and politics? This course considers a range of critical pressure points central to digital studies, including social networking, participatory media, digital archives, databases, new media activism, performance, embodiment, and representations of race, gender, and sexuality in electronic contexts.

Prerequisite: 0.5 credit in SDS
Exclusion: UNI346H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

SDS354H1 - Theories of Sexuality I: Western Trajectories

Previous Course Number: UNI354H1
Hours: 24L

This course offers a survey of some key texts and narratives that have traversed and structured Western conceptualizations of sexuality from Greek antiquity to the 19th century. We will examine a variety of literary, philosophical and medical sources in light of what they say about past conceptualizations of the body, desire and its pleasures, and we will ask how they resonate with, or radically differ from, our current understandings of bodily norms, passions and transgressions.

Prerequisite: SDS255H1/SDS256H1/UNI255H1/UNI256H1
Exclusion: UNI354H1
Distribution Requirements: Humanities; Social Science
Breadth Requirements: Thought, Belief and Behaviour (2)
SDS355H1 - Theories of Sexuality

Previous Course Number: UNI355H1
Hours: 24L

This course introduces students to key theories of sexuality and sexual diversity. The main goal is to create a framework for understanding sexuality at its intersections with race, gender, class, disability, citizenship status, and geography among other social relations and processes at an advanced level. Closely tracing sexuality’s intersections, course readings will draw upon critical race theory, postcolonial critique and decolonizing movements, women of colour feminisms, trans studies, and transnational sexuality and gender studies.

Prerequisite: 4.0 credits
Exclusion: UNI355H1
Recommended Preparation: Some coursework in intersectionality of gender or sexuality
Distribution Requirements: Humanities; Social Science
Breadth Requirements: Society and its Institutions (3)

SDS365H1 - Sexuality and Law

Previous Course Number: UNI365H1
Hours: 24L

The course explores the legal regulation of sexuality. How does law understand, constitute and regulate sex, sexuality and sexual diversity? It will consider the role of different types of regulation, including criminal law, family law and constitutional law, and explore issues ranging from sex work and pornography to same sex marriage to transgender discrimination.

Prerequisite: 0.5 credit in SDS
Exclusion: UNI365H1
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

SDS375H1 - Special Topics in Sexual Diversity Studies A

Previous Course Number: UNI375H1
Hours: 24L

Topics vary from year to year depending on instructor. This seminar is intended to expose students in the Sexual Diversity Studies program to topics that may not be covered by permanent university courses.

Prerequisite: 0.5 credit in SDS
Exclusion: UNI375H1
Distribution Requirements: Humanities; Social Science

SDS376H1 - Special Topics in Sexual Diversity Studies B

Previous Course Number: UNI376H1
Hours: 24L

Topics vary from year to year depending on instructor. This seminar is intended to expose students in the Sexual Diversity Studies program to topics that may not be covered by permanent university courses.

Prerequisite: 0.5 credit in SDS
Exclusion: UNI376H1
Distribution Requirements: Humanities; Social Science

SDS377H1 - Lesbian Studies: Identity/Theory/Culture

Previous Course Number: UNI377H1
Hours: 24L

This multidisciplinary course examines multiple lesbian identities that have varied in time and place. The course will pose such questions as: What does lesbian mean? Why have changes occurred in meaning? How has the identity of lesbian been culturally represented and politically expressed in various social and political contexts? It will also take up contemporary theoretical, cultural, and political understandings of lesbianism.

Prerequisite: 0.5 credit in SDS
Exclusion: UNI377H1
Distribution Requirements: Humanities; Social Science
Breadth Requirements: Society and its Institutions (3)
JPS378H1 - Sex and the State

Hours: 24L

What role have sex and sexuality played in the formation of the modern nation state? How has the state regulated sex? This course explores these questions with a theoretical focus on biopolitics. We will proceed in two parts. First, we engage Foucault's History of Sexuality and its reception by postcolonial theorists, focusing on questions of state building. The second part of the course shifts examination from state formation to contemporary forms of sexual regulation by the state. This includes maintenance of the public/private divide, citizenship law and nationalism, administrative violence and the prison industrial complex, and neoliberalism and BDSM. By the end of the course, students are able to apply core theoretical concepts and identify forms of contemporary sexual regulation in a variety of Western and non-Western contexts. (Given by the Department of Political Science and the Mark S Bonham Centre for Sexual Diversity Studies.)

Prerequisite: A combined minimum of 1.0 credit from POL and/or SDS courses
Exclusion: POL378H1 (Topics in Comparative Politics II: Sex and the State), offered in Fall 2017 and Fall 2018; SDS375H1 (Special Topics in Sexual Diversity Studies A: Sex and the State), offered in Fall 2017 and Fall 2018
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

SDS380H1 - Sexual Diversity in Transnational Perspective

Hours: 24L

An exploration of LGBTQ rights and changes in social and cultural responses to sexual diversity in varied regional, national, and cultural contexts, potentially including Africa, Latin America, South and East Asia, and Eastern Europe. The role of transnational linkages and networks will also be considered in effecting change.

Prerequisite: 0.5 credit in SDS
Distribution Requirements: Humanities; Social Science
Breadth Requirements: Society and its Institutions (3)

SDS381H1 - Intro to Trans Studies

Hours: 24L

This course examines current and historical transgender issues by exploring legal and health care issues, politics, mainstream and other media representations (including films, interviews, and other genres), as well as current and historical advocacy and community work in relation to power structures such as the nation-state, race, disability, and sexuality.

Prerequisite: Completion of one 0.5 FCE from SDS, WGS or EQS courses or permission of the instructor.
Exclusion: SDS376H1 (Special Topics in Sexual Diversity Studies B: Intro to Queer of Colour Critique), offered in Winter 2017
Distribution Requirements: Humanities; Social Science
Breadth Requirements: Thought, Belief and Behaviour (2)

SDS382H1 - Intro to Queer of Colour Critique

Hours: 24L

This course provides an introduction to the intersections between race, gender and sexuality through an exploration of the political theories, activisms and cultural forms of LGBTQ people of colour. It examines the emergence of queer of colour theory and critiques, and the ways in which the intersections of race, gender and sexuality figure in national, global, economic, & cultural structures.

Prerequisite: 0.5 credit in SDS
Exclusion: SDS376H1 (Special Topics in Sexual Diversity Studies B: Intro to Queer of Colour Critique), offered in Winter 2017
Distribution Requirements: Social Science; Humanities
Breadth Requirements: Creative and Cultural Representations (1)
SDS385H1 - Queer Indigenous Politics and Cultures

Hours: 24L

This upper level course introduces students to questions of gender, sexuality, two-spirit, and same-sex desire at the intersections of race, indigeneity, and the violences of settler colonialism. Students will engage with work by scholars, activists, and artists in the fields of indigenous and queer studies, decolonizing activism, and cultural production.

Prerequisite: 0.5 credit in SDS/INS
Exclusion: SDS375H1 (Special Topics in Sexual Diversity Studies A: Indigeneity & Sexuality), offered in Winter 2019
Recommended Preparation: Some coursework in indigenous culture and history in Canada/US
Distribution Requirements: Social Science; Humanities
Breadth Requirements: Society and its Institutions (3)

SDS425H1 - Sexuality & Health

Hours: 24S

How is the idea of "ethics" understood and deployed in research on sexuality and health? What are the ways that discourses of "risk," "precarity," and "cure" become regulative frameworks? How do racialization, colonialism and nation-building participate in the biopolitics of sexuality and health? With these questions in mind, this interdisciplinary course will discuss various scholarly and activist literatures, including Youth Studies, Critical Disability Studies, Environmental Justice scholarship, Sex Education and Public Health Research, Critical Development Studies, and Queer and Feminist Studies to explore the cultural, social and political dimensions of ethics, health, and sexuality historically, and at the present moment.

Prerequisite: 1.0 credit in SDS/HST
Exclusion: SDS375H1 (Special Topics in Sexual Diversity Studies A: Sexuality & Health), offered in Winter 2018; SDS455H1 (Special Topics in Sexual Diversity Studies: Sexuality & Health), offered in Winter 2019
Recommended Preparation: Some coursework in health, disability studies, and equity studies
Distribution Requirements: Social Science; Humanities
Breadth Requirements: Society and its Institutions (3)

JNS450H1 - Sexuality & Disability

Hours: 24S

An interdisciplinary and intersectional approach to the study of disability and sexuality. Students will engage with historical, mainstream and critical discourses and explore complex issues and representations pertaining to disability, sexuality, sexual practices and desire. Draws from a range of writings and cultural texts in queer, crip and sexuality studies.

Prerequisite: SDS255H1/SDS256H1 (UNI255H1/UNI256H1) or NEW240Y1/NEW241Y1 or permission of the instructor
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

SDS455H1 - Special Topics in Sexual Diversity Studies

Previous Course Number: UNI455H1
Hours: 24S

Topics vary from year to year depending on instructor. This seminar is intended to expose students in the Sexual Diversity Studies program to topics that may not be covered by permanent university courses.

Prerequisite: 1.0 credit in SDS
Exclusion: UNI455H1
Recommended Preparation: Coursework in SDS at the 300 level or higher
Distribution Requirements: Humanities; Social Science

SDS458H1 - Research Essay in Sexual Diversity

Previous Course Number: UNI458H1
Hours: 24S

A research essay under the supervision of a faculty member with knowledge of sexual diversity, the proposal and supervisor subject to the approval of the SDS Program Director. Not eligible for CR/NCR option.

Prerequisite: SDS255H1/SDS256H1/UNI255H1/UNI256H1
Exclusion: UNI458H1
Distribution Requirements: Humanities
SDS459Y1 - Honours Essay in Sexual Diversity

Previous Course Number: UNI459Y1
Hours: 48S

A major research essay prepared over the course of two academic terms (one year); under the supervision of a faculty member with knowledge of sexual diversity; the proposal and supervisor subject to the approval of the SDS Program Director. Not eligible for CR/NCR option.

Prerequisite: SDS255H1/SDS256H1/UNI255H1/UNI256H1
Exclusion: UNI459Y1
Distribution Requirements: Humanities

SDS460Y1 - Advanced Research in Sexual Diversity Studies

Previous Course Number: UNI460H1
Hours: 24S

A capstone for majors and specialists who will work closely with SDS faculty in developing their own research project while participating in this seminar and learning about key debates, methodologies, and ethical issues in conducting research in SDS. Students will learn to write proposals, ethics reviews, grants and other relevant documents. Not eligible for CR/NCR option.

Prerequisite: 1.0 credits in SDS, 0.5 of which needs to be a 300+ level SDS course
Exclusion: UNI460H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

SDS465H1 - Queer Migrations and Refugee Politics

Hours: 24S

This interdisciplinary course will explore the politics of migration and border-crossing from queer, feminist, and trans perspectives. Drawing upon contemporary North American and transnational research, students will engage with critical literatures on citizenship and the state, mobility, belonging, and kinship and how these processes intersect with sexuality in the context of immigration and refugee systems.

Prerequisite: 1.0 credit in SDS/DTS
Exclusion: SDS455H1 (Special Topics in Sexual Diversity Studies: Queer Migrations and Refugee Politics), offered in Fall 2018
Recommended Preparation: Some coursework in migration & diaspora studies, or transnationalism
Distribution Requirements: Social Science; Humanities
Breadth Requirements: Society and its Institutions (3)

SDS470H1 - Sexual Representations: Critical Approaches in Porn Studies

Previous Course Number: UNI470H1
Hours: 24S

This course is a critical study of the historical, aesthetic, and cultural formation of the concept of pornography. The course explores the relationship between sexual representation and sex work; works through debates about artistic merit and censorship and how they relate to larger issues of power, capitalism, and technology; and theorizes the relationship between sex and commerce. Readings will include work from feminist, queer, people of colour, and trans theorists in the cutting-edge field of porn studies.

Prerequisite: 1.0 credit in SDS
Exclusion: UNI470H1; UNI475H1, Special Topics: Porn Studies
Recommended Preparation: SDS365H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

SDS475H1 - The New Queer Visibility

Previous Course Number: UNI475H1
Hours: 24S

This course critically examines the socio-political cultural context that has produced a new queer visibility. It assesses many of the post-Stonewall changes in the North American public sphere and the interrelationship between the new queer visibility and the North American and public sphere.

Prerequisite: (SDS255H1/SDS256H1)/(UNI255H1/UNI256H1) and SDS355H1/UNI355H1 or permission of the instructor
Exclusion: UNI475H1
Distribution Requirements: Humanities; Social Science
Breadth Requirements: Society and its Institutions (3)

SDS478H1 - Queer Musics

Previous Course Number: UNI478H1
Hours: 24S

This course explores, through queer of colour critique, feminist and queer theories, how sexuality, gender, and race are performed and heard in several popular music styles/genres. Sampling the field with readings, music videos and audio recordings, we examine sexuality, gender and race in music performance and reception currently and historically.

Prerequisite: 1.0 credit in SDS
Exclusion: UNI478H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)
SDS485H1 - Advanced Seminar in Queer Studies

Hours: 24S

This course will provide an advanced exploration of the historical and contemporary formations and debates of queer studies. This seminar is designed to provide students with the opportunity to practice their skills of research and interpretation at a particularly advanced level. The specific theme of the seminar changes per year. Please see the department website for details.

Prerequisite: 4.0 credits
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

SDS490Y1 - Engaging Our Communities

Hours: 48S

A service learning course with student placements in various LGBT community organizations alongside regular classroom seminars to look at the politics of engagement, active citizenship, mobilization, archiving community histories, accessibility, belonging, activism, and philanthropy.

Prerequisite: SDS255H1/SDS256H1 (UNI255H1/UNI256H1) and at least 1 FCE in SDS at the third-year level or permission of the instructor. For Majors and Specialists.
Exclusion: SDS456Y1: Special Topics: Engaging our Communities (2015-16)
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)
Introduction

For over one thousand years the countries of the Slavic world have played a prominent role in international life, and have provided our civilization with numerous writers, musicians, philosophers, religious and political thinkers, and scientists of note. The richness of the Slavic cultures has a special significance for Canada, since the vast influx of Slavs, which began in the last century, has contributed greatly to the Canadian cultural mosaic.

The Department of Slavic Languages and Literatures offers an extensive range of courses in Russian, Polish, Ukrainian, Czech and Slovak, Bosnian, Croatian, and Serbian languages, literatures, culture, and film as well as in Slavic linguistics. Within this range there are courses suitable for inclusion in a wide variety of programs of study, whether or not the student has studied any Slavic language previously. Some students may specialize in Slavic Languages and Cultures, i.e., Russian, Polish or Ukrainian (see Programs of Study). Others may simply wish to gain a working knowledge of Russian or another Slavic language to aid their reading of important material in another field. Language study emphasizes small instructional groups, with some laboratory or conversational practice, and the use of literary materials.

Courses in the literatures and cultures of various Slavic countries explore the artistic, intellectual, and social currents of their civilizations, trace the literary history of each country, and examine the works of major authors. Many of our literature, culture, and film courses are taught in English and do not require special linguistic preparation.

The growing importance of Eastern Europe in contemporary affairs has had the effect of making academic study of this area especially lively and relevant. The student whose interest in the Russian or East European world is political, historical, or sociological can specialize in Russian and East European Studies, or pursue a course in Political Science, History, or Sociology, and at the same time take language courses, and perhaps selected courses in literature, in this Department. Students planning to specialize in Economics, Psychology, Mathematics, or any number of other fields, who have a special interest in the Russian or East European area, will find an advanced knowledge of Russian or of another Slavic language an important intellectual and professional asset.

Students intending to take a Program offered by the Department are asked to study carefully the Programs of Study and are urged to begin their language training as soon as possible. A Departmental brochure is available on request.

Regarding Slavic Languages and Literatures Programs

Enrolment in the Slavic Languages and Literatures programs requires the completion of four courses (4 FCE); no minimum grade required.
Slavic Languages and Literatures

Slavic Languages and Cultures
Specialist (Arts Program) - ASSPE1200

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

10.5 FCEs with at least 4.0 at the 300+ level, including 1 at the 400 level.

Students must choose any two of the available language areas (Russian, Ukrainian, Polish, Czech and Slovak, or South Slavic).

1. SLA103H1 and SLA256H1.
2. 4 FCEs of language coursework from each of the two chosen language areas (2FCEs per language area). In consultation with the Undergraduate Coordinator, students may be permitted to substitute language courses with the equivalent number of FCEs in literature and culture courses in the same language area.
   a. Czech & Slovak: SLA105Y1, SLA204Y1
   b. Polish: SLA106H1, SLA116H1, SLA206H1, SLA207H1; or SLA306H1, SLA336H1.
   c. Russian: SLA100H1, SLA101H1, SLA210H1, SLA220Y1, SLA320Y1, SLA410H1, SLA420Y1.
   d. South Slavic: SLA107Y1, SLA257H1, SLA277H1, SLA337H1 (Bosnian, Croatian, Serbian); or SLA109Y1, SLA209H1, and SLA213H1 (Macedonian).
   e. Ukrainian: SLA108Y1, SLA208Y1.
3. 5 additional FCEs, with at least 2 FCEs from each of the two chosen language areas (please note area-specific requirements):
   a. Czech and Slovak: SLA200H1, SLA215H1, SLA230H1, SLA254H1, SLA333H1, SLA335H1, SLA405H1, SLA435H1, SLA465H1, SLA475H1. In consultation with the Undergraduate Coordinator, students may take up to 1 FCE in Czech and Slovak history or political science courses taught outside the department.
   b. Polish:
      i. Polish Language and Culture option: SLA216H1 (required), SLA226H1, SLA236H1, SLA266H1, SLA286H1, SLA346H1, SLA356H1, SLA406H1, SLA427H1, HIS251Y1, HIS353Y1 (required), HIS433H1, HIS461H1.
      ii. Polish Studies option: SLA216H1 (required), SLA226H1, SLA236H1, SLA346H1, SLA356H1, SLA406H1, SLA427H1, HIS251Y1, HIS353Y1 (required), HIS433H1, HIS461H1.
   c. Russian:
      i. Russian Language and Literature: SLA121H1, SLA203H1, SLA212H1.
      ii. Russian Studies: SLA234H1, SLA242H1, SLA245H1 (required), SLA246H1, SLA252H1, SLA254H1, SLA266H1, SLA286H1, SLA301H1, SLA307H1, SLA311H1, SLA312H1, SLA314H1, SLA317H1, SLA318H1, SLA321H1, SLA322H1, SLA323H1, SLA330H1, SLA331H1, SLA334H1, SLA342H1, SLA435H1, SLA436H1, SLA440H1, SLA451H1, SLA412H1, SLA414H1, SLA413H1, SLA415H1, SLA420Y1, SLA422H1, SLA424Y1, SLA430H1, SLA433H1, SLA434H1, SLA449H1, SLA463H1.
   d. South Slavic: SLA200H1, SLA217H1, SLA227H1.

Slavic Languages and Cultures
Major: Czech and Slovak (Arts Program) - ASMAJ1200A

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

(6.5 FCEs or their equivalent, with at least 2.0 FCEs at the 300+ level, including 0.5 FCE at the 400 level)

1. 1.0 FCE of Common Core: SLA103H1 and SLA256H1.
2. 2.0 FCEs of language coursework: SLA106Y1, SLA204Y1. In consultation with the Undergraduate Coordinator, students may substitute courses in course group 2 with the equivalent number of FCEs in course group 3 (below).
3. 3.0 additional FCEs to be chosen from: SLA200H1, SLA215H1, SLA254H1, SLA333H1, SLA335H1, SLA405H1. In consultation with the Undergraduate Coordinator, students may take up to 1 FCE in Czech and Slovak history or political science courses taught outside the department.
4. 0.5 FCE toward requirement 3 may be taken from the interdisciplinary pool of courses offered by the Slavic Department, including: SLA104H1, SLA200H1, SLA201H1, SLA202H1, SLA203H1, SLA222H1, SLA230H1, SLA254H1, SLA255H1, SLA267H1, SLA286H1, SLA287H1, SLA301H1, SLA302H1, SLA318H1, SLA325H1, SLA330H1, SLA331H1, SLA333H1, SLA377H1, SLA380H1, SLA486H1, SLA495H1, SLA496H1, SLA498Y1, SLA499H1.
5. 0.5 FCE in Breadth Requirement Category 5: The Physical and Mathematical Universes or another half course approved by the program director, to fulfill the Quantitative Reasoning Competency required in the program.
Slavic Languages and Literatures

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

(6.5 FCEs or their equivalent, with at least 2.0 FCEs at the 300+ level, including 0.5 FCE at the 400 level)

1. 1.0 FCE of Common Core: SLA103H1 and SLA256H1

Faculty of Arts & Science Language Citation

The Department of Slavic Languages and Literatures participates in the Faculty of Arts and Science’s Language Citation initiative. Students may achieve this Citation in Bosnian, Croatian, Czech, Polish, Russian, Serbian, and Ukrainian. Students interested in completing the Language Citation in languages taught in the Slavic Department but not listed here should consult the Undergraduate Coordinator of the Department of Slavic Languages and Literatures.

Language study is a demanding and intellectually rewarding educational experience. Our students learn to communicate both orally and in writing in other languages and are thus able to experience other parts of the world in more intimate ways. Their access to other cultures opens doors for further study and employment. Students in our department also have the opportunity to read a vast array of world-renowned authors in the original languages, as well as works – normally not available in English – in other areas of study, for example, cinema studies, drama, folklore, history, intellectual history, philosophy, mathematics, and political science.

The Language Citation recognizes a significant level of achievement in language study. For course selection students should consult the Undergraduate Coordinator as early as possible since not every language course is offered each year. Students who begin language study at the Intermediate level should consult the Undergraduate Coordinator for approval of advanced literature and culture courses that may satisfy the requirements for the Language Citation.

The Language Citation in Bosnian, Croatian, or Serbian is available to students who complete SLA257H1, SLA277H1, and an additional FCE in South Slavic literature or culture with readings and discussion in the target language with a grade of at least B-. The Language Citation in Macedonian is available to students who complete SLA209H1, SLA213H1 and an additional FCE in South Slavic literature or culture with readings and discussion in the target language with a grade of at least B-. Consult the Undergraduate Coordinator for approval of advanced literature and culture courses that may satisfy the requirements for the Language Citation.

The Language Citation in Czech is available to students who complete SLA204Y1 and an additional FCE in Czech literature or culture with readings and discussion in the target language with a grade of at least B-.

The Language Citation in Polish is available to students who complete SLA206H1, SLA207H1, SLA306H1 and SLA336H1 with a grade of at least B-.

The Language Citation in Russian is available to students who complete, with a grade of at least B-, two FCEs: SLA220Y1, SLA320Y1 or SLA420Y1.

The Language Citation in Ukrainian is available to students who complete SLA208Y1 as well as one additional FCE in Ukrainian literature or culture with readings and discussion in the target language with a grade of at least B-. Transfer language credits also eligible.

Students should note that, as explained in the Language Citation section of the Degree Requirements chapter of this Calendar, the Language Citation is not equivalent to an academic program and that enrolment in a program is not necessary in order to earn the recognition bestowed by the Citation.

Regarding Slavic Languages and Literatures Courses

Note: The Department reserves the right to place students in the language course best suited to their linguistic preparation

Bosnian, Croatian, Macedonian and Serbian Courses: Please see South Slavic Courses

Macedonian Courses: Please see South Slavic Courses

Russian language student placement policy
All students who have studied Russian outside the University of Toronto must take a language placement test prior to enrolling into a Russian language course. Contact the Department for test dates and times.

Native speakers of Russian are not allowed to enroll into any Russian language course, with the exception of SLA330H1. Native speakers may enrol into any Russian literature and culture course, and any Russian POST (language requirement will be replaced with the equivalent number of literature and culture FCEs in consultation with the Undergraduate Coordinator).
Heritage speakers of Russian are allowed to enroll into a Russian language course only by special permission from the Russian language program coordinator, Prof. Julia Mikhailova (julia.mikhailova@utoronto.ca) but are encouraged to enrol in SLA210H1 and SLA410H1, courses specially designed for them. Heritage speakers may enroll into any Russian literature and culture course, and any Russian POST (if necessary, language requirement will be replaced with the equivalent number of literature and culture FCEs in consultation with the Undergraduate Coordinator).

Who are native and heritage speakers of Russian?

For academic purposes, the Department considers a student to be a native speaker of Russian if s/he meets one of the following criteria:

- The student speaks Russian as their native language.
- The student was born and/or grew up outside of Russia.
- The student lived in a Russian-speaking country (any former Soviet republic) before the age of 10 and did elementary schooling in Russian.

For academic purposes, the Department considers a student to be a heritage speaker of Russian if s/he meets one of the following criteria:

- The student left Russia before the age of 10.
- The student lived in a Russian-speaking country (any former Soviet republic) before the age of 10 but did elementary schooling in a language other than Russian.
- The student was born and/or grew up outside of a Russian-speaking country but speaks some Russian at home.

It is the responsibility of individual students to furnish documentation proving their native- or heritage-speaker status. In the absence of such documentation, the Department reserves the right to deny enrolment into Russian language courses. Heritage and native speakers of Russian who enroll in a Russian language course and fail to identify themselves to the Department engage in cheating and will be treated in accordance with the university policy on academic misconduct.

Slavic Languages and Literatures Courses

SLA194H1 - Utopia Interrupted: Late and Post-Soviet Russian Literature

Hours: 24S

Almost 30 years after the collapse of the Soviet Union, what can we understand about its culture and people, and its impact on the popular imagination in the West? To answer these questions, the course introduces students to canonical literary and cinematic works from the post-Stalin era to the present, with particular attention to the literary and cultural peripheries. Some of the topics will include: Gulag, or Return of the Repressed, Counter-Culture, Space Race, Immigration, Gender, Perestroika, and Putin’s Russia. All readings in English. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

SLA195H1 - Literature and Painting in Russia and the West

Hours: 24S

What makes literature ‘visible’? How do the verbal and the visual coexist? This seminar explores the relationship between words and images, texts and pictures through history, in Russia and the West. Special attention will be paid to the figure of the artist. Is it a writer’s alter ego, the incarnation of creativity, or just a character among others? Literary texts (mainly short stories) from Balzac and Gogol to Chekhov and O. Henry, Maugham and Bunin, Nabokov and Camus will be studied along with the paintings of some major 19th-20th century artists. The comparative dimension of the course will help students contextualize Russian literature and think about its relationship with the Western canon. We will also watch some 21st century films about artists (such as Julie Taymor’s Frida [2002], Milos Forman Goya’s Ghosts [2006], and Mike Leigh Mr. Turner [2014]). All texts will be in English. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

SLA193H1 - Objects of War

Hours: 24L

An object or a thing always has a collective history. It speaks of the political and the social conditions under which it was made. In this course, objects of war – the material culture of conflict – from the 20th and 21st centuries will be critically and historically examined. How do these objects speak of violence, politics, and culture, but also rewrite and influence the arenas within which they circulate? Some objects include: canned food, drones, the journalists’ hotel, helmets, tents. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)
SLA196H1 - Russia at War

Hours: 24S

In its long history Russia has fought numerous wars, both defensive and offensive, and these wars have inspired a rich, complex, contradictory poetic response. We examine Russian war narratives starting with the medieval period and ending with the Second World War and including epic poetry, songs, stories, novels, paintings, and films. We will study the depiction of war and the image of the soldier (or warrior) in different genres and time periods, as well as the historical circumstances in which the different works were produced and the respective audiences for which they were intended. All texts will be in English. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

SLA197H1 - The Imaginary Jew

Hours: 24S

The course examines the genesis and evolution of the image of the Jew, central to all European cultures, from the theology and psychology of Christian anti-Judaism to their reflection in folklore, visual, plastic, and verbal arts, and to the survival of the imaginary Jew in secular forms. Special attention is given to the Jews of Slavic and East European imagination. All readings are in English. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

SLA198H1 - The Slavic Grecian Formula: From Ancient Rhapsode to Modern Slav Song

Hours: 24S

Slav singers of heroic tales about war, lust, honour and revenge have made a special contribution to our appreciation of classical literature and mythology. We will compare Slavic epics and African-American rap songs to reveal the connection between Homer's Iliad and Nas's iconic Illmatic, between the mythical image of the pagan goddess Aphrodite and the mystique of Nicki Minaj, and other iconic singers today. As we read The Iliad closely, we will study songs from the Russian, Bosnian Muslim, Croatian and Serbian traditions. Employing new performance formulaic theory, we will learn that they share much, in melody and message, with the work of today's hip-hop artists, whose roots of rap "flowing" reach back to the beginnings of Western literature and the epic singers of ancient Greece. Students will have the opportunity to interact with a unique online multimedia edition of an epic song by a traditional Slavic singer.

No knowledge of languages other than English is required. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

SLA199H1 - Invisible Kingdom, Imaginary Space

Hours: 24S

The Central European Region of Galicia gave rise to a remarkable array of literary representations -- Austrian, Jewish, Polish, and Ukrainian -- animating fantastic creatures, powerful myths, deviant pleasures, and sublime stories. Bruno Schulz created shimmering peacocks, Leopold von Sacher-Masoch seized ecstasy through pain, and Ivan Franko investigated the effects of avarice and social decay.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)
SLA425H1 - The World Revealed: Cinema, Authenticity, and Theory

Hours: 48L

This seminar will investigate how filmmakers and theorists have related the categories of fact and fiction to the production of films in Russian and (post-) Yugoslav cinemas. At the center of our inquiry will be the history and theory of cinematic authenticity, historical referentiality, and reality effects. Course work includes film viewings outside of class meeting times. Jointly offered with a graduate level course.

Prerequisite: 9.0 credits

Breadth Requirements: Creative and Cultural Representations (1)

Interdisciplinary Courses

SLA103H1 - Slavic Civilizations

Hours: 24L

A survey of Slavic civilizations through literature, art, architecture, and film. Key moments in the development of the cultures of Slavic countries are examined in a comparative framework, juxtaposing the varied historical, cultural, linguistic, religious, social, and political developments of the countries involved. Taught in English, all readings in English.

Distribution Requirements: Humanities

Breadth Requirements: Creative and Cultural Representations (1)

SLA104H1 - Cities of the Mediterranean

Hours: 24L

This course examines the cultural history of Mediterranean ports and cities, with particular emphasis on Croatian cities in dialogue with cities in Italy and Greece, through works of art, architecture, and literature. Readings in English.

Distribution Requirements: Humanities

Breadth Requirements: Creative and Cultural Representations (1)

SLA200H1 - Culture and Politics in Europe

Hours: 24L

Introduction to the issues of the interaction between cultural expression and political life, with a historical focus on 1968 in Central and Eastern Europe. The mutually influential relationship between artistic activity and political dynamics in modern societies is examined through literature, visual arts, drama, music, and film. Taught in English, all materials in English.

Distribution Requirements: Humanities

Breadth Requirements: Society and its Institutions (3)

SLA201H1 - Losing It

Hours: 24L

How does one cope with loss, be it a nose, a leg, a pet, a name, a lover, a battle, a fortune, or one’s sanity? Through literary texts from Central and Eastern Europe, we explore the trauma and poetics of losing, and the mechanisms of coping with and compensating for the lost object. Taught in English, all readings in English.

Distribution Requirements: Humanities

Breadth Requirements: Creative and Cultural Representations (1)

SLA202H1 - Jewish Communities in Slavic Countries

Hours: 24L

Literature about the Jewish community in Slavic countries. How do these Jewish minorities perceive and identify themselves? How are they perceived by others? Taught in English, all readings in English.

Distribution Requirements: Humanities

Breadth Requirements: Society and its Institutions (3)

SLA203H1 - Faking It

Hours: 24L

The role of forgery in cultural, national, and personal identities. A scholar “discovering” an “ancient” manuscript, a noblewoman in disguise joining the army, an impostor conning a provincial town, a writer faking political loyalty. Literary texts from Central and Eastern Europe expose the porous boundaries between authenticity and lies, highlighting the artificiality and vulnerability of social and cultural conventions. Taught in English, all readings in English.

Distribution Requirements: Humanities

Breadth Requirements: Creative and Cultural Representations (1)
SLA214H1 - Slavic Languages through Creative Writing

Hours: 24P

A course for students of Czech and Slovak, BCS and Russian. Improve your writing skills in a group of different Slavic language learners. Learn simple creative writing in different genres. This course presents a catalogue of different methods and strategies for individual learners at various stages of writing in a foreign language. Complements rather than substitutes for intermediate and advanced levels of the languages taught.

Prerequisite: SLA105Y1 or SLA107Y1 or (SLA100H1 and SLA101H1)
Corequisite: SLA204Y1 or (SLA257H1 and SLA277H1) or SLA220Y1 or SLA320Y1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

SLA222H1 - Forging Identities: The Roms of Central and Eastern Europe

Hours: 24S

Both in popular culture and the headlines, Roma (Gypsies) are often depicted as either romantic or negative. Roma and Slavs have interacted for centuries and this course examines the history of that interaction with particular emphasis on linguistic and educational rights. Taught in English, all readings in English.

Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

SLA229H1 - Writing with Images: Eastern and Central European History Through the Graphic Novel

Hours: 24L

This course examines how East and Central European graphic novelists retell the history of the 20th century in images and words. Our focus is the medium. How do comics effect the relationship between the personal and national? Can graphic novels substitute history textbooks?

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

SLA235H1 - After Communism: Literature and Art Post-1989

Previous Course Number: SLA377H1
Hours: 24S

This course examines the era inaugurated by the collapse of the state-socialist regimes in the former Eastern Bloc, marked by political turmoil, major economic restructuring, and social ambivalences. The course investigates topics such as: socialist legacy and nostalgia, mass emigrations and refugee crises, conflicts over national identity and borders, sociocultural anxieties about inclusion in the EU, perspectives on the future of socialist thought and practice in Eastern Europe.

Exclusion: SLA377H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

SLA253H1 - Origins of Russia and Ukraine

Previous Course Number: SLA102H1
Hours: 24L

A survey of Ukrainian and Russian civilizations through art, architecture, literature, and religion. Includes the Scythians, whose battle skills and gold fascinated the ancient world; Kyivan Rus’ and its princes, monks and martyrs; rise of the Cossacks; and Peter the Great, founder of the Russian Empire and St. Petersburg. Taught in English, all readings in English. No background knowledge required.

Exclusion: SLA102H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

SLA254H1 - Stone Books to Sky Books: The Book as Institution, Commerce and Art

Hours: 24L

Evolution of the book and printed media in Central and Eastern Europe: legends (and forgeries) of ancient letters, mediaeval illuminated manuscripts, forbidden and “supernatural” books, hand-written and painted books of modernist and avant-garde artists, books as a way of living and dying. Readings in English.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)
SLA256H1 - Firebirds and Other Wonders: The World of Slavic Folklore

Hours: 24L/12T

An introduction to the comparative study of folk narratives – fairytales, legends, epics, from Russia, Central and Eastern Europe, and the Balkans. Topics include the structural and psychological analysis and interpretation of oral folk traditions; the cultural specificity of Slavic folklore; its adaptation and treatment in literature, music, and visual arts. Taught in English, all readings in English.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

SLA268H1 - Cossacks!

Hours: 24S

How are Cossacks depicted in literary and visual works? Were they the agents of a repressive Russian government, the hirelings of Polish kings, the tormentors of Eastern European Jews, the protectors of Europe from the Ottomans, or the liberators of the Ukrainian nation? We read works from the Jewish, Polish, Russian, and Ukrainian cultural traditions.

Prerequisite: None
Corequisite: None
Exclusion: CCR199H1 (First-Year Seminar: The Cossacks), offered in Winter 2012, Winter 2013, Fall 2013, Fall 2015, Fall 2016, and Fall 2017
Recommended Preparation: None
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

SLA280H1 - Introduction to Russian Asia: From Central Asia to Siberia

Hours: 24S

Introduction to geography, languages, people, literature, and the history of Russian Asia. Includes readings in history, exile narratives, articles on the linguistic geography of the languages of Russia including Russian, Siberian languages such as Yakut and Tungus, Turkic languages of Central Asia, Korean and Chinese as minority languages, with a special focus on language contact and language politics.

Prerequisite: None
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

SLA286H1 - Literature and Science

Previous Course Number: SLA486H1
Hours: 24S

Shaped by the experience of two world wars, two totalitarianisms, and several revolutions, continental sci-fi is known for its radical and uncompromising thought experiments and daring aesthetics. Discussing works by Evgenii Zamiatin, Karel Capek, Sigizmund Krzhizhanovsky, Fritz Lang, HG Wells, Stanislaw Lem, Andrei Tarkovsky, and Jacek Dukaj among others, we examine the consequences of science, technology and social engineering pushing individuals beyond their human limits.

Prerequisite: None
Exclusion: SLA486H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

SLA302H1 - The Imaginary Jew

Hours: 36S

The course examines the genesis and evolution of the image of the Jew, central to all European cultures, from the theology and psychology of Christian anti-Judaism to their reflection in folklore, visual, plastic, and verbal arts, and to the survival of the imaginary Jew in secular forms. Special attention is given to the Jews of Slavic and East European imagination. All readings are in English.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

SLA303H1 - Literary Imagination and Jewish Identity in Modern Europe

Hours: 24S

An exploration of Central and East European authors writing in different languages but united by Jewish ancestry. We examine the responses of artists and intellectuals of Jewish extraction (Sholem Aleichem, Babel, Bialik, Heine, Kafka, Mandelshtam, Sforim, Zhabotinskii, etc.) to cultural secularization and modernity. Taught in English. Readings in English.

Recommended Preparation: SLA302H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)
SLA318H1 - City of Saints and Sinners: Kyiv through the Centuries

Hours: 24L

Captivating and elusive: the "new Jerusalem," Yehupets, a "Slavic Pompeii" and frontier city. This course examines Kyiv through works of literature, visual arts, architecture, and popular culture that reveal Ukrainian, Russian, Jewish, and Polish versions of the city. Gogol, Sholem Aleichem, Bulgakov, Vynnychenko, and many others. Taught in English, all readings in English.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

SLA330H1 - Old Church Slavonic

Previous Course Number: SLA330Y1
Hours: 36S

Structure and history of the first Slavic literary language. Reading and linguistic study of Old Slavonic texts.

Recommended Preparation: Two years of any Slavic language
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

SLA331H1 - Modernism and Visual Arts

Hours: 24S

Synthesis of visual arts, music, and literature in the late Russian Empire-early Soviet Union. Baba Yaga's hut and levitating sculptures; symphony in words and the language of stars; from princesses and puppets to the first peeks into the fourth dimension. Kandinsky, Bely, Zamyatin, Malevich, and many others. Taught and read in English.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

SLA333H1 - Animated Film in Europe

Previous Course Number: SLA233H1
Hours: 24L

Trends in the history of European animated film, focusing on Central and Eastern European cinematic traditions. Aesthetics of animated image and peculiarities of animation as an art form. Films are analyzed in their artistic, cultural and political contexts. Taught in English, English subtitles.

Exclusion: SLA233H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

SLA380H1 - Language, Politics, Identity

Hours: 24S

In this course we will examine the multi-faceted nature of language policy, language standardization, language contact and conflict. While focus will be on states that arose from the Former Soviet Union and the languages of Central and Southeastern Europe, discussion will open to cover a broad range of language issues, including, for example orthography shifts here in Canada and around the world, including China, Korea, Japan, and India. We will explore issues such as language standards, language rights, language conflict, languages of education, writing systems and linguistic identity.

Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

SLA492H1 - Race, Empire, Gender in Eastern Europe and Russia

Hours: 24S

This course examines recent scholarship dedicated to race, empire, and gender in Eastern Europe and Russia. The course will explore theoretical texts (e.g. decolonial criticism, "second world" feminisms), scholarship on particular case studies (e.g. Catherine Baker's 2018 Race and the Yugoslav Region), and literature and art that speaks to these issues from the perspective of the East European, Russian, and Soviet experience. We will explore oft-sidelined topics, such as ideologies of race and historicizing whiteness as a colonial formation. The aim of the course is to address some of the silences within Slavic studies by foregrounding the complicated political legacies of the region.

Prerequisite: Completion of 4.0 FCEs
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

SLA498Y1 - Independent Studies

A year-long research project (primarily for majors in Slavic POSs) on an approved major topic in a Slavic literature or culture, or Slavic linguistics, supervised by one of the Department's instructors. Not eligible for CR/NCR option.

Prerequisite: Permission of the Department
Distribution Requirements: Humanities
SLA499H1 - Independent Studies

A semester-long research project (primarily for majors in Slavic POSIs) on an approved major topic in a Slavic literature or culture, or Slavic linguistics, supervised by one of the Department’s instructors. Not eligible for CR/NCR option.

Prerequisite: Permission of the Department
Distribution Requirements: Humanities

Czech & Slovak

SLA105Y1 - Elementary Czech

Hours: 96P

Grammar, composition, and conversation. Readings from Czech literature. Open only to students with little or no knowledge of the language.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

SLA204Y1 - Intermediate Czech

Hours: 96P

Using selected texts of diverse styles, this class surveys Czech grammar and introduces various aspects of syntax, composition and translation. Special attention will be paid to oral practice.

Exclusion: SLA205H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

SLA215H1 - Czech and Slovak Cultures

Hours: 24L

Some of the most important features of Czech and Slovak cultural history are introduced in a survey of the national myths, traditions and cultural trends. (Offered every three years)

Exclusion: SLA215Y1
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

SLA225H1 - Czech and Slovak Cinema

Hours: 24L

Czech and Slovak cinema of the sixties, generally known as the Czechoslovak New Wave, represents the ways the cinematographers viewed the past, examined the present and escaped into the world of fantasy. In addition, we will examine several theoretical, historical and cultural aspects of national culture and international cinematography.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

SLA335H1 - Lifting the Iron Curtain: Czech Culture between 1960 and 1989

Hours: 24L

This class explores the subversive power of literary, cinematic, and theatrical experiments of the 1960s and confronts them with the development of Czech culture during the so-called normalization that lasted until 1989. Topics include literary texts, cinema, and fine arts at home and in exile. Taught in English, readings in English and in the original.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

SLA405H1 - On the Waves of the Avant-garde and Beyond: Czech Literature of the 20th Century

Previous Course Number: SLA405Y1
Hours: 24S

The experiments of the 1920s serve as a point of departure for studies in Czech culture from the early 20th century to the present artistic innovations. Readings include works by Jaroslav Seifert, Karel Teige, Karel _apek, F. Langer, V. Nezval, M. Kundera, V. Linhartová and others. (Offered every three years). Readings in Czech.

Prerequisite: SLA305H1 or permission of the instructor
Exclusion: SLA405Y1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)
Polish

SLA106H1 - Polish for Beginners I

Hours: 24L/24P

The course is aimed at a wide range of students with a general interest in Polish but no prior knowledge. A communicative based approach will be used throughout the course, where all four skills (speaking, reading, listening, and writing) will be practised, with the main emphasis on speaking. Students will engage in interactive language activities, participating in group and pair work according to a syllabus based on systematic grammatical progression.

Exclusion: SLA106Y1, SLA116H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

SLA116H1 - Polish for Beginners II

Hours: 24L/24P

The course is aimed at a wide range of students with a general interest in Polish who have already completed SLA106H or who have comparable basic knowledge of Pol. A communicative based approach will be used throughout the course, where all four skills (speaking, reading, listening, and writing) will be practised, with the main emphasis on speaking. Students will engage in interactive language activities, participating in group and pair work according to a syllabus based on systematic grammatical progression.

Prerequisite: SLA106H1 or permission of instructor
Exclusion: SLA106Y1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

SLA206H1 - Intermediate Polish I

Hours: 12L/36P

Students who completed SLA106H and SLA116H or who have comparable basic knowledge of Polish further develop their speaking, listening, reading, and writing skills by revising, consolidating and building on their knowledge. Upon completion, they will be able to communicate in more advanced everyday situations and have substantial familiarity with Polish grammar.

Prerequisite: SLA106Y1 or SLA 106H and SLA116H
Exclusion: SLA206Y1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

SLA207H1 - Intermediate Polish II

Hours: 12L/36P

Students with a general interest in Polish who have completed SLA206H1 or who have a comparable level of Polish further develop their speaking, listening, writing, and reading skills by revising, consolidating, and building on their knowledge. Upon completion, they will be able to communicate in more advanced everyday situations and have substantial familiarity with Polish grammar.

Prerequisite: SLA206H1 or permission of instructor
Exclusion: SLA206Y1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

SLA216H1 - Introduction to Polish Culture

Hours: 24L

Major cultural traditions, historical processes, myths, and figures that have shaped and redefined Polish civilization and national identity are problematized and contextualized with the help of works of literature, history, philosophy, political science, music, visual and performing arts. Readings in English (also available in Polish). (Offered in alternate years)

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

SLA226H1 - Film and Ethics: Polish Cinema

Hours: 24L

The Polish School in cinema, its predecessors and successors, their artistic accomplishments, major theoretical and thematic concerns, and their place on the map of European cinema. Films of Ford, Wajda, Polanski, Konwicki, Borowczyk, Has, Kawalerowicz, Zanussi, Kieslowski, and of the new generation of Polish film makers. Films and discussions in English. (Offered every three years)

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)
SLA236H1 - Polish Culture in 10 Images

Hours: 8S

We examine the most important aspects of Polish historical experience and cultural identity by looking at ten iconic images from Polish culture. These images may include a historical painting by Matejko, a photo of the Solidarity strikes in 1980, a screenshot from a Wajda film, or a literary passage from a Gombrowicz novel. Apart from serving as an introduction to Polish cultural studies, this course provides students with analytical tools to read diverse cultural texts. This is a blended course combining online modules with four on-site discussion meetings per semester.

Prerequisite: None
Corequisite: None
Exclusion: None
Recommended Preparation: None
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

SLA266H1 - War and Culture

Hours: 24S

Poland and Europe 1914-1945. As we commemorate the centenary of the outbreak of WWI, this cataclysmic event that launched the 20th century and was followed by another total war soon after still defines our view of the world and understanding of it. It may be time now to look anew at how various forms of expression, including literature, film, theatre, painting and sculpture produced during the two wars, between them or many decades later deal with the extreme and everyday experiences, with shattered worlds of individuals, ethnicities, and nations.

Prerequisite: SLA216H1 or permission of the instructor
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

SLA306H1 - Conversations-Inspirations: Everyday Polish

Hours: 48P

Through a series of thematic modules based on everyday communicative situations in contemporary Poland students develop Polish language skills in the four linguistic competencies: listening, reading, writing, and speaking. The course is based on a communicative-functional approach to language. It means that even though students are regularly exposed to new grammatical structures, their work focuses primarily on practical, diverse uses of language in real-life situations.

Prerequisite: SLA206Y1 or SLA207H1 or permission of instructor
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

SLA336H1 - Let's Talk! Advanced Polish

Hours: 48P

Students expand their practical knowledge of Polish by engaging with online media and current issues in culture and society. They enrich their vocabulary, grammatical structures, and use of diverse stylistic registers while fine-tuning reading, writing, listening, and speaking skills.

Prerequisite: SLA306H1 or permission of instructor
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

SLA346H1 - Communism and Culture

Hours: 24S

Probes the paradoxes of politics, culture and everyday life by analyzing the complex coexistence of art and literature with changing cultural politics in a totalitarian and post-totalitarian system, with simplistic ideology and political dissent, and with prevailing myths about the West and the East. Readings in English (Polish for majors).

Recommended Preparation: SLA216Y1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

SLA356H1 - What's New? Polish Culture Today

Hours: 24S

The amazing cultural transformations of Poland in the last fifteen years within a changing Europe. The impact of these changes on Poland's social consciousness and perception of identity, history, and nationhood. The most recent literature, fine arts, music, and popular culture. Readings in English (Polish for majors).

Recommended Preparation: SLA216Y1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)
SLA406H1 - Transgressions: Drama, Theatre, Performance

Hours: 24S

Study of drama as a literary and theatrical genre in its thematic and formal diversity in Polish literature from the 16th to the 20th century is combined with investigations of the role of the theatre as cultural institution in different periods of Polish history. Readings in English (in Polish for students in the major program). (Offered every three years)

Exclusion: SLA406Y1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

SLA426H1 - Polish for the 21st Century

Hours: 48P

Polish language course for heritage speakers and advanced students who want to master the language through interactions with broad and diverse cultural materials such as mass and popular culture, contemporary literature, film, and theatre, mass media and the Internet.

Prerequisite: SLA306H1, SLA336H1 or permission of instructor
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

SLA427H1 - Polish Culture for the Curious

Hours: 24S

The fourth year seminar whose specific topic is decided depending on the needs of the students and the interests of guest and permanent instructors.

Prerequisite: SLA216Y1 or permission of instructor
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

SLA436H1 - Rebels, Scoffers, and Jesters: Polish Culture from Different Perspectives

Hours: 24S

An advanced course on artistic, political, aesthetic, philosophical, and ideological dissenters who questioned, undermined, and redefined the main traditions in Polish culture from the 18th to the 21st centuries. Readings in English (Polish for majors).

Prerequisite: SLA216Y1
Recommended Preparation: SLA336H1
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

Russian

SLA100H1 - Elementary Russian I

Hours: 60P

Basic features of the grammar. Acquisition of essential vocabulary for practical conversation and for comprehension. Development of reading and writing skills. (May not be taken by students who, in the judgment of the Department, qualify for entry into SLA210H1 or SLA220Y1).

Exclusion: native speakers of Russian
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

SLA101H1 - Elementary Russian II

Hours: 60P

Basic features of the grammar. Acquisition of essential vocabulary for practical conversation and for comprehension. Development of reading and writing skills. (May not be taken by students who, in the judgment of the Department, qualify for entry into SLA210H1 or SLA220Y1).

Prerequisite: SLA100H1 or permission of instructor
Exclusion: native speakers of Russian
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)
SLA121H1 - Russian Cultural History in Twelve Images

Hours: 24L

Russian Cultural History in Twelve Images An introductory survey of Russian cultural history through key images, exploring the historical, intellectual, artistic, and mythical significance of these images in Russian cultural identity and in foreign perceptions. Among the images are: Rublev's “Trinity,” The Bronze Horseman, the Cathedral of Christ the Savior, and Tatlin's Tower. Taught in English, readings in English. No prior familiarity with Russian language or culture is expected.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

SLA210H1 - Russian for Heritage Speakers

Hours: 48P

This course is designed for students with Russian background, students raised in homes where Russian is/was spoken, who speak or merely understand basic Russian but are otherwise illiterate in Russian (cannot/have difficulty reading or writing). This course helps heritage learners of Russian develop/maintain writing and reading skills as well as develop cultural literacy. (Online course in 2011-2012).

Prerequisite: Permission of instructor
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

SLA211H0 - Russian in Action

Hours: 48P

Emphasis on expansion of vocabulary, developing conversational and listening skills, and intensive practice in real-life situations. Offered as part of Summer Program in Russia. Not eligible for CR/NCR option.

Prerequisite: SLA101H1 or SLA210H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

SLA212H1 - The Russian Novel

Hours: 24L/12T

Introduction to the Russian novelistic tradition at the height of its creative power. We examine the Russian novel’s universal appeal and influence, and its impact on modern art and thought. Authors may include (depending on instructor) Gogol, Turgenev, Dostoevsky, Tolstoy, Belyi, Nabokov, Pasternak, Solzhenitsyn. Taught and read in English.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

SLA220Y1 - Intermediate Russian

Hours: 120P

Continuation of development of proficiency in speaking, reading, listening and writing. Review the basic and learning of new grammatical and syntactical structures, study of word formation and acquisition of active vocabulary. Reading of classical, contemporary, adapted, and non-adapted literary and mass-media texts. Culture and listening through animation.

Prerequisite: SLA101H1
Exclusion: native speakers of Russian, including SLA210H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

SLA221H1 - Speak Like a Russian

Hours: 24P

A course on practical phonetics. Get your Russian sounds right. Improve your intonation. Reduce your foreign accent.

Prerequisite: SLA100H1, SLA101H1
Corequisite: SLA220Y1 or SLA320Y1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

SLA224H1 - Russian-Jewish Writing

Hours: 24L

This course explores the writings of Russian authors of Jewish origin. Subjects include: assimilation; identity; the existence or non-existence of Russian – Jewish literature. The works studied may vary from year to year.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)
SLA231H0 - Special Topics in Russian Studies

Usually offered during the summer through the Woodsworth Summer Abroad program. Content varies from year to year based on instructor. Not eligible for CR/NCR option.

Distribution Requirements: Humanities

SLA234H1 - Russian and Soviet Cinema

Hours: 12L/24P

A survey of the Russian cinematic tradition from its beginnings through the first decade following the disintegration of the USSR. The course examines the avant-garde cinema and film theory of the 1920s; the totalitarian esthetics of the 1920s-1940s and the ideological uses of film art; the revolution in film theory and practice in the 1950s-1960s; cinema as medium of cultural dissent and as witness to social change. Students also acquire basic skills of film analysis. Taught in English, all films subtitled in English.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

SLA245H1 - The Golden Age of Russian Literature

Hours: 24L

A survey of Russian literature from 1820-1900. Topics include: Romanticism and Realism; the myth of St. Petersburg; the Russian Empire and its borders; the individual and society; man and nature; the “woman question”; freedom and rationality. Readings may include: Pushkin, Lermontov, Gogol, Goncharov, Tolstoi, Turgenev, Dostoevskii, Saltykov-Shchedrin, Chekhov. Taught and read in English.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

SLA252H1 - Russian Short Fiction

Hours: 12T/24S

An exploration of the elements of the short story through close readings of works by 19th and 20th century writers. Stories in translation by Pushkin, Gogol, Turgenev, Dostoevsky, Chekhov, Olesha, Babel, and others. All readings in English.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

SLA260H1 - Constructing Space: A History of Russian Art and Architecture

Hours: 24L

Chronologically organized and covering a period of ten centuries, from the eleventh to the twenty-first, the course has a special focus, the rendering of space and perspective. Beginning with the so-called “reverse perspective” of Russian Icons and the devotional world of churches and cathedrals, continuing with the geometrically organized, rational space of the 18th century and St. Petersburg, and moving on to the distorted reality of the Russian avant-garde and Socialist Realism’s attempt at reproducing reality “as it is,” the course concludes by asking where this oscillating acceptance and rejection of illusion leaves us in the 21st century. Consideration of paintings, buildings, sculptures, selected literary texts and films.

Prerequisite: None
Corequisite: None
Exclusion: None
Recommended Preparation: FAH102H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

SLA263H1 - Studies in Russian-French Cultural History

Hours: 24L/12T

A survey of Russian-French intellectual, literary, and artistic contacts and mutual influences, from the 18th through the 20th centuries. Topics may include: transnational circulation of genres, styles, aesthetic programs, philosophical concepts, and political ideas; cultural tourism; cultural appropriation and misreading; direct contacts between French and Russian intellectual and artistic elites. Lectures in English. Students taking the course from the French Department will read the texts in French, have tutorials in French, and write assignments in French. All others will read texts in English, have tutorials in English, and write assignments in English.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

JSH300H1 - Literature and History in Russia

Hours: 24L

History and Literature were always interconnected in Russia. Writers not only sought to reflect the society around them, but were themselves often social critics and political figures. The course examines key texts in Russian literary tradition both as works of art and as primary sources for the historian. All readings in English.

Recommended Preparation: HIS250H1/HIS250Y1 or SLA240H1/ SLA241H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)
SLA300H1 - Russian Literature in the Age of Empire

Hours: 24L

Survey of major movements and institutions, familiar and less studied writers and intellectuals of the first half of the nineteenth century. Imperial culture between and within Europe and Asia. Romanticism as literary movement, cultural ideology, and lifestyle. Emergence of literature as profession and public sphere. Literature and nationalism. Taught in English, all readings in English.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

SLA310H1 - Russian Literature Between Tradition and Modernity

Hours: 24L

Survey of major movements and institutions, genres, familiar and less studied writers and intellectuals of the second half of the nineteenth century. Imperial culture in the reform era. Realism as literary movement, professionalization of literature and criticism, the novel and serialization, the short story and drama. Taught in English, all readings in English.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

SLA311H1 - Gogol

Hours: 12L/12S

Fantastic and grotesque works by the most hilarious, obsessive, and delusional character in Russian literature, who teased, fascinated, and polarized readers. Gogol's writings are examined through various theoretical approaches. Includes cinematic (Taras Bulba, Viy, Overcoat) and musical (Shostakovich's "Nose") re-creations of Gogol's works. Taught in English, all readings in English.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

SLA312H1 - Nabokov

Hours: 24S

A study of Vladimir Nabokov's novels written in Europe and the United States. Special attention is paid to the nature and evolution of Nabokov's aesthetics; the place of his novels in European and American literary traditions; Nabokov's creative uses of exile to artistic, philosophical and ideological ends; the aesthetic and cultural implications of the writers' switch from Russian to English. Novels studied: Defense, Despair, The Gift, The Real Life of Sebastian Knight, Lolita, Pnin, Pale Fire. Taught in English, all readings in English.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

SLA314H1 - Dostoevsky

Hours: 24L

Crime and Punishment, The Brothers Karamazov, and short works. Dostoevsky's political, psychological, and religious ideas as they shape and are shaped by his literary art. Readings in English. Taught in English, all readings in English.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

SLA317H1 - Tolstoy

Hours: 24S

War and Peace or Anna Karenina, and some shorter works. Tolstoy's political, psychological, and religious ideas as they shape and are shaped by his literary art. Taught in English, all readings in English.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)
SLA320Y1 - Advanced Russian

Hours: 120P

A survey of Russian culture and history of the 20th century through non-adapted readings and film. Development of advanced speaking, reading, listening and writing skills on a wide variety of topics. Work on grammar and vocabulary building. Subordinate and relative clauses, aspect, verbs of motion, participles and gerunds. Class is conducted primarily in Russian.

Prerequisite: SLA220Y1 or permission of instructor
Exclusion: native speakers of Russian, including SLA210H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

SLA321H1 - Conversational Russian

Hours: 36P

Expansion of vocabulary and development of conversational skills. Discussion of a variety of topics (history, culture, art, politics, law, social and economic problems, contemporary events). Class is taught in round-table format.

Prerequisite: SLA220Y1 and permission of instructor
Exclusion: Native speakers of Russian
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

SLA322H1 - News from Russia

Hours: 24P

Language, life and the media in contemporary Russia. The course will be based on reading Russian newspapers, listening to Russian media, and discussing contemporary events in Russia.

Prerequisite: SLA220Y1
Exclusion: Heritage and native speakers of Russian
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

SLA323H1 - The Mysteries of Russian Revealed

Hours: 12P/12S

This course introduces Russian’s sounds, structures, and alternations. Russian’s tricky morphologic alternations and their historical causes are explored while students master the hidden encoding of forms through study of the writing system, root structures, and variation.

Prerequisite: SLA220Y1 or permission of instructor
Exclusion: SLA220H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

SLA334H1 - Film Genre in Russia

An examination of the understanding and practice of film genre in Russian and Soviet cinema. Various genres and generic hybrids – comedy, melodrama, action, war, horror, fantasy, etc. – are studied in the context of critical literature on the problem of film genre and against the backdrop of international cinematic traditions. Taught in English, all films subtitled in English.

Recommended Preparation: CIN105Y1, SLA234H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

SLA342H1 - Theatricality and Spectacle in the History of Russian Culture: From Jesters to Meyerhold

Hours: 24S

We will study Russian public spectacles from the eighteenth century imperial court festivities all the way through the Revolutionary festivals of the 1920s. We will also look at the 2003 celebration of the 300 year anniversary of St. Petersburg and the 2014 Sochi Olympics. Special emphasis on those figures who influenced twentieth century theatre and film in the West (such as Konstantin Stanislavsky, Vsevolod Meyerhold, Sergei Diagilev). All readings in English. No knowledge of Russian required.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)
SLA343H1 - Studies in Late Soviet Culture

Hours: 24L

A survey of artistic and intellectual life in the USSR from the post-Stalinist “Thaw” period to the collapse of the Soviet empire and its cultural aftermath in the 1990s. Topics include: the recovery of suppressed cultural memory; the fluid boundaries between official and unofficial cultures; internal and external exile; Aesopian language; alternative modes of creation and dissemination (samizdat, tamizdat, unauthorized exhibitions and concerts, etc.); Russian conceptualism and post-modernism. Taught in English, readings in English.

Recommended Preparation: SLA245H1, SLA246H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

SLA345H1 - Russian Modernism

Previous Course Number: SLA246H1
Hours: 24L

A history of Russian modernist culture from the 1890s to 1940. Topics include: Russia’s fin-de-siècle art and thought in European context; the aesthetic and philosophical evolution of Russian modernism as a cultural community; modernist experiments in literature; conservative reactions to modernism before and after the communist takeover in Russia; the modernist strategies of survival. Taught and read in English.

Exclusion: SLA246H1
Recommended Preparation: SLA245H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

SLA367H1 - Chekhov

Hours: 24S

Selected stories, plays; stylistic, structural, and thematic analysis, literary and historical context, influence in Russia and the West. Taught in English, all readings in English.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

SLA400H1 - Studies in Medieval Russian Literature

Hours: 24S

Explores the development of the types of writing (e.g. chronicles, vitae, epics, tales, poetry) used to capture the cultural, political, religious, and aesthetic experiences of Mediaeval Rus’ from the 11th to 17th century. Readings in English. Where appropriate, majors will read some excerpts in the original.

Recommended Preparation: Some reading knowledge of Russian desirable but not required
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

SLA404H1 - Russia Across Centuries I

Hours: 24S

A survey of Russian Culture from the tenth century to the early nineteenth century. Topics may vary by year. Includes literature, music, art, architecture, dance, film, history and politics. Taught in Russian, all readings are in Russian. Fosters advanced language skills of conversational fluency, listening comprehension, writing and composition, expanded vocabulary, recognition of stylistic registers, and advanced syntax. Students will read literary and non-literary texts as well as watching contemporary films and television programs.

Prerequisite: SLA320Y1 or SLA210H1
Recommended Preparation: SLA410H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

SLA410H1 - Russian for Heritage Speakers II

Hours: 48P

The course helps advanced heritage learners further to develop their active command of Russian. Special focus on speaking and writing skills, as well as cultural competence. Taught in Russian, all materials in Russian.

Prerequisite: SLA210H1 or permission of instructor
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)
SLA412H1 - History of Russian

Hours: 24P

Historical phonology, morphology, accentuation of Russian in its East Slavic context. Further topics include dialectology and historical syntax. Readings of a variety of Old Russian-East Slavic texts in the original.

Prerequisite: Permission of instructor.
Recommended Preparation: Good reading knowledge of Russian and/or SLA320Y1 (Advanced Russian).
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

SLA413H1 - Pushkin

Hours: 24S

Select lyrical poetry, narrative poems, drama, and prose. Topics may include: poet and society; poetry, nation, and empire; Pushkin's life, death, afterlife, and cultural mythologies; Pushkin in visual arts, music, and film. Readings in Russian.

Prerequisite: SLA320Y1 or permission of the instructor.
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

SLA414H1 - Russia Across Centuries II

Hours: 24S

A continuation of SLA404H1. Survey of Russian culture from 1917 to the present. Topics may vary by year. Includes material on literature, music, art, architecture, dance, film, history and politics. Taught in Russian, all readings in Russian. The course fosters advanced language skills of conversational fluency, listening comprehension, writing and composition, expanded vocabulary, recognition of stylistic registers, and advanced syntax. Students will read literary and non-literary texts and watch contemporary films and television programs.

Prerequisite: SLA320Y1 or SLA210H1
Recommended Preparation: SLA410H1, SLA404H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

SLA415H1 - Studies in Russian Literature of the 18th Century

Hours: 36S

The prose, poetry and dramaturgy of the most prominent literary figures of the eighteenth century, including Karamzin, Lomonosov, Fonvizin, Derzhavin and Krylov; aspects of literature during the reign of Peter I; literature and satirical journalism during the reign of Catherine II. (Taught in Russian)

Prerequisite: Permission of the instructor
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

SLA416H1 - Russia Across Centuries II

Hours: 24S

A continuation of SLA404H1. Survey of Russian culture from 1917 to the present. Topics may vary by year. Includes material on literature, music, art, architecture, dance, film, history and politics. Taught in Russian, all readings in Russian. The course fosters advanced language skills of conversational fluency, listening comprehension, writing and composition, expanded vocabulary, recognition of stylistic registers, and advanced syntax. Students will read literary and non-literary texts and watch contemporary films and television programs.

Prerequisite: SLA320Y1 or SLA210H1
Recommended Preparation: SLA410H1, SLA404H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

SLA420Y1 - Studies in Russian Syntax and Stylistics

Hours: 96P

Syntactic structures and their relation to meaning and style, word order, intonation. Consolidation of morphology, vocabulary building through extensive reading. Translation, composition, and oral practice.

Prerequisite: SLA320Y1 or permission of instructor
Exclusion: native speakers of Russian, including SLA210H1
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

SLA421H1 - Introduction to Russian Poetry and Poetics

Previous Course Number: SLA424Y1
Hours: 36S

A study of the main principles of Russian prosody (meter, rhythm, rhyme, phonetic instrumentation, verse, stanza, genre) in relation to the creation of meaning of a poetic text. The formal aspects of Russian versification are examined in their historical evolution from the 18th century to the present, in both "classical" and "experimental" poetic modes. Taught in Russian, readings in Russian and English.

Prerequisite: SLA320Y1
Exclusion: SLA424Y1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)
SLA422H1 - Nineteenth-Century Russian Poetry

Previous Course Number: SLA424Y1
Hours: 36S

A survey of the golden age of Russian poetry with special attention to the evolution of verse forms and poetic genres. In this course students acquire advanced skills in the close reading of poetic forms and in their contextual historical analysis and interpretation. Taught in Russian, readings in Russian and English.

Prerequisite: SLA320Y1
Exclusion: SLA424Y1
Recommended Preparation: SLA421H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

SLA423H1 - War and Peace

Hours: 36S

War and Peace in depth, and from various points of view, literary, political, philosophical, historical, and psychological. Various critical approaches; cognate literary works. Students are expected to have read the novel before the course begins. Readings in English.

Recommended Preparation: SLA317H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

SLA430H1 - Advanced Russian Writing Skills

Hours: 48P

The course will support students in gaining proficiency in presentational mode and in improvement of language competence for communication in academic contexts. Students will elevate their skills to the advanced level. Emphasis is on grammatical structures, syntax, lexicon, content organization, construction of complex presentation and expression of scholarly ideas and critical thought with accuracy and consistency in use of the Russian language. Offered online only.

Prerequisite: SLA320Y1 or SLA210H1
Recommended Preparation: Advanced reading, writing, listening ability in Russian.
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

SLA433H1 - Anna Karenina

Previous Course Number: SLA324H1
Hours: 36S

Anna Karenina in depth, and from various points of view, literary, political, philosophical, historical, and psychological. Various critical approaches; cognate literary works. Students are expected to have read the novel before the course begins. Readings in English.

Exclusion: SLA324H1
Recommended Preparation: SLA317H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

SLA434H1 - Dostoevsky in Literary Theory and Criticism

Hours: 24S

Explores Dostoevsky’s works through the lens of Russian and Western novel theory. Theorists include: Viacheslav Ivanov, Georg Lukacs and Mikhail Bakhtin. Topics include: genre, history and modernity; the novelistic narrator; novelistic plot; novelistic narrative; time and space; the generic history and prehistory of the novel; the novel and the self; the novel’s relation to the present; novelistic subgenres including the Bildungsroman; the novel’s simultaneous status as fragment and totality; and the particular and the universal in novelistic representation. Taught in English, readings in either Russian or English.

Recommended Preparation: SLA314H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

SLA449H1 - Russian Thinkers

Hours: 36S

Social and political change, national and spiritual destiny in philosophical, journalistic and critical writings. From Slavophiles and Westernizers to revolutionary and apocalyptic thought. Reflections on Russia's position between Europe and Asia and on the place of Russia's East Asian neighbors in its history and culture. Taught in English, readings in English.

Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)
SLA463H1 - Themes in Russian Realism

Hours: 24L/12S

What is distinctive about Russian realism? The course will examine nineteenth century Russian realist fiction in relation to various theoretical approaches, from Erich Auerbach to Roman Jakobson. We will read contemporary works of criticism and thought from Russia and Europe that may have influenced it.

Prerequisite: The equivalent of one FCE in literature
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

South Slavic: Bosnian, Croatian, Macedonian, and Serbian

SLA107Y1 - Elementary Bosnian, Croatian, and Serbian

Hours: 96P

Basic phonology, orthography, morphology and syntax of Bosnian, Croatian and Serbian. Development of the four basic language skills: reading, writing, listening, and speaking. Acquisition of essential vocabulary for practical conversation and for comprehension.

Exclusion: native speakers of BCS, SLA257Y1, SLA237Y1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

SLA109Y1 - Elementary Macedonian

Hours: 96P

The basic features of the grammar of the Macedonian literary language. Acquisition of essential vocabulary for practical conversation and for comprehension. Development of reading and writing skills. Open only to students with little or no knowledge of the literary language. (Offered in alternate years).

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

SLA209H1 - Intermediate Macedonian

Hours: 48P

This course completes the basics of Macedonian grammar including the wide variety of past tenses, complex sentence structures, and word formation.

Prerequisite: SLA109Y1 or permission of instructor
Exclusion: SLA209Y1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

SLA213H1 - Reading Macedonia: A Cultural Exploration

Hours: 48P

This course explores Macedonian culture as read through its literature, film, cuisine, music, folklore, architecture, and new media.

Prerequisite: SLA209H1 or permission of instructor
Exclusion: SLA209Y1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

SLA217H1 - Cultural History of the South Slavs

Hours: 24L

Works of literature, history, music, and visual arts are examined in order to explore the complex cultural legacy of the Balkans, an area marked by Byzantine, Ottoman, and Austro-Hungarian colonial presence. The course will familiarize students with major cultural traditions, myths, and historical flashpoints. Readings in English.

Exclusion: SLA217Y1, SLA227Y1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)
SLA227H1 - South Slavic Literature
Hours: 24L

A survey of the most significant twentieth-century novels from Croatia, Serbia and Bosnia through a chronological selection of literary texts (poems, plays, novels) from the eighteenth to the twentieth century. The course places South Slavic literary developments within the broader context of European intellectual history as well as Balkan cultural and political life. Taught in English, all readings in English.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

SLA277H1 - Intermediate Bosnian, Croatian, and Serbian II
Hours: 48P

Continuation of SLA257H1. Systematic study of morphology and syntax. Intermediate composition and oral practice. Reading and translation of contemporary texts in BCS.

Prerequisite: SLA257H1 or permission of instructor
Exclusion: SLA257Y1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

SLA247H1 - (Post) Yugoslav Cinema
Hours: 24L

An overview of the Yugoslav and post-Yugoslav cinematic tradition from the 1960s to the present. Topics include revolution and socialism; cinema as activism; ideology and politics; sex and gender; war and trauma. Taught in English. All films with subtitles.

Exclusion: SLA427H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

SLA257H1 - Intermediate Bosnian, Croatian, and Serbian I
Hours: 48P

Systematic study of morphology and syntax. Intermediate composition and oral practice. Reading and translation of contemporary and more complex texts in BCS.

Prerequisite: SLA107Y1 or permission of instructor
Exclusion: SLA257Y1, SLA307Y1, SLA316Y1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

SLA337H1 - Advanced Bosnian, Croatian, and Serbian
Hours: 48P

Morphology, syntax, composition and translation, oral practice. Extensive reading, translation and analysis of contemporary Bosnian, Croatian and Serbian texts representing diverse styles.

Prerequisite: SLA257Y1 or permission of instructor
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

SLA277H1 - Intermediate Bosnian, Croatian, and Serbian II
Hours: 48P

Continuation of SLA257H1. Systematic study of morphology and syntax. Intermediate composition and oral practice. Reading and translation of contemporary texts in BCS.

Prerequisite: SLA257H1 or permission of instructor
Exclusion: SLA257Y1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

SLA357H1 - Literature of Exile and Immigration
Hours: 24S

This course examines novels and short stories by writers from the former Yugoslavia (including Dubravka Ugrešić, Aleksandar Hemon) that thematize exile, migration, and displacement. Alongside literary works, we will read theoretical essays that speak to concepts of home, nation, and language. Taught in English. Readings in English.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)
Ukrainian

SLA108Y1 - Elementary Ukrainian

Hours: 96P

Basic vocabulary, simple sentence patterns, essential morphology. Internet language laboratory drills. Intended for students with little or no knowledge of the language.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

SLA208Y1 - Intermediate Ukrainian

Hours: 96P

Study of morphology through grammar drills; oral practice; reading of texts from Ukrainian literature.

Prerequisite: Permission of instructor
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

SLA218Y1 - Ukrainian Literature and Culture

Hours: 24L/24S

A general survey of Ukrainian culture through an examination of selected literary works and their social, political, historical, philosophical, and aesthetic contexts. The course covers the period from Kyivan Rus to the present. Readings in English. (Offered in alternate years)

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1); Society and its Institutions (3)

SLA228H1 - 20th Century Ukrainian Fiction in Translation

Hours: 12L/12S

A selection of twentieth century Ukrainian novels and short prose in English translation. From the avant-garde intellectual novel of the 1920s, through socialist realism, to the post-modernist prose of the 1990s. Authors include Pidmohylny, Antonenko-Davydovych, Honchar, Shevchuk, Andrukhovych and Zabuzhko.

Recommended Preparation: any course in literature
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

SLA238H1 - Literature of the Ukrainian-Canadian Experience

Hours: 24S

A selection of literary texts depicting the experience and perceptions of Ukrainians in Canada from the first immigrants to the present. Texts include works originally written in English, French and Ukrainian, but all readings are in English. Authors include: Kiriak, Kostash, Ryga, Galay, Suknaski, Kulyk Keefer.

Recommended Preparation: any course in literature
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

SLA248H1 - Women and Women's Themes in Ukrainian Literature

Hours: 24S

This course examines the presentation of women and women's themes in works of Ukrainian literature. The subjects covered include: role models, freedom, socialism, nationalism, feminism, and sexuality.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)
SLA308Y1 - Advanced Ukrainian

Hours: 96L

Development of advanced speaking, reading, listening and writing skills on a wide variety of topics. Work on grammar and vocabulary building. Review of morphology and study of syntax. Short compositions. Expressing a written formal argument or opinion.

Prerequisite: SLA208Y1 or permission of instructor
Exclusion: Fluent native speakers of Ukrainian
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

SLA328H1 - The Culture of Contemporary Ukraine

Hours: 24S

Contemporary Ukraine is an amalgam of various cultural traditions. This course examines its languages, religions, nationalities, literature, cinema, arts, print and broadcast media, regions, education, and social groups. Special attention is given to the factors that influence public perceptions of identity. All readings are in English.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

SLA338H1 - Ivan Franko

Hours: 24S

Ivan Franko is one of the most important and innovative figures in the history of Ukrainian literature. This seminar explores a selection of the bellettristic writings by this fascinating and prolific poet and novelist in the context of Ukrainian culture and politics in the Austro-Hungarian Empire. Taught in English. All readings are in English.

Recommended Preparation: Previous coursework in Ukrainian literature, e.g. SLA218Y1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

SLA358H1 - Breaking Away from Empire: Ukrainian Fiction Since Independence

Hours: 24S

This course traces the extraordinary development of Ukrainian prose since the collapse of the Soviet Union. We will explore post-modernist euphoria, colonial angst, cultural entropy, hooliganism, national identity, gender issues, and other aspects of modern Ukraine. All readings in English.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

SLA358H1 - The Ukrainian Novel

Hours: 48S

Major works by Kulish, Nechui-Levytsky, Mryny, Franko, Kotsiubinsky, Kobylianska, Vynnychenko, Ianovsky, Pidmohylny, Honchar, Andrukhovych, and Zabuzhko. Readings in Ukrainian. (Offered every four years)

Prerequisite: Permission of instructor
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

SLA428Y1 - Shevchenko

Hours: 24S

A critical study of Taras Shevchenko. Life, works, and significance. Readings in Ukrainian.

Prerequisite: Permission of instructor
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)
SWK301H1 - Qualitative Research Methods: Meaning-Making in Social Contexts

Hours: 24L

Qualitative research uses text as units of analysis based on data collected through interviews, policy documents, archival materials and various forms of media. Students are provided with conceptual understandings and tools to explore how people, community members, helping professionals, administrators, and policy makers make meaning of their world(s) in the context of their whole lives. In this course students will: be introduced to interpretive and constructivist qualitative research methods; learn how to assess the ethics and rigor of qualitative research; and develop the ability to assess qualitative research and evaluate implications for people and social change.

Prerequisite: Completion of 9.0 credits
Exclusion: SOC204H1
Recommended Preparation: Some familiarity with any research methods, theories of ethics, and critical thinking
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

SWK302H1 - Aging, Law and Policy

Hours: 36L

This course will examine selected areas in aging that reflect current issues and future directions with respect to law and health/social policy, and will delve into how they are impacted in the time of COVID-19. The focus will be on essential elements of the law and policy and their links to the context of aging in Canada. The course will consider "issues on the ground" where each topic will be explored from "alternative viewpoints", presenting both a legal and policy perspective with the aim of making connections between law, policy and current best practices. The longstanding debate about whether the consequences of individual and population aging should be viewed as private troubles or public issues continues to influence law and policy in the areas of health care, community services, income security and housing, especially for specific groups defined by gender, class, sexual orientation and ethnicity. Analyses of each area will include an evaluation of the main applications of the law and policies, and students will gain an in-depth understanding of the issues discussed and the significance of these issues to older adults.

Prerequisite: Completion of 4.0 credits
Recommended Preparation: This course will be attractive to students from all disciplines but they can expect engaged learning and critical thinking. Workload will be commensurate with a 300-level course.
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

Introduction

Sociology’s key principle is that patterned social relationships create opportunities for, and place constraints on, human action. The influence of this idea is widespread. New research agendas in law, literature, economics, and other disciplines reflect the notion that beyond individual motives, goals, values, beliefs and emotions, patterned social relationships help to make us who we are. Our courses and faculty research examine how patterned social relationships shape and are shaped by gender roles and families; health; immigration and ethnic relations; labour markets, work and social inequality; political structures and processes; crime, law and deviance; culture; cities; and networks, and communities.

To test explanations regarding the influence of social relationships on various aspects of human behaviour, sociologists collect and analyze observational, survey, experimental, and historical data. Accordingly, the sociological perspective and the research skills learned by studying sociology prepare students for a wide variety of careers in industry, government, education, politics, health and journalism. Medical, legal, and environmental fields report an increasing need for sociologists. Municipal, provincial and federal governments hire in areas like urban sociology, community relations, policy and planning, and statistical analysis. In private business, sociologists work in management consulting firms and polling organizations, as well as in labour relations and human resources.

A professional career in sociology requires training beyond the undergraduate level. However, the critical, analytical and research skills that undergraduate sociology students learn open many employment opportunities. Over a third of Canadian undergraduates in sociology go on to be employed in business, finance and administrative occupations, and just under a third in government service, social science, and educational fields.

Undergraduate Chair: Christian Caron, Room 286, 725 Spadina Ave., 416-978-8263, christian.caron@utoronto.ca

Undergraduate Administrator: Donna Ragbir, Room 284, 725 Spadina Ave., 416-946-4064, sociology.undergraduate@utoronto.ca

Undergraduate Program Information and Course Descriptions: available at https://sociology.utoronto.ca

Regarding Sociology Programs

Enrolment in sociology programs is limited. Consult the Arts & Science Program Toolkit for application procedures.

NOTE 1: Obtaining 65% or more in SOC101Y or a combined average of 65% or more in SOC102H+SOC103H, SOC102H+SOC150H1, SOC103H+SOC150H1, or SOC100H1+SOC150H1 is required for entry into the sociology major and minor programs. Entry to the sociology specialist program at the end of the first year requires a minimum of 80% in SOC101Y or a minimum combined average of 80%
in SOC102H+SOC103H, SOC102H+SOC150H1, SOC103H+SOC150H1. Achieving the minimum grades does not guarantee acceptance into the programs. Credit for higher-level SOC courses will not waive these requirements.

NOTE 2: Transfer credits of SOC1**H without exclusion cannot be used to meet program admission or requirements.

Sociology Programs

Sociology Specialist (Arts Program) - ASSPE1013

Enrolment Requirements:

This is a limited enrolment program. Note there are different options depending on whether a student has completed between 4.0 and 8.5 credits, or 9.0 or more credits. Students interested in the Sociology Specialist typically apply and enrol from the Sociology Major.

For students who have completed 9.0 or more credits:

Variable Minimum Grade Average
A minimum grade average is needed for entry, and this minimum changes each year depending on available spaces and the number of applicants. The following courses must be completed:

• SOC201H1, SOC202H1, and SOC204H1

To ensure that students admitted to the program will be successful, applicants with a final grade average lower than 70% in these required courses will not be considered for admission. Please note that obtaining this minimum grade average does not guarantee admission to the program.

Special Requirement

• Students must be enrolled in the Sociology Major (ASMAJ1013)

For students who have completed between 4.0 and 8.5 credits:

Variable Minimum Grade Average
A minimum grade average is needed for entry, and this minimum changes each year depending on available spaces and the number of applicants. The following courses must be completed:

• (SOC100H1 and SOC150H1)

To ensure that students admitted to the program will be successful, applicants with a final grade average lower than 65% in these required courses will not be considered for admission. Please note that obtaining this minimum grade average does not guarantee admission to the program.

Note:
Students cannot combine a Sociology Specialist program with another Sociology program (Major or Minor) for their degree.

Completion Requirements:

(10.0 credits in Sociology)

1. SOC101Y1, or a combination of (SOC102H1 and SOC103H1), (SOC102H1 and SOC150H1), (SOC103H1 and SOC150H1), or (SOC100H1 and SOC150H1).

2. SOC201H1, SOC202H1, and SOC204H1

3. SOC251H1, SOC252H1, and SOC254H1

4. 2.0 SOC credits from 300-level "Program-Only" courses (SOC319H1 – SOC354H1; Offerings will vary from year to year.).

5. 1.0 SOC credit at the 400-level

6. An additional 3.0 credits in Sociology at the 200 or 300-level (1.0 of which must be taken at the 300-level, i.e., 2.0 credits at the 200 or 300-level and 1.0 at the 300-level).

NOTES:
1. Students cannot take more than 1.0 credit at the 400-level without written permission from the Undergraduate Program Administrator.

2. Students cannot take more than 2.0 credits of the program-only courses without written permission from the Undergraduate Program Administrator.

Sociology Major (Arts Program) - ASMAJ1013

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

Variable Minimum Grade Average
A minimum grade average is needed for entry, and this minimum changes each year depending on available spaces and the number of applicants. The following courses must be completed:

• (SOC100H1 and SOC150H1)

To ensure that students admitted to the program will be successful, applicants with a final grade average lower than 65% in these required courses will not be considered for admission. Please note that obtaining this minimum grade average does not guarantee admission to the program.

Note:
Students cannot combine a Sociology Major program with another Sociology program (Specialist or Minor) for their degree.

Completion Requirements:

(7.0 credits in Sociology)

1. SOC101Y1, or a combination of SOC102H1+SOC103H1, SOC102H1+SOC150H1, SOC103H1+SOC150H1, or SOC100H1+SOC150H1.

2. SOC201H1, SOC202H1, and SOC204H1
3. 1.0 credit from SOC251H1, SOC252H1, and SOC254H1

4. 1.0 SOC credit from 300-level "Program-Only" courses (SOC319H1 – SOC354H1; Offerings will vary from year to year.).

5. 0.5 SOC credits at the 400-level

6. An additional 2.0 credits in Sociology at the 200 or 300-level (0.5 of which must be taken at the 300-level, i.e., 1.5 credits at the 200 or 300-level and 0.5 at the 300-level).

NOTES:
1. Students cannot take more than a 0.5 credit at the 400-level without written permission from the Undergraduate Program Administrator.
2. Students cannot take more than 1.0 credit of the program-only courses without written permission from the Undergraduate Program Administrator.

Sociology Minor (Arts Program) - ASMIN1013

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

Variable Minimum Grade Average
A minimum grade average is needed for entry, and this minimum changes each year depending on available spaces and the number of applicants. The following courses must be completed:

• (SOC100H1 and SOC150H1)

To ensure that students admitted to the program will be successful, applicants with a final grade average lower than 65% in these required courses will not be considered for admission. Please note that obtaining this minimum grade average does not guarantee admission to the program.

Note:
Students cannot combine a Sociology Major program with another Sociology program (Specialist or Minor) for their degree.

Completion Requirements:

(4.0 credits in Sociology)

1. SOC101Y, or a combination of SOC102H+SOC103H, SOC102H+SOC150H1, SOC103H+SOC150H1, or SOC100H1+SOC150H1.

2. 3.0 SOC credits, which includes at least 1.0 SOC credit at the 300-level, i.e., 2.0 SOC credits at the 200 or 300-level and 1.0 SOC credit at the 300-level.

Combined Degree Program (CDP) in Arts and Education: Sociology (Major), Honours Bachelor of Arts/Master of Teaching

The Combined Degree Program in Arts/Science and Education is designed for students interested in studying the intersections of teaching subjects and Education, coupled with professional teacher preparation. Students earn an Honours Bachelor’s degree from the Faculty of Arts and Science (St. George) and an accredited professional Master of Teaching (MT) degree from the Ontario Institute for Studies in Education (OISE). They will be recommended to the Ontario College of Teachers for an Ontario Teacher’s Certificate of Qualifications as elementary or secondary school teachers. The CDP permits the completion of both degrees in six years with 1.0 FCE that may be counted towards both the undergraduate and graduate degrees.

Program requirements:
1. Minor in Education and Society, Victoria College
2. Major in Sociology (first teaching subject)
3. Minor in an area corresponding to the second teaching subject as determined by OISE

(see http://pepper.oise.utoronto.ca/~jhewitt/mtrresources/intermediate_senior_teaching_subject_prerequisites_2016-17.pdf)

See here for additional information on the CDP, including admission, path to completion and contact information.

Regarding Sociology Courses

Note:
Transfer credits of SOC1**H without exclusion cannot be used to meet program admission or requirements.

400-level Courses

Note: Sociology majors cannot take more than 0.5 SOC FCE at the 400 level and Sociology specialists cannot take more than 1.0 SOC FCE at the 400 level, without written permission from the Undergraduate Program Administrator.
Sociology Courses

SOC100H1 - Introduction to Sociology I: Sociological Perspectives

Hours: 24L/12T

This course will challenge your views on a wide range of issues that affect us all. It will also excite your interest in a unique sociological way of understanding your world. We will analyze the globalization of culture, emerging patterns of class, race, and gender inequality in Canada and internationally, criminal and deviant behaviour, and so on. You will learn to understand these and other pressing social issues by analyzing the way the social world is organized. These topics are further taken up in the sequel to this course, SOC150: Introduction to Sociology II: Sociological Inquiries.

Exclusion: SOC101Y1, SOC102H1, SOC103H1, SOCA01H3, SOCA02H3; SOC100H5
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

SOC150H1 - Introduction to Sociology II: Sociological Inquiries

Hours: 24L/12T

In the sequel to SOC100H1: Introduction to Sociology I: Sociological Perspectives, this course will explore in more depth the topic of social inequality and the contemporary debates that animate sociology. We may like to think of ourselves as perfectly free but powerful social forces open up some opportunities and close off others, constraining our freedom and helping to make us what we are. By examining the operation of these social forces, sociology can help us know ourselves. The course is also about skills-building, skills useful not only for success at U of T, but beyond the walls of the university.

Prerequisite: SOC100H1 or SOC102H or SOC103H
Exclusion: SOC101Y, (SOC102H + SOC103H), SOC200H1, SOC200Y1, SOCB05H3, SOC221H5, SOC200Y5
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

SOC196H1 - Global Cities and Urban Refugees: Connecting South and North

Hours: 24L

The majority of refugees and asylum seekers today live in cities, above all, in the Global South. This course will introduce and critically assess key theories and concepts on forced migration in relation to cities from a global perspective. By drawing on a wide range of literature and case studies from around the world, the course will explore and compare cities across the Global South and North around questions of law, governance, and politics related to urban refugees and asylum seekers. Restricted to first-year students. Not eligible for CR/NCR option.

Prerequisite: None
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

SOC197H1 - Future “Agents” & Social Relations: Considering Sociology in a World of Robots, Cyborgs, Bioengineered Agents & Tools

Previous Course Number: SII199H1S-L0391

Hours: 24L

Some people are worried that we risk becoming less human if we allow ourselves or others to engage in widespread self-transformation through the insertion of some kinds of devices into human bodies (e.g., computers, becoming cyborgs) or as a result of interventions such as genetic engineering, etc. Others are concerned that the use of some technologies, or barriers to their use, will increase global inequalities. In this course we will read, talk, and write about these and related issues. We will take a sociological approach, which means that we will attend to contextual forces that shape practices, and material flows, and the meaning of objects. Students will present their final paper in class. Restricted to first-year students. Not available for CR/NCR option.

Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)
SOC198H1 - The Social Networks of Students

Hours: 24L

This course is a First-Year Foundation Seminar and provides an opportunity for exploration of different topics and themes. Social networks are the webs of connections between people, the mesh that weaves people into communities and societies. In this course, you will learn about social networks by examining the ones around you: what do student's social networks look like? How do they change from high school, to university, and beyond? You will learn, first hand, how researchers study social networks, and how we work to understand their association with important outcomes like academic achievement, graduation, job-finding, and more. Restricted to first-year students. Not available for CR/NCR option.

Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

SOC199Y1 - How We Use Time in Everyday Life

Hours: 48S

This seminar examines how people use time in their everyday lives: the content, the interpersonal and structural circumstances, and the implications. The seminar will include an examination of seminal writings about people's use of time and hands-on practice in the strategies and techniques of analyzing available data, including the formulation of questions and approaches to answering them. Students will acquire an appreciation not only of the concept of time and how it helps explain important issues in the social sciences but also of how they use time in their daily lives and how time-use analysis can help them better understand many situations. Several skills will be developed in this seminar, including reading, writing, expressing points of view, and asking and answering research questions by using numerical data and computers to organize, analyze, and show results clearly. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

SOC201H1 - Classical Sociological Theory

Hours: 24L/12T

Introduction to the history, nature, and role of sociological theory, through an examination of the works of key classical theorists such as Karl Marx, Max Weber, Emile Durkheim, Georg Simmel, and others. Restricted to sociology majors and specialists.

Prerequisite: SOC101Y1, or a combination of SOC102H1+SOC103H1, SOC102H1+SOC150H1, SOC103H1+SOC150H1, or SOC100H1+SOC150H1
Exclusion: SOC203H1; SOC231H5; SOCB42H3
Recommended Preparation: SOC150H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

SOC202H1 - Introduction to Quantitative Methods in Sociology

Hours: 24L/18T

Introduction in quantitative social science research from descriptive statistics to hypothesis testing using various strategies for the analysis of bivariate relationships. Restricted to sociology majors and specialists.

Prerequisite: SOC101Y1, or a combination of SOC102H1+SOC103H1, SOC102H1+SOC150H1, SOC103H1+SOC150H1, or SOC100H1+SOC150H1
Exclusion: SOC200Y5, SOC222H5, ECO220Y1, ECO227Y1, GGR270H1, PSY201H1, STA220H1, STA248H1, POL222H1, POL232H1, POL242Y1, POL322H1, STA288H1
Recommended Preparation: SOC150H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

SOC204H1 - Introduction to Qualitative Methods in Sociology

Hours: 24L/12T

Introduction to the methods and issues of qualitative research, the theories, methods for data collection and analysis, and the personal and ethical issues relating to qualitative research. Restricted to sociology majors and specialists.

Prerequisite: SOC101Y1, or a combination of SOC102H1+SOC103H1, SOC102H1+SOC150H1, SOC103H1+SOC150H1, or SOC100H1+SOC150H1
Exclusion: SOC302H1; SOCC23H3; SOC387H5
Recommended Preparation: SOC150H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)
SOC205H1 - Urban Sociology

Hours: 24L

This course reviews theories of urban genesis and urban form; the interrelationship of urbanization, industrialization and modernization, issues in urban living (housing, transportation, urban-renewal, poverty, unemployment, etc.); urban social networks (ethnic and cultural heterogeneity, neighbourhood, community and other voluntary associations).

**Prerequisite:** SOC101Y1 or SOC102H1 or SOC100H1

**Recommended Preparation:** SOC150H1

**Distribution Requirements:** Social Science

**Breadth Requirements:** Society and its Institutions (3)

SOC207H1 - Sociology of Work & Occupations

Hours: 24L

The nature and meaning of work in relation to changes in the position of the professions, unions and government, of women and minority groups, and in industrial societies more generally. Career choice and strategies, occupational mobility, and individual satisfaction at work.

**Prerequisite:** SOC101Y1 or SOC102H1 or SOC100H1

**Exclusion:** SOC227H5

**Recommended Preparation:** SOC150H1

**Distribution Requirements:** Social Science

**Breadth Requirements:** Society and its Institutions (3)

SOC208H1 - Introduction to Social Policy

Hours: 24L

This course introduces students to the concepts, history and development of social policy in economically developed welfare states. It examines the problems and concepts of the policy process, exploring the political, economic, and institutional frameworks that structure public choices about social policy in Canada, and compare systems of social policy around the world.

**Prerequisite:** SOC101Y1 or SOC102H1 or SOC100H1

**Exclusion:** SOC297H1 (New Topics in Sociology: Introduction to Social Policy), offered in Winter 2017; SOC240H5

**Recommended Preparation:** SOC150H1

**Distribution Requirements:** Social Science

**Breadth Requirements:** Society and its Institutions (3)

SOC209H1 - Sexuality and Modernity

Hours: 24L

This course examines questions related to sexuality, with a special focus on the social construction of sexual identity, practice, community and desire. To do so, we proceed self consciously with a critical analysis of the modern study of sexuality, and the ways in which sexual science, as a kind of social practice, has affected the construction and regulation of sexual orientation.

**Prerequisite:** SOC101Y1 or SOC102H1 or SOC100H1

**Exclusion:** SOC395H1 (taken in Winter 2015, Winter 2016), SOC387H1 (taken in Fall 2016, Fall 2017), SOC386H1 (taken in Winter 2018)

**Recommended Preparation:** SOC150H1

**Distribution Requirements:** Social Science

**Breadth Requirements:** Society and its Institutions (3)

SOC210H1 - Sociology of Race and Ethnicity

Hours: 24L

The course explores the concepts of race and ethnicity and major theories to understand race and ethnic relations.

**Prerequisite:** SOC101Y or SOC102H or SOC100H1

**Exclusion:** SOC210Y1

**Recommended Preparation:** SOC150H1

**Distribution Requirements:** Social Science

**Breadth Requirements:** Society and its Institutions (3)

SOC212H1 - Sociology of Crime & Deviance

Hours: 24L

This course provides an overview of the study of crime and deviance. We critically examine how scholars have gone about studying crime and deviance (the methods they use and the statistics they employ) as well as the major sociological explanations for crime and deviance. We also consider the empirical evidence as it relates to the validity of these explanations and some of the policy fallout from different theoretical approaches.

**Prerequisite:** SOC101Y1 or SOC102H1 or SOC100H1

**Exclusion:** SOC211H5

**Recommended Preparation:** SOC150H1

**Distribution Requirements:** Social Science

**Breadth Requirements:** Society and its Institutions (3)
SOC213H1 - Sociological Social Psychology

Hours: 24L

This course provides an introduction to the systematic study of the influence of individuals, groups, and society on individuals' thoughts, feelings, and behaviours from a sociological perspective. The course emphasizes interaction among individuals, between an individual and a group, or among groups, all situated within particular social contexts. One core emphasis involves the ways that individual-level processes contribute to explaining social inequality in social groups and organizations. Topics include identity processes, social cognitions, attitudes, emotions, status processes, power relations, legitimacy, and justice.

Prerequisite: SOC101Y1 OR SOC102H1 or SOC100H1
Exclusion: PSY220H1
Recommended Preparation: SOC150H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

SOC220H1 - Social Stratification

Hours: 24L

This course is concerned with the causes and consequences of economic inequality. More specifically, it explores how achieved and ascribed characteristics are related to social class and related economic outcomes. Although some of the material will be comparative and pertain to modern Democracies generally, emphasis will be on Canadian society.

Prerequisite: SOC101Y1 or SOC102H1 or SOC100H1
Recommended Preparation: SOC150H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

SOC214H1 - Sociology of the Family

Hours: 24L

This course examines diverse family patterns, to show the economic, political and cultural factors that influence families. A brief social history of family paves the way for an examination of the various family patterns common in Canada today. Special attention is paid to the gender relations at the heart of family.

Prerequisite: SOC101Y1 or SOC102H1 or SOC100H1
Exclusion: SOC49H3; SOC244H5
Recommended Preparation: SOC150H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

SOC221H1 - Asian Communities in Canada

Hours: 24L

The course will explore the structures and processes of Asian communities in Canada. Historical development of various Asian communities will be explored.

Prerequisite: SOC101Y1 or SOC102H1 or SOC100H1
Exclusion: SOC342Y1/SOC394Y1
Recommended Preparation: SOC150H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

SOC243H1 - Sociology of Health and Illness

Hours: 24L

This course examines (1) the social causes of illness and disease, (2) the experience of illness, and social processes that shape both of these issues, including medicalization. It focuses on population health, the relation between agency and structure, and macro-micro connections. Professional health care is discussed to the extent that it provides context for analyses of illness patterns and experiences.

Prerequisite: SOC101Y1 or SOC102H1 or SOC100H1
Exclusion: SOC239H5
Recommended Preparation: SOC150H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)
SOC246H1 - Sociology of Aging

Hours: 24L

This course deals with population aging, cohort effects, inter-generational relations, historical variation in effects of social environment on aging, how health and family relationships vary with age, and social policies related to aging. The whole life course is considered, but the emphasis on adulthood and old age.

Prerequisite: SOC101Y1 or SOC102H1 or SOC100H1
Exclusion: SOC334H5
Recommended Preparation: SOC150H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

SOC249H1 - Sociology of Migration

Hours: 24L

This course examines contemporary migration flows, types and causes of migration, theories of migration, immigration policies, and migrant integration with emphasis on Canada.

Prerequisite: SOC101Y1 or SOC102H1 or SOC100H1
Exclusion: SOC307Y1
Recommended Preparation: SOC150H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

SOC250Y1 - Sociology of Religion

Hours: 48L

This course will examine religious beliefs, practices, and experiences from a historical-sociological and comparative perspective. Classical and contemporary theories will be reviewed and applied to investigate such topics as: the social origins of religions; the formation of religious communities; heresies, schisms and the making of orthodoxies; secularization and fundamentalism; cults and new religious movements; religious regulation of the body and person; and the variable linkages of religion to politics, war, art and science.

Prerequisite: SOC101Y1 or SOC102H1 or SOC100H1
Exclusion: RLG210Y1
Recommended Preparation: SOC150H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

SOC251H1 - Contemporary Sociological Theory

Hours: 24L/12T

A selective introduction to major contemporary thinkers and approaches whose ideas have achieved wide influence, as well as an on-going inquiry into the nature and role of sociological analysis. Restricted to sociology majors and specialists.

Prerequisite: SOC201H1 or SOC203H1
Exclusion: SOC376H1; SOC232H5
Recommended Preparation: SOC150H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

SOC252H1 - Intermediate Quantitative Methods in Sociology

Hours: 24L/24T

Provides students with the opportunity to develop an understanding of the logic of multivariate analysis by applying various strategies for the analysis of complex multivariate data. Restricted to sociology majors and specialists.

Prerequisite: SOC202H1
Exclusion: SOC300H1, ECO220Y1, PSY202H1, STA221H1
Recommended Preparation: SOC150H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

SOC254H1 - Intermediate Qualitative Methods in Sociology

Hours: 24L/12T

An in-depth examination of key methods of qualitative research, and an opportunity to design and conduct qualitative research that draws from key debates, methodologies, and methods in the field. Restricted to sociology majors and specialists.

Prerequisite: SOC204H1
Recommended Preparation: SOC150H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)
SOC256H1 - Lives and Societies

Hours: 24L

Characteristics of very different kinds of societies, from hunters and gatherers to modern postindustrial countries, and how these affect features of individual lives including: life stages, their status, and transitions between them; the variety of possible life courses; rates of birth and death, and their implications for people, their kin, and their societies.

Prerequisite: SOC101Y1 or SOC102H1 or SOC100H1
Recommended Preparation: SOC150H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

SOC260H1 - Introduction to Political Sociology

Hours: 24L

An introduction to key topics in political sociology such as social movements, electoral alignments, parties as organizations, the welfare state, revolution, policymaking, state formation, nationalism and imperialism.

Prerequisite: SOC101Y1 or SOC102H1 or SOC100H1
Exclusion: SOCB30H3; SOC335H5
Recommended Preparation: SOC150H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

SOC265H1 - Gender and Society

Hours: 24L

This course first explores how sociologists conceptualize gender and study gender. Then, it explores the varied nature of gender relations, with a focus on the social organization of gender today.

Prerequisite: SOC101Y1 or SOC102H1 or SOC100H1
Exclusion: SOCB22H3; SOC275H5
Recommended Preparation: SOC150H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

SOC270H1 - Introduction to Social Networks

Previous Course Number: SOC355H1
Hours: 24L

This course covers the fundamentals of the social network perspective, including a short introduction to social network theory and a survey of major findings in social network research. We will study how patterns of relations between social actors develop and how they affect outcomes such as health, status attainment, and inequality. Students will write a proposal to conduct research from a social network perspective.

Prerequisite: SOC101Y1 or SOC102H1 or SOC100H1
Exclusion: SOC355H1, SOC294H1 (Topics: Introduction to Social Networks) offered in Winter 2018 and Winter 2020
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

SOC280H1 - Sociology of Culture

Hours: 24L

The course examines the social origins of culture, the cultural patterns found in various groups and institutions, and the influence culture has on important aspects of society.

Prerequisite: SOC101Y1 or SOC102H1 or SOC100H1
Exclusion: SOC281H; SOC202H5
Recommended Preparation: SOC150H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

SOC282H1 - Introduction to Social Problems

Hours: 24L

Examines a variety of widely discussed social problems, including poverty, crime, substance abuse, sexism, climate change and urban sprawl, using sociological theories to understand the causes of these problems. Will also examine the “social construction” of these social problems and factors that influence public attention and concern.

Prerequisite: SOC101Y1 or SOC102H1 or SOC100H1
Recommended Preparation: SOC150H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)
SOC293H1 - New Topics in Sociology
An opportunity to explore new topics in sociology. Topics vary from year to year based on the instructor. Consult the Departmental website: http://sociology.utoronto.ca/st-george-campus/courses-3/new-topics-in-so...

Prerequisite: SOC101Y1 or SOC102H1 or SOC100H1
Recommended Preparation: SOC150H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

SOC294H1 - New Topics in Sociology
An opportunity to explore new topics in sociology. Topics vary from year to year based on the instructor. Consult the Departmental website: http://sociology.utoronto.ca/st-george-campus/courses-3/new-topics-in-so...

Prerequisite: SOC101Y1 or SOC102H1 or SOC100H1
Recommended Preparation: SOC150H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

SOC295H1 - New Topics in Sociology
An opportunity to explore new topics in sociology. Topics vary from year to year based on the instructor. Consult the Departmental website: http://sociology.utoronto.ca/st-george-campus/courses-3/new-topics-in-so...

Prerequisite: SOC101Y1 or SOC102H1 or SOC100H1
Recommended Preparation: SOC150H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

SOC296H1 - New Topics in Sociology
An opportunity to explore new topics in sociology. Topics vary from year to year based on the instructor. Consult the Departmental website: http://sociology.utoronto.ca/st-george-campus/courses-3/new-topics-in-so...

Prerequisite: SOC101Y1 or SOC102H1 or SOC100H1
Recommended Preparation: SOC150H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

SOC297H1 - New Topics in Sociology
An opportunity to explore new topics in sociology. Topics vary from year to year based on the instructor. Consult the Departmental website: http://sociology.utoronto.ca/st-george-campus/courses-3/new-topics-in-so...

Prerequisite: SOC101Y1 or SOC102H1 or SOC100H1
Recommended Preparation: SOC150H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

SOC298H1 - New Topics in Sociology
An opportunity to explore new topics in sociology. Topics vary from year to year based on the instructor. Consult the Departmental website: http://sociology.utoronto.ca/st-george-campus/courses-3/new-topics-in-so...

Prerequisite: SOC101Y1 or SOC102H1 or SOC100H1
Recommended Preparation: SOC150H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

SOC299Y1 - Research Opportunity Program
Credit course for supervised participation in faculty research project. Details at https://www.artsci.utoronto.ca/current/academics/research-opportunities/research-opportunities-program. Not eligible for CR/NCR option.

Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

SOC303H1 - Family Demography
Hours: 24L
Uses empirical sociological studies to describe and analyze the political, social and economic implications of diverse family relationships and living arrangements. Examines the social and economic consequences of inconsistencies between public definitions of family and the realities of family life. Introduces students to the statistical analysis of the demographic features of families using census data.

Prerequisite: 1.0 SOC FCE at the 200+ level
Exclusion: SOC320H1
Recommended Preparation: SOC214H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)
SOC304H1 - Status and Class Mobility

Hours: 24L

Shows how getting ahead or becoming downwardly mobile are affected by social as well as economic factors. Links the experience of mobility to larger scale social change.

Prerequisite: 1.0 SOC FCE at the 200+ level
Exclusion: SOC321H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

SOC306H1 - Economic Sociology

Hours: 24L

This course offers a sociological account of economic phenomena. It examines the sociological perspectives on production, consumption, exchange and distribution, economic crises, and other economic matters. In addition to exploring economic behavior in the corporate and financial worlds, the course also examines behavior in households, markets for intimacy, and illegal markets.

Prerequisite: 1.0 SOC FCE at the 200+ level
Exclusion: SOC386H1F (2016/2017), SOC323H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

SOC308H1 - Global Inequality

Hours: 24L

This course examines the social processes that characterize stratification and social inequality across the globe, by looking at whether global inequality is growing, shrinking or stagnant and the impact of globalization on global inequality, with particular emphasis on examining disparities over time in education, income/wealth and health.

Prerequisite: 1.0 SOC FCE at the 200+ level OR SOC220H1
Exclusion: SOC395H1S (2016/2017), SOC345H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

SOC309H1 - HIV and AIDS: Social Policies and Programs

Hours: 24L

Explores and discusses specific theories of action. Applies theories to various factors associated with AIDS/HIV. Examines political, scientific, health, social, economic, and cultural environments. This course forces students to examine the hidden theoretical assumptions surrounding AIDS/HIV.

Prerequisite: 1.0 SOC FCE at the 200+ level
Exclusion: SOC309Y1, SOC324H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

SOC310H1 - Sociology of Atrocities

Previous Course Number: SOC397H1

Hours: 24L

This course focuses on the sociology of atrocities. We focus on the range of social actors and processes involved when atrocities occur, how we identify, name, and respond to atrocities (such as genocide or crimes against humanity), the behavior of bystanders and intervenors, cultural trauma and the effects of atrocities, and processes of commemoration. We investigate the collective and social dynamics to try and explain the role of individuals, groups, and institutional actors in committing atrocities, including the role of group identities, bureaucracies, collective decision-making, shared repertoires, legacies of hate, and peer networks. We study the role of other actors – in particular legal institutions, but also humanitarian bodies, journalists, and others – in identifying, naming and sometimes responding to these atrocities, along with sociological evidence about how they do so and the efficacy of any such response.

Prerequisite: 1.0 SOC FCE at the 200+ level
Exclusion: SOC330H1; SOC330H1F (13/14); SOC397H1 (Selected Topics in Sociological Research: International Criminal Justice & Atrocities), offered in Winter 2015 and Winter 2016
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)
SOC311H1 - Immigration and Race Relations in Canada

**Hours:** 24L

Examines the economic, social, cultural and political impacts of 20th century immigration in Canada, and emerging race and ethnic relations. Topics include immigration policy; population impact; community formation; labour markets; enclave economies; welfare use by immigrants; the criminal justice system; racial conflict; multiculturalism and race; and equity policies.

**Prerequisite:** 1.0 SOC FCE at the 200+ level

**Exclusion:** SOC336H1, SOC347H1

**Distribution Requirements:** Social Science

**Breadth Requirements:** Society and its Institutions (3)

SOC312H1 - Population and Society

**Hours:** 24L

This introductory course examines Canada's population in a global context, covering a broad range of population issues and perspectives. Topics include (a) demographic data and methods, (b) population composition in terms of age, sex, and nuptiality, (c) demographic processes of fertility, mortality, internal and international migration, (d) the relationship between population change and urbanization, and (e) the role of social policy on population change. For all course topics, the instructor will examine historical and cross-national trends and review proposed explanations.

**Prerequisite:** 1.0 SOC FCE at the 200+ level

**Exclusion:** SOC312Y1, SOC325H1, SOC356H5

**Recommended Preparation:** SOC200H1

**Distribution Requirements:** Social Science

**Breadth Requirements:** Society and its Institutions (3)

SOC313H1 - Social Control

**Hours:** 24L

This course examines how society has gone about controlling specific types of deviants (e.g., gang members, sex and drug offenders) and acts of deviance (e.g., organized crime, the deviance of social control agents). In examining these individuals and acts, attention is also directed to why they are defined as deviant and sanctioned, and why some types of deviance are less likely to be detected and sanctioned than others. Finally, consideration is also given to a range of sanctions that have been used to control deviance and the empirical evidence on their effectiveness.

**Prerequisite:** 1.0 SOC FCE at the 200+ level

**Exclusion:** SOC326H1

**Recommended Preparation:** SOC212H1

**Distribution Requirements:** Social Science

**Breadth Requirements:** Society and its Institutions (3)

SOC314H1 - Domestic Violence

**Hours:** 24L

This course will provide an overview of the different forms of domestic criminal violence, concentrating primarily on intimate partner violence and child abuse. We will focus on the methodological problems in assessing the nature and extent of these types of violence, the risk factors and correlates of both offending and victimization and the theoretical explanations that have been offered for these crimes. We also consider the social and legal responses to intimate partner violence and child abuse.

**Prerequisite:** 1.0 SOC FCE at the 200+ level

**Exclusion:** SOC328H1

**Recommended Preparation:** SOC212H1

**Distribution Requirements:** Social Science

**Breadth Requirements:** Society and its Institutions (3)

SOC315H1 - Sociology of Health Care

**Hours:** 24L

Examines factors that influence the organizational structure of health care systems, how these organizations develop, how they are maintained, and how they can be change.

**Prerequisite:** 1.0 SOC FCE at the 200+ level

**Exclusion:** SOC244H1, SOC333H5, SOC346H1

**Distribution Requirements:** Social Science

**Breadth Requirements:** Society and its Institutions (3)

SOC316H1 - Sociology of Health Care

**Previous Course Number:** SOC439H1

**Hours:** 24L/12T

This course examines the labour market and employment situation of immigrants emphasizing recent Canadian experience in comparative context. Topics include immigrant human capital, declining immigrant earnings, immigrant skill-underutilization, impact of the knowledge economy, racial discrimination, labour market structure and unionization, immigrant entrepreneurship and experiences of the Canadian-born second generation. This is a program-only course and is restricted to Sociology Majors and Specialists.

**Prerequisite:** SOC201H1, SOC202H1, SOC204H1 & 1.0 FCE from SOC251H1/SOC252H1/SOC254H1

**Exclusion:** SOC370H1

**Distribution Requirements:** Social Science

**Breadth Requirements:** Society and its Institutions (3)
SOC320H1 - Family Demography

Hours: 24L/12T

Uses empirical sociological studies to describe and analyze the political, social and economic implications of diverse family relationships and living arrangements. Examines the social and economic consequences of inconsistencies between public definitions of family and the realities of family life. Introduces students to the statistical analysis of the demographic features of families using census data. This is a program-only course and is restricted to sociology majors and specialists.

Prerequisite: SOC201H1, SOC202H1, SOC204H1 & 1.0 FCE from SOC251H1/SOC252H1/SOC254H1
Exclusion: SOC303H1
Recommended Preparation: SOC214H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

SOC321H1 - Status and Class Mobility

Hours: 24L/12T

Shows how getting ahead or becoming downwardly mobile are affected by social as well as economic factors. Links the experience of mobility to larger scale social change. This is a program-only course and is restricted to sociology majors and specialists.

Prerequisite: SOC201H1, SOC202H1, SOC204H1 & 1.0 FCE from SOC251H1/SOC252H1/SOC254H1
Exclusion: SOC304H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

SOC323H1 - Economic Sociology

Hours: 24L/12T

This course offers a sociological account of economic phenomena. It examines the sociological perspectives on production, consumption, exchange and distribution, economic crises, and other economic matters. In addition to exploring economic behavior in the corporate and financial worlds, the course also examines behavior in households, markets for intimacy, and illegal markets. This is a program-only course and is restricted to sociology majors and specialists.

Prerequisite: SOC201H1, SOC202H1, SOC204H1 & 1.0 FCE from SOC251H1/SOC252H1/SOC254H1
Exclusion: SOC306H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

SOC324H1 - HIV and AIDS: Social Policies and Programs

Hours: 24L/12T

Explores and discusses specific theories of action. Applies theories to various factors associated with AIDS/HIV. Examines political, scientific, health, social, economic, and cultural environments. This course forces students to examine the hidden theoretical assumptions surrounding AIDS/HIV. This is a program-only course and is restricted to sociology majors and specialists.

Prerequisite: SOC201H1, SOC202H1, SOC204H1 & 1.0 FCE from SOC251H1/SOC252H1/SOC254H1
Exclusion: SOC309H1; SOC309Y1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

SOC325H1 - Population and Society

Hours: 24L/12T

This introductory course examines Canada’s population in a global context, covering a broad range of population issues and perspectives. Topics include (a) demographic data and methods, (b) population composition in terms of age, sex, and nuptiality, (c) demographic processes of fertility, mortality, internal and international migration, (d) the relationship between population change and urbanization, and (e) the role of social policy on population change. For all course topics, the instructor will examine historical and cross-national trends and review proposed explanations. This is a program-only course and is restricted to sociology majors and specialists.

Prerequisite: SOC201H1, SOC202H1, SOC204H1 & 1.0 FCE from SOC251H1/SOC252H1/SOC254H1
Exclusion: SOC312H1; SOC356H5
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)
SOC326H1 - Social Control

Hours: 24L/12T

This course examines how society has gone about controlling specific types of deviants (e.g., gang members, sex and drug offenders) and acts of deviance (e.g., organized crime, the deviance of social control agents). In examining these individuals and acts, attention is also directed to why they are defined as deviant and sanctioned, and why some types of deviance are less likely to be detected and sanctioned than others. Finally, consideration is also given to a range of sanctions that have been used to control deviance and the empirical evidence on their effectiveness. This is a program-only course and is restricted to sociology majors and specialists.

Prerequisite: SOC201H1, SOC202H1, SOC204H1 & 1.0 FCE from SOC251H1/SOC252H1/SOC254H1
Exclusion: SOC313H1
Recommended Preparation: SOC212H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

SOC328H1 - Domestic Violence

Hours: 24L/12T

This course will provide an overview of the different forms of domestic criminal violence, concentrating primarily on intimate partner violence and child abuse. We will focus on the methodological problems in assessing the nature and extent of these types of violence, the risk factors and correlates of both offending and victimization and the theoretical explanations that have been offered for these crimes. We also consider the social and legal responses to intimate partner violence and child abuse. This is a program-only course and is restricted to sociology majors and specialists.

Prerequisite: SOC201H1, SOC202H1, SOC204H1 & 1.0 FCE from SOC251H1/SOC252H1/SOC254H1
Exclusion: SOC313H1
Recommended Preparation: SOC212H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

SOC329H1 - Social Movements

Hours: 24L/12T

This course introduces students to the sociological study of collective action. Students will explore how movements in a variety of historical and global contexts endeavor to produce social change. In this process, we will examine political and cultural opportunities and obstacles, organizational dynamics, resources, collective action frames, strategies and tactics. This is a program-only course and is restricted to sociology majors and specialists.

Prerequisite: SOC201H1, SOC202H1, SOC204H1 & 1.0 FCE from SOC251H1/SOC252H1/SOC254H1
Exclusion: SOC279H1; SOC360H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

SOC330H1 - Sociology of Atrocities

Previous Course Number: SOC397H1
Hours: 24L/12T

This course focuses on the sociology of atrocities. We focus on the range of social actors and processes involved when atrocities occur, how we identify, name, and respond to atrocities (such as genocide or crimes against humanity), the behavior of bystanders and intervenors, cultural trauma and the effects of atrocities, and processes of commemoration. We investigate the collective and social dynamics to try and explain the role of individuals, groups, and institutional actors in committing atrocities, including the role of group identities, bureaucracies, collective decision-making, shared repertoires, legacies of hate, and peer networks. We study the role of other actors – in particular legal institutions, but also humanitarian bodies, journalists, and others – in identifying, naming and sometimes responding to these atrocities, along with sociological evidence about how they do so and the efficacy of any such response. This is a program-only course and is restricted to sociology majors and specialists.

Prerequisite: SOC201H1, SOC202H1, SOC204H1 & 1.0 FCE from SOC251H1/SOC252H1/SOC254H1
Exclusion: SOC279H1; SOC360H1
Recommended Preparation: SOC212H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)
SOC331H1 - Sociology of Technology

Hours: 24L/12T

This course invites students to critically examine the interplay between technology and society. We will discuss how our interactions with technologies, including computers and the Internet, ICTs, social media, and other digital technologies, have become central for our understanding of contemporary social life. This course provides an overview of the sociology of technology, encompassed by various topics in which technology intersects with other areas of sociological inquiry, such as social stratification, community and networks, criminology and social control, work and labour, health and aging, and many others. This is a program-only course and is restricted to Sociology Majors and Specialists.

Prerequisite: SOC201H1, SOC202H1, SOC204H1 & 1.0 FCE from SOC251H1/SOC252H1/SOC254H1
Exclusion: SOC356H1; SOC356Y1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

SOC332H1 - Lives in Canada

Hours: 24L/12T

The life course in Canada, in the twentieth century and today, with some comparisons to other first world countries. How lives have changed over the past century; how lives are affected by history and social location; the impact of the life trajectories on health and crime. This is a program-only course and is restricted to sociology majors and specialists.

Prerequisite: SOC201H1, SOC202H1, SOC204H1 & 1.0 FCE from SOC251H1/SOC252H1/SOC254H1
Exclusion: SOC357H1; SOC257H1
Recommended Preparation: SOC220H1 or SOC281H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

SOC333H1 - Quality of Institutions and Lives

Hours: 24L/12T

Theory and research on quality of life encompass studies of subjective dimensions of individual wellbeing, such as happiness, and studies that focus on objective indicators of the quality of institutions and settings, such as child mortality rates. Quality-of-life theories range from (sometimes utopian) classical sociological theories with a historical and political slant to recent interdisciplinary theories that integrate sociological, psychological, and philosophical approaches. This is a program-only course and is restricted to sociology majors and specialists.

Prerequisite: SOC201H1, SOC202H1, SOC204H1 & 1.0 FCE from SOC251H1/SOC252H1/SOC254H1
Exclusion: SOC362H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

SOC334H1 - Sociology of Mental Health and Mental Disorders

Hours: 24L/12T

An overview of the link between social inequality and emotional inequality, focusing on differences in mental health across social groups and the role of stress and coping resources in explaining group differences. This is a program-only course and is restricted to sociology majors and specialists.

Prerequisite: SOC201H1, SOC202H1, SOC204H1 & 1.0 FCE from SOC251H1/SOC252H1/SOC254H1
Exclusion: SOC363H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

SOC335H1 - Urban Health

Hours: 24L/12T

Cities are home to particular populations (the poor, the homeless, racial and ethnic minorities, immigrants, and the young and old) and have distinct risks and protections relevant to health. Patterns of health in cities, historical developments, and emerging literature and methodology are used to uncover how everyday settings influence health. This is a program-only course and is restricted to sociology majors and specialists.

Prerequisite: SOC201H1, SOC202H1, SOC204H1 & 1.0 FCE from SOC251H1/SOC252H1/SOC254H1
Exclusion: SOC364H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

SOC336H1 - Transnational Asia

Hours: 24L/12T

This course explores how transnational flows of capital, labor, ideas, and culture are reconstituting the ways in which we organize our political, economic, and cultural life by particularly focusing on Asia, the region that has been at the center of this global transformation. How has the notion of the “transnational” evolved and invited critical reevaluations? What has been the place of Asian countries in this global process and what political, economic, social, and cultural changes do they experience? By examining these questions, this course aims to enhance our understanding of contemporary Asian societies closely tied with each other and the rest of the world. This is a program-only course and is restricted to sociology majors and specialists.

Prerequisite: SOC201H1, SOC202H1, SOC204H1 & 1.0 FCE from SOC251H1/SOC252H1/SOC254H1
Exclusion: SOC372H1; SOC351H1 (New Topics in Sociology: Transnational Asia), offered in Winter 2019; SOC395H1 (New Topics in Sociology: Transnational Asia), offered in Fall 2019
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)
SOC337H1 - Gender Relations

Hours: 24L/12T

This course examines the dynamics of gender in daily life – in sexuality and intimate relations, in parenting and families, and in paid work and workplace organizations, as well as in popular culture. It examines the social construction of gender in individuals and in social organizations, in order to understand gender inequality. This is a program-only course and is restricted to sociology majors and specialists.

Prerequisite: SOC201H1, SOC202H1, SOC204H1 & 1.0 FCE from SOC251H1/SOC252H1/SOC254H1
Exclusion: SOC365H1
Recommended Preparation: SOC265H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

SOC338H1 - Sociology of Women and Work

Hours: 24L/12T

This course focuses on women's paid and unpaid work and the relationship between the two. It analyzes the gender gap in earnings, the sexual segregation of the labour force, the restructuring of paid work, sexual harassment, paid domestic work, and the division of housework and child care. This is a program-only course and is restricted to sociology majors and specialists.

Prerequisite: SOC201H1, SOC202H1, SOC204H1 & 1.0 FCE from SOC251H1/SOC252H1/SOC254H1
Exclusion: SOC366H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

SOC339H1 - Race, Class, and Gender

Hours: 24L/12T

In this class, we analyze the ways in which race, class, gender and sexuality interact and shape communities, life opportunities, perspectives and politics. We will read contemporary ethnographies concerning work, socialization, and urban life against current sociological theories about inequality and intersectionality, and identity. This is a program-only course and is restricted to sociology majors and specialists.

Prerequisite: SOC201H1, SOC202H1, SOC204H1 & 1.0 FCE from SOC251H1/SOC252H1/SOC254H1
Exclusion: SOC367H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

SOC340H1 - Comparative Political Sociology

Hours: 24L/12T

The study of comparative (historical and cross-national) variation in outcomes that are the subject of research by political sociologists. This is a program-only course and is restricted to sociology majors and specialists.

Prerequisite: SOC201H1, SOC202H1, SOC204H1 & 1.0 FCE from SOC251H1/SOC252H1/SOC254H1
Exclusion: SOC371H1
Recommended Preparation: SOC260H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

SOC342H1 - The Sociology of Women and International Migration

Hours: 24L/12T

Examines the international migration of women in postindustrial economies with emphasis on Canada. Topics include: theories of female migration; the impacts of immigration policies; migration trends and entry status; integration issues pertaining to family, language knowledge, citizenship and economic status; labour market barriers and public policy considerations. This is a program-only course and is restricted to sociology majors and specialists.

Prerequisite: SOC201H1, SOC202H1, SOC204H1 & 1.0 FCE from SOC251H1/SOC252H1/SOC254H1
Exclusion: SOC383H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

SOC343H1 - Neighbourhoods & Communities in Canada

Hours: 24L/12T

Uses recent and historical data to demonstrate the changing social characteristics of local neighbourhoods and larger communities, as these have been affected by industrialization, immigration and other factors and as they affect the life chances of their residents. Provides students with active learning experiences through research activities using Census data. This is a program-only course and is restricted to sociology majors and specialists.

Prerequisite: SOC201H1, SOC202H1, SOC204H1 & 1.0 FCE from SOC251H1/SOC252H1/SOC254H1
Exclusion: SOC384H1
Recommended Preparation: SOC202H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)
SOC344H1 - Sociology of Everyday Life

**Hours:** 24L/12T

This course explores the phenomenological and organizational foundation of everyday experience. It focuses on the structure and social interactions that shape everyday life, and explains the social order that makes everyday life seem smooth and relatively effortless. The course offers experience in qualitative research and writing. This is a program-only course and is restricted to sociology majors and specialists.

**Prerequisite:** SOC201H1, SOC202H1, SOC204H1 & 1.0 FCE from SOC251H1/SOC252H1/SOC254H1

**Exclusion:** SOC388H1

**Distribution Requirements:** Social Science

**Breadth Requirements:** Society and its Institutions (3)

SOC345H1 - Global Inequality

**Hours:** 24L/12T

This course examines the social processes that characterize stratification and social inequality across the globe, by looking at whether global inequality is growing, shrinking or stagnant and the impact of globalization on global inequality, with particular emphasis on examining disparities over time in education, income/wealth and health. This is a program-only course and is restricted to sociology majors and specialists.

**Prerequisite:** SOC201H1, SOC202H1, SOC204H1 & 1.0 FCE from SOC251H1/SOC252H1/SOC254H1

**Exclusion:** SOC308H1

**Distribution Requirements:** Social Science

**Breadth Requirements:** Society and its Institutions (3)

SOC346H1 - Sociology of Health Care

**Hours:** 24L/12T

Examines factors that influence the organizational structure of health care systems, how these organizations develop, how they are maintained, and how they can be changed. Topics also include the social forces that influence the relationship between healthcare providers and consumers. This is a program-only course and is restricted to sociology majors and specialists.

**Prerequisite:** SOC201H1, SOC202H1, SOC204H1 & 1.0 FCE from SOC251H1/SOC252H1/SOC254H1

**Exclusion:** SOC336H1

**Distribution Requirements:** Social Science

**Breadth Requirements:** Society and its Institutions (3)

SOC347H1 - Immigration and Race Relations in Canada

**Hours:** 24L/12T

Examines the economic, social, cultural and political impacts of 20th century immigration in Canada, and emerging race and ethnic relations. Topics include immigration policy; population impact; community formation; labour markets; enclave economies; welfare use by immigrants; the criminal justice system; racial conflict; multiculturalism and race; and equity policies. This is a program-only course and is restricted to sociology majors and specialists.

**Prerequisite:** SOC201H1, SOC202H1, SOC204H1 & 1.0 FCE from SOC251H1/SOC252H1/SOC254H1

**Exclusion:** SOC311H1; SOC336H1

**Distribution Requirements:** Social Science

**Breadth Requirements:** Society and its Institutions (3)

SOC348H1 - Culture and Inequality

**Hours:** 24L/12T

How location in socioeconomic, ethnic, gender, and generational groups shapes individual cultural repertoires; how culture affects individual positions in stratification hierarchies; and the role of culture in group boundaries and struggles. This is a program-only course and is restricted to sociology majors and specialists.

**Prerequisite:** SOC201H1, SOC202H1, SOC204H1 & 1.0 FCE from SOC251H1/SOC252H1/SOC254H1

**Exclusion:** SOC281H1; SOC381H1

**Distribution Requirements:** Social Science

**Breadth Requirements:** Society and its Institutions (3)
SOC349H1 - Deconstructing 'Muslim American' - Race, Nationalism, and Religion

Hours: 24L/12T

Since the 2016 U.S. presidential election, Muslim Americans have been once again been cast as both threatening "outsiders" as well as examples of what makes the United States a "nation of immigrants." What do these contestations teach us about how race, nationalism, and globalization shape immigrant identities? This course examines a range of topics, from everyday boundary-making to ongoing global politics pertaining to different Muslim groups in the United States, often drawing comparisons with Muslims in other Western countries. Course materials include theoretical overviews, research articles, survey reports, book chapters, newspapers, films, and T.V. shows. This is a program-only course and is restricted to sociology majors and specialists.

Prerequisite: SOC201H1, SOC202H1, SOC204H1 & 1.0 FCE from SOC251H1/SOC252H1/SOC254H1
Exclusion: SOC373H1; SOC394H1 (New Topics in Sociology: Deconstructing "Muslim American" - Race, Nationalism and Religion), offered in Winter 2019; SOC352H1 (New Topics in Sociology: Deconstructing "Muslim American" - Race, Nationalism and Religion), offered in Winter 2020
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

SOC350H1 - New Topics in Sociology

Hours: 24L/12T

An opportunity for students to explore new topics in sociology. Topics vary from year to year based on the instructor. Consult the Departmental website: http://sociology.utoronto.ca/st-george-campus/courses-3/new-topics-in-sociology/. This is a program-only course and is restricted to sociology majors and specialists.

Prerequisite: SOC201H1, SOC202H1, SOC204H1 plus two of the following (1.0 FCE): SOC251H1, SOC252H1, SOC254H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

SOC351H1 - New Topics in Sociology

Hours: 24L/12T

An opportunity for students to explore new topics in sociology. Topics vary from year to year based on the instructor. Consult the Departmental website: http://sociology.utoronto.ca/st-george-campus/courses-3/new-topics-in-sociology/. This is a program-only course and is restricted to sociology majors and specialists.

Prerequisite: SOC201H1, SOC202H1, SOC204H1 plus two of the following (1.0 FCE): SOC251H1, SOC252H1, SOC254H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

SOC352H1 - New Topics in Sociology

Hours: 24L/12T

An opportunity for students to explore new topics in sociology. Topics vary from year to year based on the instructor. Consult the Departmental website: http://sociology.utoronto.ca/st-george-campus/courses-3/new-topics-in-sociology/. This is a program-only course and is restricted to sociology majors and specialists.

Prerequisite: SOC201H1, SOC202H1, SOC204H1 plus two of the following (1.0 FCE): SOC251H1, SOC252H1, SOC254H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

SOC353H1 - New Topics in Sociology

Hours: 24L/12T

An opportunity for students to explore new topics in sociology. Topics vary from year to year based on the instructor. Consult the Departmental website: http://sociology.utoronto.ca/st-george-campus/courses-3/new-topics-in-sociology/. This is a program-only course and is restricted to sociology majors and specialists.

Prerequisite: SOC201H1, SOC202H1, SOC204H1 plus two of the following (1.0 FCE): SOC251H1, SOC252H1, SOC254H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

SOC354H1 - New Topics in Sociology

Hours: 24L/12T

An opportunity for students to explore new topics in sociology. Topics vary from year to year based on the instructor. Consult the Departmental website: http://sociology.utoronto.ca/st-george-campus/courses-3/new-topics-in-sociology/. This is a program-only course and is restricted to sociology majors and specialists.

Prerequisite: SOC201H1, SOC202H1, SOC204H1 plus two of the following (1.0 FCE): SOC251H1, SOC252H1, SOC254H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)
SOC356H1 - Sociology of Technology

Hours: 24L

This course invites students to critically examine the interplay between technology and society. We will discuss how our interactions with technologies, including computers and the Internet, ICTs, social media, and other digital technologies, have become central for our understanding of contemporary social life. This course provides an overview of the sociology of technology, encompassed by various topics in which technology intersects with other areas of sociological inquiry, such as social stratification, community and networks, criminology and social control, work and labour, health and aging, and many others.

Prerequisite: 1.0 SOC FCE at the 200+ level
Exclusion: SOC351H1; SOC356Y1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

SOC357H1 - Lives in Canada

Hours: 24L

The life course in Canada, in the twentieth century and today, with some comparisons to other first world countries. How lives have changed over the past century; how lives are affected by history and social location; the impact of the life trajectories on health and crime.

Prerequisite: 1.0 SOC FCE at the 200+ level
Exclusion: SOC257H1, SOC332H1
Recommended Preparation: SOC220H1 or SOC281H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

SOC360H1 - Social Movements

Hours: 24L

This course examines the sociological study of collective action. Students will explore how movements in a variety of historical and global contexts endeavor to produce social change. In this process, we will examine political and cultural opportunities and obstacles, organizational dynamics, resources, collective action frames, strategies and tactics.

Prerequisite: 1.0 SOC FCE at the 200+ level
Exclusion: SOC279H1; SOC329H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

SOC362H1 - Quality of Institutions and Lives

Hours: 24L

Theory and research on quality of life encompass studies of subjective dimensions of individual wellbeing, such as happiness, and studies that focus on objective indicators of the quality of institutions and settings, such as child mortality rates. Quality-of-life theories range from (sometimes utopian) classical sociological theories with a historical and political slant to recent interdisciplinary theories that integrate sociological, psychological, and philosophical approaches.

Prerequisite: 1.0 SOC FCE at the 200+ level
Exclusion: SOC333H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

SOC363H1 - Sociology of Mental Health and Mental Disorders

Hours: 24L

An overview of the link between social inequality and emotional inequality, focusing on differences in mental health across social groups and the role of stress and coping resources in explaining group differences.

Prerequisite: 1.0 SOC FCE at the 200+ level
Exclusion: SOC334H1
Recommended Preparation: SOC220H1 or SOC281H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

SOC364H1 - Urban Health

Hours: 24L

Cities are home to particular populations (the poor, the homeless, racial and ethnic minorities, immigrants, and the young and old) and have distinct risks and protections relevant to health. Patterns of health in cities, historical developments, and emerging literature and methodology are used to uncover how everyday settings influence health.

Prerequisite: 1.0 SOC FCE at the 200+ level
Exclusion: SOC335H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)
SOC365H1 - Gender Relations

Hours: 24L

This course examines the dynamics of gender in daily life – in sexuality and intimate relations, in parenting and families, and in paid work and workplace organizations, as well as in popular culture. It examines the social construction of gender in individuals and in social organizations, in order to understand gender inequality.

Prerequisite: 1.0 SOC FCE at the 200+ level
Exclusion: SOC337H1
Recommended Preparation: SOC265H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

SOC366H1 - Sociology of Women and Work

Hours: 24L

This course focuses on women’s paid and unpaid work and the relationship between the two. It analyzes the gender gap in earnings, the sexual segregation of the labour force, the restructuring of paid work, sexual harassment, paid domestic work, and the division of housework and child care.

Prerequisite: 1.0 SOC FCE at the 200+ level
Exclusion: SOC338H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

SOC367H1 - Race, Class, and Gender

Hours: 24L

In this class, we analyze the ways in which race, class, gender and sexuality interact and shape communities, life opportunities, perspectives and politics. We will read contemporary ethnographies concerning work, socialization, and urban life against current sociological theories about inequality and intersectionality, and identity.

Prerequisite: 1.0 SOC FCE at the 200+ level
Exclusion: SOC339H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

SOC370H1 - Immigration and Employment

Previous Course Number: SOC439H1
Hours: 24L

This course examines the labour market and employment situation of immigrants emphasizing recent Canadian experience in comparative context. Topics include immigrant human capital, declining immigrant earnings, immigrant skill-underutilization, impact of the knowledge economy, racial discrimination, labour market structure and unionization, immigrant entrepreneurship and experiences of the Canadian-born second generation.

Prerequisite: 1.0 SOC FCE at the 200+ level
Exclusion: SOC319H1
Recommended Preparation: SOC317Y1 or SOC336H1 or SOC366H1 or SOC383H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

SOC371H1 - Comparative Political Sociology

Hours: 24L

The study of comparative (historical and cross-national) variation in outcomes that are the subject of research by political sociologists.

Prerequisite: 1.0 SOC FCE at the 200+ level
Exclusion: SOC340H1
Recommended Preparation: SOC260H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

SOC372H1 - Transnational Asia

Previous Course Number: SOC395H1
Hours: 24L

This course approaches Asia from a transnational perspective to enhance our understanding of the complexities involved in Asia’s contemporary transformations. By departing from traditional nation-state-oriented analyses, this class explores how Asia shapes and is shaped by trans-Pacific politics, war and colonial legacies, global capitalism, labor migration, international norms of citizenship, urban development, and flows of ideas and popular culture. By closely examining Asia’s transnational interconnectedness, we question the prevalent notion of Asia and regional studies and highlight the contradictions and challenges Asia faces in its political, economic, social, and cultural spheres. This critical approach is expected to offer a deeper investigation of Asia in and of itself while critiquing dominant assumptions and frameworks found in existing approaches to Asia.

Prerequisite: 1.0 SOC FCE at the 200+ level
Exclusion: SOC336H1; SOC351H1 (New Topics in Sociology: Transnational Asia), offered in Winter 2019; SOC395H1 (New Topics in Sociology: Transnational Asia), offered in Fall 2019
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)
SOC373H1 - Deconstructing 'Muslim American' - Race, Nationalism, and Religion

Previous Course Number: SOC352H1
Hours: 24L/12T

Since the 2016 U.S. presidential election, Muslim Americans have once again been cast as both threatening "outsiders" as well as examples of what makes the United States a "nation of immigrants." What do these contestations teach us about how race, nationalism, and globalization shape immigrant identities? Taking Muslim Americans as a case study, this course will examine a range of topics, from everyday boundary-making to ongoing global politics pertaining to different Muslim groups in the United States, often drawing comparison with Muslims in other Western countries. More broadly, the course aims to unpack how various global and local/national forces shape the contours, dimensions, and meanings attached to an identity category. To that end, the course begins with some prominent sociological theories, such as intersectionality, double-consciousness, and Orientalism. We will apply these theoretical lenses to analyze issues of race, globalization, cultural citizenship, media representation, and political integration in Muslim American and immigrant experiences.

Prerequisite: 1.0 SOC FCE at the 200+ level
Exclusion: SOC349H1; SOC394H1 (New Topics in Sociology: Deconstructing "Muslim American" - Race, Nationalism and Religion), offered in Winter 2019; SOC352H1 (New Topics in Sociology: Deconstructing "Muslim American" - Race, Nationalism and Religion), offered in Winter 2020
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

SOC381H1 - Culture and Inequality

Hours: 24L

How location in socioeconomic, ethnic, gender, and generational groups shapes individual cultural repertoires; how culture affects individual positions in stratification hierarchies; and the role of culture in group boundaries and struggles.

Prerequisite: 1.0 SOC FCE at the 200+ level
Exclusion: SOC281H1; SOC348H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

SOC383H1 - The Sociology of Women and International Migration

Hours: 24L

Examines the international migration of women in postindustrial economies with emphasis on Canada. Topics include: theories of female migration; the impacts of immigration policies; migration trends and entry status; integration issues pertaining to family, language knowledge, citizenship and economic status; labour market barriers and public policy considerations.

Prerequisite: 1.0 SOC FCE at the 200+ level
Exclusion: SOC342H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

SOC384H1 - Neighbourhoods & Communities in Canada

Hours: 24L

Uses recent and historical data to demonstrate the changing social characteristics of local neighbourhoods and larger communities, as these have been affected by industrialization, immigration and other factors and as they affect the life chances of their residents. Provides students with active learning experiences through research activities using Census data.

Prerequisite: 1.0 SOC FCE at the 200+ level
Exclusion: SOC343H1
Recommended Preparation: SOC202H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

SOC386H1 - New Topics in Sociology

An opportunity to explore new topics in sociology. Topics vary from year to year based on the instructor. Consult the Departmental website: http://sociology.utoronto.ca/st-george-campus/courses-3/new-topics-in-so...

Prerequisite: 1.0 SOC FCE at the 200+ level
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)
**SOC387H1 - New Topics in Sociology**

**Hours:** 24L

**Prerequisite:** 1.0 SOC FCE at the 200+ level

**Distribution Requirements:** Social Science

**Breadth Requirements:** Society and its Institutions (3)

---

**SOC388H1 - Sociology of Everyday Life**

**Hours:** 24L

This course explores the phenomenological and organizational foundation of everyday experience. It focuses on the structure and social interactions that shape everyday life, and explains the social order that makes everyday life seem smooth and relatively effortless. The course offers experience in qualitative research and writing.

**Prerequisite:** 1.0 SOC FCE at the 200+ level

**Exclusion:** SOC344H1

**Distribution Requirements:** Social Science

**Breadth Requirements:** Society and its Institutions (3)

---

**SOC390Y1 - Independent Research**

Independent Research courses allow students to pursue a specific topic of interest. These courses are offered at the 300-level, as full or half courses. Students work independently with a professor in the Department who acts as research supervisor. There are no formal class meetings, lectures, or readings other than what is agreed to with the supervisor. Professors accept supervisory responsibility at their discretion. They are not required to serve as research supervisors. It is recommended that students approach a professor working in the same sub-discipline of sociology. Often students become interested in a topic through a SOC course and approach the instructor of that course for supervision; however, this is not required.

**Prerequisite:** Students must have completed 10.0 courses towards their degree, plus a SOC course at the 300+ level to be eligible for 300-level Independent Research.

**Distribution Requirements:** Social Science

**Breadth Requirements:** Society and its Institutions (3)

---

**SOC392H1 - Independent Research**

Independent Research courses allow students to pursue a specific topic of interest. These courses are offered at the 300-level, as full or half courses. SOC399Y1 - Research Opportunity Program
Credit course for supervised participation in faculty research project. Details at https://www.artsci.utoronto.ca/current/academics/research-opportunities/research-opportunities-program. Not eligible for CR/NCR option.
SOC408H1 - Advanced Studies in Organizations

Previous Course Number: SOC489H1
Hours: 24L

This course covers central issues in the field of organizational sociology. It explores different perspectives on why complex organizations look and operate the way that they do, and examines the social consequences of their behavior. The first part of the course focuses on the evolution of the modern firm. We will trace the history of different models of management and strategy, and evaluate their relative efficacy. The second part of the course examines how organizations shape, and are shaped by, their environments. The third part of the course will explore how organizational behavior influences social inequality, and how social inequality shapes the way that modern organizations function. We will make use of both social scientific analyses and Harvard Business School case studies. Restricted to 4th-year sociology majors and specialists.

Prerequisite: 1.0 SOC FCE at the 300+ level
Exclusion: SOC489H1 (Topics: Sociology of Organizations), offered in Fall 2017 and Fall 2019
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

SOC409H1 - Sexuality and Research Design

Previous Course Number: SOC485H1
Hours: 24L

Research designs are much like jigsaw puzzles, but harder: they require scholars to carefully connect a variety of distinct yet intricately linked pieces into a thematically consistent, practical and defensible whole. Few tasks in the research process are as commonplace and as riddled with difficulty. This semester length course will provide a forum for students to compose a research design on the topic of sexuality using qualitative approaches that include in-depth interview and ethnography. Throughout the course, students will read a variety of works that describe the goals, procedures, and underlying logic of research design. These works will draw from articles and chapters on methodological problems and issues, and also from actual studies that use in-depth interview and ethnography in sexuality studies. Restricted to 4th-year sociology majors and specialists.

Prerequisite: 1.0 SOC FCE at the 300+ level
Exclusion: SOC485H1 (Topics: Sexuality of Research Design), offered in Fall 2017, Winter 2019, Fall 2019, SOC497H1 (Topics: Sexuality of Research Design), offered in Fall 2016
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

SOC412H1 - Medicalization of Deviance

Hours: 24L

This course examines the sociological implications associated with the growing dominance of psychiatry over designating and managing the margins of ‘normality’ and ‘deviance.’ It covers the evolution of the DSM and rise of deinstitutionalization, the importance of stigma and symbolic interactionist understandings of psychiatric diagnoses, and the methods of social control used to mitigate risk and reduce social deviance within the psychiatric and criminal justice systems. Emphasis will be placed on understanding the social implications of mental health labels. Restricted to 4th-year sociology majors and specialists.

Prerequisite: 1.0 SOC FCE at the 300+ level
Recommended Preparation: SOC313H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

SOC413H1 - Sociology of Punishment

Hours: 24L

This course considers the history of penology, theories of penal development and current trends. Particular attention will be paid to cross-national variations in punishment and what these reveal about the relevance of particular theories and the importance of culture in understanding historical developments in punishment. Restricted to 4th-year sociology majors and specialists.

Prerequisite: 1.0 SOC FCE at the 300+ level
Exclusion: WDW340H1
Recommended Preparation: SOC313H1 or SOC315H1 or SOC212H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

SOC422H1 - Advanced Studies in Political Sociology

Hours: 24L

This fourth year course will provide an advanced treatment of selected topics in political Sociology. Specific topics to be covered are the relationship between political systems and cleavage voting, the relationship between social class and attitudes and voting, the post-materialist thesis, social capital and civic participation, gender politics, the various varieties, causes and effects of welfare states, and social movements. The course will have both a Canadian and international focus. Restricted to 4th-year sociology majors and specialists.

Prerequisite: 1.0 SOC FCE at the 300+ level
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)
SOC427H1 - Families and Health

Hours: 24L

Examines the competing theoretical, policy and therapeutic responses to a variety of family health problems, including addictions, chronic physical illnesses, and mental illness, as well as the effects of illness on family life and family coping. The links between theory and practice provide the basis for discussion of knowledge transfer. Restricted to 4th-year sociology majors and specialists.

Prerequisite: 1.0 SOC FCE at the 300+ level
Recommended Preparation: SOC314H1 or SOC363H1 or SOC364H1 or SOC478H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

SOC448H1 - Sociology & Emotions

Hours: 24L

From social cohesion to intergroup violence, emotional processes influence social outcomes. Moral aspects of experience in particular are linked to emotions such as shame and pride. Students in this course will review major theories of, and a variety of empirical approaches to, the link between social and emotional processes. They will be encouraged to extend ideas and analyses in the published literature to new topics. Restricted to 4th-year sociology majors and specialists.

Prerequisite: 1.0 SOC FCE at the 300+ level (preferably selected from the Recommended Preparation list for this course)
Recommended Preparation: SOC313H1 or SOC355H1 or SOC362H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

SOC455H1 - Researching from a Social Network Perspective

Hours: 24L

The course will cover methods for analyzing social network data and familiarize students with software created for working with these data. Each student will complete an empirical research project. Restricted to 4th-year sociology majors and specialists.

Prerequisite: 1.0 SOC FCE at the 300+ level
Recommended Preparation: SOC357H1 or SOC388H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

SOC460H1 - Global Inequalities and Contentious Politics

Previous Course Number: SOC495H1
Hours: 24L

Global Inequality and Contentious Politics: This is a seminar course designed to understand global inequalities and contentious politics. Inequality has been one of the primary subjects in sociological inquiries and its scope naturally expands to a global dimension as our societies are increasingly shaped by international connections. This seminar focuses on understanding various manifestations of global inequalities intersected by international hierarchy, race, gender, and class. Yet, these divisions and injustices are neither static nor unchallenged as people react to these realities via divergent methods. This class will read major theoretical approaches to social movements and examine contentious mobilizations taking place in different geographies around the world to reshape the global order ridden with disparities. Empirical cases of contentious activism include anti-globalization protest, the Occupy movement, campaigns for migrant care workers, resistance against American military bases, and the Me Too movement. Restricted to 4th-year sociology majors and specialists.

Prerequisite: 1.0 SOC FCE at the 300+ level
Exclusion: SOC494H1 (Topics: Global Inequalities and Contentious Politics), offered in Winter 2019, SOC495H1 (Topics: Global Inequalities and Contentious Politics), offered in Winter 2020
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

SOC463H1 - Mental Health and Education

Previous Course Number: SOC493H1
Hours: 24L

In this course, we examine institutions of higher education as unique social contexts within which student mental health unfolds. In doing so, we will address mediating and moderating factors, which characterize the unique and varied socio-emotional experiences of students attending post-secondary. As such, we will distinguish and clarify social approaches to studying mental health – focusing on mentorship, funding, social support, academic demands and healthcare resources – from mental illness as characterized in medical disciplines. Students will be expected to read thoroughly and apply insights from the course to authentic mental health concerns facing institutions of higher education today. Restricted to 4th-year sociology majors and specialists.

Prerequisite: 1.0 SOC FCE at the 300+ level
Exclusion: SOC493H1 (Topics: Mental Health and Education), offered in Fall 2018 and Winter 2020
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)
SOC465H1 - Advanced Studies in Gender

Hours: 24L

This course explores major questions about the nature of gender and gender inequality. The course requires a careful review of key theoretical and empirical work addressing one of these questions and the completion of a research project. Restricted to 4th-year sociology majors and specialists.

Prerequisite: 1.0 SOC FCE at the 300+ level.
Recommended Preparation: SOC214H1 or SOC366H1 or SOC367H1 or SOC365H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

SOC478H1 - Social Context of Public Policy

Hours: 24L

This course explores how policy processes and frameworks need to be evaluated in light of the social context in which they are developed. Factors to be considered include the interplay between public values and expectations and public policy; the implications of cultural diversity and demographic change, and understandings of ethical principles of conduct in public organizations. A related goal is to help students learn how to use empirical research to answer highly contested issues in policy circles and in public life. These objectives are pursued by introducing students to major trends in inequality in Canada, assessing these trends within a comparative context, reflecting on their normative implications, and examining alternative policy responses to these developments. Restricted to 4th-year sociology majors and specialists.

Prerequisite: 1.0 SOC FCE at the 300+ level.
Recommended Preparation: SOC303H1 or SOC304H1 or SOC314H1 or SOC363H1 or SOC364H1 or SOC365H1 or SOC371H1 or SOC383H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

SOC479H1 - Advanced Studies in Social Movements

Hours: 24L

This course focuses on current debates and research findings in the study of social movements. Restricted to 4th-year sociology majors and specialists.

Prerequisite: 1.0 SOC FCE at the 300+ level (preferably selected from the Recommended Preparation list for this course)
Exclusion: SOC484H1
Recommended Preparation: SOC371H1 or SOC478H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

SOC481H1 - Culture and Social Networks

Hours: 24L

Relationships between various forms of culture and the networks connecting both individual people and organizations creating culture. Restricted to 4th-year sociology majors and specialists.

Prerequisite: 1.0 SOC FCE at the 300+ level (preferably selected from the Recommended Preparation list for this course)
Recommended Preparation: SOC355H1 or SOC382H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

SOC483H1 - Culture and Cognition

Hours: 24L

This course examines the social foundations of thinking and action, with a focus on how individuals think and act through shared cognitive schemas that are embedded in larger social structures. The course is organized around a wide-ranging array of classical and contemporary theories that help explain the various factors that shape culture and cognition. There is a research component to put this analytical understanding into practice. Restricted to 4th-year sociology majors and specialists.

Prerequisite: 1.0 SOC FCE at the 300+ level
Exclusion: SOC483Y1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

SOC484H1 - Children of Immigrants

Hours: 24L

Nearly one-quarter of Canada's population are immigrant offspring, defined as those who immigrate as children or those who are Canadian born with foreign born parents. This course examines sociological perspectives, language and bilingualism, racial and ethnic identities, family structure and relationships, marriage, education and labour market experiences of immigrant offspring. Restricted to 4th-year sociology majors and specialists.

Prerequisite: 1.0 SOC FCE at the 300+ level (preferably selected from the Recommended Preparation list for this course)
Recommended Preparation: SOC303H1 or SOC304H1 or SOC305H1 or SOC314H1 or SOC383H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)
SOC485H1 - New Topics in Sociology
An opportunity to explore new topics in sociology. Topics vary from year to year based on the instructor. Consult the Departmental website: http://sociology.utoronto.ca/st-george-campus/courses-3/new-topics-in-sociology/. Restricted to 4th-year sociology majors and specialists.

Prerequisite: 1.0 SOC FCE at the 300+ level
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

SOC486H1 - Advanced Topics in Urban Sociology
Hours: 24L

This course offers real world observation and abundant examples that speak to the strengths and limitations of particular theory, data, and methods for studying urban problems. Students undertake a supervised research project that involves identifying, observing and reflecting on real phenomena in the urban environment. Restricted to 4th-year sociology specialists and majors.

Prerequisite: 1.0 SOC FCE at the 300+ level
Recommended Preparation: SOC312H1 or SOC364H1 or SOC384H1 or SOC205H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

SOC488H1 - Mental Health over the Life Course
Hours: 24L

This course is a research-based exploration of mental health at all stages of life, from birth to death. It emphasizes the long-term consequences for mental health of childhood adversities and disadvantage, major life transitions, and turning points in the life course. Restricted to 4th-year sociology majors and specialists.

Prerequisite: 1.0 SOC FCE at the 300+ level
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

SOC489H1 - New Topics in Sociology
An opportunity to explore new topics in sociology. Topics vary from year to year based on the instructor. Restricted to 4th-year sociology majors and specialists. Consult the Departmental website: http://sociology.utoronto.ca/st-george-campus/courses-3/new-topics-in-sociology/.

Prerequisite: 1.0 SOC FCE at the 300+ level
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

SOC490Y1 - Independent Research
Independent Research courses allow students to pursue a specific topic of interest. These courses are offered at the 400-level, as full or half courses. Students work independently with a professor in the Department who acts as research supervisor. There are no formal class meetings, lectures, or readings other than what is agreed to with the supervisor. Professors accept supervisory responsibility at their discretion. They are not required to serve as research supervisors. It is recommended that students approach a professor working in the same sub-discipline of sociology. Often students become interested in a topic through a SOC course and approach the instructor of that course for supervision; however, this is not required. Not eligible for CR/NCR option. For further details, please visit our website at: http://sociology.utoronto.ca/st-george-campus/courses-3/independent-research-course/

Prerequisite: Students must have completed 15.0 courses towards their degree, plus a SOC course at the 300+ level to be eligible for 400-level Independent Research.
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

SOC491H1 - Independent Research
Independent Research courses allow students to pursue a specific topic of interest. These courses are offered at the 400-level, as full or half courses. Students work independently with a professor in the Department who acts as research supervisor. There are no formal class meetings, lectures, or readings other than what is agreed to with the supervisor. Professors accept supervisory responsibility at their discretion. They are not required to serve as research supervisors. It is recommended that students approach a professor working in the same sub-discipline of sociology. Often students become interested in a topic through a SOC course and approach the instructor of that course for supervision; however, this is not required. Not eligible for CR/NCR option. For further details, please visit our website at: http://sociology.utoronto.ca/st-george-campus/courses-3/independent-research-course/

Prerequisite: Students must have completed 15.0 courses towards their degree, plus a SOC course at the 300+ level to be eligible for 400-level Independent Research.
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)
SOC492H1 - Independent Research

Independent Research courses allow students to pursue a specific topic of interest. These courses are offered at the 400-level, as full or half courses. Students work independently with a professor in the Department who acts as research supervisor. There are no formal class meetings, lectures, or readings other than what is agreed to with the supervisor. Professors accept supervisory responsibility at their discretion. They are not required to serve as research supervisors. It is recommended that students approach a professor working in the same sub-discipline of sociology. South Asian Studies

Students study South Asia in an approach attentive to global formations. They are introduced to the study of South Asia—Bangladesh, India, Pakistan, Nepal, Sri Lanka—through a wide angle view of Asian modernities, political economies, and cultures, all the while delving into to specialist close-ups of South Asia. With open access to comparative courses in the Contemporary Asian Studies program, students can learn from specialists in South, East, and Southeast Asia.

With a curriculum motivated by the moving present—the changing face of South Asia today—the South Asian Studies minor offers rigorous training in major debates and questions in the rich field of South Asian Studies, and provides a basic foundation for many directions of future study. From historical contexts of ethnic conflict, to postcolonial readings of ancient traditions, to the politics of religious and ethnic identities, to the workings of vast-scale democracy and capitalism, to the worlds of cinema and public culture, students are exposed to the dynamic landscapes—political, material, and mythic—that constitute South Asia today.

Students may also be interested in the closely connected Contemporary Asian Studies program.

South Asian Studies Programs

South Asian Studies Minor (Arts Program) - ASMIN1333

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

(4 full courses or their equivalent)

1. SAS114H1
2. 1.0 FCE in 200 level CAS courses (CAS200H1, CAS201H1, CAS202H1)
3. SAS318H1 or HIS282Y1
4. 0.5 FCE in 300 level CAS courses
5. Additional 1.0 or 1.5 FCEs (as necessary to total 4.0 FCEs in minor) from the list of eligible courses found below.

Courses Eligible for Program Credit

In addition to SAS courses and CAS courses with significant South Asia content, students may choose from the following courses as electives. For full course descriptions, please check with the sponsoring departments. Not all electives are offered every year. Students are responsible for checking co- and pre-requisites for all elective courses as well as priority controls. Students who wish to count courses towards the program that are not listed here (including U of T courses and transfer credits) must seek permission from the program director in advance. Course approval is not guaranteed and will be given at the discretion of the program director. Please consult the program advisor at ai.asianstudies@utoronto.ca with questions.

- CDN230H1: Asian Canadian History
- ENG369H1: South Asian Literatures in English
- FAH364H1: Visual South Asia*

- RLG472H1: Religion and Aesthetics in South Asia
- SOC219H1: Asian Communities in Canada
- SMC456H1: Indian Christianity

*Courses for which South Asian Studies students have priority enrolment
South Asian Studies Courses

SAS114H1 - Introduction to South Asian Studies

Previous Course Number: SAS114Y1
Hours: 24L

An interdisciplinary introduction to South Asian Studies emphasizing inquiry and critical analysis, drawing attention to the specificities of individual nations as well as the factors (historical, political, economic and cultural) that define South Asia as a region. Some attention will be paid to the South Asian Diaspora.

Exclusion: NEW114Y1, SAS114Y1
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

CAS200H1 - Introduction to Contemporary Asian Studies

Hours: 24L

This course is an introduction to Contemporary Asian Studies. It covers detailed case study material from South Asia, Southeast Asia, and East Asia. It introduces students to the interdisciplinary study of political, sociocultural and economic interactions among these regions, as well as the transnational forces shaping internal dynamics throughout Asia. In addition, it examines the ways that forces stemming from Asia are affecting global processes, pushing scholarship to engage questions about colonialism, nationalism, "race," religion, markets, urbanization, migration, and mass mediated culture. This course provides preparation for more advanced courses on Asia and globalization and provides an introductory gateway for the Contemporary Asian Studies major and minor. May be taken in the first year of studies.

Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

CAS201H1 - Global Asian Studies: Insights and Concepts

Previous Course Number: CAS200Y1
Hours: 24L

This course addresses Asia empirically in contemporary global formations and as an idea in the global imagination. It introduces students to concepts and theories central to scholarship on Asia and its transnational formations. It provides foundational theoretical and conceptual material to understand global issues as they play out in the politics, economies, cultures and contemporary social worlds of contemporary Asian sites. Interdisciplinary analytical and research concepts are introduced to provide area studies grounding. This course provides preparation to delve into deeper research on Asia connected to broad questions about the natures of democracy, authoritarianism, market formation, social justice, and the media of cultural expression. It informs students aiming to take more advanced courses on Asia and globalization and provides one part of the foundation for the Contemporary Asian Studies major and minor. CAS201H1 introduces the theoretical and conceptual frameworks that are explored through further grounded empirical case studies in upper year CAS courses.

Exclusion: CAS200Y1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

CAS202H1 - Global Asian Studies: Sites and Practices

Previous Course Number: CAS200Y1
Hours: 24L

This interdisciplinary course explores a variety of sites and topics in South, Southeast, and East Asia. It explores themes including contemporary and historical articulations of socio-economic development, (post)colonial political formations, urbanization processes, climate change, labour struggles, gender studies, migration, citizenship, and social justice. The course examines the diversity of Asian modernities, cross-regional linkages, and changing approaches to area studies over time. It provides a foundation for the Contemporary Asian Studies major and minor, preparing students for taking more advanced courses on Asia in the global context.

Exclusion: CAS200Y1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)
CAS310H1 - Comparative Colonialisms in Asia

Hours: 24L

This course analyzes the impact of colonialism in South, East, and Southeast Asia and the various ways in which pre-colonial traditions intersect with and reshape colonial and postcolonial processes across the various regions of Asia. The course will examine the conjunctures of economy, politics, religion, education, ethnicity, gender, and caste, as these have played out over time in the making and re-making of Asia as both idea and place. Attention will be paid to postcolonial and indigenous theories, questions of ‘the colonial’ from the perspective of Asian Studies, and debates about the meaning of postcolonialism for the study of Asia now and in the future.

Prerequisite: 0.5 FCE in 200 level CAS courses
Distribution Requirements: Humanities; Social Science
Breadth Requirements: Society and its Institutions (3)

SAS318H1 - Colonialism and Tradition

Hours: 24L

This course analyzes the impact of colonialism in South Asia and the various ways in which tradition intersects with and has reshaped colonialism in postcolonial South Asia. The course will examine the role of religion, education, ethnicity, gender, and caste. Some attention will be paid to postcolonial and indigenous theory.

Prerequisite: At least 6 FCEs
Recommended Preparation: SAS114H1
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

CAS320H1 - Comparative Modernities in Asia

Hours: 24L

Since at least the late 1700s, the effects of capitalism across the globe have profoundly transformed the landscapes of human livelihood, consumption, production and governance in Asia. While colonial empires have declined, new empires have emerged, and a growing number of countries have witnessed the rise of nationalism and independent states, social, political and technological revolutions, and most recently neoliberal globalization. This course theorizes and explores these dramatic changes in a comparative framework. It is aimed at students wishing to better understand the great transformations of modern Asia in a global context.

Prerequisite: 0.5 FCE in 200 level CAS courses
Recommended Preparation: CAS202H1
Distribution Requirements: Humanities; Social Science
Breadth Requirements: Society and its Institutions (3)

CAS3350H1 - Asian Youth Cultures

Hours: 24L

In focusing on youth in Asia, this course brings together two disputed cultural formations of substantial contemporary importance. Both youth and Asia are increasingly invoked on the global stage in support of a wide range of interests. Examining practices of young people and the idea of youth in the context of Asia requires critical attention to the promises and fears that attach to the rise of Asian economies, international demographic transitions, the growth of a global middle-class, increasing consumption disparities, changing immigration patterns, expanding technological skills, global/local environmental concerns, and young people’s shifting political priorities and loyalties. The course may feature a significant amount of social theory, with authors such as Michel Foucault, Roland Barthes, Louis Althusser, and Stuart Hall.

Prerequisite: Minimum of 6 FCEs
Recommended Preparation: 0.5 FCE in 200 level CAS courses
Distribution Requirements: Humanities; Social Science
Breadth Requirements: Creative and Cultural Representations (1)

CAS360H1 - Asian Genders

Hours: 24L

This course will explore ways that gender is mobilized and produced in parts of Asia. It seeks to understand gender and sexuality in their diversity and in attempts to “fix” or locate it in various bodies and places. Attempts will be made to see how gender is made knowable in terms of sexuality, medicine, nation, class, ethnicity, religion, and other discourses. The course assumes a willingness to read challenging theory – such as the writings of Judith Butler, Michel Foucault, and Eve Sedgwick – and asks that students commit to regular attendance.

Prerequisite: Minimum of 6 FCEs
Recommended Preparation: 0.5 FCE in 200 level CAS courses
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

CAS370H1 - Asian Cities

Hours: 24L

This course offers a multidisciplinary perspective of urban life in Asia. The thematic focus will be on how the urban intersects with modernities and postcolonial formations. Drawing on recent scholarship in the social sciences and the humanities, we will examine the realignment of cultural, political, and economic forces associated with Asia’s diverse processes of urbanization.

Prerequisite: Minimum of 6 FCEs
Recommended Preparation: 0.5 FCE in 200 level CAS courses
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)
CAS390H1 - Special Topics

Hours: 24L

Course content varies in accordance with the interest of the instructor. Check [http://munkschool.utoronto.ca/ai/cas](http://munkschool.utoronto.ca/ai/cas) for an updated description.

**Prerequisite:** Minimum of 6 FCEs

**Recommended Preparation:** 0.5 FCE in 200 level CAS courses

**Distribution Requirements:** Social Science

SAS390H1 - Special Topics in South Asian Studies

Hours: 24L

Course content varies in accordance with the interest of the instructor.

**Prerequisite:** SAS114H1 and at least 9 FCEs, or permission from the instructor.

**Distribution Requirements:** Humanities

CAS393H1 - Independent Research

Supervised independent research on a topic agreed on by the student and supervisor before enrolment in the course. Open to advanced students with a strong background in contemporary Asian studies. A maximum of one year of Independent Research courses is allowed per program. Contact hours with the supervisor may vary, but typically comprise of one hour per week. Not eligible for CR/NCR option.

**Prerequisite:** At least 10 FCEs, permission from Program Director

CAS393Y1 - Independent Research

Supervised independent research on a topic agreed on by the student and supervisor before enrolment in the course. Open to advanced students with a strong background in contemporary Asian studies. A maximum of one year of Independent Research courses is allowed per program. Contact hours with the supervisor may vary, but typically comprise of one hour per week. Not eligible for CR/NCR option.

**Prerequisite:** At least 10 FCEs, permission from Program Director

**Distribution Requirements:** Social Science

CAS400H1 - Interdisciplinary Research in Methods in Contemporary Asian Studies

Hours: 24S

This seminar addresses Asian worlds – in Asia, transnationally, and locally – to cultivate new approaches to global processes and problems. The course explores key Asian sites that open new configurations for studying interactions between economic/environmental development, political change, and migration and cultural politics. It provides an advanced and systematic overview of the research methodologies that students have been exposed to throughout the CAS program. These include historical-archival, ethnographic, visual/media, and statistical/quantitative methods that allow us to map Asian political, economic, and cultural formations, and through them, global challenges. The seminar builds interdisciplinary conversations attentive to both critical problematizing and problem-solving, to qualitative and applied projects. It is the required capstone to the Contemporary Asian Studies major.

**Prerequisite:** 1.0 FCE in 200 level CAS courses; 1.0 FCE in 300 level CAS courses

**Exclusion:** CAS400Y1

**Distribution Requirements:** Social Science

**Breadth Requirements:** Society and its Institutions (3)

CAS414H1 - Public Culture and Media in Asia

Hours: 24S

This upper-level seminar will introduce students to the interdisciplinary study of popular culture and mass-mediated cultural forms in Asia. Through readings about popular protest, festivals, cinema, print, television, and music this course provides methodological tools to interpret the politics of representation and the formation of alternative modernities in the Asian continent and among the diaspora. The course will furthermore familiarize students with a range of theoretical lenses for conceptualizing the different meanings of the public from a modern Asian perspective.

**Prerequisite:** At least 14 FCEs

**Exclusion:** NEW414H1, SAS414H1

**Recommended Preparation:** 1.0 FCE in 200 level CAS courses; 1.0 FCE in 300 level CAS courses

**Distribution Requirements:** Social Science

**Breadth Requirements:** Creative and Cultural Representations (1)
CAS420H1 - Asia and the New Global Economy

Previous Course Number: JPA420H1
Hours: 24S

This course explores the rise of Asia and its integration into the new global economy (labor, capitalism, knowledge economy, economic nationalism, inequality, gender, the meaning of capitalism, democracy, among others), exposing students to diverse disciplinary perspectives. Geographical coverage is pan-Asian, including East, Southeast and South Asia.

Prerequisite: At least 14 FCEs
Exclusion: JPA420H1
Recommended Preparation: 1.0 FCE in 200 level CAS courses; 1.0 FCE in 300 level CAS courses
Distribution Requirements: Humanities; Social Science
Breadth Requirements: Society and its Institutions (3)

CAS430H1 - Nationalism and Revolution in Asia

Hours: 24L

This course explores the far-reaching social, political, and cultural transformations in modern East, Southeast, and South Asia, focusing on the twentieth-century revolutionary histories and struggles to establish modern nation-states. The course adopts a topical approach within a chronological and comparative framework to highlight major historical movements and theoretical issues significant to the Asian experience.

Prerequisite: At least 14 FCEs
Exclusion: HIS382H1, ASI430H1
Recommended Preparation: 1.0 FCE in 200 level CAS courses; 1.0 FCE in 300 level CAS courses
Distribution Requirements: Humanities; Social Science
Breadth Requirements: Society and its Institutions (3)

CAS450H1 - Asian Pathways Research Practice

Hours: 24S

This seminar builds on the systematic overview of research methodologies of the Contemporary Asian Studies major and its capstone course, CAS400H1. CAS450H1 provides students with the opportunity to research questions of contemporary relevance stemming from Asia and its transnational networks and communities. Addressing a range of methodologies, including historical-archival, ethnographic, visual/media, and statistical/quantitative, the course emphasizes research experience outside the classroom, in Asia as well as locally with communities in Toronto. Students will develop their own research contributions while working collaboratively.

Prerequisite: At least 14 FCEs, including 1.0 FCE in 200 level CAS courses and 1.0 FCE in 300 level CAS courses
Exclusion: CAS400Y1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

CAS498H1 - Independent Research

Supervised independent research on a topic agreed on by the student and supervisor before enrolment in the course. Open to advanced students with a strong background in contemporary Asian studies. A maximum of one year of Independent Research courses is allowed per program. Contact hours with the supervisor may vary, but typically comprise of one hour per week. Not eligible for CR/NCR option.

Prerequisite: At least 14 FCEs including CAS200Y1/(CAS201H1 and CAS202H1), CAS310H1; enrolment in the Contemporary Asian Studies major or minor, and permission from the Program Director
Recommended Preparation: CAS320H1
Distribution Requirements: Social Science

CAS498Y1 - Independent Research

Supervised independent research on a topic agreed on by the student and supervisor before enrolment in the course. Open to advanced students with a strong background in contemporary Asian studies. A maximum of one year of Independent Research courses is allowed per program. Contact hours with the supervisor may vary, but typically comprise of one hour per week. Not eligible for CR/NCR option.

Prerequisite: At least 14 FCEs including 1.0 FCE in 200 level CAS courses, 1.0 FCE in 300 level CAS courses, enrolment in the Contemporary Asian Studies major or minor, and permission from the Program Director
Distribution Requirements: Social Science

Introduction

Overview:

Spanish is the most widely spoken language of the Americas, with 130 million speakers in North America alone, more than 400 million worldwide, and with growing numbers in Canada. It is the fourth most widely spoken language in the world, and it is the official language in 21 countries on three continents: Europe, Africa, and Latin America.

Spanish opens the door to the study of a rich range of cultural expressions in literature, film, and art, from medieval and early modern Transatlantic world, to the literary and cultural productions of contemporary Spanish and Spanish American societies. The department offers a wide selection of courses at the introductory (second year), intermediate (third year) and advanced (fourth year) level in literature, culture, and linguistics. Students are encouraged to complement and expand on the training they receive in these courses by taking courses in other academic units. By the time of their graduation, our students acquire skills to read analytically fictional and non-fictional, literary and visual texts. They thus gain a deep knowledge of Hispanic cultures, as well as the skills to reflect critically on the world in which they live.

Spanish also opens the door to the study of the Romance language family. The Department offers students the opportunity to advance their language skills through the systematic reflection on the language structure, from the sound system to the morphology and syntax. Through a variety of courses with a theoretical and experimental focus in linguistics, students acquire basic skills that can be transferred to teaching or research programs. Through collaboration with other language and linguistics programs, students are provided with opportunities and training to conduct research in linguistics with a focus on the Spanish language.

What can I do with a degree in Spanish?

Plenty! Spanish is recognized as one of the four United Nations official languages. A degree in Spanish linguistics, literature, and culture opens up career paths both domestically and internationally. The skills that students acquire through the study of Spanish and of the Spanish-speaking world either prepare them directly for or are an asset in some of the following fields:

- media, journalism, marketing, public relations;
- domestic government services and NGOs; foreign services and foreign affairs specialist; international development; political aid,
- commerce, finances, tourism, and hospitality
- postgraduate studies and academic careers; cultural work
- editing, publishing, translation, education
- library and information sciences
- careers in the health profession, including medicine, speech pathology and audiology
- computational linguistics, speech recognition, and synthesis

For the Portuguese component, see under “Portuguese Program” in this Calendar.

For further information, please contact us in the Department of Spanish and Portuguese, Victoria College, Room 208.

- Website: http://spanport.utoronto.ca/
- Telephone: (416) 813-4080
- Email: spanport@chass.utoronto.ca
- Associate Chair, Undergraduate Studies: (416) 813-4082
  - Email: spanport.undergraduate@utoronto.ca

The Department offers Specialist, Major and Minor programs, as well as language citation certificate.

How is the program structured?

For many students, our program begins with the language sequence.

Language sequence:

1. The Department reserves the right to place students in the language course best suited to their linguistic preparation.

2. Students who, in the department’s assessment, have adequate knowledge of Spanish may be required to take Spanish literature,
culture or linguistics course instead of a language course at any level.

The progression of courses in the language sequence is designed to accommodate a wide range of previous language experience. Students are placed in the appropriate language course based on their proficiency, as determined by the online placement test and departmental assessment.

Placement test:

Students who have studied Spanish before joining the department should take the on-line placement test by going to the following link:

http://spanport.utoronto.ca/undergraduate/spanish

Please, read carefully the instructions that explain how to take the test. The placement test can be taken only once.

If you cannot assess your placement level from the available information, please contact the Associate Chair, Undergraduate Studies and you will receive personal advice for placement in the language sequence.

Students with no previous knowledge of Spanish: enroll in SPA100Y1.

The recommended sequence of language courses for those students who have had little or no previous training in the language is the following:

SPA100Y1 > SPA220Y1 > SPA320Y1 > SPA420H1

Students with previous knowledge of Spanish: take the placement test.

Students who have studied Spanish before joining the department may enroll in several courses – beginners’ intermediate or advanced – depending on their background and their level of preparation. This includes those students who have traveled or lived briefly in the Spanish-speaking world.

The recommended sequence of language courses for those students who join the department having mastered a beginner’s level of Spanish, including those who successfully completed SPA100Y1, is the following:

SPA220Y1 > SPA320Y1 > SPA420H1

The recommended sequence of language courses for those students who join the department having mastered an intermediate level of Spanish, including those who have successfully completed SPA220Y1, is the following:

SPA320Y1 > SPA420H1

Native or bilingual speakers of Spanish:

Those students who have native fluency in Spanish because they have had a life-long exposure to spoken Spanish in an informal context (i.e., those who have lived in a Spanish-speaking country, or those who live in a Spanish-speaking family) – should enroll in SPA219Y1. Students who qualify for this course have distinctly different learning needs than those students who learned Spanish as a foreign language. They have a native knowledge of the language and are able to understand and speak Spanish, but they have had little or no exposure to written Spanish. The recommended language sequence for such students is the following: SPA219Y1 > SPA420H1

Students who have completed the equivalent of a high school degree or higher level of education in a Spanish-speaking country can skip the language sequence. However, if they have not studied descriptive grammar, they should enroll in SPA420H1. Please consult the Undergraduate Coordinator for placement advice.

Fluent (native) speakers of Spanish who have received high school degree, or a higher level of education in the Spanish language, and who in the department’s assessment do not need further training in language, may enroll immediately in any literature, culture or linguistics course.

Throughout the language sequence, stress is laid both on the cultural component of language acquisition and on the range of practical applications to which both the spoken and the written language may be put. Courses in business Spanish and in the structure of the Spanish language provide an array of possible options for students in the upper years.

Literature, culture and linguistics courses:

Students are encouraged to enroll early on in their academic career in several second-year courses as they transition from the language sequence (SPA219Y1 / SPA220Y1 / SPA320Y1) into the third and fourth-year courses in literature, culture, and linguistics.

SPA258H1 is a foundational course for the students who plan to pursue a major or a specialist degree in Spanish. While permitting students to advance their skills in reading and composition, this course also introduces information literacy, and the terms and methods of literary analysis through the study of a wide selection of brief literary texts. Intermediate level students (SPA220Y1) who are comfortable reading short texts, and who have well-developed writing and speaking skills for the intermediate level, may take that course while enrolled in SPA220Y1 (preferable in their second semester of SPA220Y1). Others should complete SPA220Y1 before taking SPA258H1.

The other courses offered in the 200-series (SPA221H1 and SPA259H1) are not required for a Specialist or Major degree but are recommended for students who need to hone their language skills before advancing to the upper-level literature, culture and linguistics courses.

SPA221H1 (Spanish Pronunciation) is a companion course to SPA220Y1. Students who are interested in this course are best advised to enroll while taking SPA220Y1.

SPA259H1 is a course that introduces students to the techniques of cultural analysis. Although not a degree requirement, this course is a popular option for students enrolled in the program. It has the same language requirements as SPA258H1 (students can take it either while enrolled in SPA220Y1, or upon completion of SPA220Y1).

Following the language sequence, and upon successfully completing SPA258H1, students pursuing a specialist and major degrees will fulfill in the due course of their university career the remaining degree requirements:

- One-half course in Hispanic linguistics from the 300/400 series
- One-half course in Spanish peninsular literature from the 300/400 series
Spanish Programs

Spanish Specialist (Arts Program) - ASSPE0623

Enrolment Requirements:
This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:
Consult the Associate Chair, Undergraduate Studies, at the Department of Spanish and Portuguese:

splice.utoronto.ca

(10.0 credits, including at least 1.0 400-level credit)

First Year:
SPA100Y1/SPA120Y1/SPA220Y1, SPA219Y1 (for native/bilingual speakers of Spanish)

Second Year:
SPA220Y1/SPA320Y1, SPA420H1 (for speakers who have taken SPA219Y1 in first year)

SPA258H1

Third and Fourth Years:
1. SPA320Y1
2. 0.5 credit in Hispanic linguistics from the 300/400 series
3. 0.5 credit in Spanish peninsular literature from the 300/400 series
4. 0.5 credit in Spanish American literature from the 300/400-series
5. SPA420H1
6. SPA454H1 or SPA489H1
7. Additional SPA courses to make the equivalent of 10.0 credits. Up to 2.0 credits may be taken from cognate departmental or college offerings: EUR, GGR, HIS, LAS, LIN, POL, PRT. A complete list of eligible courses is available at the departmental website.

Spanish Major (Arts Program) - ASMAJ0623

Enrolment Requirements:
This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:
Consult the Associate Chair, Undergraduate Studies, Department of Spanish and Portuguese:

splice.utoronto.ca

(7 credits)

First Year:
SPA100Y1/SPA120Y1/SPA220Y1, SPA219Y1 (for native/bilingual speakers of Spanish)

Second Year:
SPA220Y1/SPA320Y1, SPA420H1 (for speakers who have taken SPA219Y1 in their first year)

SPA258H1

Third and Fourth Years:
1. SPA320Y1
2. 0.5 credit in Hispanic linguistics from the 300/400-series
3. 0.5 credit in Spanish peninsular literature from the 300/400-series
4. 0.5 credit in Spanish American literature from the 300/400-series
5. SPA420H1
6. SPA454H1 or SPA489H1
7. Additional SPA courses to make the equivalent of 10.0 credits. Up to 2.0 credits may be taken from cognate departmental or college offerings: EUR,
GGR, HIS, LAS, LIN, POL, PRT. A complete list of eligible courses is available at the departmental website.

**Spanish Minor (Arts Program) - ASMIN0623**

**Enrolment Requirements:**

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

**Completion Requirements:**

Consult the Associate Chair, Undergraduate Studies, Department of Spanish and Portuguese.

spanport.undergraduate@utoronto.ca

(4.0 credits)

**First Year:**

SPA100Y1/ SPA120Y1/ SPA220Y1, SPA219Y1 (for native/bilingual speakers of Spanish)

**Second Year:**

SPA220Y1/ SPA320Y1

**Third Year:**

SPA320Y1

Additional SPA courses to a total of 4.0 credits. Up to 1.0 cognate credit may be taken in Portuguese. No other cognates are permitted for a Spanish Minor.

**First-Year Foundation Seminars**

The SPA195H1/ SPA196H1/ SPA197H1/ SPA198H1/ SPA199H1 seminars are designed to provide the opportunity to work closely with an instructor in a class of no more than thirty students. These interactive seminars are intended to stimulate the students’ curiosity and provide an opportunity to get to know a member of the professorial staff in a seminar environment during the first year of study.

**Faculty of Arts & Science Language Citation**

The Department of Spanish and Portuguese participates in the Faculty of Arts and Science’s Language Citation initiative for Spanish. For a full description of the Language Citation requirements, see the Calendar in the “Degree Requirements” section.

To complete the language citation in Spanish students will normally complete the two language-sequence courses that follow the introductory level: SPA220Y1, SPA320Y1

Native and bilingual speakers should complete SPA219Y1 and two additional half-courses in Spanish in the 300- or 400-series.

Students should note that, as explained in this Calendar, the Language Citation is not equivalent to an academic program and that enrolment in a program is not necessary in order to earn the recognition bestowed by the Citation.

To request the citation, e-mail your request with your student ID number to the Associate Chair, Undergraduate Studies.

**Regarding Spanish Courses**

**Note:**

- see also European Studies, Latin American Studies

**Notes**

1. The Department reserves the right to place students in the language course best suited to their linguistic preparation.
2. Students who, in the department’s assessment, have adequate knowledge of Spanish may be required to take Spanish literature, culture or linguistics course instead of a language course at any level.
3. All courses are taught in Spanish unless otherwise specified.

**Spanish Courses**

**SPA100Y1 - Spanish for Beginners**

**Hours:** 48L/48T

Introduction to the Spanish language for beginning students; overview of basic grammatical structures, development of vocabulary and oral and written expression. Not eligible for CR/NCR option.

**Prerequisite:** No previous knowledge of Spanish, or placement test results.

**Exclusion:** SPA120Y1, SPA219Y1, SPA319Y1, SPA220Y1, SPA320Y1, SPA420H1

**Distribution Requirements:** Humanities

**Breadth Requirements:** Creative and Cultural Representations (1)
SPA120Y1 - Accelerated Spanish Through Community Engaged Learning

Hours: 96L

This course is a combination of SPA100Y1 and SPA220Y1 into one year. It is designed for students with prior knowledge of Spanish, but whose level is not appropriate to enroll in SPA220Y1. The focus is on the fundamentals of Spanish grammar and cultural aspects through community service learning with the local Spanish-speaking community of Toronto. Not eligible for CR/NCR option.

Prerequisite: High School Spanish; informal knowledge of Spanish
Exclusion: Native and Heritage Speakers, SPA219Y1, SPA100Y1 and SPA220Y1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

SPA195H1 - Barcelona

Hours: 24L

A deep dive into the modern experience of one of the world’s most compelling cities, this course considers Barcelona from a multidisciplinary perspective that includes study of its architecture, foodways, politics and response to mass tourism. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

SPA196H1 - Class and Work in the Americas

Hours: 24L

This course examines economic and social inequalities in the contemporary Americas. We look at the ways in which class divisions are represented in academic studies, literature, film, and television. From Mexican maquiladoras to indigenous reservations, we consider the global poor and how recent changes in the character of work (automation, outsourcing, free trade zones) have had an impact on class divisions, especially for younger members of society. Can a renewed understanding of class and work help us to negotiate power, privilege, and inequality in this century? Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

SPA197H1 - Cervantes and Imperial Spain

Hours: 24L

During the lifetime of Miguel de Cervantes, the Spanish monarchy governed an empire that extended across the globe, from its traditional lands in Europe to colonies in the Philippines and the Americas. We will examine the advantages and cost of imperial rule through reading Cervantes’s Exemplary Stories (1613), and diverse collection of short fictional texts. Discussions will centre on such questions as the social impact of imperial wealth, the relationship between external wars and the ideal of peaceful rule, and contact with non-European cultures. Students will be introduced to the University of Toronto’s outstanding resources for studying the literatures and cultures of early modern Europe. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

SPA198H1 - A Brief History of Love in the Western World

Hours: 24L

This course introduces students to the ways in which the foremost thinkers in the history of the Western world (Plato, Ovid, St. Augustine, Ficino, Ebreo) conceived the idea of love; how did the notions of sexuality and gender play into that idea, and how did these notions carry on—or not—into our present understanding of love, sexuality and gender. While the background readings pertain to the general Western cultural heritage, the literary texts through which we will observe particular applications of the theories of love were produced by some of the outstanding 16th and 17th century Spanish authors (for ex. Rodríguez de Montalvo; Jorge de Montemayor; Miguel de Cervantes; Tirso de Molina, María de Zayas, Sor Juana Inés de la Cruz). All the readings will be in English. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)
SPA199H1 - More than Nachos and Tequila: Mexican History and Culture

Hours: 24L

This course aims at studying the rich history of Mexico from an interdisciplinary perspective. We will cover a wide range of issues, such as identity, modernity race, immigration, gender, sexuality, globalization, and iconic figures. The issue of identity as construed from the inside, but also from the outside and particularly from the English-speaking world (i.e. current US presidential views on the wall), will be widely examined. Course materials will range from chronicles of conquest to modern reflections and representations by historians, philosophers, filmmakers, musicians, writers and artist, among others. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

SPA221H1 - Spanish Pronunciation

Hours: 24L

A practical introduction to articulatory phonetics, Spanish sound patterns, phonetics, phonology; the basic concepts of phonetic description and transcription; the study of Spanish vowel and consonant systems, stress and intonation.

Prerequisite: SPA100Y1
Corequisite: SPA120Y1 or SPA220Y1
Exclusion: SPA219Y1; native speakers of Spanish; SPA321H1
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

SPA219Y1 - Academic Spanish

Hours: 48L/24T

For native (heritage) speakers who have had exposure to spoken Spanish in an informal context (i.e., living in a Spanish-speaking country; or with a Spanish-speaking family), but little to no exposure to written Spanish. The students' ability to speak and understand Spanish may range from basic to relatively high fluency, but they cannot write and/or read Spanish. The course reviews English/Spanish spelling differences; written and spoken registers of Spanish, and basic aspects of the grammatical system. Provides students with the essential understanding of Spanish grammatical system; builds their vocabulary; and trains them to express themselves formally.

Prerequisite: Basic to relatively high native ability to speak and understand Spanish; limited or no formal education in Spanish.
Exclusion: SPA100Y1, SPA120Y1, SPA220Y1, SPA320Y1, SPA319Y1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

SPA220Y1 - Intermediate Spanish

Hours: 48L/48T

Intermediate Spanish for non-native speakers. Intensive grammar review of the structures of Spanish integrated with an introduction to reading authentic Spanish material, with practice designed to build vocabulary and to improve oral and written expression.

Prerequisite: SPA100Y1 or placement test.
Exclusion: SPA120Y1, SPA219Y1, SPA319Y1, SPA320Y1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

SPA254H1 - Cervantes and Modern Fiction

Hours: 24L

Critical reading of Don Quixote as a canonical text for the novel and other narrative forms, including historical metafiction, the short story, and fictional autobiography. Comparative discussion of Quixotic fictions by modern authors, such as Machado de Assis, Borges, Nabokov, García Márquez, Junot Díaz. Lectures and readings in English.

Prerequisite: None
Recommended Preparation: None
Breadth Requirements: Creative and Cultural Representations (1)

SPA255Y0 - Introduction to the Hispanic World

Hours: 48L

A survey of Hispanic Culture, with attention to central issues in history, politics, and popular traditions. Course will be taught in English.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)
SPA258H1 - Introduction to Hispanic Literary Studies

Hours: 36L

Introduction to university literary studies in Spanish and information literacy. Representative selection of Spanish and Spanish American prose, poetry, and drama, with focus on critical terminology and methods of literary analysis. Required for a program degree.

Prerequisite: First semester SPA220Y1
Corequisite: SPA120Y1 or SPA220Y1 or SPA219Y1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

SPA259H1 - Introduction to Hispanic Cultural Studies

Hours: 24L

Forms of cultural expression in Spain, Latin America and Spanish-speaking North America, with study of representative media, including literature, journalism, film, visual art, and the urban environment. Introduction to methods of cultural analysis. (Offered in alternate years).

Prerequisite: Minimum 1st semester of SPA220Y1
Corequisite: SPA120Y1 or SPA220Y1 or SPA219Y1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

SPA299Y1 - Research Opportunity Program

Credit course for supervised participation in faculty research project. Details at https://www.artsci.utoronto.ca/current/academics/research-opportunities/research-opportunities-program. Not eligible for CR/NCR option.

Distribution Requirements: Humanities

SPA320Y1 - Advanced Spanish

Hours: 48L/48T

Advanced Spanish for non-natives. Selective review of grammar with emphasis on the complex sentence; intensive practice in written and oral expression to improve proficiency.

Prerequisite: SPA120Y1 or SPA220Y1 or placement test.
Exclusion: SPA219Y1/SPA319Y1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

SPA322H1 - Introduction to Hispanic Linguistics

Hours: 24L/12T

The basic concepts and analytic tools of linguistics applied to the study of Spanish, with a focus on the Spanish phonological, morphological, and syntactic systems. Theoretical discussion and practical exercises in analytic techniques.

Prerequisite: SPA120Y1 or SPA220Y1 or SPA219Y1; or instructor's permission
Recommended Preparation: SPA221H1
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

SPA323H1 - Business Spanish

Previous Course Number: SPA323Y1
Hours: 24L/12T

An advanced level business Spanish course covering topics on international relations, politics, legal and culture. This course aims to enhance written and oral expression in Spanish through content focusing on the language that is used in official, diplomatic, and financial situations. Through the analysis of case studies, newspapers and videos, students will be introduced to the business cultures and intercultural communication of the Spanish-speaking world.

Prerequisite: SPA120Y1 or SPA220Y1 or proof of comparable Spanish level
Corequisite: SPA320Y1, SPA219Y1 or proof of comparable Spanish level
Exclusion: SPA323Y1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

SPA324H1 - Spanish Bilingualism

Hours: 24L

Spanish bilingualism from three different perspectives: linguistic, sociolinguistic, psycholinguistic. Analysis of typical language contact phenomena with materials from Spanish. Case studies of Spanish in contact and discussion of the psychological consequences of bilingualism. Introduction to survey methods in sociolinguistics and psycholinguistics, and basic techniques for conducting language interviews. (Offered in alternate years)

Prerequisite: SPA120Y1 or SPA220Y1 or SPA219Y1 or Permission of the Department
Recommended Preparation: SPA221H1/SPA322H1
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)
SPA326H1 - Latin American Varieties of Spanish Through the Media

Hours: 36L

This course aims at exposing students to different varieties of Latin American Spanish. Lexical, morpho-syntactic and phonological variation will be discussed and theoretical descriptions will be illustrated by using samples from contemporary cinema and television. (Offered in alternate years)

Prerequisite: SPA120Y1 or SPA220Y1 or SPA219Y1 or Permission of the Department
Recommended Preparation: SPA221H1/SPA320Y1/SPA322H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

SPA327H1 - Catalan

Previous Course Number: SPA327Y
Hours: 24L

Study of Catalan language through an overview of grammatical structures and exercises in proficiency skills, complemented by readings in Catalan history and society to attain interdisciplinary cultural literacy. (Offered every three years)

Prerequisite: SPA120Y1 or SPA220Y1 or SPA219Y1 or any other 200 level Romance Language.
Exclusion: SPA325Y1/SPA325H1, SPA327Y1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

SPA341H1 - Modernist Movements in Spain

Hours: 24L

Literary and artistic movements in Spain from 1890 to 1940, with special attention to the convergence and mutual mediation of politics and art. Materials to be studied include novels, poetry, the urban environment, graphic art, literary journals and manifestos, and some early Hispanic film. (Offered every three years)

Prerequisite: SPA120Y1 or SPA220Y1 or SPA219Y1 or Permission of the Department
Recommended Preparation: SPA258H1
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

SPA345H1 - Spanish Cinema

Hours: 24L

Analysis of the development of Spanish Cinema within its social and political contexts. Directors studied include Buñuel, Bardem, Erice, Saura, Almodóvar and Bigas Luna. (Offered every three years).

Prerequisite: SPA120Y1 or SPA220Y1 or SPA219Y1 or Permission of the Department
Recommended Preparation: SPA258H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

SPA348H1 - Galdos and the Realist Novel

Hours: 24L

Representative fiction by Galdós, the principal Spanish novelist of the nineteenth century. Detailed study of such texts as Marianela, Doña Perfecta, La desheredada, Realidad, La incognita, in relation to modernity of realist fiction and contemporary issues in politics, social relations and individual psychology. (Offered every three years)

Prerequisite: SPA120Y1 or SPA220Y1 or SPA219Y1 or Permission of the Department
Recommended Preparation: SPA258H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

SPA352H1 - Court and Country in Early Modern Spain

Hours: 24L

Representative texts (such as ballads, popular and courtly lyric; chivalry, pastoral and picaresque prose, theater) from the early modern period, studied in relation to the history and society of imperial Spain. Discussion of literary texts as codes of social conduct; issues of urbanization, court culture, social order and disorder, and cultural discourses of identity and difference. Reading from modern authors (Sender, Borges) to illustrate the continuity of court and country in the Hispanic tradition. (Offered every three years)

Prerequisite: SPA120Y1 or SPA220Y1 or SPA219Y1 or Permission of the Department
Recommended Preparation: SPA258H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)
SPA354H1 - Parody and Comedy in Early Modern Spanish Literature

Hours: 24L

Parody and comedy as interrelated literary forms that create humor through conventional character types, the play of language, self-conscious imitation, and the relationship of parodic works to canonical intertexts. Considerations of humor as a response to social anxieties in early modern Spain. Analysis of poems, plays and short prose narratives by representative authors: Garcilaso, Góngora, Quevedo, Tirso de Molina, Cervantes.

Prerequisite: SPA120Y1 or SPA220Y1 or SPA219Y1 or permission of the Department
Recommended Preparation: SPA258H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

SPA368H1 - Spanish and the Empire: Migration in Language and Literature

Hours: 24L

This interdisciplinary approach considers broad cultural consequences resulting from the contact of Spanish with the American indigenous languages. Current cultural and linguistic theories on language contact are used to analyze sixteenth to eighteenth-century Spanish texts, and invite reflection on language, power, and the emergence of new cultural expressions. (Offered every three years)

Prerequisite: SPA120Y1 or SPA220Y1 or SPA219Y1 or Permission of the Department
Recommended Preparation: SPA258H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

SPA375H1 - Latin American Cinema

Hours: 12L/12T

This online course examines the social, political, and cultural contexts of recent Latin American cinema. Topics include: military dictatorship and its aftermath, race and indigeneity; poverty, precarity, and inequality; gender and sexuality; and memory and trauma. The representation of these themes in Latin American cinema of the 21st century has contributed to an increase in its transnational and cosmopolitan reception. Focus is given to Argentina and Mexico, though films from other countries will be included. Taught in English.

Recommended Preparation: INI115Y/INI212Y/SPA258H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

SPA381H1 - Nation, Identity and Modernity in Spanish-America

Hours: 24L

Analysis of poetry, short stories, essays, and graphic art in the context of nation-building and the question of identity during the nineteenth century. (Offered every three years)

Prerequisite: SPA120Y1 or SPA220Y1 or SPA219Y1 or Permission of the Department
Recommended Preparation: SPA258H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

SPA382H1 - Spanish American Women in Art, Film, and Literature

Hours: 24L

Study of different creative expressions by women in Spanish America from the colonial period to the present; analysis of selected works of visual art, film, essays, poetry, and fiction. (Offered every three years)

Prerequisite: SPA120Y1 or SPA220Y1 or SPA219Y1 or Permission of the Department
Recommended Preparation: SPA258H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

SPA384H1 - Avant-Garde Movements in Spanish America

Hours: 24L

Study of representative works of major artistic and literary movements in 20th and 21st century Spanish America: avant-garde poetry, theatre of the absurd, surrealist art, neo-realism, postmodernism. (Offered every three years)

Prerequisite: SPA120Y1 or SPA220Y1 or SPA219Y1 or Permission of the Department
Recommended Preparation: SPA258H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)
SPA385H1 - Literature and Social Change in Spanish America

Hours: 24L

Detailed study of key moments and texts in Spanish American culture from the nineteenth and twentieth centuries, focusing on such topics as the creation of new nations, indigenismo, Caribbean anti-slavery literature, and the Mexican and Cuban Revolutions. (Offered every three years)

Prerequisite: SPA120Y1 or SPA220Y1 or SPA219Y1 or Permission of the Department
Exclusion: SPA487H1
Recommended Preparation: SPA258H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

SPA386H1 - Literary Landscapes of the Mexican Revolution

Hours: 24L

Examines cultural production, including short stories, novels, films and paintings surrounding the socio-political transformations of the revolutionary period. Readings and discussion emphasize general concepts of the landscape, as a visual and spatial mode of interpreting relationships between human subjects, and between these subjects and the territory they occupy. (Offered every three years)

Prerequisite: SPA120Y1 or SPA220Y1 or SPA219Y1 or Permission of the Department
Recommended Preparation: SPA258H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

SPA387H1 - Latin American Performative Expression

Hours: 24L

Considers continuities and divisions between word and action, art and politics, in short works of fiction, theatre, film and performance projects. Includes work from twentieth-century and contemporary Mexico as well as Latin American cultural production from Canada and the United States.

Prerequisite: SPA120Y1 or SPA220Y1 or SPA219Y1 or Permission of the Department
Exclusion: SPA467H1 (Topics: Latin American Performative Practices), offered in Fall 2009, Winter 2018
Recommended Preparation: SPA258H1
Breadth Requirements: Creative and Cultural Representations (1)

SPA389H1 - Central American Literature: Narratives of War

Hours: 24L

The 70s and 80s represent a period of armed struggle, civil war, and revolution in most of Central America. Through the study of specific novels, short stories, and films, this course analyzes the representation of violence, and the political repression generated by military conflicts. (Offered every three years)

Prerequisite: SPA120Y1 or SPA220Y1 or SPA219Y1 or Permission of the Department
Recommended Preparation: SPA258H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

SPA398H0 - Research Excursions

Distribution Requirements: Humanities

SPA398Y0 - Research Excursions

Distribution Requirements: Humanities

SPA399Y1 - Research Opportunity Program

Credit course for supervised participation in faculty research project. Details at https://www.artsci.utoronto.ca/current/academics/research-opportunities/research-opportunities-program. Not eligible for CR/NCR option.
SPA420H1 - Advanced Grammar

Hours: 36L

Linguistic analysis with the objective of improving students' command of Spanish grammar. Advanced review of traditional grammatical topics, including the verbal and pronominal systems, and Spanish copulas and embedded clauses. This course assumes familiarity with the grammatical terminology introduced in SPA320Y1.

Prerequisite: SPA219Y1 or SPA320Y1, or placement test.
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

SPA421H1 - The Structure of Spanish

Hours: 36L

Study of Spanish morphology and syntax: syntactic categories in Spanish, the structure and interpretation of simple and complex sentences. (Offered in alternate years)

Prerequisite: SPA420H1, or permission of department
Recommended Preparation: SPA322H1
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

SPA422H1 - Sociolinguistics of Spanish

Hours: 24L

Study of linguistic variation across the Spanish-speaking world; central issues in phonological, morphological, and syntactic variation, analyzed from a geographical as well as from a social point of view. (Offered in alternate years)

Prerequisite: SPA322H1 or permission of the department
Recommended Preparation: SPA420H1
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

SPA423H1 - Spanish Phonology

Hours: 24L/12T

Theoretical and experimental approaches to Spanish phonology. Topics include: Spanish phonemic inventory, sound patterns, suprasegmentals (stress and intonation), synchronic and diachronic variation. Methods of data collection and analysis in the discipline, with practical applications. (Offered in alternate years)

Prerequisite: SPA322H1 or permission of the Department
Recommended Preparation: SPA420H1
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

SPA425H1 - History of the Spanish Language

Hours: 24L

Have you ever doubted where Spanish came from? Or how did it become the language we know today? This course presents a detailed study of the external and internal history of the Spanish language in which this evolution occurred. Special attention will be paid to the linguistic progress of the language from its Latin roots to Modern Spanish and to the socio-cultural, historical, political and literary influence that have affected its linguistic evolution. The main features of the Spanish language evolution will be put in practice through a close reading of representative Medieval, Renaissance and dialectal texts.

Prerequisite: SPA320Y1 or SPA219Y1 or permission of instructor
Breadth Requirements: Creative and Cultural Representations (1)

SPA435H1 - Fictions of Contemporary Spain

Hours: 24L

Study of major currents in narrative fiction during the last twenty years, a period of return to democratic government, the relaxing of censorship and the opening up of Spanish culture. Analysis of works from several generations of male and female writers. (Offered every three years)

Prerequisite: At least one 300-series half-course in Spanish.
Recommended Preparation: SPA258H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)
SPA439H1 - Topics in Spanish Studies

Hours: 24S

A course on specific topics in Spanish studies, designed for advanced students. Course content and instructor are established on a yearly basis.

Prerequisite: SPA220Y1/SPA219Y1
Recommended Preparation: SPA258H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

SPA450H1 - Literature and Society in Medieval Iberia

Hours: 24S

Study of medieval social topics such as witchcraft, violence, love, marriage, childhood, maternity, crimes and punishment. Analysis of such texts as Poema del Mio Cid; the Romancero, Milagros de Nuestra Señora, Libro de buen amor, Don Juan Manuel and Celestina, from the perspective of iconography and social history. (Offered every three years)

Prerequisite: At least one 300-series half-course in Spanish.
Corequisite: SPA320Y1
Recommended Preparation: SPA258H1/SPA352H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

SPA454H1 - Cervantes: Don Quixote

Hours: 36L

Detailed study of Don Quixote as a foundational text in the European literary tradition, with attention to the conventions, genres, and literary techniques that inform the text.

Prerequisite: SPA258H1; SPA219Y1 or SPA320Y1 or permission of the department
Exclusion: SPA350Y1
Recommended Preparation: SPA352H1; Another 300-series half course in Spanish
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

SPA456H1 - Transatlantic Hispanic Baroque: Crisis and Disenchantment

Hours: 24L

Study of the seventeenth-century Transatlantic Hispanic world that, after the epoch of discovery and expansion in the sixteenth century, faces economic and political downfall, accompanied by a social and spiritual crisis that results in the culture baroque. Through analysis of literary texts by such authors as Cervantes, Góngora, Quevedo, Sor Juana, Sigüenza, Gracián Zayas and Calderón, we will discuss the meanings of the term "baroque", and of the phenomena that capture its zeitgeist.

Prerequisite: SPA320Y1; at least one other 300-level course in SPA
Recommended Preparation: SPA352H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

SPA467H1 - Topics in Spanish-American Literature and Culture

Hours: 24L

A course on a specific topic in Spanish American culture, designed for advanced students. Course content and instructor are established on a yearly basis.

Prerequisite: At least one 300-series half-course in Spanish.
Recommended Preparation: SPA258H1/SPA259H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

SPA475H1 - 21st Century Latin American Culture

Hours: 24L

Contemporary Argentine and Mexican authors and visual artists will be studied through their work, online visibility, and also the institutional and discursive structures that facilitate and shape their production. In-class Skype discussions with some of the artists. (Offered every three years)

Prerequisite: At least one 300-series half-course in Spanish.
Recommended Preparation: SPA258H1/SPA259H1
Distribution Requirements: Humanities
SPA480H1 - Icons and Iconography in Latin American Culture

Hours: 24L

Production, circulation and meaning of icons through Latin American literary and cultural contexts. Readings are selected from the period of independence to the present, and focus on the transformative ideological charge of cultural objects across geographic space and history. Focuses on political and socio-economic tensions between popular and elite spheres of cultural production, and on the risks and limits of iconographic representation. (Offered every three years)

Prerequisite: At least one 300-series half-course in Spanish.
Recommended Preparation: SPA258H1/SPA259H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

SPA482H1 - 20th-Century Spanish American Narrative

Hours: 24L

Detailed study of the major movements in Spanish-American narrative, including magic realism, fantastic literature, women's writing, and testimonial literature, through analysis of representative novels and short stories. (Offered every three years)

Prerequisite: At least one 300-series half-course in Spanish.
Recommended Preparation: SPA258H1/SPA259H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

SPA486H1 - Contemporary Caribbean Literatures and Identities

Hours: 24L

Literature studied as a socio-political space for the articulation of new concepts of cultural identity; examination of cultural change and aesthetic innovation in selected poetic, dramatic, and narrative texts from different national traditions (Cuba, the Dominican Republic, Puerto Rico). (Offered every three years)

Prerequisite: At least one 300-series half-course in Spanish.
Recommended Preparation: SPA258H1/SPA259H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

SPA488H1 - Central America Postwar Narrative

Hours: 24L

The end of civil and military conflicts in the last decade of the 20th century reshapes the political landscape of Central America. Through selected readings of novels and short stories from representative writers, issues of immigration, displacement, and globalization are discussed to understand these changes in the region. (Offered every three years)

Prerequisite: At least one 300-series half-course in Spanish.
Recommended Preparation: SPA258H1/SPA259H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

SPA489H1 - Latin American Transculturations

Hours: 36L

This course integrates a series of contemporary debates in Latin American cultural studies with analysis of its transdisciplinary history and global permutations. Key topics of investigation within these debates may include indigeneity; coloniality, transculturation, and subalternity; empire, nation, and globalism; revolution, state discourse, and the popular; gender and sexuality; and the production of race.

Prerequisite: SPA258H1; SPA219Y1/SPA320Y1
Recommended Preparation: Another 300-series half-course in literature
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

SPA490H1 - Independent Study

Individual study with a member of staff on a topic of common interest including readings, discussion and written assignments. Not eligible for CR/NCR option.

Prerequisite: At least one 300-series half-course in Spanish, and written approval of the Undergraduate Coordinator
Distribution Requirements: Humanities

SPA491H1 - Independent Study

Individual study with a member of staff on a topic of common interest including readings, discussion and written assignments. Not eligible for CR/NCR option.

Prerequisite: At least one 300-series half-course in Spanish, and written approval of the Undergraduate Coordinator
Distribution Requirements: Humanities
Statistical Sciences

Introduction

Statistical Science is the science of learning from data. Statistical science plays a large role in data science, which broadly encompasses computational and statistical aspects of managing and learning from large and complex datasets. Statistical theory and methodology have applications in almost all areas of science, social science, public health, medicine, engineering, finance, technology, business, government and industry. Statisticians and data scientists are involved in solving problems as diverse as understanding the health risk of climate change, predicting the path of forest fires, understanding the role of genetics in human health, and creating a better search engine. New ways of collecting, organizing, visualizing, and analyzing data are increasingly driving progress in all fields and have created demand for people with data expertise.

The Department of Statistical Sciences offers specialist, major, and minor programs in Statistics and a specialist program in Data Science. All programs offer training in statistical methods, theory, computation, and communication, as well as an understanding of the role of statistical science to solve problems in a variety of contexts. The specialist program in Statistical Science: Theory and Methods emphasizes probability and statistical theory as underlying mathematical frameworks for data analysis. The specialist program in Statistical Science: Methods and Practice has greater emphasis on collaborative statistical practice. Students in this program combine their study in statistics with a focus in a discipline that relies on statistical methods. The specialist program in Data Science is offered jointly with the Department of Computer Science. Students in this program acquire expertise in statistical reasoning and methods, in the design and analysis of algorithms and data structures for handling big data, in best practices for software design, and in machine learning. The major program in Statistics offers the most flexibility in choice of courses. This program gives students a broad understanding of the methods and computational and communication skills appropriate for effective statistical problem solving. The minor program in Statistics is designed to provide students with some exposure and skills in statistical methods which is intended to complement programs in other disciplines that involve quantitative research.

Statistical Sciences Programs

Data Science Specialist (Science Program) - ASSPE1687

Description:

The field of Data Science is a combination of statistics and computer science methodologies that enable ‘learning from data’. A data scientist extracts information from data, and is involved with every step that must be taken to achieve this goal, from getting acquainted with the data to communicating the results in non-technical language. The Data Science Specialist program prepares students for work in the Data Science industry or government and for graduate studies in Data Science, Computer Science, or Statistics. Students in the program will benefit from a range of advanced courses in Computer Science and Statistics offered by the University of Toronto, as well as from a sequence of three integrative courses designed especially for the program.

The Data Science Specialist program comprises three fundamental and highly-integrated aspects. First, students will acquire expertise in statistical reasoning, methods, and inference essential for any data analyst. Second, students will receive in-depth training in computer science: the design and analysis of algorithms and data structures for handling large amounts of data, and best practices in software design. Students will receive training in machine learning, which lies at the intersection of computer and statistical sciences. The third aspect is the application of computer science and statistics to produce analyses of complex, large-scale datasets, and the communication of the results of these analyses; students will receive training in these areas by taking integrative courses that are designed specifically for the Data Science Specialist program. The courses involve experiential learning: students will be working with real large-scale datasets from the domain of business, government, and/or science. The successful student will combine their expertise in computer and statistical science to produce and communicate analyses of complex large-scale datasets.

Skills that graduates of the program will acquire include proficiency in statistical reasoning and computational thinking; data manipulation and exploration, visualization, and communication that are required for work as a data scientist; the ability to apply statistical methods to solve problems in the context of scientific research, business, and government; familiarity and experience with best practices in software development; and knowledge of current software infrastructure for handling large data sets. Graduates of the program will be able to demonstrate the ability to apply machine learning algorithms to large-scale datasets that arise in scientific research, government, and business; create appropriate data visualizations for complex datasets; identify and answer questions that involve applying statistical methods or machine learning algorithms to complex data, and communicating the results; present the results and limitations of a data analysis at an appropriate technical level for the intended audience.

Enrollment Requirements:

This is a limited enrollment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

For students admitted to Arts & Science in the Year 1 Computer Science (CMP1) admission category:

Variable Minimum Grade
A minimum grade is needed for entry, and this minimum changes each year depending on the number of applicants. At least 20

spaces will be available each year for students applying from Year 1 Computer Science (CMP1). The following courses must be completed:

- CSC110Y1
- CSC111H1
- MAT137Y1/MAT157Y1
- STA130H1

To ensure that students admitted to the program will be successful, applicants will not be considered for admission with a grade lower than 70% in CSC110Y1, MAT137Y1, and STA130H1, or lower than 77% in CSC111H1. (MAT157Y1 grades will be adjusted to account for the course’s greater difficulty.) Obtaining these minimum grades does not guarantee admission to the program.

For students admitted to other Arts & Science Year 1 admission categories:

Special Requirement

- Students who do not have the Computer Science Admission Guarantee must complete a supplementary application to be considered for the program.

Variable Minimum Grade
A minimum grade is needed for entry, and this minimum changes each year depending on available spaces and the number of applicants. The following courses must be completed:

- CSC148H1
- MAT137Y1/MAT157Y1
- STA130H1

To ensure that students admitted to the program will be successful, applicants with a grade lower than 70% will not be considered for admission. (MAT157Y1 grades will be adjusted to account for the course’s greater difficulty.) Obtaining these minimum grades does not guarantee admission to the program.

Notes:

1. Requests for admission will be considered in the first program request period only.
2. Due to the limited enrollment nature of this program, students are strongly advised to plan to enroll in backup programs.
3. Students admitted to the program after second or third year will be required to pay retroactive deregulated program fees.

Completion Requirements:

(13.0-13.5 credits, including at least 1.5 credits at the 400-level)

First year (3.0-3.5 credits)
MAT137Y1/ MAT157Y1; MAT223H1/MAT240H1 (MAT240H1 is recommended); STA130H1; (CSC108H1, CSC148H1Y (CSC110Y1, CSC111H1)

Note: Students with a strong background in an object-oriented language such as Python, Java or C++ may omit CSC108H1 and proceed directly with CSC148H1. There is no need to replace the missing half-credit for program completion; however, please base your course choice on what you are ready to take, not on “saving” a half-credit. Consult with the Computer Science Undergraduate Office for advice on choosing between CSC108H1 and CSC148H1.
Statistical Sciences

Second year (3.5 - 4.0 credits)
MAT237Y1/ MAT257Y1; STA257H1; STA261H1; CSC207H1; (CSC165H1, CSC236H1)/ CSC236H1/ CSC240H1 (CSC240H1 is recommended); JSC270H1 (Data Science I)
Note: CSC240H1 is an accelerated and enriched version of CSC165H1 plus CSC236H1, intended for students with a strong mathematical background, or who develop an interest after taking CSC165H1. If you take CSC240H1 without CSC165H1, there is no need to replace the missing half-credit for program completion; however, please base your course choice on what you are ready to take, not on “saving” a half-credit. Consult the Computer Science Undergraduate Office for advice on choosing between CSC165H1 and CSC240H1. CSC236H1 may be taken without CSC165H1 for students who completed CSC111H1.

Later years (6.5 credits)

1. STA302H1; one of STA303H1 or STA305H1; STA355H1; CSC209H1; CSC263H1/ CSC265H1 (CSC265H1 is recommended); CSC343H1; CSC373H1; JSC370H1 (Data Science II)
2. STA314H1/ CSC311H1/ CSC411H1
3. 2.0 credits from the following list, including at least 1.0 credit at the 400 level (see below for additional conditions): STA303H1/ STA305H1 (whichever one was not taken previously), STA347H1, CSC401H1, STA414H1/ CSC412H1, CSC413H1/ CSC421H1, any 400-level STA course; JSC470H1 (Data Science III); CSC454H1, CSC490H1, CSC491H1, CSC494H1, CSC495H1

The choices from 3 must satisfy the requirement for an integrative, inquiry-based activity by including at least 0.5 credit from the following: JSC470H1 (Data Science III); CSC454H1, CSC490H1, CSC491H1, CSC494H1, CSC495H1, STA490Y1, STA496H1, STA497H1, STA498Y1, STA499Y1. This requirement may also be met by participating in the PEY Co-op (Professional Experience Year Co-op) program.

Students will be advised to develop domain expertise in at least one area where Data Science is applicable, by taking a sequence of courses in that area throughout their program. Examples of such areas will be provided to students by program advisors and will form the basis for a later proposal for program Focuses (to be approved through internal Arts & Science governance procedures).

Specialist in Statistical Science: Methods and Practice (Science Program) - ASSPE2270

Description:
Statistical Science encompasses methods and tools for obtaining knowledge from data and for understanding the uncertainty associated with this knowledge. The purposes of the undergraduate programs are to: (1) equip students with a general framework for obtaining knowledge from data; (2) give students skills that they are able to flexibly apply to a variety of problems; and (3) to provide students with the ability to learn new methods as needs, data sources, and technology change.

The Specialist Program in Statistical Science: Methods and Practice is distinguished from the specialist program in Statistical Science: Theory and Methods through its emphasis on collaborative statistical practice and advanced exposure to an allied discipline. The program includes fundamental concepts in probability and statistical theory with mathematical prerequisites relevant to statistical practice. Students in the program acquire advanced expertise in statistical reasoning, methods, and computation, and complete a focus in another discipline that permits students to become conversant in that discipline to the extent that they can effectively collaborate. Students will also acquire advanced skills in communication, consultation and collaboration and an understanding of the role of mathematical thinking to support the development and evaluate the properties of statistical methods.

Enrolment Requirements:
This is a limited enrolment program. Note there are different admission criteria depending on whether a student has completed between 4.0 and 8.5 credits, or 9.0 or more credits.

For students who have completed between 4.0 and 8.5 credits:

Completed Courses (some with minimum grades)
The following courses are required:
- STA130H1
- CSC108H1/ CSC120H1/ CSC148H1
- MAT223H1/ MAT240H1
- (MAT135H1 and MAT136H1) with a minimum grade of 75% in each/ MAT137Y1 (65%)/ MAT157Y1 (65%)

Variable Minimum Grade Average
A minimum grade average in STA130H1 and (MAT135H1 and MAT136H1)/ MAT137Y1/ MAT157Y1 is needed for entry. This minimum grade average changes each year depending on available spaces and the number of applicants.

Note:
Students who take (MAT135H1 and MAT136H1) will typically require a higher minimum grade average than students who take MAT137Y1/ MAT157Y1.

For students who have completed 9.0 or more credits:

Completed Courses (some with minimum grades)
The following courses are required:
- CSC108H1/ CSC120H1/ CSC148H1
- MAT223H1/ MAT240H1
- MAT235Y1/ MAT237Y1/ MAT257Y1
- (STA237H1 and STA238H1) with a minimum grade of 75% in each/ (STA247H1 and STA248H1) with a minimum grade of 75% in each/ (STA257H1 and STA261H1) with a minimum grade of 65% in each

Variable Minimum Grade Average
A minimum grade average in (STA237H1 and STA238H1)/ (STA247H1 and STA248H1)/ (STA257H1 and STA261H1) and MAT235Y1/ MAT237Y1/ MAT257Y1 is needed for entry. This minimum grade average changes each year depending on available spaces and the number of applicants.

Note:
Students who take (STA237H1, STA238H1)/ (STA247H1, STA248H1) will typically require a higher minimum grade average than students who take (STA257H1, STA261H1).

Completion Requirements:
(10 or 10.5 credits plus a disciplinary focus requiring 2.0–3.5 credits)

First year:
1. STA130H1, CSC108H1/CSC120H1/CSC148H1, (MAT135H1, MAT136H1)/MAT137Y1/MAT157Y1 (MAT137Y1/MAT157Y1 recommended)
2. Recommended: introductory course in disciplinary focus. MAT223H1/MAT240H1 is also strongly recommended to be taken in first year and is required preparation for MAT237Y1.

Second year:
3. MAT223H1/MAT240H1, MAT235Y1/MAT237Y1/MAT257Y1. (STA237H1, STA238H1)/STA247H1, STA248H1/STA257H1, STA261H1
((STA257H1, STA261H1) recommended)

Upper years:
4. STA302H1, STA303H1, STA304H1, STA305H1, STA313H1/STA314H1/STA365H1, STA355H1
5. 1.5 credits from the following list: STA414H1, STA437H1, STA442H1, STA457H1, STA465H1, STA475H1, STA480H1, STA410H1
6. STA490Y1 or successful completion of an internship involving Statistics when an internship program becomes available.
7. 1.0 credit from the following list: MAT224H1/MAT247H1, MAT337H1/MAT357H1, CSC148H1, CSC207H1, STA300+/level courses (excluding STA310H5)

Disciplinary Focuses

Students in the Specialist Program in Statistical Science: Methods and Practice program must enrol in and complete at least one disciplinary focus.

To enrol in one or more focuses, students must first be enrolled in the Specialist Program in Statistical Science: Methods and Practice program. Enrolment instructions can be found on the Arts & Science Program Toolkit website. Focuses can be chosen on ACORN after admission to the program, which begins in July.

Health Studies: (2.0 credits) HMB342H1, at least 0.5 credit from HST209H1/HST211H1/HST250H1, and at least 0.5 credit from HST308H1/HST310H1/HST405H1/HST330H1/HST440H1/HST464H1

Global Health: (3.0 credits) BIO120H1, BIO130H1, HMB203H1, HMB265H1, HMB323H1/HMB303H1/HMB306H1/JNH350H1/HMB342H1, HMB433H1/HMB460H1/HMB462H1/HAJ453H1/HMB434H1 (Recommended: HMB433H1)

Health and Disease: (3.0 credits) BIO120H1, BIO130H1, HMB202H1, HMB265H1, HMB302H1/HMB322H1/HMB312H1/HMB342H1, HMB422H1/HMB427H1/HMB432H1/HMB434H1/HMB435H1/HMB436H1/HMB437H1/HMB452H1/HMB462H1

Fundamental Genetics and its Applications: (3.0 credits) BIO120H1, BIO130H1, HMB201H1, HMB265H1, HMB301H1/HMB311H1/HMB321H1/HMB360H1/HMB421H1/HMB441H1/HMB401H1/HMB431H1 (Recommended: HMB421H1)

Neuroscience: (3.0 credits) BIO120H1, BIO130H1, HMB200H1, HMB265H1, HMB300H1/HMB310H1/HMB320H1/HMB360H1/CJH332H1/HMB420H1/JHA410H1/HMB430H1/HMB450H1 (Recommended: HMB420H1)

Social Psychology: (2.0 credits) PSY100H1, PSY220H1, PSY322H1, PSY326H1/PSY321H1/PSY424H1/PSY426H1/PSY405H1/PSY406H1

Cognitive Psychology: (2.0 credits) PSY100H1, PSY270H1, PSY493H1, PSY372H1/PSY405H1/PSY406H1/PSY475H1

Sociolinguistics: (3.0 credits) LIN100Y1; two of LIN228H1, LIN229H1, LIN232H1 or LIN241H1, LIN351H1 and LIN456H1

Psycholinguistics: (3.0 credits) LIN100Y1; two of LIN228H1, LIN229H1, LIN232H1 or LIN241H1; two of JLP374H1, JLP315H1 or JLP471H1

Astronomy & Astrophysics: (2.5 or 3.0 credits) (PHY131H1 and PHY132H1)/(PHY151H1 and PHY152H1); AST221H1, AST222H1; (PHY522H1 and AST320H1)/AST325H1/AST326Y1

Sociology: (2.5 credits) (SOC100H1 and SOC150H1) with a combined minimum grade average of 65%; SOC204H1; 1.0 credit from SOC303H1, SOC312H1, SOC336H1, SOC355H1, SOC363H1, SOC364H1.

Students interested in advanced study in Sociology should consider additional courses, in particular SOC201H1, SOC251H1, and SOC254H1

Ecology: (3.0 credits) BIO120H1, BIO220H1; 2.0 credits from (with at least a 0.5 credit at the 400-level) EEB319H1/EEB321H1/EEB328H1/EEB365H1/EEB424H1/EEB433H1/EEB440H1 or ENV234H1/ENV334H1/ENV432H1

Evolutionary Biology: (3.5 credits) BIO120H1, BIO130H1, BIO220H1; 1.5 credits from HMB265H1/BIO260H1/EED318H1, EED323H1, EED324H1, EED325H1, EED362H1, EED352H1; 0.5 credit from EEB440H1, EEB455H1, EEB459H1, EEB460H1

Notes:
- BIO260H1 requires BIO230H1 as a prerequisite.
- Students in the Focus in Evolutionary Biology can request that HMB waive the co-requisite of BIO230H1 for HMB265H1 and that EEB waive the prerequisite of BIO230H1 for EEB460H1. These waivers will only be considered for students in the Applied Statistics specialist focus in Evolutionary Biology. All other pre- and co-requirements are required.

Economics: (3.5 credits) (ECO101H1 and ECO102H1), ECO200Y1/ECO206Y1/ECO202Y1/ECO208Y1, 0.5 credit 300+ series ECO course with the exception of ECO374H1 and ECO375H1

Biochemistry: (3.0 credits) CHM135H1, CHM136H1, BCH210H1, BCH311H1, BCH370H1, BCH441H1

Physics: (2.5 credits) PHY131H1, PHY151H1, PHY132H1, PHY152H1, PHY224H1, PHY252H1, PHY254H1, PHY256H1, PHY324H1
Specialist in Statistical Science: Theory and Methods (Science Program) - ASSPE2290

**Description:**

Statistical Science encompasses methods and tools for obtaining knowledge from data and for understanding the uncertainty associated with this knowledge. The purposes of the undergraduate programs are to: (1) equip students with a general framework for obtaining knowledge from data; (2) give students skills that they are able to flexibly apply to a variety of problems; and (3) to provide students with the ability to learn new methods as needs, data sources, and technology change.

The Specialist Program in Statistical Science: Theory and Methods emphasizes probability and the theory of statistical inference as underlying mathematical frameworks for statistical data analysis. Students in the program acquire advanced expertise in statistical theory and methods, as well as an understanding of the role of statistical science to solve problems in a variety of contexts. The successful student will also acquire skills in mathematical reasoning, computational thinking, and communication in the context of solving statistical problems.

**Enrolment Requirements:**

This is a limited enrolment program. Note there are different admission criteria depending on whether a student has completed between 4.0 and 8.5 credits, or 9.0 or more credits.

**For students who have completed between 4.0 and 8.5 credits:**

**Completed Courses (some with minimum grades)**

The following courses are required:

- STA130H1
- CSC108H1/ CSC120H1/ CSC148H1
- MAT223H1/ MAT240H1
- MAT137Y1 (65%) / MAT157Y1 (65%)

**Variable Minimum Grade Average**

A minimum grade average in STA130H1 and MAT137Y1 / MAT157Y1 is needed for entry. This minimum grade average changes each year depending on available spaces and the number of applicants.

**For students who have completed 9.0 or more credits:**

**Completed Courses (some with minimum grades)**

The following courses are required:

- CSC108H1/ CSC120H1/ CSC148H1
- MAT223H1/ MAT240H1
- MAT237Y1/ MAT257Y1
- STA257H1 (65%) and STA261H1 (65%)

**Variable Minimum Grade Average**

A minimum grade average in (STA257H1 and STA261H1) and MAT237Y1 / MAT257Y1 is needed for entry. This minimum grade average changes each year depending on available spaces and the number of applicants.

**Completion Requirements:**

(11.0 credits)

**First Year:**

STA130H1, CSC108H1/ CSC120H1/ CSC148H1, MAT137Y1/ MAT157Y1, MAT223H1/ MAT240H1

**Second Year:**

MAT224H1/ MAT247H1, MAT237Y1/ MAT257Y1; STA257H1, STA261H1

**Higher Years:**

1. STA302H1, STA303H1, STA304H1/ STA305H1, STA313H1/ STA314H1/ STA365H1, STA347H1, STA355H1
2. 1.0 credit from the following list: STA410H1, STA414H1, STA437H1, STA442H1, STA457H1, STA465H1, STA475H1, STA480H1
3. One of STA447H1, STA452H1, STA453H1
4. 1.0 credit from: ACT451H1, ACT452H1, ACT460H1, MAT327H1, MAT332H1, MAT334H1/MAT354H1, MAT337H1/MAT357H1, MAT301H1/MAT347Y1, MAT344H1, CSC207H1, CSC336H1, CSC343H1, STA300+ level courses (excluding STA310H5)
5. One of STA492H1, STA496H1/ STA497H1/ STA498Y1/ STA499Y1 or successful completion of an internship involving Statistics when an internship program becomes available.

Note: Students planning to take any of these courses should ensure they have the required prerequisites.

Statistics Major (Science Program) - ASMAJ2289

**Description:**

Statistical Science encompasses methods and tools for obtaining knowledge from data and for understanding the uncertainty associated with this knowledge. The purposes of the undergraduate programs are to: (1) equip students with a general framework for obtaining knowledge from data; (2) give students skills that they are able to flexibly apply to a variety of problems; and (3) to provide students with the ability to learn new methods as needs, data sources, and technology change.

The Major in Statistics gives students a broad understanding of the statistical methods and computational and communication skills appropriate for effective statistical problem solving. The successful student will also acquire a general understanding of the role of mathematical thinking to support the development and evaluate the properties of statistical methods. While the Major is designed to complement study in an area of application of quantitative methods, students in the Major may choose to have a greater focus in probability and statistical theory through elective courses.

**Enrolment Requirements:**

This is a limited enrolment program. Note there are different admission criteria depending on whether a student has completed between 4.0 and 8.5 credits, or 9.0 or more credits.
For students who have completed between 4.0 and 8.5 credits:

Completed Courses
The following courses are required:

• STA130H1
• (MAT135H1 and MAT136H1)/MAT137Y1/MAT157Y1

Variable Minimum Grade Average
A minimum grade average in STA130H1 and (MAT135H1 and MAT136H1)/MAT137Y1/MAT157Y1 is needed for entry. This minimum grade average changes each year depending on available spaces and the number of applicants.

Note:
Students who take (MAT135H1 and MAT136H1) will typically require a higher minimum grade average than students who take MAT137Y1/MAT157Y1.

For students who have completed 9.0 or more credits:

Completed Courses
The following courses are required:

• CSC108H1/CSC120H1/CSC148H1
• MAT223H1/MAT240H1
• MAT235Y1/MAT237Y1/MAT257Y1
• (STA237H1 and STA238H1)/ (STA247H1 and STA248H1)/ (STA257H1 and STA261H1)/ ECO227Y1

Variable Minimum Grade Average
A minimum grade average in (STA237H1 and STA238H1)/ (STA247H1 and STA248H1)/ (STA257H1 and STA261H1)/ ECO227Y1 and MAT235Y1/MAT237Y1/MAT257Y1 is needed for entry. This minimum grade average changes each year depending on available spaces and the number of applicants.

Note:
Students who take (STA237H1 and STA238H1)/ (STA247H1 and STA248H1) will typically require a higher minimum grade average than students who take (STA257H1 and STA261H1)/ ECO227Y1.

Completion Requirements:
(7.0 credits, including a 0.5 credit STA 400-series course)

First Year:
STA130H1, CSC108H1/CSC120H1/CSC148H1, (MAT135H1, MAT136H1)/MAT137Y1/MAT157Y1.

(MAT223H1/MAT240H1 recommended in 1st year)

Second Year:
MAT223H1/MAT240H1, MAT235Y1/MAT237Y1/MAT257Y1;
(STA247H1, STA248H1)/ (STA237H1, STA238H1)/ (STA257H1, STA261H1)/ ECO227Y1

(STA237H1 and STA238H1 are strongly recommended. MAT221H1 may not be used for this requirement.)

Higher Years:
1. STA302H1
2. 0.5 credit from STA313H1/STA314H1/STA365H1/STA347H1/STA355H1
3. 0.5 credit from STA414H1/STA437H1/STA442H1/STA457H1/STA465H1/STA475H1/STA480H1

4. 1.0 credit from all available STA300+ level courses, excluding STA310H5

Statistics Minor (Science Program) - ASMIN2289

Description:
Statistical Science encompasses methods and tools for obtaining knowledge from data and for understanding the uncertainty associated with this knowledge. The Minor in Statistics is designed to provide students with some exposure and skills in statistical methods. It complements programs in other disciplines which involve quantitative research.

Enrolment Requirements:
This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:
(4.0 credits)

First Year:
MAT133Y1 (70%)/(MAT135H1, MAT136H1)/MAT135Y/MAT137Y1/MAT157Y1, CSC108H1/CSC120H1/CSC148H1 (MAT135H1 and MAT136H1)/MAT137Y1/MAT157Y1 is strongly recommended).

STA130H1 is also strongly recommended.

Second Year:
MAT221H1 (70%)/(MAT223H1/MAT240H1, (STA220H1/STA221H1/ECO220Y1, STA255H1)/(STA237H1, STA238H1)/(STA247H1, STA248H1)/(STA257H1, STA261H1)/ECO227Y1

MAT221H1 (70%)/MAT223H1/MAT240H1 recommended in 1st year

Higher Years:
STA302H1

0.5 credit from all available STA300+ level courses (excluding STA310H5)

About Courses in Statistical Sciences

The statistics course offerings are intended not only for students in statistics programs of study, but also to serve the needs of the many other disciplines that use statistical methods.

• The first-year seminar courses, STA197H1, STA198H1 and STA199H1, are designed to provide first-year students with the opportunity to work closely with an instructor in a
small class setting. Note that these courses do not count toward a Statistics program of study.

- First year students wishing to enrol in a major or specialist program in the Department of Statistical Sciences must take STA130H1, which provides a broad introduction to statistical reasoning, data science, statistical computation and communication.

- The second year foundation courses (STA220H1, STA221H1, STA237H1, STA238H1, STA247H1, STA248H1, STA255H1, STA257H1, and STA261H1) are distinguished primarily by their mathematical demands, as indicated by the prerequisites. Students interested in pursuing more advanced study in probability and theoretical statistics should take STA257H1 and STA261H1. They are the most mathematically rigorous of the 2nd year courses and provide the greatest flexibility when choosing upper-year courses. They are required by students in the specialist programs in Statistical Science: Theory and Methods and Data Science. Students in the specialist program in Statistical Science: Methods and Practice or in the major program in Statistics may instead choose STA237H and STA238H1. Students in computer science programs of study can take STA247H1 and STA248H1. The courses STA288H1, STA220H1 and STA221H1 provide training in statistical reasoning and methods for students in other programs of study, with STA288H1 particularly designed for students in life science programs. Students interested in completing a minor in statistics can combine STA220H1 with STA255H1, which will provide preparation in probability and statistical theory sufficient for many of the upper year courses in statistical methods.

- Pre- and co-requisites are designed to ensure that students have the appropriate preparation for their courses. They are strictly enforced. However, exceptions can be considered for students who have taken an equivalent course at another university. If you have taken courses that are exclusions to pre- or co-requisite courses, though, you should be aware that these are not always equivalent to the requisite courses and may not be allowed.

### Statistical Sciences Courses

#### STA130H1 - An Introduction to Statistical Reasoning and Data Science

**Hours:** 24L/24P

This course, intended for students considering a program in Statistical Sciences, discusses the crucial role played by statistical reasoning in solving challenging problems from natural science, social science, technology, health care, and public policy, using a combination of logical thinking, mathematics, computer simulation, and oral and written discussion and analysis.

**Corequisite:** MAT135H1/MAT136H1/MAT137Y1/MAT157Y1. Strongly recommended: CSC108H1/CSC120H1/CSC148H1

**Distribution Requirements:** Science

**Breadth Requirements:** The Physical and Mathematical Universes (5)

#### STA197H1 - Thinking Better with Statistics

**Hours:** 24S

This course explores how our statistical intuitions and ways of thinking can let us down. There’s no need to be a math whiz to be a better statistical thinker. Everyone can become a more critical consumer of claims presented in media, advertisements and by politicians—especially those relevant to our own health and wealth. This course uses real-world examples and tours common and avoidable statistical traps and tricks. Restricted to first-year students. Not eligible for CR/NCR option.

**Distribution Requirements:** Science

**Breadth Requirements:** The Physical and Mathematical Universes (5)
STA198H1 - Probabilities Everywhere

Hours: 24S

This course examines the meaning and mathematics of probabilities, and how they arise in our everyday lives. Specific topics may include: the nature of coincidences, the concept of luck, games involving dice and cards, long run averages in casinos, margins of error in polls, the interpretation of medical studies, crime statistics, decision making, pseudorandomness, and Monte Carlo algorithms. Restricted to first-year students. Not eligible for CR/NCR option.

Prerequisite: Grade 12 Mathematics

Distribution Requirements: Science

Breadth Requirements: The Physical and Mathematical Universes (5)

STA199H1 - Statistical Evidence: Truth or Myth?

Hours: 24S

This course explores the impact Statistics has made and continues to make on everyday life through science, law, and the modern methods for information processing. Statistical principles will be illustrated using examples from real life including business, romance and health. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Science

Breadth Requirements: The Physical and Mathematical Universes (5)

STA201H1 - Why Numbers Matter

Hours: 36L

This course teaches non-science students the importance of quantitative reasoning to many different areas. It explores a variety of applications to such diverse subjects as economics, gambling, politics, poetry, graphics, music, medicine, demographics, sports, secret codes, and more, using only basic high school level mathematics combined with logical thinking.

Exclusion: MAT133Y1/MAT135H1/MAT136H1/MAT137Y1/ MAT157Y1/(MAT132H3, MAT133H3)/(MAT130H3, MAT136H3)/(MAT131H3, MAT137H3)/MAT135Y5/MAT137Y5/MAT157Y5. This course is not open to first-year students, nor to students enrolled in any science Major or Specialist program.

Distribution Requirements: Science

Breadth Requirements: The Physical and Mathematical Universes (5)

STA220H1 - The Practice of Statistics I

Hours: 36L

An introductory course in statistical concepts and methods, emphasizing exploratory data analysis for univariate and bivariate data, sampling and experimental designs, basic probability models, estimation and tests of hypothesis in one-sample and comparative two-sample studies. A statistical computing package is used but no prior computing experience is assumed. Note: STA220H1 does not count as a distribution requirement course.

Prerequisite: Grade 12 Mathematics and one University course in the physical, social, or life sciences

Breadth Requirements: The Physical and Mathematical Universes (5)

STA221H1 - The Practice of Statistics II

Hours: 36L/12T

Continuation of STA220H1 (or similar course), emphasizing major methods of data analysis such as analysis of variance for one factor and multiple factor designs, regression models, categorical and non-parametric methods (Note: STA221H1 does not count as a distribution requirement course).

Prerequisite: STA220H1/STA288H1/PSY201H1/GGR270H1/EEB225H1/STAB22H3/STA220H5

Breadth Requirements: The Physical and Mathematical Universes (5)
From STA237H1 - Probability, Statistics and Data Analysis I:

**Hours:** 36L/12T

An introduction to probability using simulation and mathematical frameworks, with emphasis on the probability needed for more advanced study in statistical practice. Topics covered include probability spaces, random variables, discrete and continuous probability distributions, probability mass, density, and distribution functions, expectation and variance, independence, conditional probability, the law of large numbers, the central limit theorem, sampling distributions. Computer simulation will be taught and used extensively for calculations and to guide the theoretical development.

**Prerequisite:** (MAT135H1, MAT136H1)/MAT137Y1/(MATA30H3, MATA36H3)/(MATA31H3, MATA37H3)/MAT135Y5/MAT137Y5/MAT157Y5

**Exclusion:** STA247H1, STA255H1, STA257H1, ECO227Y1, STAB52H3, STA256H5, ECO227Y5

**Distribution Requirements:** Science

**Breadth Requirements:** The Physical and Mathematical Universes (5)

From STA238H1 - Probability, Statistics and Data Analysis II:

**Hours:** 36L/12T

An introduction to statistical inference and practice. Statistical models and parameters, estimators of parameters and their statistical properties, methods of estimation, confidence intervals, hypothesis testing, likelihood function, the linear model. Use of statistical computation for data analysis and simulation.

**Prerequisite:** STA237H1/STA247H1/STA257H1/

STA256H5/STA260H5

**Distribution Requirements:** Science

**Breadth Requirements:** The Physical and Mathematical Universes (5)

From STA247H1 - Probability with Computer Applications:

**Hours:** 36L/12T

Introduction to the theory of probability, with emphasis on applications in computer science. The topics covered include random variables, discrete and continuous probability distributions, expectation and variance, independence, conditional probability, normal, exponential, binomial, and Poisson distributions, the central limit theorem, sampling distributions, estimation and testing, applications to the analysis of algorithms, and simulating systems such as queues (Note: STA247H1 does not count as a distribution requirement course).

**Prerequisite:** (MAT135H1, MAT136H1)/MAT137Y1/(MATA30H3, MATA36H3)/(MATA31H3, MATA37H3)/MAT135Y5/MAT137Y5/MAT157Y5/CSC148H1/CSCA48H3/CSC148H5

**Exclusion:** ECO227Y1/STA255H1/STA237H1/STA257H1/

STA256H5/STA256H5/ECO227Y5

**Breadth Requirements:** The Physical and Mathematical Universes (5)

From STA248H1 - Statistics for Computer Scientists:

**Hours:** 36L/12T

A survey of statistical methodology with emphasis on data analysis and applications. The topics covered include descriptive statistics, data collection and the design of experiments, univariate and multivariate design, tests of significance and confidence intervals, power, multiple regression and the analysis of variance, and count data. Students learn to use a statistical computer package as part of the course (Note: STA248H1 does not count as a distribution requirement course).

**Prerequisite:** STA237H1/STA247H1/STA257H1/

**Breadth Requirements:** The Physical and Mathematical Universes (5)
STA255H1 - Statistical Theory

**Hours:** 36L/12T

This course deals with the mathematical aspects of some of the topics discussed in STA220H1. Topics include discrete and continuous probability distributions, conditional probability, expectation, sampling distributions, estimation and testing, the linear model (Note: STA255H1 does not count as a distribution requirement course).

**Prerequisite:** STA220H1/STA221H1/ECO220Y1 (note: ECO220Y1 may be taken as a co-requisite)/STAB22H3/STA220H5/ECO220Y5; MAT133Y1 (70%)/(MAT135H1, MAT136H1)/MAT137Y1/MAT157Y1/ MATA32H3 (70%), MATA33H3 (70%))/(MATA30H3, MATA36H3)/(MATA31H3, MATA37H3)/MAT133Y5 (70%)/MAT135Y5/MAT137Y5/MAT157Y5

**Exclusion:** ECO227Y1/STA237H1/STA238H1/STA257H1/STA261H1/STA247H1/STA248H1/STAB52H3/STAB57H3/STA256H5

**Breadth Requirements:** The Physical and Mathematical Universes (5)

STA261H1 - Probability and Statistics II

**Hours:** 36L/12T

**Prerequisite:** STA257H1/STAB52H3/STA256H5

**Corequisite:** MAT235Y1/MAT237Y1/MAT257Y1/MATB42H3/MAT236H5; MAT223H1/MAT240H1/MATA23H3/MAT223H5/MAT240H5

**Exclusion:** ECO227Y1/STA238H1/STA257H1/STA260H5/ECO227Y5

**Breadth Requirements:** The Physical and Mathematical Universes (5)

STA257H1 - Probability and Statistics I

**Hours:** 36L/12T

A mathematically rigorous introduction to probability, with applications chosen to introduce concepts of statistical inference. Probability and expectation, discrete and continuous random variables and vectors, distribution and density functions, the law of large numbers. The binomial, geometric, Poisson, and normal distributions. The Central Limit Theorem. (Note: STA257H1 does not count as a distribution requirement course).

**Prerequisite:** (MAT135H1 (70%), MAT136H1 (70%))/MAT137Y1/MAT157Y1 (MAT137Y1/MAT157Y1 is strongly recommended)/MATA36H3 (70%)/MAT135Y5 (70%)/MAT136H1/MAT137Y1/MAT157Y1

**Exclusion:** ECO227Y1/STA237H1/STA247H1, STA248H1, MAT137H1, STAB52H3, STA256H5, ECO227Y5

**Breadth Requirements:** The Physical and Mathematical Universes (5)

JSC270H1 - Data Science I

**Hours:** 24L/24P

This course is restricted to students in the Data Science Specialist program. Data exploration and preparation; data visualization and presentation; and computing with data will be introduced. Professional skills, such as oral and written communication, and ethical skills for data science will be introduced. Data science workflows will be integrated throughout the course. These topics will be explored through case studies and collaboration with researchers in other fields.

**Prerequisite:** STA257H1, CSC207H1

**Corequisite:** STA261H1, MAT237Y1/MAT257Y1, CSC236H1/CSC240H1

**Breadth Requirements:** The Physical and Mathematical Universes (5)
STA288H1 - Statistics and Scientific Inquiry in the Life Sciences

Hours: 36L/18P

Introduction to statistics and its connection to all stages of the scientific inquiry process. Issues around data collection, analysis and interpretation are emphasized to inform study design and critical assessment of published research. Statistical software is used to conduct descriptive and inferential statistics to address basic life sciences research questions.

Prerequisite: BIO230H1/BIO255H1
Exclusion: STA220H1, PSY201H1, GGR270H1, ECO220Y1, ECO227Y1, SOC202H1, EEB225H1, HMB325H1, STA238H1, STA248H1, STA261H1, PCL376H1, STA215H5, STA220H5, STAB22H3
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

STA299Y1 - Research Opportunity Program

Credit course for supervised participation in faculty research project. Details at https://www.artsci.utoronto.ca/current/academics/research-opportunities/research-opportunities-program. Not eligible for CR/NCR option.

Distribution Requirements: Science

STA302H1 - Methods of Data Analysis I

Hours: 36L

Prerequisite: STA238H1/STA248H1/STA255H1/STA261H1/ECO220Y1/STAC67H3/STA302H5
Exclusion: STAC67H3, STA302H5
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

STA303H1 - Methods of Data Analysis II

Hours: 36L

Analysis of variance for one-and two-way layouts, logistic regression, loglinear models, longitudinal data, introduction to time series.

Prerequisite: STA302H1/STAC67H3/STA302H5
Exclusion: STAC51H3
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

STA304H1 - Surveys, Sampling and Observational Data

Hours: 36L

Design of surveys, sources of bias, randomized response surveys. Techniques of sampling; stratification, clustering, unequal probability selection. Sampling inference, estimates of population mean and variances, ratio estimation. Observational data; correlation vs. causation, missing data, sources of bias.

Exclusion: STAC50H3, STAC52H3, STA304H5
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

STA305H1 - Design and Analysis of Experiments

Hours: 36L

Prerequisite: STA302H1/STAC67H3/STA302H5
Exclusion: STAC50H3, STAC52H3, STA305H5
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)
STA313H1 - Data Visualization

Hours: 24L/12P

An introduction to data visualization and the use of visual and interactive representations of data to support human cognition. This course covers visualization techniques and algorithms based on principles from graphic design, perceptual psychology, cognitive science, and human-computer interaction. Topics include: graphic design, interaction, perception and cognition, communication, and ethics. Computational tutorials involve design review, implementation, and testing of information visualizations.

Prerequisite: At least 70% in CSC108H1 or at least 60% in CSC148H1; STA238H1/STA248H1/STA261H1/ECO227Y1

Distribution Requirements: Science

Breadth Requirements: The Physical and Mathematical Universes (5)

STA314H1 - Statistical Methods for Machine Learning I

Hours: 36L/12T

Statistical methods for supervised and unsupervised learning from data: training error, test error and cross-validation; classification, regression, and logistic regression; principal components analysis; stochastic gradient descent; decision trees and random forests; k-means clustering and nearest neighbour methods. Computational tutorials will support the efficient application of these methods.

Prerequisite: STA238H1/STA248H1/STA255H1/STA261H1/ECO227Y1/CSC108H1/CSC120H1/CSC148H1/CSCA08H3/CSCA48H3/CSCA20H3/CSC108H5/CSC148H5/MAT223H1/MAT240H1/MAT235Y1/MAT237Y1/MAT238Y1/MAT239Y1/MAT241H3/MAT242H3/(MAT232H5, MAT236H5)/(MAT233H5, MAT236H5)/(MAT233H5, MAT236H5) (Note: STA257H1, MAT223H1/MAT240H1, MAT237Y1/MAT257Y1 are very strongly recommended)

Corequisite: STA302H1/STA302H5

Exclusion: CSC411H1, CSC311H1, STA314H5, STA315H5, CSCC11H3, CSC411H5

Breadth Requirements: The Physical and Mathematical Universes (5)

STA347H1 - Probability

Hours: 36L

An overview of probability from a non-measure theoretic point of view. Random variables/vectors; independence, conditional expectation/probability and consequences. Various types of convergence leading to proofs of the major theorems in basic probability. An introduction to simple stochastic processes such as Poisson and branching processes.

Prerequisite: STA247H1/STA255H1(70%)/STA257H1(70%)/STA257H1/ECA227Y1/STAB52H3/STA256H5/MAT223H1/MAT240H1/MAT233H1/MAT237H1/MAT240H5/MAT235Y1/(MATB41H3, MATB42H3)/(MAT232H5, MAT236H5)/(MAT233H5, MAT236H5)/(MAT233H5, MAT236H5) (Note: STA257H1, MAT223H1/MAT240H1, MAT237Y1/MAT257Y1 are very strongly recommended)

Exclusion: MAT377H1/STAC62H3

Distribution Requirements: Science

Breadth Requirements: The Physical and Mathematical Universes (5)

STA355H1 - Theory of Statistical Practice

Hours: 24L/12P

STA355H1 provides a unifying structure for the methods taught in other courses, and will enable students to read methodological research articles or articles with a large methodological component. Topics covered include statistical models and distributions; fundamentals of inference: estimation, hypothesis testing, and significance levels; likelihood functions and likelihood-based inference; prior distributions and Bayesian inference.

Prerequisite: STA255H1 (75%)/STA238H1 (75%)/STA248H1 (75%)/STA238H1 (75%)/STA261H1 (60%)/ECO227Y1 (60%)/STA257H5 (60%)/STA260H5 (60%)/ECO227Y5 (60%); MAT235Y1/MAT237Y1/MAT238Y1/(MATB41H3, MATB42H3)/(MAT232H5, MAT236H5)/(MAT233H5, MAT236H5)/(MAT233H5, MAT236H5); MAT223H1/MAT240H1/MAT237Y1/MAT240H5

Exclusion: STAC58H3

Recommended Preparation: CSC108H1/CSC120H1/CSC121H1/CSC148H1

Distribution Requirements: Science

Breadth Requirements: The Physical and Mathematical Universes (5)
STA365H1 - Applied Bayesian Statistics

Hours: 36L

Bayesian inference has become an important applied technique and is especially valued to solve complex problems. This course first examines the basics of Bayesian inference. From there, this course looks at modern, computational methods and how to make inferences on complex data problems.

Prerequisite: STA302H1/STAC67H3/STA302H5
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

JSC370H1 - Data Science II

Hours: 24L/24P

This course is restricted to students in the Data Science Specialist program. Students will learn to identify and answer questions through the application of exploratory data analysis, data visualization, statistical methods or machine learning algorithms to complex data. Software development for data science and reproducible workflows. Communication of statistical information at various technical levels, ethical practice of data analysis and software development, and teamwork skills. Topics will be explored through case studies and collaboration with researchers in other fields.

Prerequisite: JSC270H1, STA261H1, MAT237Y1/MAT257Y1, CSC263H1, STA302H1, CSC343H1
Corequisite: STA303H1/STA305H1
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

STA398H0 - Research Excursions

Distribution Requirements: Science

STA398Y0 - Research Excursions

Distribution Requirements: Science

STA399Y1 - Research Opportunity Program

Credit course for supervised participation in faculty research project. Details at https://www.artsci.utoronto.ca/current/academics/research-opportunities/research-opportunities-program. Not eligible for CR/NCR option.

STA410H1 - Statistical Computation

Hours: 36L

Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

STA414H1 - Statistical Methods for Machine Learning II

Hours: 36L

Probabilistic foundations of supervised and unsupervised learning methods such as naive Bayes, mixture models, and logistic regression. Gradient-based fitting of composite models including neural nets. Exact inference, stochastic variational inference, and Markov chain Monte Carlo. Variational autoencoders and generative adversarial networks.

Exclusion: CSC412H1
Recommended Preparation: STA303H1
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)
STAT422H1 - Theory of Statistical Inference

Hours: 36L

This course examines current theory of statistical inference, particularly likelihood-based methods and Bayesian methods with an emphasis on resolving present conflicts; log-model expansion and asymptotics are primary tools.

Prerequisite: STA355H1
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

STAT437H1 - Methods for Multivariate Data

Hours: 24L/12P

Practical techniques for the analysis of multivariate data; fundamental methods of data reduction with an introduction to underlying distribution theory; basic estimation and hypothesis testing for multivariate means and variances; regression coefficients; principal components and partial, multiple and canonical correlations; multivariate analysis of variance; profile analysis and curve fitting for repeated measurements; classification and the linear discriminant function.

Prerequisite: STA302H1/STA352Y1/STAC67H3/STA302H5 (MAT224H1/MAT247H1 recommended)
Exclusion: STA223H1/MAT240H1/
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

STAT442H1 - Methods of Applied Statistics

Hours: 36L

Advanced topics in statistics and data analysis with emphasis on applications. Diagnostics and residuals in linear models, introduction to generalized linear models, graphical methods, additional topics such as random effects models, designed experiments, model selection, analysis of censored data, introduced as needed in the context of case studies.

Prerequisite: STA303H1/(STAC67H3, STAC51H3); CSC108H1/CSC120H1/CSC148H1/CSCA08H3/CSCA48H3/CSCA20H3/CSC108H5/CSC148H5
Exclusion: STA441H5
Recommended Preparation: At least an additional 1.0 FCE in STA courses at the 300 or 400 level
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

STAT447H1 - Stochastic Processes

Hours: 36L

Discrete and continuous time processes with an emphasis on Markov, Gaussian and renewal processes. Martingales and further limit theorems. A variety of applications taken from some of the following areas are discussed in the context of stochastic modeling: Information Theory, Quantum Mechanics, Statistical Analyses of Stochastic Processes, Population Growth Models, Reliability, Queuing Models, Stochastic Calculus, Simulation (Monte Carlo Methods).

Prerequisite: STA347H1/MAT377H1/STAC62H3
Exclusion: STA348H5, STAC63H5
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

STAT450H1 - Topics in Statistics

Hours: 36L

Topics of current research interest are covered. Topics change from year to year, and students should consult the department for information on material presented in a given year.

Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

STAT452H1 - Mathematical Statistics I

Hours: 36L

Statistical theory and its applications at an advanced mathematical level. Topics include probability and distribution theory as it specifically pertains to the statistical analysis of data. Linear models and the geometry of data, least squares and the connection to conditional expectation. The basic concept of inference and the likelihood function.

Prerequisite: MAT223H1/MAT240H1/
MAT223H3/MAT223H5/MAT240H5; MAT235Y1/MAT237Y1/
MAT237Y1/(MATB41H3, MATB42H3)/(MAT232H5,
MAT236H5)/(MAT233H5, MAT236H5); (STA257H1,
STA355H1)/STA347H1. Note: MAT237Y1/MAT257Y1; (MAT223H1,
MAT224H1)/MAT240H1 very strongly recommended.
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)
STA453H1 - Mathematical Statistics II

Hours: 36L

Continuation of STA452H1: statistical theory and its applications at an advanced mathematical level. Topics include classical estimation, theory with methods based on the likelihood function and the likelihood statistics. Testing hypothesis and the evaluation of conference from both a bayesian and frequentist point of view.

Prerequisite: STA452H1
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

STA457H1 - Time Series Analysis

Hours: 36L

An overview of methods and problems in the analysis of time series data. Topics include: descriptive methods, filtering and smoothing time series, theory of stationary processes, identification and estimation of time series models, forecasting, seasonal adjustment, spectral estimation, bivariate time series models.

Prerequisite: STA302H1/STAC67H3/STA302H5; MAT235Y1/ MAT237Y1/MAT257Y1/(MATB41H3, MATB42H3)/(MAT232H5, MAT236H5)/(MAT233H5, MAT236H5)
Exclusion: STAT57H3, STA457H5
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

STA465H1 - Theory and Methods for Complex Spatial Data

Hours: 36L

Data acquisition trends in the environmental, physical and health sciences are increasingly spatial in character and novel in the sense that modern sophisticated methods are required for analysis. This course will cover different types of random spatial processes and how to incorporate them into mixed effects models for Normal and non-Normal data. Students will be trained in a variety of advanced techniques for analyzing complex spatial data and, upon completion, will be able to undertake a variety of analyses on spatially dependent data, understand which methods are appropriate for various research questions, and interpret and convey results in the light of the original questions posed.

Prerequisite: STA302H1/STAC67H3/STA302H5, STA303H1
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

STA475H1 - Survival Analysis

Hours: 36L

An overview of theory and methods in the analysis of survival data. Topics include survival distributions and their applications, parametric and non-parametric methods, proportional hazards regression, and extensions to competing risks and multistate modelling.

Prerequisite: STA303H1
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

JSC470H1 - Data Science III

Hours: 24L/24P

This course is restricted to students in the Data Science Specialist program. Research topics and applications of data science methods will be explored through case studies and collaboration with researchers in other fields. Data analysis, visualization, and communication of statistical information at various technical levels, ethical practice of data analysis and software development, and teamwork skills.

Prerequisite: JSC370H1, STA314H1/CSC411H1/CSC311H1, STA303H1/STA305H1
Exclusion: STA490Y1
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

STA480H1 - Fundamentals of Statistical Genetics

Hours: 36L/9P

Statistical analysis of genetic data is an important emerging research area with direct impact on population health. This course provides an introduction to the concepts and fundamentals of statistical genetics, including current research directions. The course includes lectures and hands-on experience with R programming and state-of-the-art statistical genetics software packages.

Prerequisite: STA303H1
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)
STA490Y1 - Statistical Consultation, Communication, and Collaboration

Previous Course Number: STA490H1
Hours: 48L/48P

Through case studies and collaboration with researchers in other disciplines, students develop skills in the collaborative practice of Statistics. Focus is on pragmatic solutions to practical issues including study design, dealing with common complications in data analysis, and ethical practice, with particular emphasis on written communication.

Prerequisite: STA303H1, STA304H1/STA305H1, STA355H1 (An application is required to be considered for this course. Information about this special enrolment course as well as a link to the online application form is available on the Department of Statistical Sciences website. Priority will be given to students who complete the application during the priority enrolment period the summer before the course is offered and who are completing all requirements of the Specialist in Statistical Science: Methods and Practice or the Applied Statistics Specialist that academic year.)
Corequisite: one additional 400 level STA course
Exclusion: STA490H1
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

STA492H1 - Seminar in Statistical Science

Hours: 36S

This course is intended for students completing the Statistical Science: Theory and Methods Specialist program. Novel influential ideas and current research topics in statistics will be explored through readings and discussion. Content will generally vary from semester to semester. Student presentations and written reports will be required.

Prerequisite: STA355H1 (Permission of instructor. An application is required to be considered for this course. Information about this special enrolment course as well as a link to the online application form is available on the Department of Statistical Sciences website. Priority will be given to students who complete the application during the priority enrolment period the summer before the course is offered and who are completing all requirements of the Specialist in Statistical Science: Theory and Methods or the Statistics Specialist that academic year.)
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

STA496H1 - Readings in Statistics

Independent study under the direction of a faculty member. Students wishing to take this course must have the permission of the Department of Statistical Sciences and of the prospective supervisor. Not eligible for CR/NCR option.

Prerequisite: At least 1.0 FCE 300+ level STA courses with a minimum grade of 80% in each course.
Exclusion: STA497H1/STA498Y1/STA499Y1
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

STA497H1 - Readings in Statistics

Independent study under the direction of a faculty member. Students wishing to take this course must have the permission of the Department of Statistical Sciences and of the prospective supervisor. Not eligible for CR/NCR option.

Prerequisite: At least 1.0 FCE 300+ level STA courses with a minimum grade of 80% in each course.
Exclusion: STA496H1/STA498Y1/STA499Y1
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

STA498Y1 - Readings in Statistics

Independent study under the direction of a faculty member. Students wishing to take this course must have the permission of the Department of Statistical Sciences and of the prospective supervisor. Not eligible for CR/NCR option.

Prerequisite: At least 1.0 FCE 300+ level STA courses with a minimum grade of 80% in each course.
Exclusion: STA496H1/STA497H1/STA499Y1
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

STA499Y1 - Readings in Statistics

Independent study under the direction of a faculty member. Students wishing to take this course must have the permission of the Department of Statistical Sciences and of the prospective supervisor. Not eligible for CR/NCR option.

Prerequisite: At least 1.0 FCE 300+ level STA courses with a minimum grade of 80% in each course.
Exclusion: STA496H1/STA497H1/STA498Y1
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)
Trinity College

Faculty List

Professors
- D.P.H. Allen, MA, B. Phil, D. Phil
- R. Bothwell, MA, PhD
- C. Brittain PhD (Dean of Divinity and Margaret E. Fleck Chair in Anglican Studies)
- M. Morin, LL.B, LL.M, SJ(D (ES&L Program)
- M. Ratcliffe, BSc, PhD
- I. Zeitlin, PhD (First Year Foundations)

Associate Professor
- J. Billelt, M.Phil., PhD (First Year Foundations)
- S. Scharper PhD (Trinity One Program)

Assistant Professors
- J. Duncan, MA, PhD (Director, Ethics, Society, & Law Program)
- C. Ewing, PhD (International Relations Program)
- M.J. Kessler, PhD (Director, Trinity One Program)
- T. Sayle, PhD (Director, International Relations Program)

Adjunct Professors
- J. Leitch, LL.M, PhD (Ethics, Society & Law)

Sessional Lecturers
- G. Bareeb, PhD Candidate (International Relations Program)
- L. Boehm, MPhSc, MA (First Year Foundations)
- M. Braunstein, BSc, MSc, PhD (Trinity One Program)
- J. Cammaert- Raval PhD (Trinity One Program)
- S. J. Cunningham, PhD (International Relations Program)
- S. Davis, MA, PhD (Trinity One Program and Associate Director, ES&L Program)
- J. M. Dirks, PhD (International Relations Program)
- G. Donaghy, BA, MA, PhD (International Relations Program & Director, Bill Graham Centre for Contemporary International History)
- H. Evans Cameron, BA, LL.B, SJ(D (ES&L Program)
- J. Fitzgibbon, PhD (Trinity One, Associate Director Trinity One Program)
- J. Herold, BA, MA, PhD (First Year Foundations)
- B. Kelly, PhD (International Relations Program)
- A. Kislenko, MA, PhD (Trinity One Program)
- M. Kunz, PhD Candidate (International Relations Program)
- D. Laverty, BA, PhD (Other Trinity Courses and ES&L Program)
- P. Patchet-Golubev
- R. Rahbar, PhD (Trinity One Program)
- O. Rojas, PhD (Trinity One Program)
- N. Spiegelaar, PhD (Trinity One Program)
- S. Stevenson, MA, PhD (First Year Foundations)

Introduction

Trinity College offers Trinity One, a set of first-year courses, an independent studies program, and three inter-disciplinary programs: Ethics, Society, and Law; Immunology; International Relations. The Major Program in Ethics, Society, and Law assembles courses offered by a variety of Departments and Colleges, including History, Philosophy, Political Science, Religion, Sociology, Woodsworth College and Trinity College. The Specialist and Major Programs in Immunology are assembled from offerings by the Departments of Biochemistry, Immunology, Molecular Genetics. The International Relations Program encompasses courses offered by the Departments of History, Political Science, Economics and Trinity College.

The Margaret MacMillan Trinity One Program

Trinity One provides first-year students with the opportunity to explore together significant issues and ideas pertaining to the conduct of human life and world affairs. Trinity One has six streams, each linked to a prominent aspect of the College’s intellectual identity: Policy, Philosophy, & Economics; Ethics, Society, & Law; International Relations; Medicine & Global Health; Biomedical Health; and Environment & Sustainability. Each stream includes two seminar courses limited to 25 students. These courses foster small-group discussion and emphasize the development of critical-thinking, oral-presentation, writing and research skills. Co-curricular events enable students in the streams of Trinity One to hear guest speakers and to engage in informal conversation with one another and with their professors. Please see the Trinity One webpages.

Ethics, Society, and Law

The Ethics, Society and Law program allows undergraduates to explore some of the most crucial questions facing contemporary society, and to do so by means of an explicitly interdisciplinary approach. The humanities, social sciences and natural sciences all provide useful lenses for study and distinctive skill sets. Students are required to cover core areas in each of the streams; they additionally select their own areas of focus from optional courses in fields like philosophy, religion, anthropology, women and gender studies, economics, geography, political science, sociology and criminology. Engaging across disciplines, E, S and L majors acquire a strong critical preparation for well-informed, effective analysis and action, which will serve them professionally, locally and as members of the global community. Please see the ES&L webpages.

International Relations

The study of international relations dates back to antiquity and remains one of the most vital disciplines in the academic community. Its purpose is to explore the enduring questions of the origins of war and the maintenance of peace, prosperity, sustainability and well-being, the nature and exercise of power within the international system, and the changing character of the participants and process and outcomes in international decision-making.

Drawing on the strengths of faculty members in History, Political Science, Economics and related disciplines, the International Relations Program offers a structured and interdisciplinary education. The program provides students with knowledge of the historical and contemporary dimensions of the international system while introducing them to the methodologies employed in historical, political, economic and social scientific analysis.

The International Relations Specialist and Major are limited enrolment programs. For more information, please consult the International Relations Program webpages.

Immunology Studies

For more information please see the entry under Immunology or the Immunology departmental website.

Independent Studies

Consult the Director, Dr. Gillian Gillison, Trinity College (office is located in room 319 Larkin Building).

The Trinity College Independent Studies Program is open to students of all colleges. Only full-time students are eligible to apply. The program allows you to undertake extensive research into a topic that interests you, and is an especially suitable way of doing
interdisciplinary work on subjects that are not directly part of the present university curriculum. Enrollment is open until the end of the first week of the semester in which the course will begin.

Participation in the program is restricted to students who have completed at least 10 courses (FCEs) and have maintained a CGPA of at least 3.50. Students applying to the Trinity Program must already have the agreement of a full-time faculty member of the University to act as supervisor for either a half course or a full year Independent Study course. The maximum number of independent studies half courses for which a student may receive credit is one, and the maximum number of independent studies full course equivalents for which a student may receive credit is two, typically one credit in third year and one credit in fourth year. Permission to undertake Trinity independent studies projects for the equivalent of two full courses will normally be granted only to students with a cumulative GPA of at least 3.70. Your proposal must be approved by your supervisor and accepted by the director of the program, Dr. Gillian Gillison.

Course numbers are as follows: Students enrolling for the first time register for one or more of TRN300H1, TRN301Y1, TRN302Y1 (third year), or for one or more of TRN400H1, TRN404Y1, TRN405Y1 (fourth year), as appropriate. Those enrolling for a second time register in one of TRN400H1, TRN404Y1, and TRN405Y1, as appropriate. Enrolment in third year TRN independent studies courses is not a prerequisite for fourth year TRN independent studies courses but students who initially enrol in fourth year TRN independent studies courses may not subsequently enrol in third year TRN independent studies courses.

Students are enrolled in TRN independent studies courses by the Dean of Arts’ office at Trinity College. Students should complete the enrolment approval process in enough time to be enrolled no later than the end of the first week of classes in the relevant term.

Please note that a TRN independent studies course is not a “directed reading” course. The expectation is that students should do original research and provide a report of this research as part of their evaluation.

Students are required to identify a second reader for their final report, in addition to their direct supervisor, whose evaluation of the paper will form part of their final grade for the course. The second reader should also be a Faculty member.

Students are required to file a graded progress report with the director of the program, Dr. Gillian Gillison, no later than two weeks before the last date for dropping the course without academic penalty. All work including final reports must be submitted on or before the last day of classes. The supervisor and second reader will then grade the report and copies of the final essay or report, one graded by the supervisor and one independently graded by the second reader must be emailed to the Director within one week of the last day of classes.

For more information, please see the Independent Studies webpage.

Trinity College Programs

Ethics, Society, and Law Major (Arts Program) - ASMAJ1618

Description:

The Ethics, Society and Law program allows undergraduates to explore some of the most crucial questions facing contemporary society, and to do so by means of an explicitly interdisciplinary approach. The humanities, social sciences and natural sciences all provide useful lenses for study and distinctive skill sets. Students are required to cover core areas in each of the streams; they additionally select their own areas of focus from optional courses in fields like philosophy, religion, anthropology, women and gender studies, economics, geography, political science, sociology and criminology. Engaging across disciplines, E, S and L majors acquire a strong critical preparation for well-informed, effective analysis and action, which will serve them professionally, locally and as members of the global community. Please see the ES&L webpages: http://www.trinity.utoronto.ca/current/programs-courses/esl/esl.html

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

Variable Minimum Grade Average

A minimum grade average in required courses is needed for entry, and this minimum changes each year depending on available spaces and the number of applicants. The following courses must be completed:

For students who have completed 4.0 to 8.5 credits:

• 3.0 credits from BR=2 and/or BR=3 and/or TRN170Y1

To ensure that students admitted to the program will be successful, applicants with a grade average lower than 77% will not be considered for admission. Please note that obtaining this minimum grade average does not guarantee admission to the program.

For students who have completed 9.0 credits:

• A minimum grade average of 77% in 3.0 credits that count toward the program, including 1.0 credit from: ETH201H1, ETH210H1, ETH220H1, ETH230H1, PHL265H1, PHL271H1, PHL275H1, and POL200Y1.

To ensure that students admitted to the program will be successful, applicants with a grade average lower than 77% will not be considered for admission. Please note that obtaining this minimum grade average does not guarantee admission to the program.

Completion Requirements:

(7.0 credits)

1. First year: While no specific courses are required in first year, course selection should take into account the program’s admission requirements above, as well as the prerequisites for 200+ level courses students plan to take to complete the program.
2. Second year: PHL271H1, TRN203H1, and TRN204H1 are required courses that students are recommended to take in second year (their first year of registration in the program).

3. Third year: TRN303H1, TRN312H1

5. 1.0 credit from ETH201H1, ETH210H1, ETH220H1, ETH230H1, ETH350H1, ETH401H1, PHL265H1, PHL275H1, POL200Y1, to be taken in any year of registration in the program.

6. 3.0 credits from Groups A-D, including at least a 0.5 credit from each of Groups A-C and at least 1.5 credits at the 300+ level. Courses taken in fulfillment of requirement 5 above may not be counted toward the Group courses here.

Group A (Ethics)
ETH201H1, ETH210H1, ETH220H1, ETH230H1, ETH350H1, ETH401H1, PHL273H1, PHL275H1, PHL281H1, PHL295H1, PHL341H1, PHL373H1, PHL375H1, PHL378H1, PHL380H1, PHL381H1, PHL382H1, PHL383H1, PHL384H1, PHL394H1, PHL407H1, POL303Y1, RLG221H1, RLG224H1, RLG228H1

Group B (Society)
ANT204H1; CSCI300H1; ECO313H1, ECO332H1, ECO336H1; ENV221H1, ENV222H1, ENV234H1, GGR114H1, HIS322H1, HPS324H1, JGE331H1, PHL235H1, PHL365H1, POL200Y1, POL214Y1, POL230Y1, POL412H1, POL432H1, PSY311H1, PSY321H1, SOC208H1, SOC212H1, SOC220H1, SOC265H1, SOC331H1, SOC330H1, SOC360H1, SOC367H1, CRI205H1, CRI210H1, CRI300H1, CRI335H1, CRI340H1, CRI380H1, CRI425H1, WGS373H1

Group C (Law)
CLA336H1; ECO320H1; ENV422H1, NMC484H1, PHL370H1, PHL416H1, POL337Y1, POL340Y1, SMC361H1, TRN304H1, TRN305Y1, TRN305Y1, TRN305Y1, TRN305Y1, TRN305Y1, TRN425Y1, CRI225H1, CRI365H1, WGS365H1

Group D (Further Courses)
RLG309H1, TRN200Y1, TRN320H1, TRN321H1, TRN406H1, TRN407Y1, and with permission of the director: TRN300H1, TRN303Y1, TRN302Y1, TRN400H1, TRN404Y1, TRN405Y1, TRN377Y1, TRN477H1, one FCE from TRN160Y1, TRN161Y1, TRN171Y1, TRN172Y1.

N.B. (1) The above CRI courses are available only to students enrolled in the double major program Ethics, Society, and Law/Criminology. (2) Access to courses in the Ethics, Society, and Law program is not guaranteed; students must check prerequisites.

International Relations Specialist (Arts Program) - ASSPE1469

Description:
The study of international relations dates back to antiquity and remains one of the most vital disciplines in the academic community. Its purpose is to explore the enduring questions of the origins of war and the maintenance of peace, the nature and exercise of power within an international system, and the changing character of the participants in international decision-making.

Drawing on the strengths of faculty members in History, Economics, and Political Science, the International Relations Specialist Program offers a structured and interdisciplinary education. The program provides students with knowledge of the historical and contemporary dimensions of the international system while introducing them to the methodologies employed in historical, political and economic analysis.

Enrolment Requirements:
This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

Variable Minimum Grade Average
A minimum grade average in required courses is needed for entry, and this minimum changes each year depending on available spaces and the number of applicants. The following courses must be completed:

- (ECO101H1 and ECO102H1) with a minimum grade of 63% in each, or ECO105Y1 with a minimum grade of 80%
- 2.0 credits from GGR112H1, HIS102Y1, HIS103Y1, MUN101H1, MUN102H1, MUN105Y1, POL101H1, POL106H1, POL107H1, POL109Y1, TRN150Y1, TRN151Y1, TRN152Y1, VIC181H1, VIC183H1, VIC184H1, VIC185H1, with a minimum grade of 70% in each course.

To ensure that students admitted to the program will be successful, applicants with a final grade lower than the minimum grades stated above will not be considered for admission. Please note that obtaining these minimum final grades does not guarantee admission to the program; admission will be based on the average of the required courses.

Note:
Completing ECO105Y1 limits future enrolment options in ECO courses. First-year MAT courses are a prerequisite for many optional ECO courses in the IR Program Requirements listed below. Students are strongly advised to enrol in MAT133Y1/ (MAT135H1 and MAT136H1)/ MAT137Y1/MAT157Y1 if they wish to pursue ECO electives.

Completion Requirements:

(13.0 credits)

Consult the Office of the International Relations Program, room 310N, Munk School of Global Affairs, 416-946-8950.

Year 1 (3.0 credits):
1. ECO101H1 and ECO102H1 OR ECO105Y1
2. 2.0 FCE from GGR112H1, HIS102Y1, HIS103Y1, MUN101H1, MUN102H1, MUN105Y1, POL101H1, POL106H1, POL107H1, POL109Y1, TRN150Y1, TRN151Y1, TRN152Y1, VIC181H1, VIC183H1, VIC184H1, VIC185H1

Year 2 (2.5 credits):
1. ECO231H1 and ECO232H1, OR ECO200Y1/ ECO202Y1/ ECO206Y1/ ECO208Y1. Students should note that completing (ECO231H1 and ECO232H1) limits future enrolment options in ECO courses.
2. POL208H1
3. TRN250Y1

Year 3 (4.0 credits):
1. 1.0 credit from: ECO320H1/ ECO341H1/ ECO342H1/ ECO362H1/ ECO364H1/ ECO365H1/ ECO368H1
2. 1.0 credit from: HIS311Y1/ HIS312H1/ HIS324H1/ HIS330H1/ HIS338H1/ HIS341Y1/ HIS343H1/ HIS344H1/ HIS347H1/ HIS350H1/ HIS359H1/ HIS361H1/ HIS364H1/ HIS377H1/ HIS379H1/ HIS385H1/ HIS386H1/ HIS397H1
4. 0.5 credit from: ECO351H1/ TRN307H1/ TRN308H1/ TRN377Y1/ Or any of the above not previously counted

Note: Those students choosing to add a Focus should be guided in their selection by the courses listed in their Focus group.

Year 4 (3.5 credits)

1. 1.0 credit from: TRN419Y1/ TRN421Y1
2. 2.5 credits from:

Note: Those students choosing to add a Focus should be guided in their selection by the courses listed in their Focus group.

Focus in International Economy (Specialist) - ASFOC1469C

Enrolment Requirements:

Enrolment in the International Relations Specialist is required for entry into this Focus.

Enrolment in this Focus is recommended after second year to guide choice of courses in the higher years. Please note normal course prerequisites will apply to all courses in the Focus.

Completion Requirements:

(2.5 FCE)

1. ECO341H1
2. ECO342H1
3. 1.5 FCE chosen from the following list:
   HIS312H1, POL312Y1, HIS402H1, HIS405Y1, HIS429H1, HIS430H1, POL467H1, TRN409H1 (Canadian Defense Policy since the end of the Cold War), TRN410H1 (Nuclear Weapons and International Politics), TRN419Y1, TRN410H1

Notes:
- Focus courses meet the basic IRP inclusion standard of substantially and directly addressing relations between and among countries at the state or society level.
- Students can request substitutions from the IRP Director
- Not all courses may be available at all times without scheduling conflicts.

Focus in Canadian Foreign & Security Relations (Specialist) - ASFOC1469B

Enrolment Requirements:

Enrolment in the International Relations Specialist is required for entry into this Focus.

Enrolment in this Focus is recommended after second year to guide choice of courses in the higher years. Please note normal course prerequisites will apply to all courses in the Focus.

Completion Requirements:

(2.5 FCE)

1. HIS311Y1

Focus in International Law & Human Rights (Specialist) - ASFOC1469E

Enrolment Requirements:

Enrolment in the International Relations Specialist is required for entry into this Focus.
Enrolment in this Focus is recommended after second year to guide choice of courses in the higher years. Please note normal course prerequisites will apply to all courses in the Focus.

**Completion Requirements:**

2.5 FCEs

1. **POL340Y1**
2. 1.5 FCE chosen from the following list:
   - ECO320H1, HIS338H1, HIS361H1, HIS397H1,
   - POL324H1, GGR419H1, HIS411H1, HIS465Y1,
   - HIS470H1, HIS487H1, HIS493H1, POL412H1, POL456Y1,
   - POL457Y1, POL468H1, TRN421Y1

**Notes:**

- Focus courses meet the basic IRP inclusion standard of substantially and directly addressing relations between and among countries at the state or society level.
- Students can request substitutions from the IRP Director
- Not all courses may be available at all times without scheduling conflicts.

**Focus in Transnational Exchanges (Specialist) - ASFOC1469G**

Enrolment Requirements:

Enrolment in the International Relations Specialist is required for entry into this Focus.

Enrolment in this Focus is recommended after second year to guide choice of courses in the higher years. Please note normal course prerequisites will apply to all courses in the Focus.

**Completion Requirements:**

2.5 FCE from the following list:

- ECO365H1, ECO368H1, HIS324H1, HIS341Y1, HIS369H1,
- HIS415Y1, HIS439H1, HIS494H1, JHA394H1, GGR324H1/
- POL371H1, GGR344H1/POL372H1, POL409H1, POL456Y1,
- POL445H1, POL472H1, TRN409H1 (Nuclear Weapons and International Politics), TRN410H1

**Notes:**

- Focus courses meet the basic IRP inclusion standard of substantially and directly addressing relations between and among countries at the state or society level.
- Students can request substitutions from the IRP Director
- Not all courses may be available at all times without scheduling conflicts.

**International Relations Major (Arts Program) - ASMAJ1469**

**Description:**

The study of international relations dates back to antiquity and remains one of the most vital disciplines in the academic community. Its purpose is to explore the enduring questions of the origins of war and the maintenance of peace, the nature and exercise of power within an international system, and the changing character of the participants in international decision-making.

Drawing on the strengths of faculty members in History, Economics, and Political Science, the International Relations Specialist Program offers a structured and interdisciplinary education. The program provides students with knowledge of the historical and contemporary dimensions of the international system while introducing them to the methodologies employed in historical, political and economic analysis.

**Enrolment Requirements:**

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

**Variable Minimum Grade Average**

A minimum grade average in required courses is needed for entry, and this minimum changes each year depending on available spaces and the number of applicants. The following courses must be completed:

- (ECO101H1 and ECO102H1) with a minimum grade of 63% in each, or ECO105Y1 with a minimum grade of 80%
- 1.0 credit from GGR112H1, HIS102Y1, HIS103Y1, MUN101H1, MUN102H1, MUN105Y1, POL101H1, POL106Y1, POL107H1, POL109H1, TRN150Y1, TRN151Y1, TRN152Y1, VIC181H1, VIC183H1, VIC184H1, VIC185H1, with a minimum grade of 70% in each course.

To ensure that students admitted to the program will be successful, applicants with a final grade lower than the minimum grades stated above will not be considered for admission. Please note that obtaining these minimum final grades does not guarantee admission to the program; admission will be based on the average of the required courses.

**Note:**

Completing ECO105Y1 limits future enrolment options in ECO courses. First-year MAT courses are a prerequisite for many optional ECO courses in the IR Program Requirements listed below. Students are strongly advised to enrol in MAT133Y1/ [MAT135H1 and MAT136H1] / [MAT137Y1] / [MAT157Y1] if they wish to pursue ECO electives.

**Completion Requirements:**

(7.5 credits)

**Year 1 (2.0 credits):**

1. **ECO101H1** and **ECO102H1**, OR **ECO105Y1**
2. 1.0 credit from **GGR112H1**, **HIS102Y1**, **HIS103Y1**, **MUN101H1**, **MUN102H1**, **MUN105Y1**, **POL101H1**, **POL106Y1**, **POL107H1**, **POL109H1**, **TRN150Y1**, **TRN151Y1**, **TRN152Y1**, **VIC181H1**, **VIC183H1**, **VIC184H1**, **VIC185H1**
Year 2 (2.5 credits):

1. ECO231H1 and ECO232H1, OR ECO200Y1/ECO202Y1/ECO206Y1/ECO208Y1. Students should note that completing (ECO231H1 and ECO232H1) limits future enrolment options in ECO courses.
2. POL208H1
3. TRN250Y1

Year 3 (2.5 credits):

1. TRN350H1
2. 1.0 credit from:
   - HIS311Y1/HIS312H1/HIS324H1/HIS330H1/HIS338H1/HIS341Y1/HIS343H1/HIS344H1/HIS347H1/HIS350H1/HIS359H1/HIS361H1/HIS364H1/HIS377H1/HIS379H1/HIS385H1/HIS386H1/HIS397H1/TRN307H1/TRN308H1
3. 1.0 credit from:

Year 4 (0.5 credit)

TRN409H1/ TRN410H1

Note: Those students choosing to add a Focus should be guided in their selection of courses at the third and fourth year level by the courses listed in the specific Focus group they choose.

Focus in Canadian Foreign & Security Relations (Major) - ASFOC1469A

Enrolment Requirements:

Enrolment in the International Relations Major is required for entry into the Focus.

Enrolment in this Focus is recommended after second year to guide choice of courses in the higher years. Please note normal course prerequisites will apply to all courses in the Focus.

Completion Requirements:

Note: this Focus requires completion of 0.5 FCE or more in addition to the 7.5 FCE required for the International Relations Major.

(2.5 FCEs)

1. POL340Y1
2. 1.5 FCE chosen from the following list:
   - ECO320H1/HIS338H1/HIS361H1/HIS397H1/POL324H1/GGR419H1/HIS411H1/HIS465Y1/HIS470H1/HIS487H1/HIS493H1/POL412H1/POL456Y1/POL457Y1/POL469H1/TRN421Y1

Notes:

• Focus courses meet the basic IRP inclusion standard of substantially and directly addressing relations between and among countries at the state or society level.
• Students can request substitutions from the IRP Director
• Not all courses may be available at all times without scheduling conflicts.

Focus in International Law & Human Rights (Major) - ASFOC1469D

Enrolment Requirements:

Enrolment in the International Relations Major is required for entry into the Focus.

Enrolment in this Focus is recommended after second year to guide choice of courses in the higher years. Please note normal course prerequisites will apply to all courses in the Focus.

Completion Requirements:

Note: this Focus requires completion of 0.5 FCE or more in addition to the 7.5 FCE required for the International Relations Major.

(2.5 FCEs)

1. POL340Y1
2. 1.5 FCE chosen from the following list:
   - ECO320H1/HIS338H1/HIS361H1/HIS397H1/POL324H1/GGR419H1/HIS411H1/HIS465Y1/HIS470H1/HIS487H1/HIS493H1/POL412H1/POL456Y1/POL457Y1/POL469H1/TRN421Y1

Notes:

• Focus courses meet the basic IRP inclusion standard of substantially and directly addressing relations between and among countries at the state or society level.
• Students can request substitutions from the IRP Director
• Not all courses may be available at all times without scheduling conflicts.

Focus in Transnational Exchanges (Major) - ASFOC1469F

Enrolment Requirements:

Enrolment in the International Relations Major is required for entry into the Focus.

Enrolment in this Focus is recommended after second year to guide choice of courses in the higher years. Please note normal course prerequisites will apply to all courses in the Focus.
Completion Requirements:

Note: depending on course selection, this Focus may require the completion of extra half-courses in addition to the 7.5 FCE required for the International Relations Major.

2.5 FCE from the following list:
ECO365H1, ECO366H1, HIS324H1, HIS341Y1, HIS369H1, HIS415Y1, HIS439H1, HIS494H1, JHA394H1, GGR324H1, POL371H1, GGR344H1/POL372H1, POL409H1, POL456Y1, POL445H1, POL472H1, TRN409H1 (Nuclear Weapons and International Politics), TRN410H1

Notes:

- Focus courses meet the basic IRP inclusion standard of substantially and directly addressing relations between and among countries at the state or society level.
- Students can request substitutions from the IRP Director
- Not all courses may be available at all times without scheduling conflicts.

Certificate in International Affairs (UofT Global Scholar) - ASCER1469

Enrolment Requirements:

This is an open enrolment Certificate. A student who has completed 4.0 credits may enrol in the Certificate.

Completion Requirements:

(Total: 2.5 credits)

1. 1.0 credit from EAS100Y1, EAS110Y1, EAS120Y1, EST100H1, EST101H1, FIN100H1, FIN110H1, FSL100H1, FSL102H1, FSL121Y1, GER100Y1, GER101H1, GRK101H1, HUN100Y1, INS210Y1, INS215Y1, INS220Y1, INS230H1, ITA100Y1, LAT101H1, LAT102H1, MGR100H1, NEW280Y1, NML100Y1, NML155H1, NML156H1, NML260Y1, NML270Y1, PRT100Y1, PRT120Y1, RLG260H1, RLG261H1, RLG262H1, RLG263H1, RLG264H1, SLA100H1, SLA101H1, SLA105Y1, SLA106H1, SLA107Y1, SLA108Y1, SLA109Y1, SLA116H1, SPA100Y1, SWE100H1, SWE101H1. Other introductory language classes may be approved by the Director of the International Relations Program.

2. 1.0 credit from TRN250Y1 or (POL208H1 + one of POL201H1, POL205H1, POL211H1, POL218H1, POL219H1, POL220H1, POL223H1, POL224H1)

3. 0.5 credit gained studying international affairs as part of an international experience.

Students are encouraged to discuss possible options with the Director of the International Relations Program.

Transfer credit equivalents of the following courses earned from participation in an international exchange or actual courses completed via the Summer Abroad program will qualify for this requirement:

A Global Classroom course, International Course Module, or Research Excursion Program dealing with some aspect of international affairs not captured in the above list may also fulfill the global experience requirement with approval of the Director of the International Relations Program.

Trinity College Courses

Listed in this order:

- Trinity One;
- Ethics, Society, and Law;
- Independent Studies;
- International Relations;
- Other

First Year Foundations (FYF)

The FYF seminars are designed to provide the opportunity to work closely with an instructor in a class of no more than thirty students. These interactive seminars are intended to stimulate the students’ curiosity and provide an opportunity to get to know a member of the professorial staff in a seminar environment during the first year of study.

Trinity One Courses

Students participating in other Foundational Year programs (e.g., Vic One, Munk One) are excluded from Trinity One.
TRN191H1 - Disaster and Terrorism: Religion and Ethics at Ground Zero

Hours: 24S

In response to contemporary terrorist attacks and natural disasters, many are led to cry, "The world will never be the same!" How should such statements be evaluated? What impact do they have on social and political life? This course explores religious and cultural responses to human tragedy and cultural shock. Discussion will attend to debates over the meaning of suffering, public reactions to terrorism, the traumas of natural disasters, and the role of media in covering such events. These themes are engaged from the perspectives of ethics, cultural theory, religious studies, and theology. The course focuses on popular responses to events that include: the Lisbon Earthquake of 1755, the First World War, the Holocaust, Hurricane Katrina, the Japanese experiences of Hiroshima and Fukushima, 9/11, and more recent examples of terrorism and disaster. Attention will be given to concerns such as the impact of trauma on social and political debate, the function of religious discourse in the face of tragedy, the nature of ideology, and the relationship between religion and violence. A thematic concern throughout the course will be the nature of ethical commitment in the midst of confusion and social disruption. Restricted to first-year students. Not available for CR/NCR option.

Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

TRN192H1 - Public Health in Canada: Health for the 21st Century

Hours: 24L

This course deals with preventive care and population health. It will also move into new areas like healthcare and the environment (climate change) and the greening of healthcare. It will look at health as an extension of democracy – of how health extends individual rights beyond the political realm to the social realm, of how it can build social capital and knit populations together. It will look at areas inimical to health, 'detriment to health' and how economic inequality can lead to health inequality. Along with this it will look at ways of empowering the individual, the public as agent and a role of public engagement by major institutions. It will also push beyond the popular determinants of health to engage students in a paradigm on next steps, the future challenges in population health. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

TRN193H1 - Canadian Health Policy: Past, Present and Future

Hours: 24L

This is a health systems course. It deals with illness care, individual health, and health insurance. It will take a comparative and historical approach. We will look at the genesis of Canadian healthcare, our benefits and those other countries provide (e.g., pharmacare, dental care). We will look at indirect contributors like childcare and basic income. We will examine the public-private debate. We will also take some novel approaches. One is that the university has an expanded role in the 21st century, one that involves public outreach, a role that includes healthcare. Recent academic literature on healthcare notes that it is nation-building. We will look at why. We will examine some cutting-edge ideas, like integrated care, the learning health system, the concept of customer-owners. We will explore whether our healthcare system needs to be anchored by 'institutions of excellence' and identify these. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

TRN194H1 - Literature and Wicked Problems

Hours: 24L

This course explores contemporary literature in relation to the interdisciplinary framework of "wicked problems." Research emphasizes that complex, entrenched problems, like government relations with Indigenous peoples or human impacts on the climate, involve interconnected systems and require approaches that cross disciplines and types of knowledge. The course examines the role of literary works (mostly 21st-century fiction) in addressing these issues of pressing concern to students as global citizens. Critical thinking, scholarly reading and database research are foundational skills that this course strengthens in order to prepare students for their writing in disciplines across the university. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)
TRN195H1 - The Literature of Heroes and Horrors

Hours: 24L

This course explores contemporary literary works that redefine heroism in light of personal and cultural trauma. What does recent literature (mostly 21st-century fiction) show us about the nature of heroism in our time? To answer this question, the course examines theories of psychological trauma, studies in the field of positive psychology, and research on gothic and dystopian literature. Critical thinking, scholarly reading and database research are foundational skills that the course strengthens in order to prepare students for their writing in disciplines across the university. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

TRN196H1 - The Last Roman: Boethius, his Consolation of Philosophy, and the Legacy of the Ancient World

Hours: 24L

Anicius Manlius Severinus Boethius (died 524) was the greatest scholar and statesman of Rome after its conquest by the barbarian Ostrogoths. When he was unjustly sentenced to death for treason, he wrote one of the great classics of Western literature, The Consolation of Philosophy. C. S. Lewis remarked of the work that "until about two hundred years ago it would, I think, have been hard to find an educated man in any European country who did not love it." Boethius confronts the most intractable questions of suffering humanity: Why do bad things happen to good people? What is the point of living a virtuous life? Do we really have free will, or is choice an illusion? In this seminar, we will learn about Boethius's world and his philosophical sources, and we will analyses the argument he offers in the Consolation. We will then see how Boethius's ideas are discussed by modern scholars and consider the relevance of Boethius's ideas to modern life. A highlight of the term will be a visit to the Fisher Rare Book Library to look at manuscripts and early printed books. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

TRN197H1 - In the Shadow of the Vikings: Depictions of the Early Norse in Medieval, Modern, and Post-Modern Culture

Hours: 24L

Although rarely attested during the historical era when they were active, since the early nineteenth century the word "Viking" has been popularly applied to describe groups of Scandinavian adventurers who marauded along the frontiers of Medieval Europe: in this respect, the image of "the Viking" may be regarded as much a modern, as it is a medieval, creation. The legacy of historical "Viking activities" was a factor in the development of modern nation states in Scandinavia and the Baltic region, and their contributions to the heritage of people residing in Britain, continental Europe, the Middle East, and even the Atlantic coast of Canada have been and continue to be cited to the present day. Aspects of culture attributed to "the Vikings"—their assumed independence, courage, resourcefulness, and tenacity in the face of adversity, as well as the occult characteristics of their cosmology—have, for better and worse, inspired modern artists, writers, composers, intellectuals, explorers and even political leaders, and persist in present day literature, art, music, sport and popular culture as well. Why and how do elements of historic Viking culture continue to evoke traditions and characteristics popularly attributed to "the Vikings"? What are some implications of "Viking-ness" for those people in the post-Viking Age past and/or present who we may regard—or may regard themselves—as the "cultural descendants" of the Vikings? In this seminar, participants will study selected cultural artifacts of the "post-Viking Age," along with recent multidisciplinary research, to observe how various "post-Viking Age" cultures and subcultures have selectively appropriated elements of the "Viking" past. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)
TRN198H1 - The Viking Phenomenon: Commerce, Conflict, and Communication along Europe's Frontiers, 7th – 15th Century

**Hours:** 24L

Perspectives on the impact that the Scandinavian raiders and traders popularly referred to as “Vikings” had on European and World history continue to develop as the work of historians, archaeologists, linguists, and scientists expands our understanding of the past. Recent research has revised the traditional view of the “Vikings” as primarily marauding warriors; in its place, a more complex and nuanced conception of the implications that “Viking activity” had on the social, economic, and political development of the peoples with whom they came in contact has emerged. This seminar will consider the relationship between the traditional conception of the “Viking warrior” and recent research that suggests the broader impact that the “Viking Phenomenon” had upon the economic revival and sociopolitical development of medieval Europe and its frontiers. In the course of the seminar, we will examine a selection of historical records and information concerning artifacts of the material culture of “The Viking Age” in order to better understand the activities of early medieval “Vikings,” not only as warriors, but also as agents of commerce, explorers, pioneers, and rulers. Restricted to first-year students. Not eligible for CR/NCR option.

**Distribution Requirements:** Humanities  
**Breadth Requirements:** Creative and Cultural Representations (1)

TRN199H1 - Classical Social and Political Thought from the 18th Century Enlightenment to the 20th Century

**Hours:** 24L

In the first part of the course, via lectures and readings, we will be examining the Enlightenment, the French and Industrial Revolutions, and the Romantic Conservative Reaction to these revolutions. In part two of the course, we will study Karl Marx, who coined the term "capitalism" to describe the new type of society that had emerged as a product of the Industrial Revolution. Marx, as the severest critic of the capitalist system, called attention to its alienating character. In the 19th Century, his ideas provoked a response that accounts, in large measure, for the character of Western political thought. The discussion of Marx is therefore followed by the intense debate with his "ghost," the Marxian legacy. We will engage with the participants in the debate - - Weber, Pareto, Mosca, Michels, Durkheim, and Mannheim. Restricted to first-year students. Not eligible for CR/NCR option.

**Distribution Requirements:** Humanities; Social Science  
**Breadth Requirements:** Thought, Belief and Behaviour (2)

TRN253Y1 - Contemporary Issues in Health Science

**Hours:** 48S

Can the immune system be strengthened? Are some diseases incurable? What is the best way to stop the spread of a virus? This course examines the scientific principles underlying contemporary issues in the science of human health with the goal of exposing students to the current state of biomedical research. We will develop three distinct types of understanding that are essential to literacy about the science of human health: the basic concepts in science; the nature of scientific research; and the rules that govern how scientists do their work. This course will explore topics such as stem cells, gene editing, regenerative medicine, vaccination, drug development, and personalized medicine. Restricted to first-year students. Not eligible for CR/NCR option.

**Exclusion:** Innis One, Munk One, New One, SMC One, UC One, Vic One, Woodsworth One  
**Distribution Requirements:** Science  
**Breadth Requirements:** Living Things and Their Environment (4); Society and its Institutions (3)

TRN135Y1 - Science and Social Choice

**Hours:** 48S

Many of the decisions we make as a society rely on advances in scientific knowledge. In this course, we will discuss a number of contemporary medical topics that involve complex scientific discoveries about health, the human body, disease, and infection. We will consider genes and study the medical implications of our growing understanding of the human genome. We will study a number of recent cases in order to explore how scientific findings influence decision-making in hospitals and the selection of social policies. We will also discuss the background forces that shape medical research and how this affects the kinds of health problems that are prioritized. The objective of this course is to develop a solid understanding of biological concepts related to human health and consider them in their wider social and ethical contexts. Restricted to first-year students. Not eligible for CR/NCR option.

**Exclusion:** Innis One, Munk One, New One, SMC One, UC One, Vic One, Woodsworth One  
**Distribution Requirements:** Science; Social Science  
**Breadth Requirements:** Living Things and Their Environment (4); Society and its Institutions (3)
TRN136Y1 - Canadian Health Policy in the Global Context

Hours: 48S

In this course we consider when our health policies support the highest standards of medical care, consistent with the latest discoveries in medical research. We examine the ways in which debates around ethics, effectiveness and efficiency shape global and national health policy. We begin by exploring the most important advancements in global health policy over the past two decades. We then assess Canada’s experience in providing health care, identifying lessons for national policy reform and for Canada’s role as a leader in global health research and policy. We explore a range of health challenges including universal health care, anti-microbial drug resistance, HIV AIDS, tuberculosis, reproductive, maternal, newborn and child health, cardiovascular care, oncology, environmental health, indigenous health, violence against women and mental health. Restricted to first-year students. Not eligible for CR/NCR option.

Prerequisite: Admission to Trinity One
Corequisite: TRN135Y1
Exclusion: TRN235H1, TRN236H1, Innis One, Munk One, New One, SMC One, UC One, Vic One, Woodsworth One
Distribution Requirements: Science; Social Science
Breadth Requirements: Thought, Belief and Behaviour (2); Society and its Institutions (3)

TRN140Y1 - Ethics, Humans, and Nature

Hours: 48S

This course introduces students to ethical issues arising from the way humans interact with nature. Students will study some theoretical approaches for evaluating how human society affects the planet, ecosystems, and the other animals. Theories will be drawn from philosophy, theology, and ecology, and will include Western and non-Western approaches to living in harmony with one’s environment. Key themes may include speciesism – the idea that human needs are the most important – as well as overpopulation, extinction, vegetarianism, and responsible resource management. The course will also look at how social policy shapes human choices and whether sustainability initiatives should be pursued through the public or private sector. The course will also discuss the spiritual connection between humans and the environment and how society can be organized to promote access to nature in urban communities. Restricted to first-year students. Not eligible for CR/NCR option.

Corequisite: TRN141Y1
Exclusion: Innis One, Munk One, New One, SMC One, UC One, Vic One, Woodsworth One
Breadth Requirements: Thought, Belief and Behaviour (2); Society and its Institutions (3)

TRN141Y1 - Environmental Science and Pathways to Sustainability

Hours: 48S

This course introduces students to fundamental issues in environmental science with a multi-disciplinary focus on human impacts on physical and biological systems, and on identifying pathways to sustainability. Key themes will include energy and resources, climate change, land use, contaminants and protecting biodiversity in the context of the Anthropocene. The course challenges students to apply the scientific method to environmental monitoring, research and problem solving through project design, data collection and analysis. The course also emphasizes information literacy, skills to distinguish science from pseudo-science, and considerations around representation of environmental science in the media. Restricted to first-year students. Not eligible for CR/NCR option.

Corequisite: TRN140Y1
Exclusion: Innis One, Munk One, New One, SMC One, UC One, Vic One, Woodsworth One
Breadth Requirements: Living Things and Their Environment (4); The Physical and Mathematical Universes (5)

TRN150Y1 - National versus International

Hours: 48S

The international system today faces extraordinary challenges. Understanding these challenges requires understanding the past. This seminar course briefly reviews the origins and development of the international system from the 17th century through the age of empires and the great wars of the 20th century. It then concentrates on the clash of nationalism with internationalism in the world since 1945, looking at such issues as what drives nationalism and what alternatives there are to it. We will study ideas and ideologies as well as the institutions that make up the current geopolitical world. Restricted to first-year students. Not eligible for CR/NCR option.

Prerequisite: Admission to Trinity One
Exclusion: Innis One, Munk One, New One, St. Mike's One, Vic One, UC One, Woodsworth One
Distribution Requirements: Social Science
Breadth Requirements: Thought, Belief and Behaviour (2); Society and its Institutions (3)
TRN151Y1 - Global Governance

Hours: 48S

Terrorism, the proliferation of arms (including weapons of mass destruction), environmental degradation, globalization, technological change, and the rise of non-state actors all pose challenges to statecraft and the management of global order. This seminar course explores the changing dynamics of global politics and the responses to them by states (and others). Topics will include an examination of new forms of international collaboration that have developed in the wake of crises in the years following the Second World War. Restricted to first-year students. Not eligible for CR/NCR option.

Prerequisite: Admission to Trinity One
Exclusion: Innis One, Munk One, New One, St. Mike’s One, Vic One, UC One, Woodsworth One
Distribution Requirements: Social Science
Breadth Requirements: Thought, Belief and Behaviour (2); Society and its Institutions (3)

TRN152Y1 - Justice & Global Conflict

Hours: 48S

Modern states face both new and familiar challenges to protecting national security. National insecurity threatens a country’s capacity to protect the well-being of its citizens while at the same time participating in international organizations and treaties. This course explores the origins and management of international conflict from the 17th to the 21st century, focusing on the precursors to war and the markers of peace. We will also consider the ways in which our current global world order promotes and preserves justice between and within nations. Students will consider different theoretical approaches to justice between nations, and apply them to recent security issues. By studying the history of conflict and the difference between justice and injustice students will gain a deeper understanding of how current geopolitical actors can structure and affect the prospects for security policy reform moving forward. Restricted to first-year students. Not eligible for CR/NCR option.

Corequisite: TRN151Y1
Exclusion: Innis One, Munk One, New One, SMC One, UC One, Vic One, Woodsworth One
Breadth Requirements: Thought, Belief and Behaviour (2); Society and its Institutions (3)

TRN160Y1 - Public Policy and the Public Good

Hours: 48S

What is public policy? Is there such a thing as the public good? This seminar course examines the notion of the “public” through investigating possible answers to a central political question: what is the purpose of government? Drawing on readings in philosophy and political theory, the course considers a variety of approaches to interpreting the nature of the public good and asks how policy makers should respond when competing goods (e.g., freedom and security) clash with each other. The course involves discussion of contemporary issues in public policy. Restricted to first-year students. Not eligible for CR/NCR option.

Prerequisite: Admission to Trinity One
Exclusion: Innis One, Munk One, New One, SMC One, UC One, Vic One, Woodsworth One
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3); Thought, Belief and Behaviour (2)

TRN161Y1 - Making Public Policy Work

Hours: 48S

How do we know what kinds of public policy will work and what will not? How do we assess the effectiveness of a policy? An historical examination of ways in which Canadian governments have addressed a range of policy problems. Case studies of areas of federal and provincial activity today. Restricted to first-year students. Not eligible for CR/NCR option.

Prerequisite: Admission to Trinity One
Exclusion: Innis One, Munk One, New One, SMC One, UC One, Vic One, Woodsworth One
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)
TRN162Y1 - Political Economy and Social Inequality

Hours: 48S

What is the relationship between capitalism and democracy? How can studying rational choice theory inform public policy? This course will introduce students to the methods of studying the interplay between economics and political goals. We will focus on specific topics to guide our quantitative analysis, which may include intergenerational poverty, the transfer of wealth, efficiency, and social stratification. Students will learn how to situate a society’s economic institutions within their broader political context, and study how economic outcomes interact with broader policies relating to, for example, health, equality, social mobility, and well-being. We will analyse empirical results while developing critical skills for interpreting economic data and research. Restricted to first-year students. Not eligible for CR/NCR option.

Prerequisite: Admission to Trinity One
Corequisite: TRN160Y1
Exclusion: Innis One, Munk One, New One, SMC One, UC One, Vic One, Woodsworth One
Breadth Requirements: Thought, Belief and Behaviour (2); Society and its Institutions (3)

TRN170Y1 - Ethics and the Creative Imagination

Hours: 48S

A seminar course that explores ethical issues through the study of works of the creative imagination that pose or provoke questions of right and wrong, good and evil, justice and injustice. The selected works will be drawn from such fields as literature, film, and the visual and performing arts. Open only to students admitted to Trinity One. Restricted to first-year students. Not eligible for CR/NCR option.

Prerequisite: Admission to Trinity One
Exclusion: Innis One, Munk One, New One, St. Mike’s One, Vic One, UC One, Woodsworth One
Breadth Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

TRN171Y1 - Ethics and the Public Sphere

Hours: 48S

What does it mean to be morally required to do something? What rights do we have over ourselves, our bodies, our privacy, our choices? In this course, we will read texts from philosophy, history, political science, cultural studies and beyond that engage with the theme of ethics in the public arena. These will provide valuable analytic tools as we go on to confront contemporary issues that raise urgent ethical questions. Restricted to first-year students. Not eligible for CR/NCR option.

Prerequisite: Admission to Trinity One
Exclusion: Innis One, Munk One, New One, St. Mike’s One, Vic One, UC One, Woodsworth One
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3); Thought, Belief and Behaviour (2)

TRN172Y1 - Ethics and the Law

Hours: 48S

What is the relationship between moral values and the law? What role does the law play in enabling people to live better lives? Are legal institutions and actors subject to higher ethical standards? In this course we will read texts from legal theory and political philosophy to try to explain the connection between ethics and the law. This will provide the basis for thinking about some historical and contemporary legal cases, as well as ethical issues judges, lawyers, and lawmakers face in their professional roles. Restricted to first-year students. Not eligible for CR/NCR option.

Corequisite: TRN171Y1
Exclusion: Innis One, Munk One, New One, St. Mike’s One, Vic One, UC One, Woodsworth One
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2); Society and its Institutions (3)

TRN225Y1 - The Art of Health Science Discovery

Hours: 48S

Illustrated by contemporary examples, students go through the stages of the scientific discovery process. From initial idea, through literature review, funding (grant writing and assessment), experimental design and critical analysis of data through to the public dissemination of results by publication, the patent process and development of intellectual property.

Prerequisite: TRN125Y1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4); Society and its Institutions (3)
TRN235H1 - Health Policy in Canada: Past, Present and Future

Hours: 24S

This course explores the nature and impact of public health policy in Canada. The course describes the origins of Canadian health policy, its evolution towards its current form and the choices resulting from aging populations and the increasing costs associated with a high standard of health care.

Prerequisite: TRN135Y1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

TRN204H1 - Introduction to Law and Legal Reasoning

Hours: 24L/12T

This course introduces students to legal reasoning through progressively complex exercises. First, hypotheticals expose students to basic skills required for legal reasoning. Second, they analyze simplified versions of specially selected concrete cases. Third, the course analyses real cases discussed in first year courses in law school.

Prerequisite: Active in ASMAJ1618
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

TRN236H1 - The Politics of Global Health

Hours: 24S

This course explores the nature and impact of policy relationships designed to improve global public health. We explore the analytical tools necessary to study these institutional arrangements and examine successes and failures of these policy relationships across a range of global health policy challenges including infectious disease and child health.

Prerequisite: TRN135Y1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

TRN303H1 - Ethics and Society

Hours: 24S

An exploration of the ethical dimensions of selected contemporary social issues. Restricted to students in the major program Ethics, Society, and Law.

Prerequisite: TRN203H1 and active in ASMAJ1618
Recommended Preparation: PHL271H1
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

TRN304H1 - Law and Social Issues

Hours: 24L

An exploration of the legal dimensions of selected contemporary social issues. Restricted to students in the major program Ethics, Society, and Law.

Prerequisite: Active in ASMAJ1618
Exclusion: TRN304Y1
Recommended Preparation: PHL271H1, TRN204H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)
TRN304Y1 - Law and Social Issues

Hours: 48L

An exploration of the legal dimensions of selected contemporary social issues. Restricted to students in the major program Ethics, Society, and Law.

Prerequisite: Active in ASMAJ1618
Exclusion: TRN304H1
Recommended Preparation: PHL271H1, TRN204H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

TRN305H1 - Basic Principles of Law

Hours: 24L

An exploration of some basic legal principles in public and private law. Areas of law that may be studied include contract, tort, criminal and administrative law. Restricted to students in the major program Ethics, Society, and Law.

Prerequisite: Active in ASMAJ1618. A student must be in third or fourth year.
Exclusion: TRN305Y1
Recommended Preparation: PHL271H1, TRN204H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

TRN305Y1 - Basic Principles of Law

Hours: 48L

The nature and justification of legal rules as preparation for the study of basic principles of law governing the relations between individual citizens, and the relations between individual citizens and the state. A selection of contract, tort, criminal and administrative law. Restricted to students in the major program Ethics, Society, and Law.

Prerequisite: Active in ASMAJ1618 only if enrolling in the Fall/Winter session. A student must be in third or fourth year.
Exclusion: TRN305H1
Recommended Preparation: TRN204H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

TRN312H1 - Sustainability Issues in Ethics, Society, and Law

Hours: 24L/12T

This course focuses on core issues selected from the general domain of sustainability which are addressed through each of the three subject-area lenses of Trinity’s Ethics, Society, and Law program, namely the ethics, the socio-political context, and the legal environment of sustainability issues and initiatives.

Prerequisite: TRN203H1, TRN204H1
Exclusion: TRN321H1 (Selected Topics in Ethics, Society, and Law: The Ethics, Society and Law of Environmental Sustainability), offered in Winter 2020
Recommended Preparation: PHL271H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

TRN320H1 - Selected Topics in Ethics, Society, and Law

Hours: 24S

The course examines a selected topic in ethics, society, and law. The set of topics will be based on the research interests of an individual instructor. Both the topics and the instructor may change with each offering of the course, and the course is not expected to be offered every year.

Prerequisite: Enrolment in ASMAJ1618. A student must be in third or fourth year.
Recommended Preparation: PHL271H1, TRN203H1, TRN204H1
Distribution Requirements: Humanities; Social Science
Breadth Requirements: Society and its Institutions (3)

TRN321H1 - Selected Topics in Ethics, Society, and Law

Hours: 24S

The course examines a set of selected topics in ethics, society, and law. The topics will be based on the research interests of an individual instructor. Both the topics and the instructor may change with each offering of the course, and the course is not expected to be offered every year.

Prerequisite: Enrolment in ASMAJ1618. A student must be in third or fourth year.
Recommended Preparation: PHL271H1, TRN203H1, TRN204H1
Distribution Requirements: Humanities; Social Science
Breadth Requirements: Thought, Belief and Behaviour (2)
TRN406H1 - Community Research Partnerships in Ethics

Students undertake research projects designed to meet the knowledge needs of ethics-oriented organizations in the broader community.

Prerequisite: Students must be in the final year of registration in the Major Program in Ethics, Society, and Law and will normally have a CGPA of at least 3.70. Enrolment is by application. Consult the Arts & Science Registration Instructions and Timetable at http://www.artsci.utoronto.ca/current/course for course enrolment procedures.

Recommended Preparation: PHL271H1, TRN203H1, TRN204H1, TRN303H1

Distribution Requirements: Humanities

Breadth Requirements: Thought, Belief and Behaviour (2)

TRN425Y1 - Law Workshops Course

Students attend workshops in the Faculty of Law, meet for related discussion and complete related assignments. Enrolment is restricted to qualified fourth-year students registered in the Major Program Ethics, Society, and Law.

Prerequisite: TRN303H1. Enrolment is by application. Consult the Arts & Science Registration Instructions and Timetable. Students must be in the final year of registration in the Major Program in Ethics, Society, and Law. Students will normally have strong performance in 300-level courses in Ethics, Society and Law.

Recommended Preparation: PHL271H1, TRN203H1, TRN204H1

Distribution Requirements: Society and its Institutions (3)

Independent Studies

TRN299Y1 - Research Opportunity Program

Credit course for supervised participation in faculty research project. Details at https://www.artsci.utoronto.ca/current/academics/research-opportunities/research-opportunities-program. Not eligible for CR/NCR option.

Prerequisite: Application through the Research Opportunity Program (ROP); selection by the instructor.

Distribution Requirements: Humanities

TRN300H1 - Trinity Independent Studies

Trinity Independent Studies. Not eligible for CR/NCR option.

Distribution Requirements: Humanities

TRN301Y1 - Trinity Independent Studies

Trinity Independent Studies. Not eligible for CR/NCR option.

Distribution Requirements: Humanities

Trinity Independent Studies. Not eligible for CR/NCR option.

Distribution Requirements: Humanities

International Relations

TRN250Y1 - Ordering International Relations in the Age of Empire

Hours: 24L/48T

The course examines the origins and development of three fundamental norms in international relations (sovereignty; free trade; human rights) in their historical, imperial context.

Prerequisite: Admission to International Relations Major or Specialist program
Recommended Preparation: Prerequisite courses for entry into International Relations Major or Specialist Program
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3); Thought, Belief and Behaviour (2)

TRN350H1 - Scarcity, Sustainability, and the Future of International Relations

Hours: 24L/12T

International Relations are changing, and changing quickly. Major challenges in global affairs, including the interrelated problems of climate change, resource scarcity, great power competition, and changes in mass politics will shape our future in uncertain and possibly dangerous ways. This course seeks to evaluate the effect of these interconnected issues on our world today, and their implications for the future. Through a series of case studies, students will be encouraged to identify future international challenges and work to develop sustainable and innovative solutions to the problems that will confront our world in the next decades and beyond.

Prerequisite: TRN250Y1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

TRN409H1 - Selected Topics in International Studies

Selected Topics in International Studies

Prerequisite: Enrolment in the International Relations program or in a History or Political Science major or specialist program
Exclusion: TRN409Y1
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

TRN409Y1 - Selected Topics in International Studies

Selected Topics in International Studies

Prerequisite: Enrolment in the International Relations program or in a History or Political Science major or specialist program
Exclusion: TRN409H1
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)
TRN410H1 - Researching Critical Cases in Contemporary International Relations

This course allows students with majors in International Relations to apply some of the techniques and skills they have developed during their undergraduate careers to an original research project in contemporary international relations history. This course is a chronological historical survey of the world since 1968, as the origin of the present era. Within the chronology, attention is given to major developments/themes that emerged and continue to affect the present day. These include: the rise of China as a power, political dissent, the emergence of terrorism, the environment, energy as major international issues, the neo-liberal economic turn, globalization, the end of the Cold War, the human rights/humanitarian intervention revolution, and key post 2000 developments such as the War on Terror, the decline of the US "unipolar moment," the 2008 financial crisis and the return in the 2010s of nationalism and protectionism. This course is restricted to students enrolled in the International Relations major program.

Prerequisite: TRN250Y1
Exclusion: TRN410Y1
Recommended Preparation: POL208Y1 or HIS344H1 are recommended as preparation or taken concurrently.
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

TRN411Y1 - Selected Topics in International Studies

Selected Topics in International Studies

Prerequisite: Enrolment in the International Relations program or in a History major or specialist program, or permission of instructor
Distribution Requirements: Humanities

TRN419Y1 - Comparative American, British and Canadian Foreign Policy

Hours: 48S

The origins and evolution of American, British and Canadian foreign policy from the late 18th century to the present. Policies are compared in order to understand the development of these countries as nations and actors in the international community.

Prerequisite: Students must have a background in one of Canadian, British or American history.
Distribution Requirements: Humanities; Social Science
Breadth Requirements: Society and its Institutions (3)

TRN421Y1 - Fragile and Conflict-Affected States in Global Politics

Hours: 48S

Since the end of the Cold War, fragile and conflict-affected states have been widely viewed in the international relations field as one of the preeminent challenges to international security and global governance. Western countries have typically responded to this challenge by launching interventions aimed at building new states that can be integrated into the global, liberal order. This course will dissect the liberal peacebuilding and statebuilding project and explore its broader impact and implications for the international system.

Recommended Preparation: POL300Y1 or POL343Y1
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

Other Trinity College Courses

TRN200Y1 - Modes of Reasoning

Previous Course Number: TRN200H1
Hours: 24L/24S

First term: students are taught how to recognize, analyze, evaluate, and construct arguments in ordinary English prose. Second term: one or more discipline-related modes of reasoning (e.g., scientific reasoning, ethical reasoning, legal reasoning) studied with reference to a selection of contemporary social issues.

Exclusion: PHL247H1/PHI247H1/TRN200H1
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

TRN307H1 - International Experience I

A one semester research experience abroad. Students participate in a research project under the mentorship of a faculty supervisor in the host institution and gain experience of working and living abroad.

Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)
TRN308H1 - International Experience II

Students who have engaged in a research project abroad participate in a regular forum in which they present their research projects and discuss their varied experiences of work and social engagement in different foreign environments. Students prepare a detailed scholarly article based on their research.

Prerequisite: TRN307H1
Distribution Requirements: Social Science
Breadth Requirements: Society and Its Institutions (3)

TRN377Y1 - Trinity Comprehensive Paper I

Students are individually mentored by faculty experts through readings from primary literature towards preparation of a quality review article. For students in third year, students identify their faculty mentor during second year and agree to become familiar with the available textbook level material during that year in their chosen topic. Not eligible for CR/NCR option.

Prerequisite: minimum of 8.0 FCEs completed and by permission of the instructor
Distribution Requirements: Humanities; Science; Social Science

TRN477H1 - Trinity Comprehensive Paper II

The preparation of a publication quality review article typically involves extensive editing. Students are individually mentored by faculty experts to take the review paper generated in TRN377Y1 and edit the structure, content and style to produce a publication quality review article. Not eligible for CR/NCR option.

Prerequisite: TRN377Y1
Distribution Requirements: Humanities; Science; Social Science

TRN478H1 - Science Writing for Non-Scientific Audiences

The course aims to train senior-level science students in a wide range of writing genres, focusing on a diversity of non-scientific audiences and writing styles. In addition, students learn to read and analyze texts in order to understand rhetorical strategies and devices.

Prerequisite: Students in science specialist or major programs. Permission by instructor.
Exclusion: Non-science students, first or second year students.
Recommended Preparation: TRN377Y1 (the comprehensive paper will serve as writing sample).
Distribution Requirements: Humanities
Breadth Requirements: Living Things and Their Environment (4)
University College

Faculty List

Professor, Research
E. Gilbert, MA, Ph.D. (Vice-Principal)

Associate Professor, Research
L. Mar, Ph.D (Canadian Studies)

Associate Professors, Teaching
J. Plotnick, MA, MSc (Writing Workshop)
S. Rayter, MA, Ph.D. (Sexual Diversity Studies)

Assistant Professors, Research
J. Moreau, MA, Ph.D (Sexual Diversity Studies)
Y. Xu, Ph.D (Cognitive Science)

Assistant Professors, Teaching
J. John, BA, Ph.D. (Cognitive Science)
D. Kojima, MA, Ph.D. (Sexual Diversity Studies)
S. Lurie, MA, Ph.D (Canadian Studies)
J. Vervaeke, MA, Ph.D (Cognitive Science)

Senior Lecturer
R. Salutin, MA (Canadian Studies)

Introduction

University College offers a number of programs and courses outside the areas traditionally covered by departments. These include UC One and programs and courses in Asian Canadian Studies, Canadian Studies, Cognitive Science, Drama, Health Studies, and Sexual Diversity Studies, in addition to First-Year Foundation Seminars. The overall aims of the College Programs are to foster interdisciplinary work in significant areas of study and to encourage intellectual breadth. Many program courses are open to students not enrolled in the programs themselves.

UC One: Engaging Toronto

UC One is an exciting initiative that provides first-year students with a special university experience. Students choose from one of four courses, each of which is designed to engage with the city from a different perspective. Classroom learning is directly linked to real life experience.

UC One is a half-credit course, one of four courses typically taken by a first-year Faculty of Arts and Science student. Enrolment in each course is limited to up to 30 students. Students enrol in one of the following four half year courses:

- UNI101H1: Citizenship in the Canadian City
- UNI102H1: Performing the City
- UNI103H1: Gradients of Health in an Urban Mosaic
- UNI104H1: Sex in the City

In UC One, you can choose a stream that complements your own interests.

Weekly lectures and seminars will be supplemented with prominent guest speakers, including political and business leaders, activists from non-governmental organizations, theatre directors, artists, and health practitioners. Students will have the opportunity to meet with the speakers and socialize with their fellow students after each guest lecture. Students will also participate in a range of field trips across the city.

Students enrol to the specific section during the Enrolment period. All first-year students in the Faculty of Arts and Science (St. George campus) are eligible to enrol. Those participating in other One programs are excluded from UC One.

For more information visit the UC One website at: https://www.uc.utoronto.ca/programs-study-first-year-program-uc-one.

The Asian Canadian Studies Program (Minor)

The minor in Asian Canadian Studies program focuses on community-engaged learning that explores how to understand the historical, social, cultural, economic, and political forces that affect people of Asian heritage in Canada. Our interdisciplinary courses connect students with local communities, and every course provides opportunities for students to pursue a choice of research interests. Together we critically investigate and add to knowledge about Asian Canadians.

The Canadian Studies Program (Specialist, Major, Minor)

The Canadian Studies program offers opportunities to study contemporary Canada in an interdisciplinary manner and to explore cultural, social, economical and political developments in this complex and diverse country. Students are encouraged to consider additional courses in Aboriginal Studies in completing the requirements of the Program.

The Cognitive Science Program (Major)

The Cognitive Science Program introduces students to the field of cognitive science: the interdisciplinary study of mind in humans and machines. Our students gain an understanding of such mental phenomena as perception, language, reasoning, and consciousness, and they integrate this understanding with an account of how the human brain works.

The Cognitive Science Arts Major has three course streams: Perception and Attention; Thinking and Reasoning; and Language and Cognition. The Cognitive Science Science Major has two streams: Computational Cognition and Cognition and the Brain. Courses include: COG250Y1 Introduction to Cognitive Science; COG341H1 and COG342H1 Issues in Cognitive Science; COG401H1, COG402H1, and COG403H1 Seminar in Cognitive Science; COG498H1/COG499H1 Independent Study; as well as courses drawn from offerings in Computer Science, Linguistics, Philosophy, and Psychology.

The Centre for Drama, Theatre & Performance Studies (Specialist, Major, Minor)

The Centre for Drama, Theatre & Performance Studies is described elsewhere in this Calendar under Drama.

The Health Studies Program (Specialist, Major)

The Health Studies Program focuses on many areas of study that surround, interact with and support bio-medical research and clinical activity in regard to health, including health policy, practices, research methods, and socio-cultural expression. The Major serves as a general introduction; the Specialist provides a more intense research focus with more methodological emphasis.
The Sexual Diversity Studies Program (Specialist, Major, Minor)

The Sexual Diversity Studies Program allows students to focus on questions of sexual identity, difference, and dissidence across disciplinary lines and cultural frameworks. By examining sexual diversity across time and place, students will learn about the ways different cultures have separated the sexual from the nonsexual, the normal from the abnormal, and what the regulation of sexuality can tell us about how power operates along the lines of gender and race, for example. Students will gain an understanding of how and why certain sexual practices have come under scrutiny, and the significance of the various labels and identities that we have attached to them.

University College (UNI) and Drama (DRM) courses are staffed by a combination of specific program staff members and members of various University departments, and are open to all students at the University. Further information on University College Independent Study courses is available at https://www.uc.utoronto.ca/programs-study-academic-programs-independent-study. Further information on DRM is available at https://www.cdfs.utoronto.ca/.

University College Programs

Canadian Studies Specialist (Arts Program) - ASSPE0728

Description:

Canadian Studies courses offer opportunities to study contemporary Canada in an interdisciplinary manner to explore cultural, social, economic, and political developments in this complex and diverse country. Students are encouraged to consider additional courses in Indigenous Studies in completing the Program requirements.

Please note that not all courses are offered on an annual basis. A list of approved Canadian Studies courses can be found on the website at www.uc.utoronto.ca/canadianstudies/. Other courses that are in the current academic Calendar that include significant Canadian content may be considered for approval by the Canadian Studies Program Director. Consult the Canadian Studies Program Office, UC173, University College, 416-946-4025. Email: canadian.studies@utoronto.ca.

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

(11.0 credits in Canadian Studies approved courses, including 4.0 credits at the 300+ level, of which 1.0 credit must be at the 400-level.)

First Year: No specific first-year requirements. (Students are advised to take introductory courses that will serve as prerequisites for optional courses of interest taken later in the program.)

1. (CDN267H1 and CDN268H1), 1.0 credit from the following: FAH248H1/ DRM268H1/ ENG215H1/ ENG252H1/ ENG254H1/ FOR200H1/ FRE210H1/ GGR240H1/ GGR246H1/ HIS262H1/ HIS264H1/ INS201H1/ INS210H1/ INS220H1/ INS231H1/ LIN201H1/ POL214Y1/ POL224Y1/ SLA238H1/ SOC218H1/ SOC220H1/ TRN235H1

2. (CDN367H1 and CDN368H1)

3. 0.5 credit from the following: CDN307H1/ CDN335H1/ CDN380H1/ CDN390H1/ JSU325H1

4. CDN420Y1/ CDN435Y1 or another fourth-year Canadian Studies course approved by the Program Director.

5. Students will take another 6.5 credits offered by the Canadian Studies Program, or from the list of courses approved by the Canadian Studies program (see: www.uc.utoronto.ca/canadianstudies). Suitable courses not on the list may be considered for approval by the Program Director.

Students are responsible for checking co- and prerequisites for all courses.

Health Studies Specialist (Arts Program) - ASSPE2085

Description:

The Health Studies Program explores how health around the world is shaped by the circumstances in which people are born, grow up, live, work, and age, and how these in turn connect to a wider set of environmental, social, cultural, economic, and political forces. Understanding health requires knowledge from a range of disciplines and sectors: Health Studies offers a stimulating interdisciplinary environment that challenges students to think about health – both locally and globally – in new ways.

Enrolment Requirements:

This is a limited enrolment program. Note there are different options depending on whether a student has completed between 4.0 and 8.5 credits, or 9.0 or more credits.

Variable Minimum Grade Average
A minimum grade average in required courses is normally needed for entry, and this minimum changes each year depending on available spaces and the number of applicants. The following courses must be completed:

For students who have completed between 4.0 and 8.5 credits:

- 1.0 credits from: ANT100Y1/ BIO130H1/ GGR107H1/ HPS100H1/ HPS110H1/ HPS120H1/ PCL102H1/ PHS100H1/ PHL100Y1/ PHL101Y1/ POL101Y1/ PSY100H1/ SOC100H1/ TRN135Y1/ UNI103H1/ UNI103Y1/ WGS160Y1. If more than 1.5 credits have been completed, the minimum grade average will be based on the higher course grades.

To ensure that students admitted to the program will be successful, applicants with a grade average lower than 77% in required courses will not be considered for admission. Please note that obtaining this minimum grade average does not guarantee admission to the program.

1.0 credits from the following: CDN267H1 and CDN268H1, 1.0 credit from the following: FAH248H1/ DRM268H1/ ENG215H1/ ENG252H1/ ENG254H1/ FOR200H1/ FRE210H1/ GGR240H1/ GGR246H1/ HIS262H1/ HIS264H1/ INS201H1/ INS210H1/ INS220H1/ INS231H1/ LIN201H1/ POL214Y1/ POL224Y1/ SLA238H1/ SOC218H1/ SOC220H1/ TRN235H1

2. (CDN367H1 and CDN368H1)

3. 0.5 credit from the following: CDN307H1/ CDN335H1/ CDN380H1/ CDN390H1/ JSU325H1

4. CDN420Y1/ CDN435Y1 or another fourth-year Canadian Studies course approved by the Program Director.

5. Students will take another 6.5 credits offered by the Canadian Studies Program, or from the list of courses approved by the Canadian Studies program (see: www.uc.utoronto.ca/canadianstudies). Suitable courses not on the list may be considered for approval by the Program Director.

Students are responsible for checking co- and prerequisites for all courses.
For students who have completed 9.0 credits or more:

- 77% in 1.5 credits from: ANT100Y1/ BIO130H1/ GGR107H1/ HPS100H1/ HPS110H1/ HPS120H1/ HST209Y1/ HST211H1/ HST250H1/ PCL102H1/ PHL100Y1/ PHL101Y1/ PHS100H1/ POL101Y1/ PSY100H1/ SOC100H1/ TRN135Y1/ UNI103H1/ UNI103Y1/ WGS160Y1. If more than 1.5 credits have been completed, the minimum grade average will be based on the higher course grades.

To ensure that students admitted to the program will be successful, applicants with a grade average lower than 77% in required courses will not usually be considered for admission. Please note that obtaining this minimum grade average does not guarantee admission to the program.

Completion Requirements:

(12.0 credits, including 2.0 credits at the 400-level)

1. 1.0 credit from the following courses: ANT100Y1/ BIO130H1/ GGR107H1/ HPS100H1/ HPS110H1/ HPS120H1/ PCL102H1/ PHS100H1/ PHL101Y1/ PSY100H1/ SOC100H1/ TRN135Y1/ UNI103H1/ UNI103Y1/ WGS160Y1
2. HST209H1, HST211H1, and HST250H1
3. PHL281H1 or INS200H1
4. STA220H1 or equivalent
5. 1.0 credit from the following courses: ANT208H1/ HMB202H1/ HMB203H1/ INS205H1/ JUN237H1/ NFS264H1/ PCL201H/ PCL218H1/ PHL281H1/ SOC204H1/ SOC243H1/ STA221H1/ TRN235H1/ TRN236H1
6. HST310H1
7. HST373H1/ HMB342H1
8. HST350H1
9. 2.0 credits from the following courses: HST307H1/ HST308H1/ HST309H1/ HST330H1/ HST350H1/ HST350Y1/ ANA300Y1/ ANT345H1/ ANT348H1/ ANT358H1/ EEB324H1/ GGR340H1/ HPS319H1/ HPS370H1/ HMB303H1/ HMB323H1/ INS340Y1/ INS350H1/ JFK350H1/ PHS300H1/ PHL381H1/ PHL383H1/ PHS300H1/ SOC309H1/ SOC316H1/ SOC363H1/ SOC364H1/ SOC365H1/ WGS367H1
10. HST450Y1
11. 1.0 credit of the following courses: HST405H1/ HST407H1/ HST409H1/ HST410H1/ HST411H1/ HST440H1/ HST451Y1/ HST464H1/ HST480H1 or another 400-level course approved by Director.
12. The remaining 2.0 credits can include any courses not previously taken from the lists above, or any of the following: ANT434H1/ ANT458H1/ ANT460H1/ ANT474H1/ ENV430H1/ GGR433H1/ JFP450H1/ HIS423H1/ HIS498H1/ HMB322H1/ HMB406H1/ HMB433H1/ HMB462H1/ HST400Y1/ IRE378H1/ NEW344Y1/ PHL381H1/ PSY333H1/ SOC412H1/ SOC488H1

Please note that not all courses are offered on an annual basis. A list of approved Canadian Studies courses in the current academic Calendar that include significant Canadian content may be considered for approval by the Canadian Studies Program Director.

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

(7.0 credits in Canadian Studies approved courses with 2.0 credits at the 300+ level, of which a 0.5 credit must be at the 400-level)

First Year: No specific first-year requirements. (Students are advised to take introductory courses that will serve as prerequisites for optional courses later in the program.)

1. (CDN267H1, CDN268H1), 1.0 credit from the following: FAS248H1/ DRM268H1/ ENG215H1/ ENG252H1/ ENG254H1/ FLM250H1/ GGR240H1/ GGR246H1/ HPS262H1/ HIS264H1/ INS201H1/ INS209H1/ INS220H1/ INS231H1/ LIN201H1/ POL214Y1/ POL224Y1/ SLA238H1/ SOC218H1/ SOC220H1/ TRN235H1
2. (CDN367H1 and CDN368H1)
3. 0.5 credit from the following: CDN307H1/ CDN335H1/ CDN380H1/ CDN390H1/ JUN237H1
4. CDN405H1 or another fourth-year Canadian Studies course approved by the Program Director.
5. Students will take another 3.0 credits offered by the Canadian Studies Program, or in the list of courses approved by the Canadian Studies Program (see: www.uc.utoronto.ca/canadianstudies). Suitable courses not on the list may be considered for approval by the Program Director.

Cognitive Science Major - Arts (Arts Program) - ASMAJ1445

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

In effect for March 1, 2020:

Variable Minimum Grade Average

A minimum grade average in required courses is needed for entry, and this minimum changes each year depending on available spaces and the number of applicants. The following courses must be completed:

- COG250Y1 with a minimum grade, or
- 1.5 credits in CSC, LIN, PHL, or PSY with a minimum grade average based on the 1.5 credits. No more than 1.0 credits can be from any ONE of the listed course designators. If more than 1.5 credits have been completed, the minimum grade average will be based on the higher course grades.

Canadian Studies Major (Arts Program) - ASMAJ0728

Description:

Canadian Studies courses offer opportunities to study contemporary Canada in an interdisciplinary manner to explore cultural, social, economical and political developments in this complex and diverse country. Students are encouraged to consider additional courses in Indigenous Studies in completing the Program requirements.
Note: Students are responsible for checking co- and prerequisites for all courses. Not all courses are offered on a regular basis. A list of approved Cognitive Science courses can be found on the website: https://www.uc.utoronto.ca/programs-study-academic-programs-cognitive-sc... For any questions, consult the Cognitive Science Program Office, UC173, University College, 416-946-4025. Email: cecille.sioulis@utoronto.ca or the Program Director at: cogsci.director@utoronto.ca

Completion Requirements:

(8.0 credits)

Where noted below, please consult the Faculty of Arts & Science Course Calendar on prerequisites.

First Year:

CSC108H1/ CSC120H1; LIN102H1 (note: LIN200H1 does not serve as prerequisite for upper year LIN courses)

Second Year:

COG250Y1 (may be taken in Year 1); STA220H1/ PSY201H1; PSY270H1

Second Year and Higher:

COG341H1/ COG342H1, PHL342H1, PSY290H1 and 3.0 credits from one of Stream 1, 2, or 3:

Stream 1: Perception and Attention

PHL232H1; PSY280H1; and 2.0 credits of any of the following:

For those with the appropriate prerequisites: CSC207H1/ CSC320H1/ CSC420H1

Stream 2: Language and Cognition

JLP315H1/ JLP374H1; LIN232H1/ LIN241H1 and 2.0 credits of any of the following (at least a 0.5 credit must be from LIN): COG260H1/ COG341H1/ COG342H1/ COG343H1/ COG415H1/ COG498H1/ COG499H1/ JLP315H1/ JLP374H1/ JLP471H1/ JLP472H1/ JLS473H1/ JLS474H1/ LIN331H1/ LIN341H1/ PHL245H1/ PHL340H1/ PHL345H1/ PHL351H1/ PHL352H1/ PHL451H1/ PHL452H1/ PSY210H1/ PSY211H1/ PSY473H1/ PSY493H1/

For those with the appropriate prerequisites: CSC401H1/ CSC485H1

Stream 3: Thinking and Reasoning

PHL245H1; PSY260H1; and 2.0 credits of any of the following:

For those with the appropriate prerequisites: CSC401H1/ CSC485H1

For those with the appropriate prerequisites: CSC207H1/ CSC304H1/ CSC311H1/ CSC384H1/ CSC486H1

Fourth Year: COG401H1/ COG404H1

Cognitive Science Major - Science (Science Program) - ASMAJ1446

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

In effect for March 1, 2020:

Variable Minimum Grade Average

A minimum grade average in required courses is needed for entry, and this minimum changes each year depending on available spaces and the number of applicants. The following courses must be completed:

• COG250Y1 with a minimum grade, or
• 1.5 credits in CSC, LIN, PHL, or PSY with a minimum grade average based on the 1.5 credits. No more than 1.0 credits can be from any ONE of the listed course designators. If more than 1.5 credits have been completed, the minimum grade average will be based on the higher course grades.

Note: Students are responsible for checking co- and prerequisites for all courses. Not all courses are offered on a regular basis. A list of approved Cognitive Science courses can be found on the website: https://www.uc.utoronto.ca/programs-study-academic-programs-cognitive-sc... For any questions, consult the Cognitive Science Program Office, UC173, University College, 416-946-4025. Email: cecille.sioulis@utoronto.ca or the Program Director at: cogsci.director@utoronto.ca

Completion Requirements:

(8.0 credits)

Note: that some Computer Science courses included below under Streams 1 and 2 have unlisted co- or prerequisites. Please consult the Faculty of Arts and Science Course Calendar. Those interested in the Science Major are advised to consider also registering for a Computer Science Specialist, Major, or Minor (for Stream 1) or a Human Biology Neuroscience Specialist or Major (for Stream 2).

First Year:

CSC108H1/ CSC120H1 (recommended option); CSC148H1; MAT135H1 and MAT136H1 (or MAT137Y1)

Second Year:

COG250Y1 (may be taken in Year 1); STA220H1/ STA257H1/ PSY201H1; PSY270H1

Second Year and Higher:

PSY290H1, PHL342H1 and 2.5 credits from one of Stream 1 or 2:
Stream 1: Computational Cognition

Computational cognition is the interdisciplinary study of the information-processing underpinnings of cognitive mental processes. It seeks an understanding of cognition in mathematical terms and to apply this understanding to debates in artificial intelligence, cognitive psychology, and beyond.

No more than 1.5 credits of the 2.5 credits required from this list of options may come from any single 3-letter course designator, except for CSC courses. For CSC courses, a minimum of 1.0 credit and up to 2.0 credits may be chosen. At least 1.0 credit of the 2.5 credits must be at the 300-level. COG340H1/COG341H1/COG342H1/COG343H1/COG415H1/COG498H1/COG499H1/CS207H1/CS230H1/CS311H1/CS324H1/CS384H1/CS401H1/CS413H1/CS420H1/CS485H1/CS486H1/JLP315H1/JLP374H1/JLP471H1/LIN232H1/LIN311H1/LIN314H1/NEW438H1/PHL240H1/PHL245H1/PHL246H1/PHL345H1/PHL347H1/PSY210H1/PSY220H1/PSY230H1/PSY260H1/PSY270H1/PSY280H1/PSY290H1/PSY312H1/PSY305H1/PSY316H1/PSY330H1/PSY331H1/PSY362H1/PSY370H1/PSY371H1/PSY372H1/PSY378H1/PSY379H1/PSY380H1/PSY414H1/PSY475H1

Stream 2: Cognition and the Brain

Today’s cognitive scientists are more interested than ever before in the way the brain implements the information-processing underpinnings of cognitive mental processes. The study of cognition and the brain is the study, grounded in cognitive neuroscience, of those aspects of brain activity directly relevant to the performance of cognitive functions.

At least 1.5 credits must come from PSY courses and 1.0 credit of the 2.5 credits must be at the 300-level. COG260H1/COG341H1/COG342H1/COG343H1/COG415H1/COG498H1/COG499H1/JLP315H1/JLP374H1/JLP471H1/LIN232H1/LIN311H1/LIN314H1/NEW438H1/PHL240H1/PHL245H1/PHL246H1/PHL345H1/PHL347H1/PSY210H1/PSY220H1/PSY230H1/PSY260H1/PSY270H1/PSY280H1/PSY290H1/PSY312H1/PSY305H1/PSY316H1/PSY330H1/PSY331H1/PSY362H1/PSY370H1/PSY371H1/PSY372H1/PSY378H1/PSY379H1/PSY380H1/PSY414H1/PSY475H1

Enrolment Requirements:

This is a limited enrolment program. Note there are different options depending on whether a student has completed between 4.0 and 8.5 credits, or 9.0 or more credits.

Variable Minimum Grade Average

A minimum grade average in required courses is needed for entry, and this minimum changes each year depending on available spaces and the number of applicants. The following courses must be completed:

For students who have completed between 4.0 and 8.5 credits:

- 1.0 credit from: ANT100Y1/BIO130H1/GGR107H1/HPS100H1/HPS120H1/PCL102H1/PHS100H1/PHL100Y1/PHL101Y1/POL101Y1/PSY100H1/SOC100H1/TRN135Y1/UNI103H1/UNI103Y1/UNI104Y1/WGS160Y1. If more than 1.5 credits have been completed, the minimum grade average will be based on the higher course grades.

To ensure that students admitted to the program will be successful, applicants with a grade average lower than 70% in required courses will not usually be considered for admission. Please note that obtaining this minimum grade average does not guarantee admission to the program.

For students who have completed 9.0 credits or more:

- 70% in 1.5 credits from: ANT100Y1/BIO130H1/GGR107H1/HPS100H1/HPS120H1/HST209H1/HST211H1/HST250H1/PCL102H1/PHL100Y1/PHL101Y1/POL101Y1/PSY100H1/SOC100H1/TRN135Y1/UNI103H1/UNI103Y1/WGS160Y1. If more than 1.5 credits have been completed, the minimum grade average will be based on the higher course grades.

To ensure that students admitted to the program will be successful, applicants with a grade average lower than 70% in required courses will not usually be considered for admission. Please note that obtaining this minimum grade average does not guarantee admission to the program.

Completion Requirements:

(8.0 credits, including 1.5 credits at the 400-level.)

1. 1.0 credit from the following courses: ANT100Y1/BIO130H1/GGR107H1/HPS100H1/HPS110H1/HPS120H1/HST209Y1/HST211Y1/HST250H1/PCL102H1/PHL100Y1/PHL101Y1/POL101Y1/PSY100H1/SOC100H1/TRN135Y1/UNI103H1/UNI103Y1/WGS160Y1

2. HST209H1/HST211H1, and HST250H1

3. PHL281H1/INS200H1

4. STA220H1 or equivalent

5. 0.5 credit from the following courses: ANT208H1/HMB202H1/HMB203H1/INS205H1/JSU237H1/NFS284H1/PCL201H1/PCL218H1/SOC204H1/SOC243H1/STA221H1/TRN235H1/TRN236H1

6. HST310H1

7. HST373H1/HMB342H1

8. 1.0 credit from the following courses: HST307H1/HST308H1/HST309H1/HST330H1/HST350H1/ANA300Y1/ANT345H1/ANT348H1/ANT358H1/EEB324H1/GGR340H1/HPS319H1/HPS370H1/HMB303H1/HMB323H1/INS340Y1/INS350H1

Fourth Year:

COG402H1/COG403H1/COG404H1

Health Studies Major (Arts Program) - ASMAJ2085

Description:

The Health Studies Program explores how health around the world is shaped by the circumstances in which people are born, grow up, live, work, and age, and how these in turn connect to a wider set of environmental, social, cultural, economic, and political forces. Understanding health requires knowledge from a range of disciplines and sectors: Health Studies offers a stimulating interdisciplinary environment that challenges students to think about health – both locally and globally – in new ways.
Asian Canadian Studies Minor (Arts Program) - ASMIN2728

Description:

The Minor in Asian Canadian Studies focuses on community-engaged learning that explores how to understand the historical, social, cultural, economic, and political forces that affect people of Asian heritage in Canada. Our interdisciplinary courses connect students with local communities, and every course provides opportunities for students to pursue a choice of research interests. Together we critically investigate and add to knowledge about Asian Canadians.

The category "Asian Canadian" is widely understood to refer to people in Canada of East Asian, South Asian, Southeast Asian, and West Asian ancestry.

Students take two required 0.5 credit core courses in Asian Canadian Studies; select from an array of courses in Asian Canadian Studies; and take additional courses related to the larger contexts of Asian Canadian Studies. The Minor in Asian Canadian Studies is easily combined with other disciplines, such as Anthropology, Art, Economics, English, Geography, History, Political Science and Sociology, as well as with interdisciplinary studies such as Contemporary Asian Studies, Diaspora and Transnational Studies, Equity Studies, East Asian Studies, South Asian Studies, and Near Eastern Studies.

Students will be encouraged to take full advantage of the opportunities available through the Canadian Studies Program, including its journal, ImagINATIONs, produced by and for undergraduate students and its annual undergraduate student conference. The Canadian Studies Student Union is a focal point for social as well as academic pursuits, and is open to students pursuing a Minor in Asian Canadian Studies. Students also can participate in Asian Canadian Studies student events and in the tri-campus Asian Canadian Studies Research network. The Research network brings together professors and students to discuss current research related to Asian Canadian Studies, Asian diasporas, and global Asian migrations. Students in the minor are also invited to participate in the Asian Institute's Asian Pathways Research Lab that offers research opportunities in Toronto.

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

(4.0 credits, including 1.0 credit at the 300+ level).

First Year: No specific first-year requirements. (Students are advised to take introductory courses that will serve as prerequisites for optional courses of interest to them later in the program.)

Subsequent year requirements:

Required courses (1.0 credit):
1. CDN230H1 Asian Canadian History
2. CDN307H1 Asian Cultures in Canada

Additionally, 3.0 credits from courses in requirements 3 & 4, with at least 1.0 credit in each category.

3. Asian Canadians and Asian Diasporas in Canada:

CAS413H1; CDN450H1; CDN460H1; CDN490H1; CDN595H1; CDN695H1; CDN696H1; CDN697H1; ENG268H1; ENG368H1; ENG369H1; SOC218H1; ANT477H1; SAS114H1.

4. Contexts of Asian Canadian Studies:

Canadian Studies program courses:

CDN202H1; CDN205H1; CDN218H1; CDN221H1; CDN267H1; CDN268H1; CDN280H1; CDN305H1; CDN335H1; CDN336H1; CDN367H1; CDN368H1; CDN380H1; CDN405H1; CDN406H1; CDN420Y1; CDN425H1; CDN435Y1;

Other courses:

Other courses:

1186
University College Courses

CDN197H1 - Inventing Canada

Hours: 24S

This course explores the ways that Canadian history and identity have been commemorated, interpreted and experienced, now and in the past. The course focuses in particular on who has been included or excluded in commemorative efforts over time. Key topics include representations of women, Indigenous peoples, and political figures on screen and through public installations like museum exhibits, plaques and statues. Case studies highlighting a range of interpretive media will encourage students to work with and discuss a range of primary and secondary sources, build critical thinking and academic writing skills. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

CDN198H1 - Canada, Colonialism and Settler Relations

Hours: 24S

A First Year Foundations seminar focused on exploring Canada’s colonial history and recent efforts to enact appropriate settler relations through an interdisciplinary lens. Topics will include contemporary land claims and treaty-making processes, the Royal Commission on Aboriginal Peoples, governmental apologies for the mistreatment of Indigenous peoples, the Truth and Reconciliation Commission, land acknowledgements, practices of allyship through social movement such as Idle No More, and efforts to influence Canada’s overseas mining practices. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Society and its Institutions (3)
CDN199H1 - Canada- Hong Kong Migration

Hours: 24S

This course surveys the effects of migrations and cultural connections between Hong Kong and Canada from the 1960s. Students will discuss and analyze the impact of migrations, and study the connection between the two locations from the perspectives of history, culture and literature, politics and democracy, economic and financial development and the network of people and community. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Society and its Institutions (3)

COG344H1 - Issues in Cognitive Science IV: Language and Communication

Hours: 36L

An examination of core topics in cognitive science building on introductions in COG250Y1. Typical topics include: language and cognition; language acquisition; theories of meaning; pragmatics.

Prerequisite: COG250Y1 and one of either LIN232H1/LIN241H1 or JLP315H1/JLP374H1.

COG345H1 - Issues in Cognitive Science V: Cognitive Science and Society

Hours: 36L

An examination of core topics in cognitive science building on introductions in COG250Y1. Topics include central moral, social, and political questions both relevant to and raised by cognitive science research.

Prerequisite: COG250Y1 and one of PSY270H1/PHL342H1

Breadth Requirements: Thought, Belief and Behaviour (2)

UNI197H1 - Hamilton: Musical and History

Hours: 24S

This course examines the American revolution and its reception in the musical “Hamilton.” The American revolution generated multiple stories that included and excluded actors, peoples, perspectives, and more. This course delves into the American revolution and the diversity of those engaged in it and affected by it. The songs, performances, and reception of the musical “Hamilton” are a key resource for exploring the events and role of the American Revolution. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Humanities

Breadth Requirements: Society and its Institutions (3)

UNI198H1 - Why Go to University? The Changing Role and Purpose of Higher Education

Hours: 24S

Is higher education about job preparation or about giving students an opportunity to learn about themselves and the world around them? Can higher education in Canada achieve both these aims? This course engages with the spirited conversations and scholarly debates about the ideals of a liberal arts education and how these connect with ancient and contemporary arguments about citizenship. We explore the impact on higher education of globalization and what some call the “corporatization” of universities. Students will be encouraged to think, read, research and write about various models of higher education and explore questions suggested by these debates. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Social Science

Breadth Requirements: Society and its Institutions (3)
UNI199H1 - The Construction of Race in America: A History

Hours: 24S

The course will explore the origins of racial categories in America, in particular Negro (later black), Indian, and white. Drawing on primary sources such as memoirs, film, and government records as well as writings by scholars, we will examine how beliefs about these categories changed over time and with what consequences for the unfolding of American history. Arriving at the present day, we will consider such contradictory developments as the accelerating influence of Black Lives Matter and the headline-grabbing white nationalism on display at the “Unite the Right” rally in Charlottesville, Virginia, August, 2017. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Social Science
Breadth Requirements: Thought, Belief and Behaviour (2)

UNI103H1 - Gradients of Health in an Urban Mosaic

Previous Course Number: UNI103Y1
Hours: 36S

In this course, you will examine how Toronto's varied communities access and use health care, and how they may encounter barriers in doing so. You will study how economic disparities, shifting demographics, and government policies affect health policy and the right to access resources. Restricted to first-year students. Not eligible for CR/NCR option.

Exclusion: Innis One, Munk One, New One, St. Mike's One, Trinity One, Vic One, Woodsworth One
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

UNI104H1 - Sex in the City

Previous Course Number: UNI104Y1
Hours: 36S

You will learn about the sexual politics of the city and how cities and their neighbourhoods become sexualized and desexualized spaces. In Sex in the City, you will examine what "sex" means to Toronto's varied, multicultural communities by looking at urban space, cultural productions, law enforcement, safety and health resources and more. Restricted to first-year students. Not eligible for CR/NCR option.

Exclusion: Innis One, Munk One, New One, St. Mike's One, Trinity One, Vic One, Woodsworth One
Distribution Requirements: Social Science
Breadth Requirements: Thought, Belief and Behaviour (2)

UNI106H1 - Performing the City II

Previous Course Number: UNI102Y1
Hours: 36S

Further exploration of connections between the performing arts, urban spaces, and cultural diversity; complementing UNI102H1. How does theatrical performance affect how people perceive the city? What are the alternatives to established theatres, and how does community activism inform performing arts in Toronto? Restricted to first-year students. Not eligible for CR/NCR option.

Exclusion: Innis One, Munk One, New One, St. Mike's One, Trinity One, Vic One, Woodsworth One
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)
Canadian Studies

CDN202H1 - Aspects of Quebec Culture
Previous Course Number: UNI202H1
Hours: 24S

An exploration of modern Québec culture as expressed in literature and the performing arts. Through a selection of internationally-known entertainers, we examine form, artistic innovation, communication of information and knowledge, and spectatorship. Novels and plays provide key elements such as tradition and historical context.

Exclusion: UNI202H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

CDN205H1 - Topics in Canadian Studies I
Previous Course Number: UNI205H1
Hours: 24L

A focused introduction to specific issues in Canadian culture and society. Content will vary from year to year. Specific course information will be available on the Canadian Studies website at www.uc.utoronto.ca/canadianstudies.

Exclusion: UNI205H1
Distribution Requirements: Humanities; Social Science

CDN218H1 - Voices in Canadian Writing
Previous Course Number: UNI218H1
Hours: 24S

A study of the variety of voices in Canadian fiction with a focus on contemporary writers. Issues such as marginalization, migration, diaspora and the formulation of the Canadian canon are discussed.

Exclusion: UNI218H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

CDN221H1 - Culture and the Media in Canada
Previous Course Number: UNI221H1
Hours: 24L

An exploration of the encounter between culture and mass communication in Canadian society. The course considers the role of major cultural institutions such as the CBC, the NFB, and their granting bodies. The emergence of new media and its relationship to mass media is also addressed.

Exclusion: UNI221H1
Distribution Requirements: Social Science
Breadth Requirements: Creative and Cultural Representations (1)

CDN225H1 - Asian Canadian Space & Place
Hours: 24L

A comprehensive examination of the socio-cultural dimensions of space and place in the contemporary Asian Canadian context. Explores Asian Canadian landscape, culture and heritage, place and identity formation, multiculturalism and nationalism, spatial conflict and contestation, and the political economy of cultural space.

Recommended Preparation: CDN267H1/CDN268H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

CDN230H1 - Asian Canadian History
Previous Course Number: UNI230H1
Hours: 24L

The course examines the history of Asian Canadians from the mid-1800s to the present by analyzing their contributions to the socio-cultural, economic, and political development of Canada. It explores how Asian Canadian history reconfigures prevailing understanding of race, migration, multiculturalism, and national identity through intersectional, comparative, and transnational frameworks.

Exclusion: UNI230H1
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)
CDN240H1 - Italian Canadian Studies

**Hours:** 24L

An interdisciplinary course that examines the social, economic, and political forces and events that have shaped the Italian Canadian experience. Topics include initial and subsequent settlement patterns including suburbanization, identity formation, education, mobility, work, media, multiculturalism, transnationalism, and political participation and representation. The course interrogates the complexities of the social and cultural interactions of Italian Canadians in the context of the changing demography of Canada.

**Recommended Preparation:** CDN267H1, CDN268H1
**Distribution Requirements:** Social Science
**Breadth Requirements:** Society and its Institutions (3)

CDN267H1 - Canadian Nationalisms

**Previous Course Number:** UNI267H1
**Hours:** 24L

A critical examination of contemporary forms of Canadian nationalism. This interdisciplinary course will interrogate national formations across theoretical works, policy documents, and cultural representations. Students will address the ways that nationalist discourses constitute difference, especially with respect to race, ethnicity, gender, and sexuality.

**Exclusion:** UNI220Y, UNI267H1
**Distribution Requirements:** Humanities
**Breadth Requirements:** Creative and Cultural Representations (1)

CDN268H1 - Canada and Globalization

**Previous Course Number:** UNI268H1
**Hours:** 36L

Students examine the impact of contemporary globalization on Canada, and for Canada’s place in the world. The course is interdisciplinary in its approach and addresses globalization from a wide range of perspectives, including mobility, trade, urbanization, health, religion, environmental change, technology, communications, and the arts.

**Exclusion:** UNI220Y, UNI268H1
**Distribution Requirements:** Social Science
**Breadth Requirements:** Society and its Institutions (3)

CDN280H1 - Canadian Jewish History

**Previous Course Number:** UNI280H1
**Hours:** 24L

This course focuses on initial settlement patterns of Jews in Toronto and elsewhere, community growth including suburbanization, and contemporary challenges such as anti-Semitism and assimilation.

**Exclusion:** UNI280H1
**Distribution Requirements:** Humanities; Social Science
**Breadth Requirements:** Society and its Institutions (3)

CDN305H1 - Topics in Canadian Studies II

**Previous Course Number:** UNI305H1
**Hours:** 24L

An in-depth study of selected questions in contemporary Canadian culture and society. Content will vary from year to year. Specific course information will be available on the Canadian Studies website at www.uc.utoronto.ca/canadianstudies/.

**Exclusion:** UNI305H1
**Distribution Requirements:** Humanities; Social Science

CDN307H1 - Asian Cultures in Canada

**Previous Course Number:** UNI307H1
**Hours:** 24S

An exploration of the cultural histories and creative productions of a wide range of Asian communities in Canada. Experts in specific areas - literature, dance, drama, film - will be invited to present their work.

**Exclusion:** UNI307Y1, UNI307H1
**Recommended Preparation:** CDN267H1 (formerly UNI267H1), CDN268H1 (formerly UNI268H1)
**Distribution Requirements:** Humanities
**Breadth Requirements:** Creative and Cultural Representations (1)
CDN325H1 - Asian Canadian Space & Place

Hours: 24L

A comprehensive examination of the socio-cultural dimensions of space and place in the contemporary Asian Canadian context. Explores Asian Canadian landscape, culture and heritage, place and identity formation, multiculturalism and nationalism, spatial conflict and contestation, and the political economy of cultural space.

Prerequisite: 5.0 FCE or permission of the instructor
Recommended Preparation: CDN267H1/CDN268H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

CDN335H1 - Black Canadian Studies

Previous Course Number: UNI335H1
Hours: 24S

An interdisciplinary course that interrogates the constitution of blackness in Canada. Students will study race and ethnic relations, alongside other identity formations such as class, gender and sexuality. Topics to be addressed include media, education, law, immigration and mobility, urbanism, work, political representation and the arts.

Exclusion: UNI335H1
Recommended Preparation: CDN267H1 (formerly UNI267H1), CDN268H1 (formerly UNI268H1)
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

CDN340H1 - The History of Canadian-U.S. Relations

Hours: 24L

Over time, Canadians and Americans have developed distinct identities and cultures, but their histories have always been closely linked. This course examines the complex interrelationship between Canada and the United States. from the colonial period through the present day, especially its political, cultural, and indigenous dimensions.

Prerequisite: 0.5 FCE in a CDN course or permission of instructor
Exclusion: CDN305H1 (Canadian Topics II: The History of Canadian-U.S. Relations)
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

CDN355H1 - Digital Media, Digital Makers

Hours: 24S

This course will introduce students to quantitative research tools developed through the Digital Humanities. Students will learn to use online text analytics tools in order to understand how quantitative methods can support critical academic research of the study of Canada. Quantitative digital analysis will be applied to a wide range of Canadian digital academic archives and community hubs.

Recommended Preparation: CDN267H1, CDN268H1
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

CDN365H1 - The Canadian Arctic

Hours: 24S

This course surveys topics related to the Canadian Arctic. Through a critical interdisciplinary lens, the course looks at a broad set of issues including discovery and history, the environment and climate change, economic and resource development, sovereignty and security, social conditions, governance, and First Nations, Inuit, and Metis perspectives.

Prerequisite: At least 4.0 FCE in Faculty of Arts & Science/1.0 FCE in Canadian Studies
Exclusion: CDN406H1 (Topics in Canadian Studies III: Canadian Arctic Policy Development and Inuit Recognition)
Recommended Preparation: CDN267H1, CDN268H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

CDN367H1 - Canadian Pluralism

Previous Course Number: UNI367H1
Hours: 24S

Students will examine the complexities of social and cultural interaction in the context of changing Canadian demographics. This course compares and contrasts policies regarding indigenous rights, migration, multiculturalism, and citizenship with contemporary cultural narratives in literature, painting and film.

Prerequisite: CDN267H1/CDN268H1 or permission of instructor
Exclusion: UNI320Y1, UNI367H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)
CDN368H1 - Canada's Borders

Previous Course Number: UNI368H1
Hours: 24S

The Canadian border is being reshaped by the increasing transnational movement of people, goods and ideas. Students will examine border issues relating to mobility, trade, and security from a wide range of interdisciplinary perspectives, from public policy to contemporary media, such as TV, films, and novels.

Prerequisite: CDN267H1/CDN268H1 or permission of instructor
Exclusion: UNI320Y1, UNI368H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

CDN395H1 - Independent Study in Asian Canadian Studies

Previous Course Number: UNI395H1

An opportunity to write an independent research paper in Asian Canadian Studies under direction of a faculty member. Students wishing to take this course must have their essay proposal and supervisor approved by the Canadian Studies Program Director. The application for enrolment should be made in the term preceding study. Not eligible for CR/NCR option.

Prerequisite: CDN267H1/CDN268H1 or permission of instructor
Exclusion: UNI395H1

CDN380H1 - Socio-Cultural Perspective of the Canadian Jewish Community

Previous Course Number: UNI380H1
Hours: 24L

This course examines the relationship between prominent Canadians who happen to be Jews and those whose works are founded in Jewish identity; the diversity of the community on the basis of religion, language, class, ideology, etc.; contributions to the arts and scholarship; and the role and contribution of Jewish women.

Exclusion: UNI380H1
Distribution Requirements: Humanities; Social Science
Breadth Requirements: Creative and Cultural Representations (1)

CDN390H1 - Chinese Canadian Studies

Previous Course Number: UNI390H1
Hours: 24S

This course examines socio-cultural, political and economic aspects of Chinese communities in Canada. It explores how the study of Chinese Canadians challenges and augments our understanding of issues such as immigration and diaspora, multiculturalism, and race and ethnicity.

Prerequisite: 4.0 FCEs or by permission of instructor
Exclusion: UNI390H1
Recommended Preparation: CDN230H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

CDN405H1 - The University in Canada

Previous Course Number: UNI405H1
Hours: 24S

This seminar course will address the role of universities in Canadian society and in the lives of Canadians. Students will explore both contemporary issues in Canadian higher education and consider the historical contexts from which they emerged.

Prerequisite: CDN367H1/CDN368H1 or permission of instructor
Exclusion: UNI405H1
Recommended Preparation: CDN267H1, CDN268H1, CDN367H1, CDN368H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

CDN406H1 - Topics in Canadian Studies_III

Hours: 24S

An in-depth study of selected questions in contemporary Canadian culture and society. Content will vary from year to year. Specific course information will be available on the Canadian Studies website at www.uc.utoronto.ca/canadianstudies.

Prerequisite: At least 4.0 FCE in Faculty of Arts & Science/1.0 FCE in Canadian Studies
Recommended Preparation: CDN267H1, CDN268H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)
CDN420Y1 - Senior Essay

Previous Course Number: UNI420Y1

Hours: 48S

Students select an appropriate research topic and, in consultation with the Program Director, make arrangements with a suitable supervisor. Preferably, research projects must be approved by the supervisor and by the Director of the Canadian Studies Program by April of the preceding academic year. Students meet periodically during the year in seminar to participate in peer evaluations of: statement of research, literature review, methods of analysis, and to share reports of progress in research. Not eligible for CR/NCR option.

Prerequisite: Normally open only to Majors and Specialists in the Canadian Studies program or permission of Director.
Exclusion: UNI420Y1
Distribution Requirements: Humanities; Social Science

CDN425H1 - Independent Research in Canadian Studies (formerly UNI425H1)

An opportunity to write a substantial research paper in Canadian Studies that integrates research methodologies and conceptual frameworks developed over the student's course of study. Students must have their topic and supervisor approved by the Canadian Studies program director. Not eligible for CR/NCR option.

Prerequisite: CDN367H1, CDN368H1 or permission of Director
Distribution Requirements: Humanities; Social Science

CDN430Y1 - Senior Seminar: Special Topics in Canadian Studies

Previous Course Number: UNI430Y1

Hours: 48S

An upper level seminar. Not eligible for CR/NCR option.

Prerequisite: CDN367H1 (formerly UNI367H1), CDN368H1 (formerly UNI368H1) or permission of the Director of the Canadian Studies program
Exclusion: UNI430Y1

CDN435Y1 - Active Citizenship in a Canadian Context

Previous Course Number: UNI435Y1

Hours: 48S

This course draws from theoretical works to critically examine the experiences of citizenship of various communities in Canada. A service learning component is incorporated so that students can themselves engage in active citizenship. The course develops extra-curricular expertise that can contribute to a student's professional CV.

Prerequisite: Completion of 10 FCEs, and application required. See http://www.uc.utoronto.ca/courses-offered-canadian-studies-program for details.
Exclusion: UNI435Y1
Distribution Requirements: Humanities; Social Science
Breadth Requirements: Creative and Cultural Representations (1); Society and its Institutions (3)

JCI250H1 - Italian Canadian Communities

Hours: 24S

This course examines the past and present settlement patterns of those of Italian descent in Canada, in rural areas and cities, including increasing suburbanization. Students will address issues such as work and employment and political participation. Challenges and opportunities will be examined, with respect to issues such as migration, community-building, belonging, and discrimination.

Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

JCI350H1 - Italian Canadian Culture and Identity

Hours: 24S

This course examines the contributions of Canadians of Italian descent to arts, culture, identity and heritage in Canada, with attention to the diversity of the community with respect to issues such as language, religion, gender, class, sexuality, etc. A core concept addressed by the course is immigration, whether from the experiences of migrants themselves or later generations.

Recommended Preparation: JCI250H1/ITA233H1
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)
JSU325H1 - Queerly Canadian

Previous Course Number: UNI325H1
Hours: 36L

This course focuses on Canadian literary and artistic productions that challenge prevailing notions of nationality and sexuality, exploring not only how artists struggle with that ongoing Canadian thematic of being and belonging, but also celebrate pleasure and desire as a way of imagining and articulating an alternative national politics.

Prerequisite: SDS255H1/SDS256H1/CDN267H1 (formerly UNI267H1)/CDN268H1 (formerly UNI268H1) or permission of the instructor
Exclusion: SDS375H1 Special Topics: Queerly Canadian, UNI325H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

JUG320H1 - The Canadian Wilderness

Hours: 24L

The idea of wilderness permeates narratives of Canadian national identity, while policy-makers seek to manage and contain natural areas. This course compares and contrasts historical and contemporary wilderness narratives in literature, painting and film with policies in areas such as conservation, urban planning, land claims and tourism.

Recommended Preparation: 8.0 FCE's
Distribution Requirements: Social Science
Breadth Requirements: Thought, Belief and Behaviour (2)

JUG325H1 - Landscapes of Violence in Canada

Hours: 24L

This course examines how violence is enacted in Canada, at various scales, and across domestic, urban, national, and international landscapes. We will interrogate what is meant by violence; examine its colonial, racial and patriarchal dimensions; explore the impact on people and communities; and attend to forms of resistance and repair.

Recommended Preparation: CDN267H1, CDN268H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

Cognitive Science

COG250Y1 - Introduction to Cognitive Science (formerly JUP250Y1, UNI250Y1)

Hours: 78L

An introduction to the problems, theories and research strategies central to the interdisciplinary field focusing on the nature and organization of the human mind and other cognitive systems. Interrelations among the philosophical, psychological, linguistic and computer science aspects of the field are emphasized.

Exclusion: JUP250Y1, UNI250Y1
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

COG260H1 - Data, Computation, and the Mind

Hours: 24L/12P

How does the human mind work? We explore this question by analyzing a range of data concerning such topics as human rationality and irrationality, human memory, how objects are represented in the mind, and the relation of language and cognition. This class provides critical thinking and practical computational skills that will allow students to work with data in cognitive science and related disciplines.

Prerequisite: CSC108H1/CSC148H1
Corequisite: COG250Y1
Distribution Requirements: Social Science
Breadth Requirements: The Physical and Mathematical Universes (5)

COG341H1 - Issues in Cognitive Science I: Attention, Perception, and Consciousness

Hours: 36L

An examination of core topics in cognitive science building on introductions in COG250Y1. Typical topics include: perception and attention; concepts; imagery; consciousness.

Prerequisite: COG250Y1 and one of PSY270H1/PHL342H1
Distribution Requirements: Humanities; Social Science
Breadth Requirements: Thought, Belief and Behaviour (2)

Hours: 36L

An examination of core topics in cognitive science building on introductions in COG250Y1. Typical topics include: concepts; theories of mind; cognitive evolution.

Prerequisite: COG250Y1 and one of PSY270H1/PHL342H1
Distribution Requirements: Humanities; Social Science
Breadth Requirements: Thought, Belief and Behaviour (2)

COG343H1 - Issues in Cognitive Science III: Computational Cognition

Hours: 24L/12P

An examination of core topics in cognitive science building on introductions in COG250Y1. Typical topics include: computational models of cognition and learning, natural language processing, computer intelligence.

Prerequisite: COG260H1, CSC148H1, STA220H1/PSY201H1
Corequisite: COG250Y1
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

COG401H1 - Seminar in Cognitive Science

Hours: 36S

Advanced treatment of cognitive science topics for arts majors. Possible topics include: concepts, consciousness, the mind-body problem, cognitive science and the arts.

Prerequisite: COG250Y1; PHL342H1; 14.0 credits
Exclusion: COG402H1, COG403H1
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

COG402H1 - Seminar in Cognitive Science

Hours: 36S

Advanced treatment of cognitive science topics such as neuroscientific theories of consciousness, rationality and modelling of cognitive processes.

Prerequisite: COG250Y1; PSY270H1; 14.0 credits
Exclusion: COG401H1; COG403H1
Distribution Requirements: Science; Social Science
Breadth Requirements: Thought, Belief and Behaviour (2)

COG403H1 - Seminar in Cognitive Science

Hours: 36S

Advanced treatment of cognitive science topics, including the application of core ideas from probability theory, information theory, statistics, and machine learning to modelling human cognition and artificial intelligence.

Prerequisite: CSC148H1; COG250Y1; COG260H1; (MAT135H1, MAT136H1)/MAT137Y1, 0.5 FCE in statistics; 14.0 credits
Exclusion: COG401H1; COG402H1
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

COG404H1 - Seminar in Cognitive Science

Hours: 36S

Advanced treatment of cognitive science topics, including language processes and language representation, productions and comprehension, language acquisition, and language and theory of mind, pragmatics, reference and context.

Prerequisite: COG250Y1; JLP315H1/JLP374H1; LIN232H1/ LIN241H1; 14.0 credits.
Exclusion: COG401H1; COG402H1; COG403H1
Distribution Requirements: Social Science
Breadth Requirements: Thought, Belief and Behaviour (2)
COG415H1 - Cognitive Science in Practice

Hours: 18L/15P

This course provides COG students with the opportunities to practice quantitative and qualitative evaluation and assessment methods in real world situations and juxtapose theory with practice. Placement activities will ground topics such as problem solving, logistics, decision making, etc., through practical application, individual and group / in-class critical reflection.

Prerequisite: COG250Y1, COG341H1/COG342H1, PSY370H1

Distribution Requirements: Science

Breadth Requirements: Thought, Belief and Behaviour (2)

COG498H1 - Independent Study

Advanced Independent Study. Not eligible for CR/NCR option.

Distribution Requirements: Humanities; Social Science

COG499H1 - Individual Study in Cognitive Science

Advanced Independent Study. Not eligible for CR/NCR option.

Distribution Requirements: Humanities; Social Science

HST211H1 - Health Policy in Canada

Previous Course Number: UNI211H1

Hours: 24L

Introduces students to health policy in Canada, with a particular focus on the social determinants of health, and on how to improve health through policy advocacy. Examines the policy making process in the Canadian context, and the development of health policy in Canada. Explores current debates about health issues.

Exclusion: UNI211H1

Distribution Requirements: Social Science

Breadth Requirements: Society and its Institutions (3)

HST250H1 - Introduction to Research Methods in Health Studies

Previous Course Number: UNI250H1

Hours: 36L

Offers students in Health Studies a basic understanding of research design and data collection on health topics. Also assesses the usefulness of research and data collection in the formation of health policy.

Exclusion: UNI250H1

Distribution Requirements: Social Science

Breadth Requirements: Society and its Institutions (3)

HST307H1 - Special Topics in Health Studies I

Hours: 24L

The specific content of this course will vary from one year to another, depending on the availability of particular health researchers and scholars. Specific course information will be available on the Health Studies website at www.uc.utoronto.ca/healthstudies/.

Distribution Requirements: Social Science

Health Studies

HST209H1 - Introduction to Health: Determinants of Health & Health Care

Previous Course Number: UNI209H1

Hours: 24L

A multidisciplinary approach to understanding perspectives in health, health equity, and primary health care. Themes include critical discussion of the measurements of health outcomes and the socioeconomic and political factors that affect health, including neglected and marginalized populations in Canada and globally.

Exclusion: UNI209H1

Distribution Requirements: Social Science

Breadth Requirements: Society and its Institutions (3)
HST308H1 - Aging and Health

Previous Course Number: UNI308H1  
Hours: 24L

Provides an understanding of the interface between health and aging, and how to maintain wellness in a rapidly aging population. Examines theories of aging, the meaning of health in old age, myths about the health of Canada’s older people, and emerging national and international responses to aging populations.

Prerequisite: HST209H1, HST211H1  
Exclusion: UNI308H1

Distribution Requirements: Social Science  
Breadth Requirements: Society and its Institutions (3)

HST309H1 - Special Topics in Health Studies II (formerly UNI309H1)

Hours: 24L

The specific content of this course will vary from one year to another, depending on the availability of particular health researchers and scholars. Specific course information will be available on the Health Studies website at www.uc.utoronto.ca/healthstudies/.

Distribution Requirements: Social Science

HST310H1 - Critical Health Policy

Previous Course Number: UNI310H1  
Hours: 24L

A critical, in-depth exploration of contemporary health and social issues. Political, social and economic forces at play in Canadian society are examined in relation to specific health issues and policies, in order to understand general societal and system dynamics of evolution and change, and to identify implications for reform efforts.

Prerequisite: HST211H1  
Exclusion: UNI310H1

Distribution Requirements: Social Science  
Breadth Requirements: Society and its Institutions (3)

HST330H1 - Population Health

Previous Course Number: UNI330H1  
Hours: 24L

Extends students’ understanding of population-based strategies of health promotion in Canada. Topics include: variations in health status as affected by population patterns, class, gender, ethnicity, employment, and family composition; major causes of morbidity and mortality; the concept of “community health”, opportunities and constraints facing public policy.

Prerequisite: HST209H1  
Exclusion: UNI330H1

Recommended Preparation: HST250H1

Distribution Requirements: Social Science  
Breadth Requirements: Society and its Institutions (3)

HST350H1 - Health Research & Practice

Previous Course Number: UNI350Y1, HST350Y1  
Hours: 36S

For students enrolled in the Health Studies Specialist and Major programs. Students engage in activities that will prepare them for independent research and practicum projects. Includes, but not limited to, sessions on topic selection and program development, finding a supervisor, ethics and professionalism, formulating a grant proposal.

Prerequisite: HST250H1  
Exclusion: UNI350Y1, HST350Y1

Distribution Requirements: Social Science

HST373H1 - Epidemiology

Previous Course Number: UNI373H1  
Hours: 36L

Introduces students to the principles and methods of epidemiology. Emphasis on descriptive methods and study design. Computational techniques, measurement problems, and issues that surround the drawing of inferences from area-level or other aggregate data will be discussed.

Prerequisite: STA220H1 or equivalent  
Exclusion: HMB342H1, UNI373H1

Distribution Requirements: Social Science  
Breadth Requirements: The Physical and Mathematical Universes (5)
HST400Y1 - Health Studies Practicum

Hours: 172P/24S

Individual field placement with a health-related institution or organization, in which the student applies theory and skills to specific projects and/or tasks. Culminates in an oral and written report. Not eligible for CR/NCR option.

Prerequisite: HST350H1/HST350Y1 or permission of the Director

HST405H1 - Global Migration and Health

Previous Course Number: HST307H1
Hours: 24L

Over the past decades, economic globalization, widening socio-economic inequities, conflict, natural disasters, environmental degradation, and, more recently, climate change have combined to become increasingly significant forces shaping global migration fluxes. This course analyzes the impact of migration on the health of those who move and of individuals, communities and entire societies in countries of origin, transit, arrival, and resettlement. It adopts an interdisciplinary approach, incorporating scholarly work from the fields of public health, the social sciences, law, and human rights.

Prerequisite: HST209H1
Exclusion: HST307H1 (Special Topics in Health Studies I: Globalization, Migration and Health), offered in Winter 2017, Winter 2018, and Winter 2019

Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

HST407H1 - Special Topics in Advanced Health Studies I

Hours: 24L

The specific content of this course will vary from one year to another, depending on the availability of particular health researchers and scholars. Specific course information will be available on the Health Studies website at www.uc.utoronto.ca/healthstudies/.

HST409H1 - Special Topics in Advanced Health Studies II

Hours: 24S

The specific content of this course will vary from one year to another, depending on the availability of particular health researchers and scholars. Specific course information will be available on the Health Studies website at www.uc.utoronto.ca/healthstudies/.

Exclusion: UNI409H1

HST410H1 - Case Studies in Health Policy (formerly UNI408H1)

Hours: 36S

Analyses the formation and implementation of health policy through the use of case studies. Each case deals with a substantive health policy issue. Using case studies, students will learn to understand and analyze the processes by which public policies are formed, and perform comparisons of policy alternatives.

Prerequisite: HST211H1
Exclusion: UNI408H1, HST408H1
Recommended Preparation: HST310H1

Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

HST411H1 - Political Economy of Health

Previous Course Number: UNI411H1
Hours: 36S

Examines the production and distribution of health and illness within and across populations. A political economy approach is used to better understand the fundamental origins of health inequalities, the political action that is required to tackle them, and the obstacles that hinder the possibilities for such action.

Prerequisite: HST209H1
Exclusion: UNI411H1

Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)
HST440H1 - Health & Pharmaceuticals

Previous Course Number: UNI440H1
Hours: 24L

A critical examination of drug development, including the role of health professionals and the pharmaceutical industry in researching, testing, marketing, licensing, and evaluating pharmaceutical drugs. Topics include the differing needs for drug development, evaluation and dispensing in lower income countries, and potential conflicts of interest in drug development.

Prerequisite: HST209H1/HMB303H1
Exclusion: UNI440H1, UNI330H1 (Health & Pharmaceuticals) taken prior to 2010-11
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

HST450Y1 - Undergraduate Health Research Project

Previous Course Number: UNI450Y1

Final culminating project for students in the Health Studies Specialist. Students will prepare an undergraduate thesis by the end of the course under the supervision of a University of Toronto faculty member. Not eligible for CR/NCR option.

Prerequisite: HST250H1, STA220H1, HST350Y1
Exclusion: UNI450Y1
Distribution Requirements: Social Science

HST451Y1 - Independent Research in Health Studies

Previous Course Number: UNI451Y1

This two-semester course designation will permit students to gain academic credit for health studies pursued independently, or to participate in an ongoing health research project, under the supervision of a University of Toronto faculty member. Not eligible for CR/NCR option.

Prerequisite: HST209H1, HST250H1
Exclusion: UNI451Y1
Recommended Preparation: HST350Y1
Distribution Requirements: Social Science

HST464H1 - The Nature of International Health

Previous Course Number: UNI464H1
Hours: 24L

Explores the historical, ideological, economic, political, and organizational factors that shape the theory and practice of international health (IH). Students will be encouraged to critically examine some of the central tensions embedded in this field.

Prerequisite: HST209H1/HMB303H1
Exclusion: UNI464H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

HST480H1 - Independent Research in Health Studies

Previous Course Number: UNI480H1

This one-semester course will permit students to gain academic credit for health studies pursued independently, or to participate in an ongoing health research project, under the supervision of a University of Toronto faculty member. Not eligible for CR/NCR option.

Prerequisite: HST209H1, HST250H1
Exclusion: UNI480H1
Recommended Preparation: HST350Y1
Distribution Requirements: Social Science

JSU237H1 - Introduction to HIV/AIDS: Health, Sexuality and Gender (formerly UNI237H1)

Hours: 24L

A critical examination of the HIV/AIDS global pandemic from a multidisciplinary perspective and with an emphasis on sexuality. The course examines the basic biology of HIV/AIDS and then covers social, historical, political, cultural, gender, and public health aspects of HIV/AIDS. Attention is given to the distinct features of vulnerable and marginalized populations, prevention, treatment, drug development, and access to medicines.

JSU237H1 is particularly intended for students in the Health Studies and/or Sexual Diversity Studies programs.

Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)
PHS100H1 - Global Health Grand Opps

Hours: 24L/24T

This course introduces students to basic public health-related concepts, significant aspects of the historical development of global health, and a selection of topics illustrating the broad and evolving nature of this field. In addition, it helps students explore the contributions that various disciplines/fields offer to global health.

Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

PHS300H1 - HIV Prevention Research

Hours: 24L

This course engages students in in-depth learning about HIV research. In addition to learning about methods and issues from a variety of research disciplines as applied to HIV, students will be expected, with guidance, to design a study relevant to the content of the course.

Recommended Preparation: STA220H1 or equivalent
Distribution Requirements: Science; Social Science
Breadth Requirements: Society and its Institutions (3)

Other University College Courses

JUM202H1 - Mathematics as an Interdisciplinary Pursuit

Hours: 24L/12T

A study of the interaction of mathematics with other fields of inquiry: how mathematics influences, and is influenced by, the evolution of science and culture. Art, music, and literature, as well as the more traditionally related areas of the natural and social sciences may be considered. (Offered every three years)

JUM202H1 is particularly suited as a Science Distribution Requirement course for Humanities and Social Science students.

Exclusion: JUM102H1
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

JUM203H1 - Mathematics as a Recreation

Hours: 24L/12T

A study of games, puzzles and problems focusing on the deeper principles they illustrate. Concentration is on problems arising out of number theory and geometry, with emphasis on the process of mathematical reasoning. Technical requirements are kept to a minimum. A foundation is provided for a continuing lay interest in mathematics. (Offered every three years)

JUM203H1 is particularly suited as a Science Distribution Requirement course for Humanities and Social Science students.

Exclusion: JUM103H1
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

JUM205H1 - Mathematical Personalities

Hours: 24L/12T

An in-depth study of the life, times and work of several mathematicians who have been particularly influential. Examples may include Newton, Euler, Gauss, Kowalewski, Hilbert, Hardy, Ramanujan, Gódel, Erdős, Coxeter, Grothendieck. (Offered every three years)

JUM205H1 is particularly suited as a Science Distribution Requirement course for Humanities and Social Science students.

Exclusion: JUM105H1
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

UNI299Y1 - Research Opportunity Program

Credit course for supervised participation in faculty research project. Details at https://www.artsci.utoronto.ca/current/academics/research-opportunities/research-opportunities-program. Not eligible for CR/NCR option.

Distribution Requirements: Humanities
UNI393Y1 - University College Independent Studies

An opportunity to design an independent research course of study at the 300 level not otherwise available within the Faculty. Normally, students will have a minimum cGPA of 3.0 and have completed 10 FCEs. Permission of a faculty supervisor and approval by the Vice-Principal are required. Those registered in a UC program or UC-registered students should submit a written proposal and application form to the Programs Office (UC173) for approval. Applications for Y and F courses are due by 30 June prior to the academic year; S courses to be submitted by 15 September; Summer proposals are due by 15 February. Not eligible for CR/NCR option.

Application form is available at the University College website at www.uc.utoronto.ca/.

Prerequisite: Permission of University College Vice-Principal

UNI394H1 - University College Independent Studies

An opportunity to design an independent research course of study at the 300 level not otherwise available within the Faculty. Normally, students will have a minimum cGPA of 3.0 and have completed 10 FCEs. Permission of a faculty supervisor and approval by the Vice-Principal are required. Those registered in a UC program or UC-registered students should submit a written proposal and application form to the Programs Office (UC173) for approval. Applications for Y and F courses are due by 30 June prior to the academic year; S courses to be submitted by 15 September; Summer proposals are due by 15 February. Not eligible for CR/NCR option.

Application form is available at the University College website at www.uc.utoronto.ca/.

Prerequisite: Permission of University College Vice-Principal

UNI399Y1 - Research Opportunity Program

Credit course for supervised participation in faculty research project. Details at https://www.artsci.utoronto.ca/current/academics/research-opportunities/research-opportunities-program. Not eligible for CR/NCR option.

UNI495Y1 - University College Independent Studies

An opportunity to design an independent research course of study at the 400 level not otherwise available within the Faculty. Normally, students will have a minimum cGPA of 3.0 and have completed 15 FCEs. Permission of a faculty supervisor and approval by the Vice-Principal are required. Those registered in a UC program or UC-registered students should submit a written proposal and application form to the Programs Office (UC173) for approval. Applications for Y and F courses are due by 30 June prior to the academic year; S courses to be submitted by 15 September; Summer proposals are due by 15 February. Not eligible for CR/NCR option.

Application form is available at the University College website at www.uc.utoronto.ca/.

Prerequisite: Permission of University College Vice-Principal

UNI496H1 - University College Independent Studies

An opportunity to design an independent research course of study at the 400 level not otherwise available within the Faculty. Normally, students will have a minimum cGPA of 3.0 and have completed 15 FCEs. Permission of a faculty supervisor and approval by the Vice-Principal are required. Those registered in a UC program or UC-registered students should submit a written proposal and application form to the Programs Office (UC173) for approval. Applications for Y and F courses are due by 30 June prior to the academic year; S courses to be submitted by 15 September; Summer proposals are due by 15 February. Not eligible for CR/NCR option.

Application form is available at the University College website at www.uc.utoronto.ca/.

Prerequisite: Permission of University College Vice-Principal

D. Wright, BSc, MBA (Kenneth and Patricia Taylor Distinguished Professor of Foreign Affairs)

Introduction

Victoria College (Vic) is committed to providing students with a personal and inclusive university experience inside and outside the classroom. This is an environment where students and faculty are engaged in building a community that welcomes diversity, embraces creativity and is energized by challenge.

At Vic, we nurture a close-knit learning environment from the very beginning of your academic career. Whether it is through our Vic One program, Vic One Hundred or the First-Year Foundation (FYF) courses offered by the Faculty of Arts and Science, every first-year Victoria College student takes at least one small seminar course. You will experience here the academic advantages of being a student at one of Canada’s leading research universities combined with the intimacy of a small liberal arts college.

More information is found on the Victoria College website.

Vic One

Victoria College offers first-year Arts and Science students an opportunity for a unique educational experience that draws upon the College’s history and identity. Eight streams with differing emphases are available in this foundation year program, known as Vic One. The eight streams feature lively seminars and dialogue, and are enriched by weekly plenary sessions with guest professors, visiting artists, writers, ambassadors and other public figures.

Two required courses in each stream are seminar courses given by faculty of Victoria College. They have a limited enrolment of 25 students in each class. A third co-requisite course is listed with each course description. Students who have questions about their Vic One co-requisite course must contact the Vic One Liaison Officer at vic.one@utoronto.ca.

Vic One enrolment requires an application that is found on the Vic One website (www.vic.utoronto.ca). All first-year students in the Faculty of Arts and Science (St. George campus), regardless of college membership, are eligible for admission to Vic One. Admission decisions are based on extra-curricular activities, a short original essay and the student’s entering grades.

PLEASE NOTE: Vic One students are NOT eligible to enrol in Vic One Hundred courses, First-Year Foundations seminars or any other One program.

Vic One Hundred: First Year Seminars

Vic One Hundred is a Victoria College initiative that offers first-year Arts and Science students the opportunity to experience a small class environment. These limited enrolment courses facilitate close contact with distinguished teaching faculty and fellow students, while providing an excellent gateway to, and foundation for, subsequent studies.

Combined Degree Program (CDP) in Arts/Science and Education (Victoria College and Ontario Institute for Studies in Education)

The Combined Degree Program in Arts/Science and Education is designed for students interested in studying the intersections of teaching subjects and Education, coupled with professional teacher preparation. Students earn an Honours Bachelor’s degree from the
Faculty of Arts and Science (St. George) and an accredited professional Master of Teaching (MT) degree from the Ontario Institute for Studies in Education (OISE). The CDP permits the completion of both degrees in six years with 1.0 FCE that may be counted towards both the undergraduate and graduate degrees.

Program requirements:
1. Minor in Education and Society, Victoria College
2. Major in one of the following areas, corresponding to the first teaching subject:
   - English
   - History
   - Mathematics
   - Psychology
   - Sociology
3. Minor in an area corresponding to the second teaching subject as determined by OISE. See the teaching subject prerequisites for Junior/Intermediate and Senior/Intermediate teaching.

Application Process
Applicants apply successively to the H.B.A./H.B.Sc. program, the MT program, and the CDP. See the department/college page for admission requirements in the relevant Major and Minor programs.

In the Spring term of Year 3 of the Bachelor program, students apply at OISE for conditional admission to the MT. To be considered for conditional admission to the Master of Teaching and the Combined Degree Program, students must meet the following admission requirements:

- Have completed or be on course to complete the Education and Society Minor Program (Victoria College)
- Be registered in the 3rd year of the H.B.Sc. or H.B.A. Degree Program, in one of the above listed major programs.
- Have completed at least half of the teaching subjects’ prerequisite courses (i.e. 3.0 FCEs in 1st teaching subject, and 1.5 FCE in 2nd teaching subject) by the end of third year.
- Have an average grade equivalent of at least B+, normally demonstrated by an average grade in the 2nd year.
- Provide at least two letters of reference.
- Meet other qualifications as specified by the MT program.

See: http://www.oise.utoronto.ca/mt/How_To_Apply.html

Once students have accepted a conditional offer of admission to the MT program, they will be eligible to take 1.0 graduate FCE at OISE in their fourth year, which will count towards both the undergraduate degree and the Master of Teaching degree.

If the student does not meet the above conditions, the offer of conditional admission to the Combined Degree Program will be rescinded. Students in this position could apply separately to the Master of Teaching outside of the Combined Degree Program.

For students to be given full, unconditional admission to the MT program, they must:

- Maintain at least a B+ (3.3) average in their final year or over senior courses.
- Achieve a grade of at least B+ average in the 1.0 graduate FCE taken in Year 4.

- Have completed required courses to meet the first and second teaching subjects.
- Successfully complete the requirements for the H.B.Sc./H.B.A. program.
- Have the undergraduate degree confirmed.

Academic Path to Completion for the CDP
Year 1-4: H.B.Sc./H.B.A. program and degree requirements
Year 4: 1.0 FCE in the MT graduate courses
Year 5-6: 9 FCEs of the MT program requirements

Creative Expression and Society Program

The Minor in Creative Expression and Society allows students to develop creative and communicative proficiency by taking part in one or more workshop-style courses in fiction, non-fiction, or poetry writing and/or creative expression through aural and visual media. Students will also explore the reciprocal relationship of the creative arts and society by studying social issues in the arts, the influence of writers and artists on society, and the impact of society and the marketplace on creative endeavours. Courses explore such topics as the arts and public opinion; reception and interpretation; marketing and reviewing; censorship and criticism; ethics and accountability. This program fosters the exercise of creativity while making the relationship of creative expression and social conditions a subject for reflection and dialogue.

Education and Society Program

The Vic-sponsored Education and Society Minor is open to all Arts and Science students. This program is for those who are interested in education policy, the sociology of education, and teaching as a skill that is relevant to many careers. The Minor program provides strong background for admission to a teacher education program and is required for admission to the Combined Degree Program with OISE (separate application required, see above).

Literature and Critical Theory Program

The Literature and Critical Theory program (formerly Literary Studies) is based on a pair of ideas. The first is that many of the most important issues that engage our attention call for a multidisciplinary approach. The second is that the kind of critical analysis demanded by the study of literary texts offers powerful tools for investigating other cultural and social forms, both past and present. Central to the program is the comparative study of forms of representation – texts, media, institutions, and theories — in diverse cultures and historical periods. This requires thinking seriously about what it means to compare and what it means to translate.

The Literature and Critical Theory program will attract students who are interested in exploring and generating links between literature and historical, cultural, political, social, and psychological forces. The program trains students to think about how problems of the present are tied to those of the past, and to consider critically how we both represent this past and imagine possible futures. Students will be engaged in the practice of close, contextualized analyses of literary texts and other discursive forms, including artefacts, institutions and social practices, originating in different languages, geographical locations, and historical periods.

Literary production, like all forms of cultural production, invariably exceeds the boundaries of the nation, and increasingly so in today’s globalized world. The boundaries between various cultural media are similarly porous, and the aesthetic values by which we identify,
judge, and classify literary and cultural objects are historically shaped. For these reasons, students will be encouraged to study in more than one language and to work with a variety of media. Our courses explore literary and cultural movements across languages, geographical regions, epochs, media, and disciplines.

**Material Culture Program**

What does it mean to live in a "material world"? What might we learn from studying the things that surround us? In an increasingly consumer-oriented, globalized and digital age, how do objects express the longstanding beliefs and values of different societies? Material culture is the study of objects -- clothing, household goods, machinery, built forms -- that show signs of human influence. The program engages students in the study of material culture (tangible things, broadly defined); supports research projects which originate with studies of artefacts; and fosters trans-disciplinary and inter-institutional dialogues amongst students, scholars, stewards and purveyors of material culture -- within the university and at a range of cultural agencies. We examine the meanings people invest in their things, across cultures and time periods, and consider processes of production and consumption, including moments of invention, exchange, use, re-use, divestment, disposal, and collection. Students will work with curators and other professionals to analyze the social and cultural relevance of objects as part of understanding of a culture or society. The Minor is designed to complement programs in such disciplines as Asian Studies, Near and Middle Eastern Studies, Geography, History, Art, History of Science and Technology, Semiotics, Renaissance Studies, and Anthropology.

**Renaissance Studies Program**

The Renaissance Studies Program lets you study one of the most critical periods in European and world history. Changes in art and literature, in social and political development, and in technology and science transformed European concepts of the individual, society, and the world.

Many aspects of our modern world had their origin in this period: our emphasis on the study of human affairs; our irrepressible interest in the exploration of the universe, in science, and in medicine; the institutions of church and state as we know them today. The Renaissance is also a period of unparalleled European contacts with non-European civilizations -- from the powerful Islamic world of the Near East and North Africa to the great pre-Columbian civilizations of the Americas, from the uncharted forests of equatorial Africa to the exotic lands of the Indian subcontinent and the Far East, nothing seemed too distant or too inaccessible for the European mind or merchant.

This interdisciplinary program is particularly attractive to students of history, politics, literature, fine art, history of science, music and theatre, because it assembles aspects of all these studies to focus on one seminal period in Western civilization.

**Science and Society Program**

The Science and Society program studies the complex, interdependent relationship between science, technology, and society. The influence of scientific research and its applications is evident in virtually all aspects of modern life, from our conception of societal obligation and familial relations, to our interaction with the commonplace materials and objects we use to sustain ourselves. However, scientific and technological development is in turn affected by and shaped by politics, public opinion, moral beliefs and cultural practices.

Courses in this program explore topics such as ethical uses of technology, scientific revolutions and controversies, science-related policy and politics, modeling and communication of scientific research, and knowledge transfer from research to commercial and societal applications.

**Semiotics and Communication Studies Program**

Semiotics is the science of communication and sign systems, in short, of the ways people understand phenomena and organize them mentally, and of the ways in which they devise means for transmitting that understanding and for sharing it with others. Although natural and artificial languages are therefore central to semiotics, its field covers all non-verbal signalling and extends to domains whose communicative dimension is perceived only unconsciously or subliminally. Knowledge, meaning, intention and action are thus fundamental concepts in the semiotic investigation of phenomena.

**Victoria College Programs**

**Literature and Critical Theory Specialist in the Comparative Literature Stream (Arts Program) - ASSPE1026**

**Enrolment Requirements:**

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

**Completion Requirements:**

(12.5 FCE, no more than 1.0 FCE at the 100-level, at least 3.0 FCE at 300-level and 1.0 FCE at 400-level)

1. First year in program: VIC202Y1
2. First or second year in program: VIC203H1, VIC205H1
3. 3.5 FCE from VIC162H1, VIC163H1, VIC165Y1, VIC204H1, VIC301H1, VIC302H1, VIC303H1, VIC304H1, VIC305H1, VIC306H1, VIC307H1, VIC308H1, VIC401H1, VIC401Y1, VIC403H1, VIC404H1, VIC405H1, VIC494H1, VIC494Y1
4. 0.5 FCE in Breadth Requirement Category 5: The Physical and Mathematical Universes, or another half course approved by the program director, to fulfill the Quantitative Reasoning competency required in the program.
5. VIC402H1
6. 6.0 FCE in languages or literatures drawn from other departments. At least 4.0 of these involve reading texts in a language other than English, including at least 2.0 at the 300+ level. These courses must be pre-approved by the program coordinator to ensure they will be counted towards this program of study.
Literature and Critical Theory Specialist in the Cultural Theory Stream (Arts Program) - ASSPE1023

Enrolment Requirements:
This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:
(12.5 FCE, no more than 1.0 FCE at the 100-level, at least 3.0 FCE at 300-level, and 1.0 FCE at 400-level)

1. First year in program: VIC202Y1
2. First or second year in program: VIC203H1, VIC205H1
3. 3.5 FCE from VIC162H1, VIC163H1, VIC190Y1, VIC204H1, VIC301H1, VIC302H1, VIC303H1, VIC304H1, VIC305H1, VIC306H1, VIC307H1, VIC308H1, VIC401H1, VIC403H1, VIC404H1, VIC494Y1.
4. 0.5 FCE in Breadth Requirement Category 5: The Physical and Mathematical Universes, or another half course approved by the program director, to fulfill the Quantitative Reasoning competency required in the program.
5. VIC402H1
6. 4.0 FCE in ONE other discipline – African Studies, Anthropology, Caribbean Studies, Cinema Studies, Classics, Drama, East Asian Studies, Equity Studies, Fine Art, History, Music, Political Science, Philosophy, Psychology, Sociology, Women and Gender Studies, and other departments as approved by the program coordinator.
7. 2.0 FCE in a language other than English, including at least 1.0 at the 300+ level.

Renaissance Studies Specialist (Arts Program) - ASSPE0532

Enrolment Requirements:
This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:
(10 FCE, no more than 1.0 FCE at the 100-level, at least 3.0 FCE at 300-level and 1.0 FCE at 400-level):

1. 3.0 FCE from: VIC114H1, VIC141H1, VIC142H1, VIC240Y1, VIC241H1, VIC242H1, VIC341H1, VIC342H1, VIC343H1, VIC343Y1, VIC344H1, VIC338H1, VIC345H1, VIC346H1, VIC347H1, VIC348H1, VIC349H1, VIC392H1, VIC392Y1, VIC441H1, VIC442H1, VIC449H1, VIC449Y1, VIC492H1, VIC492Y1
2. 1.0 FCE in Literature from: ENG220Y1, ENG301H1, ENG302Y1, ENG303H1, ENG304Y1, ENG330H1, ENG331H1, ENG335H1, ENG336H1, FRE319H1, FRE320H1, ITA200H1, ITA249H1, ITA300H1, ITA312H1, ITA325H1, ITA332H1, ITA356Y0, ITA357Y0, ITA370H1, ITA400H1, ITA420H1, ITA431H1, SPA352H1, SPA368H1, SPA452H1, SPA454H1
3. 1.0 FCE in History: HIS243H1, HIS301H1, HIS308H1, HIS309H1, HIS319H1, HIS357Y1, HIS362H1, HIS368H1, HIS403H1, HIS438H1, HIS443H1
4. 1.0 FCE in Art from: FAH330H1, FAH331H1, FAH333H1, FAH335H1, FAH337H1, FAH338H1, FAH340H1, FAH341H1, FAH344H1, FAH370H1, FAH371H1, FAH393Y0, FAH430H1, FAH432H1, FAH433H1, FAH434H1, FAH435H1, FAH436H1, FAH440H1, FAH470H1
5. 1.0 FCE in a Research Course (a 299Y1, 399Y1, on a Renaissance Studies topic, or VIC392H1/ VIC392Y1, VIC492H1/ VIC492Y1)
6. 2.0 FCE in a language relevant to Renaissance Studies – French, Italian, Spanish, Portuguese, Latin, German (only one may be at the introductory level).
7. VIC440Y1

Literature and Critical Theory Major in the Comparative Literature Stream (Arts Program) - ASMAJ1026

Enrolment Requirements:
This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:
(7.5 FCE, no more than 1.0 FCE at the 100-level, at least 1.5 FCE at 300-level and 0.5 FCE at 400-level)

1. First year in program: VIC202Y1
2. First or second year in program: VIC203H1 and VIC205H1
3. 2.5 FCE from VIC162H1, VIC163H1, VIC190Y1, VIC204H1, VIC301H1, VIC302H1, VIC303H1, VIC304H1, VIC305H1, VIC306H1, VIC307H1, VIC308H1, VIC401H1, VIC403H1, VIC404H1, VIC494Y1.
4. 0.5 FCE in Breadth Requirement Category 5: The Physical and Mathematical Universes, or another half course approved by the program director, to fulfill the Quantitative Reasoning competency required in the program.
5. VIC402H1
6. 2.0 FCE in a language or literature drawn from other departments, where texts are read in a language other than English. At least 1.0 FCE must be at the 300+ level. These courses must be pre-approved by the program coordinator to ensure they will be counted towards this program of study.

Literature and Critical Theory Major in the Cultural Theory Stream (Arts Program) - ASMAJ1023

Enrolment Requirements:
This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.
Completion Requirements:

(7.5 FCE, no more than 1.0 FCE at the 100-level, at least 1.5 FCE at 300-level and 0.5 FCE at 400-level)

1. First year in program: VIC202Y1
2. First or second year in program: VIC203H1, VIC205H1
3. 2.5 FCE from VIC162H1, VIC163H1, VIC190Y1, VIC204H1, VIC301H1, VIC302H1, VIC303H1, VIC304H1, VIC305H1, VIC306H1, VIC307H1, VIC308H1, VIC401H1/ VIC401Y1, VIC403H1, VIC494H1/VIC494Y1
4. 0.5 FCE in Breadth Requirement Category 5: The Physical and Mathematical Universes, or another half course approved by the program director, to fulfill the Quantitative Reasoning competency required in the program.
5. VIC402H1
6. 1.0 FCE in ONE other discipline – African Studies, Anthropology, Caribbean Studies, Cinema Studies, Classics, Drama, East Asian Studies, Equity Studies, Fine Art, History, Music, Political Science, Philosophy, Psychology, Sociology, Women and Gender Studies, and other departments as approved by the program coordinator.
7. 1.0 FCE in a language other than English at the 200+ level.

Renaissance Studies Major (Arts Program) - ASMAJ0532

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

(6 FCE, no more than 1.0 FCE at the 100-level, and at least 2.0 FCE at 300+ level)

1. 2.0 FCE from: VIC114H1, VIC141H1, VIC142H1, VIC240Y1, VIC241H1, VIC242H1, VIC341H1, VIC342H1, VIC343H1, VIC344H1, VIC345H1, VIC346H1, VIC347H1, VIC348Y0, VIC349H1, VIC359H1, VIC359Y1, VIC441H1, VIC442H1, VIC449H1, VIC449Y1, VIC492H1/VIC492Y1
2. 1.0 FCE in Literature from: ENG220Y1, ENG301H1, ENG302Y1, ENG304Y1, ENG330H1, ENG331H1, ENG335H1, ENG336H1, FRE319H1, FRE320H1, ITA200H1, ITA249H1, ITA300H1, ITA312H1, ITA325H1, ITA332H1, ITA356Y0, ITA357Y0, ITA370H1, ITA400H1, ITA420H1, ITA431H1, SPA352H1, SPA368H1, SPA452H1, SPA455H1
3. 1.0 FCE in History: HIS243H1, HIS301H1, HIS308H1, HIS309H1, HIS319H1, HIS357Y1, HIS362H1, HIS368H1, HIS403H1, HIS438H1, HIS443H1
4. 1.0 FCE in Art from: FAH230H1, FAH330H1, FAH331H1, FAH333H1, FAH335H1, FAH337H1, FAH338H1, FAH340H1, FAH341H1, FAH344H1, FAH370H1, FAH371H1, FAH379Y0, FAH430H1, FAH432H1, FAH433H1, FAH434H1, FAH435H1, FAH436H1, FAH440H1, FAH470H1
5. VIC440Y1

Creative Expression and Society Minor (Arts Program) - ASMIN2741

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

4.0 FCE including at least 1.0 FCE at the 300+ level, with a maximum of 1 FCE at the 100 level. Up to 1.0 FCE may be chosen from approved courses offered by other departments (see list of Cognate Courses).

1. At least 1.0 FCE from Group A – Creative Expression: VIC273H1, VIC275H1, VIC276H1, VIC279H1, VIC280H1, VIC350Y1, VIC370H1, VIC470H1, VIC479Y1, VIC480H1, IVP210H1. Students who achieve at least 77% in the Vic One course VIC191Y1 may count that course toward the Minor and use it to fulfill this requirement.
2. At least 1.0 FCE from Group B – Social Contexts and Interpretation: VIC209H1, VIC223Y1, VIC235H1, VIC270H1, VIC271H1, VIC281H1, VIC320Y1, VIC335H1, VIC352Y1, VIC371H1, VIC372H1, VIC373H1. Students who achieve at least 77% in the Vic One course VIC190Y1 may count that course toward the Minor and use it to fulfill this requirement.
3. Up to 1.0 FCE from Cognate Courses: INS300Y1, CIN201Y1, EAS349H1, ENG287H1, ENG389Y1, DRM428H1, FAH352H1, FAH377H1, INI211H1, INI131Y1, MUS211H1, SMC219Y1, SMC229H1, SMC317H1, SMC319H1

Education and Society Minor (Arts Program) - ASMIN1029

Description:

The Vic-sponsored Education and Society (E&S) Minor is open to all Arts and Science students. The program provides students with opportunities to develop their understanding of the social, cultural, historical, and political contexts of education and issues related to these contexts while reflecting on the reciprocal relationship between education and society.

Conceived as an interdisciplinary Minor program, E&S targets students from a broad array of Major and Specialist programs with interests in education, teaching, curriculum development, learning, child development, social justice, and international education. The Minor program provides strong background for admission to a teacher education program and is required for admission to the Combined Degree Program with OISE.

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

Variable Minimum Grade Average

A minimum grade or grade averages in required course are needed for entry, and these minimums change each year depending on
available spaces and the number of applicants. The following courses must be completed:

- PSY100H1 (70%)
- 3.0 credits (minimum grade average of 73%)

To ensure that admitted students are adequately prepared to succeed in the program, applicants with a final grade and grade averages lower than those listed in the required courses will not be considered for admission. Please note that obtaining this minimum final grade or minimum grade average does not guarantee admission to the program.

Special requirement
Program applicants will be required to submit a supplemental application including 2 short questions related to the Education & Society Minor.

Completion Requirements:

Program Requirements

(4.0 credits, including 1.0 credit at 300+ level)

1. PSY100H1
2. VIC260H1, VIC261H1, VIC262H1, and VIC265H1
3. VIC360H1, VIC360Y1
4. 1.0 credit from: VIC356H1, VIC361H1, VIC363H1, VIC368H1, VIC369H1, VIC345H1, or a course related to Education and Society at the 300+ level selected from the offerings in Sociology, Anthropology or Geography (Arts).

Literature and Critical Theory Minor (Arts Program) - ASMIN0539

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

(4.0 FCE, no more than 1.0 FCE at the 100-level, and at least 1.0 FCE at the 300+ level)

1. VIC202Y1
2. 3.0 FCE from: VIC162H1, VIC163H1, VIC190Y1, VIC203H1, VIC204H1, VIC205H1, VIC301H1, VIC302H1, VIC303H1, VIC304H1, VIC305H1, VIC306H1, VIC307H1, VIC308H1, VIC401Y1, VIC402H1, VIC403H1, VIC494H1, VIC495Y1

Material Culture Minor (Arts Program) - ASMIN2729

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

(4.0 FCE, no more than 1.0 FCE at the 100-level, and at least 1.0 FCE at the 300+ level)

1. VIC224Y1/VIC225Y1
2. 2.5 FCE from VIC224Y1/VIC225Y1 (if not used to fulfill requirement 1), VIC229H1, VIC229Y1, VIC260H1, VIC261H1, VIC262H1, VIC327H1, VIC328H1, VIC329H1, VIC329Y1, VIC373H1, VIC429H1 or cognate courses, with at least 0.5 FCE at the 300+ level. No more than 1.0 FCE may be chosen from the list of cognate courses.
3. VIC444H1

Cognate courses:
ANT349H1, ANT372H1, ANT412H1, ANT457H1, ARH309H1, EAS219H1, EAS297H1, FAH319H1, FAH338H1, FAH436H1, FAH463H1, FAH480H1, FAH484H1, HIS302H1, HIS310H1, HIS358H1, HIS436H1, HIS484H1, HPS202H1, HPS401H1, HPS430H1, HPS431H1, NMC264H1, NMC394H1, NMC464H1, RLG305H1, RLG307H1, VIC198H1, VIC199H1.

Students who achieve at least 77% in Vic One courses may count one of these toward the Minor and use it to fulfill this requirement.

Renaissance Studies Minor (Arts Program) - ASMIN0532

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

(4 FCE, no more than 1.0 FCE at the 100-level, and at least 1.0 FCE at 300+ level)

1. 2.0 FCE from:
   VIC114H1, VIC141H1, VIC142H1, VIC240Y1, VIC241H1, VIC242H1, VIC341H1, VIC342H1, VIC343H1, VIC343Y1, VIC344H1, VIC345H1, VIC346H1, VIC347H1, VIC348H1, VIC349H1/VIC349Y1, VIC392H1/VIC392Y1, VIC440Y1, VIC441H1, VIC442H1, VIC449H1/VIC449Y1, VIC492H1/VIC492Y1
2. 2.0 FCE in Literature, History, or Art from:
   Literature: ENG220Y1, ENG301H1, ENG302Y1, ENG303H1, ENG304Y1, ENG330H1, ENG331H1, ENG335H1, ENG336H1, FRE319H1, FRE320H1, FRE441H1, ITA200H1, ITA249H1, ITA312H1, ITA325H1, ITA300H1, ITA332H1, ITA356Y0, ITA357Y0, ITA370H1, ITA400H1, ITA420H1, SPA352H1, SPA368H1, SPA452H1, SPA454H1
   History: HIS243H1, HIS301H1, HIS308H1, HIS309H1, HIS319H1, HIS368H1, HIS357Y1, HIS362H1, HIS403H1, HIS438H1, HIS443H1
   Art: FAH230H1, FAH330H1, FAH331H1, FAH333H1, FAH335H1, FAH337H1, FAH338H1, FAH340H1, FAH341H1, FAH344H1, FAH370H1, FAH371H1,
Science and Society Minor (Arts Program) - ASMIN2743

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

The Minor in Science and Society is an interdisciplinary program that focuses on the different ways science and technology shape modern society and, in turn, how society shapes science and technology. From the food we eat to the way we conceive family relations or our obligations to future generations, our daily practices and our beliefs are increasingly influenced by scientific research and its applications. In turn, politics, public opinion, moral beliefs and cultural practices affect scientific and technological development. Courses in this program address such topics as science and values, science-related policy and politics, ethical uses of technology, scientific revolutions and controversies, modeling and communication of scientific research, and knowledge transfer from research to commercial and societal applications.

(4.0 FCEs, including at least 1.0 FCE at 300+ level)

1. HPS200H1
2. 1.0 FCE from: VIC206H1, VIC207H1, VIC242H1, VIC245H1, VIC274H1, VIC343H1, VIC493H1 (Science Capstone). Students who achieve at least 77% in VIC121H1, VIC122H1, VIC170Y1 or VIC172Y1 may count up to 1.0 FCE from these courses towards this requirement.
3. 1.0 FCE from: HPS110H1, HPS202H1, HPS210H1, HPS211H1, HPS222H1, HPS245H1, HPS260H1, HPS270H1, HPS272H1, HPS303H1, HPS307H1, HPS318H1, HPS319H1, HPS324H1, HPS345H1, HPS346H1, HPS401H1, HPS402H1, HPS430H1, HPS431H1, HPS440H1, HPS450H1.
4. An additional 0.5 FCE from program requirements (2) and (3) above.
5. An additional 1.0 FCE from program requirements (2) and (3) above and/or from the approved list of cognate courses: ANT358H1, ANT364H1, BIO220H1, EEB215H1, ENV200H1, ETH220H1, GGR223H1, GGR321H1, JIG322H1, JIG323H1, JIG331H1, JIG332H1, JIG333H1, JIG334H1.

Semitics and Communication Studies Minor (Arts Program) - ASMIN1939

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

Variable Minimum Grade
A minimum grade in a required course is needed for entry, and this minimum changes each year depending on available spaces and the number of applicants. One of following courses must be completed:

- ANT100Y1/LIN100Y1/LIN101H1/LIN102H1/PHL100Y1/SOC101Y1/SOC102H and SOC103H1/SOC100H1 and SOC150H1/ 1.0 credits in Vic One.

To ensure that admitted students are adequately prepared to succeed in the program, applicants with a final grade lower than 73% in related courses will be considered for admission. Please note that obtaining this minimum final grade does not guarantee admission to the program.

Completion Requirements:

(4.0 credits, including 1.0 credit at the 300+ level)

1. 1.0 credit from: ANT100Y1, LIN100Y1, LIN101H1, LIN102H1, PHL100Y1, SOC101Y1/SOC102H, SOC103H1/SOC100H1, SOC150H1.
2. VIC223Y1
3. 1.0 credit from: VIC320H1, VIC322H1, VIC323Y1, VIC324H1, VIC325H1.
4. 1.0 credit from Groups A-E.

Group A: Anthropology
ANT204H1, ANA253H1, ANA322H1, ANA329H1, ANA356H1, ANA366H1, ANA425H1, ANA426H1, ANA427H1, ANA450H1, JAL328H1, JAL355H1

Group B: Linguistics
LIN200H1, LIN229H1, LIN232H1, LIN251H1, LIN333H1, LIN341H1, LIN456H1, JAL355H1, JLP315H1, JLP374H1

Group C: Philosophy
PHL200Y1, PHL201H1, PHL235H1, PHL244H1, PHL245H1, PHL285H1, PHL304H1, PHL310H1, PHL311H1, PHL317H1, PHL320H1, PHL321H1, PHL322H1, PHL325H1, PHL340H1, PHL342H1, PHL346H1, PHL351H1, PHL385H1

Group D: Psychology
PSY210H1, PSY220H1, PSY260H1, PSY270H1, PSY280H1, PSY312H1, PSY316H1, PSY323H1, PSY362H1, PSY370H1, PSY371H1, PSY372H1, PSY421H1, PSY427H1, PSY434H1, JLP315H1

Group E: Other Related Area Courses
CAS414H1, CDN221H1, CIN201Y1, CIN270Y1, CIN301Y1, CIN310Y1, CIN314Y1, CIN330Y1, CIN332Y1, CIN364H1, CLA204H1, CLA219H1, CLA305H1, CLA388H1, CLA389H1, COG250Y1, CRM230Y1, ENG382Y1, ENG384Y1, FAH231H1, FAH245H1, FAH246H1, FAH272H1, FAH337H1, FAH346H1, FAH348H1, FAH372H1, FAH374H1, FRE310H1, HIS374H1, HIS450H1, HIS459H1, HIS460H1, HPS250H1, INI301H1, INI305H1, JUM203H1, MUS300H1, MUS306H1, NEW302Y1, NEW303H1, RLG200H1, RLG210Y1, RLG211H1, RLG212H1, RLG227H1, RLG230H1, RLG232H1, RLG233H1, RLG249H1, RLG301H1, RLG304H1, RLG305H1, RLG315H1, RLG316H1, SLA231H1, SLA495H1, SLA496H1, SMC219Y1, SMC271H1, SMC387H1, SMC392H1, SMC397H1, SOC368H1, SOC382H1, SOC438H1, VIC202Y1, VIC224Y1, VIC225Y1, VIC281H1, VIC302H1, VIC305H1, VIC306H1, VIC307H1, VIC308H1, VIC326H1, VIC343Y1, VIC345H1, WGS271Y1, WGS372H1
Victoria College Courses

Vic One: Education Stream

VIC150Y1 - School and Society

**Hours:** 48S

This course will be about the social and historical role of the school. The course will examine schools and learning as social, political, intellectual, and economic phenomena. Restricted to first-year students. Not eligible for CR/NCR option.

**Prerequisite:** Admission to Vic One
**Corequisite:** VIC151Y1 and PSY100H1
**Exclusion:** Innis One, Munk One, New One, SMC One, Trinity One, UC One, Woodsworth One, 199 seminars, Vic One Hundred courses.
**Distribution Requirements:** Social Science
**Breadth Requirements:** Society and its Institutions (3)

VIC151Y1 - Theories and Practices of Teaching

**Hours:** 48S

This course focuses on connecting theories and practice of teaching with a view to having students develop their personal understanding of teaching. Students will be involved in a practicum. Restricted to first-year students. Not eligible for CR/NCR option.

**Prerequisite:** Admission to Vic One
**Corequisite:** VIC162H1, VIC164H1, VIC165H1, and 1.0 FCE in any 100-level course in ENG or FAH or PHL
**Exclusion:** Innis One, Munk One, New One, SMC One, Trinity One, UC One, Woodsworth One, 199 seminars, Vic One Hundred courses.
**Distribution Requirements:** Humanities
**Breadth Requirements:** Thought, Belief and Behaviour (2)

Vic One: Frye Stream

VIC162H1 - Cultural Forms and Their Meanings

**Hours:** 24S

A study of culture with a view to developing basic concepts with examples drawn from the visual arts, music, film, literature, architecture, and/or local urban artefacts. Restricted to first-year students. Not eligible for CR/NCR option.

**Prerequisite:** Admission to Vic One
**Corequisite:** VIC163H1, VIC164H1, VIC165H1, and 1.0 FCE in any 100-level course in ENG or FAH or PHL
**Exclusion:** Innis One, Munk One, New One, SMC One, Trinity One, UC One, Woodsworth One, 199 seminars, Vic One Hundred courses.
**Distribution Requirements:** Humanities
**Breadth Requirements:** Creative and Cultural Representations (1)

VIC163H1 - Cultural Forms and Their Meanings: People and Ideas

**Hours:** 24S

A study of culture with a view to developing basic concepts with examples drawn from the visual arts, music, film, architecture, and/or local urban artefacts. We will emphasize how contemporary thought has affected the practice of everyday life. Restricted to first-year students. Not eligible for CR/NCR option.

**Prerequisite:** Admission to Vic One
**Corequisite:** VIC162H1, VIC164H1, VIC165H1, and 1.0 FCE in any 100-level course in ENG or FAH or PHL
**Exclusion:** Innis One, Munk One, New One, SMC One, Trinity One, UC One, Woodsworth One, 199 seminars, Vic One Hundred courses.
**Distribution Requirements:** Humanities
**Breadth Requirements:** Thought, Belief and Behaviour (2)
VIC164H1 - Ideas and Their Consequences: Literary and Artistic Realms of the Imagination

Hours: 24S

A study of the ideas and concerns of creative thinkers and their impact upon cultures. The course includes literary, scientific and/or religious intellectuals from the major traditions. Attention to modes of reasoning, cultural definition and expression. Emphasis on philosophical and artistic concepts. Restricted to first-year students. Not eligible for CR/NCR option.

Prerequisite: Admission to Vic One
Corequisite: VIC162H1, VIC163H1, VIC165H1, and 1.0 FCE in any 100-level course in ENG or FAH or PHL
Exclusion: Innis One, Munk One, New One, SMC One, Trinity One, UC One, Woodsworth One, 199 seminars, Vic One Hundred courses.
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

VIC167H1 - Ideas and Their Consequences: Isolation and Communion in Modern Culture

Hours: 24S

A study of art, with a focus on poetry, as an essential mode of experience and knowledge, in the context of contemporary and modern society. Along with literary artists, the course includes writers on history and sociology and presents the interplay between artistic vision and socio-political situations. Restricted to first-year students. Not eligible for CR/NCR option.

Prerequisite: Admission to Vic One
Corequisite: VIC162H1, VIC163H1, VIC164H1, and 1.0 FCE in any 100-level course in ENG or FAH or PHL
Exclusion: Innis One, Munk One, New One, SMC One, Trinity One, UC One, Woodsworth One, 199 seminars, Vic One Hundred courses.
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

VIC165H1 - Ideas and Their Consequences: Isolation and Communion in Modern Culture

Hours: 24S

A study of art, with a focus on poetry, as an essential mode of experience and knowledge, in the context of contemporary and modern society. Along with literary artists, the course includes writers on history and sociology and presents the interplay between artistic vision and socio-political situations. Restricted to first-year students. Not eligible for CR/NCR option.

Prerequisite: Admission to Vic One
Corequisite: VIC162H1, VIC163H1, VIC164H1, and 1.0 FCE in any 100-level course in ENG or FAH or PHL
Exclusion: Innis One, Munk One, New One, SMC One, Trinity One, UC One, Woodsworth One, 199 seminars, Vic One Hundred courses.
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

VIC166H1 - Common Vices and Neglected Virtues: Intro to Ethics of Character

Hours: 24S

Vice is popular: a prestigious university press has brought out a series of seven books on the Seven Deadly Sins. This course examines such questions as the following. Are greed, lust and gluttony just bad names for necessary and otherwise acceptable instincts? What is the place, in a good human life, of such qualities as honesty, trust, civility and the like? Are vices and virtues culturally determined or a matter of individual preference? Can character be taught, or is it rather a matter of genes and luck? Restricted to first-year students. Not eligible for CR/NCR option.

Prerequisite: Admission to Vic One
Corequisite: VIC167H1, VIC168H1, VIC169H1, and 1.0 FCE in any 100-level course in ANT or PHL or RLG
Exclusion: Innis One, Munk One, New One, SMC One, Trinity One, UC One, Woodsworth One, 199 seminars, Vic One Hundred courses.
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

VIC167H1 - Ideas and Fine Thoughts

Hours: 24S

This course examines how political ideas are formed and developed through literature, art, plays, essays and philosophical works in the twentieth century. Restricted to first-year students. Not eligible for CR/NCR option.

Prerequisite: Admission to Vic One
Corequisite: VIC166H1, VIC168H1, VIC169H1, and 1.0 FCE in any 100-level course in ANT or PHL or RLG
Exclusion: Innis One, Munk One, New One, SMC One, Trinity One, UC One, Woodsworth One, 199 seminars, Vic One Hundred courses.
Distribution Requirements: Humanities; Social Science
Breadth Requirements: Creative and Cultural Representations (1)
VIC168H1 - Identity and Equality in the Public Sphere

Hours: 24S

This course explores current legal and philosophical debates around equality, discrimination, and the shaping of individual and group identities. It addresses the way values, affiliation, and identities have an impact on the public sphere of law and policy-making – and the ways in which law and policy, in turn, shape our conceptions (and misconceptions) of people's identities. Restricted to first-year students. Not eligible for CR/NCR option.

Prerequisite: Admission to Vic One
Corequisite: VIC166H1, VIC167H1, VIC169H1, and 1.0 FCE in any 100-level course in ANT or PHL or RLG
Exclusion: Innis One, Munk One, New One, SMC One, Trinity One, UC One, Woodsworth One, 199 seminars, Vic One Hundred courses.
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

VIC169H1 - Ethical Living in a Pluralistic World

Hours: 24S

This course examines different values, beliefs, and traditions relating to the natural and social world, ethical living, and the common good. Restricted to first-year students. Not eligible for CR/NCR option.

Prerequisite: Admission to Vic One
Corequisite: VIC166H1, VIC167H1, VIC168H1, and 1.0 FCE in any 100-level course in ANT or PHL or RLG
Exclusion: Innis One, Munk One, New One, SMC One, Trinity One, UC One, Woodsworth One, 199 seminars, Vic One Hundred courses.
Distribution Requirements: Social Science
Breadth Requirements: Thought, Belief and Behaviour (2)

Vic One: Stowe-Gullen Stream

VIC170Y1 - The Impact of Science on Our Society

Hours: 48S

How rhetoric and statistical analysis are used to communicate scientific observations and theories to different audiences will be examined in lectures and seminars. Uncertainty, belief, evidence, risk assessment, random error and bias will be discussed using examples drawn from literature, the arts and the physical, life and social sciences. Students will prepare a research grant application on a scientific topic of their own choice. Restricted to first-year students. Not eligible for CR/NCR option.

Prerequisite: Admission to Vic One
Corequisite: VIC171Y1 and 1.0 FCE selected from first-year course offerings in the sciences (0.5 FCE must be a BIO course)
Exclusion: Innis One, Munk One, New One, SMC One, Trinity One, UC One, Woodsworth One, 199 seminars, Vic One Hundred courses.
Distribution Requirements: Humanities; Social Science
Breadth Requirements: Thought, Belief and Behaviour (2)

VIC171Y1 - Methodology, Theory and Practice in the Natural Sciences

Hours: 48S

An examination of scientific theories and their logic in life and physical sciences. Experimental design, novel device production, data analysis and modeling will be discussed using examples drawn from primary source material in the natural sciences. Students will prepare a research paper on a topic designed in consultation with the instructor. Restricted to first-year students. Not eligible for CR/NCR option.

Prerequisite: Admission to Vic One
Corequisite: VIC170Y1 and 1.0 FCE selected from first-year course offerings in the sciences (0.5 FCE must be a BIO course)
Exclusion: Innis One, Munk One, New One, SMC One, Trinity One, UC One, Woodsworth One, 199 seminars, Vic One Hundred courses.
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)
**Vic One: Schawlow Stream**

**VIC172Y1 - Physical Sciences Today**

Hours: 48S

How is science performed and what enables scientific progress? What are our responsibilities as scientists? We base the discussion mostly on the development of microscopy tools. We look at how scientific discoveries affect and were affected by society. This course explores the complementary skills and knowledge needed by modern scientists. Restricted to first-year students. Not eligible for CR/NCR option.

**Prerequisite:** admission to Vic One

**Corequisite:** VIC173Y1 and 1.0 FCE selected from first-year course offerings in the sciences (0.5 FCE must be a CHM, MAT or PHY course)

**Exclusion:** Innis One, Munk One, New One, SMC One, Trinity One, UC One, Woodsworth One, 199 seminars, Vic One Hundred courses.

**Distribution Requirements:** Science; Social Science

**Breadth Requirements:** Society and its Institutions (3)

**VIC173Y1 - Philosophy of Science for Physical Scientists**

Hours: 48S

This course introduces students to some of the issues in the philosophy of science, in general, and in the philosophy of physics, in particular. Topics include the scientific method and its controversies, the meaning of time and its properties, realism versus competing approaches, thought experiments, and quantum mechanics. Restricted to first-year students. Not eligible for CR/NCR option.

**Prerequisite:** admission to Vic One

**Corequisite:** VIC172Y1 and 1.0 FCE selected from first-year course offerings in the sciences (0.5 FCE must be a CHM, MAT or PHY course)

**Exclusion:** Innis One, Munk One, New One, SMC One, Trinity One, UC One, Woodsworth One, 199 seminars, Vic One Hundred courses.

**Distribution Requirements:** Science; Social Science

**Breadth Requirements:** Thought, Belief and Behaviour (2)

**Vic One: Pearson Stream**

**VIC181H1 - Events in the Public Sphere: World Affairs**

Hours: 24S

This course will review issues in contemporary world affairs, from the fall of the Berlin Wall to the present day. The course will examine the politics and practice of foreign policy decision making. Issues to be covered include the collapse of the Soviet Union, intervention in humanitarian crises, and the conflicts in Afghanistan and Iraq. Restricted to first-year students. Not eligible for CR/NCR option.

**Prerequisite:** Admission to Vic One

**Corequisite:** VIC183H1, VIC184H1, VIC185H1, and 1.0 FCE in any 100-level course in ECO, HIS or POL

**Exclusion:** Innis One, Munk One, New One, SMC One, Trinity One, UC One, Woodsworth One, 199 seminars, Vic One Hundred courses.

**Distribution Requirements:** Social Science

**Breadth Requirements:** Society and its Institutions (3)

**VIC183H1 - Individuals and the Public Sphere: Shaping Memory**

Hours: 24S

This course explores how public service and citizenship are developed. Topics may include the role of law and government, civil liberties, rights and responsibilities, and the role of protest. Emphasis on individuals and movements that have shaped modern memory. Restricted to first-year students. Not eligible for CR/NCR option.

**Prerequisite:** Admission to Vic One

**Corequisite:** VIC181H1, VIC184H1, VIC185H1, and 1.0 FCE in any 100-level course in ECO, HIS or POL

**Exclusion:** Innis One, Munk One, New One, SMC One, Trinity One, UC One, Woodsworth One, 199 seminars, Vic One Hundred courses.

**Distribution Requirements:** Social Science

**Breadth Requirements:** Creative and Cultural Representations (1)
VIC184H1 - Individuals and the Public Sphere: History, Historiography and Making Cultural Memory

Hours: 24S

A seminar course that examines the contribution of an individual or individuals to the public sphere. The course will explore how public service and citizenship are developed in social, philosophical, and cultural contexts. We will examine our evolving role in developing collective, cultural and counter memory. Restricted to first-year students. Not eligible for CR/NCR option.

Prerequisite: Admission to Vic One
Corequisite: VIC181H1, VIC183H1, VIC185H1, and 1.0 FCE in any 100-level course in ECO, HIS or POL
Exclusion: Innis One, Munk One, New One, SMC One, Trinity One, UC One, Woodsworth One, 199 seminars, Vic One Hundred courses.
Distribution Requirements: Social Science
Breadth Requirements: Thought, Belief and Behaviour (2)

VIC185H1 - Events in the Public Sphere: Social Justice

Hours: 24S

This course uses events to discuss the nature of society including major revolutions, economic crises, and the impact of significant artistic, cultural and technological developments. Emphasis on our responsibilities towards social justice. Restricted to first-year students. Not eligible for CR/NCR option.

Prerequisite: Admission to Vic One
Corequisite: VIC181H1, VIC183H1, VIC184H1, and 1.0 FCE in any 100-level course in ECO, HIS or POL
Exclusion: Innis One, Munk One, New One, SMC One, Trinity One, UC One, Woodsworth One, 199 seminars, Vic One Hundred courses.
Distribution Requirements: Social Science
Breadth Requirements: Thought, Belief and Behaviour (2)

VIC186Y1 - The Art and Literature of Leadership

Hours: 48S

What is a leader? Are leaders born or are they made, and if they are made is there a craft to being able to lead others? Through works of art, film, and literature, this course examines the various types of men and women who become leaders from natural-born talents to statesmen and state-crafters and individual entrepreneurs with the purpose of defining those qualities that make for the leaders of tomorrow. Restricted to first-year students. Not eligible for CR/NCR option.

Prerequisite: Admission to Vic One
Corequisite: VIC187H1, VIC188H1, ECO101H1 and ECO102H1
Exclusion: Innis One, Munk One, New One, SMC One, Trinity One, UC One, Woodsworth One, 199 seminars, Vic One Hundred.
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

VIC187H1 - Prosperity, Justice, and Sustainability: Introduction to Public Policy

Hours: 24S

This course introduces policy applications of measurement tools and economic concepts by analyzing current issues in the news, such as public spending and debt, health care, social security, energy, climate change, innovation, and education. Concepts from the philosophy and history of economic thought will be used to address such questions as: What is the nature of economic explanations? Do they tell us the truth about reality? Restricted to first-year students. Not eligible for CR/NCR option.

Prerequisite: Admission to Vic One
Corequisite: VIC186Y1, VIC188H1, ECO101H1 and ECO102H1
Exclusion: Innis One, Munk One, New One, SMC One, Trinity One, UC One, Woodsworth One, 199 seminars, Vic One Hundred.
Distribution Requirements: Social Science
Breadth Requirements: Thought, Belief and Behaviour (2)
VIC188H1 - Corporate Citizenship, Sustainability, and Ethics

Hours: 24S

Drawing together philosophical background readings with contemporary applications, this course addresses issues of corporate social responsibility, business ethics, human rights, diversity, and equity, and considers how these topics intersect with a wide range of global practices. Restricted to first-year students. Not eligible for CR/NCR option.

Prerequisite: Admission to Vic One
Corequisite: VIC186Y1, VIC187H1, ECO101H1 and ECO102H1
Exclusion: Innis One, Munk One, New One, SMC One, Trinity One, UC One, Woodsworth One, 199 seminars, Vic One Hundred.
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

VIC191Y1 - Artistic Creation and Public Issues

Hours: 72S

This course addresses social issues through the exploration of creative activity and the imaginative arts. Topics will be discussed from historical, ethical and philosophical perspectives, and might be considered either in a group or individually. Restricted to first-year students. Not eligible for CR/NCR option.

Prerequisite: Admission to Vic One
Corequisite: VIC190Y1 and 1.0 FCE in any 100-level course in ARC or CIN or DRM or ENG or MUS or VIS
Exclusion: Innis One, Munk One, New One, SMC One, Trinity One, UC One, Woodsworth One, 199 seminars, Vic One Hundred courses.
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

Vic One: Jewison Stream

VIC190Y1 - The Arts and Society

Hours: 48S

The artist, filmmaker, poet or dramatist has changed society and how we imagine our future. The course explores a number of paradigm cases of how the arts have interacted with social problems. Both historical and current examples of the role of the imaginative arts will be explored. Restricted to first-year students. Not eligible for CR/NCR option.

Prerequisite: Admission to Vic One
Corequisite: VIC191Y1 and 1.0 FCE in any 100-level course in ARC or CIN or DRM or ENG or MUS or VIS
Exclusion: Innis One, Munk One, New One, SMC One, Trinity One, UC One, Woodsworth One, 199 seminars, Vic One Hundred courses.
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

VIC191Y1 - Artistic Creation and Public Issues

VIC One Hundred

VIC101H1 - Conflict Theory and Practice

Hours: 24S

This course is a general orientation to conflict theory, and develops a basic understanding of essential conflict resolution principles that will complement the study of conflict theory. The course will examine the differences between conflicts and disputes, the functions and desirability of conflict, and the conditions that facilitate conversion of conflicts from destructive to constructive. Not eligible for CR/NCR option.

Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

VIC102H1 - Ethics and Choices in Times of Crisis

Hours: 24S

This course examines a specific event, or events, in relation to the public sphere. The course will use events or an event as an entry point to discuss the nature of society including topics such as major revolutions, economic crises, the impact of the appearance of significant artistic or cultural works, and the impact of technological changes. Not eligible for CR/NCR option.

Exclusion: VIC102Y1
Distribution Requirements: Humanities; Social Science
Breadth Requirements: Thought, Belief and Behaviour (2)
VIC105H1 - Odysseys: The Search for Meaning

**Hours:** 24S

Metaphors and motivations of journeying have long intrigued human beings as they have attempted to understand the meaning of their existence: the setting out, the seeking for a desired object, the pilgrimage of religious observance, and the longing to return home. Through texts, art, music and film, this course will explore some of the shaping journey-myths of our culture from classical, Hebrew, medieval and modern sources. Not eligible for CR/NCR option.

**Distribution Requirements:** Humanities
**Breadth Requirements:** Creative and Cultural Representations (1)

VIC106H1 - Psychology and Society

**Hours:** 24S

This course explores central developments and ongoing controversies in the scientific study of the human mind, brain and behaviour. It examines topics such as: psychoanalysis, behaviourism, humanistic psychology, evolutionary psychology, intelligence testing, and feminist perspectives. Goals include understanding the historical evolution and social relevance of scientific psychology. Not eligible for CR/NCR option.

**Exclusion:** VIC206H1
**Distribution Requirements:** Humanities; Social Science
**Breadth Requirements:** Thought, Belief and Behaviour (2)

VIC107H1 - Evolution, Genetics, and Behaviour

**Hours:** 24S

In this course we examine major episodes in the history of evolution and genetics in the twentieth century. Topics include Darwinian evolution, sociobiology and evolutionary psychology, eugenics, and genetic screening and therapy. We will examine different views about the control of evolution and genetic manipulation in their socio-cultural-economic context and discuss the ethical and social implications of those views. Not eligible for CR/NCR option.

**Exclusion:** VIC207H1
**Distribution Requirements:** Humanities; Social Science
**Breadth Requirements:** Thought, Belief and Behaviour (2)

VIC108H1 - Belonging, Imagination and National Identity

**Hours:** 24S

This course will examine a number of questions related to the origins of national identities and the sustainability of nation-states. Topics covered will include: language, ethnicity, religion, politics, war, symbols, the arts, sport and public spectacle, and cuisine. Not eligible for CR/NCR option.

**Exclusion:** VIC108Y1
**Distribution Requirements:** Humanities; Social Science
**Breadth Requirements:** Society and its Institutions (3)

VIC109H1 - Innovators and Their Ideas

**Hours:** 24S

A study of the ideas and concerns of innovators who questioned traditional views and values. The course includes creative thinkers who challenged basic concepts on politics, literature, religion, and society. Not eligible for CR/NCR option.

**Exclusion:** VIC109Y1
**Distribution Requirements:** Humanities
**Breadth Requirements:** Thought, Belief and Behaviour (2)

VIC110H1 - Critical Perspectives on Society

**Hours:** 24S

By means of short texts, film or art works this course explores such themes as the effect of technology on the political, the nature of democracy, the question of resistance through art and the role of violence in the social. Not eligible for CR/NCR option.

**Distribution Requirements:** Social Science
**Breadth Requirements:** Thought, Belief and Behaviour (2)
VIC112H1 - Puzzles, Discovery and the Human Imagination

**Previous Course Number:** VIC112Y1  
**Hours:** 24S

There has never been a period of time, nor has there ever been a culture, without some kind of puzzle tradition. Are puzzles just playful artefacts, intended merely to entertain? Or are they mirrors of something much more fundamental in human life? The course will take a close look at what puzzles tell us about the human mind and human culture. Not eligible for CR/NCR option.

**Exclusion:** VIC112Y1  
**Distribution Requirements:** Humanities; Social Science  
**Breadth Requirements:** Thought, Belief and Behaviour (2)

VIC113H1 - Encountering Distant Climes: The Literature of Travel and Exploration

**Hours:** 24S

This course will study accounts of world travelers and explorers from the Middle Ages to the present, including representative examples drawn from the Age of Exploration, the Grand Tour, scientific and map-making expeditions, and the contemporary genre of travel writing. Particular attention will be given to the trans-cultural nature of travel, and the interactive aspects of the gulf between the observer and those observed. Students will analyze the diverse motivational factors behind excursions and expeditions, and apply a critique to written accounts in light of such factors as self-discovery, knowledge and imagination, Eurocentrism, orientalism, cultural relativism, colonialism/imperialism, race, gender, and eco-tourism. Not eligible for CR/NCR option.

**Distribution Requirements:** Humanities  
**Breadth Requirements:** Creative and Cultural Representations (1)

VIC114H1 - Renaissance in Popular Culture

**Hours:** 24S

This course explores the depiction of the Renaissance in a wide range of plays, films and novels. The focus is on the exchange between film, fiction, and ‘fact’, and on how the values and concerns of the present shape creative recreations of the past in popular culture. Not eligible for CR/NCR option.

**Exclusion:** VIC114Y1  
**Distribution Requirements:** Humanities  
**Breadth Requirements:** Creative and Cultural Representations (1)

VIC115H1 - Imagined Power: Literature and Film

**Hours:** 24S

In this course we will study a number of literary and cinematic works that take up questions of power, duty, rights, responsibility, and freedom. Our texts will be drawn from a long history, and from many parts of the world. The sequence however will not be chronological. Not eligible for CR/NCR option.

**Exclusion:** VIC115Y1  
**Distribution Requirements:** Humanities; Social Science  
**Breadth Requirements:** Creative and Cultural Representations (1)

VIC116H1 - Politics of the Pen

**Hours:** 24S

A study of how literature challenges prevailing political beliefs and social norms. We will situate our discussion in the broader context of human rights and freedoms. We will examine cases where literature has been censored and writers have been imprisoned or driven into exile. Part of this course involves a community service-learning component. We will consider how this literature contributes to debate and advocacy around issues of social justice. Not eligible for CR/NCR option.

**Distribution Requirements:** Humanities  
**Breadth Requirements:** Thought, Belief and Behaviour (2)

VIC117H1 - Understanding the Performing Arts: Interpretation and Expression

**Hours:** 24S

This course examines two key issues about the performing arts that concern both artists and theorists: the nature of interpretation and of expression. What might we mean when we say that a work, a piece of music or a dance for example expresses something? What is it to express? And what is the nature of interpretation? Are there any constraints or boundaries on interpretation? We will draw on both philosophers and non-philosophers to explore these sorts of questions. Not eligible for CR/NCR option.

**Distribution Requirements:** Humanities  
**Breadth Requirements:** Creative and Cultural Representations (1)
VIC119H1 - Myths and Legends in Modern Contexts

Hours: 24S

This course provides an introduction to modern forms of ancient narratives, exploring the ways in which selected ancient literary sources and myths have been adapted to modern Canadian literature. Ancient narratives or ‘old stories’ are often reused, reinterpreted or reconstructed in modern narratives and given new relevance in a contemporary context. Students will encounter sources and contexts of ancient narratives. Not eligible for CR/NCR option.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

VIC121H1 - Evaluating Healthcare: Problems and Solutions

Hours: 24S

This course introduces students to the study of healthcare by asking foundational questions about how evidence and knowledge are produced in the context of healthcare problems. Students will explore how different frameworks for clinical practise (e.g. Evidence-based Medicine, Person-Centered Healthcare) conceptualize evidence and how different methodologies impact how healthcare research is conceived, reported, and understood. Students will learn to critically appraise healthcare research studies and assess their evidence value and implications for clinical practice. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Social Science
Breadth Requirements: Living Things and Their Environment (4)

VIC122H1 - Scientific Evidence in Public Policy

Hours: 24S

This course investigates issues arising from the translation of scientific evidence for public consumption, including in the development of public policy and in confronting problems of social and global significance. Areas of focus will include climate change, global health, and clinical medicine. Students will explore concepts including the perception and communication of risk, the generalizability of research findings, probabilistic and mechanistic thinking, and the use and abuse of scientific authority and “expertise” in public discourse. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

VIC134H1 - Globalization

Hours: 24S

This interdisciplinary course explores the contemporary character of globalization. The world is shrinking as money, goods, people, ideas, weapons, and information flow across national boundaries. Some commentators assert that a more tightly interconnected world can exacerbate financial disruptions, worsen the gap between rich and poor nations, undermine democracy, imperil national cultures, harm the environment, and give unconstrained freedom to predatory corporations. Others proclaim that globalization - understood as capitalism and free markets - fosters economic growth, encourages creative collaboration, inspires technological breakthroughs, and enhances human prospects for a better life, in rich and poor countries alike, in unprecedented ways. Our task is to evaluate the evidence and draw our own conclusions. Not eligible for CR/NCR option.

Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

VIC135H1 - The Death of Meaning

Hours: 24S

In The Origin of Species Darwin concluded there was no evidence to suggest that life was designed by a higher power. A corollary of this is that our lives lack any necessary purpose or meaning. Our readings will be directed to the question of what it means to lack ‘Meaning’. Not eligible for CR/NCR option.

Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

VIC136H1 - How to Study Everyday Life

Hours: 24S

An introduction to the academic study of everyday life. A cross-disciplinary discussion class drawing on a wide variety of examples from ordinary life, fantasy, and culture. We situate the apparently innocuous within larger patterns of social relations and social change. Not eligible for CR/NCR option.

Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)
VIC137H1 - Science and Science Fiction

Hours: 24S

Based on reading and discussion of science fiction and popular science in the context of social issues, this seminar course explores the fantastic visions of humanity's future inspired by scientific advances during the twentieth century. Not eligible for CR/NCR option.

Distribution Requirements: Social Science
Breadth Requirements: Thought, Belief and Behaviour (2)

VIC141H1 - Discovery and Revolution

Hours: 24S

This course examines the emergence of a global modern world in relation to the upheavals of the Renaissance (1350-1700) and its discoveries and innovations in culture and society. Not eligible for CR/NCR option.

Exclusion: VIC141Y1
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

VIC142H1 - Machiavelli: The Politics of Power

Hours: 24S

The name of Machiavelli unleashes powerful opinions and responses and conjures up trickery, duplicity and cynicism. Yet Machiavelli himself is arguably the least Machiavellian of political figures of the Italian Renaissance. This course examines the writings of Niccolò Machiavelli, placing them in their historical context in order to understand this most controversial figure of the Renaissance, his influence and his lasting legacy. Not eligible for CR/NCR option.

Exclusion: ITA198H1 (Machiavelli and Machiavellianism); VIC141Y1
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

VIC159Y1 - Vic One Hundred Special Topics Seminar

Hours: 48S

Topics vary from year to year. Not eligible for CR/NCR option.

Distribution Requirements: Humanities; Science; Social Science
Breadth Requirements: Creative and Cultural Representations (1); Thought, Belief and Behaviour (2)

VIC159H1 - Vic One Hundred Special Topics Seminar

Hours: 24S

Topics vary from year to year. Not eligible for CR/NCR option.

Distribution Requirements: Humanities; Science; Social Science

VIC198H1 - Posters and Propaganda

Hours: 24L

How and when have political posters been used? What forms do they take? How have they changed over time? What can these visual artifacts tell us about the relationship between art and propaganda, and about the political movements that have mobilized visual strategies to advance their aims? This course involves visits to several poster collections, develops visual literacy skills, and highlights the role of the visual in societies past and present. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Social Science
Breadth Requirements: Creative and Cultural Representations (1)

VIC199H1 - Thinking with Things

Hours: 24S

This course will examine the materiality of objects with a view to understanding how artefacts are made, their circulation, consumption, and the importance of things to social and cultural life. An investigation of artefacts from various collections in and around the university will be undertaken to develop basic methods for the study, description and analysis of material culture. In addition to hands-on exploration of objects, topics may include antiquarians and their methods, material culture in colonial contexts, and materials in contemporary user-friendly design. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)
Creative Expression and Society

IVP210H1 - Holography for 3D Visualization

Hours: 24L/36P

An introduction to the theory and practice of holography. Human perception & 3D visualization; fundamentals of 3D modeling; ray and wave optics; interference, diffraction, coherence; transmission and reflection holograms; colour perception; stereograms. Applications of holography in art, medicine, and technology. Computer simulation, design, and construction of holograms.

Exclusion: JOP210H1
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

VIC209H1 - How Stories Work

Hours: 24S

Stories give shape and substance to the things we believe in, from scientific theories and sacred texts to literary tales and philosophical propositions. They perpetuate ideals and identities, and sustain institutions and communities. This course will take up a set of texts from the arts, sciences, religions and several other storytelling traditions, ancient and modern, considering their claims to authority and making connections between them.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

VIC235H1 - Innovation in Society

Hours: 24L

This course investigates the history and contemporaneity of innovation as a response to social, scientific, and environmental challenges. Students will acquire key frameworks for understanding the workings of innovation, the place of creativity, and the social impacts of new and disrupted organizations. Through historicizing key moments of innovation (from the Gutenberg printing press to today’s healthcare discoveries) and considering related issues (including intellectual property and sustainability) students will develop approaches to understanding the past, present, and future of creative disruption.

Exclusion: MUN101H1, MUN102H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

VIC270H1 - Listening: A Critical History

Hours: 24S

Surveying scenarios for public and private musical listening, from historical contexts to the present, this course explores critical questions about how we listen, including the relationship between musical genres and listening situations, the definition of music vs. noise, the influence of spectatorship, and the impact of changing technologies. Students discuss the changing aesthetics and ideologies of musical listening, considering ways in which listening shapes our understanding of the social and our awareness of communities.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

VIC271H1 - Reading the Wild

Hours: 24S

In light of the environmental crisis, this seminar surveys a wide range of oral and written literature in order to discover how our approach to nature has changed over the centuries, what gains and losses have attended modernity, and what older cultures can teach us as we seek to preserve threatened ecosystems.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

VIC273H1 - The Body: An Exercise

Hours: 24S

This course will sketch the vital role or the drama of the human body, aspects of its performance, comedy, tragedy and death, through selected parts of history, in life and as reflected in "art."

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

VIC275H1 - Creative Writing: Short Fiction

Hours: 24S

This course is for aspiring fiction writers who wish to deepen their craft. Each seminar will feature a lecture on technical issues such as plot and characterization, as well as an analysis of a short story by a classic writer. Students will write their own stories, with editorial input from the instructor.

Prerequisite: Application Required.
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)
VIC276H1 - Writing for the Stage and Screen

Hours: 24L

A creative writing course for students interested in an introduction to writing for theatre and film. Seminars will focus on technical issues including plot, characterization, dramatic structure, dialogue, image-based storytelling, and aspects of dramaturgy. Seminars may also include analyses of notable plays and screenplays across a variety of genres. Students will write their own scripts, with editorial input from the instructor.

Prerequisite: Application required. The instructor will review student portfolios of creative work to ensure a productive learning experience in which all students can contribute to and benefit from workshop-based pedagogy.

Exclusion: CIN349H1; DRM228H1; DRM328H1

Distribution Requirements: Humanities

Breadth Requirements: Creative and Cultural Representations (1)

VIC279H1 - Creative Non-Fiction

Hours: 24S

This course examines the forms, style, aims, and ethics of non-fictional forms such as documentary writing, journalism, and life-writing. It combines the study of examples from contemporary media with exercises in writing non-fictional prose.

Distribution Requirements: Humanities

Breadth Requirements: Creative and Cultural Representations (1)

VIC280H1 - Creative Writing: Poetry

Hours: 24S

A workshop course (with a literature component) in writing poetry. Designed for those with a serious ambition to be writers as evinced in work they are already doing. The literature component emphasizes multicultural dimensions of contemporary writing in English.

Prerequisite: Application required

Distribution Requirements: Humanities

Breadth Requirements: Creative and Cultural Representations (1)

VIC281H1 - Popular Music, Technology, and the Human

Hours: 24S

This course explores ways in which popular music, sound and sound technologies have influenced our understanding of the recent human condition. Drawing on a variety of theoretical perspectives, we consider the musical uses of technology as both a material culture and a set of distinctly innovative practices that can create powerful transformations of consciousness, meaning and value.

Distribution Requirements: Humanities

Breadth Requirements: Creative and Cultural Representations (1)

VIC335H1 - Ethical Enterprise and Critical Reflection

Hours: 24L

The course explores what change we hope to produce through a wide range of new enterprises. The main goal is to develop critical perspectives on enterprises in the widest sense, including start-up companies, non-profits, arts institutions, community outreach organizations, and social activism. What would make these changes ethical? When we evaluate the endeavours, how can we compare economic benefits, social disruption, questions of exclusion and diversity, sustainability in several senses, and the processes of change themselves? Where are the limits of social responsibility in entrepreneurial creativity?

Prerequisite: 6.0 FCE in any subject

Distribution Requirements: Social Science

Breadth Requirements: Society and its Institutions (3)

VIC350Y1 - Creative Writing

Hours: 48S

A workshop course (with a literature component) in writing fiction and poetry. Designed for those with a serious ambition to be writers as evinced in work they are already doing. Does not offer instruction for beginning writers. Presupposes perfect and sophisticated written language skills. The literature component emphasizes multicultural dimensions of contemporary writing in English.

Prerequisite: Application Required. Preference given to fourth and third-year students.

Distribution Requirements: Humanities

Breadth Requirements: Creative and Cultural Representations (1)
VIC352Y1 - Love, Sex and Death in Short Fiction

Hours: 48S

This course will examine how a variety of international authors, both nineteenth century and modern, handle the themes of mortality, sexual passion and love in their short fiction. Particular emphasis will be placed on the artistry of the writers’ presentation, the role of dialogue, the economy of narrative, etc. Students will read Chekhov, The Kiss, Lady with a Dog and Tolstoy, Master and Man but will also be exposed to such contemporary popular authors as Elmore Leonard, When the Women Come Out to Dance; Truman Capote, Mojave; Richard Ford, The Occidentals; Philip Roth, The Dying Animal; Ian McEwen, The Cement Garden; and David Bezmozgis, Natasha.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

VIC370H1 - Music and the Imagination

Hours: 24S

This course explores how music creatively reflects and inspires our sense of self, place and community through readings, close listening, case studies, and creative responses. We consider various sites of musical imagination, and the genres that intersect with them. Course discussion addresses how music participates in the social life of creativity, imagination and fantasy, and what these roles mean for music’s significance in society and culture. No prior experience in music composition required.

Prerequisite: Completion of 6.0 FCE
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

VIC371H1 - Documentary Journalism

Hours: 24S

This seminar course looks at the history and evolution of documentary journalism in print and/or visual media through changing contexts, including challenges in the digital era. Students discuss major stories in the news, focusing on some important practitioners of the genre and on ethical issues such as privacy, objectivity, and partisanship.

Prerequisite: Completion of 6.0 FCE
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

VIC372H1 - Reviewing, Reception, and Reading Communities

Hours: 24S

While readers and audiences often are considered to be cultural "consumers," this course will consider reception as an active, creative, and often collaborative activity, by examining formal and informal practices of reviewing and response that may include fan/fanfic cultures, book clubs, community and nation-wide reading programs, and award competitions. Such contexts of reception will be considered along with their social, economic, and ethical implications.

Prerequisite: Completion of 6.0 FCE
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

VIC373H1 - Materialities of Music

Hours: 24L

Music is often understood as the most ephemeral and transcendent of the fine arts, even if that means overlooking the physical realities of music’s production and dissemination. We will examine these materialities here, from paper and technologies of print, through to instruments for making and studying sound, and architectural spaces for its market circulation; we will see how music and its instruments provided the raw material for the emergence of a nineteenth-century science of acoustics.

Prerequisite: Completion of 6.0 FCE
Recommended Preparation: 0.5 FCE in Creative Expression and Society, Material Culture, or Music.
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

VIC435H1 - Capstone Seminar: Community-Engaged Research

Hours: 12L/78P

This course provides students with an experiential learning opportunity in community-engaged research combined with critical reflection and academic discussion within a seminar setting. Through a placement in social enterprise organizations, students develop research-based approaches to support their organization in assessing needs, impact, and resources. Alongside this hands-on experience, interdisciplinary seminar discussions will help students understand how research methodologies, standards, and protocols are deployed in community settings. Not eligible for CR/NCR.

Prerequisite: 15.0 FCE in any subject. Application required.
Exclusion: NEW497Y1/NEW498H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)
VIC470H1 - Soundscapes

Hours: 24S

This course surveys the growth of the field of Acoustic Ecology and the aesthetic, political, and ethical questions it engages. Students learn about creative and musical practices associated with this new attention to sound, and they gain experience with the practice of field recording and sonic-environmental sampling. The course culminates with a final Soundscape composition or creative mapping project. No previous experience in sound recording or composition required.

Prerequisite: Completion of 9.0 FCE
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

VIC479Y1 - The Novel: A Master Class

Hours: 48S

Advanced young writers in this fourth-year seminar work to produce a short novel appropriate for submission to an agent or a publisher. The class does not offer instruction for beginning writers. It is intended for serious writers interested in learning about writing novels at a professional level.

Prerequisite: Application required
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

VIC480H1 - Poetry: A Master Class

Hours: 24S

A workshop course in writing poetry. Designed for those with a serious ambition to be writers as evinced in work they are already doing. Does not offer instruction for beginning writers. Presupposes perfect and sophisticated written language skills.

Prerequisite: Application required.
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

VIC260H1 - Equity and Diversity in Education

Hours: 36L

This course focuses on raising awareness and sensitivity to equity and diversity issues facing teachers and students in diverse schools and cultural communities. It builds knowledge of how oppression works and how cultural resources and educational practices may be brought to bear on reducing oppression and improving equity. The field experience in this course entails observation of and participation in equity and diversity efforts in a culturally-rooted school and/or community organization.

Prerequisite: Enrolment in Education and Society Minor
Exclusion: JSV202H1, SMC271H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

VIC261H1 - Child and Adolescent Development in Education

Hours: 36L

This course examines how children and adolescents develop and explores how best to facilitate their growth and learning in the area of education. Major topics include cognitive, emotional, social, moral, physical and language development. Themes addressed include interpersonal relationships such as pro-social and aggressive behaviour, as well as the influence of schooling, family life and culture. This course includes a 20-hour field experience located in a school and entails observation of development across various age groups. This may be satisfied by participation in Vic Reach or in another organization with the approval of the Program Coordinator.

Prerequisite: Enrolment Education and Society Minor
Exclusion: JSV201H1, SMC272H1
Distribution Requirements: Social Science; Social Science
Breadth Requirements: Thought, Belief and Behaviour (2)

VIC262H1 - Communication and Conflict Resolution in Education

Hours: 36L

This course aims to develop an understanding of social conflict and cultural diversity. How does conflict act as a catalyst for change? What do socio-cultural, cognitive, and motivational approaches teach us about conflict? Topics include: effects of conflict, human rights principles, cross-cultural understanding.

Prerequisite: Enrolment in Education and Society Minor
Exclusion: JSV200H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)
VIC265H1 - Introduction to Teaching

Previous Course Number: VIC362H1 & VIC355H1
Hours: 24S

Builds understanding of teaching as professional practice. The course primarily focuses on the research base underlying policies and documents such as the Foundations of Professional Practice. This course is restricted to students enrolled in the Education and Society Minor (Arts).

Exclusion: VIC362H1, VIC355H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

VIC356H1 - Multiple Literacies in Education

Hours: 36L

While pedagogical theory has long emphasized the place of language acquisition in literacy, recent educators have begun exploring the role of digital, visual, print, and critical literacies in education. This course introduces students to a multiple literacies framework through the pedagogical lens of social justice and diversity. Class participants learn to integrate the multimodalities of literacy in their teaching practice and expand their understanding of 21st-century literacy. This course requires students' enrolment in the Education and Society Minor or permission of the instructor.

Recommended Preparation: VIC355H1/VIC362H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

VIC360H1 - Education Internship

Students are required to complete an internship in an educational environment. This can be satisfied by participation in an organization with the approval of the Program Coordinator. Written assessment of the internship is required. Not eligible for CR/NCR option.

Prerequisite: Enrolment in Education and Society Minor, VIC362H1/EDU311H
Exclusion: VIC360Y1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

VIC360Y0 - Education Internship - International

Students are required to complete an internship in an educational environment in Beijing, China. Arranged through Victoria College and the Centre for International Exchange, the Beijing International Exchange is only for students in the Education & Society Minor. Written assessment of the internship is required. Not eligible for CR/NCR option.

Prerequisite: Enrolment in Education and Society Minor, VIC362H1/EDU311H
Exclusion: VIC360H1, VIC360Y1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

VIC360Y1 - Education Internship

Students are required to complete an internship in an educational environment. This can be satisfied by participation in an organization with the approval of the Program Coordinator. Written assessment of the internship is required. Not eligible for CR/NCR option.

Prerequisite: Enrolment in Education and Society Minor, VIC362H1/EDU311H
Exclusion: VIC360H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

VIC361H0 - A Study of Chinese Literature and Culture

This course will compare selected works of Chinese and Canadian authors with a view to the presentation of such writing in an educational setting.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)
VIC363H1 - Teaching Math: The JUMP Approach

Hours: 24S

This course will challenge the widely accepted idea that people need to be born with a special gift or natural ability to excel in mathematics. New research in education and cognitive science suggests that young learners often struggle in school because they are not taught in a way that allows their brains to work efficiently. This course will examine barriers that prevent students from learning and methods of teaching that can help all students reach their full potential (not only in math). Math lovers and math phobic students are welcome: the course aims to help students develop deeper levels of confidence and understanding in mathematics so they can become effective teachers themselves.

Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

VIC368H1 - Special Topics in Education and Society

Hours: 24L

In-depth study of a topic related to education and society. Content varies with instructor. Please see Victoria College website for current offerings.

Prerequisite: Completion of 9.0 FCE
Recommended Preparation: One 200-level course in Education and Society
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

VIC369H1 - Special Topics in Education and Society

Hours: 24L

In-depth study of a topic related to education and society. Content varies with instructor. Please see Victoria College website for current offerings.

Prerequisite: Completion of 9.0 FCE
Recommended Preparation: One 200-level course in Education and Society
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

VIC395Y0 - Studies in Chinese Culture

Hours: 48S

This course takes place on exchange, in Beijing, China. Students will study five traditional Chinese arts topics and their impact on Chinese culture.

Prerequisite: Students must have completed a minimum of 10 FCE
Distribution Requirements: Humanities; Social Science; Science

Literature and Critical Theory

VIC202Y1 - Forms of Representation

This course explores representation as a cultural and political problem from antiquity to the modern era. Representation will be analyzed as a means of depicting or constructing reality and as a tool for constituting individual and collective subjectivity. We consider literary and other modes of representation in their historical contexts.

Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

VIC203H1 - Empires I

Hours: 24L/12T

This course examines the literary and non-literary representations that accompany imperial conquests and hegemony from pre-modern times to the emergence of the modern nation-state. We compare the establishment, interpretation and reinvention of cultural forms of empire (e.g. Ottoman, Persian, Roman) at local, national, transnational and global levels.

Exclusion: VIC203Y1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

VIC204H1 - Canons and Canonicity

This course will consider the problem of canons in a variety of contexts: the aesthetic (including the literary, visual arts and music), but also the religious, the political, the philosophical and other discursive forms. Special focus will be on the problem of the relations across these boundaries.

Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)
**VIC205H1 - Empires II**

**Hours:** 24L/12T

This course examines the literary and non-literary representations that accompany imperial conquests and hegemony from the emergence of the modern nation-state through more recent developments in globalization. We compare the establishment, interpretation and reinvention of cultural forms of empire (e.g. British, Japanese, Spanish) at local, national, transnational and global levels.

**Exclusion:** VIC203Y1  
**Distribution Requirements:** Humanities  
**Breadth Requirements:** Creative and Cultural Representations (1)

**VIC301H1 - Critical Writing Seminar**

This course is a writing intensive class devoted to the practice and analysis of critical writing. We will explore the critical tradition, the public(s) for whom one writes, and the choice of voice, point of view, and writerly form. The class will be structured around workshop style discussion and writing exercises.

**Recommended Preparation:** VIC202Y1  
**Distribution Requirements:** Humanities  
**Breadth Requirements:** Creative and Cultural Representations (1)

**VIC302H1 - Pasts and Futures**

An introduction to representations of history, in which we will consider concepts that turn on the problem of time such as tradition, periodization, genealogy, memory, crisis, revolution, eschatology, and utopia.

**Recommended Preparation:** VIC202Y1  
**Distribution Requirements:** Humanities  
**Breadth Requirements:** Creative and Cultural Representations (1)

**VIC303H1 - Memory and Trauma**

This course will explore the problem of memory in relation to both collective and individual trauma. What pressure does trauma place on language, and agency, and how does it figure in commemoration, narrative, monumentalization, and other modes of representing the past?

**Recommended Preparation:** VIC202Y1  
**Distribution Requirements:** Humanities  
**Breadth Requirements:** Thought, Belief and Behaviour (2)

**VIC304H1 - Praxis and Performance**

This course will explore what it means to “act” in cultural, political, religious, and psychological realms. We focus on the historically shifting relations between theory and practice, between artifice and agency, and between theatricality and spectatorship.

**Recommended Preparation:** VIC202Y1  
**Distribution Requirements:** Humanities  
**Breadth Requirements:** Creative and Cultural Representations (1)

**VIC305H1 - Institutions and Power**

This course will consider some of the ideologies and practices of various institutions at work in the production and transmission of cultural objects and social power. These may include the family, museum, hospital, prison, university, library, and theatre, as well as fields such as publishing and religion.

**Recommended Preparation:** VIC202Y1  
**Distribution Requirements:** Humanities  
**Breadth Requirements:** Creative and Cultural Representations (1)

**VIC306H1 - Culture and Media**

This course will consider relations between various cultural media – such as film, literature, photography, visual art, architecture – with specific attention to the historical demands and possibilities posed by technological change.

**Recommended Preparation:** VIC202Y1  
**Distribution Requirements:** Humanities  
**Breadth Requirements:** Creative and Cultural Representations (1)

**VIC307H1 - Periodization and Cultural History**

This course explores the phenomenon of historical periodization in its various modes, including as a stylistic concept, a set of discursive norms for cataloguing and grouping cultural forms, and a means of organizing and contesting historical narratives.

**Recommended Preparation:** VIC202Y1  
**Distribution Requirements:** Humanities  
**Breadth Requirements:** Thought, Belief and Behaviour (2)
**VIC308H1 - Identities**

Though “identity” might suggest sameness, it is historically unstable and has many components, including ability/disability, age, class, ethnicity, gender, health/illness, ‘race,’ sexuality, and religion. This course considers the complexities of identity-formation and identity-transformation as captured in literary texts and cultural artefacts over a wide range of historical and cultural contexts.

**Recommended Preparation:** VIC202Y1  
**Distribution Requirements:** Humanities  
**Breadth Requirements:** Thought, Belief and Behaviour (2)

---

**VIC401H1 - Seminar in Comparative Literature**

**Hours:** 24S

This course offers senior students in Literature and Critical Theory the opportunity to take part in a graduate seminar in Comparative Literature. Topics change annually.

**Prerequisite:** Permission of instructor  
**Distribution Requirements:** Humanities  
**Breadth Requirements:** Creative and Cultural Representations (1)

---

**VIC401Y1 - Seminar in Comparative Literature**

**Hours:** 48S

This course offers senior students in Literature and Critical Theory the opportunity to take part in a graduate seminar in Comparative Literature. Topics change annually.

**Prerequisite:** Permission of instructor  
**Distribution Requirements:** Humanities  
**Breadth Requirements:** Creative and Cultural Representations (1); Thought, Belief and Behaviour (2)

---

**VIC402H1 - Translation and Comparativity**

This course will consider questions of adaptation, appropriation, imitation, hybridity and incommensurability across languages, geographical regions, epochs, media, and academic disciplines. Course topics may include the role of translation in the historical projects of nation-building and empire.

**Prerequisite:** VIC202Y1 and one of: VIC302H1, VIC303H1, VIC304H1, VIC305H1, VIC306H1, VIC307H1; or permission of instructor.  
**Distribution Requirements:** Humanities  
**Breadth Requirements:** Thought, Belief and Behaviour (2)

---

**VIC403H1 - Advanced Topics in Literature and Critical Theory**

Content varies depending on instructor. In-depth examination of selected issues.

**Prerequisite:** VIC202Y1 and one of: VIC302H1, VIC303H1, VIC304H1, VIC305H1, VIC306H1, VIC307H1; or permission of instructor.  
**Distribution Requirements:** Humanities

---

**VIC494H1 - LCT Senior Research Paper**

This course provides an opportunity to design an interdisciplinary course of study, not otherwise available within the Faculty, with the intent of addressing specific topics in Literature and Critical Theory. Written application (detailed proposal, reading list and a letter of support from a Victoria College faculty member who is prepared to supervise) must be submitted for approval on behalf of Victoria College. For application procedures visit the Victoria College website. Not eligible for CR/NCR option.

**Prerequisite:** A minimum CGPA of 3.0 and have completed 15 FCE and permission of College Program Director.  
**Distribution Requirements:** Humanities

**Distribution Requirements:** Humanities
Material Culture

VIC224H1 - Introduction to Material Culture

Hours: 12P/24S

This course is about things - the everyday objects of past and present cultures. It examines the meanings people have invested in objects and how those meanings have changed over time. Using interdisciplinary approaches, students investigate objects found in homes, retail spaces, cities, art galleries and museums in order to develop new understandings of the objects that structure their daily lives and their material world.

Prerequisite: Completion of 4.0 FCE
Exclusion: VIC224Y1
Distribution Requirements: Humanities; Social Science
Breadth Requirements: Thought, Belief and Behaviour (2)

VIC224Y1 - Introduction to Material Culture

Hours: 24P/48S

This course is about things - the everyday objects of past and present cultures. It examines the meanings people have invested in objects and how those meanings have changed over time. Using interdisciplinary approaches, students investigate objects found in homes, retail spaces, cities, art galleries and museums in order to develop new understandings of the objects that structure their daily lives and their material world.

Prerequisite: Completion of 4.0 FCE
Exclusion: VIC224H1
Distribution Requirements: Humanities; Social Science
Breadth Requirements: Thought, Belief and Behaviour (2)

VIC225Y1 - A History of the World in Objects

Hours: 48L/24P

Through a multidisciplinary approach, this course opens new perspectives on the history of artifacts, the evolution of a world of things, and the analysis of material culture. Lectures and tutorials are supplemented by hands-on exercises in museums and local communities.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1); Society and its Institutions (3)

VIC229H1 - Special Topics in Material Culture

Hours: 24S

An in-depth examination of some aspect of Material Culture theory or practice. Content in any given year depends on instructor. Not offered every year.

Distribution Requirements: Humanities; Social Science
Breadth Requirements: Thought, Belief and Behaviour (2)

VIC229Y1 - Special Topics in Material Culture

Hours: 48S

An in-depth examination of some aspect of Material Culture theory or practice. Content in any given year depends on instructor. Not offered every year.

Distribution Requirements: Humanities; Social Science
Breadth Requirements: Thought, Belief and Behaviour (2)

VIC326H1 - The Material Culture of Food

This course explores the material cultures which form around food and foodways in contemporary culture. It looks at foods as objects of production and consumption and at the material landscapes (culinary tools, the geography of the kitchen and restaurant, the archives - recipes, cookbooks, menus - that home cooks or chefs use) in order to "expose" the social, cultural and political dimensions of cooking, entertaining and eating.

Prerequisite: Completion of 6.0 FCE
Exclusion: VIC229H1 taken in 2015-2016
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

VIC327H1 - Digital Material Culture

Hours: 24S

This course explores the materiality of digital objects, from image and music files to digital documents to video games and other software, and considers their status as material culture. It involves the primary study of digital objects and also considers the technological infrastructures, cultural contexts, and signifying systems in which they are produced, circulated, and interpreted.

Prerequisite: Completion of 6.0 FCE
Distribution Requirements: Social Science
Breadth Requirements: Thought, Belief and Behaviour (2)
VIC328H1 - Materializing Cultural Identities

Hours: 24S

Students examine the expression of cultural identities in objects. Students are taught to think critically about the construction, use, display, and exchange of objects with significance for cultural identity. In addition to lectures and discussions, students participate in guided visits to sites – everyday, ritual, institutional – where negotiation of identity through objects occurs.

Prerequisite: Completion of 6.0 FCE
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

VIC444H1 - Themes in Material Culture

Hours: 24S

This fourth year seminar, required for students pursuing a minor in material culture, will have opportunities to explore themes in material culture studies, museum exhibitions and collections as well as processes of object analysis in greater depth and at an advanced level. Specific topics and research projects will vary according to the interests and specialties of course instructors and students.

Prerequisite: VIC224Y1/VIC225Y1, completion of 9 FCE and permission of instructor
Distribution Requirements: Humanities; Social Science
Breadth Requirements: Creative and Cultural Representations (1)

VIC329H1 - Internship in Material Culture

A practical or experiential learning opportunity under the supervision of a faculty member, normally at a museum, art gallery or other cultural agency (as approved by the supervisor). Not eligible for CR/NCR option.

Prerequisite: Completion of 9 FCE; Enrolled in the Material Culture minor
Distribution Requirements: Humanities; Social Science

VIC329Y1 - Internship in Material Culture

A practical or experiential learning opportunity under the supervision of a faculty member, normally at a museum, art gallery or other cultural agency (as approved by the supervisor). Not eligible for CR/NCR option.

Prerequisite: Completion of 9 FCE; Enrolled in the Material Culture minor
Distribution Requirements: Humanities; Social Science

VIC429H1 - Advanced Topics in Material Culture, Information Systems and Meaning-Making

Hours: 24S

Content varies depending on instructor. Selected issues are examined in depth and at an advanced level.

Prerequisite: VIC224Y1/VIC225Y1 and completion of 9 FCE; and permission of instructor
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

Renaissance Studies

VIC240Y1 - The Civilization of Renaissance Europe

Hours: 48L

An interdisciplinary introduction to the civilization of the Renaissance illustrated by a study of the institutions, thought, politics, society and culture of both Italy and Northern Europe. Italian city states such as Florence, Urbino and Venice, Papal Rome and despotic Milan are compared with the northern dynastic monarchies of France and England.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1); Society and its Institutions (3)

VIC241H1 - Renaissance Icons and Afterlives

Previous Course Number: VIC241Y1
Hours: 24S

Focusing on famous works like Michelangelo’s David, Shakespeare’s Hamlet, Cervantes’ Don Quixote, and Monteverdi’s Orfeo, this course explores some of the greatest masterpieces of the European Renaissance and their afterlives, cross-cultural adaptations, and appropriations in later and modern popular culture.

Exclusion: VIC241Y1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)
VIC242H1 - Scientific Worldviews of the Renaissance

Hours: 24L

An in-depth study of late medieval and early modern scientific worldviews, with a focus on interconnections between natural philosophy, cosmology, theology, astronomy, optics, medicine, natural history, and ethics. Through a consideration of early modern ideas including free will and determinism, the finite and infinite universe, teleology and mechanism, theism and deism, and deduction and intuition, this course investigates some of the period’s key metaphysical and methodological assumptions, and reveals how an evolving scientific understanding informed the Renaissance worldview.

Exclusion: HPS309H1
Recommended Preparation: 4.0 FCE
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

VIC338H1 - Renaissance in the City

Hours: 24S

An interdisciplinary course exploring the history, art, architecture, literature, and music of the Renaissance in one or more cities from ca. 1400-1650. The course will investigate how local political and social-historical contexts shape ideas and cultural forms, and so illustrate the process and effects of cross-fertilization in the Renaissance period.

Exclusion: VIC348Y0
Recommended Preparation: VIC240Y1, or another course in Renaissance Studies
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

VIC341H1 - The Self and Society: Women, Men and Children

Hours: 24S

A study of the changing conception of the human self in the Renaissance, and of its representation by major authors: Erasmus, Rabelais, Marguerite de Navarre, Castiglione, Machiavelli and others.

Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

VIC342H1 - Women and Writing in the Renaissance

Hours: 24S

Focusing on writers from various geographical areas, the course examines a variety of texts by early modern women (for example, treatises, letters, and poetry) so as to explore the female experience in a literate society, with particular attention to how women constructed a gendered identity for themselves against the backdrop of the cultural debates of the time.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

VIC343H1 - Sex and Gender

Previous Course Number: VIC343Y1
Hours: 24S

An interdisciplinary approach to questions of gender and sexuality in early modern Europe, with special focus on the representations of the sexual drive, the gender roles of men and women, and varieties of sexual experience in the literature and art of the period.

Exclusion: VIC343Y1
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

VIC343Y1 - Sex and Gender

Hours: 48S

An interdisciplinary approach to questions of gender and sexuality in early modern Europe, with special focus on the representations of the sexual drive, the gender roles of men and women, and varieties of sexual experience in the literature and art of the period.

Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3); Thought, Belief and Behaviour (2)

VIC344H1 - Renaissance Narrative

Hours: 24S

Focuses on analysis of short stories and longer prose works including, in English translation: Boccaccio's stories of love, fortune and human intelligence in the Decameron; Rabelais' humorous parody of high culture in Gargantua; the tragic tale of Romeo and Juliet; and the adventures of picaresque rogues in Lazarillo de Tormes and Nashe's Unfortunate Traveler.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)
VIC345H1 - Media and Communications in the Early Modern Era

Hours: 24S

This course examines the various media (printing press, representational art, music, preaching) and social and political forces (family and political networks, censorship, education, etc.) that conditioned the communication of ideas in early modern society.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

VIC346H1 - The Idea of the Renaissance

Hours: 24S

This course examines the changing views of the Renaissance, from the earliest definitions by poets and painters to the different understandings of contemporary historians. We will pay attention to the interests and biases that have informed the idea of the Renaissance as an aesthetic, social, political, gendered, and eurocentric phenomenon.

Prerequisite: Completion of 6.0 FCE
Recommended Preparation: At least one half course in the art, literature, history, or philosophy of fifteenth or sixteenth century Europe
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

VIC347H1 - Studies in Renaissance Performance

Hours: 24L

Studies in the development of new forms in music, drama and dance in the Renaissance. The course will consist of seminars and lectures, and may incorporate live performances taking place in Toronto in addition to recordings.

Recommended Preparation: VIC240Y1, or another course in Renaissance Studies.
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

VIC348Y0 - The Renaissance City

This course will study four Renaissance Italian urban environments, beginning with the medieval city of Siena followed by the construction of Renaissance urban space in republics, principalities, and papal Rome. Field trips and illustrated lectures will introduce students to Renaissance urban, cultural, and political history.

Recommended Preparation: VIC240Y1, another course in Renaissance Studies or permission of the instructor. (Offered in Siena only)
Exclusion: VIC338H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1); Society and its Institutions (3)

VIC349H1 - Special Topics in the Renaissance

Hours: 24L/12P

Studies in an aspect of the Renaissance based around lectures, seminars, and readings. Content in any given year depends on instructor. Not offered every year.

Recommended Preparation: VIC240Y1, or another course in Renaissance Studies.
Distribution Requirements: Humanities

VIC349Y1 - Special Topics in the Renaissance

Hours: 48L/24P

Studies in an aspect of the Renaissance based around lectures, seminars, and readings. Content in any given year depends on instructor. Not offered every year.

Recommended Preparation: VIC240Y1, or another course in Renaissance Studies.
Distribution Requirements: Humanities
VIC392H1 - Renaissance Studies Independent Study

This course provides an opportunity to design an interdisciplinary course of study, not otherwise available within the Faculty, with the intent of addressing specific topics in Renaissance studies. Written application (detailed proposal, reading list and a letter of support from a Victoria College faculty member who is prepared to supervise) must be submitted for approval on behalf of Victoria College. For application procedures visit the Victoria College website. Not eligible for CR/NCR option.

**Prerequisite:** A minimum CGPA of 3.0 and have completed 10 FCE and permission of College Program Director.

**Distribution Requirements:** Humanities

VIC392Y1 - Renaissance Studies Independent Study

This course provides an opportunity to design an interdisciplinary course of study, not otherwise available within the Faculty, with the intent of addressing specific topics in Renaissance studies. Written application (detailed proposal, reading list and a letter of support from a Victoria College faculty member who is prepared to supervise) must be submitted for approval on behalf of Victoria College. For application procedures visit the Victoria College website. Not eligible for CR/NCR option.

**Prerequisite:** A minimum CGPA of 3.0 and have completed 10 FCE and permission of College Program Director.

**Distribution Requirements:** Humanities

VIC441H1 - Michel de Montaigne: A Renaissance Life

**Hours:** 24S

A study of Montaigne as a multifaceted historical and cultural figure, as a mirror to sixteenth-century history, as product and observer of the religious divisions, political transformations, and cultural evolutions in an age marked by religious war, the growth of the state, the advent of the printed book, and the dissemination of the humanist project across western Europe. The course examines Montaigne’s essays, travel journals, and important scholarly works on Montaigne, in the context of contemporary gender relations, colonial empire, religious belief, and early modern Europe’s complex relationship with Greco-Roman Antiquity.

**Prerequisite:** VIC240Y1/HIS243H1, or permission of the instructor

**Recommended Preparation:** Another course in Renaissance Studies or permission of the instructor

**Breadth Requirements:** Thought, Belief and Behaviour (2)

VIC442H1 - The Renaissance Book

**Hours:** 24L

This course explores the intellectual and historical contexts of the Renaissance book and applies a digital humanities approach to its study, focusing on books printed in Western Europe between 1500 and 1700. Through a close examination of early and rare books, students explore three major areas in Renaissance intellectual history: 1) humanist rhetoric, politics, and literature, 2) Reformation studies, and 3) natural history, science, and medicine. Regular guest lectures sponsored by the Centre for Reformation and Renaissance Studies will introduce students to scholars from beyond the UofT; the course also involves experiential learning with digital exhibitions and rare books.

**Prerequisite:** 10.0 FCE’s

**Exclusion:** VIC449H1 (Advanced Seminar in the Renaissance: Exhibiting the Renaissance Book), offered in Winter 2018 and Winter 2019

**Recommended Preparation:** VIC240Y1, or another course in Renaissance Studies

**Distribution Requirements:** Humanities

**Breadth Requirements:** Society and its Institutions (3)

VIC449H1 - Advanced Seminar in the Renaissance

**Hours:** 12P/24S

An in-depth study in an aspect of the Renaissance based around lectures, seminars, and readings. Content in any given year depends on the instructor.

**Recommended Preparation:** VIC240Y1, or another course in Renaissance Studies.

**Distribution Requirements:** Humanities
VIC449Y1 - Advanced Seminar in the Renaissance

Hours: 24P/48S

An in-depth study in an aspect of the Renaissance based around lectures, seminars, and readings. Content in any given year depends on the instructor.

Recommended Preparation: VIC240Y1, or another course in Renaissance Studies.

Distribution Requirements: Humanities

VIC492H1 - Renaissance Studies Independent Study

This course provides an opportunity to design an interdisciplinary course of study, not otherwise available within the Faculty, with the intent of addressing specific topics in Renaissance studies. Written application (detailed proposal, reading list and a letter of support from a Victoria College faculty member who is prepared to supervise) must be submitted for approval on behalf of Victoria College. For application procedures visit the Victoria College website. Not eligible for CR/NCR option.

Prerequisite: A minimum CGPA of 3.0 and have completed 15 FCE and permission of College Program Director.

Distribution Requirements: Humanities

VIC492Y1 - Renaissance Studies Independent Study

This course provides an opportunity to design an interdisciplinary course of study, not otherwise available within the Faculty, with the intent of addressing specific topics in Renaissance studies. Written application (detailed proposal, reading list and a letter of support from a Victoria College faculty member who is prepared to supervise) must be submitted for approval on behalf of Victoria College. Not eligible for CR/NCR option.

Prerequisite: A minimum CGPA of 3.0 and have completed 15 FCE and permission of College Program Director.

Distribution Requirements: Humanities

Science and Society

IVP210H1 - Holography for 3D Visualization

Hours: 24L/36P

An introduction to the theory and practice of holography. Human perception & 3D visualization; fundamentals of 3D modeling; ray and wave optics; interference, diffraction, coherence; transmission and reflection holograms; colour perception; stereograms. Applications of holography in art, medicine, and technology. Computer simulation, design, and construction of holograms.

Exclusion: JOP210H1

Distribution Requirements: Science

Breadth Requirements: The Physical and Mathematical Universes (5)

VIC206H1 - Psychology and Society

Hours: 24S

This course explores central developments and ongoing controversies in the scientific study of the human mind, brain and behaviour. It examines topics such as: psychoanalysis, behaviourism, humanistic psychology, evolutionary psychology, intelligence testing, and feminist perspectives. Goals include understanding the historical evolution and social relevance of scientific psychology.

Exclusion: VIC106H1

Distribution Requirements: Humanities; Social Science

Breadth Requirements: Thought, Belief and Behaviour (2)

VIC207H1 - Evolution, Genetics, and Behaviour

Hours: 24S

In this course we examine major episodes in the history of evolution and genetics in the twentieth century. Topics include Darwinian evolution, sociobiology and evolutionary psychology, eugenics, and genetic screening and therapy. We will examine different views about the control of evolution and genetic manipulation in their socio-cultural-economic context and discuss the ethical and social implications of those views.

Exclusion: VIC107H1

Distribution Requirements: Humanities; Social Science

Breadth Requirements: Thought, Belief and Behaviour (2)
VIC242H1 - Scientific Worldviews of the Renaissance

Hours: 24L

An in-depth study of late medieval and early modern scientific worldviews, with a focus on interconnections between natural philosophy, cosmology, theology, astronomy, optics, medicine, natural history, and ethics. Through a consideration of early modern ideas including free will and determinism, the finite and infinite universe, teleology and mechanism, theism and deism, and deduction and intuition, this course investigates some of the period’s key metaphysical and methodological assumptions, and reveals how an evolving scientific understanding informed the Renaissance worldview.

Exclusion: HPS309H1
Recommended Preparation: 4.0 FCE
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

VIC245H1 - Science Wars: Society and the Limits of Scientific Knowledge

Hours: 24L

An introduction to competing conceptions of scientific knowledge and the role of sociocultural factors in shaping scientific methods, theories, and evidence. Can science provide objective knowledge of the external mind-independent world, or are the empirical aspirations of science limited by the social, cultural, economic, political, and religious contexts that shape “science” itself? Can scientific knowledge reach certainty? How do sociocultural factors affect the process of theory acceptance? This course considers “science” as an epistemological battleground from 17th century debates on inductive reasoning to contemporary arguments about “alternative” science.

Breadth Requirements: Thought, Belief and Behaviour (2)

VIC278H1 - Modelling Evil and Disease

Hours: 24S

Models frame our understanding and treatment of illness and are the most fundamental element of the scientific method. Theology, history, and literature may use models in different ways than natural and medical sciences but fundamentally all modelling is an attempt to accurately predict and manipulate the future.

Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

VIC377H1 - Special Topics in Science and Society

Hours: 24S

In-depth study of a topic related to science and society. Content varies with instructor. Please see the Victoria College website for current offerings.

Prerequisite: Students must have completed a minimum of 9.0 FCE
Recommended Preparation: 0.5 FCE in Science and Society
Distribution Requirements: Social Science; Science
Breadth Requirements: Thought, Belief and Behaviour (2)

Semiotics and Communication Studies

VIC223Y1 - Signs, Meanings, and Culture

Hours: 48L/24T

This course will introduce the main elements of semiotic theory, applying it to the study of human culture, from language, myth, and art to popular forms of culture such as pop music and cinema. It will deal with primary texts in the development of semiotics, and cover a broad range of cultural applications of semiotic theory.

Distribution Requirements: Social Science
Breadth Requirements: Thought, Belief and Behaviour (2)
VIC320H1 - Semiotics of Visual Art

Previous Course Number: VIC320Y1
Hours: 24L

Theories and models of applied semiotics: analysis of sign systems as articulated in various forms of artistic and cultural production.

Prerequisite: VIC220Y1/VIC223Y1
Exclusion: VIC320Y1
Distribution Requirements: Social Science
Breadth Requirements: Creative and Cultural Representations (1)

VIC322H1 - Topics in Semiotics

Hours: 24S

An in-depth examination of some aspect of semiotic theory or practice. Content in any given year depends on instructor. Not offered every year.

Prerequisite: VIC220Y1/VIC223Y1
Distribution Requirements: Social Science
Breadth Requirements: Creative and Cultural Representations (1)

VIC323Y1 - Theories of the Sign

Hours: 48L/24T

Theories of signification studied with a focus on major works in the semiotics of modern and contemporary culture.

Prerequisite: VIC220Y1/VIC223Y1
Distribution Requirements: Social Science
Breadth Requirements: Creative and Cultural Representations (1)

VIC324H1 - Introduction to Forensic Semiotics

Hours: 24L

This course will introduce the field of forensic semiotics, which is new and in the process of being developed within the general field of semiotics. The course will look at the usage of semiotic notions, methods, and techniques in the area of forensic science. This includes the analysis of facial expression, sign-based clues left at crime scenes, body language, the symbolism of tattoos in gang behaviour, the role of ritual and slang in criminal gangs and in organized crime syndicates, and the analysis of conversations and written materials produced by criminals and their meanings. Experts in the field (from the judiciary, police, and other areas) will be invited to give guest lectures.

Prerequisite: VIC220Y1/VIC223Y1
Distribution Requirements: Social Science
Breadth Requirements: Creative and Cultural Representations (1)

VIC325H1 - Media Semiotics

Hours: 24L

This course will deal with media semiotics, both in the traditional sense of the study of meanings in all media (from print to digital) and in how new digital media are changing the nature of signification and communication. The course will look at the usage of semiotics to study how meaning is negotiated in interactive media versus the older and still extant one-way media (print and radio, for example). The course will utilize actual media materials (comic books, television programs, text messages, and so on) on which semiotic analysis can be conducted.

Prerequisite: VIC220Y1/VIC223Y1
Distribution Requirements: Social Science
Breadth Requirements: Creative and Cultural Representations (1)
VIC435H1 - Capstone Seminar: Community-Engaged Research

Hours: 12L/78P

This course provides students with an experiential learning opportunity in community-engaged research combined with critical reflection and academic discussion within a seminar setting. Through a placement in social enterprise organizations, students develop research-based approaches to support their organization in assessing needs, impact, and resources. Alongside this hands-on experience, interdisciplinary seminar discussions will help students understand how research methodologies, standards, and protocols are deployed in community settings. Not eligible for CR/NCR.

Prerequisite: Application required. Not eligible for CR/NCR.
Exclusion: NEW497Y1/NEW498H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

VIC451H1 - Capstone: Learning Communities and Higher Education

Hours: 24S

This course examines higher education in Canada using Victoria University and Victoria's affiliates as a case study. Topics covered include learning communities, mentoring, experiential learning, and international contexts of education. Students gain practical mentorship experience through placement in first-year Victoria College courses. Not eligible for CR/NCR.

Prerequisite: Students must have a minimum CGPA of 3.0 and 15 completed FCE. Application required.
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

VIC476H1 - Capstone Seminar in Foreign Policy

The seminar involves a critical assessment of current foreign policy issues and contemporary world problems. Issues and case studies to be analyzed include: 1. International military interventions to respond to imminent threats or humanitarian crises, issues of legitimacy and effectiveness. e.g., Iraq, Afghanistan, Kosovo, Haiti. 2. Canada-US relations in international crisis management, the track record and the way ahead. 3. Globalization, international terrorism, and their effects on sovereignty, diplomacy and international institutions.

Prerequisite: Completion of 15 FCE, and VIC181H or permission of the instructor. Application required.
Exclusion: POL470Y1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

VIC490H1 - Victoria College Independent Studies

These courses provide an opportunity to design an interdisciplinary course of study not otherwise available within the Faculty. Written application (detailed proposal, reading list and a letter of support from a Victoria College faculty member who is prepared to supervise) must be submitted for approval on behalf of Victoria College. For application procedures visit the Victoria College website. Not eligible for CR/NCR option.

Prerequisite: A minimum CGPA of 3.0 and have completed 15 FCE and permission of College Program Director.
Distribution Requirements: Social Science
VIC490Y1 - Victoria College Independent Studies

These courses provide an opportunity to design an interdisciplinary course of study not otherwise available within the Faculty. Written application (detailed proposal, reading list and a letter of support from a Victoria College faculty member who is prepared to supervise) must be submitted for approval on behalf of Victoria College. For application procedures visit the Victoria College website. Not eligible for CR/NCR option.

**Prerequisite:** A minimum CGPA of 3.0 and have completed 15 FCE and permission of College Program Director.

**Distribution Requirements:** Social Science

VIC491H1 - Victoria College Independent Studies

These courses provide an opportunity to design an interdisciplinary course of study not otherwise available within the Faculty. Written application (detailed proposal, reading list and a letter of support from a Victoria College faculty member who is prepared to supervise) must be submitted for approval on behalf of Victoria College. For application procedures visit the Victoria College website. Not eligible for CR/NCR option.

**Prerequisite:** A minimum CGPA of 3.0 and have completed 15 FCE and permission of College Program Director.

**Distribution Requirements:** Humanities; Science; Social Science

VIC491Y1 - Victoria College Independent Studies

These courses provide an opportunity to design an interdisciplinary course of study not otherwise available within the Faculty. Written application (detailed proposal, reading list and a letter of support from a Victoria College faculty member who is prepared to supervise) must be submitted for approval on behalf of Victoria College. For application procedures visit the Victoria College website. Not eligible for CR/NCR option.

**Prerequisite:** A minimum CGPA of 3.0 and have completed 15 FCE and permission of College Program Director.

**Distribution Requirements:** Humanities

VIC493H1 - Vic Capstone Research Colloquium

**Hours:** 24S

This seminar provides work-in-progress support for students pursuing full-year or half-year Individual Studies projects. In an interdisciplinary seminar, students receive training and practice in project design, professional skills, and effective communication in a variety of fields and contexts. Not eligible for CR/NCR option.

**Prerequisite:** Students must have a minimum CGPA of 3.0 and 15 completed FCE. Application required.

**Corequisite:** Registration in an Independent / Individual Studies or Senior Essay course

**Exclusion:** POL499Y1; RLG404H1/RLG405H1; UNI460H1; thesis seminars in other programs

**Distribution Requirements:** Humanities; Science; Social Science

**Other Vic Seminars**

VIC259H1 - Special Topics Seminar

**Hours:** 24S

Topics vary from year to year depending on the instructor.

**Prerequisite:** Students must have completed a minimum of 5 FCE

**Distribution Requirements:** Humanities; Science; Social Science

VIC259Y1 - Special Topics Seminar

**Hours:** 48S

Topics vary from year to year depending on the instructor.

**Prerequisite:** Students must have completed a minimum of 5 FCE

**Distribution Requirements:** Humanities; Science; Social Science

VIC296H1 - Internship Opportunity

A practical or experiential learning opportunity under the supervision of a faculty member.

**Prerequisite:** Completion of 5 FCE

**Distribution Requirements:** Humanities; Social Science
VIC296Y1 - Internship Opportunity

A practical or experiential learning opportunity under the supervision of a faculty member.

**Prerequisite:** Completion of 5 FCE
**Distribution Requirements:** Humanities; Social Science

VIC299Y1 - Research Opportunity Program

Credit course for supervised participation in faculty research project. Details at https://www.artsci.utoronto.ca/current/academics/research-opportunities/research-opportunities-program. Not eligible for CR/NCR option.

**Distribution Requirements:** Humanities

VIC359H1 - Special Topics Seminar

**Hours:** 24S

An upper level course. Topics vary from year to year depending on the instructor.

**Prerequisite:** Students must have completed a minimum of 10 FCE
**Distribution Requirements:** Humanities; Science; Social Science

VIC359Y1 - Special Topics Seminar

**Hours:** 48S

An upper level course. Topics vary from year to year depending on the instructor.

**Prerequisite:** Students must have completed a minimum of 10 FCE
**Distribution Requirements:** Humanities; Science; Social Science

VIC390H1 - Victoria College Independent Studies

These courses provide an opportunity to design an interdisciplinary course of study not otherwise available within the Faculty. Written application (detailed proposal, reading list and a letter of support from a Victoria College faculty member who is prepared to supervise) must be submitted for approval on behalf of Victoria College. For application procedures visit the Victoria College website. Not eligible for CR/NCR option.

**Prerequisite:** A minimum CGPA of 3.0 and have completed 10 FCE and permission of College Program Director.
**Distribution Requirements:** Humanities

VIC391H1 - Victoria College Independent Studies

These courses provide an opportunity to design an interdisciplinary course of study not otherwise available within the Faculty. Written application (detailed proposal, reading list and a letter of support from a Victoria College faculty member who is prepared to supervise) must be submitted for approval on behalf of Victoria College. For application procedures visit the Victoria College website. Not eligible for CR/NCR option.

**Prerequisite:** A minimum CGPA of 3.0 and have completed 10 FCE and permission of College Program Director.
**Distribution Requirements:** Humanities

VIC391Y1 - Victoria College Independent Studies

These courses provide an opportunity to design an interdisciplinary course of study not otherwise available within the Faculty. Written application (detailed proposal, reading list and a letter of support from a Victoria College faculty member who is prepared to supervise) must be submitted for approval on behalf of Victoria College. For application procedures visit the Victoria College website. Not eligible for CR/NCR option.

**Prerequisite:** A minimum CGPA of 3.0 and have completed 10 FCE and permission of College Program Director.
**Distribution Requirements:** Humanities

VIC397H0 - International Study

Course content, travel destination, etc., will depend on the instructor. Topics will vary from year to year. Course not offered every year. Not eligible for CR/NCR option.

**Prerequisite:** Completion of 9.0 FCE
**Distribution Requirements:** Humanities; Social Science
VIC399Y1 - Research Opportunity Program

Credit course for supervised participation in faculty research project. Details at https://www.artsci.utoronto.ca/current/academics/research-opportunities/research-opportunities-program. Not eligible for CR/NCR option.

VIC459H1 - Special Topics Seminar

Hours: 24S

Topics vary from year to year.

Prerequisite: Completion of 15.0 FCE
Distribution Requirements: Humanities; Science; Social Science
Breadth Requirements: Creative and Cultural Representations (1)

VIC459Y1 - Special Topics Seminar

Hours: 48S

Topics vary from year to year.

Prerequisite: Completion of 15.0 FCE
Distribution Requirements: Humanities; Science; Social Science
Breadth Requirements: Creative and Cultural Representations (1); Thought, Belief and Behaviour (2)
Women and Gender Studies

Faculty List

Professors Emerita
M.J. Alexander, BSW, MA, PhD
K. Armatage, BA, MA, PhD
K.P. Morgan, BA, MA, MEd, PhD

Professors
M. Murphy, BA, PhD
K. Rittich, Mus Bac, LLM, SJD
A. Trotz, BA, MPhil, PhD
L. Yoneyama, BA, MA, PhD

Associate Professors
D. Georgis, BA, MA, PhD
M. Lo, BA, MA, MSc, PhD
B. McElhinny, BA, Ph D
V. Tahmasebi-Birgani, BA, MA, PhD (UTM)
J. Taylor, BA, MA, PhD

Associate Professor, Teaching Stream
J. Larkin, BA, MEd, PhD

Assistant Professors
N. Charles, BA, MA, PhD (UTM)
R. Diaz, BA, MPhil, PhD
J. Ellapen, BA, MA, MA, PhD (UTM)
W.C. Johnson, AB, MA, MFA, PhD
C. Lord BA, MA, PhD (UTM)
K. Recollet, BA, MA, PhD
S. Sweeney, BA, MA, PhD
S. Trimble, BA, MA, PhD
S. Ye, BA, MA, PHD (UTSC)

Introduction

For nearly five decades, we have trained students to think deeply about how gender and sexuality operate at individual, interpersonal, institutional and global levels. We are an interdisciplinary program with faculty expertise across a range of fields, including history and literature, sociology and law, cultural studies and queer theory, and African, Caribbean, Middle Eastern, East Asian, and Equity studies. We enable students to answer urgent and complex questions, such as how militarization can constrict men’s aspirations for their lives, why pay gaps exist, how sexual expression is scripted and can be re-scripted, and even what Lizzo might have in common with Shakespeare. In addition to training students to analyze a music video, a novel, and a government report with equal care and skill, we also focus attention on matters of scale: when to aggregate and when to parse significant distinctions; how to think comparatively across space and time.

The Women & Gender Studies Institute (WGSI) at the University of Toronto is distinctive for its transnational approach. We critically address how national borders and nationalist discourses frame constructions of gender, race, class, indigeneity, sexuality, ability, and other important differences. We study the effects of migration, diaspora, and displacement on experiences of home and heritage, family, desire, and selfhood. We provide students the conceptual tools to connect processes of imperialism and globalization with emergent economies and forms of labour and consumption. Finally, we encourage students to reflect on the varied histories of feminism when framing their own activisms in the present.

Our graduates go on to do innovative work in the public service, creative, and corporate sectors, and some enter the academy. They become everything from documentary filmmakers to grassroots activists to policy analysts in economic development agencies and professors in leading universities. All of them draw on the critical lenses they develop in this program, becoming part of a rich community of graduates who maintain their connections with one another, and who come back to the diverse classrooms where they once were students to share their experiences.

Undergraduate Coordinator: Prof. S. Trimble, New College, Room 2013 (416-946-0288).

Undergraduate Administrator: Marian Reed, New College, Room 2036 (416-978-3668).

Women and Gender Studies Programs

Women and Gender Studies Specialist Program (Arts Program) - ASSPE0571

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

(10.0 credits, including at least 5.0 credits at the 300+ level and at least 1.0 credit WGS course at the 400-level)

1. WGS160Y1 (normally taken in first year)
2. WGS260H1
3. WGS360H1
4. WGS460Y1 and 1.0 credit at the 400-level
5. 4.0 credits from the core group below
6. 2.0 credits from Group A or B

Women and Gender Studies Major Program (Arts Program) - ASMAJ0571

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.
Completion Requirements:

(7.0 credits, including at least 3.0 credits at the 300+ level and at least a 0.5 credit WGS course at the 400-level)

1. WGS160Y1 (normally taken in first year)
2. WGS260H1
3. WGS360H1
4. 3.0 credits from the core group below
5. 2.0 credits from group A or B

Women and Gender Studies Minor Program (Arts Program) - A$MIN0571

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

1. WGS160Y1 or WGS271Y1.
2. An additional 3.0 credits from the WGS core group or group A. 1.0 of these credits must be WGS courses at the 3rd or 4th-year level.

Course Groups

Core Group

- WGS160Y1 Introduction to Women and Gender Studies
- WGS260H1 Texts, Theories, Histories (formerly WGS252H1/WGS252Y1)
- WGS271Y1 Gender in Popular Culture
- WGS273H1 Gender & Environmental Injustice
- WGS275H1 Men and Masculinities
- WGS280H1 Special Topics in Women and Gender Studies
- WGS311H1 Special Topic in Women and Gender Studies
- WGS332H1 Special Topic in Women and Gender Studies
- WGS333H1 Special Topic in Women and Gender Studies
- WGS334H1 Special Topic in Women and Gender Studies
- WGS335H1 Special Topic in Women and Gender Studies
- WGS336H1 Selected Topics in Cultural Studies
- WGS340H1 Women and Revolution in the Middle East
- WGS350H1 (no longer offered)
- WGS355H1 Gendered Labour Around the World
- WGS360H1 Making Knowledge in a World that Matters
- WGS362H1 Selected Topics in Gender and History
- WGS363H1 Selected Topics in Gender and Theory
- WGS365H1 Gender Issues in the Law
- WGS367H1 The Politics of Gender and Health
- WGS369H1 Studies in Post-Colonialism
- WGS370H1 Utopian Visions, Activist Realities
- WGS372H1 Women and Psychology/ Psychoanalysis
- WGS373H1 Gender and Violence
- WGS374H1 Feminist Studies in Sexuality
- WGS376H1 Studies in Queer and Trans (formerly WGS272H1/WGS272Y1)
- WGS380H1 Feminist Graphic Novels
- WGS385H1 Gender and Neoliberalism
- WGS386H1 Gender and Critical Political Economy
- WGS390H1 Land-ing: Indigenous and Black Futurist Spaces
- WGS395H1 Indigeneity(s), hub spaces and decolonization
- WGS396H1 Writing the Body
- WGS397H1 The Politics of Girlhood
- WGS420H1 Asian/North American Feminist Issues
- WGS426H1 Gender and Globalization: Transnational Perspectives
- WGS434H1 Advanced Topics in Women and Gender Studies
- WGS435H1 Advanced Topics in Women and Gender Studies
- WGS440H1 Decolonial Cyborgs for Planetary Futures
- WGS442H1 Toxic Worlds, Decolonial Futures
- WGS450H1 Modernity, Freedom, Citizenship: Gender and the Black Diaspora
- WGS451H1 Independent Study in Women and Gender Studies Issues
- WGS460Y1 Honours Seminar
- WGS461Y1 Advanced Topics in Women and Gender Studies
- WGS462H1 Advanced Topics in Gender and History
- WGS463H1 Advanced Topics in Gender Theory
- WGS465H1 Special Topics in Gender and the Law
- WGS470Y1 Community Engagement
- WGS480H1 Challenging Coloniality: Caribbean Sexualities in Transnational Perspective
- WGS481H1 Gender, Sexuality and Black Liberation from Black Power to #BlackLivesMatter
- WGS482H1 Translating Sexuality: Queer Migration, Queer Diasporas
- WGS483H1 Transnational Indigenous Literatures
- WGS484H1 Contemporary French Women's Prose Fiction
- GGR327H1 Geography and Gender
- GGR320H1 Geographies of Transnationalism, Migration, and Gender
- GGR327H1 Geography and Gender
- HIS202H1 Gender, Race and Science
- HIS205H1 Topics in Women's History
- HIS297Y1 History of Africa from a Gender Perspective
- HIS306H1 Islam and Muslims in the Balkans
- HIS348H1 Topics in Gender History
- HIS351H1 Men, Gender and Power in Europe from the Renaissance to the French Revolution
- HIS363H1 Dynamics of Gender in Canadian History
- HIS383Y1 Women in African History
- HIS406H1 Advanced Topics in Gender History
- HIS446H1 Gender and Slavery in the Atlantic World
- HIS448H1

Group A

- ANT343H1 Social Anthropology of Gender
- ANT456H1 Queer Ethnography
- ANT460H1 Global Perspectives on Women's Health
- CDN335H1 Black Canadian Studies
- CLA219H1 Women in Antiquity
- CLA319H1 Sexuality and Gender in Classical Literature
- ENG273Y1 Queer Writing
- ENG355Y1 Transnational Indigenous Literatures
- FRE304H1 Contemporary French Women's Prose Fiction
- GGR320H1 Geographies of Transnationalism, Migration, and Gender
- GGR327H1 Geography and Gender
- HIS202H1 Gender, Race and Science
- HIS205H1 Topics in Women's History
- HIS297Y1 History of Africa from a Gender Perspective
- HIS306H1 Islam and Muslims in the Balkans
- HIS348H1 Topics in Gender History
- HIS351H1 Men, Gender and Power in Europe from the Renaissance to the French Revolution
- HIS363H1 Dynamics of Gender in Canadian History
- HIS383Y1 Women in African History
- HIS406H1 Advanced Topics in Gender History
- HIS446H1 Gender and Slavery in the Atlantic World
- HIS448H1
Women and Gender Studies Courses

WGS160Y1 - Introduction to Women and Gender Studies

Hours: 48L/24T

An integrated and historical approach to social relations of gender, race, class, sexuality and disability, particularly as they relate to women's lives and struggles across different locales, including Canada.

Distribution Requirements: Humanities; Social Science
Breadth Requirements: Creative and Cultural Representations (1); Thought, Belief and Behaviour (2)

WGS260H1 - Texts, Theories, Histories (formerly WGS262H1/WGS262Y1)

Hours: 24L/12T

Examines modes of theories that shaped feminist thought and situates them historically and transnationally so as to emphasize the social conditions and conflicts in which ideas and politics arise, change and circulate.

Exclusion: WGS262H1/WGS262Y1
Recommended Preparation: WGS160Y1
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

WGS271Y1 - Gender in Popular Culture

Hours: 48L

A critical examination of institutions, representations and practices associated with contemporary popular culture, mass-produced, local and alternative.

Exclusion: WGS271H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

WGS273H1 - Gender & Environmental (In)Justice

Previous Course Number: WGS273Y1
Hours: 48L/24T

Using a transnational, feminist framework, this course examines material and conceptual interrelations between gendered human and non-human nature, ecological crises, political economies and environmental movements in a variety of geographical, historical and cultural contexts. Does environmental justice include social justice, or are they in conflict? What might environmental justice and activism involve?

Exclusion: WGS273Y1
Distribution Requirements: Humanities; Social Science
Breadth Requirements: Society and its Institutions (3)

WGS275H1 - Men and Masculinities

Hours: 24L/12T

Examines how masculinities shape the lives of men, women, transgender people. Effects of construction, reproduction and impact of masculinities on institutions such as education, work, religion, sports, family, medicine, military and the media are explored. Provides critical analysis of how masculinities shape individual lives, groups, organizations and social movements.

Recommended Preparation: WGS160Y1
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

WGS280H1 - Special Topics in Women and Gender Studies

Hours: 24L

Subjects will vary from year to year.

Distribution Requirements: Humanities; Social Science
Breadth Requirements: Thought, Belief and Behaviour (2)

WGS281H1 - Special Topics in Women and Gender Studies

Hours: 24L

Subjects vary from year to year.

Distribution Requirements: Humanities; Social Science
Breadth Requirements: Thought, Belief and Behaviour (2)
WGS331H1 - Special Topic in Women and Gender Studies

Hours: 24L

An upper level seminar. Subjects of study vary from year to year.

Recommended Preparation: WGS160Y1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

WGS332H1 - Special Topic in Women and Gender Studies

Hours: 24L

An upper level seminar. Subjects of study vary from year to year.

Recommended Preparation: WGS160Y1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

WGS333H1 - Special Topic in Women and Gender Studies

Hours: 24L

An upper level seminar. Subjects of study vary from year to year.

Recommended Preparation: WGS160Y1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

WGS340H1 - Women and Revolution in the Middle East

Hours: 24L

This course examines the complex and conflictual relations between women and revolutionary struggles and focuses on a number of theoretical and empirical issues relevant to the Middle East and North Africa context.

Exclusion: WGS335H1 Women and Revolution in the Middle East
Recommended Preparation: WGS160Y1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

WGS335H1 - Special Topic in Women and Gender Studies

An upper level seminar. Subjects of study vary from year to year.

Recommended Preparation: WGS160Y1
Distribution Requirements: Humanities

WGS336H1 - Selected Topics in Cultural Studies

Hours: 24L

An upper level course. Topics vary from year to year. Please consult the Women & Gender Studies Institute's website for more information.

Recommended Preparation: WGS160Y1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

WGS340H1 - Women and Revolution in the Middle East

Hours: 24L

This course examines the complex and conflictual relations between women and revolutionary struggles and focuses on a number of theoretical and empirical issues relevant to the Middle East and North Africa context.

Exclusion: WGS335H1 Women and Revolution in the Middle East
Recommended Preparation: WGS160Y1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

WGS355H1 - Gendered Labour Around the World

Hours: 24L

This course will focus on masculinities and femininities in workplace settings, with an emphasis on service work around the world. We will discuss workers' lived experiences of gender regimes which are embedded within the dynamics of class, race and nation. The relationships between gender processes and workplace hierarchies will be explored.

Exclusion: WGS363H1 Gendered Labour Around the World
Recommended Preparation: WGS160Y1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)
WGS360H1 - Making Knowledge in a World that Matters

Hours: 24L/12T

Teaches skills in feminist approaches to making knowledge. Introduces feminist practices for doing research and navigating the politics of production and exchange. Develops skills for conveying knowledge to the wider world, such as through research papers, reports, performance, new media, art.

Prerequisite: WGS160Y1
Distribution Requirements: Humanities; Social Science
Breadth Requirements: Creative and Cultural Representatives (1)

WGS362H1 - Selected Topics in Gender and History

Hours: 24S

An upper level seminar. Subjects of study vary from year to year.

Recommended Preparation: WGS160Y1
Distribution Requirements: Humanities

WGS363H1 - Selected Topics in Gender and Theory

Hours: 24S

An upper level seminar. Subjects of study vary from year to year.

Recommended Preparation: WGS160Y1
Distribution Requirements: Humanities

WGS365H1 - Gender Issues in the Law

Hours: 24L

Examines the operation of the law as it affects women, the construction and representation of women within the legal system, and the scope for feminist and intersectional analyses of law. Includes an analysis of specific legal issues such as sexuality and reproduction, equality, employment, violence and immigration.

Recommended Preparation: WGS160Y1
Distribution Requirements: Humanities; Social Science
Breadth Requirements: Society and its Institutions (3)

WGS367H1 - The Politics of Gender and Health

Hours: 24L/12T

Examines diverse traditions and normative models of health (e.g. biomedicine, social constructionist, indigenous health) in conjunction with analyses of the origin, politics, and theoretical perspectives of contemporary Women's Health Movements. Topics may include fertility, sexuality, poverty, violence, labour, ageing, (dis)ability, and health care provision.

Recommended Preparation: WGS160Y1
Distribution Requirements: Humanities; Social Science
Breadth Requirements: Society and its Institutions (3)

WGS369H1 - Studies in Post-Colonialism

Previous Course Number: NEW369H1
Hours: 24L

Examines gendered representations of race, ethnicity, class, sexuality and disability in a variety of colonial, neo-colonial, and post-colonial contexts. Topics may include the emergence of racialist, feminist, liberatory and neoconservative discourses as inscribed in literary texts, historical documents, cultural artifacts and mass media.

Exclusion: NEW369H1
Recommended Preparation: WGS160Y1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representatives (1)

WGS370H1 - Utopian Visions, Activist Realities

Hours: 24L

Drawing on diversely situated case-studies, this course focuses on the ideals that inform struggles for social justice, and the mechanisms activists have employed to produce the change. Foci include the gendered implications of movement participation, local and transnational coalition, alternative community formation, and encounters with the state and inter/supra/transnational organizations.

Recommended Preparation: WGS160Y1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)
WGS372H1 - Women and Psychology/ Psychoanalysis

Hours: 24L

An interdisciplinary analysis of the relationship of women to a variety of psychological and psychoanalytical theories and practices. Topics may include women and the psychological establishment; women's mental health issues; feminist approaches to psychoanalysis.

Recommended Preparation: WGS160Y1
Distribution Requirements: Humanities; Social Science
Breadth Requirements: Thought, Belief and Behaviour (2)

WGS376H1 - Studies in Queer and Trans (formerly WGS272H1/WGS272Y1)

Hours: 24L

Takes up conversations in queer and trans studies as separate and entangled fields. It explores how queer and trans people have experienced and theorized gender and sexuality.

Exclusion: WGS272H1/WGS272Y1
Recommended Preparation: WGS160Y1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

WGS373H1 - Gender and Violence

Hours: 24L

An interdisciplinary study of gendered violence in both historical and contemporary contexts including topics such as textual and visual representations; legal and theoretical analyses; structural violence; war and militarization; sexual violence; and resistance and community mobilization.

Recommended Preparation: WGS160Y1; WGS350H1
Distribution Requirements: Humanities; Social Science
Breadth Requirements: Society and its Institutions (3)

WGS377H1 - Feminist Graphic Novels

Hours: 24L

Comics aren't new, and graphic novels aren't either, but feminists have built a rich array of stories about consciousness, resistance, and coming of age in this genre that warrant scholarly attention. In this case, we will read graphic novels for their subtleties, thinking about what picture and text make possible in the exploration of emotion, interconnection, and identity. Reading about resistance to marriage in Ay of Yop City, a child's view of revolution in Perspolis, parent child reckoning in Fun Home, and loneliness in Skim will advance students' understandings of the of the power of narrative and the pictorial displacement of innocence.

Recommended Preparation: WGS160Y1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

WGS374H1 - Feminist Studies in Sexuality

Hours: 24L

Sexual agency as understood and enacted by women in diverse cultural and historical contexts. An exploration of the ways in which women have theorized and experienced sexual expectations, practices and identities. This course will be offered every three years.

Recommended Preparation: WGS160Y1; WGS271Y1
Distribution Requirements: Humanities; Social Science
Breadth Requirements: Thought, Belief and Behaviour (2)

WGS378H1 - Black Britain: Race, Gender and Entangled Diasporas

Hours: 24L

An exploration of Black British history and culture, with a particular focus on labour, overlapping migrations, and racial formations following World War II. Topics and themes may include Afro-Asian-Arab politics and transnational solidarities against empire; citizenship and (non)belonging; mobilizations against fascism and state violence; the Black Women's Movement and Black British Feminisms; the emergence and interventions of Cultural Studies; the Caribbean Artists Movement and Black British cultural productions more generally.

Recommended Preparation: WGS160Y1 and completion of at least 4.0 FCE
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)
WGS382H1 - Decolonial Aesthetics and Indigenous Futurities

Hours: 24L

Students are invited to think through the relationships between Indigenous and Afro-futurist concepts and land. This class will engage indigenous feminist and emergent indigenous queer theories to Indigenous and Afro-futurist thought. We explore various 'texts' relating to theoretical concepts and methodologies emerging from Indigenous decolonial work towards land and futures.

Exclusion: WGS335H1 (Special Topic in Women and Gender Studies: Decolonial Aesthetics and Futurities), offered in Winter 2018 and Winter 2019
Recommended Preparation: WGS160Y1 and completion of at least 4.0 FCE
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

WGS385H1 - Gender and Neoliberalism

Hours: 24L

Reviews major feminist transnational, Marxist and Foucaultian approaches to the study of neoliberalism. Adopts a comparative, historical and global approach to the ways that gender is implicated in state restructuring, changing roles for corporations and non-governmental organizations, changing norms for personhood, sovereignty and citizenship, and changing ideas about time/space.

Recommended Preparation: WGS160Y1
Distribution Requirements: Humanities; Social Science
Breadth Requirements: Society and its Institutions (3)

WGS386H1 - Gender and Critical Political Economy

Hours: 24L

Offers a critical analysis of political economy, its historical and contemporary contentions and the ruptures that open the space for alternative theorizing beyond orthodox and heterodox thinking, by inserting gender and intersecting issues of power, authority and economic valorization across multiple and changing spheres: domestic, market and state.

Recommended Preparation: WGS160Y1; WGS273Y1
Distribution Requirements: Humanities; Social Science
Breadth Requirements: Society and its Institutions (3)

WGS390H1 - Land-ing: Indigenous and Black Futurist Spaces

Hours: 24L

Students are invited to think through the relationships between Indigenous and Afro-futurist concepts of land. This class will engage Indigenous feminist and Black queer and feminist theories of land and space, linking them to Afrofuturist and Indigenous futurist thought. We explore various texts in relation to emergent methodologies, decolonial desires, and love and radical relationalities.

Recommended Preparation: Completion of 4.0 credits
Exclusion: WGS335H1 (Special Topic in Women and Gender Studies: Decolonial Aesthetics and Futurities), offered in Fall 2015, WGS335H1 (Special Topic in Women and Gender Studies: Indigenous Feminist Theory), offered in Winter 2018, Winter 2019 and Winter 2020
Recommended Preparation: WGS160Y1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

WGS396H1 - Writing the Body

Hours: 24L

Examines the ways in which bodies are lived and enscribed and represented through a variety of genres. Students will work through issues of corporeality and materiality in the production and reception of texts and will practice embodied writing on a personal level through in-class workshops and written assignments.

Recommended Preparation: WGS332H1: Writing the Body
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

WGS397H1 - The Politics of Girlhood

Hours: 24L

The course communicates the growing field of "girl studies" and provides a critical exploration of the historical, social, psychological and political definitions attached to girlhood. We will move toward a feminist understanding of how definitions of girl-child shape individual experience, historical narratives, cultural representations, political agendas and futures.

Recommended Preparation: WGS160Y1
Distribution Requirements: Humanities; Social Science
Breadth Requirements: Thought, Belief and Behaviour (2)
WGS420H1 - Asian/North American Feminist Issues

Hours: 24L

A transpacific examination of issues that have directly and indirectly shaped the feminist and other related critical inquiries in Asia and among the Asian diasporas in Canada and the United States.

Prerequisite: WGS160Y1, one full course at the 300+ level in WGS, and one half course in WGS.

Distribution Requirements: Humanities

Breadth Requirements: Society and its Institutions (3)

WGS426H1 - Gender and Globalization: Transnational Perspectives

Critically examines current interdisciplinary scholarship on globalization, its intersections with gender, power structures, and feminized economies. Related socio-spatial reconfigurations, 'glocal' convergences, and tensions are explored, with emphasis on feminist counter-narratives and theorizing of globalization, theoretical debates on the meanings and impacts of globalization, and possibilities of resistance, agency, and change.

Prerequisite: WGS160Y1, one full course at THE 300+ level in WGS, and one half course in WGS.

Exclusion: WGS463H1, fall session 2009

Distribution Requirements: Social Science

Breadth Requirements: Society and its Institutions (3)

WGS434H1 - Advanced Topics in Women and Gender Studies

Hours: 24S

An upper level seminar. Topics vary from year to year depending on instructor. Please consult the Women & Gender Studies Institute's website for more information.

Prerequisite: WGS160Y1, one full course at THE 300+ level in WGS, and one half course in WGS.

Distribution Requirements: Humanities

WGS435H1 - Advanced Topics in Women and Gender Studies

Hours: 24S

An upper level seminar. Topics vary from year to year depending on instructor.

Prerequisite: WGS160Y1, one full course at THE 300+ level in WGS, and one half course in WGS.

Distribution Requirements: Humanities

WGS440H1 - Decolonial Cyborgs for Planetary Futures

Hours: 24L

Drawing together film, fiction, and theory this course invites students to explore ways of imagining other worlds. From afro-futurism to planetary humanism, from cyborgs to hauntings, from science fiction fantasies to the politics of aliens, the course examines and produces feminist, postcolonial, anti-racist, and queer visions of other worlds.

Prerequisite: WGS160Y1, one full course at the 300+ level in WGS, and one half course in WGS.

Distribution Requirements: Humanities

Breadth Requirements: Creative and Cultural Representations (1)

WGS442H1 - Toxic Worlds, Decolonial Futures

Hours: 24S

This course explores the ways environmental violence is an integral practice of settler colonialism that affects human and non-human life, disrupts Indigenous sovereignty, and enacts ongoing racism. A typical way of addressing environmental violence is to document the harm done to bodies and communities. This class asks, how might we also refuse environmental violence and enact better obligations to land/body relations? What kind of decolonial futures can be summoned in the aftermath of environmental violence? Our readings will bring Indigenous feminist approaches together with Black feminist, queer, and feminist environmental justice approaches. Participants will build upon the readings to create their own decolonial environmental justice future projects.

Prerequisite: WGS160Y1, one full course at the 300+ level in WGS, and one half course in WGS.

Exclusion: WGS463H1 (Advanced Topics in Gender Theory: Toxic Worlds, Decolonial Futures), offered in Winter 2018, Winter 2019 and Winter 2020

Distribution Requirements: Humanities

Breadth Requirements: Thought, Belief and Behaviour (2)
WGS450H1 - Modernity, Freedom, Citizenship: Gender and the Black Diaspora

Hours: 24L

Explores transnational feminist genealogies of the black diaspora. The course pays attention to the contexts and movements that generated key questions, exploring how these interventions disclose preoccupations with modernity, freedom and citizenship. Topics may include trauma and memory, sexual citizenship, Afrofuturism, indigeneity, and the crafting of political communities.

Prerequisite: WGS160Y1, one full course at the 300+ level in WGS, and one half course in WGS.
Exclusion: WGS434H1 Black Diasporic Feminisms: Modernity, Freedom, Citizenship
Distribution Requirements: Humanities; Social Science
Breadth Requirements: Thought, Belief and Behaviour (2)

WGS451H1 - Independent Study in Women and Gender Studies Issues

Under supervision, students pursue topics in Women and Gender Studies not currently part of the curriculum. Not eligible for CR/NCR option.

Prerequisite: Permission of the Undergraduate Coordinator, Women and Gender Studies Program.
Distribution Requirements: Humanities

WGS460Y1 - Honours Seminar

Hours: 24S

Supervised undergraduate thesis project undertaken in the final year of study. Students attend a bi-weekly seminar to discuss research strategies, analytics, methods and findings. A required course for Specialist students. Not eligible for CR/NCR option.

Prerequisite: WGS160Y1, one full course at the 300+ level in WGS, and one half course in WGS.
Distribution Requirements: Humanities; Social Science

WGS461Y1 - Advanced Topics in Women and Gender Studies

Hours: 48S

An upper level seminar. Topics vary from year to year depending on the instructor.

Prerequisite: WGS160Y1, one full course at the 300+ level in WGS, and one half course in WGS.
Distribution Requirements: Humanities

WGS462H1 - Advanced Topics in Gender and History

Hours: 24S

An upper-level seminar. Topics vary from year to year depending on instructor.

Prerequisite: WGS160Y1, one full course at the 300+ level in WGS, and one half course in WGS.
Distribution Requirements: Humanities

WGS463H1 - Advanced Topics in Gender Theory

Hours: 24S

Senior students may pursue more advanced study in feminist theory. Topics vary from year to year depending on instructor.

Prerequisite: WGS160Y1, one full course at the 300+ level in WGS, and one half course in WGS.
Distribution Requirements: Humanities

WGS465H1 - Special Topics in Gender and the Law

Hours: 24S

Senior students may pursue advanced study in gender and law. Topics vary from year to year.

Prerequisite: WGS160Y1, WGS365H1, one half course at the 300+ level in WGS, and one half course in WGS.
Distribution Requirements: Humanities; Social Science
Breadth Requirements: Society and its Institutions (3)

WGS470Y1 - Community Engagement

Hours: 48S

The application of theoretical study to practical community experience. Advanced Women and Gender Studies students have the opportunity to apply knowledge acquired in the Women and Gender Studies curriculum through a practicum placement within a community organization. Not eligible for CR/NCR option.

Prerequisite: WGS160Y1, one full course at the 300+ level in WGS, and one half course in WGS.
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)
WGS480H1 - Challenging Coloniality: Caribbean Sexualities in Transnational Perspective

Previous Course Number: WGS435H1S
Hours: 24S

This course foregrounds the Caribbean as a transnational space, where sexuality, gender, race and class are intimately connected and shaped by colonial legacies and contemporary circuits of globalization.

Prerequisite: WGS160Y1, one full course at the 300+ level in WGS, and one half course in WGS.
Exclusion: WGS435H1 (Topics: Challenging Coloniality: Caribbean Sexualities in Transnational Perspective), offered in Summer 2017
Distribution Requirements: Humanities; Social Science
Breadth Requirements: Thought, Belief and Behaviour (2)

WGS481H1 - Gender, Sexuality and Black Liberation from Black Power to #BlackLivesMatter

Previous Course Number: WGS435H1
Hours: 24S

This course maps genealogies of black insurgency and transnational itineraries of intersectional theorizing, organizing, and praxis from the 20th century to our present moment. Through close study of works by and about black revolutionary migrants, exiles, intellectuals, fugitives, and so-called terrorists, participants will critique and create radical visions for emancipation. Major topics and themes may include black feminisms; queer insurgencies; transnational imaginaries and solidarities; silence and intracommunal violence; accountability and transformative justice. Through collective discussion, writing, and reflection we interrogate visions and strategies of emancipation, and imagine radical futures historically and in our own times.

Prerequisite: WGS160Y1, one full course at the 300+ level in WGS, and one half course in WGS
Exclusion: WGS434H1 (Topics: Trans/national Sexuality), offered in Fall 2016 and Fall 2017
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

WGS482H1 - Translating Sexuality: Queer Migration, Queer Diasporas

Previous Course Number: WGS434H1
Hours: 24S

This course examines how notions of sexuality travel as people move within and beyond national borders. It investigates how queer and trans migrants pursue different versions of belonging, solidarity, survival, and hope. Participants will study transnational archives (which may include popular culture, new media, film, literature, and performance) as they trace globalization’s effects on racialized, queer, and trans communities. Major topics may include: queer of color critique; queer settler colonialism; transnational and global south sexualities; imperialism and militarism; neoliberalism and homonationalism; humanitarianism and sexual rights; queer and trans social movements; postcolonial intimacies.

Prerequisite: WGS160Y1, one full course at the 300+ level in WGS, and one half course in WGS
Exclusion: WGS434H1 (Topics: Trans/national Sexuality), offered in Fall 2016 and Fall 2017
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

Introduction

Woodsworth College is named in honour of James Shaver Woodsworth (1874-1942), minister, pacifist, social activist and Member of Parliament, who was strongly committed to broadening educational opportunities for all. The College remains faithful to its mission of promoting accessibility and equity, providing two access programs for students seeking admission to the Faculty of Arts and Science: the Millie Rotman Shime Academic Bridging Program and the Diploma to Degree Transfer Program. In addition, Woodsworth offers rewarding educational experiences through its distinctive College One programs, a selection of First-Year Foundation courses, and the Summer Abroad programs. The Minor program in Digital Humanities prepares students for future paths ranging from graduate studies in literature, history, library science, and other fields, to careers as technical writers, data analysts and visualizers, project managers, and programmers. Regardless of College affiliation, you are encouraged to explore the exceptional range of programs offered by Woodsworth College.

Woodsworth College

Woodsworth College Programs

Listed in this order:

- Digital Humanities (Minor program)
- First-Year Foundation Options
  - First-Year Seminars
  - Woodsworth One
- Summer Abroad Programs
- Access Programs
  - Millie Rotman Shime Academic Bridging Program
  - Diploma to Degree

Digital Humanities (Minor program)
Digital humanities (DH) is a discipline at the intersections of the humanities with computing. DH studies human culture -- art, literature, history, geography, religion -- through computational tools and methodologies; and, in turn, DH studies the digital through humanist lenses. Digital humanists study social media phenomena or medieval manuscript archives; computationally analyze thousands of newspaper articles to trace economic developments; construct video games to study literary narratives; or resurrect historical cities through digital maps and virtual reality exhibits.

In introductory and advanced DH courses, students learn about the intellectual landscape of digital humanities scholarship. They learn how to build digital stories, exhibits, and maps; how to digitize rare books; how to analyze collections of data; how to construct digital models and 3D-print them; and how to manage major digital projects. By the end of the program, students conduct a major DH research project of their own or participate in the research of an established faculty project. Throughout the program, students gain a critical perspective on digital technologies, learning to consider the ways digital platforms shape, and are shaped by, the currents of wider social and cultural forces. By providing this critical and technical skillset, the Digital Humanities Minor prepares students for future paths that range from graduate studies in literature, history, library science, education, or computer science, to careers as technical writers, data analysts and visualizers, project managers, or programmers.

- FYF Seminars
Woodsworth’s FYF seminars, all of which are stand-alone H courses, are designed to provide first-year students with the opportunity to work closely with an instructor and fellow students in a class of no more than 25, maximizing opportunities for class discussion and the development of essential academic skills. Each seminar focuses on specific disciplinary or interdisciplinary issues, questions or controversies of particular interest to the instructor, and introduces the students to the excitement of discovery inherent in academic research and scholarship at the University of Toronto. Wide-ranging readings and assignments encourage students to develop their ability to think critically and to express ideas and arguments clearly and coherently, both orally and in writing. Please check the timetable for Woodsworth College’s current offerings of FYF seminars.

- Woodsworth One
Woodsworth One has two interdisciplinary streams, both of which draw on a wide range of Social Sciences and Humanities perspectives. The Order and Disorder stream focuses on the role of laws, government policies, trade, war, and innovation in creating and disrupting both social and global order. The Popular Culture Today stream examines the products of the entertainment industry and the social behaviours associated with their consumption, exploring how popular culture works and what it means.

Students take two half-credit seminars – one in each term – and participate in regular co-curricular activities that build students’ sense of community within Woodsworth College and across the University of Toronto. Seminars are capped at 25 students to maximize opportunities for participation and to promote close contact with both the instructor and fellow students. The emphasis is on class discussion and problem-based learning. Students participate in role-playing games, simulations, debates and more. The co-curricular activities include field trips, film screenings, guest speakers, writing and research workshops, and test-taking seminars.
The Woodsworth One team is dedicated to supporting students’ transition to university life, and to guiding their academic planning. In addition to the Program Coordinator, course instructors, and peer mentors, the team includes the College Writing Centre, the College Learning Strategist, a dedicated Registrar, and a program administrator. Each member of the team seeks to create a strong sense of community and to set students up for academic success.

Woodsworth One is geared towards first-year students enrolled in Social Sciences and Humanities within the Faculty of Arts and Sciences. In keeping with Woodworth College’s tradition of open access, there is no incoming grade requirement. Students participating in any other One program are excluded from Woodsworth One. Please note that both streams may not be offered in a given year. For more information please check the timetable for current course options.

one.wdw@utoronto.ca
wdw.utoronto.ca/woodsworthone

Summer Abroad Programs
Students can prepare themselves for a future in the global village by participating in a Summer Abroad program and complete a University of Toronto course overseas in three to six weeks. These programs are designed to enrich students’ academic lives by providing an exciting and educational international experience. Learning is not limited to the classroom; students will observe and experience many of the things they study, including the language, history, culture, art, religion, business, and politics of the host country.

summer.abroad@utoronto.ca
https://summerabroad.utoronto.ca/

Millie Rotman Shime Academic Bridging Program
The Academic Bridging Program is designed for individuals who have been away from formal education for some time and do not meet the University’s established requirements for direct entry admission. Both part-time and full-time options are available to students interested in studies in the Humanities and Social Sciences. Those seeking admission to the Sciences must take the program’s full-time science option. Students who successfully complete the program with a grade of 63% or above are admitted to the Faculty of Arts and Science with one full credit towards their degree. Students who complete either of the program’s full-time options may transfer up to two full credits towards their degree.

416-978-4444
academic.bridging@utoronto.ca
wdw.utoronto.ca/academic-bridging

Diploma to Degree
The Diploma to Degree program is a pathway to university studies for students completing a two-year liberal arts diploma at one of our partner institutions, including George Brown College, Humber College and Seneca College. The Diploma to Degree Program is a facilitated transfer program into Woodsworth College in the Faculty of Arts and Science at the University of Toronto. The program is designed for students to transfer with up to 6 transfer credits and retained credits from courses completed at the University of Toronto.

To be eligible for transfer, students must:

- Complete the 2-year diploma with a minimum 3.0 GPA
- Receive a recommendation from their college
- Achieve a minimum grade of 60% in a qualifying course at the University of Toronto.

Woodsworth College Programs

Digital Humanities Minor (Arts Program) - ASMIN1337

Description:
Digital humanities (DH) is a discipline at the intersections of the humanities with computing. DH studies human culture -- art, literature, history, geography, religion -- through computational tools and methodologies; and, in turn, DH studies the digital through humanist lenses. Digital humanists study social media phenomena or medieval manuscript archives; computationally analyze thousands of newspaper articles to trace economic developments; construct video games to study literary narratives; or resurrect historical cities through digital maps and virtual reality exhibits.

In introductory and advanced DH courses, students learn about the intellectual landscape of digital humanities scholarship. They learn how to build digital stories, exhibits, and maps; how to digitize rare books; how to analyze collections of data; how to construct digital models and 3D-print them; and how to manage major digital projects. By the end of the program, students conduct a major DH research project of their own or participate in the research of an established faculty project. Throughout the program, students gain a critical perspective on digital technologies, learning to consider the ways digital platforms shape, and are shaped by, the currents of wider social and cultural forces.

By providing this critical and technical skillset, the Digital Humanities Minor prepares students for future paths that range from graduate studies in literature, history, library science, education, or computer science, to careers as technical writers, data analysts and visualizers, project managers, or programmers.

Students should note that some courses at the 200, 300, and 400 levels may have additional prerequisites.

Permission to count courses that are not on the list below towards the Minor in Digital Humanities must be received from the Program Coordinator, and will be granted on a case-by-case basis when the student’s work demonstrably and substantially engages Digital Humanities-related content or research methods.

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

This program requires the completion of four full credits (4 FCEs):
1.0 credit from group 1 (required introductory courses); up to 2.5 credits from group 2 (digital humanities and cross-listed courses); and a minimum of 0.5 credits from group 3 (capstone experiences). Students must take at least 1.0 credit at the 300/400 level.

Students should note that some courses at the 200, 300, and 400 levels may have additional prerequisites.
Woodsworth College Courses

Not all courses are offered every year. Please check the timetable for current course offerings and enrolment restrictions/conditions. Students without course prerequisites may be removed at any time they are discovered. Course descriptions, prerequisites, corequisites and exclusions are listed below.

WDW196H1 - From Rayguns to Light Sabers: Science Fiction in Contemporary Culture

Previous Course Number: CCR199Y1
Hours: 24S

This course examines science fiction as pop culture genre, media industry, and sociocultural phenomenon, with attention to some of its key themes, its important texts, creators, and audiences, and its place in contemporary culture. We will study some works chosen by the class as well as by the instructor. Restricted to first-year students. Not eligible for CR/NCR option.

Exclusion: ANT195H1, VIC137H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

WDW197H1 - Jane Austen on Film

Hours: 24S

In the 21st century, Jane Austen’s early 19th-century novels of love and marriage are increasingly experienced through retellings and updateings in theatrical and made-for-television movies. The course will examine highlights from the last 25 years of Austen adaptations for what they can tell us about relationships in our time, including how Austen’s stories are rewritten to please a modern audience. Films in the course will include works from 1995 to 2016 (from 1995, Clueless, Austen’s Emma retold as a Hollywood high school comedy and starring Alicia Silverstone; and Sense and Sensibility, for which Emma Thompson’s screenplay won an Academy Award; and from 2016, the Hallmark Channel’s Unleashing Mr. Darcy, Austen’s Pride and Prejudice transferred to the present-day dog show circuit; and writer/director Whit Stillman’s Love and Friendship, the first-ever film version of Austen’s Lady Susan). Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

WDW198H1 - There and Back Again: Exploring Tolkien

Hours: 24S

Since the mid-twentieth century, J.R.R. Tolkien’s The Hobbit and The Lord of the Rings have become classics of children’s and fantasy literature. In this course, we read Tolkien’s The Lord of the Rings and investigate the world-building and imagined history that lies behind the books. We trace how Tolkien’s own life experience informed his work—he experiences as a soldier of the Great War and a civilian during World War Two; as a scholar of medieval language and literature, and of fairy tales; as a Catholic thinker; and as a lover of nature and the past. We also survey the afterlife of the novels in fantasy, film, and the popular imagination. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)
WDW199H1 - Indigenous Knowledge and Storytelling in Toronto

Hours: 12T/24S

The land now known as Toronto has a 13,000+ year old history of Indigenous presence that is still unfolding. This history is inscribed in the land – it is visible in the geographical features, place names, and contemporary urban form of the city and is represented through stories (oral and written) told by diverse members of Toronto’s Indigenous community. This course engages with stories of Indigenous history and presence in Toronto through a selection of Indigenous literary works about Toronto, Indigenous guest speakers, and a series of experiential Indigenous storytelling tours of significant locations across the city. Students will be introduced to Indigenous worldviews and ways of knowing and will learn why storytelling remains a significant and culturally-appropriate means for keeping and sharing land-based Indigenous Knowledge. Students will gain a deeper appreciation of the city as a traditional Indigenous territory and will reflect on their own relationships and responsibilities within these lands. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

WDW150H1 - Order and Disorder II: Problems and Solutions

Hours: 16T/24S

Building on the questions and theoretical perspectives discussed in WDW151H1, this interdisciplinary seminar introduces students to some of the methods used by scholars and researchers in sociology, political science, philosophy, and history to develop, test, and debate possible solutions to the problems of social order and disorder. Restricted to first-year students. Not eligible for CR/NCR option.

Prerequisite: WDW151H1 or permission of the Woodsworth One Program Coordinator
Exclusion: INI One, MUN One, NEW One, SMC One, TRN One, UNI One, VIC One, WDW153H1, WDW154H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

WDW153H1 - Popular Culture Today I: Issues and Perspectives

Hours: 16T/24S

Popular culture, which might best be defined as culture about everyone, by everyone, and for everyone, is an increasingly important part of life. This interdisciplinary seminar examines from multiple perspectives its impact as art movement, agent of social change, and universal language of the digital age. Restricted to first-year students. Not eligible for CR/NCR option.

Exclusion: INI One, MUN One, NEW One, SMC One, TRN One, UNI One, VIC One, WDW151H1, WDW152H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

WDW154H1 - Popular Culture Today II: Special Topics

Hours: 16T/24S

Building on the general introduction to the subject provided by WDW153H1, this interdisciplinary seminar examines one major area of popular culture in greater depth: popular music, genre fiction, online culture, etc. The focus will be different each year, and in some years more than one option may be available. Restricted to first-year students. Not eligible for CR/NCR option.

Prerequisite: WDW153H1 or permission of the Woodsworth One Program Coordinator
Exclusion: INI One, MUN One, NEW One, SMC One, TRN One, UNI One, VIC One, WDW151H1, WDW152H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)
Digital Humanities

WDW235H1 - Introduction to Digital Humanities

Hours: 24L/12P

Digital Humanities (DH) studies human culture -- art, literature, history, geography, religion -- using computational tools and methodologies, and at the same time studies digital technologies and communities through humanist lenses, as complex cultural objects shaped by wider social and political concerns and the ways we construct knowledge and meaning.

Prerequisite: 4 FCEs at the 100 level, at least 1 FCE of which must be in Humanities
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

WDW236H1 - Virtual Worlds: Introduction to Spatial Digital Humanities

Hours: 24L/12P

A Digital Humanities perspective on the virtual worlds in which we are increasingly immersed, from scholarly digital archives to video games. We study the theory and methods of geospatial humanities research and explore the technical and cultural implications of computer vision, augmented reality, the Internet of Things, and 3D printing.

Prerequisite: WDW235H1 orpermission of the Program Coordinator
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

WDW335H1 - From Book to Map to Video Game: Texts and their Digital Transformations

Hours: 24L/12P

An examination of the new forms of storytelling made possible by digital media from two perspectives, that of the maker and that of the scholarly reader. Students learn to critically analyze storytelling in new media and experiment with their own adaptations of a literary text to various digital platforms.

Prerequisite: WDW235H1 and WDW236H1; open to students not taking the Digital Humanities Minor by permission of the program coordinator.
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

WDW336H1 - Research and Writing in Digital Humanities

Hours: 24L

This course explores the future of digital humanities from two perspectives. We will examine some successful contributions to the humanities employing digital technology, and also look at some critical assessments of digital technology’s impact on humanistic studies. Students will then develop and report on their own digital humanities research projects.

Prerequisite: WDW235H1 and WDW236H1, or permission of the program coordinator.
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

WDW337H1 - Historical Archives in the Digital Age

Hours: 24L/12P

How do digital surrogates of texts and objects change how we use them? This course examines texts and archives in the digital age: the aims of building them; the new scholarly approaches that they enable; the preservation, access, and equity questions that they raise and require us to answer responsibly.

Prerequisite: WDW235H1 and WDW236H1; open to students not taking the Digital Humanities Minor by permission of the program coordinator.
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

WDW338H1 - Data: Access, Creation, Curation, and Interpretation

Hours: 24L/12P

A central challenge of digital humanities is the complexity of representing interpretive, narrative, and perspective-dependent humanities data through digital tools and environments. Topics include the history of “data” as term and concept; data standards, databases, and linked data; datasets, data curation and analytics, both qualitative and quantitative; and data visualization.

Prerequisite: WDW235H1 and WDW236H1; open to students not taking the Digital Humanities Minor by permission of the program coordinator.
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)
WDW435H1 - The Internet Archive

Hours: 24L/12P

Digital environments change how knowledge is created, communicated, and used. Using the Internet Archive as case study, this course examines the significance of such changes from a variety of perspectives: knowledge representation; technical infrastructure; gender, class, and race issues; disability rights; intellectual property questions; and algorithmic and interpretive scholarly approaches.

Prerequisite: WDW235H1 and WDW236H1 plus at least 1.0 additional FCE in the Digital Humanities Minor program; open to students not taking the Digital Humanities Minor by permission of the program coordinator.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

Other Woodsworth Courses

WDW295Y0 - Special Topics Abroad

Hours: 48L

Course description varies each year. Please see the Summer Abroad website for course details. Not eligible for CR/NCR.

Exclusion: RSM295Y0

WDW299Y1 - Research Opportunity Program

Credit course for supervised participation in faculty research project. Details at https://www.artsci.utoronto.ca/current/academics/research-opportunities/research-opportunities-program. Not eligible for CR/NCR option.

Distribution Requirements: Social Science

WDW399Y1 - Research Opportunity Program

Credit course for supervised participation in faculty research project. Details at https://www.artsci.utoronto.ca/current/academics/research-opportunities/research-opportunities-program. Not eligible for CR/NCR option.

WDW436H1 - Topics in Digital Humanities

Hours: 24L/12P

This course serves as a capstone for the Digital Humanities Minor program. It includes opportunities for students to conduct original research. The topics for this course will vary from year to year.

Prerequisite: WDW235H1 and WDW236H1, plus at least 1.0 additional FCE in the Digital Humanities Minor program.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

WDW437H1 - Research Projects in Digital Humanities

This course is for students who wish to pursue a significant research project, usually participation in a faculty-led DH research project, though it may take other forms. Students must be enrolled in the DH Minor program or obtain special permission of the program coordinator.

Prerequisite: WDW235H1 and WDW236H1, plus at least 1.0 additional FCE in the Digital Humanities Minor program.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)
Writing in the Faculty of Arts & Science

The ability to think critically and to write well-organized, clear, grammatical prose is important to your work in Arts and Science courses. It will also improve your chances if you apply to graduate or professional schools and will give you an advantage in the workplace. To help you develop your writing skills, Arts and Science provides a range of instructional resources.

NOTE: For courses in creative writing, see entries under "English" (ENG), "Innis College" (INI), and "Victoria" (VIC) in this Calendar.

Courses

Departments and programs integrate writing instruction into many of their courses, and some offer courses that concentrate on communication in their disciplines. Check the course listings by department.

Your course instructors and teaching assistants will provide guidelines for written assignments. They will often offer instruction in class and give you the opportunity to ask questions before assignments are due. You may ask them to discuss work that has been graded and returned to you.

In addition, the university offers several courses in writing effective essays:

- **ENG100H1** (Effective Writing) is listed under “English” in this Calendar
- **JE1206H1** (Writing English Essays) is listed under “English” and “Innis College”

Innis College’s Minor Program in Writing and Rhetoric offers an array of courses that explore the worlds of oral, written, and online discourse. Rhetoric courses focus on how persuasion circulates in society, while writing courses teach students how to employ rhetoric and to write well in the modes, genres, and styles appropriate to particular disciplinary, institutional, and creative contexts. Visit course listings under Innis College in this Calendar.

Victoria College offers a minor program called Creative Expression and Society. It has two components: (1) workshop-style courses allowing students to develop skills in creative expression and communication, and (2) courses encouraging students to analyze the relationship between creative arts and society. Visit course listings under Victoria College in this Calendar.

Trinity College offers the course **TRN478H1** (Science Writing for Non-Scientific Audiences). It focuses on a diversity of non-scientific audiences and writing styles.

The University of Toronto at Mississauga (UTM) offers a major and minor program in Professional Writing and Communication. The University of Toronto at Scarborough (UTSC) offers a major and minor program in Creative Writing. Consult with your college registrar about taking courses at either campus, and see the UTM and UTSC calendars for more detail about courses offerings.

English Language Learning Opportunities

The English Language Learning (ELL) Program offers undergraduates in Arts and Science a variety of ways to develop both oral and written communication. Intensive non-credit mini-courses are offered during fall and winter reading weeks and during the summer. During the fall and winter terms, programming includes free drop-in workshops using a variety of interesting activities to improve speaking, and also an online component for improving academic reading and writing.

Writing Centres

The writing centres at undergraduate colleges will help you develop the writing and critical thinking skills you need throughout your university studies. They offer, free of charge, both group and individual instruction.

Group instruction is offered through both in-course instruction and a series of workshops called Writing Plus. These intensive group workshops help prepare you to meet the expectations of university writing. They cover all stages of writing university papers, from understanding the assignment to revising the final draft. They also provide targeted advice for handling your reading load and the challenges of studying for tests and exams. Special sessions focus on writing admissions statements for graduate and professional programs. Dates and locations are listed online in the Writing Plus section of www.writing.utoronto.ca.

In individual consultations, trained writing instructors help you improve your ability to plan, write, and revise, focussing on course writing assignments of your choice. Instructors are familiar with writing conventions in the whole range of Arts and Science courses; many have specialized training in teaching students whose first language is not English. You are entitled to use the writing centre of the college where you are registered. Most colleges also allow students from other colleges to book appointments for writing assignments in a college program course. All the college writing centres use an online booking system that requires your UTORid for login. More information is available in the Writing Centres section of www.writing.utoronto.ca. Here is a list of Arts and Science writing centres.

- French Department Writing Labs: ask your professor or inquire at 416-926-2302
- Innis College Writing Centre, Rooms 315 and 322
- New College Writing Centre, Wilson Hall, Rooms 2045 and 2047
- Philosophy Department Writing Clinic, Jackman Humanities Building, Room 422.
- St. Michael’s College Writing Centre, Kelly Library, Learning Commons
- Trinity College Writing Centre, Academic Resource Centre, 6 Hoskins Avenue, basement
- University College Writing Centre, Laidlaw Library, Rooms 214, 216, and 218
- Victoria College Writing Centre, Northrop Frye Hall, Rooms 103A and 103B
- Woodsworth College Academic Writing Centre, Room 214

Writing Resources

Campus libraries stock many reference guides for academic writing, some of them online. You will find both general handbooks on style and referencing, and guides on writing in specific disciplines. You can also consult the Advice section of the website Writing at the University of Toronto at www.writing.utoronto.ca. It contains short files addressing common issues in academic writing along with links to other useful online and print resources.

GER460H1 - Advanced Yiddish

Previous Course Number: GER462H1
Hours: 36P

This course conducted entirely in Yiddish focuses on advanced reading, writing, vocabulary and conversation; the study of poetry, short fiction, and memoir literature by leading authors. Selected advanced grammatical topics are presented in conjunction with the study of texts.

Prerequisite: GER360H1
Exclusion: GER462H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

GER463Y1 - Yiddish Language for German Speakers

Hours: 48P

The course is designed as an intensive Yiddish language training. The goal is to teach German speakers to read, write and speak in Yiddish. The curriculum relies on the German language skills of the students, and focuses on differences between Yiddish and German grammar and vocabulary. Upon the completion of the course, students should be able to read Yiddish literary texts with a minimal use of dictionary.

Note: Graduate students can take the course in preparation for their Yiddish competency test.

Prerequisite: Either 3 FCE in German language or fluency in German language.
Exclusion: GER260Y1, GER360H1, GER462H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)
